PREFACE

It is almost necessary in any school system, that the system of marching be uniform throughout the different schools, otherwise when pupils go from one school to another there will be confusion, and discipline will be rendered difficult.

In any public school system it seems important that the tactics follow as closely as possible those of the United States Army, not because these are the best in all respects, but because many of the individuals will enter the different regiments later, as this is the most commonly accepted and generally understood form in America. It is thus most practicable, and as it seems possible to unite upon this, whereas it would not be possible to unite upon any system which represented the views of a special group of men, it seems necessary to have a separate manual, because a large fraction of the commands used in the army are unnecessary for use in gymnasiums, and there are a number of conditions to be met with in the gymnasiums for which adequate commands do not exist in the Infantry Manual.

The following manual has been prepared by men who are thoroughly familiar with their work, and who are daily doing that which they describe. The first part, called "Physical Training Tactics," written by Dr. C. Ward Crampton, of the High School of Commerce, New York, and Mr. Emanuel Haug, of the De Witt Clinton High School, New York, is intended particularly for high

school use. The second portion of the work, beginning with page 56, is written by Mr. Montague Gammon, and contains instructions which are peculiar to the conditions obtaining in elementary schools. The diagrams for maze running were prepared by Mr. Haug.

INTRODUCTION

Tactics are important to the gymnasium director as a means of managing classes, conducting physical training periods, and also for the educational discipline that lies in the prompt understanding and execution of orders.

The present work aims to be a convenient guide for the physical director, conducing to a uniform interpretation of commands in vogue, and tending eventually to a uniform method in tactics.

The commands and methods of execution of commands here presented are identical with the United States Military Tactics in so far as those tactics apply to gymnastic work. In many instances it has been found advisable to insert additional commands not found in the military code, and, in a few exceptional instances, a different method of execution is given, to meet the difference in aims between gymnastic and military work. Whenever any such change is suggested, the reasons are stated and the military method is immediately quoted for those who may wish to follow it unmodified.

It is thought that the manual, while not exhaustive, will meet the needs of instructors in schools that have students trained in military tactics as well as those of a less distinctively military character.

HISTORY OF TACTICS

Probably the earliest account of tactics is that from the Greeks. At the time of Alexander the Great, tactics for military purposes had been considerably developed. Accounts of formality of movement in bodies of troops are preserved and their effectiveness was apparently well demonstrated.

In mediæval times tactics were still a part of military usage, though the feudal system allowed of but little of the finish and accuracy of movement, with the involved discipline, which probably prevailed in the Greek and Roman periods.

From the advent of firearms, we find a progressive formalization of tactics down to the present day. In gymnastics tactics were developed as need required: Jahn in Germany at first used only the simplest words of command to a crowd of boys or a group of students out of doors, in the field, or in the old original Turnplaetze; Spiess, in developing school gymnastics, did much also for tactics. Ling in Sweden used the military tactics in vogue from 1810 to 1820, and adopted a considerable mass of tactics to gymnastic use.

In this country any and every kind is in vogue, from a mere rush for spots on the floor to the most exact military tactics. The situation of the present day is due to diversity of aims as well as diversity of origin. Some gymnastic directors wish only to get classes on the floor for work and off again as quickly as possible, not regarding marching and formation as useful in themselves. Others realize the advantage of tactics for the cultivation of class feeling, posture, accuracy, etc., and devote more or less time to them. Others, where military tactics are demanded in the curriculum, are forced to use them; others, still, believe in tactics so highly for their undoubted benefits as to use them to a disproportionate degree.

With these points in view, the following classification of tactics is used here:

- 1. Simple preliminary tactics.
- 2. Class formation.
- 3. Tactics for purpose of exercise; maze runs.

INTRODUCTORY COMMANDS

METHOD OF GIVING COMMANDS.—There are two kinds of commands: the Preparatory Command, such as Forward, indicating the movement that is to be executed, and the Command of Execution, such as March, Halt, and which causes the execution. Preparatory commands are printed in *Italics*; those of execution in Capitals.

"The preparatory command should be given at such interval of time before the command of execution as to admit of its being properly understood; the command of execution should be given at the *instant* the movement is to commence." (U. S. A.)

RHYTHMIC METHOD.—In giving commands it is often necessary to indicate the amount of time to be given to the execution of the command, if it is a single act, as: In Place, Rest. And it is often necessary to indicate the rhythm with which a motion involving rhythm is to be executed, as in marching. This is accomplished by establishing the rhythm in the order, by leaving the same interval between the preparatory and the executive commands as is intended will be left between the executive command and the completion of the movement as:

In Place (interval one-half second), Rest. (Interval one-half second.) Foot strikes the ground.

Forward (interval one-half second), MARCH. (Interval one-half second.) Left (one-half second); Right (one-half second); and so on.

DELAYED METHOD.—In this method the preparatory command is followed by a pause considerably longer than the rhythm would require. This conduces to the most perfect understanding of the order, fixes the attention by producing a nervous tension of expectancy and gains a more certain response. This method often brings back the flagging attention of a class.

The rhythmic method is the one that should be used habitually. A class does not have to be told about the method of command, but will naturally follow out any rhythm established in the order. All through gymnastics this principle can be used with effect.

"The tone of command is animated, distinct, and of a loudness proportioned to the number of men under instruction. Each preparatory command is pronounced in an ascending tone of voice, but always in such a manner that the command of execution may be more energetic and elevated. The command of execution is pronounced in a firm, brief tone." (U. S. A.)

Voice.—The physical trainer must learn to use the voice correctly, or suffer from a disordered class, continued physical discomfort, and an occasional breakdown. This is not the place to go into details of voice training, as there are several good books obtainable on the subject. In outline, the important points are: 1, Correct position with high chest, giving increased breathing capacity and increased resonance; 2, Abdominal expiration completed before the chest expiration commences; 3, Tone placing, not in the throat, "in front of the brow, at a distance."

To insure the correct use of the voice the physical condition must be of the best. The teacher must always and

ever exemplify what he is teaching: correct position, accuracy, and decision of movement. The physical condition of the teacher will be mirrored in every movement of the class.

The teacher must cultivate a military feeling, a feeling of rhythm and of readiness, and the class will show the result. A mind full of the work in hand means the best results; preoccupation on the teacher's part will lead to a lazy and disordered class.

Teaching.—Control of a class depends upon several factors: 1, a thorough knowledge of the work given, and the consequent confidence and respect of the class; 2, thorough exemplification of the gymnastic and military ideal in the teacher himself; 3, eternal vigilance and strictest discipline, setting a mark for discipline and never allowing a departure from it, "meaning business" all the time and "keeping at it"; 4, correct methods of teaching: a, get order and maintain it, even at the price of delay in teaching; nothing can be done without "100 per cent. order"; b, do not present too much at one time; c, show the work and explain it briefly; do not point out any difficulties until they actually arise; d, explain fully how the work is to be done on the command, and the rate at which it is to be done; e, try the movement once or twice, then correct class or individuals and combat difficulties as they arise; f, repeat until the movement is as perfect as could reasonably be expected of the class at its stage of training; Do not drop it half learned in the endeavor to maintain interest by giving something new. Make the thing interesting by rest, and, during rest, an explanation of the movement and interesting facts, military or otherwise,

associated with it. The following extract from "The Military Tactics" is of value: "The instructor explains each movement in as few words as possible, at the same time executing it himself. He requires the recruits to take by themselves the proper positions and does not touch them for the purpose of correcting them, except when they are unable to correct themselves; he avoids keeping them too long at the same movement, although each should be understood before passing to another. He exacts by degrees the desired precision and uniformity. When the execution of a movement is improperly begun and the instructor wishes to begin it anew for the purpose of correcting it he commands: As you were, at which the movement ceases and the former position is resumed." (U. S. A.)

Definitions.

Alignment—A straight line upon which several men or bodies of men are formed.

Column—A formation in which the elements are placed one behind another.

Depth—The space from head to rear of any formation.

Distance—Space in the direction of depth.

Echelon—In the order in echelon the individuals or units are placed one behind another, extending beyond or unmasking one another wholly or in part.

Facing Distance—Fourteen inches.

File—Two men, a front rank man and the corresponding man in the rear rank.

Flank—The right or left of a command in line or column. Interval—Space between the elements in the same line.

Pace—Thirty inches, the length of a full step in quick time.

Rank—A line of men placed side by side.

Following practically the order in which a teacher would put into use his commands with an untaught class, the following manœuvres are given: 1, the name of the manœuvre: 2, the command: 3, the description and comment:

Attention.—Class. Attention. "Each individual stands firm in position."

Position.—"Heels on the same line, as near each other as the conformation of the land permits. Feet turned out equally and forming with each other an angle of about 60 degrees. [See note below.] Knees straight without stiffness. Body erect on the hips, inclining a little forward. Shoulders square and falling equally. Arms and hands hanging naturally, backs of the hands outward, little fingers opposite the seams of the trousers, elbows near the body. Head erect, square to the front, chin slightly drawn in without constraint, eyes straight to the front." (U. S. A.)

NOTE. For gymnastic purposes, and perhaps for all purposes, it is better not to have the toes turned out 60 degrees, but to decrease the angle to 30 degrees or below, approaching the more hygienic "straight foot."

The order shoulders back should very seldom be given to an individual, and never to a class, as it results in throwing the head and abdomen forward. The position is better corrected by the command raise chest. The correct position of shoulders can be attained by insisting upon the weight being forward upon the balls of the feet. The body should swing forward from the ankles, and not from

the hips, as the above quoted description might be construed to indicate. The position as usually taken by the untrained is faulty and poor as regards the position of the *head* and the distribution of the *weight* and can be corrected mainly by attention to these points.

When attention is gained, the class standing in dispersed order in silence, the following command is given: Class, Fall In. (Indicating place and position between preparatory and executive order, if necessary.)

"The instructor requires the recruits to place the palm of the left hand upon the hip, below the belt when worn; he then places them on the same line, so that the right arm of each man rests lightly against the left elbow of the man next on his right, and then directs the left hand to be replaced by the side. The men thus find themselves with an interval that allows for a free movement of the arms. When the recruits have learned how to take their places, they are required to assemble without assistance on the command—fall in. They assemble rapidly, as above prescribed, at attention, each man dropping the left hand as soon as the man next on his left has his interval." (U. S. A.)

If arrangement as to size is desired (as should always be the case), directions to that effect should be given with the preparatory order. The largest should be on the right flank.

PREFERRED METHOD.—Have the left arm slightly bent, by raising the hand only three inches, thus giving room enough for all necessary manœuvres without crowding. This method is advocated for general use in schools.

DRESS.

Right, Dress; Front.

Turn the head to the right, the shoulders remaining square and at equal height. Observe with the left eye the line, and shift the position of the feet so that the chest will be on a line with the neighboring two pupils on the right. The left hand should be raised three inches, bending the elbow slightly; in this position move to the right until the right arm touches the neighbor's elbow.

Caution:—Keep the head erect, shoulders on a line, not twisted; the body must be adjusted by moving the feet and so maintaining the correct position, and not by shifting the weight of the body backward or forward which would destroy the equilibrium.

Note—1. Military dress, with palm raised to waist, gives greater interval.

2. Dress can be made to center or to any designated man of rank.

RESTS.

In place, REST. Class, ATTENTION.

The right foot is moved 6 inches straight to the rear and turned slightly outward from the straight foot position, the weight being held evenly on both feet. Place the left hand in the right behind the body with the arms and the knees straight.

Class, At Ease. Class, Attention.

"Keep one heel in place, and preserve silence but not immobility." (U. S. A.)

(Note—Parade, Rest is not given, as the arms are placed in this position in front of the chest.)

FACING.

Right, FACE.

"Slightly raise the left heel and right too and face to the right, turning on the right heel assisted by a slight pressure on the ball of the left foot; Left face is executed upon the left heel." (U.S.A.)

About, FACE.

"Executed on the *right* heel. Raise slightly the left heel and right toe, face to the rear, turning to the right on the right heel and the ball of the left foot; replace the left foot beside the right." (U. S. A.)

MARKING TIME.

Mark time, MARCH.

Start with the left foot and make a semblance of marching, without gaining ground, by alternately advancing each foot about one-half its length and bringing it back on a line with the other.

Class, Halt.

The executive command is given when the left foot is returned to place, it remains there, and the right foot finishes the step, closing to the left.

FACING WHILE MARKING TIME

Right, FACE.

The preparatory command is given when the right foot strikes the ground; the left foot takes another step, and the executive command is given when the right foot strikes the ground again. The left foot is advanced, returns to place and the turn is made upon it while the right foot is in the air.

COUNTING OFF WHILE IN LINE AT A HALT.

Count off twos (3-4-6-8), Count.

This should start from the right flank. Each man should turn his head as he speaks his number toward his neighbor on the left and immediately bring his head again to the front.

Count off, Running order, Count. Count up to total number in class.

MARCHING FROM PLACE.

Forward, MARCH. Class, HALT.

"The length of the full step in quick or regular time is thirty inches, measured from heel to heel, and the cadence is at the rate of 12) steps per minute.

At the command forward, throw the weight of the body upon the right leg, left knee straight. At the command march, move the left leg smartly but without jerk, straight forward 30 inches from the right, measuring from heel to heel, sole near the ground; straighten and turn the knee slightly out; at the same time throw the weight of the body forward and plant the foot without shock, weight of body resting upon it; next, in like manner, advance the right foot and plant it as above; continue march." (U. S. A.)

Note. To secure quick and uniform starting, and obviate the lagging that is always shown by a new class, it is advisable to use the following preliminary orders in rank and column until considerable facility is gained.

One step forward. March.

Take one step forward with the left foot; close with the right foot. It is often an assistance to a correct idea of length to pace to insist that the left foot on this order

take the place vacated by the left foot of the student in front (while in single file).

Two steps forward, March.

This can be given in a similar way. The distance between students is easily regulated by having them march with the elbow bent at the hip and the forearm and fingers stretching forward, just touching the elbow of the student in front.

VARIATIONS IN MARCHING.

Short step, March.

Take steps of 15 inches. If, while marching in double time, 18 inches.

Side step right, March.

Carry the right foot 12 inches to the right, keeping knees straight and shoulders square to the front; as soon as the right foot is planted, bring the left foot to the side of it; continue the movement, observing the cadence for each foot.

Backward, MARCH. (From a halt.)

Step backward with the left foot 15 inches to the rear, measuring from heel to heel, then with the right, and so on, the feet alternating. At the command *halt*, bring back the foot in front to the side of the one in the rear.

Forward, Double time, MARCH. (From a halt, marking time or marching.)

"At the command forward, throw the weight of the body on the right leg; at the command MARCH, raise the hands till the forearms are horizontal, fingers closed, nails toward the body, elbows to the rear; carry forward the left foot, knee slightly bent and somewhat raised, and plant the foot 36 inches from the right; then execute the same motion with the right foot; continue this alternate movement of the feet, throwing the weight of the body forward and allowing a natural swinging motion to the arms." (U. S. A.)

TO HALT.

From Quick Time.

Class, Halt.

At the command *halt*, given as either foot is coming to the floor, advance the other foot one step; the first is then brought up and planted without shock by the side of the other.

From Double Time.

Class, Halt.

Give the command halt, when the left foot strikes the ground; take another step forward with the right foot, then with the left foot, and close right foot to left.

MARCHING FROM PLACE AND CHANGING DIRECTION.

From a halt.

By the right flank, MARCH.

At the command march, turn 90 deg. to the right, stepping off immediately with the left foot without closing it to the right.

• Left oblique, March.

Executed as above, with turn of 45 degrees.

To the rear, MARCH.

Executed as above, with turn of 180 degrees. Always made to the right.

CHANGE OF DIRECTION WHILE MARCHING.

By the right flank, MARCH.

At the command *march*, given as the right foot strikes the ground, advance the left foot, turn to the right on the ball of the left foot and take a step in the new direction with the right foot.

To the right oblique, MARCH.

Executed as the previous movement, the change of direction being 45 degrees.

To the rear, MARCH.

"At the command murch, given as the right foot strikes the ground, advance and plant the left foot; then turn on the balls of both feet, face to the right-about and immediately step off with the left foot.

"If marching in double time, turn to the right-about and take four short steps in place, keeping the cadence, and then step off in the new direction with the left foot." (U. S. A.)

Backward, March.

The command march is given when the left foot strikes the ground; the right foot finishes the step forward, the left foot is then raised backward and planted in the same spot; the right foot then takes a place fifteen inches back of it; the movement is continued, alternating with steps of fifteen inches.

MARCHING IN SINGLE FILE.

 To change direction of march and maintain column. Column right, MARCH.

The command *march* should be given as the right foot of the leader strikes the ground; the left is then advanced

and a turn of 90 degrees is made on the ball of the left foot, the right taking the first step in the new direction. In the corners of the gymnasium this should be taken without command.

2. Column half right, MARCH.

Executed as the previous movement, the change of direction being 45 degrees.

3. Countermarch right, MARCH.

The leader turns 189 degrees to the right in a half circle with four steps, the others follow.

4. Marching in column, counted off in fours, to march in column of two or four, and continue in the same direction.

Form twos, right oblique, MARCH.

At the command *march*, Numbers 1 and 3 mark time till Numbers 2 and 4, respectively, oblique to their sides, when the march is resumed by twos.

4b. Form fours, right oblique, MARCH.

Number 1 marks time till Numbers 2, 3, and 4 have obliqued to his side, when the march is resumed by fours. A column of fours, from column of twos, is formed in a similar manner.

5. Marching in column, to march to the flank in line. By the right flank, MARCH.

Each member of the line executes the order by the right flank, march, as given. The line guides to the left.

GUIDING—The man on the end of the line on which the guide is made marches straight to the front. The men preserve their intervals, toward the guide, yielding to pressure on that side and resisting pressure from the opposite direction. While habitually keeping the head to the front they may occasionally glance toward the side of the guide to preserve alignment and intervals. The head is turned as little as possible for this purpose.

Guiding can be made on right or left flank, center, or on any designated member of the line.

6. To form column of fours proceeding to the side. (See cut No. 10.)

By the right flank, form fours, MARCH.

At the command march the first four execute a right flank and step off in the new direction, the next four continue to march till they can execute the right flank on the same ground as the first four have done, when they execute the right flank and follow the first four.

7. To the right oblique, MARCH.

Each individual executes a turn of 45 degrees and continues in the new direction, preserving the line.

STANDING IN LINE.

1. To march to the flank in column.

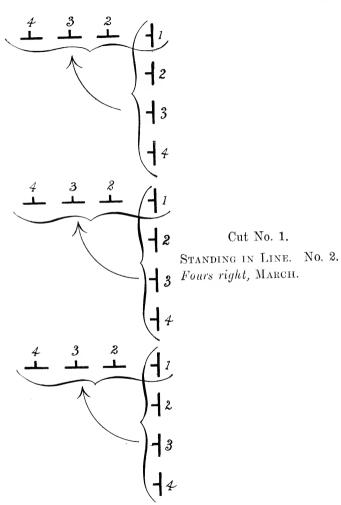

By the right flank, March.

On the command *march*, turn to the right on the right heel and the ball of the left foot and instantly step forward with the left foot.

2. To march by the flank in column of fours. (See cut No. 1.)

Fours right, March.

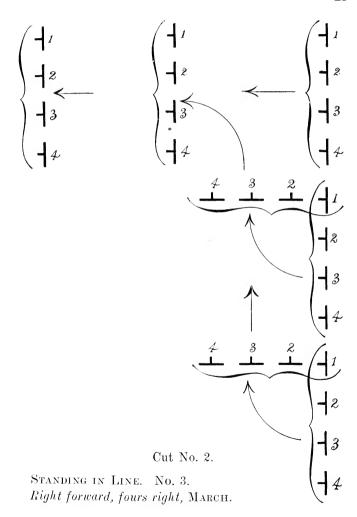

"At the command march, each four wheels 90 degrees to the right on a fixed pivot, the pivot man turning strictly in his place; the man on the marching flank maintains the full step, moving on the arc of a circle with the pivot man as the center; the men dress on the marching flank, shorten their steps according to their distance from it, and keep their intervals from the pivot." Having executed the quarter-turn the column of fours thus formed marches forward.

3. To march to the front in column of fours. (See cut No. 2.)

Right forward, fours right, MARCH.

"At the command march, the right four moves straight to the front, shortening the first three or four steps, the other fours wheel to the right, each on a fixed pivot; the second four, when its wheel is two-thirds completed, wheels to the left on a movable pivot and follows the first, the other fours, having wheeled to the right move forward, and each wheels to the left on a movable pivot, so as to follow the second."

4. To turn and form a line in a new direction at a halt. (See cut No. 3.)

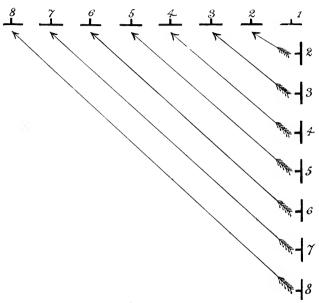

Company right, March.

"The man on the right faces to the right. The others half face to the right and, marching with a regular step, place themselves successively on the alignment established by the man on the right; all dress to the right without command. The instructor verifies the alignment from the pivot flank and commands front."

5. To turn and form a line in a new direction and march in that direction.

Right turn, MARCH, Forward, MARCH.

At the command march the man on the right flank marches to the right flank by short steps, the other men half face to the right and moving by the shortest route place themselves on the new line when they take up a short step. As soon as the men have arrived on the line, the instructor commands: Forward, MARCH, and the full step is taken up.

Cut No. 3.

Standing in Line. No. 4. Company right, March.

ward.

MARCHING IN LINE.

1. To march in column to either flank.

By the right flank, MARCH.

Each man executes a right flank and marches to the right.

2. To form column of fours, new direction.

Fours right, March.

Executed as fours right when standing in line.

3. To march to the front in column of fours. Right forward, fours right, MARCH.

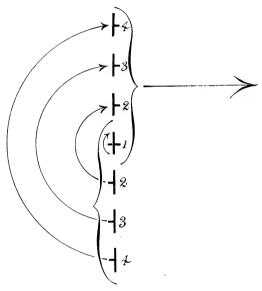

Executed as from the standing position.

- 4. To turn and march to the rear.
 - (a) To the rear, March.

 Each man executes a rear march.
- (b) Fours right about, March. (See cut No. 4.) Each four executes a turn of 180 degrees on a fixed pivot and simultaneously arriving in line marches for-
- 5. To wheel and regain same line (for practice in wheeling).

Fours right wheel, MARCH.

Fours wheel to the right, as in *fours right*, through a complete circle and continue wheeling until the order *halt*.

Cut No. 4.

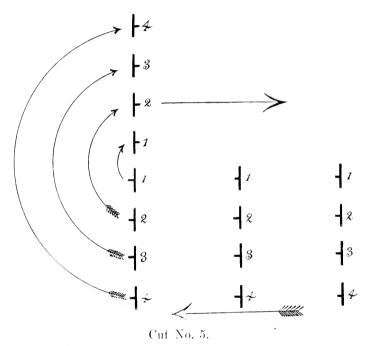

MARCHING IN LINE. No. 4b. Fours right about, March.

MARCHING IN COLUMN OF FOURS.

- 1. To change direction of column.
 - (a) Column right, MARCH.

At the command march the leading rank of fours wheels 90 degrees to the right on a movable pivot, who takes steps of ten inches in quick time, and twelve inches in double time, gaining ground forward so as to clear the wheeling point. The man on the marching flank maintains the full step, moving on the arc of a circle with the pivot man as the center, the men dress on the marching flank, shorten their steps according to the distance from it and keep their intervals from the pivot. Upon the completion of the wheel the leading four resumes the full step and succeeding fours wheel in the same manner at the same spot.

- (b) Column half right, MARCH.
- Executed in a similar manner with a turn of 45 degrees.
- (c) Countermarch right, MARCH. (See cut No. 5.) Executed as above with a turn of 180 degrees.

MARCHING IN COLUMN OF FOURS. No. 1c. Countermarch, right, March.

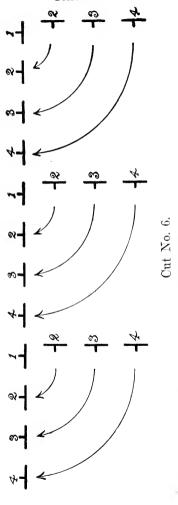

2. To march by the flank in line. (See cut No. 6.) Fours right, MARCH.

At the command march each four wheels to the right 90 degrees, forming a line and marching forward in the new direction guiding to the left.

3. To march to the rear in column of fours, reversing the marching order.

Fours right about, March.

On the command *march*, fours wheel to the right, executing a turn of 180 degrees, and continue marching in the new direction in column of fours.

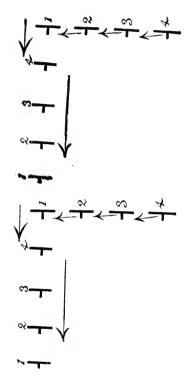

MARCHING IN COLUMN OF FOURS. No. 2. Fours right, MARCH.

4. To form right into single file. (See cut No. 7.) Right by file, MARCH.

At the command *march*, the first man moves forward, the others execute a turn of 45 degrees to the right, march obliquely, falling in behind the first man in single file.

Single file from column of twos is similarly executed.

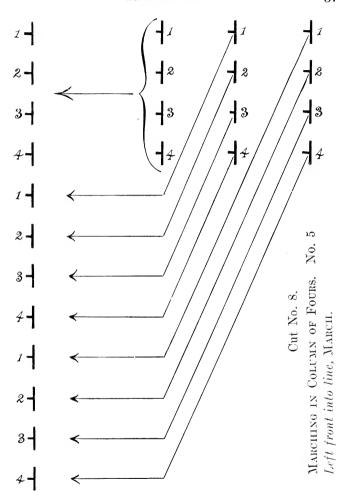

Cut No. 7.

Marching in Column of Fours. No. 4. Right, by file, March.

5. To form a line without change of direction. (See cut No. 8.)

Right front into line, MARCH.

At the command *march* the leading four moves straight to the front, dressing to the left; the other fours oblique to the right until opposite their place in line, when each marches to the front.

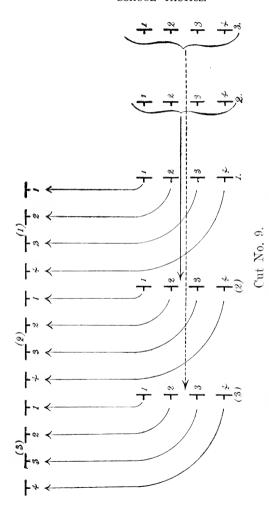

6. To form a line with change of direction. (See cut No. 9.)

On right into line, MARCH.

At the command *march*, the leading four wheels to the right on a movable pivot and moves forward, dressing to the right; each of the other fours marches a distance equal to its front beyond the wheeling point of the next four proceeding, wheels to the right and advances as explained for the first four.

Marching in twos, three, fours, fives, sixes, eights, etc., the evolutions are executed in a similar manner.

Marching in Column of Fours. No. 6. On right into line, March.

CLASS FORMATION.

Class formations made directly from line present the quickest method of forming for class work, and may be used successfully with a small class standing along one side, preferably the short side of the gymnasium. These methods cannot well be used with a large class in a small gymnasium, for if the line be too long, the front of the class will be too broad to be commanded and taught effectively by the instructor; and if he takes his place on one flank with the class facing him, the depth will be too great.

If the classes line up in two lines on opposite sides of the gymnasium, facing the center, or if the two lines are facing the same way, a sufficient distance apart, twice the number can be handled by these very quick methods.

The line is supposed to be counted off in fours.

OPENING ORDER FROM A LINE (FRONT RANK).

1. To open order in echelon preserving direction.

Front take distance, March, Class, Halt.

"Number one of each four marches straight to the front, Number two marches off as soon as Number one has advanced the specified number of steps (two paces), Numbers three and four move off in succession in like manner. The proper distance being attained, *Class*, Halt, is given." (U. S. A.)

Note—The above strictly military method may well be varied. It is simpler to assign a number of steps to Numbers one, two, three, say six, four and two steps, respectively, Number four standing in place, and the others start at once at command of March. If space is wanting,

three, two, and one steps may be taken; if considerable space is available, and bar bells or indian clubs are to be used, the intervals should be increased.

(a). To form line from above formation.

Assemble, March.

Number one stands in place, the other men move forward and close to their proper places in the line.

2. To open order backward or forward forming two lines at double distance.

Even numbers one step backward, odd numbers one step forward, MARCH. This may be varied.

3. To open order after forming column of fours with change of direction

Fours right, MARCH.

This forms column of fours, from which any of the methods of class order from that formation may be obtained. (See Opening Order from Column of Fours.)

4. To open order after forming column of fours in same direction

Right forward, fours right, MARCH.

Forming column of fours in same direction (See Opening Order from Column of Fours).

To open order after forming single file.

Right, Face.

Forming column at a halt. (For formation, see Opening Order from Single File.)

6. To open order after forming in marching column of files

By the right flank, MARCH.

Forming single file marching in new direction. (See formations under "Opening Order from Single File.")

OPENING ORDER FROM SINGLE FILE.

1. Opening order short distance to right and left forming two columns at double distance

Even numbers to right, odd numbers to left, two steps, March.

Opening order to right, preserving direction by side step.

Number four stands, number three two steps, number two four steps, number one six steps sideways right, March.

3. Opening order to the right forming echelon facing right

By the right flank number two two steps, number three four steps, number four six steps, March. Number one faces to the right and stands fast, the other numbers face and march to the right as directed and halt.

4. To open order after forming column of fours marching in same direction.

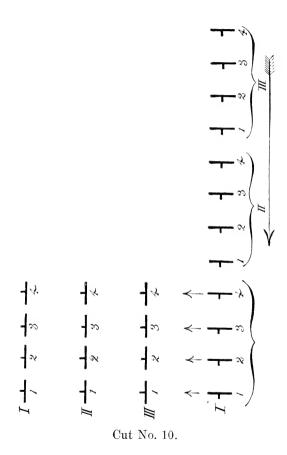

Form fours, right oblique, MARCH. (For formation see Opening Order from Column of Fours.)

5. To open order after forming column of fours marching in new direction

By the right flank form fours, March. (See cut No. 10.)

The first four executes "by the right flank" and marches forward, the others follow and execute "by the right flank" on the place where the first four turned and follow them.

Note. It is a great saving of time as well as an effective movement to give a command to open orders to the fours as soon as formed, when they come up the floor in open order and can be halted at will.

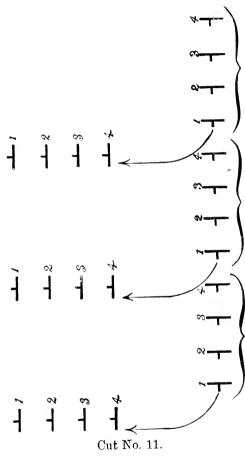

OPENING ORDER FROM SINGLE FILE. No. 5. By the right flank form fours, March.

6. To open order by forming columns of fours and marching in new direction. (See cut No. 11.)

Fours column right, MARCH.

Number one turns to the right and leads his four to the right. From this formation (which also can be obtained by giving the command: By the right flank, March, to a column of fours) the following methods of opening order can be used:

- (a) Give separate order Halt for number four first, then numbers three, two, and one, in order, when the class has marched a sufficient distance forward.
- (b) Command Halt. Then open order sideways or forward by any method desired.

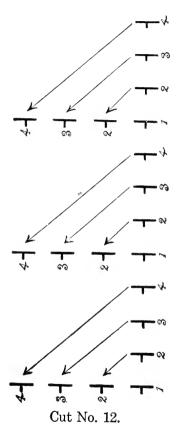

OPENING ORDER FROM SINGLE FILE. No. 6. Fours, column right, March.

7. To open ranks to the right in fours. (See cut No. 12.)

Fours open ranks right obliquely forward, arms length distance, MARCH.

On command MARCH, number one stands fast, the others oblique to the right, number four being furthest out, until all are even with number one and at arms' length distance from each other facing to the front.

Opening Order from Single File. No. 7. Fours open ranks obliquely, forward, arms length distance, March.

OPENING ORDER FROM COLUMN OF FOURS.

- 1. To open order to one side.
 - (a) To the right take intervals, MARCH.

"At the command march, the man at the left flank stands fast; the other men face to the right and step off, each man halting faced to the front when he has the proper interval." (U. S. A.) (The proper military interval is two paces, "four paces when armed.")

To regain column of fours.

(a) To the left assemble, MARCH.

"The man on the left flank stands fast, the others close, reversing the previous formation." (U. S. A.)

- 2. To open order to both sides.
 - (a) Open order from center double arms' length distance, Marcii.

Numbers one and two side step to the right, numbers three and four to the left, raising both arms. When hands do not touch neighbors' hands, stand and drop arms to the side.

- **3**. To open order to both sides by encircling.
 - (a) By encircling rear numbers two and three six steps open order, MARCH.

Numbers one and four remain standing. Number two faces three-eighths turn to the right, number three three-eighths turn to the left, and in six steps passing rear form to the side of numbers one and four, respectively, in a straight line. This can also be done with one-eighth turn, passing to the front, by the command—By encircling front, etc.

4. To open order to the front.

Front take distance, MARCH.

Or other methods mentioned under "Opening order from line."

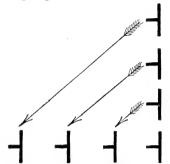

TRANSFORMATIONS.

Changing from Line to Column and from Column to Line. In addition to the regular military tactics, there are many ways of transforming the rank and file for educational and exhibition work.

These tactics are not based on the military code, but are nevertheless useful for gymnastic purposes. Under this heading we make the following subdivisions: From a line or column, transformations by

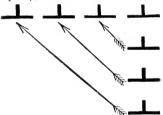

- 1. Obliquing.
- 2. Following.
- 3. Right angles.
- 4.. Evading.
- 5. Encircling.

1. (a) By obliquing from a line.

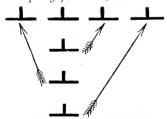

Form left obliquely forward, March. (Four counts.) This can also be executed to rear.

(b) By obliquing from column.

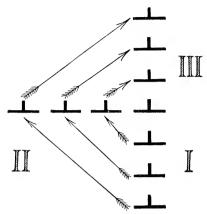

Form to left obliquely forward, MARCH. (Four counts.)

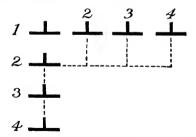

(c) Form to right and left alternately obliquely forward, March. (Four counts!)

Combinations:

(a) Form to the left obliquely forward and form right in front obliquely forward, MARCH. (Eight counts.)

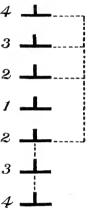

2 (a) With following. (From column.)

Form to the right forward following, MARCH.

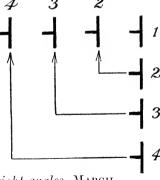

Number one remains standing, number two executes right face marches one step forward, executes left face, takes one step forward, and forms to the right of number one. Number three follows number two, taking one step more in direction of first turn and then forms next to number two. Number four adds one step in each direction.

(b) Form in front passing right, following, MARCH.

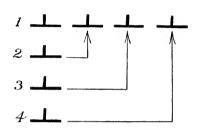

Number one remains standing. Numbers two, three and four proceed as above. 4 3 2

3. By right angles from line.

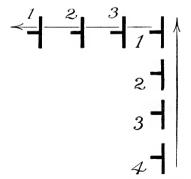

(a) Form right in front at right angles, MARCH.

Number one remains standing. Numbers two, three and four take as many steps forward as they are number in line, execute right face, and with the same number of steps forward again and a left face form in front of number one. (Eight counts.)

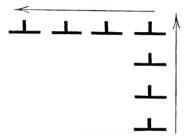

- (b) Form to the right forward at right angles, MARCH.
- **4**. (a) By evading from line.

Form right in rear closing step evading forward, March.

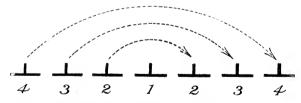

Number one steps forward three steps. Number two steps right sideways, closes left, then takes another step right sideways and steps forward in direction of number one with left foot. Others follow, all beginning with right foot.

(b) By evading from column.

Form to right forward evading left sideways. Crossstep, March. All begin with left foot.

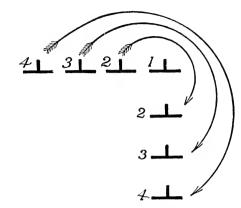

5. (a) By encircling from line forming line.

Form to right by encircling front, MARCH.

Number one remains standing, numbers two, three and four execute an eighth turn right and in a semicircle form to the right of number one. On arriving at place they face three-eighths face left to a line on the ball of the right foot, closing with left foot. All begin with left foot.

(b) By encircling from line to a column.

Form right in rear encircling front, MARCH.

Number one remains standing, number two, three, four execute an eighth turn right and in are encircle number one, passing front, form in rear of number one and face as number one.

CLASS FORMATIONS FOR ELEMENTARY SCHOOLS

Class formation in the elementary schools is a distinct problem on account of the supreme importance of saving time. Every moment is needed for the gymnastic lesson proper. On this score all formations based on "counting off" are debarred. Where the usual number of absentees is not large enough to make it objectionable, permanent numbers may be assigned, and the simpler of the formations already described used.

As variety, rather than uniformity, is desirable, the methods here given are intended to be merely suggestive. Conditions vary greatly, and each case must be considered on its own merits. The way that is most direct and effective, under the special conditions, is the one to be chosen. The chief considerations are: Number and age of pupils; shape and size of the room; location and number of apparatus racks; location of entrances. Attention to these and other details may reveal some plan that is particularly well adapted to each school.

There should be at least two racks for apparatus, one on each side of the entrance to the gymnasium. These should be unlocked for the entire period in each half-day session in which the gymnasium is in use.

"Sizing" should be accomplished as line places are taken in the classroom (when no change of costume is made), or upon the command Fall In, when pupils assemble in the gymnasium. It is frequently possible to take advantage of the existence of "sized" rows of pupils as they sit in the classroom, as for Formations 2 and 6. (See below.)

Double rank is preferred as being speedier and giving a shorter line to oversee. It is necessary to use the single file formation in case there is only one apparatus rack. Apparatus should be taken from, and returned to, the last, not the first, place in the rack that the pupil passes. The lines should be reversed in leaving the gymnasium, so that each piece of apparatus may be returned to its own place. This is imperative only when the pieces of apparatus vary in size. Apparatus should be carried in a designated noiseless way until the instant of being returned quietly to place. Where there is but one rack, the distribution of some apparatus, as wands or bar bells, may be facilitated by supplying several monitors to hand them out as the class marches to place.

The marching in hallways and on stairs is a part of the lesson, and should be as perfect as possible.

The formal commands may be omitted, and the process of going upon the floor reduced to a routine procedure. The columns will usually cover leaders, securing a correct alignment from front to rear; the ranks will dress right or left upon the designated or usual guide. The interval between the leaders of columns and between the guides may be left to their individual judgment, or it may be corrected by "taking distance" in one of several ways.

It is possible to execute all the movements of these formations in double time, and it is suggested that it be tried as soon as a class is proficient in the formation in quick time.

FORMATIONS.

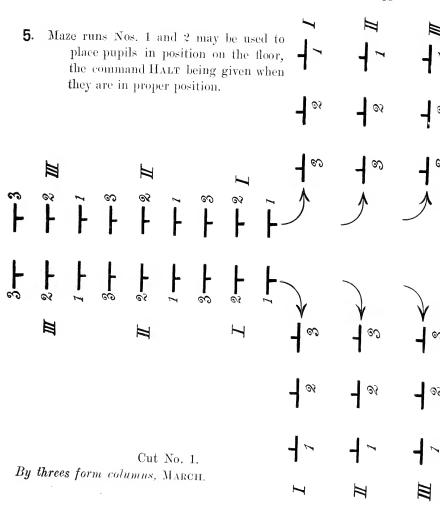

1. By threes (fours, etc.), form columns, Marcii. (See cut No. 1.)

The leader of each of the two lines, which are marching down the middle of the floor toward the rear of the room, executes a column right or left away from the center, the next two units following the leader. All six stop and face the front after gaining the necessary interval. They are the leaders of the columns. The other pupils execute the same maneuver in successive threes, after passing byond the first three.

This formation is equally effective for single rank. To Assemble.

Assemble, March.

All face outward and, following the leaders, form lines.

2 (a). Form columns of sixes (sevens, etc.), MARCH. (See cut No. 2.)

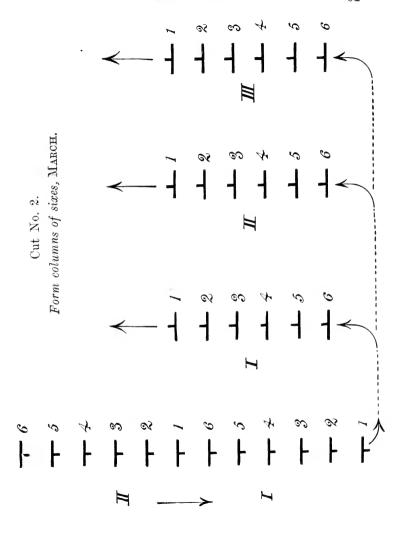

Marching down the side of the room the leader of the first six turns across at the back of the room, and then executes a column right or left toward the front. The leader of each of the other sixes executes a similar movement, turning toward the front at a proper interval from the six in front of his.

For this formation pupils should be "sized" in sixes. The rows of pupils as they sit at desks in the class room should be utilized when it is possible; and in this case the pupils should leave the class room with the row on the left (or the right) side of the room leading.

To Assemble.

Assemble, Marcii.

The pupils close order to the front, and the line first in the gymnasium is the first to leave.

2 (b). Form line, MARCH.

This formation will place the pupils on the floor in the positions corresponding to their seats in the class room, as in the preceding formation, and differs from it in order that a different method may be used in leaving the class room. The pupils in the front seats will become the leaders of the columns on the floor; these leave the room at the head of the line, followed in turn by those on the second row, these in turn by the third, so that the last to leave the room are the pupils in the rear instead of those at the side as in the previous formation.

On entering the gymnasium the line proceeds to the rear, the leaders march across till they arrive at the proper places for their columns, turn to the front and march forward abreast, preserving the proper distances. They stop at designated points and either halt without command or mark time till the command is given. The facing and stepping off at the rear of the room may well be done on command Face, March, until they are proficient.

To Assemble.

Assemble, March.

The leaders execute a right flank and march off, the next rank marches forward, executes a right flank on the same ground and follow; the others proceed similarly.

3. To form lines of fours, fives, etc., from single rank. By the right flank form column of fours, MARCH. (See cut No. 10, page 43.)

At the command MARCH, the first four executes a right flank and steps off in the new direction; the next four continues to march until it can execute the right flank on the same ground as the first four; it then executes the right flank and follows the first four. After the fours have obtained their positions on the floor, it will be necessary to open order. (For methods see "Opening Order From Column of Fours," page 48.)

To Assemble.

In fours by the right flank, MARCH.

The leading four executes a right flank and marches off, the other fours march forward and execute a right flank on the same ground following the first four.

4. From one or more columns in single rank.

Forward at two (three, etc). paces, column countermarch left and right alternately, MARCH.

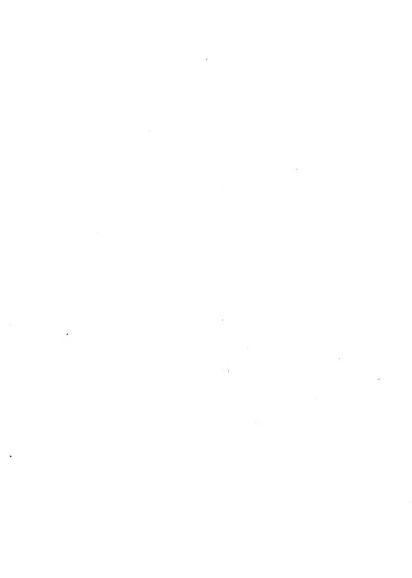

The leader executes a countermarch left; the next pupil countermarches right, and so on alternately. When the number of paces is included in the command, the designated number of steps will be taken outward away from the original line, instead of the usual one step.

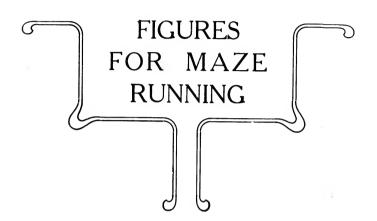

To Assemble.

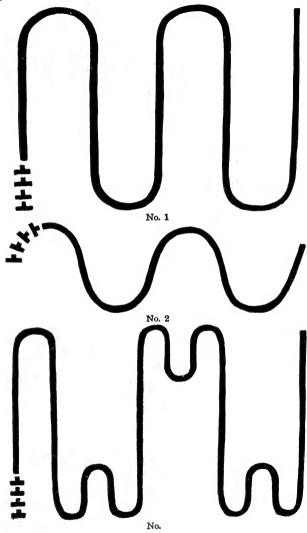

Forward (at two paces, etc.), column, countermarch left and right alternately, MARCH.

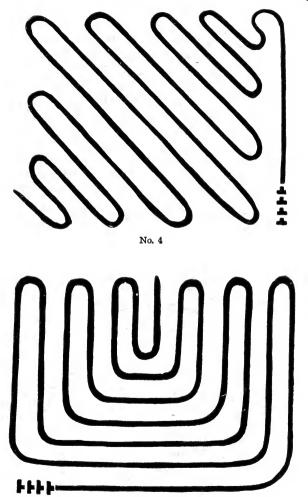

Single rank is found by executing the appropriate column countermarch left or right.

Note. See definitions of column and rank, and description of countermarch.

THE FINEST EQUIPPED GYMNASIUM IN THE WORLD

The progress made in the manufacture and the mechanical perfection of the various gymnastic appliances shown in the complete gymnasium installed by various gymnastic appliances since the World's Fair, demonstrated that the firm is alive to the imperative need of the times. Physical training is being rapidly advanced and in the congested sections of the country it is a growing problem how to provide for the new conditions. This is particularly true in public school work and similar institutions. Real estate in large cities is extremely valuable, and as a consequence, gymnasiums are often reduced in size and wholly inadequate to the growing needs. This means that the apparatus of the past of a fixed or cumbersome character must be superseded by appliances that may be rapidly and conveniently handled in a manner to accommodate the constantly increasing number of boys and girls needing systematic physical development.

A. G. Spalding & Bros., who outfitted the complete gymnasium at the World's Fair and received the Grand Prize and Gold Medal in competition for their ex-

hibit, are to be congratulated on their enterprise.

1 Spirometer—shelf. 1 Dynamometer for Grip.

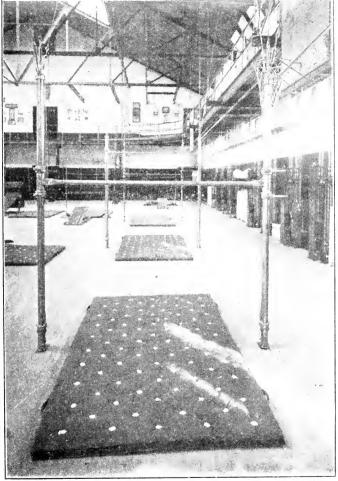

Cut No. 1—The above is a combination piece of wall apparatus which may be used as a rowing weight, back and loin pulley, direct chest pulley with upright backboard, or intercostal overhead pulleys. Either set of handles is always ready for use, and requires no adjustment.

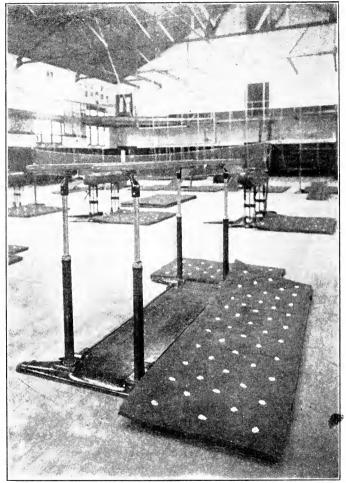

feature about it is the locking device, whereby an entire row of Indian clubs or dumb bells may be locked or unlocked with one throw of the lever, the object of the device being to place the control of the apparatus entirely in the hands of the instructor. The character of the hanger is decidedly unique and practical and is original with A. G. Spalding CUT No. 2-A portable Indian club and dumb bell rack, made of oak, mounted on rubber-tired wheels. The particular

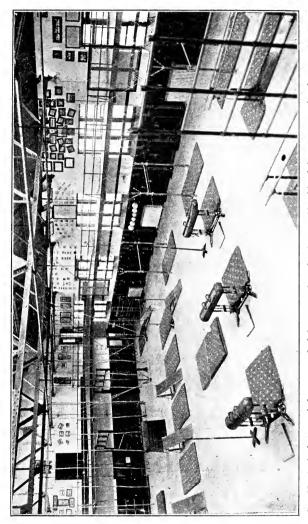

CUT No. 3-A new style of jumping standard that was favorably commented on by all who saw it. It is elaborately made of polished brass tubing and brass fittings, having a heavy iron round base. The particular feature of its construction was the automatic pin arrangement which was permanently attached to the standard and was instantly adjusted, locking itself when released at the desired height.

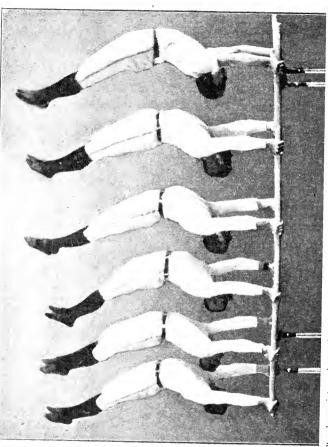

CUT No. 4—Shows a combined horizontal and vaulting bar of entirely new construction. The bars are suspended by overhead guys and these guys are tightened and the bar thrown into position at the floor by the use of one lever on each upright. The principle is radically new, and is certainly most successfully applied. The bar requires only two floor plates and two points of attachment at the floor, eliminating the spread of guys, thereby saving floor space and greatly facilitating the handling of the apparatus in clearing the floor for other work.

Cut No. 5—Illustrates a pair of parallel bars, the design of which was particularly commended by the entire body of Turn Verein representatives who used them in the Olympic gymnastic contests.

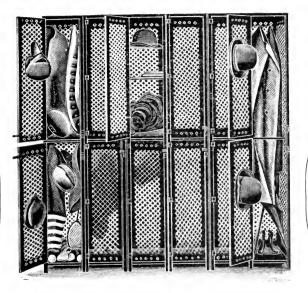

Cur No. 6-A photograph from one end of the gymnasium showing considerable of the apparatus in place on the floor. The net in the centre of the room is for volley ball games. Owing to the character of the apparatus the floor may be quickly cleared for games of this character at short notice.

the International Championships at St. Louis on Juby I and 2, 1994, requesting that they be permitted to use the apparatus of the Spaiding Rymnasium exhibit in the Rymnastic tournament, and at the The above picture shows the team of German Turners that came to America especially to compete in highly complimenting the firm on their gymnastic apparatus. The same request was made by the pionships with best results. In the International A. A. U. Championships, A. G. Spalding & Bros.' conclusion of the two-day meeting voluntarily forwarded to A. G. Spalding & Bros. a testimonial Young Men's Christian Association of America, and the apparatus was used by them for the chamappraratus was likewise used, and the chairman of the committee declared the apparatus to be the best ever used in connection with a championship meeting,

Spalding Patented Running and Jumping Shoes

(Patented December 2, 1902)

Their merits speak for themselves. The most successful

runners and hurdlers use these shoes.

In these shoes the spikes cannot by any possibility come in contact with the foot. The rubber sole is an assistance, in that it is partly underneath the spike, and therefore acts in the nature of a cushion, and our patented principle enables us to place the spikes so that they will not come loose after being wet, as water has no effect on the rubber sole. We also claim that on account of the non-slippable purchase a runner obtains with this sole, he is able to make a quicker start than is possible with a shoe of ordinary construction.

SPALDING'S ATHLETIC LIBRARY

Spalding's Athletic Library is devoted to all athletic sports and pastimes, indoor and outdoor, and is the recognized American cyclopedia of sport. Each book is complete in itself; and those sports which are governed by National Associations always designate Spalding's Athletic Library as the official publication. This gives to each book the official authority to contain the rules. Each year the books are brought up to date with the latest rules, new ideas, new pictures and valuable information, thus making the series the most valuable of its kind in the world. The price, 10 cents per copy, places them in the reach of all, and no one's library can be complete unless all numbers are found therein.

No. 12-Association Foot Ball

Contains valuable information, diagrams of play, and rules for both the Gaelic and Association styles of play. Price 10 cents.

No. 14-Curling

By the world's champion, Michael Egan, of Jersey City. This book has been rewritten and brought up to date in every particular. Every play is thoroughly explained by text and diagram. The

No. 13- How to Play Hand Ball

numerous illustrations consist of full pages made from photographs of Champion Egan, showing him in all his characteristic attitudes. Price 10 cents.

History of the sport: diagram of curling rink; rules for curling; diagrams of play. Price 10 cents.

No. 23-Canoeing

By C. Bowyer Vaux. Paddling, sailing, cruising and racing cances and their uses; canoeing and camping. Price 10 cents.

No. 27-College Athletics

M. C. Murphy, the well-known athletic trainer, now with Yale University, the author of this book, has written it especially for the schoolboy and college man, but it is invaluable for the athlete who wishes to excel in any branch of athletic sport. The subjects comprise the following articles: Training, starting, sprinting; how to train for the quarter, half,

mile and longer distances; walking; high and broad jumping; hurdling; pole vaulting; throwing the hammer. Illustrated. Price 10 cents.

No. 29-Exercising With Pulley Weights

By Dr. Henry S. Anderson, instructor in heavy gymnastics Yale gymnasium, Anderson Normal School, Chautauqua University. In conjunction with a chest machine anyone with this book can become perfectly developed. Contains all the various movements necessary to be-

come proficient and of well-developed physique. Price 10 cents.

No. 40-Archery

By J. S. Mitchel. An introductory chapter on the use of the bow and arrow; archery of the present day; the bow and how to use it, with practical illustrations on the right and wrong method of aiming. Price 10 cents.

No. 55-Official Sporting Rules

Contains rules not found in other publications for the government of many sports; rules for wrestling, cross-country running, shuffleboard, skating, snowshoeing, quoits, potato racing, professional racing, racquets, pigeon flying, dog racing, pistol and revolver shooting. Price 10 cents.

No.87-Athletic Primer

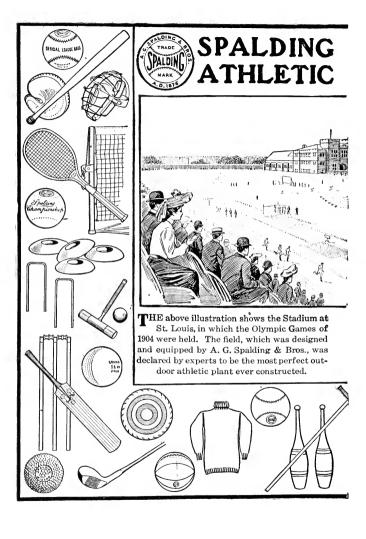

Edited by James E. Sullivan, Secretary-Treasurer of the Amateur Athletic Union; tells how to organize an athletic club, how to conduct an athletic meeting, and gives rules for the government of athletic meetings; contents also include directions for building a track and laying out athletic grounds, and a very instructive article on training; fully illustrated with pictures of leading athletes in action. Price 10 cents.

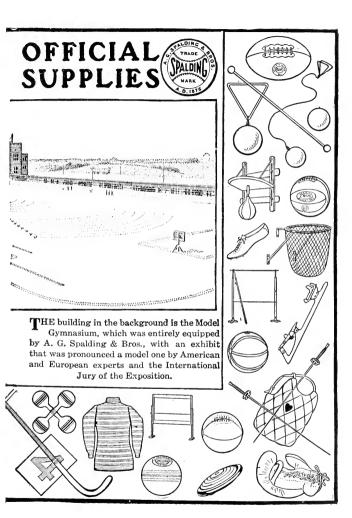

No. 102-Ground Tumbling

By Prof. Henry Walter Worth, who was for years physical director of the Armour Institute of Technology. Any boy, by reading this book and following the instructions, which are drawn from life, can become a proficient tumbler; all the various tricks explained. Price 10 cents.

No. 104-The Grading of Gymnastic Exercises

By G. M. Martin, Physical Director of the Y. M. C. A. of Youngstown, Ohio. It is a book that should be in the hands of every physical director of the Y. M. C. A., school, club, college, etc. The contents comprise: The place of the class in physical training; grading of exercises and season schedules—grading of men, grading of exercises, season schedules for various classes, elementary and advanced classes, leaders, optional exercises, examinations, college and school work; calisthenic exercises, graded apparatus exercises and general massed class exercises. Nearly 200 pages. Price 10 cents.

No. 124-How to Become a Gymnast

By Robert Stoll, of the New York A. C., the American champion on the flying rings from 1885 to 1892. Any boy who frequents a gymnasium can easily follow the illustrations and instructions in this book and with a little practice become proficient on the horizontal and parallel bars, the trapeze or the "horse." Price 10 cents.

No. 128-How to Row

By E. J. Giannini, of the New York A. C., one of America's most famous amateur oarsmen and champions. This book will instruct any one who is a lover of rowing how to become an expert. It is fully illustrated, showing how to hold the oars, the finish of the stroke and other information that will prove valuable to the beginner. Contains also the official

laws of boat racing of the National Association of Amateur Oarsmen. Price 10 cents.

No. 129-Water Polo

By Gus Sundstrom, instructor at the New York A. C. It treats of every detail, the individual work of the players, the practice of the team, how to throw the ball, with illustrations and many valuable hints. Price 10 cents.

No. 135 — Official Handbook of the A. A. U. of the United States

The A. A. U. is the governing body of athletes in the United States of America, and all games must be held under its rules, which are exclusively published in this handbook, and a copy should be in the hands of every athlete and every club

officer in America. This book contains the official rules for running, jumping, weight throwing, hurdling, pole vaulting, swimming, boxing, wrestling, etc., and is an encyclopedia in itself. Price 10 cents.

No. 136-Official Y. M. C. A. Handbook

Edited by G. T. Hepbron, the well-known athletic authority. It contains the official rules governing all sports under the jurisdiction of the Y. M. C. A., a complete report of the physical directors' conference, official Y. M. C. A. scoring tables, pentathlon rules, many pictures of the leading Y. M. C. A. athletes of the country, official Y. M. C. A. athletic rules, constitution and by-laws of the Athletic League of Y. M. C. A., all around indoor test, volley ball rules; illustrated. Price 10 cents.

No. 138-Official Croquet Guide

Contains directions for playing, diagrams of important strokes, description of grounds, instructions for the beginner, terms used in the game, and the official playing rules. Price 10 cents.

No. 140-Wrestling

Catch as catch can style. By E. H. Hitchcock, M. D., of Cornell, and R. F. Nelligan, of Amherst College. The book contains nearly seventy illustrations of the different holds, photographed especially and so described that anybody who desires to become expert in wrestling can with little effort learn every one. Price 10 cents.

No. 142-Physical Training Simplified

By Prof. E. B. Warman, the well-known physical culture expert. Is a complete, thorough and practical book where the whole man is considered—brein and body. By following the instructions no apparatus is required. The book is adapted for both sexes. The exercises comprise directions as follows: how to stand; how to sit; how to rest; breathing; exercises for the fingers, wrists, elbows, shoulders, neck, hips, knees, ankles; a word about the muscles; the arms and thighs; shoulders and chest; waist; sides; back and abdomen; bowing; bending; twisting; the liver squeezer, etc., etc., Fully illustrated. Price 10 cents.

No. 143 – Indian Clubs and Dumb-Bells

Two of the most popular forms of home or gymnasium exercise. This book is written by America's amateur champion club swinger, J. H. Dougherty. It is clearly illustrated, by which any novice can become an expert. Price 10 cents.

No. 149-The Care of the Body

A book that all who value health should read and follow its instructions. By Prof. E. B. Warman, the well known lecturer and authority on physical culture. The subject is thoroughly treated, as a glance at the following small portion of the contents shows: An all-around athlete, muscular Christianity; eating; diet-various opinions; bill of fare for brain workers; bill of fare for muscle-makers; what to eat and drink; a simple diet; an opinion on brain food; why is food required? drinking water; nutrition—how food nourishes the body; a day's food, how used; constituents of a day's ration—beefsteak, potatoes bread, butter, water; germs of disease; etc. Price 10 cents.

No. 154-Field Hockey

To those in need of vigorous and healthful out-of-doors exercise, this game is recommended highly. Its healthful attributes are manifold and the interest of player and spectator alike is kept active throughout the progress of the game. The game is prominent in the sports at Vassar, Smith, Wellesley, Bryn Mawr and other leading colleges. Price 10 cents.

No. 156-The Athlete's Guide

How to become an athlete. It contains full instructions for the beginner, telling how to sprint, hurdle, jump and throw weights, general hints on training; in fact, this book is one of the most complete on the subject that has ever appeared. Special chapters contain valuable advice to beginners and important A. A. U. rules and their explanations, while the pictures

comprise many scenes showing champions in action. Price 10 cents.

No. 157-How to Play Lawn Tennis

A complete description of lawn tennis; a lesson for beginners and directions telling how to make the most important strokes; styles and skill of the experts; the American twist service; how to build and keep a court. Illustrated from photographs of leading players in action. Price 10 cents.

No. 158-Indoor and Outdoor Cymnastic Cames

Without question one of the best books of its kind ever published. Compiled by Prof. A. M. Chesley, the well-known Y. M. C. A. physical director. It is a book that will prove valuable to indoor and outdoor gymnasiums, schools, outings and gatherings where there are a number to be amused. The games described comprise a list of 120, divided into several groups. Price 10 cents.

No. 161-Ten Minutes' Exercise for Busy Men

By Dr. Luther Halsey Gulick, superintendent of physical training in the New York public schools. Anyone who is looking for a concise and complete course of physical education at home would do well to procure a copy of this book. Ten minutes' work as directed is exercise anyone can follow. It already has had a large

sale and has been highly commended by all who have followed its instructions. Nearly 100 pages of illustrations and 100 of text. Price 10 cents.

No. 162-How to Become a Boxer

For many years books have been issued on the art of boxing, but it has remained for us to arrange a book that we think is sure to fill all demands. It contains over 70 pages of illustrations showing all the latest blows, posed especially for this book under the supervision of one of the best instructors of boxing in the United States, who makes a specialty of teaching and

who knows how to impart his knowledge. They are so arranged that anyone can easily become a proficient boxer. The book also contains pictures of all the well known boxers. A partial list of the 200 pages of the book include: A history of boxing; how to box; the correct position; the hands; clenching the fist; the art of gauging distance; the first principles of hitting; the elements of defence; feinting; knockout blows; the chin punch; the blow under the ear; the famous solar plexus knockout; the heart blow; famous blows and their originators: Fitzsimmons' contribution; the McCoy corkscrew; the kidney punch; the liver punch; the science of boxing; proper position of hand and arm; left hook to face; hook to the jaw; how to deliver the solar plexus; correct delivery of a right uppercut; blocking a right swing and sending a right uppercut to chin; blocking a left swing and sending a left uppercut to chin; the side step; hints on training, diet and breathing; how to train; rules for boxing. Price 10 cents.

No. 165-The Art of Fencing

This is a new book by Regis and Louis Senac, of New York, famous instructors and leading authorities on the subject. Messrs. Senac give in detail how every move should be made, and tell it so clearly that anyone can follow the instructions. It is illustrated with sixty full page pictures, posed especially for this book. Price 10 cents.

No. 166-How to Swing Indian Clubs

By Prof. E. B. Warman, the well-known exponent of physical culture. The most complete work on this special subject ever issued. By following the directions carefully anyone can become an expert. Price 10 cents.

No. 167-Quoits

By M. W. Deshong. The need of a book on this interesting game has been felt by many who wished to know the fine points and tricks used by the experts. Mr. Deshong explains them, with illustrations, so that a novice can readily understand. Price 10 cents.

No. 170-Push Ball

Played with an air-inflated ball 6 feet in diameter, weighing about 50 pounds. A side consists of eleven men. This book contains the official rules and a sketch of the game: illustrated. Price 10 cents.

No. I7I-Basket Ball for Women

Edited by Miss Senda Berenson, of Smith College. Contains the rules for basket ball for women as adopted by the conference on physical training, held in June, 1899, at Springfield, Mass., and articles on the following subjects: Psychological effects of basket ball for women, by Dr. Luther H. Gulid, supering of physical

H. Gulick, superintendent of physical training in the schools of Greater New York; physiological effects of basket ball, by Theodore Hough, Ph. D.; significance of basket ball for women, by Senda Berenson; relative merit of the Y. M. C. A. rules and women's rules, by Augusta Lane Patrick; practical side of basket ball, by Ellen Emerson, B. K., Agnes Childs, A. B., Fanny Garrison. A. B.; A Plea for Basket Ball, by Julie Ellsbee Sullivan, Teachers' College, New York; diagram of field, showing position of team; illustrated with many pictures of basket ball teams. Price 10 cents.

No. 174-Distance and Cross Country Running

By George Orton, the famous University of Pennsylvania runner. Tells how to become proficient at the quarter, half, mile, the longer distances, and cross-country running and steeplechasing, with instructions for training and schedules to be observed when preparing for a contest. Illustrated with numerous pictures of

leading athletes in action, with comments by the editor on the good and bad points shown. Price 10 cents.

No. 177-How to Swim

By J. H. Sterrett, the leading authority on swimming in America. The instructions will interest the expert as well as the novice; the illustrations were made from photographs especially posed, showing the swimmer in clear water; a valuable feature is the series of "land drill" exercises for the beginner, which is illustrated by many drawings. The contents comprise: A plea

for education in swimming; swimming as an exercise and for development; land drill exercises; plain swimming; best methods of learning; the breast stroke; breathing; under-arm side stroke; scientific strokes over-arm side stroke: double over-arm or "trudgeon" stroke; touching and turnine; training for racing; ornamental swimming; floating; diving; running header; back dive; diving feet foremost; the propeller; marching on the water; swimming on the back; amateur swimming rules; amateur plunging rules. Price 10 cents.

No. 178-How to Train for Bicycling

Gives methods of the best riders when training for long or short distance races; hints on training. Revised and up-to-date in every particular. Price 10 cents.

No. 180-Ring Hockey

A new game for the gymnasium, invented by Dr. J. M. Vorhees of Pratt Institute, Brooklyn, that has sprung into instant popularity; as exciting as basket ball. This book contains official rules. Price 10 cents.

No. 182-All-Around Athletics

Gives in full the method of scoring the All-Around Championship, giving percentage tables showing what each man receives for each performance in each of the ten events. It contains as well instructive articles on how to train for the All-Around Championship. Illustrated with many pictures of champions in action and scenes at all-around meets. Price 10 cents.

No. 185-Health Hints

A series of articles by Prof. E. B. Warman, the well known lecturer and authority on physical culture. Prof. Warman treats very interestingly of health influenced by insulation; health influenced by underwear; health influenced by color; exercise, who needs it? Price 10 cents.

No. 187-How to Play Roller Polo

Edited by J. C. Morse. A full description of the game; official rules; pictures of teams; other articles of interest. Price 10 cents.

No. 188-Lawn Hockey, Tether Tennis, Golf Croquet, Volley Ball, Hand Tennis, Garden Hockey, Parlor Hockey, Badminton

Containing the rules for each game. Illustrated. Price 10 cents.

No. 189-Rules for Cames

Compiled by Jessie H. Bancroft, director of physical training, department of education, New York City. These games are intended for use at recesses, and all but the team games have been adapted to large classes. Suitable for children from three to eight years, and include a great variety, divided under the general heads of ball games, bean bag games, circle games, singing and miscellaneous games. Price 10 cents.

No. 191-How to Punch the Bag

By W. H. Rothwell ("Young Corbett"), champion featherweight of the world. This book is undoubtedly the best treatise on bag punching that has ever been printed. Every variety of blow used in training is shown and explained. The pictures comprise thirty-three full page

reproductions of Young Corbett as he appears while at work in his training quarters. The photographs were taken by our special artist and cannot be seen in any other publication than Spalding's Athletic Library No. 191. Fancy bag punching is treated by a well known theatrical bag puncher, who shows the latest tricks. Price 10 cents.

No. 193-How to Play Basket Ball

By G. T. Hepbron, editor of the Official Basket Ball Guide. Contains full instructions for players, both for the expert and the novice, duties of officials, and specially posed full page pictures showing the correct and incorrect methods of playing. The demand for a book of this character is fully satisfied in this publication, as

many points are included which could not be incorporated in the annual publication of the Basket Ball Guide for want of room. Price 10 cents.

No. 194-Racquets, Squash-Racquets and Court Tennis

The need of an authoritative handbook at a popular price on these games is filled by this book. How to play each game is thoroughly explained, and all the difficult strokes shown by special photographs taken especially for this book. Contains the official rules for each game, with

photographs of well known courts. Price 10 cents.

No.195-Official Roque Guide

The official publication of the National Roque Association of America. Edited by Prof. Charles Jacobus, ex-champion. Contains a description of the courts and their construction, diagrams of the field, illustrations, rules and valuable information concerning the game of roque. Price 10 cents.

No. 199–Equestrian Polo Guide

Compiled by H. L. FitzPatrick of the New York Sun. Illustrated with portraits of leading players and contains most useful information for polo players in relation to playing the game, choosing of equipment and mounts; contains the official rules and handicaps of the National Association. Price 10 cents.

No. 200-Dumb-Bells

This is undoubtedly the best work on dumb-bells that has ever been offered. The author, Mr. G. Bojus, of New York City, was formerly superintendent of physical culture in the Elizabeth (N.J.) public schools, instructor at Columbia University, instructor for four years at the Columbia summer school, and is now proprietor of the Liberty Street Gymnasium, at 121 Liberty

Street, New York City. The book contains 200 photographs of all the various exercises, with the instructions in large, readable type. It should be in the hands of every teacher and pupil of physical culture, and is invaluable for home exercise as well. Price 10 cents.

No. 20I-Lacrosse-From Candidate to Team

By William C. Schmeisser, captain Johns Hopkins University champion intercollegiate lacrosse team of 1902; edited by Ronald T. Abercrombie, ex-captain and coach of Johns Hopkins University lacrosse team, 1900-1904. Every position is thoroughly explained in a most simple and concise manner, rendering it the best manual of the game ever published. Illustrated with numerous snapshots of important plays. Price 10 cents.

No. 202—How to Play Base Ball

Edited by T. H. Murnane. New and revised edition. Contents: How to become a batter, by Napoleon Lajoie, James Collins, Hugh Jennings and Jesse Tannehill; how to run the bases, by Jack Doyle and Frank L. Chance; advice to base runners, by James E. Sullivan, Secretary-Treasurer A.A.U.: how to become a good nitcher.

by Cy Young, "Rube" Waddell and Bert Cunningham; on curve pitching, by Cy Young, James J. Callahan, Frank Donahue, Vic Willis, William Dineen and Charley Nichols; how to become a good catcher, by Eddie Phelps, William Sullivan and M. J. Kittridge; how to play first base, by Hugh Jennings; how to play second base, by Napoleon Lajoie and William Gleason; how to play third base, by James Collins and Lave Cross; how to play shortstop, by Herman Long; how to play the infield, by Charles A. Comiskey; how to play the outfield, by Fred Clarke; the earmarks of a ball player, by John J. McGraw; good advice for players; how to organize a team; how to manage a team; how to score a game; how to umpire a game; base ball rules interpreted for boys. Price 10 cents.

No. 204-Official Intercollegiate A.A.A. Handbook

Contains constitution, by-laws, laws of athletics, and rules to govern the awarding of the championship cup of the Intercollegiate Athletic Association of Amateur Athletes of America, the governing body in college athletics. Contains official intercollegiate records from 1876 to 1904, with the winner's name and time in each event, list of points won by each college, and list of officers of the association from 1889 to 1904, inclusive. To any-

one interested the book is invaluable as a record. Price 10 cents.

No. 205-Official Handbook of the Public Schools Athletic League

This is the official handbook of the Public Schools Athletic League, which embraces all the public schools of Greater New York. It contains the official rules that govern all the contests of the league, and constitution, by-laws and officers. Edited by Dr. Luther Halsey Gulick, superintendent of physical education in the New York public schools, and Wm. C. J. Kelly, secretary of the league. Illustrated. Price 10 cents.

No. 206-How to Play Golf

No golfer should miss having a copy of this golf guide. Harry Vardon tells how to play game, with life-like illustrations showing the different strokes. The book also contains the revised official rules, official records, as well as pictures of many important players, and a directory giving name, address, membership and length of golf course of clubs in the United States, Price 10 cents.

No. 207-Bowling on the Green: or, Lawn Bowls

How to construct a green; necessary equipment; how to play the game, and the official rules as promulgated by the Scottish Bowling Association. Edited by Mr. James W. Greig. Illustrated. Price 10 cents.

No. 208-Physical Education and Hygiene

This is the fifth of the Physical Training series, by Prof. E. B. Warman (see Nos. 142, 149, 166 and 185), and a glance at the contents will show the variety of subjects: Chapter I—Basic principles; longevity. Chapter II —Hints on eating; food values; the uses of salt. Chapter III—Medicinal value of certain foods. No. 214-Graded Calisthenics and Dumb-Bell Drills

By Albert B. Wegener, Physical Director Y. M. C. A., Rochester, N. Y. Ever since graded apparatus work has been used in gymnastics, the necessity of having a mass drill that would harmonize with it has been felt. For years it has been the established custom in most gymnasiums of memorizing a set drill, never varied from one year's end to the other. Consequently the beginner was given the same kind and amount as the older member. With a view to giving uniformity the present treatise is attempted. Price 10 cents

No. 215-Indoor Base Ball

America's national game is now vieing with other indoor games as a winter pastime. This book contains the playing rules, pictures of leading teams, and interesting articles on the game. Price 10 cents.

No. 216-How to Become a Bowler

By S. Karpf, Secretary of the American Bowling Congress, and one of the best posted men on bowling in America. Contents: History of the sport: diagrams of effective deliveries; how to bowl; a few hints to beginners; American Bowling Congress; the national championships; how to build an alley; how to score; spares—how they are made. Rules for cocked hat, cocked hat and feather, quintet, battle game, nine up and nine down, head pin and four back, ten pins—head pin out, five back, the Newport game, ten pin head pin game, duckpin game, head pin game, Dayton candle (rubber neck) pin game, New England candle pin game, Illustrated with portraits of all the prominent bowlers. Price 10 cents.

No. 217-Official Athletic Almanac

Compiled by J. E. Sullivan, Chief Department Physical Culture, Louisiana Purchase Exposition, and Director Olympic Games, 1904. The only annual publication now issued that contains a complete list of amateur best-on-records; complete intercollegiate records; complete English records from 1866; swimming records; inter-

scholastic records; Irish, Scotch and Australasian records; reports of leading athletic meets; skating records; important athletic events and numerous photos of individual athletes and leading athletic teams. This year's issue is a special Olympic Games number and contains the only full account of the Olympic Games of 1904, and a review of Anthropological Days at the World's Fair stadium, being the first time on record where athletic events were contested in which savages were the exclusive participants, thus forming the first authoritative basis for a comparison between the abilities of the civilized athlete and the savage. Price 10 cents.

No. 218-Ice Hockey and Ice Polo

Written by the most famous player in Canada, A. Farrell, of the Shamrock hockey team of Montreal. It contains a complete description of the game, its origin, points of a good player, and an instructive article on how game is played, with diagrams and official rules. Illustrated with pictures of leading teams. Price 10 cents.

No. 219-Base Ball Percentage Book

To supply a demand for a book which would show the percentage of clubs without recourse to the arduous work of figuring, the publishers of Spalding's Athletic Library have had Mr. John B. Foster, Sporting Editor of the New York Evening Telegram, compile a book which answers every requirement, and which has met

with the greatest praise for its accuracy and simplicity. No follower of the game can afford to be without it. Price 10 cents.

No. 220-Official Base Ball Guide

Edited by Henry Chadwick, the "Father of Base Ball," the official publication of base ball. It contains a complete record of all leagues in America, pictures of teams, official rules and reviews of the game. The standard base ball annual of the country. Price 10 cents.

No. 221-Spalding's Lawn Tennis Annual

Contains official statistics, photographs of leading players, special articles on the game, review of important tournaments, official rules, handicapping rules and tables; list of fixtures for the current year and other valuable information. Price 10 cents.

No. 222-Spalding's Official Cricket Guide

Edited by Jerome Flannery. The most complete year book of the game that has ever been published in America. It contains all the records of the previous year, reports of special matches, official rules and pictures of all the leading teams and individual players. Price 10 cents.

An Encyclopedia of Base Ball

Attention is called to the following ten numbers of Spalding's Athletic Library, embracing the greatest collection of books of instruction for playing the various positions in the game that has ever been published. These books are entirely new and up-to-date, and contain the latest methods of play, as only last season's star players were consulted in their compilation. Each number is complete in itself and is profusely illustrated. Be sure and ask for Spalding's Athletic Library. Price 10 cents for each book. For detailed description see following numbers;

No. 223-How to Bat

The most important part of ball playing nowadays, outside of pitching, is batting. The team that can bat and has some good pitchers can win base ball games; therefore, every boy and young man who has, of course, already learned to catch, should turn his attention to this department of the game, and there is no better way of becoming proficient than by reading this book and

then constantly practising the little tricks explained therein. It is full of good advice to batsmen, and many good batters will be surprised to find contained in it so many points of which they were unaware. Edited by Jesse F. Matteson of the Chicago American, and profusely illustrated. Price 10 cents.

No. 224-How to Play the Outfield.

Compiled especially for the young player who would become an expert. The best book on playing the outfield that has ever been published. There are just as many tricks to be learned, before a player can be a competent fielder, as there are in any other position on a nine, and this book explains them all. Illustrated with numerous

page pictures of leading outfielders. Price 10 cents.

No. 225-How to Play First Base

No other position on a ball team has shown such a change for the better in recent years as first base. Modifications in line with the betterment of the sport in every department have been made at intervals, but in no other department have they been so radical. No boy who plays the initial sack can afford to overlook the points and hints contained in this book. Entirely new and up to date. Illustrated with full

page pictures of all the prominent first basemen. Price 10 cents.

No. 226-How to Play Second Base

There are so few men who can cover second base to perfection that their names can easily be called off by anyone who follows the game of base ball. Team owners who possess such players would not part with them for thousands of dollars. These men have been interviewed and their ideas incorporated in this book for the especial benefit of boys who want to know the fine points of play at this point of the diamond. Illustrated with full page pictures. Edited

by J. E. Wray, sporting editor Globe-Democrat, St. Louis. Price 10 cents.

No. 227-How to Play Third Base

Third base is, in some respects, the most important of the inheld. No major league team has ever won a pennant without a great third baseman. Collins of the Boston Americans and Leach of Pittsburg are two of the greatest third basemen the game has ever seen, and their teams owe much of the credit for pennants they have won to them. These men in this book describe just how they play the position. Everything a player should know is clearly set

forth and any boy will surely increase his chances of success by a careful reading of this book. Illustrated. Price 10 cents.

No. 228-How to Play Short-

Shortstop is one of the hardest positions on the infield to fill, and quick thought and quick action are necessary for a player who expects to make good as a shortstop. The views of every well known player who covers this position have been sought in compiling this book, and it is offered as being the most complete book of its class ever

produced. The boy who would excel at short needs to study it thoroughly. Illustrated. Price 10 cents.

No. 229-How to Catch

Undoubtedly the best book on catching that has yet been published. Every boy who has hopes of being a clever catcher should read how well known players cover their position. Among the more noted ones who describe their methods of play in this book are Lou Criger of the Boston Americans, Johnnie Kling of the Chicago Mationals and Jack O'Connor of the St.

Louis Browns. The numerous pictures in the book comprise those of all the noted catchers in the big leagues. Price 10 cents.

No. 230-How to Pitch

A new, up-to-date book. Published for the first time this year. No boy can afford to be without a copy of it. Edited by John B. Foster of the Evening Telegram (New York). The object of this book is to aid the beginners who aspire to become clever twirlers, and its contents are the practical teaching of men who have reached the top as pitchers, and who have had experience, both as members of the best clubs playing base ball and as contenders against teams

that have enjoyed national reputations. Cy Young, the famous Boston American pitcher, whose steadiness in the box is proverbial, gives advice on control of the ball and tells what a boy should do to obtain it: Sam Leever of the Pittsburgs shows how to pitch the outcurve: William Dineen of the Boston Americans tells how to pitch an inshoot; Thomas Hughes gives hints on pitching the drop; Joe McGinnity, the "iron man." of the New York Nationals, explains how he uses his successful raise ball and his famous "cross fire"; Christy Mathewson, the pride of the New York Polo Grounds, discusses the body swing; Frank Hahn, who is left-handed, has something of interest to those who use that member; John J. McGraw, New York Giants' brilliant manager, discourses on the pitcher as a fielder, and as he started in his base ball career as a twirler, his advice has grounds for attention; Al Orth, the "curveless wonder," tells how to make a batter do what you want him to do; John Powell explains how to act when runners are on bases; Charley Nichols, the former pitcher of the Boston Nationals and now manager of the St. Louis Nationals, describes the jump ball; Frank Sparks treats of change of pace, and Jack Chesbro, the star of the New York Americans' pitching corps, describes at length the "spit" ball, of which he is so famous an exponent, The book is profusely illustrated. Price 10 cents.

No. 231-How to Coach; How to Captain a Team; How to Manage a Team; How to Umpire: How to Organize a League.

A useful guide to all who are interested in the above subjects. Jimmy Collins, manager-captain of the Boston Americans, writes on coaching; M. J. Kelly of the St. Paul champions, on captaining; Al Buckenberger of the Boston Nationals, on managing; Frank Dwyer of the American League staff, on umpiring; Fred Lake on minor leagues, and the editor of the book, T. H. Murnane, President of the New

England League, on how to organize a league. Price 10 cents.

No. 232-How to Run the Bases

The importance of base running as a scientific feature of the national game is becoming more and more recognized each year. Besides being spectacular, feats of base stealing nearly always figure in the winning of a game. Many a close contest is decided on the winning of that little strip of 90 feet which lies between cushions. When hits are few and the enemy's pitchers steady, it becomes incumbent on the opposing team to get around the bases in

some manner. Effective stealing not only increases the effectiveness of

the team by advancing its runners without wasting hits, but it serves to materially disconcert the enemy and frequently has caused an entire opposing club to temporarily lose its poise and throw away the game. This book gives clear and concise directions for excelling as a base runner; tells when to run and when not to do so; how and when to slide; team work on the bases; in fact, every point of the game is thoroughly explained. In addition such clever men as Harry Bay, the fleet footed Clevelander; Frank Chance, Bill Dahlen and Hans Wagner describe their methods of action. Illustrated with pictures of leading players. Price 10 cents.

No. 233-Jiu Jitsu

A complete description of this famous Japanese system of self-defence. Each move thoroughly explained and illustrated with numerous full page pictures of Messrs. A. Minami and K. Koyama, two of the most famous exponents of the Jiu Jitsu in America, who posed especially for this book. Be sure and ask for the Spaldings Athletic Library book on Jiu Jitsu. Price 10 cents.

Spalding's Athletic Library is for sale by all department stores, athletic and sporting goods dealers and newsdealers.
