"Every housewife who practices strict economy puts herself in the ranks of those who serve the Nation."

—President of the United States.
Three Strong Points of Superiority

1st. It contains a larger percentage of milk and less cereal, therefore produces less maltose and is not as sweet as other brands.

This has four advantages:

a—It is more palatable, especially to invalids, who almost invariably object to sweets.

b—It has far less tendency to nauseate.

c—It will not ferment, or cause disturbing gases.

d—It is more soluble.

2nd. By using a lower temperature the BORDEN process preserves the malt enzymes thus affording an aid to further digestion.

3rd. By preserving the activity of the malt ferments when the milk is added, the casein is thoroughly predigested.

A highly nutritive drink for all ages and conditions

Food Values

A balanced ration is that food which keeps the individual 100 per cent efficient mentally and physically. This varies with different people because of their bodily structure, occupation and climatic conditions, but a few facts about food values may prove of assistance to the caterer of the household.

Each meal need not be a balanced one but it is necessary that certain elements, in certain quantities, and in certain combinations should form the daily ration. Protein, starch, sugar, fat, mineral salts, cellulose and water enter into the composition of human food, repairing, energizing and warming the body.

The proteins are the structure builders, therefore are needed for repair work. They form a large part of the grains, the legumes, nuts, cheese, the white of the egg and lean meat. Scientists have found that much less protein is required than is generally consumed by people of meat-eating nations, and that there is danger in eating an excess of protein, as the body has no provision for storing it for future use as it stores the starches in the liver and both the starches and fats in the adipose tissue. Protein not needed for repair work must be burned up in the system and part of the resulting ashes are solids which increase the burdens of the eliminative process and probably have much to do with the causes of rheumatism, etc. On the non-meat ration one is not as likely to overeat of the vegetable proteins because the savoriness of the meat is lacking.

Starches enter into the composition of nearly all vegetable foods. Cereals, breadstuffs and legumes are seventy-
five per cent starch. It is necessary to cook starches well so that the granule may burst its cellulose covering and be ready for the action of the saliva.

The sugar of fruits requires no digestion, but cane and maple sugars need the action of the intestinal juices to prepare them for absorption into the human system.

Fats are of two kinds, those of animal origin such as lard, suet, fat meat, cream, butter and eggs, and the vegetable fats which are found in the various nuts, in olives, and in the grains, especially oats and corn.

The mineral salts form a small part of the food in weight but are very important to the health. These salts are vital in the work of building up the bones, contribute to the fluids of the body and stimulate the nerve action. Salts are found in the cereals, a small amount in vegetables, and in most fruits. In cooking vegetables a small quantity of water should be used and the water preserved so that all the valuable salts may be retained.

Cellulose represents the great bulk of all vegetables and fruits. Only thirty per cent of it is digested, but is necessary because it gives bulk to the food thus assisting in the work of the intestines. It is also valuable in that it helps to satisfy the appetite, thus keeping us from eating an excess of proteins or starches.

The vitamins are as yet only vaguely understood, but it has been clearly shown that such substances exist in fresh uncooked food and that much of their value may be destroyed by certain cooking processes. Canned foods have lost some of them and highly prepared cereals lack them. This can be made up by always serving some uncooked vegetable or raw fruit daily.

Pure milk, which is not refined and from which nothing is removed, is in itself a very valuable food. The raisin is almost a complete food. There is a deficiency in protein
but it is rich in all the organic salts, and cooked with breakfast cereals, bread or muffins it is of great value.

The calorie value of food must also be taken into consideration. The term calorie is used to express the fuel value of foods. Starches, sugars and fats are the food elements which serve as the body's fuel. Science has discovered that man's needs vary from that of the average business man at 2,500 calories a day to that of the man engaged in an occupation requiring great physical strength at 5,000 calories. It is well to know that of all meats pork has the greatest fuel value in most of its cuts. Mutton, beef, lamb and veal are of fuel value in the order named. Goose has over four times the calorie value of chicken, and twice that of any other fowl. Even meat soups have very little fuel value, but vegetable soups are rich in mineral salts. Fish, with the exception of salmon, is low; eggs are not high; butter is very high; oysters and shellfish are very low. All flours, meals and cereals are high, oatmeal ranking highest. Most vegetables and fruits are low, but nuts are high. Sugar, honey and chocolate are extremely high.

The question of food combinations is highly important because it has been determined that all foods give rise either to acids or bases, and that the acids should be counteracted by a sufficient quantity of bases or alkalis to neutralize them. The acid-forming foods are the starches, the fats, animal proteins, and all sugars except honey and fruit sugars. The alkali foods are the fresh vegetables except the starchy ones, most fruits, especially those which are strong in mineral salts, milk and barley.

Therefore the balanced ration means that combination of foods in which the acids are entirely balanced by the alkalis and a selection of such foods as will furnish the proper amount of protein for the repair work, and will have the required calorie or energy making value, and the mineral matter necessary in regulating the body processes.
The following simple menus, which are planned for one person, meet the above requirements:

**BREAKFAST**

One apple, banana or orange; three-fourths of a cup of cooked cereal; one-fourth cup of cream; two teaspoons of sugar; one slice of bread; one square of butter; one egg or two ounces of meat, fish or poultry.

**DINNER**

One-fourth pound of meat or other protein food; one medium-sized potato; three ounces of another vegetable (non-starchy); several stalks of celery; one slice of bread; one square of butter; one portion of steamed apple or other fruit pudding, with sauce.

**SUPPER**

One portion of a creamed dish; one serving of rice; one slice of bread; one square of butter; one large slice of cake, with frosting.

Drying Fruits and Vegetables

Drying is the oldest method of preserving vegetables, fruits and meats.

It stops decay in its early stages and prevents it later on. It should be done at a very low temperature, as flavors and odors pass off and volatilize at even moderate temperature. Therefore, properly dehydrated fruits and vegetables retain all the vitamins, minerals, and other good qualities of fresh food, as well as imprisoning their delicate flavor and fine bouquet.

Articles to be dried must be clean and fresh. Scrub vegetables and prepare. If a steel knife is used it must be clean and bright. Slice evenly, in the case of large fruits and vegetables. Vegetables should be blanched, using the same method as for cold pack canning. The blanching time for green, lima and string beans is six to ten minutes; peas, six minutes; corn on cob, five to ten minutes; spinach, parsley and other herbs, four to six minutes. Remove from cold water and dry between cloths or by exposure to the air for a few minutes before placing in drier. Any green vegetable can be dried. There are different methods of drying: sun, electric fan, oven, with open door, and on a tray over hot air. The essentials are a good circulation of clean air, and a temperature of between 110 and 145 degrees. Begin with a low temperature and increase gradually. In the case of delicate fruits the temperature should go no higher than 120 degrees. Dry fruits on a cloth, as they should not come in contact with metal, and will stick to paper. It is impossible to give accurate figures as to the length of time it will take. When dry pieces will be
leathery and pliable. In drying corn, which is the hardest of all vegetables to can, Dr. Gore of the U. S. Bureau of Chemistry says: “Only very young and tender corn should be used for drying, and should be prepared immediately after gathering. Cook in boiling water, two to five minutes, long enough to set the milk. Cut kernels from cob with sharp knife, taking care not to cut pieces off cob. Spread thinly on trays, and place in position to dry; stir occasionally.” If corn is put into a thin boiling syrup, after being cut from cob, then dipped out and spread to dry, it is much improved. All food must be stirred or turned occasionally while drying.

The storage place of dried foods must be dry. To keep well, all products should be “conditioned” for a few days after leaving drier, and returned to drier if found to be moist. “Conditioning” consists in pouring from one container to another at intervals during three or four days.

Cold Pack Canning

Cold Pack Canning Is the Result of an Effort to Standardize Recipes

Required: A clean wash boiler or new galvanized can with close-fitting cover.
A wooden rack to fit the bottom of boiler, to keep jars from touching the bottom and to allow for circulation.
Wire frames to hold jars. A frame to hold a single jar is most convenient. A lifter or wire potato masher to lift jars from boiler.
No special type of jar is required.
Rubbers must be new and covers perfect.
Boil old tops in baking soda and water before putting away, and in vinegar before using again.
Wash all fruits and vegetables thoroughly. Be sure they are clean and fresh.
Blanch vegetables by putting in colander, wire basket or cheesecloth bag, immerse in boiling water, closely covered, the required number of minutes. Then dip in cold water.
Sterilize jars, rubbers and tops by boiling for five minutes.
Stand jars in hot water while filling. Be sure there is no draft, it will crack the jars.
Pack jars and finish filling with hot water and seasoning, except for tomatoes and fruit.
Tomatoes should not have water added, fill jars completely with juice, season with salt.
Fill fruit jars with thin, medium or thick syrup, as desired. A thin syrup is made by boiling three quarts of water with one pound sugar for ten minutes. A heavy
syrup is made by boiling three and a half quarts water with two pounds sugar. Do not waste by allowing it to overflow the cans.

Place rubbers and tops in position. Screw tops on tight, then turn back one-quarter round to loosen. Tightly screwed covers will crack jars. Fill boiler with water enough to cover jars at least two inches. Place jars on rack before water is too hot.

Do not begin to count time until water boils hard, and keep it boiling hard for the required time. Then remove jars.

Tighten covers and examine for leaks. Invert jars. Cover with dry towel to avoid draft.

If leaks are found change rubbers and boil again for ten minutes. Wrap jar in paper and store in a cool, dry place.

**TIME-TABLE FOR BLANCHING AND STERILIZING**

Blanch apricots, peaches, citrus fruits, apples and pears from one to two minutes, to remove skins easily. Other fruits require no blanching. Spinach and all greens should be blanched from ten to fifteen minutes; tomatoes, two minutes; corn on cob, eight minutes; asparagus, two to four minutes; beets, six minutes; lima or string beans or peas, five minutes. All fruits are cooked in the sterilizer sixteen minutes after the water begins to boil hard, except apples and pears, twenty minutes, and pineapples, thirty minutes. The time for asparagus and beets is one and one-half hours; spinach, beans and peas, two hours; corn, three hours; tomatoes, twenty-two minutes.

SOUPS AND CHOWDERS

OYSTER BISQUE

One quart oysters, one quart milk, one small cup cracker crumbs, one tablespoon butter, rubbed into one teaspoon cornstarch, pepper and salt. Drain oysters, chop fine, heat juice, add chopped oysters, boil three minutes, put through sieve. Heat milk in double boiler, add crumbs, cornstarch and seasoning, lastly the oyster soup.

MRS. E. T. COOKE.

TOMATO BOUILLON

One can tomatoes, one cup water, twelve peppercorns, bit of bay leaf, four cloves, two teaspoons sugar, one onion sliced. Cook twenty minutes. Strain and add one teaspoon salt, and one-eighth teaspoon soda (be careful not to get too much soda). In another dish cook two tablespoonfuls butter, and three level tablespoons flour. Then pour the liquid on the roux slowly.

MRS. J. M. COEN.

CORN CHOWDER

One-quarter pound salt pork in thick slice, cut and fried with two medium onions until nicely browned. Add three medium sized potatoes, or one pint cubed, cover with water, just enough to cook the potatoes until they are almost done, not soft. The water must be nearly ab-
sorbed. Add one quart of new milk and one can of corn, or one quart green corn. Let boil five minutes, serve with crackers; season well, or to taste, with salt and pepper.

_MRS. MARTIN MADSON._

**FISH CHOWDER**

Parboil a good sized fish (pike is preferable) in fresh water and remove the bones, slice an equal quantity of potatoes. Put chopped salt pork in the bottom of the kettle, and fry brown; cover with successive layers of fish, potatoes and milk crackers until the kettle is nearly full. Add enough water to boil the whole for thirty minutes.

_MRS. MARTIN MADSON._

**BAKED CUSTARD FOR SOUP**

Three eggs, one pint milk; season with white pepper, salt, chopped parsley, Worcestershire sauce. Bake in oven and when ready, cool, cut in cubes, and serve in hot bouillon.

_MRS. CHARLES J. TONK._

**FARINA DUMPLINGS FOR SOUP**

Put one-half pint milk and one ounce butter to boil. Sift into it two ounces farina, stirring constantly. It must be stirred until the whole mass has been loosened from the stew pan. Remove from the fire, let cool a little, then beat in, one at a time, the yolks of two eggs, season with salt and a grate of nutmeg. Stir in the well-beaten whites by means of a teaspoon which must first be dipped into the boiling broth; cut into oblong dumplings and drop into the boiling broth, cover and boil ten minutes.

_MRS. J. B. MEYER._
SOUP BALLS

These are nice with any clear soup. Rub one tablespoon butter to a cream and mix with the yolk of one egg; add one-quarter teaspoon each of salt and nutmeg, one teaspoon chopped parsley, three tablespoons grated bread crumbs, and the stiffly beaten white of the egg. Form into balls and boil seven minutes in the soup. This will make ten balls.

Mrs. Martin Madson.

HUNGARIAN BUTTERNOCKERLNN

Large beef rump bone, two pounds lean mutton. Wash thoroughly, and put over a slow fire with sufficient cold water to cover, cook slowly until meat is ready to fall to pieces, strain and set aside to cool. When cold remove the grease (which, being part suet, makes good shortening to mix with butter for cookies, the meat is good for hash). Heat the broth and when boiling, drop in dumplings, made as follows: one teaspoon butter creamed very light, break in one egg and beat thoroughly, then gently stir in cracker crumbs sufficient to make light dumplings, being very careful not to make them too stiff; salt to taste. Separate this into three parts, grating a little nutmeg over each. Boil five minutes.

Mrs. E. T. Cooke.

CREAM SOUP

Any beans or peas cooked until tender with a bit of onion to flavor, and mashed through a colander. To each cup pulp add three cups hot milk, salt and oil or cream to season. Thoroughly beat in an egg the last thing. Serve hot.

Mrs. E. T. Cooke.
CREAM OF CORN SOUP

One can corn, one-half teaspoon sugar, one slice bacon, one small onion, one carrot, one cup cream, one pint milk, pepper and salt. Boil corn, carrot, sugar, bacon and onion down in one pint water. When soft, put through strainer and add to cream, milk, pepper and salt. Boil about three minutes.

MRS. JAMES W. BUELL.

OX-TAIL SOUP

Two ox-tails, one large onion, one tablespoon salt, one tablespoon mixed herbs, four cloves, four peppercorns, one tablespoon beef drippings, four quarts cold water. Wash and cut up the ox-tails, separating them at the joints. Cut the onion fine and fry in the hot beef drippings. When slightly browned, draw the onion to one side of the pan, and brown half of the ox-tails. Put the fried onion and ox-tails in the soup kettle, and cover with four quarts of cold water. Tie cloves, peppercorns and herbs in a small piece of strainer cloth, and add them to the soup. Add the salt, and simmer three or four hours. Select some of the nicest joints to serve with the soup. Skim off fat, strain, and serve very hot. If vegetables are served with the soup, chop fine or in fancy shapes one pint of mixed vegetables and boil twenty minutes or until tender.

MRS. JOSEPH FRANK.

POTATO SOUP

One scant cup mashed potato, one pint milk, one teaspoon chopped onion, one-half teaspoon salt, one-half teaspoon celery salt, one tablespoon butter, one tablespoon
flour. Boil onion in milk, add flour, potato and seasoning. Let it come to a boil.

Mrs. J. Henry Truman.

SOUP STOCK

Take clean, lean meat, put in cold water; one quart of water to one pound of meat. Heat gradually to the boiling point; simmer slowly seven or eight hours. Season with pepper and salt; cool, skim, strain and set away. This makes a foundation for any kind of soup.

Mrs. Martin Madson.

SPLIT PEA SOUP

One ham bone, one carrot, one onion, one pint split peas. Soak the peas over night, and in the morning put on to cook with the ham bone, the carrot and onion sliced, and two quarts of water. Simmer for three hours, then pass through a puree sieve, season with salt and pepper. It is good just this way, but is greatly improved by the addition of a pint of milk, and when served at luncheon in bouillon cups, a spoonful of whipped cream, and a sprinkle of chopped parsley add to taste and appearance.

Mrs. S. D. Snow.

VEGETABLE SOUP

One large beef soup bone, one medium soup bone (veal), three or four onions, bunch parsley, English and German celery, leek, one or two parsnips, string beans and carrots. Scrub and dice vegetables but do not peel. Cook over slow fire several hours. Skim off fat after it cools. Strain and add one can Campbell’s tomato soup, and a dash of Worcestershire sauce. Heat and serve.

Mrs. Geo. J. Haas.
FISH AND SHELLFISH

BAKED CODFISH

One box codfish, six large potatoes. Soak codfish about three hours. Boil potatoes. Mash potatoes and codfish well together with one large lump butter, one pint hot milk, one egg. Beat all until light. Bake about forty minutes. Pour melted butter over. Cover with chopped hard boiled eggs.

MRS. BRADLEY BUELL.

CODFISH BALLS

One cup codfish cut fine, two cups raw potatoes cut small. Boil together until done. Drain and mash together. Have ready three eggs beaten light, add to mixture, beat all together, dip out with spoon and fry in hot lard a nice brown. Excellent.

MRS. W. P. DUNN.

CRAB FLAKES, LE GUERE

One cup crab flakes, one level tablespoon butter, one level tablespoon flour, one cup milk, one tablespoon chopped pimento or green pepper, one egg hard boiled and chopped, salt and paprika. Cook all together about fifteen minutes, saving the yolk of the egg to be grated over the top when served.

MRS. D. C. PRESCOTT.
BOILED FISH

A square piece of halibut or salmon, weighing about two pounds, a piece near the tail is good. After washing carefully, place on perforated plate, and tie around it a cloth or string, with which to lift it out of the water. Have salted water simmering in kettle large enough to hold the plate, and cover the fish. Put in fish and simmer, uncovered, for half an hour. Take out, drain and serve on hot platter, with egg sauce.

Egg Sauce—One pint milk, scald in double boiler. Beat two eggs in pint bowl, with one-half teaspoon salt. Pour the scalding milk over, beat well, and return to boiler. Cook till it coats the spoon. One or two hard boiled eggs chopped, and stirred in carefully just before serving is an addition. Serve in gravy boat, powdered liberally with paprika. If any is left over, free the fish from skin and bones, flake, and add to the sauce, place in baking dish, or ramekins, cover with browned crumbs, and heat through in oven.

Mrs. S. D. Snow.

BAKED HALIBUT

Place slices of halibut steak in pan, season with salt and pepper, cover with bread or toast crumbs, put a small lump of butter on each piece and pour in milk so as to fill even with top of fish, but do not disturb bread crumbs. Bake one hour.

Miss Van Meenen.

HORSE RADISH SAUCE FOR BOILED PIKE OR MUSKALLONGE

No. 1

Grate one fresh horse radish root, add one level tablespoon sugar, one and one-half tablespoons vinegar, one
bottle whipping cream (not whipped). Serve with drawn butter.

Mrs. Charles J. Tonk.

HORSE RADISH SAUCE
No. 2

Whip sweet or sour cream until stiff, season well with salt, and stir thick with grated horse radish. Chill or freeze, and serve with cold or hot meats or fish.

Mrs. S. D. Snow.

OYSTERS WITH MUSHROOMS

One cup rich hot milk, one tablespoon butter, two teaspoons parsley, chopped, one teaspoon onion juice, one-half cup mushrooms, one teaspoon flour, one pint oysters, salt and pepper. Cook flour in one-half of the butter, and add hot milk. Boil until creamy and add the seasoning, onion juice, chopped parsley, and the remainder of the butter. Canned mushrooms added, and set over hot water ten minutes (if fresh, wash in cold water, drain, and simmer for ten minutes in the cream sauce). Five minutes before serving, add oysters which have been washed and drained. When oysters curl, they are done. Use double boiler for this dish, as it scorches easily.

Miss Allie F. Armstrong.

SCALLOPED OYSTERS

MAYONNAISE
No. 1
It is not necessary to have ingredients very cold. They should be cool, but must all be of the same temperature. The same rule applies in keeping it. Mayonnaise will keep well without separating if the bowl is closely covered, and kept cool, without change of temperature. It will then keep perfectly two weeks or longer, and can be used as a base for many sauces and dressings. Yolk of one egg, one pint of oil, vinegar to thin, one teaspoon each salt and dry mustard, sprinkle of cayenne. Put dry yolk in a bowl, beat with egg
beater, add oil a drop at a time at first, thin with vinegar as necessary; beat in seasonings toward the end.

SANDWICHES AND SANDWICH FILLINGS

DEVILED OLIVES

One small bottle of olives chopped very fine, four tablespoons salad dressing, two tablespoons rolled cracker crumbs, mix well together. Let stand one hour, then spread between thin layers of bread. This will make twenty-five sandwiches.

MRS. MARTIN MADSON.

PEPPER AND NUT SANDWICHES

Spread a number of slices of bread, cut thin and without crust, with butter, and an equal number with the following mixture: Two finely chopped green peppers, and one-quarter pound pecans; add a little salt and bind together with mayonnaise. Place leaf lettuce on buttered slices, and the mixture on lettuce.

MRS. E. M. LANDIS.

SANDWICH FILLINGS

Materials for all sandwiches must be of the best, and seasoning can be a little higher than if the filling were served separately. Sandwiches can be kept a few hours by wrapping first in waxed paper, then in a damp cloth. Keep in a cool place.

Cucumber and sardine sandwiches: Remove skin and take out bones of sardines, rub to a paste, season lightly with celery salt, and moisten very slightly with mayonnaise. Cut crust from rye bread, spread with butter which
has been rubbed to a cream and seasoned very lightly with celery salt, pepper and a little curry powder; cover this with the sardine paste, and lay on top some thin, crisp rounds of sliced cucumber. For open sandwiches, the cucumber can be chopped fine, drained dry, and a thin layer placed on top. This is an English filling.

Lemon cream filling: Beat to a cream one tablespoon butter and two tablespoons brown sugar, flavor with lemon juice and a little grated nutmeg. Spread on thinly sliced brown bread.

Stuffed rolls: Cut off the tops, scoop out the inside, and fill the cavity with creamed meat, fish or fowl, or mince any of these with mayonnaise. Creamed, chopped oysters, seasoned with celery or onion salt, make a good filling.

Fresh lady fingers separated and spread with cake frosting, jelly, or a cream filling made by rubbing to a paste one tablespoon butter, two tablespoons powdered sugar, and chopped nuts or candied fruit. Cake sliced and made into sandwiches with these fillings is easy to pack.

All leftovers of salads, scrambled eggs, cheese, vegetables and meat can be used for sandwich fillings.

Fancy butter for sandwiches: Beat one-quarter pound butter to a cream, mix in one-half cup stiffly beaten cream, season lightly with mustard, salt, and a dash of cayenne. This will keep two weeks in a cool place. Butter for sandwiches is always better if beaten to a cream.

MRS. S. D. SNOW.

This recipe is at least one hundred and fifty years old. Except for the modern yeast cake, it is just as Great Grandmother made it. It is better after a few days. Nine cups flour, four cups sugar, three cups butter, one and one-half large yeast cakes (one cup home made yeast), two eggs, one pint milk, one teaspoon saleratus, one wineglass brandy, one grated nutmeg, enough raisins, currants, chopped citron, lemon and orange peel to make three-quarters of a pound. Cream butter, add sugar gradually, blend well. Take one-half this mixture, add to it one-half the flour, well sifted; heat milk, when lukewarm, dissolve yeast in it, add, and beat all well. Set to rise in warm place, well covered for seven or eight hours. Then add the remainder of the butter and sugar, soda dissolved in a little water, one-quarter teaspoon salt, the eggs, beaten till light, nutmeg, brandy and the remainder of the sifted flour, then floured fruit. Grease three large bread tins, put one-third of the mixture into each, set to rise again in a warm place, for two or three hours, and bake like bread. Very good and a little different.

BAKED INDIAN PUDDING
(Home Defense Pudding)

This is a very old recipe, handed down from Puritan ancestors. One-half cup Indian meal, one and one-half pints rich milk; boil together over a low fire, seasoning with salt and stirring constantly for about twenty minutes. First heat a little of the milk, add meal and salt, cook till thick, and add the remainder of the milk gradually as it thickens. Take from fire and stir in a large cooking spoonful lard, one teaspoon each ground cinnamon and ginger. Break two eggs in a half-pint cup, beat, and fill cup to the brim with New Orleans molasses. Turn this into the seasoned meal and beat well. Grease a baking dish, pour in mixture and bake, covered, in not too hot an oven for three-quarters of an hour, uncover and brown. This swells a little in baking. It is equally good warmed over. Mix with milk, and brown again in oven. A plain butter and sugar sauce, one tablespoon soft butter to three of powdered sugar, beaten to a cream, is best with this pudding.

Place over fire in double boiler and cook until mixture
thickens, stirring constantly. Take from fire, continue beating till cool and light, and then flavor. When quite cold add cream whipped very stiff. Put in mold and pack in ice and salt for four hours. Baking powder cans make good molds for this purpose. Grease the edge of the opening with lard (not butter on account of the salt) and put one or two layers of paraffin paper over the top before putting the cover on the mold. This is to keep the salt water out of the cream while it is packed.

Mrs. George Campbell.

Prick a hole in the large end of each of six eggs, let the whites run out into a bowl, then the yolks can easily be drained into another bowl. These can be used for cake and salad dressing. Wash egg shells in cold water and drain, set them upright in anything that will hold them level, pour in the slightly stiffened mixture by means of an oiled paper funnel, and set in a cold place. Soak one-quarter box of gelatine in one-quarter cup water, add half a cup of boiling water, one-half cup sugar, the juice of a lemon and one cup orange juice. (Before squeezing oranges wash skins and peel off thin outside skin, to be used for
straws for the nest.) Strain the orange gelatine into a round or oval glass dish, invert a large cup or bowl in the center, set in cold place. When ready to serve, break egg shells carefully, take cup from center of jelly, lay in the eggs, scatter candied orange straws and flecks of whipped cream, to represent feathers. MINT JELLY

A day or two before making this jelly, gather enough fresh mint to fill without crowding, when stripped from the stems, a quart fruit jar. Wash mint thoroughly, dry on cloth to remove surplus moisture, strip from stems, and put into jar. Heat one-half cup strong vinegar to boiling, and pour over leaves. Seal jar, and set away in a dark place for a day or two. Use for the jelly one-half peck apples, Maiden’s Blush is a good variety. Make a stiff apple jelly, using as much sugar as juice. While this is cooking, strain the mint flavored vinegar through a cloth, squeezing hard, and pour the vinegar into the boiling jelly. It should not be necessary to cook it much longer; boiling injures the flavor. Have ready some green candy coloring, color a delicate green. Remove from the fire and pour into glasses, allow to set, and seal with paraffin as any other jelly. Delicious with roast lamb, or any cold meats. Serve very cold.

MRS. S. D. SNOW.

Measure one bowl of sugar for each bowl of pulp, and cook one hour or more, until of the consistency of jelly. Stir almost constantly to keep from burning. Better cook in several kettles, or small quantity at a time, as it will jelly much easier. This makes about twenty-four jelly glasses. By straining, jelly can be made.

Use only the white portion of the watermelon rind, rejecting both the green and pink parts. After the green rind is peeled off, weigh the white part, and to each seven pounds allow four pounds white sugar, a pint of vinegar, two teaspoons allspice, two of cinnamon, one teaspoon cloves, one teaspoon ginger, and half a teaspoon ground
mace. Mix all the spices together, divide them into four parts, and tie each part into a piece of cheesecloth. Add milk and butter to crumbs, soak until crumbs are soft; add eggs well beaten, flour, salt and baking powder sifted. Cook as other griddle cakes.

Beat all together with egg beater until the whole mixture is smooth. Season with salt and pepper and cook in the usual fashion.

Miss Allie F. Armstrong.

CHEESE STRAWS

These can be made from left-overs—dry American cheese, and pie crust left over from making a pie. Grate the cheese, and season rather highly with salt and a few grains of cayenne. Roll the pie crust out thin, sprinkle thickly with grated cheese, roll up like a jelly roll, pat flat with the rolling pin, roll out again, sprinkle with more cheese, and repeat until impossible to manipulate the dough.
Roll out about a half inch thick, and cut with a silver knife into strips about four inches long and one-half inch wide. Lay these in pans, and bake in not too hot an oven, as they burn easily. Serve with salad.

Cook this mixture in double boiler until quite thick, then add chicken and one cup mushrooms. CORNED BEEF HASH

To twice the quantity of corned beef add half the amount each of potatoes and beets, all of which have been cooked and turned through the grinder. Add cold water enough to moisten well and place in a skillet over a slow fire. Stir frequently to prevent a crust forming, since beets become bitter when browned. Serve on hot platter.

Mrs. F. H. Gansbergen.
CURRY

Put two tablespoons of butter or dripping in skillet or frying pan. Add one small onion, cut up fine, one small sour apple, cut up fine. Cook tender. Add one level teaspoon of curry powder, mix. Add one and one-half cups water, stir till cooked smooth. If too thick, add more water, season with salt. Then add a pint or less of chopped meat, cook for five minutes. Serve in border of boiled rice.  

MRS. LOUIS J. HOTCHKISS.

ESCALOPE ROYALE

Eight hard-boiled eggs, separate whites and yolks, one pound of cold boiled ham, ground. Four soda crackers or same amount of bread crumbs. Make a cream sauce of one pint cream, one pint milk, little butter and flour to thicken. Put in layers and bake one-half to three-quarters of an hour.  

MRS. FRANK W. WERNER.

DISH TO UTILIZE LEFT-OVER FISH

Make sauce of two level tablespoons butter, two level tablespoons flour, one-half cup cream, one-half cup milk, season. Add one pint flaked fish, one yolk, beaten. Put into buttered dish, or individual ones, crumbs on top. Bake in dish of water one-half hour or longer.  

MISS ELIZABETH E. CHURCH.

FISH EN COQUILLE

Pick up left-over of any cooked fish—whitefish is especially good. Make a thick cream sauce, put in fish and allow to stand till cold. Fill the little coquille shells, which can be bought in the hardware section of any store, cover with
grated bread crumbs, season lightly, dot with butter and brown under the gas in the broiler. Serve with this little sweet cucumber pickles or piccalilli.

Mrs. S. D. Snow.

CREAMED HAM

Put one tablespoon butter and one tablespoon flour in saucepan, blend over fire, then add one cup of milk. Season slightly, add ham, cut in small pieces. Use more seasoning if necessary. Serve with freshly boiled rice or hominy.

Mrs. Louis J. Hotchkiss.

HAM PATTIES

One cup fine chopped or ground cooked ham, one-half cup bread crumbs, one-quarter cup milk, one teaspoon melted butter, salt and pepper to taste. Mix ham with bread crumbs and seasonings, add melted butter, moisten with milk. Half fill buttered gem pans or patty pans with the mixture. Break one egg carefully on top of each, sprinkle with salt and pepper and cover with fine bread or cracker crumbs. Bake about eight minutes in a brisk oven. Serve at once.

Mrs. Louis J. Hotchkiss.

POTTED HAM

Nice scraps from a boiled or baked ham; there must be no hard pieces. Chop all very fine, first through medium knife of grinder, then through the finest. Rub to a paste, and to each cupful add one-quarter teaspoon dry mustard and a few grains of cayenne. If very dry, add melted butter or ham fat. Press tightly into small earthen or porce-
lain lined cups, set cups in pan of hot water, cover with a thin layer of melted fat, then cover tightly, put in oven and bake one hour. Allow to get cold, then cover tops with paper. Use for sandwiches or sliced thin. This will keep well in a cool, dry place. Tongue or fish may be prepared the same way.

Mrs. S. D. Snow.

HAM SOUFFLÉ

One cup cooked chopped ham, one cup white sauce, four hard-boiled eggs. Chop whites and add to sauce. Add chopped yolks to meat. Put all together in greased bread tin. Sprinkle one cup of buttered bread crumbs on top. Bake fifteen minutes.

Mrs. E. B. Whitfield.

BAKED HASH

Meat may be left from steak, pot roast, veal roast, veal or mutton. To a pint of chopped meat add one-half the quantity of moist bread crumbs, season with salt and pepper. To give different flavor onion may be used, or celery, or sage. Put into casserole, add more milk and bake twenty minutes or more.

Mrs. Louis J. Hotchkiss.

HASH
(But Don’t Tell!)

Take finely ground cold hash, add a little chopped parsley and a small amount of lemon juice. Form into croquettes, dip in egg, then in cracker or bread crumbs. Fry in hot lard and put on brown paper to absorb grease.
Pour over them, when nicely arranged in dish, white sauce, in which is sliced boiled eggs.

This is my own invention, so of course, I do not recommend it.

Mrs. E. M. Landis.

LAMB TERRAPIN

Two cups cold lamb, diced, two tablespoons butter and one of flour, cooked together; add one cup of stock and one-half cup of cream. Now add meat, one teaspoon French mustard, one tablespoon Worcestershire sauce, two hard-boiled eggs, cut in pieces, two tablespoons Sherry wine. Season to taste. May be served in pastry shells, or on toast.

Mrs. J. M. Coen.

MEAT CROQUETTES
No. 1

Season one cup chopped cold meat with salt, celery, cayenne, lemon and onion juice. Moisten with following sauce and cool.

Sauce: Melt one and one-half tablespoons butter, add three tablespoons flour, add gradually one-half cup milk. Season. Shape into balls and fry in hot fat.

Mrs. Frank W. Werner.

MEAT CROQUETTES
No. 2

One cup chopped cooked meat, three tablespoons butter, one-half tablespoon salt, one-half cup cream, one-half cup stock, one-half cup stale bread, one egg. Flavor to taste. Mix ingredients and cook a minute. When cold mold, egg and crumb, and fry in deep fat.

Miss Margaret Dawes.
MEAT PIE

Meat may be left from steak, pot roast, veal roast, veal or mutton. Cut meat in small pieces; if there is gravy use it, if not make a white sauce of a tablespoon butter, a tablespoon flour, blended, and a cup of milk. Season sauce well with salt and pepper. Add meat and cook a few moments so meat may flavor sauce.

Make a crust of a cup of flour, sifted with level teaspoon baking powder, level tablespoon lard and one-half teaspoon salt, moisten to consistency of biscuit dough and roll out to fit the casserole. Put meat and part of gravy in casserole and dough over. Bake one-half hour.

MRS. LOUIS J. HOTCHKISS.

SOUR MEAT

Brown a heaping tablespoon of flour in a frying pan over a not too hot fire, and stir into it enough soup stock (or water) to make it of the consistency of a rather thick cream sauce. Then add four tablespoons of good cider vinegar, three tablespoons sugar, a walnut of butter, salt and pepper to taste, a tiny bit of bay-leaf, and a couple of cloves. Cook in this sauce a finely minced onion. Add to this sauce boiled beef, cut in slices, or meat balls; bring to a good boil and it is ready to serve. Any tender left-over meats may be used.

MRS. B. F. BULLARD.

LEFT-OVER POTATOES

Cold baked potatoes are the most difficult to dispose of. They are sometimes a little bitter near the skin. Peel them, chop fine, put in bowl, and to each cupful of potatoes add one teaspoon flour, salt and pepper to taste. Mix well and put into saucepan with just enough milk to cover. Boil
up, stirring constantly, and set aside till needed. Heat an iron skillet, put in enough lard or drippings to cover the bottom, turn in the potato mixture, spread it out thin, and brown slowly. Fold over, as you would an omelet, and serve. Cold creamed or scalloped potatoes can be used the same way.

Mrs. S. D. Snow.

RISSOLES

Meat may be left from steak, pot roast, veal roast, veal or mutton. When there is pie crust left, roll it out thin and cut the size of a saucer. Make a plain hash of chopped meat and seasoning, onion if desired, cool, and place a good-sized tablespoonful on each round of pie crust. Fold over like a turnover, press the edges lightly. Place in baking pan and bake in quick oven fifteen minutes. Serve with white sauce.

Mrs. Louis J. Hotchkiss.

CREAM OF CHICKEN SOUP

The bones of a boiled or roasted chicken. If there is some meat or gravy which can be added, so much the better. Cover bones with cold water, slice a medium sized onion and a few stalks of celery, and simmer for two or three hours, or longer. Strain off liquid, add an equal quantity of milk, and to one quart of soup add, when boiling, a paste of one teaspoon Penang curry powder, one teaspoon salt, two teaspoons flour, stirred with three teaspoons butter, or chicken fat. Boil for ten minutes, and serve with a spoonful of whipped cream on top of each cup. Rice may be added.

Mrs. S. D. Snow.
SOUP FROM LEFT-OVERS

It is always a problem to know how to dispose of the small left-overs of meats and vegetables. Here is where the purée sieve is worth its weight in gold and saves its small cost many times over. It is a round wire sieve, with handle and hooks, to fit over the pot, and is accompanied by a metal masher to force the food through sieve. There are numberless uses for this utensil. Save all good food, no matter how small the quantity, for two or three days. Then heat it, if possible, in the water in which some vegetable has been boiled, which you have saved for the purpose; pass while hot through the sieve, reduce by boiling, if necessary, add an equal amount of milk, thicken slightly if a cream soup, season if necessary, and serve. Whipped cream on top, with a sprinkle of chopped parsley, makes a company dish. Do not be afraid of mixtures, and sometimes a little chopped onion improves the flavor, cooked with other ingredients before straining.

Mrs. S. D. Snow.

MOCK TERRAPIN

One and one-half cups cold cooked chicken, or veal, cut in dice. One cup white sauce. Yolks of two hard-boiled eggs, finely chopped. Whites of two hard-boiled eggs, chopped. Three tablespoons of Sherry wine. One-quarter teaspoon salt. Few grains cayenne. Make the white sauce of two tablespoons butter, two tablespoons flour, one cup milk, one-quarter teaspoon salt. Melt butter, add flour, stir till it bubbles, add milk, stir till cooked smooth. Add chicken, yolks and whites of eggs, salt, cayenne. Cook two minutes and add wine. (The wine is not necessary for a good dish, but does give a fine flavor.)

Mrs. Louis J. Hotchkiss.
TOASTED CHEESE FINGERS

Cut slices of bread one-half inch thick, cut off crust and cut in strips. To one-half pound American cheese, grated, add one egg, beat together, season with salt to taste, pile on bread, add dash of paprika, and toast under broiler. Serve hot.

MRS. B. D. WARNER.

TURBOT À LA CRÊME

Use what is left from the baked whitefish. Remove bones. Make a sauce of a pint of milk, a few sprigs of parsley and a slice of onion. Simmer until well flavored. Thicken with flour, mixed thoroughly with water, and stir in with butter the size of an egg. Season with one teaspoon salt and one-quarter teaspoon pepper. Alternate fish and sauce in a baking dish, cover with rolled cracker crumbs and brown in a moderate oven.

MISS ALLIE F. ARMSTRONG.

USES FOR STALE BREAD

There are more uses for dry bread than there are for fresh bread. Do not throw good bread away or allow it to spoil in the breadbox. Where pieces are large enough, trim off crusts and cut into dice or long or triangular pieces. These can be dried on a plate in the oven, putting them in after the gas has been turned off. They will keep indefinitely in a pasteboard cracker box in a dry place. Use the dice for croûtons in soup; the fingers or triangular pieces instead of toast for a garnish for meats or stews. If something a little more crisp is liked, butter just before using and stand in oven till a golden brown. The trimmings, crusts and other pieces should be dried in the oven (leftover toast can be used, if it is not buttered or burned),
and put through the food chopper, using the finest knife. These are an improvement in taste and appearance to many dishes. They are used for breading cutlets, croquettes, etc., and have the advantage over cracker crumbs of not absorbing grease to the same extent. If a very delicious covering is wanted for any "au gratin" dish, put a level teaspoon butter on a plate, melt in oven, then stir in all the crumbs the butter will take. Place again in the oven till a golden brown. Cover the dish with this and stand again in the oven just long enough to heat through.

Mrs. S. D. Snow.

VINEGAR

Good vinegar may be made from peelings and residue after canning by placing the pulp in a clean crock, cover with water and add about one-quarter vinegar with bacteria culture or "mother" in it. Cover closely and let stand about a month, stirring frequently. Strain and bottle.

Mrs. S. D. Snow.
MISCELLANEOUS

CANDIED ORANGE STRAWS

Boil for ten minutes in salted water, thinly peeled orange rinds, cut with sharp knife or scissors into straws about one-half inch wide.

Drain, and boil in fresh water until transparent. Drain again. Have a heavy syrup of one-half cup sugar and one-half cup water, boiled for four minutes; put in the drained orange straws, and stir until well coated. Dip out with fork on oiled plate, and when cool roll in granulated sugar.

The water in which the peels were cooked, with the addition of some juice, makes a good pudding sauce or jelly. Add left-over syrup from straws.

Mrs. S. D. Snow.

DATE COFFEE

Put one-half pound dates through food chopper, pour one cup hot water on them and let stand an hour, then mix with one quart hot milk.

Mrs. E. T. Cooke.

FONDANT

White of one egg, six tablespoons of sweet cream. Stir in confectioner's sugar until it is a soft mass which can be handled without sticking to the fingers. This is the foundation for many varieties of candy.

Mrs. Martin Madson.
EGG-NOG

Separate yolk and white of a very fresh egg. Put yolk in large china bowl with one and one-half teaspoons sugar, and any preferred flavor, Sherry is best, but lemon juice, vanilla, or orange juice are good. Do not use too much. Add a tiny pinch of salt to the white, and beat to an absolutely dry froth. Combine this with the flavored yolk, and beat until thoroughly mixed. Grate nutmeg or cinnamon on top, if liked, and serve at once.

This may have one cup rich milk added, when fruit juice is not used.

MRS. S. D. SNOW.

FATS

Fat is the greatest of energy foods. It gives us endurance, and consequent ability to resist disease. Plain fat is most unpalatable, but properly seasoned, quite the reverse. It must be cooked at a comparatively low temperature. Its boiling point is higher than that of water, but its melting point is much lower than the boiling point of water.

The chief reason why deep fat frying is considered so objectionable from a dietetic standpoint is because of the careless or ignorant cook. It is not wise to serve such foods too frequently, but no one can deny that their occasional appearance is welcome.

The best fat for deep fat frying is a combination of beef fat and leaf lard or all beef fat. This is heavier than plain lard or the vegetable cooking oils, consequently does not penetrate the article cooked in it to the same extent. With proper care, it will keep indefinitely, and will not hold flavors. Procure two pounds of beef fat (it should not be kidney suet), and one pound unrendered leaf lard.
Wash clean, skin, cut in small pieces, put in iron pot, or Dutch oven, cover with cold water, and cook over a low fire for two or three hours. It should then be completely tried out. Take from the fire and strain through a fine sieve or a cloth. This can be used indefinitely for deep fat frying if the straining process is repeated after use, and care taken not to burn it in the using. It is hot enough as soon as a blue smoke rises from the surface, and should not be allowed to get any hotter. Keep covered in a cool place.

It is a great convenience to have this ready at any time.

Mrs. S. D. Snow.

GRAPE JUICE

Wash and pick from the stems, Concord grapes. One basket at a time is easiest to manage. Cover with cold water, and put over the fire in granite preserving kettle. Cook, but not hard, till the seeds separate, and settle to the bottom. Strain through a jelly bag, squeezing quite hard, and return to the fire, boil up, sweeten to taste, a little sweeter than is agreeable while hot. Have ready root beer bottles, well sterilized and hot. Have them standing in hot water, by the side of the kettle of hot juice. Fill the bottles through a sterilized funnel, very carefully at first, so as not to crack. Fill to overflowing, and immediately lay the top of the bottle over the juice to exclude the air; as the juice condenses, which it will do in a few moments, push the stopper further down, till it can be fastened. This must be done as soon as possible, but not too soon, or the bottom will be pushed out of the bottle.

Mrs. S. D. Snow.
MARSHMALLOWS CRACKERS

Put one-half marshmallow on a saltine cracker, put butter size of a pea on top of the marshmallow; set in medium hot oven until the marshmallow melts and is browned slightly.

MRS. CHARLES J. TONK.

TO PREPARE FRESH COCOANUT

Cocoanut has great food value. The easiest way to prepare is to puncture two of the three eyes at one end, let the milk run out. Crack the shell, and score the meat through to the shell with a sharp paring knife, when it may be lifted out in cubes. Pare off inner shell, and drop pieces into cold water. Put through food chopper. It is then ready to use. Dried, and mixed with half its content of sugar, it will keep well, but is best when fresh and soft.

MRS. S. D. SNOW.

TO PREPARE NUTS DAINSTILY

Shell, blanch and dry the nuts. Glacé by dipping them in the unbeaten white of an egg. Sprinkle with fine salt and roast in oven until brown, stirring frequently.

MRS. JOHN SUTCLIFFE.

SUGARED HAZEL NUTS

Two cups light brown sugar, one cup hazel nuts or quartered filberts, three-quarters cup water. Boil sugar and water till it forms a soft ball when tested in cold water. Remove from fire, add nuts, and beat until it
begins to granulate. When cool enough to handle, break the nuts separately.

Mrs. Alexander McLean.

WHEN PLANNING A SOCIAL

Proportions for Social: Many women have no idea what quantity of provisions will be required for a Social. The following rule is one that is definite and a good one to keep. To serve fifty persons: Five loaves of home-made bread, two pounds of butter, four pounds boiled ham, for sandwiches. Two pounds of coffee, one pound of loaf sugar and two quarts of cream for coffee, and seven loaves of cake will be sufficient.

Mrs. John Sutcliffe.

CLEANING FLUID

One quart deodorized benzine, one ounce alcohol, one-eighth ounce bay rum, one eighth ounce ammonia, one-eighth ounce chloroform, one-eighth ounce ether, one-eighth ounce oil of wintergreen, one-half dram borax. Filtered.

Mrs. John R. Hollister.
