MODERN HOMES.
Selected Examples of Dwelling Houses.
Described and Illustrated by T. RAFFLES DAVISON, HON. A.R.I.B.A.
With a Foreword by Sir Aston Webb, R.A., and over 300 Illustrations, chiefly from Pen Drawings by the Author.

"A very good selection, including some of the best work by Norman Shaw, Ernest George, Sir Aston Webb, Basil Champneys, T. E. Colcutt, and others. The book is just the volume to put into the hands of a possible client, and will help young architects to realise that houses may be designed with individual artistic character, whatever their size and cost."—Building News.

Royal 4to. 42s. net.

"Messrs. Field and Bunney's book demonstrates how rich England is in dignified small houses. . . The book is one a young architect should have. It would prove a good influence and prevent his running riot."—Manchester Guardian.

Imp. 8vo. 2 vols. 50s. net.

A History of Renaissance Architecture in England (A.D. 1500-1800). By REGINALD BLOMFIELD, M.A. With 150 Illustrations drawn by the Author, and 100 Plates from Photographs and old Prints and Drawings.

"A distinctly valuable addition to any architect's library. . . He has given his treatment of the subject a distinct individuality; his drawings are correct, spirited and detailed, always bright and appreciative, while his writing is entertaining, comprehensive and seldom over-dogmatic."—Building News.

"His book shows wide knowledge of English mediaval work, and he writes with keen enthusiasm for his subject. The breadth of grasp which characterises Mr. Prior's treatment of his subject makes this a book which should be of real value to the student of English Gothic.

THE "PAN" FIRE

(TAYLOR’S PATENT)

Is our latest patent and is designed to meet the demand for a fire with the greatest possible projection into the hearth, and a correspondingly shallow back to enable a greater depth of glazed tiles to be fixed at the sides upon which the light and heat from the fire can be thrown and radiated into the room as in the old fashioned dog-grate, but without its attendant smoky chimney owing to the divergent side flues.

The pan containing the fuel can be sunk level with the hearth or raised as shown.

All parts are exceedingly strong and effective. The ashes are easily removed.
