

Spalding's Athletic Library

A. G. SPALDING

Anticipating the present tendency of the American people toward a healthful method of living and enjoyment, Spalding's Athletic Library was established in 1892 for the purpose of encouraging athletics in every form, not only by publishing the official rules and records pertaining to the various pastimes, but also by instructing, until to-day Spalding's Athletic Library is unique in its own particular field and has been conceded the greatest educational series on athletic and physical training subjects that has ever been compiled.

The publication of a distinct series of books devoted to athletic sports and pastimes and designed to occupy the premier place in America in its class was an early idea of Mr. A. G. Spalding, who was one of the first in America to publish a handbook devoted to athletic sports, Spalding's Official Base Ball Guide being the initial

number, which was followed at intervals with other handbooks on the sports prominent in the '70s.

Spalding's Athletic Library has had the advice and counsel of Mr. A. G. Spalding in all of its undertakings, and particularly in all books devote to the national game. This applies especially to Spalding's Official Base Ball Guide and Spalding's Official Base Ball Record, both of which receive the personal attention of Mr. A. G. Spalding, owing to his early connection with the game as the leading pitcher of the champion Boston and Chicago teams of 1872-76. His interest does not stop, however, with matters pertaining to base ball; there is not a sport that Mr. Spalding does not make it his business to become familiar with, and that the Library will always maintain its premier place, with Mr. Spalding's able counsel at hand, goes without saying.

Library will always maintain its premier place, with Mr. Spadning sade counsel at hand, goes without saying. The entire series since the issue of the first number has been under the direct personal supervision of Mr. James E. Sullivan, President of the American Sports Publishing Company, and the total series of consecutive numbers reach an aggregate of considerably over three hundred, included in which are many "annuals," that really constitute the history of their particular sport in America year by year, back copies of which are even now eagerly sought for, constituting as they do the really first authentic records of events and official rules that have ever been consecutively compiled.

When Spalding's Athletic Library was founded, seventeen years ago, track and field athletics were practically unknown outside the larger colleges and a few athletic clubs in the leading cities, which gave occasional meets, when an entry list of 250 competitors was a subject of comment; golf was known only by a comparatively few persons; lawn tennis had some vogue and base ball was practically the only established field sport, and that in a professional way; basket ball had just been invented; athletics for the schoolboy—and schoolgirl—were almost unknown, and an advocate of class contests in athletics in the schools could not get a hearing. To-day we find the greatest body of athletes in the world is the Public Schools Athletic League of Greater New York, which has had an entry list at its annual games of over two thousand, and in whose "elementary series" in base ball last year 106 schools competed for the trophy emblematic of the championship.

While Spalding's Athletic Library cannot claim that the rapid growth of athletics in this country is due to it solely, the fact cannot be denied that the books have had a great deal to do with its encouragement, by printing the official rules and instructions for playing the various games at a nominal price, within the reach of everyone, with the sole object that its series might be complete and the one place where a person could look with absolute certainty for the particular book in which he might be interested.

In selecting the editors and writers for the various books, the leading authority in his particular line has been obtained, with the result that no collection of books on athletic subjects can compare with Spalding's Athletic Library for the prominence of the various authors and their ability to present their subjects in a thorough and practical manner.

A short sketch of a few of those who have edited some of the leading numbers of Spalding's Athletic Library is given herewith:

JAMES E. SULLIVAN

President American Sports Publishing Company; entered the publishing house of Frank Leslie in 1878, and has been connected continuously with the publishing business since then and also as athletic editor of various New York papers; was a competing athlete; one of the organizers of the Amateur Athletic Union of the United States; has been actively on its board of governors since its organization until the present time, and President for two successive terms; has attended every champion-

ship meeting in America since 1879 and has officiated in some capacity in connection with American amateur championships track and field games for nearly twenty-five years; assistant American director Olympic Games. Paris, 1900; director Pan-American Exposition athletic department, 1901; chief department physical culture Louisiana Purchase Exposition, St. Louis, 1904; secretary American Committee Olympic Games, at Athens. 1906; honorary director of Athletics at Jamestown Exposition, 1907; secretary American Committee Olympic Games, at London, 1908; member of the Pastime A. C., New York; honorary member Missouri A. C., St. Louis; honorary member Olympic A. C., San Francisco; ex-president Pastime A. C., New Jersey A. C., Knickerbocker A. C.; president Metropolitan Association of the A. A. U. for fifteen years; president Outdoor Recreation League; with Dr. Luther H. Gulick organized the Public Schools Athletic League of New York, and is now chairman of its games committee and member executive committee; was a pioneer in playground work and one of the organizers of the Outdoor Recreation League of New York: appointed by President Roosevelt as special commissioner to the Olympic Games at Athens, 1906, and decorated by King George I. of the Hellenes (Greece) for his services in connection with the Olympic Games; appointed special commissioner by President Roosevelt to the Olympic Games at London, 1908; appointed by Mayor McClellan, 1908, as member of the Board of Education of Greater New York.

WALTER CAMP

For quarter of a century Mr. Walter Camp of Yale has occupied a leading position in college athletics. It is immaterial what organization is suggested for college athletics, or for the betterment of conditions, insofar as college athletics is concerned, Mr. Camp has always played an important part in its conferences, and the great interest in and high plane of college sport to-day, are undoubtedly due more to Mr. Camp than to any other individual. Mr. Camp has probably writter

Camp has probably written more on college athletics than any other writer and the leading papers and magazines of America are always anxious to secure his expert opinion on foot ball, track and field athletics, base ball and rowing. Mr. Camp has grown up with Yale athletics and is a part of Yale's remarkable athletic system. While he has been designated as the "Father of Foot Ball." it is a well known fact that during his college career Mr. Camp was regarded as one of the best players that ever represented Yale on the base ball field, so when we hear of Walter Camp as a foot ball expert we must also remember his remarkable knowledge of the game of base ball, of which he is a great admirer. Mr. Camp has edited Spalding's Official Foot Ball Guide since it was first published, and also the Spalding Athletic Library book on How to Play Foot Ball. There is certainly no man in American college life better qualified to write for Spalding's Athletic Library than Mr.

DR. LUTHER HALSEY GULICK

The leading exponent of physical training in America; one who has worked hard to impress the value of physical training in the schools; when physical training was combined with education at the St. Louis Exposition in 1904 Dr. Gulick played an important part in that congress; he received several awards for his good work and had many honors conferred upon him; he is the author of a great many books on the subject; it was Dr. Gulick, who

books on the subject; it was Dr. Gulick, who, organized the Public Schools Athletic League of Greater New York, and was its first Secretary; Dr. Gulick was also for several years Director of Physical Training in the public schools of Greater New York, resigning the position to assume the Presidency of the Playround Association of America. Dr. Gulick is an authority on all subjects pertaining to physical training and the study of the child.

JOHN B. FOSTER

Successor to the late Henry Chadwick ("Father of Base Ball") as editor of Spalding's Official Base Ball Guide; sporting editor of the New York Evening Telegram; has been in the newspaper business for many years and is recognized throughout America as a leading writer on the national game; a staunch supporter of organized base ball, his pen has always been used for the betterment of the game.

EDITORS OF SPALDING'S ATHLETIC LIBRARY

TIM MURNANE

Base Ball editor of the Boston Globe and President of the New England League of Base Ball Clubs; one of the best known base ball men of the country; known from coast to coast; is a keen follower of the game and prominent in all its councils; nearly half a century ago was one of America's foremost players: knows the game thoroughly and writes from the point of view both of player and an official.

HARBY PHILIP BURCHELL

Sporting editor of the New York Times: graduate of the University of Pennsylvania; editor of Spalding's Official Lawn Tennis Annual: is an authority on the game: follows the movements of the players minutely and understands not only tennis but all other subjects that can be classed as athletics; no one is better qualified to edit this book than Mr. Burchell.

Play Basket Ball.

GEORGE T. HEPBRON

Former Young Men's Christian Association director; for many years an official of the Athletic League of Young Men's Christian Associations of North America; was con-nected with Dr. Luther H. Gulick in Young Men's Christian Association work for over twelve years; became identified with basket ball when it was in its infancy and has followed it since, being recognized as the leading exponent of the official rules: succeeded Dr. Gulick as editor of the Official Basket Ball Guide and also editor of the Spalding Athletic Library book on How to

JAMES S. MITCHEL

Former champion weight thrower; holder of numerous records, and is the winner of more championships than any other individual in the history of sport: Mr. Mitchel is a close student of athletics and well qualified to write upon any topic connected with athletic sport: has been for years on the staff of the New York Sun.

MICHAEL C MURPHY

The world's most famous athletic trainer; the champion athletes that he has developed for track and field sports, foot ball and base ball fields, would run into thousands; he became famous when at Yale University and has been particularly successful in developing what might be termed championship teams; his rare good judgment has placed him in an enviable position in the athletic world; now with the University of Pennsylvania; during his career has trained only at two colleges and one athletic glub Yale and the

leges and one athletic club, Yale and the University of Pennsylvania and Detroit Athletic Club; his most recent triumph was that of training the famous American team of athletes that swept the field at the Olympic Games of 1908 at London.

DR. C. WARD CRAMPTON

Succeeded Dr. Gulick as director of physical training in the schools of Greater New York: as secretary of the Public Schools Athletic League is at the head of the most remarkable organization of its kind in the world; is a practical athlete and gymnast himself, and has been for years connected with the physical training system in the schools of Greater New York, having had charge of the High School of Commerce.

DR. GEORGE J. FISHER

Has been connected with Y. M. C. A. work for many years as physical director at Cincinnati and Brooklyn, where he made such a high reputation as organizer that he was chosen to succeed Dr. Luther H. Gulick as Secretary of the Athletic League of Y. M. C. A.'s of North America, when the latter resigned to take charge of the physical training in the Public Schools of Greater New York,

DR. GEORGE ORTON

On athletics, college athletics, particularly track and field, foot ball, soccer foot ball, and training of the youth, it would be hard to find one better qualified than Dr. Orton; has had the necessary athletic experience and the ability to impart that experience intelligently to the youth of the land; for years was the American, British and Canadian champion runner.

FREDERICK R. TOOMBS

A well known authority on skating, rowing, boxing, racquets, and other athletic sports; was sporting editor of American Press Association, New York; dramatic editor; is a lawyer and has served several terms as a member of Assembly of the Legislature of the State of New York; has written several novels and historical works.

R. L. WELCH

A resident of Chicago; the popularity of indoor base ball is chiefly due to his efforts; a player himself of no mean ability; a firstclass organizer; he has followed the game of indoor base ball from its inception.

DR. HENRY S. ANDERSON

Has been connected with Yale University for years and is a recognized authority on gymnastics; is admitted to be one of the leading authorities in America on gymnastic subjects; is the author of many books on physical training.

CHARLES M. DANIELS

Just the man to write an authoritative book on swimming; the fastest swimmer the world has ever known; member New York Athletic Club swimming team and an Olympic champion at Athens in 1906 and London, 1908. In his book on Swimming, Champion Daniels describes just the methods one must use to become an expert swimmer.

GUSTAVE BOJUS

Mr. Bojus is most thoroughly qualified to write intelligently on all subjects pertaining to gymnastics and athletics; in his day one of America's most famous amateur athletes; has competed successfully in gymnastics and many other sports for the New York Turn Verein; for twenty years he has been prominent in teaching gymnastics and athletics; was responsible for the famous gymnastic championship teams of Columbia University; now with the Jersey City high schools.

CHARLES JACOBUS

Admitted to be the "Father of Roque;" one of America's most expert players, winning the Olympic Championship at St. Louis in 1904; an ardent supporter of the game and follows it minutely, and much of the success of roque is due to his untiring efforts; certainly there is no one better qualified to write on this subject than Mr. Jacobus.

DR. E. B. WARMAN

Well known as a physical training expert; was probably one of the first to enter the field and is the author of many books on the subject; lectures extensively each year all over the country.

W. J. CROMIE

Now with the University of Pennsylvanic, was formerly a Y. M. C. A. physical director; a keen student of all gymnastic matters; the author of many books on subjects pertaining to physical training.

G. M. MARTIN

By profession a physical director of the Young Men's Christian Association; a close student of all things gymnastic, and games for the classes in the gymnasium or clubs.

PROF. SENAC

A leader in the fencing world; has maintained a fencing school in New York for years and developed a great many champions; understands the science of fencing thoroughly and the benefits to be derived therefrom.

Group I Base Ball

No. 1-Spatting Base Ball Guide.

The leading Base Ball annual of the country, and the official authority of the game. Contains the official playing rules, with an explanatory index of the rules compiled by Mr. A. G. Spalding; pictures of all the teams in the National,

American and minor leagues; re-views of the season; college Base Ball, and a great deal of interesting information. Price 10 cents.

No. 1A - Spalding's Official Base Ball Record.

Something new in Base Ball. Contains records of all kinds from the beginning of the National League and official averages of all professional organizations for past season. Illustrated with pictures of leading teams and No. 228-How to Play Shortplayers. Price 10 cents.

No. 202-How to Play Base Ball.

Edited by Tim Murnane, New and revised edition. Illustrated with pic-tures showing how all the various curves and drops are thrown and portraits of leading players. Price 10 cents.

No. 223-How to Bat.

There is no better way of becoming a proficient batter than by reading this book and practising the directions. Numerous illustrations. Price 10 cents.

No. 232-How to Run the Bases.

This book gives clear and concise directions for excelling as a base runner: tells when to run and when not to do so; how and when to slide; team work on the bases; in fact, every point of the game is thoroughly explained. Illustrated. Price 10 cents.

No. 230-How to Pitch.

A new, up-to-date book. Its contents are the practical teaching of men who have reached the top as pitchers, and who know how to impart a knowledge of their art. All the big leagues' pitchers are shown. Price 10 cents.

No. 229-How to Catch.

Every boy who has hopes of being a Official clever catcher should read how wellknown players cover their position. Pictures of all the noted catchers in the big leagues. Price 10 cents.

No. 225-How to Play First Base.

Illustrated with pictures of all the prominent first basemen. Price 10 cents.

No. 226-How to Play Second Base.

The ideas of the best second basemen have been incorporated in this book for the especial benefit of boys who want to know the fine points of play at this point of the diamond. Price 10 cents.

No. 227-How to Play Third Base.

Third base is, in some respects, the most important of the infield. All the points explained. Price 10 cents.

stop.

Shortstop is one of the hardest positions on the infield to fill, and quick thought and quick action are necessary for a player who expects to make good as a shortstop. Illus. Price 10 cents.

No. 224-How to Play the Outfield.

An invaluable guide for the outfielder. Price 10 cents.

No. 231—How to Coach; How to Captain a Team; How to Manage a Team; How to Umpire; How to Or-ganize a League; Technical Terms of Base Ball.

A useful guide. Price 10 cents.

No. 219-Ready Reckoner of Base Ball Percentages.

To supply a demand for a book which would show the percentage of clubs without recourse to the arduous work of figuring, the publishers had these tables compiled by an expert. Price 10 cents.

BASE BALL AUXILIARIES.

No. 336-Minor League Base Ball Guide.

The minors' own guide. Edited by President T. H. Murnane, of the New England League. Price 10 cents.

No. 338-Official Handbook of the National League of Professional Base Ball Clubs.

Contains the Constitution, By-Laws. Official Rules, Averages, and schedule of the National League for the current year, together with list of club officers and reports of the annual meetings of the League, Price 10 cents,

No. 340-Official Handbook National Playground Ball Association.

This game is specially adapted for playgrounds, parks, etc., is spreading rapidly. The book contains a description of the game, rules and list of officers. Price 10 cents.

Group II. Foot Ball

Official No. 2-Spalding's Foot Ball Gnide.

Edited by Walter Camp. Contains the new rules, with diagram of field; All-America teams as selected by the leading authorities: reviews of the game from various sections of the country; scores; pictures. Price 10 cents.

No. 334-Code of the Foot Ball Rules.

This book is meant for the use of officials, to help them to refresh their memories before a game and to afford them a quick means of ascertaining a point during a game. It also gives a ready means of finding a rule in the Official Rule Book, and is of great help to a player in studying the Rules. Compiled by C.W. Short, Harvard, 1908. Price 10 cents.

No. 324-How to Play Foot Ball.

Edited by Walter Camp, of Yale. Everything that a beginner wants to know and many points that an expert will be glad to learn. Snapshots of leading teams and players in action, with comments by Walter Camp. Price 10 cents.

No. 2A-Spalding's Official Association Soccer Foot Ball Gnide.

A complete and up-to-date guide to the "Soccer" SPALDINGS game in the United States, 💁 containing instructions for playing the game, official rules, and interesting news from all parts of the country. Illustrated. Price 10 cents.

No. 286-How to Play Soccer.

How each position should be played. written by the best player in England in his respective position, and illustrated with full-page photographs of players in action. Price 10 cents.

FOOT BALL AUXILIARIES.

No. 332-Spalding's Official Canadian Foot Ball Guide.

The official book of the game in Canada. Price 10 cents.

No. 335-Spalding's Official Rugby Foot Ball Guide.

Contains the official rules under which the game is played in England and by the California schools and colleges. Also instructions for playing the various positions on a team. Illustrated with action pictures of leading teams and players. Price 10 cents.

Group III. Cricket

No. 3-Spalding's Official Cricket Guide.

The most complete year book of the game that has ever been published in America. Reports of special matches, official rules and pictures of all the leading teams. Price 10 cents.

277-Cricket; and How No. to Play it.

By Prince Ranjitsinhii. The game described concisely and illustrated with full-page pictures posed especially for this book. Price 10 cents.

Group IV.

Lawn

Official No. 4-Spalding's Lawn Tennis Annual.

Contents include reports of all important tournaments; official ranking from 1885 to date; laws of lawn tennis: instructions for handicapping; decisions on doubtful points; management of tournaments: directory of clubs:

laying out and keeping a court. Illustrated. Price 10 cents.

INTRODUCTION

×

Oh, do you remember, how, when a small boy in the country, in the months of April, May, June, July, August and September (it mattered little what time of the year it was, just so the ice was out of the water), you used to run to the river at a "twelve-second gait," make two simple twists of the wrist, thereby removing a waist and pair of trousers, and plunge into the water with speed equalled only by the rapidity with which you say your prayers on a cold night? Of course you do. Great fun, was it not? I used to think there was nothing like it. I could not get into the water quick enough. That was before I learned to turn the ''back" and the ''flip," however.

After I learned to turn the back and forward somersault, when I was about eleven years old, I would linger on the bank, or soft sandy beach, "tumbling," until I saw the other boys coming out to dress, then I would dive in, swim a few strokes, just to say I had been in swimming, come out and dress with the rest.

Like the proverbial "Wandering Willie," the

water lost much of its charm for me after I found what royal fun the turning and twisting on the bank afforded. I have wondered many times if the Almighty, when He created beaches like Manhattan, Rockaway and Nantasket, making them slope gently down to the water, and put the soft, but not too soft, yieiding sand there, if He did not think how admirable they would be to "tumble" on.

Any one who has experienced the pleasure of a few "backs," "flips," "snap-ups," etc., on the soft sand, immediately after donning the light bathing suit, will agree with me that it is "great fun." And he who has never been taught, never practiced any acrobatic work, 1 hope will begin "easy" at first; a few simple feats and practice carefully every opportunity he has.

I am sure whoever takes an interest, tries, and advances as far as the "round-off," "flip" and "back," will feel fully repaid for all the time passed in learning. He will find so many opportunities of performing, and it will be a means of great pleasure to himself, if not to his friends.

Many of the acts can be performed in the parlor or in a very small space. However, they should never be *practiced* in the parlor.

Now a few words upon the benefits, physical

and mental, derived from practicing tumbling. An expert tumbler has an everlasting faculty of always landing on his feet. If thrown from a horse, street car or carriage, like a cat that is dropped from a window, and the man who strikes a match on the sole of his boot, he always lights on his feet. There is a sort of wriggle or twist that a man who has practiced tumbling long can make in the air that will invariably bring him down feet first.

The mental benefit is derived from the pleasure found in practicing, as all recreation is a mental benefit. I feel that all I could preach, say or sing about the benefit of any certain exercise would be feeble indeed. Boys and young men—and they are the ones who will probably be most interested in this book—are not appealed to by advice on "what they ought to do." They will never practice any of the feats described in this book for the good it will do them. They know that plenty of sleep is good for them, and they know that tobacco is bad for them; but it makes no difference.

This book is intended more for the boy who wishes to learn but does not know just where and how to begin. What we all need in this world is encouragement. I should like to encourage every boy who wishes to learn. Don't be discouraged because it takes you so long to learn the handspring; when that is once learned, the other acts will be easier.

Do you remember the comparative lines used by a baking powder company in advertising their baking powder? There was the long line reaching nearly across the page, representing this firm's powder, "Absolutel♥ Pure." Then there was the next line, not as long, representing some other firm's powder-not as long a line, and not so pure a powder. Then there were other lines along down the list, shorter and shorter, until the last, which was only about an eighth of an inch long. Now, I think these lines might serve as an excellent illustration of the length of time it will require one to learn the different feats. Let the long line represent the length of time it takes to acquire the first trick; the practice for the first trick will help you with the second, the second with the third, and so on, so that when you have practiced and learned many feats the time required to learn each will grow shorter and shorter, although the acts grow harder.

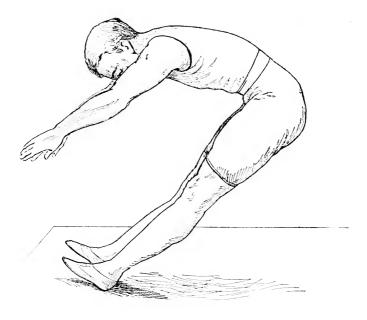

This rule will apply to all athletic and gymnastic work as well as to tumbling.

6

To boys who are apt to get discouraged I love to tell of a boy I knew in Chicago. He was far below the average in natural ability when I first knew him—awkward and clumsy—but he became interested in gymnastic work and kept "everlastingly at it." He fairly lived in the gymnasium. As a result of this faithful labor, in less than three months' time he participated in a gymnastic exhibition, turning a forward somersault through a blazing hoop.

Practice, don't be discouraged! You will probably never become as great an acrobat as one of the Nelson Brothers, but you will certainly find great pleasure and accomplish some good results by Ground Tumbling.

THE AUTHOR.

No. 2. The Sitdown.

DIRECTIONS

×

1. The Switch.

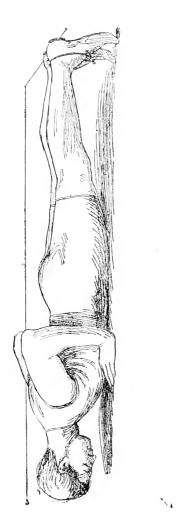

This is an act which is easily performed and affords much amusement for spectators. Stand in an erect position with hands hanging at sides, spring up a foot-and-a-half from the ground and give a quick jerk or switch with the body and come down facing in the opposite direction. Do not jump around. The turn is made by a twist of the body, not with the feet or legs.

2. The Sit Down,

Stand with the feet about one foot apart, bend over, keeping the legs perfectly straight, until the finger tips nearly touch the toes, then fall back to a sitting position on the floor. Do not bend the knees. If performed correctly this can be done on a very hard floor without hurting the performer in the least. (See illustration.)

3. The Back Roll.

Performed the same as No. 2, only instead o stopping at the sitting position the performer rolls

No. 4. THE FISH FLOP.

back on the shoulders and head, and with the use of the hands comes to a standing position on feet.

4. The Fish Flop.

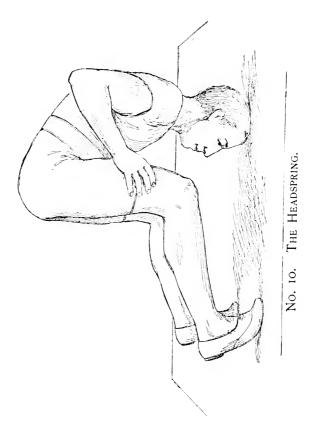

Lie on stomach, feet close together with the toes touching the floor. Place hands on sides, near ribs, flop over onto back with help of hands and feet, keeping the body perfectly rigid. (See illustration.)

5. The Front Roll.

Stand with heels close together, toes turned out. Bend over, place hands on floor about one foot apart and about a foot-and-a-half in front of fect, bend head in toward body and touch the back of head on floor between hands and, with a push from the feet, roll over on back and up onto feet again. "Curl up" in doing this act. Bring feet well under body.

6. The Cart Wheel.

Stand erect, throw left hand hard down on the floor, about two feet from the left foot, follow with the right hand, two feet from the left hand, then the right foot down about two feet from the right hand, and so on. The feet and hands should be placed as nearly on a straight line as possible.

13

Arms and legs moving like the spokes in a wheel, hence the name.

7. The Round-off.

This may be done with either running or standing start. Strike hands on ground in front of feet, letting the left strike a little before the right, as in the cart-wheel. Place them about ten inches apart, at the same time swing the body over and around, so as to land in a sitting position directly opposite the one in starting.

8. The Handspring.

Possibly the most common acrobatic feat. May be done from running or standing start; strike hands hard on the ground, turn head under and in, throw feet over head and as they begin to come down give a hard spring or push up with the hands, curling feet down and back under body and coming to standing position, facing the same way as when starting.

9. The One-hand Handspring.

Same as No. 8, except that but one hand is used. The weight of the body should be brought well over the hand used.

10. The Headspring.

Instructions same as for No. 8, only the spring is made from the head instead of the hands. (See illustration.)

11. The Snap Up.

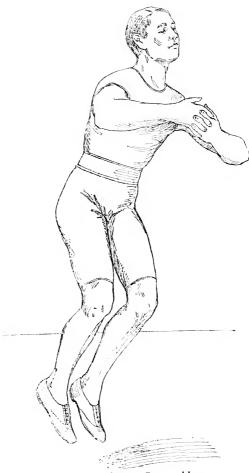

Lie on back, carry feet up and back over head so that the toes nearly touch the ground, bearing the weight on the back of head, neck and shoulders. The hands should be placed on the ground near shoulders and neck. Give a quick hard whip with the feet and legs over toward first position and a hard snap or push up with the neck, shoulders and hands. With a little practice it can be done without the aid of the hands. It is a pretty act and a good "finish" to every act ending with a fall on the back. (See illustration.)

12. The Elephant Walk.

A comical contortion act. Place hands on floor in front of feet as near to toes as possible. Do not bend the knees. Walk.

13. The Long Dive or Lion's Leap.

This is a long dive made on the mats or some soft place, much as one dives into the water. Take a short run, strike both feet at the same time

No. 19. The JUMP OVER HANDS

on a spot about five feet from the mat, make a dive toward the centre of the mat striking first the hands, then the head (which should be well turned down and under), allowing the force of the dive to be about equally divided between the hands, neck, head and shoulders. Curl up well as in No. 5.

14. The Hop Over Hand and Foot.

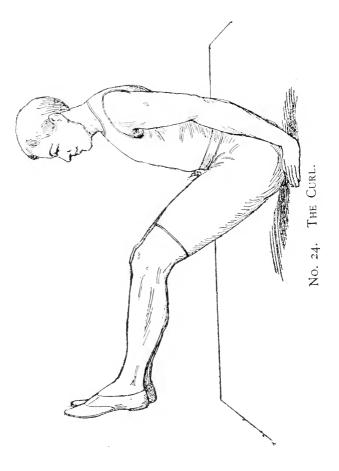

Grasp left foot with right hand, with thumb of right hand under great toe joint; fingers of right hand over top of toes with backs of fingers up. Jump over hand and foot with right foot. The point to be observed in performing this trick is to keep the right hand and left foot perfectly still while jumping with the right. If moved, they are apt to trip the foot when jumping. This is excellent practice in developing quickness in handling the feet, which is an important factor in tumbling.

15. The Hop Back.

Jump back to original position from finish of No. 14. Try the same trick with both feet over and back.

16. The Jump Over Stick in Hands.

Practice this with a cane or rattan that can be bent down while jumping over. Grasp stick with

ordinary grasp, hands placed as far apart as the width of shoulders. Jump over stick between hands, keeping stick in hands. Jump back.

17. The Jump Over Hat.

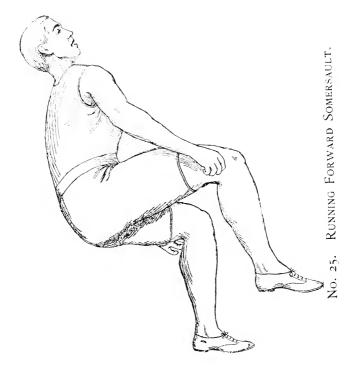

Same as No. 16, except jump is made over hat held in hands.

18. The Jump Over Razor-Blade.

This should never be practiced until the performer can successfully jump over short lead pencil held in hands. It is a 'stage trick' that takes well and usually makes a hit. It should be done with a razor-blade so dull that if struck with the feet it would do no harm. Hold the blade of the razor in the hands so loosely that if tripped upon by toes it would easily slip from hands without injury.

19. The Jump Over Hands.

This is one of the prettiest and most difficult acts that is performed. Entwine the fingers together and jump through the arms and over the hands. It may take months of practice to get this feat, but, when once learned, the legs will be so supple and quick that nearly all other acrobatic feats will come easier in consequence. (See illustration.)

20. The Twist Handspring.

Performed the same as No. 8, only, after touching the hands, the body gives a quick turn or twist to the right or left so as to finish the act facing in position used in starting.

21. The Twist Snap-Up,

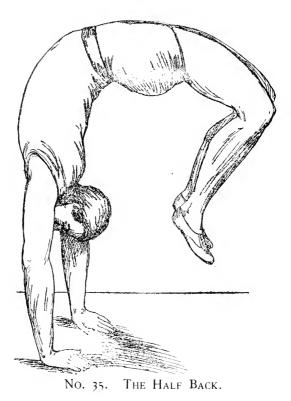

Same as No. 11, only the body gives a quick turn or twist to the right or left after the shoulders leave the ground so that the finish is made opposite the position taken in starting.

22. The Cradle.

First do the snap-up, No. 11, and immediately after landing fall back onto the shoulders, neck, head and hands as in the snap-up, then snap boat to feet and continue to rock back and forth.

23. The Kicking Jackass.

Stand with heels close together, jump onto hands, with the feet carried well back and the back arched. Then spring (not fall) back to the feet from the hands and continue the movement. Be sure that the feet leave and strike the ground together, also the hands. Do not "crow-hop," that is, don't strike first one foot and then the other, a sort of "ker-flap." "pit-pat' sound.

24. The Curl.

Stand erect, fall slowly forward on the hands, keeping the body perfectly straight. Break the force of the fall by letting the arms bend slightly, but straighten them immediately. Curl up, bringing the knees well up toward the chin and carry the feet through between the hands, not letting them touch the floor; extend legs in front of arms, curl up again, carry feet back through hands and straighten into the "handstand." This is a difficult feat, but it may be practiced with perfect safety. It is excellent practice for developing the muscles of the stomach and abdomen. (See illustration.)

25. Running Forward Somersault.

Take a quick run of about twenty yards, strike both feet together on the mat or floor. Jump well into the air, duck the head down and in, and try to describe a half circle through the air, with the feet landing in a position, the same direction as when starting. It is well to practice this over a very soft place, having a board or some hard object to turn from and land into hay, shavings, soft sand, sawdust or tan-bark. When one has a soft place on which to practice he should go at it beldly; he will then be less apt to jar himself. A quick hard run is the important thing, and a leap of about five feet should be made before striking the take-off. (See illustration.)

26. The Back Somersault.

This is done from a standing position. Get two men to hold you up while trying. The "lungers" that are generally used in the gymnasium— "coward-strap" they are called—may be used with perfect safety. However, I think the best kind of strap is a long strong towel.

Stand firmly with the heels about four inches apart, spring up as high as possible, throw the head back and down and try to describe a half circle with the feet landing in a position facing the same way as when starting. This should be performed with a "cut," that is when the feet get well over the head catch the legs back of the knees and pull them down under the body. The way of using the hands in performing the back somersault will gradually come to the performer with practice.

27. The Flip.

Sometimes called "Back Handspring." Should be practiced over a moderately soft place. Stand with the back to the mat. Sink down so that knees come within a foot of the floor in front of feet. Throw the hands and head back. Strike hands on floor, about six inches apart, in a position such as is held while waiking on hands. Do not let the head touch the ground. Then throw the feet up over the head and hands, describing a half circle, finishing facing the same way as when starting. Use the stomach and abdomen muscles when performing this act. Do not let the feet leave the ground until the hands are firmly placed.

28. The Twister.

This is No. 26, the back somersault, with a half turn to the right or left, so that the finish is made facing in an opposite position from the position in starting. It is well in practising this act to try and turn just a little at first, then an inch further, and so on until the complete half turn is made.

29. The Twist Flip.

Same as No. 27, the "flip," only a half turn is made from the hands so as to finish facing in an opposite direction from that taken when starting.

30. The Spotter.

This is the back somersault turned in such a way as to finish with the feet in the same spot they were when starting. It is best acquired by trying to make each finish nearer and nearer to the starting position.

31. The Gainer.

Same as No. 30, except that the finish is made with the feet striking in front of the starting position.

32. The Tuck-up.

This is a high back somersault performed without the "cut." It is usually done as a finish to a succession of "flips."

33. The Standing Forward.

This is the forward somersault performed without a run. To do this one must jump high into the air, turning as he would in the running forward and "cut" by catching the legs in front, just above the ankles, and drawing them under the ankles. It is a difficult act.

34. The Half Forward.

The first part of this act is performed as in No. 25, only, instead of having the feet describe a

GROUND TUMBLING.

circle over the head, they stop in the air above head, and the landing is made on the hands. It is, in fact, a sort of jump or dive on the hands and stand there.

35. The Half Back.

Like No. 26, only the finish is made onto the hands and the body balanced there. Instead of turning all the way around, jump back onto the hands and stand there. (See illustration.)

This concludes the article on "single acts." In the next chapter I will describe how the acts can be suitably combined. A clever performer can make combinations other than these. In fact, there are an endless variety of combinations that can be made with the acts here described. Space will not allow of a longer or more thorough description.

Sandow's Patent Sandow's Patent Spring Dumb Bells

A. G. SPALDING & BROS. SOLE AMERICAN AND CANADIAN LICENSEES

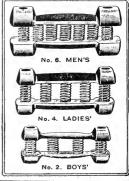

N ENTIRE SYSTEM of Physical Culture is em braced within the exercises possible with these wonderful dumb bells.

U The bells are made in two halves connected by steel springs, the effort necessary in gripping compelling the pupil to continually devote his whole mind to each movement. This concentration of will power on each muscle involved is what is responsible for the great results obtained through properly exercising with them.

HE SPALDING

Wooden lockers are objectionable, because they attract vermin, absorb odors, can be easily broken into, and are dangerous on account of fire.

Lockers made from wire mesh of expanded metal afford little security, as they can be easily entered with wire cutters. Clothes placed in them become covered with dust, and the lockers themselves present a poor appearance, resembling animal cages.

Durand-Steel Lockers are made of finest grade furniture steel and are finished with Publigloss black, furnace-baked japan (400°), comparable to that used on hospital ware, which will never flake off nor require refinishing, as do paints and enamels.

RADE-MARK

ACCEPT NO

Some of the 6,000 Durand-Steel Lockers Installed in the Public Cymnasiums of Chicago. 12'x 15'x 42', Double Tler, rable | Durand-Steel Lockers are usually built with

doors perforated full length in panel design with sides and backs solid. This prevents clothes in one locker

from coming in contact with wet garments in adjoining lockers, while plenty of ventilation is secured by having the door perforated its entire length, but, if the purchaser prefers, we perforate the backs also. \bullet

The cost of Durand-Steel Lockers is no more than that of first-class wooden lockers, and they last as long as the building, are sanitary, secure, and, in addition, are fire-proof.

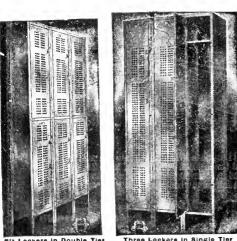

THE FOLLOWING STANDARD SIZES ARE THOSE MOST COMMONLY USED :

| | DOUBLE TIER | SINCLE TIER |
|---|-------------------|-------------------|
| | 12 x 12 x 36 Inch | 12 x 12 x 60 Inch |
| | 15 x 15 x 36 Inch | 15 x 15 x 60 Inch |

Standard Policy

A Standard Quality must be inseparably linked to a Standard Policy.

Without a definite and Standard Mercantile Policy, it is impossible for a manufacturer to long maintain a Standard Quality.

To market his goods through the jobber, a manufacturer must provide a profit for the jobber as well as the retail dealer. To meet these conditions of Dual Profits, the manufacturer is obliged to set a proportionately high list price on his goods to the consumer.

To enable the glib salesman, when booking his orders, to figure out attractive profits to both the jobber and retailer, these high list prices are absolutely essential; but their real purpose will have been served when the manufacturer has secured his order from the jobber, and the jobber has secured his order from the retailer.

However, these deceptive high list prices are not fair to the consumer, who does not, and, in reality, is not ever expected to pay these fancy list prices.

When the season opens for the sale of such goods, with their misleading but alluring high list prices, the retailer begins to realize his responsibilities, and grapples with the situation as best he can, by offering "special discounts," which vary with local trade conditions.

Under this system of merchandising, the profits to both the manufacturer and the jobber are assured; but as there is no stability maintained in the prices to the consumer, the keen competition amongst the local dealers invariably leads to a demoralized cutting of prices by which the profits of the retailer are practically eliminated.

This demoralization always reacts on the manufacturer. The jobber insists on lower, and still lower, prices. The manufacturer in his turn, meets this demand for the lowering of prices by the only way open to him, viz.: the cheapening and degrading of the quality of his product.

The foregoing conditions became so intolerable that, ten years ago, in 1899, A. G. Spalding & Bros. determined to rectify this demoralization in the Athletic Goods Trade, and inaugurated what has since become known as "The Spalding Policy."

The "Spalding Policy" eliminates the jobber entirely, so far as Spalding Goods are concerned, and the retail dealer secures his supply of Spalding Athletic Goods direct from the manufacturer under a restricted retail price arrangement by which the retail dealer is assured a fair, legitimate and certain profit on all Spalding Athletic Goods, and the consumer is assured a Standard Quality and is protected from imposition.

The "Spalding Policy" is decidedly for the interest and protection of the users of Athletic Goods, and acts in two ways:

FIRST-The user is assured of genuine Official Standard Athletic Goods, and the same fixed prices to everybody.

SECOND-As manufacturers, we can proceed with confidence in purchasing at the proper time, the very best raw materials required in the manufacture of our various goods, well ahead of their respective seasons, and this enables us to provide the necessary quantity and absolutely maintain the Spalding Standard of Quality.

All retail dealers handling Spalding Athletic Goods are required to supply consumers at our regular printed catalogue prices—neither more nor less—the same prices that similar goods are sold for in our New York, Chicago and other stores.

All Spalding dealers, as well as users of Spalding Athletic Goods, are treated exactly alike, and no special rebates or discriminations are allowed to anyone.

Positively, nobody; not even officers, managers, salesmen or other employes of A. G. Spalding & Bros., or any of their relatives or personal friends, can buy Spalding Athletic Goods at a discount from the regular catalogue prices.

This, briefly, is the "Spalding Policy," which has already been in successful operation for the past ten years, and will be indefinitely continued.

In other words, "The Spalding Policy" is a "square deal" for everybody.

A. G. SPALDING & BROS.

Standard Quality

An article that is universally given the appellation "Standard" is thereby conceded to be the Criterion, to which are compared all other things of a similar nature. For instance, the Gold Dollar of the United States is the Standard unit of currency, because it must legally contain a specific proportion of pure gold, and the fact of its being Genuine is guaranteed by the Government Stamp thereon. As a protection to the users of this currency against counterfeiting and other tricks, considerable money is expended in maintaining a Secret Service Bureau of Experts. Under the law, citizen manufacturers must depend to a great extent upon Trade-Marks and similar devices to protect themselves against counterfeit products—without the aid of "Government Detectives" or "Public Opinion" to assist them.

Consequently the "Consumer's Protection" against misrepresentation and "inferior quality" rests entirely upon the integrity and responsibility of the "Manufacturer."

A. G. Spalding & Bros. have, by their rigorous attention to "Quality," for thirtythree years, caused their Trade-Mark to become known throughout the world **as a** Guarantee of Quality as dependable in their field as the U. S. Currency is in its field.

The necessity of upholding the guarantee of the Spalding Trade-Mark and maintaining the Standard Quality of their Athletic Goods, is, therefore, as obvious as is the necessity of the Government in maintaining a Standard Currency.

Thus each consumer is not only insuring himself but also protecting other consumers when he assists a Reliable Manufacturer in upholding his Trade-Mark and all that it stands for. Therefore, we urge all users of our Athletic Goods to assist us in maintaining the Spalding Standard of Excellence, by insisting that our Trade-Mark be plainly stamped on all athletic goods which they buy, because without this precaution our best efforts towards maintaining Standard Quality and preventing fraudulent substitution will be ineffectual.

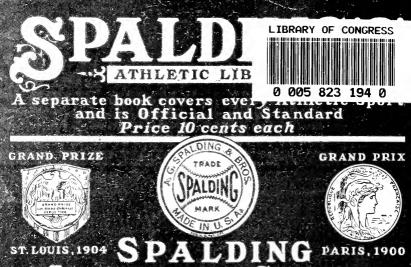

Manufacturers of Standard Articles invariably suffer the reputation of being high-priced, and this sentiment is fostered and emphasized by makers of "inferior goods." with whom low prices are the main consideration.
