The first historically known Bishop of Byzantium is St. Metrophanes (305–314), though the see had perhaps been occupied during the third century. This bishop was at first subject to the metropolitan See of Heraclea, and remained so, at least canonically, until 381, when the Second Ecumenical Council (can. iii) gave the Bishop of Constantinople the first place after the Bishop of Rome. (For the exact meaning of this canon see Hefele, Hist. des Conciles, tr., Leclercq, Paris, 1908, II, 24–27.) Fuller details are given in Fischer, "De patriarcharum Constantinopolitanorum" catalogus (Leipzig, 1894); Schermann, "Propheten- und Apostellegenden des byzantinischen Historikus Theophanes und verwandter Texte" (Leipzig, 1907); Vailhé, "Origines de l'Eglise de Constantinople" in "Echoes d'Orient" (Paris, 1907), 287–295.

Constantine had chosen this city as the new capital of the Roman Empire, but owing to his wars and the needs of the State, could not reside there. His successors were even more frequently absent. Constantius, Julian, Jovian, and Valens are found more habitually on the Danube or the Euphrates than on the Bosporus; they reside more regularly in Antioch than in New Rome. It was only under Theodosius the Great (379–395) that Constantinople assumed definitive rank as capital of the Eastern Roman Empire. However, its ambitious prelates did not wait so long to forecast the future greatness of the new city. In 339 Eusebius, and in 360 Eudoxius, quitted the great Sees of Nicomedia and Antioch for what was yet, canonically, a simple bishopric. Both the city and its inhabitants put an end to Ariam controversies; the Arian heretics held possession of the Church for forty years. Honourable mention is due to two of its bishops: St. Alexander, whose resistance and prayers were crowned by the sudden death of Arius in Constantinople; and St. Paul the Confessor, a man of the Faith who to the last added the eighty martyrs put to death simultaneously by Emperor Valens. St. Gregory of Nazianzus restored religious peace in this Church early in the reign of the aforesaid Theodosius. From the council of 381 may be said to date the ecclesiastical fortunes of Constantinople. Its bishop then set out on seven harrowing and to exercise ecclesiastical jurisdiction over the six provinces of Thrace, hitherto subject to Heraclea, and soon over the twenty-two provinces of Asia Minor and Pontus, originally subject to Ephesus and Cesarea. These rights of supremacy, though usurped, were acknowledged by the twenty-eighth canon of the Council of Chalcedon (451), from which time the bishops of Constantinople ruled over about 420 dioceses. In 431 began an almost continuous conflict with the Roman Church, that was crowned with success in 733, when an iconoclast emperor with the election of Patriarch Photius of practical Illyricum, i.e. more than a hundred dioceses. About the end of the ninth century, when Photius broke with the Roman Church, his own patriarchate included 624 dioceses (51 metropolitan sees, 51 exempt archbishoprics, and 522 suffragan bishoprics). At that time the Roman Church certainly did not govern so great a number of sees. At this period, moreover, by its missionaries and its political influence, Constantinople attracted to Christianity the Slav nations, Serbs, Russians, Moravians, and Bulgars, and obtained in these northern lands a strong support against the attacks of the barbarians. This ecclesiastical prosperity coincided with the political and municipal grandeur of the city. At the death of Theodosius the Great (395), when the Roman Empire was divided into two parts, Constantinople remained the centre and capital of the Eastern Empire. The Western Empire was destined soon to fall before the onslaughts of the barbarians. While its provinces were held by uncouth German tribes, Constantinople alone remained to represent Christian civilization and the greatness of the Roman name. Simultaneously the city was enlarged and embellished, particularly under Theodosius II, Bonus, Arcadius, and Theodoric. In 413 it reached its actual (1908) size on the right bank of the Golden Horn, under the city prefect, Anemius. In 625 Heraclea added the famous quarter of Blachernae with its venerated church of the Blessed Virgin, whose
image was considered as the palladium of the city. The circumference of the walls was then (and still is) eleven or twelve miles in length, especially under Tiberius III (c. 700), Anastasius II (714), Leo III (740), Nephosiris I (803), Theophilius (831), Michael VIII (1262), Andronicus II (1316), John VII (between 1431–1444). To protect the territory of Thrace from the invasions of the barbarians, in the early part of the sixteenth century, built a great wall about fifty miles in length and about twenty feet in breadth from Siliistra to the Lake of Derkoi. The ramparts of Constantinople had many gates: the principal one was the Golden Gate, the terminus of the Triumphant Way. On the Sea of Marmora numerous havens gave shelter to boats and barks that had not yet been created. The strongly fortified Great Palace was a real town. Other splendid palaces adorned the city (Boucoleon, Chalké, Blacherne); many graced the European and Asiatic suburbs. Hundreds of churches and monasteries, thousands of clerics, of monks, and nuns, attested an intensely religious life. The church of St. Sophia alone, the glory of Justinian’s reign, owned 365 estates. How vast these domains were may be judged from a law of Heraclius (627) that established 625 clerics as the number necessary for the service of St. Sophia. The little church of Chloucha in the agora of Constantinople had not yet been created. The names of at least 463 churches are known, 64 of which were dedicated to the Blessed Virgin. As early as 536, 68 superiors of local monasteries were present at a council in the city.

So many rich churches and monasteries, imperial or private palaces, not to speak of the luxury of the court and the great imperial dignitaries, naturally excited the covetousness of barbarian peoples. Constantinople had, therefore, to sustain numberless sieges; it was attacked in 738 by the Goths, by the Avars and Persians during the reign of Heraclius (610–41), by the Arabs during the reign of Constantine Pogonatus (668–85), and again by the Arabs under Msolemeh in 717; many times also by Bulgarians, Patzinaks, Russians, and Khazars. But the city always defied its besiegers, thanks to the solidity of its walls, often to the valour of its soldiers, but chiefly to the distributing in it of a tax for the maintenance of clerics. Perhaps, some, in the event of a loss of the city, e.g. the Thingrunds, may have broken out during the Nikara revolt (332), on which occasion Justinian nearly lost his throne, more than 80,000 persons were killed, and fire destroyed the greater part of the city.

HERESY AND SCHISM.—When Photius (d. 891) began the schism consummated by Michael Cerularius in 1054, the Byzantine Church had, since the death of Emperor Constantine in 337, been formally out of communion with the Roman Church during 248 years (55 years on account of Ariusianism, 11 on account of the condemnation of St. John Chrysostom, 35 on account of Zeno’s Henoticon, 41 on account of Monothelism, 90 on account of Iconoclasm, 18 on account of the adulterous marriage of Constantine VI). On the whole, therefore, Constantinople had been out of communion with the Apostolic See one out of every two years. During this period nineteen patriarchs of Constantinople were open heretics, some of them quite factious, e.g. of Nicea, Nicaeans, Nestorius, Acacians, Sergius, Pyrrhus. On the other hand must be mentioned several orthodox bishops, e.g. St. Gregory of Naxians, St. John Chrysostom, St. Flavian, St. Germanus, St. Tarasius, St. Methodius, and St. Ignatius, the opponent of Photius, whose virtues and literary fame compensate for the scandalous heterodoxy of their confères. Nor can we omit illustrious monks and hymnographers like St. Romanus (Menander), the greatest liturgical poet of the Byzantine Church, St. Maximus of Turin, St. Theodore, the noble abbot of the famous monastery of Studium (Stoudion), and many others who suffered martyrdom during the reigns of Iconoclast emperors. Many councils were held in Constantinople, sometimes against heresies, sometimes in favour of them. Chief among these councils are: the ecumenical councils of 381, 553, 681, and 869; the Trullan Council (692), very important for the history of canonical legislation; the councils of 712 and 875 which ratified, respectively, Monothelism and the revolt of Photius against Rome. The schism of Photius was not at once followed by its conclusion; the Italian emperor was ambitious, but the ambitious patriarch was yet alive when union with the Roman Church was re-established by Emperor Leo the Wise in 886; he obliged Photius to quit the patriarchal throne. From that time to the patriarchate of Michael Cerularius (1043–1049), in spite of the Filioque question, relations between the papacy and the patriarchate were generally cordial. There were indeed, at the beginning of the tenth century, some difficulties caused by the emperor’s fourth marriage, but in this conflict both the opposing patriarchs attempted to obtain from the Roman Church justification of their conduct. It was only the schism of Michael Cerularius that the schismatic condition was finally confirmed, almost without any apparent motive and only through the bad will of this patriarch. After long and sharp disputes between the two Churches, the pope’s legates, with the approbation of the imperial court, deposited, 15 July, 1054, on the altar of St. Sophia the Bull of excommunication against the patriarch. This act resulted in a popular revival. Five days later Michael Cerularius replied by excommunicating the pope and the “azymite” Latins. The weak-minded and lewd emperor, Constantine Monomachus, dared not resist the all-powerful patriarch. It must be noted, however, that, unhappily, the idea of schism had long been familiar to the minds and hearts of the Greeks. The first period of the schism was coeval, especially at Constantinople, with a remarkable literary revival, inaugurated as early as the tenth century by the Macedonian emperors and reached its perfection under the Comneni and the Palaeologoi. This revival, unfortunately, did not affect favourably the morality of the population, being chiefly an unconscious return to models of antiquity, indeed a kind of neo-paganism. We owe to it, however, beautiful works in literature, architecture,

IMPERIAL SUCCESSION; CRUSADES; LATIN EMPIRE OF CONSTANTINOPLE.—After the division of the Roman Empire in 395, Constantinople beheld the passage of many great dynasties: that of Theodosius, prolonged by adoption until 602; that of Heraclius, from 610 to 711, with intrusion of several usurpers; that of Leo the Isaurian, from 717 to 802; the Macedonian dynasty from 820 to 867; that of Basil the Macedonian from 867 to 1057; finally from 1081 to the Frankish conquest in 1204, of the Comneni and the Angeis. Succession, of course, was not always regular; even in the legitimate dynasties murder and cruelty, it is well known, often marked the accession of an emperor. Sometimes the streets of the capital were on the same day decked with flowers and drenched with blood. Nevertheless, till the middle of the eleventh century, the empire held its own in Asia Minor against the Turks. The latter were now gradually supplanting the Christian patriarchs of Cappadocia and Asia Minor. The Turks, who, towards the end of that century, occupied most of the Asiatic peninsula and set up their capital at Nicaea, not far from Constantinople. Then began the Crusades, that great overflow of the West towards the East, started by the pious wish of all Christian Europe to deliver the Holy Sepulchre. Con-
stantinople saw the crusaders for the first time in 1096. The contact between the two civilizations was not cordial; the Greeks gave generally to the crusaders an unkindly reception. True, they looked on them as enemies but not as the Turks, except that the crusaders, marching in the name of Christ and backed by all the strength of the West, appeared much more dangerous than the Mussulman Turks. On the other hand the Franks were only too ready to treat the Greeks as mere unbelievers, and, but for the opposition of the two patriarchs, would have begun the Crusades with the capture of Constantinople.

These sad quarrels and the fratricidal conflicts of Christian nations lasted nearly a century, until in 1182 Emperor Andronicus Comnenus, a ferocious tyrant, ordered a general massacre of the Latins in his capital. In 1190 the Greek patriarch, Dositheus, solemnly promised inducements to any Greek who would murder a Latin. These facts, together with the selfish views of the Venetians and the domestic divisions of the Greeks, were enough to provoke a conflict. The Greek Emperor Alexius III had de-throned his brother and stripped his nephew of all rights (1195); the latter sought a shelter in the West (1201), and, together with his brother-in-law, Emperor Philip of Swabia, with Venice, and Boniface of Montferrat (chief of the projected crusade), he turned aside the Fourth Crusade and directed the knights, first to the siege of Zara in Dalmatia, and afterwards to Constantinople. In the words of the Innocent III, the crusaders laid siege to the city, which soon surrendered (17 July, 1203). Emperor Alexius III took flight. His brother, Isaac Angelus, was taken from prison and crowned emperor, with his son Alexius IV. The crusaders had hoped that the new emperor would keep their promises and reunite the two Churches; confident of this they wrote to Innocent III (August, 1203) to justify their behaviour. But the imperial promise was not kept; indeed, it could not be executed. In November, 1205, Alexius IV broke off all relations with the crusaders. Thereupon the hostility between the Greeks and the Latins was in almost daily evidence; brawls and conflagrations were continually taking place. Alexius IV and his father were dethroned and put to death (February, 1204) by a usurper who took the name of Alexius V Murtzuphis. The latter made haste to put his capital, which was at that time defended, to the sword, and began a second siege. After several onslaughts the city was taken (12 and 13 April, 1204) amid scenes of great cruelty; the slaughter was followed by an unbridled plunder of the countless treasures heaped up during so many centuries by the Byzantine emperors. The holy relics of the exiled Patriarch Michael Cerularius and the Latins' relics; Villehardouin asserts that there were but few cities in the West that received no sacred booty from this pillage. The official booty alone, according to the same historian, amounted to about eleven millions of dollars whose purchasing power was then of course much greater than at this day. The new emperor, Baldwin, became emperor; Boniface of Montferrat obtained Thessalonica and Macedonia; the knights, various feudal fees; Venice, the islands and those regions of the empire that assured her maritime supremacy. This new Latin Empire, organized according to feudal law, never took deep root. It was unable to hold its own against the Greeks (who had immediately created two empires in Asia, at Nicea and at Trebizond, a despotate in Epirus and other small States) nor against the Bulgarians, Comans, and Serbs. After a much-dis turbed existence it disappeared in 1261, and Constantinople became again the centre of Greek power with Michael Palaeologus as emperor.

LATIN PATRIARCHATE.—Together with the Latin Empire a Latin patriarchate had been established in 1204 at Constantinople, on which occasion the Greek patriarch took refuge at Nicea. Notwithstanding the missions of Cardinal Benedict a Sancta Susanna (1205-1207) and Pelagius of Albano (1213), negotiations, and even persecutions, the Latins failed to induce all their Greek co-religionists to swear allegiance to the authority of the pope. In its best days the Latin patriarchate never numbered more than twenty-two archbishops and fifty-nine suffragan bishops, situated in Europe, in the islands, and even in Asia Minor. However, the Latin Patriarchate of Constantinople outshone all the Latin Empire in all of which the Latin patriarchs resided in Greece or in Italy. From 1302 the Holy See reserved to itself the appointment to this office and united with the patriarchate first the Archchipsop of Candia, later the Bishopric of Negropont; this was still the situation as late as 1463. A consistorial decree of 1497 reserved this high title to cardinals; the rule, however, was subject to many exceptions. In modern times a contrary practice has prevailed; the Latin titular Patriarch of Constantinople ceases to bear this title only on entrance to the Sacred College. Of course, after the fall of the Latin or Frankish Empire in 1204, the Latin patriarch could not deal directly with the Catholic of Constantinople; they were committed to the care of patriarchal vicars, simple priests chosen usually among the superiors of religious orders resident in the city, Observantine or Conventual Franciscans, and Dominicans. This lasted until 1561, when the Latin patriarchs were allowed to send formal vicars in direct correspondence with Constantinople a patriarchal suffragan bishop, who was free to administer the diocese in the name of the patriarch. Finally, in 1772, the Holy See suppressed the office of patriarchal suffragan and appointed patriarchal vicars Apostolic, which system is yet in existence.

RESTORATION OF GREEK EMPIRE: EFFORTS AT REUNION OF THE CHURCHES.—Having anticipated a little we may here take up the thread of our narrative. By the recovery of Constantinople in 1261, Michael Palaeologus had drawn on himself the enmity of some Western princes, especially of Charles of Anjou, brother of St. Louis and heir to the rights of the aforesaid Latin emperors of Constantinople. To forestall the crusade with which he was threatened the Greek emperor opened negotiations with the pope and accepted the union of the Churches. It was proclaimed at the Ecumenical Council of Lyons in 1274, and was confirmed at Constantinople the following year. Two titular councils held under the Greek patriarch, John Beccus, a sincere Catholic. It was not, however, accepted by the Greek people who remained always imetical to the West, and, on the emperor's death in 1282, it was rejected at a council held in the Bisarchene church. Then the councils and the rules of theocratic government which had to reckon with the ambitious claims of Charles of Valois, brother of Philip the Fair, and of other Latin pretenders to the imperial crown. The city itself was rent by the theological disputes of Barlaamites and Palamites arising from Hesychasm (q. v.), also by the domestic disputes of the family of Theodore Komnenus, of Michael Palaeologus, and John Cantacuzene. With the aid of Turkish mercenaries John Cantacuzene (the hope of the Palamites) withstood the legitimate emperor and conquered the city.

The Byzantine Empire was now in face of its last and greatest peril. The smaller Greek Empire of Trebizond controlled since 1204 a part of its Asiatic provinces. The Fourth Crusade had caused almost all the islands and a great part of its possessions in Europe to fall into the hands of the Venetians, Genoese, Franks, and local dynasts. It feared most, however, the new empire of the Osmanlis that was rapidly over-}\n\nflooring all Asia Minor. The Osmanlis were originally a small Turkish tribe of Khorassan; in the thirteenth century they had settled near Doryleum (F斯基-Shehr), whence they gradually annexed all the-

CONSTANTINOPLE

tanes and principalities of the Seljuk Turks and others. As early as 1326 Brusa in Bithynia had become the centre of their power. A Genoese fleet soon conveyed their army into Europe, where they took Gallipoli in 1397. Thenceforth, while the popes were especially anxious to save the Greek East and Constantinople, the Byzantine Empire, excited by their priests and monks, appeared daily more hostile to the West and exhausted their opportunities in useless theological disputes. The memorable defeat of the Serbs and Bulgarians at Kosovo in 1389, and that of the crusaders at Nicopolis in 1396, seemed to indicate the disappearance of the empire, while the Mongol invasion of Timur-Leng (Tamerlane) and the defeat of Sultan Bayazid at Angora in 1402 combined to assure another half-century of existence to the doomed empire.

Scarcely had Manuel II heard of the Turkish disaster when he pulled down the mosque in his capital and abandoned his negotiations at Rome, where he had initiated proposals of peace, but only for political reasons. However, the Turkish power had not been destroyed on the plain of Angora. From June to September, 1422, Sultan Murad II laid siege to Constantinople; he was near the city, but he was finally repulsed. The Turks tightened daily their control over all approaches to the city, which only a new crusade could have relieved. At the Council of Florence, therefore (1439), the Greeks again declared themselves Catholics. This formal reunion, however, increased the envy and hate of the emperor and people, and infused into them fresh hatred of the Latins. Nevertheless, the promised crusade took place under the direction of Cardinal Giuliano Cesarini. János Hunyady and Jakob-Beg (Scanderbeg) performed miracles of valour, but in vain. The crusaders were completely defeated at Varna in 1444, and nothing was left to Constantinople but to perish honourably. The reunion with Rome, as accepted at Florence, was at last proclaimed officially in St. Sophia by Cardinal Isidore, Metropolitan of Kiev (12 Dec., 1452). It was thus fated that Emperor Constantine Dragases, the sultan's great Constantine, was to die in the Catholic Faith.

FALL OF CONSTANTINOPLE; CAPITAL OF OTTOMAN EMPIRE.—When the tragic hour struck, the emperor had only about 7000 men, including all foreign succour. Since March, 1453, the Turks, to the number of 200,000, had invested the city; the preceding year they had built on the Bosporus the redoubtable fortress of Rumeli-Hissar. Their fleet also held the entrance to the Dardanelles, but was prevented from entering the Golden Horn by a strong iron chain that barred its mouth. But Mohammed II caused seventy of his ships to be sunk with clergy and people, and invaded in this way they entered the Golden Horn (22 April). He then cast across it a bridge of boats broad enough to allow the passage of five soldiers abreast, while his troops, constantly renewed, kept up without ceasing their attacks by land. Eventually the defenders were exhausted by the toils of a continuous and hopeless conflict, while their ranks grew steadily thinner through death or wounds. The population gave no help and was content to taunt the Latins, while waiting for the miracle of Heaven that was to save them. Finally, 29 May, 1453, at about 4 o'clock in the morning, a furious assault of the Turks broke down the walls and towers, and opened the gates on every side. Emperor Constantine fell like a hero at the gate of St. Romanus. St. Sophia was immediately transformed into a mosque, and during three days the unhappy city was abandoned to unspeakable excesses of cruelty and debauchery. The next year, at the demand of the sultan himself, Gennadius Scholarius, Rome's haughty adversary, was appointed Patriarch of Constantinople, and soon the Greek Church was re-established, almost in its former position. Thus was granted the sacrilegious prayer of so many Greeks, blinded by unreasoning hate, that henceforth, not the tiara, but the turban should rule in the city of Constantinople. Even the name of the city was changed. The Turks call it officially (in Arabic) Der-es-Sultan (Caesar), Der-es-Herreneptise, or (chiefly on coins) Konstantinieh. Their usual name for it is Stamboul, or rather Istamboul, a corruption of the Greek expression *η τυβολη* (pronounced *symbol*), perhaps under the influence of a form, 'Ismaboul, which could pass for "the city of Islam". Most of the churches, like St. Sophia, were gradually converted into mosques. This was the fate of SS. Sergius and Bacchus, a beautiful monument built by Justinian, commonly called "the little St. Sophia"; of the church of the monastery of Khora, whose splendid mosaics and pictures, mostly of the fourteenth century, were principal curiosities of the city; of the churches of the celebrated Pantocrator and Studium monasteries, etc. Other churches were demolished and replaced by various buildings; thus the church of the Holy Apostles gave way to the great mosque built by the conquering Sultan Mohammed II. In this city, called "the city of the sultans," some of their gigantic red porphyry sarcophagi were taken to the church of St. Irene. The latter is the only church taken from the Greeks that has not been changed into a mosque or demolished; it became, and is yet an arsenal, or rather a museum of ancient weapons.

The sultans in turn endowed their new capital with many beautiful monuments. Mohammed II built the castle of Yedi-Kouleh, the Tchinilli-Kiosk (now a museum), the mosques of Cheik Bokhari, of the Janizaries, of Kassim-Pasha, of Eyourb, where every sultan at his accession is obliged to be girt with the sword of Othman, etc. Bayazid II built the Bayr-Id-i-jei (1448). Soliman the Magnificent built the Suleimanieh, the most beautiful Turkish monument in Constantinople. His architect Sinan constructed fifty other mosques in the empire. Ahmed I built (1665) the Ahmedieh (now the fountain of the imperial Great Palace, a pretty fountain near St. Sophia, etc. The buildings of the old seraglio at Seraglio Point are also of Turkish origin; nothing is left of the Byzantine imperial palaces that once stood there. The Blacherne palace has also disappeared; its church was accidentally burned in the seventeenth century. Not far distant are the important ruins of the palace of the Porphyrogenitus. When the Turks took Constantinople, the hippodrome was already in ruinous decay. There remain yet three precious monuments of ancient imperial grandeur: the End Bashi or Column of Theodotus the Great, the Serpentine Column brought from Delphi by Constantine, and the Byzantine monument known as the Walled-up Column. Near them has been constructed, on the plans and at the expense of the German Emperor, William II, a fountain in Byzantine style. The Turks have also respected some other relics of antiquity, especially the columns of Constantine, Marcian, Theodotus, and Arcadius, the aqueduct of Valens, and many of the great subterranean cisterns.

THE TURKISH CITY.—This is not the place to narrate the later history of the city, so often the scene of sanguinary and turbulent revolutions, palace-revolutions, etc. In 1826 Mahmud II suppressed the redoubtable pretorians, but the tragic domestic revolutions go on as before. In 1807 a
British fleet threatened the city, which was courageously defended by Sultan Selim III and the French ambassador, General Sebastiani. In 1854 Anglo-French armies encamped at Constantinople before and after the Crimean expedition against Russia. In 1878 the Russians advanced to San Stefano, a little distance from the European suburbs, and dictated the treaty of that name. In 1821 the Greek patriarch, Gregory V, with many bishops and laymen, was hanged on the occasion of the outbreak of the Greek War for Independence. In 1895–1896 the capital, as well as the provinces, saw many Armenians massacred by the Kurds, with the complicity, or at least the tacit consent, of the Russians. The first of these frightful physical catastrophes of former times have been renewed; great confinements in 1864 and 1870 destroyed entire quarters at Stamboul and Pera. In the latter place many thousands of lives were lost (most of the houses are built of timber). In 1894 an earthquake laid low a great part of the Bazaar and killed several thousand persons. The city is now undergoing a slow process of cleansing; it is lit by gas, and there are some tramways in its streets, most of which are still very narrow and dirty, and are at all times obstructed by vagrant dogs. A cable railway runs from Pera.

**National and Religious Statistics.**—The population, we have already said, is (1908) at least 1,000,000, perhaps 1,200,000; Turkish statistics are very uncertain. The Turks seem to form about three-fifths of this population. There are more than 2000 mosques, near which are generally found elementary schools for boys and even for girls; often also mosques or Mussulman theological schools. The tekkes are Mussulman monasteries for dervishes of various orders. Superior instruction is given at the Lyceum of Galata Seraglio. It has about 1200 pupils (boys and girls), and instruction is given in Greek, Turkish and French. Efforts are being made to transform this college into a university. There are also about 20 secondary schools, a university of law, a school of medicine, military schools, and other professional and special schools. The libraries annexed to the great mosques contain precious Eastern manuscripts. There are many Turkish philanthropic societies, several of which are in charge of Catholic Sisters of Charity, an asylum for the poor, a Pasteur institute, and other charitable foundations. The Persian Mussulmans, generally Shiites, have their own religious organization, with a hospital at Stamboul, conducted by Sis- tine, Church. The Jews of the population are few; the community is rapidly, and is of two kinds: the Spanish Jews who came to Turkey in the sixteenth century when expelled from Spain, and still speak a bad Spanish; others, who came and still come from Russia, Rumania, Austria, Germany, etc. The latter often obtain good situations: not so the former, whose social status is low and unhappy. There is also among the Jews of the city a diversity of rites, synagogues, schools, and works of beneficence. The Christians seem to number over 300,000. If we except an insignificant body of Jacobites and their bishop, the rest may be divided as Monophytes, Protostants, Orthodox Greeks, and Catholics. The Monophytes are Armenians, who call themselves Gregorians, after their apostle, St. Gregory Illuminator. They number about 100,000, with a patriarch resident at Koun-Kapou (Stamboul), many churches, 53 elementary schools, and a large charitable establishment at Yedi-Kouleh, etc.

Protestantism is represented by English, American, German, and other foreign colonies, also by about one thousand Armenian converts. Its chief institutions, apart from several churches, are the Bible house at Stamboul, Sunday schools conducted by the Methodists (founded by the German Protestants) for assembling the poor, and a large American school founded in 1863, with about 600 pupils), and a high school for girls at Scutari. There are also some elementary Protestant schools and a special mission for the Jews, finally an English and a German hospital. The Schismatic Greeks who call themselves Orthodox, number about 150,000, some thousands of whom are Russians, i.e. of the Russisch-Orthodox Church. The ecclesiastical patriarch, who resides in the Fanar (Greek quarter, along the Golden Horn), is the bishop of the diocese (there are metropolitanates at Kadi-Keui and at Maki-Ki-Keui, the latter with the title of Derki). He is aided in the administration of his office by the Great Protosynodul. There are 40 parishes of Greek, 11 of Bulgarian, and 17 third class. The principal churches prefer instead of a simple priest, a titular bishop or chorepsiscope: they are five in number. Recent statistics show 72 schools, 64 of which give elementary and middle, and 8 superior teaching. Among the higher schools are included the so-called Great National School in the Pazar (said to date from the Middle Ages), the commercial and theological schools at Halki, etc. The theological school is a seminary for future bishops of the Greek Church. These Greek schools have 398 teachers and 13,217 pupils; the elementary schools have 10,749 pupils, and the higher schools 6,428 pupils, and the principal one may add that many Greek boys and girls, also Armenians, are taught in foreign schools, chiefly in those of the French religious congregations and at Robert College. The Greeks have a large charitable establishment at Balekli and an orphanage. Quite important also are their various associations (stipendiaries), the principal one being the important learned body known as the Literary Greek Society, with a rich library. The libraries of the Metochion, of the Holy Sepulchre, and the theological school at Halki are also remarkable for their manuscripts. For the general organization of the Greek Schism, see under Greek Church. The Russians have at Constantinople 3 monasteries, a school, a hospital, and an archeological institute, with a rich library. The Serbs and Rumanians have also their national establishments. There are in the capital about 15,000 Bulgarians. They are considered schismatics by the Greek Church, from which they have complete separation. Their ecclesiarch, who has jurisdiction over all native Bulgarians and those of European Turkey, resides at Chichili (pronounced shishli), where there are also a seminary, a school, and a hospital for Bulgarians. His cathedral is at Balats, Stamboul.

**Economic Life and Statistics.**—The Catholics include those of the Roman or Latin Rite, and others of Eastern rites often called Uniates. Among the latter, the Catholic Armenians deserve most attention; they number about 5000. Their patriarch resides at Pera, and to their special organization belong: 6 elementary and 3 middle schools, also a large charitable establishment for orphans and for poor or sick people. They have four congregations conducted as follows: The Mehitartists of Vienna have 2 residences, 19 monks; the Mehitartists of Venice, 1 residence, 8 monks; the Antonines, 1 residence, 8 monks; Sisters of the Immaculate Conception, 3 residences, about 100 nuns. The Melchites or Arabic-speaking Syrians of Byzantine Rite have a church with 3 priests, one of whom acts as vicar of his patriarch for all affairs of the "nation" that come before the Sublime Porte. The Catholic patriarchs of the Chaldeans and the Syrians are similar and represented by very few, the few faithful of their rites present in the city. The Catholic Greeks, few in number as yet, are subject to the Apostolic delegate; they have two parishes, at Koun-Kapou (Stamboul) and Kadi-Keui, conducted by the Assumptionists, and a mission at Pera, conducted by the Oblates of the Holy Trinity. The former have also missions for the Greeks at Nexares in Cappadocia and at Peramos in the Peninsula of
Cyzicus; the latter at Malgara and Daoudill in Thrace. The Catholic Bulgarians have at Galata their archbishop and one priest. The Catholic Georgians are few and are subject to the Apostolic delegate; most of them, however, reside in the territories governed by the Sublime Porte and are obliged to use the French embassy in his relations with the Turkish Government. The limits of his vicariate are: in Europe the Vicariate of Sofia, the Archdioceses of Uscub and Durazzo, and the Apostolic Delegation of Athens; in Asia, from Damad to the south, the Apostolic Delegations of Mesopotamia and Aleppo, and the Archepiscopal See of Smyrna. The Latin Catholics subject to him must number (1908) between 30,000 and 35,000, about 22,000 of whom are at Constantinople. Other principal centres are, in Europe: Saloniki, Galipoli, Cavalla, Monastir, Rodosto, Deco-Aghatch, and Adrianople, with about 6000 souls; in Asia: Bruss, Ismid, Adapoli, Zougoul-Dagh, Dardanelles, Eski-Shehir, Angora, Trebizond, Samosun, and Erzeroum with about 3000 souls. Most Latin Catholics are of foreign nationalities and come from Greece, Italy, France, and England.

Almost all the religious works of the Apostolic vicariate are conducted by religious orders or congregations. The secular clergy counts only about ten members; they possess the two parishes of Pancacli (pro-cathedral) and the Dardanelles. There are fourteen parishes in the principal city of Constantinople and its suburbs. Outside the capital, the vicariate comprises 7 other parishes and 23 missionary stations. There are several seminaries, but none for the vicariate itself: a Greek preparatory seminary at Koom-Kapou (Stamboul), a Bulgarian preparatory seminary at Karn-Aghatch (Adrianople), a Greek-Bulgarian theological seminary at Kadi-Koue, conducted by the Assumptionists, with respectively 30, 35, and 10 pupils; the Eastern Seminary, preparatory and theological, founded at Pera in 1889 by French Capuchins for Latin and Eastern Rite pupils of every Eastern diocese, with about 50 pupils; the preparatory and theological seminary conducted since 1894 at Saas Stéfano by Austrian Capuchins, 30 pupils; a Bulgarian preparatory and theological seminary at Zeitenlik (Saloniki), conducted by the Lazarists, 58 pupils. Eighty elementary or middle schools are conducted by the aforesaid religious congregations. There are 74 secondary schools, for boys with 11,400 pupils (7030 girls and 4370 boys), 6 (properly so called) colleges for boys with 1410 pupils and a commercial institute. Moreover, 600 male and female orphans are trained in 6 orphanages. A professional school has just been founded. More than half of these schools are situated at Constantinople or its suburbs.

Many of the pupils are not Catholics, and many are Mussulmans or Jews. There is at Ferikoué a large and beautiful cemetery.

Catholic Orders and Congregations.—Orders of Men.—Augustinians of the Assumption, 13 residences, 51 priests (including 6 of Greek and 6 of Slav Rite), and 28 students or lay brothers, 3 seminaries, 6 parishes, 7 schools. French Capuchins, 2 residences, 50 monks (25 students and 10 lay brothers), 1 seminary, 1 scholasticate, and the church of St. Louis, parish of the French embassy. Austrian Capuchins, 1 residence, 10 priests, 1 lay brother, and 10 monks. Italian Capuchins, 3 residences, 8 priests, and 4 lay brothers. Conventuals, 6 residences, 5 parishes, 21 priests, and 10 lay brothers. Franciscans, 4 residences, 2 priests, with 10 priests and 6 lay brothers. Dominicans, 3 residences, 1 parish, 9 priests, and 3 lay brothers. Georgian Benedictines of the Immaculate Conception, 3 residences, 2 parishes 1 school, with 13 religious (2 priests of Georgian Rite). Jesuits, 6 residences, 42 religious, about 20 priests, 9 novices, 19 lay brothers. Monastery of the Holy Cross, 11 religious. French Lazarists, 7 residences, 71 religious (56 priests), 2 colleges, 1 seminary, several schools, 1 parish. Greek Fathers of the Holy Trinity of Pera, 3 residences, 6 priests, 3 schools. Polish Resurrectionists, 3 residences, about 30 religious (12 priests, 2 novices, 18 lay brothers), 1 college, 1 commercial and 10 elementary schools. Brothers of Ploermel, 10 brothers, aiding the Assumptionists in their schools. Marist Brothers, 8 residences, 4 schools, 46 brothers, aid other religious in 10 more schools. Italian Salesians of Don Bosco, 1 technical school.

Orders of Women.—Carmelites, 6 nuns. Dominican Sisters of Mondovi, 2 schools, 14 nuns. Sisters of Charity, 17 establishments, 210 nuns; they conduct among others three Turkish hospitals, the Persian, French, Italian, and Austrian hospitals, 2 asylums, 7 orphanages, 13 schools. Franciscan Sisters of Calais, 1 residence, 10 sisters for care of sick people at home. Franciscan Sisters of Gemona (Italy), 4 residences, 30 sisters, 5 schools. Sisters of the Immaculate Conception of Ivrea (Italy), 3 residences, 32 nuns, 1 hospital. Sisters of the Immaculate Conception of Lourdes, 1 residence, 14 sisters, for the adoration of the Most Blessed Sacrament and care of sick people. Oblates of the Assumption, 8 residences, 94 sisters, 7 schools, 1 hospital, 1 novitiate for native girls. Oblates of the Assumption of Lourdes, 15 sisters, 2 schools. Sisters of St. Joseph of Poitou, 1 school. Sisters of St. Joseph of Lyons, 3 residences, 39 sisters, 3 schools, 1 hospital. Sisters of Our Lady of Sion, 120 sisters, 2 residences, 2 boarding, and 2 elementary schools. Georgian Servants of Our Lady, 2 residences, 16 sisters, 15 sisters. Bulgarian Eucharistic Sisters, 5 residences with schools, 30 sisters. Missionary Sisters of the Most Holy Heart of Mary, 8 sisters, 1 hospital. Most of these residences have dispensaries, with a physician, whose services are supplied free of charge. To the women of Constantinople the congregations must be added pious works conducted by lay persons: St. Vincent de Paul Conferences (4 at Constantinople); the Synpia, an association which conducts a school for Catholic Hellenes, with 90 pupils, various associations and brotherhoods, etc.

Constantinople

The First Council of Constantinople (Second General Council) was called in May, 381, by Emperor Theodosius, to provide for a Catholic succession in the patriarchal See of Constantinople, to confirm the Nicene Faith, to reconcile the Semi-Arians with the Church, and to put an end to the Macedonian heresy. Originally it was only a council of the Orient; the authority of its decrees was afterwards extended to the West, and hence it is called the first ecumenical council (381). The council was attended by a large number of bishops from the East and West, and it was convened by Pope Damasus (Helefe-Leclercq, Hist. des Conciles, Paris, 1908, II, 4). It was attended by 150 Catholic and 36 heretical (Semi-Arian, Macedonian) bishops, and was presided over by Meletius of Antioch; after his death, by the successive patriarchs of Constantinople, St. Gregory Nazianzen and Nectarius. Its first measure was to confirm St. Gregory Nazianzen as Bishop of Constantinople. The Acts of the council have almost entirely disappeared, and its proceedings are known chiefly through the accounts of the ecclesiastical historians Socrates, Sozomen, and Theodoret. There is good reason to believe that it drew up a formal treatise (lomenon) on the Catholic doctrine of the Trinity, also against Apollinarianism; this important document has been lost, with the exception of the first canon of the council and its famous creed (Nicene-Constantinopolitan). The latter is traditionally held to be an enlargement of the Nicene creed, expressing the Divinity of the Holy Spirit. It seems, however, to be of earlier origin, and was probably composed (309-73) by St. Cyril of Jerusalem as an expression of the faith of that Church (Bois), though its adoption by this council gave it special authority, both as a baptismal creed and as a theological formula. Recently Harnack (Realencyclopaedie fur prot. Theol. und Kirche, 3rd ed., XI, 12-28) has maintained, on apparently inconclusive grounds, that it till after the Council of Chalcedon (451) was this creed (a Jerusalem formula with Nicene additions) attributed to the Fathers of the council. Indeed, it was twice recited and appears twice in the Acts of that council; it was also read and accepted at the Sixth General Council, held at Constantinople in 580 (see below). The very ancient Latin version of its text (Manz, Coll. Conc., III, 567) is by Dionysius Exiguus. The Greeks recognize seven canons, but the oldest Latin versions have only four; the other three are very probably (Helefe) later additions. The first canon is an important dogmatic condemnation of all shades of Arianism, also of Macedonianism and Apollinarism. The second canon renews the Nicene legislation imposing upon the bishops the observance of the Council of Constantinople and patriarchal limits. The fourth canon declares invalid the consecration of Maximus, the Cynic philosopher and rival of St. Gregory of Nazianzen, as Bishop of Constantinople. The famous third canon declares that because Constantinople is New Rome the bishop of that city should have a pre-eminence of honour after the Bishop of Old Rome. Baronius wrongly maintained the non-authenticity of this canon, which he considered a innovation of Photius (an erroneously thesis) that it declared the bishop of the royal city in all things the equal of the pope. The purely human reason of Rome’s ancient authority, suggested by this canon, was never admitted by the Apostolic See, which always based its primacy on the supremacy of St. Peter. Nor did Rome actually reorganize this unattractive reordering of rank among the ancient patriarchates of the East. It was rejected by the papal legates at Chalcedon. St. Leo the Great (Ep. cxi in P. L., LIV, 1003, 1005) declared that this canon had never been submitted to the Apostolic See and that it was a violation of the Nicaean ordination. The Eastern Council in 869 the Roman legates (Mansi, XVI, 174) acknowledged Constantinople as second in patriarchal rank. In 1215, at the Fourth Lateran Council (op. cit., XXII, 991), this was formally admitted for the new Latin patriarch, and in 1438, at the Council of Florence, for the Greek patriarch (Helefe-Leclercq, Hist. des Conciles, II, 22-27). The Roman correctores of Gratian (1852), at dist. xxii, c. 3, insert the words: “canon hie ex iis est quos apostolica Romana sedes a principe et longo tempore non recipit.”

At the close of the council Emperor Theodosius issued an edict (30 June) on imperial supremacy; the churches should be restored to those bishops who confessed the equal Divinity of the Father, the Son, and the Holy Spirit, and who held communion with Nectarius of Constantinople and other important Oriental prelates whom he named. The eccumenical character of this council seems to date, and that the Greeks, from the Council of Chalcedon (451). According to Pho- tius (Mansi, III, 506) Pope Damasus approved it, but if any part of the council were approved by this Pope it could have been only the aforesaid creed. In the latter half of the fifth century the successors of Leo the Great are silent as to this council. Its mention in the so-called “Decretum Gelasii,” towards the end of the fifth century, is not original but a later insertion in that text (Helefe). Gregory the Great, following the example of Vigilius and Pelagius II, recognized it as one of the four general councils, but only in its dogmatic utterances (P. G., LXXVII, 406, 869). (See ARIANISM, NECTARIANISM; with emendations by NAZIANZUS, SAINT; LEO I, SAINT, POPE; THEODORUS THE GREAT.)

II. The Second Council of Constantinople (Fifth General Council) was held at Constantinople (5 May—2 June, 553), having been called by Emperor Justinian. It was attended mostly by Oriental bishops; only six Western (African) bishops were present. The president was Eutychius, Patriarch of Constantinople. This assembly was in reality only the last phase of the long and violent conflicts inaugurated by the edict of Justinian in 543 against Origenism (P. G., LXXXVI, 945-90). The emperor was persuaded that Nestorianism continued to draw its strength from the writings of Theodore of Mopsuestia (d. 428), Theodore of Cyrus (d. 457), and Ibas of Edessa (d. 467), and also from the personal esteem in which the first two of these ecclesiastical writers were yet held by many. The events which led to this council will be narrated more fully in the articles VIGILIUS, POPE, and in Three Chapters; only a brief account will be given here.

From 25 Jan., 547, Pope Vigilius was forcibly de-
tained in the royal city; he had originally refused to participate in the condemnation of the Three Chapters (i.e. brief statements of anathema upon Theodore of Mopsuestia and his writings, upon Theodore of Cyrus and his writings against St. Justinian the Council of Ephesus, and upon the letter written by Ibas of Edessa to Maris, Bishop of Hardaschir in Persia). Later (by his "Judicatum", 11 April, 548) Vigilius had condemned the Three Chapters (the doctrine in question being really censurable), but he expressly bound the authority of the Council of Chalcedon (451) wherein Theodoret and Ibas—but after the condemnation of Nestorius—had been restored to their places; in the West much discontent was called forth by this step which seemed a weakening before the civil power in purely ecclesiastical matters and an injustice to men long grieved and judged by God; it was all the more objectionable as the Western mind had no accurate knowledge of the theological situation among the Greeks of that day. In consequence of this Vigilius had persuaded Justinian to return the aforesaid papal document and to proclaim a truce on all sides until a general council could be held. At this time there was an emperor and the Greek bishops violated this promise of neutrality; the former, in particular, publishing (551) his famous edict, "Omoegia tov svartov, condemning anew the Three Chapters, and refusing to withdraw the said edict. This modified protest Vigilius thereupon suffered various personal indignities at the hands of the civil authority and nearly lost his life; he retired finally to Chalcedon, in the very church of St. Euphemia where the great council had been held, whence he informed the Christian world of the state of affairs. Soon the Oriental bishops sought reconciliation with him, induced him to return to the city, and withdrew all that had hitherto been done against the Three Chapters; the new patriarch, Eutychius, successor to Mennas, whose weakness and subserviency were the immediate cause of all this violence and confusion, presented (6 Jan., 553) his profession of faith to Vigilius and, in union with other Oriental bishops, urged the calling of a general council under the presidency of the pope. Vigilius was willing, but proposed that it should be held either in Italy or in Sicily, in order to secure the attendance of Western bishops. To this the pope would not consent, instead, a kind of commission made up of delegates from each of the great patriarchates; Vigilius suggested that an equal number be chosen from the East and the West; but this was not acceptable to the emperor, who thereupon opened the council by his own authority on the date and in the manner mentioned above. Vigilius refused to participate, not only on account of the overwhelming proportion of Oriental bishops, but also from fear of violence; moreover, none of his predecessors had ever taken part personally in an Oriental council. To this decision he was urged by the wishes of his will, and to give an independent judgment on the matters at issue. Eight sessions were held, the result of which was the final condemnation of the Three Chapters by the 165 bishops present at the last session (2 June, 553), in fourteen anathematisms similar to the thirteen previously issued by Justinian.

In the meantime Vigilius had sent to the emperor (14 May) a document known as the first "Constitutum" (Manasi, IX, 61-106), signed by himself and sixteen, mostly Western, bishops, in which sixty heretical propositions of Theodore of Mopsuestia were condemned, and five anathemata and logiographic teachings repudiated; it was forbidden, however, to condemn his person, or to proceed further in condemnation of the writings or the person of Theodoret, or of the letter of Ibas. It seemed indeed, under the circumstances, no easy task to denounce fittingly the certain errors of the great Antiochene theologian and his followers and yet uphold the reputation and authority of the Council of Chalcedon, which had been content with obtaining the essentials of submission from the Monophysites from Alexandria and Chalcedon (545), but for that very reason had never been forgiven by the Monophysite opponents of Nestorius and his heresy, who were now in league with the numerous enemies of Origen, and until the death (548) of Theodora had enjoyed the support of that influential empress.

The decisions of the council were executed with a violence in keeping with its conduct, though the ardently hoped-for reconciliation of the Monophysites did not follow. Vigilius, together with other opponents of the imperial will, as registered by the subserene and count-prefect, seems to have been banished (Hefele, II, 905), together with the faithful bishops and eclesiastics of his suite, either to Upper Egypt or to an island in the Propontis. Already in the seventh session of the council Justinian caused the name of Vigilius to be stricken from the diplomas, without prejudice, however, it was said, to communion with the Pope. The Greek clergy and people, now freed from the Gothic yoke, requested the emperor to permit the return of the pope, which Justinian agreed to on condition that Vigilius would recognize the late council. This Vigilius finally agreed to do, and in two documents (a letter to the emperor dated 8 Dec., 553, and a second "Constitutum" of 23 Feb., 554, probably addressed to the Western episcopate) condemned, at last, the Three Chapters (Manasi, IX, 414-20, 457-88; cf. Hefele, II, 905-11), independently, however, and without mention of the council. His opposition had never been based on doctrinal grounds but on the decency and openness of the measures proposed, the wrongful imperial violence, and a delicate fear of injury to the authority of the Council of Chalcedon, especially in the West. Here, indeed, despite the additional recognition of it by Pelagius I (555-60), the Fifth General Council only gradually acquired in public opinion an ecclesiastical character. In Northern Italy the ecclesiastical provinces of Milan and Aquila broke off communion with the Apostolic See; the former yielding only towards the end of the sixth century, whereas the latter (Aquileia-Graude) would not do so until 700 (Hefele, op. cit., II, 911-27). (For an equitable appreciation of the conduct of Vigilius see, besides the article Vigilius, the judgment of Bois, in Dict. de thèol. cath., II, 1238-39.) The pope was always correct as to the doctrine involved, and yielded, for the sake of peace, only when he was satisfied that there was no fear for the authority of Chalcedon, which he at first, with the entire West, deemed in peril from the machinations of the Monophysites.

The original Greek Acts of the council are lost, but there is extant a very old Latin version, probably contemporary and for the most part uniformly quoted by his successor Pelagius I. The Baluze edition is reprinted in Manasi, "Coll. Conc.", IX, 163 sqq. In the next General Council of Constantinople (680) it was found that the original Acts of the Fifth Council had been tampered with (Hefele, op. cit., II, 855-58) in favour of Monothelism; nor is it certain that in their present shape we have them in their original completeness (ibid., pp. 859-60). This has a bearing on the much disputed question concerning the condemnation of Origenism at this council. Hefele, moved by the antiquity and persistence of the reports of the Orientals, his teacher, Peter Damianus (p. 861) with Cardinal Noris, that in it Origen was condemned, but only en passant, and that his name in the eleventh anathema is not an interpolation.

The chief sources are the writings of the contemporary Western (African) Fuscundus de Hermias, Pro defensa trium capit.;
III. THE THIRD COUNCIL OF CONSTANTINOPLE

(Sixth General Council) was summoned in 678 by Emperor Constantine Pogonatus, with a view of restoring between East and West the religious harmony that had been troubled by the Monothelitical controversies, and particularly by the violence of his predecessor Council I, which had condemned the Council of Ephesus (Arian), and another of import from a Roman synod held in the spring of 680. They were read in the second session, with the protest of the Pope. In particular, the Pope's insertion of the faith of the Apostolate See as the living and stainless tradition of the Apostles of Christ, assured by the promises of Christ, witnessed by all the popes in their capacity of successors to the Petrine privilege of confirming the brethren, and therefore finally authoritative for the Universal Church. The result of the eighteen sessions was devoted to an examination of the Scriptural and patristic passages bearing on the question of one or two wills, one or two operations, in Christ. George, Patriarch of Constantinople, soon yielded to the evidence of the orthodox teaching concerning the two wills and two operations in Christ, but Macarius of Antioch, "almost the only certain representative of Monothelism since the nine propositions of Cyrus of Alexandria" (Chapman), resisted to the end, and was finally anathematized and deposed for "not consenting to the tenor of the orthodox letters sent by Agatho the most holy man, on the point, etc., that the two natures (human and Divinc) of Christ there is a perfect operation and a perfect will, against which the Monothelites had taught that there was but one operation and one will (a single directive) quite in consonance with the Monophysite confusion of the two natures in Christ. In the thirteenth session (28 March 681) after anathematizing the chief Monothelite heretics mentioned in the aforesaid letter of Pope Agatho, i.e. Sergius of Constantinople, Cyrus of Alexandria, Pyrrhus, Paul, and Peter of Constantinople, and Theodore of Pharan, the council added: And in addition to those whose names are transmitted, who were pope of Elder Rome, be with them cast out of the Holy Church of God, and be anathematized with them, because we have found by his letter to Sergius that he followed his opinion in all things and confirmed his wicked dogmas." A similar condemnation of Pope Honorius occurs in the dogmatic decree of the final session (18 Sept., 681), which was signed by the legates and the emperor. Reference is here made to the famous letter of Honorius to Sergius of Constantinople about 634, around which has arisen (especially before and during the Vatican Council) such a large controversies literature. It has been an inveterate habit and tradition the occasion of the question by the stubborn Monothelite Macarius of Antioch, and had been publicly read in the twelfth session together with the letter of Sergius to which it replied. On that occasion a second letter of Honorius to Sergius was also read, of which only a fragment has survived. (For the question of this pope's orthodoxy, see Honorius I: Infallibility; Monothelities.)

There has been in the past, leading to Gallicanism and the opponents of invariance and infallibility, much controversy concerning the proper sense of this council's condemnation of Pope Honorius, the theory (Baronius, Dammarter) of a falsification of the Acts being now quite abandoned (Hefele, III, 289-313). Some have maintained, with Pennacchi, that he was indeed condemned as a heretic, but that the Oriental bishops of the council misunderstood the thoroughly orthodox (and dogmatic) letter of Honorius; others, with Hefele, that the council condemned the heretically sounding expressions of the pope (though his doctrine was really orthodox); others finally, with Chapman (cf. below), that he was condemned "because he did not, as he should have done, declare authoritatively the Petrine tradition of the Roman Church. To that tradition he had made no appeal but had merely approved and enlarged upon the half-hearted compromise of Sergius. . . . Neither the pope nor the council condemned that the pope held that the Apostolic See was the fountain of the Roman tradition, for he had never claimed to represent it. Therefore, just as to-day we judge the letters of Pope Honorius by the Vatican definition and deny them to be ex cathedra, because they do not define any doctrine and impose it upon the whole Church, so the Christians of the seventh century judged the papal letters by the council of the Roman Church, and they did not claim what papal letters were wont to claim, viz., to speak with the mouth of Peter in the name of Roman tradition." (Chapman).

The letter of the council to Pope Leo, asking, after the traditional manner, for confirmation of its Acts, while including again against Monothelites, lays a remarkable stress on the magisterial office of the Roman Church, and, in general, the documents of the Sixth General Council favor strongly the inerrancy of the See of Peter. "The Council," says Dom Chapman, "accepts the letter in which the pope defined the faith. It deposes those who refused to accept it. It asks [the pope] to confirm its decisions. The Bishops and Emperor declare that they have seen the letter to contain the doctrine of the Fathers. Agatho speaks with the voice of Peter himself; from Rome the law had gone forth as out of Mount Sinai; Peter has taken Peter's place. If Agatho died during the council and was succeeded by Leo II, who confirmed (685) the decree against Monothelism, and expressed himself even more harshly than the council towards the memory of Honorius (Hefele, Chapman), though he laid stress chiefly on the neglect of the pope to send forth the traditional teaching of the Apostolic See, whose spotless faith he treasonably tried to overthrow (or, as the Greek may be translated, permitted to be overthrown).

The Acts of the Council are in the eleventh volume of Mansi, Coll. Conc. The most complete presentation of its history is in Hefele, Conciliorum chron. (2nd ed., Freiburg, 1877), III, 249-313, see also the English tr. (Edinburgh, 1892), and for the later bibliography the French bibliographic, Pichon (Paris, 1907); Schneemller, Studien über die Honoriusfrage (Freiburg, 1894); Pennacchi, Denzinger, Conc. VI (Rome, 1870); Herrenberger-Kirsch, Kirchenrecht, (4th ed., Freiburg, 1904), I., 633-38; Marmillot, Hon- orius et L'orthodoxie en Am., (Paris, 1894); XI, 82-92; Botta, Pope Honorius before the Tribunals of Reason and History (London, 1894); Döllinger (Old Catholic), Falsifying the Pope in the Kaiser's name, Ameri- can ed. of the Papistlibel (New York, 1872), 223-48; Chapman, The condemnation of Honorius I of Rome, 1897, and reprinted by the London Cath. Truth Society, 1907; Grihans in Kirchbl., VII, 230 sqq. For the extensive literature in Latin, see Ch. E. Hefele, Conc. VI, 313 sqq.; for the extensive foreign literature, see CHAPMAN.

IV. THE FOURTH COUNCIL OF CONSTANTINOPLE

(Eighth General Council) was opened, 5 Oct., 869, in the Cathedral of Saint Sophia, under the presidency of the legates of Adrian II. During the preceding decade grave irregularities had occurred at Constantinople, among them the deposition of the Patriarch...
Ignatius and the intrusion of Photius, whose violent measures against the Roman Church culminated in the attempted deposition (867) of Photius as patriarch, was the accession in that year of a new emperor, Basil the Macedonian, changed the situation, political and ecclesiastical. Photius was interned in a monastery; Ignatius was recalled, and friendly relations were resumed with the Apostolic See. Both Ignatius and Basil expressed a wish to convene a general council. After holding a Roman synod (June, 869) in which Photius was again condemned, the pope sent to Constantinople three legates to preside in his name over the council. Besides the Patriarch of Constantinople there were present the representatives of the Byzantine throne and, at the end, also the representatives of the Patriarch of Alexandria. The attendance of Ignatian bishops was small enough in the beginning; indeed there were never more than 102 bishops present.

The legates were asked to exhibit their commission, which they did; then they presented to the members of the council the famous formula (iabellus) of Pope Hormisdas (514–23), binding its signatories "to follow in everything the Apostolic See of Rome and teach all its laws ... in which communion is the whole, real, and perfect solidarity of the Christian religion". The Photian legates were asked to return the false statements of two former envoys of Photius to Rome. In the fifth session Photius himself unwillingly appeared, but when questioned observed a deep silence or answered only in a few brief words, pretending blasphemously to imitate the attitude and speech of Christ before Caiphas and Pilate. Through his representatives he was given another hearing in the next session; they appeared to the canons as above the pope. In the seventh session he again appeared, this time with his consecrator George Ascebes. They appealed, as before, to the ancient canons, refused to recognize the presence or authority of the Roman legates, and rejected the authority of the Roman Church through the offers to render an account to the emperor. As Photius would not renounce his usurped claim and recognize the rightful patriarch Ignatius, the former Roman excommunications of him were renewed by the council, and he was banished to a monastery on the Bosporus, whence he died. Ignatius, not Photius, was the prevailing and impious, and by a very active correspondence kept up the course of his followings, until in 877 the death of Ignatius opened the way for his return to power. Iconoclasms, in its last remnant, and the interference of the civil authority in ecclesiastical affairs were denounced by the council. The tenth and last session was held in the presence of the emperor, his son Constantine, the Bulgarian king, Michael, and the ambassadors of Emperor Louis II.

The twenty-seven canons of this council dealt partly with the situation created by Photius and partly with general points of discipline or abuses. The decrees of Nicholas I and Adrian II against Photius and in favour of Ignatius were read and confirmed, the Photian clerics deposed, and those ordained by Photius reduced to lay communion. The council issued an Encyclical to all the faithful, and wrote to the pope requesting confirmation. The decrees of the legates signed its decrees, but with reservation of the papal action. Here, for the first time, Rome recognized the ancient claim of Constantinople to the second place among the five great patriarchates. Greek pride, however, was offended by the compulsory signature of the aforesaid Roman formulary of reconciliation, and in a subsequent conference of Greek ecclesiastical and civil authorities the newly-converted Bulgarians were declared subject to the Patriarchate of Constantinople. Photius continued to contest the decision by the Apostolic See, Ignatius proved ungrateful, and in this important matter sided with the other Eastern patriarchs in conspiring, for political reasons, a notable injustice; the territory henceforth known as Bulgaria was in reality part of the ancient Illyria that has always belonged to the Latin Church, and not, until the Iconoclastic Leo III (718–41) violently withdrew it and made it subject to Constantinople. Ignatius very soon consecrated an archbishop for the Bulgarians and sent thither many Greek missionaries, whereupon the Latin bishops and priests were obliged to retire. On their way home the archbishop and, indeed, the entire body were imprisoned; they had, however, given to the care of Anastasius, Librarian of the Roman Church (present as a member of the Frankish embassy) most of the submission-signatures of the Greek bishops. We owe him the Latin version of these documents and a copy of the Greek Acts of the council which he also translated and to which is due most of our documentary knowledge of the proceedings. It was in vain that Adrian II and his successor threatened Ignatius with severe penalties if he did not withdraw from Bulgaria his Greek bishops and priests. The Roman Church never regained the former region she had lost. (See Photius; Ignatius of Constantinople; Nicholaus I.)

B. PARTICULAR COUNCILS OF CONSTANTINOPLE.—I. In the summer of 382 a council of the Oriental bishops, convoked by Theodosius, met in the imperial city. We still have its important proclamation of faith, often wrongly attributed to the Second General Council (i.e. at Constantinople in the preceding year), exhibiting the doctrinal agreement of all the Christian churches; also two canons (v and vi) wrongly put among the canons of the Second General Council (Hierie-Legencey, Histoire des conciles, Paris, 1907, II (i), 53–56).

In the summer of the year (383) Theodosius convoked another council, with the hope of uniting all factions and parties among the Christians on the basis of a general acceptance of the teachings of the Ante-Nicene Fathers. He met with a qualified success (Socrates, From 52, 193, 2, 465–63); among the most stubborn of those who resisted Eunomius (see Eutonianism).

II. The council, held in 692, under Justinian II is generally known as the Council in Trullo, because it was held in the same domed hall where the Sixth General Council had met (see above). Both the Fifth and Sixth General Councils had omitted to draw up disciplinary canons, and as this council was intended to complete both in this respect, it also took the name of Quinisext (Concilium Quini sexturnum, Zőve- do Néptûrsery, i.e. Fifth-Sixth). It was attended by 215 bishops, all Orientals. Basil of Gortyna in Ilyria, however, belonged to the Roman patriarchate and called himself papal legate, though no evidence is extant of his right to use a title that in the East served to clothe the decrees with Roman authority. In fact, the West never recognized the 102 disciplinary canons of this council, in the same manner as those of earlier canons. Most of the new canons exhibit an inimical attitude towards Churches not in disciplinary accord with Constantinople, especially the Western Churches. Their customs are anathematized and "every little detail of difference is remembered to be condemned" (Fortescue, Canonization of Constantine (381) and canon xxvii of Chalcedon (451) are
renewed, the heresy of Honorius is again condemned (can. 1), and marriage with a heretic is invalid because Rome says so. It is not unlikely (for the whole Church) that all clerics except bishops may continue in wedlock, while they excommunicate anyone who tries to separate a priest or deacon from his wife, and any cleric who leaves his wife because he is ordained (can. iii, vi, xii, xiii, xlviii). The Orthodox Church holds this council an iconoclastic one, and adds its canons to the decrees of the Fifth and Sixth Councils. In the West St. Bede calls it (De sexta mundi statu) a reprobate synod, and Paul the Deacon (Hist. Lang., VI, p. 11) an errant one. Dr. Fortescue rightly says (op. cit. below, p. 96) that intolerance of all other customs with the wish to make the whole Christian world conform to its own local practices has always been and still is a characteristic note of the Byzantine Church. For the attitude of the popes, substantially identical, in face of the various attempts to obtain their approval of these canons, see Hefele, "Antiquitates Ecclesiasticæ," III, 345–351.

In 754 the Iconoclast Emperor Constantine V called in the imperial city a council of 338 bishops. Through cowardice and servility they approved the heretical attitude of the emperor and his father Leo III, also the arguments of the Iconoclasm party and their measures against the defenders of the sacred images. They anathematized St. Germanus of Constantinople and St. John Damascene, and denounced the orthodox as idolaters, etc.; at the same time they resented the spoliation of the churches under pretext of destroying images (see ICONOCLASM).

IV. For the three Photian synods of 861 (deposition of Ignatius), 867 (attempted deposition of Nicholas I), and 879 (recognition of Photius as lawful patriarch), recognized by the Greeks as Eighth General Council in opposition to the council of 869–70, which they continue to abominate, see PHOTIUS.

In 1639 and 1672 councils were held by the Orthodox Church at Constantinople, at the Calvinistic confession of Cyril Lucaris and his followers. [See Semnos, Les dernières années du patriarche Cyril Lucar in "Echoes of Orient," 1903, VI, 97–117, and Fortescue, "Orthodox Eastern Church" (London, 1907), 267].

THOMAS J. SHAHAN

Constantinople, CREED OF. See NICENE CREED.

Constantinople, THE RITE OF (or BYZANTINE RITE), the liturgies, Divine Office, forms for the administration of sacraments and for various blessings, sacramentals, and exorcisms, of the Church of Constantinople, which is now after the Roman Rite, by far the most widely spread in the world. With one insignificant exception—the Liturgy of St. James is used once a year at Jerusalem and Zakynthos (Zacynthus)—it is followed exclusively by all Orthodox Churches, by the Melkites (Melchites) in Syria and Egypt, the Uniates in the Balkans and the Italo-Greeks in Calabria, Apulia, Sicily, and Corsica. So that more than a hundred millions of Christians perform their devotions according to the Rite of Constantinople.

I. HISTORY.—This is not one of the original patriarchal rites. It is derived from that of Antioch. Even apart from the external evidence as derived from the two liturgies will show that Constantinople follows Antioch in the disposition of the parts. There are two original Eastern types of liturgy: that of Alexandria, in which the great Intercession comes before the Consecration, and that of Antioch, in which it follows after the Epiklesis. The Byzantine use in both its Liturgies (of St. Basil and St. John Chrysostom) follows exactly the order of Antioch. A number of other parallel forms in the Eastern Church and elsewhere are ascribed to St. Basil (d. 379). However, it is clear that internal evidence, as it is from external witness. The tradition of the Church of Constantinople ascribes the whole of its two Liturgies to St. Basil the Great (d. 379), Metropolitan of Cappadocia. This tradition is confirmed by contemporary evidence. It is also necessary to maintain that the new form of the Liturgy of his Church, and that the Byzantine service called after him represents his reformed Liturgy in its chief parts, although it has undergone further modification since his time. St. Basil himself speaks on several occasions of the changes he made in the services of his Church. He made a new Synaxarium, and adds to the Pontius to complain of opposition against himself on account of the new way of singing psalms introduced by his authority (Ep. Basilii, evii, Patr. Gr., XXXII, 763). St. Gregory of Nazianzus (Nazianzen, d. 390) says that Basil had reformed the order of prayers (Orat. XX, P. G., XXXV, 761). Gregory of Nyssa (died c. 394) compares his brother Basil with Samuel because he "carefully arranged the form of the Service" (Toroswry, in Laudem fr. Bas., P. G., XLI, 608). Proklos (Proculus) of Constantinople (d. 446) writes: "When the great Basil rebuked the carelessness and degeneracy of men who feared the length of the Liturgy and shortened its form, be so as to remove the weariness of the clergy and assistans" (De traditione divini Missae, P. G., XLVI, 849). The first question that presents itself is: What rite was it that Basil modified and shortened? Certainly it was that used at Cæsarea before his time. And this was a local form of the great Antiochene use, doubtless with many local variations and additions. That the original rite that stands at the head of this line of development is that of Antioch is proved from the disposition of the present Liturgy of St. Basil, to which we have already referred; from the fact that, before the rise of the Patriarchate of Constantinople, Antioch was the head of the Churches of Asia Minor as well as of Syria (and invariably in the East the patriarchal see gives the norm in liturgical matters, followed and then gradually modified by its suffragan Churches); and lastly by the absence of any other so widely used in all Eastern rites stand that of Antioch and Alexandria. Lesser and later Churches do not invent an entirely new service for themselves, but form their practice on the model of one of these two. Syria, Palestine, and Asia Minor in liturgical matters derive from Antioch, just as Egypt, Abyssinia, and Nubia do from Alexandria. The two extant are (1) that of the Eighth Book of the Apostolic Constitutions and (2), parallel to it in every way, the Greek Liturgy of St. James (see ANTIOCHENE LITURGY). These are the starting-points of the development we can follow. But it is not to be supposed that St. Basil had before him either of these services, as they now stand, when he made the changes in question. In the first place, his source is rather the Liturgy of St. James than that of the Apostolic Constitutions. There are parallels to both in the Basilian Rite; but the likeness is much greater to that of St. James. From the beginning of the Eucharistic prayer (Vere dignum et justum est, our Preface) to the dismissal, Basil's order is almost exactly that of James. But the now extant Liturgy of St. James (in Brightman, "Liturgy Eastern and Western," 31–68) has itself been considerably modified in later years. Its earlier part is a true parallel of the Byzantine (Commensae and the Offertory) is certainly later than the time of St. Basil. In any case, then, we must go back to the original Antiochene Rite as the source. But neither was this the immediate origin of the form. It must be remembered that all living rites are subject to gradual modification through use. The
outline and frame remain; into this frame new prayers are fitted. As a general rule liturgies keep the division of their parts but tend to lose the text of the prayers. St. Basil took as the basis of his reform the use of Cessarea in the fourth century. There is reason to believe that it was this use, while retaining the essential order of the original Antiochene service, had already considerably modified various parts, especially the action; but it is known that St. Basil shortened the Liturgy. But the service that bears his name is not at all shorter than the present one of St. James. We may, then, suppose that by his time the Liturgy of Cessarea had been considerably lengthened by additional prayers (this is the common development). In P.G., 186, 1010, St. Basil says, the rite of Constantinople bears his name is the Liturgy of St. James as modified by St. Basil, it must be understood that Basil is rather the chief turning-point in its development than the only author of the change. It had already passed through a period of development before his time, and it has developed further since. Nevertheless, St. Basil and his reform of the rite of his own city are the starting-point of the special use of Constantinople.

A comparison of the present Liturgy of St. Basil with earlier allusions shows that in its chief parts it is really the service composed by him. Peter the Deacon (P. G., XXXIX, 301, 1) says, St. Basil shortened the Liturgy of St. James. St. Gregory the Great (P.G., XXIX, 310, 302) quotes as composed by him the beginning of the Introit-prayer and that of the Elevations exactly as they are in the existing Liturgy (Brightman, 319, 341). The Second Council of Nicaea (787) says: "As all priests of the holy Liturgy kneel, Basil says in the prayer of the Anaphora: We approach with confidence to the holy altar..." The prayer is the one that follows the Anamnesis in St. Basil's Liturgy (Brightman, p. 329. Cf. Hardouin, IV, p. 371).

From these and similar indications we conclude that the Liturgy of St. Basil in its oldest extant form is substantially authentic, namely, from the beginning of the Anaphora to the Communion. The Mass of the Catechumens and the Offertory prayers have developed since his death. St. Gregory Nazianzen, in describing the saint's famous encounter with Valens at Cessarea, in 372, describes the Offertory as a simpler rite, accompanied with psalms sung by the people but without an audible Offertory prayer (Gregor. Naz., Or., xiii, 52, P. G., XXXVI, 561). This oldest form of the Basleian Liturgy is contained in a manuscript of the Barberini Library of about the year 900 (MS, I, 55, reprinted in Brightman, 309-344). The Liturgy of St. John Chrysostom is in the Cyrillic and Molchoite Churches (Euchologion, Venice, 1898, pp. 75-97; Brightman, 400-411) is printed after that of St. Chrysostom and differs from it only in the prayers said by the priest, chiefly in the Anaphora; it has received further unimportant modifications. It is probable that even before the time of St. John Chrysostom the Liturgy of Basil was used at Constantinople. We have seen that Peter the Deacon mentions that it was "used by nearly the whole East." It would seem that the importance of the See of Cessarea (even beyond its own exarchy), the fame of St. Basil, and the practical convenience of this short Liturgy led to its adoption by many Churches in Asia and Syria. The Feast of St. Jesus (Peter the Deacon's remark would probably mean a day the whole East "knew") and St. Basil shortened the Liturgy. It was administered that this day a Liturgy that was practically the same as the one he had known at home in Cappadocia. His Sixth Sunday after Pentecost (P.G., XXXVI, 311) at Constantinople, his Thirty-Eighth (P.G., XXXVI, 311) at Constantinople. In both he refers to and quotes the Eucharistic prayer that his hearers know. A comparison of the two texts shows that the prayer is the same. This proves, that at this time of its most important element, the liturgy used at the capital was that of Cappadocia—the one that St. Basil used as a basis of his reform. It would therefore be most natural that the reform too should in time be adopted at Constantinople. But it would seem that before Chrysostom this Basleian Rite (according to the universal rule) had received further development and additions at Constantinople. It has been suggested that the form of the Nestorian Liturgy is the original Byzantine Rite, the one that St. Chrysostom found in use when he became patriarch (Probol, "Lit. des IV. Jahrh."., 413).

The next epoch in the history of the Byzantine Rite is the reform of St. John Chrysostom (d. 407). He not only further modified the Rite of Basil, but left both his own reformed Liturgy and the unaltered Basilian one itself, as the exclusive use of Constantinople. St. John became Patriarch of Constantinople in 397; he reigned there till 403, was then banished, but came back in the same year and was banished again in 404, and died in exile in 407. The tradition of his Church says that during the time of his patriachate he composed from the Basleian Liturgy a shorter form that is the one still in common use throughout the Orthodox Church. The same text of Probol (Procob). "Not only, our father, John Chrysostom, zealot for the salvation of his flock as a shepherd should be, considering the carelessness of human nature, thoroughly rooted up every diabolical objection. He therefore left out a great part and shortened all the forms lest anyone..." The liturgy away from this Anaphora, for instance..." etc. He would then, have treated St. Basil's rite...exactly as Basil treated the older rite of Cessarea. There is no reason to doubt this tradition in the main issue. A comparison of the Liturgy of Chrysostom with that of Basil will show that it follows the same order and is shortened considerably in the text of the prayers; for a further comparison of its text with the numerous allusions to the rite of the Holy Eucharist in Chrysostom's homilies will show that the oldest form we have of the Liturgy agrees substantially with the one he describes (Brightman, 530-534). But it is also certain that the modern Liturgy of St. Chrysostom has received considerable modifications and additions since his time. In order to reconstruct the rite used by him we must take away from the present Liturgy all the Preparations of the Offerings (Eucharisticia, the ritual of the Little and Great, and the Creed. The service began with the bishop's greeting. "O Lord, for Peace to all men..." the answer was "May be...the spirit." The lessons followed from the Prophets and Apostles, and the deacon read the Gospel. After the Gospel the bishop or a priest preached a homily, and the prayer over the catechumens was said. Originally it had been followed by a prayer over penitents, but Nektarios (381-397) had abolished the discipline...
of public penance, so in St. Chrysostom's Liturgy this prayer is left out. Then came a prayer for the faithful (baptized) and the dismissal of the catechumens. St. Chrysostom mentions a new ritual for the Offertory: the choir accompanied the bishop and formed a solemn procession to bring the bread and wine from the altar (Hom. xxxvi, in I Cor., vi, P. G., LXI, 313). No mention of the processions and the Cherubic Chant that accompany the Great Entrance are a later development (Brightman, op. cit., 530). The Kiss of Peace apparently preceded the Offertory in Chrysostom's time (Brightman, op. cit., 522, Pseudo, op. cit., 205). The Eucharistic prayer followed, and after recitation of the dialogue "he will fill up your hearts" etc. This prayer, which is clearly an abridged form of that in the Basilian Rite, is certainly authentically of St. Chrysostom. It is apparently chiefly in reference to it that Prokop says that he has shortened the older rite. The Sanctus was sung by the people as now. The ceremonies performed by the deacon at the words of Institution are a later addition. Prokop thinks that the original Epiklesis of St. Chrysostom ended at the words "Send thy Holy Spirit down on us and on these gifts spread before us" (Brightman, op. cit., 386), and that the continuing prayer (especially the disconnected interrupting "be merciful to us, O God" and "be merciful to me") is part of the Epiklesis; Maltzaw, "Die Liturgien", etc., Berlin, 1894, p. 88 are a later addition (op. cit., 414). The Intercession followed on at once, beginning with a memory of the saints. The prayer for the dead came before that for the living (ibid., 216-415). The Eucharistic prayer ended with a doxology to which the people answered, Amen; and then the bishop greeted them with the text, "The mercy of our great God and Saviour Jesus Christ be with all of you" (Tit., ii, 13), to which they answered: "And with thy spirit", as usual. The Lord's Prayer followed, introduced by a short homily spoken by the deacon and followed by the well-known doxology: "For thine is the kingdom", etc. This ending was added to the Our Father in the Codex of the New Testament used by St. Chrysostom (cf. Hom. xix in P. G., LVII, 282). Another greeting (Peace to all) with its answer introduced the manual acts, first an Elevation with the words "Holy things for the holy" etc., the Breaking of Bread and the Communion under both kinds. In Chrysostom's time it seems that people received either kind separately, drinking from the chalice. A short prayer of thanksgiving ended the Liturgy. That is the rite as we see it in the saint's homilies (cf. Procop., op. cit., 159-202, 282-283). That is the rite that was publicly preached at Antioch (387-397) before he went to Constantinople. It would seem, then, that the Liturgy of St. Chrysostom was in great part that of his time at Antioch, and that he introduced it at the capital when he became patriarch. We have seen from Peter the Deacon that St. Basil's Rite was used by "nearly the whole East". There is, then, no difficulty in supposing that it had penetrated to Antioch and was already abridged there into the "Liturgy of Chrysostom" before that saint brought this abridged form to Constantinople.

It was this Chrysostom Liturgy that gradually became the common Eucharistic service of Constantinople, and that spread throughout the Orthodox world, as the city that had adopted it became more and more the acknowledged head of Eastern Christendom. It did not completely displace the older rite of St. Basil, but reduced it to very few days of the year, is still said (see below, under II). Meanwhile the Liturgy of St. Chrysostom itself underwent further modification. The oldest form of it now extant is in the same manuscript of the Barberini Library that contains St. Basil's Liturgy. In this the elaborate rite of the Proskomide has not yet been added, but it has already received additions since the time of the saint whose name it bears. The Trisagog (Holy God, Holy Strong One, Holy Immortal One, have mercy on us) at the Little Entrance is a liturgy that have been revealed to Proclus of Constantinople (434-47, St. John Dam., De Fide Orth., III, 10): this probably gives the date of its insertion into the Liturgy. The Cherubikon that accompanies it is apparently a later development. Judas II (566-78, Brightman, op. cit., 532), and the Creed that follows, just before the beginning of the Anaphora, is also ascribed to him (Joannis Bibliarchis Chronicon, P. L., LXXII, 863). Since the Barberini Euchologion (nineteenth cent.) the Preparation of the Offerings (προσφυγος) at the altar and the Great Entrance are a later development into the elaborate rite that now accompanies it. Brightman (op. cit., 533-563) gives a series of documents from which the evolution of this rite may be traced from the ninth to the sixteenth century.

These are the two Liturgies of Constantinople, the older one of St. Basil, now said only on a few days, and the later shortened one of St. Chrysostom that is in common use. There remains the third, the Liturgy of the Presanctified (των προσφυγων). This service, that in the Latin Church now occurs only on Good Friday, was at one time used on the all-night vigils of Lent everywhere (see ALLELUIALITURGIAE). Already in the fourth century,Origines, 229-230. This is the practice of the Eastern Churches. The Paschal Chronicle (see CHRONICON PASCHALE) of the year 645 (P. C., XCVII) mentions the Presanctified Liturgy, and the fifty-second canon of the Second Trullan Council (692) orders: "On all days of the fast of forty days, except Saturdays and Sundays and the day of the Holy Annunciation, the Liturgy of the Pre-sanctified shall be celebrated." The essence of this Liturgy is simply that the Blessed Sacrament that has been consecrated on the preceding Sunday, and is reserved in the tabernacle (αγαθοθηκη) under both kinds, is taken out and distributed as Communion. It is now always celebrated at the end of Vespers (δεκατεμπυραμ') which form its first part. The lessons are read as usual, and the litany sung; the catechumens are dismissed, and then, the whole Anaphora being naturally omitted, Communion is given; the blessing and dismissal follow. This great part of the rite is simply taken from the Great Entrance, it is sometimes abridged to at least part of Vespers, which form its first part. The lessons are read as usual, and the litany sung; the catechumens are dismissed, and then, the whole Anaphora being naturally omitted, Communion is given; the blessing and dismissal follow. by singing psalms (Hom. iv, in Ep. ad Hebr., P. G., LXXXIII, 43) etc.

With regard to the Divine Office especially, it has the ars generalis principles in East and West from a very early age (see Breviary). Essentially it consists in psalm-singing. Its first and most important part is the Lauds (Laudes) sung at dawn (the Laudes) was sung; during the day the people met again at the third, sixth, and ninth hours, and at sunset for the evensong (Vespers). Besides the psalms these Offices contain lessons from the Bible and collectas. A peculiarity of the Antiochene use is the watch for the Orthros (Pa-Ath. De Vesp. P. G., XXVII, 276); the evening hymn, Φως καθρεφτε, still sung in the Byzantine Rite at the Hesperinos and attributed to Ahenogenes (in the second cent.), is quoted by St. Basil (De Spir. Sancto, lxxiii, P. G., XXXII, 205).

Egeria of Aquitaine, the pilgrim to Jerusalem, gives a vivid description of the Office as sung there according to Antioch in the fourth century ("S. Silvias (sic) peregrin.""). ed. Canmurredi, Rome, 1887.

To this series of Hours two were added in the fourth century. John Cassian (Instit., III, iv) describes the addition of Prime by the monks of Palestine, and St. Basil refers (loc. cit.) to the Office of Prime, and of the Evening Prayer. Before the sixth century, therefore, the Antiochene office was as follows: Prime and Compline, then were originally private prayers said by monks in addition to the canonical Hours. The Antiochene manner of keeping this Office was famous all over the East. Flavian of Antioch in 357 softened the heart of Theodosius (after the outrage to the statues) by making his clerics sing to him "the chant of Antioch" (Sozom., H. E., VII, xxxii). And St. John Chrysostom, as soon as he comes to Constantinople, introduces the methods of Antioch in keeping the canonical Hours (16, VIII, 6). Eventually the Eastern Office admits short services (the Hour, the Vespers, and Compline) into its frame a number of famous psalmists have written a new succession of Metrical psalms; of these St. Romanos the singer (sixth cent.), St. Cosmas the singer (eighth cent.), St. John Damascene (c. 780), St. Theodore of Studion (d. 820), etc. were the most famous (see Byzantine Literature, sub-title IV. Ecclesiastical etc.). St. Sabas (d. 532) and St. John Damascene eventually arranged the Office for the whole year, though, like the Liturgy, it has undergone further development since, till it acquired its present form (see below).

II. THE BYZANTINE RITE AT THE PRESENT TIME.—The Byzantine Rite has been modified to such an extent that the Orthodox Church does not maintain any principle of unification in language. In various countries the same prayers and forms are translated (with unimportant variations) into what is supposed to be more or less the vulgar tongue. As a matter of fact, however, it is only in Russia that the liturgical language is the same as that of the people. Greek (from which all the others are translated) is used at Constantinople, in Macedonia (by the Patriarchate), Greece, by Greek monks in Palestine and Syria, by nearly all Orthodox in Egypt; Arabic in parts of Syria, Palestine, and by the few churches in Egypt; Old Slavonic throughout Russia, in Bulgaria, and by all Exarchates, in Cæsarea, Servia, and by the Orthodox in Austria and Hungary; and Rumanian by the Church of that country. These four are the principal languages. Later Russian missions use Esthonian, Lettish, and German in the German provinces, Finnish and Swedish in Finland and Siberia, Chinese, and Japanese, (Brightman, op. cit., LXXXI-LXXXII). Although the Liturgy has been translated into English (see Happgood, op. cit. in bibliography), a translation is never used in any church of the Greek Rite. The Uniates use Greek at Constantinople, in Italy, and partially in Syria and Far Eastern Araxes. Old Slavonic in Slav lands, and Rumanian in Rumania. It is curious to note that, in spite of this great diversity of languages the ordinary Orthodox layman no more understands his Liturgy than if it were in Greek. Old Slavonic and the semi-classical Arabic in which it is sung are dead languages.

The Calendar.—It is well known that the Orthodox still use the Julian Calendar. (Old Slavonic, by the Russian (1908) are thirteen days behind us. Their liturgical year begins on 1 September, "the beginning of the Indent, that is of the new year". On 15 November begins the first of their four great fasts, the "fast of Christ's birth" (that lasts till Christmas (25 December). The fast of Easter begins on the Monday after the sixth Sunday after the Easter Sunday, the fast from flesh-meat after the seventh Sunday before the feast (our Sæxsemas). The fast of the Apostles lasts from the day after the first Sunday after Pentecost (their All Saints' Day) till 28 June, the fast of the Mother of God from 1 August to 14 August. Throughout this year fall a great number of feasts. The great cycles are the same as ours—Christmas, followed by a Memorial of the Mother of God on 26 December, then St. Stephen on 27 December, etc. Easter, Ascension Day, and Whit Sunday follow as with us. Many of the other feasts are the same as ours, though often with different names. As the Office is the same as the prayer, the feasts are the same. The feast of Our Lady is her birthday (8 September), Presentation in the Temple (21 November), Conception (9 December), Falling-asleep (ελευθερία, 15 August), and the Keeping of her Robe at the Baptistery (at Constantinople, 2 July). Feasts are further divided according to their solemnity into three classes: great, middle, and less. Easter of course stands alone as greatest of all. It is "The Feast" (εορτα, al-Γ); there are twelve other very great days and twelve great ones. Certain chief saints (the Apostles, the three holy hierarchs—Sts. Basil, Gregory of Nazianzus, and John Chrysostom—30 January, the holy and equal to the Apostles Sovereigns, Constantine and Helen, etc.) have middle feasts; all the others are lesser ones. The Sundays are named after the subject of their Gospel; the first Sunday of Lent is the feast of Orthodoxy (after Iconoclasm), the Saturdays before Eastless Sunday (our Sæxsemas) and Whit Sunday (50th Sunday) they have as their subject All Saints. Wednesdays and Fridays throughout the year are days of abstinence (Forteuse, "Orth. Eastern Church", 398-401).

Service-books.—The Byzantine Rite has no such compendiums as our Missal and Breviary; it contains in a number of loosely arranged books. They are: the Typikon (παράλληλο), a perpetual calendar containing full directions for all feasts and all possible coincidences. The Euchologion (ευχαλόγιον) contains the priest's part of the Hesperinos, Orthros, the three Liturgies, and other sacraments and sacramentals. The Triodion (τριώδιον) contains the variable parts of the Liturgy and Divine Office (except the psalms, Epistles, and Gospels) for the movable days from the tenth Sunday before Easter to Holy Saturday. The Penteksotarion (πηνεκεσταριόν) continues the Triodion from Easter Day to the first Sunday after Pentecost. All Saints' Day (1 Oct). The Epitaph (επιτάφιο) gives the Offices of the Sundays for the rest of the year (arranged according to the eight modes to which they are sung—α, ββ, γγ, and the Parakletike (παρακλήτικη) is for the weekdays. The twelve Menaias (μεναίες), one for each month, contain the Proper of Saints; the Menologion (μενολογίον) is the collection of the Menaias, and the Horologion (φόρμασις) contains the choir's part of the day Hours.
The altar, vestments and sacred vessels.—A church of the Byzantine Rite should have only one altar. In a very large church, however, there are side-chapels with altars, and sometimes consecrated altars in one church; this is an abuse not inconsistent with their rite. The altar (ὁ ἱερὸς τράπεζα) stands in the middle of the sanctuary (ἐπιτραπέζω); it is covered to the ground with a linen cloth over which is laid a silk or velvet covering. The Euchologium, a foldable tionment, and perhaps one or two ombonaria. Those in the Lityurgy are laid out for use elsewhere. [See ALTAR (IN THE GREEK CHURCH.)] Behind the altar, round the apera, are seats for priests with the bishop's throne in the middle (in every church). On the south side of the altar stands a large credence-table (στρογγυλός); the first part of the Liturgy is said here. On the south side is the diakonikon, a sort of sacristy where vessels and vestments are kept; but it is in no way walled off from the rest of the sanctuary. The sanctuary is divided from the rest of the church by the ikonostasis (ἐκοινωνιών, picture-screen), a great screen stretching across the whole width and reaching high up into the roof (see § 131. The Eucharist as an ALTAR, HISTORY OF THE CHRISTIAN). On the outside it is covered with a great number of pictures of Christ and the saints, arranged in a more or less determined order (Christ always to the right of the royal doors and the Bl. Virgin on the left), before which rows of lamps are hung. The ikonostasis has three doors, the "royal door" in the middle, the deacon's door to the south (right hand as one enters the church), and another door to the north. Between the royal door and the deacon's door the bishop has another throne facing the people. Immediately outside the ikonostasis is the choir. A great part of the services take place here. In the body of the church the people stand (there are no seats as a rule); then comes the narthex, a passage across the church at the west end, from which one enters by doors into the nave. Most of the funeral rites and other services take place in the narthex. Churches are roofed as a rule by a succession of low cupolas, often of a similar design in the middle of which there is generally a belfry. The vestments were once the same as the Latin ones, though now they look very different. It is a curious case of parallel evolution. The bishop wears over his cassock the sticharion (στίχαριον) our alb; it is often of silk and colour. The epitrachelion is a piece of stuff, shaped, of which the two ends are sewn together and hang straight down in front, with a loop through which the head is passed. The sticharion and epitrachelion are held together by the zonoi (ξώνια), a narrow belt of stuff with clasps. Over the wrists he wears the epimantikia (ἐπιμαντικία), cuffs or gloves with the palm for the hand cut off. From the girdle the epigonation (ἐπιγονάτιον), a diamond-shaped piece of stuff, stiffened with cardboard, hangs down to the right knee. Lastly, he wears over all the sakkos (σακκός), a vestment like our dalmatic. Over the sakkos comes the omophorion (ὁμόφωρον), a great pallium of silk embroidered with crosses. There is also a smaller omophorion for some rites. He has a pectoral cross, an enkolpion (ἐνκολπίον, a metal containing a relic), a mitre formed of metal and shaped like an imperial crown, and a diakonikion (διακονικίον), or crozier, with the bishop's name ending in each of the last two is the word "ALTAR" three times. A very common abuse (among Melkites too) is for other servers to wear the orarion. This is expressly forbidden by the Council of Laodicea (c. 360, can. xxii). The Byzantine Rite has no sequence of liturgical colours. They generally use black for funerals, otherwise any colour is allowed. The vestments of any kind are laid on the altar, the chalice and paten (βάτερα), which latter is much larger than ours and has a foot to stand it (it is never put on the chalice), the aetheriskos (ἀθερήσκος) a cross of bent metal that stands over the paten to prevent the veil from touching the holy bread, the spoon (Χείλε) for giving communion, the spear (χεῖλη) to cut up the bread, and the fan (πτέρυγα) which the deacon waves over the Blessed Sacrament—this is a flat piece of metal shaped like an angel's head with six wings and a handle. The antimension (ἀντιμήνιον) a kind of ornamental containing relics that is spread over the altar. The Liturgy is performed upon a portable altar. The Holy Bread (always leavened of course) is made as a flat loaf marked in squares to be cut up during the Proskomide with the letters ΚΣ. XC. CN. KA. (Ἰερου Ἀριστοῦ τοῦ Πατρίσιον). In the diaconikon a vessel is kept with hot water for the Liturgy (Fortescue, op. cit. 403–404; "Echoes d'Outre," V., 129–139). K. Storff, "Die griech. Liturg.," 13–14).

Church music.—The singing in the Byzantine Rite is always unaccompanied. No musical instrument of any kind may be used in their churches. They have a plain chant of eight modes that correspond to ours, except that they are numbered differently; the four authentic modes (Donc, Phrygian, Lydian, and Mixolydian—our 1st, 3rd, 6th, and 7th) come first, then the plagal modes (our 2nd, 4th, 6th, and 8th). But their scales are different. Whereas our plainsong is strictly diatonic, theirs is enharmonic with varied intervals. They always sing in unison and frequently change the mode. They have achants (see CHANT).

The result is generally—to our ears—monotoneous and strange, though in some cases a carefully trained choir produces a fine effect. The music of the Liturgy of St. Anne's (Melkite) College at Jerusalem, trained by the French Péres Blancs. One of these, Père Rebour, has written an exhaustive and practical treatise of their chant ("Toolé de psalitique" etc.; see bibliography).

In Russia and lately, to some extent, in the metropolitan church of Athens they sing figured music in parts of a very stately and beautiful kind. It is probably the most beautiful and suitable church music in the world.

The Holy Liturgy.—The present use of the Byzantine Rite confines the older Liturgy of St. Basil to the Sundays in Lent (except Palm Sunday), Maundy Thursday, and Holy Saturday, also the Eves of Christmas and the Epiphany, and St. Basil's feast (1 January). On all other days on which the Liturgy is celebrated they use that of St. Chrysostom. But on the weekdays in Lent (except Saturdays) they may not consecrate, so they use for them the Liturgy of the Presanctified. An Ordinal for the Liturgy is necessary only every day, but as a rule only on Sundays and feast-days. The Uniates, however, in this, as in many other ways, imitate the Latin custom. They also have a curious principle that the altar as well as the celebrant must be fasting, that is to say that it must not have
constantinople

317

has been used already on the same day. So there is only one Liturgy a day in an Orthodox Church. Whence many priests say that they anoint the Anaphora together over the same offerings. This happens nearly always when a bishop celebrates; he is surrounded by his priests, who celebrate with him. The Liturgy of St. Chrysostom, as being the one commonly used, is always printed first in the Euchologion. It is the framework into which the others are fitted; and the greater part of the Liturgy is always said according to this form. After it are printed the prayers of St. Basil (always much longer) which are substitute for some of the usual ones when his rite is used, and then the variants of the Liturgy of the Presanctified. The Liturgies of Basil and Chrysostom, then, differ in the common number of the prayers, may be described together.

The first rubric directs that the celebrant must be reconciled to all men, keep his heart from evil thoughts, and be fasting since midnight. At the appointed hour (usually immediately after None) the celebrant and deacon (who communicates and must therefore also be fasting) say the preparatory prayers before the ikonostasis (Brightman, op. cit., 353–354), kiss the holy icons, and go into the diaconikon. Here they vest, the celebrant blessing each vestment as it is put on, say certain prayers, and wash their hands, saying, "Lord Jesus Christ, Son of God, have mercy on me a sinner," etc., op. cit., 354–356). Then the first part of the Liturgy, the Preparation of the Offering (προσκομιδα) begins at the credence table (συνεργεῖον). The loaves of bread (generally five) are marked in divisions as described above under the caption Altar, etc. The celebrant cuts away with the holy lance the parts marked IC. XC. NI. KA., and says: "The Lamb of God is sacrificed." These parts are then called the Lamb. The deacon pours wine and warm water into the chalice. Other parts of the bread are cut away in honour of the All-holy Theotokos, nine for various saints, and others for the bishop, Orthodox clergy, and various people for whom he wishes to pray. This rite is accompanied by many prayers, the particles (προσφέρω) are arranged on the diskos (paten) by the Lamb (that of the Theotokos on the right, because of the verse "The Queen stands at thy right hand."); A long rubric explains all the covetousness of the celebrant, the preventers, the offerings are repeatedly incensed. The deacon then incenses the prayer, altar, sanctuary, nave, and the celebrant. (A detailed account of the new rite of the Proskomide is given in the "Echoes d' Orient," III, 65–78.) They then go to the altar, kiss the Gospel on it and the deacon holding up his oration says: It is the opening prayer of the "Litany of the Holy One." The doors of the ikonostasis are opened, and the deacon goes out through the north door. Standing before the royal doors he chants the Great Litany, praying for peace, the Church, the patriarch or synod (in Orthodox countries for the archbishop and his family), the city, travellers, etc., etc. To each clause the prayer answer "Kyrile eleison." Then follows the first antiphon (on Sundays Ps. cii), and the celebrant at the altar says a prayer. The Short Litany is sung in the same way (the clauses are different, Brightman, op. cit., 362–372), with an antiphon and prayer, and then a third Litany; on Sundays the third antiphon is the Beatitudes.

Here follows the Little Entrance. The deacon has gone back to the celebrant's side. They come out through the north door in procession, the deacon holding up the Gospel. On the Gospel they light candles. The troparia (short hymns) are sung, ending with the Trisagion: "Holy God, Holy Strong One, Holy Immortal One, have mercy on us" (three times); then "Glory be to the Father," etc. — "As it was in the beginning," etc.— and again "Holy God!" etc. Meanwhile the celebrant says other prayers. A reader sings the Epistle; a Gradual is sung; the deacon sings the Gospel, having incensed the book; more prayers are said; then come the Anaphora, and they are dismissed by the deacon: "All catechumens go out. Catechumens go out. All catechumens go away. Not one of the catechumens [shall stay]."—

Of course nowadays there are no catechumens. — The prayers for the catechumens bring us to the first variant between the two Liturgies. The one said by the celebrant is different hand, an exception is the Eastern rite. The Liturgy of the Faithful begins here. Prayers for the faithful follow (different in the two rites, Brightman, op. cit., 375–377 and 400–401); and then comes the dramatic moment of the Liturgy, the Great Entrance. The celebrant and deacon go to the prosthesis, the offerings are incensed. The deacon covers his shoulders with the great veil (see Asz) and takes the diskos (paten) with the bread; the thurible hangs from his hand; the celebrant follows with the chalice. Acolytes go in front and form a solemn procession. Meanwhile the Choir and other choirs sing "Breathe yeurons: "Let us, who mystically represent the Cherubim, and who sing to the Life-giving Trinity the thrice holy hymn, put away all earthly cares so as to receive the King of all things" before the offering and the procession are consecrated, is a curious instance of a dramatic representation that anticipates the real moment of the Consecration. After some more prayers at the altar, different in the two liturgies, the deacon cries out, "The doors! The doors! Let us attend in wisdom," and the doors of the ikonostasis are shut. The Greek is then sung.

Here begins the Anaphora (Canon). There is first a dialogue, "Lift up your hearts," etc., as with us, and the celebrant begins the Eucharistic prayer: "It is meet and just to sing to Thee, to bless Thee, praise Thee and give thanks to Thee, Lord, for ever in all ages. Amen." The anaphora in St. Basil's Rite is much longer. It is not said aloud, but at the end he lifts up his voice and says: "Crying, singing, proclaiming the hymn of victory and saying:— and the choir sings "Holy, Holy, Holy," etc., etc., in our Missa. Very soon, after a short prayer (considerably longer in St. Basil's Rite) the celebrant comes to the words of Institution. He lifts up his voice and sings: "Take and eat: this is My Body that is broken for you for the forgiveness of sins"; and through the Ikonostasis the choir answers "Amen." Then: "Drink ye all of this, this is My Blood of the New Testament that is shed for you and for many for the forgiveness of sins." R. Amen — as before. The Orthodox, as is known, do not believe that these words consecrate, so they go straight on to the Anamnesis, and a special rubric in their Euchologion (ed. Venice, 1898, p. 63) warns them not to make any reverence here. The Unia, on the other hand, make a profound reverence after the words "Unde et memoriae" ("Unde et memoriae") again is longer in the Basilian Liturgy. The Epiklesis follows. The deacon invites the celebrant in each case: "Bless, sir, the holy bread [or wine]." The two forms (of Basil and Chrysostom) may stand as specimens of the principle of abbreviation that distinguishes the later rite. In St.
Basil’s Liturgy: "We pray and beseech thee, O Holy of Holy ones, that according to the mercy of thy favour thy Holy Spirit come down on us and on these present gifts to bless them, sanctify them and to make this... (Chrys.): "And make this Precious Blood the Body of Christ" for Deacon: "Amen. Bless, Sir, the holy chalice." Celebrant (Basil): "But this chalice the Precious Blood itself of our God and Saviour Jesus Christ." Chrys.: "And what it is in this Chalice the precious Blood of Thy Christ." Deacon: "Amen. Bless, Sir, both." Celebrant (Basil): "This was shed for the salvation of the world." Chrys.: "Changing it by thy Holy Spirit." Deacon: "Amen. Amen. Amen.")

Both then make a deep prostration, and the deacon waves the rhipidion (fan) over the Blessed Sacrament. This ceremony, now interpreted mystically as a symbol of adoring angels, was certainly once a practical precau-
tion against the accidental dropping of the Host. The Celebrant divides the portions marked Ν and ΚΑ, and the deacon puts them into the chalice with a sponge. The doors are opened and the deacon says, "Draw near in the fear of God and with faith." The celebrant comes down to the doors with the chalice and the spoon and offers it, accompanied with the Holy Bread dipped in the chalice, and with one form, as before. The people stand to receive Communion (the Byzantine Rite knows practically no kneeling at all). Finally, the deacon puts all the remaining particles into the chalice and carries it back to the prothesis. Those other particles (any phosphor) originally cut off from the bread have lain on the disks (paten) since the proskomide. It has been a great question whether they are consecrated or not. The Orthodox now say that they are not, and the deacon puts them into the chalice after the Communion. It is obviously a question of the celebrant's intention. The Uniat priests are told to consecrate them too, and in their Liturgy the people receive them in Communion (Fortescue, op. cit., 417; "Echoes d'Orient", III, 71-73).

Here begins the Dismissal. The deacon unwinds his oration, goes back to the choir before the ikonostasis, and says a short prayer. Then he goes to the prothesis and consumes all that is left of the Holy Eucharist with the phosphor. Meanwhile, some of the bread originally cut up at the Prothesis has remained there all the time. This is now brought to the celebrant, blessed by him, and given to the people as a sacramental (see also the next paragraph). After some more prayers the celebrant and deacon go to the diakonikon, the doors are shut, they take off their vestments, and the Liturgy is over. The whole service is very much longer than our Mass. It lasts about two hours. It should be noted that all the time the celebrant winds his oration, and then goes to the prothesis and consumes all that is left of the Holy Eucharist with the phosphor. Meanwhile, some of the bread originally cut up at the Prothesis has remained there all the time. This is now brought to the celebrant, blessed by him, and given to the people as a sacramental (see ANTIDONON). After some more prayers the celebrant and deacon go to the diakonikon, the doors are shut, they take off their vestments, and the Liturgy is over. The whole service is very much longer than our Mass. It lasts about two hours. It should be noted that all the time the celebrant winds his oration, and then goes to the prothesis and consumes all that is left of the Holy Eucharist with the phosphor. Meanwhile, some of the bread originally cut up at the Prothesis has remained there all the time. This is now brought to the celebrant, blessed by him, and given to the people as a sacramental (see also the next paragraph). After some more prayers the celebrant and deacon go to the diakonikon, the doors are shut, they take off their vestments, and the Liturgy is over. The whole service is very much longer than our Mass. It lasts about two hours. It should be noted that all the time the celebrant winds his oration, and then goes to the prothesis and consumes all that is left of the Holy Eucharist with the phosphor. Meanwhile, some of the bread originally cut up at the Prothesis has remained there all the time. This is now brought to the celebrant, blessed by him, and given to the people as a sacramental (see ANTIDONON). The Byzantine Rite has no provision for low Mass. As they say the Liturgy only on Sundays and feast-days, they have less need for such a rite. In case of necessity, where there is no deacon, the celebrant supplies his part as best he can. The Uniates, who have begun to celebrate every day, have evolved a kind of low Liturgy; and at the Greek College at Rome they have a number of little manuscript books containing an arrangement for celebrating with a priest and one lay server only. But in the Levant, at any rate, the Liturgy is always sung, and incense is always used; so that the choir and the people, in the Uniates, for the Liturgy is a celebrant, server, and one other man who forms the choir. The "Liturgy of the Presanctified" is fitted into the general framework of St. Chrysostom's Rite. It is usu-
ally celebrated on Wednesdays and Fridays in the first six weeks of Lent, and on all the days of Holy Week, except Maundy Thursday and Easter, when the real Liturgy (of St. Basil). On other days in Lent there is no liturgical service at all. On the Sunday before more loaves (πρωτοφανής) are used than otherwise. The same rite of preparation is made over all. After the Elevation the celebrant dips the other proskomides into the chalice and the eucharistic rite is completed. The chalice in the tabernacle (ἀριστερὸς) kept for this purpose. The Liturgy of the Presanctified is said after Vespers (εσπερινά), which forms its first part. There is of course no further Proskomide, but the preparatory prayers are said by celebrant and deacon as usual. The Great Vesper is introduced into the middle of Vespers. The Great Vespers (see above) is a triumphal service as usual, and the lessons are read. The prayers for catechumens and their dismissal follow. The Great Entrance is made with the already consecrated offerings, and a changed form of the Cherubic Hymn is sung (Maltsew, "Die Liturgien", 149). The curtals of the royal doors is half-drawn across the whole Anaphora is omitted, and they go on at once to the Short Liturgy before the Lord’s Prayer. The Lord’s Prayer, Inclemation, and Elevation with the form: "The presanctified Holy Things to the holy" follow. Wine and warm water are poured into the chalice, but not (as far as the Eucharist, p. 147). The Blessed Sacrament already dipped in consecrated wine is now dipped in unconsecrated wine. The celebrant drinks of this wine after his Communion without any prayer. The Liturgy ends as usual (with different forms in some parts), and the deacon consumes what is left of the Holy Eucharist (unless some of it is again reserved for the next Presanctified Liturgy and the wine in the chalice. This is the merest outline of the rite. Its earlier part is inextricably joined to the Vespers (Maltsew, op. cit., 121-158).

The Divine Office is very long and complicated. When sung as a choir it lasts about eight hours. It is said entirely only by monks. Secular priests say part of it, as their devotion dictates. The Uniates frequently apply to Rome to know what to do, and the answer is always: Servetur consuetudo, by which is meant that their secular clergy should say as much of the Office as is customary. It is impossible for them to follow the Liturgy. The Office divided into the usual forms is indicated above (under Service-books) which correspond to ours, with additional short hours (ωρόρυκτα) intermediate between Prime, Terce, Sext, None, and Vespers. It is made up of psalms, lessons, prayers, and especially a great number of hymns in rhythmical prose. The whole is divided into three sections, each of which is made up of three sections (παρασκευα). The whole Psalter is sung every week. The most important of the many kinds of hymns are the following: A canon (κανών) is made up of nine odes corresponding to the nine canticles of Moses, Ex., xxv, 1-19; Deut., xxxii, 1-43; Ps. 1 Kings, ii, 1-10; Hab., iii, 2-19; Is., xxxvi, 9-20; Jonas, ii, 2-10; the Benedictic, Magnificat, and Benedictus) sung at Lauds. Of these canticles the second is sung only in Lent; therefore most canons have no second ode. Each ode (φαία) is supposed to correspond more or less to its canticle. Thus the ninth ode will generally contain a reference to Jona’s whale. Otherwise the canon is usually about the feast on which it is sung, and much ingenuity is expended in forcing some connexion between the event of the day and the allusions in the canticles. The odes are further divided into a heirmos (αἱρείματα) and troparia, the latter from three to twenty or more. The heirmos sets the tune for each ode (see Plain Chant), and the troparia follow it. The last troparium of each ode always refers to Our Lady and is called eóbraan. The odes often make an acrostic in their initial letters; sometimes they are alphabetic. In long canons a poem is intercalated in the middle during which people may sit (they stand for nearly the whole Office); it is called estiēma. Three troparia form a class ("ta troparia") of Italian stanza. The canons for the weekdays are in the Oktoechos, those for immovable feasts in the Menaiai, for movable ones in the Triodion and Pentekostarion (see above under Service-books). One of the most famous of all is St. John Damascene’s Golden Canon for Easter Day Inserted by him in his "Hymns of the Eastern Church", 4th ed., London, pp. 30-44). Other kinds of chant are the kontakion (κοντάκια), a short poem about the feast, the stichos (στίχος) a verse, generally from a psalm (like our antiphons), which introduces a sticheron (στιχερόν) or hymn sung at Matins and Vespers. An idiomelon (ιδιομέλος) is a trope sung by the deacon, instead of following a heirmos (for other kinds of chant see Nelles, "Kalend. Man.", pp. lvi-lxii, and the example he gives from the feast of the Transfiguration, 6 August). The Great Doxology (δοξολογία) is our "Gloria in excelsis", the small one our "Gloria Patri". The Hymnos Akathistos (σάλμις ἀκαθίστος, standing hymn) is a complete Office in honour of Our Lady and of her Annunciation (see Ακαθίστημι). It has all the Hours and is made up of psalms, odes, etc., like other Offices. It is sung very solemnly on the Saturday before the second Sunday before Easter; and they sing part of it every Easter as Matins and Saturday morning in Lent. It is always sung standing. The Hymnos Akathistos is printed at the end of the Horologion. P. de Meester, O.S.B., has edited it with an Italian translation ("Hymno lo sco di l’Acriti to cremona, -Olio delle innocenti, Rome, 1800"). At the end of Vespers every day is sung the famous φέριστα, as the evening light disappears, and the lambs are lit:—

Hail, gladdening Light, of pure glory poured Who is the immortal Father, heavenly, blest, Holiest of Holies, Jesus Christ, Our Lord; Now we are come to the sun’s hour of rest, The lights of evening round us shine, We hymn the Father, Son and Holy Spirit divine, Worthiest art Thou at all times to be sung With undefiled tongue, Son of our God, giver of life alone. Therefore in all the world, thy glories, Lord, they own.

—Keble’s translation in the "Hymns, Ancient and Modern", No. 18.

There are, lastly, services for the administration of the Seven Great Mysteries (the Seven Sacraments) that are printed in the Buchmachterion after the liturgies (see, p. 138-288). Baptism is divided into two parts: one by immersion (the Orthodox have grave doubts as to the validity of baptism by infusion.—See Fortescue, Orth. E. Church, p. 420). The child is anointed all over its body and dipped three times with its face towards the east. The form is: "The servant of God, N., is baptized in the name of the Father, Amen, and of the Son, Amen, of the Holy Ghost, Amen." Confirmation follows at once and is conferred by priests (the Holy See recognizes this confirmation as valid and neither rebaptizes nor reconfirms converts from Orthodoxy). The whole body is again anointed with chrism (το χρισμός) prepared very elaborately with fifty-five various substances by the canonical patriarch on Maundy Thursday (Fortescue, op. cit., 425-426). The form is: "The seal of the gift of the Holy Ghost" (Euch., 136-144). The Orthodox never rebaptize when they are sure of the validity of former baptism; but they reconfirm continually. Confirmation has become the usual rite of admittance into their Church, even in the case of apostates who have already been confirmed orthodoxly. The pious Orthodox layman Communicates as a rule only four times a year, at Christmas, Easter, Whitsunday, and the Falling Asleep of the Mother of God (15 August). The Blessed
Sacrament is reserved for the sick in the ἀρτοφαγεία, (or ἁρτοφαγεία) under both kinds more or less; that is to say it has been dipped into the chalice and allowed to dry. It is given to the sick with a spoon and with the usual form (see above under Holy Liturgy). They have no tradition of reverence for the reserved Eucharist. 

Penance (μετάτηχις) is administered rarely, if ever, at the hands of Holy Communion. They have no confessionals. The ghostly father (πνευματικός) sits near the iconostasis under the picture of our Lord, the penitent kneels before him (one of the rare cases of kneeling is in this rite), and several prayers are said, to which the choir answers "Kyrie Eleison." Their prayer is always addressed to himself. Then the ghostly father is directed to say "in a cheerful voice: Brother, be not ashamed that you come before God and before me, for you do not confess to me but to God who is present here." He asks the penitent his sins, says that only God can forgive him, but that Christ gave this power to his Apostles saying: "Whose sins ye shall forgive," etc., and absolves him with a decretorial form in a long prayer in which occur the words: "May this same God, through me a sinner, forgive you all now and for ever." (Euch., pp. 221-222.) Holy Order (περιορισμός) is given by a priest, but with hand only. The form is (in the Euch.):

"The grace of God, that always strengthens the weak and fills the empty, appoints the most religious sub-deacon N. to be deacon. Let us then pray for him that the grace of the Holy Ghost may come to him. Long prayers follow, with allusions to St. Stephen and the deacon; the bishop vests the new deacon, giving him an orarion and a ripendion. For priests and bishops there is the same form, with the obvious variants, the most religious deacon N. to be priest," or "the most religious elect N. to be Metropolitan of the holy Metropolis N." (nearly all their bishops have the title Metropolitan,) and the other officers receive vestments and instruments. Priests and bishops are consecrated at once with the ordainer (Euch., 160-181).

The Orthodox believe that the grace of Holy orders may perish through heresy or schism, so they generally reordain converts (the Russian Church has officially refused to do this, Fortescue, op. cit., 423-424). Matrimony (γάμος) is often called the "crowning" (στρέφωμα) from the practice of crowning the spouses (Euch., 238-252). They wear these crowns for a week, and have a special service for taking them off again (Euch., 252). The Anointing of the Sick (ευξαλία) is administered (when possible) by seven priests, and all other physical ailments are treated. Used in memory and for the Good Samaritan. It is blessed by a priest just before it is used. They use a long form involving the all-holy Theotokos, the "moneyless physicians" Sts. Coenraad and Damian, and other saints. They anoint the forehead, chin, cheeks, hands, nostrils, and breast with a brush. Each priest present does the same (Euch., 260-268). The service is, as usual, very long. They anoint people who are only slightly ill, (they very much resent our name: Extreme Unction), and in Russia on Maundy Thursday the Metropolitan of Moscow and Novgorod anoint everyone who presents himself, as a preparation for Holy Communion (Echos d' Orient, II, 193-203).

There are many Sacramentals. People are sometimes anointed with the oil taken from a lamp that burns before a holy icon (occasionally with the form for confirmation: the seal of the gift of the Holy Ghost). They have besides the antidoron another kind of blessing, the κοσμηματικός (τεκοφούς) ennobled in honour of some saint or in memory of the dead. On the Epiphany ("The Holy Lights") there is a solemn blessing of the waters. They have a great number of exorcisms, very stern laws of fasting (involving abstinence from many things besides flesh meat), and laws for all manner of things. These are to be found in the Euchologion. Preaching was till lately almost a lost art in the Orthodox Church; now a revival of it has begun (Geisler, Geistliches u. Weltliches, etc., 76-82). There is a long funeral service (Euch., ed. cit., 393-470). For all these rites (except the Liturgy) a priest does not wear all his vestments but (over his cassock) the epitrachelion and phainolion. The high black hat without a brim (καπέλο) worn by all priests of this rite is well known. It is worn with vestments as well as in ordinary life. Bishops and dignitaries have a black veil over it. All clerics wear long hair and a beard. For a more detailed account of all these rites see "Orth. Eastern Church", pp. 416-428. The Orthodox Church in Greece are published at their official press (στοιχεία) at Venice (various dates: the Euchologion quoted here, 1893; the Unitone aition of 1880 is also an Athenian edition of the Church's usual translations have published their versions. Provost Alexios P. J. M. of the Russian Embasy church at Florence has copied all the books in Old Slavonic with a parallel German translation and notes (Berlin, 1892). REBAULOT, Liturgiarum orientalium collectae (2d ed., 2 vols., Frankfort, 1847); MEALE, The Liturgies of St. Mark, St. James, St. Clement, St. Chrysostom, St. Basil London, 1875; Greek, another volume contains The Constitutions of the Primitive Liturgies of St. Mark, etc.; ROBERTSON, The Divine Liturgies of Our Fathers among the Saints John Chrysostom, Basil the Great, and Leo the Great (Greek and English, London, 1894); DE MEER, La divine liturgie de S. Constitutions. See Jansenists.

Constitutions, Ecclesiastical.—The term constitution denotes, in general, the make-up of a body, or, more specifically, of a religious society, the word, in the singular, signifies the fundamental law determining their governing, legislative, and executive organism; in the plural it denotes the enactments, ordinances, and laws issued by the supreme authority to further the object of the society. In legal language the term constitutions denotes only church ordinances, civil ordinances being termed leges, laws. The constitutions ecclesiasticae have in common with the leges civiles the binding power derived from the authority of their framers, but they differ from them as the Church differs from civil society, viz. in their origin. Civil laws are enactments of a power directly human and only Divine in its first cause; their primary object is the furtherance of temporal welfare; and their sanction, temporal penalties. Ecclesiastical constitutions, on the other hand, emanate from an authority directly of Divine institution; their ultimate object is to promote the salvation of souls in the Kingdom of God on earth; their sanction consists in spiritual penalties.

In the total complex of laws bearing on matters spiritual, ecclesiastical constitutions stand midway between the Divine and the natural law. The Divine law is contained in the Scriptures interpreted by living, authoritative tradition, e. g., the Ten Commandments, the constitutions of the Church, the adminis-
Constitution, Papal (Lat. constituire, to establish, to decree), ordinances issued by the Roman pontiffs and binding those for whom they are issued, whether they be for all the faithful or for special classes or individuals. From the earliest times, the Christians of the whole world have consulted the popes on all matters pertaining to faith, morals, and discipline. The earliest instance is the well-known appeal from Constantine to Pope Sylvester I, in the life of the Christian Era. From that time on, requests for decisions on various ecclesiastical matters were addressed to the Holy See from all parts of the known world, and the answers that were received were revered as proceeding from the mouth of Christ's chief Apostle and Vicar on earth. The fact that the decrees of Church councils, whether general, provincial, or even diocesan, were anciently as a rule forwarded to the pope for his revision or confirmation, gave occasion for many papal constitutions during the early ages. After the time of Constantine the Great, owing to the greater liberty allowed to the Church, such intercourse with the Apostolic See became more frequent and more open. St. Jerome, in the fourth century (Ep. cxxiii.), testifies to the number of responses requested of the sovereign pontiff from both the Eastern and the Western Church during the time he was secretary to Pope Damasus. The papal responses soon began to constitute an important section of canon law, is evident from statements in the letters of various Roman pontiffs. The decretalia and constituta of the Apostolic See were recognized as laws or as interpretations of existing canons binding the churches to the Holy See. The fact that ecumenical councils required the papal confirmation before their decrees were valid (a principle expressly admitted by the early councils themselves) tended not a little to direct the attention of all Christians to the fullness of jurisdiction residing in the successor of St. Peter. Hence the profession of faith sent to the popes by newly elected bishops and by emperors on their succession to the throne.

Turning to the strictly canonical aspect of the case, the word concordia is derived from conc (cum) and statuendo, and therefore means a common statute. It is consequently synonymous in most respects with law. In fact, a papal constitution is a legal enactment of the ruler of the Church, just as a civil law is a decree emanating from a secular prince. Reiffenstuel declares that the difference of name between ecclesiastical and civil statutes is very proper, since a secular ruler derives his authority immediately from the people, and hence it is really the people who make the laws, while the pope receives his power immediately from God and is himself the source whence all Church regulations proceed. As a matter of fact, however, while it is true that ecclesiastical laws are generally designated "constitutions", yet they are occasion-
COUNCILS, with their separate tribunals, their consultors, and trained officials, has brought about a change in the preparation of papal constitutions. It is to these congregations that the pope looks for aid in preparing the subject-matter of his letters to the Church. (See ROME, COUNCILS.)

The binding force of pontifical constitutions, even without the acceptance of the Church, is beyond question. The primacy of jurisdiction possessed by the successor of Peter comes immediately and directly from Christ. That this includes the power of making obligatory laws is evident. Moreover, that the popes have the intention of binding the faithful directly and immediately is plain from the mandatory form of their constitutions. Bishops, therefore, are not at liberty to accept or refuse papal enactments because, in their judgment, they are ill-suited to the times. Still less can the lower clergy or the civil power (see EXEMPTA; PLACERET) possess any authority to declare pontifical constitutions invalid or prevent their due promulgation. The Gallican opinions to the contrary are no longer tenable after the decrees of the Council of the Vatican (Sess. IV, ch. iii). If a papal constitution, published in Rome for the whole Church, were n.s. or local, it was in the hands of the bishop, but it was not claimed that the faithful would nevertheless be bound by it, if it concerned faith or morals. If it referred to matters of discipline only, its observance would not be urgent, not because of any defect in its binding force, but solely because in such circumstances the pope is presumably suspended from the obligation for the reason of not being. This leads to the question of the proper promulgation Q. v. of papal laws (see LAW). The common teaching now is that promulgation in Rome makes them obligatory for the whole world. The method employed is to affix the decrees at the portals of St. Peter’s, e. S. John Lateran, in the Apostolic Apancy and in the Piazza del Fiori.

Consubstantiation—This heretical doctrine is an attempt to hold the Real Presence of Christ in the Holy Eucharist without admitting Transubstantiation. According to it, the substance of Christ’s Body exists together with the substance of bread, and in like manner the substance of His Blood together with the substance of wine. Hence the word Consubstantiation. How the two substances can coexist is variously explained. The most subtle theory is that, just as God the Son took to Himself a human body without in any way destroying its substance, so does He in the Blessed Sacrament assume the nature of bread. Hence the theory is also called “Impartation.”

The subject cannot be treated adequately except in connexion with the general doctrine of the Holy Eucharist (q. v.). Here it will be sufficient to trace briefly the history of the heresy. In the earliest ages of the Church Christ’s words, “This is my body”, were understood by the faithful in their simple, natural sense. In the course of time discussion arose as to whether they were to be taken literally or figuratively, and when it was settled that they were to be taken literally in the sense that Christ is really and truly present, the question of the manner of this presence began to be agitated. The controversy lasted from the sixth to the twelfth century, and during which time the doctrine of Transubstantiation, which teaches that Christ is present in the Eucharist by the change of the entire substance of bread and wine into His Body and Blood, was fully indicated as Catholic dogma. In its first phase it turned on the question, whether the Body was the historical body of Christ, the very body which was born, crucified, and risen. This was maintained by Paschasius Radbert and denied by Gratianus and Peter Lombard in the middle of the twelfth century. What concerns us here more closely is the next stage of the controversy, when Berengarius (1000–1088) denied, if not the Real Presence, at least any change of the substance of the bread and wine into the substance of the Body and Blood. He maintained that “the consecrated Bread, retaining its substance, became Body of Christ, that is, not losing anything which it was, but assuming something which it was not” (panis sacras in altari, salvi suae substantiæ, est corpus Christi, non amittens quod erat sed assumens quod non erat—cf. Marteone and Durand, “Thessaurus Novus Anecd.,” IV, col. 165). It is clear that he rejected Transubstantiation; but what sort of presence he admitted would seem to have varied at different periods of his long career. His opinions were condemned in various councils held at Rome (1050, 1050, 1078, 1079), Verdii (1050), Pottiers (1074), though both Pope Alexander II and the United Estates of Burgundy VII concurred in not marking his heresy. His principal opponents were Lanfranc, afterwards Archbishop of Canterbury (De Corpore et Sanguine Domini adversus Berengarium Turonensem), Durandus of Troarn (q. v.), Guittmundus of Aversa, and Hugh of Langres. Although it cannot be said that he had many adherents during his lifetime, yet his heresy did not die with him. It was maintained by Wycliff (Trialog., IV, 6, 10) and Luther (Walc, XX, 1228), and is the view of the High Church party among the Anglicans at the present day. Besides the Councils above-men, it was condemned by the Fourth Lateran Council (1215), the Council of Constance (1418)—“The substance of the material bread and in like manner the substance of the material wine remain in the Sacrament of the altar”, the first of the condemned propositions of Wycliff), and the Council of Trent (1551).

Berengarius and his modern followers have appealed chiefly to reason and the Fathers in support of their opinions. That Transubstantiation is not contrary to reason, and was at least implicitly taught by the Fathers, is shown in the article TRANSUBSTANTIATION. In the discussion of the Fathers about the two natures of Christ, the Incarnation and the Eucharist was frequently referred to, and this led to the expression of views favouring Impanation. But after the definitive victory of St. Cyril’s doctrine, the analogy was seen to be deceptive. “See Batiffol, Etudes d’histoire, etc, 2nd series, p. 319 sqq.”, unanimously rejected Consubstantiation, but they differed in their reasons for doing so. Albertus Magnus, St. Thomas, and St. Bonaventure maintained that the words, “This is my body”, disproved it; while Alexander of Hales, Scotus, Durandus, Oecam, and d’Ailly declared that it was not inconsistent with Scripture, and could only be disproved by the authority of the Fathers and the teaching of the Church (Turuël, Hist. de la théol. posit., I, 313 sqq.). This line of argument has been a stumbling-block to Anglican writers, who have quoted some of the Schoolmen in support of their erroneous opinions on the Eucharist; e.g. Pusey, “The Doctrine of the Real Presence” (1855).

T. B. SCANNELL.
Consultors, Diocesan, a certain number of priests in each diocese of the United States who act as official advisers of the bishop in certain matters pertaining to the administration of the diocese. As a body they take the place of the cathedral chapter as established elsewhere by the general laws of the Church. Their appointment was recommended (1866) by the Second Plenary Council of Baltimore. The Third Plenary Council (1884) decreed that they should be constituted a diocesan council, and defined their particular rights and duties.

I. APPOINTMENT.—The diocesan consultors, it was decreed (n. 18), should be six, or at least four, in number. Where neither number is possible, there should be at least two. They hold office for three years; but they may be reappointed or selected at the expiration of each term. The manner of their election consists in the appointment by the bishop alone of half of their number, and of the other half by the bishop also, after having taken the vote of the clergy. All the clergy exercising the sacred ministry in the diocese send, in writing, to the bishop three names for every consultant to be elected. From these the bishop makes the selection of whom he judges most fit for the office. At stated periods they are convened and presided over by the bishop, four times, or at least twice, a year, and, as occasion requires, monthly. In case of the death, resignation, or removal of a consultant, the bishop appoints his successor with the advice of the other consultors.

II. RIGHTS AND DUTIES.—The diocesan council has certain rights and duties (A) when the see is filled, and (B) when it is vacant. (A) When the see is filled, the bishop is bound to ask the advice of the diocesan consultors: (1) For convoking and promulgating a diocesan synod; (2) for dividing missions or parishes; (3) for giving over a mission or parish to a religious community; (4) for appointing deputies for the diocesan seminary; (5) for appointing a new diocesan consultant and synodal examiners to conduct the examination for vacant parishes; (6) for alienating church property, when the sum exceeds five thousand dollars; (7) for determining what missions are to be made parishes with irremovable rectors and appointing the first irremovable rectors in the diocese; (8) for fixing the pension of an irremovable rector who has resigned or who has been removed for cause; (9) for convoking, or calling, a synod, the salary of rectors. In all these cases the consultors give their opinions collectively, i.e., in a body, and by secret ballot if they deem proper. The bishop, however, although bound to seek their advice in these matters, is not obliged to follow it.

(B) When the see is vacant: (1) The administrator must follow the same procedure, i.e., he must ask the opinion of the diocesan consultors in the above-stated cases. (2) The expiration of the three-year term of the consultors within the period of the vacancy does not affect their tenure of office. They remain in office until the accession of the new bishop who, within six months from his consecration, should hold a new election of diocesan consultors. (3) In the election of a new bishop the council of 1884 conceded a voice to the consultors, as representatives of the clergy of the diocese. Together with the irremovable rectors they meet within thirty days after the vacancy occurs under the presidency of the consultors, or, if he be hindered, of a suffragan deputed by him. If the vacancy be that of the archbishopric the senior suffragan presides, or one deputed by him. The voting is by secret ballot. Three candidates are selected whose names are sent to the S. Cong. de Propaganda Fide, and to the consultors of the other dioceses, who meet, within ten days, to approve or disapprove of the candidates presented by the consultors and irremovable rectors. The Bishops send their own list to Rome. The pope may reject both lists and appoint as bishop some one who is on neither. (4) When there is a question of selecting a coadjutor with the right of succession the consultors with the irremovable rectors have a vote just as in the election of a new bishop. (5) This is also the case when a new diocese is formed out of one or more existing dioceses. In that case, only the irremovable rectors within the limits of the new diocese join with the consultors of the older diocese or dioceses. (See Baltimore, Plenary Councils of.)

Consultors, Roman. See Roman Congregations.

Contant de la Molette, PHILIPPE DE, theologian and Biblical scholar, born at Côte-Saint-André, in Dauphiné, France, 29 August, 1737; died on the scaffold during The Terror, 1793. He studied at the Sorbonne, and, in 1765, defended a thesis on Job, in six languages. Louis XV was so well pleased that he allowed him to pass the examinations for the licentiate without the required delays; a privilege, however, which de la Molette did not use. Later on, he became Vicar-General of the Diocese of Vienne, France. As a Biblical author, he shows great erudition and is well versed in the Oriental languages, but he lacks originality, and his criticism is often misleading. His works, all published in Paris, are the following: "Essai sur l'Ecriture Sainte ou Tableau historique des avantages que l'on peut tirer des langues orientales pour la parfaite intelligence des Livres Saints" (1775); "Nouvelle méthode pour entrer dans le vrai sens de l'Ecriture sainte" (1777); "La Genèse expliquée d'après les textes primitifs", etc. (1777), 3 vols., a work intended especially as a refutation of Moreau: "L'Exode expliqué", 3 vols. (1780); the thesis that he had defended in 1765 is printed in the beginning of this work; "Les Psautres expliqués", etc., 3 vols. (1781); "Traité sur la poésie et la musique des Hébreux" (1781), a continuation of the preceding; "Le Lévitique expliqué", 2 vols. (1786). He had also done considerable work as a preparation for a "Nouvelle Bible polyglotte", but it is doubtful whether he ever published it.

R. BUTIN.

Contarini, GASPARO, Venetian statesman and cardinal, b. 10 October, 1483, of an ancient and noble family in Venice; d. at Bologna, 24 August, 1542. He received his elementary training in his native city; and afterwards, from 1501 to 1509, he frequented the University of Padua, where he studied Greek, mathematics, Aristotelian philosophy, and theology. He was a close student and acquired the reputation of a great philosopher. After his return to Venice he became one of the most notable of the patrician families, a member of the Great Council, and afterwards was named to a commission which administered the debt of the republic. In September, 1520, he was appointed orator or ambassador to the court of the Emperor Charles V (1519-56), with instructions to defend the rights of the Pope against Francis I of France (1515-47), and to prevent all hostile measures of the emperor. In Worms, where he arrived in April, 1521, he heard much about Luther and his errors; but, not being concerned with the matter, he refrained from all interference, and never saw Luther nor spoke to him. From Vienna he went with the imperial court to the Netherlands, then to England, and finally to Spain. In August, 1525, he returned to Venice. A report of his expe...
Contarini's principal works are the following: (1) "De immortali anima"; (2) "De officio episcopi libri duo"; (3) "De magistratibus et republica Venetorum libri V"; (4) "Compendii philosophi libri VIII"; (5) "De potestate Pontificis"; (6) "De elementis libri V"; (7) "Confutatio articulorum seu questionum Lutherti"; (8) "De libero arbitrio"; (9) "Conciliorum magus illustrium summa"; (10) "De Sacramentis christianae legis et catholice ecclesiae libri IV"; (11) "De justificacione"; (12) "Cathechismus"; (13) "De Prædestinatione"; (14) "Scholia in epistolæ divi Pauli".

In many of these writings Contarini touched upon the questions raised by Luther and other reformers; in spite of the Catholic view, he was always fortunate. Thus, in describing the process of justification, he attributes the result largely to faith—not to faith with incontinent charity in the Catholic sense, but to faith in the sense of confidence. However, he departs again from the Protestant view by including in the preparatory stage a real breaking away from sin and turning to good, a repentance and desistance from duties of the old order, in denying the essence or the causa formalis of justification; he requires not only the supernatural quality inherent in the soul, by which man is constituted just, but, in addition to that, the outward imputation of the merits of Christ, believed to be necessary owing to the deficiency of our nature. This is why he would object, nevertheless, to class Contarini among the partisans of the Reformation. The above-mentioned views were taken only in part from the teaching of the Protestants; as yet the Church had given no definite decision on these matters. Moreover, Contarini wished always to remain a Catholic; at the conference of Ratisbon he protested repeatedly, that he would sanction nothing contrary to the Catholic teaching, and he left the final decision of all matters of faith to the Pope.

Contarini, Giovanni, Italian painter of the Venetian school, b. at Venice about 1549; d. in 1605. Contarini was a contemporary of Jacopo Palma called Palma Giovane. He was a great student of the works of Titian, and Titian is declared to have been an exact imitator of Titian. According to an old story he was so extremely accurate in his portraits that on "sending home one he had taken of Marco Dolce his dogs began to fawn upon it mistaking it for their master." Contarini's work is extremely mannered, soft and sweet, but distinguished by bold line, rich colouring and executed very much on the lines of Titian's painting. His finest picture is in the Louvre, having been removed from the ducal palace at Venice, and represents the Virgin and Child with St. Mark and St. Sebastian, and the Dogs of Venice, Marino Grimani, kneeling before them. Other paintings of his are in the galleries at Berlin, Florence, Milan, and Vienna, and in many of the churches at Venice. He painted easel-pictures of mythological subjects, which are treated with propriety and discretion but are peculiarly lacking in force and strength; in many of the palaces in Venice he decorated ceilings. Some years of his life were spent in studies of Leonardo and of Rudolf II, with whom he was a great favourite and by whom he was knighted. His work has been described by one writer as a combination of sugar, cream, mulberry juice, sunbeam and velvet, but the criticism is a little unjust and one or two of his works, for example the "Resurrection" in the church of San Francesco di Paolo at Venice, claim to be masterly. This picture is certainly a fine piece of colouring, well composed and well carried out.

The chief authority is Carlo Rudolfi, Venetian Artists (Venice, 1648); Barrow, Art in Italy (London, 1899); Kugler, The Italian Schools of Painting (London, 1900). George Charles Williamson.

Contemplation.—The idea of contemplation is so intimately connected with that of mystical theology that the one cannot be clearly explained independently of the other; hence we shall here set forth what mystical theology is.

Preliminary Definitions.—Those supernatural acts or states which no effort or labour on our part can succeed in producing, even in the slightest degree or for a single instant, are called mystical. The making of an act of contension and the reciting of a Hail Mary are supernatural acts, but when one wishes to produce the same grace by his own effort, he is not reciting an act of contemplation. But to see one's guardian angel, which does not in the least depend on one's own efforts, is a mystical act. To have very ardent sentiments of Divine
love is not, in itself, proof that one is in a mystical state, because such love can be produced, at least feebly and for an instant, by our own efforts. The preceding definition is equivalent to that given by St. Teresa in the beginning of her second letter to Father Rodrigues Alvarez. Mystical theology is the science that studies mystical states; it is above all a science based on observation. Mystical theology is frequently confounded with ascetic theology; the latter, however, treats of the virtues. Ascetical writers discuss the little or nothing of prayer, but they confine themselves to prayer that is not mystical.

Mystical states are called, first, supernatural or infused, by which we mean manifestly supernatural or infused; secondly, extraordinary, indicating that the intellect operates in a new way, one which our efforts cannot bring about; and, thirdly, interior, to say that the soul receives something and is conscious of receiving it. The exact term would be passivo-active, since our activity responds to this reception just as it does in the exercise of our bodily senses. By way of distinction ordinary prayer is called active. The word mystical has been much abused. It has at length come to be applied to all religious sentiments that are somewhat ardent and, indeed, even to simple poetical sentiments. The foregoing definition gives the restricted and theological sense of the word.

First of all, a word as to ordinary prayer, which occupies a large part of our devotions. Second, meditation, also called methodical prayer, or prayer of reflection, in which may be included meditative reading; third, affective prayer; fourth, prayer of simplicity, or of simple gaze. Only the last two degrees (also called prayers of the heart) will be considered, as they belong rather on the mystical states. Most forms in which the affective acts are numerous, and which consists much more largely of them than of reflections and reasoning, is called affective. Prayer of simplicity is mental prayer in which, first, reasoning is largely replaced by intuition; second, affections and resolutions, though not absent, are only slightly varied and expressed in a few words. To say that the multiplicity of acts has entirely disappeared would be a harmful exaggeration, for they are only notably diminished. In both of these states, but especially in the second, there is one dominant thought or sentiment which recurs constantly and easily (although with varying development) in the child manner of thoughts, beneficial or otherwise. This main thought is not continuous but keeps returning frequently and spontaneously. A like fact may be observed in the natural order. The mother who watches over the cradle of her child thinks lovingly of him and does so without being aware of it, and very often without his knowledge. Prayers differ from meditation only as greater from lesser and are applied to the same subjects. Nevertheless the prayer of simplicity often has a tendency to simplify itself, even in respect to its object. It leads one to think chiefly of God and of His presence, but in a more particular state, which is nearer than others to the mystical states, is called the prayer of amorous attention to God. Those who bring the charge of illibleness against these different states always have an exaggerated idea of them. The prayer of simplicity is not to meditation what inaction is to action, though it might appear to be at times, but what uniformity is to variety and intuition to reasoning.

A soul is known to be called to one of these degrees when it succeeds therein, and does so with ease, and when it derives profit from it. The call of God becomes one of this kind of prayer; second, a want of facility and distaste for meditation. Three rules of conduct for those who show these signs are admitted by all authors: (a) When, during prayer, one feels neither a relish nor facility for certain acts one should not force oneself to produce them, but be content with affective prayer or the prayer of simplicity (which, by hypothesis, can succeed); (b) otherwise one should yield to this inclination instead of obstinately striving to remain immovable like the Quietists. Indeed, even the full use of our faculties is not superficial in helping us to reach God. (c) Outside of prayer, properly so called, one should profit on all occasions either to get instruction or to pray. By the will and thus make up what prayer itself may lack. Many texts relative to the prayer of simplicity are found in the works of St. Jane de Chantal, who, together with St. Francis of Sales, founded the Order of the Visitations. She complained of the opposition that many well-disposed persons of good resolutions did not show the simplicity that others displayed. She desired to be freed from the form of prayer. The frequent reference writers the prayer of simplicity is called acquired, active, or ordinary contemplation. St. Alphonsus Liguori, echoing his predecessors, defines it thus: "At the end of a certain time ordinary meditation produces what is called acquired contemplation, which consists in seeing at a simple glance the truths which could previously be discovered only through protracted discourse" (Homo apostolicus, Appendix I, no. 7).

To distinguish it from acquired contemplation mystical union is called intuitive, passive, extraordinary, or higher contemplation, vocal prayer. It is the prayer of simplicity considered only as contemplation, without any qualification. Mystical graces may be divided into two groups, according to the nature of the object contemplated. The states of the first group are characterized by the fact that it is God, and God only, who manifests Himself; in the second group the manifestation is of a created object, as, for example, when one beholds the humanity of Christ or an angel or a future event, etc. These are visions (of created things) and revelations. To these belong miraculous bodily phenomena which are sometimes observed in ecstasies. There are four degrees or stages of mystical union. They are here taken as they are described by St. Teresa has described them with the greatest clearness in her "Life" and principally in her "Interior Castle": first, incomplete mystical union, or the prayer of quiet (from the Latin quieta, quiet; which expresses the impression experienced in this state); second, the full, or semi-ecstatic, union, which St. Teresa sometimes calls the prayer of union (in her "Life" she also makes use of the term entire union, entera unión, ch. xvii); third, ecstatic union, or ecstasy; and fourth, transforming or defying union, or spiritual marriage (properly) of the soul with God. The first three are called spiritual inactions, the last two, weak, medium, and the energetic. It will be seen that the transforming union differs from these specifically and not merely in intensity.

The preceding ideas may be more precisely stated by indicating the easily discernible lines of demarcation between the mystical states. Thus, when the Divine action is still too weak to prevent distractions: in a word, when the imagination still retains a certain liberty; (b) full union when its strength is so great that the soul is fully occupied with the Divine object, whilst, on the other hand, the senses continue to act (under these conditions, by making a greater or less effort, one can cease from prayer); (c) ecstasy when communications with the external world are severed or nearly so (in this event one can no longer make voluntary movements nor emerge from the state at will). Between these well-defined types there are imperceptible transitions, a pupil of the sun, colours blue, green, and yellow. Mystics use many other appellations: silence, supernatural sleep, spiritual inebriation, etc. These are not real degrees, but rather ways of being in the four preceding degrees. St. Terese sometimes designates the weak prayer of
quiet as supernatural recollection. As regards transforming union, or spiritual marriage, it is here sufficient to say that it consists in the habitual consciousness of a grace which shall possess us in heaven: the participation of the Divine nature. The soul is conscious of the Divine assistance in its superior supernatural operations, those of the intellect and the will. Spiritual marriage differs from spiritual espousals inasmuch as the first of these states is permanent and the second only transient.

CHARACTERISTICS OF MYSTICAL UNION. Unanimous: The different states of mystical union possess twelve characters. The first two are the most important; the first because it denotes the basis of this grace, the other because it represents its physiognomy.

First character: the presence felt.—(a) The real difference between mystical union and the recollection of ordinary prayer is that, in the former, God is not satisfied with helping us to think of Him and reminding us of His presence; He gives us an intellectual experimental knowledge of that presence. (b) However, in the lower degrees (spiritual quiet) God does this in a rather obscure way. The more elevated the order of the union the clearer the manifestation. The obscurity just mentioned is a source of interior suffering to beginners. During the period of spiritual quiet they instinctively believe in the preceding doctrine, but afterwards, because of their preconceived ideas, their own temperament and religious habits, they are often afraid of going astray. The remedy lies in providing them with a learned director or a book that treats these matters clearly. By experimental knowledge is understood that which comes from the object itself and makes it known not only as possible but as existing, and in such and such conditions. This is the case with mystical union. God is therein present as well as conceived. Hence, in mystical union, we have experimental knowledge of God and of His presence, but it does not at all follow that this knowledge is of the same nature as the Beatific Vision. The angels, the souls of the departed, and devils know another one another experimentally but in an interior way to that in which God will be manifested to us in heaven. Theologians express this principle by saying that it is a knowledge by impressed or intelligible species.

Second character: interior possession.—(a) In states inferior to ecstasy one cannot say that he sees God, unless the exceptional and exceptional is led to use the word see. (b) On the contrary, what constitutes the common basis of all the degrees of mystical union is that the spiritual impression by which God manifests His presence makes that presence felt in the way of an interior something with which the soul is penetrated; this is the sensation of absorption, of fusion, of immersion. (c) For the sake of greater clearness the sensation one experiences may be designated as interior touch. This very clear expression of spiritual sensation is used by Searmelli (Directoire mystique, Tr. III, no. 26) and had already been resorted to by Father Ricci (Praxis theologica, I, no. 735). The following comparison will aid us in forming an exact idea of the physiognomy of mystical union. We may say that it is in a precisely similar way that we feel the presence of our body when we remain perfectly immobile and close our eyes. If we know that our body is present, it is not because we see it or have been told of the fact. It is the result of a special sensation (cœsthesia), an interior impression, very simple and yet impossible to analyse. Thus is it that in mystical union we feel God within us and in a very simple way. The soul absorbed in mystical union that is not too elevated may be said to resemble a man placed of his friends in an impenetrably dark place and in utter silence. He neither sees nor hears his friend whose hand he holds within his own, but through means of touch, he feels his presence. He thus remains thinking of his friend and loving him, although amid distractions.

The foregoing statements concerning the first two characters also apply to the third one to whom the term fusion is applicable to those who have received mystical graces, but, on the contrary, they are often a source of amazement to the profane. For those who will admit them, at least provisionally, the difficulties of mystical union are overcome and what is to follow will not be very mysterious. The ten characters remaining are the consequences or concomitants of the first two.

Third character:—Mystical union cannot be produced at will. It is this character that was useful above in defining all mystical states. It may also be added that these states cannot be augmented nor their manner of being changed. By remaining immobile and being content with inferior acts of the will one cannot cause these graces to cease. It will be seen farther on that the only means to this end lies in resuming bodily activity.

Fourth character:—The knowledge of God in mystical union is obscure and confused; hence the expression to enter into Divine obscurity or into Divine darkness. In ecstasy one has intellectual visions of the Divinity, and the loiter these become, the more they surpass our understanding. Then is raised the problem, a mixture of light and darkness. The great darkness is the name given to the state in which a union with Divine attributes is never shared by any creature, for instance, infinity, eternity, immutability, etc.

Fifth character:—Like all else that borders on the Divine nature this mode of communication is only half comprehensible and it is called mystical because it indicates a mystery. This character and the preceding one are a source of anxiety to beginners, as they imagine that no state is Divine and certain unless they understand it perfectly and without anyone's help.

Sixth character:—In mystical union the contemplation of God is produced neither by reasoning nor by the consideration of creatures nor still by interior images of the sensible order. We have seen that it has an altogether different cause. In the natural state our thinking is always accompanied by images, and it is the same in ordinary prayer, because supernatural operations of an ordinary character resemble those of nature. But in mystical contemplation a sufficient takes place. St. John of the Cross repeatedly reverted to this point. It has been said that the acts of the imagination are not the cause of contemplation; however, they may at least accompany it. Most frequently it is in distractions that the imagination manifests itself, and St. Teresa declared that for this evil there is a sufficient. We shall designate as constitutive acts of mystical union those which necessarily belong to this state, such as thinking of God, relishing Him and loving Him; and by way of distinction we shall denote as additional acts such acts, other than distractions, as are not proper to mystical union, that is, they are an inessential cause nor its consequences. This principle indicates that an addition, whether voluntary or not, is made to Divine action. Thus, to recite a Hail Mary during spiritual quiet or to give oneself up to a consideration of death would be to perform additional acts, because they are not essential to the existence of spiritual quiet. These definitions will prove useful later on. But even now they will permit us to explain certain abbreviations of language, often indulged in by mystics, of which many erroneous interpretations have been made, misunderstanding having resulted from what was left unexpressed. Thus it has been said: "Often in supernatural prayer there are no more additional acts"; or, "One must not fear therein to suppress all acts"; whereas what should have been said was this: "There are no more additional acts." Taken literally, these abridged phrases do not differ from those of
the Quietists. St. Teresa was suddenly enlightened in her way of perfection by reading in a book this phrase, though it is inaccurate: "In spiritual quiet one can think of nothing" (Life, ch. xxiii). But others would not have discerned the true value of the experience. In like manner it was pointed out that "the will only is united"; by which was meant that the mind adds no further reasoning and that thenceforth it makes itself forgotten or else that it retains the liberty of producing additional acts; then it seems as if it were not united. But in future these expressions that invite long explanations will be avoided.

Seventh character.—There are continual fluctuations. Mystical union does not retain the same degree of intensity for five minutes, but its average intensity may be the same for a notable length of time.

Eighth character.—Mystical union demands much less labour than meditation, and the more elevated the state the less the effort required, in ecstasy there being none whatever. St. Teresa compares the soul that progresses in these states to a gardener who takes less and less trouble to water his garden (Life, ch. xi). In the prayer of quiet the labour does not consist in procuring the prayer itself: God also gives it; but first comes disturbance; second, in occasionally producing additional acts; third, if the quiet be weak, in suppressing the ennui caused by incomplete absorption which very often one is disinclined to perfect by something else.

Ninth character.—Mystical union is accompanied by sentiments of love, tranquillity, and pleasure. In spiritual quiet these sentiments are not always very ardent although sometimes the reverse is the case and there is spiritual jubilation and inebriation.

Tenth character.—Mystical union is accompanied, and often in a very visible manner, by an impulse towards the different virtues. This fact (which St. Teresa constantly repeats) is the more sensible in proportion as the prayer is more elevated. In private, far from leading to pride these graces always produce humility.

Eleventh character.—Mystical union acts upon the body. This fact is evident in ecstasy (q. v.) and enters into its definition. First, in this state the senses have little or no action; second, the members of the body are usually motionless; third, respiration almost ceases; fourth, vital heat seems to disappear, especially from the extremities. In a word, all is as if the soul lost its life and motion in all that it gains on the side of Divine union. The law of continuity shows us that these phenomena must occur, although in a lesser degree, in those states that are inferior to ecstasy. At what moment do they begin? Often during spiritual quiet, and this seems to be the case mainly with persons of weak temperament. This spiritual quiet is somewhat opposed to bodily movements the latter must react reciprocally in order to diminish this quiet. Experience confirms this conjecture. If one begins to walk, read, or look to right and left, one feels the Divine action diminishing; therefore the bodily union is a practical measure of ending the mystical union.

Twelfth character.—Mystical union to some extent hinders the production of some internal acts which, in ordinary prayer, could be produced at will. This is what is known as the suspension of the powers of the soul. In ecstasy this fact is most evident and is also evident in actual quiet, one of those states inferior to ecstasy, being one of the phenomena that have most occupied mystics and been the cause of the greatest anxiety to beginners. Those acts which have been termed additional, and which would likewise be voluntary, are what are hampered by this suspension, hence it is an obstacle to vocal prayers and pious reflections.

To sum up: as a general rule, the mystical state has a tendency to exclude all that is foreign to it and especially whatever proceeds from our own assiduity, our own effort. Sometimes, however, God makes exceptions. Concerning suspension there are three rules of conduct identical with those already given for the prayer of simplicity (see above). If a director suspects that a person is sustained under the influence of quiet he can most frequently decide the case by questioning him on the twelve characters just enumerated.

The Two Nights of the Soul.—There is an intermediate state not yet mentioned, a frequent transition between ordinary prayer and spiritual quiet. St. John of the Cross, who was the first to describe it, called it the night of sense or first night of the soul. If we abide by appearances, that is to say, by what we immediately observe in ourselves, this state is a prayer of simplicity but with characteristics, two especially, which make it a thing apart. It is bitter, and it is almost solely upon God that the simple gaze is incessantly riveted. Five elements are included in this distressing state: there is first, an habitual aridity; second, an undeveloped, confused idea of God, recurring with singular persistency and independently of the will; third, the sad and constant need of a close union with God; fourth, a constant introduction of God's grace to detach us from all sensible things and impart a distaste for them, whence the name, "night of sense" (the soul may struggle against this action of grace); fifth, there is a hidden element which consists in this: God begins to exercise over the soul the action characteristic of the prayer of quiet, but He does it so gently that one may be unconscious of it. Hence it is a spiritual quiet in the latent, disguised state, and it is only by verifying the analogy of effects that one comes to know it. St. John of the Cross speaks of the second night of the soul as the night of the mind. It is nothing more than the union of the mystical states inferior to spiritual marriage but regarded as including the element of gloom and therefore as producing suffering. We can now form a compact idea of the development of mystical union in the soul. It is a tree the seed of which is first concealed in the earth and the roots that are secretly put forth in darkness constitute the night of sense. From these a frail stem springs up into the light and this is spiritual quiet. The tree grows and becomes successively full union and ecstasy. Finally, in spiritual marriage it attains the end of its development and then especially it bears flowers and fruit. This harmony existing between the states of mystical union is a fact of noteworthy importance.

Revelations and Visions of Creatures.—There are three kinds of speech: exterior, which is received by the ear, and interior, which is subdivided into imaginative and intellectual. The last is a communication of thought without words.

There are three similar kinds of visions. Many details of these different graces will be found in the works of St. Teresa. What are known as private and particular revelations are those contained neither in the Bible nor in the deposit of Apostolic tradition. The Church does not accept them but regards them as not productive of grace and as not being sufficiently authenticated by witnesses. Nevertheless it is certain that many saints were deceived and that their revelations contradict one another. What follows will explain the reason of this. Revelations and visions are subject to many illusions which shall be briefly set forth. First, the vision is of a professor of history and archaeology, an absolute prediction that was only conditional, or commit some other error in interpreting it. Second, when the vision represents a scene from the life or Passion of Christ, historic accuracy is often only approximate; otherwise God would lower Himself to the rank of a professor of history and archaeology. It wishes to sanctify the soul, not to satisfy our curiosity. The seer, however, may believe that the reproduction is exact; hence the want of agreement between revela-
mons concerning the life of Jesus Christ. Third, during the vision personal activity may be so mingled with the Divine action that answers in the sense desired. This fact, during what vivid imaginations may go so far as to produce revelations and visions out of whole cloth without any evil intent. Fourth, sometimes, in his desire to explain it, the seer afterwards unconsciously alters a genuine revelation. Fifth, amanuenses and editors take deplorable liberties in revising, so that the text is not always authentic. Some revelations are even absolutely false: first, in describing their prayer, certain persons lie most audaciously; second, amongst those afflicted with neuropathy there are inventors who, in perfectly good faith, imagine to be real facts things which never occurred; third, the devil may to a certain degree, counterfeit Divine visions; fourth, amongst writers there are genuine forgers who are responsible for political prophecies, hence the profusion of absurd predictions.

Illusions in the matter of revelations often have a serious consequence, as they usually instigate to exterior acts, such as teaching a doctrine, propagating a new devotion, prophesying, launching into an enterprise that entails expense. There would be no evil to fear if these impulses came from God, but it is entirely otherwise when they do not come from God, which is more rare. We frequently say that it is difficult to discern. On the contrary there is naught to fear from mystical union. It impels solely towards Divine love and the practice of solid virtue. There would be equal security in the impossible supposition that the state of prayer was only an imitation of mystical union, for then the tendencies would be exactly the same. This supposition is called impossible because St. Teresa and St. John of the Cross keep repeating that the devil cannot imitate nor even understand mystical union. Neither can our mind and imagination reproduce the combination of the twelve characteristics described above.

What has been said shows us the importance of not confounding mystical union with revelations. Not only are these states of a different nature but they must also be differently estimated. Because ignorant of this distinction many persons fall into one of these two extremes: first, if they know the danger revealed to them extend their zeal to mystical union and thus turn certain souls from an excellent path; second, if on the contrary, they are reasonably persuaded of the security and tranquillity of mystical union, they wrongfully extend this favourable judgment to revelations and drive certain souls into the path of error.

When God so wills He can impart to him who receives a revelation the full certainty that it is real and wholly Divine. Otherwise one would not have had the right to believe the Prophets of the Old Testament. Scripture ordained that they be distinguished from false prophets. For instance, the envoy of God performed miracles or uttered prophecies the realization of which was verified. In order to judge private revelations in a more or less probable way, two kinds of information must be obtained. First, one should ascertain the qualities or defects, from a natural, ascetic, or mystical point of view, of the person having revelations. When the one in question has been canonized the investigation has already been made by the Church. Second, one should be acquainted with the qualities or defects of the revelation itself and with its various circumstances, favourable or unfavourable, to its having come from the sources that should be actuated by the same principles, the two chief points to settle being: first, in what the soul is absorbed while thus deprived of the senses, and whether it is captivated by knowledge of a higher order and transported by an immense love; second, what degree of virtue it possessed before reaching this state and what great progress it made afterwards. If the result of the investigation be favourable the probabilities are on the side of Divine ecstasy, as neither vices nor disease can work the imagination up to this pitch.

There are several rules of conduct in connexion with revelations but we shall give only the two most important. The first relates to the director. If the revelation or the vision has for its sole effect the augmentation of the fervour of the seeker for God, Christ, or the saints, nothing prevents these facts from being provisionally considered Divine; but if, on the contrary, the seer be impelled to certain undertakings or if he wish that his prediction should be firmly believed, the utmost distrust must be shown, but with the greatest kindness. If the seer be dissatisfied with the attitude and insist upon being believed, he should be told: "You must admit that you cannot be believed simply upon your word, consequently give signs that your revelations come from God and from Him alone," As a rule this request remains unanswered. Note the prudence of the Church in regard to certain feasts or devotions which it has instituted in consequence of private revelations. The revelation was only the occasion of the measure taken. The Church declares that such a devotion is reasonable but she does not guarantee the revelation that suggested it. The second rule concerns the director. In the first place, he is generally to do his utmost to repulse the revelations and to turn his thoughts away from them. He is to accept them only after a prudent director will have decided that he may place a certain amount of confidence in them. This doctrine, which seems severe, is nevertheless taught forcibly by many saints, such as St. Ignatius (Acts SS, 31 July, Préliminaires, no. 614), St. Philip Neri (ibid., 26 May, 2nd life, no. 375), St. John of the Cross (Assent, Bk. II, ch. xvi, xvii, and xxiv), St. Teresa, and St. Alphonsus Liguori (Homo Apoll., Appendix I, no. 23), for the reason that there is danger of illusions. With the greatest reason, revelations and visions (of created objects) should be neither desired nor requested. On the other hand many passages in St. Teresa and other mystics prove that mystical union may be desired and asked for, provided it be done humbly and with resignation to God's will. The reason is that this union has no disadvantages, whereas judgments of infallibility are fraught with danger of sanctification (see Theology, under subtitle Mystical: Quietism).

St. Teresa far excels all writers that preceded her on the subject of contemplation. In their descriptions those prior to her confined themselves to generalities. Exception was made especially by St. Angela de Foligno, Ruysbroeck and the Venerable Marin d'Escobar as regards the subject of ecstasies. St. Teresa was likewise the first to give a clear, accurate, and detailed classification. Before her time hardly anything was described except ecstasies and revelations. The lower degrees required more delicate observation than had been devoted to them before her day. After St. Teresa the first place for careful observation of these matters belongs to St. John of the Cross. But his classifications are confused. St. Teresa and St. John of the Cross are also greatly superior to subsequent authors who have been satisfied to repeat them, with comments.

AUG. POULAIN.

Contemplative Life, a life ordered in view of contemplation; a way of living especially adapted to lead to and facilitate contemplation, while it excludes all other preoccupations and intents. To seek to know and love God more and more is a duty incumbent on every Christian and should be his chief pursuit, and in this wise the Christian and the contemplative lives are synonymous. This duty, however, admits of various degrees in its fulfillment. Many give it only a part of their time and attention, either from lack of piety or because of other duties; others attempt to blend harmoniously the contemplative life with active ministry, i.e. the care of souls, which, undertaken from a motive of supernatural charity, can be made compatible with the inner life. Others again, who have the same end in view, undertake the duty of contemplation to the utmost perfection, and give up all occupations inconsistent with it, or which, on account of man's limited abilities, of their nature would impede it. The custom has prevailed of applying the term "contemplative" only to the life led by the latter class of believers.

Contemplation, the object of contemplative life, is defined as the compliant, loving gaze of the soul on Divine truth already known and apprehended by the intellect assisted and enlightened by Divine grace. This definition shows the two chief differences between the contemplation of the Christian ascetic and the merely scientific research of the theologian. The contemplative, in his investigation of Divine things, is actuated by love for those things, and to increase this love is his ultimate purpose, as well as the firstfruits of his contemplation; in other words the theological virtue of charity is the mainspring as well as the outcome of the act of contemplation. Again, the contemplative does not rely on the natural powers of his intellect in his endeavours to gain cognizance of the truth, but, knowing that human reason is limited and weak, especially when inquiring into things supernatural, he seeks to make use of prudence and faith, and all Christian virtues strive to fit his soul for the grace he desires. The act of contemplation, imperfect as it needs must be, is of all human acts one of the most sublime, one of those which render greatest honour to God, bring the greatest good to the soul, and enable it most efficaciously to become a means of salvation and manifest blessing to others. According to St. Bernard (De Consider., lib. I, c. vii), it is the highest form of human worship, as it is essentially an act of adoration and of utter self-surrender of man's whole being. The soul in contemplation is a soul lying prostrate before God, convinced of and confessing its own nothingness, reduced to the state of being the going and honour and blessings from those He has created. It is a soul lost in admiration and love of the Eternal Beauty, the sight of which though but a feeble reflection, fill it with a joy naught else in the world can give—a joy which, far more eloquently than speech, testifies that the soul regards Beauty above all other beatitudes, and finds in it the completion of all its desires. It is the jubilant worship of the whole heart, mind, and soul, the worship "in spirit and in truth" of the "true adorers," such as the Father seeks to adore Him (John, iv, 23).

By contemplative life, however, is not meant a life passed only in contemplation. On earth an act of contemplation cannot be of long duration, except in the case of an extraordinary privilege granted by Divine power. The weakness of our bodily senses and the natural instability of our minds and hearts, together with the exigencies of life, render it impossible for us to fix our attention for long on one object. This is true with regard to earthly or material things; it is still more true in matters pertaining to the supernatural order. Only in Heaven shall the understanding be strengthened so as to waver no more, but adhere unceasingly to Him Who made it.

Hence it is rare to find souls capable of leading a life of contemplation without occasionally engaging their material or physical activities, while it is rare for them in earthly or material things. The combination, however, of the two lives, of which Catholic hagiology affords such striking and glorious examples, is, as a general rule and for persons of ordinary attainments, a matter of considerable difficulty. Exterior action, with the solicitude and cares attendant on it, tends naturally to absorb the attention; the soul is thereby hampered in its efforts to ascend to the higher regions of contemplation, as its energy, capacity, and power of application are usually too limited to allow it to carry on together such different pursuits with success. If this is true with regard to those even who are working for God and are engaged in enterprises calculated to further His interests, it is all the more true of those who are toiling with no other direct end than to procure their subsistence and their temporal well-being. This is why those who have wished to give themselves up to contemplation and reach an eminent degree of mystical union with God have been obliged by withdrawing from the crowd and have abandoned all other pursuits, to lead a retired life entirely consecrated to the purpose of contemplation. It is evident that such a life can be led nowhere so safely and so easily as in those monastic orders which make it their special object. The rules of these orders supply their members with every means necessary and useful for the purpose, and safeguard them from all exterior obstacles. Foremost among these means must be reckoned the vows, which are barriers raised against the intruders of the three great evils devastating the world (1 John, ii, 16). Poverty frees the contemplative from the cares inherent to the possession and administration of temporal goods, from the moral dangers that follow in the wake of wealth, and from that insatiable greed for gain which so lowers and materializes the mind. Chastity frees him from the bondage of married life with its solicitude to the heart, and from the anxieties and sorrows of childbearing, whereas he can, with the Apostle's expression (1 Cor., vii, 33), and so apt to confine man's sympathies and action within a narrow circle. By the same virtue also he obtains that cleanliness of heart which enables him to see God (Matth., v, 8).

Obedience, without which community-life is impossible, frees him from the anxiety of determining what course to take amidst the ever-shifting circumstances of life. The stability which the vow gives to the contemplative's purpose by placing him in a fixed state with set duties and obligations is also an inestimable advantage, as it saves him from natural inconsistency, the blight of so many undertakings.

Silence is of course the proper spiritual neighbor of the contemplative soul, since to converse with God and men at the same time is hardly possible. Moreover, conversing unnecessarily is apt to give rise to numberless thoughts, fancies, and desires alien to the duties and purpose of contemplative life, which assail the soul at the hour of prayer and distract it from God. It is no wonder, then, that monastic legislators and guardians of regular discipline should have always laid such stress on the practice of silence, strenuously enforcing its observance and punishing transgression with special severity. This silence, if not perpetual, must embrace at least the greatest part of the contemplative's life. Solitude is the home of silence, the best safeguard. Moreover, it cuts to the root one of the strongest of man's selfish propensities, the desire to make a figure before the world, to win admiration and
applause, or at least to attract attention, to be thought and spoken of. “Manifest thyself to the world” (John, vii, 4) says the demon of vainglory; but the Spirit of God holds another language (Matt., vii). Solitude may be twofold: the seclusion of the cloister, which implies restriction of intercourse with the outer world, and the contemplative continence of the cell, a practice which varies in different orders.

Religious life, being essentially a life of self-denial and self-sacrifice, must provide an effectual antidote to every form of self-seeking, and the rules of contemplative orders especially are admirably framed so as to start and modify even such instinct: vigo, fasting, austeritv, asceticism, and often manual labour tame the flesh, and thus help the soul to keep in subjection its worst enemy. Contemplatives, in short, forgo many transient pleasures, many satisfactions sweet to nature, all that the world holds most dear; but they gain in return a liberty for the soul which enables it to rise without hindrance to the thought and love of God. Though God Himself is the chief object of their study and meditation, He is not the only one. His works, His dealings with men, all that reveals Him in the province of grace or of nature is the object of their study and the subject of their investigations. The development of the Divine plan in the growth of the Church and in the history of nations, the wondrous workings of grace and the guidance of Providence in the lives of individual souls, the marvels and beauty of creation, the writings of the saints and especially of Christendom, and above all, the Holy Scriptures form an inexhaustible store-house, wherein the contemplative can draw food for contemplation.

The great function assumed by contemplatives, as has already been said, is the worship of God. When living in community, they perform this sacred office in a public, official way, assembling at stated hours of the day and night to the psalms of praise” (Ps. xlix, 14, 23; see Office, Divine). Their chief work then is what St. Benedict (Rule, xliii) calls emphatically God’s work (opus Dei), i.e. the solemn chanting of Divine praise, in which the tongue gives utterance to the admiration of the intellect and to the love of the heart. And this is done in the name of the Church and of all mankind. Not only does contemplation glorify God, but it is most beneficial to the soul itself. Nothing brings the soul into such close union with God, and union with God is the source of all sainthood. Never so well as when contemplating the perfections of God and the grandeur of His works does man see his own imperfections and failings, the wiles of sin, the paucity and futility of so many of his labours and undertakings: and thus nothing so grounds him in humility, the prop and the bulwark of every other virtue.

Love for God necessarily breeds love for our fellowmen, all children of the same Father; and the two loves keep pace with each other in their growth. Hence it follows that contemplative life is eminently conducive to increase of charity for others. The heart is enlarged, affection is deepened, sympathy becomes more keen, and the mind is more aware of the worth of an immortal soul in God’s eyes. And although the two great commandments given by Christ (Matt., xxii, 37 sqq.)—love for God and love for our neighbour—the first is exemplified more markedly in contemplative orders, and the second in active orders, contemplatives, nevertheless, not only must do have in their hearts a strong and true love for others, but they realize that love in their deeds. The principal means contemplatives have of proving their love for others are prayer and penance. By prayer they draw down from Heaven on struggling and suffering humanity manifold graces, light, strength, and courage, and by penance, they earn for others, by penance, they strive to atone for the offences of sinful humanity, to appease God’s wrath and ward off its direful effects, by giving vicarious satisfaction to the demands of His justice. Their lives of perpetual abnegation and privation, of hardship cheerfully endured, of self-inflicted suffering, joined to the sufferings of their Divine Master and Model help to repair the evil men do and to obtain God’s mercy for the wrongdoers. They thus help all men. This twofold ministry carried on within the narrow precincts of a monastery knows no other limits to its effects than the bounds of the earth and the needs of mankind. Or rather that ministry extends further still its sphere of action, for the dead as well as the living benefit by it. (See Contemplation, Prayer of; Monasticism.)

EDMUND GURDON.

Contouss, Vincent, Dominican theologian and preacher, b. at Altivillaro (Gers), Diocese of Condom, France, 1641; d. Creil-sur-Oise, 26 Dec. 1674. His epigraph in the church of that place described him as “in years a youth, mature in wisdom and in virtue venerable.” Despite his short life, he gave proof in his writings of considerable learning and won remarkable popularity by his pulpit utterances. He was seventeen years old when he entered the Order of Preachers. After teaching philosophy and the rudiments of theology at Toulouse, he began a career of preaching as brilliant as it was brief. He was stricken in the pulpit at Creil, where he was giving a mission. His reputation as a theologian rests on a work entitled “Theologia Mentis et Cordis”, published posthumously at Lyons in nine volumes, 1651; second edition, 1687. His life is found in the fifth volume of the “Histoire des hommes illustres de l’ordre de Saint Dominique”, by Père Tournon. The peculiar merit of his theology consists in an attempt to get away from the prevailing dry reasoning of Scholasticism and, while retaining the accuracy and solidity of its method, to embellish it with illustrations and images borrowed from the Fathers, that appeal to the heart as well as the mind. This pious and learned compilation has not yet lost its value and utility for students and preachers.

JOHN H. STAPLETON.

Continenve.—Continence may be defined as abstinence from even the licit gratifications of marriage. It is a form of the virtue of temperance, though Aristotle did not accord it this high character since it involved a conflict with wrong desires—an element, in the mind of the philosopher, foreign to the meaning of the virtue in the strict sense. Continence, it is seen, has a more restricted significance than chastity, since the latter finds place in the condition of marriage. The abstinence we are discussing, then, belongs to the state of celibacy, though clearly the notion of this latter does not necessarily involve the former in any certain way.

Practice.—In considering its practice we regard continence as a state of life. Though among savages and barbarians every one, as a rule, seeks to contract an early marriage, yet even among these peoples continence is more frequently practised by those who discharge the public duties of religion. This is particularly true in South America and to authors cited by W. Buckler, the male wizards of Patagonia embraced a life of continence, as did the priests of the Mosquito Islands and of ancient Mexico. According to Chinese law such condition of abstinence is made obligatory upon all priests, Buddhist or Taoist. Among the Greeks continence was required of several orders of priestly ministers of the cultus of the vestals among the Romans. The continence extensively observed among the Essenes, the Muni-
contingent, and some of the Gnostics, though not confined to a priestly class, was reckoned to the means of a greater satisfaction. Such a widespread practice offers evidence of an instinctive feeling that the inconvenience of our sensual nature is in a measure degrading, and that it is particularly incompatible with the perfect purity that should characterize one consecrated to the worship of the All Holy. That the attitude of a number of sects towards the lower side of human nature has taken on a character of unreasonable, and even absurd, severity is clear. This is observed especially in the case of the Manichaeans and branches of the Gnostics in the past, and of the Shakers and other unimportant communities in our time. The law of the Catholic Church imposing a state of continence upon its clergy was a prescription or accident; its maintenance orders of men and women is set forth in the articles Celibacy of the Clergy; Religious Orders; and Virginity.

Two general objections are frequently urged against the state of continence. First, it is said that the condition of continence is detrimental to the well-being of the individual. In such a statement, it will be frequently found, continence is understood as an unchaste celibacy, and such surely is not only a moral but a physical evil most pernicious. Certain it is, however, that the self-sacrifice and control involved in true continence finds fruitage in a greater measure of moral power. The words of Jesus Christ, Matt. xix, 12, may be here appealed to. Moreover, the abstinence of which we speak is a condition of increased physical vigour and energy. Of this many savages are not unmindful; for among a number of these continence is imposed upon the braves during times of war as a means of fostering and strengthening their daring and courage. A second objection rests upon considerations of the social good. It is contended that a state of continence means failure to discharge the social obligation of conserving the species. But such an obligation fails, not upon every member of the community, but upon society at large, and is amply discharged though there be individual exceptions. Indeed the non-fulfilment of this duty is never threatened by a too general observance of sexual abstinence. On the contrary it is only the unlawful gratification of carnal passion that can menace the due growth of population. The words of Jesus Christ, Matt. xix, 12, that continence withdraws from the function of reproduction the worthier members of society—those whose possible offspring would be the most desirable citizens of the State. This contention, however, overlooks the social service of the example set by such observance—a service which is due in importance, upon every individual of society of observing absolute continence for periods of greater or less duration, is of highest value.

JOHN WEBSTER MELODY.

Contingent (Lat. contingere, to happen).—Aside from its secondary and more obvious meaning (as, for instance, its qualification of the predictable accident, of a class of modal propositions, and so on), the primary and technically philosophical use of the term is for one of the supreme divisions of being, that is, continuous and non-continuous being. In this connexion the meaning of the term may be considered objectively, and the genesis of the idea subjectively.

Objectively (ontologically) the contingent may be viewed: (1) in the purely ideal or possible order, and it is then the conceptual note or notes between which and existence in the actual order there is no contra-

diction, and which consequently admits of, though it does not demand, actualization. It is thus coextensive with possible being and is called the absolutely contingent. (2) The contingent, however, is coextensive with existence, the contingent is that being whose essence, as such, does not include existence and which, therefore, does not, as such, demand existence but is indifferent to be or not to be. This is called relatively contingent and the term is usually employed in this sense. Every being is thus contingent, though it may likewise hypothetically necessary, in that having existence it cannot at the same time and under the same aspect not have it; inasmuch, too, as it is determined by proximately, and hence relatively, necessitated antecedents. (3) In regard to its subject—be this subject contingency, necessity, or accident—its nature orders of men and women is set forth in the articles Celibacy of the Clergy; Religious Orders; and Virginity.

JOHN WEBSTER MELODY.

Contingent (Lat. contingere, to happen).—Aside from its secondary and more obvious meaning (as, for instance, its qualification of the predictable accident, of a class of modal propositions, and so on), the primary and technically philosophical use of the term is for one of the supreme divisions of being, that is, continuous and non-continuous being. In this connexion the meaning of the term may be considered objectively, and the genesis of the idea subjectively.

Objectively (ontologically) the contingent may be viewed: (1) in the purely ideal or possible order, and it is then the conceptual note or notes between which and existence in the actual order there is no contra-

object-sphere and asserts that all things observed and searched into have a borrowed existence. This idea of contingency is then further assured by the witness of consciousness to the conditioned, and hence contingent, character of its own states, testimony which is reconfirmed by the facts of birth and death.

Against this statement of the genesis of the contingency-concept it may be objected that experience does not extend beyond the field of sensuous phenomena. On the other hand, however, the intellect, motivated by the principle of sufficient reason, discerns the underlying noumenon, or essence of things material, Kant to the contrary notwithstanding, at least sufficiently to pronounce with certitude on their essential conditionateness and contingency. But it is urged by materialistic monists that the underlying substrate of the sensuous world is one homogeneous, eternal, necessary being, essentially involving existence. To this objection it may be answered that no finite thing, much less a finite material being, can contain the ultimate reason of its existence. The definite limitations, spatial, integral, positional, etc., and the inertia of the hypothetical primordial matter shows that it is conditioned by the functioning and development of its passage from the homogeneous to the heterogeneous state, into which it is supposed to have evolved in the actual universe, equally demands an extraneous active agency. It should, however, be noted that the argument from contingency to necessary being does not extend to the existence of God. So that the analysis of the objective concept is necessarily required in order to show that the latter concept includes that of underivedness (as this is) and that this in turn includes completeness, absence of any potentiality for further perfection (arbus purus), hence infinitude. The failure to note this limitation of the argument seems to have led Kant to deny its validity.

F. P. SIEGFRIED.

Contract (Lat. contractus; Old Fr. contrat; Mod Fr. contrat; Ital. contratto).—I. THE CANONICAL AND MORALIST DOCTRINE on this subject is a development of that contained in the Roman civil law. Roman law a merger or agreement between two parties to give, do, or refrain from doing something was a nude pact (pactum nudum) which gave rise to no civil obligation, and no action lay to enforce it. It needed to be clothed in some investitive fact which the law recognized in order to give rise to a civil obligation which should be enforced at law. Not that the nude pact was considered to be destitute of all binding force; it gave rise to a natural obligation, and it might afford ground for a legal exception. A man of honour would keep his engagements even if he knew that the law could not be invoked to compel him to do so. Moral theology, bending by some of its God-expressing existence, might be satisfied with the mere legal view of the effect of an agreement. If the agreement had all other requisites for a valid contract, moral theology must necessarily consider it to be binding, even though it was a nude pact and could not be enforced in the courts of law. Canon law made this moral attitude its own. In the Decretals of Gregory IX it is expressly laid down that pacts, however nude, must be kept, and that a strenuous endeavour must be made to put in execution what one has promised. It thus came to pass that nude pacts could be enforced in the Christian courts, and the Church's legislation served eventually to break down the moralism of its predecessors, and to pave the way for the more equitable law of contract which all Christian nations now possess.

In the canonical and moral doctrine there is hardly room for the distinction between a nude pact, or mere agreement, and a contract. The Roman jurist's definition of the former is frequently used by canonists to define a contract. They say that a contract is a consent of two or more persons by whom are capable of contracting with reference to some lawful object a consent, whether such agreement can be enforced in the civil courts or not. The intention of the parties is looked at, and if they are seriously intended to bind themselves, there is a contractual relation between them. This doctrine, however, gives rise to a question of some importance. The Church fully admits and defends the right of the State to make laws for the temporal well-being of its citizens. All States require certain formalities for the validity of certain actions. Last wills and testament are a familiar example, and although they are not strictly contracts, yet the principle is the same and they will serve for an example of what is meant. A deed, the only formal contract of English law, is another example. A will devoid of the requisite formalities is null and void at law; but what is the effect of such a voiding law in the forum of conscience? This question has been much debated among moralists, and it is not an easy one to answer. Some hold that a law is binding in the internal as well as in the external forum, so that if a formal contract, destitute of the formalities required by law, is null and void in conscience as it is in law. Others adopted the contrary opinion, and held that the law of moral nature only affected the external forum of civil law, and left intact the natural obligation arising from a contract. The common opinion takes a middle course. It holds that the want of formality, though it makes the contract void in the eyes of the law, renders it only voidable in the forum of conscience, so that, until one of the parties moves to set the contract aside, it remains valid, and anyone deriving benefit under it may enjoy his benefit in peace. If, however, the party interested moves to set it aside, and does so effectively, by having recourse to the court of law if necessary, both must then abide by the law which makes the contract void and of no effect.

There are four essential elements in a contract: consent of the parties, contractual capacity in them, determine and lawful subject-matter, and a lawful consideration. The contract is formed by the mutual consent of the parties, which must be real, not feigned, and manifested so that each may know that the other party consents. There is no difficulty about the outward manifestation of consent when the parties enter into the contract in each other's presence. But when the parties are not present to each other, and the contract is made by letter or telegram, it sometimes becomes a question of importance as to when and how the contract is formed. It is the contract is formed when the offeror signifies his consent by posting a letter of acceptance to the offeror, or is the knowledge of his acceptance required to complete the contract? All that is required by the nature of a contract is that there should be mutually manifested agreement of the two wills. There will be such agreement when one of the parties makes an offer to the other, and this one manifests his acceptance of the offer by posting a letter or by sending a telegram. There is then consent of two wills to the proposal, and so there is a contract. Mutual consent to the same proposal may be hindered by a mistake of one of the parties. Such mistakes are not to be inherently caused by the fraud or misrepresentation of the other party. If the mistake is substantial, so that at least one of the parties thinks that the subject-matter of the contract is quite other
than it really is, there will be no true consent, and no contract. Similarly, if there be a mistake about the nature of the contract proposed (as, if one party intends to sell, and the other party only wants to borrow) there is no agreement of wills. Mistake about the mere quality of the subject-matter of the contract is accidental, not substantial, and in spite of it there may be substantial agreement between the parties. If, however, such a mistake has been caused by the fraud or misrepresentation of the other party to the contract, the party deceived would be in no way bound by the agreement; and if the party deceived were to revoke the contract, there would be no agreement of wills. Mistake about the mere quality of the subject-matter of the contract is accidental, not substantial, and in spite of it there may be substantial agreement between the parties. If, however, such a mistake has been caused by the fraud or misrepresentation of the other party to the contract, the party deceived would be in no way bound by the agreement; and if the party deceived were to revoke the contract, there would be no agreement of wills. In such cases, the party deceived might have entered into the contract, it is only fair that the deceived party should be able to protect himself from injury by retiring from the agreement. Contracts, then, entered into because of accidental mistake which was induced by the fraud or misrepresentation of the other party, will be rescindable at the option of the party deceived.

The consent of the parties must be deliberate and free, for a perfect and a true contract cannot arise from consent which is not deliberate or free. Hence we must see what the influence of fear is upon the validity of a contract. If the fear goes to depriving one of the parties of the use of reason, he cannot, while in that state, give a valid consent, and the contract will be null and void. Fear, however, does not ordinarily produce such extreme effects; it leaves a man with the natural use of his reason and capacity of understanding or willing. Hence even grave fear, then, does not of itself invalidate a contract, but if it is unjustly caused by the other party to the contract with such force as to make consent of the other party’s consent, are made invalid by canon law. Some authorities even hold that all such contracts are invalid by natural law, but the opinion is at most only probable. A person must have the use of reason in order to give valid consent to a contract, and his contractual capacity must not have been taken away by law. Those who have not yet attained the use of reason, imbeciles, and those who are perfectly drunk so that they do not know what they are doing, are incapable of contracting by the law of nature. Minors are to a certain extent protected in this respect by English and American law. Practically, their contracts are voidable except those for necessaries. Married women were formerly incapable of entering into a valid contract, but in England since 1832 their disability has been removed, and in most of the States of the Union, the same doctrine begins to prevail. Religious persons are to a greater or less extent, according as they are under solemn or simple vows, incapable of entering into a binding contract. Corporations and companies are limited in their contractual capacity by their nature or by the articles of association. The consent to an agreement and certain, it must be possible, and it must be honest. A contract cannot be a bond of iniquity, and so an agreement to commit sin is null and void. Some theologians maintain that when, in execution of a contract, a sinful action has been performed, a right is acquired to receive the price agreed upon. The opinion seems at any rate probable. If the contract is not sinful in itself, but voided by positive law, it will be valid until it is set aside by the party interested, as was said above concerning informal contracts. When persons enter into a contract, each party promises to give, do, or forbear something in favour of the other. The price which is immediately agreed from the contract, and which is the cause of it, is called the consideration in English law. It is a necessary element in a contract, and if it is wanting the contract is null on account of the failure of a necessary condi-

tion in the agreement. The courts of civil law will not enforce a simple contract unless there be a valuable consideration in it; mere motives of affection or moral duty will not suffice. This rule, however, only affects legal obligations; it has nothing to do with obligations in conscience. A valid contract imposes on the contracting parties an obligation of justice to act conscientiously according to the terms of the agreement. They will be bound to perform not only what they expressly agreed to do, but whatever the law, or custom, or usage in the circumstances requires. The obligation arising from a contract will cease when the contract has been executed, when a new person has been substituted for the old one by the free consent of the parties, when the parties mutually and freely withdraw from the contract. When one of the parties fails in what is due, the other may, by rule, be free. A contract may be concluded not absolutely but conditionally on the happening of some uncertain and future event. In this case the condition contract imposes on the parties the obligation of waiting for the event, and in case it happens the contract becomes binding on them without renewal of consent. On the other hand, a contract is sometimes entered into and begins to bind at once; but the parties agree that it shall cease to bind on the happening of a certain event. This is called a condition subsequent, while the former is a condition precedent.

II. IN CIVIL JURISPRUDENCE, a contract has been defined to be "the union of several persons in a co-incentive expression of will by which their legal relations are determined" (Holland, "Elements of Jurisprudence", 10th ed., Oxford and New York, 1906, 209). This "co-incentive expression" consists of an agreement and promise enforceable in law, and "on the face of the matter capable of having legal effects", "an act in the law" "whereby two or more persons capable of contracting", "of doing acts in the law", "declare their consent as to any act or thing to be done or forborne by some or one of those persons for the use of the others or other of them" (Follock, "Principles of Contract", 3rd Am. ed., Philadelphia, 193), the intention implied by the consent being that from the agreement and promise shall arise "duties and rights which can be dealt with by a court of justice" (ibid.). Thus, while every contract is an agreement, not every agreement is a contract. A mutual consent of two parties to exchange or barter, for no other end than to live together, would be an agreement, and yet not what in jurisprudence is known as a contract. For such consent contemplates the producing of no legal right, or of any duty which is a legal obligation. Subject only to these or similar explanations may be properly adopted the time-honoured definition of the contract as understood in English law, a definition commended by Chancellor Kent ("Commentaries on American Law", II, 449, note 2) for its "neatness and precision", namely, "an agreement of two or more persons upon sufficient consideration to do or not to do a particular thing".

KINDS OF CONTRACT.—The Roman civil law defined contracts as real (re), verbal (verbis), literal (letiteris), or consensual (consensus). A real contract was one, such as loan or pledge, which was not perfected until something had passed from one of the parties to the other. A verbal contract (serborum obligation or promise) was perfected by a spoken formula. This formula consisted of a question by one of the parties and an exactly corresponding answer by the other. Thus: Quinque aureos mihi dare spondest? Sponeor, or Promittis? Promitto, i. e. Dost thou agree (or promise)
to give me five pieces of gold. I agree, or I promise. The similarity may be noted of this to the modern form for administering an affidavit or for taking the acknowledgment of a written legal instrument. A literal contract was perfected by a written acknowledgment of debt and was used chiefly in the instance of a loan of money. Consensual contracts were those of which sale would be an example, which might be perfected by consent, and to which no particular form was essential (Mackenzie, "Studies in Roman Law", Edinburgh and London, 1898, 211, 215-256). In the English law the principal division of contracts is into those by writing under seal (called specialties), and those known as simple contracts; and there are also "quasi-contracts" or cases of restitution. A simple contract is one in which neither party has the right of action or judgment by confession, contracts in court, which need no further description. Simple contracts include all contracts written, but not under seal or of record, and all verbal contracts.

A person may contract in person or by an agent. "The tendency of modern times" remarks Holland (op. cit., 118), "is towards the fullest recognition of the principles proclaimed in the canon law, potest quis per alium quod potest facere per se ipsum, qui facit per alium est perinde ac si faciat per se ipsum", i.e., one may do through another whatever one is free to do by himself, or an act done through another is equivalent to an act done by oneself.

**REQUIREMENTS OF CONTRACT.**—According to Roman law, such a contract as that of sale required a *justa causa*, namely, a good legal reason (Lezze, "Roman Private Law", London, 1906, 131; Poste, "Gaii Institutiones", 4th ed., Oxford, 1904, 138). According to English law, simple contracts require a valuable consideration, in like manner as by Roman law there was needed a *justa causa*. By that law, informal contracts which had no *justa causa* were ineffectual (Poste, op. cit., 334). Stipulations irregular in form were invalid, or mere agreements, even though the ancient law (Lezze, op. cit., p. 273, 308) attached no obligation. The translator of Pothier cites a civil-law authority to the effect that the Roman jurisprudence let some engagements rest on the mere integrity of the parties who contracted them, thinking it no more conducive to the cultivation of virtue to leave some things to the good faith and probity of mankind than to subject everything to the compulsory authority of the law (Pothier, "A Treatise on the Law of Obligations", tr. Evans, Philadelphia, 1826, Appendix, 11, 17).

A civil law jurist admitted the moral obligation of good faith and probity, so an eminent English judge concedes that "by the law of nature" every man ought to fulfill his engagements. But it is equally true, he continues, "that the law of this country supplies no means nor affords any remedy to compel the performance of any agreement made without sufficient consideration. "Such a remission", he adds, "nudum pactum ex quo non ortitur actio", a mere agreement, giving rise to no action at law, the learned judge conceding that this understanding of the maxim may (as it certainly does) differ from its sense in the Roman law (J. W. Smith, "The Law of Contracts", 7th Amer. ed., Philadelphia, 1885, 103). A moral consideration has been said to be "nothing in law" (Smith, op. cit., 203). The moral obligation of a contract is of "an imperfect kind", to quote an eminent American jurist, "addressed to the conscience of the parties under the solemn admonitions of accountability, of time, and of the Constitution of the United States", 5th ed., Boston, 1891, Section 1380), but not to an earthly court of justice. With these doctrines of the Roman and of the English law we may compare the Scotch law, according to which no consideration is essential to a legal obligation, "an obligation undertaken gratuitously though gratuitously being binding". "This", adds Mackenzie (op. cit., 233) "is in conformity with the canon law by which every pactio producit action et omne verbum de ore fidelis etrique", i.e., every word of a faithful man is equivalent to a debt.

In the Roman law fulfillment of the legal solemnities of the verbal contract was deemed to indicate such "serious intention of contracting a valid and effectual obligation" (Pothier, op. cit., Appendix II) as to dispense with proof of any just causa (Pothier, op. cit., 334). In the English law it is not any verbal formality, but the solemnity of writing and sealing (Pothier, ibid.) which dispenses with proof of that valuable consideration in modern English law analogous to the old Roman justa causa, and, as a general proposition, essential to the validity of simple contracts as a matter of public policy, in the exceptional instance of negotiable paper always presumed, and in favour of certain holders conclusively (Smith, op. cit., 181). This consideration is described generally as "the matter accepted or agreed upon as the equivalent for which the promise is made" (Lezze, "Principles of the Law of Contracts", 4th ed., London, 1902, 425). And one promise would be a legal consideration for another (Smith's "Leading Cases", 9th Amer. ed., Philadelphia, 1889, 302). But the English law infers what a man chooses to bargain for to be of some value to him, and therefore does not all its discernment to be inquired into (Pollock, op. cit., 193). The consideration must, however, "be of some value in contemplation of law". A promise, for instance, to abstain from doing what the promisor has no right to do, is a promise of no value, and therefore no consideration for a contract (Smith, op. cit., 181). No obligation can by English law result from an agreement "immoral in a legal sense". By this is meant "not only that it is morally wrong, but that according to the common understanding of reasonable men it would be a scandal for a court of justice to treat it as binding on parties, it might appear the result of any positive prohibition or penalty" (Pollock, op. cit., 410). The civil-law authority, Pothier, instances a promise by an officer to pay a soldier for fighting "a soldier of another regiment". If the officer pays, he has no legal claim for recovery of this consideration given and received for a wrongful act, and, on the other hand, the soldier, if he fight before receiving the agreed consideration, acquires no legal claim for it against the officer (Pothier, op. cit., 23). No one is under a legal duty to fulfil a promise to do an act opposed to the policy of the law (Smith, op. cit., 241, 24). But there are instances in which instances of contracts opposed to the policy of the law have yet conflict with no moral law (Smith, op. cit., 213). A contract induced by what in law is deemed to be fraud may be rescinded at the election of the party defrauded. But "general fraudulent conduct", or "general dishonesty of purpose", or mere "intention and design to deceive" is not sufficient unless these evil acts and qualities have been connected with a particular transaction, were the ground on which it took place, and gave rise to the contract (Smith, op. cit., 245, editor's note). In the instance of a sale, the seller was, by the Roman civil law, held to an implied warranty that the thing sold was "free from such defects as made it unfit for the use for which it was intended" (Mackenzie, op. cit., 236). By the English law there is, if the thing be sold for a fair price and be at the time of sale in the possession of the seller, an implied warranty of title, but of quality implied warranty of quality (Cunningham, "The Constitution of The United States", 5th ed., Boston, 1891, Section 1380), but not to an earthly court of justice. With these doctrines of the Roman and of the English law we may compare the Scotch law, according to which no consideration is essential to a legal obligation, "an obligation undertaken gratuitously though gratuitously being binding". "This",
vendee to aid and assist the observation of the vendee" (Kent, op. cit., II, 484).

Respecting what may be termed generally "motives and inducements" (ibid., 487) of a contract, the writer uniformly respects the freedom of commerce; and parties must at their own risk inform themselves of the commodities they deal in" (op. cit., 491). In a note, Cicero is referred to as favoring the view that conscience forbids the concealment, the commentator adding, "It is a little singular, however, that some of the best ethical writers, under the Christian Dispensation should complain of the moral lessons of Cicero, as being too austere in their texture, and too sublime in speculation for actual use" (ibid., note d). As fraud, so coercion, termed in English law duress, or the threat of it, constitutes a valid defence to the obligee of a contract (Smith, op. cit., 230; Pollock, op. cit., 728 sqq.).

STATUTORY RESTRICTIONS.—A certain French ordonnance of 1667 (Pothier, op. cit., 448, Appendix, 168) has been thought to have, perhaps, suggested the English statute of 1689, which reiterates its purpose to be the prevention of many frauds, practices which are commonly endeavoured to be upheld by perjury and subornation of perjury. Accordingly, the statute requires that certain contracts be in writing, and those for sales of "goods, wares or merchandise of over ten pounds price" in writing, or that there be a part-delivery or part-payment. This enactment, known as the Statute of Frauds, has, with numerous variations, been embodied in statutes in the United States (except in Louisiana), carrying, to quote from the American commentator, "its influence through the whole body of our civil jurisprudence" (Kent, op. cit., 494, note a).

By the early Roman law many contracts were enforceable by legal action after any lapse of time however long. But, to quote the Institutes, "Sacra constitutiones . . . actionibus certos fines dedere" (the imperial constitutions assigned fixed limits to actions), so that, after certain prescribed periods, no action would be maintainable. The obligation of contracts ("The Institutes of Justinian," tr. Sandars, London, 1898, BK. IV, tit. xii; BK. II, tit. vi). Such positive restrictions on the legal remedy are not in English law contained in enactments known as Statutes of Limitation (Blackstone, op. cit., BK. III, 307). One ancient English statute fixed for limitation of certain actions the time of the coming of King John from Ireland, another statute the coronation of Henry III (Blackstone, op. cit., BK. III, 188). But modern statutes, as well in England as throughout the United States, limit the remedy to certain periods from the time of entering into contracts, adopting the manner of the Roman constitutions. The legal maxim Leges vigilantibus non dormientibus subvenient (the laws aid the vigilant, not the careless) is applicable to private suitors (Blackstone, op. cit.). But nullum tempus occurrit regi (no time runs against the king), and therefore, unless specially mentioned, the Government is not included within the restrictions of a statute of limitations. According to ancient English legal conceptions these statutes ought not to bind the king, for the reason that he "is always busied for the public good, and therefore has not leisure to move within the times limited to subjects" (ibid., BK. I, 247).

INVOLIABILITY OF CONTRACTS.—To secure inviolability of contracts, the Constitution of the United States (Art. I, Sect. 10) provides that no State shall pass a "law impairing the obligation of contracts". By obligation is meant that legal obligation which exists "wherever the municipal law recognizes an absolute duty to perform a contract". And the word contract being used in this clause of the Constitution without qualification, the protection of the Constitution is not confined to executory contracts, but embraces also executed contracts (Story, op. cit., Sect. 1376-1392), such as a grant which, because it amounts to an extinguishment of the right of the party, implies a contract to reassert the right. And the Constitution also protects even state charters granted to private persons for private purposes, whether these be literary, charitable, religious, or commercial (Kent, op. cit., I, 413-424; Story, op. cit., Sect. 1376-1392). See also DONATION.

CHARLES W. SLOANE.

Contract, The Social.—"Du Contrat Social, ou Principes du droit politique", is the title of a work written by J.-J. Rousseau and published in 1762. From the time of his stay at Venice, about 1741, Rousseau had in mind a large treatise dealing with "Les institutions politiques". The "Contrat Social" is but a fragment of this treatise which, as a whole, has never been published.

The "Contrat Social" is divided into four books. The first treats of the formation of societies and the social contract. Social order is a sacred right which is at the foundation of all other rights. It does not come from nature. The family is the most ancient and the most natural of all societies; but this association of parents and children, necessary as long as these cannot provide for themselves, is maintained afterwards only by convention. Some philosophers have said that among men some are born for slavery, others for domination; but they confound cause and effect; if some are slaves by nature, it is because there have been slaves against nature. Again, social order is not based on force, for the strongest is not strong enough to retain at all times his supremacy unless he transforms force into right, and obedience into duty. But in that case right would change places with force. If it is necessary to obey because of force, there is no need of obeying because of duty; and if one is not forced to obey there is no longer any reason for obedience.

All legitimate authority among men is based on an agreement. This argument, according to Grotius, has its foundation in the right of a people to alienate its freedom. But to alienate is to give or to sell. A man does not give himself; at most he sells himself for a living; but for what should a people sell itself. To give itself gratuitously would be an act of folly and therefore null and void. Moreover, even if a man has the right to give himself, he has no right to give his children who are born men and free. Grotius, again, in order to legitimize slavery, appeals to the right of the conquering people to preserve its own freedom by sparing his life at the price of his freedom. But war is a relation between State and State, and not betweem man and man. It gives the right to kill soldiers so long as they are armed, but, once they have laid down their arms, there remain only men and no one has the right to enslave man. The words slavery and right are contradictory.

The social order originates in an altogether primitive and unanimous agreement. When men in the state of nature have reached that stage where the individual is unable to cope with adverse forces, they are compelled to change their way of living. They cannot create new forces, but they can unite their individual energies and thus overcome the obstacles to life. The fundamental problem is, then, "to find a
form of association which defends and protects with the whole common energy, the person and property of every individual, without respect to his condition as a member of the state, uniting himself to all, still obeys only himself and remains as free as before. The solution is a contract by which each one puts in common his person and all his forces under the supreme direction of the general will. There results a moral and collective body, named by them, as there are persons in the community. In this body the condition is equal for all, since each gives himself wholly; the union is perfect, since each gives himself unre- servedly; and finally, each, giving himself to all, gives himself to nobody. This body is called the "State or the government" by law, which, taken together, form "the people" are the "citizens" as participating in the supreme authority, and "subjects" as sub- jected to the laws. By this contract man passes from the natural to the civil state, from instinct to morality and justice. He loses his natural freedom and his unlimited right to all that he attempts or is able to do, but he gains civil liberty and the ownership of all that he possesses by becoming the acknowledged trustee of a part of the public property.

The second book deals with sovereignty and its rights. Sovereignty, or the general will, is inalienable, for it cannot be transmitted; it is indivisible, since it is essentially general; it is infallible and always right. It is determined and limited in its power by the common interest; it acts through laws. Law is the decision of the general will in regard to some object of common interest. But though the general will is always right and always desires what is good, its judgment is not always enlightened, and consequently does not always see wherein the com- mon good lies; hence the necessity of the legislator. But the legislator has, of himself, no authority; he is only a guide. He drafts and proposes laws, but the people alone (that is, the sovereign or general will) has authority to approve them.

The third book treats of government and its exercise. In the State it is not sufficient to make laws, it is also necessary to enforce them. Although the sovereign or general will has the legislative power, it cannot exercise by itself the executive power. It needs a special agent, intermediary between the sub- jects and the sovereign, which applies the laws under the direction of the general will. This is precisely the part of the Government which is the minister of the sovereign and not sovereign itself. The one or the several magistrates who form the Government are only the officials of the executive power; they are the officers of the sovereign, and their office is not the result of a contract, but a charge laid upon them; they receive from the sovereign the orders which they transmit to the people, and the sovereign can at will limit, modify, or revoke this power.

The chief principles of government are: democracy, a government by the whole, or the greater part of the people; aristocracy, government by a few; monarchy, government by one. Democracy is in practice impossible. It demands conditions too numerous and virtues too difficult for the whole people. "If there were a people of gods, its govern- ment would be democratic, so perfect a government is not for men." Aristocracy may be natural, heredi- tary, or elective. The first is found only among simple and primitive people; the second is the worst of all governments; the third, where the power is given to one person who has charge of all affairs, is the best and the most natural of all govern- ments whenever it is certain that those who wield power will use it for the public welfare and not for their own interest. No government is more vigorous than monarchy; but it presents great dangers; if the end is not the public welfare, the whole energy of the administration is concentrated for the detriment of the State. Kings seek to be absolute, and offices are given to intriguers. Theoretically, a government based on the pure form of government for individuals, it must be combined with, and controlled by, elements borrowed from other forms. Also, it is to be remarked that not every form of government is equally suitable to every country; but the government of each country must be adapted to the character of its people. All things being equal, the best form of government for a country is the one under which the citizens, without any outside means, without naturalization or colonies, increase and multiply. In order to prevent any usurpation on the part of the government, some fixed and periodic meetings of the people must be deter- mined by law, which, taken together, form the people, are suspended, and all authority is in the hands of the people. In these meetings the people will decide two questions: "Whether it pleases the sovereign to preserve the present form of government, and whether it pleases the people to continue the administration in the hands of those who are actually in charge." Intermediary between the sovereign authority and the Government there is sometimes another power, that of the deputies or representatives. The general will, however, cannot be represented any more than it can be alienated; the deputies are not representa- tives of the people, but agents of the government; they cannot decide anything definitively; hence, any law which is not ratified by the people is null. The insti- tution of the Government, therefore, is not based on a contract between the people and the magistrates; it is a law. Those who hold power are the officers, not the masters, of the people; they have not to make a contract, but to obey; by fulfilling their duties they simply discharge their duties as citizens.

In the fourth book, Rousseau speaks of certain social institutions. The general will is indestructible; it expresses itself through elections. As to different forms of elections and institutions, such as tribune, dictatorship, censure, etc., he is the historian of the ancient republics of Rome and Greece, of Sparta especially, can teach us something about their value. Religion is at the very foundation of the State. At all times it has occupied a large place in the life of the people. The Christianity of the Gospel is a holy religion, but by teaching detachment from earthly things it con- flicts with the social spirit. It produces men who fulfil their duties with indifference, and soldiers who know how to die rather than how to win. It is important for the State that each citizen should have a religion that will help him to love his duty; but the dogmas of the religion must be the only ones that the people are in so far as they are related to morality or duties towards others. There must be, therefore, in the State a religion of which the sovereign shall determine the articles, not as dogmas of religion, but as senti- ments of sociability. Whosoever does not accept them may be banished, not as impious, but as unaccoun- table; and whosoever, after having accepted them, will not act according to them shall be punished by death. These articles shall be few and precise; existence of the Divinity, powerful, intelligent, good, and provi- dent; future life, happiness of the just; chastisement of the wicked; sanctity of the social contract and the laws; these are the positive dogmas. There is also one negative dogma: Whosoever shall say, "Outside of the Church there is no salvation", ought to be banished from the State.

The influence of this book was immense. Rousseau composed it at the time for both Hobbes and Locke, and to Montesquieu's "Esprit des lois", published fourteen years before; but, by the extreme prominence given to the ideas of popular sovereignty, of liberty and equality, and especially by his highly coloured style, his short and concise formulæ, he put within the common reach principles and concepts which had hitherto been confined to scientific exposition. The
book gave expression to ideas and feelings which, at a time of political and social unrest, were growing in the popular mind. It would be interesting to determine how Rousseau’s Evangelist of the French Revolution formulates the constitutions; at any rate, he furnished the French Revolution with its philosophy, and his principles direct the actual political life of France. His book, says Mallet du Pan, was “the Koran of the Revolutionists,” and Carlyle rightly calls Rousseau “the Evangelist of the French Revolution.” The orators of the Constituante quoted its sentences and formulas, and if it may be believed that Rousseau would have condemned the massacres and violence of 1793, the Jacobins, nevertheless, looked to his principles for the justification of their acts.

It is quite intelligible that the “Contract social” should be considered by some as the gospel of freedom and democracy, by others as the code of revolution and anarchy. That it contains serious contradictions is undeniable. For instance, Rousseau assigns as the essential basis of the general will the unanimous consent of the people; yet he assumes this very right is determined in the plural conclave of suffrages; he affirms that parents have no right to engage their children in a contract, and yet children from their birth will be subject to the primitive contract; he affirms that a man has no right to alienate himself, yet he bases the social contract essentially on the right of individuals of personal property, absolute freedom, and absolute equality of all—false and unnatural.

He bases society on a convention, ignoring the fact and truth so clearly shown both by psychology and history that man is a being essentially social, and that, as Bonald says, the “law of sociability is as natural to man as the law of gravitation to physical bodies.” He affirms as a first principle that all men are born free. He calls the natural state a state of instinct, and he defines natural freedom as the unlimited right of each to do whatever he can. He opposes this natural state and freedom to the civil state which he calls the state of justice and morality, and civil liberty derived from human law by the generation of a new state. This evidently means that man is born an animal with force as its power and instinct as its guide, and not an intelligent and free being. Rousseau forgets that, if natural freedom is power to act, it is at the same time an activity subjected to a rule and discipline, imposed by the very object and conditions of human life; that if all men are born with a right to freedom, they are also born with a duty to direct this freedom; that, if all are born equally free—in the fundamental sense that all have the same essential right to live a human life and to attain human perfection—still, the exercise of this right is conditioned by individual special laws and conditions; in a word, that the natural state of man is both freedom and discipline in the individual as well as in the social life. Rousseau’s conception of freedom leads him directly to an individualism and a naturalism which have no limits save those of brute force itself.

Again, he declares that all men are born naturally equal. Now this principle is true if it is understood in the sense of a specific equality, the foundation of human dignity. Every man has the right, equal in all, to be treated as a man, to be respected in his personal dignity. The protection of authority by authority in his effort towards perfection. But the principle is fundamentally false, if, as interpreted by Rousseau, it means individual equality. The son is not individually equal to his father, nor the infant to the adult, nor the dull to the intelligent, nor the poor to the rich, in individual needs, rights, or special duties. The natural relations between individual men, their reciprocal duties and rights, their relations in the hierarchy. The basis of social relations is not absolute individual independence and arbitrary will, but freedom exercised with respect for authority. By his interpretation of this principle, Rousseau leads to a false individualism which ends in anarchy.

Rousseau maintained that society does not produce the total alienation of the personality and rights of each associate; hence, for the absolute individualism of nature he substitutes an absolute socialism in the civil state. It is the general will which is the ultimate source and supreme criterion of justice, morality, property, and religion. Then we have, in spite of all the explanations advanced by Rousseau, the suppression of personality, the reign of force and caprice, the tyranny of the multitude, the deepness of the crowd, the destruction of true freedom, morality, and society.

The French Revolution was the realization of these principles. Society has not its foundation in the free alienation of persons and of all their rights to the benefit of society, but in those of the individuals; it is not based on the condition of persons and rights of individuals, but on the condition of the people, on the will of the people, on the action of the assembly. The assembly is the only authority of all, justified by this very end. Society is not formed from elements all individually equal, but is organized from graduated elements. These degrees of authority, however, in the social organization are not by nature the exclusive possession of anybody, but accessible to the capacities and the efforts of all. Society is not a collection of authority over subjects; and this authority, while it may be determined in its subject and manner of exercise by the people, has not its foundation in their will, but in human nature itself as God created it.

G. M. SAVAGE.

Contrition (Lat. contritio—a breaking of some-thing hardened).—In Holy Writ nothing is more common than exhortations to repentance: “I desire not the death of the wicked, but that the wicked turn from his way and live” (Ezech., xxxiii, 11); “Except you do penance you shall all likewise perish” (Luke, xiii, 5: cf. Matt., xii, 41). At times this repentance is expressed in terms of a mode of life, so that it always implies a recognition of wrong done to God, a detection of the evil wrought, and a desire to turn from evil and do good. This is clearly expressed in Ps. 1 (5-14): “For I know my iniquity. . . . To thee only have I sinned, and have done evil before thee. . . . Turn away thy face from my sins, and blot out all iniquities. Create me clean in me, etc. More clearly does this appear in the parable of the Pharisee and the publican (Luke, xviii, 13), and more clearly still in the story of the prodigal (Luke, xvi, 11-32): “Father, I have sinned against heaven and before thee: I am not worthy to be called thy son.”

Nature of Contrition.—This important subject has been called by theologians “contrition.” It is defined explicitly by the Council of Trent (Sess. XIV, ch. iv de Contritione): “a sorrow of soul and a hatred of sin committed, with a firm purpose of not sinning in
the future". The word contrition itself in a moral sense is not of frequent occurrence in Scripture (cf. Ps. i, 19). Etymologically it implies a breaking of something that has become hardened. St. Thomas Aquinas holds that contrition is a Master of the more ten- tation that explains its peculiar use: "Since it is requisite for the remission of sin that a man cast away entirely the liking for sin which implies a sort of con- tinuity and solidity in his mind, the act which obtains forgiveness is termed by a figure of speech 'contri- tion'". (In Lib. Sent. IV, dist. xvii; cf. Supplem. Thom. Q. 7, art. 1.) The Fathers are nearly all in accord that contrition is a speculative sorrow for wrong done, remorse of conscience, or a resolve to amend; it is a real pain and bitterness of soul together with a hatred and horror for sin committed; and this hatred for sin leads to the re- solve to sin no more. The early Christian writers in speaking of the nature of contrition sometimes insist on the feeling of sorrow, sometimes on the detestation of the wrong committed (Augustine in P. L., XXXVII, 1901, 1902; Chrysostom, P. G., XLVII, 409, 410). Augustine includes both when writing: "Compunctus corde non solut dici nisi stimulis peccatorum in dolore ponatur" (Enarr. in Ps. Vol. VI, of Augustine, col. 1440). Nearly all the medieval theologians hold that contri- tion is based principally on the detestation of sin. This detestation presupposes a knowledge of the hein- ousness of sin, and this knowledge begets sorrow and pain of soul. As sin is committed by the consent, so it is judged by the detestation of the rational man. Hence contrition is essentially sorrow. But it should be noted that sorrow has a twofold significations—dissent of the will and the consequent feeling; the former is of the essence of contrition, the latter is its effect" (Bonaventure, In Lib. Sent. IV, dist. xvi, Pt. I, art. 1). (See also St. Thomas Aquinas, Comment. in Lib. Sent. IV; Billuart (De Sac. Penit., Diss. iv, art. 1) seems to hold the opposite opinion.)

Necessity of Contrition.—Until the time of the Reformation no theologian ever thought of denying the necessity of contrition for the forgiveness of sin. But with the coming of Luther and his doctrine of justification by faith alone the absolute necessity of contri- tion was excluded as by a natural consequence. Leo X in the famous Bull "Exsurge" [Denzinger, no. 751 (635)] condemned the following Lutheran position: "By no means believe that you are forgiven on ac- count of your contrition, but because of Christ's work." Luther, however, states in his "Luther's explanation account I say, that if you receive the priest's absol- ution, believe firmly that you are absolved, and truly absoled you will be, let the contrition be as it may." Luther could not deny that in every true conversion there was grief of soul, but he asserted that this was the result of the grace of God poured into the soul at the time of justification, etc. (For this discussion see Vacant, Dict. de théol. cath., s. v. Contrition.) Catholic writers have always taught the necessity of contri- tion for the forgiveness of sin, and they have insisted that such necessity arises (a) from the very nature of repentance (P. L. Vol. VI of Augustine, col. 1440) and (b) from the nature of God. (a) They point out that the sentence of Christ in Luke, xiii, 5, is final: "Except you do penance", etc., and from the Fathers they cite passages such as the following from Cyprian, "De Lapsis", no. 32: "Do penance in full, give proof of the sorrow that comes from a grieving and lamenting soul... they who do away with repentance for sin, close the door to satisfaction." The Scholastic doctors laid down the principle, "No one can begin a new life who does not repent him of the old" (Bonaventure, In Lib. Sent. IV, dist. xvi, Pt. II, art. I, Q. ii, also ex professo, ibid., Pt. I, art. I, Q. iii), because why then point out the absolute incongruity of turning from God and clinging to sin, which is hostile to God's law. The Council of Trent, mindful of the tradition of the ages, defined (Sess. XIV, ch. iv de Contrit.ion) that "contrition has always been necessary for obtaining forgiveness of sin". (b) The positive command of God is also clear in the premises. The Baptist sound- ed the note of preparation for the coming of the Mes- siah: "Make straight the way of the Lord" and, as a conse- quence, "they went out to him and were baptised confessing their sins". The first preaching of Jesus is described in the words: "Do penance, for the kingdom of heaven is at hand"; and the Apostles, in their first sermons to the people, warn them to "do penance and be baptized for the remission of their sins" (Acts, i, 30-38; Mark, i, 17). (Clement in P. G., I, 341; Hermas in P. G., II, 894; Tertullian in P. L., II, 38.)

Perfect and Imperfect Contrition.—Catholic teaching distinguishes a twofold hatred of sin: one, perfect contrition, springs from the love of God Who has been grievously offended; the other, imperfect contrition, arises principally from some other mo- tives, such as loss of heaven, fear of hell, the heinous- ness of sin, etc. (Council of Trent, Sess. XIV, ch. iv de Contrit.ion). For the doctrine of imperfect contri- tion we find:

Qualities.—(a) Accord with Catholic tradition con- trition, whether it be perfect or imperfect, must be at once (a) interior, (b) supernatural, (c) universal, and (d) sovereign.

(a) Interior.—Contrition must be real and sincere sorrow of heart, and not merely an external manifes- tation of a desire to escape the penalties of sin. Theologians laid particular stress on the necessity of hearty repentance. The Psalmist says that God despises not the "contrite heart" (Ps. i, 19), and the call to Israel was, "Be converted to me with all your heart... and rend your hearts, and not your garments" (Joel, ii, 12 sq.). Holy Job did penance in sackcloth and ashes because he reprehended himself in sorrow of soul (Job, xlii, 6). The contrition adjudged neces- sary by Christ and his Apostles was no mere formality, but the sincere expression of the sorrowing soul (Luke, xv, 11-32; Luke, xviii, 13); and the grief of the woman in the house of the Pharisee merited for- giveness because "she loved much." The exhorta- tions to penance found everywhere in the Fathers have no uncertain sound (Cyprian, De Lapsis, P. L., IV; Chrysostom, De compl. penit., P. G., XLVII, 393 sqq.), and the Scholastic doctors from Peter Lombard on insist on the same sincerity in repentance (Peter Lombard, Isb. Sent. IV, dist. xvi, no. 1).

(b) Supernatural.—In accordance with Catholic teaching contrition ought to be prompted by God's grace and aroused by motives which spring from faith, as opposed to merely natural motives, such as loss of honour, fortune, and the like (Chamnitz, Examen Cons., I, 11, Pt. II, De Penit.). In the Old Testament God is God who gives a "new heart" and who puts a "new spirit" into the children of Israel (Ezech., xxxvi, 25-29); and for a clean heart the Psalmist prays in the Misereor (Ps. I, 11 sqq.). St. Peter told those to whom he preached in the first days after Pentecost that God had raised up Christ "to give re- pentance to Israel" (Acts, v, 30 sq.). St. Paul in ad- vising Timothy insists on dealing gently and kindly with those who resist the truth, "if peradventure God may give them repentance" (II Tim., ii, 24-25). In the days of the Pelagian heresy Augustine insists on the supernaturalness of contrition, when he writes: "That we turn away from God is our doing, and this is the bad will; but to turn back to God we are unable unless He arouse and help us, and this is the good will." Some of the Scholastic doctors, notably Scot- tus, Cajetan, and after them Suarez (De Penit., Dist. iv, chap. vi) ask whether the曹操 naturality in the case of contrition, but no theologian ever taught that repentance which makes for forgiveness of sin in the present economy of God could be inspired by merely natural motives.

On the
contrary, all the doctors have insisted on the absolute necessity of grace for contrition that disposes to forgiveness (Bonaventure, In Lib. Sent. IV, dist. xiv, Pt. I, art. II, Q. iii; also dist. xvii, Pt. I, art. I, Q. iii; cf. St. Thomas, In Lib. Sent. IV). In keeping with this teaching of the Scriptures and the doctors, the Council of Trent defined: "If anyone say that without fear of God and without humility a man can repent in the way that is necessary for obtaining the grace of justification, let him be anathema."

(c) Universal.—The Council of Trent defined that real contrition includes "a firm purpose of not sinning in the future," consequently he who repents must resolve to avoid all sin. This doctrine is intimately bound up with the Catholic teaching concerning grace and repentance. There is no forgiveness without sorrow of soul, and forgiveness is always accompanied by God's grace; grace cannot coexist with sin; and, as a consequence, one sin cannot be forgiven while another remains for which there is no repentance. This is the clear teaching of the Bible. The Prophet urged men to turn to God with their whole heart (Joel, ii, 12 sq.), and Christ tells the doctor of the law that we must love God with our whole mind, our whole strength (Luke, x, 27). Each one is ordered that a man "not go on his evil ways" if he wish to live. The Scholastics inquired rather subtly into this question when they asked whether or not there must be a special act of contrition for every serious sin, and whether, in order to be forgiven, one must remember at the moment all his grievous transgressions. To both questions they answered in the negative, judging that an act of sorrow which implicitly included all his sins would be sufficient.

(d) Sovereign.—The Council of Trent insists that true contrition includes the firm will never to sin again, so that no matter what evil may come, such evil must be preferred to sin. This is Christ's: "What shall it profit a man if he gain the whole world and suffer the loss of his soul?" Theologians have discussed at great length whether or not contrition which must be sovereign appetitum, i.e. in regarding sin as the greatest possible evil, must also be sovereign in degree and in intensity. The decision has generally been that sorrow need not be sovereign "intensively," for intensity makes no change in the substance of an act (Ballerini, Opus Morale: De Contritione; Bonaventure, In Lib. Sent. IV, dist. xxi, Pt. I, art. II, Q. i).

CONTRITION WITHOUT THE SACRAMENT OF PENANCE.—Contrition is not only a moral virtue, but the Council of Trent defined that it is a "part," nay more, quasi materias, in the Sacrament of Penance. "The (quasi) matter of this sacrament consists of the acts of the penitent himself, namely, contrition, confession, and satisfaction. These, inasmuch as they are by God's institution required in the penitent for the integrity of the sacrament and for the full and perfect remission of sin, are for this reason called parts of penance." In consequence of this decree of Trent theologians teach that sorrow for sin must be in some sense sacramental. La Croix went so far as to say that sorrow must be aroused with a view of going to confession, but this seems being asked too much; most theologians think with Schieler-Heuser (Theory and Practice of Confession, p. 113) that it is sufficient if the sorrow coexist in any way with the confession and is referred to it. Hence the precept of the Roman Ritual, "After the confession has heard the most earnest exhortation to move the penitent to contrition" (Schieler-Heuser, op. cit., p. 111 sqq.).

PERFECT CONTRITION WITHOUT THE SACRAMENT.—Regarding that contrition which has for its motive the love of God, the Council of Trent declares: "The Council further teaches that, though contrition may sometimes be made perfect by charity and may reconcile men to God before the actual reception of this sacrament, still the reconciliation is not to be ascribed to the contrition apart from the desire for the sacrament which it includes." The following proposition (no. 32) taken from Baulis was condemned by Gregory XIII: "That charity which is the fullness of the law is not always conjoined with the Holy Obedience, and without it perfect contrition, with the desire of receiving the Sacrament of Penance, restores the sinner to grace at once. This is certainly the unanimous teaching of the Scholastic doctors (Peter Lombard in P. L., CXCI, 886; St. Thomas, In Lib. Sent. IV, ibid.; St. Bonaventure, In Lib. Sent. IV, ibid.); therefore they derived from Holy Writ. Scripture certainly ascribes to charity and the love of God the power to take away sin: "He that loveth me shall be loved by My Father"; "Many sins are forgiven her because she hath loved much". Since the act of perfect contrition implies necessarily this same love of God, theologians have ascribed to perfect contrition what Scripture teaches belongs to charity. Nor is this strange, for in the Old Covenant there was some way of recovering God's grace once man had sinned. God wills not the death of the wicked, but that the wicked turn from his way and live (Ezech., xxxiii, 11). This total turning to God correponds in the love of contrition; and if under the Old Law love sufficed for the pardon of the sinner, surely the coming of Christ and the institution of the Sacrament of Penance cannot be supposed to have increased the difficulty of obtaining forgiveness. That the earlier Fathers taught the efficacy of sorrow for the remission of sins is very clear (Clement in P. G., I, 341 sqq.; Hermas in P. G., II, 894 sqq.; Chrysostom in P. G., XLIX, 285 sqq.), and this is particularly noticeable in all the commentaries on Luke, vii, 47. The Venerable Bede writes (P. L., XCVI, 425): "What is love but fire; what is sin but fire itself? Hence it is inward fire." Thus the contention on Scripture, that the love of God is the love of the good alone; others, basing their contention on Scripture, think that the love of charity (amor benedictitae, amor amicitiae) suffices; when there is question of interested, or selfish, love (amor concupiscitentia) theologians hold that purely selfish love is not sufficient. When one furthermore asks what must be the formal motive in perfect love, there seems to be no unanimity among the theologians. Some hold that where there is perfect love God is loved for His good alone; others, basing their contention on Scripture, think that the love of God is the love of the good alone; others, basing their contention on Scripture, think that the love of charity (amor gratiudinis) is quite sufficient, because God's goodness and love towards men are intimately united, nay, inseparable from His Divine perfection (De Rector, Theologia, Thesis et al., Scholion iii, no. 3; Schieler-Heuser, op. cit., pp. 77 sqq.).

OBLIGATION OF ELICITING THE ACT OF CONTRITION.—In the very nature of things the sinner must repent before he can be reconciled with God (Sess. XIV, ii. 1). But this is a difficult matter. Therefore he who has fallen into grievous sin must either make an act of perfect contrition or supplement the imperfect contrition by receiving the Sacrament of Penance: otherwise reconciliation with God is impossible. This obligation urges under pain of sin when there is danger of death. In danger of death, therefore, if the sinner not only receives the sacrament of Penance, but actively enters the sacrament, the sinner must make an effort to elicit an act of perfect contrition. The obligation of perfect contrition is also urgent whenever one has to exercise some act for which a state of grace is necessary and the Sacrament of Penance is not accessible. Theologians have questioned how long a man may remain in the state of sin, without making an effort to
elicit an act of perfect contumacy. They seem agreed that such neglect must have extended over considerable time, but what constitutes a considerable time they find it hard to determine (Schieler-Heuser, op. cit., pp. 83 sqq.). Probably the rule of St. Alphonsus Liguori will aid the solution: "The duty of making an act of contumacy is urgent when one is obliged to do so by a principle of love" (Santilli, de necess. contritionis, no. 731; Ballerini, Opus Morale: de contritione).

EDWARD J. HANNA.

Contumacy (in Canon Law), or contempt of court, is an obstinate disobedience of the lawful orders of a court. Simple disobedience does not constitute contumacy. Such crime springs only from unequivocal and stubborn resistance to the reiterated or persistent orders of a legitimate court, and involves contempt or denial of its authority. The general law of the Church demands that the citation, or order to appear, be repeated three times (in the United States twice) before proceedings declaratory of contumacy take place. A peremptory citation, stating that the one who wishes to satisfy the law, contumacy may arise not only from contempt of the court proper, but also from contempt of any order of a lawful court. Contumacy is commonly divided into true and presumptive. True contumacy takes place when it is certain that the citation was served, and the defendant, without just cause, fails to obey the terms of the citation. Presumptive contumacy occurs when there is a strong presumption, though it is not certain, that the citation was served. The law holds this presumption equivalent to a moral certainty of service of citation. The defendant becomes guilty of contumacy if, when lawfully cited, he fails to appear before the judge, or if he declines himself, or in any way prevents the service of the citation. The plaintiff inures the guilt of contumacy by failure to appear before the court at the specified time. And the defendant or plaintiff may be proceeded against on the charge of contempt, if either rashly withdraws from the trial, or disobeys the literal precept of the judge, or refuses to answer the charges of the other party. A witness becomes guilty of contumacy by disobeying the summons or by refusal to testify in the cause at issue.

All causes excepting appearance in court exempt from contempt of court. The following, among others, produce such effects: (1) ill-health; (2) absence on public affairs; (3) summons to a higher court; (4) indelent weather; (5) unsafe of place to which cited. These and like causes, if known to the judge, render null and void any sentence pronounced by him in such circumstances. But if they be unknown to the judge at the time of sentence, the condemned, on motion, must be reinstated in the position held by him prior to the sentence. Contumacy should never be held equivalent to a juridical confession of guilt. It cannot therefore dispense with the trial, but only makes it lawful to proceed in the absence of the party guilty of contumacy as though he were present (B Kiermier, Council of Baltimore, 313). Contempt of court, being an act of resistance to legitimate authority, is a crime, and therefore punishable. The chief penalties are: (1) The trial proceeds in the absence of the contumacious person, and presumably to his detriment; (2) presumption of guilt, but not submission to the court; (3) a punishment at the discretion of the judge; (4) suspension; (5) excommunication may be inflicted, and if the contumacious party be not absolved within one year he may be proceeded against as suspected of heresy (Council of Trent, Sess. XXV, ch. iii de Ref.); (6) loss of the right of appeal from a definitive sentence, in all cases of true contumacy. Presumptive contumacy does not carry this penalty. Before inflicting penalties the guilt of contempt must be established. The accused must be cited to answer the charge of contumacy, which must be prosecuted according to the procedure established and laid down in the law.

JAMES H. DRISCOLL.

Contzen, ADAM, economist and exegete, b. in 1573 (according to Sommervogel in 1575), at Montjoie in the Duchy of Julich, which is now part of the Rhine Province of Prussia; d. 19 June, 1635, at Munich. He entered the Society of Jesus at Trier in 1595, was professor of philosophy in the University of Wurzburg in 1606, and was transferred to the University of Munich, where he occupied the Chair of Scripture for more than ten years. He had a share in the organization of the University of Molsheim, in Alsace, of which he was chancellor in 1622-23. Contzen was a learned and versatile writer in theological controversy, in political economy, and in the interpretation of the Scriptures. He defended the controversial works of Cardinal Bellarmine against the attacks of Professor Pares of Hodelberg, and when the latter sought to unite the Calvinists and the Lutherans against the Catholics, Contzen demonstrated the impractical nature of the project in his work, "De unione et synodo Evangelicorum," and showed the only way of restoring unity occurred was "De pace Germaniae libri duo, prior de falsis, alter de veris" (Mainz, 1616). This work was twice reprinted at Cologne, in 1642 and in 1685. His ideas on the restoration of peace were further developed in the works occasioned by the centenary of the Reformation, one of which, "Jubilium jubilorum," was published 1618 in Latin and in German. His most interesting work, which marks him as a thinker in advance of his age, "Politicae lib. X," was published at Mainz in 1621 and 1629. The book has been called an "Anti-Machiaveli" because the author describes the rule of Christian judges, of which he is a model, in accordance with the principles of Revelation. In the questions of political and national economy which he discusses he advocates a reform of taxation, the freeing of the soil from excessive burdens, state ownership of certain industries for the purpose of revenue, indirect taxation of objects of luxury, a combination of the protective system with free-trade, and state aid for popular associations. The Elector Maximilian of Bavaria was so impressed by the ability shown in this work that he chose Contzen for his confessor. During his residence in Munich, which began in 1623, he completed and published his commentary on the Four Gospels, and on the Epistles of St. Paul to the Romans, the Corinthians, and the Galatians. He also wrote a political novel, "Methodus doctrinae civilis, seu Abissini Regis Historia," in which he showed the practical working of his political theories.

Convent (Lat. conventus) originally signified an assembly of Roman citizens in the provinces for purposes of administration and justice. In the history of monasticism the term has two distinct technical meanings: (1) A religious community of either sex
when spoken of in its corporate capacity. The word was first used in this sense when the ceremonials of life began to be combined with the cenobitical. The hermits of an Eastern laura, living in separate cells grouped in a community of others who were spoken of collectively, were called a conventus. In Western monasticism the term came into general use from the very beginning, and the technical phrase abbas et conventus signifies to this day the entire community of a monastic establishment. (2) The buildings in which resided the community of either of these kinds; in this sense the word denotes more properly the home of a strictly monastic order, and is not correctly used to designate the home of what is called a "congregation". In addition to these technical meanings, the word has also a popular signification at the present day, by which it is made to mean in particular the alocel of female religious, just as "monastery" denotes that of men, though in reality the two words are interchangeable. In the present article the word is taken chiefly in its popular sense. The treatment, moreover, is limited to those features which are common to all, or nearly all, communities of religious persons, due to the special purpose, rule, or occupation of each religious order are explained in the pertinent article.

Convent Life.—The life lived by the inmates of a convent naturally varies in its details, according to the particular object for which it has been founded, or the circumstances in which it is affected. Convents are often roughly divided into two classes, strictly enclosed and unenclosed, but with regard to the convents existing at the present day this division, though correct as far as it goes, is not a very satisfactory one, because both classes are capable of subdivision, and, on account of the varied kinds of work undertaken by the nuns, these subdivisions overlap one another. Thus, of the strictly enclosed communities, some are purely contemplative, others mainly active (i.e. engaged in educational or rescue work), while others again combine the two. Similarly, of the unenclosed orders, some are purely active (i.e. undertaking educational, parochial, hospital, or other work), and others unite the contemplative with the active life, without, however, being strictly enclosed. As a general deduction, it may be stated that the contemplative life, in which women are represented by a divided number of souls and the souls of others by their lives of prayer, seclusion, and mortification, was the idea of the older orders, while the distinctive note of the more modern congregations is that of active work amongst others and the relief of their bodily wants.

Legislation as to Convents.—Canon law contains a large and important section relating to the establishment and government of convents. The privileges of such as are exempt from episcopal jurisdiction, the appointment of confessors for the nuns, and the duties of the same, the regulations of the Church concerning enclosure, and the administration and testing of candidates, the nature and obligations of the vows, the limits of the powers of superiors, and the conditions regarding the erection of new convents are among the many points of detail legislated for. One or two points may be alluded to here. The law of the Church requires that no new convent be established, whether it be save the entire convent or but a part of it, without the consent of the bishop of the diocese; for what is technically called "canonically erected" further formalities, including approbation from Rome, have to be complied with. All confessors for nuns must be specially approved by the bishop, even those of orders exempt from his ordinary jurisdiction, and the bishop has also to provide that all nuns can have access two or three times in the year to an "extraordinary" confessor, other than their usual one. The bishop also is obliged periodically to visit and inspect all the convents in his diocese, excepting those that are exempt, at the time of which visitation every nun must be free to see him privately in order to make any complaints or suggestions that she may wish. With regard to the admission of postulants the law provides for every precaution being taken, on the one hand, to prevent coercion and, on the other, to safeguard the community from being obliged to receive those about whose vocation there may be any doubt. Physical fitness on the part of the candidate is in most orders an indispensable condition, though there are some which admit women of delicate health; but, once admitted and professed, the contract becomes reciprocal, and while the nun undertakes to keep her vows, the community is bound to provide her with lodging, food, and clothing, and to maintain her in sickness or in health (see Novitiate; Vow).

Down.—With regard to the dowry required of a nun, the customs and rules of the different orders vary
much according to circumstances. Some convents, on account of their poverty, are obliged to insist upon it, and, generally speaking, must be content to make a modest contribution to the general fund. A convent that is rich will often dispense with the dowry in the case of a highly promising candidate, but it must always depend upon particular circumstances. The minimum amount of the dowry required is generally fixed by the rule or constitutions of the convent or order.

Office.—In most of the older contemplative orders the choir nuns are bound to recite the whole Divine Office in choir. In only a very few of the English convents, e.g., Cistercians, Dominicans, and Poor Clares, do the nuns rise in the night for Matins and Lauds; others recite these offices immediately after they rose in the evening "by anticipation". In some there are other additional offices recited daily; thus the Cistercians and Poor Clares say the Office of Our Lady and that of the Dead every day, and the Brigittines say the latter thrice in the week, as well as an Office of the Holy Ghost. Almost all the active orders, both enclosed and unenclosed, use the Office of Our Lady, but some, like the Sisters of Charity, are not bound to the recitation of any Office at all.

Lay Sisters.—In most orders the nuns are divided into choir sisters and lay sisters. The latter are usually employed in the households of the nuns in various manual work. They take the usual vows and are as truly religious as the choir nuns, but they are not bound to the choir Office, though they often attend the choir at the time of Office and recite certain prayers in the vernacular. There is always a distinction between their habit and that of the choir nuns, sometimes very slight and sometimes strongly marked. In some orders where the choir sisters are enclosed the lay sisters are not; but in others they are as strictly enclosed as the choir nuns. Several orders have, by their rule, no lay sisters, among them being the Sisters of Bon Secours, the Little Sisters of Our Lady, and the Poor Servants of the Mother of God.

Conventual Buildings.—The internal arrangement of a properly constituted convent is, for the most part, similar to that of a monastery for men (see Monastery and Monasticism). Sisters of Bon Secours, Little Sisters of Our Lady, and the Poor Servants of the Mother of God.

Conventual Act. See Penal Laws.

Convent Schools (Great Britain).—Convent education is treated here not historically but as it is at the present day, and, by way of introduction, it may be briefly stated that the idea of including the education of the young amongst the occupations of a religious community is practically as old as that of the religious life for women itself. From the earliest times, communities in England for children to be educated in convents, and we learn that the number of schools went forth from Wimborne in the eighth century to help St. Boniface in his work of evangelising Saxony, established convent schools wherever they went, in which a very high standard of scholarship was attained. Stray remarks in Chaucer and other medieval writers likewise reveal the fact that the English convent schools of the Middle Ages compared favourably with schools for the other sex. But all this came to an end at the Reformation for England was concerned; and, for one notable exception, English convent education had practically to start afresh in the nineteenth century. The exception referred to was the Bar Convent at York, belonging to the Institute of the Blessed Virgin Mary, whose foundress, Sister Mary Ward, was the parent of religious congregations devoted to the education of English girls. The Bar Convent was established in 1686, and in spite of penal laws, Protestant persecution, no-popery riots, and even, on more than one occasion, the imprisonment of the nuns for their faith, the work of the convent has continued from that day to this, and with its hundred schools and ten thousand pupils, in speaking of the world, the Institute of the B. V. M. has long held a foremost place amongst the teaching orders of the Church.

The opening of numerous convents in England during the latter half of the nineteenth century has produced correspondingly numerous convent schools, in many of which, be it noted, Protestant as well as Catholic girls (especially in day and elementary schools) have been and are still being educated. The foundation of training colleges for Catholic teachers, the demand for teachers with academic qualifications, and the increasing Government interest in the consequent official recognition of convent schools, and the more recent advance in the way of higher education for Catholic women, have all combined to raise the standard of convent education; and the leading teaching orders have proved equal to the demand made upon their capabilities and energy. The convents stand foremost in the work they have done for religion and education, and they have turned out hundreds of girls, not only educated in the highest sense of the word but also truly religious.

Although in its widest sense the term 'Convent School' may be taken to include all those, of whatsoever kind, in which the work of education is undertaken by female religious—such as primary or elementary schools (whether mixed or for girls only), reformatory and industrial schools—it is only proposed in this article to deal with secondary schools, i.e., those for the education of girls for secondary classes, training colleges for Catholic schoolmistresses, and colleges for the higher education of women, these being more closely connected with convent life itself.

Secondary Education.—Almost all convent secondary schools are under Government inspection. This gives them the status which entitles them to have the Board of Education, regulates their course of studies, and ensures unity of method and efficiency. Some are also in receipt of a State aid-grant, which places certain restrictions upon their methods of management. Where no grant is accepted the nuns are more independent as regards the admission and refusal of pupils. The aim of all religious orders engaged in secondary education for girls is, whilst making every effort to keep abreast of modern requirements with regard to scholastic efficiency, to give also the additional advantage of a thorough religious training, so that parents may have no reason to fear that by securing the latter for their children they are sacrificing the greater temporal advantages that might be obtained at a Protestant school. The system of Government inspection and recognition by the Board of Education, with or without the State aid-grant, secures the necessary degree of efficiency, whilst the nuns, associated with the various communities by which the schools are conducted, sufficiently guarantees the religious side of their educational work. Government inspectors and public examiners have frequently testified to the excellent moral tone and atmosphere of convent schools and to the cordial relations existing between
teachers and pupils, no less than to the high teaching ability of the nuns themselves. The fact that education in its truest sense means something more than mere book-learning is nowhere more fully realized than in the convent school, and results all tend to prove that the religious and moral training imparted in such institutions has in some measure taught the advantage to the more technical side of educational work. It has sometimes been said that the standard of scholarship attained is not so high in Catholic as in non-Catholic schools of the same class, but however true this may have been in the past, the general levelling up that has taken place during the last ten or twenty years has rendered it as high as it is now. The public examination lists of recent years afford ample proof that the leading convent schools are equal in efficiency to all others.

The range of studies pursued in convent secondary schools is a wide one. It includes religious knowledge, English in all its branches, French, Latin, mathematics, science, drawing, needlework, class-singing, and drilling, while such subjects as music, singing, dancing, Greek, German, Italian, elocution, shorthand, book-keeping, dressmaking, cooking, etc., are generally taught as optional extras. Pupils are entered for the Public and Cambridge Examinations, the Higher Locals, the Higher and Lower Certificates of the Oxford and Cambridge Joint Examination Board, the Matriculation Examinations of the London and Liverpool Universities, as well as for those of the College of Preceptors, the Incorporated Society of Musicians, the Royal Academy of Music, and the South Kensington School of Art. School buildings and accommodations are of the most up-to-date pattern—one of the necessary conditions for Government recognition. Physical development is provided for by means of hockey, croquet, tennis, cycling, and gymnastics, according to the particular circumstances of each school.

All the leading educational communities make a special point of having their teachers properly trained and fully qualified. This again is a sine qua non for official recognition, and the Order in Council of 1902, concerning the registration of secondary teachers, gave fresh impetus to the work of training teachers for convent schools. The principal teaching orders send their subjects usually to one or other of the two Catholic training colleges for secondary teachers (St. Mary's Hall, Liverpool, and Cavendish Square, London), or else have them qualify by obtaining one or more of the following: the Higher Certificate of the Oxford and Cambridge Teachers' Training Syndicate, the Oxford diploma for teachers, Women's Honours in Modern Languages (Oxford), the Women's diploma for the Oxford B. A. degree, the LL.A. diploma of St. Andrew's University, the Licentiateship of the College of Preceptors, the Higher Certificate of the Oxford and Cambridge Joint Board, the Higher Local Certificate of Oxford or Cambridge, or a degree at one of the universities that grant degrees to women, e.g. London, Liverpool, or Dublin. Foreign languages are in most cases taught by natives, and in the teaching of many of them the religious are assisted by extern professors holding the highest qualifications. From these few facts it will be evident that the convent schools of England are adequately keeping pace with the times and that in point of efficiency they are in no way behind non-Catholic schools of the same class. It is only fair for obtaining this, and for the efforts that have been made to bring into existence for the advanced education of Catholic women, religious as well as secular, at the Universities of Oxford and Cambridge point to a still higher degree of efficiency for the future.

There are at the present over two hundred Catholic secondary schools in England and about sixty different religious orders. Chief among these may be mentioned the English Institute of the B. V. M., with six such schools, the Sisters of the Holy Child Jesus (eight schools), the Faithful Companions of Jesus (fourteen), the Sisters of Notre Dame of Namur (eighteen), the Religious of St. Andrew (one), the Religious of the Sacred Heart (eight), the Sisters of Mercy (eleven), the Servites (five), and of different congregations (twenty-three). Some of the best known, and most successful of these schools are those at York and Cambridge (Inst. of B. V. M.); Mayfield, St. Leonard's, Preston, Harrogate, and Cavendish Square. London (Sisters of the Holy Child Jesus); Isleworth, Liverpool, Birkenhead, and Clarendon Square, London (Faithful Companions); Westminster, Northampton, and Norwich (Notre Dame); Streatham (St. Andrew's); Stamford Hill (Servites); and St. Ursula's, Oxford. Many of these secondary schools have attached to them pupil teachers' centres, where valuable preliminary work in the training of elementary schoolmistresses is done, and many of them serve also as "practising schools" in which the students of Catholic and other training colleges give their model lessons in the presence of their instructors and the Government inspectors. The pass and honours lists of the various public examinations in recent years give percentages of candidates from the convent schools and prove conclusively that as far as results go they are fully equal to the best secondary schools under non-Catholic management.

TRAINING COLLEGES.—The training colleges are of two kinds—those for the training of primary or elementary schoolmistresses, and those for teachers in secondary schools. Both kinds are under the care of the religious orders. All the Catholic training colleges are recognized by Government, and in those for primary teachers the students whose expenses are assisted by a Government grant are known as "King's Students," their names being placed upon a list of successful candidates on a competitive examination under Government auspices. There are six recognized training colleges for primary teachers, Mount Pleasant, Liverpool (under the Sisters of Notre Dame); St. Charles' Square, London, and Newcastle-on-Tyne (Religious of the Sacred Heart); Southampton (Nuns of La Sainte Union); Salford (Faithful Companions); and Hull (Sisters of Mercy). In all these the Government syllabus is followed and the Board of Education certificate is granted after two years' successful teaching in one school, subsequent to the completion of the course at the college. An important part of the work is the "Instruction in English," which are given by the students in some secondary school connected with the training college under the direction of the "Mistress of Method," and which are criticized then and there by her as well as by the other students in turn. The best known and largest of these training colleges, which was also the first to be established, is that of Mount Pleasant, Liverpool, under the Sisters of Notre Dame of Namur. It was opened in 1856 with twenty-one students and now numbers one hundred and sixty King's Scholars. It has been (1905) officially affiliated to the Liverpool University and a limited number of its students are allowed to follow the arts or science degree course of the university after the usual two years' Government course has been completed. The whole of the preliminary and certain subjects of the intermediate course can be done at Mount Pleasant under the sisters, which reduces the time of residence to one year. The degree of Bachelor of Arts or Master of Arts has been awarded to this college and, as is quite an innovation, it speaks well for the college that five out of the first six sent in obtained the B. A. degree in the minimum period of time.

The training colleges for secondary teachers are St. Mary's Hall, Liverpool, attached to Notre Dame, Mount Pleasant, and Cavendish Square, London, under the Sisters of the Holy Child Jesus, opened in 1885. Both of these are recog-
used by the Board of Education as well as by the Teachers Syndicate of the Cambridge University; and the teachers' diploma of that university, necessary for "registration" to teach successful students at the end of the course. Many of the other teaching orders send their subjects to these colleges, where while following the usual course with other students, special arrangements are made for them to carry out the duties of their religious life and to follow their own rules for confession. The chief religious schools include history and methods of education, logic, psychology, ethics, school management, and hygiene, tested by a written examination; and the practical work, taken in the secondary schools attached to the two colleges, is awarded the diploma after one year's practice and a test lesson given before a Governor, in the University of Cambridge. The Cambridge Syndicate is followed in all subjects except philosophy, for which a course of Catholic philosophy is allowed to be substituted.

Hitherto only Catholic students have been admitted to these colleges, but regulations issued by the Board of Education (which may come into effect by the year 1908) require that no qualified student applying for admission may be rejected, if there is room, on the score of religion. The Catholic hierarchy have protested against this and memorialized the prime minister, but the authorities adhere to their decision and require Catholic training colleges to be forthcoming. These regulations will in future be recognized. The Catholic training colleges had therefore to face the alternative of the introduction of non-Catholic students to the exclusion of Catholics, where numbers are limited, or serious monetary loss through the withdrawal of the State-aided King's Scholars.

Higher Education for Women.—The higher education of women, in connexion with convents, is hardly out of the experimental stage. The university class in the Notre Dame Training College and its affiliation to the Liverpool University have already been mentioned. Up to 1895 Catholics were prohibited (by ecclesiastical authority) from entering the older residential universities of Oxford and Cambridge, and the removal in that year of the prohibition favoured men only. Women had to wait still longer; but this restriction was taken away in June 1907, by a decree from Rome, which sanctions under certain conditions the opening of houses for women, both secular and religious, at Oxford and Cambridge, to enable them to secure the advantages of a university education. The Sisters of the Holy Child Jesus were the first community to avail themselves of this concession. They have opened a convent at Oxford, recognized and licensed, where twenty secular students and an unlimited number of religious may reside whilst following the university course. St. Ursula's Convent, also at Oxford, likewise receives ladies and religious desirous of reading for honours in modern languages or for the B.A. degree examination, in which they may do either by attending the University lectures, or by means of private tuition in the convent itself. Women are not eligible for degrees, either at Oxford or at Cambridge, but they are allowed to attend almost all the university lectures and to sit for the degree examinations, receiving if successful a diploma instead of the degree itself. It is proposed to establish at Cambridge a college for Catholic women, similar to those of Newnham and Girton, which will probably, in accordance with the desires of Propaganda, be placed under the charge of one of the principal teaching orders. A committee to carry out the project has the Archbishop of Westminster at its head.

Secondary Education in Ireland and Scotland.—The convent schools of Ireland and Scotland compare favourably with those of England, and their general character, scope, and conditions being practically similar, they need no further description here. There are in Scotland about ten different orders engaged in secondary education, with upwards of twenty schools under their care, besides the two training colleges—one at Glasgow for primary teachers, under the Sisters of Notre Dame, and the other at Edinburgh for secondary teachers, conducted by the Sisters of Mercy. In Ireland the chief teaching orders are the Institute of the B. V. M. (with thirteen convent schools attached); the Sisters of Jesus (with three schools), the Dominicans, Ursulines, and the St. Louis Nuns, each with several prominent secondary schools. The equivalent in Ireland of recognition and inspection by the Board of Education is the "Intermediate System", introduced in 1878, which produces practically the same results, and has been approved by most of the religious institutes engaged in secondary education. This system arranges examinations and awards medals, money prizes, and exhibitions. Catholic girls wishing to pursue a higher course after completing that of the Intermediate System, have to take the examinations and degrees of the Royal University of Dublin, and if they demand several orders have colleges under their care in Dublin, the most prominent and successful being Loreto College, belonging to the Institute of the B. V. M., and the Dominican College. The Irish educational authorities do not insist on the formal training of their girls, but each order according to its constitution is responsible for the training of its own members. The results, however, of their work prove that this is no less thorough and efficient than that obtainable at one of the recognized English training colleges.

There is very little published literature on this subject, but scattered information can be had in Eckstein, Woman and Monasticism (Cambridge, 1890), and in the education work of various writers; and Streeter, The Convants of Great Britain (London, 1902), for particulars as to the teaching orders. Some of these articles are contained in The Crucible (Oxford, quarterly, 1905-08) and in the Catholic Directory (London, 1908). The foregoing article has been compiled chiefly from unpublished information supplied by the superiors of the principal teaching orders working in England.

G. CYPRIAN A LSTON.

Conventuals, Order of Friars Minor.—This is one of the three separate bodies, forming with the Friars Minor and the Capuchins who is commonly known as the First Order of St. Francis. All the friars of this order to-day follow the rule of the Friars Minor, but whereas the Friars Minor and the Capuchins profess this rule pure and simple, differing only accidentally in their particular constitutions, the Conventuals observe it with certain dispensations lawfully accorded.

There has been some difference of opinion as to the origin of the name "Conventual". Innocent IV decreed (Bull "Cum tamquam veri", 5 April, 1250) that Franciscan churches where convents existed might be called Conventual churches, and some have maintained that the name "Conventual" was first given to the religious residing in such convents. Others, however, assert that the word Conventuals was used to distinguish the inmates of large convents from those who lived more after the manner of hermits. In any event it seems safe to assert that the term Conventual was not used to signify a distinction of the Order of Friars Minor in any official document prior to 1431. Since that time, and more especially since 1517, this term has been employed to designate that branch of the Franciscan Order which has accepted dispensations from the substantial observance of the rule in regard to poverty. It may be noted, however, that the name "Conventual" has not been restricted to the Franciscan Order. Thus the statutes of the Camaldolese approved by Leo X distinguished between the Conventuals and the Observants in that order, and St. Pius V (Bull "Superiorius mensibus", 16 April, 1567) says: "That
which we have decreed for the Conventuals of the Order of St. Francis we decree likewise for the Conventuals of the Friars Minor, as we have already done. Under Sixtus IV (1587) the latter attempted to dispute the right of the Minister General of the Friars Minor to the title "Minister General of the Whole Order," but were unsuccessful. They renewed their efforts under Clement VIII (1593 and 1602) but with no greater success. In 1625 they again renewed the question, which was disputed for six years. On 22 March, 1631, the right of the Minister General of the Friars Minor to the title in dispute was solemnly confirmed by the Sacred Congregation of Rules, and Benedict XIII by a Bull of 21 July, 1728, imposed perpetual silence upon the contestants.

In 1655 the Conventuals accepted the Tridentine indent, allowing them to form orders to which property corporately, and their chapter held at Florence in that year drew up statutes containing several important reforms which Pius IV subsequently approved (Bull "Sedex Apostolic", 17 Sept., 1655). Three years later St. Pius V (Bull "Ad Extirpandos", 8 June, 1568) sought to enforce a stricter observance of the vows of poverty and of the community life among the Conventuals, and the superiors of the order immediately enacted statutes conformable to his desires, which the pope approved (Bull "Illa nos cura", 23 July, 1568). In 1625 new constitutions were adopted which greatly increased the number of regular provisions. These constitutions, which were subsequently promulgated by Urban VIII (Bull "Militantes Ecclesiae", 5 May, 1628), are known as the "Constitutions Urbanae" and are of primary importance, since at their profession the Conventuals vow to observe the Rule of St. Francis in accordance with them, that is to say, by admitting the duly authorized dispensations therein set forth (see "Constitutiones Urbane ordinis fratum Minorum St. Francisci Conventualium, Assisi, 1803"). It would therefore be no less false than unjust to regard the Conventuals as a less observant of the obligations contracted by their profession than the Friars Minor and Capuchins, since they are not bound by all the obligations assumed by either of the latter. The institution of several communities and even provinces of Reformed Conventuals, more especially between 1562 and 1668 (see "Constitutioni generali de' frati riformati de' Minori Conventuali de' frati de' Minori conventuali fatte per ordine del Capitolo generale de' Minori Conventuali celebrato in Orvieto l'anno 1611"), affords interesting proof of the vitality of the order, which for the rest has possessed many men of eminent virtue and has rendered important services to the Church.

St. Joseph of Cupertino (d. 1663), one of the greatest saints of the seventeenth century, and Bl. Bonaventure of Potenza (d. 1711) were both Conventuals, and the beatification of several other members of the order is now under way. The Conventuals have, moreover, given three popes to the Church: Sixtus IV (1471-84), Sixtus V (1585-90), and Clement XIV (1770-74), besides a number of cardinals and other distinguished prelates. Among the eminent theologians and scholars the order has produced, the names of Mastruz, Fagi, Brancati, Papini, Sbaralea, and Eubei are perhaps most familiar. The Conventuals enjoy the privilege of guarding the tomb of St. Francis at Assisi and that of St. Anthony at Padua, and they furnish the penitentiaries to the Vatican Basilica and to the sanctuary at Loreto. At Rome they possess the famous church and convent of the Twelve Apostles, which was restored by Don Corrado Pallavicini, with the permission of the pope, in 1868. The habit of the Conventuals which was formerly gray is now black—whence they are sometimes called by the people the "Black Franciscans," in contrast to the Friars Minor and Capuchins, whose habit is brown; it consists of a serge tunic fastened around the waist with a thin white coat with three
knots; to the large cape, which is round in front and pointed behind, a small hood is attached. Unlike the Friars Minor and the Capuchins, the Conventuals wear hosen and shoes.

By 1517 the Conventuals formed only about a sixth part of the order. After their separation from the Friars Minor, the number of Conventuals diminished considerably. In Spain Cardinal Ximenes was instrumental in depriving them of their convents, which were given to the Friars Minor. Clement VII, 22 June, 1524, ordered the Friars Minors to Burgos to bring back to the Regular Observance all the Conventuals in the Kingdom of Navarre, and St. Pius V, 16 April, 1567, commanded all the Conventuals in Spain to embrace the Regular Observance. Like measures were adopted, 30 October, 1567, in regard to Portugal, where as in Flanders and in Denmark all the Conventuals gradually passed over to the Friars Minor. In France all their provinces save three joined the main branch of the order. Nevertheless the Conventuals continued to prosper in other countries. In Italy and Germany they suffered fewer losses than elsewhere. During the seventeenth century centers they increased more, for in 1770 they possessed some 31 provinces with 966 convents. In France alone they had 48 convents and numbered 330 religious. In 1771, 8 convents in France including the great convent in Paris, which had since 1517 been subject to the Minister General of the Friars Minor, passed over to the Conventuals, giving them a total of 2620 religious in France alone, but twenty years later their number there had fallen to 1544. Since the revolutionary epoch the order lost more than 1000 houses, principally in France, Italy, Switzerland, and Germany. At present (1907) it is divided into 26 provinces. Of these 12 are in Italy, the others being those of Malta; Galicia; Russia and Lithuania; Strasburg, comprising Bavaria and Switzerland; Liège, comprising Belgium and Holland; Austria and Styria; Bohemia, with Moravia and Silesia; Hungary and Transylvania; Spain; the United States; Rumania, with the mission of Moldavia; and the Orient, with the mission of Constantinople.

The mission of Moldavia, which is one of the oldest in the Seraphic Order, comprises 10 convents with parishes, in which there are 28 missionaries governed by an archbishop belonging to the order. Twelve convents are connected with the mission of Constantinople, where the Apostolic delegate is a Conventual. The order has recently made new foundations in England and Denmark. According to the latest available official statistics (1899), the Conventuals numbered in all some 15,000 religious.

At least two Conventual missionaries were labouring in the United States in the early forties, but the establishment of the order there may be said to date from 1850. In 1907 there were two flourishing provinces of the order in the United States, the province of the Immaculate Conception which numbers thirteen convents, those of Trenton, Camden, Hoboken, Albany, and Terre Haute being the most important; and the province of St. Anthony of Padua, the members of which are Poles, and which has ten convents and houses in the Dioceses of Baltimore, Brooklyn, Buffalo, Detroit, Harrisburg, Hartford, and Springfield.

The Conventuals were not affected by the Apostolic Constitution "Felicitate quædam" of Leo XIII (4 Oct., 1897) by which the different special reforms into which the Observants had become divided since 1517 were reunited under the name of Friars Minor, but like the Capuchins (who were constituted a separate body in 1619) they still remain an independent order. Leo XIII, however, expressly confirmed the right of precedence accorded to the Friars Minor by Leo X.

PASCHAL ROBINSON.

Conversano, Dioceze di (Cupersanensis), suffragana di Bari. Conversano, situated on the coast of Bari, in Apulia (Southern Italy), is the ancient Cupersanum, a city of the Peucetians. Its history is practically that of Apulia. After the invasion of the Normans, it was for a while the seat of a duchy; later, however, it became a fief of the dukes of Atri. The first bishop whose date is certain was Hilarius, present at the Roman synod of 591. Local tradition, however, preserves the name of a previous bishop, Simplicius, who died in 492. No other names are recorded up to the episcopate of Leo, mentioned in a document of 1088. Other bishops worthy of mention were: the Cencarian Stefano (c. 1280); Giovanni de' Gropi (c. 1283); Antonio Guidorizzi (d. 1433); Ponzio de' Corcoli, who died in the odour of sanctity in 1482; Raimondo de' Valenti (d. 1579); Giuseppe Palmero (who was appointed 1658); Andrea Brancaccia (1681). The diocese has a population of 95,521, with 7 parishes, 130 churches and chapels, 132 secular and 8 regular priests, 2 religious houses of men and g and women.

U. BENIGNI.

Conversi, lay brothers in a religious order. The term was originally applied to those who, in adult life, voluntarily renounced the world and entered a religious order to do penance and to lead a life of greater perfection. The renouncing of the world was known as the conversio a seculo, which had as its object a reform or change of life, the conversio morum, hence conversi or the "converted". The conversi were thus distinguished from the oblates or those who, as children, were presented to the Christian or from the religious who, for example, lived in the religious life and were placed in a monastery to receive proper religious instruction and to be educated in profane knowledge. In the eleventh century St. John Gualbert, founder of the Benedictine congregation known as the Vallombrosani, introduced for the first time a distinction between the frares conversi, or lay brothers, and priests, or choir religious. For among the conversi there were not seldom those who were either entirely illiterate, or who in the world had led a life of public scandal, or had been notorious criminals, and while on the one hand it was unjust that such should be debarred from the means of doing penance in the cloister and from the other hand it was contrary to the religious life, they were at the same time hardly to be considered fit subjects for the reception of Sacred orders. They were thus received into the order for the purpose of engaging in manual labour and occasionally for directing the temporal affairs of the monastery. In modern canonical usage the term conversus is synonymous, or nearly so, with that of lay brother. What has been said of religious orders of men can, in general, be applied equally to those of women, though the distinction between conversi, or lay sisters, and choir religious does not appear to have been introduced until the twelfth century. According to rule, the conversi wear a habit different from that of the choir religious; but the essential obligations of the vows and of the monastic life in general are alike for all. (See Lay Brother and Oblate.)
KAULEN in Kirchenlex., s. v. For the large share of these conversions, in the development of the medieval agriculture, monastic administration, etc. see HOFFMANN, Das Konvertenstitul des Cistercienserordens (Freiburg, Switzerland, 1905).

STEPHEN M. DONOVAN.

CONVERSION (from the classical Latin converto, depon. convertor, whence conversio, change, etc.), in the Latin Vulgate (Acts xv, 3), in patristic (St. Augustine, Civ. xxi, 36), and in medieval Latin, a moral change, a turning or returning to God, to the true religion, in which sense it has passed into our modern languages: the conversion of St. Paul, of Constantine the Great, of St. Augustine. In the Middle Ages the word conversion was often used in the sense of forsaking the world to enter the religious state. Thus St. Bernard speaks of his conversion.

The return of the sinner to a life of virtue is also called a conversion. More commonly do we speak of the conversion of an infidel to the true religion, and most commonly of the conversion of a schismatic or heretic to the Catholic Church.

Every man is bound by the natural law to seek the true religion, embrace it when found, and conform his life to its principles and precepts. And it is a dogma of the Church defined by the Vatican Council that man is able by the natural light of reason to arrive at the certain knowledge of the existence of the one true God, our Creator and Lord. The same council teaches that faith is a gift of God necessary for salvation, that it is an act of the intellect commanded by the will, and that it is a supernatural act. The act of faith then is an act of the understanding, whereby we firmly hold as true whatever God has revealed, not because of its intrinsic truth perceived by the natural light of reason, but because God, who can neither deceive nor be deceived, has revealed it. It is in itself an act of the understanding, but it requires the influence of the will which moves the intellect to assent. For many of the truths of revelation, being mysteries, are to some extent obscure. Yet, it is not a blind act, since the fact that God has spoken is not merely probable but certain. The evidences for the fact of revelation are not, however, the motive of faith; they are the grounds which render revelation credible, that is to say, they make it certain that God has spoken. And it is not necessary that they be of such nature that they may comply with the duty of embracing the true Faith and persevering in it, God by His only-begotten Son has instituted the Church and has adorned it with obvious marks so that it may be known by all men as the guardian and teacher of revealed truth. The act (or actus) of the Schism of the Catholic Church alone. Nay, the Church itself by its admirable propagation, sublime sanctity, and inexhaustible fecundity, by its Catholic unity and invincible stability, is a great and perpetual motive of credibility and irrefragable testimony of its Divine mission (see Geno, Vatic., De Fide, cap. 3).

The first step, therefore, in the normal process of conversion is the investigation and examination of the credentials of the Church, which often is a painful labour lasting for years. The external grace which draws a man's attention to the Church and causes him to begin his inquiry, is various and manifold; there are individual inquirers. It may even be something to one's temporal advantage, which was the case with Henry IV of France. It may be the interest aroused in a great historical personage, such as Innocent III, in the case of Friedrich von Hurter. Whatever may have been the initial motive, if the study be pursued with an open mind, we hold that it will lead to the knowledge of the true Church, i.e. to this certain conclusion: The Catholic Church is the true Church. This intellectual conviction, however, is not yet the act of faith. One may hesitate, or refuse to take the next step, which is the "good will to believe" (plus credulitatis affectus). And this leads to the third and final act, the act of faith itself: I believe what the Church teaches because God has revealed it. These three acts, especially the last, fulfilling in action, nor should any temporal considerations be allowed to interfere with a duty on which depends the soul's salvation. And because all are bound to enter the Church, it follows that the Church has a right to receive all who apply for reception, of whatever age, sex, or condition they may be. Nay, in virtue of the divine command to preach the Gospel to every creature, the Church is strictly bound to receive them, and no earthly authority can forbid the exercise of this duty. To the Church alone it belongs to lay down the conditions for reception and to inquire into the interior dispositions of him who presents himself for admission into her bosom. The conditions are, knowledge and profession of the Catholic Faith and the resolve to live in accordance with it. The right to admit converts into the Church belong strictly speaking to the bishop. Usually all priests exercising the sacred ministry receive faculties for this end. Hence the Church cannot, where baptism is administered, sacramental confession is also required from the convert. It is the law clearly laid down in the Acts of the Second Plenary Council of Baltimore. The order of proceedings is as follows: first, abjuratio of heresy or profession of faith; second, conditional baptism; third, sacramental confession and conditional absolution. (Tit. V, Cap. II, n. 240.)

Force, violence, or fraud may not be employed to bring about the conversion of an unbeliever. Such means would be sinful. The natural law, the law of Christ, the nature of faith, the teaching and practice of the Church forbid such means. Credere voluntaria est, to believe depends upon the free will, says St. Thomas (II-II, Q. x, a. 8), and the minister of baptism, before administering the sacrament, is obliged to ask the question, "Wilt thou be baptized?" And only after having received the answer, "I will," may he proceed with the sacred function. The Church cannot give the baptism of children of unbaptized parents without the consent of the latter, unless the children have been cast away by their parents, or are in imminent danger of death. For the Church has no jurisdiction over the unbaptized, nor does the State possess the power of using temporal means for compelling children. The safeguards formerly decreed against apostates were not intended to coerce men to accept outwardly what they did not believe in their hearts, but to avenge for a crime (see the article of St. Thomas, loc. cit.). The medieval legislation, both ecclesiastical and secular, clearly distinguished between the punishment to be inflicted for the crime of apostasy and the means of instruction to be used in order to bring about the reissance of the apostate. As Bishop von Ketteler says, "The punishment inflicted by the Church upon heretics in comparatively few cases was not based upon the false principle that conviction could be forced upon the mind by external means, but upon the truth that by baptism the Christian has assumed obligations the fulfilment of which could be insisted upon. This punishment was only inflicted in particular cases and upon public and formal heretics." Convert parents like other Catholics are obliged to have their children baptized and instructed in the Catholic faith. The Constitution of the United States of America proclaims complete separation of Church and State and guarantees full liberty of conscience. In consequence the laws of these States place no hindrance whatever in the way of conversions. It may also be
said that on the whole the American people are socially tolerant towards converts. No wonder that in this country conversions are comparatively more numerous than in the British Empire too, since the days of Catholic Emancipation in 1829, liberty of conscience prevails in theory as well as in practice, although there exists both in England and Scotland an established Church. Catholic disabilities have been almost entirely removed. Catholics are only excluded from the throne and from few of the highest offices of the State. In Germany after the Reformations the tyrannical principle cujus regio, ilius religio was proclaimed, in virtue of which the sovereign for the time being could impose his religion upon his subjects. He exercised the power both to forbid conversions to the Catholic Church, and to compel appeal from it. In the present German Empire, where nearly two-thirds of the population is Protestant, liberty of conscience is the law of the land. And although union of Church and State exists, conversion does not involve any disabilities or the loss of any civil or political rights. In some of the States, however, two ecclesiastical provinces of the French and somewhat restricted by State laws. Most of the States prescribe the age before which conversions are not lawful, which is either fourteen or sixteen, or even eighteen. In Saxony, Brunswick, and Mecklenburg, the public exercise of the Catholic religion is subject to regulation by the State. In the Greek-Orthodox is the State religion, other denominations are only tolerated. For long conversion from the Orthodox Church to Catholicism was followed by grievous disabilities. By the ukase of 1803 certain rights and liberties were granted to other denominations. The publication of the ukase was immediately followed by the return to the Catholic Church of many Ukrainians who had been forced into schism by persecution. The Scandinavian countries were very intolerant till about the middle of the nineteenth century. Denmark gave liberty to the Catholic Church in 1844, Sweden and Norway in 1860.

B. GULDER.

Convents. See Counter-Reformation; Oxford Movement; Roman Empire; Statistics.

Convocation of the English Church, the technical name given in the Church of England to which corresponds in some respects to a provincial synod, though in other respects it differs widely from it. The archbishops of Canterbury and York have each their Convocation, but that of Canterbury is the more important, and is spoken of as "Convocation" par excellence. The history of its external constitution is continuous down to the present time and is bound up with the development of English constitutional history; its powers and independence, however, were lost at the Reformation; its organization, retained as a mere form for many years, has been utilized of late to give expression to the opinions entertained by the clergy as a body upon questions of the day. Thus its exercise influence, but has no power. The authority of the Crown asserted at the Reformation is still supreme and intact.

The history of Convocation may be divided into five periods: (1) Before 1295; (2) From 1295 until the Reformation; (3) The Reformation period; (4) The post-Reformation period; (5) Modern times.

(1) Prior to 1295.—In the 1295 the Church in England had assembled in diocesan and provincial synods to regulate disciplinary and other matters interest to the body of the clergy. Moreover the archbishops, bishops, abbots, and priors used to take their place in the national council on account of the estates they held in chief (in capite) of the Crown. But the beneficed clergy took no part in it. The increasing frequency of royal appeals for money grants and the unwillingness of the bishops to be responsible for actions done by them led Stephen Langton, as early as 1225, to summon proctors of cathedral, collegiate, and conventual churches to attend his provincial synod, and gradually that representative principle became part of the system of Convocation. The failure of the irregular attempt of Edward I to convocate the clergy led him to issue (1283) a writ to the archbishop with a view to Convocation meeting in London in that same year, and at that meeting a "benevolence" was duly voted. The form of writ used in 1283 is the same in form as that still in use, and the instructions issued on the occasion, the Archbishops of Canterbury, John Peckham, still entirely the existing constitution of Convocation, so that, with the exception of the disappearance of the monastic representatives, the external organization of Convocation remains unchanged.

(2) After 1295.—In addition to the Baronage and Convocations of the realm, after 1295, a representative body of the beneficed clergy summoned to attend personally in Parliament, the summons being conveyed by the insertion, in the bishop's writ of summoned to Parliament, of the promunientiae clause. That summons was the beginning of a new phase in the long struggle waged by the Crown for control of the taxation of the clergy. It was to facilitate the obtaining of money grants that Edward I endeavoured once more to unite representatives of the clergy and laymen in one deliberative assembly, composed on the basis of temporal property. To have countenanced the attempt would have been to recognize the Crown's claim to tax church property, and the clergy insisted upon their constitutional right of making their money grants in Convocation. The struggle between the Crown and the clergy continued until 1337, when the Crown gave way, though retaining the promunientiae clause in the bishop's writ of summons. Authorities differ as to whether the Parliamentary proctors of the clergy sat in the Lower House or in the Upper House; most probably they sat and voted in the Lower House.

The question of the exact relation of Convocation to the newer Parliamentary representatives of the clergy is obscure; nor is the obscurity lessened by the fact that the proctors of the clergy for Convocation were frequently the same persons as the proctors of the clergy for Parliament. Two opinions have been defended: the first, that the older ecclesiastical councils with their representatives of the clergy; the other, that the process of gradual decay of Parliamentary representation of the clergy, part of their rights passed to the ecclesiastical councils, thus giving rise to the historical connexion between the Convocations and Parliament. The latter view, ably advocated by Stubbe, at present holds the field.

The division of Convocation into an Upper and a Lower House came about gradually, and was not formed, as is sometimes supposed, on the model of the two Houses of Parliament. In 1296 the members of Convocation resolved themselves into two deliberative purposes into four groups: bishops, monastic representatives, dignitaries, and proctors of the clergy. Eventually Convocation came to open with a joint session presided over by the archbishop, after which the bishops and abbots remained to deliberate at the Upper House, while the rest withdrew to deliberate as the Lower House.

The objection of the clergy to sitting in Parliament lessened indeed their influence over that body; at the same time they secured the right of meeting when Parliament met, and that right of meeting involved the right of petitioning and to some extent
of legislating for themselves. That idea of Convocation as the clerical parliament had important consequences to the church property, which was successfully maintained; but the clergy could neither elect nor be elected to the House of Commons, and to this day a person in Holy orders is ineligible for Parliament. At the same time the legislation of Convocation was binding on the clergy only and not upon the people. (3) The Reformation Period. - Convocation lost its independence and most of its powers by the Act of Submission [25 Hen. VIII (1533-4), c. 19], which enacted that Convocation could only meet by royal command, and that without royal leave and licence no new canons, constitutions, or ordinances may be made. This act was, however, commonly disregarded, and against any statute law; or (d) against any custom of the realm. The loss of legislative independence paved the way for the loss of taxing powers, which were finally renounced in 1695, the right of voting at Parliamentary elections being obtained in return. The power of Convocation of dealing with cases of heresy has been exercised but rarely, and then to no purpose. It continued to be convoked at the beginning of each Parliament, but its sittings were interrupted from 1640 to 1660, to be resumed after the Restoration. In 1689, in view of the opposition of the clergy to the Toleration Act of William and Mary, no summons was issued to Convocation. The Commons, however, protested against the innovation, and their petition had its effect; at the same time Archbishop Tillotson, and to some extent his successor Tenison, met the difficulties of the situation by refusing to allow any deliberations. Convocation continued to exist to the Pretenders. Parties were formed, and claims were made, insisting upon the independence of the Lower House on the analogy of the House of Commons. Atterbury led the malcontents; Wake, afterwards Archbishop of Canterbury, Kennet, Hoadley, and Gibson led the other party. In Ireland, Toryism dominated the Lower House; Liberalism, alike in politics and theology, pervaded the Upper House. Permission to deliberate led to trouble in 1701, and a prostration followed. The Bangorian Controversy arising out of Hoadley's sermon led to similar results in 1717. The opposition of the Lower House was worn out by repeated prorogations immediately following the opening session, and with the exception of the discussions allowed in 1741 and 1742, Convocation ceased to be a deliberative body until 1854.

(4) Post-Reformation Period. - The Act of Submission of Henry VIII was stringently interpreted by the judges at a committee before the Lords in Parliament (in 8 Jac., 1) as forbidding, even after obtaining royal assent, any canon (a) against the person of the king; (b) against the commonwealth of the realm, or against any statute law; or (d) against any custom of the realm. The loss of legislative independence paved the way for the loss of taxing powers, which were finally renounced in 1695, the right of voting at Parliamentary elections being obtained in return. The power of Convocation of dealing with cases of heresy has been exercised but rarely, and then to no purpose. It continued to be convoked at the beginning of each Parliament, but its sittings were interrupted from 1640 to 1660, to be resumed after the Restoration. In 1689, in view of the opposition of the clergy to the Toleration Act of William and Mary, no summons was issued to Convocation. The Commons, however, protested against the innovation, and their petition had its effect; at the same time Archbishop Tillotson, and to some extent his successor Tenison, met the difficulties of the situation by refusing to allow any deliberations. Convocation continued to exist to the Pretenders. Parties were formed, and claims were made, insisting upon the independence of the Lower House on the analogy of the House of Commons. Atterbury led the malcontents; Wake, afterwards Archbishop of Canterbury, Kennet, Hoadley, and Gibson led the other party. In Ireland, Toryism dominated the Lower House; Liberalism, alike in politics and theology, pervaded the Upper House. Permission to deliberate led to trouble in 1701, and a prostration followed. The Bangorian Controversy arising out of Hoadley's sermon led to similar results in 1717. The opposition of the Lower House was worn out by repeated prorogations immediately following the opening session, and with the exception of the discussions allowed in 1741 and 1742, Convocation ceased to be a deliberative body until 1854.

Apart from such general authorizations the Crown also possesses the right to submit definite business to the consideration of Convocation. This is done by "Special Letters of Business", a practice established in 1872, and again in 1907, in submitting the reports of the ritual commissioners to its consideration.

The House of Laymen, which first met in connexion with the Convocation of Canterbury in 1886 (York, 1892), is an assembly unknown to law. As at present constituted the two Convocations of Canterbury and York are summoned by the archbishops on the instruction of the king when Parliament is summoned. Each possesses an Upper and a Lower House; the Upper House, presided over by the archbishops, consists of the diocesan bishops; the Lower House is composed of archdeacons, archdeaconesses, archdeacons for each chapter, and proctors for the beneficed clergy, two from each diocese in the province of Canterbury, two from each archdeaconry in the province of York. The Lower House elects a prolocutor who, on being presented to the archbishop and approved by him, presides over the deliberations of the Lower House, and communicates the results to the Upper House. The stately ceremonial of Catholic days has been preserved for the opening session of Convocation, together with the use of the Latin tongue.

Conwell, Henry, second Bishop of Philadelphia, U.S.A., b. at Moneymore, County Derry, Ireland, in 1745; d. at Philadelphia, 22 April, 1842. After the death of Bishop Egan, in 1814, the Bishopric of Philadelphia was offered successively to the Rev. Dr. James Marchal, of the Church of Rome, and to the Vice-principal Barth, the administrator, but both these clergymen, deterred by the contumacious attitude of the trustees of St. Mary's church, returned the Bulls; whereupon the Holy See appointed (26 Nov., 1819) Henry Conwell, parish priest of Dungannon and Vicar-General of the diocese of Meagh, Ireland, positively and solemnly. He was too heavy for his seventy four years. He had made his studies in the Irish College at Paris, where his family had founded a bursa. He was universally beloved by his people and the clergy, and an ineffectual attempt was made to retain him in Ireland. He was consecrated in London by Bishop Poynter, 24 Aug., 1829, and arrived in Philadelphia, 2 Dec., bringing with him a young priest named Keenan, subsequently for many years pastor at Lancaster. The seeds of future troubles had been sown during the vacancy, when the administrator, without demanding credentials, stationed at St. Mary's the brilliant but disingenuous and unprincipled Rev. William Hogan, who had so ingratiated himself with the board of trustees that when, on 12 Dec., the bishop revoked his faculties, a schism ensued which lasted for many years. For details of the quarrel, the reader is referred to J. Gilmary Sheas's "History of the Catholic Church in the United States" (see above). The controversy was conducted with the controversy with dignity, but in the course of it, through desire of peace, committed two errors of judgment. The first was the recalling to the diocese and appointing as vicar-general of William Vincent Harold, a Dominican who his predecessor had dis-
missed. Contrary to the bishop's expectation, the return of Harold complicated the situation. It was a mistake that cost him his life, as he died, in 1066, having been relegated to the trustees, yielding to them the right of determining salaries and of vetoing his appointments. Highly displeased at this surrender of episcopal rights, the Holy See appointed an administrator and summoned the bishop to Rome. His explanations were provided with such a vehemence and with such a vehemence that he was forced to return to his see. He did return to Philadelphia and received permission to perform episcopal functions, without interfering in matters of administration. In 1850 Francis Patrick Kenrick arrived as coadjutor and administrator, and Bishop Conwell spent his remaining days in seclusion at Croydon.

James P. Loughlin.

CONEA, Archdiocese of (Campsana), with the perpetual administration of Campagna (Campaunia). Conea, a city of the province of Avellino, Southern Italy, on the River Ofanto (the ancient Aufidus), was formerly called Conspa, and belonged to the Hiperini, allies of the Samnitae during their wars with the Romans. It was captured in 213 B.C. by Fabius Maximus and was made a Roman colony. During the Second Punic War it was betrayed to Hannibal (214 B.C.) and opened the way to Capua. The city was twice destroyed by earthquakes (980, 1964), and was at one time nearly abandoned. The first known Bishop of Conza was Pelagius, who was present at the Roman synod of 745 held under Pope Zachary. The see was raised to the rank of an archbishopric under Alexander II or Gregory VII (i.e. between 1061 and 1085), having previously been a suffragan of Salerno. Among the bishops worthy of mention is the Blessed Erberto (1169). The bishops resided either in their feudal stronghold of San Menna, at Campagna, or at Sant'Angelo de' Lombardi, the present episcopal residence. The Diocese of Campagna was erected by Clement VII, 19 June, 1525; the see was vacant from 1793 to 1818, when it was placed under Conza. The dioceses together have a population of 123,000, with 37 parishes, 230 churches and chapels, 232 secular and 10 regular priests, 3 religious houses of men and women.

Cooktown, Vicariate Apostolic of, comprises North Queensland, Australia, from 16° 30' south latitude to Cape York, and from the Pacific Coast to the boundary of Northern Territory. It was formed out of the Diocese of Brisbane, a pro-vicariate in 1876, was first entrusted to Italian priests, who subsequently withdrew, and, in 1882, to the Irish Augustinians (Father John Hutchinson, Pro-Vicar). In 1887 the mission was created a vicariate apostolic, and Dr. Hutchinson was appointed its first vicar. He died 28 October, 1897, and was succeeded by the Rev. James D. Murray, consecrated 3 July, 1898. The administrative centre of the vicariate is at Cairns.

Statistics to close of 1907.—Parochial districts, 7; stations, 32; churches, 18; regular priests, 11; nuns, 24; boarding school, 1; primary schools, 3; children attending Catholic schools, 470; Catholic population, about 6000.

Henry W. Cleary.

Coombes, William Henry, b. 8 May, 1877; d. 15 November, 1890. He passed his early years at Meadgate, Somersethal, England, the property and for many years the residence of his uncle, Rev. William Coombes (d. 18 April, 1822), of Douai College, Grand-Vicar of the Western District. Young Coombes went to Douai at the age of 15, in 1881, and was ordained to the priesthood on 23 December, 1888. He was then consecrated to the episcopate on 23 December, 1888.

JAMES F. LOUGHLIN.

COPACABANA, also called Copacabana, a village of about four hundred people, Indians chiefly, on the shore of Lake Titicaca, province of Omasuyos, in northern Bolivia. It is the location of a famous sanctuary dedicated to Our Lady of Carmel, and of a convent of Franciscan Recollects. During the wars of independence it was despoiled of most of its rich ornaments and gifts, and ruthless plundering by faithless custodians in the course of political disturbances has further contributed to impoverish it. The edifices, originally very handsome, are in a state of sad neglect. It is a shrine for pilgrims from Bolivia and southern Peru, and on 6 August the feast of its patron saint is frequented by thousands. Before 1534 Copacabana was an outpost of Inca occupation and perhaps the only one on Bolivian soil of any prominence. The Incas held it as the key to the very ancient shrine and oracle on the Island of Titicaca, which they had adopted as a place of worship, yielding to the veneration in which it stood among the Aymaras from time almost immemorial. There were at Copacabana minor shrines, in which the ceremonial of the Incas was observed with that of the original inhabitants. When the Spaniards first visited the islands of Titicaca and Koiti, in 1561 and 1563, the primitive cults were abandoned and the Dominicans made Copacabana the centre of their missions. Secular priests then replaced them at the instigation of the Viceroy Francisco de Toledo, and finally the mission and its annexes were entrusted to the Augustinians in 1569.

In 1582 an Indian from Copacabana, struck by the sight of the statues of the Blessed Virgin which he saw in some of the churches at La Paz, tried to make one himself, and after many failures, succeeded in producing one of fair workmanship for an untrained native, and it was placed at Copacabana as the statue of the tutelary protectress of the community. Many miracles have been attributed to it, and its fame has spread far beyond the limits of its surroundings. It is kept in a special chapel, where the Indians are uniting in their devotions. The jewels with which it is adorned are perhaps the only ones in the church that have not been replaced by modern imitations. During the uprising of the Indians in 1781, while the church itself was desecrated, the "Camarín", as the chapel is called, remained untouched and exempt from spoliation. Copacabana is the scene of often repulsively boisterous Indian celebrations. On the
2d of February and 6th of March. It furnishes the pretext for Indian idolaters to prepare for the celebration of the planet's altar to the old Pagan with the Christian altar to the Virgin. A source of mortification to the Bolivian clergy, who are yet unable to modify it. Copacabana is surrounded by pre-Columbian ruins of considerable interest.

The mention is made of Copacabana in the earlier documents touching what is now Bolivia, as, for instance, Documentos históricos para la historia de Chile (1556); RAMON, HIST. del Descubrimiento de las Islas (Lima, 1561); JAGUAR DE LOS RIOS DE MANCAYO, Voyage aux Indes occidentales (1592); E. CALANCH, el Brasil, (1596); PERU, ETC. (Lima, s. d., written c. 1588); OLIVA, HIST. de la INDIANIA (1598); ANDRADE DE S. NICOLAS, YMDRAGA DE S. D. DE Copacabana (1637); and M. BORSANI, Antiquità della Corte di Copacabana, in persuano novi mundi Regno celebrissima (Rome, 1656).

A F. BANDIELER.

Copæ (known in Latin as pluviale or copassa), a vestment which may most conveniently be described as a long liturgical mantle, open in front and fastened at the breast with a band or clasp. As existing monuments show, whether we look at pictorial representations or at the copes of early date which still survive, there has been remarkably little change in the character of the vestment from the earliest ages. Then as now it was made of silk, wool, or cloth of gold, and, as it is important to note, it differed from the earlier form of chasuble only in this, that in the chasuble the straight edges were sewn together in front while in the cope they were left open. The most conspicuous external modification which the cope has undergone, during the past thousand years and more, lies in a certain divergence in the shape of the hood, a feature which, after all, is not in any way an essential part of the vestment. In some early examples we find only a little triangular hood, which was no doubt intended to be of practical utility in covering the head in procession. But with the lapse of time the hood has developed into a mere ornamental appendage, and it is now quite commonly represented by a sort of shield of rich embroidery, artificially stiffened and sometimes adorned with a fringe, the whole being fastened by buttons or by some other device to the back of the cope below the broad orphrey which usually forms an upper border to the whole. The fact that in many early chasubles, as depicted in the drawings of the eighth and ninth centuries, we see clear traces of a primitive hood, thus bearing out the explicit statement upon the point of Isidore of Seville, strongly confirms the view that in their origin cope and chasuble were identical, the chasuble being only a cope with its front edges sewn together.

History.—The earliest mention of a copæ seems to meet us in Gregory of Tours, and in the "Miracula" of St. Furseus, where it seems to mean a cloak with a hood. So from a letter written in 787 by Theodamar, Abbot of Monte Cassino, in answer to a question of Charlemagne about the dress of the monks (see Mon. Germ. Hist.: Epist. Carol., II, 512) we learn that what in Gaul was styled cucula (cowl) was known to the Cassinese monks as cope. Moreover the word occurs more than once in Alcuin's correspondence, apparently as denoting a garment for everyday wear. When Alcuin twice observes about a cucula which was sent him, that he meant to wear it always at Mass, we may probably infer that such garments at this date were not distinctively liturgical owing to anything in their material or construction, but that they were set aside for the use of the altar at the choice of the owner, who might wear a piece of silk cloth or cloth of gold as a particular or extraordinary attire. In the case of the chasuble the process of liturgical specialization, if we may so call it, was completed at a comparatively early date, and before the end of the ninth century the maker of a cucula probably knew quite well in most cases whether he intended his handiwork for a Mass vestment or for an everyday use.

But in the case of a copæ, or cope, as a symbol of specialization seems to have been delayed until much later. The two hundred copies of which we read in a Saint-Riquier inventory in the year 801, a number increased to 377 by the year 881, were, we believe, mere cloaks, for the most part of rude material and destined for common wear. It may be that the belief in chasubles being the attribute of the high altar and solemnity of the Divine Office, especially in the winter season. In 831 one of the Saint-Riquier copes is specially mentioned as being of chestnut colour and embroidered with gold. This, no doubt, implies use by a dignitary, but it does not prove that it was as yet regarded as a sacred vestment. In fact, if the following passage from the conclusions of Mr. Osborn's History of the Devout Life (Dublin Review, Jan., 1897), who was the first to sift the evidence thoroughly, is not until the twelfth century that the cope, made of rich material, was in general use in the ceremonies of the Church, at which time it had come to be regarded as the special vestment of canons and priests. Still, an ornamental cope was even then considered a vestment that might be used by any member of the clergy from the highest to the lowest, in fact even by one who was only about to be tonsured. Amongst monks it was the practice to vest the whole community, except, of course, the celebrant and the deacon, if present, at high Mass, at such festivals, whereas on feasts of somewhat lower grade, the community were usually vested in albs. In this movement the Netherlands, France, and Germany had taken the lead, as we learn from extant inventories. For example, already in 870, in the Abbey of Saint-Trond we find "thirty-three precious copes of silk" as against only twelve chasubles, and it was clearly the Cluniac practice in the latter part of the tenth century to vest all the monks in copes during high Mass on the great feasts, though in England the regulations of St. Dunstan and St. Æthelwold show no signs of any such observance. The custom spread to the second half of the thirteenth century, and the use of such cathedrals as Rouen, and cantors nearly everywhere used copes of silk as their own peculiar adornment in the exercise of their functions.

Meanwhile the old copæ nigra, or copæ choralis, a choir cope of black stuff, open or partly open in front, and commonly provided with a hood, still continued in use. It was worn in the Church Office, by the clergy of the cathedral and collegiate churches and also by many religious, as, for example, it is retained by the Dominicans during the winter months down to the present day. (See Costume, Clerical.) No doubt the "cope" of the friars, to which we find so many references in the Wycliffe manuscripts, and not merely of Chaucer and Langland, designate their open mantles, which were, as we may say, part of their full dress, though not always black in colour. On the other hand we may note that the copæ claustra, or close cope, was simply a cope or cape sewn up in front for common outdoor use. "The wearing of this," says Mr. Bishop, (loc. cit., p. 24), "instead of the 'copæ scissa', the same cope not sewn up, is again and again enjoined on the clergy by synods and statutes during the late Middle Ages." The copæ magna, now worn according to Roman usage by cardinals, bishops, and certain specially privileged prelates on occasions of ceremony, is not strictly a liturgical vestment, but is only a glorified copæ choralis, or choir cope. Its colour for cardinals is ordinarily red, and for bishops violet. It is ample in volume and provided with a long train and a disproportionately large hood, the lining of which last, ermine in winter and silk in summer, is made to show sacred a tippet across the back at high Mass on the greatest of the papal mantum, which differs little from an ordinary cope except that it is red in colour and somewhat longer. In the eleventh and twelfth centuries the mantitio, or bestowal of the mantum on the newly elected pope, was regarded as specially symbolic of investiture with papal authority. "Investio de
COPENHAGEN

350

COPACAVIGUS

papatu romano ut præsia urbi et orbii" was conferring it (I invest thee with the episcopal dignity); thou rule over the city and the worship.

Modern Use.—Under all these different forms the cope has not substantially changed its character or shape. It was a vestment for processions, and one worn by all ranks of the clergy when assisting at a function, but never employed by the priest and his same members in offering the Holy Sacrifice. Today, the present day it is still, as the "Ceremoniale" directs, worn by cantors on certain feast days in the solemn Office; but it is also the vestment assigned to the celebrant, whether priest or bishop, in almost all functions in which the chasuble is not used, for example in processions and the greater blessings and consecrations, at solemn Vespers and Lauds, in giving Benediction of the Blessed Sacrament, at the absolutions and burial of the dead, at the Asperges before Mass, etc. At a pontifical high Mass it is worn by the assistant priest who especially attends upon the bishop. As regards colour the cope follows that of the day, and it may be any colour or any combination of colours, according to its ample dimensions and unvarying shape, ancient copes are preserved to us in proportionately greater numbers than other vestments and provide the finest specimens of medieval embroidery we possess. Among the Syon Cope in the South Kensington Museum, London, and the Ascot Cope are remarkable as representing the highest excellence of that specially English thirteenth-century embroidery known as the opus anglicanum. We are also indebted to the use of copes of some magnificent specimens of the jeweller's craft. The brooch or clasp, meant to fasten the cope in front, and variously called morse, pectoral, botton, etc., was an object often in the highest degree precious and costly. The work which was the foundation of all the fortunes of Benvenuto Cellini was the magnificent morse which he made for Pope Clement VII. (See Cellini, Benvenuto.)

Beside the minor articles which are devoted to this subject in the ecclesiastical encyclopedias and works on archaeology, we may note the exhaustive work of Braun, Die liturgische Gesamtansicht (Freiburg, 1907), 306-358, also the thorough discussion of Edmund Bishop in Dublin Review (Jan., 1897), 17-19, and of any rich or scarce volumes. For some of the most elegant illustrations of copes, see especially de Farcy, La Broderie (Angers, 1890), and also Rouault de Fleury, La Mode (Paris, 1889), VIII, 1-17.

HERBERT THURSTON.

Copenhagen, University of.—It was founded by a bull which Sixtus IV issued 19 June, 1475, at the request of King Christian I. This bull authorized the priests, bishops, and archbishops of Denmark to establish the university in any place selected by the king; and the latter, by letters patent of 4 Oct., 1478, laid the foundation at Copenhagen. The Bishop, Dean, and Provost of Roskild and the Dean of Copenhagen were appointed conservators. The statutes, drawn up by the Archbishop of Lund and promulgated 28 Nov., 1479, followed closely those of Cologne. From Cologne also the new university received its first professors. The most distinguished among these, before the Reformation, was the Carmelite, Povel Helgesen (Paul Heliis, q. v.) writer of important controversial and historical works. Both he and Bishop Lage Urne, chancellor of the university, vigorously opposed the advances of Protestantism in Denmark. The university suffered severely during the religious upheaval, but was reorganized under King Christian III by the Lutheran theologian, Johann Bugenhagen (1539), called for that purpose from Wittenberg. In the conflagration of 1728 the university building almost totally destroyed, but was at once restored by King Christian VI (1732). Notable among the professors during the modern period are Holberg, Oehlenschlager, Raek, Madvig, and Oersted. The university comprises at present the faculties of theology, law, medicine, philosophy, and sciences, with

E. A. PACE.

COPERNICUS, NICOLAUS, latinized form of NICOLAS KOPPERNIK, the name of the founder of the heliocentric planetary theory; b. at Thorn, 19 Feb., 1473, d. at Frauenburg, 24 May, 1543, both places being in what is now Prussian territory. Whether the family came originally from Silesia or from Poland, certain it is that his father Nicolaus, a merchant, emigrated from Krakow to Thorn, and married the sister of Lucas Watzelrode, later Prince-Bishop of Ermeland. Of the four children the oldest and youngest, Andreas and Nicolaus, adopted the clerical career, while the older girl became a Cistercian nun and Abbess of Culm, and the younger became a nun.

The whole family belonged to the Third Order of St. Dominic. Nicolaus was hardly ten years old when his father died. His uncle, Lucas, however, took charge of the children and gave them a university training.

Nicolaus Nicolaei de Thorunia was matriculated in Krakow in 1491, where he studied classics, mathematics, drawings, and perspective. Professor Blar, who represented astronomy, belonged to the school of Ptolemy. The bishop, himself a former student of Bologna, sent the boys to Italy. In 1497 Nicolaus was enrolled in the University of Bologna as a German national and a student in canon law. He also studied Greek and became a disciple of Novara, then professor of astronomy. To obtain for his nephews the necessary support, the bishop procured their election as canons by the chapter of Frauenburg (1497-1499). In the spring of 1500 the brothers went from Bologna to Rome for the jubilee. According to George Joachim, surnamed "Rheticus" (because a native of Feldkirch, in ancient Rheitia) and his friend Achilles Gasser, Copernicus gave astronomical lectures in the Eternal City, and it was there that he owed to his vocation of founding a new astronomy. The brothers obtained from the chapter of Frauenburg a two years' leave of absence to continue their studies. From 1501 to 1503 Nicolaus was in Padua and Ferrara studying medicine and jurisprudence. In Ferrara he took his degree of Doctor of Canon Law; but no document is found of his graduating in medicine. His proficiency in that profession was, however, later evinced by his renown as a physician at the episcopal court of Heilsberg, where his uncle resided. After his university studies Copernicus practised medicine for six years (1506-1512) at Heilsberg, being sought by bishops and princes, but especially by the pope, who employed gratis. There is no show to document that Copernicus ever received higher orders. His medical practice, which was only private, was never against him being a priest; and the fact that in 1537 King Sigismund of Poland put his name on the list of four candidates for the vacant episcopal seat of
COPERNICUS, “DE ORBIBVM CCELSTIUM R EVOLUTIONIBVS”
FACSIMILE OF PAGE OF THE MS., LIBRARY OF THE COUNTS NUSTITZ, PRAGUE
Ermland, makes it probable that, at least in later life, he had entered the priesthood. After the death of his uncle, in 1512, Copernicus went to Frauenburg for the election of the new bishop, and remained there until 1516, when he was nominated administrator of the diocesan castle of Allenstein. His term of four years being over, he returned to the chapter in Frauenburg. There the bishop died, and Copernicus became administrator of the diocese. While the quiet life at Heilsberg had left him enough leisure to publish a Latin translation of the Greek letters of Theophilactus (1509), his public offices gradually drew him into the study of finance. In 1522 he wrote a memorandum on monetary reforms, which five years later, in 1527, he translated into Latin; one of the main ideas of that is the view that the King of Poland substantially accepted it (1528), and Copernicus was nominated deputy counsellor on the financial regulations of Prusia (1522–29).

These various offices, however, could not distract the genius of Copernicus from the main thought of his life. The towers of Heilsberg, of Allenstein, and of Frauenburg became so many observatories, and his great work "On the Revolutions of the Celestial Bodies" bears testimony to his unremitting observations of sun, moon, and planets. His reputation was such that in 1514 the Piazza, the Roman University, was asked by Leo X., asked through Bishop Paul of Fossombrone, for his opinion on the reform of the ecclesiastical calendar. His answer was, that the length of the year and of the months and the motions of the sun and moon were not yet sufficiently known to attempt a reform. The incident, however, spurred him on as he himself writes to Paul III, to make more accurate observations; and these actually served, seventy years later, as a basis for the working out of the Gregorian calendar. Twenty-five years after his university career, he had finished his great work, at least as far as he had in mind, but hesitated a long time whether to publish it or to imitate the Pythagoreans, who transmitted the mysteries of their philosophy only orally to their own disciples for fear of exposing them to the contempt of the multitude. His friends who had become interested in the new theory prevailed on him to write at least an abstract for them, most of whom had been at the University of Vienna (1873) and Stockholm (1878). In this commentary Copernicus stated his theory in the form of seven axioms, reserving the mathematical part for the principal work. This was in 1531, or twelve years before his death. From this on the doctrine of the heliocentric system began to spread. In 1534 Widmanstättd lectured before Pope Clement VII on the Copernican solar system. His reward consisted in a Greek codex which is preserved in the State library of Munich. Three years later Copernicus was urged by Cardinal Schönberg, then Archbishop of Capua, in a letter dated at Rome, 1 November, 1536, to publish his discovery, or at least to have a copy made at the cardinal's expense. But all the urging of friends was in vain, until a younger man was providentially sent to his side.

It was George Joachim Rheticus who quitted his chair of mathematics in Wittenberg in order to spend two years at the feet of the new master (1539–41). Hardly ten weeks after his arrival in Frauenburg he sent a "First Narration" of the new solar system to his scientific friend Schön in Nuremberg, in the form of a letter of sixty-six pages, which was soon after published (1540); and the letters next obtained for publication the manuscript of a preliminary chapter of the great work on plane and spherical trigonometry. Finally Copernicus, feeling the weight of his sixty-eight years, yielded, as he writes to Paul III, to the entreaties of Cardinal Schönberg, of Bishop Giese of Culm, and of other learned men to surrender his manuscripts for publication.

Bishop Giese charged Rheticus, as the ablest disciple of the great master, with the task of editing the work. The intention of the latter was to take the manuscript to Wittenberg and have it published at the university; but owing to the hostility prevailing there against the Copernican system, only the chapter on trigonometry was printed (1542). The two copies of the "First Narration" and of the chapter on trigonometry, which Rheticus presented to his friend Dr. Gasser, then practising medicine in Feldkirch, may be seen in the Vatican Library (Palat. IV. 585). Rheticus then turned to Schön in Nuremberg, who, together with Osiander, accepted the charge and engaged the printing-house of Petreius in the same city. In the meanwhile Rheticus tried to resume his chair in Wittenberg, but on account of his Copernican views had to resign (1542) and turned to Leipzig (1543). He was thus prevented from giving his personal attention to the edition, nor was the author himself able to superintend it. Copernicus became paralysed on the right side and weakened in memory and mind many days before his death. The first copy of the "Six Books on the Revolutions of the Celestial Orbits" was handed to him the very day he died. Fortunately for him, he could not see what Osiander had done. This reformer, knowing the attitude of Luther and Melancthon to the Copernican system, introduced the word "Hypothesis" on the title page, and without adding his own name, replaced the preface of Copernicus by another strongly contrasting in spirit with that of Copernicus. The preface of Osiander warns the reader not to expect anything certain from astronomy, nor to accept its hypothesis as true, ne stultior ab hac disciplina disces tal, quam accesseris. The dedication to Pope Paul III was, however, retained, and the text of the work remained intact, as was ascertained later when access was had to the original manuscript, now in the family library of the Counte Nostitz in Prague, recently opened.

Opposition was first raised against the Copernican system by Protestant theologians for Biblical reasons, and strange to say it has continued, at least sporadically, to our own days. A list of many of their pamphlets is enumerated by Beckmann. On the Catholic side opposition only commenced seventy-three years later, when it was occasioned by Galileo. On 5 March, 1616, the work of Copernicus was forbidden by the Congregation of the Index "until corrected", and in 1620 these corrections were indicated. Nine sentences, by which the heliocentric system was represented as certain, had to be either omitted or changed. In 1538 after the death of Copernicus, in 1596, 1679, 1758 the book of Copernicus disappeared from the revised Index of Benedict XIV. New editions were issued in Bazel (1566) by Rheticus; in Amsterdam (1617) by Müller of Güttlingen; in Warsaw (1854) an edition de luxe with Polish translation and the real meaning of Copernicanism, and the last (5th) in Thorn (1873) by the Copernicus Society, on the four hundredth anniversary of the author's birthday, with all the corrections of the text, made by Copernicus, given as foot-notes. A monument by Thorwaldsen was erected to Copernicus in Warsaw (1850), and another by Tiek at Thorn (1853). Rheticus, Clavius, and others called Copernicus the second Ptolemy, and his book the second "Almagest". His genius appears in the fact that he grasped the truth centuries before it could be proved. If he had precurators, they are to be compared to those of Columbus. What is remarkable of Copernicus, is that while he did not shrink from demolishing a scientific system consecrated by a thousand years' universal acceptance, he set his face against the reformers of religion. For supplementary information see the article GALILEO.

J. G. HAGEN.

Coppe, François Edouard Joachim, poet, dramatist and novelist, b. at Paris, 26 January, 1842; d. 23 May, 1908. His father, a clerk in the war department, gave him the example of a true Christian life. He studied for a few years at the Lycée Saint-Louis, but his family being in strained circumstances, he left the school before graduating to aid in the support. He completed his education by private study, spending long hours in the Library Éte-Geneviève, after a hard day's work. In 1863, he joined the group of poets later celebrated under the name of the "Farnassiens", and three years later published his first collection of verses, "Le Relique", soon followed by "Intimités". His first play "Le Passant", was produced in 1869. Through the influence of Princesse Mathilde, he was appointed assistant-librarian at the senate, a sinecure which allowed him to devote himself to literature. From 1871 to 1885 he was librarian at the Comédie Française. In 1876 he received the cross of the Legion of Honour, and was elected to the French Academy in 1884, succeeding Laprade, another poet whose talent did no little honor to the Catholic Faith. The works of Coppe come under four classes: narrative poems, dramas, novels and short stories. The narrative poems, including "Le Relique" (1869), "Intimités" (1868), "Les Humblees" (1872), "Contes en Vers" (1880), and "Les Poèmes Modernes" (1897-1899), present picturesque scenes of contemporary life, the sentimental realism of which is entirely free from coarseness or triviality. He wrote a great number of plays in verse, chief among which are: "Le Passant" (1869), "Le Luther de Crémone" (1876), "Severo Torelli" (1883), which is regarded as his dramatic masterpiece, "Les Jacobites" (1886), "Pour Le Couronne" (1886), "Faire de Dois" (1871), and "Le Pater", a play dealing with an episode of the Commune; long forbidden by the Government, it obtained a great success in 1890. His drama is remarkable for its lofty and generous ideas, while its technique shows a constant effort to combine the theory of romanticism with the demands of modern theories. His works in prose comprise several novels: "Hermiette" (1889); "Une idylle pendant le siège" (1874); "Les vrais riches" (1886); "Rivales" (1893); "le Coupable" (1897), and many short stories "Contes en prose" (1883); "Vingt contes nouveaux" (1883); "Contes répandus" (1889). The short stories are the most popular part of his works. Simplicity, truth and vividness in the portrayal of familiar scenes, constitute the charm that has endeared the author to readers the world over. In "La Bonne Soul" (1896), after a serious illness that brought him back to the religious faith of his childhood, there are elements of great strength and spiritual tenderness. The last years of his life were saddened by cruel sufferings endured with patience. He was a modest man and led a quiet simple life. He was always ready to help those who struggled through life in obscurity. He gave to the French Academy, in 1907, a sum yielding $200 annually to be used as a prize for young poets.

Coptic Versions of the Bible. See Versions of the Bible.

Coptos, a titular see of Upper Egypt. It was the chief town of the Nomos of Haraw (Two Hawks), and was once politically important, but under the eleventh dynasty it was overshadowed by Thebes. Its principal god was Manou, with an Isis and an Horus infant; the remains of their temple were explored by Flinders Petrie in 1894. Coptos was at the crossroads of the two great routes leading to the coast of the Red Sea, the one towards the port Tā′aou (Myos Hormos), the other more southerly, towards the port of Shabir (Berene). Under the Pharaohs the whole trade of southern Egypt with the Red Sea passed over these two roads; under the Ptolemies, and in Roman and Byzantine times, merchants followed the same roads for purposes of barter with the coasts of Zanibar, Southern Arabia, India, and the Far East. Coptos was most prosperous under the Antonines; it was captured in 292 by Diceteian after a long siege, but soon recovered its former standing. In the sixth century it was called Justinianopolis. The see was suffragan of Ptolemais in the Thebais Secunda. Five bishops are known (Lequien, II, 607): Theodorus, a partisan of Meletius; Phobismemon in 431; Sabinus in 451; Vincent, author of the "Canonical Solutions", preserved in an Arabic translation and highly esteemed by the Copts; Moyzes, who wrote the panegyric of Vincent. Under the caliphs and the sultans Coptos remained one of the chief cities of Said. In 1175 its Christian inhabitants raised the standard of revolt against the Mussulmans, but were promptly defeated by El Adel, brother of or son of (Abd al) Din), who hanged near 3000 the trees around the city. In the thirteenth century there were still in this region numerous monasteries. Coptos was ruined in the sixteenth century by the Turkish conquest. It is to-day a village called Kebt, or Keft, with about 2500 inhabitants, subject to the mufti of Kenef; it is situated near the right bank of the Nile, between Denderah (Tynteria) and Karnak (Thebes), about 620 miles from Cairo.

S. VAILLÉ.

Coqart, Claude-Godefroi, missionary and army chaplain, b. in Pays de Caux, France, 20 February, 1706; d. at Chicoutimi, Canada, 4 July, 1755. He began his novitiate in the Jesuit College at Paris, 20 May, 1726, studied at the College of Lulon from 1727 to 1737, and at La Flèche, and was professor at Arras and Hesdin. In 1740 he set out for Canada and, in the following year, journeyed with Verendrye to Fort La Reine. He probably returned with Verendrye when that explorer was compelled to resign his position as commanding officer. He was sent to Quebec in 1751. Father Coquart laboured on the Saguenay mission and later at Quebec. After the conquest of Canada he attempted to settle a few Jesuits in Acadia, but the English authorities forced them to leave. He then resumed his labours in the Saguenay region, where he
closed his missionary career. He has left an Abnaki grammar and dictionary. In the Jesuit Relations (Thwaites ed., LXIX) is a memoir written by him for the Intendant of Canada, in which he describes the so-called "King's Poste" of Eastern Canada, with practical observations and suggestions that make it a valuable economic study.

EDWARD P. SPILLANE,

Coraecium, a titular see of Asia Minor. According to Ptolemy (V, 5, 3), this town was not in Cilicia Tracheia, but in Roman Pamphylia. It had belonged to Assyria according to the pre-Roman ethnic system, and from A.D. 74 was probably included in Lycia-Pamphylia. Its port was the chief centre of the famous Cilician pirates: there Diodorus Tryphon was killed by the VIIth, and the city was assaulted and captured by Pompey, who levelled their fortress. Coraecium became a suffragan of Side, metropolis of Pamphylia Prima. Lequien (I, 1007) mentions only four bishops, the first having been present at the Council of Constantinople (381), the last at the Council of Constantinople in 1146; but the title is also mentioned in the "Notitiae episcoporum" as late as the twelfth or thirteenth century. Coraecium is now a little town with about 2000 inhabitants (500 Greeks), the chief centre of a castra in the valley of Konia. Its Turkish name is Alaya. The Armenians have completely disappeared, though the town was a very important one in the time of the Ruba's. There are: a church ruin; walls; ancient tombs, and other remains of antiquity, and many romantic stories are associated with it.

BROOKS, Coraecium (London, 1847); CUINSET, Turquis d'Aue (1, 367-570); ALLEHAN, Stadiamon (Venice, 1890), 395 sq., with illustrations.

Corbett, James. See Sale, Diocese OF.

Corbie (Corby or Corbington), Ambrose, b. near Durham, 15 Apr. 1619; d. at Rome, 11 April, 1649. He was the fourth son of Gerard Corbie and his wife Isabella Richardson, exiles for the Faith. Of their children, Ambrose, Ralph, and Robert, having become Jesuits (Richard died as a student at St.-Omers, and the two surviving daughters, Mary and Catherine, became Benedictine nuns at Brussels), the parents by mutual agreement entered religion. The father entered the Society of Jesus as a lay brother in 1628, and having reconciled his father Ralph (aged 100) to the Church, died at Watten, 17 Sept., 1637. The mother, in 1633, was professed as a Benedictine at Ghent and died a centenarian, 25 Dec., 1652. Ambrose at the age of twelve entered St.-Omers, going there (1622) to the English College, Rome. He entered the Society of Jesus at Watten in 1627, and in 1641 was professed. Having taught with success for some years at St.-Omers, and been minister at Ghent in 1645, he was appointed confessor at the English College, Rome, where he died in 1651. His works are:

1. "Certamen Triplex," etc., the history of the martyrdom of three English Jesuit priests: Thomas Holland, his own brother Ralph Corbie (see below), and Henry Morse (Antwerp, 1645, 12mo), with three engraved portraits; reprinted (Munich, 1648, 12mo); English translation by E. T. Scear (London, 1658, 8vo).

3. An account of his family;

RALPH (called at times Corbington), Venerable, brother of the above, martyr-priest, b. 25 March, 1598, near Dublin; d. 7 September, 1644. From the age of five he spent his childhood in the north of England, then going over seas he studied at Saint-Omer, Seville, and Valladolid, where he was ordained. Having become a Jesuit about 1626, he came to England in 1631 and laboured in Durham. He was seized by the Parliamentarians at Hamsterley, 8 July, 1644, when clothed in his Mass vestments, conveyed to London, and committed to Newgate (22 July), with his friend John Duckett, a secular priest. At their trial (Old Bailey, 4 September) they both admitted their priesthood; they were sentenced to death, and executed at Tyburn, 7 September. Stonyhurst has a relic of Father Corbie; for the Duke of Gueldrés' attestation in 1650 of other relics, see Foley's "Records S. J.," I, 504; the "Certamen triplex" portrait is reproduced in "Records," VII (II), 168; for his letters, see vol. III, 69 sqq., of the same work. The Corbie altar, according to Foley [op. cit., VII (II), 398] was Carlington or Carlton.

PATRICK RYAN.

Corbie (also Corbey), Monastery of, a Benedictine abbey in Picardy, in the Diocese of Amiens, dedicated to Sts. Peter and Paul. It was founded in 657 by Saint Bathilde, widow of Clovis II, and both she and her son Clotaire III endowed it richly with lands and privileges. The latter were subsequently confirmed by Popes Benedict III and Nicholas I. The first monks, who came from Luxeuil, Theodelfrid being the first abbot. Under St. Adelhard, the ninth abbot, the monastic school of Corbie attained great celebrity and about the same time it sent forth a colony to found the abbey of Corvey in Saxony. In 1137 a fire destroyed the monastic buildings but they were rebuilt on a larger scale. Commentatory abbeys were introduced in 1550, amongst those that held the house being Cardinal Mazarin. The somewhat dropping fortunes of the abbey were revived in 1618, when it was one of the first to be incorporated into the new Congregation of Saint-Maur. At its suppression in 1790 the buildings were partly demolished, but the church remains to this day, with its imposing portico and western towers. One of the most famous scholars produced by Corbie was Paschatus Radbert (d. 865), the first to write a comprehensive treatise on

CHURCH OF ST. STEPHEN, CORBIE.
the Blessed Sacrament. In the controversy to which this work gave rise, his chief opponent was Ratramnus, one of his own monks, whose views, however, are at variance with Catholic teaching; both treatises are printed in Migne, P. L., CXX-CXXI. The library of Corbinian, rich and extensive, was removed to Saint-Germain-des-Prés in 1624.

MARILTON, Lives of St. Bathilde and Bl. Theodolind in Acta Sanctorum 0. B., pass. II, Venice, 1733; SAINTE-Marthe, Guilia Christiana (Paris, 1759, 1760); Migne, L'abbé (Paris, 1858); SKEETER in Kirchenlex., III, 1588-99; CORBET, Germain, (Paris, 1894-98), 795-94, with bibliography. A view of the abbey, as it was before suppression, is given in DELVAUX AND DELLIELE, Monasticon Galliense (Paris, 1871), II, pl. 76.

G. CYPRIL ASLYON.

Corbinian, Saint, Bishop of Freising, in Bavaria, b. about 680 at Charesca near Melun, France; d. 8 September, 730. His feast is celebrated 8 September, translation, 20 November; emblem, a bear. Nothing is known of his youth. He left his father, Waldelisio, died before the birth of Corbinian. After the death of his mother, Corbinianus, he lived as a hermit at the church of Saint-Germain et Chaters. With some of his disciples he founded Ratisbon 716 (709). Here he was consecrated bishop, given the pallium, and sent to preach, which he did with great success in the vicinity of his former home. In 723 (716) he again visited Rome, with the intention of resigning. The pope would not listen to his request. On his return trip Corbinus came to Mainz, then to the court where he was sought by messengers of Duke Grimoald to go to Bavaria, and settle at Freising. The dates of the Roman journeys are somewhat confused, but the people of Freising seem to consider 724 as the date of Corbinian's arrival, for in 724 was celebrated the tenth, and in 1824 the eleventh centenary of the existence of the diocese. On account of the incestuous marriage of Grimoald, his apparent repentance, and subsequent relapse, Corbinian left Freising, but returned in 729 (725), on the invitation of Huebert, Grimoald's successor, and continued his apostolic labours. His body was buried at Freising, then transferred to Mainz, and in 769 brought back to Freising by Bishop Aribio, who also wrote his life. St. Corbinian was a man of zeal, and of strong feeling, not so tame and temper, and exercised great influence over all with whom he came in contact.

FRANCIS MERSHMAN.

Corcoran, James Andrew, theologian, editor, and Orientalist, b. at Charleston, South Carolina, U. S. A., 30 March, 1820; d. at Philadelphia, 16 July, 1889. In his fourteenth year he was sent to the College of Propaganda, Rome, where he made a brilliant course and was ordained priest 21 December, 1842. He was the first native of the Carolinas who received the orders. He remained a year longer in Rome to complete his studies and was made doctor in sacred theology. He read with ease the literatures and dialects of Western and Northern Europe, spoke Latin as fluently as his native tongue, and acquired that thorough mastery of the idiom which distinguishes the scholars of the Second Plenary Council of Rome. Moreover, in addition, he was a profound Semitic scholar, with a special predilection for Syriac. On the death of Bishop England in 1842 he was recalled to Charleston, where he taught in the seminary, doing parochial work in the meantime, and in conjunction with the editing of "The Catholic Miscellany", the first distinctively Catholic literary periodical published in the United States. His position as a Catholic editor naturally involved him in

many controversies, one being on the life and teachings of Martin Luther, for which Dr. Corcoran procured from Europe an abundance of Lutheran. He had made great headway with the preparation of a life of Luther, when in 1861 his manuscript and library were destroyed by fire. His sympathies were with the South, and the end of the struggle found him rector of a parish at Wilmington, North Carolina, where he proved his fidelity to pastoral duty during an epidemic of cholera which decimated his little flock. He was made secretary to the Baltimore Provincial Council of 1835 and 1836, also secretary in chief at the Second Plenary Council of 1886. He was one of the editors of the complete works of Bishop England. In 1868 he was chosen by the unanimous voice of the American hierarchy as their theologian on the commission preparatory to the Vatican Council. He was assigned to the doctrinal commission presided over by Cardinal Bixio. During the debates on papal infallibility, a doctrine which he firmly held, he drew up for Archbishop Spalding the famous "Spalding Formula", destined as an olive-branch, in which the doctrine is rather implied than flatly declared. But for the others he stood by his convictions without making compromises. While at the council, Bishop Wood of Philadelphia, his school-fellow at the Propaganda, perfected arrangements by which Dr. Corcoran took a theological chair in the newly-opened seminary at Overbrook, near Philadelphia. This position he retained until death, devoting on the close of his long years, a call to the Catholic University at Washington. In 1876 the "American Catholic Quarterly Review" was founded, and Dr. Corcoran was made chief editor. His able articles and book notices were the principal source of its success. (For a list of his contributions see General Index of the Review. Philadelphia, 1900, p. 15.) In 1883, when the archbishops of the United States were invited to Rome to prepare for the Third Plenary Council of Baltimore, they took Dr. Corcoran with them as secretary, and, at their request, he was permitted to be present and take notes at the sessions held with the three cardinals appointed by Pope Leo XIII as a special commission. The following year he was made a domestic prelate and assisted as secretary at the Plenary Council. That Monsignor Corcoran did not disburse to posterity works of any great size is explained by the circumstances of his life. He was too busy to write much on the various subjects of his time was occupied with his immense correspondence. He may be said to have been weighted down with "the solicitude of all the Churches", for such was the confidence which the bishops and clergy reposed in his judgment, that they sought his counsel at all difficult points of theology and canon law. He was apparently unconscious of his great gifts, claiming no superiority, and was extremely affable. His love for the Church, and his loyal adhesion to all her doctrines, were patent in all he said or wrote.

JAMES F. LOUGHLIN.

Corcoran, Michael, soldier, b. at Carrickveel, County Galway, Ireland, 21 September, 1827; d. at Fairfax Court House, Virginia, U. S. A., 22 December, 1883. His father was an army pensioner, and he himself joined the Royal Irish Constabulary when nine years of age. He resigned after three years' service and emigrated to New York in August, 1849. Here he soon became a leader among his fellow-countrymen. He enlisted as a private in the Sixty-Ninth Regiment of the State Militia, a command composed of Catholics of Irish birth or descent. He rose from the rank of a private to that of colonel, 25 August, 1859. The next year the Prince of Wales (afterwards King Edward VII of England) visited New York, and in the military parade given
in his honour Colonel Corcoran refused to offer the Sixty-Ninth Regiment to join. For this act of military disobedience he was placed under arrest by the State authorities and ordered on parole, but was not then brought to trial. The trial created much excitement all over the country, his Irish countrymen enthusiastically applauding his course, and the case was pending when the Civil War broke out. The proceedings were immediately quashed, and the Sixty-Ninth, with overwhelming odds, was one of the first regiments mustered into the service of the Confederacy on 23 April, 1861, to the defence of the Union. It participated with special gallantry in the first Battle of Bull Run, 21 July, 1861, in which action Colonel Corcoran was wounded and taken prisoner. He was kept in the Confederate prisons for thirteen months and then exchanged, and apart, special honor was paid to him. North brought him a series of popular ovations and testimonial dinners. He was commissioned a brigadier-general, at once raised a brigade of four regiments, which was called the Irish Legion, and, taking command of it, rejoined the army in Virginia in November, 1862. (1) The following year the Legion participated in several minor engagements, and while in camp at Fairfax Court House, Virginia, General Corcoran was thrown from his horse and died the same day from the effects of the accident. 

Chas. Corcoran and His Campaigns (Boston, 1860); Cammins, Irish American Historical Miscellany (New York, 1906); The Irish American (New York); The Pilot (Boston); Sir Richard Cobden; O'Connell, Memoirs of Gen. Thomas Francis Meagher (Worcester, 1891).

THOMAS F. MEEHAN.

Cord. CONFRATERNITIES OF THIS, pious associations of the faithful, the members of which wear a cord or cincture in honour of a saint, to keep in mind some special grace or favour which they hope to obtain through his intercession. Among Oriental peoples, and especially among the Jews, whose priests and prophets wore a cincture, the wearing of a belt or girdle dates back to very ancient times. Christ himself commanded his Apostles to have their loins girded. In the early Church virgins wore a cincture as a sign and emblem of purity, and hence it has always been considered a symbol of chastity as well as of mortification and humility. The wearing of a cord or cincture in honour of a saint is of very ancient origin, and is the first of the religious vocations. Both in the East and in the West. In the Middle Ages cinctures were also worn by the faithful in honour of saints, though no confraternities were formally established, and the wearing of a cincture in honour of St. Michael was general throughout France. Later on, ecclesiastical authority set apart special places or churches or hospitals, the houses or institutions, the friars and religious orders, and the members of those orders, were considered and regarded as confraternities. The number of cinctures in honour of the Most Precious Blood, Our Lady, St. Francis of Paul, and St. Philomena. There are in the Church three archconfraternities and one confraternity the members of which wear a cord or cincture.

(1) The archconfraternity of Our Lady of Consolation, or of the Black Leathern Belt of St. Monica, St. Augustine, and St. Nicholas of Tolentino.—According to an old tradition, St. Monica in a vision received a black leathern belt from the Blessed Virgin, who assured the holy widow that she would take under her special protection all those who wore it in her honour. St. Monica related this vision to St. Ambrose and St. Simplicianus; both saints put on a leathern belt, and St. Ambrose is said to have girded St. Augustine with it at his baptism. Later on it was adopted by the Hermits of St. Augustine as a distinctive part of their habit. When, after the canonization of St. Nicholas of Tolentino, it was proposed to give general reverence among the faithfultn, Eugene IV in 1439 erected the Confraternity of the Cincture of St. Monica, St. Augustine, and St. Nicholas of Tolentino, in the church of St. James at Bologna. In 1590 Thaddeus of Perugia, General of the Augustinians, united this confraternity and that of Our Lady of Consolation (founded in 1318 or, according to others, in 1493) to those confraternities which were established by Gregory XIII in his Bull "Ad ea" (15 July, 1575). The same pope raised this confraternity to the rank of an archconfraternity and enriched it with many indulgences. He further ordained that all confraternities of the black leathern belt should be aggregated to the archconfraternity at Bologna, in order to secure its privileges; in which union was enrolled by the special feast of this confraternity is the Sunday within the octave of the feast of St. Augustine (28 August). The members are obliged to wear a black leathern belt, to recite daily thirteen Paters and Aves and the Salve Regina, and to fast on the vigil of the feast of St. Augustine not belonging to his own observance.

(2) Archiconfraternity of the Cord of St. Francis.—After his conversion St. Francis girded himself with a rough cord in memory of the cords with which the Pharisees had girded themselves. He then took a white girdle with three knots came subsequently to form part of the Franciscan habit. According to Wadding, St. Dominic received the cord from St. Francis and always wore it under his habit out of devotion to the saint, his example being followed by the faithful. "Quis expositionis" (19 November, 1655), Sixtus V erected the Archiconfraternity of the Cord of St. Francis in the basilica of the Sacro Convento at Assisi, enriching it with many indulgences, and conferred upon the minister general of the Conventuals the power of erecting confraternities of the Cord of St. Francis in the churches of his own order and of aggregating them to the archconfraternity at Assisi. The same pope, in his Bull "Divinae caritatis" (29 August, 1687), granted new indulgences to the archconfraternity and empowered the minister general of the Friars Minor to erect confraternities of the Cord of St. Francis in the churches of his own order in those places where there are no Conventuals. Paul V, in his Bull "Cum certas" (2 March, 1607), and "Nuper archiconfrateramitatis" (11 March, 1607), revoked all spiritual favours hitherto conceded to the archconfraternity and enriched it with new and more ample indulgences. Both indulgences were confirmed by the Brief of Clement X, "Dudum felicis" (13 July, 1673). Finally, Benedict XIII in his Constitution "Sacrosancti apostolatus" (30 September, 1724), conceded to the minister general of the Conventuals authority to erect confraternities of the Cord of St. Francis in churches of the churches of the bishops or in those places where there are no Franciscans. New privileges and indulgences were conceded to the archconfraternity by two decrees of the Sacred Congregation of Indulgences dated 22 March, 1779, and 26 May, 1883. Besides the ordinary requirements necessary for the gaining of all plenary and partial indulgences, the wearing of the cord and enrolment in the records of the archconfraternity are the only conditions imposed on the members.

(3) Archiconfraternity of the Cord of St. Joseph.—The miraculous cure of an Augustinian nun at Antwerp in 1657 from a grievous illness through the wearing of a cord in honour of St. Joseph gave rise to the pious practice of wearing it to obtain the grace of purity through his intercession. The devotion soon spread over many countries of Europe, and in the last century was revived at Rome in the church of San Rocco and in that of San Nicolò at Venetia. Pius IX, in his Brief "Expositum nobis nuper" (14 March, 1862) enriched the confraternity with many indulgences. In 1860 sev-
eral new Indulgences were granted to the confraternity erected in the church of San Nicolò at Verona and by the privilege of 14th June 1655, issued against the Gregorian reform, the Confraternity of the Holy Name of Jesus was established. The members are obliged to wear a cord having seven knots, and are excommunicated for daily seven glories in honour of St. Joseph. They are mentioned in the statutes of the church and in the act of pontifical indulgence. In 1862, the Confraternity of the Holy Name of Jesus was created by Pius IX, in order to enjoy its spiritual favours and indulgences.

(4) Confraternity of the Confraternity of St. Thomas. — It was founded in the Church of St. Thomas Aquinas in the late 13th century, by St. Thomas Aquinas, as a means of promoting the spread of his teaching and making him accessible to all. It was later reorganized and enlarged under the direction of St. Thomas Aquinas himself and his followers, and it continues to this day as a society for the study of philosophy and theology.

The confraternity was chartered by Pope Gregory IX in 1234, and its members are required to wear a black cord with seven knots, to recite on Sunday seven Ave Marias in honour of St. Thomas. For the erection of and reception into this confraternity special faculties must be had from the superior general of the Dominicans. Its indulgences are granted on the feast of St. Thomas, the fourth Thursday of November (Teresa), and during the octave of St. Thomas (Benedict XIII, 1727, § 9) and in the decree of the Sacred Congregation of Indulgences (May 8, 1844). (See Arch-Confraternity.)

Cordella, See Recollects.

Cordella, CHARLES, English missionary priest, b. 5 October 1720; d. at Newcastle-on-Tyne, 26 January, 1791. He was the son of Charles Cordell and Hannah Darrell, of the well-known family of Sootney Castle and Calehill, Kent, and was educated first at "Dame Alice's School", Fennyhalgh, afterwards at Douai, where, in 1748, he began to study for the priesthood. He left the college on 10 June, 1748, for England, where he served the mission at Arundel (1749–55)., Rounday, in Yorkshire, the Isle of Man, and finally Newcastle-on-Tyne (1755–91). In 1778 the presidency of the English college at Saint-Omer was offered to him, but he would not accept it. He was a scholarly, book-loving man, of some note as a preacher. In politics he remained a staunch Jacobite. He published many translations and one original pamphlet, "A Letter to the Author of a Book called 'A Candid and Impartial Sketch of the Life and Government of Pope Clement XIV'" (1785). The translation includes "The Divine Office for the Use of the Laity" (4 vols., Sheffield, 1763; 2d ed., 1820, 2 vols., Newcastle, 1780); Berger's "Desai Self-refuted" (1775); Caraccioli's "Life of Pope Clement XIV" (1776); Letters of Pope Clement XIV (2 vols., 1777); Foreign's "Travels of Reason" (1781); "Manners of the Jews" (1781); "Manners of the Israelites" (1786); "Earlier Historical Catechism" (1786); and "Short Historical Catechism" (1786).

EDWIN BURTON.

Cordara, GIULIO CESARE, historian and littératueur, b. at Alessandria in Piedmont, Italy, 14 Dec., 1704; died there 6 March, 1785. The son of an illustrious and ancient family that came originally from Nice, young Cordara studied at Rome under the Jesuits, and became a Jesuit himself at the age of fourteen. Subsequently he taught in various colleges of the order, soon acquiring a great reputation not only for a knowledge of general literature, but especially for proficiency in poetry, rhetoric, and history. A brilliant, acute mind of the XVII, the founder of the Roman College, and a satirist on the Cabalists of the day, won for him admission into the Academy of the Arcadians. Several poetical works of his appeared under the pen name of Pameo Cassio. He was in high favour with the exiled Stuart, then residing in Rome, on account of an allegorical drama, "La Morte di Nice", which he composed in honour of the titular King James III, and a history in Latin of the revolution in Scotland and of Charles Edward Stuart, Prince of Wales, which some of his admirers took upon as his most finished production. His satires on "The Literary Spirit of the Times", published in 1737, are of a high order of merit. In them he pillories a class of contemporary writers who arrogated to themselves the literary censorship of their day, condemned the classification of the sciences and the methods of instruction in vogue, and even the accepted principles of taste. A seventh and revised edition was brought out at Augsburg in 1764. But the work by which he is perhaps best known is the "History of the Society of Jesus", Sixth Part, in two volumes, the first published in Rome in 1750, the second posthumously, by Father Ruggazzini in 1859, over a century later. This work was a continuation of the history of the Society by Orlandini, Sacchini, and Juvency and embraced the period of Mutius Vitelleschi, 1016–1033. It is in Latin and remarkable for the elegance, purity, and dignity of its style. He is also the author of a history of the German College in Rome, which contains a list of its distinguished alumni (Rome, 1770). When the Society of Jesus was suppressed, Cordara, who had been a member for more than half a century, withdrew from Rome to Turin and later to Alessandria, where the King of Sardinia had allowed some members of the Society to live there. Notwithstanding his advanced age and his new mode of life, Cordara continued his literary labours and published much in prose and verse. Sommervogel enumerates more than sixty works, large and small, of which he is the author. The citizens of his native town erected a marble statue to his memory, in the church of the Barnabites where he was interred.

EDWARD P. SPILLANE.
CORDIER (CORDERIUS), BALTRAMUS, exorcist and editor of patriotic works, b. at Antwerp, 7 June, 1592; d. at Rome, 24 June, 1650. He entered the Society of Jesus in 1612, and after teaching Greek, moral theology, and Sacred Scripture, devoted himself to translating and editing MSS. of Greek canonists and other Fathers of the Church; he also searched the libraries of Europe. He published the following: (1) "Catena s. Gregorii quinque Patrum grecorum in S. Lucam" (Antwerp, 1628); (2) "Catena Patrum grecorum in S. Joanneum" (Antwerp, 1630); (3) "Joannes Philoponin in cap. I Genesis. recens. et emend. (Antwerp, 1630); (4) "S. Cyrilli apologiae morales" (Vienna, 1630); (5) "Opera S. Dionysii Aropagitis cum S. Maximi scholis" (Antwerp, 1634); (6) "Expositio Patrum grecorum in Psalmos" (Antwerp, 1643–46); (7) "Symbolae in Matthaeum" (2 vols., of which, however, only the second is by him; Toulouse, 1646–47); (8) "S. Dorothei archimandritae institutiones asceticae" (Antwerp, 1646); (9) "S. P. N. Cyrilli archiepiscopi Alexandrini homiliae XIX in Jeremiam" (Antwerp, 1648)—in this case, as in a few others, his critical acumen was at fault; these homilies are Origen's. He is said also to have been a contributor of some of the later portions of the Book of Job; "Job Illustratus" (Antwerp, 1646; reprinted in Migne's "Cursus S. Scripturae", XIII and XIV, and in Campan's edition of Cornelius a Lapide).

SOMMERJOEGEL, Biblioth. de la c. de J., II, 1438, s. v.; EVERTS, "Bibl."

CORDOVA, DIocese OF (CORDUBENSI), in Spain, formerly suffragan of Toledo, since 1851 of Seville. It includes the province of the same name, with the exception of a few parishes that pertain to the Archdiocese of Seville, while in return Cordova takes in a portion of the civil province of Badajoz. The Gospel, it is believed, was preached there in the Apostle's time, and it being said that the Apostles St. James the Greater and St. Paul, while preaching in various cities of Spain may have sent thither some of their disciples; Cordova (Colonia Patrica) was then the chief city of Bética, and the centre of Andalusiæ life. The name of the apostolic founder of the See of Cordova is unknown, as the oldest extant documents do not antedate the third century. The conditions of the Christian religion in this early period were quite similar to those which obtained elsewhere in the Roman Empire—persecution, suspicion, denunciation, enforced professional, etc. Many of its martyrs, Faustus, Januarius, and others, suffered at Cordova; their relics were afterwards eagerly sought by the other churches of Spain, and even in Gaul and elsewhere. The earliest known bishop (though not the founder of the see) is Severus, about 279; he was followed by Gratius and Becius. In 294 the famous Hosius became Bishop of Cordova and immortalized it by his resistance to Arianism. Fifteen bishops governed the see from the death of Hosius in 357 to 693, from which period to 839 no bishops are known. All ecclesiastical records, doubts, perish in the course of the Arab domination that began in 711. During this time, the faithful could, it is true, worship freely, and retain their churches and property on condition of paying a tribute for every parish, cathedral, and monastery; frequently such tribute was increased at the will of the conqueror, and often the living had to pay for the dead. Many of the faithful then fled to Northern Spain; others took refuge in the monasteries of the Sierras, and thus the number of Christians shrank eventually to small proportions.

In 786 the Arab Caliph, Abd-er-Rahman I, began the construction of the great mosque of Cordova, now the Cathedral Church. Bishop Lucia was the first to take part in the preparation of the site and foundations. Though they suffered many vexations, the Christians continued to enjoy freedom of worship, and this tolerant attitude of the amirs seduced not a few Christians from their original allegiance. Both Christians and Arabs co-operated at this time to make Cordova a flourishing city, the elegant refinement of which was unequalled in Europe. Under Abd-er-Rahman II there came a change in the attitude of the Arab rulers, other and more fierce persecutions, destruction of the churches. Christians were accused of abusing the memory of Mohammed, of entering mosques, and of conspiracy against the Government. Saracen fanaticism ran high. Among the martyrs of this period are Perfectus, Florus, Maria, numerous nuns of the monastery of Tabana in the tribe of Alamin, Aurelia, Abundius, Amator, and others; the names of more than thirty are known. The most famous of these martyrs is St. Eulogius, priest and abbot, who was in 858 chosen Archbishop of Toledo. For his encouragement of the confessors by his writings, "Memorialis sanctorum", "Apologeticus sanctorum martyrum", "Documementum martyrii", "Epistles", he was eventually put to death in 859. His life was written (P. L., CXV, 705–32) by Paulus Alvarus, a Scholastic priest and theologian, who was not a martyr, Baudusin not-withstanding (Eulogius und Alvarus, Leipzig, 1872). After his death the See of Cordoba was vacated, the government under succeeding bishops, Saul (850) and Valentins (862); it co-operated with the Anthropomorphic heresy of Hoestegasis and other causes to bring about a gap of a century and a half in the list of the bishops of Cordova. In 962 Abd-er-Rahman III was succeeded by his son Al-Hakam. Owning the lands which the Christians of Cordova then enjoyed, some knowledge of their condition has been preserved, among other things the name of their bishop, Joannes, also the fact that, at that period, the citizens of Cordova, Arabs, Christians, and Jews, enjoyed so high a degree of literary culture that the city was known as the "Athens of the Moors". All this made the country eager to drink at its fountains of knowledge. Among the men afterwards famous who studied at Cordova were the scholarly monk Gerbert, destined to sit on the Chair of Peter as Sylvester II (999–1003), the Jewish rabbi Moses and Maimonides, and the famous Spanish-Arabian commentator on Aristotle, Averroes (Bouret, De Scholæ Cordubæ christianæ sub Omniatarum imperio, Paris, 1853). On account of the wretched administration of the successors of Abd-er-Rahman III, the invasion of the Almohades (1097), and the continuous peninsular warfare between Moor and Christian, the holdings of the Christians did not equal their former power in 1236. The long period (524 years) of humiliation of the Church of Cordova now came to an end, and a new epoch of prosperity and Christian religious service began which was inaugurated by the piety and generosity of the saintly conquisitador (Haincæ, Christianity and Islam in Spain, London, 1889, 756–1031). Reference has already been made to the conversion of the mosque into a cathedral; several parishes were also established, and especially convents were built for various religious orders, Dominicans, Franciscans, Mercedarians. A cathedral chapter was established, some of the earlier Christian churches were restored, and some mosques were converted into churches. The diocese, that in the earlier Hispano-Roman period had been very large, began to expand again and had added to it many cities of the Archdiocese of Seville, which was yet in the power of the Moors. The newly acquired territory was soon occupied by Christian knights and Christian families, owing to the privileges and franchises granted by St. Ferdinand to such a great extent. Bishop Lucas, consecrated about 1237, began a new episcopal series which has remained unbroken, the bishop consecrated in 1898 being his seventy-third successor.
CORDOVA

Since the expulsion of the Moriscoes and Jews at the end of the fifteenth century, the Catholic worship alone has been exercised in the diocese, if individuals belonging to a few sects are excepted. It is true that in the eighteenth century the religious fervor of the Catholics of Cordova has considerably diminished, owing to the assimilation by the civil laws of the liberal principles of the French Revolution, the legalized usurpation of ecclesiastical property, and a positivism nourished by the literature, the theatre, and the free press of the age. In this way, much of the Catholic charity and zeal which distinguished the centuries after the reconquest, when bishops, clergy, and faithful rivalry one another in generous endowment of hospitals, asylums, and schools, and placed at the disposal of the Church a rich patrimony in the capes of its clergy and a continuous and splendid public worship. A steady sectarian propaganda, a lowering of the moral tone, and religious ignorance have made many Cordovans quite lax in their Catholic practice; nevertheless, they do not at all wish to appear as deserting the Catholic Faith. The palace of the government faces the former mosque, and in it are located all the administrative offices of the diocese. The cathedral clergy is composed of twenty canons, fifteen beneficed clerics, and five ecclesiastics charged with various duties. There are 124 parishes, about 500 priests, and 299 churches and chapels. The population of the diocese is about 430,000; that of the city in 1900 was 58,275. The following religious orders and congregations have houses in the city: Jesuits, Carmelites, Capuchins, Dominicans, Trinitarians, Salesians, and Diocesan Missionaries of the Sacred Heart of Mary, the last named founded in 1878. In the provinces, or five other places in the diocese there are also religious houses, among them convents of Franciscans and Augustinians.

In the near vicinity of Cordova is the solitude (desierto) of Our Lady of Belén, a monastery of (fourteen) anchorites under a common rule and leading a very austere life; they do not take sacred orders, and are governed by a brother superior (hermano mayor); their spiritual director is a secular priest. The Salesian Fathers alone are engaged in teaching; the other orders devote themselves to the contemplative life or conduct public worship. There are seventy-seven religious communities of women, of whom some have their houses and are scattered throughout the diocese. They number in all 1106 sisters. Some lead the contemplative life, others devote themselves to teaching or to works of charity. The twelve charitable institutions are cared for by 145 Sisters of Charity; among such institutions are a boys’ orphan asylum with 425 inmates, and a foundling asylum containing 131 children. There is also a charitable restaurant (Comedor de la Compadrazgo) of the diocese, and an old and abundant food for workingmen and poor families at very modest prices. The religious educational institutes of the city for both sexes number twelve, and the pupils attending them 2023. The college of the Salesian Fathers has 325 boys. Outside of Cordova there are several educational and charitable institutions. The Grand Seminary of San Pelagio at Cordova was founded in the sixteenth century by Dr. Mauricio Pazos y Figueroa, and enlarged in the eighteenth by Cardinal Salazar. It has fifteen professors and 125 ecclesiastical students. Attached to the college is a boys’ charitable institution devoted to works of charity, or to the support of public worship. Of the early sympos held at Cordova, two are important, those of 839 and 852. The Acts of the former were first printed by Florés (España sagrada, XV; Hefele, IV, 99). It was held against fanatical heretics, probably from Northern Africa, and known as “Casiani”, who professed loose doctrines regarding marriage, rejected veneration of images, demanded no religious in fasting, declared unclean certain foods, insisted on receiving the Eucharist Host each in his own hand, etc. The synod of 852 reproved those Christians who voluntarily sought the occasion of martyrdom and declared that such had no right to the veneration due to martyrs (Mansi, XIV, 970; Hefele, IV, 179).

CORDOVA, DioCESe OF (CORDUBENSIS IN AMERICA), in the Argentine Republic, suffragan of Buenos Aires. It was created in 1570, but was vacant from 1819 to 1830, and again from 1841 to 1853. It has 46 parishes, 49 churches and chapels, and a vast extent (it includes the two states of Cordova and Rioja, which in 1895 had about 570,000 souls), has two auxiliary bishops. The population of the episcopal city is 55,500; one of the two national universities, the second oldest in the New World (1573), is located there, also a national observatory, and a meteorological bureau.

CORDOVA, JUAN DE, b. 1503, at Cordova in Andalusia, Spain, of noble parents; d. 1585 at Oaxaca, Mexico. It is not certain whether Cordova was his family name, or whether he assumed it from his native city after he became a Dominican. He first embraced a military career, serving in Flanders as ensign. He then went to Mexico, and accompanied Coronado to New Mexico in 1540-42. In 1543 he entered the Dominican Order at Mexico, and was sent to Oaxaca in 1548, where he acquired the Zapotecan idiom and ministered to the Indians. He was named provincial in 1568. Brought up under the ascetic and refractory discipline of his order, he was, in his whole life, thoroughgoing with such rigour and severity, that there were many complaints against him to the chapter that congregation at Yahuhtilán in 1570. He refused to comply with the admonitions of his superiors and change his methods, and was accordingly suspended. With the explanation: "Benedictus Deus", he received the notification of his deposition, and, declining the interference of the Viceroy Enriquez in his favour, retired to his convent at Tlaxcochauayahua in Oaxaca, where he died after twenty-five years spent in retirement and in the study of the Zapotecan language and the customs of the natives. His knowledge of the language was thorough, and he composed a "Vocabulario de la Lengua Zapoteca, é Diccionario Hispano-Zapoteco" (Mexico, 1671, or, according to Ycazbalceta, 1578). The "Arte en Lengua Zapoteca" appeared in 1578 at Mexico. Besides the linguistic part, this book contains a short but valuable note on the rites and superstitions of the Zapotecan Indians, and an equally important account of their method of reckoning time, which has been republished by Manuel Orozco y Berra.

MANUEL GARCIA OBUNA.
INTERIOR OF THE CATHEDRAL, CORDOVA

MOSQUE, BEGUN BY ABD-EL-RAHMAN I IN 786; COMPLETED IN 1001. AREA OF BUILDING 336 FEET BY 395 FEET

ORIGINAL NUMBER OF COLUMNS 1200
Core, Dathan, and Abiram (םַדָּן, אֵבִיָּר; leaders of a revolt against Moses and Aaron (Num., xvi)). Core was the son of Issaar, of the Cashtie family. Dathan and Abiram were the sons of Eliab, the son of Phallu, of the tribe of Ruben. A fourth leader is mentioned, Hol, the son of Pheleth, likewise a Rubene; but as the name does not again appear, a corruption of the text is rightly suspected. Core was the head of the rebel priests, as his name is called before that of the massive tribe of the people under Core, who is not a Levite, against the ecclesiastical authority of the tribe of Levi; and a third, which is merely a retouched version of the second, telling of the struggle of the non-Aaronic Levites under Core, who is now a Levite, against the temple. The story presents nothing improbable. We need not search deeply into history to find similar examples of parties with different, or even conflicting interests, uniting for a common end. It may, it is true, be resolved into two fairly complete narratives. But many an historical account can thus be divided by using the arbitrary methods here applied, picking out sentences or parts of sentences here and there and rejecting the whole unless it militates against division. The literary argument is too weak and too uncertain to base a theory upon it.

F. Bechtel.

Coré, Vicariate Apostolic of, coextensive with the Empire of Corea; it was created a distinct vicariate Apostolic, 9 September, 1831. But for nearly half a century before that time Corea had many fervent Catholics. In a manner perhaps unique in the annals of the Church, the Faith was introduced without preaching and before any missionaries had penetrated the country. The educated people, more eager for new knowledge the more their country was jealously closed, procured through the annual embassy to Peking all the books possible upon science, literature, etc. Some Christian books fell into their hands, and, the grace of God aiding, they recognized the truth. One of them, Ni-seung-houn, undertook in 1784 the journey to Peking and was baptized there, under the name of Mow-hon. On his return he baptizid his companions, who, like himself, were men of learning and high position. That their faith was firm, events proved. In 1791 Paul Youn and Jacques Kouen sealed their belief with their blood for having refused to offer sacrifice upon the occasion of the death of their relatives. Connected by reason of its origin with the Church of Peking, Corea was dependent upon that vicariate until 1831. About the year 1794, a Chinese priest, Father Jacques Tiyou, was sent to Corea. Upon his arrival he found about 4000 faithful. After seven years of a heroic and fruitful ministry he was arrested and put to death, 31 May, 1801. Before and after him numerous Christians suffered martyrdom with admirable fortitude. Among them particular mention is due to the married couple, Jean Ryou and Luthgade Ni. Shaken and decimated by the tempest, and deprived of its priests, the Christian religion was preserved by the zeal of the fervent people, voluntary catechists, who rallied the dispersed, and made unheard-of efforts to obtain pastors from the Bishop of Peking or the sovereign pontiff. It was at this time that the vicariate Apostolic was established, and confined to the Society of Foreign Missions of Paris. The first vicar Apostolic named, Mgr. Bruniquel, was consecrated in the rose-color church of Siam. He started upon his journey in 1832, suffered incredible hardships in passing through China and Mongolia, and died in Tatary, just as he was completing arrangements to enter the country of his mission. His companion, Father Maubant, succeeded...
In crossing the northern frontier by way of Eui-typou, and in January, 1836, entered the closed country. The following year Father Chastan joined him there, and, a little later, the new vicar Apostolic, Mgr. Imbert. Under their ministration Christianity soon flourished. All this went on with the greatest secrecy; the least indiscretion would have caused all to be lost. The edicts proscribing Christianity remained as ever, but, as usual, both of these edicts lived as upon the eve of battle, preparing themselves for martyrdom.

The persecution broke out in 1839, many Christians were arrested, tortured, and put to death; the missionaries were hunted without mercy. Mgr. Imbert was taken, and, saying that the murder of his two companions would cause the persecution to cease, he directed them to deliver themselves up; they responded heroically to the call, and all three were beheaded, 21 September, 1839. It was not until 1845 that a new bishop, Mgr. Ferроé, succeeded in entering Corea; he brought with him a young missionary and also the first Corean priest, Andrée Kim, who had made his studies at Macao, and who was taken and executed the following year. His cause, and those of the Venerable Mgrs. Imbert, Maubant, and Chastan, and of the principal Corean martyrs, eight, were introduced into Rome, by a decree of 24 September, 1857. The country remained more firmly closed than ever, the Christian religion more severely proscribed, and the entrance of apostolic workers more perilous and difficult. Admission to Corea was most often accomplished by way of the sea, a Chinese barque bringing the missionaries with great secrecy to the coast of Corea, where a Corean ship, under cover of the darkness, would go to meet them. Father Maistre spent ten years in vain attempts and useless expeditions before he was able to set foot in Corea. Notwithstanding these difficulties, numerous local and foreign missionaries, during twenty years, the mission prospered. In 1866 it counted upwards of 25,000 faithful, two bishops, and ten missionaries. A terrible persecution then broke out, the two bishops and seven missionaries were taken and executed: Mgr. Berneux, vicar Apostolic, with Fathers Beaufort, Doré, and De Bretenières (8 March); Father Poulhié, pro-vicar, and Father Petitnichal (10 March); and Mgr. Daveluy, the conducer, with Fathers Aumaitre and Huin (30 March). Numbers of the laity also suffered martyrdom, while others perished of distress and hunger in the mountains. The persecution lasted 72 years; schools were opened, and twenty of the principal Christians, in 1901, to the Sacred Congregation of Rites. The three surviving missionaries, unable to maintain themselves in the country, were obliged to return to China. This persecution, which occurred during the second year of the reign of the emperor who abdicated in 1907, was not precisely his fault. During his minority the power was exercised by his father, known under the name of Tai-ouen-kou, prince-regent. Of a suspicious and violent character, the regent believed that the extermination of the Catholics in Corea was the best policy to follow. Later he recognized his mistake and repented of it.

A French attempt, known as the Kang-ho expedition, made to avenge the murder of the French missionaries, was not prosecuted with sufficient vigour, and merely served to revive the persecution which lasted as the kingdom remained in power. In 1876, after an interval of ten years, the new vicar Apostolic, Mgr. Ridel, succeeded in sending two missionaries to Corea; he himself entered the following year with two others. But after some months of sojourn in Seoul his retreat became known and he was thrown into prison. Upon the demand of the French minister to Peking, the Corean Government consented to send him back to China; in 1879, Father Despout, arrested in turn, was also sent back after several months of captivity. The bloody era was closed; nevertheless, the missionaries were obliged to continue their life of seclusion. Liberty came to them only with the treaty of commerce, concluded with the different powers towards the year 1884. Upon their return in 1876 they found but 10,000 Christians; since then this number has grown from year to year. The Catholic coreans numbered in 1885, 14,039; 1890, 17,577; 1895, 25,998; 1900, 42,441; 1905, 58,593; and in 1907, 63,340. From 1876 dates the spread of the ordinary mission labours which the persecution had not permitted to develop.

In 1888 the State of Chartres was called to take charge of the orphanages. In each district some chapels have been built, with residences for the missionaries. In 1892 a seminary was built at Ryong-saun near Seoul. The quasi-cathedral church of Seoul was solemnly consecrated 29 May, 1898. The parish schools have been opened anew, or organized upon a better footing. It has even been possible to open in the great centres a few schools for girls, a thing which Corean usage would never before have permitted. In 1875 the missionaries published a dictionary and a grammar in French and Corean. The mission has also developed a press for the printing of Corean Catholic books, and of a weekly Corean Catholic newspaper, founded in 1906, which counts more than 4000 subscribers. As a striking event of this period may be noted the conversion to Catholicism of the princes, the mother of the emperor and the true wife of the terrible regent. Christian in her heart even before the persecution of 1866, she was baptised and confirmed 11 October, 1896, but in great secrecy and unknown even to those about her. The following year she received the other sacraments, coming to the Sacraments of Penance and of Holy Eucharist, and died piously 8 January, 1898. The Vicars Apostolic of Corea have been: Barthélemy Bruguère (1831-35); Laurent-Marie-Joseph Imbert (1837-39); Jean-Joseph Ferroé (1843-53); Simon-François Berneux (1854-66); Marie-Antoine Nicolas Daveluy (1857-69); Félix Clair Ridel (1870-94); Jean-Marie-Gustave Blanc (1884-90); Gustave-Charles-Marie Mutel (1890—).

The following statistics show the state of the missions in 1907: 1 bishop; 46 French missionaries; 10 Corean priests; 11 French sisters; 41 Corean sisters; 72 schools for boys, with 1,014 pupils; 2 orphanages, for girls, with 191 pupils; 2 orphanages, with 28 boys and 261 girls; 379 orphans placed in families; 2 pharmacies; 1 seminary, with 22 preparatory students and 9 theological students; 48 churches or chapels; 48 districts; 851 Corean parishes; 63,340 baptised Christians; 5,500 catechumens under instruction. (See map of Corea.)

G. Mutel.

Corea, Archidioceze of.—Corea is one of the Ionian Islands, at the entrance of the Adriatic, opposite the southern coast, from which it is separated by the narrow channel. Its modern name is an Italian corruption of Coppol (pronounced Corif), the Byzantine Greek name for the chief town of the island. The ancient name for both island and city was Cereyra or Coreyra. This has been identified with the Homeric Scheria, where returned Alcmeon, king of the Phaeacians, the host of Ulysses, and Nausicaa's.
father. In 735 n. c. the island received Corinthian colonists led by Chersicrates. Its navy and trade increased to such an extent that as early as 664
n. c. it could wage war upon Corinth. During the Peloponnesian War, when allied with the Athenians, it sent twenty talents to Athens as its sessor. But internal strife soon caused the decay of its power; while the people sided with the Athenians, the aristocracy were helped by the Corinthians. From the rule of the Macedonians Corfu passed to that of the Romans. Under the Byzantines it became effectively the capital of the Ionian Islands and of the neighbouring cities in Epirus (Presessa, Buthrotum, etc.), and signalled itself by courageous conflicts with Dalmatians, Bulgars, and Saracens. About the end of the twelfth century it formed a duchy under the despotes of Epirus. Charles of Anjou, King of Naples, conquered it in 1274. It recovered its independence by expelling the Neapolitan garrison and took refuge in the protectorate of Venice. After the capture of Constantinople, Mohammed II sent an army which landing on the island, was turned away. The inhabitants were spared, and the town was captured by the Turks and the Russians (1797). The Seven Islands were united in a republic under a Turkish and Russian protectorate. The Treaty of Tilsit gave them again to France in 1807, but in 1809 the islands, with the exception of Corfu, fell into the power of England. In 1815 the United States of the Ionian Islands were put under the protectorate of Great Britain, with Corfu as capital and residence of the governor. On 8 March, 1864, the islands were annexed to Greece, and since this time Corfu (Gr. Kerkyra), with Paxos, Santa Maria (Leukas), and Ithaca, etc., have formed a monarchical or province of the kingdom.

The island has a mild, salubrious climate. It is hilly, with rather barren valleys, and produces corn and oil. Brimstone and marble are among its exports. The whole population is about 70,000. Italian is still much used, together with Greek, chiefly among the old and educated population. Corfu is situated on the eastern coast and boasts of a broad and good port. It exhibits ruins of a temple of Poseidon, a cenotaph of Memories, and a statue of Schilenburg. In 1861 the late Empress Elizabeth of Austria built there, in the purest Greek style, her magnificent palace, the Achilleion, named after a colossal statue of Achilles on one of the terraces of the park; this palace has been bought by the Emperor of Germany. The population of the island is about 17,000; 5000 Jews, 4000 Catholics, the rest orthodox Greeks.

According to legend the Church of Corfu was founded by St. Jason, a disciple of St. Paul, but the first known bishop is Apollodorus, present at Nicea in 325. It was at first a suffragan of Nicopolis in Epirus Vetus, but in the Middle Ages was made a metropolis. Since 1000 it has again become a simple bishopric. (See "Echos d' Orient," 111, 285 sq.) Among its distinguished prelates were St. Arsenius, a tenth-century author of homilies, and Georgius Bardanes, in the thirteenth century, a fiery adversary of the Latins. (See Lequin, II. 145.)

The island honours as its patron the celebrated St. Spyridon, whose relics lie in the Greek cathedral. Situated on the hinterland of Corfu, Centuries of Church eclesiarchialsee. The archiepiscopate includes Paxos, Antipaxos, other islets, and several localities in Epirus, between Parga and Saso; the Catholic, however, have almost completely disappeared except in Corfu. There is but one parish, with six churches or chapels, and some ten priests. The Sisters of Our Lady of Compassion conduct a school and an orphanage. (For the episcopal list see Lequin, III. 577.) It was seized by Greeks, and at the beginning of the nineteenth century, under the leadership of Gennadius, a converted Jew, the first bishop was appointed. Among the archbishops, the famous Benedictine Cardinal, Angelo Maria Quirini, who died in Italy in 1750, deserves mention.

S.

Corfu (Cauria), Diocese of (Cauriensis), in Spain, suffragan of Toledo; it includes nearly the entire province of Cáceres, with the exception of a few parishes that belong to the Diocese of Plasencia. The first mention of a Diocese of Corfu is in 399 when its bishop, Jacintus, subscribed the acts of the Third Council of Toledo. Under Visigothic rule Coria was a suffragan of Merida. During the Arab conquest the episcopal list was continued by means of titular bishops. One of them, Jacobus, was deposed in 798. The bishops later assisted at the consecration of the church of Compostela in 876. After the reconquest of the city (1142) Alfonso VII turned the mosque into a cathedral, and had it reseated in honour of the Blessed Virgin and all the saints. The first bishop of the new see was Inigo Navarro. The archbishops were: Catholics, 171, 941; priests, 250; parishes, 124; churches, 159; chapels, 186.

EDUARDO DE HINOJOSA.

Corinth (Corinthius), a titular archiepiscopal see of Greece. The origin of Corinth belongs to prehistoric legend. About 1100 n. c. this city, delivered from the Argives by the Dorian invasion, became the centre of the Sacred rule in Pelo- A.D. 404 it waged successful wars against neighbouring cities, including Athens. A little later, under the tyranny of the Bacchiadæ (750-657 n. c.), it founded many colonies, among them Corcyra and Syracuse. About 657 n. c. a revolution substituted for tyranny a government based on popular election. The city now took no great part in Greek history, except as the scene of the Isthmian games and by the transit duty it imposed on all goods passing by its citadel. Its name is scarcely mentioned during the Mede wars, and after beginning the Peloponnesian war (432-404) it handed the direction of it over to Sparta and later on abandoned its ally. The foreign policy of this subservient vassal of Philip (later the federal centre, but not the inspirer, of the Achaean league) was never positive and domestic; its true glory was its luxury, riches, and artistic culture. It gave its name to the third and most ornamental of the orders of Greek architecture. Corinth was captured and plundered by Mummius (146 n. c.), restored and embellished again by Cesar and Hadrian, and ravaged in turn by the Hermil, Visigoths, and Slavs. In 1205 it was captured by the French, who gave it up to the Venetians, by whom it was held, excepting brief intervals, until 1715. The Turks left it in 1821, and in 1858, after a severe earthquake, it was transferred to the western shore of the gulf. The new town, in the provinces of Argolis and Corinthia, has about 4500 inhabitants, and exports dried currants, oil, corn, and silk. The ancient site is now occupied by a wretched village, Palea Corinthía or Old Corinth has also a few buildings, partly built where temples had formerly stood. Near by are the lofty Acropolis (Acro-Corinthus) and ruins of a temple and amphitheatre. The ship canal between the
Corinthians, Epistles to the—Introductory.

—St. Paul Founds the Church at Corinth.—St. Paul's first visit to Europe is graphically described by St. Luke (Acts, xvi-xviii). When he reached Troas, at the north-west corner of Asia Minor, on his second great missionary journey in company with Timothy and Silas (who had the confidence of The Twelve), he met St. Luke, probably for the first time. At Troas he had a vision of "a man of Macedonia standing and beseeching him, and saying: 'Pass over in to Macedonia and help me.' In response to this appeal he proceeded to Philippi in Macedonia, a region of Zealots, and he was there converted by preaching in the synagogue every Sabbath; and he persuaded the Jews and the Greeks." Of this period he says that he was with them "in weakness, and fear, and much trembling." The ill-usage he had received was still fresh in his memory, as, writing a month or two after Troas, he says: "When I recall how he had been "shamefully treated at Philippi". But when he was joined by Silas and Timothy, who brought him pecuniary aid from Macedonia, he became more bold and confident, and "was earnest in testifying to the Jews that Jesus is the Christ. But they gain saying and blasphemying, he took off his garments and cast them to the ground. Your blood be upon your own heads; I am clean: from henceforth I will go unto the Gentiles." He then began to preach in the house of Titus Justus, adjoining the synagogue. Crispus, the ruler of the synagogue, and his family, and several of the Corinthians were converted and baptized. Amongst these were Cnaeus, Stephanas, and his household, and the house of Fortunatus and Achalaeus, "the firstfruits of Achaea" (1 Cor., i, 14, 16; xvi, 15). The growing opposition of the Jews, however, and the wicked state of the city had a depressing influence upon him; but "the Lord said to Paul in the night, by a vision: Do not fear, but speak and hold not thy peace, because I am with thee; and no man shall set upon thee to hurt thee; for I have much people in this city. And he stayed there a year and six months, teaching among them the word of God" (Acts, xviii, 9-11). Many were converted; some of them noble, wealthy,
and learned, but the great majority neither learned, nor powerful, nor noble (I Cor., i, 20). During this long period the faith was planted not only in Corinth but innumerable cities: Athens, Galatia, the brother of Socrates (A.D. 54). Gallo, perceiving that it was a question of religion, refused to listen to them. The crowd, seeing this and supposing that it was a dispute between Greeks and Jews, fell upon the ring-leader of the latter (Soethenes, who succeeded Crispus as ruler of the synagogue) and gave him a sound beating in the very sight of them. He was killed, and all his belongings were confiscated, and St. Paul’s circular tour from Ephesus to Jerusalem, Antioch, Galatia, Phrygia, and back to Ephesus, “a certain Jew, named Apollo, born at Alexandria, an eloquent man, came to Ephesus, one mighty in the scriptures, and being fervent in spirit, spoke, and taught diligently in the scriptures that are of Jesus, knowing only the baptism of John.” Priscilla and Aquila fully instructed him in the Christian faith. In accordance with his desire he received letters of recommendation to the disciples at Corinth. “Who, when he was come, helped them very much who had believed. For he greatly impressed them with the words which he had heard by the scriptures that Jesus is the Christ.” (Acts, xvii., 27, 28.) He remained at Corinth about two years, but, being unwilling to be made the centre of strife, he joined St. Paul at Ephesus. From the inspired words of St. Luke, no mean judge, we may take it that in learned and eloquent he was in a fair with the greatest of his contemporaries, and that in intellectual powers he was not inferior to Jews like Josephus and Philo. He is likely to have known the latter, who was a prominent member of the Jewish community in his native city of Alexandria, and had died only fourteen years before; and his deep interest in Holy Scripture would certainly have led him to study the works of Philo. The eloquence of Apollo, and his powerful applications of the Old Testament to the Messians, captivated the intellectual Greeks, especially the more educated. That, they thought, was true wisdom. They began to make invidious comparisons between him and St. Paul, and he was accused of profaneness. His experience at Athens, had purposely confined himself to what we should call solid catechetical instruction. The Greeks dearly loved to belong to some particular school of philosophy; so the admirers of Apollo laid claim to a deeper perception of wisdom and boasted that they belonged to a Christian school of thought. He was an Alexandrian preacher. The majority, on the other hand, prided themselves on their intimate connexion with their Apostle. It was not zeal for the honour of their teachers that really prompted either of these parties, but a spirit of pride which made them seek to put themselves above their fellows, and prevented them from humbly thanking God for the grace of being Christians. About this time there came from the East some who had possibly heard St. Peter preach. These regarded the others as their spiritual inferiors; they themselves belonged to Cephas, the Prince of the Apostles. Commentators are of opinion that this party spirit did not go so deep as to constitute formal schism or heresy. They all met together for prayer and the celebration of the Sacred Mysteries; but there were hot disputes and many breaches of fraternal charity. The Fathers mention only three parties; but the text obviously implies that there were more. The Cephas, the apostle, himself said, “I am of Christ.” This view is now held by several Catholics, and by many non-Catholics. What was the nature of this party it is difficult to determine. It has been suggested that a few of those who were specially endowed
with spiritual gifts, or charismata, boasted that they were above the others, as they were in direct communication with Christ. Another explanation is that these were the first Corinthians, of that they claimed to follow His example in their reverence for the Law of Moses. At any rate, the statement, "I am of Christ!", seemed to make Christ a mere party name, and to imply that the others were not Christians in the genuine and perfect sense of the word.

St. Paul, hearing of this state of things, sent Timothy together with Erastus (probably the "treasurer of the city" of Corinth—Rom., xvi, 23) round by Macedonia, to put things in order. Soon after they left, Stephanas and other delegates came with a letter from the Corinthians. This letter contained some self-glorification and requested the Apostle to give a solemn ratification of the practices which they proceeded to perform, but it made no mention of their shortcomings. By this time he had become fully aware of the grave state of affairs amongst them. Besides party strife, some made light of sins of impurity. One man went to the extent of marrying his stepmother, while another still continued amongst the pagans. So far were they from showing horror that they treated him in a friendly manner and allowed him to be present at their meetings. As matters were too pressing to wait for the arrival of Timothy, St. Paul at once wrote the First Epistle to the Corinthians (ix, 1). Then he went to Titus at Assos.

Importance of the First Epistle.—This is generally regarded as the greatest of the writings of St. Paul by reason of the magnificence and beauty of its style and the variety and importance of its contents. So splendid is its style that it has given rise to the conjecture that St. Paul took lessons in oratory at Ephesus; but this is highly improbable. St. Paul's was not the type of eloquence to be moulded by mechanical rules; his was the kind of genius that produces literature on which rules of rhetoric are based. If the Corinthians were impressed by the eloquence of Apollo, they could not help feeling, when they heard and read this Epistle, that here was an author capable of bearing comparison not only with Apollo, but with the best that they could boast in Greek literature, of which they were so justly proud. Scholars of all schools are loud in its praise. The striking similes, figures of speech, and telling sentences of the Epistle have made it one of the finest in the literature of the Church.240 Moreover, in Smith's "Dict. of the Bible," says that chapters xiii and xv are among the most sublime passages, not only in the Bible, but in all literature.

But this Epistle is great not only for its style but also for the variety and importance of its doctrinal teaching. In no other of his Epistles does St. Paul touch on so many different subjects; and the doctrines which are touched upon in (many cases only incidentally) are important as showing what he and Silvanus, a disciple and trusted delegate of the older Apostles, taught the early Christians. In some of his letters he had to defend his Apostolate and the freedom of Christians from the Law of Moses against heretical teachers; but he never had to defend himself against his bitterest enemies, the Judaizers, for his teaching on Christ and the principal points of doctrine contained in these two Epistles, the obvious reason being that his teaching must have been in perfect harmony with that of the Twelve. He distinctly states in ch. xv, 11, "For whether I, or they (The Twelve Apostles), so we preach, and so you have believed."

Divisions of the First Epistle.—Instead of giving a formal summary of the contents of the Epistle, it may be more useful to give the teaching of the Apostle, in his own words, clasping together, as much as possible, the order of the Creed. With regard to arrangement, it may be stated, in passing, that the Epistle is divided into two parts. In the first six chapters he rebukes them for their faults and corrects abuses: (1) He shows the absurdity of their divisions and bickerings; (2) deals with the scandalous case of incest; (3) their lawsuits before pagans; and (4) the want of sufficient honor of impurity in some of them. In the second part (the other ten chapters) he solves the difficulties which they proposed to him and lays down various regulations for their conduct. He deals with questions relating to (1) marriage, (2) virginity, (3) the use of things offered to idols, (4) proper decorum in church and the celebration of the Eucharistic sacrifice, or Charismata, (5) the Resurrection, (7) the collections for the poor of Jerusalem.

Its Teaching.—God the Father (passim).—"Yet there is but one God, the Father, of whom are all things, and we unto him; and one Lord Jesus Christ, after that are the eleven. Then why came ye by me? Compare II Cor., xiii, 13: "The grace of our Lord Jesus Christ, and the charity of God, and the communication of the Holy Ghost be with you all." (Bengel, quoted by Bernard, calls this an Aegrium testificationum to the Blessed Trinity.)—Jesus Christ. (1) "Grace to you, and peace from God our Father, and from the Lord Jesus Christ" (i, 3). "You are called unto the fellowship of his Son, Jesus Christ our Lord" (i, 9). "Christ the power of God and the wisdom of God" (i, 24). "We speak the wisdom of God in a mystery, a wisdom which is hidden, which God ordained before the world, unto our knowledge as it is now revealed by the Spirit." (ii, 7). "The word of God is compared to them that are saved, is the power of God" (i, 18). "We preach Christ crucified, unto them that are called Christ the power of God and the wisdom of God" (i, 23, 24). "But of him are you in Christ Jesus, who of God is made unto us wisdom, and justice, and sanctification and redemption" (i, 30). "For I judged myself not to know any thing among you, but Jesus Christ, and him crucified" (ii, 3). "For Christ our pasch is sacrificed!" (v, 7). "For you are bought with a great price" (vi, 20—cf. i, 13, 17; vii, 23; viii, 11, 12). (3) The following passage probably contains fragments of an early creed: "The gospel of Christ, which I preach among you, which is written of you in the Epistle of the first, and second Corinthians" (ii, 4). Of course, there were the Five hundred brethren at once: of whom many remain until this present, and some are fallen asleep. After that, he was seen by James, then by all the apostles. And last of all, he was seen also by me, as by one born out of due time" (xv, 1). "Have not I seen Christ Jesus our Lord?" (ix, 8). "And if Christ be not risen again, then is our preaching vain, and your faith is also vain" (xv, 14). "But now Christ is risen from the dead, the firstfruits of them that sleep" (xv, 20—cf. vi, 14). (4) "Waiting for the coming of our Lord Jesus Christ" (i, 7). "That the spirit may be saved in the day of our Lord Jesus Christ" (v, 5). "He that judgeth me is the Lord. Therefore judge not before the time; until the Lord come, who both will bring to light the hidden things of darkness, and will make manifest the counsels of the hearts; and shall every man have praise from God" (iv, 4, 5).—The Holy Ghost. "Now there are diversities of ministries, but the same Spirit; there are diversities of prostitutions, but the same God" (xii, 6). "But to us God hath revealed them, by his Spirit. The Spirit searcheth all things, yes, the
deep things of God. . . . the things that are of God no man knoweth, but the Spirit of God'" (ii, 10, 11— cf. ii, 12-14, 16). "Know you not, that you are the temple of God, and that the Spirit of God dwelleth in you?" (iii, 16). "But you are washed, but you are sanctified . . . in the name of our Lord Jesus Christ, and in your God'" (iv, 4). "You . . . know not, that your members are the temple of the Holy Ghost, who is in you, whom you have from God; and you are not your own? . . . Glorify and bear God in your body" (vi, 19, 20). "But all these things one and the same Spirit worketh, dividing to every one according to his will" (xii, 13). "For in one Spirit were we all baptized into one body, whether Jews or Gentiles, whether bond or free" (xii, 12, 13). [Here follows the allegory of the body and its members, xii, 14-25.]

"For as the body is one, and hath many members, and all the members of the body, whereas they are many, yet are one body, so also is Christ. For in one Spirit were we all baptized into one body, whether Jews or Gentiles, whether bond or free" (xii, 21-31).

"For God is not the God of disunion, but of peace: as also I teach in all the Churches of the saints" (xiii, 11).

"I have sent you Timothy, who is my dearest son and faithful in the Lord, who will put you in mind of my ways, which are in Christ Jesus: as I teach everywhere in every church" (xiv, 17). "But if any man seem to be contentious, we have no such custom, nor the church of God" (xi, 16). "The gospel which I preached to you ... and wherein you stand; by which also you are justified in the name of our Lord Jesus Christ, and by the Spirit of our God" (xv, 1-2).

"For whether I, or they [The Twelve Apostles], so we preach, and so you have believed" (xv, 11). "The churches of Asia salute you" (xvi, 19). —Old Testament Types. "Now all these things happened to them in figure: and they are written for our correction" (i, 11). - Authority.

"What will you? shall I come to you with a rod; or in charity, and in the spirit of meekness?" (iv, 21).

"Now concerning the collections. . . . as I have given order to the churches of Galatia, so do ye also" (xvi, 21). —Power of excommunication. I indeed, absent in body, but present in spirit, judge you that which ye ought to judge; as though I were present, him that hath so done. In the name of our Lord Jesus Christ, you being gathered together, and my spirit, with the power of our Lord Jesus Christ, to deliver such one to Satan for the destruction of the flesh, that the spirit may be saved" (v, 3-6). "Jesu Christ has shed his blood, and roared the loud voice of his judgment upon wicked men" (xi, 7).

"For what have I to do to judge them that are without? ... For them that are without, God will judge" (v, 12, 13). —Sanctity. "For the temple of God is holy, which you are" (iii, 17). "Know you not that your bodies are the members of Christ" (viii, 15). "Your members are the temple of the Holy Ghost, who is in you, and bears God in your body" (vi, 19, 20). —Grace. "Grace is faithful, and who will not suffer you to be tempted above that which you are able, but will make also with temptation, that you may be able to bear it" (iii, 10). "Grace be with you" (i, 3). "But by the grace of God, I am what I am; and his grace in me hath not been void, but I have laboured more abundantly than they all: yet not I, but the grace of God which was with me" (ii, 9). —Virtuous life necessary for salvation. "Know you not that the unclean spirit does not possess the kingdom of God? Do not err: neither fornicators, nor idolaters, nor adulterers, nor the effeminate . . . nor thieves, nor covetous, nor drunkards . . . shall possess the kingdom of God" (vi, 9, 10). —Baptism. "Unto the rest of the Epistles of the holy places of the Epistles of St. Paul as in the teaching of his Divine Master. "But I chastise my body, and bring it into subjection: lest perhaps when I have preached to others, myself should become a castaway" (ix, 27). "Wherefore he that thinketh himself to stand, let him take heed lest he fall" (x, 12). "Therefore, my beloved brethren, be ye steadfast and unmovable; always abounding in the work of the Lord, knowing that your labour is not in vain in the Lord" (xv, 58). "Watch ye, stand fast in the faith, do manfully, and be strengthened" (xvi, 13).

"Do all to the glory of God" (x, 31). —Be without offense to the Jews and to the Gentiles, and to the church of God" (xii, 32). —Be ye followers of me as I am of Christ" (xi, 1). —Resurrection of the body and life everlasting. "For God hath raised up the Lord, and he will raise us up also by his power" (vi, 14).

"And as in Adam all die, so also in Christ all shall be made alive... "For as in Adam all die, so also in Christ all shall be made alive" (i, 18). "And death is the end of all things: And the end of all things is life everlasting" (i, 18).

"For God hath raised up the Lord, and he will raise us up also by his power" (vi, 14).

"And as in Adam all die, so also in Christ all shall be made alive... "For as in Adam all die, so also in Christ all shall be made alive" (i, 18). "And death is the end of all things: And the end of all things is life everlasting" (i, 18). —Eucharist. "The chalice of benediction, which we bless, is it not the communion of the blood of Christ? And the bread, which we break, is it not the partaking of the body of the Lord? . . . But the things which the heathens sacrifice, they sacrifice to devils. . . . You cannot drink the chalice of the Lord and the chalice of devils" (x, 16-21). "For I have received of the Lord that which also I delivered unto you, that the Lord Jesus, the same night in which he was betrayed, took bread, and giving thanks, said: Take ye, and eat: this is my body . . . In like manner also the chalice, etc. . . . Therefore whosoever shall eat this bread, or drink the chalice of the Lord unworthily, shall be guilty of the body and of the blood of the Lord. . . . And let every one that eateth this bread, and drinketh judgment to himself, not discerning the body of the Lord" (xi, 23-29). On the words of consecration see the two able articles by Dr. A. R. Edgar in "The Expositor", March and April, 1908. —Marriage. Its use. Marriage good, but celibacy better. The marriage of divorced persons not forbidden. Second marriage allowed to Christians; but single state preferable for those who have the gift from God. (vii, i-8.) —Pauline Dispensation: a Christian is not bound to remain single if his pagan partner is unwilling to live with him (vii, 12-15). —Virginity. It is not wrong to marry; but preferable to remain single. St. Paul's example of that which he himself did in marriage does well; and he that giveth her not doth
better." (vii, 25-40.)—Principles of moral theology. In ch. vii and following chapters Ch. Paul solves several difficult questions. He represents the Church as a very delicate nature, depending upon what we should now call the tractatus de sexto (sec. praecepto decalogi). He would, doubtless, have preferred to be free from the necessity of having to enter into such disagreeable subjects; but as the welfare of souls required it, he felt it incumbent upon him, as part of his Apostolic office, to write, and in the meantime write; it is in the spirit that pastors of souls have acted ever since. If so many difficulties arose in a few years in one town, it was inevitable that numerous complicated cases should occur in the course of centuries amongst peoples belonging to every degree of barbarism and civilization. There were questions the Church was right in expected to give a helpful answer; hence the growth of moral theology.

The Second Epistle was written a few months after the First, in which St. Paul had stated that he intended to go round by Macedonia. He set out on this journey sooner than he had anticipated, on account of the disturbance at Ephesus caused by Demetrius and the votaries of Diana of the Ephesians. He travelled northwards as far as Troas, and, after waiting some time for Titus, whom he expected to meet on his way back from Corinth, whither he had carried the First Epistle, he set sail for Macedonia and went on to Philippi, where he met Titus. The news that Titus brought him from Corinth was for the most part of a cheering character. The great majority were loyal to their Apostle. They were sorry for their faults; they had obeyed his injunctions regarding the public sinner, and the man himself had deeply repented. We hear no more of the parties of Paul, Apollo, and Cephas, though the letter appears to contain one reference to the fourth party. His friends, who had expected a visit from himself, were deeply grieved at his not coming as he had promised; a few who were his enemies, probably judaizers, sought to take advantage of this to undermine his authority by discovering in this a clear proof of fickleness of mind and instability of purpose; they said that his unwil-lingness to receive support betrayed want of affection; that he used threatening language when at a safe distance, but was in fact a coward who was mild and conciliatory in person; that his enemies were fomenting themselves by one who made the rather erroneous pretension to be an Apostle of Christ, when he was nothing of the kind, and was in reality, both naturally and supernaturally, inferior to men they could name. This news filled the soul of St. Paul with the deepest emotion. He purposely delayed in Macedonia and sent them this Epistle to prepare them better for his coming and to counteract the evil influence of his opponents. It was sent by Titus and two others, one of whom, it is almost certain, was St. Luke. The circumstances under which the Epistle was written can be best gathered from the text itself. We can easily imagine the effect produced when it was read for the first time to the assembled Christians at Corinth, by Titus, or in the sonorous tones of the Evangelist St. Luke. The news that their great Apostle had sent them another letter rapidly spread through the city; the previous one had been such a masterly production that all were eager to listen to this. The great bulk of the expectant congregation were his enthusiastic admirers, but a few came to criticize, especially one man, a Jew, who had recently arrived with letters of recommendation, and was endeavouring to supplant St. Paul. He said he was an Apostle (not one of The Twelve, but of the kind mentioned in the Didache). He knew of dignified presence, as he spoke slightly of St. Paul's insignificant appearance. He was skilled in philosophy and polished in speech, and insinuated that St. Paul was wanting in both. He knew little or nothing of St. Paul except by hearsay, as he accused him of want of determination, of cowardice, and unworthy motives, things belied by every fact of St. Paul's life. The man of his easy escape, others by letters, but he would not frighten him. This man comes to the assembly expecting to be attacked and prepared to attack in turn. As the letter is being read, ever and anon small dark clouds appear on the horizon; but when, in the second part, the Epistle has quieted down into a calm exhortation to almsgiving, this man is congratulating himself on his easy escape, and is already picking holes in what he has heard. Then, suddenly, as upon the army of Sisara, the storm breaks upon him; lightnings strike, thunder upbraids. He is beaten down by the deluge, and his influence is swept out of existence by the irresistible current. And as he is now reduced, he has no other weapon than to call his "Apologia pro Vitâ Sui", a fact which makes it one of the most interesting of the writings of the New Testament. Erasmus described it as follows: "Now it bubbles up as a limpid fountain; soon it rushes down as a roaring torrent carrying all before it; then it flows peacefully and gently along. Now it widens out as into a broad and tranquil lake. Yonder it gets lost to view, and suddenly reappears in quite a different direction, when it is seen meandering and winding along, now deflecting to the right, now to the left; then making a wider loop and occasionally doubling back upon itself."

Divisions of the Epistle.—It consists of three parts. In the first of these (chapters i to vii, incl.), after (1) introduction, (2) the Apostle shows that his change of plan is not due to lightness of purpose but for the good of the people, and his teaching not mutable; (3) he did not wish to come again in some way. The repentant one, (4) His great affection for them. (5) He does not require, like others, letters of recommendation. They, as Christians, are his commendatory letters. (6) He writes with authority, not on account of arrogance, but because of the greatness of the ministry with which he was entrusted, as compared with the ministry of Moses. Those who refuse to listen have the veil over their hearts, like the carnal Jews. (7) He endeavours to please Christ Who showed His love by dying for all, and will reward His servants. (8) Moving exhortation.

The second part (chapters viii and ix) relates to the collections for the poor Christians at Jerusalem. (1) He praises the Macedonians for their ready generosity in giving out of their poverty. He exhorts the Corinthians to follow their example in imitation of Christ Who, being rich, became poor for our sakes. (2) He sends Titus and two others to make the collections and to remove all grounds of calumny that he was enriching himself. (3) He has boasted of them in Macedonia that they began before others. (4) A man shall reap in proportion as he sows. God loves the cheerful giver and is able to repay. Giving not only relieves the poor brethren but causes thanksgiving to God and prayers for benefactors.

The third part (last four chapters) is directed against the pseudo-Apostles. (1) He is bold towards some who think he acts from worldly motives. He has powerful arms from God for humbling such and pun-
Corinthians

blessing their disobedience. Some say he terrifies by letters which are weighty and strong; but his bodily presence is weak, and his speech contemptible". Let such a one understand that such as he is in his Epistle, so will he be when present. (2) He will not pretend, as they do, to be greater than he is, nor will he extort himself by other men's labours. (3) He asks pardon for the weakness, worldly-mindedness of his epistles. It is to counteract the influence of the pseudo-Apostles. He jealously guards the Corinthians lest they be deceived as Eve was by the serpent. (4) If the new-comers brought anything better in the way of religion, he could understand their submission to their dictatorship. (5) He is not inferior to those superlative Apostles. If he is inferior in last part, it is only that he has not enabled himself amongst them, and did not exact support in order to gain them. The false Apostles profess a like disinterestedness; but they are deceitful men, transforming themselves into Apostles of Jesus Christ. And no wonder: for Satan transformed himself into an angel of light, and they imitate their master. They make false insinuations against the Apostle. (6) He, too, will glorify a little (speaking like a foolish worldly person, in order to confound them). They boast of natural advantages. He is not inferior to them in any; but he far surpasses them in his supernatural election to the apostleship, in his peculiar selection for the apostleship at Corinth, in all patience, in signs, and wonders, and mighty deeds. The Corinthians have all that other Churches had except the burden of his support. He asks them to pardon him that injury. Neither he nor Titus nor any other of his friends overreached them. He writes thus lest he should come again in sorrow. He threatens the unrepentant.

Unity of the Second Epistle.—Whilst the Pauline authorship is universally acknowledged, the same cannot be said for its unity. Some critics hold that it consists of two Epistles, or portions of Epistles, by St. Paul, that the first nine chapters belong to one Epistle, and the last four to another. As these two sections are held to have been written by St. Paul, there appears to be nothing in this view that can be said to be in opposition to the Catholic doctrine of inspiration. But the hypothesis is very far from being proved. More, on the part of the arguments that can be alleged against it, it can scarcely be regarded as probable. The principal objection against the unity of the Epistle is the difference of tone in the two sections. This is well stated and answered by the Catholic scholar Hug ("Introduction", tr. by Wait, I, 25, 299: "It is enough that this is different the tone of the first part, mild, amiable, affectionate, whereas the third part is severe, vehemence, and irrespectively castigatory. But who on this account would divide Demosthenes' oration De Corone into two parts, because in the more general character of the second and in the tone of the oration while on the other hand, in abasing and chastising the accuser, in the parallel between him and Aeschines, words of bitter irony gush out impetuously and fall like rain in a storm?""). This argument is referred to with approval by Meyer, Cornell, and Jacquier. Others have explained the difference of tone by supposing that when the first nine chapters were finished fresh news of a disagreeable kind arrived from Corinth, and that this led St. Paul to add the last four chapters. In the same way the parenthetical section (vi, 14, vii, 2), which seems to have been inserted as an afterthought, can be explained. It was added, according to the expression used in vi, 11, 13, "our heart is enlarged... be you also enlarged", which in the O. T. had the bad meaning of being too free with infidels. St. Paul's manner of writing has also to be taken into account. In this, as in his other Epistles, he speaks as a preacher who now addresses one portion of his congregation, now another, as if they were the only persons present, and that without fear of being misunderstood. Dr. Bernard thinks that the difference of tone can be sufficiently accounted for on the supposition that the letter was written at different sittings, and that the writer was in a different mood owing to ill-health or other circumstances. The other objections brought against the unity of the Epistle are those which are sufficiently answered by the same argument, and need only be briefly summarized as follows: The last section, it is said, begins very abruptly, and is loosely connected with the previous one by the particle δε. But there are several other instances in the Epistles of St. Paul, where transition is made in precisely the same way. The same, indeed, people who are denounced, whereas that is not the case in the first portion. Still, there is clear reference in the first section to persons who accused him of being fickle, arrogant, brave at a distance, etc. One of the strongest arguments against the integrity is that there are several verses in the first nine chapters which seem to presuppose an equal number of passages in the second, and the contention is that the last section is a portion of an earlier Epistle. But on closer examination of each passage this connexion is seen to be only apparent. On the other hand, there are at least as many obvious places in which necessity compels us to look to the second section, as to the first. It is probable that we must look back and presuppose verses in the first. It is remarkable, moreover, that the only extant fragments of the supposed two Epistles should fit so well. It has also been urged that the First Epistle is not painful enough to account for statements in the Second. But a close examination of i, 11, 14, ii, 6; i, 1, 2, 3, 4, 18; iv, 8, 9, 10, 18, 19; v, etc., of the First Epistle, will show that this objection is quite unfounded. The linguistic unity between the two portions of the Epistle is very great; and many examples can be given to show that the two sections were always integral portions of one whole. The evidence afforded by early manuscripts, translations, and quotations points strongly in the same direction.

Organization of the Church at Corinth as Exhibited in the Two Epistles.—There is nothing in either Epistle which enables us to say what was the precise nature of the organization of the Church at Corinth. In I Cor. x, 1, 13, we read, "Apol. and Corinthians, indeed hath set some in the church: first apostles, secondly prophets, thirdly doctors; after that [the gift of] miracles; then the graces [charismata] of healings, helps, governments [or wise counsels], kinds of tongues, interpretations of speeches. Are all apostles? Are all prophets? Have all talents? Where is the spirit of prophesying?" From the whole context it is clear that this passage is nothing else than an enumeration of extraordinary gifts, and that it has no bearing whatsoever on church government. The word apostle is probably used here in its broad sense, not as meaning the Apostles of Jesus Christ, but the apostles of the Church. If it is meant to include the former, then the reference is not to their ruling power, but to their supernatural gifts, upon which the whole argument turns. St. Paul thanked God that he spoke with all their tongues. Bernabas is called an apostle (Acts, xiv, 4, 13). In 11 Cor. xv, 23, St. Paul calls his messengers "the apostles of the churches". (Compare Rom., xvi, 7; Apoc., ii, 2.) The Didache, or "Teaching of the Twelve Apostles", which is probably a work of the first century, has the statement that if an apostle remains till the third day claiming support, he is to be regarded as a false prophet. It also says that every true teacher of the word of God who is worthy of his calling, "interprets parables". This gives one of the rules for detecting a false prophet. "Prophets and doctors" are referred to in Acts, xiii, 1. It is extremely probable that St. Paul had organized the Church at Corinth during his long stay there as carefully as he had previously done in Galatia ("and when they had ordained to them priests in
every church"—Acts, xiv, 22) and in Ephesus ("wherein the Holy Ghost hath placed you bishops"—Acts, xx, 7, 28). We have these statements on the authority of the author of the Acts, now admitted, even by Harnack, to be St. Luke, the companion of the Apostle. St. Paul had spent six or eight times as long at Corinth as he had at Philippi, yet we find him writing to the Galatians: "For I have been to all the saints in Christ Jesus, who are at Philippi, with the bishops and deacons" (Phil., i, 1—cf. I Thess., v, 12). The principal office of the bishops and deacons was, according to the Didache, to consecrate the Blessed Eucharist. It is only by accident, as it were, without the sanction of St. Paul speaking in the First Epistle, of the form of consecration used at Corinth, and which is substantially the same as that given in the Gospels. Had the abuses not arisen, it seems clear that he would not have referred to the Eucharist. He says nothing of it in the Second Epistle. In that case there would not be wanting those who would have loudly asserted that the Corinthians "knew nothing of it," and, by implication, that the Apostle's mind had not yet developed to that extent. But as he speaks so clearly we may take it as certain, too, that the ministers of the Eucharist were the same as in other places. There is no evidence that it was ever the custom to have bishops or priests. Those with the deacons, were the regular ministers in each place, under the immediate jurisdiction of the Apostles of Jesus Christ. From all this we may conclude that the Church in Achaia was as regularly organized as the earlier Churches of Galatia, Ephesus, and the neighbouring Province of Macedonia, or as in the Church of Creta (Tit., i, 5). There were "bishops" (which word certainly meant priests and perhaps also our modern bishops) and deacons. Later on, Timothy, Titus, and others were appointed over these "bishops," priests, and deacons, and were monarchical bishops in the modern sense of the word. Other such bishops succeeded the Apostles. (See Bishop.)

COROLIS, GASPAR-GUSTAVE DE, French mathematician, b. at Paris, in 1792; d. in the same city, 1843. He entered the Ecole Polytechnique in 1808, and later continued his studies at the Ecole des Ponts et Chaussées. Though determined to become an engineer, he did not enter upon the practice of his profession, but became instead, in the year 1816, a tutor in mathematical analysis and mechanics at the Ecole Polytechnique. In 1838 he succeeded Duloung as director of studies in the same school. He became a member of the Académie des Sciences in 1836. Corolis was a man of much ability, but his delicate health prevented him from doing justice to his powers. He was a successful educator and together with Gen. Poncelet was one of the pioneers of the reform in the teaching of mathematics. While engaged in teaching, he at the same time carried on his researches in theoretical and applied mechanics. The theory emancipated by him regarding relative motions has found numerous applications, particularly in the case of motions taking place on the surface of the earth; as, for example, the deviation towards the east of falling bodies, the apparent rotation of the plane of vibration of a pendulum, etc. Corolis was the author of "Calcul de l'effet des machines" (1829), which was reprinted in 1844 with the title "Traité de la mécanique des corps solides," and of "Théorie mathématique du jeu de bilard" (1835). He also published a number of articles, notably in the "Dictionnaire de l'industrie," MARIE, HIST. DES SCIENCES MAT. ET PHYS. (Paris, 1888), XII, 190.

HENRY M. BROCK.

CORKEY (COCAGNA), DIACOCE OF (COCAGNIENSI), in Ireland, suffragan of Cashel. St. Finbarr was the founder and first bishop of the see. It is situated about the middle of the sixth century at Rathcullen, six miles north of Bandon, and educated in Leinster. Having spent some time on "a green island" in Gougane Barra, he founded a monastery and a school at Lough Eire, the name given to the marshy expanse of the river Lee, on which the city is built, and from which both city and diocese derive the name Cork (corcaigh, "marsh"). This monastery seems to have been erected on the elevated plateau to the south of the city, now known as the Rock, close by the palace of the Protestant bishop. Soon many students flocked thither from various parts. They and his followers founded many other monasteries on the large island in the marsh beneath, built on it, and so gave birth to a city which now numbers over 70,000 inhabitants, and is the residence of the saint's episcopal successor.

The limits of the territory over which St. Finbarr ruled cannot be accurately defined to-day. A fact, however, not generally recognized by historians enables us to conclude that the boundaries were sufficiently clear even in the most ancient times. Finbarr's father was chief-metal-worker to Tigherneach, chief of Uí Echach Mumhan. As the saint advanced in years he was worthily recognized as a patron by the entire sept, and so obtained spiritual jurisdiction over their wide territories. The eastern and western limits were respectively Cork and Mizen Head, and there are arguments to show that the northern and southern were the Avenmore (Blackwater) and the ocean. In the Synod of Rathbrussell (1110) those are also named as the limits of the Diocese of Cork, whereas it would appear that the sept lands and the diocese were coterminous, as was the case with St. Faughnan's Diocese of Ross, which coincides with the lands of the O'Driscoll; and that of St. Munchin, Limerick, with those of Uí Fighente, in later times O'Donovans. At some time after the twelfth century the question between the Lee and Blackwater to the north was detached in favour of the neighbouring Diocese of Clony; the land of the O'Driscolls had been already erected into the Diocese of Ross; and to-day Cork is approximately bounded on the north by the city and suburbs, and the River Lee as far as Gougane Barra; on the east by Cork Harbour, on the south by the Diocese of Ross and the ocean, and on the west by Bantry Bay.

The church and monastery founded by St. Finbarr were naturally the centre of the diocese till the sixteenth century. For many years the successor to the first abbot was also bishop of the diocese. Other churches and monasteries, however, grew up in the city itself and in the territories over which he ruled. In a document dated 1190, in which Innocent III confirms to the Bishop of Cork his various privileges, mention is made of eight churches in the city, the five being Sancta Maria, in Monte, the double St. Mary's, Shandon, close by which stands the Catholic cathedral of to-day. Two centuries later (1309), in the will of John de Wychedon, we find the names of no fewer than fifteen churches, all in the city, four of them bearing names such as "Leper of Dilby," "Leper of Glenamore"; but a hundred years after
this (1462), in a charter of Edward IV, we find only eleven churches mentioned. Of the churches in country districts during this long period we have no definite account. The Carmelites were introduced into Kinsale in 1334 by Robert Balraim; much earlier, in the seventh century, we find mention of Saint Gobban, abbot of a monastery of regular canons in this vicinity. The Biasinna Abbey, built a convent for Franciscans about 1463, and McCarthy Lauder had done likewise at Ballymacadane on the Bandon Road in 1460. Tracton Abbey, two miles west from Carrigaline, was begun in 1224, and the great monastery of Kilrees, five miles west of Cork, was founded by MacCarthy Mór in 1466, who is interred in the middle of the choir.

At the Reformation, when Bishop Bennett was deprived of the temporalities of the see (1535), such of the churches as remained passed into Protestant hands. Among others the old church of St. Finbarr, called Gill Abbey, after a famous bishop of the twelfth century (1152-72), seems to have remained in some form till 1725. At that date it was removed to make room for a more modern building, which in turn has been succeeded by the present Protestant cathedral. After the Sequestration the Catholics had possession of a considerable number of houses, as contemporary accounts describe them. In the reports given by government officials in 1731 we find many of them put down as huts; and the addition "built since George the 1st" applied to the names of many more. The existing churches of the diocese have been erected in recent years on, or near, the sites of these last mentioned of persecution. In the five parishes into which the city is divided there are thirteen public churches, besides private oratories and chapels attached to institutions. In each of the thirty parishes in country districts there are one, two, or three churches, according to the population, and many of them are the most mysterious of the great mysteries they enclose. Of the city parishes two—that called the North, or St. Mary’s, and that of Sts. Peter and Paul—are held by the bishop. In the former stands the pro-cathedral, begun by Dr. Moylan in 1729, a red sandstone structure, overlooked by a magnificent tower of the same material, due to the energy of a well-known Cork priest.

The lists of successors to St. Finbarr in the bishopric vary considerably with the different authorities. The present (1908) occupant of the see is described as the 59th, or the 105th, from the first bishop. The lists vary, and it is difficult to select the more correct, though somewhat too large. Two have been raised to the altars of the Church—St. Nessan and Blessed Thaddeus McCarthy. The veneration of the former dates from ancient times, that of the latter from 1492, when he died a pilgrim at Ivera in Piedmont, Italy. First appointed Bishop of Ross, and expelled therefrom on a false charge, he was nominated to the united Dioceses of Cork and Cloyne. Unable to occupy the see owing to the opposition of the Geraldines, etc., he journeyed to Rome, won his cause, but died amid wonderful evidences of sanctity on the return journey. The decree of his beatification was published in 1805. Giolla Aedh O’Muighin (1152-72) was a famous bishop. He practically refounded the old monastery of St. Finbarr; like his great predecessor he belonged to a Connacht clan. The Four Masters speak of him as "the tower of the virginity and wisdom of the time". After his death (1430) at the desire of the Bishop of Cloyne, the two Dioceses of Cork and Cloyne were united, and remained thus for three hundred years (1747). During the seventeenth century the united bishoprics were more than once governed by vicars apostolic. This occurred in 1614-20, and again in 1667-76. The Catholics of Cork were more than once expelled for their religion; frequently the Catholics of the province were forbidden to live in walled towns or fortified places (1644, 56, 72). In 1693, on the representation of King James, the administration of Ross was given to the reigning Bishop Seyne. It seems to have remained in the hands of his successors until 1747, when it passed into the jurisdiction of the newly enfranchised Bishopric of St. Colman.

The Diocese of Cork was under St. Finbarr, with twelve prebendaries and the usual dignitaries. Though re-established by Dr. Delaney in 1858–59, it dates from the twelfth century; naturally it ceased to exist during the years of persecution. The religious orders and congregations in the diocese are eight in number: Augustinians (second foundation, Red Abbey, in fifteenth century); Dominicans (first foundation Abbey of the Island, 1229); Friars Minor (first foundation near Wise’s Hill, 1214); Carmelites (Kinsale); Franciscan Capuchins; Vincentians; Fathers of Charity; Society of African Missions, the last four being quite modern foundations. There are in addition two teaching orders of men, the Christian and Presentation Brothers, besides 11 communities of nuns; the latter are: Presentation (4 houses), Ursulines (2 houses), Sisters of Mercy (4 houses), Sisters of Charity (4 houses), Good Shepherd (1 house), French Sisters of the Daughters of Mary (1 house), Convent of Mary, 1 house, Bon Secours (1 house), Sisters of the Poor (1 house), Sisters of the Assumption (1 house), the last nursing the poor in their own homes.

At the census of 1891 the Catholic population of the diocese numbered 178,461. They are attended by one bishop and 114 priests, who administer 35 parishes, of which 5 are in the city. Kilrees Abbey, and Gougane Barra are the best preserved among the early monuments of the diocese. A great part of the former still stands. The latter is an island on which are the ruins of a square court, with walls fourteen feet thick, in which are eight cells or cloisters rudely cut in the rock. Each of these cells is about seven by seven, and the court fifty feet square. It was here that St. Finbarr prepared himself by prayer and seclusion in the lonely shadows of the mountains that surround the lake for the great work of founding a city and a diocese.

P. Sexton.

Cork, School of.—The monastic School of Cork had a wide reputation, especially in the seventh and eighth centuries. The name is derived from the Irish corcagh, which means a marsh, for in ancient times the floods of the River Lee covered the low ground on which most of the present city of Cork was afterwards built. The founder of the School and Diocese of Cork was Barra or Baire (Barry), more commonly called Finbarr the Fair-haired. His family belonged to the Hy Brinim Ratha, a tribe that dwelt on the eastern shore of Lough Corrib, in the County Galway; but his father, a skillful cedd, or certified worker in brass, was forced to migrate to Hy Liathain, in the west of the County Cork, where the saint was born about the middle of the sixth century. His chief teacher was a certain MacCuirp, or Curporius, who, himself, it seems, had been a student in the School of St. Columba in Rome. To perfect himself in the science of the saints, Barra retired to a hermitage in a small island of the lonely lake which still bears his name, Gougane Barra. Calalan’s splendid poem in praise of the romantic beauty of this lake has made its name familiar to all the inhabitants of Cork; for, day by day, it would appear, Barra returned to his native territory, where he founded some dozen churches before he
finally established himself near the marsh of Lough Eire (Eire), which appears to have been the original name of the place. There he founded a monastic school about 620, which in a short time attracted a multitude of students and produced many great scholars. The Irish “Life of Finbarr” gives the names of a dozen of these holy and learned men, who in turn became founders of churches and schools in the South of Ireland. The most distinguished of them was St. Colman Mac Ua Cluasaigh, Feriogind or professor in the School of Cork about the year 664.

At that time all Ireland was devastated by a terrible yellow plague which carried off two-thirds of the population. There was a prevalent idea that the pestilence could not, or at least did not, extend beyond nine waves from the shore. So Colman and his pupils wisely resolved to migrate from their monastery in the marshes of Cork to one of the islands in the high sea. Being a poet and a holy man he composed a poem, mostly in Irish, committing himself and his pupils to the protection of God and His saints, especially the patron saints of Erin. As they sought their island refuge the students chanted the poem verse by verse, each one reciting his own stanza until it was finished, and then they began again. Fortunately lines themselves do. The School of Cork continued to flourish for many centuries, even after the Danes had established themselves there; in 874 we find recorded the death of a “scribe of Cork”, and in 881 we are told of the death of a certain son of Connudh, “a scribe, wise man, bishop and abbot of Cork”. In 1134 the ancient monastery and School of Cork, which had fallen into decay, were refounded by the celebrated Cormac MacCarthy, King of Munster. (See Finbarr, Saint.)

John Healy.

Corker, Maurus, an English Benedictine, b. in 1636 in Yorkshire; d. 22 December, 1715, at Paddington near London. His baptismal name, James, he exchanged for Maurus when he entered the order. On 23 April, 1686, he took vows at the English Benedictine Abbey of Lambpringe near Hildesheim, in Germany, and returned to England as missionary in 1685. Being accused by Titus Oates of implication in the “Popish Plot” he was imprisoned in Newgate, but was acquitted of treason by a London jury, 18 July, 1679.

Queenstown Harbour, Cork

most of this poem still survives, and is printed in the “Leabhar Imuin” or “Book of Hymns” (edited by J. H. Todd, Dublin, 1855-89). The language is of the most archaic type of Gaelic, and is interspersed here and there with phrases mostly taken from Scripture, but made to rhyme with each other as the Gaelic Hereupon he was arraigned for being a priest and sentenced to death, 17 January, 1680. Through influential friends he was granted a reprieve and detained in Newgate. While thus confined he is said to have reconciled more than a thousand Protestants to the Faith. One of his fellow-prisoners at Newgate was
the saintly Oliver Plunket, Archbishop of Armagh, with whom he formed an intimate friendship, and whom he prepared for his martyrdom, which took place, 15 June, 1681. Some very interesting correspondence which was carried on in prison between these two confessors of the Faith was published in the "Irish Ecclesiastical Record" (Sept., 1883). On the accession of James II in 1685, Father Corker was released and kept at the court as resident ambassador of Prince-Bishop Ferdinand of Bavaria, the Elector of Cologne. In 1687 he erected the little convent of St. John at Clerkenwell, where religious services were held for the public, but which was destroyed by a mob, 11 November, 1688, during the revolt against King James II. Father Corker himself was only twice to see refuge on the continent. In 1691 he was made Abbot of Cismar near Lübeck and, two years later, of Lamspringe, where he had made his religious profession. In 1696 he resigned as abbot and returned to England to continue his missionary labours. He is the author of various pamphlets proving the innocence of those condemned for implication in the fictitious "Popish Plot."

MICHAEL OTT.

Cormac MacCuillean (836–908), an Irish bishop and King of Cashel, was of the race of Eoghanacht, of Southern Ireland, and in his early years received a good education in one of the Irish schools. He was ordained priest, and after was appointed Bishop of Cashel. In the year 900 he became, on account of his descent, King of Cashel, and thus were combined in his person the two offices of spiritual and temporal ruler of Leth Mog, as the southern portion of Ireland was called. The ardrí (high king), Flann, assisted by the King of Leinster, led his forces into the Southern Province (906), and was met by the Munstermen under Cormac at Moylena (Tullamore). The ardrí suffered a signal defeat. Later on, however (908) Flann, assisted by Ceorhball, King of Leinster, and Cathal, King of Connaught, returned to the attack, and the Munstermen were again defeated by Flann. Cormac, Abbot of Inniscathay, had claimed tribute from Leinster, and had even signified his intention of assuming the position of ardrí. The battle was fought at the present Ballymonart; the Munstermen suffered a complete defeat and Cormac was killed in the battle. An Irish historian, "Samson Chormaic", contains etymologies and explanations of over 1400 Irish words has come down to us. Though, etymologically, the work is of little value, yet on account of the light it throws upon many ancient Irish customs and institutions it is of great importance to the historian. The "Glossary of Cormac" is said to be only a part of the "Saltsair Chaisil", also attributed to Cormac. This work, if ever existed, has disappeared, or, as W. Stokes thinks, it is more likely that at best the "Saltsair Chaisil" was only a collection of transcripts of manuscripts from the hands of different writers. The above-mentioned "Samson Chormaic" or "Cormaic" (Laurence), translated and annotated by John O'Donovan and edited by W. Stokes (Calcutta, 1868). See Stokes, "Three Irish Glossaries" (London, 1862).

JAMES MACAFFREY.

Cortaro, Elena Lucrezia Piccopia, a learned Italian woman of noble descent, b. at Venice, 5 June, 1546; d. at Padua, 25 July, 1584. Her father, Giovanni Battista Cornaro, was a pupil of the Premonstratensians of St. Mark's. At the age of seven he began the study of Latin and Greek under distinguished instructors, and soon became proficient in these languages. She also mastered Hebrew, Spanish, French, and Arabic, earning the title of "Oraclum Septilungium". Her later studies included mathematics, philosophy, and theology. In 1562 she took the habit of a Benedictine Oblate with the canons regular, but, however, becoming a nun. In compliance with her father's wish, she entered the University of Padua and after a brilliant course of study received the degree of Licentiate in philosophy. The degree was conferred 25 June, 1678, in the cathedral of Padua in presence of many persons eminent for learning and science. Elena was a woman of various interests and was esteemed throughout Europe for her attainments and virtues. The last seven years of her life were devoted to study and charity. She was buried in the church of Santa Giustina at Padua and her statue was placed in the university. Her writings, published at Padua in 1588, include academic discourses, translations, and devotional treatises. In 1685 the University of Padua caused a medal to be struck in her honour. In 1895 Abbess Mathilda Pynsent of the English Benedictine Nuns in Rome had Elena's tomb opened, the remains placed in a new casket, and a suitable tablet inserted in her memory. Biographies in Italian by DAZA (Venice, 1588); LUPUS (Venice, 1589); BACCINI (Parma, 1588); more recently, DA SAVOIA (Rome, 1900); ARBLETZ (Rome, 1896); CORRADO (Rome, 1896). For an account of the bibliography see CIVILTA CATTOLICA (Rome, 1896–1900), 17th series, vol. IV; BAILEY, A DAUGHTER OF THE DOPHIN IN AMER. CATH. QHT. REVIEW (Philadelphia, 1896), XXI, 820.

E. A. PAGE.

Cormeille, Jean-Baptiste, French painter, etcher, and engraver, b. at Paris between 1646 and 1649; d. there, 12 April, 1695. He was the youngest son of Michel Cormeille of Orléans, and brother of the famous Michel. He was called "the younger Cormeille". His devoted father was his teacher and painstakingly prepared the youth for his future successes as an historical painter. In 1664 he won the second prize and in 1668 the first prize of the academy. He then went to study in Rome and, on his return in 1675 was received into the Royal Academy, painting for his reception picture the "Punishment of Bajazia by Hercules", now one of the notable canvases in the Louvre. He painted in some of the Paris churches and in 1679 finished his "Delivery of St. Peter from Prison" for the church of Notre-Dame-des-Champs. With this he was employed on the decorations of the Tuileries. In 1692 he was appointed professor in the academy. His style, like his brother's, was that of the school of the Desiderosi, but Jean was somewhat inferior to the younger Michel in composition and drawing. Many of the paintings of this excellent artist were engraved by contemporary masters, a few by the great Mariette, and Jean himself engraved and etched plates after his own designs and finished pictures, and after the Carracci. His work with acid and the burin was spirited and exhibited his thorough mastery of technique. He commenced and finished his plates after the manner of Agostino Carracci. His most important plates were: "Bust of Michelangelo", "St. Bernard", "Mercury in the Air", and "St. John in the Wilderness" (after Annibale Carracci).

For bibliography, see article CORNELL, MICHEL (the Younger).

LEIGH HUNT.

Cormeille, Michel, a French painter, etcher and engraver, b. in Paris in 1642; d. at the Gobelins manufactory at Paris, 18 August, 1708. He was the son of an artist, Michel Cormeille of Orléans, and on this account is sometimes called the "younger Michel". He is also and more commonly known as
the "older Corneille" (Corneille l'Aîné), to distinguish him from a younger brother, Jean-Baptiste Corneille, also a painter. His father was the first and the most influential of his teachers; of his masters were Mignard and the celebrated Lebrun. Devoting himself wholly to historical painting, Michel won the Academy Prize and went to Rome on the king's pension; but feeling his genius hampered by the restrictions of the prize, he gave up the money in order that he might study the antiques in his own way. Coming under the powerful influence of the Eclectics, he studied with the Carracci and modelled his style on theirs. In 1663 he returned to Paris and was elected a member of the Royal Academy, his picture on entering being "Our Lord's Appearance to St. Peter after His Resurrection". In 1673 he became an adjunct, and, in 1680, a full professor in the Academy.

Corneille painted for the king at Versailles, Meudon, and Fontainebleau, and decorated in fresco many of the great Paris churches, notably Notre-Dame, the church of the Capucins, and the chapel of Saint-Grégoire in the Invalides. His style, reminiscent of that of the old masters, is the conventional style of the Eclectics; his drawing is remarkably careful and exact, the expression on the faces of his religious subjects is dignified and noble, the management of chiaroscuro excellent, and the composition harmonious, but suggested by Venetian School. For his insufficient knowledge of the composition of pigments, the colour in many of his pictures has suffered such a change that it is to-day disapprovable; but the artist possessed a good colour-sense, and contemporary records go to prove that his colour was refined and pleasing. He etched and engraved over a hundred plates in a bold and free style, for he was a master of the line; but he subsequently spoiled the effect by too much and too precise work with the graver. A dishonest dealer put Raphael's name on some of Michel Corneille's plates, and for a long time no one disputed their attribution to the great master. For many years Corneille resided at the Gobelin manufactory, and was sometimes called "Corneille des Gobelins". Among his paintings are a "Repose en Egypte", now in the Louvre, and a "Baptism of Constantine" in the museum at Bordeaux. Among his most important etched and engraved works are: "The Activity"; "Flight into Egypt"; "Abraham's Journey with Lot" (wrongly ascribed to Raphael); and "Jacob wrestling with the Angel", a plate after Annibale Carracci.

LEIGH HUNT.

Corneille, MICHEL, the elder Michel, a French painter, etcher, and engraver, b. in Orleans about 1601; d. at Paris, 1664. He was one of many who studied with that celebrated master, Simon Vouet, who exerted a despotic influence over the French School, and impressed his artistic personality strongly on all his pupils. Michel devoted himself to historical paintings, and was one of the twelve original members of the Royal Academy at its foundation in 1648. He became its rector in 1656. He was an excellent colourist—in this more Venetian than French—and his early style resembled that of Simon Vouet; later his work had all the merits and all the faults of the post-Raphaellte, or decadent, "sweet", school of Italian art, showing the far-reaching influence of the Carracci. He was long employed in the decoration of churches in Paris, his masterpiece being the celebrated "St. Paul and St. Barnabas at Lystra", painted for the Cathedral of Notre-Dame. His etched and engraved work differed very little from that of the Carracci and of his two sons. It was chiefly reproductive. Notable examples are the "Murder of the Innocents", after Raphael, and the "Virgin Suckling the Infant Jesus", after Lodovico Carracci. The story of his life is given in Verne's "History of Art", also in bibliography under CORNEILLE, MICHEL (the Younger).

LEIGH HUNT.

Corneille, PIERRE, a French dramatist, b. at Rouen, 6 June, 1606; d. at Paris, 1 October, 1684. His father, Pierre Corneille, was avocat du roi and maître des eaux et forêts in the Vicomté of Rouen. His mother, Marthe Lepesant, belonged to an old family of Normandy. He was educated at the Jesuit college in Rouen, studied law at Caen, and was admitted to the Bar in 1624. Four years later he was granted the office of Advocate to the Admiralty. Although the duties of his charge allowed him leisure enough to follow his poetical vocation, he soon quitted the Bar and went to Paris, in 1636, with "Les Andromèdes". The first comedy he produced, "Médée" (1629), met with so great a success that he resolved to write for the stage. Other plays followed rapidly: "Clitandre" (1632), "La Veuve", "La galerie du palais" (1633), "La suiviante", "La place royale" (1634), "Médée" (1635), "L'illusion comique" (1636). Cardinal Richelieu, who took a great interest in dramatic matters and was even the writer of several plays, realized that the young author had some talent and enrolled him, in 1633, among the "five authors", whose functions consisted in revising and polishing the plays written by the great politician. Corneille was too independent a genius to get along easily with the autocratic playwright; he was dismissed, in 1635, because he had "esprit de suite", and returned to Rouen.

The year 1636 saw the production of "Le Cid", which marked the beginning of a new epoch in the French drama. Its remarkable success aroused Richelieu's anger and jealousy to such a degree that the French Academy, which was so much indebted to the great cardinal, was obliged to criticize the play in a public pamphlet, known as "Les sentiments de l'Académie sur le Cid", written, under command, by Chapelain. The public, however, admired "Le Cid" none the less, and, as Boileau said, "all Paris saw Rodrigue with the same eyes as Chimène". After a silence of four years Corneille brought out "Horace" and "Cinna" (1640). The poet was then in full possession of his talent and from this time to the year 1651 produced a series of plays, most of which are masterpieces: "Polyeucte", a Christian tragedy, perhaps the most perfect of Corneille's plays; "Roméo", "Le Menteur" (1643), a comedy; "Thédore, vierge et martyre"; a very poor drama which failed; "La suite du menteur" (1645); "Rodogune" (1646); "Héraclius" (1647); "Andromède" (1650); "Don Sanché d'Aragon" (1650); "Nicomède" (1651). Corneille was elected to the French Academy in 1647. After "Polyeucte" (1643), which was a decided failure, he resolved to quit the stage, and in his retreat at Rouen began to translate the "Imitation of Christ" at the solicitation of Queen Anne of Austria. A few years later, yielding to Fouquet's entreaties, he began again to write plays: "Édipe" (1659), "Sertorius" (1662),
Corneille was a true Christian. For years he
remained a churchman, as the Vicar of Saint-Sau-
vre in Rouen, and discharged his duties most relig-
iously. Towards the end of his life he sold the
house in which he was born to give a dowry to
his daughter, who entered the Order of Saint
Dominic. In all his dramas he constantly pursued a
lofty ideal, shaping men as they should be,” and representing
characters whose heroism, sense of duty, and ready-
ness to self-sacrifice contain lessons of highest moral-
ity. The standard text of Corneille’s works is the

Corneille, Jacob, also called Jacob van Amsterdam,
or van Oostzaan, and at times confounded with
a Walter van Assen, a Dutch painter of the first third
of the sixteenth century. Nothing certain is known
regarding the life of Corneille nor of his relations
to other artists. He was one of the last painters of
the Netherlands who showed no traces of Italian influ-
ence; however, his prel, Jacob van der Groot, is regarded
as the first “Romantic”. In composition Corneille
was natural and expressed agreeable feeling in
the manner of the old Flemish school; its colours are
rich and warm; his backgrounds display an attractive
landscape. But besides mistakes in drawing, an ugly
realism often detracts from his works. Pictures are
extant which it is certain he painted in the years
1506–30. A small yet attractive altar-piece in Berlin
represents in the foreground the Madonna and Child
with angels playing musical instruments, while the
background shows a landscape; on the wings are
depicted St. Augustine, St. Barbara, and the donor;
the outer sides of the wings show St. Anne and St.
Elizabeth. An altar-piece in the Belvedere at Vienna,
representing St. Jerome, is full of force, variety,
and religious feeling. St. Jerome is drawing a thorn
out of the foot of a lion; the landscape in the back-
ground shows scenes from the life of the saint; on the
outside of the doors is the Mass of St. Gregory.
One of the most important works of Corneille is the “Tri-
umph of Religion”, or the “Adoration of the Trinity”,
at Cassel. At Antwerp there is an altar-piece of the
Virgin with angels; another, representing the Crucifi-
xion, is at Cologne. A “Adoration of the Magi” at Verona are capital executed paintings. Both Berlin and the archiepiscopal
museum at Antwerp possess canvases representing
the Adoration of the Magi; a painting of the same subject
is in private possession at The Hague. The
figure of Christ and the drapery of Mary Magdalen are
not modelled in the picture at the Rijksmuseum,
painted by Cornelis in his earliest period. Another
canvas of a later date shows Saul and the Witch of
Endor.

G. Gietmann.

Corneille (Korńjelj), a centurion of the Italic
cohort, whose conversion at Cesarea with his house-
hold is related in Acts, x. The Roman name Corneille
would indicate that he was either of the
distinguished gens Cornelia, or a descendant of one
of its freedmen—most likely the latter. The cohort in
which he was centurion was probably the Cohors II
Italica civilis Romanorum, which a recently discovered
inscription proves to have been stationed in Syria be-
tween A.D. 47 and 60. The description of the centurion
as a religious man, and fearing God . . . , giving much alms
to the people” [i.e. the Jews (cf. x, 22)], shows that
he was one of those gentiles commonly, though incor-
correctly, called proselytes of the gate, who worshipped
the one true God and observed some of the prescriptions
of the Mosaic Law, but who were not admitted to the
Jewish community by circumcision. He was

L. N. DELAMARRE.

Certainly not a full proselyte (Acts, x, 28, 34 sq., 45;
xi, 3). The baptism of Cornelius is an important
event in the history of the Early Church. The gates
of the Church, within which thus far only those who
were circumcised and observed the Law of Moses had
been admitted, were now thrown open to the uncircum-
uncinated Gentiles without the obligation of submit-
ting to the Jewish ceremonial laws. The innovation
was disapproved by the Jewish Christians at Jeru-
usalem (Acts, xi, 2, 3); but when Peter had related his
case, and Cornelius’s vision had been followed by the
Holy Ghost, he had come down upon the new converts, opposition
ceasing (Acts, xi, 4–18) except on the part of a few
extremists. The matter was finally settled at the
Council of Jerusalem (Acts, xv). According to one
tradition Cornelius became Bishop of Cesarea; accord-
ing to another, Bishop of Scopasia in Myria.

F. BECHTEL.

Cornelius, Pope, Martyr (251 to 253). We may
accept the statement of the Liberian Directory
that he reigned two years, three months, and ten
days, for Luspius, Lightfoot, and Harnack have shown
that this list is a first-rate authority for this date.
His predecessor, Fabian, was put to death by Decius,
20 January, 250. About the beginning of March, 251
the persecution slackened, owing to the death of
Emperor, against whom two rivals had arisen.
It was possible to assemble sixteen bishops at Rome,
and Cornelius was elected, though against his will
(Cyprian, Ep. iv, 24), “by the judgment of God and of
Christ, by the testimony of almost all the clergy,
and of the people; by the consent of all priests and of
the people” (ibid., 9). He is not
asked to St. Cyprian, to be numbered among the glorious
confessors and martyrs who sat long awaiting the
sword or the cross or the stake and every other tor-
ture.

A few weeks later the Roman priest Novatian
made himself anti-pope, and the whole Christian
world was convulsed by the schism at Rome. But
the secession of St. Cyprian, and the consecration
of his bishops of Africa, and the influence of St. Diony-
sius the Great, Bishop of Alexandria, brought the
East within a few months to a right decision. In
Italy itself the pope got together a synod of sixty
bishops. (See NOVATIANISM.) Fabius, Bishop of
Antioch, seems to have wavered. Three letters to
him from Cornelius were known to Eusebius, who gives extracts from one of them (Hist. Eccl., VI, xiii), in which the pope details the faults in Novatian's election and conduct with considerable censure. Nevertheless, it is clear that in the Roman Church there were forty-six priests, seven deacons, seven subdeacons, forty-two acolytes, fifty-two ostiarii, and over one thousand five hundred widows and persons in distress. From this Burnet estimated the number of Christians in Rome at fifty thousand, so he thought; but Bellarmi and Harnack think this figure possibly too large. Pope Fabian had made seven regions; it appears that each had one deacon, one subdeacon and six acolytes. Of the letters of Cornelius to Cyprian two have come down to us, together with nine from Cyprian to the pope. Mgr. Mazzarri, in his true text of the letters of Cornelius are in the colloquial "vulgar Latin" of the day, and not in the more classical style affected by the ex- orator Cyprian and the learned philosopher Novatian. Cornelius sanctioned the milder measures proposed by St. Cyprian and accepted by his Carthaginian colleague for the restoration to communion, after varying terms of penance, of those who had fallen during the Decian persecution (see CYPRIAN).

At the beginning of 263 a new persecution suddenly broke out. Cornelius was exiled to Centumcellae, near Velleia. There were no defections among the Roman Christians, all were confessors. The pope "led his brethren in confession," writes Cyprian (Ep. ix. ad Corn.), with a manifest reference to the confession of St. Peter. "With one heart and one voice the whole Roman Church confessed. Then was seen, dearest friend, that faith which the blessed Apostle praised in you (Rom., i. 8); even then he foresaw in spirit your glorious fortitude and firm strength." In June Cornelius died a martyr, as St. Cyprian repeatedly calls him. The Liberian catalogue has ibi cum gloriam dormicionem accept, and this may mean that he died of the rigours of his imprisonment, though later accounts say that he was beheaded. St. Jerome says that Cornelius and Cyprian suffered on the same day in different years, and his careless statement has been generally followed. The feast of St. Cyprian was in fact kept at Rome at the time Cornelius was buried, a circumstance that the "De martyribus martyrum" has "XVIII. octobri Cyprianum Africe Romae celebraturn in Calisti." St. Cornelius was not buried in the chapel of the popes, but in an adjoining catacomb, perhaps that of a branch of the noble Cornelii. His inscription is in Latin: CORNELIUS MARTYR and in Greek: ΚΩΝΣΤΑΝΤΙΝΟΥΣ ΑΡΙΣΤΗΝΑ. His feast is kept with that of St. Cyprian on 14 September, possibly the day of his translation from Centumcellae to the catacomb.

The two Latin letters will be found in all editions of CYPRIAN. A better text is in MERCATI, D'alcuni nostri eusebi per la critica del testo di S. Cypriano (Rome, 1890). They will be found with that of Cornelius in a very good, and one of the best, edition of EUSEBIUS, Synopsis Hist. (1908). A very good and complete edition of the Latin correspondence of St. Cyprian is due to W. M. Thoen (Thorn, 1903)

Cornelius, Peter, later when ennobled, von Cornelius, b. at Düsseldorf, 23 September, 1783; d. at Berlin, 6 March, 1867. In 1811 he went to Rome, where until 1819 he became director of the Academy of Fine Arts at Düsseldorf; while at Düsseldorf he also executed works on a large scale for the Crown-Prince of Bavaria, later Louis I. In 1826 Cornelius was appointed director of the Academy at Munich, and for a long time Louis I of Bavaria was his liberal patron. After fifteen years, however, misunderstandings and the envy of detractors obliged Cornelius to accept the pension offered him by Frederick V. of Prussia as director of the Academy of Fine Arts at Berlin, which office he retained until his death. Cornelius early developed poetic imagination, great energy, courage for large undertakings, and technical skill. He felt himself called to accomplish great tasks, and so occupied himself with a large theme, the illustration of Goethe's "Faust." The publication of the first six sheets furnished Cornelius with the means for his first visit to Rome. Here he joined the Italian colony of German artists, the so-called "Nazarene painters," and was powerfully stimulated both by working with them and by their enthusiasm for a new school of German-Christian art. This intercourse, however, entailed no loss of his independence and creative force. He drew the remaining six pictures for "Faust," illustrated the "Romeo and Juliet" of Shakespeare, whose works just at this period were becoming better known in Germany, and filled by the rising national spirit of his country, made drawings for the old German epic, the "Nibelungenlied."

While at Rome his longing to express great conceptions in fresco-painting on a large scale had its first opportunity of fulfilment. The Prussian ambassador, Bartholdy, gave a commission to the German painters for the decoration of his house on Monte Pincio with frescoes from the Old-Testament story of Joseph; through Bartholdy's influence the painter received an order from the Marchese Massimi to paint frescoes from the works of Ariosto, Tasso, and Dante in his villa near the Lateran. Some of these frescoes have a deservedly high reputation, as: "Joseph before Pharaoh", "Joseph and his Brethren", "Dante before Peter, James, and John", as well as other groups in the cartoons for scenes in Paradise. Three of the Dante cartoons were completed, but one of them has since vanished. The superiority of Cornelius to the entire circle of his artist-friends, Overbeck included, became so clear to men like Niebuhr and Prince Louis of Bavaria that the two positions above-mentioned, at Düsseldorf and Munich, were offered him. No longer hampered by material cares or artistic limitations, Cornelius had now full opportunity and a fine field for the carrying out of his ideals. A commanding place in the artistic world of his own country was a long time assured him, and the attainment of his hopes for the development of art on a heroic scale in Germany seemed near. The first ten years of his life in Düsseldorf and Munich as a professor and working artist formed a period of great renown and success.

As director Cornelius took up with vigour the re-organization of the art academies of Munich and Düsseldorf, but his influence in the latter city was not permanent. After he had made Munich his permanent residence and most of his friends had followed him there, the academy at Düsseldorf, under the direction of Schadow, pursued other aims, one of the main differences being that the scheme of de-
and lofty ideals; at the same time he could make use of symbolic allusions as they are conceived by Dante.

Cornelius has been called a poet and thinker; the loftiness and unity of conception displayed by these frescoes justify the assertion. The mastery of the difficult proportion of space shown is astonishing; the surfaces seem to have been planned for the frescoes and not the frescoes for the spaces. On the other hand, the inequality of execution especially in regard to colour is very striking. Cornelius allowed great liberty to his unequally gifted pupils; still much of the work, especially what he painted himself, is excellently carried out, as: "The Fall of Troy", "The Judges of the Lower World", "Eros with an Eagle", and "Eros with Cerberus". It must be acknowledged that Cornelius was not strong in colour, although his frescoes from the life of Joseph in the Villa Bartholdy are in all particulars satisfactory. King Louis I allowed him to make only the drawings for the loggia of the Pinakothek; the execution of the work was entrusted to Clemens Zimmermann. In these designs Cornelius gave in an unstrained manner, yet one full of thought and imagination, the history of German and Italian painting. He hoped to have an opportunity in the new church, the "Ludwigskirche", to create a Christian epic which should be a Divine Comedy in colour, but to his bitter disappointment he was only commissioned to decorate the choir and transept. The subject chosen for delineation was the Christian conception of the Creation, Redemption, and the Last Judgment; the gigantic fresco of the Judgment, containing 225 square feet, was painted by himself (1836-39). Parts of the fresco show great merit in composition and drawing; a reverent composure and the avoidance of repulsive nudity distinguish the painting from Michelangelo's "Judgment" on the altar wall of the Sistine Chapel. The colour scheme, it must be acknowledged, is somewhat lacking in harmony, and the light in the church is unfavourable. King Louis saw the fresco under peculiarly unfortunate circumstances, and Cornelius fell into disgrace.

In 1841 he went to Berlin where the art-loving Frederic William IV became his unwavering patron. While at Berlin he drew for the royal mausoleum planned by the king the celebrated cartoons: "Christ Conquering Sin", for the cloister designed in connexion with a new cathedral; "Christ Conquering Death", for the west wall of the cloister; "Christ in His Church", for the south wall, and "Christ at the End of the World", taken from the imagery of the Apocalypse, for the north wall. In harmony with the scheme of the cartoons is the painting for the apse of the intended cathedral, "Mankind Awaiting the Day of Judgment", completed by Cornelius in 1856. During his residence at Berlin Cornelius produced his most mature work as a draughtsman; his designs were at all times so complete that they were not certain to gain by execution in colour. The cartoons for the royal mausoleum, of which the one for the north wall was on the scale of the intended fresco, met fairly undisputed approval. His work as head of the German School at Rome and as leader in Germany of aspiring artists gives Cornelius the position of a pioneer of the nineteenth century in asserting high ideals and in developing technic on the heroic scale.

H. Grimm, "Neue Szenen" (Berlin, 1865); Von Wolkenburg, "Peter von Cornelius" (Berlin, 1867); Auguste Cornelius, "Der Mein der deutschen Maler und Künstler" (Berlin, 1874); Peter von Cornelius, ein Geldenbuch (Berlin, 1874); Carinum in "Germanisches und preussisches Leben" (Leipzig, 1889); Eckardt, "Peter Cornelius" (Bielefeld, 1900), gives on p. 131 a complete bibliography.

G. Gietmann.

Cornelius Corneli i a Lapide (Cornelius Cornelii van den Steen), Flemish Jesuit and exegete, b. at Bocholt, in Flemish Limburg, 18 December, 1567; d. at Rome, 12 March, 1637. He studied humanities and philosophy at the Jesuit colleges of Maastricht and Cologne, theology first, for half a year, at the University of Douai, and afterwards for four years at Louvain; he entered the Society of Jesus, 11 June, 1592, and, after two years' novitiate and another year of theology, was ordained priest 24 December, 1595. After teaching philosophy for three years, he was made professor of Holy Scripture at Louvain in 1596 and next year of Hebrew also. Twenty years later, in 1616, he was called to Rome in the same capacity, where, on the 3rd of November, he assumed the office which he filled with such renown for many years after. The latter years of his life, however, he seems to have devoted exclusively to finishing and correcting his celebrated commentaries. He was a sincerely pious and zealous priest and an exemplary religious. During his professorship at Louvain he liked to spend his holidays preaching and administering the sacraments, especially at the pilgrimage of St. Michael (Montigny). With moving simplicity and truth he portrayed himself in an emotional prayer to the Prophets at the end of his commentary on Daniel: "For nearly thirty years I suffer with and for you with gladness the continual martyrdom of religious life, the martyrdom of illness, the martyrdom of study and teaching; I have had with you all, the fourth martyrdom, of blood. For you I have spent my vital and animal spirits; I will spend my blood too." With his brethren in religion at Rome he enjoyed so high a reputation for sanctity that, when he died, they gave him a separate burial place, in order to be the more certain of finding his bones when eventually, as they hoped, he should receive the honour of beatification.
Cornely, Karl Josef Rudolf, German Biblical scholar and Jesuit, b. 19 April, 1830, at Breyell in Germany; d. at Trevez, 2 March, 1908. On the completion of his classical studies he matriculated at Münster in Westphalia to study philology and theology. In 1852 he joined the Society of Jesus. Recognizing his abilities, his superiors determined to give him the best possible training both practical and theoretical. Consequently, by his own efforts he took a two years' course of Scholastic philosophy at Paderborn and Bonn and another year of sacred and profane oratory. Then he was sent to Feldkirch to teach Latin, Greek, and German, and to preside at the disputations of the students of philosophy from 1857 to 1859. After this practical experience he returned to Paderborn to go through the necessary course of dogmatic and moral theology previous to his ordination in 1863. The next year he was sent to study the Commentaries on the Greater and Lesser Prophets, on the Acts of the Apostles, the Canonical Epistles and the Apocalypse, Ecclesiasticus and the Psalms, followed later on. The rest were edited only after his death; but all of them have been several times rewritten and collectively. Of the Commentary on the Epistles of St. Paul he himself was permitted to see at least eleven editions. The complete series, with Job and the Psalms added by other hands, appeared at Antwerp, 1681, 1714; at Venice, 1717, 1740, 1798; at Cologne, 1732; at Turin, 1838; at Lyons, 1839-42, 1865 and 1866; at Malza, 1843-48; at Naples, 1854; at Lyons and Paris, 1855 and 1856; at Milan, 1857; at Paris, 1859-63. The last-mentioned edition has been enriched by Cranmore and Péronne with many annotations from more recent interpreters. All these commentaries are on a very large scale. They explain not only the literal, but also the spiritual and moral sense of the sacred text, and furnish a large number of quotations from the Fathers and the later interpreters of Holy Writ during the Middle Ages. Like most of his predecessors and contemporaries, a Lapide intends to serve not only the historical and scientific study of the sacred text, the exegesis, the interpretation, and especially of pulpit exposition. An extract from the commentary on the Acts appeared in 1737 at Tournai, under the title: "Effigies Sancti Pauli, aive ideae vitae apostolicae". A large work in 4 vols., "Les trevres de Cornelius a Lapide: extrait de ses commentaires de l'ecriture sainte a l'usage des predicateurs, des communautés et des families chevétennes", by the Abbé Barbier, was published at Le Mans and Paris, 1856, re-edited at Paris, 1859, 1872, 1876, 1885, 1890; and an Italian translation of the same, by F. M. Faber, appeared at Parma, 1869-70, in 10 vols., 16 mo.

These numerous editions show how highly these works are estimated by Catholic theologians. But Protestant voices have joined in the appreciation. G. H. Goezius (Leipzig, 1899) wrote an academical dissertation, Exercitatio theologicae de Cornelii a Lapide Commentatoris, "and wrote he praises the Jesuit author as the most important of Catholic Scriptural writers. An English translation of the complete commentaries was undertaken by the Rev. Thomas W. Moseman, an Anglican clergyman, under the title, "The great Commentary of Cornelius a Lapide." (London, 1876—). A manuscript in the Vatican Library contains an Arabic translation of the Commentary on the Apocalypse, by Yusuf ibn Girgis (beginning of the eighteenth century). The same Marone commentator is said to have translated the Commentary on the Epistles of St. Paul.

"Commentariorum de collectio de praeclara historicis" (Brussels, 1857, 610-4, 630-45; DE BACKER AND SOMMEVVIELE, 8bid. de la c. de J. (Brussels and Paris, 1863), IV, 1011-26, IX (1890), 574.

JOHN P. V. KASTERN.

Cornely was a kind of encyclopedia of Catholic missions. In 1873 "Die katholischen Missionens", intended for German readers, this magazine was above all to describe the labours and successes of the German missionary and to give the history, the geography, and the ethnographic features of the German missions in foreign countries. In the beginning Cornely took the lion's share of the work upon himself. Soon, however, the labour was thus divided: Cornely wrote the reports on Europe and Australia; Baumberg reported on Asia; Kreiten on Africa; and von Hummeler on America. In 1879 Cornely was appointed professor of exegesis at the Gregorian University in Rome. Here he planned and wrote the first volumes of the "Cursus Scripturarum Sacrarum", a complete Biblical encyclopedia, the largest publication of its kind in modern Catholic literature. To carry out a plan so
vast required the combined efforts of many scholars. Cornely himself undertook to write the general and special introductions and the commentaries on the Epistles of St. Paul. Even this task he could not complete, although he discontinued lecturing in 1889 to devote all his energies to the greatest work of his life, as he says in his writings: “Introductio generalis in U. T. libros sacros” (Paris, 1893); “Introductio specialis in historico V. T. libris” (Paris, 1897); “Introductio specialis in idee absolute et prophetice V. T. libris” (Paris, 1897); “Introductio specialis in singulis N. T. libris” (Paris, 1897); “Historiae et notitiae adductivas in U. T. libris Compendium” (Paris, 1890); “Synopsis librorum Christi sacram” (Paris, 1899); “Psalmorum synopseis” (Paris, 1899); “Analytis librorum sacrorum N. T.” (Paris, 1899); “Commentarius in praeem ep. ad Corinthios” (Paris, 1890); “Commentarius in epistolos ad Cor. alteram et ad Galatas” (Paris, 1890); “Commentarius in ep. ad Romanos” (Paris, 1890); “Leben des sel. Petrus Faber” (Freiburg, 1900); “Leben des sel. Spinola” (Mainz, 1898).

Bachmayer, Stammen aus Maria-Laz. LXXIV, 4, 387. Peter Schwerter.

Cornet, NICOLAS, a French theologian, b. at Amiens, 1572; d. at Paris, 1663. He studied at the Jesuit college of his native place, took the doctorate of theology at the University of Paris, 1626, and soon became president of the École de Navarre, syndic of the Sorbonne or faculty of theology. In this capacity he reported to the assembly of the Sorbonne, 1649, seven propositions, two taken from Arnauld’s “Fréquente Communion and five from the “Augustinus” of Jansenius. In spite of strong opposition created by members of the faculty of the studies, with Saint-Amour, appealed to Parliament and by Jansenists like De Boursiès in “Propositiones de gratia in Sorbonnes facultate prope diem examinandi, proponeCal. Junii 1649”, and Arnauld in “Considération sur l’entreprise faite par M. Cornet, syndic de la faculté, en l’assemblée de Juillet 1649”, he succeeded in having the Assembly of the Clergy of 1650 denote the five propositions of the “Augustinus” to Pope Innocent X, who condemned them, 31 May, 1653 (Denzinger, Enchiridion, no. 1092 (906) sqq.). Maligned by Jansenist writers like Hermant, Cornet was held in high esteem by Richelieu and Mazarin. His eulogy was pronounced by no less a personage than Bossuet himself (Oraison funèbre de Messire Nicolas Cornet). He left no writings, but is said to have collaborated with Richelieu on the “Méthodes de controversy” (Paris, 1856); SAINT-REUX, Port-Royal (Paris, 1871); REHMERSCHER, Histoire universelle (Paris, 1856), XI, 9, 150. J. F. Sollier.

Corneto-Tarquinia, DIocese of. See Civitavecchia and Corneto.

Cornice, the uppermost division of the entablature, the representative of the roof, of an order, consisting of projecting mouldings and blocks, usually divisible into bed-moulding, corons, and gutter. In classic architecture each of the orders has its peculiar cornice. Any moulded projection which ceases or finishes the part to which it is affixed, as the coping of a façade, the moulding that runs round an apartment under the ceiling, or surmounts a door, window, etc.

Cornillon, Abbey of, founded by Albero, Bishop of Liége, in 1124, three years after St. Norbert had formed the Premonstratensian Order. The abbey was intended for Canons Regular of Prémontré who had been sent from the Abbey of Floreffe near Namur; it stood on the right bank of the Meuse on an elevation called Mont Cornillon which overlooked the city of Liége. In the early years of the order all Norbertine abbeys were double abbeys, that is to say, the canons lived on one side of the church and the Norbertine nuns, who had charge of the hospital for women, dwelt on the other side. Where an abbey stood on an elevation, as was the case at Cornillon, both the nunnery and the hospital were erected at the foot of the hill. St. Juliana of Cornillon (b. 1193; d. 1258), whose name is connected with the institution of the feast of Corpus Christi, was a nun of this convent. The first abbot of Cornillon was Blessed Lucas, one of St. Norbert’s disciples, a learned and holy religious, some of whose writings have been published in the “Bibliotheca Magna Patrum”, and also by Migne. The Bishop of Liége, wishing to build a fortress on the heights of Cornillon, gave in 1288, in exchange to the Norbertine canons, another place in his episcopal city where the abbey, now called Beaurepart (Bellus Reditus), stood until it was suppressed by the French Republic in 1796. All the religious refused to take the oath of allegiance to the Republic; some were exiled to Rome. The abbey was put to desert and the abbey was declared to be of public utility, consequently it was not sold; for a time it served as an arsenal and for other government purposes, but by decree of 11 June, 1809, Napoleon gave the abbey to the Bishop of Liége, as the bishop’s residence and diocesan seminary. Where the Abbey of Mont Cornillon originally stood the Little Sisters of the Poor have erected a home for old people, and close to the home, but below, at the foot of the hill, the former convent is now inhabited by Carmelite nuns. Part of the church of the nuns has remained as it was when St. Juliana of Cornillon prayed there, and was favoured with miracles which led to the institution of the feast of Corpus Christi.

Cornoldi, Giovanni Maria, professor, author, and preacher, born at Venice, 29 Sept., 1822; d. at Rome, 18 Jan., 1892. He entered the Society of Jesus in 1840 and taught philosophy at Bressanone and Padua for many years. From 1880 until his death he belonged to the editorial staff of the “Civiltà Cattolica”, in Rome and often preached at the seminary of the same institution. He was an ardent disciple of St. Thomas and wrote many works in explanation of his doctrine and in refutation of Rosinianism. His “Lezioni di Filosofia” (Rome, 1872) was translated into Latin by Cardinal Agostini under the title “Institutiones Philosophica ad mentem divi Thomae Aquinatis”. In addition to his purely philosophical writings he published a commentary on the “Divina Commedia” of Dante, illustrated from philosophy and theology. He founded academies in honour of St. Thomas at Bologna and at Rome and established two periodicals, “La Scienza Italiana” and the journal of the “Accademie di S. Tommaso”. He was a man of great amiability, zealous and fervent in religious life. “Civiltà Cattolica”, 1892, 1, 348-352, gives a full list of his writings; HUNTER, Nominautor. John Corbett.

Coronado, Francisco Vasquez de, explorer, b. at Salamanca, Spain, 1500; d. in Mexico, 1553. He went to Mexico before 1538, and is said to have been one of the favourite of the vicar Don Antonio de Mendosa, who appointed him Governor of New Galicia in 1538. In the year following, on the strength of the
CORONATION 380

Coronation. — The subject will be treated under the following headings: (I) The Emperors at Constantinople; (II) Visigothic and Celtic Elements; (III) The English Coronation Orders; (IV) The Western Empire and the Roman Pontifical; (V) Other Coronations.

I. THE EMPERORS AT CONSTANTINOPLE. — "A coronation rite," it has been well said, "is ideally the process of the creation of the monarch, even though through a long course of time the idea of its success, by a natural and instinctive desire, it may be said that the coronation, properly speaking, there was none, for it was he who first brought the regal diadem into prominence. Yet certain features about the accession of the emperors in this early period deserve attention. In the first place, theatrically at least, the emperor was elected. Normally, the senate voted and the people, or more commonly the army, acclaimed and in that way ratified the choice. No doubt this procedure was often anticipated and the result was assured before any forms were gone through. But the forms were not dispensed with, and even when the senate or the army had elected the candidate which was decisive, the people met and acclaimed in more or less formal comitia. In spite, however, of the principle of election, the emperor was often able to exercise a predominant voice in the election of his successor or his colleague, as he could also create his wife "Augusta." In his last period of imperial insignia were "the purple", that is the pallium or chlamys of the general in the field, emblematic of the supreme military authority, for the emperor was sole imperator; and secondly, the laurel wreath. The more or less violent clothing of the new emperor in the processus ludamentum often constituted a sort of investiture. On his part the promise of a largesse to the soldiers, and sometimes to the people, became the equivalent of a formal acceptance of the election.

A new order of things was brought about by Constantine's assumption of the diadem (see Sichel, in Byzantinische Zeitschrift, VII, 513–534). Constantine wore it habitually during life (caput coronnatum perpetuo diademate, says Aurelius Victor, Ep. lx), and after death it adorned his corpse. In this way the diadem became the primary symbol of sovereignty, but without at first any prescription of forms according to which it should be conferred. When Julian was proclaimed, by his party, as "Augustus", he hoisted him standing upon a shield, a ceremony they seemed to have learned from the German recruits in their ranks, and then a standard-bearer took off the torque, or gold necklace, which he wore and set it upon Julian's head. No other crowning seems to have taken place, but soon after we find the emperor at Vienna,
wearing a gorgeous diadem set with jewels. In the case of Valentinian (364) and his son Gratian (367) we have equally mention of a crown assumed amid profuse acclamations of the assembled army. In each case, also, the newly-elected sovereign made a speech and promised largesses to the troops, which Julian fixed at five gold pieces and a pound of silver to each man. Informal as the proceedings in all these cases seem to have been, most of the elements so far mentioned took a permanent place in the coronation ceremonial which was ultimately evolved. Even the Teutonic practice of hoisting upon a buckler (see Tacitus, Ann., XV, 29) though rarely mentioned explicitly, was probably maintained for a considerable time, for it certainly was observed in the election of Anastasius (491) and Justin II (565), and the miniature of the election of David in a tenth-century psalter at Paris, in which he is represented standing upon a buckler supported by young men while another sets a diadem on his head, implies that this ceremony was generally familiar at a later date. The diadem, though the military torque after the analogy of Julian’s election was often retained as well, was and continued to be the symbol of supreme power, and along with it, from the time of Constantine onward, went the ceremony of “adoration” of the monarch by prostration.

The next epoch-making change seems to have been the introduction of the Patriarch of Constantinople to set the diadem upon the head of the elected sovereign. The date at which this first took place is disputed; for we cannot altogether ignore the alleged dream of Theodosius I who saw himself crowned by a bishop (Theodoret, Hist. Eccl., VI, vi), but Sichel (loc. cit., p. 517; cf. Gibbon, ch. xxxvi) holds that the Patriarch Anatolius in 450 crowned Marcian and by that act originated a ceremony which became of the greatest possible significance in the later conception of kingship. At first there seems to have been no idea of lending any religious character to this investiture; and make their formal choice, and the book of the Holy Gospels is exposed in their midst (Const. Porph., De Cer., I, 92). The coronation does not take place in a sacred building, but an oath is taken by the emperor to govern justly and another written oath is exacted of him by the patriarch that he will keep the faith entire and introduce no novelty into the Church. Then after the emperor had donned a portion of the regalia, the patriarch made a prayer, and the “Kyrie eleison” (possibly an ekteles or litany) being said, put upon his sovereign the imperial chlamys and the jewelled crown. The acclamations also which accompany and follow the emperor’s speech, with its promises of the usual largesses, are pronouncedly religious in character; for example “God will preserve a Christian Emperor! These are common prayers! These are the prayers of the world! Lord help the pious! Holy Lord uplift Thy word! ... God be with you!” Moreover at the conclusion of the ceremony the emperor went straight to St. Sophia, putting off his crown and offering it at the altar.

The first emperor to be crowned in church was Pho-
CORONATION 382  CORONATION

case in 602, and although our records of procedure are somewhat defective, no doubt can be felt that from this time forth the whole ceremonial assumed a formal and religious character. The rite is contained in the "Euchologium", the earliest extant manuscript, dating from the 7th century. The ceremony is intended to be celebrated with the insignia in the metatorium before the ceremony begins, but the ritual centres in the conferring of the chalmyas and crown. Before each of these is imposed the patriarch reads in silence an impressive prayer closely analogous in spirit to what we find in the Western liturgy. As an example let us take over the chalmyas begins thus: "O Lord, our God, the King of kings and Lord of lords, who through Samuel the prophet didst choose David Thy servant to be king over Thy people Israel; do Thou now also hear the supplication of us unworthy and behold from Thy dwelling place Thy faithful servant N, whom Thou hast been pleased to set as king over Thy holy nation, which Thou didst purchase with the precious blood of Thine only-begotten Son: vouchsafe to anoint him with the oil of gladness, endue him with power from on high, put upon his head a crown of pure gold, grant him long life, etc." After the coronation, the prayer continues: "Holy, holy, holy, Loigny to the highest and on earth peace", three times. Then Holy Communion is given to the emperor from the reserved Sacrament, or perhaps even the Mass of the Precinctified is celebrated. After which all the standards and halberds are dipped and raised again, and the senators and clergy prostrate in adoration.

One cannot help suspecting that the choice of this particular moment, when the emperor has just received the Sacred Host, for the act of adoration may have been motivated by some foresight of possible conscientious objections about performing such adoration merely to the emperor's person. The rite of prostration, though introduced by Constantine, was probably not unaffected by lingering memories of the pagan apotnesis of the Caesars. Finally, after the adoration came the laudes (see ACCLAMATIONS) of acata as they were called in the East (ακαθαρκεία was the technical word). The cantors cried "Glory be to God in the highest. . . This is the great day of the Lord. This is the day of the life of the Romans", and so on for many verses, the people repeating each one or twice. After which "Many, many, many": B, "Many years, from henceforth up sitting so and so, and the chalmyas of the Romans"; B, "Many years to you" and so forth with much repetition. Finally, the emperor leaves the church wearing his crown and going to the metatorium seats himself upon his throne while the dignitaries (δικαστήρια) come and do homage by kissing his knees. Although the prayer over the chalmyas beseeches God to "anoint him with the oil of gladness" the early eucharologias contain no mention of any rite of unction, and it seems tolerably certain that this was not introduced in the East until the twelfth century (Brightman, loc. cit., 383-386). Even when adopted, the unction was only an ornamental one, the oil being applied with the chalmya upon the monarch's head. The introduction of this new feature seems to have been accompanied with other changes which are found in the later Byzantine coronations. The investiture with the purple chalmyas altogether disappears, but two distinct prayers or blessings are retained, between which are inserted by unification and the crowning. Finally, we may notice that the emperor is to some extent treated as an ecclesiastic, for he wears a mandylion, or cope, and discharges the functions of a deputatus, which is, or was, the Greek equivalent of one of our minor orders.

II. NECROPOLITIC AND CELTIC ELEMENTS.—Turning now to the inauguration rite of early kingships in the West the first traces of a coronation order seem to be found in Spain and in Great Britain. Some of the Spanish councils speak copiously, though vaguely, of the election of kings (Migne, P. L., LXXXIV, 385, 396, 426), and while in the first half of the seventh century there is no mention of unction but only of a profession of faith and promise of just government on the part of the king and of the loyal submission of his people, towards the close of the same century we have the clearest evidence that the Visigothic kings on their accession were solemnly anointed by the Bishop of Toledo. When in 672 the oil was poured upon the head of the kneeling King Wamba a cloud of white smoke arose (see ANNO FAVO REM.); in one document the king, "modum columnae, Julian, Historia, c. iv; Migne, P. L., XCVI, 706) which was regarded by those present as a supernatural portent. For the rest we know little of this early Spanish coronation rite beyond the fact that it was a religious ceremony and that the king undertook certain obligations towards his people. It is chiefly interesting as supplying the earliest known examples of the unction. Whether this ceremony was instituted by the Spanish bishops in imitation of what they read in the Old Testament concerning the unction of Saul, David, and Solomon (I Kings, x and xvi; III Kings, 1) or whether they themselves derived it from the purely Christian tradition it seems impossible now to decide.

In view of what has been written of late about the close liturgical relations between Spain and England, via Celtic, i.e. probably Irish, channels (see Bishop in Journ. of Theol. Stud., VIII, 278), it is natural to pass from Spain to the earliest coronations in the British Isles. The statement of Gildas (c. 530?) cannot be ignored, when, speaking of the desolation and corruption of manners in Britain, he says: "ungebantur reges non per Deum, sed quilibet crudeliores exstant, et paucum post uboritibus non pro veri examinatione crucifabuntur, alii electa trucoribus" (De Excidio, ch. xxii; Mommersen, 37). Again, in his commentary on the First Book of Kings (x, 1) St. Gregory the Great certainly seems to speak as if the rite of the unction of kings was practised in his time (Migne, P. L., LXXIX, 278). "Ungatur caput regis", he says; "quia spirituali gratia mens est replenda doctoris". It may conceivably be that these passages are only metaphorical, but they at least show a familiarity with the conception which might at any moment find expression in actual practice. At the same time no record exists of the use of unction in the earliest Scottish coronations. Gathering together the fragments of information which give the following ceremonial as representing in all probability the rite of "ordination" of a Celtic king, say the Lord of the Isles, in the seventh and eighth centuries. There was a gathering of the principal people of the nation including, if possible, seven priests. The new ruler was elected unless a tanist (a lieutenant with right of succession) had been elected already. The king was clad in white and Mass was celebrated down to the Gospel. After the Gospel the king was made to set his right foot in the foot-print of Fergus Mor-Mac Era, the impression of which was considered to make the right of kingship. He then took possession of the ancient customs of the country and to leave the succession to the tanist. His father's sword or some other sword was then placed in one of his hands and a white rod in the other, with suitable exhortations. After this a bard or herald rehearsed his genealogy. Re-entering the church seven prayers were recited by him and by, if possible, the whole of these prayers being called the Benediction, during which he who offered it laid his hand upon the king's head. The Mass was then finished and the king probably Communicated. At the conclusion of the whole he gave a feast and distributed a largess (Bute, Scottish Coronations, 33). It will be noticed that as in the earlier Spanish ritual, there is no mention of a crown or diadem, and though the unction which is so prominent a feature in the Spanish ceremony is ap-
pbrantly lacking, still our information is too fragmentary to enable us to speak with confidence, more especially in view of the casual utterance of Gildas.

III. THE ENGLISH CORONATION CUSTOMS. But of all detailed ceremonies for the performance of a monarchal coronet which has been preserved to us in a complete form is one of English origin. It is known as the Egbertine Order, because the best-known manuscript in which it is contained is an Anglo-Saxon codex which professes to be a copy of the Pontifical of Archbishop Egbert of York (752-765). We cannot in such a case be secure against subsequent interpolations, for the Egbert Pontifical, now at Paris (MS. Latin 10,575), is only of the tenth century, but the character of the coronation order itself is quite consistent with an early date. Moreover the same ritual occurs in other early manuscripts, and fragments of it are found embedded in Continental orders, such as that for the coronation of Queen Judith (856). Nearly everything in this Egbertine Order is of interest and we may analyze it rather closely. At the head we find the title: Missa pro regibus in die benedictionis ejus (sic). Being, as the title says, a Mass, it begins: Intrat, intrat, regum cunctos nunc Damasyst, eum (xxxvi,6–4), Gradual, and Gospel (Matt., xxi., 15 sq.). Then occurs the rubric: "the blessing upon a newly-elected king", upon which follow three prayers of moderate length beginning respectively: "Te invocamus, Domine sancte", etc.; "Deus qui populis tuis", etc.; and "In Christum Confitemini", etc. The second of these prayers, which still remains practically unchanged in the coronation order used at the accession of King Edward VII, may be quoted here as a specimen:—

"O God, who providest for Thy people by Thy power and rulest over them in love; great unto this Thy servant Edward our King, the spirit of wisdom and government, that being devoted unto Thee with all his heart, he may so wisely govern this kingdom, that in his time Thy Church and people may continue in safety and prosperity, and that, persevering in good works unto the end, he may through Thy mercy come to Thine everlasting Kingdom; through Jesus Christ Thy Son our Lord. Amen."

It is worth noting that we have no reason to believe that this prayer or others occurring in the Egbertine Order is necessarily of English origin. On the contrary it seems to have been adapted out of one of the Roman forms of the Roman Sacramentary—which begins: Deus qui populis tuis indulescit consulis, and an intermediate form was used at the coronation of Charles the Bald as King of Lotharingia in 868. After the three prayers we meet the rubric: "Here he shall pour oil upon his head from a horn, with the intonation: Unum cum Petro, Amen. Psalm Domine in virtute tua, etc. (Ps. xx). Let one of the bishops say the prayer while the others anoint him." The prayer referred to is the Deus electorum fortitudo, some phrases of which still remain in the prayer now said immediately before the anointing. The same Deus electorum fortitudo is found in the coronation order of Queen Judith, who was anointed queen by Hincmar, Bishop of Reims, in 856. It contains allusions to the olive-branch brought by the dove to the ark and to the anointing of Aaron and of the kings of Israel and thus shows itself to have been originally designed for some such purpose as a prayer of anointing. Then follows another rubric: "Here all the bishops with the magnates [principibus] put the sceptre into his hand." Some of the texts, however, omit this last rubric and write simply Benedictio; and to say the truth the short sentences which follow are very much of the nature of a prayer against the king. The last one is already quoted from some of the Byzantine orders, though they are a little longer in form and could certainly not have been repeated in Latin by the Anglo-Saxon populace or even the magnates. The people's share in this function is probably indicated by the simple "Amen" which follows each clause. There are sixteen of these brief clauses and then the rubric announces: "Here a staff is put into his hand", whereupon another prayer for the welfare of the king is followed by a prayer of blessing, vague and somewhat extravagant in language, preceded by the rubric: "Here let all the bishops take the helmet and set it upon his head." The simultaneous crowning by several hands is rather a noteworthy feature in the ceremonial and it is curious to find it in a later "Liber Regalis" and other orders the archbishop is named alone imposing the crown, the illuminations in medieval chronicles and romances almost invariably represent the crown as being put on by at least two bishops standing on either side. After this prayer follows what is perhaps the most interesting rubric of the whole order, though unfortunately even with the aid of our three different manuscripts we cannot restore the text of the latter part with any great degree of confidence. "And all the people shall say three times with the bishops and priests: 'May King N. live for ever. Amen, Amen, Amen.' Then shall the whole people say: 'God save the king.'" Then the pope is placed on his throne by this [i.e. the following] blessing. Accordingly before the Mass is suffered to proceed another solemn prayer is said, Deus perpetuatus auctor, which in the Egbert Pontifical is emphasized by a preceding rubric: "Let them say the seventh prayer over the King." Notice the prayer in question is really the eighth, and undoubtedly this fact coupled with traces of marginal numbering which reveal themselves in the Egbert Pontifical lends probability to Lord Bute's theory that this series of prayers betrays Celtic influences and was originally designed for the seven priests whose presence was supposed in the Celtic ritual. The eighth prayer, as he thinks that of the union, is shown on this hypothesis to be an interpolation of somewhat later date. After this last prayer, Deus perpetuatus auctor, the Mass is resumed. The Mass prayers are Roman and the same Mass prayers are attached to the very early coronation order which Mgr. Magistretti has printed from an Ambrosian pontifical of the ninth century and which he pronounces to be also indisputably Roman. It seems probable enough that we are here again in the presence of the same sort of compromise between Celtic and Roman elements which we find in the Stowe Missal. In the same Missal as the present one we find the following rubric—it may perhaps be an interpolation of later date than the rest of the order—and we may here see the King's first proclamation to his people:—

"It is rightful conduct in a king newly ordained to make these three bequests [prœcepta] to his kingdom, namely, etc., etc." (Ps. xii.).aw."First, that the Church of God and all Christian folk should keep true peace at all times. Amen."

"The second is that he should forbid all robbery and all unrighteous things to all orders. Amen."

"The third is that he should enjoin in all dooms justice and mercy, that the gracious and merciful God, of His everlasting mercy, may show pardon to us all. Amen."

It is probable that in this triple division of the primitive oath we have the explanation of a feature which still survives in the English coronation service. Before the king three naked swords are carried, two pointed and one without a point, which is hence known as curtana, the sword cut short. The two first swords were known to medieval writers as the sword of the clergy and the sword of justice. They represent the king's two promises, to defend the Church (not, as is popularly supposed, to coerce and punish the Church) and to punish evildoers. The third, without a point, most aptly symbolizes the mercy with which, as the sovereign himself is taught to hope for mercy, all his justice is to
be tempered. We have evidence that these three swords were known in English ceremonial as early as Richard I (1189), while the form of oath just cited remained in use until quite late. Upon this oath something more will need to be said.

Towards the end of the tenth century we find that a new coronation order was in use in England. It incorporated most of the Egbertine Order but it added much new matter. Various considerations show that it was an attempt to institute the imperial coronation of the Carolingian monarchs on the Continent, and our knowledge of the imperial state assumed by King Edgar strongly suggests that it is to be assigned to the date of his deferred coronation (973). Another modification took place shortly after the Conquest and is probably to be traced to Norman influence. But all churches felt in Church and State. But the most important English order is that introduced at the coronation of Edward II, in 1307, and known as that of the "Liber Regalis". It lasted practically unaltered through the Reformation period and though translated into English upon the accession of James II it was not substantially modified until the coronation of Edward VII. It may be said even at the present day to form the substance of the ritual by which the monarchs of Great Britain are crowned. While it contained many prayers in common with those used in the imperial coronation of the Western Empire and those of the Pontifical. It also preserved many distinctive features. A short synopsis of it will be serviceable.

After the sovereign had been solemnly brought to Westminster Abbey church and had made an offering at the altar, he was conducted to a raised platform erected for the purpose and there he was presented to the people, who, on a short address from one of the bishops, signified by acclamations their assent to the coronation. Then the king was interrogated by the archbishop as to his willingness to observe the laws, customs, and liberties granted by St. Edward the Confessor, and he was required to promise peace to the Church and justice to his people, all which he confirmed by an oath taken upon the altar. Next they proceeded to the anointing, which was introduced by the Veni Creator and the litanies, during which the king remained prostrate on his face. For the anointing the king was seated and his hand, breast, shoulder-blades, and joints of the arm were anointed with the oil. The anthem and several long prayers being recited the while. Finally his head was anointed, first with the oil of catechumens and afterwards with chrism. The next stage in the ceremony was the dressing and investiture of the crown. A tunic (colobium sacer) was put upon him, with shoes upon his feet and spurs. Then he was girded with a sword and received the armilla, a sort of stole put about the neck and tied to his arms at the elbows. These were followed by the pallium, or cloak, formerly the equivalent of the chlamys, or purple paludamentum, and fastened by a clasp over the right shoulder, but now represented in English coronations by a sort of mantle like a cope. Then the crown was blessed by a special prayer, Deus tuorum corona fidelium, and imposed by the archbishop with two other prayers. This was followed by the blessing and conferring of the ring and finally the sceptre and rod were presented, also with prayers. A further long blessing was pronounced when the king was conducted to the throne there to receive the homage of the peers. Then if there was no queen consort to be crowned, Mass began immediately. A Mass with "proper" prayers and preface and a special benediction given by the archbishop before the Agnus Dei. After the Credo the King went to the altar and offered the Mass. And when Mass was ended, wine and a mark of gold. The kiss of peace was brought to the king at his throne but he went humbly to the altar to Communicate, after which he received a draught of wine from St. Edward's stone chalice. As the end the king was conducted to the shrine of St. Edward where he made an offering of his crown.

As already remarked, the service for the coronation of the King of England is by no means substantially the same, though English has been substituted for Latin and though many transpositions and modifications have been introduced in the prayers and ceremonies, all distinctively Roman expressions being studiously suppressed. The Mass of course goes back to the celebration service of the Book of Common Prayer, but the sovereign still offers bread and wine as well as gold, and down to the coronation of Queen Victoria even the "proper" preface was retained. Indeed its omission and other omissions and changes introduced for the first time in the coronation of King Edward VII were promptly made by the desire of abbreviating a very long service. The most serious alteration in the medieval form is of course in the oath. Since the time of William III the king has sworn to maintain "the Protestant Reformed Religion established by Law"—a phrase which has always been a thorn in the side of those advanced Ritualists who contend that the Church of England has never been Protestant. Moreover since the interrogative form is used, this description is uttered by the Archbishop of Canterbury before the Lords and Commons and the representatives of the whole English Church. On the other hand one clause in the interrogation still stands unaltered, "I, King Edward, do promise to cause Law and Justice in mercy to be executed in all your judgments!" To which he replies, "I will"—a promise which differs but slightly from the undertaking made in the oldest Egbertine Order. After the archbishop's questions have all been answered the king advances to the "Altar", as it was still called, and takes this solemn oath upon the Bible lying there: "The things which I have here before promised I will perform and keep, so help me God." The coronation oath, it should be noticed, must be carefully distinguished from "the Protestant Declaration", which the sovereign by a still unrepealed clause of the Bill of Rights (1689) is required to make on the first day of his first Parliament. In this declaration Transubstantiation and other Catholic doctrines are repudiated and the Mass declared idolatrous. When, as sometimes has happened, the coronation ceremony precedes the first meeting of Parliament, the declaration against Transubstantiation is read out of the coronation ceremony. The only new element introduced into the English rite since the Reformation is the presenting of the Bible to the sovereign. This like the Protestant Declaration dates from the coronation of William and Mary.

IV. THE WESTMINSTER ENSIGNS AND THE ROMAN PONTIFICAL.—There is so much general similarity between the English coronation order in its perfected form and that used for the coronation of the Emperor and the King of the Romans that it will not be necessary to treat this section in great detail. The fact is undoubtedly is, though Anglican liturgists ignore it as far as possible, that at each of the early modifications of the English ritual, more especially that under King Edgar, the imperial ceremonial was freely imitated (see Thurston, Coronation Ceremonies, 18-23 sq.). But owing to the accidental preservation of so many English documents there is no coronation ceremonial in the world the history of which is so well known to us as that of England and we have consequently given it the preference in order of treatment. Apart from Spanish examples, the earliest definite instance of unction of a Christian sovereign seems to be that of Pepin, who was first crowned by St. Boniface at the palace at Aix-la-Chapelle (757) and again together with his sons Charles and Carloman and his wife Bertha, by Pope Stephen at St-Denis, Sunday, 28 July, 754. Charlemagne was solemnly crowned at St. Peter's in Rome by Pope Leo III, on Christmas
Day, 800. The statement of a Greek chronicler that he was anointed from head to foot is probably a mere blunder or gross exaggeration. Despite the efforts of Dr. Diemand (Das Ritual der Kaiserkrönung) to classify the various Ordis for the coronation of the emperor and to trace the stages of their development, the subject remains intricate and obscure. We may be content to note rapidly the elements of its complete form.

The ceremony was assumed to take place at Rome, as of right it should, and the first incident was the solemn entry of the emperor into Rome, which should if possible take place on a Sunday or festival. He was met in state outside the walls and escorted to St. Peter's. Next came the reception by the pope, who sat enthroned and surrounded by his cardinals at the altars above. St. Peter's, and defender of the Holy Roman Church in all ways that I can be of help [in omnibus utilitarianus] so far as I shall be supported by the Divine aid, according to my knowledge and ability. This undertaking, which at first was clearly not an oath in form, was afterwards strengthened by a number of added clauses. It continued: "I swear upon these Holy Gospels", or again by an explicit promise of fidelity to the reigning pope by name and to his successors. There was here also perhaps a prayer of blessing spoken as the emperor was escorted into the church. At one time this was followed by a sort of examination into the fitness of the candidate, but this disappeared in the later Ordines. He was then received and in a sense enrolled among the canons of St. Peter's and prepared for the anointing. The anointing was introduced by the litany and performed by the Bishop of Ostia, who only anointed the right arm and the back between the shoulders with the oil of catechumens. Two prayers follow, both of which have found their way into the English order, though one of them occurs in a contracted form and is used only for conferring the ring. All this took place before the beginning of Mass, but in the later forms of the Mass, and Mass is the next. In the great service, the bestowal of the insignia and notably of the crown, took place after the Gradual, being thus inserted in the Mass itself. The order in which the insignia were delivered varied much, and in the later forms a mitre was given to the emperor before the crown, and the sceptre was accompany with a vestment. This last had no place in the medieval English ceremony. After the giving of the insignia the Laudes, or acclamations, were sung and then the Gospel was chanted and the Mass resumed its course. The whole ceremony concluded with a solemn procession to the Lateran basilica.

The form used in Germany for the coronation of the King of the Romans retains much in common with the imperial order, but it bears a still closer resemblance to what is known as the "second" English ritual, viz.: that used for the Anglo-Saxon King Eadgar. The fact, as Dr. Diemand points out, seems to have been that the Egbertine Order was reinforced by imperial elements borrowed from abroad, and thus acquired a certain reputation as the most elaborate form for the crowning of a king. Hence it came to be largely copied on the Continent and in that way we find unmistakable traces of prayer, oration, written and sung into Central Europe and even as far south as Milan. The ordo inscribed "De Benedictione et Coronatione Regis", which is still extant in the "Pontificale Romanum", bears much resemblance to the forms just described used for the coronation of the emperor. For example the scrutinium occurs in this form: The king is presented to the consecrating archbishop by the bishop, who petition that he may be crowned, and who, when these intangibles have been said, and the emperor replies that he knows him to be a worthy and proper person. The oath follows, also the litany with prostration, and then the anointing on the arm and between the shoulders. Then, after Mass has been begun and brought as far as the Gradual, the king kneels at the altar-steps and takes the crown, and sceptre, each accompanied with appropriate prayers. Finally the king is solemnly enthroned, the Te Deum sung, and the remainder of the Mass follows. A similar, but generally somewhat shorter, rite is observed in the coronation of a queen consort. The prayers that are not taken from those used for the king and the insignias are naturally fewer.

V. OTHER CEREMONIALS.—In earlier ages almost every country under monarchical government had a coronation ceremony of its own and this was nearly always distinguished by some peculiar features. For example, in France in Arogon the regent, and defender of the Holy Roman Church in all ways that I can be of help [in omnibus utilitarianus] so far as I shall be supported by the Divine aid, according to my knowledge and ability. This undertaking, which at first was clearly not an oath in form, was afterwards strengthened by a number of added clauses. It continued: "I swear upon these Holy Gospels", or again by an explicit promise of fidelity to the reigning pope by name and to his successors. There was here also perhaps a prayer of blessing spoken as the emperor was escorted into the church. At one time this was followed by a sort of examination into the fitness of the candidate, but this disappeared in the later Ordines. He was then received and in a sense enrolled among the canons of St. Peter's and prepared for the anointing. The anointing was introduced by the litany and performed by the Bishop of Ostia, who only anointed the right arm and the back between the shoulders with the oil of catechumens. Two prayers follow, both of which have found their way into the English order, though one of them occurs in a contracted form and is used only for conferring the ring. All this took place before the beginning of Mass, but in the later forms of the Mass, and Mass is the next. In the great service, the bestowal of the insignia and notably of the crown, took place after the Gradual, being thus inserted in the Mass itself. The order in which the insignia were delivered varied much, and in the later forms a mitre was given to the emperor before the crown, and the sceptre was accompany with a vestment. This last had no place in the medieval English ceremony. After the giving of the insignia the Laudes, or acclamations, were sung and then the Gospel was chanted and the Mass resumed its course. The whole ceremony concluded with a solemn procession to the Lateran basilica.

The form used in Germany for the coronation of the King of the Romans retains much in common with the imperial order, but it bears a still closer resemblance to what is known as the "second" English ritual, viz.: that used for the Anglo-Saxon King Eadgar. The fact, as Dr. Diemand points out, seems to have been that the Egbertine Order was reinforced by imperial elements borrowed from abroad, and thus acquired a certain reputation as the most elaborate form for the crowning of a king. Hence it came to be largely copied on the Continent and in that way we find unmistakable traces of prayer, oration, written and sung into Central Europe and even as far south as Milan. The ordo inscribed "De Benedictione et Coronatione Regis", which is still extant in the "Pontificale Romanum", bears much resemblance to the forms just described used for the coronation of the emperor. For example the scrutinium occurs in this form: The king is presented to the consecrating archbishop by the bishop, who petition that he may be crowned, and who, when these intangibles have been said, and the emperor replies that he knows him to be a worthy and proper person. The oath follows, also the litany with prostration, and then the anointing on the arm and between the shoulders. Then, after Mass has been begun and brought as far as the Gradual, the king kneels at the altar-steps and takes the crown, and sceptre, each accompanied with appropriate prayers. Finally the king is solemnly enthroned, the Te Deum sung, and the remainder of the Mass follows. A similar, but generally somewhat shorter, rite is observed in the coronation of a queen consort. The prayers that are not taken from those used for the king and the insignias are naturally fewer.
CORONEL

sacred procession in which the emperor enters the church and is conducted to his throne. The lifting upon a shield which was long retained in the old Greek Church for many years, is now put up at Moscow. After the emperor has recited the Nicene Creed as a profession of faith, and after an invocation of the Holy Ghost and litany, the emperor assumes the purple chlamys and then the crown is presented to him. He takes it and puts it on his head himself, while the metropolitan says, "In the name of the Father and of the Son and of the Holy Ghost, Amen." and then the metropolitan makes the following short address: "Most God-fearing, absolute and mighty Lord, Emperor of all the Russians, this visible and tangible adornment of thy head is an eloquent symbol that as the head of the whole Russian people, invincibly crowned by the King of kings, Christ, with a most ample blessing, seeing that He bestows upon thee entire authority over His people." This is followed by the delivery of the sceptre and orb, each with addresses. Then the crown is crowned, the emperor for a moment putting his own crown on the head of the emperor before he invests her with that which properly belongs to her. This is followed by the proclamation of the emperor's style and by a general act of homage. The Liturgy is then celebrated, and after the Communion hymn (eunamós) the royal gates of the sanctuary are opened, the emperor is invited to approach, and, near the altar, standing on the cloth of gold, the emperor and empress are anointed. In the case of the emperor the forehead, eyes, nostrils, mouth, ears, breast, and hands on both sides, are all touched with oil but in the case of the empress theunction is confined to the forehead only. Then the emperor, within the royal gates, and receives both the Eucharistic species as a priest does, separately. The empress, however, remains outside, and receives only, as the Greek laity usually do, by intinction.

HERBERT THURSTON.

CORONEL, GREGORIO NÚÑEZ, a distinguished theologian, writer, and preacher, b. in Portugal, about 1548; d. about 1620. At an early age he entered the Order of St. Augustine in one of its many houses in his native land. He manifested, during the course of his studies, the same precocity in the study of the most abstruse problems of philosophy and theology. Soon after his ordination to the priesthood he became famous as a profound theologian and master of sacred eloquence. When his fame was at its zenith, he left Portugal and was appointed by the Duke of Savoy chaplain and preacher to his court. He came to Rome by order of his superiors, and there took the degree of Doctor of Divinity. Coronel taught theology for many years in the Eternal City with credit to himself and honour to his order. At this time the controversy about the efficacy of Divine grace and free will between the Jesuits and Dominicans was at its height. The reigning pontiff, Clement VII, established the famous Congregatio de Auxiliis to decide the points at issue, and Coronel was appointed by the pope to the onerous and invidious position of secretary. He was continued in this office by Pope Clement's successor, Paul V. As a reward for his services to the congregation, he was offered a bishopric. This he declined, saying that at his age—he was then sixty—honours and responsibilities were better to be laid down than assumed. He attended the general chapter of his order, held at Rome in 1620, as definitore of the Sardinian province. Coronel's principal works are: "Libri decem de verà Christi Ecclesiâ," (Rome, 1694); "Libri sex de optimo reipublice statu," (Rome, 1697); "De traditionibus apostolica" (Rome, 1697). A history of the Congregatio de Auxiliis manuscript, is preserved in the Angelica Library in Rome.

ELIAS, Encomium Augustinianum (Brussels, 1664); CHYMER, Bibliotheca Augustiniana (Antwerp, 1662); LANTER, Postrema sacrae religionis Augustiniana (Rome, 1680); BARDI, BARBARO, AND NARDI, Catalogus manuscriptorum Bibliotheca Augustiniana (Rome, 1817); MONTAQUI, Monastica Augustinis Cruserium continuatio (Valladolid, 1803).

J. A. KNOWLES.

CORONEL, Juan, b. 1569, in Spain; d. 1651, at Mérida, Mexico. He made his academic studies at the University of Alcalá de Henares, and joined the Franciscans of the province of Castile. He was sent to Guadalajara, Mexico, in 1609, and took himself with the Maya language that he was able to teach it, the historian Cogolludo being one of his pupila. Cogolludo says he wrote a Maya grammar (Arte) that was printed in Mexico, of which, however, nothing else is known. A catechism in Maya: "Doc- trina cristiana en lengua Maya," was published at Mexico in 1620, and in the same year there appeared in print, also at Mexico, "Discursos preparados y trato- dos espirituales en lengua Mayas." Both are exceedingly rare. Father Coronel was one of the foremost teachers of the Indians of Yucatan in the seventeenth century. He wandered through the Indian territory for years, always travelling barefooted. His great austeritv impeded his election to the office of Provincial of the Franciscan Order in Yucatan.

COGOULLDO, Historia de Yucutan (Madrid, 1668, Mérida, 1849); BERIANTITO, Bibliotheca hispano-americana (Mexico, 1818; Amencanica, 1883); SOQUIER, Monograph, etc. (New York, 1861); he merely copies BERIANTITO.

AD. F. BANDELLER.

CORPORAL (from L. corpus, body), a square white linen cloth, now usually somewhat smaller than the breadth of an altar, upon which the sacred Host and chalice are placed during the celebration of Mass. Although formal evidence is wanting, it may fairly be assumed that something in the nature of a corporal has been in use since the earliest days of Christianity. Naturally it is difficult in the early stages to distinguish the corporal from a number of altar cloths. By St. Opulus (c. 375), which says, "What Christian is unaware that in celebrating the Sacred Mysteries the wood of the altar is covered with a linen cloth?" (ipsa ligna tinteamine cooperiri, Opulus, vi, ed. Zwiens, p. 145), leaves us in doubt which he is referring to. This is probably the earliest reference to Pontificalis, "He [Pope Sylvester] decreed that the Sacrifice should not be celebrated upon a silken or dyed cloth, but only on linen, springing from the earth, as the Body of our Lord Jesus Christ was buried in a clean linen shroud." (Mommert, p. 61), cannot be relied upon. Still, the
ideas expressed in this passage are found in an authentic letter of St. Isidore of Pelusium (Ep. i, 123) and again in the "Expositio" of St. Germanus of Paris in the sixth century. L. Ill. 1. Indeed in the eleventh century, and till the dawn of the Middle Ages, as the verse attributed to Hildebert (P. L., CLXII, 1194) sufficiently show:-

Ara cruxis, tumulique calix, lapidique patena,
Sindicis officium candida byssus habet.

It is quite probable that in the early centuries only one cloth was reserved both for the chalice and corporal, this being of large size and doubled back to cover the chalice. Much doubt must be felt as to the original use of certain cloths of figured linen in the treasury of Monza which Barbier de Montault sought to identify as corporals. The corporal was described as palla corporalis, or selamen dominice menses, and generally seems to have been of linen, though we hear of altar-cloths of silk (Greg. of Tours, "Hist. Franc.", VII, 22; X, 16), or of purple (Paulus Silentiarius, "Desc. S. Sophie", p. 758; a coloured miniature in the tenth-century Benedictional of St. Ethelwold also seems to show a purple altar-covering). It is in the eleventh century, and in the Disc. Eccl. (cap. cxviii) quotes a council of Reims as having decreed "that the corporal [corporale] upon which the Holy Sacrifice was offered must be of the finest and purest linen without admixture of any other fibre, because Our Saviour's Body was wrapped not in silk, but in clean linen." He adds that the corporal was never to remain on the altar, but was to be put in the Missal [Sacramentorum libro] or shut up with the chalice and paten in some clean receptacle. And when it was washed, it was to be washed first of all by a priest, deacon, or subdeacon in the church itself, in a place or a vessel specially reserved for this, because it had been impregnated with the Body and Blood of our Lord. Afterwards it might be sent to the laundry and treated like other linen. The suggestion as to keeping the corporal between the leaves of the Missal is interesting because it shows that it cannot, even in the tenth century, have been an afterthought. The same ground is given which might be inferred from the description in the "Second Roman Ordo" (cap. ix), where the deacon and an assistant deacon are represented as folding it up between them. Still it was big enough at this period to allow of its being bent back to cover the chalice, and thus serve the purpose of our present pall. This is done both by the Carthusians to this day, it is also generally agreed that no pall and have no proper elevation of the chalice. As regards the size of the corporal, some change may have taken place when it ceased to be usual for the people to bring loaves to the altar, for there was no longer need of a large cloth to fold back over them and cover them. In the twelfth centuries, the practice of covering the corporal over the chalice gave place to a new plan of using a second (folded) corporal to cover the mouth of the chalice when required. The question is debated in some detail in one of the letters of St. Anselm, who gives a list of the arrangements (P. L., CLVII, 550) and a hundred years later we find Pope Innocent III stating, "there are two kinds of palls or corporals, as they are called (duplex est palla quae dicitur corporale) one which the deacon spreads out upon the altar, the other which he places folded upon the mouth of the chalice." (De Min. 11, 56) The essential unity of the pall and the corporal is further shown by the fact that the special blessing which both palls and corporals must always receive before use designates the two as "linteates ad tegendum involucrum Corpus et Sanguinem D. N. J. C.", i. e.
to cover and enfold the Body and Blood of Christ. This special blessing for corporals and palls is alluded to even in the Celtic liturgical documents of the seventh and eighth centuries. Indeed the Roman Pontifical is found almost in the same words in the Spanish "Liber Ordinum" of about the same early date.

According to existing liturgical rules, the corporal must not be ornamented with embroidery, and must be the colour of the purest white linen, although these do not seem to have been made medievel exceptions to this law. It is not to be left open upon the altar, but when not in use is to be folded and put away in a burses, or "corporal-case", as it was commonly called in pre-Reformation England. Upon these burses much ornamentation is lavished, and this has been the case since the days of the Roman pontifical. It is still followed by some of the older religious orders. The corporal and pall have to pass through a triple washing at the hands of a priest, or at least a subdeacon, before they may be sent to a laundry. Also, when they are in use they may not be handled by any person other than the clergy, or sacristians to whom special permission is given.

HERBERT THURSTON.

Corporal Works of Mercy. See Mercy.

Corporation (Lat. corpus, a body), an association recognized by civil law and regarded in all ordinary transactions as an individual. It is an artificial person. Chief Justice Marshall of the Supreme Court of the United States of America, in the course of a formal judicial utterance, thus defined the term corporation:

"A corporation is an artificial being, invisible, intangible, and existing only in contemplation of law. The mere creation of a law, it possesses only those properties which the charter of its creation confers upon it, either expressly or as incidental to its very existence. These are such as are supposed best calculated to effect the object for which it was created. Among the most important are immortality, and, if the expression may be used, day by day, perpetuity. The rights and privileges by which a perpetual succession of many persons are considered as the same, and may act as a single individual. They enable a corporation to manage its own affairs, and to hold property without the perplexing intricacies, the hazardous and endless necessity of perpetually conveying and transmitting it from hand to hand. It is chiefly for the purpose of clothing bodies of men, in succession, with qualities and capacities, that corporations were invented, and are in use. By these means, a perpetual succession of individuals are capable of acting for the promotion of the particular object, like one immortal being."

Chancellor Kent of New York, one of the most famous jurists of modern times, defines a corporation as "a franchise possessed by one or more individuals, who subsist, as a body politic, under a special denomination, and are vested, by the policy of the law, with the capacity of perpetual succession, and of acting in several respects, however numerous the associations may be, as a single individual. The object of the institution is to enable the members to act by one united will, and to continue their joint
powers and property in the same body, undisturbed by the change of members, and without the necessity of renewal, as the right of members pass from one individual to another. All the individuals composing a corporation and their successors, are considered in law as but one person, capable, under an artificial form, of taking and conveying property, contracting debts and duties, and of enjoying a variety of civil and political rights. One of the particular advantages upon his is the perpetuity of perpetual succession; for, in judgment of law, it is capable of indefinite duration. The rights and privileges of the corporation do not determine, or vary upon the death or change of any of the individual members. They continue as long as the corporation endures."

ANCIENT CORPORATIONS.—Among the ancient Greeks a kind of association called crateia corresponded in its characteristics very closely with the modern corporation. Solon is said to have encouraged the formation of such bodies, and in his legislation permitted them to be instituted freely and to engage in any transactions not contrary to law. The Roman prototype of the corporation as it came into existence under the common law of England, and from England was transplanted into America, was the collegium. This kind of association, called also corpus, consisted of three persons, of whom at least two had to have a body, i.e., to have been, as we say, duly incorporated. The persons who formed a collegium were called collegae or sodales. The word collegium derived from com, "with," and lego, "to select," had the literal meaning of an aggregation of persons united in any office or for any common purpose. In the later days of the Roman Republic corporation was used in documents relating to public law in the same sense as collegium. The word societas seems to have been used as a term corresponding to our word partnership. A collegium possessed the legal right of holding property in common. Its members had a common treasury and could sue and be sued by their syndicus or actor. According to the Roman law, that which was due to the collegium was not due to individuals composing it; that which was an indebtedness of the collegium and a debt of individuals, the property of the collegium was liable to be seized and sold for its debts. The term universitas is used by the Roman law writers in the same sense as collegium. The application of universitas to an academic or literary institution is first found in a Decretal of one of the popes establishing a papal university for the brethren of the cloister. The meaning of universitas is that of a body of persons devoted to spiritual affairs, such as bishops, archdeacons, parsons, and vicars. Prior to the reign of Edward VI, deans and chapters, priors and canons, abbots and monks were ecclesiastical corporations. Lay corporations are those of which the king or the government, for the securing and management of temporal affairs. As Blackstone says, the king is a corporation to prevent in general the possibility of an interregnum and to preserve the possessions of the Crown entire; for immediately upon the demise of one king his successor is considered in law as having full possession of the regal dignity and privileges. Examples of other lay corporations are those which are created to govern towns or districts such as the corporation known as the City of London; others have been created for the conduct of manufacturing and commercial enterprises, for the diffusion of learning, and for scientific research. The Universities of Oxford and Cambridge are examples of corporations created for the advancement of learning. Eleeomcnary corporations are defined by Blackstone to be such as are constituted for the perpetual distribution of free alms on charitable principle to such persons as such founder may have designated. Of this kind are all hospitals for the maintenance of the poor, sick, and impotent.

CREATION.—Under the common law of England corporations depended for their existence upon a charter (Lat. charta, a paper) granted by the king.
Corporations which had existed so long a time that "the memory of man ran not to the contrary" were said to exist by prescription; but that considerate doctrine was based upon the theory that the corporation had had so long a time received control of its own charter, and was in course of time and by reason of the vicissitudes of human affairs, had been lost. When the religious revolution of the sixteenth century occurred, most of the religious houses of England were corporations by prescription, because they were so ancient that their original charters, if there were any, had disappeared. The rights under a charter by prescription, however, are as valid as if the charters had been issued at the time of the revolution of the church, and are even in modern times, that a corporation was bound by implication in many cases where its charters had not been attested by the common seal.

In modern times many corporations are expressly authorized by legislation to act without using a seal, and the decisions of the courts have generally held, at least in modern times, that a corporation was bound by implication in many cases where its acts had not been attested by the common seal.

Privileges and Disabilities.—A corporation must always appear by attorney or agent (the actor or synodicus of the Roman law) for it cannot appear in person; being, as Sir Edward Coke says, invisible and existing only in contemplation of the law. Under the strict construction of the laws of the several States of the Union, as well as under the English common law, corporations are either public or private, public corporations being those that are erected for the purposes of local government, such as municipal corporations for the government of cities, counties, and towns. The term private corporations includes all others, religious, literary, charitable, manufacturing, insurance, banking, and railroad corporations. In the various States of the Union corporations were formerly created by charter granted by the legislature. In the greater number of the States at the present time private corporations are created by the voluntary act of individuals who associate themselves together and make a public declaration of their intention to become a body corporate and take such action in conformity with general rules laid down by legislation. Charters of incorporation granted by the legislatures of the States to private corporations are considered as excepted from the provisions of Section 10, of the Constitution of the United States, by which it is declared that "no State shall pass any law impairing the obligation of contracts." This was decided by the Supreme Court of the United States in the case entitled "The Trustees of Dartmouth College vs. Woodward," 4 Edeanets' Reports, Vol. 4, p. 518.

In many States the right to amend, modify, or repeal a charter was usually reserved in the charter itself. Such a provision is now incorporated into the constitutions of many of the States.

Power of Corporations.—The principal characteristic of a corporation as a public body was that it was vested with the privilege of perpetuity, that is, it was said to have perpetual succession. At the present time in the greater number of American States the general legislation providing for the creation of corporations expressly designates a fixed term during which a corporation may exist. The second of the original powers of corporations which is still maintained, is to sue or to be sued, implead, or to be impleaded, grant or receive, by its corporate name and to do all other acts as natural persons may. The third privilege was to purchase lands and to hold them for the time limited by the charter, and to convey them to its successors. This right was largely modified by the statutes of mortmain (q. v.) in England and has been strictly regulated and greatly limited by American legislation. The fourth original power possessed by corporations was that of having a common seal. As was said by the ancient law writers of England, a corporation, being an invisible body, cannot manifest its intentions by any personal act or by speech, and therefore can act only by the common seal. In modern times many corporations are expressly authorized by legislation to act without using a seal, and the decisions of the courts have generally held, at least in modern times, that a corporation was bound by implication in many cases where its acts had not been attested by the common seal.

Visitations.—The necessity of supervision over corporate acts being generally acknowledged, it was held at common law that every corporation had, necessarily, a visitor. As Blackstone well says, "Corporations, being composed of individuals, subject to human frailty, are as liable as private persons, to deviate from the end of their institution. And for that reason the law has provided proper persons to visit, inquire into and correct all irregularities that arise in such corporations, either sole or aggregate, and whether ecclesiastical, civil or eleemosynary."

Dissolution.—Any member of a corporation may be disfranchised, that is, he may lose his membership in the corporation by acting in such manner as to forfeit his rights under a provision of the by-laws; or he may resign from the corporation by his own voluntary act. A resignation by parole, if entered upon...
commonly spoken of as one of the "Penal Laws", and enumerated by Butler in his "Historical Account of the Laws against the Roman Catholics of England", it was not directly aimed against them, but against the Presbyterians. It was passed in December, 1661, the year after the Restoration, technically 13 Charles II. Parliament was at that time entirely Presbyterian. The Penal Laws had no intention, so far as they were aimed at nothing short of restoring England to its state before the time of the Commonwealth. It required all the prudence of the Earl of Clanendon, the chancellor, to restrain them. The Corporation Act represents the limit to which he was prepared to go in preventing the alienation of lands and tenements. They were incorporated in the government of cities and boroughs throughout the country, and this act was designed to dissipate them. It provided that no person could be legally elected to any office relating to the government of a city or corporation, unless he had within the previous twelve months received the sacrament of "the Lord's Supper' according to the rites of the Church of England. He was also commanded to take the Oath of Allegiance and Supremacy, to swear belief in the Doctrine of Passive Obedience, and to renounce the Covenant. In default of these requisites the election was to be void. The act was passed, as we have seen, 19 years later, known as the Test Act, prescribed for all officers, civil and military, further stringent conditions, including a declaration against Transubstantiation. These two acts operated very prejudicially on Catholics, forming an important part of the general Penal Code which kept them out of public life. In later times the number, even of non-Catholics, who qualified for civil and military posts in accordance with their provisions was very small, and an "Act of Indemnity" used to be passed annually, to relieve those who had not done so from the penalties incurred. The Corporation Act was no exception to the regulation to the case of Protestants; yet on the only occasion when a Catholic ventured to ask for a share in the Indemnity, it was refused on the ground of the act not being applicable to him. (Butler, op. cit., 19.) The Corporation Act remained nominally in force throughout the eighteenth century. It was eventually repealed in 1828, the year before Catholic Emancipation.  

BERNARD WARD.

Corpus Christi (Body of Christ), Feast of, is celebrated in the Latin Church on the Thursday after the1st Sunday in May, commemorating the Admission of the Holy Eucharist. Of Maundy Thursday, which commemorates this great event, mention is made as Natalis Calicis (Birth of the Chalice) in the Calendar of Polemus (448) for the 24th of March, the 25th of March being in some places considered as the day of the death of Christ. This day, however, was in Holy Week, a season of sadness, during which the minds of the faithful are expected to be occupied with thoughts of the Lord's Passion. Moreover, so many other functions took place on this day that the principal event was almost lost sight of. This is mentioned as the chief reason for the introduction of the new feast, in the Bull "Transiturus". The instrument in the hand of Divine Providence was St. Juliana of Mont Cornillon, in Belgium. She was born in 1193 at Retinnes near Liége. Orphaned at an early age, she was educated by the Augustinian nuns of Mont Cornillon. Here she in time made her religious profession and later became superioress. Intrigues of various kinds several times drove her from her convent. She died 5 April, 1258, at the House of the Cistercian nuns at Fosses, and was buried at Villiers.  

Juliana, from her early youth, had a great veneration for the Blessed Sacrament, and always longed for a special feast in its honour. This desire is said

CORPORATION Act of 1661.—The Corporation Act of 1661 belongs to the general category of test acts, designed for the express purpose of restricting public offices to members of the Church of England. Though
to have been increased by a vision of the Church - under the appearance of the full moon having one dark spot in which was seen the absence of such solemnity. She made known her ideas to Robert de Thorete, then Bishop of Liège, to the learned Dominican Hugh, later cardinal legate in the Netherlands, and to Jacques Pantaléon, at that time Archdeacon of Liège, afterwards Bishop of Verdun, Patriarch of Jerusalem, Bishop of Poitiers, who was favourably impressed, and, since bishops as yet had the right of ordering feasts for their dioceses, he called a synod in 1246 and ordered the celebration to be held in the following year, also, that a monk named John should write the Office for the occasion. The decree is preserved in Binterim (Denkwa der Keiten, V, 1, 276), together with parts of the Office.

Bishop Robert did not live to see the execution of his order, for he died 16 October, 1248; but the feast was celebrated for the first time by the canons of St. Martin at Liège. Jacques Pantaléon became pope 29 August, 1261. The reclus Evè, with whom Juliana had spent some time, and who was also a fervent adorer of the Holy Eucharist, now urged Henry of Gueders, Bishop of Liège, to request the pope to extend the celebration to the entire world. Urban IV, always an admirer of the feast, published the Bull “Transitivum” (5th September, 1263), in which he had extolled the love of Our Saviour as expressed in the Holy Eucharist, he ordered the annual celebration of Corpus Christi on the Thursday next after Trinity Sunday, at the same time granting many Indulgences to the faithful for the attendance at Mass and at the Office. This Office, composed at the request of the pope by the Angelic Doctor St. Thomas Aquinas, is one of the most beautiful in the Roman Breviary and has been admired even by Protestants. The death of Pope Urban IV (2 October, 1264), shortly after the publication of the decree, somewhat marred the novelty of the festival. Clement V again took the matter in hand and, at the General Council of Vienne (1311), once more ordered the adoption of the feast. He published a new decree which embodied that of Urban IV. John XXII, successor of Clement V, urged its observance. Neither decree speaks of the eucharistic procession which accompanies the celebration. This procession, already held in some places, was endowed with Indulgences by Popes Martin V and Eugene IV. The feast had been accepted in 1306 at Cologne; Worms adopted it in 1315; Strasbourg in 1316. In England it was introduced from Belgium between 1320 and 1325. In the United States, where the Church is young, the solemnity is held on the Sunday after Trinity.

In the Greek Church the feast of Corpus Christi is known in the calendars of the Syrians, Armenians, Copts, Melchites, and the Ruthenians of Galicia, Calabria, and Sicily.

**Francis Mershman.**

**Corpus Juris Canonicus.—I. Definition.—** The term corrupt here denotes a collection of documents; corpus juris, a collection of laws, especially if they are placed in systematic order. It may signify also an official and complete collection of a legislation made by the legislative power, comprising all the laws which are in force in a country or society. The term, also received, reserved, or Roman or canon law, being merely the phraseology of the learned, is used in the above sense when the “Corpus Juris Civilis” of the Roman Christian emperors is meant. The expression corpus juris may also mean, not the collection of laws itself, but the legislation of a society considered as a whole. Hence Benedict XIV could rightly say that the collection of his Bull formed part of the corpus juris (Jahre 1946). We can explain the significance of the term corpus juris canonici than by simply taking the successive meanings which were assigned to it in the past and which it usually bears at the present day. Under the name of “corpus canonum” were designated the collection of Dionysius Exiguus and the “Collectio Anselmosiana” of Bishop Anselm of Cantale (see above). The “Decree” of Gratian is already called “Corpus Canonici” by a glossator of the twelfth century, and Innocent IV calls by this name the “Decretals” of Gregory IX (Ad expediendos, 9 Sept., 1253). Since the second half of the thirteenth century, Corpus Juris Canonicus in contradistinction to Corpus Juris Civilis, or Roman law, gradually denoted the following collections: (1) the “Decretals” of Gregory IX; (2) those of Boniface VIII (Sixth Book of the Decretals); (3) those of Clement V (Clementine), i. e. the collections which at that time, with the “Decree” of Gratian, were taught and explained at the universities. At the present day, under the above title are commonly understood these three collections with the addition of the “Decree” of Gratian, the “Extravagantes” of John XXII, and the “Extravagantes Communes”.

Thus understood, the term dates back to the sixteenth century and was officially sanctioned by Gregory XIII (Cum pro munere, 1 July, 1660). The earliest editions of these texts printed under the now usual title of “Corpus Juris Canonici”, date from the end of the sixteenth century (Frankfort, Svo, 1556; Paris, fol., 1587). In the strict sense of the word the Church does not possess a corpus juris clausum, i. e. a collection of laws to which new ones cannot be added. The Council of Bазе (Sess. XXIII, ch. vi) and the decree of the Congregation “Super statu regulare” (25 Jan., 1848) do not speak of a corpus clausum; the first refers to reservations in corpus juris expresso clausis, that is, reservations of ecclesiastical benefices contained in the “Corpus Juris”, especially in the “Liber Sextus” of Boniface VIII, to the exclusion of those held in the “Extravagantes” described below, and at that time not comprised in the “Corpus Juris Canonici”; the second speaks of culsil et privilegia, in corpus juris expresso clausis non sunt inclusa, privileges not only granted by the Holy See, but also inserted in the official collections of canon law.

**II. Principal Canonical Collections.**—We shall briefly sketch the history of the earliest collections of canon laws, and shall add a brief description of the “Corpus Juris Canonicus” as it is now understood. The history of canon law falls generally into three periods. The first extends to the “Decree” of Gratian, i. e. to the middle of the twelfth century (jus antiquum); the second reaches to the Council of Trent (jus novum); the third includes the latest enactments since the Council of Trent inclusively (jus novissimum).

1. *Jus antiquum.*—The most ancient collections of canonical legislation are certain very early pseudo-Apostolic documents: for instance, the *Διδαχή τω δώδεκα απόστολοι* or “Teaching of the Twelve Apostles”, which dates from the end of the first or the beginning of the second century; the Apostolic Church Ordinances; the “Didascalia”, or “Teaching of the Apostles” (third century); the Apostolic Canons (see CANONS, APOTOLIC); and Apostolic Constitutions. These collections have never had any official value, no more than any other collection of this first period. It was in the East, in the School of Mineo, that arose the first systematic collections. We cannot so designate the chronological collections of the canons of the councils of the fourth and fifth centuries (314–451); the oldest systematic collection, made by an unknown author in 535, has not come down. The most important collections of this epoch are the *Ταυρομνημονια*
or the collection of John the Scholastic (Joannes Scholasticus), compiled at Antioch about 550, and the Nomocanon, or compilations of civil laws affecting religious matters (rēs civiles) and ecclesiastical laws (rēsum). One such mixed collection is dated in the sixth century and has been erroneously attributed to John the Scholastic; another of the seventh century is credited as the Liber canones of the schismatical patriarch Photius (883). In the Western Church three collections of canons have exercised an influence far beyond the limits of the country in which they were composed; they are the "Collectio Dionysiana", the lengthy Irish collection (Eibernen-s slips) of the Decretals of Pseudo-Isidorus, the "Dionysiana", also called "Corpus canonum", "Corpus codicis canonum", was the work of Dionysius Exiguus who died between the years 540 and 555; it contains his Latin translation of the canons of the councils of the Eastern Church and a collection of (38) papal letters (Epistle decretalcs) dating from the reign of Pope Sisæclus (384–398) to that of Anastasius II (d. 498). The authority of this Italian collection, at once quite considerable at Rome and in Italy, was greatly increased after Adrian I had sent to Charlemagne (774) a modified and enlarged copy of the collection, henceforth known as the "Collectio Dionysiana". The Exemplum of Aschard (802) accepted it as the "Codex Canonum" of the immense Empire of the Franks.

The lengthy Irish collection of canons, compiled in the eighth century, influenced both Gaul and Italy. The latter country possessed, moreover, two fifth-century Latin translations of the Greek synods (the collection erroneously called "Isidoriana" or "His pans", and the "Collectio Priscæ"); also an important collection of pontifical and imperial documents (the "Avellana", compiled in the pontificate of Gregory the Great, 590–604). Africa possessed a collection of 106 canons, mostly by 948, compiled about 1000, also the "Breviario Canonum", or digest of the canons of the councils by Fulgentius Ferrandus (d. 546), and the "Concordia Canonum" of Clesonius, an adaptation of the "Dionysiana" (about 600). In Gaul are found, at the beginning of the sixth century, the "Statuta Ecclesiae antiqua", erroneously attributed to Africa, and, among many other collections, the "Quenumeriana" (end of the fifth or beginning of the sixth century) and the "Dacheriana" (about 800), both so called from the names of their editors, Paschase Questel and d'Arcé. Spain possessed the "Isidoriana", compiled about 772 by Martin, Bishop of Braga, and a "Codex canonum" or "Collectio Hispana" dating from about 633, contributed in the ninth century to St. Isidore of Seville. In the ninth century arose several apocryphal collections, viz. those of Benedictus Levita, of Isidorus Mercator (also Pascator or Maccatus), and the "Capita Anglirmani". An examination of the controversies which these three collections give rise to will be found elsewhere (see FALSE DECERTALS). The Pseudo-Isidoran collection, the authenticity of which was for a long time admitted, has exercised considerable influence on ecclesiastical discipline, without however modifying it in its essential principles. Among the numerous collections of a later date, we may mention the "Collectio Anselmo dedicata", compiled in Italy at the end of the ninth century, the "Libellus de ecclesiastica disciplinae" of Regino of Prüm (d. 915); the "Collectarium canonum" of Burchard of Worms (d. 924), which contains the creation of the Decretum. St. Anselm had completed the work of Archbishop Lucca, compiled towards the end of the eleventh century; the "Collectio trium partium", the "Decretum" and the "Panormiana" of Yves of Chartres (d. 1115 or 1117); the "Liber de misserécialit et justitiā" of Algerus of Liége, who died in 1132—all collections which Grattian made use of in the compilation of his "Decretum". The aforesaid collections and others are described more fully in the article CANONS, COLLECTIONS OF ANCIENT.

(2) Jus novum and Corpus juris canonici.—It was about 1150 that the Camaldolese monk, Gratian, professor of theology at the University of Bologna, to obviate the difficulties which beset the study of practical, external theology (theologia practica externa), i.e. canon law enlarged, republished himself "Concordia discordantium canonum", but called by others "Novo Decretal", "Decreta", "Corpus juris canonici", also "Decretum Gratiani", the latter being now the commonly accepted name. In spite of its great reputation the "Decretum" has never been recognized by the Church as a canonical collection. It is divided into three parts (ministeria, negotia, sacrmenta). The first part is divided into 101 distinctions (distinctiones), the first 20 of which form an introduction to the general principles of canon law (tractatus decretalium); the remainder constitutes a tractatus ordinarium, relative to ecclesiastical persons and functions. The second part contains 360 causes (causes), divided into questions (questiones), and treat of ecclesiastical administration and marriage; the third question of the 33rd cause treats of the Sacrament of Penance and is divided into 7 distinctions. The third part, entitled "De consecrationibus", contains the sacramental consistorial form, and contains 5 distinctions. Each distinction or question contains dicta Gratiani, or maxims of Gratian, and canones. Gratian himself raises questions and brings forward difficulties, which he answers by quoting auctoritates, i. e. canons of councils, decretals of the popes, texts of the Scripture or of the Fathers. These are the canones; the entire remaining portion, even the summaries of the canons and the chronological indications, are called the maxims or dicta Gratiani. It is to be noted that many auctoritates have been inserted in the "Decretum" by authors of a later date. These are not so much cited in order to explain the canones as, in the palea, the name of the principal commentator on the "Decretum". The Roman revisers of the sixteenth century (1556–82) corrected the text of the "Decree" and added many critical notes designated by the words Correctores Romani.

The "Decretum" is quoted by indicating the number of the canons and that of the distinction or of the cause and the question. To differentiate the distinctions of the first part from those of the third question of the 33rd cause of the second part and those of the third part, the words de Pena, i. e. de Penitentia, and de Cons., i. e. de Consuetudine, are added to the latter. For instance, "c. 1. d. XI" indicates the first part of the "Decree", distinction XI, canon 1; "c. 1. d. de Pena", d. VI" refers to the second part, 33rd cause, question 3, distinction VI, canon 1; "c. 8. de Cons., d. II" refers to the third part, distinction II, canon 8; "c. 8. C. XII, q. 3" refers to the second part, cause XII, question 3, canon 8. Sometimes, especially in the case of well-known and much-quoted canons, the first words are also indicated, e. g., c. S vita suadente obolo, C. XVII, q. 4, i. e. the 29th canon of the second part, cause XVII, question 4. Occasionally the first words alone are quoted. In both cases, to find the canon it is necessary to consult the alphabetical tables (printed in all editions of Gratian) that contain the first words of every canon.

The general laws of a later date than the "Decree" of Gratian have been called "Extravagantes", i.e. laws not contained in Gratian's "Decree" (Vagones ext Decretum). Among them are the so-called "Decretals". These are found in new collections, five of which (Quinque compilations antiquae) possessed a special authority. Two of them, namely the third and the fifth, are the most ancient official compilations of the Roman Church (see DECERTALS, PAPAL). Among other compilations at the end of the twelfth and the beginning of the thirteenth century the following deserve special atten-
tion: "Appendix concilii Lateranensis III"; the collections known as "Bambenbergia" (Bamberk), "Lipsiensia" (Leipzig), "Cassellana" (Cassel), "Halicenses" (Halle), and "Hildesheimenses" (Hildesheim), a named from the libraries in which the manuscripts of these collections were found; the collection of the Italian Benedictine Rainerus Pomposianus, that of the English canonist Gilbert (Collectio Gilberti), that of his countryman Alanus, professor at Bologna (Collectio Alanii), and that of the second chapter of the Council of Basle. Soon the new era of official collections began to dawn. In 1230 Gregory IX ordered St. Raymond of Penafort to make a new collection, which is called the "Decretals of Gregory IX" (Decretales Gregorii IX). To this collection he gave force of law by the Bull "Extravagantes commaunis" (1240), and of the first book of the "Extravagantes" by the Bull "Dei gratia" (1243). It is also known to canonists as the "Liber extra", i.e. extra Decretum Gratiani. Boniface VIII published a similar code 3 March, 1298, called the "Sixth Book of the Decretals" (Liber Sextus). John XXII added to it the last official collection of canon law, the "Liber septimus Decretalium", better known under the title of "Constitutiones Clementia V", or simply "Clementina" (Quoniam nulla, 25 Oct., 1317). Later on the canonists added to the manuscripts of the "Decretals" the most important constitutions of succeeding popes. These were soon known and quoted as "Extravagantes", i.e. twenty constitutions of John XXII himself, and an addition of 17 chapters up to 1484. In the Paris edition of the canonical collections (1499-1505) Jean Chappuis drew them up in the form since then universally accepted, and kept for the first the name "Extravagantes Joannis XXII", and called the others, "Extravagantes communes"; i.e. commonly met with in the manuscripts of the "Decretals" (see DECRETALS, PAPAL).

The "Corpus Juris Canonici" was now, indeed, complete, but it contained collections of widely different juridical value. Considered as collections, the "Decree" of Grattan, the "Extravagantes Joannis XXII", and the "Extravagantes communes" have not, and never had, a legal value, but the documents which they contain may possess, and, as a matter of fact, often do possess, very great authority. Moreover, custom has given even to several apocryphal canons of the "Decree" of Grattan the force of law. The decisions are of cum limits, and are no longer binding, unless abrogated by subsequent legislation. The collections of Gregory IX (Libri quinque Decretalium) and of Boniface VIII (Liber Sextus) are moreover exclusive. The former, indeed, abrogated all the laws contained in the afore-mentioned collections, subsequent to 1234. This decision of Grattan. Several authors, however, have maintained, but wrongly, that it abrogated also all the ancient laws which had not been incorporated in Grattan. The second abrogated all the laws passed at a later date than the "Decretals" of Gregory IX and not included in itself. Each of these three collections is considered as one collection (collectio usum), i.e. one of which all the decisions have the same value, even if they appear to contain antinomies. It is to be noted, however, that, in cases of contradiction, the decisions of the collections of later date invalidate those found in a collection of an earlier date.

The "Decretals" of Gregory IX, those of Boniface VIII, and the "Clementines" are divided uniformly into five books (liber), the books into titles (titulus), the titles into chapters (caput), and treat successively of jurisdiction (jus), procedure (judicium), the clergy (clerus), marriage (coniubium), and delinquents (crimina). The rubrics, i.e. the summaries of the various titles, have the force of law, if they contain a complete meaning; on the other hand, the summaries of the chapters have not this juridical value. It is customary to quote these collections by indicating the number of the chapter, the title of the collection, the heading of the title, the number of the book and the title. The "Decretals" of Gregory IX are indicated by the letters "X", i.e. extra Decretum Gratiani. The "Sixth Book of the Decretals" of Boniface VIII by "in VI", i.e. "in Sexto"; the "Clementines" by "in Clem.", i.e. "in Clementina". For instance: "c. 2, X, De pactis, 1, 35", refers to the second chapter of the "Decretals" of Gregory IX, first book, title 35; "c. 2, in VI", De hereditatis, 2, 2", refers to the second chapter of the "Clementines", fifth book, title 2; "c. 2, in Clem, De testibus, II, 8", refers to the second chapter of the "Clementines", second book, title 8. If there is only one chapter in a title, or if the last chapter is quoted, these passages are indicated by "c. unicum", and "c. ultimum", i.e. "caput unicum" and "caput ultimum". Sometimes also the indication of the number of the chapters is replaced by the first words of the chapter, as for instance: c. Odoardus. In such cases the number of the chapter may be found in the index-tables printed in all the editions. The "Extravagantes Communes" are divided and quoted in the same manner as the "Decretals", and the collection is indicated by the abbreviations: "Extrav. Commun." For instance: "c. 1 (or unicium, or Ambitiosi), Extrav. Commun., De rebus Ecclesiis non alienandis, III, 4", refers to the first chapter (the only chapter) in book III, title 4 of the "Extravagantes Communes". This collection omits the usual "Liber IV", which contains all the "Extravagantes of John XXII" are divided only into titles and chapters. They are indicated by the abbreviation, "Extrav. Joan. XXII". For instance: "c. 2, Extrav. Joan. XXII, De verborum significacione XIV", refers to the second chapter of the fourteenth title of this collection.

Principal editions.—Very soon after the invention of printing editions of the "Corpus Juris", with or without the gloss (comments of canonists) were published. We have already mentioned the importance of the Paris edition (1499-1505) for the two collections of "Extravagantes". This edition includes the gloss. The last edition with the gloss is that of Lyons (1616). Though the Council of Trent did not order a revision of the text of the canonical collections, St. Pius V appointed (1568) a commission to prepare a new edition of the "Corpus Juris Canonici". This commission devoted itself entirely to the revision of the text of the "Decree" of Grattan and of its gloss. Gregory XIII ("Cum pro munere", 1 July, 1580; "Emendationem", 2 June, 1582) decreed that no change was to be made in the revised text. This edition of the "Corpus" appeared at Rome in 1582, in codices Mutinus, and "Decretum Gregorii XIII". The subsequent editions. The best-known, previous to the nineteenth century, are those of the brothers Pithou (Paris, 1687), Freiesleben (Prague, 1728), and the Protestant canonist Bömer (Halle-Magdeburg, 1747). It is to be noted that the text of the latter edition differs from that of the Roman edition of 1582, and does not therefore possess practical utility. The edition of Richter (Leipzig, 1833-39) avoids this defect and is valuable for its critical notes. The edition of Friedberg (Leipzig, 1879-81) does not reproduce the text of the Roman edition for the "Decree" of Grattan, but gives the Roman text of the other collections. It is the best and most critical edition.

(3) Jus novissimum.—After the Council of Trent, an attempt to secure a new official collection of church laws was made about 1580, when Gregory XIII charged three cardinals with the task. The work was instituted during the pontificate of Paul V, was completed under Clement VIII, and was printed (Rome, 1598) as: "Sanctissimi Domini nostri Clementis papae VIII Decretales", sometimes also "Septimus liber Decretalium". This collection, never approved either by Clement VIII or by Paul V, was recently edited (Freiburg, 1870) by Sentis. In 1657
an Italian canonist, Paul Lancelotus, attempted unsuccessfully to secure from Paul IV, for the four books of his "Institutiones juris canonici" (Rome, 1563), an authority equal to that which its model, the "Institutiones" of Emperor Justinian, once enjoyed in the Roman Empire. A private individual, Pierre Mathieu of Lyons, also wrote a "Liber septuagesimus" (1587), in the appendix to the Frankfort (1590) edition of the "Corpus Juris Canonici". This work was put on the Index. The sources of modern canon law must be looked for in the disciplinary canons of the Council of Trent (see Trent, Council of), in the collections of papal Bulls (see Bullarium), of general and local councils; in the decisions and answers of the Roman Congregations (see Congregations, Roman). However, the ancient "Corpus Juris Canonici" forms yet the basis of the actual canonical legislation. The present position is not without grave inconveniences. At the Vatican Council several bishops asked for a new codification of the canon law, and since then several canonists have attempted to compile treatises in the form of a full code of canonical legislation, e.g. de Luise (1873), Fillet (1890), Pessani (1894), Deshayes (1894), Collomiti (1898-1901). Finally Pius X determined to undertake this work by his "Auctorem institutum" (19 March, 1904), and named a commission of cardinals to compile a new "Corpus Juris Canonici" on the model of the codes of civil law. (See Law.)

Corrado, Rudolfo. See Ghirlandajo.

Correction, Fraternal, is here taken to mean the admonishing of one's neighbour by a private individual with the purpose of reforming him or, if possible, preventing his sinful indulgence. This is clearly distinguishable from an official disciplining, whose mouth-piece is a judge or other superior, whose object is the punishment found by Theodoric and whose aim is not so directly the individual advantage of the offender as the furtherance of the common good. That there is, upon occasion and with due regard to circumstances, an obligation to administer fraternal correction there can be no doubt. This is a conclusion not only deducible from the natural law binding us to love and to assist one another, but also explicitly contained in positive precept such as the incitement of Christ: "If thy brother shall offend against thee, go, and rebuke him between thee and him alone. If he shall hear thee, thou shalt gain thy brother" (Matt., xvii, 15). Why is not a sufficing grave condition of spiritual distress calling for succour in this way, this commandment may exactly fulfilment under pain of mortal sin. This is reckoned to be so only when (1) the delinquency to be corrected or prevented is a grievous one; (2) there is no good reason to believe that the offender will not correct him for himself; (3) there is a well-founded expectation that the admonition will be heeded; (4) there is no one else just as well fitted for this work of Christian charity and likely to undertake it; (5) there is no special trouble or disadvantage accruing to the reformer as a result of it. Practically, however, individuals without any official capacity are seldom called upon seriously to transgress the law in this matter because it is but rarely one finds the coalition of circumstances just enumerated.

Of course the reproof is to be administered privately, i.e. directly to the delinquent and not in the presence of others. This is plainly the method appointed by Christ in the words just cited and only as a remedy for obtrusion is any other or else permitted by Him. Still there are occasions upon which one might lawfully proceed in a different way. For instance (a) when the offence is a public one; (b) when it makes for the prejudice of a third party or perhaps even the entire community; (c) when it can only be condignly dealt with by the authority of a superior personally exercised; or (d) when a public rebuke is necessary to preclude scandal: witness the withstanding of Peter by Paul mentioned in the Epistle to the Galatians (ii, 11-14); (e) when the offender has already in advance relinquished whatever right he possessed to have his good name safeguarded, as is the custom in some religious bodies. The obligation of fraternal correction, so far as private persons go, does not obtain, generally speaking, for the case of one who violates a law through insincible ignorance. The obvious reason is that there is then no formal sin. Superiors to be sure can claim no such immunity to this method of punishment when a public rebuke is needed. Every one, however, whether having an official competency or not, is bound to give the admonition when the sin, committed though it be from ignorance, is hurtful to the offender or a third party or is the occasion of scandal.

Correction, Houses of Spiritual. See Retreat, Houses of Correctional.

Correctories are the text-forms of the Latin Vulgate resulting from the critical emendations as practised during the course of the thirteenth century. Owing to the carelessness of transcribers, the conjectural corrections of critics, the insertion of glosses and paraphrases, and especially to the preference for readings found in the earlier Latin versions, the text of St. Jerome was corrupted at an early date. About 550 Cassiodorus made an attempt at restoring the purity of the Latin text. Charlemagne entrusted the same labour to Alcuin, who presented his royal patron with a corrected copy in 801. Similar attempts were repeated by his successors, the Bishops of Aix, in 821. Lanfranc, Archbishop of Canterbury (1070-1089), Stephen Harding, Abbot of Citeaux (1109-1134), and Deacon Nicolaus Manicius (about the beginning of the thirteenth century). At this period the need of a revised Latin text of the Vulgate became more imperative than ever. When, towards the end of the twelfth century, the schools of Paris were organized into the university and its various faculties adopted the same reference texts, the faculty of theology, too, adhered to a uniform text of the Latin Bible. It cannot be ascertained at present whether this adoption was owing to the chance prevalence of a certain manuscript or to the critical work of theologians, whether it was the effect of an official choice of the university or of a prevailing custom; at any rate, the almost general adoption of this text threw into oblivion a great number of genuine readings which had been current in the Latin version and transmitted in the corrected text, uniform, indeed, but very corrupt. This is the so-called "Biblia Parisiensia", or Paris Bible; no copy is known to exist in our days. The thirteenth century reacted against this evil by a series of correctories. Father Deniile enumerates as many as thirteen groups, but it is more convenient to reduce them to three classes: the Dominican, the Franciscan, and the allied correctories.
Dominican Correctories.—The general chapter of the Dominicans held in 1236 connects a correct text of the Old Latin Bible with the readings of the Fathers, and the Dominicans of Paris published that all Bibles should be conformed to this. Little more is known of this work; but the following correctories are more noted: (1) The "Biblia Senonensis", or the Bible of Sens, is not the Paris Bible as approved of by the Archbishops of Sens, nor is it a particular text adopted by the ecclesiastical city, but it is a text of the Latin Vulgate created by the Dominicans of Paris and approved by the Dominican Fathers residing there. Whatever be the value of this correctory, it did not meet with the approval of the Dominican Order, as may be inferred from an ordination of the general chapter held in Paris, 1256. Quotations from the "Biblia Senonensis" are critical in character. (2) The "Correctorium Sorbonianum" is another text of God". Eight manuscripts of Hugues's correctory are still extant. (3) Theobald is the name of the Dominican Father who is usually connected with the next correction of the Latin Vulgate text, which appeared about 1248. The text of this too resembles that of the Latin manuscript No. 17 in the National Library, Paris, and is thus related to the "Correctorium Senonense". It may be identical with the "Correctorie Parisiensis secunda", quoted in the "Correctorium Sorbonium". (4) Another correctory was prepared about 1250 in the Dominican convent of Saint-Jacques, Paris. The manuscript thus corrected contains a text as bad as, if not worse than the Bible of Paris, the readings of which were carried into the new correctory. The principles of Hugues of Saint-Cher were followed by the correctors, who marked in red the words to be omitted, and added marginal notes to explain the text. It is more copious in the Old Testament than in the New. The autograph is preserved in the National Library, Paris, M.S.B. lat. 16,719-16,722.

Franciscan Correctories.—The great Franciscan writer, Roger Bacon, was the first to formulate the three principles which ought to guide the correction of the Latin Vulgate; his religious brethren endeavoured to apply them, though not always successfully. (1) The "Correctorium Sorbonicum", probably the work of William ofBritanny, derives its name from the fact that the thirteenth-century manuscript in which the corrections were made belonged to the Library of the Sorbonne. It was kept in the National Library, Paris, M.S.B. lat. 15554, fol. 147-253. The marginal and interlinear glosses are derived from the Paris Bible and the correctory of the Dominican Father Theobald; the make-up of the work imitates the Dominican correctories. (2) The "Correctorium Vaticanum" owes its name to the circumstance that its first known manuscript was the Cod. Vaticanus lat. 3466, though at present eight other copies are known, belonging to the thirteenth or the beginning of the fourteenth century. Its author is William de Mar, of Oxford, a disciple of Roger Bacon, whose principles and methods he follows. Though acquired with several Latin and Hebrew manuscripts, the Targum, the commentaries of Rashi, and the original texts, he relied more on the authority of the early manuscripts of St. Jerome's text. There are some faults in the correctory, resulting mainly from the author's limited knowledge of Greek. (3) Gérard de Huy was a faithful follower of Roger Bacon's principles in the old Latin manuscripts and the readings of the Fathers are his first consideration; he disagrees does he have recourse to the original texts. Unfortunately he knew no Latin manuscripts older than those of the ninth and tenth centuries containing a text of Alcuin's recension. But Gérard knew the history of the versions and the origin of the textual corrections of the Sacred Scriptures. He corrected the Paris Bible and gave an account of his emendations in his marginal notes. (4) Two more Franciscan correctories must be noted: MS. 61 (Toulouse), of the fifteenth century, reproduces the correctory of Gérard de Buxo, of Avignon, a work rather exegetical in character. MS. 28 (Eismaelen), of the beginning of the fourteenth century, contains the work of John of Cologne.

Allied Correctories.—Mangenot mentions six other groups of correctories which have not been fully investigated as yet. Two of them are allied to the Dominican correctory of the convent of Saint-Jacques: one is represented by the MS. lat. 15,555, fol. 147, National Library, Paris; the other by Cod. Laurent., Plut., XXV, sin., cod. 4, fol. 101-107 (Florence), and by MS. 131, fol. 1, Arsenal, Paris. Two other groups are allied to the Franciscan correctories: one, represented by Cod. 141, lat. class. I, fol. 121-390, Marciano (Veneto), of the beginning of the fourteenth century, by the other, found in MS. 82, Borges. (Rome), depends on Gérard de Huy. Finally two very brief correctories are to be found in MS. 492, Antonian, Padua, and in MS. Cent. I, 47, fol. 127, Nürenberg.

Corrigan, Michael Augustine, third Archbishop of New York, b. 13 May, 1829, d. New York, 8 May, 1902. He was native of Ireland. After graduating at Mt. St. Mary's College, Emmitsburg, Md., in 1859, he entered the College of the Propaganda at Rome, and was one of the twelve students with whom the North American College was opened there, 8 December, 1859. He was ordained priest at Rome, 19 September, 1863, and received there the degree of Doctor of Divinity in 1864. Returning to his native diocese in September, 1864, he was successively professor of dogmatic theology and of Scripture, vice-president and president of Seton Hall College and Seminary, and vicar-general of Our Lady of Peace diocese until 1876; consecrated Bishop of Newark in 1876. His administration, during the seven years of its continuance, was characterized by unceasing and successful efforts to bring the regulation of the spiritual and temporal affairs of the diocese into strict accordance with the prescriptions and recommendations of the plenary councils of the Church in the United States that had been held previous to his accession to the episcopacy.

The declining health of Cardinal McCloskey, Archbishop of New York requiring the appointment of a coadjutor, the young Bishop of Newark was named, 1 October, 1880, titular Bishop of Petra, with the right of succession for New York, and on the death of Cardinal McCloskey in October, 1885, he assumed charge. Having taken an active part in the proceedings of the Third Plenary Council of Baltimore (1884) as the representative of the cardinal, his first impor-
tant act as archbishop was to convocate a synod of the diocese, in November, 1886, to carry into effect the de-
crees of the council. The considerable changes made
by the council in the status of the clergy and its pro-
visions for the administration of the dioceses of the
United States, as to their subordinate officials, were
strongly opposed by the clergy, who believed it would
cause a new theological movement to replace that of
St. Joseph's, Troy. The new See was established at
Dunwoodie, near Albany, and opened September, 1896. The unfinished towers of St. Patrick's Cathedral
were completed. The orphan Asylums on Fifth and Madison Avenues were trans-
ferred to a suburban site, Kingsbridge.

During the municipal election of 1886 Archbishop Corrigan deemed it his duty to disapprove of the
socialistic character of the writings and addresses of one of the candidates for the mayoralty. This brought
about the most disturbing incident, perhaps, of the
archbishop's administration, the difference between
himself and a prominent member of his clergy, the
Rev. Dr. Edward McGlynn, rector of St. Stephen's
Church, New York city, occasioned by the latter's
advocacy of opinions which the archbishop believed
were contrary to the Catholic Church's teaching on
the rights of property. The controversy began in
1886 with the clergyman's appearance on the public
platform, in behalf of one of the candidates for mayor,
who stood for certain novel economic theories, and led
to the preservation of his pastoral office. Not
consulting with the order of the pope, Leo XIII.,
to proceed to Rome, he incurred the sentence of excom-
unciation.

There resulted some commotion in ecclesiastical and
other circles, accentuated later (1892) by a new phase
which the Catholic School question assumed in its re-
lationship to the public school law. A period of much public discussion and excitement followed, which, however,
subside rapidly when Dr. McGlynn was relieved of the
censure by the Apostolic Delegate, then Arch-
bishop Satolli, and obeyed the summons of the Holy
Father. In 1894 Archbishop Corrigan appointed Dr.
McGlynn pastor of St. Mary's Church, Newburgh,
where he remained until his death in 1901.

On May 4th, 1898, Archbishop Corrigan celebrated
the twenty-fifth anniversary of his episcopal consec-
ration. Laymen, priests, and many prominent non-
Catholics assembled to testify to his virtues as an
ecclesiastic and as a citizen. He made his last visit ad
libitum in 1900. Two years afterward, returning from
a confirmation visit to the Bahamas, he contracted a
cold, which, aggravated by an accident, caused his
death on May 5th of the same year. The manifestation
of sentiments of respect and affection on that event was not only local but national. From
the beginning of his episcopate in New York he was
obliged to face the problem of the great influx of for-
eign, especially Italian, immigration and its religious
requirements. He had to guide and direct the char-
itable and educational interests of his diocese which
rapidly and widely expanded during his administra-
tion. During the seventeenth years of his rule he was
instrumental in the increase of the churches, chapels,
and stations of the archdiocese by one hundred and
eighty-eight, of the clergy by two hundred and eighty-
four, of schools by seventy-five. His scholarship was
depth and wide, extending to every branch of ecclesias-
tical learning; his piety marked but unobtrusive; his
methodical and reforming, his career was marked by
his unceasing labours in behalf of religion make him a
conspicuous figure in the history of the American
Church of the nineteenth century. The only literary
production that his busy life as a priest and bishop permitted him to publish was a "Register of the
Archbishop's Early Missions to 1885", which compiled for the

“Historical Records and Studies” of the United States
Catholic History Society (Jan., 1889, sqq.).

there were many heathens in Corsica, which long retained its early reputation as a wild and inhospitable island. On the fall of the Western Empire (476) Corsica was taken by the Vandals, but was recovered by the Eastern Empire and heeded by the Christian church under Totila. Eventually, however, it became subject to the exarchs of Ravenna, and remained a Byzantine possession until the eighth century. At the end of the sixth and the beginning of the seventh century the Roman Church owned large landed estates in Corsica, and the Donation of Pepin the Short (754-55) the island became a civil dependency of the pope (Liber Pontifii, ed. Duchesne, I, 498; II, 104, note 35). From the eighth to the eleventh century it was frequently plundered by Saracen pirates. Pisa then set up a claim of overlordship which was soon disputed by Genoa. In 1300 the latter made good its claim to the civil and ecclesiastical influence of hitherto exercised by Pisa, and despite numerous revolutions (Sampiero, 1567; Baron Neufhof, 1720; Paoli, 1755) held at least a nominal authority until 1768. In that year Genoa ceded Corsica to France, since which time the island has remained a French province. It is its historically famous as the birthplace of Napoleon Bonaparte.

It has been asserted that Christianity was introduced into Corsica in Apostolic times. Ughelli, in his "Italia Sacra", says of Mariana, one of the oldest settlers: "It received the Catholic Faith, and has held it to the present day without ever sacrificing the Apostolic succession"; but this would be difficult to establish. Another tradition which finds favour with historians is, that Christianity was spread in the island by confessors of the Faith exiled thither (Hergrömther, I, in French tr., Paris, 1901, p. 297). The Ballondists say the country was entirely Christian in A.D. 439. It gave saints and martyrs to the Church; Mr. de la Fosse, in his "Recherches" (see bibliography infra), cites the names of three Corsican Friars Minor of the Observance, Bernardino Alberti, Francesco Mucchietti, Teodulo Designorio, whose virtues had been authoritatively declared heroic, and also claims as Corsicans St. Laura, virgin and martyr, whose festival was celebrated as a first-class feast in the ancient Diocese of Aleria, St. Partheus, martyr, St. Vincenzio, and St. Florintus. It is said, also, that St. Julia was a Corsican.

Before and after 600 Corsica was in close dependence on the Apostolic See, and always remained so, (see Cappelleti, Le Chiese d'Italia, XVI, 307 sqq.). In 1077 Gregory VII named as his vicarius for Corsica the Bishop of Pisa. In 1092 Pope Urban II made its bishops suffragans of the Archbishops of Pisa. In 1133 Innocent II, having granted the island to Genoa, gave him for suffragans the Corsican Bishops of Mariana, Nebbio, and Accia, the Archbishops of Pisa retaining as suffragans the sees of Ajaccio, Aleria, and Sagone. The Bishops of Mariana and Accia were united, 90 January, 1563. About 1580 the Bishop of Pisa, Giovanni Sauli, (Catholic Encyclopedia), the "Apostle of Corsica" awaked the islanders to a more earnest religious life and founded a seminary on the model of those decreed by the Council of Trent. At the time of the French Revolution there were five dioceses in Corsica: Mariana and Accia, Nebbio, Aleria, Sagone, and Ajaccio. A decree of 12 July, 1790, of the National Assembly at Paris, whose members had voted the Civil Constitution of the Clergy, reduced these five bishoprics to one, giving to Bastia the pastoral care of the whole island. On 8 May, 1791, the election of the Constitutional bishop took place, the choice fell upon the canton Ignatius François Guicci, Vicar-General of Mariana, and Provost of the Cathedral. He, however, made a public and solemn recantation 22 December, 1794. The Concordat of 1801, between the Holy See and the French Republic, which officially restored Catholic worship in France, made of Corsica a single diocese with Ajaccio as its episcopal city. (See Concordat of 1801; Ajaccio.) St. Euphrosius, bishop and martyr, is the patron of the diocese. St. Julia and Devota were declared patrons of the island by decree of the S. C. of Rites, 5 August, 1809, and 14 March, 1820. The "Directoire Cleri" of the diocese for 1907 states that there are in Corsica one bishop and five hundred and ninety-seven priests, professors, directors, and chaplains. There are one vicar-general, eight vicars and nine honorary canons, five archpriests, thirteen parishes of the first class, forty-eight of the second class, and three hundred and thirty-three chapels. Parochial councils, composed of members of the laity, assist the parish priests, since the suppression of the former boards of trustees by the separation of Church and State. In Ajaccio there was, until recently, a dioecesan seminary, but the students were dispersed on account of the non-acceptance by Pope Pius X of the so-called "Law of Separation". At the time it ceased to exist, it had thirty-eight students and five candidates for the priesthood. Every ordained priest is required to present himself yearly for five consecutive years for examination in ecclesiastical sciences before a special committee. The degrees in theology may dispense from several or all of these examinations, but a young priest is never allowed to exercise the ministry until he has passed an examination of this kind. In Corsica there are numerous charitable and pious brotherhoods, founded in the days of Italian rule. Several of these associations assemble in their own chapels. The churches are usually of the Italian style of architecture and structure, and govemmed by the Society for the Propagation of the Faith is directed by a diocesan committee instituted 13 February, 1859. The St. Vincent de Paul Society has two conferences. An Association for free Catholic schools is supported by the subscriptions of the faithful, who also provide for the needs of Catholic worship. Before the suppression of the religious orders there were in Corsica one house of the Jesuits, six Franciscans, one Dominican, and five Capuchin monasteries, and one house of the Oblates of Mary. These, as well as the schools of the Christian Brothers and all conventual churches, have been closed by the Government. There are still six convents of nuns. In consequence of the new laws of France, the Catholic Church in Corsica, a poor country, is confronted with a crisis: the people, habituated to look to the State for the support of public worship, must now adopt new methods and make many sacrifices for the maintenance of religion. Pietro Felcino, op. cit., "Apostolicae Sedis " (1560 in Muratori, Italicorum Rerum Scriptores, by Della Rovere, Crevald, and Montecorviani, Chronicles, continued to 1560 by Filippini, and tr. into French by Lettenberg (Bastia); Guadin, Voyage en Corse (latter half of the eighteenth century); Renucci, Storia di Corse, 2nd ed., 1824; Robert, Recherches ... sur la Corse (Paris, 1835); Fries, Histoire des Corse (Bastia, 1832); Gregorovicius, Histoire des Corse, a French tr. of German and Italian works (Paris, 1859); J. ALEXANDRE GUARCO.

Cortés, DONOSO. See DONOSO CORTÉS.

Cortés, HERNANDO, conqueror of Mexico, d. at Medellin in Spain c. 1485; d. at Castileja de la Cuesta near Seville, 2 December, 1547. He was married first to Catalina Xuxerez, from which marriage there
was no issue, and, after her death, to Doña Juana de Zuñiga, niece of the Duke of Bejar. From this union there sprang four children, one son (Martín) and three daughters. His parents were Martín Cortés de Monroy and Catalina Pizarro Altamirano, both of honourable extraction, belonging to the middle class of nobility, but not wealthy. They sent their son to school at Salamanca when he was fourteen years of age, but study was irksome to him, his restless and ambitious temperament chafed under restraint, and he returned home much to the displeasure of his parents. As he was the only son, they looked upon him as their hope and future support, and had wished that he would adopt the profession of the law. Dissatisfied at home Cortés turned his eyes to the newly discovered Western world, and, after an unsuccessful attempt to embark for the West Indies with Ovando, succeeded in reaching Española in a craft commanded by one Quintero, who signaled himself during the voyage by trying to deceive his superior and reach the New World before them in order to secure personal advantages. It may be that the example of Quintero was a school for Cortés in his subsequent career. The life Cortés led in the Antilles was that of the military man of his time, with intervals of rest on such estates as he gradually acquired. He was a favourite of both Ovando and Velasquez, but he quarrelled with the latter, deceived him and made him a mortal enemy. The conflicts were very serious, for Velasquez was Governor of Cuba and a man of influence at court. The conduct of Cortés during his stay in the Antilles (1504–1519) revealed, besides military aptitude (which he had small opportunity of displaying), shrewdness, daring (in his dealings with Velasquez), and no excess of scruples in morals.

In 1517 Cordova reached the coast of Yucatan, while commanding a modest expedition despatched by Velasquez. He was mortally wounded and only a remnant of his crew reached Cuba again, bringing back news of the superior culture of the people they had met. Another expedition was determined upon, and was carried out the year following under the leadership of Grijalva. It touched the coast of Mexico, and brought home metallic objects and evidences of superior culture. Ere Grijalva had come back, Velasquez determined to send a third and more numerous squadron to the Mexican coast. Cortés, then one of Velasquez’s favourites, was named as the commander, a choice which created no little envy. Cortés entered into the enterprise with zeal and energy, sacrificing with too much ostentation a considerable part of his fortune to equip the expedition. Eleven vessels were brought together, manned with well-armed men, and horse and artillery were embarked. At the last moment Velasquez, whose suspicions were aroused by the actions of Cortés, instigated by his surroundings, attempted to prevent the departure. It was too late; Cortés, after the example set by Quintero, slipped away from the Cuban coast and thus began the conquest of Mexico. His life from the time he sailed on his momentous undertaking in 1519 is so intimately linked with the history of Mexico, that the reader may be referred for additional details to the articles MEXICO, AZTECS, and PEDRO DE ALVARADO.

As a soldier Cortés put to use in Mexico the Indian mode of warfare he had observed in the Antilles, and it enabled him to achieve an unbroken success in the open field. Indian defensive tactics from buildings and walls were new to him, but he quickly saw both their strong and their weak points, and his reduction of the island settlement of Tenochtitlan was no small feat. He recognized at an early date the Indian method of procuring it by decoy and ambush, and this led to his success against the tribe of Tlaxcalans. He was very quick in detecting devices and stratagems, even in time of apparent peace, and in adopting and executing measures to defeat them. One of the most remarkable instances is what has been called the “massacre of Cholula”. When Cortés was at the large Indian settlement of Tlaxcalans and had perfected an alliance with that people, some Indians from the neighbouring tribe of Cholula urged him to visit their home. He was warned not to go, since the visitors did not express the wish of their kindred, who were bitterly opposed to dealing with the Spaniards. Though unacquainted with the character of the natives, he marched to Cholula, but noticed that a trap was being set for him. He prevented the outbreak by an attack on the Indians, and after a short struggle forced them into submission.

The most daring of his exploits, and one that may be qualified as absolutely reckless although successful, was his march on Narváez who, with a much superior force of Spaniards, had landed on the gulf coast with orders from Velasquez, not only to supersede Cortés, but to capture him and bring him to trial in Cuba for disobedience and treason towards the governor. Leaving only one hundred and forty men under Alvarado to hold an Indian settlement of twenty thousand souls, he set out against Narváez, who had nine hundred soldiers while Cortés was forced as he approached the coast, mustered about two hundred and sixty. With these he surprised his antagonist and took him prisoner. The move was a desperate one, as the sequel proved. But the secret
of his success lay in his marvellously quick movements, for which Narvaez was not prepared, as well as in his rapid return to the plateau, by which he surprised the Indians who held Alvarado and his people at their mercy. The desperate defence of the Spaniards in the absence of Cortés would have been unnecessary had he latter not used his military genius of the case. In contrast with that lightning-like quickness, but equally well adapted to the necessities of the war, was the methodical investment and capture of the lake settlement, showing the fertility of the conqueror's mind in suitting his tactics to altered conditions.

To these military accomplishments Cortés joined an unusual perspicacity in penetrating the general situation in aboriginal Mexico. He saw, soon after landing at Vera Cruz, the looseness of the bonds by which the Indian tribes were connected, and yet his keen perception remained at fault in that he did not appreciate (nor could he, from the standpoint of the times, understand) Indian tribal organization. The sway the tribes of the table-land and interior lake-basin held over many of their neighbours appeared to him (judging from European and Asiatic models) as an evidence of mere chance, for it led to the outcast as a hereditary autocrat. Of the nature of tribal society he had not, and could not have, any idea. While, therefore, his attempts at winning tribes leagued with the Mexican confederacy over to the Spanish cause were usually successful, he was less fortunate in his relations with the Mexicans themselves. His seizure of the person of Montezuma, the head war-chief of the confederates, did not have the expected result. Led by the belief that Montezuma was a supreme ruler, hence the pivot of a state, Cortés, by force of arms, was able to control the Mexican tribes and its confederates through his captive. The seizure itself appears as an act of singular daring, and Cortés and his men were astonished at the ease with which it was executed, and the lack of opposition on the part of the Indians; but they did not know that their prisoner was of so little importance. He was an elected officer, who could be replaced without trouble, and the tribal council, supported by the medicine men and guided by their oracular utterances, were the real heads of the confederacy. The general outbreak against the Spaniards began after Montezuma was sent in to the prison and the hostile manifestations were limited to blocking Alvarado.

For the sake of policy, Cortés was, in general, far from cruel towards the Indians. He allowed Cuauhtemoc to be tortured in order to force him to reveal the whereabouts of his supposed hidden treasures. Such acts were not uncommon at that period, and every nation was at times guilty of them. This cruelty was, however, useless, because the greater part of the Mexican treasures had already passed into the hands of the Spaniards. The execution of Cuauhtemoc on the journey of the Honduras was another instance of the misconception by Cortés of Indian conditions. It is not at all unlikely that the Mexican chieftain was party to a plan to exterminate the Spaniards while they were floundering through the forests and swamps, but even if this were so, his execution in an act of self-defence on the part of an innocent object might have been achieved. But Cortés had an exaggerated conception of the power and influence of Cuauhtemoc's office, as he had in the case of Montezuma. To the Indians as a mass he was kind. He recognized that their preservation would insure eventual prosperity for the Spaniards, provided the Indians gradually accepted European ideas. Therefore he regarded the Church as the main instrument for the education of the Indian.

But he was far from sharing in the dreams of Las Casas. His relations with the clergy were very cordial, he did all he could to introduce missionaries, and even Las Casas mentions him favourably. It has been intimated that the kind treatment of the Mexican natives by Cortés was part of a deeply-laid plan to introduce a fool of Mexico for selfish and treasonable purposes, for Cortés was not always the faithful subject. This leads us to consider his relations to the Crown of Spain and a few points of his private character.

The impression has prevailed that Cortés was treasured by the Spanish Government with base ingratitude. It is true that a few years after 1521 an unfavourable change took place in his relations with the Emperor Charles V and his government. The change never led to an absolute break, but it caused a gradual curtailling of his power which Cortés felt very keenly. While lavishly contributing his own means at the outset, Cortés made his conquest avowedly as a Spanish subject, for and in behalf of Spain and its monarch. Mexico became a Spanish colony through his instrumentality, but it was the duty of the Spanish Government personified in him, and not only generously rewarded, but he speedily complained of insufficient compensation to himself and his comrades. Thinking himself beyond reach of restraint, he disobeyed many of the orders of the Crown, and, what was more imprudent, said in a letter to the emperor, dated 15 October, 1524 (Tudabada, "Documentos para la Historia de Mexico", Mexico, 1858, 1). In this letter Cortés, besides recalling in a rather abrupt manner that the conquest of Mexico was due to him alone, deliberately acknowledges his disobedience in terms which could not fail to create unfavourable impression. After the capture of the Indian settlement the Crown, as its prerogative, in 1522 sent to Mexico officers to investigate the condition of affairs, and to report on the conduct of Cortés. To this he could not object, as it was an established custom. The commissioner, Tapia, charged with the investigation, was so hampered, however, by the officers of Cortés that he did not even reach the valley of Mexico, but returned without carrying out his orders. Cortés himself, while keeping at a distance, treated him with the utmost courtesy, but rendered all action on his part impossible. A second commissioner, Luis Ponce de Leon, sent in 1526 with disastrous results of dangerous powers. He died at Mexico soon after his arrival, in a manner that leaves little doubt of foul play, although Prescott discredits it. But Prescott had not then the documentary material since unearthed. A number of minor charges were brought against the conqueror, and they appear to have been substantiated. They could not fail to create grave suspicion, because they presented the picture of a conspiracy, the object of which was to make Cortés the independent ruler of Mexico. Under such circumstances the least that could be expected was the condemnation of Honduras from the government of the new province. The situation was a very critical one for the Crown. Cortés held the country and its resources, and controlled a body of officers and men who had, in 1520, expressed to the emperor in writing their admiration for his conduct, and dwelt in the strongest terms on the restraining influence which the movements had placed the mother country. It is true, in case of a clash, Spain might have counted upon the support of the inhabitants of the Antilles, but the military reputation of Cortés had become so great that the selection of a leader against him would have been very hazardous for the cause, and could not be avoided as long as possible. Cortés' position was gradually undermined, titles and honours were conferred upon him, but not the administrative
Cortes, Giovanni Andrea (his name in the Benedictine Order was Gregorio), cardinal and monastic reformer, b. 1485 at Modena; d. 21 Sept., 1548. After receiving a training in the Universities of Pisa and Piacenza, he devoted himself to the study of jurisprudence for five years, first at Bologna, then at Padua, and was graduated as doctor of laws at the early age of seventeen. His thorough knowledge of the Latin and Greek languages induced Cardinal Giovanni de' Medici, the future Pope Paul III, to take him into his service and afterwards appoint him legal auditor in the Curia. Desirous of leading a more quiet life, Cortes resigned this office and in 1507 entered the Benedictine monastery of Polirone near Mantua, one of the most flourishing abbeys of the recently founded Congregation. When Cardinal Giovanni de' Medici heard that his former auditor had become a monk, he addressed a letter to him expressing his surprise and displeasure at the step which Cortes had taken and urging him to leave the monastery and resume his former occupation in Rome. In his answer to the cardinal's letter he pointed out the great dangers which beset his soul while he was still engaged in worldly pursuits, and speaks of the interior happiness which he experienced while chanting the Divine praises and applying himself to the study of Holy Scripture. When in 1513 Giovanni de' Medici became papal legate in Germany, he sent him a letter of congratulation in which, however, he did not omit to remind the new pontiff of his duty to begin at last that general reform of which the Church stood in extreme need. Like many other saintly and learned men of the time, Cortes was deeply grieved at the indifference manifested by many ecclesiastical dignitaries towards a wholesome internal reform of the Church. It is due to his untiring zeal that the Benedictine reform, which had recently been inaugurated in Italy by the Cassinese Congregation, was carried through, and that, with the return of monastic discipline, the Benedictine monasteries of Italy again became centres of learning for which they had been so famous in the past.

In 1516 Augustin de Grimaldi, Bishop of Grasse and abbot of the monastery of Lérins, united his monastery with the Cassinese Congregation, and, upon the bishop's request, Cortes and a few others were sent thither. The bishop's intention was to introduce the Cassinese reform. Hitherto Cortes devoted himself to literary pursuits, and in order to promote the study of the Humanities he founded an academy where he and other learned members of the monastery educated the French youth, thus becoming instrumental in transplanting to French soil the literary Humanistic move-

authority he coveted. At the same time his attention was insensibly directed to explorations outside of America, to the much-desired Moluccas or Spice Islands.

At a time when there was almost a certainty, in court circles in Spain, of an intended rebellion by Cortés, a charge was brought against him that cast a fatal blow upon his character and plans. He was accused of the murder of his first wife. Prescott makes light of the accusation, but his opinion has since been discovered which was beyond his reach. This evidence leaves no doubt that Catalina Xuxera was strangled by her husband. The proceedings of the investigation were kept secret. No report, either favorable or unfavorable, was published. Had the Government declared him innocent, it would have greatly increased his popularity; had it declared him a criminal, a crisis would have been precipitated by the accused and his party. Silence was the only safe policy. But that silence is a strong indication that grave danger was apprehended from his influence. It is curious that, after the conquest of the Mexicans had been consummated, but more particularly after the sinister deeds above mentioned, success seems to have abandoned his banner. Excluded from the government of Mexico, his eyes were turned to further conquests. Antonio de Mendoza, first viceroy of New Spain, was looked upon by Cortés as his enemy, but the accusation that he opposed and hampered Cortés in nearly every one of his new enterprises is not justified. It was the latter who, at once, opened a violent campaign against everybody who approached what he considered his new domain. He found grave faults with every measure, and resorted to statements that were utterly baseless. Thus his attack upon Father Marcos de Nizza, charging him with having attributed to himself the discovery of New Mexico while in reality he, Cortés, had been the discoverer, is so groundless that it appears almost ridiculous. Every expedition set on foot by Cortés in the Pacific either failed absolutely or produced meagre, unsatisfactory results. Soured by these failures which stood in flagrant contrast to the brilliant success of his early efforts, Cortés became a chronic complainer. The saying went: "He who is gone, his government also." The Government could not forget the proofs of unreliability which the conqueror of Mexico had given when he thought himself master of the situation. The emperor finally permitted him to join the great expedition against Algiers in 1514. Don Fernando, his admirer, had the advice of Cortés been followed that undertaking would have had a less disastrous end; but he was not even consulted. The enterprise failed, and the conqueror of Mexico did not long survive the failure.

Cortes was a good writer. His letters to the emperor, on the conquest, deserve to be classed among the best Spanish documents of the period. They are, of course, coloured so as to place his own achievements in relief, but, withal, he keeps within bounds and does not exaggerate, except in matters of Indian civilization and the numbers of population as implied by the size of the settlements. Even there he uses comparatives only, judging from outward appearances and from impressions. His first letter is lost, and the one from the municipality of Vera Cruz has to take its place. It was published for the first time in volume IV of "Documentos para la Historia de España," appearing in 1520. Then it was republished in "Carta de Relación," bearing the date of 30 Oct., 1522, appearing at Seville in 1522. The "Carta tercera," 15 May, 1522, appeared at Seville in 1523. The fourth, 20 October, 1524, was printed at Toledo in 1525. The fifth, on the Hondureña expedition, is contained in volume IV of the "Docu-

mentos para la Hist. de España." The important letter mentioned in the text has been published under the heading of "Carta del P. Cortés a Ysabalcoa." A great number of minor documents by Cortés or others, for or against him, are dispersed through the voluminous collection above cited and through the "Colección de Documentos de Indias," as well as in the "Documentos para la Historia de México." Of his letters on the conquest there are a number of reprints and translations into various languages.

See articles on Aztec and Mexico for the bulk of literature on the conquest of Mexico and the part played by Cortés in it. For his early career and especially that of the Conquest and of their statements therefore deserve particular attention, and with absolute impartiality cannot be expected. On the sinister occurrences of the death of Ponce de León and of Catalina Xuxera the "Documentos de Indias" give the authentic invoices. The Conquest is described at length in a fragment from the sixteenth century, "De Rebus Graeciae."
CORTONA
Brother Elias (Elia Coppi), the famous companion of St. Francis of Assisi, and later Vicar-General of the Franciscan Order; Cardinals Egidio Boni and Silvio Passerini; the painter Luca Signorelli; the architect and painter Pietro Berrettini (Pietro da Cortona). One of the glories of the city is St. Margaret of Cortona (1248–97). She was born at Laviano (Alviano) in the Diocese of Chiusi, and formed an evil relation with a nobleman of the vicinity. On discovering his body after he had met a violent death, she repented suddenly, and after a public penance, retired to Cortona, where she took the habit of a Tertiary of St. Francis and devoted her life to works of penance and charity. There still exist at Cortona religious works due to her zeal. Leo X permitted her veneration at Cortona, and Urban VIII extended the privilege to the Franciscan Order. Benedict XIII canonized her in 1728. Her body rests in a beautiful sarcofagus in the church dedicated to her at Cortona. It is not known whether Cortona was an episcopal see previous to its destruction by the Lombards. From that time until 1325 it belonged to the Diocese of Arezzo. In that year, at the request of Guglielmo Cassi, John XXII raised Cortona to episcopal rank, as a reward for the fidelity of its Guelph populace, Arezzo remaining Ghibelline. The first bishop was Rainiero Ubertini. Other bishops were Luca Grazier, who was a distinguished member of the Council of Florentia (1438); Matteo Coneini (1560) and Gerolamo Gaddi (1562) were present at the Council of Trent. The cathedral

CATHEDRAL, CORTONA (Designed by Antonio da Sangallo?)

and the other churches of Cortona possess numerous works of art, especially paintings of the school of Luca Signorelli and of Fra Angelico. The diocese has 50 parishes, 60 churches and oratories, 85 secular and 36 regular priests, 30,200 inhabitants, 6 religious houses of men, and 6 of women.

Corvey, Abbey of (also called New Corbie), a Benedictine monastery in the Diocese of Paduborn, in Westphalia, founded c. 930 by Otto I, King of Germany, and by the Emperor Louis the Pious and St. Adalbert, Abbot of the older Corbie, from which the new foundation derived its name. Corvey soon became famous, and its abbots ranked as princes of the empire. In its school were cultivated all the arts and sciences, and it produced many celebrated scholars. To it the world is indebted for the preservation of the first five books of the "Annals" of Tacitus. From its cloisters went forth a stream of missionaries who evangelized Northern Europe, chief among whom being St. Ansgar, the Apostle of Scandinavia. Here, too, Walhades was buried, the writer of the history of the Saxons (see Saxons), and the "Annales Corbeienses", which issued from the same scriptorium, figure largely in the "Monumenta Germaniae" collected by Pertz. (These "Annales" must not be confused with the forged "Chronicon Corbeiense" which appeared in the nineteenth century.) The school of Corvey declined after the fifteenth century, but the abbey itself continued until 1803, when it was secularized and given to the family of Orange-Nassau. The famous abbey library has long since been dispersed.

"Corynthus, the corvey'schen Geschichtsquellen (Leipzig, 1841); Zsigmondy, Historie Lit. d.S.B. (Augsburg, 1764); Pertz, Mon. Germ. Hist.: Scriptores (Hanover, 1839); III: Migne, Dict. des Anc. des Kirchenk. (Paris, 1856); Ermisch, Chevalier, Topo-bibliol. (Paris, 1854-99); Janben, Wölb von Stablo und Corvey (Berlin, 1854)

G. Cyprian Alton.

Corcyra, a titular see of Glicia Trachaea in Asia Minor. It was the port of Seleucia, where, in 191 B.C., the fleet of Antioco the Great was defeated by the Romans. In the Roman times it preserved its commercial importance, but the Turks usually kept their fleet there to watch over the pirates. Justinian restored the public baths and a hospital. Alexius Comnenus re-equipped the fortress, which had been dismantled. Soon after Corcyra was conquered by the Armenians, who held it till the middle of the fourteenth century, when it was occupied temporarily by the Turks, and for a time played an important part. Peter I, King of Cyprus, captured it in 1361. From 1448 or 1454 it belonged alternately to the Karamanlis, the Egyptians, the Karamanlis a second time, and finally to the Osmanlis. The ruins of the city are at Ghorbassos, twenty-eight miles north-east of Seleucia (Seleucia), in the vilayet of Adana. Among them are a triumphal arch, a beautiful Christian tomb, sarcophagi, etc. The two medieval castles, one on the shore, the other in an islet, connected by a ruined pier, are partially preserved; the former was reputed impregnable. Three churches are also found, one decorated with frescoes. About two miles from the cape is the famous Corcyrian cavern, 886 feet long, 65 wide, from 98 to 228 high. Near this castle are many other smaller but curious grottoes, a temple of Zeus, and a little church with Byzantine paintings, converted into a mosque and one ten miles north of Ghorbassos, another large grotto with thirteen curious bas-reliefs hewn in the rock. The city figures in the "Synecdemus" of Hierocles, and about 840 in Parthey's "Notitia Prima"; it was suffragan of Tarsus. Lequien (II, 879) mentions five Greek bishops from 381 to 850; another is known from an inscription ("World dominions... d'Asie mineure, 341"). One Latin Bishop, Gerardus, was present at a council of Antioch about 1136; four are known in the fourteenth century (Lequien, III, 1197; Ebel, I, 218).

Corvina, Turricula d'Asie, I, 73; Albani, Siegestaube (Venice, 1856), 392-400.

S. VAILLÉE.

Corvallis, a titular see of Asia Minor. Korydalles, later also Korydalla, was a city in Lydia. In Roman times it struck coins. It figures in the "Notitiae episcopatuum" as late as the twelfth or thirteenth century as a suffragan of Myra. Lequien (I, 979) mentions only four bishops: Alexander, spoken of in St. Basil's letter cxxxvii, Palladius in 451 and 458, Leo in 787, and Eustathius in 879. Corydallus has not as yet been identified. There was a see of the same name in Pamphylia, suffragan to Perge (see Lequen, I, 1031).

S. PÉTRIDÉS.

Cosa, Juan de la, navigator and cartographer, according to tradition b. in 1460 at Sta. María del Puerto (Santaño), on the Bay of Biscay, Spain, and hence called Juan Biscayno, d. on the coast of the Gulf of Uraba, 28 February, 1510. He passed his life from earliest childhood on the ocean. From the countries of his native coast, which he knew thoroughly, he soon ventured onto the coast of Western Africa, which was at that time the goal of so many Spanish expeditions. When Columbus in 1492 made preparations for his voyage to the west, Juan de la Cosa had attained such reputation, that the great discoverer engaged him, together with his ship Santa María, and in spite of a passing estrangement between them, he secured de la Cosa's services as cartographer for his second expedition in 1493-1496. In 1499 Juan de la Cosa joined as first pilot the expedition of Alonso de Ojeda and Vespucci, and was with them amongst the first to set foot on the coast of Florida. In 1500 he returned to the Gulf of Paria. At the same time the coast from Essequibo to the Cape Vela was explored. Immediately after his return he designed his chart of the whole world, which is of the utmost importance for the history of the discovery of America. Later in the same year, or early in 1501, he continued his discoveries along the South American coast to the Isthmus of Panama, and returned in 1502 to Haiti. When the Spanish court found soon afterwards that the Portuguese had made several incursions into the newly discovered country, Queen Isabella sent Juan de la Cosa at the head of a delegation to Portugual, to remonstrate. He was nominated alguazil major, and in 1504-05 was commander of an expedition to the Pearl Islands and the Gulf of Uraba to found settlements there. At the same time he visited Jamaica and Haiti. Another voyage undertaken 1507-08 with Alonso de Partida, Juan de los Reyes and Juan Cortés had the same object in view. In 1509 for the seventh and last time Juan de la Cosa started for the New World. He carried two hundred colonists on three ships and on reaching Haiti he placed himself under the command of Ojeda, who added another ship with one hundred men to the expedition. After the expedition the old frontier-dispute between Ojeda and Nicuesa, they went with Pizarro into Ojeda's territory and landed at Cartagena against the warnings of Cosa, who proposed to disembark on the more peaceful coast of the Gulf of Uraba. They were attacked by the natives and de la Cosa was killed.

Juan de la Cosa made several charts of which one, the famous chart of the world is still preserved. It is the oldest representation of the New World. Of special interest is the outline of Cuba, which Columbus never believed to be an island. Waldenaer and Alexander von Humboldt were the first to point out the great importance of this chart. It is now in the Museo Naval in Madrid. Reproductions of it are given by Humboldt in his "Atlas geographique et physique"; by Jomard in his "Collection des Monuments", tab. XVI; by Winsor, in his "History of America", III (London, 1888), and by W. R. Spence in his "Entdeckung Amerikas" (Berlin, 1891). Atlas, table VII. A facsimile was published in Madrid, 1892.

De Lequen, Juan de la Cosa (Madrid, 1877); Carmona, Ensayo cronologico del celebre navegador y cartógrafo de España en francés; la serie de éxitos para acompañar al Mapa Mundial de Juan de la Cosa (Madrid, 1892).

Otto Hartig.
Western half of the first map of the New Discoveries, drawn on ox-hide in colours by the pilot Juan de la Cosa, A.D. 1500, now preserved in the Naval Museum, Madrid. Size 18 x 22 inches. This celebrated map was discovered by Baron Alexander von Humboldt while at work in the Library of Baron von Klenau. In the middle of the West side of the map is a vignette representing Saint Christopher (the Christ-Bearer) carrying upon his shoulders the infant Christ, supposed to be an allusion to Columbus.
Cosmas, Archdiocese of (Cusentina), immediately subject to the Holy See. Cosenza is a city in the province of Calabria, Southern Italy, at the confluence of the Crati and the Busento. It was known to the ancients as Consentia, and was the capital of Bruttium. It was conquered (338 n.c.) by Alexander of Epirus, uncle of Alexander the Great. Later it adhered to King Pyrrhus, when he invaded Italy. Between 278-176 B.C. both Lucania and Bruttium acknowledged the supremacy of Rome. Alexander besieged the city (A.D. 410), but died there the same year and was buried in the bed of the Busento at its confluence with the Crati. In 902 Cosenza was pillaged by the Saracens, who were later expelled by the Normans but regained possession of the city in 1004. In 1130 Cosenza became the capital of Calabria Ginterior, now Cosenza, and therefrom shared the vicissitudes of the Kingdom of Naples. Among its famous citizens may be mentioned the savant Gian Vincenzo Gravina, co-founder with Queen Christina of Sweden of the Roman Academy of the Arcadia in 1656 (see Academies, Roman). The city suffered much from earthquakes, especially in 1184, 1658, and 1783. The Gospel was first preached in Cosenza by missionaries from Reggio; its earliest known bishop is Palumbus, a correspondent (599) of St. Gregory the Great. Cosenza was raised to the dignity of an archbishopric about 1050. Among the best known Archbishops of Cosenza have been: Rufus, who died in 1233; the missionary to Russia, Gaddi, who died in 1356, and the theologian, Cardinal, who obtained from Paul IV the privilege by which the cathedral canons of Cosenza wear the choir habit of the Vatican basilica; and Giuseppe Maria Sanfelice (1650), frequently charged by the Holy See with diplomatic missions. The diocese has a population of 159,500, with 190 parishes, 264 churches and chapels, 200 secular and 16 regular priests, 2 religious houses of men and 5 of women.

Cappellacci, Le Chiese d'Italia (Venice, 1843), XXI, 286; M. M. J. de Fillipio, Storica dell'arcidiocesi di Consenza (Naples, 1750); Ann. ecc. (Rome, 1907), 429.

U. Benigni.

Cosgrove, Henry, second Bishop of Davenport, Iowa, U.S. A., b. 19 December, 1834, at Williamsport, Pennsylvania; d. at Davenport, 23 December, 1906. He was the first native of the United States appointed to a see west of the Mississippi. In 1854 he emigrated to Iowa with his parents from Pennsylvania. He was ordained priest 27 August, 1857, and became pastor of St. Margaret's church, Davenport, in 1861. After the death of Bishop McMullen of Davenport he was administrator of the see, for which he was consecrated 20 July, 1884.

Rev. R. S. B. D. of the Catholic University of U.S. (Milwaukee, 1898); The Messenger (New York, Jan., 1907).

Thomas F. Meenan.

Cosin (the name is also written Cossyn), Edmund, vice-Chancellor of Cambridge University, England. The dates of his birth and death are uncertain. He was born in Bedfordshire and entered King's Hall, Cambridge, as a Bible clerk, receiving the degrees of B.A. early in 1535, M.A. in 1541, and B.D. in 1547. He held the living of Grendon, Northamptonshire, which was in the gift of King's Hall, from 21 September, 1538, to November, 1541, and, successively, fellowships of King's Hall, St. Catharine's Hall, and of Trinity College. Early in Queen Mary's reign he was elected Master of St. Catharine's, which brought him as gifts from the Crown the Norfolk rectories of St. Edmund, North Lynn (1533), Fakenham (1555), and the Norfolk vicarages of Caistor Holy Trinity, and of Oxburgh (1554). He was presented to the rectory of Thorpland by Trinity College in the following year. He was also chaplain to Bishop Rowe of London and assistant to Michael Dunning, the Chancellor of the Diocese of Norwich. In 1558 he was elected Vice-Chancellor of Cambridge but being a Catholic he refused to conform to the Elizabethan heresies, and hence in 1560 was forced to resign all his preferments and enter a monastery in 1564 to live in retirement in Caius College, Cambridge. Four years later, summoned to answer before the Lords of the Council to a charge of non-conformity, he went into exile rather than foreswear his faith. He was living on the Continent in 1576 but no further definite records of his career are available.

Kirk in Dict. Nat. Biot., X, 175; Strype, Memoriala, III, 180; Bloxfield, Norfolk.

Thomas F. Meenan.

Cosmas, called Magiopolites of Cosmas of Jerusalem), a hymn-writer of the Greek Church in the eighth century, was the foster-brother of St. John of Damascus. The teacher of the two boys was an elderly Silician, also named Cosmas, who had been freed from slavery by St. John. On the death of this Cosmas went from Damascus to Jerusalem, where both became monks in the monastery of St. Sabas near that city. Cosmas, however, left the monastery in 743, when he was appointed Bishop of Mauma, the port of ancient Gaza on the southern coast of Phoenicia. The Greek Church observes his feast on 14 October.

The hymns of Cosmas were originally intended to add to the interest of the services at Jerusalem, but through the influence of Constantine the Great became universal in the Orthodox Greek Church. It is not certain, however, that all the hymns ascribed to Cosmas in the Greek liturgical books were really his compositions, especially as his teacher of the same name was also a hymn-writer. Collections of hymns, varying in number, are attributed to Cosmas, and may be found in Migne, P. G., CXVIII, 459-524, and in Christ-Paranikas, "Anthologia graeca carminum monasticorum" (Leipzig 1871), xciv-xcvii. The above-mentioned notes or scholia on the poems of Gregory of Nazianzus see Mii, "Spielegium Romanum", II, Pt. II, 1-375, and Migne, P. G., XXXVIII, 339-679.

Krummacher, Gesch. der byzantinischen Literatur (2d ed., Munich, 1890), 674 sqq.

Anton Baumstark.

Cosmas and Damian, Saints, early Christian physicians and martyrs whose feast is celebrated on 27 September. They were twins, born in Arabia, and practiced the art of healing in the seaport Aegae, now Ayasih (Assus), on the Gulf of Iskanderun in Cilicia, Asia Minor, and attained a great reputation. They accepted no pay for their services and were, therefore, called ἄδηπτοι, "the silverless". In this way they brought many to the Christian Faith. When the Diocletian persecution began, the Prefect Lysias had Cosmas and Damian arrested, and ordered them to recant. They remained constant under torture, in a miraculous manner suffered no injury from water, fire, air, nor on the cross, and were finally beheaded with the sword. Their three brothers, Anthimus, Leonius, and Euprepius died as martyrs with them. The execution took place 27 September, probably in the year 287. At a later date a number of fables grew up about them, connected in part with their relics.
The remains of the martyrs were buried in the city of Cyrus in Syria; the Emperor Justinian I (527–565) sumptuously restored the city in their honour. Having been cured of a dangerous illness by the intercession of Cosmas and Damian, Justinian, in gratitude for their aid, rebuilt and adorned their church at Constantinople, and it became a celebrated place of pilgrimage. At Rome Pope Felix IV (526–530) erected a church in their honour, the mosaic of which are still among the most valuable art-remains of the city. The Greek Church celebrates the feast of Saints Cosmas and Damian on 1 July, 17 October, and 1 November, and venerates three pairs of saints of the same name and profession. Cosmas and Damian are regarded as the patrons of physicians and surgeons and are sometimes represented with medical emblems. They are invoked in the Canon of the Mass and in the Litany of the Saints.

GABRIEL MEIER.

Cosmas Indicopleustes (Cosmas the Indian Voyager), a Greek traveller and geographer of the first half of the sixth century, b. at Alexandria, Egypt. Cosmas probably received only an elementary education, as he was intended for a mercantile life, and in his earlier years was engaged in business pursuits. It may be, however, that by further study he increased his knowledge, since his notes and observations show more than ordinary training. His business took him to the regions lying south of Egypt, the farthest point of his travels in this direction being Cape Guardafui. He traversed the Mediterranean, the Red Sea, and the Persian Gulf, and gathered information about lands lying far to the East; but it is not certain that he actually visited India. In his later years he entered the monastery of Ratu in the Peninsula of Sinai. If it be necessary to suppose, as some investigators assert, that Cosmas was at any time a Nestorian, it would appear from his work, the "Christian Topography", that, at least towards the close of his life, he returned to the orthodox faith. While an inmate of the monastery he wrote the "Topography" above mentioned, a work which gives him a position of importance among the geographers of the early Middle Ages.

The "Christian Topography" has been preserved in two manuscript copies, one in the Laurentian Library at Florence, and the other in the Vatican. In the second half of the seventeenth century Isaac Vossius, Emerec Bigot, and Melchisédech Thévenot first made the work known in a fragmentary way by publishing extracts from it. The first complete and critical edition, accompanied by a Latin translation, was issued by Bernard de Monfaucon in his "Collectio nova patrum et scriptorum graecorum" (Paris, 1707), II, 113–345. The "Topography" was also printed by Gal-landi in his "Bibliotheca veterum patrum" (Venice, 1776), and in Migne, P. G. (Paris, 1864), LXXI-VIII, 51–476. A French translation of the most important parts is found in Charton, "Voyageurs anciens et modernes" (Paris, 1855); a complete English translation, with notes and a critical introduction, was issued for the Hakluyt Society by J. W. McCrindle (London, 1897). The work is divided into twelve books and contains a description of the universe, as Cosmas constructed it in his imagination, and an account of those regions which he had visited, or concerning which he had gathered information. According to Cosmas the world is a rectangular structure in two sections, their length much greater than their breadth, and corresponding in form and proportions to the Tabernacle of the Old Testament. The base is formed by the surface of the earth, around which flows the ocean; on the other side of the ocean lies another—unknown—continent, from which rise the walls that support the firmament above. The stars are carried by the angels in a circle around the firmament. Above the firmament springs a vault which separates the heaven of the blessed from the world beneath. The theory that there is an antipodes, says Cosmas, is a doctrine to be rejected. The earth rises towards the north and ends in a cone-shaped mountain behind which the sun continues its wanderings during the night, and the nights are long or short according as the position of the sun is near the base or the summit of the mountain.

This curious attempt to harmonise a childish Biblical exegesis with ordinary phenomena and the current opinions of the time is at least superior to the extraordinary geographical hypotheses of that day. Aside from the fact that the theories of Cosmas exercised no influence, they are not of sufficient importance to affect the genuine worth of several portions of the "Topography". The value of these passages rests on the methodical conscientiousness of the simple merchant, as it is seen, for example, in the careful copy of the so-called Inscription of Adulis (Monumentum Adulitanum) which has been preserved to Greek epigraphy only in the copy of Cosmas. Cosmas, with the aid of his travelling companion, Menas, took a copy of it in 522 for the governor of the Christian King Eliesbaan of Abyssinia, retaining a replica for himself. Of equal importance is the information he collected concerning Zanzibar and the Indian Ocean, and what he learned as to the trade of Abyssinia with the interior of Africa and of Egypt with the East. The best-known and most celebrated part of the "Topography" is the description, in the ninth book, of Ceylon and of the plants and animals of India. The work also gives much valuable information concerning the extension of Christianity in his day. The Vatican manuscript of the "Christian Topography" has explanatory maps and sketches, either made by Cosmas himself or prepared under his direction; they are of value as the first efforts of pe
Cosmas of Prague, Bohemian historian, b. about 1045, at Prague, Bohemia; d. there, 21 October, 1125. He belonged to a knightly family, received his first instruction in the schools of Prague, and studied grammar and dialectics at Liège under the direction of a renowned master named Franco. At Liège he acquired good literary taste and that acquaintance with the classics which is evident throughout his work. While still young he entered ecclesiastical life at Prague, but was not ordained prior to the year 1069, and due to his ordination he became a member of the cathedral chapter of St. Vitus in Prague, and ultimately its dean. According to a general custom of the age, while still a minor cleric, he was married to one Bozetech, by whom he had a son named Henry or Zde, after which Bishop of Olomut. When Bishop of Prague, Gebhard, Cosmas, and Hermann, he was on terms of great intimacy, and often accompanied them on their travels; he likewise enjoyed the esteem and the confidence of the rulers of Bohemia. Cosmas wrote in Latin a "Chronica Bohemorum" history of Bohemia from the earliest times to 1125. The work consists of three books; the first brings the narrative to 1038, the second to 1092, the third to 1125. For the early part he relied almost exclusively on popular tradition, since there was no previous work on the subject. For the other parts he drew from the testimony of eyewitnesses, from his own experience, or from monuments and written documents. As an historian, Cosmas is generally truthful and conscientious; he distinguishes between what is certain and what is based only on rumours or tradition, and often indicates his sources of information. The style is pleasing, and the character-sketches are vivid. Owing to these qualities, and also to the fact that he was the first writer of Bohemian history, he is called the Herodotus of Bohemia. The work was edited repeatedly: Freher, "Scriptores rerum bohemarcharum" (Hanover, 1602, 1607, 1620); Mencke, "Scriptores rerum Germ.: Saxoniae" (Leipzig, 1769); P. Pelz, "Scriptores rerum bohemarcharum" (Prague, 1783); Koepe, "Mon. Germ. Hist.: Script." (Hanover, 1851); also in Migne, P. L., CLI XVI; Emler and Tomek, "Fontes rerum bohemarcharum" (Prague, 1874), II.

Cosmati Mosaic (Gr. skemat), a peculiar style of inlaid ornamental mosaic introduced into the decorative art of Europe during the twelfth century, by a marble-worker of the name, Theodore, who came from Constantinople to Venice. Theodore settled in the hill-town thirty-seven miles east-south-east of Rome. Laurentius acquired his craft from Greek masters and for a time followed their method of work, but early in his career, freeing himself from Byzantine traditions and influences, he worked along original lines and evolved a new style of decorative mosaic, vigorous in colour and design, which he invariably employed in conjunction with plain or sculptured marble surfaces, making it a decorative accessory to some architectural feature. As a rule he used white or light-coloured marbles for his backgrounds; these he inlaid with squares, parallelograms, and circles of darker marble, porphyry, or serpentinite, surrounding them with ribbons of mosaic composed of coloured and gold-glazed tesserae. These harlequin-like mosaics, or mosaics with marble mouldings, carvings, and flat bands, and further enriched them with mosaic. His earliest recorded work was executed for a church at Fabieri in 1190, and the earliest existing example is to be seen in the church of Aes Celli at Rome. It consists of an epistle and gospel ambo, a chapel screen, and pavement. In much of his work he was assisted by his son, Jacobus, who was not only a sculptor and mosaic-worker, but also an architect of ability, as witness the architectural alterations carried out by him in the cathedral of Civita Castellana, a foreshadowing of the Renaissance. This was a work in which members of his family took part, and they were all followers of the craft for four generations. Those attaining eminence in their art are named in the following genealogical epitome: Laurentius (1140-1210); Jacobus (1165-1254); Lucas (1221-1240); Jacobus (1258-1323); Deodatus (1323-1303). Their noted Cosmatesque mosaics are to be seen in the Roman churches of SS. Alessio e Bonifacio, S. Sabba, S. Cesareo, S. Giovanni a Porta Latina, S. Maria in Cosmedin, S. Balbina, S. Maria sopra Minerva, S. Maria Maggiore, and in the cloister of S. Scholastica at Subiaco, the basilica of St. Magnus at Anagni, the duomo of Civita Castellana, and the ruined shrine of St. Edward the Confessor in Westminster Abbey.

CARYL COLEMAN.

Cosmogony.—By this term is understood an account of how the universe (cosmos) came into being (cosmos—γονoς = I have become). It differs from cosmology, or the science of the universe, in this: that the latter aims at understanding the actual composition and governing laws of the universe as it now exists; while the former answers the question as to how it first came to be. The Christian Faith accounts for the origin of the universe by creation ex nihilo, by which the world was brought into being and the preservative, or maintenance, of Providence according to which it developed into what it is now. Modern science has propounded many theories as to how the primeval gaseous substance evolved into the present harmony of the universe. These theories may be called scientific cosmogonies; and the account of the origin of the world given in Genesis, i and ii, is styled Mosaic cosmogony. The word cosmogony is, however, usually applied to mythical accounts of the world's origin current amongst the peoples of antiquity and the more modern races which have not been touched by recent scientific methods. In this article the word is understood only in this latter sense. In treating of the strange admixture of pseudo-scientific speculations and religious ideas which the human mind, unassisted by revelation, elaborated to account for the existence and harmony of the universe, we are directed at first to follow only the chronological order. The first accounts are those of the ancients. The heavens and the earth are at first sight so irconcilable, so fanciful, that no other order of treatment seems possible; but an attempt will be made in the conclusion to sum up and systematise the various ideas enumerated, to trace the various lines along which past thought and fancy developed indirect principles, and thus to show the unity which underlies even this confusing diversity. As modern
When on high the heavens were not uttered, 
Below the earth bore not yet a name; 
The ocean primeval was their begetter, 
Mummu Tiamtu the parent of all of them. 
The waters were mixed together in one and 
Fields not yet marked, marshes not yet seen. 

When of the gods there existed none, 
Elsewhere the name, there not yet settled 

Then came into being the gods (in order). 
Lahmu and Lahamu went forth. 

Great were the ages. 
Anasr and Kizar were produced, and over them 
Long grew the days, there appeared 
The God Anu, their son. 

The Greek copyist had evidently mistaken ΛΛΑΧΩΧ for ΔΑΧΩΧ, but otherwise the two accounts tally exactly: Apason is Apsu the Ocean; Tauthie is Tiamtu, as Assyrian labalizes the nasals; Lache and Lachos are likewise Lahmu and Lahamu; Kissare, Assora, Anos, Illinos, and Aos correspond to Kissar and Anasr, Anu, Enil, and Ea or Aoe. Dadmacius considered Moumis the son of Tiamu. But in the Babylonian text Mummu seems to have Tiamut in apposition, and the participle muallidat is in the feminine, yet on a later fragment Mummu does figure as the son of Tiamut, and Damascus’s statement seems correct. In any case they began with a double, purely material, principle Apsu and Tiamat, male and female, probably personifying the mass of salt and sweet water “mixed together in one”. Out of all these things even the gods arise, their birth is in reality the gradual differentiation of the as yet undifferentiated, undetermined, undivided, watery A.L.L. The meaning of Anasr and Kizar is plain; they are personified ideas: Above and Below. The meaning of Lahmu and Lahamu is not so clear. Popular mythology spoke of the Lahmu as monsters and demons, spirits of evil, and their progeny sides with Tiamut as the monster of Chaos; yet, on the other hand, they cannot be evil in themselves, for the good gods, Anu, Bel, and Ea, are their children. Lahmu has been supposed with at least as much right as that of the earliest Babylonian cosmogonies known to us.

Babylonian.—Two different Assyro-Babylonian cosmogonies have come down to us. The longer one is known under the name of Creation Epos or “ Enuma elish!”, the shorter with which it begins. The shorter one is commonly known as the Bilingual Account of Creation because, on the fragmentary tablet on which it is written, the Semitic Babylonian is accompanied by a Sumerian version. 

(a) The Creation Epos.—A good summary of this cosmogony has been known since the sixth century of the Christian Era, through Damascius (the Athenian neo-Platonic who emigrated to Persia when Justinian suppressed the schools of Athens), as follows: “The Babylonians, passing over in silence the one-principle of the universe, constitute two, Tauthie and Apason, making Apason the husband of Tauthie and calling her the mother of the gods. And from these proceeds an only-begetted son, Moumis, who, I consider, is nought else but the intelligible world proceeding from the two principles. From them another progeny is likewise produced, Dache and Dachos, and also a third, Kissare and Kissarelos, from which last three others proceed, Anos, and Illinos, and Aos. And to Aoe and Dauke a son is born called Belos of whom they say that he is the creator of the world [demiyur].” The Assyrian original upon which this summary is based was first discovered and published by G. Smith, in 1875, from seven fragmentary tablets in the British Museum. It has been translated by a number of scholars; and recently (London, 1903), with the addition of numerous fragments, by L. W. King of the same museum. It opens as follows:—

When on high the heavens were not uttered, 
Below the earth bore not yet a name; 
The ocean primeval was their begetter, 
Mummu Tiamtu the parent of all of them. 
The waters were mixed together in one and 
Fields not yet marked, marshes not yet seen. 

When of the gods there existed none, 
Elsewhere the name, there not yet settled 

Then came into being the gods (in order) 
Lahmu and Lahamu went forth (as the first) 

Great were the ages. 
Anasr and Kizar were produced, and over them 
Long grew the days, there appeared 
The God Anu, their son. 

The Greek copyist had evidently mistaken ΛΛΑΧΩΧ for ΔΑΧΩΧ, but otherwise the two accounts tally exactly: Apason is Apsu the Ocean; Tauthie is Tiamt, as Assyrian labalizes the nasals; Lache and Lachos are likewise Lahmu and Lahamu; Kissare, Assora, Anos, Illinos, and Aos correspond to Kissar and Anasr, Anu, Enil, and Ea or Aoe. Damascius considered Moumis the son of Tiamut. But in the Babylonian text Mummu seems to have Tiamat in apposition, and the participle muallidat is in the feminine, yet on a later fragment Mummu does figure as the son of Tiamt, and Damascius’s statement seems correct. In any case they began with a double, purely material, principle Apsu and Tiamat, male and female, probably personifying the mass of salt and sweet water “mixed together in one”. Out of all these things even the gods arise, their birth is in reality the gradual differentiation of the as yet undifferentiated, undetermined, undivided, watery A.L.L. The meaning of Anasr and Kizar is plain; they are personified ideas: Above and Below. The meaning of Lahmu and Lahamu is not so clear. Popular mythology spoke of the Lahmu as monsters and demons, spirits of evil, and their progeny sides with Tiamat as the monster of Chaos; yet, on the other hand, they cannot be evil in themselves, for the good gods, Anu, Bel, and Ea, are their children. Lahmu has been supposed with at least as much right as that of the earliest Babylonian cosmogonies known to us.
l on he built, Esagila [a counterpart of the Esagila of Eridu] was completed. He created the gods; the Anunnaki [tutelary spirits of the earth] created the glorious city together with him. The seat of their heart's joy he proclaimed on high. Marduk bound together the Anunnaki [anima] and the Anunnaki [animae]; he made dust and cast it over the foundation, that the gods might sit in a pleasant place. He made mankind. Aruru [the goddess of Sippar] made the seed of mankind with him*. Marduk then creates the animals, the plants, the city, the state, Nippur, Erech, and their temples: Lugalzaggatum is considered to be another name for Marduk. In the text it is doubtful whether the Anunnaki were created by Marduk or whether they were assistant-creators with Marduk. The latter seems preferable. The meaning of "he bound together a foundation" is doubtful, because of the uncertainty about the word ana. The ancients thought the earth to be like a section of a hollow ball floating on the great waters, convex side upwards. Marduk is here forming his rough skeleton of the earth as a raft on the waters, and he fills it up with soil or clay dust according to the text. This cosmogony is not so much the one that of the Creation Epos, because it makes Marduk sole creator without reference even to Anu or Ea. It is remarkable that man is created before animals and plants, and scholars have not failed to draw attention to a similar statement in Genesis, ii, 7–9. Furthermore, the Tigris and the Euphrates are named in this cosmogony: "He made them and set them in their place—well proclaimed he their name", which also reminds one of the mention of the rivers in the same chapter of Genesis. Some remote connexion is of course possible.

EGYPTIAN.—The fundamental ideas of Egyptian cosmogonies can be gathered from the Book of the Dead, chapter xvi, which goes back to the eleventh dynasty (c. 2560 B.C.), if not to the sixth (c. 3000 B.C.). Cosmogonic speculations in greater detail can be found in the funeral inscriptions of Seti I, in the Valley of the Dead near Thebes (c. 1400 B.C.), nor are they wanting in texts on monuments and papyri down to late in the Ptolemaic period. But according to Brugsch, Egyptian thought was but little subject to change even during the score of centuries and more during which it is known to us. In the beginning there was neither heaven nor earth. Shoreless waters, covered with thick darkness, filled the world-space. There was no light, nor are we told to say that the Egyptians said to contain the male and female gerns and the beginnings of the future world. From the very first there dwell in this watery proto-matter a divine force or proto-soul, which pervaded and penetrated its as yet not differentiated parts. This penetration was so absolute that this soul became almost identical with the matter it pervaded. The divine proto-soul then felt a desire for creative activity and this his will, personified as the god Thot, brought the universe into being; whereas the image of the universe had previously formed itself in the eyes of Thot. The word of Thot brought movement in the still watery substance of the primordial matter and purposeful. Nun now began to differentiate itself, i. e. its qualities became manifest in a cosmogonic ogdoad of deities (four pairs, male and female): Nun and Nunet, Heh and Hehet, Keke and Keket, Nenu and Nenut. Nun and Nunet represent the begetting and begettor; Heh and Hehet the abysmal dark, the Erebos; difficult ideas to grasp, perhaps active and passive infinity would be a good expression. This infinity is mostly conceived in relation to time, and is consequently equivalent to, and often described by, the Greek Aion; as infinity of force it resembles "Ep e, Keke, Keket, and the abysmal dark, the Erebos; the abstract of the Egyptians. Nenu and Nenut symbolize rest; the two other names or titles of Nenu, Goer and Hems, embody the same idea—to settle or lie down, to cease from work. Contrary to the Babylonian idea of war with the Dragon of Chaos, tranquility is, in Egypt, a principle of progress. All united, these deities of the ogdoad form the beginnings and are the fathers and mothers of all things. Pictorially, they are indicated by figures of four men and women: the men carry a frog; the women a serpent's head on their shoulders. The frog and serpent represent the first elements of animal creation; the unaccounted for appearance and disappearance of frogs in marshes seemed like a sort of spontaneous generation of animal life out of stagnant water; this serpent periodically shedding its skin was a symbol of the yearly renewal of nature. The male figures are coloured blue, to signify water the begetter of all things; the female are flesh-coloured, to signify the life produced. These cosmogonic gods then transform the invisible divine will of Thot into a visible universe, harmoniously welded together. The first act of creation is the formation of an egg, which rises upon the hands of Heh and Hehet out of the proto-matter. Out of the egg arises the god of light, Ra, the immediate cause of life in this world. Now this universe was conceived as being both the body and soul of God, as growing in, but being identical with the cosmic All. This universe, however, was formed by concurrence of nine divine things, i. e. the great Ennead of Gods: (1) Shu, the dry air of day; (2) Tafnut, the night air, pregnant with the rays of the waxing moon; (3) Keb, the god of the earth, or soil; (4) Nut, the goddess of the heavens above; (5) Osiris, the moist or fruitifying element; (6) Isis, the maternal or conceiving force of the earth; (7) Set, the god of evil and contradiction—the destructive element in nature, opposing the light, moisture, and fertility of the earth—in popular mythology, the brother-enemy of Osiris and Isis; (8) Horus, popularly conceived as the divine child of Isis and Osiris, living nature in the circle of her perpetual rejuvenescence; (9) Nephthys, the boundary spirit or horizon, the world-limit, or the strand of the endless sea.

Parallel with these quasi-scientific explanations of the universe, the popular mind attributed to its favourite divinities a share in the cosmogony. In Upper Egypt the egg-productive energy gave first rise to a divinity, Chnum, the potter who shapes the eggs on his wheel; in Lower Egypt, Ptaah, the artificer, becomes the creator of the egg. Sometimes, however, a third bird is said to enter the scene, and the egg-cell is supposed no longer to be the cosmic functions of the eggs are attributed to the lotus-bud. In one of the inscriptions of Denderah, Pharao hands a lotus-flower to the solar deity, saying: "I hand thee the flower which arose in the beginning, the glorious lily on the great sea. Thou camest forth in the city of C.umbute of its leaves, and thou didst give light to the earth till then wrapped in darkness". On the other hand, Ra is not merely the enlightener, but the personal creator of the world, the Lord, infinite in his being, the Master Everlasting, who was before all things; none is like unto him. He sustained the heavens, and deigned to dwell in the midst of them; he laid the foundations of the earth, that it might sustain his form; he created the deep, that he might be hidden in the lower spheres, he, the noble youth, came forth out of Nun. This personification of the spirits of light in the sun-god Ra could evoke real sublimity of thought and expression, so much so that for a little while the god Ra developed in monotheism under Amenophis III and IV. On the other hand the amplitude of divine titles of each local deity plays havoc with cosmogonic consistency, thus Ptaah in Memphis is ruler of infinity (Heh) and Lord of eternity (Te); Min Anam, Lord of Infinity, hastening for the Day, Hathor, the Mother of the Gods; and Creatrix of Eternity; Hathor and Horus are mother and father to Horsamutui, a phase of Ra the sun-god, and similar fancies.
IRANIAN.—In considering these cosmogonies we must distinguish a threefold phase of development: (a) The ancient Iranian phase, as given in the Avesta, the Yasna, and the Vendidad. Without entering into the much-disputed question of the date of the Avesta, it may be safely stated that these oldest cosmogonies go back to about 1000 B.C. (b) The later Iranian or early Persian phase, as contained in orthodox Pahlavi literature, the Bundahiš and the Mainuchier. (c) Heterodox Iranian opinions amongst schismatical sects, as the Sasanian, Manichaean, and other. We shall find the dualism, which is the great characteristic of Iranian thought, showing a gradual tendency towards monism, and its primitive simplicity transformed into fanciful intricacy without, however, altogether losing the loftiness of its first ideas.

Although the Pahlavi expositions of the views of the ancient Iranians on the origin of the universe, yet scattered passages in the Avesta leave no doubt that at the beginning of all things they postulated a twofold principle: good and evil. At the head indeed of all creation stands Ahura Mazda, a purely spiritual being who is distinguished in the Gathas a distinct dualism of origin is taught. At the end of Yasna, xxviii, Zarathustra asks: "Do thou, Ahura Mazda, teach me from thyself, that I may of thine own volition and my own will create things," and in Yasna, xxx, comes the answer: "Thus are the primeval spirits, who as a pair—yet each independent in his action—have been named of old. They are the two spiritual principles: the better thing and a worse thing as to thought, word, and deed. When the two spirits came together at the first to make the world of non-life, and to determine how the world at last should be made, then there was for the wicked the worst lot and for the holy the best state of mind. He who was the evil one chose the evil, but the bountiful spirit chose righteousness." Ahura Mazda, or, as the name later became abbreviated, Ormuzd, the Wise Lord, is the good spirit or Spento Mainyu; the Evil One is Ahrō Mainyu, the destroying spirit later known as Ahriman. The absolute dualism of the above passage is unmistakable: in the beginning was Good and Evil; the good became as it were incarnate in the words of Ormuzd in Ahriman; and the evil, however, does not actually occur in this Yasna. This dualism gradually softened as centuries went on, and Ormuzd was repeatedly and emphatically designated as the Creator. Thus Yasna, i, 1 (which is of considerably later date than Yasna, xxx): "I confess and proclaim, Ahura Mazda, the fully luminous, the radiant, the glorious, who sends his joy-creating grace afar, who made us and who fashioned us, who has nourished us and protected us, who is the Spento Mainyu." But whenever Ormuzd, the source of all good, produces what is good, the Evil One produces its opposite, therewith to destroy Ormuzd's creation. Ahriman, therefore, formed as a counter-creator, as an evil spirit, by a secondary creator. This is thus expressed in Fargardi of the Vendidad: "The first of good lands which I, Ahura Mazda, created was Iran-Veg, thereupon came Anro Mainyu, who is all death, and he counter-created the serpent in the river, and the winter, the work of demons. The second of good lands which I created was the plain of Sogdiana. Thereupon came Ahrō Mainyu, who is all death, and he counter-created the locust, bringing death unto cattle and plants." No less than sixteen such creations and counter-creations are thus enumerated: Ahriman counter-creates plunders, sin, ants and ant-hills, unbelief, tears and wailing, idols and impurity, burial of the dead, the cooking of corpses, abnormal issues, excessive heat, and bitter cold. From this enumeration of Ahriman's work one gathers that he and his good adversary were originally personified principles, and this personification led to their being accounted real spiritual beings. Sometimes this personification was so materialized as to lead to the assumption of a body to Ormuzd, but this was of some other substance invisible, and the above-mentioned instances, besides these two world-creators we meet in the Avesta four elementary beings, or rather attributes of Ormuzd, called Thwasha or Infinite Space, Zrvan Akaranu or Endless Time, Anagha raacau and Temao or Beginningless Light and Darkness. These personified abstractions—Spenta Mainyu, Sun, Light, and the co-equal with Ormuzd and Ahriman; they do not create, but they constitute the receptacle, the source, and the twofold material of creation.

Later Parthian speculations on the origin of the universe are found in the Bundahiš, a Pahlavi commentary on the Avesta, which may date from the Sassanids, but in its present form cannot be earlier than the seventh century of the Christian Era. Ormuzd is here described as in endless light and all-wise; but Ahriman in endless darkness and lacking in knowledge. Light and darkness seem to have been identified with Ormuzd and Ahriman at an early period, according to Polycarpus and Phutaran. Ormuzd and Ahriman both produced their own creatures, which remain apart in a spiritual or ideal state for 3000 years; for Ahriman is unaware of the existence of Ormuzd and his good creation. After this begins Ahriman's opposition to the work of Ormuzd, with the understanding, however, that the created world is not more than 9000 years old, and that only the middle 3000 years were to see Ahriman successful. By pronouncing a mysterious spell Ormuzd throws Ahriman into a state of confusion for a second 3000 years. Meanwhile, Ormuzd creates the archangels and the material universe with sun, moon, and stars; Ahriman creates darkness, devils, or evil spirits, and, helped by them, he throws himself upon the good creation to destroy it. The six divisions of creation—the sky, water, earth, plants, and animals, and men—suffer the attacks of the dævas. The primeval ox, symbolizing the later animal world, is slain, and so is Payomad, representing humanity.

Yet, though Gayomard dies, his offspring lives. After many purifications by archangels, the Rivas plant, gotten of him, grows up. This plant contains both man and woman; when their bodies have sufficiently developed they receive the breath spiritually into them, and the body is formed. Thus, the soul is created before and after the body, for he who was created". And Ahura Mazda said to them, "You are man, you are the ancestory of the world". A story is told of the first pair, whether Mashya and Mashyana or, as elsewhere given, Yima and his wife, similar to that of Adam's sin in paradise; a like similitude can also be found in Ahura Mazda creating the world in six stages, but there is nothing to show that the Bible is the borrower, in fact the contrary is most probable. In the Mainuchier a further stage in Persian cosmogonies is reached. There the light is distinctly named as the essence of the universe. Ormuzd, created and zeus, or endless time, is no longer considered an attribute of Ormuzd, but is an independent fundamental being, which pronounces its blessing and joy over the creation which Ormuzd produces. So chapter viii: "The creator Ahravan produced these creatures and creation, the archangels and the spirit of wisdom from that which is his own splendour and with the blessing of endless time. For this reason unlimited time is undecaying and immortal, painless and hungerless, thirstless and undisturbed; for ever and ever no one will be able to overpower it or to make it not all-over-ruling in his own affairs. And Ahravan, the wicked, counter-created the dævas [demons and devils] and the rest of the things of corruption." He made a treaty with Ormuzd for 9000 years during which things must remain as they are. But after 9000 years Ahriman will be utterly impotent.
Srosh, the angel of obedience, will smite Aeshun, the attacking demon. Mitra, the angel of sunlight, and Zrvan Akarana, Time-without-end, and the angel of justification, will be the creators. Since the creation of Aeshun, Ahura Mazda will become again undisturbed as in the beginning. Cosmology perhaps, rather than cosmogony, is contained in chapter xlv: "Sky, and earth, and water, and what is therein are like the egg of a bird. By Ahura Mazda, the creator, the sky is arranged above, the earth below, and the sea within it; the earth in the midst of the sky is just like the yolk within the egg; the water within the earth and sky is such as the white of the egg." This, of course, must not be understood as a sort of early evolution theory; it merely indicates the shape of the universe as conceived by the Persians.

Iranian dualism then was never quite consistent, not even in the Avesta. In the Mainoichir it makes indeed an attempt at monism in personifying Zrvan, out of which creation comes, and by which creation is blessed, but the inconsistencies of the system finally brought forth a number of unorthodox sects. Each of these sects solved the problem of unity versus plurality in its own way. Some, as the Gayaomarti, those indicated in Firdosi’s book of kings, and the author of the Vajkart, practically believed in an eternal almighty creator of heaven and earth, much in the same sense as Christians do. Ahriman, at first a primeval being of Ormuzd (the Parsee equivalent for Satan); others reached a sort of monism by making either Thwasa (Space) or Zrvan (Time) the origin of all things, even of Ormuzd and Ahriman. That Thwasa was once the head of the Iranian pantheon is perhaps indicated by so early a witness as Herodotus (I, xxxv) and much later by Damascius. Zrvan, as the source of all things amongst the Persians, is attested by many of the Fathers (Theod. Mops., Moses of Chorene), by Eznik and Elia- seus. At this period the origin of all things was conceived in various fantastical ways. According to some (Rivajete, Cod. XII.), Time created Water and Fire and when these came together Ormuzd arose. According to others, Time for 1000 years yearned to bring forth a son and offered sacrifice for that purpose, but then doubted; Ormuzd was conceived as fruit of the sacrifice, Ahriman as fruit of the doubt—and similar fancies which strongly suggest Indian influence. It is more likely that Ormuzd, throughout the foremost and immediate creator of the cosmos or world as it now is, and as far as it is good. It is remarkable also that Iranian cosmogonies are not devoid of a noble ethical strain, however much they may have changed during the course of ages.

Indian—These cosmogonies are so manifold and so bewildering in their fantastic variety that only the oldest and most purely Indian can be referred to, and the main outlines indicated. As ethical dualism is the characteristic of Iranian thought, so is idealistic pantheism of the thought of India. In Indian cosmogonies more than elsewhere we have to distinguish between philosophic speculation and popular religion, which each in its way influenced their conception of the origin of the world. The oldest cosmogonies must naturally be sought in the Rig-Veda. The age of these sacred books is largely a matter of controversy, but their origin can be roughly assigned to a date earlier than 1000 B.C. Among the 1028 hymns of the Rig-Veda none is so famous as cxxix of Book X, of which a translation was given by Max Müller forty years ago. This translation, though metrical, is remarkably literal and contains the best exposition of ancient Indian thought on this subject. It runs as follows:

Nor Aught nor Naught existed; yon bright sky
Was not, nor heaven’s broad woof outstretched above.
What covered all? what sheltered? what concealed?
Was it the water’s fathomless abyss?

There was no death—but yet there was naught immortal.
There was no conflagration day and night;
The Only One breathed breathless by itself,
Other than it there was no creation.

Darkness there was, and all at first was veiled
In gloom profound—an ocean without light—
The Germ that still lay covered in the husk
Burst forth, one nature, from the fervent heat.
Then first came Love upon it, the new Spring
Of mind—yea, possessor, and the seed of good
Pondering, this bond between created things
And uncreated. Comes this spark from the earth
Piercing and all pervading, or from heaven?
Then seeds were sown and mighty powers arose—
Nature below and Power and Will above.
Who knows the secret? Where is it here?
Whence, whence this manifold creation sprung?
The gods themselves came later into being—
Who knows from whence this great creation sprung?
He from whom all this great creation came,
Whether his will created or was mute,
The Most-High Seer that is in highest heaven,
He knows it—or perchance even He knows not.

If, however, we divest this and similar Indian effusions (Rig-V., X, exc, lixii) of their poetical garb and set aside the agnostic touch in the last line, their cosmogony is philosophically conceived as follows: The universe proceeds by evolution. This evolution is introduced by Tapas, i.e. the intense heat of the absolutely indefinite That), this unites in itself all spiritual and material elements of the world. Tad is an idea obtained only by absolute abstraction, for it possesses only one quality, viz. that of vitality. From Tad the universe proceeds by evolution. This evolution is introduced by Tapas, i.e. the intense heat of the absolutely indefinite That), this unites in itself all spiritual and material elements of the world. Tad is an idea obtained only by absolute abstraction, for it possesses only one quality, viz. that of vitality. From Tad the universe proceeds by evolution. Another development, or rather another nomenclature for the same cosmogonic principles, makes Brah- ma the source of all things. Brahma is Tad, or the impersonal, unconscious All-Soul. This word Bramha, from meaning originally sacred sacrificial food, came to be used for the Supreme Being out of which the universe comes and unto which it returns. In later days Atman, or Highest Self, becomes the starting point in Indian cosmogonies.

A curious feature, especially in later cosmogonic ideas, is the power of sacrifice, to which even the evolution of the universe is due; in fact sacrificial food is the prototypical out of which the world was created. This is brought out in one of the latest hymns of the Rig-Veda (Book X, xec, the so-called song of Purusha) and often in the Upanishads. Purusha is one more designation of the Supreme Being. On his spiritual side he is often identified with Brahma and Atman, on his material side he is the proto-matter out of which the world is made. Out of Purusha’s mouth proceed Indra and Agni. Indra in popular religion becomes the world-creator, as also Varuna the king. Some references to King Varuna are of singular sublimity (Atharva-Veda, IV, xvi). If two persons sit together and scheme, King Varuna is there as a third and knows it. Both this earth here belongs to King Varuna and also yonder broad sky, whose boundaries are far away. The oceans are the loins of Varuna, yet he is hidden in a small drop of water. He that should flee beyond the heavens would not be free from King Varuna. King Varuna sees through all that is between heaven and earth and all that is beyond. He has counted the winkings of man’s eyes; the world is in his hands as the dice in the hands of a player. In the mind of the people the impersonal abstractions of pantheism became individualised and conceived as an intensely personal creator. On the other hand the most grotesque, and often coarsely conceptions arose, and became the physical processes of the world’s production. As intermediary beings or stages were mentioned seed, or an egg, or a tree, or the lotus-bud; different animals, such as a boar, a fish, a turtle; or sexual intercourse. The most common theory is that of the egg (Chand. br., V, xix). This all was in the beginning non-existent, only Tad existed; Tad became transformed, it became an egg, this lay there for a year; then it divided itself in two, the two halves of the shell were silver and gold. The Gold is the Heaven, the Silver the Earth, and what was born is the Sun. Non infrequent are the incarnations in animals. By Brahmans in it, the personification of the creative power of Brahma, or Prajapati, or Vishnu, became incarnate in a boar or a turtle; and similar fancies. In the Atharva-Veda, especially XIX, 53, 54, another fundamental cosmogonic being or personification enters, which is unknown to earlier Indian speculations, viz. Tani. It occupied the place there in the Rig-Veda, but in Ath.-Ved., xiv, Kala has risen to the first place of all, and even Brahma and Tapas proceed from it. This rise in Kala’s dignity was prepared already in the Upanis- shads (Mātrī-Up., VI, xiv), where Kala and Akāla, time and not-time, are two forms of Brahma, after he has appeared world or rather the sun as the first thing in the universe.

Phoenician.—Almost all we know of Phoenician cosmogonies is derived from a late source, Philo Byblius (born A.D. 42), transmitted to us by Eusebius in his “Praeparatio Evangelica”. Philo, however, only claimed to have translated a late copy of an ancient Phoenician author called Sanchoniathon. This statement, though believed by Eusebius and by Porphyry before him (De abst. II, 56) is rejected as a literary fraud by many modern, especially German, scholars. Philo is supposed to have pretended to use an ex- tremely ancient source only to substantiate his theory that all mythology was devised ancient history. The great controversy that has raged round the name of Sanchoniathon cannot here be gone into, but in reading this cosmogony it must throughout be borne in mind that, instead of being the exposition of very early Canaanite ideas, it may possibly be a manipulated account of that cosmopolitan mixture of ideas which was current in Syria about A.D. 100. The beginning of all things, according to this account, was air moved by a breath of wind and dark chasm black as Erebus. This windy chaos was eternal, infinite. But when this breath yearned over its own elements, and confusion began, this was called Dakos. Dakos was the origin of all creation, and, though it knew not its own creation, out of its self-embrace arose Mot a slimy or watery substance, out of which all created germs were produced. Animal life without sensation came first; out of this came beings endowed with intelligence who were called Zophebus (‘one who hears the voices of heaven’). Mot had a shape like that of an egg out of which came forth sun, moon, and stars. The air being thus illuminated, owing to the glow of the sea and land, winds were formed, and clouds and a vast downpour of the heavenly waters took place. By the heat of the sun things were made to split off from one another and, being projected on high, clashed with one another, caused thunder and lightning, and thus arose the above-mentioned intelligent beings, who took fright and began to stir on the earth and in the sea as males and females. Not unlike this is the cos- mogony given by Damascius on the authority of Eude- mos. Before all things was Time, then Desire, then Darkness. Out of the union of Desire and Darkness were born Air (maso.) and Breath (fe.), Air representing pure thought, and Breath the prototype of life proceeding therefrom by motion. Out of Air and Breath came forth the cosmic egg. According to the manner given by the same Damascius, Oudomos, Ether and Air generated Oudomos (world-time, seculum), Chousoros (artificer, creative energy), and the cosmic egg; and Damascius expressly states that, according to the Phoenicians, world-time is the first principle containing all in itself. The origin of mankind is described as the birth of Eos and Protogone from the wind Copia and the woman Beau, (said to mean “night”). The name Bao strongly suggests בְּאוּ of Genesis; for Copia several derivations have been suggested: בָּאוּ לָךְ “voice of the wind”; בְּאֹ לָךְ, “the sound of the voice of Jahve” or σαραίας, “turgid”; or בָּאוּ לָךְ, “wind from every side”. But these derivations are perhaps more ingenious than probable.

Greek.—The cosmogonies are far too numerous and divergent to allow of a simple description embracing all. Only some prominent cosmogonies can be indicated, and some of the points common to all. Homer seems to have taken the universe as he found it without change. He never continues the story further, but simply narrates the world that the Oceanus is origin, and Thetys mother of all; from verse 244 that Nê (Night) has power even over Oceanus; hence Darkness, Water, and Mother- hood seem the three stages of his cosmogony. The fragments of Orphic cosmogonies given by Eudemos, Plato, and Lycurgus, do not agree. The most that can be said of Oceanus, and Theia, and the other elementary beings, and the first of them in order of existence was probably Night. A more detailed cosmogony of great antiqu-
Cosmology

Cosmology

Cosmology is to be found in Hesiod’s “Theogony” (about 800 B.C.) in verses 160 sqq., which C. A. Elton translated as follows:

First Chaos was; next ample-bosomed Earth,
The seat immovable for evermore
Of those Immortals who the snow-topped heights
Inhabit of Olympus, or the gloom
Of Tartarus, in the broad-tracked ground’s abyss.

Love then arose, most beautiful amongst
The deathless deities; resistless, he
Of every mortal man, and of every mortal man
Undrews the limbs; dissolved the wiser breast
By reason steeld and quells the very soul.

From Chaos, Erebos and ebon Night;
From Night the Day sprang forth and shining air
Whom to the love of Erebos she gave.

Earth first produced the heaven and all the stars,
She brought forth the mountains forth,
And next the sea... Then, with Heaven
Consorting, Ocean from her bosom burst
With its deep eddying waters.

Chaos, then, is the starting-point of Hesiod’s cosmogony. Chaos, however, must probably not be understood as “primeval matter” without harmony and order, but rather as the “empty void” or “place in the abstract.” To Hesiod, χαos cannot have lost its original meaning. Thus, it is not difficult to see how the term could be translated as “chaos,” “hull,” “void,” etc. Hesiod, then, starts at infinite space; other Greeks take Time, or χρόνος, as a starting-point. The cosmogony of Pherecydes (544 n. c.) claims a high place among Greek theories as to the origin of the world, because of the prominence given to Zeus, a personal spiritual being, as the origin of all things. “Zeus and Chronos and Chthonia have always been and are the three first beginnings; but the One I would consider before the Two, and the Two after the One. Then Chronos produced out of himself fire, air, and water, these I take to be the three Logical Elements, and out of them arose a numerous progeny of gods divided into five parts or a pentecosmos.” Pherecydes’ cosmogony has come down to us in some other slightly modified forms but Zeus is ever at the head. He seems also to have known of a primeval battle between Chronos and Ophionoeus, but how it fits in with his cosmogony we know not. Chthonia seems to be the moist Protomata, earth not Ge, but the earth, is created. The stages of his cosmogony are therefore: God, Time, Matter—all three first principles, yet God is in some sense first; God, when feeling a desire to create, changes himself into love, so that he may bring forth a Cosmos, i.e. a well-ordered world, out of contraries, bringing his elements into agreement and friendship. A noble idea, truly, only falling short of the Christian idea in conceiving time and matter as eternal, Zeus thus being maker or fashioner, not creator, of heaven and earth.

A cosmogony of almost the same date is that of Empedocles, which seems in flat contradiction to that of Pherecydes: for it postulates two first principles, not originating from Unity: Air and Night. Out of these arise Tartarus etc. Later Orphic cosmogonies begin some with Chronos, others with Water and Earth, some with Λήθη. In the last stage of the Greek cosmogony the egg plays an important part, either as evolutionary stage, as embryonic state of the earth, or merely to indicate the shape of the Cosmos.

We possess no ancient Etruscan or Latin cosmogonies, but it is certain that the God Janus was a cosmogonic deity; though Jupiter was summus, the highest god, Janus was primus, the first of the gods, and as such is sacrificed even here the belief in the individuality of life in nature was the guiding principle, the world was produced as life comes from life by animal generations, or as the tree comes out of the seed, the flower out of the bud, or as the egg is laid by the bird. These imaginations are often combined in a grotesque ensemble,
against the complexity of which appear in greater relief the majesty and simplicity of the words: In the beginning God created the heavens and the earth.

AOSMOGONY — Of the Modern Races.—Amongst the modern myths of the world, the origin of the Norse and the American cosmogonies call for comment.

The Norse cosmogonies are the only remnant of ancient Germanic ideas on this subject, for the so-called "Prayer of Wessobrunn", a fragment ascribed to the eighth or ninth century, is too short to give us any information beyond the belief in the existence of one almighty god, and with him a multitude of divine spirits, before the world was. It is, moreover, uncertain whether the Wessobrunner fragment represents pure Germanic thought uninfluenced by Christianity. The Norse cosmogonies are contained in the Edda; the more ancient ones in the Voluspa of the Poetic Edda, the younger one in the Ynglinga Saga, of the Prose Edda. It is sometimes said that these cosmogonies so clearly betray the influence of the Arctic climate that they can in no sense belong to the Southern Germans. This, however, is hardly convincing, as it is unknown where precisely the Germans lived previously to their immigration into Europe, and what was the climate of Northern Europe and Asia when these Sagas first grew up. In the third verse of "The Sibyl's Song", of Voluspa, the cosmogony begins:—

There was a time when only Ymir was, Nor sand, nor sea, nor briny waves, Nay earth existed not, nor heaven above. A yawning space without a spot of green Unto the vaults were raised all, By Buri's Sons creating noble Midgard. Then shone the Southern Sun on stony mountains, And from the very soil the herbs were sprouting. And yet the Southern Sun, the helmsman of the Moon, Bridled heaven's steeds with her right hand, For it was unknown as yet where she should dwell, Nor knew the moon the power he possessed, The Stars were ignorant of their abode. Then went the Powers all to sit in judgment The all-holy gods held thereupon their council, To Night and to the waning moon gave names. They gave to Morn and Noon their calling To Evening and Eve, whereby to reckon years.

The Sibyl further chante how the Aesir met on Ida's plain at a great steed and temperance feast and forged their tools. The creation of dwarfs is then related in detail, and finally the creation of man. Three Aesir, great and kind, went to the world and found in utter weakness Ask and Embla, the first human pair. "Spirit they possessed, but sense had none; No blood, not strength to move, nor goodly colour. Life gave Odin, Sense gave Hoein, Blood gave Lodur and goodly colour." This cosmogony is explained, enlarged, and slightly modified in the Ynglinga Saga, or Yggdrasil's deception. The lengthy account can be summed up as follows:—

There are three stages of development: (a) the rise of vital beings in times primeval, Muspelheim, or the southern realm of Light, Niflheim or the northern realm of Darkness, and between them the Ginnungga Gap, or yawning cleft. Muspelheim existed first, and Niflheim is secondary in the order of being, but how either arose the cosmogony does not explain. In the northern realm there existed a well, called Hvergelmir, from which proceeded twelve torrents, called together Elivagar, or Ice-stream. This stream flowing into the Ginnungga Gap formed the cosmogonic being Ymir. At first this was a lifeless mass, but this mass develops under the influence of Audhumla, represented as a cow licking the ice, being a figure for the Thawing Warmth. (b) Out of Ymir the Frost Giants, or Hrithmuros, arise, and the fundamental gods; out of Audhumla arise Odin, Vili, and Ve; or Odin, Vili, and Ve are the sons of Bör, who

married Bestla, daughter of the Frost Giant Bósthorn. (c) Odin, Vili, and Ve slay the monster Ymir, throw his body into the Ginnungga Gap, and out of his limbs create the visible universe, or Midgard, cover his skull the vault of heaven, and out of his blood create the clouds, out of his blood the seas, and so on. Then they build the Burg of the Gods, Asgard; they order the course of the stars and create the Dwarf. Lastly, the first man and woman are created, Ask and Embla, whom Odin found as weak and miserable beings on the seashore. These Norse cosmogonies involve the most ancient cosmogonies in this: that they do not really go back to the beginning of all things, but presuppose the existence of a twofold world—one South the other North—and only account for the formation of this present world in the space between both. They agree with most other cosmogonies in another world the actual formation of this Cosmos to one (Odin) or more (Odin, with Vili and Ve as destroyers of Chaos) intelligent personal beings or gods.

American Cosmogonies have been preserved in fair number. The early missionaries to America, especially those to Mexico, Central America, and South America, were strongly impressed with the monotheistic character of Indian speculations, ascribing this world and its phenomena to the influence of one omnipresent spiritual being, called in one place the "Great Spirit", in another place Viracocha, in another Hunab-ku, elsewhere Quetzalcoatl, etc. Yet, concurrently with these ideas there is little or no philosophical speculation. American cosmogonies only existed a number of apparent puerile traditions concerning the beginning of things. But again these childish fancies were but the clothing of general cosmogonic ideas. According to the Ottawas and other northern Algonquins, a raft was floating on the shoreless waters. Upon this raft were a number of animals with Michabo, the Giant Rabbit, as their chief. As they were without land to live on, Michabo, the Giant Rabbit, made first the beaver and then the otter, that they should dive and bring up a piece of mud. As they failed, Wajashk, the female muskrat, at her own request is allowed to dive. When she had remained below for a day and a night, she floated to the surface as dead, but they found in one of her paws a little clog of mud. Michabo, endowed with creative power, kneads this little bit of soil till he makes it grow into an island, a mountain, a country, nay into this world in which we live. And now the beaver makes his stream and transfixes them with other arrows, thus creating trees with stems and branches. Some say he created man from the dead bodies of certain animals, others that he married the muskrat and thus begat the ancestors of the human race. It has been suggested that in the name "Michabo" there lies another word, viz. "Mich-Waban", the great Dawn, or the great East. The word "Wajashk", likewise, probably contains the word "Ajishki", or mud. The story then would mean: When the great light in the east shone upon the primeval waters, dry land in ever-increasing extent appeared above the surface, and the rays of the sun, penetrating the soil brought forth the action of the light on the slime brought forth man.

Closely similar to this cosmogony is that of the Iroquois. In the beginning the heavens were peopled with celestial beings, and the wide ocean below with monsters of the deep. Then Atesen, a divine being, fell through a rift in the sky into the primeval waters. The turtle offered her his back as resting place. Then some animal brought her a little clay, out of which she produced the dry land. Ataesenc gave birth to a daughter, who, though a virgin, gave birth to twins, Tawiscara and Joskeha. This daughter having died in childbirth, her body, being buried, imparts fertility to the soil. A mortal battle is waged between the two brothers Joskeha, the good, and Tawiscara, the evil one. The latter is overcome, flies to the West, and becomes the god of the dead. Joskeha creates first
Cosmography — See Geography.

Cosmology.—From its Greek etymology ("kosmos world; Nòròs, knowledge or science) the word cosmology means the science of the world. It ought, therefore, to include in its scope the study of the whole material universe: that is to say, of inorganic substances, of plants, of animals, and of man himself. But, as a matter of fact, the wide range indicated by the etymology of the word has been narrowed in the actual meaning. In our day cosmology is a branch of philosophical study, and therefore excludes from its investigation whatever forms the object of the natural sciences. While the sciences of physics and biology seek the proximate causes of corporal phenomena, the laws that govern them, and the wonderful harmony resulting therefrom, cosmology aims to discover the deeper and remote causes which neither observation nor experiment immediately reveals. This special purpose restricts in many ways the field of cosmology. There is another limitation not less important. Man’s unique position in the universe makes him the object of a special philosophical study, viz. psychology, or anthropology; and, in consequence, that portion of the material universe in which the sciences deal has been cut off from the domain of cosmology properly so called.

There is a tendency at present to restrict the field still further; and limit it to what is known as inorganic creation. Psychology being by its very definition the study of human life considered in its first principle and in the totality of its phenomena, its investigations ought to comprise, it would seem, the threefold life of man, vegetative, animal, and rational. And, indeed, the inter-dependence of these three lives in the one living human being appears to justify the enumeration demanded by many authorities of note for the psychological field. Hence for those who accept this view, cosmology has nothing to do with organic life but is reduced to “a philosophical study of the inorganic world”. Such, in our opinion, is the best definition that can be given. At the same time it should be remarked that many philosophers still favour a broader definition, which would include not only the mineral kingdom but also living things considered in a general way. In German-speaking countries cosmology, as a rule, is known as Naturphilosophie, i. e. philosophy of nature.

The word cosmology is derived from the name, philosophers usually understand a study of the universe along the lines of one of the foregoing definitions. Scientists, on the other hand, give a more scientific turn to this philosophy of nature, transforming it into a sort of general physics with an occasional excursion into the realm of sensitive and inorganic life. A notable instance is the work of Prof. Ostwald, ‘Vorlesungen über Naturphilosophie’ (Leipzig, 1902).

Origin of Cosmology.—The word itself is of recent origin. It was first used by Wolff when, in 1730, he entitled one of his works “Cosmologia Generalis” (Frankfort and Leipzig). In this treatise the author studies the cosmology of ancient peoples, especially those that exist among things in nature, the contingency of the universe, the harmony of nature, the necessity of
postulating a God to explain the origin of the cosmos and its manifestation of purpose. Because of the advance the natural sciences were then making, Wolff omitted from his philosophic study of nature the purely physical portion which till then had been closely allied with it. The cosmology of the ancients and especially of Aristotle was simply a branch of physics. The "Physics" of Aristotle treats of corporeal beings in as far as they are subject to motion. The work is divided into two parts: (1) General physics, which embraces the general principles governing corporeal motion in general, which includes various kinds; the origin of substantial compounds; changes in quality; changes in quantity by increase and decrease; and changes arising from motion in place, on which Aristotle hinges our notions of the infinite, of time, and of space. (2) Special physics which deals with the various classes of beings: terrestrial bodies, celestial bodies, and man. It is the first part of this work that comes nearest to what we mean by cosmology. The Schoolmen of the Middle Ages, as a rule, follow the path marked out for them by Aristotle. Cosmological subjects, properly so called, have no reserved place in philosophic study, and are generally treated in the "Physics." In our own time, philosophers employ the words "cosmology" and "philosophy of nature" to designate the philosophic study of the corporeal world.

Metaphysic.—Cosmology is the natural complement of the special sciences. It begins where they leave off, and its domain is quite distinct from theirs. The scientist determines the immediate cause of the phenomenon observed in the mineral or the organic world: he formulates their laws, and builds these into a synthesis with the help of certain general theories, such as those of light, of heat, and of electricity. The cosmologist, on the other hand, seeks the ultimate causes, not of this or that class of beings or of phenomena, but of the whole material universe. He inquires into the constituent nature of corporeal beings, their destiny, and their first cause. It is clear that these larger problems are quite beyond the range and purpose of the various sciences, each of which is by its method confined to its own particular subject. Nevertheless, cosmology must borrow, and borrow largely, from the data of science, since the causes which it studies are not directly perceptible; they can be known only through phenomena which are their more or less faithful manifestations. It treats, in fact, of the nature and essential properties of the universe and of the relations of its various parts, and this is true of the different parts of the universe as so many purely material phenomena arising from one necessary and eternal substance. Lastly, according to the supporters of the Immanent Emanation theory, the Divine Being develops within itself so that it is continually identifying itself with the beings it evolves, or that come forth from it, just as the grub maintains its substantial identity throughout its transformation into chrysalis and butterfly. It is clear that such a theory hardly differs from Pantheism.

In the Transcendent Emanation theory all beings issue from the Divine Substance much in the same way as new fruits appear on the parent tree without impairing its substance, and without losing its productive power. (c) Creationism is the view held by the generality of spiritualist philosophers. The universe through its endless transformations reveals its contingency: that is to say, its existence is not a necessity: therefore it must have received its existence from some other cause. This, however, is a necessary and independent one, unless we admit an infinite series of dependent causes and so leave unsolved the problem of the world’s existence. God has, therefore, drawn all things from nothingness by the free act of His Almighty Will; in a word, He has made them out of nothing, since an act cannot be a necessity, e.g., Emanationism, which implies a real intrinsic change in God, is incompatible with the immutability, necessity, and absolute perfection of the Divine Being.

DIVISION OF COSMOLOGY.—Cosmology, as most
The constituent causes of the world.—The composition of corporeal beings is also the subject of much discussion. There are actually four systems of note, each promising to solve this delicate problem: Mechanism; Hylomorphism (the Scholastic system); Dynamism, and Dynamicism.

The characteristic tendency of Mechanism, i.e. of the mechanical theory, is to disregard all qualitative differences in natural phenomena and to emphasize their quantitative differences. That is to say, in this system the constituent matter of all corporeal beings is everywhere the same and immutable; all the forces animating it are of the same nature; they are simply modes of local motion. Furthermore, there is no internal principle of finality; in the world everything is determined by mechanical laws. To explain all cosmic phenomena, nothing is needed but mass and motion; so that all the differences observable between corporeal beings are merely differences in the amount of matter and motion. Mechanism appeals especially to the law of the correlation of forces in nature and of the mechanical equivalent of heat. Heat, we know, does work; but it consumes itself in proportion to its own activity. In like manner, the quantity of any physical process may be substituted for another, but the quantity of the new force will always be equivalent to the quantity of the force that has disappeared. Having in this way identified mechanical force with motion, the holders of this theory felt authorized to unify all forces and reduce them to local motion; and it was then an easy step to consider substance as homogeneous since its only use is to serve as a background for phenomena. Other arguments are drawn from chemistry, especially from the facts of isomerism, polymerism, and allotropism.

The mechanical theory is of ancient origin. Amongst its earliest partisans were Thales, Anaximander, and Heracleitus, whose chief concern was to prove the derivation of the world from one simple primitive substance. Empedocles, however, held out for four elements—air, earth, water, fire. But Democritus, and later Epicurus, suppressed this distinction between the elements, proclaimed the essential homogeneity of matter, and referred the variety of natural phenomena to differences of motion. After the time of Epicurus (270 B.C.), this system disappeared. The Scholastic school of later centuries. Restored by Descartes, it soon won the favour of most scientists, and it is still dominant in scientific research. The Cartesian philosophy was a restatement of the two basic principles of the old theory, the homogeneity of nature and the reduction of all forces to terms of motion; but it got new vigour by contact with the natural sciences, especially physics and chemistry; hence the name Atomism (q. v.) by which it is usually known. It should, however, be noted that there are two Atomisms, the one purely chemical, the other philosophical. According to the former, all simple substances are composed of atoms; but since no chemical force known to us can divide them, but which have all the properties of visible bodies. Atoms form groups of two or four or sometimes more; these small tenacious groups, known as chemical molecules coalesce in physical molecules, and from these are built up the material bodies we see around us. The material body thus results from a progressive aggregation of molecules, and the very smallest portion of it that is endowed with the properties of the compound contains many atoms of various species, since by definition the compound results from the union of numerous elements. On this atomic theory, the universe, a vast and complicated system, was grafted during the last century that Philosophical Atomism which, while assigning to all atoms the same nature, differentiates them only by varying amounts of mass and motion.

Another explanation of the material world is offered by Dynamism. If Mechanism attributes extension to matter and complete passivity to corporeal substances, Dynamism sees in the universe only a perpetual and extended, yet essentially active. There is nothing strange in the antithesis of these two systems. The Dynamism of Leibniz—it was he who propounded it—was but a reaction against the Mechanism of Descartes. To these two matrix-ideas of unextended, active forces, Leibniz added the idea of actio in distans. They soon found out that points without extension can touch only by completely merging the one with the other, and on their own hypothesis the points in contact would amount to nothing more than a mathematical point which could never give us even the illusion of apparent extension. To avoid this pitfall, the Dynamists betheught them of considering all bodies as aggregates of force unextended indeed but separated by intervals from one another. Conceived by Leibniz, who held the monads to be dowered with an inmanent activity, this system has been amended and modernized by Father Boevois, Kant, Father Hume, and Father Leroy. On the whole it has found few supporters; scientists as a rule prefer the mechanical view. It would seem, however, that a reaction towards it has set in since the discovery of the radioactivity of matter. The property manifested by a considerable number of bodies of emitting at ordinary temperatures a seemingly inexhaustible quantity of electric rays suggests the idea that matter is a focus of energy which tends to diffuse itself in space. But in point of fact there are only two arguments in favour of Dynamism. One is drawn from the difficulties of grasping the concept of extension; the other from the fact that all we know of matter comes to us through its action on our organs of sense; hence the inference that force is the only thing existing apart from ourselves.

Between these two extremes stands the Scholastic theory, known as Hylomorphism, or the theory of matter and form (mater, matter; formes, form), also as the Aristotelian theory, and later as the Thomistic theory from the name of its principal defender in the Middle Ages. Aristotle (384–322 B.C.), who was its author, gave it a large place in his treatises on physics and on metaphysics. It was discussed during centuries in the Peripatetic and neo-Platonic schools and in the schools of Constantinople and Athens in the sixteenth to the twelfth century. Although it has been discarded, its essence principles survived, it was an insignificant factor in philosophical thought. An exception, however, must be made in favour of Avicenna in the East (980–1037) and of Averroes in Spain (1126–1198), both famous commentators on the Aristotelian encyclopaedia. In the thirteenth century, the Golden Age of Scholasticism, the system was restored, thanks to a number of Latin translations, and its long-forgotten treasures were brought to light by daring prospectors, such as Alexander of Hales, Albertus Magnus, St. Thomas Aquinas, St. Bonaventure, and St. Aquinas. During the fourteenth and fifteenth centuries the cosmological theory, and indeed the whole Scholastic system, suffered a decline which lasted till the sixteenth century, though during the interval it found ardent supporters in some of the religious orders. The restoration movement began about the middle of the sixteenth century with the works of Kleegein (1811–1883); Sanseverino (1811–1865); and Liberatore (1810–1892); but it was especially owing to the impulse given it by the famous Encyclical of Leo XIII: "Eterni Patris," (1879), that Scholasticism regained its place of honour beside the great modern systems.

The Scholastic theories are subject to the following propositions: (1) Bodies both elementary and compound have an essential unity; they differ spe-
cifically, and are by their very nature extended; (2) they possess powers or energies both passive and active which spring from their substantial nature and are inseparable from it; (3) they have an immanent tendency toward certain specific states to which the exercise of their native energies. The basic principle of this cosmology is that of immanent finality. The corporeal world is a masterpiece of order and harmony. In spite of ceaseless transformations, every species of body, simple and composite alike, reappears again and again with characteristic properties and in the well-being of the individual and of the universe as a whole. Now this constant and harmonious co-operation of innumerable causes acting under conditions the most diverse can only be explained, say the Scholastics, by admitting in the material agents themselves fixed and permanent principles of order. The universe must therefore be composed of special natures, i.e., of beings which by their constitution and properties are really adapted to the ends they have to attain. Substance and its distinctive energies form a whole which is completely subordinated to its appointed destiny; so that if serious alterations, such as changes of position, temperatures, and air pressure produce properties and in marring the harmony that ought to exist between them and their substantial base, the being so affected must put on a new nature in harmony with its new state. There takes place, in other words, what the Scholastics call a substantial transformation. This implies that the properties of the original being must persist throughout the change, and be carried over into the final result, otherwise transformation would involve the annihilation of the first being and the production of the second out of nothing. On the other hand, if we hold that during the process the being in question does not lose its own specific difference in exchange for another, it would be illogical to speak of a transformation, since a change which preserves the substantial integrity of the being can never have as its result the production of a new being. All bodies, then, that are subject to such a change must contain, in spite of their unity, two constituent principles. The one is a specifying or determining principle whence spring the actuality and distinguishing marks of the body itself; and it is this principle which is born and dies at every step in the deeper transformations of matter. It is called substantial form. The other, the indeterminate component, represents the substance as subject to the various essential forms; and it is called first matter. These are the fundamental ideas in the Scholastic theory.

As a system it is not at every point the direct antithesis of the two other systems outlined above. It is true that, whileMechanism claims that the properties of bodies are nothing but local motion, the Scholastics admit the existence of qualities properly so called in all bodies, i.e., accidental determinations, fixed and destined for action. These properties are generated with the new substance; they cling to it including its essence and its external manifestation. But, on the other hand, the Scholastics concede to the mechanical theory that local motion plays a large part in the world, that it is the accomplishment and the measure of every exertion of material force. Hence they give Mechanism credit for assigning a quantitative value to the phenomena of nature, divisibility, and extension—in a word, of all the properties so highly prized by Mechanism; this principle is first matter. But the Scholastic theory adds a substantial form, i.e., a determining principle and a root-cause of the activities and peculiar tendencies displayed by each individual body.

A similar partial agreement exists between Scholasticism and Dynamism. In the hydromorphic constitution of bodies the dynamic element has a predominant operating role, represented by the substantial form; but since the corporeal being does not appear to be a source of energy pure and simple, the dynamic element is joined with first matter, of which passivity and extension are the natural outcome.

A fourth and last system is called Dynamism "at the material universe". The only real difference between it and Mechanism lies in the fact that it attributes to bodies forces distinct from local motion; but at the same time it maintains that they are purely mechanical forces. Matter, it asserts, is homogeneous and the atom incapable of transformation. This theory, proposed by Martin and Tongiorgi, and upheld nowadays by certain scientists, is a transition between the mechanical and the Scholastic system. Its partisans, in fact, are persuaded that a theory which denies the reality of qualitative energies inherent in matter and reduces them to local motion thereby makes the true explanation of natural phenomena impossible. The universe to the whims of chance. Some Dynamists, therefore, to meet the obvious requirements of order in the world, seek in substance itself the reasons of its secondary principles of activity. But in this hypothesis it seems rather hard not to admit, as the Scholastics maintain, that the real essence of substance is the only explanation of the constancy observed in the accidental differences of things.

The final cause of the material universe. The last problem that cosmology attempts to solve is that of the final cause. It is intimately bound up with that of the first cause. Materialists like Häckel and Büchner, who refuse to see in the universe a plan or a purpose, can assign no goal to cosmic evolution. In their opinion, just as the world, during its eternal past, has undergone countless variations in form, so during its eternal future it is destined to ceaseless change. The laws of mechanics, the chance encounter of atoms and molecules, the capricious play of natural forces following no preconceived aim, will determine the nature, and form of the states through which matter is to pass. Pantheists and all who identify God with matter share as a rule the same view. For them the condition of the world is but the fatal result of purposeless evolution: science is god, or rather is itself the term of its existence and activity.

Those who believe in the existence of a personal God can never admit that an all-wise being created without a purpose. And since a perfect and independent being can have no other than himself as the final aim of his action, it follows that the ultimate end of creation is to manifest the glory of the Creator, man being the intermediary, and, as it were, the high-priest of the material world. The welfare of man himself is the secondary purpose of creation. According to St. Thomas the world is a vast hierarchy of which ignorance is the matter and man as he is in the natural order ministers to the vegetable and this in turn to the animal, while man finds in all these the satisfaction of his needs and the adornment of his earthly life. Above all he finds in the material universe and in the service it renders him a means of rising to perfect happiness in the possession of God.

D. Nye.
Costa, Francesco, known sometimes as del Cos- 

sa. His San painter of the School of Ferrara, b. about 1480; d. probably at Ferrara, 1485. Cossa is noted specially for his fresco work. The first record we have of him is in 1456 when he was an assistant to his father, Cristofano del Cossa, at that time employed in painting the carvings and statues on the high altar in the chapel of the bishop's palace at Ferrara. Cossa after this appears in conjunction with Cosimo Tura, decorating the summer retreat known as the Schi- 

fanoia, and of the frescoes which remain, three can be safely ascribed to him. They illustrate the manners and dress of the period and are rich in architectural details, somewhat less decorative and less fantastic than Tura's, but strong and grander than the latter's work. Considering himself, however, insuff- 

iciently remunerated by Duke Borso, Cossa left Fer- 

rara for Bologna in 1470, where he obtained many commissions under the Bentivogli. Here he painted his two masterpieces, one, the Virgin and Child with two saints and a portrait of Alberto de' Catanei, pro- 

duced in 1474; the other, the fresco of the Madonna del Baracano, representing the Virgin and Child with the portraits of Giovanni Bentivoglio and Maria Vin- 

guerra, painted in 1472. In these works Cossa re- 

veals himself as a painter of great power and original- 

ity, statues in his conception of grand and majestic 

power, and a gift for modelling, simple and severe in composition. In the National Gallery there is a fine 

picture by him representing St. Vincent Ferrer, an "Annunciation," in the Dresden collection, which has been attributed to Polliajuolo, and a fine profile por- 

trait at Locko Park near Derby, said to represent 

Duke Ercole I of Ferrara. He executed some glass 

paintings in Bologna, the best of which is a beautiful circular window, in the church of San Giovanni in 

Monte, representing St. John in Patmos; this bears his signature.

---

Costa, Lorenzo, Ferrarese painter, b. at Ferrara in 1460; d. at Mantua in 1535. He is believed to have been a pupil of either Tura, or Cossa. At the age of twenty-three Costa established himself at 

Bologna, under the patronage of the Bentivogli family, in the same workshop as Francia. The two men were much influenced by each other; Francia worked as a goldsmith, but Costa had the greater imagina- 
tion and depth of color, and his production was much richer. It is probable that his coming to Bologna was the cause of Francia's change of craft, and that but for this friendship the greater man would have re- 

mained all his life a goldsmith. Costa's earliest work in 

Bologna is the fresco in San Girogio Maggiore (1493); his greatest, the altar-piece in San Giovanni in 

Monti (1497). The two friends united in painting the 

altar-piece for the church of the Misericordia, the centre and upper part of which still remain in Bolo- 

rna, while the predella by Costa is at Milan. They 

worked for the same patrons, decorated the same 

walls of palace, church, and monastery, and both suf- 

fered when Bentivoglio was driven from Bologna in 

1509, and his palace became a heap of ruins. Costa 

then passed into the service of the Gonzaga family 

at Mantua. His work can be well studied in Bologna, 

but there are pictures by him also in Milan, Berlin, London, and Paris. His early frescoes are in the chapel in Fiesole, and the latest in the Schalcheria Palace at Mantua. He him- 

self engraved more than one plate after his pictures. His paintings are very much in the style of those by Francia, but the subjects are treated in a freer and more picturesque manner. The colouring is always enigmatic, the heads of the figures well modelled and 

full of expression, the architectural backgrounds rich, 

varied, and accurate, and the perspective thoughtful 

and well planned. The frescoes in Costa's work are 

far less hard than those in Francia's, and fall in easy 

and not in rigid folds.

Abbeccario Fiamma (Bologna, 1718); COSTA, GEORGE 

GEORGE CHARLES WILLIAMSON.

Costadoni, Giovanni Domenico, frequently known as Don Ameno, his name in religion, an Italian Camaldolese monk, historian, and theologian. Born at Florence, 6 October, 1714, at Venice; d. 23 January, 1785, in the same city. The son of a rich merchant, he sacrificed at an early date his prospects of success in the world and took the religious habit at St. Michael's monas- 

tery, situated on the island of Murano in the Venetian laggon. Here he studied philosophy and theology with more than usual success. At the age of twenty- 

three he revealed his literary ability in a letter (Lettera critica) written in defence of certain Camaldolese writers, who had been attacked by Giusto Fontanini in his "Library of Italian Eloquence". Costadoni frequently collaborated with the learned Mitelli in the publication of the "Annales Camaldulenses" (Venice, 1755-73). Some archeological 

collections due to his pen, such as "Dissertazione sopra il rimovimento dei segni sui nostri cristiani", were published in the voluminous collection of historical essays edited by Galperg, a monk of the same order. His works also include: "Avvia ed istruzione pratiche intorno ai principali doveri de' regolari" (Faenza, 1770; Venice, 1771); "Lettere consolatorie" (Venice, 1775); "Lettere sopra questione teologiche" (Venice, 1773). Costadoni's unpublished manu- 

scripts were transferred, after his death, to St. Greg- 

ory's monastery at Rome, by order of the Camal- 

dolese abbot, Mauro Cappellari (later Pope Gregory XVI).

N. A. WEBER.

Costa Rica, Republic of, a narrow isthmus be- 

tween Panama on the east and the Republic of Nic- 

aragua on the north, the Caribbean Sea on the north-east and the Pacific Ocean on the south-west. Between latitudes north 9° and 11° and longitudes west of Green- 

wich 85° and 86°, its area is calculated at 18,400 square 

miles, the population about double the number, or 

3500 Indians. The principal city is San José, the 

capital, with 24,500 inhabitants; next comes Cartago 

with 7800, then Heredia with 7151. There are two 

ports on the Atlantic and two on the Pacific coast. 

Mountain chains traverse the territory in many direc- 

tions, but the principal one runs through the whole 

length from north-west to south-east. Its tallest 

peak is called "Fico Blanco" and rises to 11,800 feet 

above sea-level. Costa Rica has six, partly active, volca- 
noes among which the tallest (Irazu) rises to a height 

of 11,600 feet and has been dormant for many years. 

The surface is generally very much broken, the moun- 

tains are eruptive or volcanic, and sedimentary de- 

posits of these waters against them at a lower level. Many 

streams, some of which are navigable for a short dis- 

tance, water the territory. The Pacific coast has two 

handsome gulfs: Nicoya in the north, and the Golfo 

Dulce near the frontier of Panama. 

There is some tropical forest, but two seasons: 

winter or the dry, and summer or the wet, season. 

Altitude and climate divide the country into three 

zones, the hot that rises from the shores on both sides 

about 3000 feet; the temperate (between 3000 and 

7500), and the cold higher up. Snowfalls, even on the 

highest summits, are very rare; the mean temperature
of the hot section is stated as varying between 72° and 82° Fahr.; of the temperate zone, from 57° to 78 degrees. Mahogany, cedar, rosewood and other precious woods for building and decorative purposes are scattered through its forests, also dye-woods. Medicinal plants are numerous and India-rubber of the species called "Tilluma elastica." Among resinous plants commonly the Myroxylon species producing the best balsams, abound. The chief agricultural products are coffee, bananas, tobacco, cocoa. Cotton and indigo are also raised. Most of the cultivated plants were imported from Europe by the Spaniards. Nearly if not all larger mammals of the torrid zones of America are found here. Costa Rica is a rich field. There are mines of gold, silver, copper and lead. Gold was discovered as early as Columbus' last voyage in 1502, and the number of gold ornaments found in the hands of the Indians, as well as the auriferous sands of the rivers, gave the newly discovered country its name Costa Rica, "the rich coast." In 1815 the rich gold district of Monte del Agua cate was first brought to notice by Bishop Garcia de Nicaragua and Leon. No general mining statistics exist. Mining laws are rather confused, being a mixture of former Spanish ordinances with modern amendments. But mining property is impounded in duty, and neither the Government nor municipalities levy any taxes on mining property.

Costa Rica became independent of Spain in 1821 and was a member of the Central American confederation from 1824 to 1841 when that confederacy was dissolved. In 1870-1871 a constitution was adopted which has been modified repeatedly since. The executive head of the republic is a president, but there have been several dictators. The president is elected, for four years, indirectly through electors chosen by the people, and cannot serve a second term. He is assisted by six secretaries. In case of the inability of the president to discharge his duties, he is replaced by one of three persons designated by Congress, at the first session in each presidencial term. Congress consists of only one house. Its members are also indirectly chosen by the people for four years, one member for every 8000 inhabitants, and one-half are elected every two years. Members of the supreme court of justice are appointed by Congress. The territory is divided politically into five provinces at the head of which is a governor appointed by the president. Costa Rica has a civil code, a code of civil procedure and, since 1858, a criminal law. Trial by jury takes place only in criminal cases.

By the Constitution, art. 51, "The Catholic Apostolic Roman is the religion of the state which contributes to its maintenance without impairing the exercise in the republic of any other religion not opposed to universal morality and good behavior" (buenas costumbres). By the Concordat (7 October, 1862) the jurisdiction previously exercised from the time of the Spanish occupation by the ecclesiastical authorities in litigations involving Church possessions or the temporal rights of the Church, passed over to the civil tribunals, but it was stipulated at the same time that the in courts of the second and the third instance, legal trial of criminal cases involving priests required the assistance as judicial assessors of ecclesiastics nominated by the bishop. In 1908, no Apostolic delegate having been appointed for Costa Rica since the year 1882, Pius X communicated to the republic his wish to re-establish the Congregation for the Missions and sententative at the Vatican answered that the government welcomed the idea, and begged His Holiness to give the new delegate the character of envoy to the republic, to which the pope assented. The envoy extraordinary and Apostolic delegate named was Mgr. Giovanni Ciocchini, titular Archbishop of Sebastia.

Up to 1850 the Bishop of Leon (Nicaragua) was also administrator of Costa Rica. The first Bishop of Costa Rica, Anselmo Llorente y Lafuente, was consecrated in Guatemala, 7 September, 1851, and installed 5 January, 1852. Bishop B. A. Thiel (b. at Elberfeld, 1850; d. at San José, 1901) a Laasari, who was professor of theology in Ecuador and banished for defending the Jesuits, was appointed Bishop in 1880. He was an explorer and student of Indian languages, and the founder of an ethnographic and biological museum at San José. He translated a number of religious works from German into Spanish and wrote "Idiomas de los Indios" and "Viajes" (1897) and "Datos cronol. para la Hist. ec. de Costa Rica." There are forty-four museums in the republic. The first Vincent de Paul conferences are very active. In 1899 they had 1396 members. In San José there are six. Women's St. Vincent de Paul auxiliaries are organized in nearly all the cities. In 1899 they distributed $20, 208. Since the Plenary Council of Latin America (1899) episcopal (see BERTHET) to be valid must be publicly recorded. In 1890 the public treasury contributed 19,404 pesos to the support of the Church. Primary education is free and compulsory. Its immediate direction belongs to the municipalities, the national executive, however, reserves the right of general supervision. Control of the Church is left to the Costa Rican government to give or to receive what instruction it pleases in any educational establishment not supported by public funds. The budget of public instruction rose from 137,677,779 in 1890 to 253,203 pesos in 1902, when there were six higher schools, one normal school, and 300 primary schools, the latter, with 17,746 pupils.

After Costa Rica was discovered by Columbus in 1502, Diego de Nicuesa attempted to colonize it in 1509, but it was fourteen years later when Francisco Hernandez made a settlement in the country, and its conquest was carried out by Pedro de Alvarado in 1510. Several tribes of the isthmus spoke a language allied to the Chibcha of Colombia. Among these, it seems that the Talamancas and Guaymies were the most prominent. The former held the eastern coast, extending to the boundary of Nicaragua, the latter lived mostly in what is now the Republic of Panama. A tribe, to which the Spanish name of Talanquero has been given, also belonged to Costa Rica. In culture, especially in the working of gold and silver, the Guaymies resembled the Chibcha. All these aborigines were grouped in small independent tribes and their resistance to the European invaders was protracted rather by natural obstructions than by military force. During Spanish colonial times Costa Rica had sixty-two successive rulers,—governors (adelantados), etc., and was regarded as a province of Guatemala.

THIEL, La Iglesia Catolica en Costa Rica in Revista de c. y l. en el Siglo XIX (San José, 1902). For the earliest period of discovery and Spanish colonization of Costa Rica, the letters of Columbus are indispensable. AD. F. BANDERJEL.
Costume, Clerical.—To discuss the question of ecclesiastical costume in any detail would be impossible in an article like the present. No topic has formed the subject of so many synodal enactments, and in almost every country and every order of the clergy we find distinctive features which might call for special treatment. Only the broad outlines can therefore be dealt with here. It may be noted, however, that the most important items of clerical attire, e.g., birretta; mantelletta; etc., have separate articles assigned to them.

History.—It seems that in the early centuries of Christianity no distinctive dress was adopted by ecclesiastics. Many indications point to this conclusion, e.g., the lacerna, or birrus, and (civil) daemnic, associated with the martyrdom of St. Cyriacus. The most explicit testimony is that afforded by a letter of Pope Celestine IV in 1246 to certain bishops of Gaul, in which he rebukes them for wearing attire which made them conspicuous, and lays down the rule that “we [the bishops and clergy] should be distinguished from the common people [populo] by our bearing, but not by our clothes; by our conduct, not by our dress; by cleanliness of mind, not by the care we spend upon our person” (Manzi, “Concilia,” IV, 465). In the East it would seem to have been the custom for ascetics and philosophers, whether Christian or not, to affect a special habit, but the Christian clergy generally did not profess asceticism in this distinctive way. Nor were content to wear the birrus (βίρρος) like the laity about them. This usage a canon of the Council of Gangra (340), especially when it is taken in conjunction with other facts (cf. Sozomen, III, 14), distinctly approves the practice. If any man,” says the council, “wears the pallium cloaks and tunics passed by life, and if there be some holiness in that, condemn those who with reverence use the birrus and other garments that are commonly worn, let him be anathema!” (Hefele-Leclercq, “Hist. des Conc.,” I, 1037). At the other extremity of Christendom the documents that survive concerning St. Patrick and other early Celtic bishops present them to us as habitually dressed in the casula (chasuble), which was the chief or a distinctive liturgical attire, but simply an outer garment commonly worn by the humbler classes. In the sixth and following centuries we find that in Rome and in countries near Rome the civil dress of the clergy began markedly to differ from that of the laity, the reason probably being that the time had not a distinct Roman type of costume with its long tunic and voluminous cloak, representing the toga, whereas the laity were increasingly inclined to adopt the short tunic, with breeches and mantle, of the genis braccata, i.e., the Northern barbarians, who were now the masters of Italy. Probably this Roman influence made itself felt to some extent throughout Western Christendom.

The canons of the Council of Braga in Portugal (572) required the clergy to wear a vestis talans, or tunic, reaching to the feet, and even in far-off Britain we find indications, both among the Celts and Anglo-Saxons, that underlays for the latter were being worn as seemly in the clergy, at any rate during their service at the altar. During the same period synodal decrees became gradually more frequent, restraining in various ways the tendency of the clergy to adopt the current fashion of worldly attire. By a German council of 941 the laity were barred from wearing either the pallium or the orus, i.e., not the saquum, or short military cloak, but the casula (chasuble), which even then had not become an exclusively liturgical dress. Perhaps the most interesting and significant enactment of this period is a letter of Pope John VIII (c. 875) admonishing the Archbishops of Canterbury and York to see that their clergy wore due ecclesiastical attire, and quoting the example of the English clergy in Rome who, on the eve of St. Gregory’s feast, had given up their short cloaks and adopted the long Roman tunic reaching to the feet: “Apostolice sententiae usque aede Sodii prevaluit, ut voluntarie omnes Anglorum clerici, sub ipsa vigilia S. Gregorii, laicalem et spinsocrum, sed et curtonum, habitum deponentes, talares tunicas Romanas induerent” (Jaffé-Wattenbach, Reg. RR, PP. 2995). In the East the distinction between lay and clerical costume was somewhat slower in developing than in the West, probably because of the influence of the autonomic invasion of less civilized peoples. In Justinian’s legislation it seems clear that a distinctive dress was recognized as belonging to monks, but there is nothing to show that any similar distinction applied to the clergy at large. The Trullan council, however, in 691 prescribed that all who were enrolled among the clergy should use at all times the robes (εραθῆ) appointed for those of their profession, under pain of excommunication for a week. Furthermore from the eighth century onwards we find almost universally numerous canons passed to restrain clerics from wearing rich dresses, bright colours, and extravagant orna- ments. In Germany, not until 1222 was the stola forbidden to them, as being distinctive of monks. On the other hand, at Metz, in 888, the laity were forbidden to wear the cope (capppus) belonging to the clergy, while in another synod presbyters were enjoined to wear their stoles always, as an indication of their priesthood. Such a bishop as St. Hugh of Lichfield still complied with this rule in the twelfth century but at the present day the practice is peculiar to the Holy Father alone.

In the later Middle Ages the dress of the clergy was regulated by the canon law, the jus commune of the Church at large, but with many supplementary enactments passed by the local councils. Thus the Council of 1215 laid down the principle that clerics must wear garments closed in front and free from extravagance as to length (Clausa defenser desuper in-
dumenta nimia brevitate vel longitudine non notanda. —Man6, XXII, 1006). Ornamental appendages, cloths of red or green colour, brooches (pulvina) to fasten their cloaks and to use "claned" copewes (cappa manicata), either at Office or at other times, are all forbidden by the same enactment. In England, the synod held under Cardinal Langton, in 1222, required that dignitaries and ordinary priests should be seen abroad "being attired in ecclesiastic habit," and that the usual cope was "not clerical at all, but more suited to knights (non clericalis sed potius militaris)." Offenders in future were to be punished, and the bishops were to see that all in sacred orders used garments of fitting length and wore closed copes. Somewhat later the legatine council under Ottoboni insisted that all ecclesiastics, whether in sacred orders or not, were to wear clothes of fitting length, coming at any rate below the middle of the shin (salemula tribusarm medium attingentes). Further, all priests and beneficed clergy were to wear closed copes, except when on a journey, or for some other important reason. All embroidery, felting (diligibus), and penalties were enacted against transgressors, but they do not seem to have produced any lasting effect, for numerous other decrees on the same subject were passed in England at a later date, notably in 1281 and in 1342. The proper dress of the medieval clergy was therefore the vestis talaria, and over this priests and dignitaries were bidden to wear the cappe clausae. The former of these must have been a sort of cassock, but made like a tunic, i.e. not opening, and buttoning down the front. The wearing of the closed cope was no doubt often evaded by the secular clergy. Such writers as Chaucer and Langland seem to lay so much emphasis upon the copes of the friars that it is difficult to believe that this mantle, resembling a liturgical cope, but partly at least sewn up in front, was as commonly worn by secular priests. That the cope was often of considerable length may be gathered from a passage in "Piers Plowman's Crede":

His cope that bielypped him, wcl clene was it folde.
Of double-worsted y-dyght, down to the hele.

It would seem that the closed cope has a modern representative in the cappe clausae of cardinals and bishops, and also in the chimer (etymologically descended from the Italian simarre), the loose mantle now worn by the Anglican episcopate to which the well-known lawn sleeves are attached. The wearing of a separate head-dress, or "coll," seems to have been prohibited to the inferior orders of the clergy except when on a journey; but of course doctors of theology and some other graduates had their caps of honour. Besides these we hear of the "riippibe", a sort of broad tippet or scarf sometimes drawn over the head, sometimes worn hanging loose on the shoulders. The dress of the clergy in other countries did not probably differ very greatly from that of medieval England. As already said, innumerable decrees everywhere passed in provincial synods restraining extravagances, for every ecclesiastical fashion—the peaked shoes, the parti-coloured dress, the headgear of flowers, the ordinarily tight hose, etc.—was liable to find imitators among the clergy. One article of costume which occurred just once on "other" or "small" monuments, both in England and abroad, is the "alume", a fur-lined tippet and hood, still retained at Rome and elsewhere by the canons of cathedral and collegiate churches, and now practically confined to them. Formerly the alume was worn by university graduates, and many other orders of the clergy. It is probably only a warmer variant of the hood, which almost everywhere survives as part of a winter costume, and which is the familiar adjunct of the surplice for Anglican clergymen when officiating in the sanctuary. It will be readily understood that the indescribably cold and draughty condition of our old cathedrals rendered some such furred protection for the head and neck almost a necessity during the long hours of the night service. Naturally, the richness and amplitude of the fur lining varied in some measure with the dignity of the wearer. In funeral monuments the alume is found constantly associated with the cope, also primarily a choir vestment.

Modern Usage.—The modern and more centralised legislation regarding clerical costume may be considered to begin with a constitution of Sixtus V, in 1689, insisting under the severest penalties that all clerics, even those in minor orders, should uniformly wear the vestis talaria and go tonsured. Offenders were to lose all title to their benefices or any other emolument which they held. Another edict issued under Urban VIII, in 1624, goes into greater detail. It directs that the cassock should be confined with a cinature, and that the cloak worn over it should normally, like the cassock, fall as low as the ankles. The under-dress, the hose included, should be modest, and dark in colour. Any violation of these regulations was forbidden. The hat shall be of approved shape, and a simple cord or ribbon shall form its only ornament. Infringements of these regulations are to be punished with a pecuniary fine. Another important Roman decree, issued in 1708, forbids clerics to wear a peruke covering any part of the forehead or ears and, while admitting the use of shorter garments when on a journey, required such garments in all cases to extend below the knees and to exhibit no eccentricities, such as large buttons and huge pockets. In 1725 Pope Benedict XIII made the wearing of lay costume by an ecclesiastic an offence of the most serious kind, which, not only, according to the Bull of Sixtus V, entailed the forfeiture of all emoluments, but denied absolution to those delinquents who did not spontaneously surrender their benefices if they had been guilty of this offence. It would seem that this extreme rigour has never been upheld in practice by the Roman Congregation with whom the ecclesiastical costume ultimately lies. Mgr. Barbier de Montault, for example, remarks that, although infraction of the law of ecclesiastical costume are by no means allowed to pass with impunity, and though "the Sacred Congregation of the Council is wont to support the decrees of bishops and insist upon the wearing of the proper vestments of the order as far as concerns the question of punishment it answers 'Let the bishop proceed with moderation'" (B. de Montault, "Le Costume" etc., I, 45). In English-speaking countries where the wearing of the tonsure is not obligatory, the rules affecting the costume of ecclesiastics are less rigid. The decrees on the subject of the First Synod of Westminster and the Third Plenary Council of Baltimore are in practical agreement. The latter says (§ 77), "We wish therefore and enjoin that all keep the law of the Church, and that when at home or when engaged in the sanctuary they should always wear the cassock (vestis talaria) which is proper to the clergy. When they go abroad for duty or relaxation, or when upon a journey, they may use a shorter dress, but still one that is black in colour, and which reaches to the knees, so as to distinguish it from lay costume. We enjoin upon our priests as a matter of strict precept, that both at home and abroad, and wherever they are, unless acting in any place, in the presence of it, they should wear the Roman collar." The general introduction of the use of bicycles among the clergy has brought about somewhat laxer practice regarding the length of the upper garments worn out of doors and the Second Synod of Maynooth (1900)
Cotenna, a titular see of Asia Minor. Strabo (XII, 570) mentions the Kateneis in Pisidia adjoining Selge (now Sirk) and the tribe of Homonades (east and north of Troglitius, Seidi Shehi Lake). Their city must be identified with the modern village of Kastoria or Gudene, on the Alaghir Tchai, in the vilayet of Konia. An inscription has been found showing that the people called themselves Koteneis, so that the true name of the town was Kotenna. Hierocles mentions it as Kottana in Pamphylia. It appears as Kotana in Parthey's "Notitiae episcoporum," X and XII, twelfth or thirteenth century, as a suffragan of Side. Six bishops are known: Hesychius in 381, Acacius in 431, Eugenius or Eusebius in 461, Flavianus in 536, Cosmas in 650, Macarius in 879. It has been said that the Koteneis are the same as the Etenneis, mentioned by Polybius, V, 75, as living in Cappadocia above Side, in the Roman times. The native name may have been Kateneis, and the tribe afterwards divided into at least two districts, the northern taking the name Etenneis while the southern preferred Kotenneis. There was another see called Etenna or something
similar. A third district was perhaps also called Banaba or Manaus; for in 680 Cosmas appears as Bishop of "Kotenna and Manaus."

LEQUIEN, Orientis christiani, 1, 1000.
S. PÉTRIDÉS.

Ootium, a titular see of Asia Minor. Kition, according to its coins, better Cytiaion, the city of Cotys, was an ancient city of Phrygia Salutaris. Æsop is said to have been born there. It was a centre of heresy from the second century onwards. Socrates (IV, xxvii) speaks of its Novatian bishop. At first it was a simple suffragan of Smyrna, but became an autocephalous archbishopric, probably in the eighth century, and about the tenth appears as a metropolis with three suffragan sees, which were later increased to thirteen (?). Lequien (I, 851) mentions ten bishops, the last in the fourteenth century. The first is Cyrus, sent thither by Theodosius II, after four bishops had been slain by the inhabitants. The town preserves some ancient ruins, a Byzantine castle and church. It was taken and plundered by Timur-Leng (Tamerlane) in 1402. It is now the chief town of the sanjak of the vilayet of Brusa, and is called by the Turks Kutya. It has about 22,000 inhabitants, including 4000 Greeks, 2300 Armenians, 700 Cappadocian Armenians, and a few Latins; it contains two schools. It is also the see of a non-Catholic Armenian bishop. During late centuries Kutaya has been renowned for its Turkish earthenware, of which fine specimens may be seen at the Imperial Museum in Constantinople. Coton, Pierre, a celebrated French Jesuit, b. 7 March, 1564, at Nérondex in Forez; d. 19 March, 1626, at Paris. He studied law at Paris and Bourges, entered the Society of Jesus at the age of twenty-five, and was sent to Milan to study philosophy. Here he became acquainted with St. Charles Borromeo. On his return to his native country he preached with remarkable success at Roanne, Avignon, Nîmes, Grenoble, and Marseille. An acquaintance with Henry IV of France soon ripened into friendship, and the Archbishopric of Aries being vacant, the king offered it to Father Coton, who refused the honour. The king having recalled the exiled Jesuits to France, their enemies could not pardon the influence Father Coton had in bringing this about, and an attempt was made to assassinate him. Some writers have pretended that Father Coton was not above suspicion on the doctrine of regicide, and when Henry IV was assassinated, they accused Father Coton of defending Ravillac, the king's murderer. But if his enemies at court had any knowledge that he held such views they failed to make it public.

Father Coton had for two years previous to the death of Henry been consecrated to his son, the young Dauphin. In 1610 the biting satire "Anti-Coton, où est prompte que les Jésuites sont coupables du parricide d'Henri IV" was followed by many pamphlets for and against the Society. It was an easy task for Father Coton to defend himself against these calumniators and produce proofs of his innocence, but very difficult for the author of the libel, who was put into prison to be Pierre Dumoulin, a Protestant minister of Charenton, and an associate of the Calvinists, to substantiate any statement that he had advanced. Father Coton was continued in his capacity as confessor to the new king, Louis XIII, which duty he discharged until 1617; when he left the court at the request of the king who withdrew to the novitiate at Lyons. He then traversed the provinces of the South as a missionary, and went to Milan, Loreto, and Rome to fulfil the vows the reigning king had made to the Blessed Virgin, St. Charles, and St. Peter. He returned to France as provincial of the Society, and preached at Paris in the church of S. Gervaise, whither the king and the whole court flocked to hear him. Just at this period a book published by Santarelli, an Italian Jesuit, who attributed to the pope the power of deposing kings who were guilty of certain crimes, and under such circumstances of absolving their subjects from their allegiance, was translated from the many enemies of the Society of Jesus in France.

The doctrines which Santarelli expounded had been unwise accepted in the Middle Ages, and were still more zealously by the Ultramontane theologians, although they were not so well known to the French public as in Italy. This book, which in Italy was received in its true light, was, in Paris, under the rule of Richelieu, construed into a provocation to regicide and rebellion. These false views were attributed to every member of the Society, and the Parliament demanded that all Jesuits residing in France should be called upon to sign a protestation disavowing all the doctrines contained in Santarelli's treatise. Father Coton was ill at the time, and the news conveyed to him aggravated his condition. On his death-bed he was visited by an envoy of Parliament, who informed him of the condemnation pronounced against Santarelli and the severe measures that threatened his brethren. The dying Jesuit murmured: "Is it possible that I who have served so faithfully the Kings of France should be looked upon at last as guilty of treason and a disturber of the peace?" His "Institution catholique" and "Genève plagiaires" are controversial works, as also his "Sacrifice de la Messe." For his other works see De Backer, 1st ed., II, p. 149.

G. E. KELLY.

Cotrone, Diocese of (Ottoneus), a suffragan of Reggio. Cotrone is a city of the province of Catanzaro, in Calabria, Southern Italy, on the Ionian Sea. It is the ancient Croton, an Achaean colony founded c. 707 b. c., and long one of the most flourishing cities of Magna Graecia. Its inhabitants were famous for their physical strength, and for the simple sobriety of their lives. It was the birthplace of Milo, the famous athlete, and it was at Croton that Pythagoras founded his school. In 350 b. c. the city was taken by Dionysius the Elder of Syracuse and in 266 b. c. by Agathocles. Later it was pillaged by Pyrrhus. In the Second Punic War it was seized by Hannibal, but some time later became a Roman colony. About A. D. 550, it was unsuccessfully besieged by Totila, King of the Goths, and at a later date became a part of the Byzantine Empire. About 1470 it was taken and sacked by the Turks, who put to death the bishop and many people who had taken refuge in the cathedral. Later on it was conquered by Normans and thenceforth shared the fate of the Kingdom of Naples.
According to local legend the Gospel was preached there by St. Dionysius the Areopagite. Its first known bishop was Flavianus, during whose episcopate occurred the siege of the city by Totila. Other bishops were: Theodosios (642); Petrus (680); Theotimus (790); and Nicephorus (870). Worthy of note are: Antonio Sebastiano Minturno (1523-1538), Governor of the Spanish Dominicans, Juan Lopez (1595); the Theatine, Tommaso dai Monti (1599), famous for his zeal; and Nico- foro Melisene Commeno (1628), who had previously rendered signal service to the Holy See in the Orient and in France. The diocese has a population of 14,000, with 10 parishes, 29 churches and chapels, 24 separate religious communities, and 60 religious orders of women.

Cotter, J. B. See Winona, Diocese of.

Courney, Robert de, a medieval French master-builder and son of a master-builder of the same name, b. at Reims (or Courcy, according to some authorities); d. at Reims in 1311. In 1263 he was appointed suc- cessor to Hugues Libergier as director of the work of rebuilding the churches of Saint-Nicaise at Reims, and be- tween this date and 1279 he constructed the choir, chapels, and part of the transept; the church was afterwards destroyed during the Revolution. Some good illustrations of this building, begun in 1229 and considered one of the best Gothic churches of the great period in France, have been preserved. A nearly con- temporary chronicle of the Abbey of Saint-Nicaise says that "Hugo Libergiers pronaon ecclesia perfect. Robert de Coucy caput ecclesiastic construxit".

After the death of his father, Robert de Coucy had also chief charge of the work on the cathedral at Reims, which was rebuilt after its destruction by the people in 1210. The new cathedral was begun in 1211, and the choir, constructed by Robert de Coucy the elder, was completed in 1241. The cathedral was built on a simple plan of a vast choir, no transepts, and a rather narrow nave. Viollet-le-Duc says: "This building has all the strength of the cathedral of Chartres, with none of its heaviness; in short, it combines the essential requirements of artistic beauty, power and grace; it is, besides, built of fine materials cunningly put to- gether, and there is found in all its parts a pains- taking care and a skill very rare at a period when men built with great rapidity and often with inadequate resources. It is a labyrinth of mazes, or representations of a maze, which formerly existed in the pavement of the nave of the cathedral were effigies of the architects of the edifice from its foundation up to 1382; among these effigies, according to tradition, were those of the two Robert de Coucys, father and son. In the cloister of the Abbey of Saint-Denis at Reims Pélissié noticed the gravestone of Robert de Coucy, "Maître de Notre-Dame et de Saint-Nicaise, qui trépassa en l'an 1311".

THOMAS H. POOLE.

Courdert, Frederic Rene, b. in New York, 1 March, 1832; d. at Washington, D. C., 20 December, 1918. He graduated from Columbia College in his native city in 1850, and on his majority was admitted to practice in the courts. He became a leader of the Bar, being learned in the science of the law and skilled in its art and practice. During the controversy concerning American and British seal fisheries in the Bering Sea, and in the controversy concerning the disputed boundary between Venezuela and British Columbia, he acted as legal adviser for the United States Governments. He was an orator not only in English, but also in the French, Spanish, and Italian languages, and was gifted with a manner and style singularly attractive, with ready wit and power of sarcasm. He bore testimony to his political principles in periods of strain and contro- versy. He consented in 1876 to visit Louisiana for the purpose of urging the "Returning Board" of that politically distracted State to act justly respecting election re- sults, which were to determine the presi- dential succession, and in 1892 and again in 1893 he was a prominent opponent of the course taken by his own political party. Politics he seemed to regard as a means for carrying into effect certain principles, not as a means of office-seeking. He declined the Russian mission, a judgeship of the Court of Appeals of the State of New York, and a justiceship of the Supreme Court of the United States. He accepted (and it was the only public office he ever held) the inconspicuous and unsalaried membership in the Board of Education of the City of New York. As a Catholic he was always loyal to the Church; as the son of a French refugee he never forgot France. On two subjects he declared himself to be sensitive: the Bank of Peter and the land of his ancestors.

CHARLES W. SLOANE.

COUNCILS.

COUNCILS, General.—This subject will be treated under the following heads: I. Definition; II. Classification; III. Historical Sketch; IV. The Pope and General Councils; V. Composition of General Councils; (a) Right of participation; (b) Requisite number of members; (c) Papal headship of the formal element of councils; VI. Factors in the Pope's Co-operation with the Council: (a) Convocation; (b) Direction; (c) Confirmation; VII. Business Methods: (a) The facts; (b) The theory; VIII. Infallibility of General Councils; IX. Correlation of Papal and Conciliar Infallibility; X. Infallibility Restricted to Infamous Findings; XI. Pronouncement; XII. Is a Council above the Pope? XIII. Has a General Council Power to Depose a Pope?

I. Definition. — Councils are legally convened assemblies of ecclesiastical dignitaries and theological experts for the purpose of discussing and regulating matters of church doctrine and discipline. The terms council and synod are synonymous, although in
the oldest Christian literature the ordinary meetings for worship are also called synods; and diocesan synods are not properly councils because they are only convened for deliberation. Councils unlawfully assembled are termed concilia, convencula, and even latrocinia, i.e. “robber synods”. The constitutive elements of an ecclesiastical council are the following:—

(a) A legally convened meeting of
(b) members of the hierarchy, for
(c) the purpose of carrying out their judicial and doctrinal functions,
(d) means of deliberation in common,
(e) resulting in regulations and decrees invested with the authority of the whole assembly.

All these elements result from an analysis of the fact that councils are a concentration of the ruling powers of the Church for decisive action.

The first condition is that such concentration conform to the constitution of the Church: it must be started by the head of the forces that are to move and to act, e.g. by the metropolitan if the action is limited to one province. The actors themselves are necessarily the leaders of the Church in their double capacity of head and teacher, but the outcome of conciliar activity is the settling of questions of faith and discipline. When they assemble for other purposes, either at regular times or in extraordinary circumstances, in order to deliberate on current questions of administration, or on concerted action in emergencies, their meetings are not called councils but simply meetings, or assemblies, of bishops. Deliberation, with free discussion and ventilation of private views, is another essential note in the notion of councils. They are the mind of the Church in action, the sensus ecclesiae taking form and shape in the mould of dogmatic definition and authoritative decrees. The correctness of their actual claim, necessarily precedes the final triumph of faith. Lastly, in a council’s decisions we see the highest expression of authority of which its members are capable within the sphere of their jurisdiction, with the added strength and weight resulting from the combined action of the whole body.

II. Classification.—Councils are, then, from their nature, a common effort of the Church, or part of the Church, for self-preservation and self-defence. They appear at her very origin, in the time of the Apostles at Jerusalem, and throughout her whole history, whenever the morals or discipline are seriously threatened. Although their object is always the same, the circumstances under which they meet impart to them a great variety, which renders a classification necessary. Taking territorial extension for a basis, seven kinds of synods are distinguished:

(1) Ecumenical councils are those to which the bishops, and others entitled to vote, are convoked from the whole world (οἰκουμένη) under the presidency of the pope or his legates, and the decrees of which, having received papal confirmation, bind all Christians. A council, ecumenical in its convocation, may fail to secure the assent of the pope or his legates, and thus not rank in authority with ecumenical councils. Such was the case with the Robber Synod of 449 (Lactacianus Ephesinum), the Synod of Pisa in 1409, and in part with the Councils of Constance and Basle.

(2) The second rank is held by the general synods of the East or the West, composed but one-half of the episcopate. The Synod of Constantinople (381) was originally only an Eastern general synod, at which were present the four patriarchs of the East (viz. of Constantinople, Alexandria, Antioch, and Jerusalem), with many metropolitans and bishops. It ranks as ecumenical because its decrees were ultimately confirmed by the Western bishops.

(3) Patriarchal, national, and provincial councils represent a whole patriarchate, a whole nation, or the several provinces subject to a primate. Of such councils we have frequent examples in Latin Africa, where the metropolitan and ordinary bishops used to meet under the Primate of Carthage; in Spain, under the Primate of Toledo, and in earlier times in Syria, under the Metropolitan—later Patriarch—of Antioch. Provincial councils bring together the bishops of the metropolitan of an ecclesiastical province and other dignitaries entitled to participate.

(4) Diocesan synods consist of the clergy of the diocese and are presided over by the bishop or the vicar-general.

A peculiar kind of council used to be held at Constantinople; it consisted of bishops from any part of the world who happened to be at the time in that imperial city. Hence the name σύνοδος ἐνυπαράγων “visitors’ synods”.

(5) Lastly there have been mixed synods, in which both civil and ecclesiastical dignitaries met to settle secular as well as ecclesiastical matters. They were frequent at the beginning of the Middle Ages in France, Germany, Spain, and Italy. In England even abbesses were occasionally present at such mixed councils. Sometimes, not always, the clergy and laity were in separate sections of the presence chamber.

Although it is in the nature of councils to represent either the whole or part of the Church organism yet we find many councils simply consisting of a number of bishops brought together from different countries for some special purpose, regardless of any territorial or hierarchical connection. They were most frequent in the fourth century, when the metropolitan and patriarchal circumscriptions were still imperfect, and questions of faith and discipline manifold. Not a few of them, summoned by emperors or bishops in opposition to the lawful authorities (such as that of Antioch in 341), were positively irregular, and acted as evil rather than good work. These cannot be compared to the meetings of bishops of our own times; decrees passed in them had no binding power on any but the subjects of the bishops present; they were important manifestations of the sensus ecclesiae (mind of the Church) rather than judicial or legislative bodies. But precisely as expressing the mind of the Church they often acquired a far-reaching influence due, either to their internal soundness, or to the authority of their framers, or to both.

It should be noted that the terms concilia plenaria, universalia, or generalia are, or used to be, applied indiscriminately to councils not confined to a particular province; in the Middle Ages, even provincial synods, as compared to diocesan, received these names. Down to the late Middle Ages all papal synods to which a certain number of bishops from different countries had been summoned were regularly styled plenary, general, or universal synods. In earlier times, before the separation of East and West, councils to which several distant patriarchates or exarchates sent representatives, were described absolutely as “plenary councils of the universal Church”. These terms are applied by St. Augustine to the Council of Ephesus (431), at which the Church on the side of the Western bishops were present. In the same way the Council of Constantinople (382), in a letter to Pope Damasus, calls the council held in the same town the year before (381) “an ecumenical synod” i.e. a synod representing the oikouménē, the whole inhabited world as known to the Greeks and Romans, because all the Eastern patriarchates, though no Western, took part in it. The synod of 381 could not, at that time, be termed ecumenical in the strict sense now in use, because it still lacked the formal confirmation of the Apostolic See. As a matter of fact, the Greeks themselves did not put this council on a par with those of Nice, Ephesus, and Chalcedon, and the Latins acknowledged its authority only in the sixth century.
COUNCILS

III. HISTORICAL SKETCH OF ECCUMENICAL COUNCILS.—The present article deals chiefly with the theological and canonical questions concerning councils which are ecumenical in the strict sense above defined. Special articles give the history of each important synod under the head of the city or see where it was held. In order, however, to supply the reader with a basis of fact for the discussion of principles which follow, a list is appended of the twenty-two ecumenical councils with a brief statement of the purpose of each.

(1) The First Ecumenical, or Council of Nicaea (325) lasted two months and twelve days. Three hundred and eighteen bishops were present. Homoious, Bishop of Chios, was legate of Pope Sylvester. The Emperor Constantine was also present. To this council we owe the Creed (Symbolum) of Nicaea, defining against Arius the true Divinity of the Son of God (εὐανεύμονος), and the fixing of the date for keeping Easter (against the Quartodecimanists).

(2) The Second Ecumenical, or First General Council of Constantinople (381), under Pope Damasus and the Emperor Theodosius I, was attended by 150 bishops. It was directed against the followers of Macedonius, who impugned the Divinity of the Holy Ghost. To the above-mentioned Nicene Creed it added the clauses referring to the Holy Ghost (qui...adora), and all that follows to the Ghost.

(3) The Third Ecumenical, or Council of Ephesus (431), of more than 200 bishops, presided over by St. Cyril of Alexandria representing Pope Celestine I, defined the true personal unity of Christ, declared Mary the Mother of God (Θεοτόκος) against Nestorius, Bishop of Constantinople, and renewed the condemnation of Pelagius.

(4) The Fourth Ecumenical, or Council of Chalcedon (451)—150 bishops under Pope Leo the Great and the Emperor Marcian—defined the two natures (Divine and human) in Christ against Eutyches, who was excommunicated.

(5) The Fifth Ecumenical, or Second General Council of Constantinople (553), of 165 bishops under Pope Vigilius and Emperor Justinian I, condemned the errors of Origen and certain writings (The Three Chapters) of Theodore, of Theodore, Bishop of Mopsuestia, and of Ibas, Bishop of Edessa; it further confirmed the first four general councils, especially that of Chalcedon whose authority was contested by some heretics.

(6) The Sixth Ecumenical, or Third Council of Constantinople (680–681), under Pope Agatho and the Emperor Pogonatus, condemned the Patriarchs of Constantinople and of Antioch, 174 bishops, and the emperor. It put an end to Monothelism by defining two wills in Christ, the Divine and the human, as two distinct principles of operation. It anathematized Sergius, Fyrrhus, Paul, Macarius, and all their followers.

(7) The Seventh Ecumenical, or Second Council of Nicaea (787) was convoked by Emperor Constantine VI, and his mother Irene, under Pope Adrian I, and was presided over by the legates of Pope Adrian; it regulated the veneration of holy images. Between 300 and 387 bishops assisted.

(8) The Eighth Ecumenical, or Fourth Council of Constantinople (789), under Pope Adrian II and Emperor Basil, numbering 102 bishops, 3 papal legates, and 4 patriarchs, consigned to the flames the Acts of an irregular council (conciliaulatum) brought together by Photius against Pope Nicholas and Ignatius, the Pope of Constantinople; it condemned Photius who had unlawfully seized the patriarchal dignity. The Photian schism, however, triumphed in the Greek Church, and no other general council took place in the East.

(9) The Ninth Ecumenical Council (1123) was the first held in the Lateran at Rome under Pope Callistus II. About 900 bishops and abbots assisted. It abolished the right, claimed by lay princes, of investiture with ring and scepter to ecclesiastical benefices and dealt with church discipline and the recovery of the Holy Land from the infidels.

(10) The Tenth Ecumenical Council (1139) was the Second Lateran held at Rome under Pope Innocent II with an attendance of about 1000 prelates and the Emperor Conrad. Its object was to put an end to the errors of Arnold of Brescia.

(11) The Eleventh Ecumenical Council (1179) was the third assembled at the Lateran, and took place under Pope Alexander III, Frederick I being emperor. There were 302 bishops present. It condemned the Arians and Waldenses, and issued numerous decrees for the reformation of morals.

(12) The Twelfth Ecumenical Synod (1215) was the Fourth Lateran, under Innocent III. There were present the Patriarchs of Constantinople and Jerusalem, 71 archbishops, 412 bishops, and 800 abbots, the Primate of the Maronites, and St. Dominic. It issued an enlarged creed (symbol) against the Albigenses (Firmriner credidimus), condemned the Trinitarian errors of Abbot Joachim, and published 70 important reformatory decrees. This is the most important council of the Middle Ages; it marks the culminating point of ecclesiastical life and papal power.

(14) The Fourteenth Ecumenical Council was held at Lyons (1274) by Pope Gregory X, the Patriarchs of Antioch and Constantinople, 15 cardinals, 500 bishops, and more than 1000 other dignitaries. It effected a temporary reunion of the Greek Church with Rome. The word filioque was added to the symbol of Constantinople and means were sought for recovering Palestine from the Turks. It also laid down the rules for papal elections.

(15) The Fifteenth Ecumenical Council took place at Vienne in France (1311–1313) by order of Clement V, the first of the Avignon popes. The Patriarchs of Antioch and Alexandria, 300 bishops (114 according to some authorities), and 3 kings—Philip IV of France, Edward II of England, and James II of Aragon—were present. The synod dealt with the Albigenses and errant mendicants and condemned the Fraticelli, the Beghards, and the Beguines, with projects of a new crusade, the reformation of the clergy, and the teaching of Oriental languages in the universities.

(16) The Council of Constance (1414–1418), the Sixteenth Ecumenical, was held during the great Schism of the West, with the object of ending the divisions in the Church. It only became legitimate when Gregory XII had formally convoked it. Owing to this circumstance it succeeded in putting an end to the schism by the election of Pope Martin V, which the Council of Pisa (1409) had failed to accomplish on account of its illegality. The rightful pope confirmed the former decrees of the synod against Wydulf and Hus. This council is thus only ecumenical in its last sessions (XLII–XLV inclusive) and with respect to the decrees of earlier sessions approved by Martin V.

(17) The Seventeenth Ecumenical Council met at Bologna (1431); Eugene IV, Emperor of the Holy Roman Empire, its object was the religious pacification of Bohemia. Quarrels with the pope having arisen, the council was transferred first to Ferrara (1438), then to Florence (1439), where a short-lived union with the Greek Church was effected, the Greeks accepting the council's definition of
controversied points. The Council of Basle is only eccumenical till the end of the twenty-fifth session, and of its decrees Eugenius II approved only such as dealt with the extirpation of heresy, the peace of Christendom, and the reform of the Church, and which at the same time did not derogate from the rights of the Holy See.

(18) The Eighteenth Eccumenical, or Fifth Council of Florence, from 1512 to 1517 under Popes Julius II and Leo X, the emperor being Maximilian I. Fifteen cardinals and about eighty archbishops and bishops took part in it. Its decrees are chiefly disciplinary. A new crusade against the Turks was planned, but came to naught, owing to the religious unity caused by the Council. It has no part in the new government of the Church. This principle is confirmed by the fact that during nineteen centuries of Church life only twenty ecumenical councils took place. It is further illustrated by the complete failure of the decree issued in the thirty-ninth session of the Council of Constance (then without a rightful head), to the effect that general councils should meet frequently and at regular intervals; the very first synod summoned at Pavia for the year 1423 could not be held for want of responses to the summons. It is thus evident that general councils are not qualified to issue, independently of the pope, dogmatic or disciplinary decrees binding on the whole Church. As a matter of fact, the older councils, especially those of Ephesus (431) and Chalcedon (451), were not convened to decide on questions of faith still open, but to give additional weight to, and secure the execution of, papal decisions previously issued and regarded as fully authoritative. The other consequence of the same principle is that the bishops in council assembled are not commissioned, as are our modern parliaments, to control and limit the power of the sovereign, or head of the State, although circumstances may arise in which it would be their right and duty firmly to excommunicate with the power of censures. The severe stricures of the Sixth General Council on Pope Honorius I may be cited as a case in point.

IV. THE POPE AND GENERAL COUNCILS.—The relations between the pope and general councils must be exactly defined to arrive at a just conception of the functions of councils in the Church, of their rights and duties, and of their traditional phrase, "the council represents the Church", associated with the modern notion of representative assemblies, is apt to lead to a serious misconception of the bishops' function in general synods. The nation's deputies receive their power from their electors and the people in general; the bishops, and especially those in the modern democratic State they are directly created by, and out of, the people's own power. The bishops in council, on the contrary, hold no power, no commission, or delegation, from the people. All their powers, orders, jurisdiction, and membership in the council, come to them from above—directly from the pope, ultimately from God. What the episcopate in council does represent is the Divinely instituted magisterium, the teaching and governing power of the Church; the interests it defends are those of the depositum fidei, of the revealed rules of faith and morals, i.e. the interests of God.

The council is, then, the assessor of the supreme teacher and judge sitting on the Chair of Peter by Divine appointment; its operation is essentially cooperation—the common action of the members with their head—and therefore necessarily rises or falls in value according to the personal qualities of the council and the pope. A council in opposition to the pope is not representative of the whole Church, for it neither represents the pope who opposes it, nor the absent bishops, who cannot act beyond the limits of their dioceses except through the pope. A council not only acting independently of the Vicar of Christ, but sitting in judgment over him, is unthinkable in the constitution of the Church; in fact, such assemblies have only taken place in times of great constitutional disturbances, when either there was no pope or the rightful pope was indistinguishable from antipopes. In such abnormal times the safety of the Church becomes supreme, and the first duty of the abandoned flock is to find a new shepherd, under whose direction the existing evils may be remedied.

V. COMPOSITION OF GENERAL COUNCILS.—(a) Right of participation.—The right to be present and to act at a plenary council is naturally confined to the bishops actually exercising the episcopal office. In the earlier councils there appear also the exarchi (country-bishops), who, according to the better opinion, were neither true bishops nor an order interposed between bishops and priests, but priests in the strictest sense only, and ecclesiastics of higher rank than the secular. They were ordained by the bishop and charged with the administration of a certain district in his diocese. They had the power of conferring minor orders, and even the subdiaconate. Titular bishops, i.e. bishops not ruling a diocese, had equal rights with other bishops at the Vatican Council (1869–70), where 117 of them were present. Their claim lies in the fact that their order, the episcopal consecration, entitles them, jure divino, to take part in the administration of the Church, and that a general council seems to afford a proper sphere for the exercise of a right which the want of a proper diocese keeps in abeyance. Dignitaries who hold episcopal or quasi-episcopal jurisdiction without being bishops—such as cardinal-priests, cardinal-deacons, abbots, mitred abbots, bishops of whole orders or congregations of monasteries, generals of clerks regular, representatives of the most important and mixed congregations, or apostolic prefects at the Vatican Council. Their title is based on positive canon law: at the early councils such votes were not admitted, but from the seventh century down to the end of the Middle Ages the contrary practice gradually prevailed, and has since become an acquired right. Priests and deacons frequently cast decisive votes in the name of absent bishops whom they repre-
sented; at the Council of Trent, however, such procurators were admitted only with great limitations, and at the Vatican Council they were even excluded from the council hall.

Besides voting members, every council admits, as consultors, a select number of doctors in theology and canon law. In the Council of Constance the consultors were allowed to vote. Other clerics have always been admitted as notaries. Lay people may be, and have been, present at councils for various reasons, but never as voters. They gave advice, made complaints, sometimes tried to influence the decisions. Since the Roman emperors had accepted Christianity, they assisted either personally or through deputies (commissarii). Constantine the Great was present in person at the First General Council; Theodosius II sent his representatives to the third, and Emperor Marcian sent his to the fourth, at the sixth session of which himself and the Empress Pulcheria assisted personally. Constantine Pogonatus was present at the sixth; the Empress Irene and her son Constantine Porphyrogenitus only sent their representatives to the seventh, whereas Emperor Basil, the Macedonian, attended at the seventh, sometimes through his deputies. Only the Second and the Fifth General Synods were held in the absence of the emperors or imperial commissaries, but both Theodosius the Great and Justian were at Constatinople while the councils were sitting, and kept up constant intercourse with them, and the same was the case with synods, even at provincial synods, of frequent occurrence. The motive and object of the royal presence were to protect the synods, to heighten their authority, to lay before them the needs of particular Christian states and countries.

This laudable and legitimate cooperation led by degrees to interference with the courts' rights in conciliar matters. The Eastern Emperor Michael claimed the right to summon councils without obtaining the pope's consent, and to take part in them personally or by proxy. But Pope Nicholas I resisted the pretensions of Emperor Michael, pointing out to him, in a letter (865), that his imperial predecessors had only been present at general synods dealing with matters of faith, and from that fact drew the conclusion that all other synods should be held without the emperor's or his commissaries' presence. A few years later the Eighth General Synod (Can. xvii: Hefele, IV, 423) adopted the doctrine that no council could be held without the emperor's presence—the emperors had only been present at general councils—and that it was not right for secular princes to witness the condemnation of ecclesiastics (at provincial synods). As early as the fourth century the bishops greatly complained of the anarchy of Constantine to be fat, in imposing his comissary on the Synod of Tyre (335). In the West, however, secular princes were present even at national synods, e.g. Sisernand, King of the Spanish Visigoths, was at the Fourth Council of Toledo (586) and King Chintulan at the fifth (588); Charlemagne assembled bishops of Frankfort (591) and of Reims (597) at the Synod of Whitby (Collatio Pharen- sia) in 664. But step by step Rome established the principle that no royal commissary may be present at any council, except a general one, in which "faith, reformation, and peace" are in question.

(b) Quo aura number of members. The number of bishops present required to constitute an eccumenical council cannot be strictly defined, nor need it be so defined, for eccumenicity chiefly depends on cooperation with the head of the Church, and only secondarily on the number of co-operators. It is physically impossible to bring together all the bishops at one time. But the Icath is any standard by which to determine even an approximate number, or proportion, of prelates necessary to secure eccumenicity. All should be invited, no one should be debarred, a somewhat conside-erable number of representatives of the several provinces and countries should be actually present: this may be laid down as a practicable theory. But the ancient Church did not conform to this theory. As a rule only the patriarchs and metropolitans received a formal summons to attend, and the rest acted as their suffragans. At Ephesus and Chalcedon the time between the convocation and the meeting of the council was too short to allow of the Western bishops being invited. As a rule, but very few Western bishops were personally present at any of the first eight general synods. Occasionally, e.g., at the sixth, their absence was remedied by sending deputies with precise instructions arrived at in a previous council held in the West. What gives those Eastern synods their eccumenical character is the co-operation of the pope as head of the universal, and, especially, of the Western Church. This circumstance, so remarkably prominent in the Councils of Ephesus and Chalcedon, affords the best proof that, in the sense of the Church, the essential constituent element of eccumenicity is less the proportion of bishops present to bishops absent than the organic connexion of the council with the pope. The papal headship is the formal element of councils.

(c) Papal headship the formal element of councils.——It is the action of the pope that makes the councils eccumenic. That action is the exercise of his office of supreme teacher and ruler of the Church. Its necessity results from the fact that no authority is supreme unless it bears the stamp of the pope; be alone can bind all the faithful. Its sufficiency is equally manifest: when the pope has spoken ex cathedra to make his own the decisions of any council, regardless of the number of its members, nothing further can be wanted to make them binding on the whole Church. The earliest enunciation of the principle is found in the letter of the Council of Sardica (343) to Pope Julius I, and was often quoted, since the beginning of the fifth century, as the (Nicene) canon concerning the necessity of papal co-operation in all the more important conciliar Acts. The Church historian Socrates (Hist. Eccl., II, xvii) makes Pope Julius say, in reference to the Council of Antioch (341), that the law of the Church (i.e., the Church's) forbids "the churches to pass laws contrary to the judgment of the Bishop of Rome", and Sozomen (III, x) likewise declares "it is to be a holy law not to attribute any value to things done without the consent of the Bishop of Rome". Pope Julius is here quoted by both Socrates and Sozomen directly refers to an existing ecclesiastical custom, and, in particular, to a single important case (the deposition of a patriarch), but the underlying principle is as stated.

Papal co-operation may be of several degrees: to be effective in stamping a council as universal it must amount to taking over responsibility for its decisions by giving them formal confirmation. The Synod of Constantinople (381) in which the Nicene Creed received its present form, the one used by the whole Church (and no claim to be universal was made by the Western bishops), before Pope Damascus and the Western bishops had seen its full Acts they condemned certain of its proceedings at an Italian synod, but on receiving the Acts, Damascus, so we are told by Photius, confirmed them. Photius, however, is only right with regard to the synod. (That is where the authority of the synod is at stake.) But with the council Damascus must have been rejected by Leo the Great and even by Gregory the Great (about 400). A proof that the Synod of Constantinople enjoyed papal sanction may be drawn from the way in which the Roman legates at the Fourth General Synod (Chalcedon, 451) allowed, although without any previous notice, the bishops at the same time they energetically protested against the canons of the council. It was on account of the papal approbation of the Synod that, in the sixth century, Pope Vigilius, Pelagius II, and Gregory the Great
declared this council œcumcnical, although Gregory still refused to sanction its canons. The First Synd of Constantinople presents, then, an instance of a minimum of papal co-operation impressing on a particular council the mark of universality. The normal expectation of the former was to achieve the consent of the Church more than a post-factum acknowledgment.

The pope's office and the council's function in the organization of the Church require that the pope should call the council together, preside over and direct its labours, and finally promulgate its decrees to the universal Church as expressing the mind of the whole teaching body guided by the Holy Ghost. Instances of such normal, natural, perfect co-operation occur in the five Lateran councils, which were presided over by the pope in person; the personal presence of the highest authority in the Church, his direction of the deliberations, and approbation of the decrees, stamp the conciliar proceedings throughout as the function of the Magisterium Ecclesiae in its most authoritative form. Councils in which the pope is represented by legates are, indeed, also representative of the teaching body of the Church; but the representation is not absolute or adequate, is no real concentration of its whole authority. They act in the name, not with the whole power of the teaching Church, and their decrees become universally binding only through an act, either antecedent or consequent, of the pope. The true difference between councils presided over personally and by proxy is marked in the form in which their decrees are promulgated: when the pope has been present the decrees are published in his own name with the additional formula: sacró approbáta Concilii; when papal legates have presided the decrees are attributed to the synod (S. Synodus declarat, definit, decernit).

VI. FACTORS IN THE POPE'S CO-OPERATION WITH THE COUNCIL.—We have seen that no council is œcumcnical unless the pope has made it his own by co-operation, which admits of a minimum and a maximum, consequent of various degrees of perfection. Catholic writers could have saved themselves much trouble if they had always based their apologetics on the simple and evident principle of a sufficient minimum of papal co-operation, instead of endeavouring to prove, at all costs, that a maximum is both required in principle and demonstrable in history. The two decisive factors in the success of the pope in council are the convocation, direction, and confirmation of the council by the pope; but it is not essential that each and all of these factors should always be present in full perfection.

(a) Convocation.—The juridical convocation of a council may in the hands of the emperors, it was to be expected that the pope was sometimes induced—if not forced—by circumstances to make his authorisation suit the imperial wishes and arrangements.

After studying the principles it is well to see how they worked out in fact. Hence the following historical summary of the convocation of the first eight general councils:

(1) Eusebius (Vita Constantinii, III, vi) informs us that the writs of convocation to the First General Synod were issued by Emperor Constantine, but as not one of those writs has come down to us, it remains doubtful whether or not they mentioned any previous consultation with the pope. It is, however, an undeniable fact that the Sixth General Synod (680) plainly affirmed that the Council of Nicaea had been convened by the emperor and Pope Sylvester (Mansi, Coll. Conc., XI, 661). The same statement appears in the life of St. Sylvester found in the “Libri Pontificum”, but this evidence need not be pressed, as it is not from the council being, from the circumstances in which it was given, of sufficient strength to carry the point. For the Sixth General Council took place in Constan-
tine, at a time when the bishops of the imperial city already attempted to rival the bishops of Old Rome, and the vast majority of its members were Greeks; their message is therefore entirely free from the mendacity of the Western bishops, or prejudice. The solemnity must be accepted as a true presentment of fact.

Rufinus, in his continuation of Eusebius' history (I, 1), says that the emperor summoned the synod ex sacerdotum sententia (on the advice of the clergy); it is but fair to suppose that if he consulted several prelates he did not meet with a unanimous assent. The consequence of a letter of the pope to Theodosius the Great is based on a confusion. The document here brought in as evidence refers to the synod of the following year, which was indeed summoned at the instigation of the pope and the Synod of Aquileia, but was not an ecumenical council.

(2) The Second General Synod (381) was not, at first, intended to be ecumenical; it only became so because it was accepted in the West, as has been shown above. It was not summoned by Pope Damascus, as is often contended, for the assertion that the assent of the Western bishops, to the synodal, is the consequence of a letter of the pope to Theodosius the Great is based on a confusion. The document here brought in as evidence refers to the synod of the following year, which was indeed summoned at the instigation of the pope and the Synod of Aquileia, but was not an ecumenical council.

(3) The Third General Council (Ephesus, 431) was convoked by Emperor Theodosius II and his Western colleague Valentinian III; this is evident from the Acts of the council. It is equally evident that Pope Celestine I gave his consent, for he wrote (18 May, 431, Ep. 1. 41): "I wish to send my legates to the bishops on account of the synod. Let them act with the consent of the council, but that he would send his representatives. And in his epistle of 8 May to the synod itself, he insists on the duty of the bishops present to hold fast to the orthodox faith, expects them to accede to the sentence of he has already pronounced on Nestorius, and adds that he has sent his legates to execute that sentence at Ephesus. The members of the council, in the wording of their solemn condemnation of Nestorius: "Urged by the Canons and conforming to the Letter of our most holy Father and fellow servant Celestine the Roman bishop, we have framed this sorrowful sentence against Nestorius." They express the same sentiment where they say that "the epistle of the Apostolic See (to Cyril, communicated to the council) already contains a judgment and a rule (νόημα και νόμος) on the case of Nestorius," and that they, the bishops in council—have executed the judgment of Cyril. All this manifested the bishops' conviction that the pope was the moving and quickening spirit of the synod.

(4) How the Fourth General Synod (Chalcedon, 451) was brought together is set forth in several writings of Pope Leo I and Empress Theodosius II and Marcian. Leo asked Theodosius to prepare a council composed of bishops from all parts of the world, to meet, preferably, in Italy. He repeated the same request, first made 13 October, 449, on the following feast of Christmas, and prevailed on the Western Emperor Valentinian II together with his empress and his mother, to support it at the Byzantine Court. Once more (in July, 450) Leo renewed his request, adding, however, that the council might be dispensed with if all the bishops were to make a profession of the orthodox faith without being united in council. About this time Theodosius II died and was succeeded by his sister, St. Pulcheria, and her husband Marcian. Both at once informed the pope of their willingness to summon the council, Marcian specially asking him to state in writing whether he could assist at the synod in person or through his legates, so that the necessary writs of convocation might be issued to the Eastern bishops. By this time, however, the church had been reunited in the Eastern Church; nearly all the bishops who had taken part in the Robber Synod had now repented of their aberration and signed, in union with their orthodox colleagues, the "Epistola dogmatica" of Leo to Flavian, by this act rendering the need of a council less urgent. Besides, the Iuns were just then invading the West, preventing many Latin bishops, whose presence at the synod was most desirable, from leaving their flocks to undertake the long journey to Chalcedon. Other motives induced the pope to postpone the synod, e.g. the fear that it might be made the occasion by the bishops of Constantinople to improve their hierarchical position, a fear well justified by subsequent events. But Marcian had already summoned the synod, and therefore gave his instructions as to the business to be transacted. He was then entitled to say, in a letter to the bishops who had been at the council that the synod had been brought together "ex precepto christiannorum principum et ex consensu apostolicae sedis" (by order of the Christian princes and with the consent of the Apostolic See). The emperor himself wrote to Leo that the synod had been held by his authority (te auctore), and the bishops of Moesia, in a letter to the Byzantine Emperor Leo, said: "At Chalcedon many bishops assembled by order of Leo, the Roman pontiff, who is the true head of the bishops.

(5) The Fifth General Synod was planned by Justinian I with the consent of Pope Vigilius (q.v.), but on account of the emperor's dogmatic pretensions, quarrels arose and the pope refused to be present, although repeatedly invited. His Constitutum of 14 August, 553, to the pope, do not appear to have reached him. Justinian anathematized Theodore of Mopsuestia and Theodoret, led to open opposition between pope and council. In the end all was righted by Vigilius approving the synodal decrees.

(6, 7, 8) These three synods were each and all called by the emperor and in the time with the consent and assistance of the Apostolic See. (See Constantinople, Councils of; Nicea, Councils of.)

(b) Direction.—The direction or presidency of councils belongs to the pope by the same right as their convocation and constitution. Were a council directed in its deliberations and acts by anyone independent of the pope and acting entirely on his own responsibility, such a council could not be the pope's own in any sense: the defect could only be made good by a consequent formal act of the pope accepting responsibility for its decisions. In point of fact, papal legates presided over all the Eastern councils, which were led by their beginning bishops' council. Every reader will obtain a clearer insight into this point of conciliar proceedings from a concrete example, taken from Hefele's introduction to his "History of the Councils":—

Pope Adrian II sent his legates to the Eighth (Ecumenical) Council (Robber Synod) (787) with an express declaration to the Emperor Basil that they were to act as presidents of the council. The legates, Bishop Donatus of Ostia, Bishop Stephen of Nepesina, and the deacon Marinus of Rome, read the papal rescript to the synod. Not the slightest objection was raised. Their names took precedence in all the protocols; they determined the duration of the several sessions, gave leave to make speeches and to read documents and to admit other persons; they put the leading questions, etc. In short, their presidency in the first five sessions cannot be disputed. But at the sixth session Emperor Basil was present with his two sons, Constantine and Leo, and, as the Acts relate, received the presidency. These same Acts, however, at once clearly distinguish the emperor and his sons from the synod when, after naming them, they continue: conveniente sancto ac universalis synodo (the holy and universal synod now meeting), thus disassociating the lay ruler from the council properly. The names of the legates continue to appear first among the members of the synod, and it is they who in those latter sessions determine the matters for discussion, subscribe the Acts before anyone else, expressly as presidents of the
councils, whereas the emperor, to show clearly that he did not consider himself the president, would only subscribe after all the bishops. The papal legates hesitated at the council as a judge (judex), but merely as a witness and presided. Hence it may be contended that the Eastern patriarchs, Ignatius of Constantinople, and the representatives of the other Eastern patriarchs, in some degree participated in the presidency: their names are constantly associated with those of the Roman legates and clearly distinguished from those of the other metropolitans and bishops. They, as it were, form with the papal legates a board of directors, fix with him the order of proceedings, determine who shall be heard, subscribe, like the legates, before the emperor, and are entered in the reports of the several sessions (Epitreus, c. 49), though they are not called presidents. All this, however, granted, the fact still remains that the papal legates unmistakably hold the first place, for they are always named first and sign first, and—a detail of great importance—for the final subscription they use the formula: haec sanctae et universae synodi synodo presidens (presiding over this holy and universal synod), while Ignatius of Constantinople and the representatives of the other patriarchs claim no presidency, but word their subscription thus: suscipiens et omni- bus quae ab eo judicata et scripta sunt conclusio et de/iniens subscripti. (receiving this holy and universal synod and agreeing with all it has judged and written, and defining I have signed). If, on the other hand, this form of subscription differs from that of the president, it differs no less, on the other, from that of the bishops. These, like the emperor, have without exception used the formula: suscipiens (syndom) subscripti. (receiving the synod I have signed), omitting the otherwise conclusio (which was used to mark a decisive vote (votum decistium).

Hefele gives similar documentary accounts of the first eight general synods, showing that papal legates always presided over them when occupied in their proper business of deciding questions on faith and discipline. The names of the other metropolitans, which was generally acknowledged. Thus, the Emperor Theodosius II, in his edict addressed to the Council of Ephesus, that he had sent Count Candidian to represent him, but that this imperial commissary was to take no part in dogmatic disputes since “it was unlawful and wrong for them to mingle in ecclesiastical inquiries.” The Council of Chalcedon acknowledged that Pope Leo, by his legates, presided over it as “the head over the members.” At Nicaea, Hosius, Vitus, and Vincentius, as papal legates, signed before all other members of the council. The right of presiding and directing implies that the pope, if he chooses to make a full use of his powers, can determine the subject matter to be dealt with by the council, prescribe rules for conducting the debate, and generally order the whole business as seems best to him. Hence no conciliar decree is legal, and cannot be considered valid without the positive consent—of the pope or his legates. The consent of the legates alone, acting without a special order from the pope, is not sufficient to make conciliar decrees at once perfect and operative; what is necessary is the pope’s own consent. For this reason no decree can become illegitimate and null in law on account of pressure brought to bear on the assembly by the presiding pope, or by papal legates acting on his orders. Such pressure, if coming from the outside, would be null, since the internal, natural principle of order through the use of lawful power, does not amount to external, unnatural coercion, and, therefore, does not invalidate the Acts due to its exercise.

Examples of councils working at high pressure, if the expression may be used, without swilling their oaths, are of frequent occurrence. Most of the early councils were convened to execute decisions already finally fixed by the pope, no choice being left the assembled Fathers to arrive at another decision. They were forced to conform their judgment to that of Rome, with or without discussion. Should papal pressure go beyond the limits of this magnitude and of the importance of the matters under discussion, the effect would be, not the invalidation of the council’s decrees, but the paralyzing of its moral influence and practical usefulness. On the other hand, the fact that a synod is, or has been, acting under the leadership of its Divinely appointed head, is the best guarantee of its freedom from unnatural disturbances, such as intrigues from below or coercion from above. In the same way violent interference with the papal leadership is the grossest attack on the council’s natural freedom. Thus the Robber Synod of Ephesus (Frank, 431) was of such a nature that it was duly authorized by the presence of papal legates, was declared invalid and null by those same legates at Chalcedon (451), because the prejudiced Emperor Theodosius II had removed the representatives of the pope, and entrusted the direction of the council to Dioscorus of Alexandria, as most unjustly in point.

(c) Confirmation.—Confirmation of the conciliar decrees is the third factor in the pope’s necessary cooperation with the council. The council does not represent the teaching Church till the visible head of the Church has given his approval, for, unapproved, it is but a headless, soulless, impersonal body, unable to give its decisions the binding force of laws for the whole Church, or the finality of judicial sentences. With the papal approval, on the contrary, the council’s pronouncements represent the fullest effort of the teaching and ruling Church, a judicium plenus et sacramentum, beyond which no power can go. Confirmation being the final touch of perfection, the success of this synod and the very life of conciliar decrees, it is necessary that it should be a personal act of the highest authority, for the highest authority cannot be delegated. So much for the principle, or the question of right. When we look for its practical working throughout the history of councils, we find the limits of the way it has been applied under the influence of varying circumstances.

(1) Councils over which the pope presides in person require no further formal confirmation on his part, for their decisions formally include his own as the body includes the soul of the council. The Vatican Council of 1869–70 offers an example in point.

(2) Councils over which the pope presides through his legates are not identified with himself in the same degree as the former. They constitute separate, dependent, representative tribunals, whose findings only become final through ratification by the authority for which they act. Such is the theory. In practice, however, the papal confirmation is, or may be, presumed in the following cases:

(a) When the council is convened for the express purpose of carrying out a papal decision previously issued at, or even through, the conciliar positive consent—of the pope or his legates. The consent of the legates alone, acting without a special order from the pope, is not sufficient to make conciliar decrees at once perfect and operative; what is necessary is the pope’s own consent.

(b) When the council is convened as an early synod; or when the legates give their consent in virtue of a special public instruction emanating from the pope; in these circumstances the papal ratification pre-exists, is implied in the conciliar decision, and need not be formally renewed after the council.

It
may, however, be superadded *ad abundatum*, e. g. the confirmation of the Council of Chalcedon by Leo I.

(b) The necessary consent of the Apostolic See may also be presumed when, as generally at the Council of Trent, the legates have personal instructions from the pope on each particular question coming up for decision, and act conformably, i. e. if they allow no decision to be taken unless the pope’s consent has previously been accorded. For a similar result as to the importance of the Pope’s consent, we also find it in the decrees of the Chalcedon Council and through our office this Apostolic See, consent to, and confirm, by the authority of Blessed Peter, those things which have been defined, as being finally set by the Lord Himself on the solid rock which is Christ.

No event in the history of the Church better illustrates the necessity of the See of Peter for the operation of the Church, in particular, confirmation, than the controversies which in the sixth century raged about the Three Chapters. The Three Chapters were the condemnation (1) of Theodore of Mopsuestia, his person, and his writings; (2) of Theodoret’s writings against Cyril and the Council of Ephesus; (3) of a letter from Ibas to Maris the Persian, also against Cyril and the council. Theodore anticipated the heresy of Nestorius; Ibas and Theodoret were indeed restored at Chalcedon, but only after they had given orthodox explanations and shown that they were free from Nestorianism. The two points in debate were: (1) Did the Council of Chalcedon acknowledge the orthodoxy of the said Three Chapters? (2) How, i. e. by what test, is the point to be settled? Now the two contending parties agreed in the principle of the test: the approval of the council stands or falls with the approbation of the pope’s legates and of Pope Leo I himself. Defenders of the Chalcedon, e. g. Zeno, refused to accept as authentic any letter or act of Leo I.

(c) Presumed consent can but rarely apply with the same efficacy to each and all of the decisions of an important council. A solemn papal ratification puts them all on the same level and removes all possible doubt. Lastly the papal ratification formally promulgates the sentence of the council as an article of faith to be known and accepted by all the faithful; it brings to light and public view the intrinsic ecclesiastical authority of the council; it is the natural, official, indisputable criterion, or test, of the perfect legality of the conciliar transactions or conclusions. If we bear in mind the numerous disturbing elements at work in and around an ecumenical council, the conflicting religious, political, scientific, and personal interests contending for supremacy, or at least eager to secure supremacy, in the affairs of the Church, or, add to these the importance of a papal ratification to crush the endless chicanery which otherwise would endanger the success and efficacy of the highest tribunal of the Church. Even they who refuse to see in the papal confirmation an authentic testimony and sentence, declaring infallibly the truth in the content of the council, as a dogmatic fact, must admit that it is a sanative act and supplies possible defects and shortcomings; the ecumenical authority of the pope is sufficient to impart validity and infallibility to the decrees he makes by officially ratifying them. This was done by Pope Vigilius for the Fifth General Synod. Sufficient proof for the sanatory efficacy of the papal ratification lies in the absolute sovereignty of the pope and in the infallibility of his ex-cathedra pronouncements. Should it be argued, however, that the sentence of an ecumenical council is the only absolute, final, and infallible sentence, even then, and then more than ever, the papal ratification would be necessary. For in the transactions of an ecumenical council the pope plays the principal part, and if any deficiency in his action, especially in the exercise of his own special prerogatives, were apparent, the labours of the council would be in vain. The faithful have a right to act as infants until the authentic documents not authenticated by the seal of the fisherman, or the Apostolic See, which now wields the authority of St. Peter and of Christ. Leo II beautifully expresses these ideas in his ratification of the Sixth General Council: “Because this great and universal synod has most fully proclaimed the definition of the right faith, which the Apostolic See of St. Peter the Apostle, whose office we, though unequal to it, are holding, also reverently and with all due respect of its authority, has made known through the office this Apostolic See, consent to, and confirm, by the authority of Blessed Peter, those things which have been defined, as being finally set by the Lord Himself on the solid rock which is Christ.”

VII. BUSINESS METHODS.—The way in which councils transact business now demands our attention. Here as in most things, there is an ideal which is never completely realized if it is not realized at all. In councils, the ideal is to have a set of rules regulated in such a way that an officer, the bishop, or the presiding officer, is present at every meeting, and that the business is transacted in an orderly manner, with the decisions clearly recorded and authenticated.

(a) The facts.—It has been sufficiently shown in the foregoing section that the pope, either in person or by deputy, directs the transaction of conciliar business. But we must remember that the pope is not a mere executive officer, but the supreme judge of the Church. Therefore, when we look for a fixed order or set of rules regulating the proceedings, we have to come down to the
Vatican Council to find an official Ordo concilii ecumenici and a Methodus servanda in prisco principio, etc. In accordance with the mandate of after the Fathers and adjusted by them to the particular objects and circumstances of the council. The so-called Ordo celebrandi Concilii Tridentini is a compilation posterior to the council, written by the conciliar secretary, A. Massarelli; it is a record of what has been done, not a rule of what should be done. Some needed rules were, however, already established at the reform councils of the fifteenth century as a substitute for the absent directing power of the pope. The substance of these rulings is given in the "Ceremoniale Romanum" of Augustinus Patrizius (d. 1490). The institution of "congregations" dates from the first council of Constance (1414). At those councils all the meetings of the Fathers were called indiscriminately sessiones or actiones, but since Constance the term session has been restricted to the solemn meetings at which the final votes are given, while all meetings for the purpose of consultation or provisional voting are termed congregations.

The distinction between general and particular congregations likewise dates from Constance, where, however, the particular congregations assumed a form different in spirit and composition from the practice of earlier and later councils. They were simply gatherings of "nations" (first four, then five) present at the council; their deliberations were to form national votes which were presented in the general assembly, whose decisions conformed to a majority of such votes. The particular congregations of more recent councils were merely consultative assemblies (committees, commissions) brought together by appointment or invitation in order to deliberate on special matters. At Trent there were congregations of prelates and congregations of theologians, both partly for dogs, partly for discipline. The congregations of prelates were either "deputations", i.e. committees of specially chosen experts, or conciliar groups, usually three, into which the council divided for the purpose of facilitating discussion.

The official ordo of the Vatican Council confirmed the Tridentine practice, leaving, however, to the initiative of the prelates the formation of groups of the. The voting by "nations", peculiar to the reform councils, has also been abandoned in favour of the traditional voting by individuals (capitola). At the Vatican Council there were seven "commisions" consisting of theologians from all countries, appointed a year before the actual meeting of the Council. The whole council divided into the various matters to be laid before the council. The object of these congregations is sufficiently described by their titles: (1) Congregatio cardinalitatis directrix; (2) Commissione congregarum; (3) politico-eclesiastica; (4) pro ecclesia et missionibus Orientis; (5) pro Regularibus; (6) theologica dogmatica; (7) pro disciplinae ecclesiastic (i.e. a general directive cardinalitial congregation, and several commissions for ceremonies, politico-eclesiastical affairs, the churches and missions of the Orient, the regular orders, dogmatic theology, ecclesiastical discipline). On the basis of their labours were worked out the schemata (drafts of decrees) to be discussed by the council. Within the council itself there were seven "deputations": (1) Pro recipiendi et expendendi Patrum propositionibus (appointed by the pope to examine the propositions of the Fathers); (2) Judicis excusationum (Judges of excusation); (3) Judicis prop formulate propositions (to settle questions of prudence and such like); (4) deputatio pro rebus ad fidem pertinentibus (on matters pertaining to faith); (5) deputatio pro rebus discipline ecclesiastica (on ecclesiastical discipline); (6) pro rebus ordinum regularium (on religious orders); (7) pro rebus ritus orientalis et apostolicis missionibus (Oriental rites and Apostolic missions).

The acceptance of these deputations, except the first, were chosen by the council. Objections and amendments to the proposed schemata had to be handed in and writing to the responsible deputation which considered the matter and modified the schema accordingly. Anyone desiring further to improve the modified draft had to obtain from the legates permission to propose his amendments in a session, after which they were to be down in writing. If, however, ten prelates decided that the matter had been sufficiently debated, leave for speaking was refused. At this stage the amendments were collected and examined by the synodal congregation, then again laid before the general congregation to be voted on. The votes for admission or rejection were expressed by the prelates standing or remaining seated. Next the schema, reformulated in accordance with these votes, was submitted to a general congregation for approval or disapproval in toto. In case a majority of placet were given for it, it was accepted in a last solemn public session, after a final vote of placet or non placet ("it pleases", or "it does not please").

(b) The theory.—The principle which directs the practical working of a council is the perfect, or best possible, realization of its object, viz. a final judgment on the moral and dogmatic questions submitted to it; the authority and majesty of the whole teaching body of the Church. To this end some means are absolutely necessary, others are only desirable as adding perfection to the result. We deal first with these latter means, which may be called the ideal elements of the council:

(1) The presence of all the bishops of the world is an ideal notion, but the presence of a very great majority is desirable for many reasons. A quasi-complete council has the advantage of being a real representation of the whole Church, while a nearly complete council is less in law, i.e. the few members present legally represent the many absent, but only represent their juridical power, their ordinary power not being representable. Thus for every bishop absent there is an absent an authentic witness of the Faith as it is in his diocese. (2) A free and exhaustive discussion of all objections. (3) An appeal to the universal belief—i.e. the opinion of the Church as a whole. (4) Unanimity in the final vote, the result of the universal faith, as testified to by the Fathers, or of conviction gained in the debates. It is evident that these four elements in themselves would make the work of a council an ideal perfection, but it is not less evident that they are not essential to its substance, to its conciliar effectiveness. If they were necessary, we may acknowledge all councils and decrees would lose their intrinsic authority, because one or other or all of these conditions were wanting. Again, there is no standard by which to determine whether or not the number of assisting bishops was sufficient and the debates have been exhaustive; nor do the Acts of the councils always inform us of the unanimity of the final decisions or of the way in which it was obtained. We are each of these four elements essential to an authoritative council no such council could have been held, in many cases, when it was none the less urgently required by the necessities of the Church. Authors who insist on the ideal perfection of councils only succeed in undermining their authority, which is, perhaps, the object they aim at. Their fundamental error is a failure to recognize the nature of the council. The existence of the function of the council as a witness to, and teaching of, the generally accepted faith, whereas it is essentially a juridical function, the action of judges as well as of witnesses of the Faith. This leads us to consider the essential elements in conciliar action.
COUNCILS

IV.

From the notion that the council is a court of judges the following inferences may be drawn: (1) The bishops, in giving their judgment, are directed only by the direct inspiration of the Holy Ghost; no previous consent of all the faithful or of the whole episcopate is required. In unity with their head they are one solid college of judges authoritatively constituted for united, decisive action—a body entirely different from a body of simple witnesses. (2) This being admitted, the council's decision is of the same nature as that of any other college whose members were called but failed to take their seats, provided the number of those actually present is not altogether inadequate for the matter in hand. Hence their resolutions are rightly said to rest on universal consent: universali consensus constituit, as the formula runs. Further, on the same supposition, the college of judges is subject to the rule obtaining in all assemblies constituted for framing a judicial sentence or a common resolution, due regard being paid to the special relations, in the present instance, between the head and the members of the college: the co-operative verdict embodies the opinion of the majority, including the head, and in law stands for the verdict of the whole assembly; it is communis sensus constitutum (established by common consent). A majority verdict, even headed by papal legates, if disconnected from the personal action of the pope, still fails short of authoritative decision for the whole Church, and cannot claim infallibility. Were the verdict unanimous, it would still be imperfect and fallible, if it did not receive the papal approbation. The verdict of a majority, therefore, not endorsed by the pope, has no binding force on either the dissentient members present or the absent members, nor is the pope bound in any way to endorse it. Its only value is that it justifies the pope, in case he approves it, to say that he confirms the decision of a council, or gives his own decision sacro approbante concilio (with the consent of the council). This he could not say if he annulled a decision taken by a majority including his legates, or if he gave a casting vote between two equal parties. A unanimous conciliatory decision, as distinct from a simple majority decision, may under certain circumstances, be, in a way, binding on the pope and compel his approbation—by the compelling power, not of a superior authority, but of the Catholic conscience in the name of the Church. To exert such power the council's decision must be clearly and unmistakably the reflex of the faith of all the absent bishops and of the faithful.

To gain an adequate conception of the council at work it should be viewed under its twofold aspect of journalist and legislator. In the first aspect the conciliar assembly is primarily a judge who pronounces a verdict conjointly with the pope, and, at the same time, acts more or less as witness in the case. Its position is similar to that of St. Paul towards the first Christians: quod acceptisset a me per mullos testes. In relation to the pope the council is but an assembly of authentic witnesses and competent counsellors whose influence on the papal sentence is that of the mass of evidence which they represent or of the preparatory judgment which they pronounce; it is the only way in which numbers of judges can influence one another. Such influence lessens neither the dignity nor the efficiency of any of the judges; on the other hand it is never required, in councils or elsewhere, to make their verdict unassailable. The Vatican Council, not excluding the fourth session in which papal infallibility was defined, comes nearer than any former council to the ideal perfection just described. It offered to the legislative portion of the conciliar assembly, both absolutely and in proportion to the totality of bishops in the Church; it allowed and exercised the right of discussion to an extent perhaps never witnessed before: it appealed to a general tradition, present and past, containing the effective principle of the doctrine under discussion, viz. the duty of submitting in obedience to the Holy See and of conforming to its teaching in last resort, not in absolute unanimity, and secured the greatest majority—nine-tenths—for its preparatory judgment.

VIII. INFALLIBILITY OF GENERAL COUNCILS.—All the arguments which go to prove the infallibility of the Church apply with their fullest force to the infallibility of general councils in union with the Holy Ghost.

For considering the conciliar infallibility a decision of the highest and most supreme type, irrespective of the life-energy of the teaching Church actuated and directed by the Holy Ghost. Such was the mind of the Apostles when, at the Council of Jerusalem (Acts, xv, 28), they put the seal of supreme authority on their decisions in attributing them to the joint action of the Spirit of God and of themselves: Kunnt vos, omnium Spiritus sancto et nobis (It hath seemed good to the Holy Ghost and to us). This formula and the dogma it enshrines stand out brightly in the deposit of faith and have been carefully guarded throughout the many storms raised in councils by the play of the human element. From the earliest times they who rejected the decisions of councils were themselves rejected by the Church. Emperor Constantine saw in the decrees of Nicaea “a Divine commandment” and Athanasius wrote to the bishops of Africa: “What God has spoken through the Council of Nicaea endures for ever.” (Eph., xiii, 19.) On the same opposition, the college of judges is subject to the rule obtaining in all assemblies constituted for framing a judicial sentence or common resolution, due regard being paid to the special relations, in the present instance, between the head and the members of the college: the co-operative verdict embodies the opinion of the majority, including the head, and in law stands for the verdict of the whole assembly; it is communis sensus constitutum (established by common consent). A majority verdict, even headed by papal legates, if disconnected from the personal action of the pope, still fails short of authoritative decision for the whole Church, and cannot claim infallibility. Were the verdict unanimous, it would still be imperfect and fallible, if it did not receive the papal approbation. The verdict of a majority, therefore, not endorsed by the pope, has no binding force on either the dissentient members present or the absent members, nor is the pope bound in any way to endorse it. Its only value is that it justifies the pope, in case he approves it, to say that he confirms the decision of a council, or gives his own decision sacro approbante concilio (with the consent of the council). This he could not say if he annulled a decision taken by a majority including his legates, or if he gave a casting vote between two equal parties. A unanimous conciliatory decision, as distinct from a simple majority decision, may under certain circumstances, be, in a way, binding on the pope and compel his approbation—by the compelling power, not of a superior authority, but of the Catholic conscience in the name of the Church. To exert such power the council's decision must be clearly and unmistakably the reflex of the faith of all the absent bishops and of the faithful.

To gain an adequate conception of the council at work it should be viewed under its twofold aspect of journalist and legislator. In the first aspect the conciliar assembly is primarily a judge who pronounces a verdict conjointly with the pope, and, at the same time, acts more or less as witness in the case. Its position is similar to that of St. Paul towards the first Christians: quod acceptisset a me per mullos testes. In relation to the pope the council is but an assembly of authentic witnesses and competent counsellors whose influence on the papal sentence is that of the mass of evidence which they represent or of the preparatory judgment which they pronounce; it is the only way in which numbers of judges can influence one another. Such influence lessens neither the dignity nor the efficiency of any of the judges; on the other hand it is never required, in councils or elsewhere, to make their verdict unassailable. The Vatican Council, not excluding the fourth session in which papal infallibility was defined, comes nearer than any former council to the ideal perfection just described. It offered to the legislative portion of the conciliar assembly, both absolutely and in proportion to the totality of bishops in the Church; it allowed and exercised the right of discussion to an extent perhaps never witnessed before: it appealed to a general tradition, present and past, containing the effective principle of the doctrine under discussion, viz. the duty of submitting in obedience to the Holy See and of conforming to its teaching in last resort, not in absolute unanimity, and secured the greatest majority—nine-tenths—for its preparatory judgment.

VIII. INFALLIBILITY OF GENERAL COUNCILS.—All the arguments which go to prove the infallibility of the Church apply with their fullest force to the infallibility of general councils in union with the Holy Ghost.

For considering the conciliar infallibility a decision of the highest and most supreme type, irrespective of the life-energy of the teaching Church actuated and directed by the Holy Ghost. Such was the mind of the Apostles when, at the Council of Jerusalem (Acts, xv, 28), they put the seal of supreme authority on their decisions in attributing them to the joint action of the Spirit of God and of themselves: Kunnt vos, omnium Spiritus sancto et nobis (It hath seemed good to the Holy Ghost and to us). This formula and the dogma it enshrines stand out brightly in the deposit of faith and have been carefully guarded throughout the many storms raised in councils by the play of the human element. From the earliest times they who rejected the decisions of councils were themselves rejected by the Church. Emperor Constantine saw in the decrees of Nicaea “a Divine commandment” and Athanasius wrote to the bishops of Africa: “What God has spoken through the Council of Nicaea endures for ever.” (Eph., xiii, 19.) On the same opposition, the college of judges is subject to the rule obtaining in all assemblies constituted for framing a judicial sentence or a common resolution, due regard being paid to the special relations, in the present instance, between the head and the members of the college: the co-operative verdict embodies the opinion of the majority, including the head, and in law stands for the verdict of the whole assembly; it is communis sensus constitutum (established by common consent). A majority verdict, even headed by papal legates, if disconnected from the personal action of the pope, still fails short of authoritative decision for the whole Church, and cannot claim infallibility. Were the verdict unanimous, it would still be imperfect and fallible, if it did not receive the papal approbation. The verdict of a majority, therefore, not endorsed by the pope, has no binding force on either the dissentient members present or the absent members, nor is the pope bound in any way to endorse it. Its only value is that it justifies the pope, in case he approves it, to say that he confirms the decision of a council, or gives his own decision sacro approbante concilio (with the consent of the council). This he could not say if he annulled a decision taken by a majority including his legates, or if he gave a casting vote between two equal parties. A unanimous conciliatory decision, as distinct from a simple majority decision, may under certain circumstances, be, in a way, binding on the pope and compel his approbation—by the compelling power, not of a superior authority, but of the Catholic conscience in the name of the Church. To exert such power the council's decision must be clearly and unmistakably the reflex of the faith of all the absent bishops and of the faithful.

To gain an adequate conception of the council at work it should be viewed under its twofold aspect of journalist and legislator. In the first aspect the conciliar assembly is primarily a judge who pronounces a verdict conjointly with the pope, and, at the same time, acts more or less as witness in the case. Its position is similar to that of St. Paul towards the first Christians: quod acceptisset a me per mullos testes. In relation to the pope the council is but an assembly of authentic witnesses and competent counsellors whose influence on the papal sentence is that of the mass of evidence which they represent or of the preparatory judgment which they pronounce; it is the only way in which numbers of judges can influence one another. Such influence lessens neither the dignity nor the efficiency of any of the judges; on the other hand it is never required, in councils or elsewhere, to make their verdict unassailable. The Vatican Council, not excluding the fourth session in which papal infallibility was defined, comes nearer than any former council to the ideal perfection just described. It offered to the legislative portion of the conciliar assembly, both absolutely and in proportion to the totality of bishops in the Church; it allowed and exercised the right of discussion to an extent perhaps never witnessed before: it appealed to a general tradition, present and past, containing the effective principle of
councils: He is therefore in their midst, fulfilling His promises and leading them into the truth for which they are striving. His presence, by cementing the unity of the assembly into one body—His own mystical body—gives it the necessary completeness, and makes up for any defect possibly arising from the physical absence of a certain number of bishops. The same presence strengthens the action of the pope, so that as mouthpiece of the council, he can say in truth, "it has seemed good to the Holy Ghost and to us", and consequently can, and does, put the seal of infallibility on the conciliar decree irrespective of his own personal infallibility.

Some important consequences flow from these principles. Conclavest approved by the pope have a double guarantee of infallibility: their own and that of the infallible pope. The council's dignity is, therefore, not diminished, but increased, by the definition of papal infallibility, nor does that definition imply a "circular demonstration" by which the council would make the pope infallible and the pope would render the same service to the council. It should, however, be borne in mind that the council without the pope has no guarantee of infallibility, therefore the conciliar and the papal infallibilities are not two separate and addible units, but one unit with single and indivisible excellence. The witness of Divine truth is the voice of Christ speaking through the mouth of the visible head of His mystical body or in unison, in chorus, with all its members. The united voice of the whole Church has a solemnity, impressiveness, and effectiveness, an external, circumstantial weight, which is wanting in simple ec-cathedral proclamations. It works its way into the minds and hearts of the faithful with almost irresistible force, because in the universal harmony each individual believer hears his own voice, is carried away by the powerful rhythm, and moved as by a Divine spell to follow the Agnus, the Lamb, who has essentially contributed to the definitions have, in that fact, an incentive to seal in publishing them and enforcing them in their dioceses; may the council itself is an effective beginning of its execution or enforcement in practice. For this reason alone, the holding of most Eastern councils was a moral necessity; the great distance between East and West, the difficulty of communication, the often keen opposition of the Orientals to Old Rome made a solemn promulgation of the definitions on the spot more than desirable. No aids to effectiveness were to be neglected in that central sphere.

These considerations further account for the great esteem in which conciliar definitions have always been held in the Church, and for the great authority they universally enjoyed without any detriment to, or diminution of, the authority of the Apostolic See. From of old it has been customary to place side by side, in the rule of faith, the authority of the councils and that of the pope as substantially the same. Thus, we read in the formula, or profession of faith, proposed by Pope Hormidas (514–23) on the Eastern bishops implicated in the schism of Acæius: "The first [step towards] salvation is the rule of orthodox [recte] faith and in no wise to deviate from the definitions of the Fathers [i.e. councils]. But the words of Our Lord to St. Peter (Thou art Peter ... ) cannot be passed over, for what He said has been verified by the events, since in the Apostolic See the Catholic religion has always been preserved without deviation. We must not be separated from this hope and faith, and following the constitutions of the Fathers, we anathematize all heresies, especially the heretic Nestorius, in his time Bishop of Constantinople, who was condemned in the Council of Ephesus by Blessed Celestine, Pope of Rome, and by St. Cyril, Bishop of Alexandria, and receive and approve all the letters of Leo, Pope, which he wrote concerning the Christian religion, as we have stated before, following in all things the Apostolic See and professing [predicantes] all its constitutions. And therefore I hope to be worthy to be with you [the pope] in the one communion which this Apostolic See professes, in which lies the entire, veracious, and peaceful solidity of the Christian religion. That it should be no purpose to build up a formula the infallibility of the Apostolic See is the centre from which radiates the infallibility of the councils.

X. SUBJECT MATTER OF INFAILIBILITY.—The subject matter of infallibility, or supreme judicial authority, is found in the definitions and decrees of councils, and in them alone, to the exclusion of the theological, juridical, or historical reasons upon which they are built up. These represent too much of the human element, of transient mentalities, of personal interests to claim the promise of infallibility made to the Church as a whole; it is the sense of the unchanging Church that is infallible, not the sense of individual churchmen of any age or excellence, and that sense finds expression only in the conclusions of the council approved by the pope. Decisions referring to dogmas were called in the East "sanctae constitutiones" (constitutions, statutes): those concerned with discipline were termed "canones" (canons, rules), often with the addition of "præcepta" (of laws). Heretical expressions "heresies" and "memoriae" apply to both, and the short formulae of condemnation were known as "anathemata" (anathemas).

In the West no careful distinction of terms was observed: "canones and decrea signify both dogmatic and disciplinary decisions. The Council of Trent styled itself "sacrosanctum" and its disciplinary edicta "de reformatione et de reformatione"; its dogmatic definitions "decreta", without qualification, where they positively assert the points of faith then in dispute, and "canones" when, in imitation of the ancient anathemas, they imposed an anathema ad on an individual that refused to accept the definitions. An opinion too absurd to require refutation pretends that only these latter canons (with the attached anathemas) contain the peremptory judgment of the council demanding unquestioned submission. Equally absurd is the opinion, sometimes recklessly advanced, that the Tridentine canons are no more than explanations of the canones, not proper definitions; the council itself, at the beginning and end of each chapter, declares them to contain the rule of faith. Thus Session XIII begins: "The Holy Synod forbids to all the faithful in future to believe, teach, or preach concerning the Holy Eucharist otherwise than is explained and defined in the present decree", and it ends: "As, however, it is not enough to speak the truth without discovering and refuting error, it has pleased the Holy Synod to subjoin the following canons, so that all, now knowing the Catholic doctrine, may also understand what heresies they have to beware against and avoid." The same remark applies to the chapters of the Vatican Council in its two Constitutions, as appears from the concluding words of the "proclamtion of the First Constitution and from the initial phrases of most chapters. All that may be conceded is that the chapters of both councils contain the doctrine catholica, i.e. the authorized teaching of the Church, but not always and invariably "dogmatica formula", i.e. propositions of faith defined as such.

XI. PROMULGATION.—Promulgation of conciliar decrees is necessary because they are laws, and no law is binding until it has been brought unmistakably to the knowledge of all. When they are not promulgated they are usually promulgated in the name of the synod itself; in cases of the pope presiding in person they have also been published in the form of papal decrees with the formula: "sacror universalis synodo approbata. This was done first at the Third Lateran Council, then at the Fourth and Sixth Laterans, and also partly at the Council of Constance."
Not even John XXXIII could have been deposed at Constance, had his election not been adulterated and himself suspected of heresy. John XXXIII, moreover, abdicated and by his abdication made his removal from the Apostolic See lawful. In all controversies and complaints regarding Rome the rule laid down by the Eighth General Synod should never be lost sight of: "If a universal synod be assembled and any ambiguity or controversy arise, the Church of the Romans, the question should be examined and solved with due reverence and veneration, in a spirit of mutual helpfulness; no sentence should be audaciously pronounced against the supreme pontiff of the elder Rome" (can. xxi, Hefele, IV, 421-22).

Pater Berenson wrote concerning the Book of the Council: "The Vatican Council; his article in the Kirchenlexicon, written in 1883, contains the marrow of his previous writings, while Hefele's history of the Councils is the standard work on the subject. For a deeper study of the councils a good collection of Acts is absolutely indispensable. The preparatory work on which the latter was the very imperfect one of Merlin (Paris, 1523). A second and richer collection, by the Belgian Franciscan Petrus Baeza, appeared in 1528 and 1566; a second edition was published as time went on: Sarum (Coligny, 1567, 5 vols.); Bohemian (Venice, 1585, 5 vols.); Bohemian (Coligny, 1600), with historical and explanatory notes from the American, republished in 1618, and in Paris, 1636, in 9 vols.; the Roman collection of general councils with historical notes, compiled by the Jesuit Simon (1608-1612), in 4 vols.—each council is preceded by a short history. On Bellarmine's advice Simon confined the Acts of the latter four to the four sessions of the Council; this collection is the foundation of all that followed. First among these is the Pate Collectio Rerum, in 37 vols. (1644). Then comes the still more complete collection of the Jesuits, the 'Vatican Councils' (Paris, 1674), in 17 folio vols., to which Baeza added a supplement volume (Paris, 1685 and 1697)."

Yet another and better edition is due to the Jesuit Harbouin; it is of all the most perfect and serviceable. Mauclerc's edition of the texts, two German town—with the help of many Italian scholars, brought out a new collection of 31 volumes, which, had it been finished, would have surpassed all its predecessors in merit; unfortunately it only comes down to the fifteenth century, and is unfinished, hence indexes. We refer the reader to the table above which takes up (1900) the new collection proposed (1870) by V. Palme. To a facsimile reprint of the 31 volumes of Mauclerc (Florence—Venice, 1567—1579) he still attaches so much weight. In beholding the task taken up by the Jesuits in 1608, he hopes to fill the gap left, in the Pate Collectio Rerum, and to fill the gap left, in the Pate Collectio Rerum, by the Jesuit Simon (1608-1612), in 4 vols.—each council is preceded by a short history. On Bellarmine's advice Simon confined the Acts of the latter four to the four sessions of the Council; this collection is the foundation of all that followed. J. Wilhelm.

Counsin, Evangelical (or Counsels of Perfection).—Christ in the Gospel laid down certain rules by which conduct was to be regulated. He prescribed one of His followers as the necessary condition for attaining to everlasting life. These precepts of the Gospel practically consist of the Decalogue, or Ten Commandments, of the Old Law, interpreted in the sense of the New. Besides these precepts which must be observed by all under pain of eternal damnation, He also taught certain principles which He expressly stated were not to be considered as binding upon all, or as necessary conditions without which heaven could not be attained, but rather as counsels for those who desired to go more than the minimum and to aim at Christian perfection, far as that can be obtained here upon earth. Thus (Matt. xix, 10 sq.) when the young man asked Him what he should do to obtain eternal life, Christ bade him to "keep the commandments." That was all that was necessary in the strict sense of the word, and by thus keeping the commands which God had given eternal life could be obtained. But when the young man pressed further, Christ told him: "If thou wilt be perfect, go sell what thou hast, and give to the poor." So again, in the same chapter, He speaks of "eunuchs who have made themselves eunuchs for the kingdom of heaven," and added: "He that can receive it, let him receive it." This distinction between the precepts of the Gospel,
which are binding on all, and the counsels, which are
the subject of the vocation of the comparatively few,
have ever been maintained by the Catholic Church. It
has been denied by heretics in all ages, and especially
by many Protestants in the sixteenth and following
centuries, on the ground that, inasmuch as all Chris-
tians are at all times bound, if they would keep God's
Commandments, to do their utmost, and even will fall
short of perfect obedience, no dispensation, the only way in which a partial
salvation could be saved. Such cases, however, are always
of an exceptional character. As there are three great
hindrances to the higher life, so also the counsels are three, one to oppose each. The love of riches is op-
pposed by the counsel of poverty; the pleasures of the
world by the counsel of chastity; and the fear of death is
excluded by the counsel of chastity; while the desire
for worldly power and honour is met by the counsel of
the Holy obedience. Abstinence from unlawful indul-
gence in any of these directions is forbidden to all
Christians as a matter of precept. The further voluntary
abstinence from what is in itself lawful is the sub-
ject of the counsels, and such abstinence is not in itself
meritorious, but only becomes so when it is done for
the sake of Christ, and in order to be more free to
serve him.
To sum up: it is possible to be rich, and married,
and in honour by all men, and yet keep the Com-
mandments and to enter heaven. Christ's advice is,
if we would make sure of everlasting life and desire to
conform ourselves perfectly to the Divine will, that
we should sell our possessions and give the proceeds
to others who are in need, that we should live a life of
chastity for the sake of, and, finally, should not
seek honours or commands, but place ourselves under
obedience. These are the Evangelical Counsels, and
the things which are counselled are not set forward so
much as good in themselves, as in the light of means to
an end and as the surest and quickest way of obtaining
everlasting life. (See ASCETICISM; MONASTICISM; RE-
QUIRED ORDERS.)
All writers on dogmatic or moral theology touch on the
subject more or less directly. The following especially may be
consulted: St. Thomas, Summa Theol., 1-11, Q. viii; 11-11,
Q. exxiv; Suarez, Opera (ed. 1658), XV, p. 38; Migne, Dict.
d'aristiciam, s. v.; MALDONATUS, Commentary on Matt. 21.22.
ARTHUR S. BARNES.
Counters (Lat. contrapunctum; Ger. Kontra-
punkt; Fr. contrepoint; It. contrapunto), from punc-
tum, "point"—as a note was formerly called in music—and contra, "against"; originally, punctum contra punctum, or nota contra notam—"point against
point," or "note against note." The term counter-
point originated in the fourteenth century, though
the art designated by it had been practised for several
centuries previous. The desire for harmony, that is,
the simultaneous sounding with the cantus firmus,
tenor, or theme, of one or more voices on different
intervals, first found expression in the so-called
organum, or "Organum" of Hucbald (840-930 or 932).
[See H. E. Woolridge in his "Oxford History of Music"
(1901), vol. I, p. 61, quotes from a treatise "De
divisione nature," by Stesius Erigena (d. 880), a
passage, describing the organum, which would indi-
cate that diaphony, even in contrary motion, was in
use in England previous to Hucbald's innovation,
though proof of its general use in the British Isles is
wanting.]
In the twelfth century, in France, the custom arose,
and became general among singers, of improvising one
note more independent than the cantus firmus, making up an
organum, or cantus firmus. This was known as dechans,
or discants. In England the gypnel, or cantus gemel-
tus (twin song), flourished at an even earlier date. The
gypnel consisted in adding the interval of the third
both above and below the cantus firmus. Later,
the third below was transposed an octave higher, giving
to the falsa-bordone, faux-bourdons, or false base.
All these sporadic attempts at polyphony culminated, in the fourteenth century, in the addition of different melodies to the *cantus firmus* in accordance with well-formulated laws of counterpoint which are still valid at the present day. The aim was the perfect integrity and indelibility of the voice of the *cantus firmus* in the counterpoint flow, from which, of course, resulted passing dissonances, but these were continually solved into consonances on the accentuated notes of the measure. During the course of the following century counterpoint skill reached unprecedented heights among both the numerous masters of the Netherlands and the Holy Roman Church, but its highest reaching and bore its ripest fruit in the Roman school of the sixteenth century. The polyphony for four, five, six, eight, or more parts, produced in that century, with its prevailing consonance and unifying life-giving principle, the *cantus firmus* (generally a Gregorian melody), is, in a sense, an image of the congregation or of the Church itself. We have unity in variety: each voice singing its own melody and still harmonising with every other voice, just as every member of the Church aspires to the same ideal according to his own nature and capacity. When monody came into fashion at the beginning of the eighteenth century it corresponds with an attempt to regain the simplicity of the sixteenth century, the study and practice of counterpoint was almost entirely neglected, but it received a new and wonderful development at the hands of Händel and Bach. For a time counterpoint art served masters other than the Church and her liturgy, but with the revived observation of her laws in regard to music, and with the study and revival, during the past sixty years, of her greatest musical treasures, counterpoint in accordance with its original principles, has come into its own again and is bearing fruit as it did of yore.

**Counter-Reformation.**—The subject of Counter-Reformation is to be considered under the following heads: I. Significance of the term; II. Low cbb of Catholic fortunes; III. St. Ignatius and the Jesuits, pioneers of the new movement; IV. The Council of Trent; V. Three great reforming popes; VI. The missions; VII. Progress in European States; VIII. Ecclesiastical literature; IX. Close of the period and retrospect.

**I. Significance of the Term.**—The term *Counter-Reformation* was first used in the period of Catholic revival from the pontificate of Pope Pius IV in 1550 to the close of the Thirty Years' War, 1648. The name, though long in use among Protestant historians, has only recently been introduced into Catholic handbooks. The consequence is that it already has a meaning and an application, for which a word with a different nuance should perhaps have been chosen. For in the first place the name suggests that the Catholic movement came after the Protestant; whereas in truth the reform originally began in the Catholic Church, and Luther was a Catholic Reformer before he became a Protestant. For becoming a Protestant, he did indeed hinder the progress of the Catholic reformation, but he did not stop it. It continued to gain headway in the Catholic South until it was strong enough to meet and roll back the movement from the North. Even if our Catholic turn towards Counter-Reformation was in fact a historical movement at the outset, and not only because of its continuity with previous and succeeding periods, and because it happened in an area which was new; when for a time Catholic rulers and whole States rose superior to considerations of self-interest.

The span of time during which this enthusiasm lasted may be justly considered as an historical period, and it is that which we call the period of the Counter-Reformation. It also has a meaning and the note at the outset that this period is the harder to follow not only because of its continuity with previous and succeeding periods, but also because it did not commence or end at the same time in all two countries, and in each land began, grew strong, and died away, through different causes, in different ways and degrees, and at different times, and at different rates. But while this is true, however, the dates assigned above will be shown to be perfectly accurate.
II. LOW EBBS OF CATHOLIC FORTUNES.—“From the time of St. Peter there has not been a pontificate so unfortunate as mine. How I regret the past! Pray for me.” So wrote the aged Pope and Saint, Paul IV, to Father Laynes, as he lay dying in August, 1559 (Oliver Manare, Commentarius de rebus Soc. Jesu, Florence, 1886, 125).

It never looks darker, it is said, than just before dawn; the prospects of Catholicism at that moment did indeed seem gloomy to the watchers in the Vatican. Luigi Mocenigo, Venetian ambassador a Rome, and witness to the dispute with the Pope on the situation: “In many countries, obedience to the pope has almost ceased, and matters are becoming so critical that, if God does not interfere, they will soon be desperate... Germany... leaves little hope of being cured. Poland is in almost as hopeless a state, and the words of Pope Paul IV place in France and Spain are too well known for me to speak of them, and the Kingdom of England... after returning a short time since to her old obedience, has again fallen into heresy. Thus the spiritual power of the pope is so straitened that the only remedy is a council by the common consent of all princes. Unless this reduces the affairs of religion to order, a grave calamity is to be feared.” Another Venetian diplomatist (and these men were reckoned among the most acute of their day) wrote not long after, that Cardinal Morone, when leaving for the council, said that there were no more ways to be seen “except by an excommunication by going back to Mocenigo’s words. At the same time, without attempting an account of the Reformaion itself, notice may be taken of what had hitherto been done in order to stem the religious revolution.

Germany.—Even before the Protestant Reformation the holding of synods and provincial councils had been frequent, and they had always been attentive to points requiring reform. After it, the popes had sent either a succession of legates and nuncios, such as Alexander, Campeggio, Cajetan, Contarini, Morone, who had upon the whole been men of conspicuous sincerity and prudence, or had found among the German Catholics many men of splendid eloquence and zeal, of holy life and ceaseless labour, such as Tetzl, Johann von Eck, Militza, Nausses, Jerome Emser, Julius Pflug, Johann Gropper, who had striven courageously and most effectively on the German side. The Emilian, Charles V (q. v.), had laboured upon the whole with marked devotion in favour of Catholicism, though his Italian policy, it is true, had frequently been repugnant to the wishes and the interests of the Roman pontiffs. But now he was gone, and his successors, Philip II of Spain and Ferdinand of Austria, whether their energy and devotion or the power which they wielded considered, were far inferior to him as champions and protectors of Catholicism. There had, of course, been some, indeed many, improvements on the Catholic side. The German episcopate, once so worthless, now numbered many noble characters, of whom Otto von Truchseß, Bishop of Augsburg and afterwards cardinal, was the most brilliant representative. The Dominican and Franciscan friars had showed from the first to advantage; always ready to meet the foe, they everywhere encouraged and strengthened the men of their own side, and prevented many defections (see N. Paulus, Die deutschen Domini, Dominikus, 1903). The first Jesuit too had won many notable successes. Thus while on the one hand it was evident that there was still life in the Church of Germany, while there was no intrinsic impossibility in carrying

further the good that had begun, on the whole the outlook was as dark as the retrospect. No bulwark against Protestantism had yet been found. Attempts to conclude a political peace were made at the various diets of Nuremberg, Speyer, Ratisbon, and Augsburg seemed to effect nothing better than to give the Protestants breathing time for fresh organization, and so prepare the way for new attacks and victories. The Turks were pressing on Hungary and Austria from the south-east; the French, allying themselves with the reformers, had invaded the German West, and had annexed the “three bishoprics” Metz, Verdun, and Toul. Charles had then made large sacrifices to get the Protestants to agree to “the religious peace of Augsburg” (1555), in order to combine all forces against France. The alliance was to last but was later broken, less by their conquests; Charles retreated; the power of Catholic Germany seemed to be under an eclipse. Mocenigo might well say that “Germany leaves little hope of being cured”.

Poland.—“Poland is in almost as hopeless a state,” Protestantism had lately gained ground rapidly. In 1555 a “national synod” had been held, which had requested the marriage of priests, Communion under both kinds, Mass in Polish, the abolishment of “anistes”. Such demands had but too often proved the forerunners of a lapse to Protestantism, and in fact in 1568 the weak king was driven from the throne by John Sigismund. The king had then “liberty” of conscience in Dansig and some other towns. There were wavering even among the clergy and the bishops, like James Uchanski, Archbishop of Gnesen and Primate of Poland in 1562. Fortunately the evil was not yet deeply rooted in the country. There had been a few peeping confessions of church property, nor apostasies among the actual rulers. The great bishop and cardinal, Stanislas Hosius, was rising to fame, and behind him stood a number of zealous clergy, who would in due time renew the face of the Church. Still for the moment the state of the country was very serious. (See Krause, Die Reform, und Gegenreform, im ehemaligen Königreiche Polen, Posen, 1901.)

France and Spain.—“The disorders in France and Spain are too well known for me to speak of them.” The first open revolt of the Huguenots, styled the Tumulte d’Amboise, had taken place just before Morone. His new France had been friendly with the heretics of Germany, had preserved her own religious peace. But the converts to Protestantism were numerous and well organized, and counted not a few of the highest nobility and of the blood royal, especially princes of the House of Bourbon, to which the crown, but was destined to its very long. The ruling sovereign, Francis II, was but a boy, and though for the moment the House of Lorraine and the family of the Guises brought victory to the Catholics, the position was one of evident danger, and was soon to result in a long series of wars of religion.

The troubles of Spain were essentially foreign rather than domestic. It was true that there had been some defections, as Enzinas (Dryander), Servotus, and Valdez. Though not numerous, these had been sufficient to cause much alarm and suspicion, so much so that the Archbishop of Toledo himself, Bartolomé Carranza (q. v.) was put on his trial. (Cf. Schäfer, “Gesch. des spanischen Protestantismus”, Gütersloh, 1902; Menendez y Pelayo, “Historia de los heterodoxos Españoles”, Madrid, 1880-82.) The proceedings lasted a long term of years, but in the end nothing could be proved against him. There was also danger from the Moriscos. But what gave most the internal disturbances were the results of the linking of the Netherlands, Naples, and so many parts of Italy to the Spaniards. The latter were everywhere unpopular, and the Reformers were beginning, especially in the Netherlands, to pose as patriots, with
results very unfortunate for Catholicism. For instance, King Philip had arranged with the Holy See in 1559 for certain changes in the Flemish sees. Mechlin, Ghent, and Twelve Bishoprics and fourteen smaller districts were formed into bishoprics. This measure, wise and commendable in itself, was badly received when it came from Spanish rulers. The redistribution of benefices, which had to be made in order to endow the new sees, caused considerable resentment and produced much字母istic controversy. Spain, in many other countries, her king was emphatically on the side of the Church, until "the Gospel light first shone in Boleyn's eyes". Then it was found that the absolute power of the sovereign was easily greater than any other force in the realm. There were some illegal children born in a large number of the clergy, and had already been distributed into thousands of hands. Only about two years were available for the actual restoration of the Church, and the work was carried out in a way that was not very conciliatory; yet the Marian establishment proved itself more stable, when tried in the fire of Elizabeth's persecution, than the ancient Church when attacked by King Henry. In neither case, however, could the Church withstand the power of the Crown; and again the resistance, though sufficient to be reckoned a magnificent protest against the royal tyranny, was entirely inadequate to hinder the dictates of the Tudor sovereign and her powerful ministers. The Marian reaction movement should not be reckoned under the Counter-Reformation proper, for it was only a reaction against the religious policies and methods of the reign of Edward the Sixth, as he had paused to the elevation of the papacy. But the virtues of a great reformer are not always the virtues most needed in a ruler. Like St. Pius V, on certain occasions, Paul IV was sometimes rash in having recourse to medieval methods. His Bull against nepotism was a mere form of the Counter-Reformation, as he had promised, in a great measure by nepotism, into the fatal war against Spain (1557–58), the misfortunes and disturbances of which affected the cause of Catholicism so adversely throughout Western Europe. Because of this war Mary Tudor's reign closed in gloom, the Netherlands were distracted, intercourse with the Pope was prohibited for England, Flanders, and Spain, and the Reformers in France maintained that the evils of the time were due to the ambition of the pope. As soon as the Peace of Paris was concluded, in 1559, the evils which had hitherto been working unperceived became evident. While England fell away, followed by Scotland, France and the Netherlands were found to be deeply infected by heresy; the Holy See had either no representatives in those countries to combat the evil, or they were so out of favour as to have little or no power. This explains the words of Paul IV on his death-bed, quoted above, which so vividly describe the unfortunate condition of the Church at this moment.

III. ST. IGNATIUS AND THE JESUITS, PIONEERS OF THE NEW MOVEMENT.—But though Paul IV did not advert to it, the Catholic reaction had already made
considerable progress. The number of great men among the cardinals, and the foundation of the Capuchins, Jesuites, and other orders, have already been mentioned as elements of the movement. There appeared Ignatius and the Jesuits, so conspicuous in the new movement. And here it may be well to notice how very different the evolution of the Protestant Reformers (even of those who were most conscientious) was from that of the vocation of this Catholic league. Luther and the French crown were no like him, or any other king, by denouncing abuses. The abuses were serious, no doubt, but from the nature of the case abuses in matters or of matters themselves holy and laudable. Yet so violent did the accusers become that they gradually forgot any good there was connected with the object desired, though the good perhaps in reality far outweighed the evil. Then came attacks upon the persons who maintained or defended the thing impugned, or who failed to make the changes demanded, and they were almost always declared to have virtually or actually betrayed or deserted the Church itself. Finally the reformer, setting himself up as the true standard of orthodoxy, fell to self-exaltation, and at last rebelled and separated from the Church, which he had originally intended to serve.

The soldier, Ignatius, in the enforced leisure after his wound at Pampeluna (1521) betook himself of serving Christ as a captain. The idea slowly took possession of his soul, and at length of his whole being. The imitation and service of Christ were to be most thorough. He would first educate himself as well as his age would allow, become a priest, induce the best of his companions to join him, and then go to the Holy Land and imitate the Saviour’s life as literally and exactly as possible. This was a humble but sublime ideal, capable of appealing to and satisfying the most earnest souls, and sure to lead to great efforts. There was no preoccupation here about the reform of abuses, nor indeed any temporal concern whatever, even the most praiseworthy. For twelve years Ignatius, now a middle-aged man, laboured at the education and the sanctification of himself and of the few followers who threw in their lot with him, and the plan would have been completed as it had been conceived, had not war with the Turks kept him and his companions waiting for several months at Venice, until war was declared to Palestine and he turned to Rome, which he reached in November, 1537, and never left again. The services of his small band of companions were soon in great request; they were the “holy men” of the hour, with heads and hearts ready for any work. In a short time they had been heard of everywhere. They had carried the Gospel to Abyssinia, India, and China, the ends of the known world. They had faced and fought the most redoubted heretics; they had preached to the poor and tended the sick in the darkest purities of the manufacturing cities. They had not indeed as yet the great college which afterwards made them famous, nor did people feel their force as a corporate body, but this only made their position as the pioneers, or advance guard of the Church, the more noteworthy. If so few preachers could do so much, their calls on others to join in the struggle roused multitudes to confidence, energy, and fresh efforts. (See Society of Jesus.)

IV. The Council of Trent.—The Council had been originally summoned in the year 1537, and sixteen sessions were held during the next fourteen years. In 1532 it was prorogued for the third or fourth time, and so serious were the quarrels throughout Europe that its conclusion was almost desired of. “The only remedy”, said Mocenigo, “is a council summoned by the common consent of all princes.” Yet there was small chance that the factious, overbearing princes of those days would give up their own views and interests. Still, for the common good, it had to be attempted, and when the bishops met again in 1561 they came with hearts resolved to do their utmost. But “the consent of all the princes” was not easy to obtain. If they submitted themselves to the authority of a council, there appeared Ignatius and the Jesuits, so conspicuous in the new movement. And here it may be well to notice how very different the evolution of the Protestant Reformers (even of those who were most conscientious) was from that of the vocation of this Catholic league. Luther and the French crown were no like him, or any other king, by denouncing abuses. The abuses were serious, no doubt, but from the nature of the case abuses in matters or of matters themselves holy and laudable. Yet so violent did the accusers become that they gradually forgot any good there was connected with the object desired, though the good perhaps in reality far outweighed the evil. Then came attacks upon the persons who maintained or defended the thing impugned, or who failed to make the changes demanded, and they were almost always declared to have virtually or actually betrayed or deserted the Church itself. Finally the reformer, setting himself up as the true standard of orthodoxy, fell to self-exaltation, and at last rebelled and separated from the Church, which he had originally intended to serve.

The soldier, Ignatius, in the enforced leisure after his wound at Pampeluna (1521) betook himself of serving Christ as a captain. The idea slowly took possession of his soul, and at length of his whole being. The imitation and service of Christ were to be most thorough. He would first educate himself as well as his age would allow, become a priest, induce the best of his companions to join him, and then go to the Holy Land and imitate the Saviour’s life as literally and exactly as possible. This was a humble but sublime ideal, capable of appealing to and satisfying the most earnest souls, and sure to lead to great efforts. There was no preoccupation here about the reform of abuses, nor indeed any temporal concern whatever, even the most praiseworthy. For twelve years Ignatius, now a middle-aged man, laboured at the education and the sanctification of himself and of the few followers who threw in their lot with him, and the plan would have been completed as it had been conceived, had not war with the Turks kept him and his companions waiting for several months at Venice, until war was declared to Palestine and he turned to Rome, which he reached in November, 1537, and never left again. The services of his small band of companions were soon in great request; they were the “holy men” of the hour, with heads and hearts ready for any work. In a short time they had been heard of everywhere. They had carried the Gospel to Abyssinia, India, and China, the ends of the known world. They had faced and fought the most redoubted heretics; they had preached to the poor and tended the sick in the darkest purities of the manufacturing cities. They had not indeed as yet the great college which afterwards made them famous, nor did people feel their force as a corporate body, but this only made their position as the pioneers, or advance guard of the Church, the more noteworthy. If so few preachers could do so much, their calls on others to join in the struggle roused multitudes to confidence, energy, and fresh efforts. (See Society of Jesus.)

V. Three Great ReformatiPope.—The popes are a rule, and from the nature of their position, extremely conservative, but it was characteristic of the Counter-Reformation that after the Council of Trent three popes of great reforming energy should be elected in close succession. (1) St. Pius V.—The great achievement of this pope was the example which he gave of heroic virtue. In the language of the day, "he made his palace into a monastery, and was himself a model of penance, asceticism, and prayer". He inspired all about him with his own high views, and new life and strength were soon seen in all parts of the papal administration. Many and notorious had been the corruptions which had crept in during the reigns of the easy-going humanistic popes who had preceded him. They had indeed passed away, after four or five years of the time, hoping to maintain good order by occasional severities and the constant dread of heavy penalties, but with lax administration such a method of government produced deplorable results. Pius V applied the laws with an unflinching regularity to rich and
noble, as well as to mean and poor. His rigour and vigour were sometimes excessive, no doubt, but this would not have been considered wrong then, where strong, where strong. There had been a popular outcry for "reform in the head as well as in the members", but it had seemed hopeless to expect it, considering the strong conservative traditions of the Roman Court. Now that the seemingly unattainable had been accomplished, the excesses of previous pontificates were easily forgiven, if they were not actually relished, as signs of the thoroughness with which the desired change had been made. Esteem for the papacy rose, papal nuncios and legates faced with firmness the powerful sovereigns to whom they were sent and not with clinging desire the easy ways of abuses. Reforms were more easily accepted by inferiors when superiors had already embraced them. Even Protestants mentioned Pope Pius with respect. Bacon spoke of "that excellent Pope Pius Quintus, whom I wonder his successors have not declared a saint" ("Of a Holy War"; in his Works, ed. of 1838, I, 623; the words however are put into the mouth of another). Though the forces against Pope St. Pius were powerful, and the general position was everywhere so critical that extreme caution might have seemed the best policy, his fearless enforcement of existing church law was on the whole wonderfully successful. The trial and imprisonment and depriving Elizabeth (1570) was in one sense ill-timed and a failure, on the other hand its results in the spiritual sphere were admirable. It broke the English Catholics of their servitude to Elizabeth's tyranny over their consciences in a way in which no milder measure could have done.

(2) Gregory XIII became a leader of the reform movement by virtue of qualities very different from those of his predecessor. He was a kindly, sociable man, who had risen to fame as a lecturer on canon law, and his successors were due to his zeal for education, piety, and the machinery of government, rather than to anything magnetic or inspiring in his personal influence. He was bountiful in his support of the Jesuit missions, and in his grants to seminaries and colleges. The German, English, and Greek colleges, and many others owe him their foundation Bulls, and much more. He sent missions abroad at his own expense to all parts of the world. Though he had no great genius for politics, he had an admirable secretary, Ptolomeo Galli, Cardinal of Como, whose papers remain to this day models of perspicacity and order. Standing nunciatures were now established at the chief centres of European government (Vienna, 1581; Cologne, 1584), and with the happiest results. Thus, when Gebhard Truchsess (q. v.) the Archbishop of Cologne, turned Protestant and tried (1582) to carry over his electorate with him, the nuncios on all sides organized a vigorous counter-attack, which was completely successful. Since then Cologne has been a tower of strength to the Catholicism of North-Western Europe. The reform of the Calendar was another piece of large-minded and far-sighted office work, if it may be so described, which reflected much credit on the pope who organized it. Gregory was also most generous in granting Indulgences, and he encouraged works of piety on a large scale. He took an active part in the celebration of the Holy Year of Jubilee in 1575, and the pilgrims, who had flocked in thousands to the Eternal City, returned to spread throughout Europe the satisfaction they had felt at the sight of the good pontiff personifying the long religious ceremonies, leading processions, or tending poor pilgrims with his own hands.

(3) Sixtus V.—Like Pius V, Gregory XIII was too much of an enthusiast for abstract theories and mediæval practices to be an ideal ruler; he was also a poor financier, and, like many other good lawyers, was somewhat deficient in practical judgment. It was exactly on these points that his successor, Sixtus V, was strong. Where Sixtus V was strong, where Sixtus V was strong, was crippled by debts and unable to restrain the bandits, who dominated the country up to the gates of Rome, Sixtus, by dint of good management, was soon one of the richest of popes, whose word was law in every corner of his States. He finished St. Peter's, which he directed the obras of. Nine months of Neronian labour were thrown away by the death of the architect, and six years of delay followed. Sixtus was large-minded, strong, and practical, a man who did not fear to grapple with the greatest problems, and under him the delay (reputed to be perpetual) of the Eternal City seemed to be changing to briskness, almost precipitation.

As the Council of Trent had given Catholics, just when they most needed it, an irrefragable testimony to the unity and catholicity of their Faith, so these three pontiffs, with their varying excellences, showed that the papacy possessed all the qualifications which the faithful expected in their leaders, virtues which afterwards repeated themselves (though not quite so frequency). Clement VIII, Paul V, and Urban VIII. Now at all events, the tide of the Counter-Reformation was running in full flood, and nowhere can its course and strength be better studied than in the missions.

VI. THE MISSIONS.—While persecution and war, politics and intrigue, custom, hampered progress in Europe, the wide continents of America, Asia, and Africa offered a freer outlet for the spiritual energy of the new movement. Beginning with St. Francis Xavier (q. v.), there are among the Jesuits alone quite a multitude of apostles and martyrs, confessors and preachers of the first order. In India and China, Antonio Criminel, Roberto de' Nobili, Ridolfo Acqua- viva, Matteo Ricci, Adam Schall. In Japan, after Padre Valignano's great successes, ensued the terrible persecution in which there perished by heroic death almost eighty Jesuits, to say nothing of others. In Abyssinia and the Congo were evangelized by Fathers Nufles, Baretto, and Sylvain. In North America there were heroic struggles to convert the Indians (see BREBIEU, LALLEMANT), and in South America St. Peter Claver's work for the slaves from Africa and the reductions of Paraguay. The Franciscan and Dominicans, of course, had special missions. Before the Jesuits in Central America (where Las Casas has left an uneringish name); elsewhere they were soon in the front rank. Later on in the period there are St. Vincent de Paul (q. v.) and his zealous apostolic followers and (1622) the Roman Congregation "De Propaganda Fide", with its organized missionaries (see PROPAGANDA, COLLEGE OF). In order to appreciate the connection of the aforesaid names with the movement under consideration, we must remember that these apostles were not only showing forth in their heroic labours and sufferings the true nature of the Counter-Reformation; they were also winning many new converts to it by their preaching, while their letters raised to the highest pitch the enthusiasm of generous souls at home (see Cros, "St. François Xavier, Sa vie et Ses lettres", Paris, 1900; also "Lettres Édifiantes et Curieuses", 3 vol., Paris, 1717; 1724, 1733).

VII. PROGRESS IN EUROPEAN STATES.—While in distant lands the new spirit found to some extent a free field, its progress in Europe was very largely dependent on the varying fortunes of the Catholic and Protestant political powers. Here it will only be possible to indicate the chief stages in that pro-
grees, and it must be remembered that controversies have arisen at one time or another even about the limits of these.

Germany and Austria. — Here it is evident that in the first named country the losses of the Catholics did not cease with the Religious Peace of Augsburg in 1555. The Protestants, as the occasion arose, had not hesitated to avail themselves of religious troubles in various ecclesiastical sees and had the number of two archbishoprics (Magdeburg and Bremen), and of 12 important bishoprics. It was only by recourse to arms that Cologne was saved in 1583; and the freedom of Strasbourg and Aachen was in grave danger. There were also many defections among the lesser princes, and so long as Maximilian II (1563–1576) was on the throne, his Protestants prevented the Catholics from acting with the vigour and authority which became their number and their cause. For the alarming condition of Northern Germany about 1600 see "Röm. Quartalschrift" (1900), p. 385 seq. So serious did the general position become, that St. Peter Canisius (q. v.) rhetorically compared the Catholic countries of Bavaria and the Tyrol to the two tribes of Israel, which alone were saved while all the others were carried off captive (see O. Braunsberger, Canisii Epistolae et Acta, Freiburg, 1896–1903, I–IV). Indeed, Albert V of Bavaria (1550–79) seemed almost the only one who was not in danger of a great disaster. This was due to the closeness of the connexion of Church with State. In virtue of the so-called Gallican Liberties (q. v.) the king and nobles exercised undue influence over the appointment of bishops, abbots, and clergy, and ecclesiastical administration in general. But the later rulers of the House of Valois, as also Catherine de' Medici were miserably wanting in principle, and all efforts at reform under such leaders ended in turmoil and strife. Margaret of Valois, sister of Francis I, had favoured Protestantism, and it soon infected the House of Bourbon (Kings of Naples), and later on her son had married, and which claimed the succession to the French throne. Henry II had shamelessly allied himself with Protestant powers abroad, while he burned heretics at home. Heresy spread among the princes of the blood and the highest nobility, who drew their inspiration after their own fashion, and many others. They were truly "columns of the church," whose influence was felt far beyond the limits of their dioceses. Far-reaching, too, were the good results effected by the Catholic writers, Tanner, Gretser (Greter), Laymann, Contzen, and by preachers and missionaries, especially Cassian, Hotman, and other Jesuists and Dominicans. The Jesuit colleges also increased steadily and were productive of great and permanent good.

At last with the reign of Rudolph II as emperor (1576–1612) came the occasion for the Counter-Reformation in Germany and Austria. Wherever the House of Hapsburg had influence the Catholic princes and lords began to exercise the same right of reformation (Reformationrecht, Jus reformandi) in behalf of the Church, which the Protestants had hitherto used against her. But the latter ere long became suspicious. In 1608 they fixed in an offensive and defensive "union" which the Catholics answered by their "League". In this way the opposing parties soon drifted into the Thirty Years War (q. v.) which lasted from 1618 to 1648. Though the Catholic allies commenced at the greatest disadvantage, they gradually won the upper hand. By the end of 1631 they secured the majority of their enemies. The year 1623 II by his "Restitutionsedict" (Edict of Restitution) recalled the Church lands seised by Protestants since the Religious Peace of Augsburg in 1555, and in particular the aforesaid two archbishopries and twelve bishoprics. The political power of the Catholics now stood at the highest point it reached during the Counter-Reformation. But a reaction soon set in; France and Sweden joined hands with the Protestants, and the Catholics had neither the enthusiasm nor the unity of purpose to maintain their advantage. The Peace of Münster and Osnabrück, in 1648, disastrous and humiliating as it was for Germany politically, was also most injurious to Catholicism. (See Westphalia, Treaty of.) Church lands were freely secularized, and the Protestants were allowed to establish their system of education. Those who practically had the right of dictating to their subjects the religion they might profess. The secular authorities, even in Catholic countries, claimed and exercised a right of placet in the choice of bishops, which was in the long run most injurious. Amid the distractions of war, the deeds of victory, and the series of defeats, the favoured of the Counter-Reformation had evaporated.

France. — If the Counter-Reformation had much to fear and to suffer from the politics of secular princes, it was not from France that it had most to dread. The wars of Francis I with the Emperor Charles V had given the Reformation an occasion for spreading. France had been the chief difficulty at the Council of Trent. In France the struggle between Catholicism and Protestantism was carried on with great bitterness and cruelty. Though the eventual victory of the Counter-Reformation was very extensive, it was only a partial victory, and France was not saved from the danger of a great disaster. This was due to the closeness of the connexion of Church with State. In virtue of the so-called Gallican Liberties the king and nobles exercised undue influence over the appointment of bishops, abbots, and clergy, and ecclesiastical administration in general. But the later rulers of the House of Valois, as also Catherine de' Medici were miserably wanting in principle, and all efforts at reform under such leaders ended in turmoil and strife. Margaret of Valois, sister of Francis I, had favoured Protestantism, and it soon infected the House of Bourbon (Kings of Naples), and later on her son had married, and which claimed the succession to the French throne. Henry II had shamelessly allied himself with Protestant powers abroad, while he burned heretics at home. Heresy spread among the princes of the blood and the highest nobility, who drew their inspiration after their own fashion, and many others. They were truly "columns of the church," whose influence was felt far beyond the limits of their dioceses. Far-reaching, too, were the good results effected by the Catholic writers, Tanner, Gretser (Greter), Laymann, Contzen, and by preachers and missionaries, especially Cassian, Hotman, and other Jesuists and Dominicans. The Jesuit colleges also increased steadily and were productive of great and permanent good.

At last with the reign of Rudolph II as emperor (1576–1612) came the occasion for the Counter-Reformation in Germany and Austria. Wherever the House of Hapsburg had influence the Catholic princes and lords began to exercise the same right of reformation (Reformationrecht, Jus reformandi) in behalf of the Church, which the Protestants had hitherto used against her. But the latter ere long became suspicious. In 1608 they fixed in an offensive and defensive "union" which the Catholics answered by their "League". In this way the opposing parties soon drifted into the Thirty Years War (q. v.) which lasted from 1618 to 1648. Though the Catholic allies commenced at the greatest disadvantage, they gradually won the upper hand. By the end of 1631 they secured the majority of their enemies. The year 1623 II by his "Restitutionsedict" (Edict of Restitution) recalled the Church lands seised by Protestants since the Religious Peace of Augsburg in 1555, and in particular the aforesaid two archbishopries and twelve bishoprics. The political power of the Catholics now stood at the highest point it reached during the Counter-Reformation. But a reaction soon set in; France and Sweden joined hands with the Protestants, and the Catholics had neither the enthusiasm nor the unity of purpose to maintain their advantage. The Peace of Münster and Osnabrück, in 1648, disastrous and humiliating as it was for Germany politically, was also most injurious to Catholicism. (See Westphalia, Treaty of.) Church lands were freely secularized, and the Protestants were allowed to establish their system of education. Those who practically had the right of dictating to their subjects the religion they might profess. The secular authorities, even in Catholic countries, claimed and exercised a right of placet in the choice of bishops, which was in the long run most injurious. Amid the distractions of war, the deeds of victory, and the series of defeats, the favour of the Counter-Reformation had evaporated.

France. — If the Counter-Reformation had much to fear and to suffer from the politics of secular princes, it was not from France that it had most to dread. The wars of Francis I with the Emperor Charles V had given the Reformation an occasion for spreading. France had been the chief difficulty at the Council of Trent. In France the struggle between Catholicism and Protestantism was carried on with great bitterness and cruelty. Though the eventual victory of the Counter-Reformation was very extensive, it was only a partial victory, and France was not saved from the danger of a great disaster. This was due to the closeness of the connexion of Church with State. In virtue of the so-called Gallican Liberties (q. v.) the king and nobles exercised undue influence over the appointment of bishops, abbots, and clergy, and ecclesiastical administration in general. But the later rulers of the House of Valois, as also Catherine de' Medici were miserably wanting in principle, and all efforts at reform under such leaders ended in turmoil and strife. Margaret of Valois, sister of Francis I, had favoured Protestantism, and it soon infected the House of Bourbon (Kings of Naples), and later on her son had married, and which claimed the succession to the French throne. Henry II had shamelessly allied himself with Protestant powers abroad, while he burned heretics at home. Heresy spread among the princes of the blood and the highest nobility, who drew their inspiration after their own fashion, and many others. They were truly "columns of the church," whose influence was felt far beyond the limits of their dioceses. Far-reaching, too, were the good results effected by the Catholic writers, Tanner, Gretser (Greter), Laymann, Contzen, and by preachers and missionaries, especially Cassian, Hotman, and other Jesuists and Dominicans. The Jesuit colleges also increased steadily and were productive of great and permanent good.

At last with the reign of Rudolph II as emperor (1576–1612) came the occasion for the Counter-Reformation in Germany and Austria. Wherever the House of Hapsburg had influence the Catholic princes and lords began to exercise the same right of reformation (Reformationrecht, Jus reformandi) in behalf of the Church, which the Protestants had hitherto used against her. But the latter ere long became suspicious. In 1608 they fixed in an offensive and defensive "union" which the Catholics answered by their "League". In this way the opposing parties soon drifted into the Thirty Years War (q. v.) which lasted from 1618 to 1648. Though the Catholic allies commenced at the greatest disadvantage, they gradually won the upper hand. By the end of 1631 they secured the majority of their enemies. The year 1623 II by his "Restitutionsedict" (Edict of Restitution) recalled the Church lands seised by Protestants since the Religious Peace of Augsburg in 1555, and in particular the aforesaid two archbishopries and twelve bishoprics. The political power of the Catholics now stood at the highest point it reached during the Counter-Reformation. But a reaction soon set in; France and Sweden joined hands with the Protestants, and the Catholics had neither the enthusiasm nor the unity of purpose to maintain their advantage. The Peace of Münster and Osnabrück, in 1648, disastrous and humiliating as it was for Germany politically, was also most injurious to Catholicism. (See Westphalia, Treaty of.) Church lands were freely secularized, and the Protestants were allowed to establish their system of education. Those who practically had the right of dictating to their subjects the religion they might profess. The secular authorities, even in Catholic countries, claimed and exercised a right of placet in the choice of bishops, which was in the long run most injurious. Amid the distractions of war, the deeds of victory, and the series of defeats, the favour of the Counter-Reformation had evaporated.
Henry IV, was educated by Père Coton (q. v.), and it was through him that most of the good traditions of the French kings in exercising their ecclesiastical power. He was one of the most important of the French rulers of the 17th century, and his influence was felt throughout the kingdom. His reign was marked by the Counter-Reformation, which was a period of great spiritual activity, and the papacy, under the influence of St. Ignatius Loyola, was able to make important gains in the New World. The Jesuits, under the leadership of St. Francis Xavier, played a significant role in the conversion of the Indians to Catholicism.

Spain and Portugal.—Turning now to Spain and Portugal, we see the Counter-Reformation winning here its most signal spiritual victories. There can be no question that the saints of Spain who flourished at this period, the theologians, canonists, and spiritual writers whom it educated, were more remarkable than those produced by any other country, e.g. St. Ignatius, St. Teresa, St. John of the Cross, St. Peter of Alcántara, St. John of the Cross, St. Francis of Solano, John of Avila, Maldonado, Navarro, Salmeron, Toledo, Gregory of Valencia, Sanchez, Suarez, Juan a Santo Tomas, Ripalda, Barbossa. These forms a galaxy of brilliant names, which in their day have never been surpassed. The Spanish and Portuguese colonies in South America and the East Indies were also colonized by missionaries, whose heroism, self-devotion, and energy were beyond compare. Starting from Las Casas, whose chief achievements, however, belong to an earlier period, mention must be made of the reductions of Paraguay and the first missions to the Philippines, while the majority of the spiritual labourers in India, China, and Japan were also furnished by the Spanish Peninsula. But here again, as in France, it was in great measure the absolutism of the Crown which prevented the triumph of the new movement from being as complete as might have been hoped for by the newly formed universities and the Parlement of the country. In the Church, however, it was effectively supported by the Crown, and at Paris the Collège de Clermont, afterwards Louis-le-Grand, became one of the chief centres of the Counter-Reformation. (3) The re-establishment of Catholicism in the districts under the power of the Huguenots through the Edict of Nantes (1598) proceeded slowly and was attended with difficulty. But the French monarchs had many reasons for exacting obedience from their often insubordinate Protestant subjects. Eventually La Rochelle, after a celebrated siege, was reduced by force (1628). Though their quasi-independence was now gone, and with it their political importance, the Counter-Reformation did not lead to the abolition of religious liberty for the Huguenots, which was already provided for by the Edicts of Nantes in 1598.

(4) There was much reluctance to admit the Council of Trent, and an obstinate insistence on the Gallican Liberties which proved eventually a calamity for the French Church.

On the one hand we find great names among the bishops of these times, such as St. Francis Xavier, Cardinals de Berulle and de la Rochefoucauld, Honoré de Laëns, Archbishop of Embrun, Philippe de Cospéan, Bishop of Nantes. Synods were frequent, the education of the priests was much improved. In 1642 St. Vincent of Paul opened the Collège des Bons Enfants, which served as a model for similar institutions. (5) The constant friction between 1642 and 1645 carried into execution his idea of the Grand Séminaire of Saint Sulpice. The clergy in general reached so high a level that the period may be regarded as one of the brightest in the history of the Gallican Church. On the other hand the great influence of the State and of the nobility in the selection of abbots and bishops, especially for the highest and most wealthy sees, could not but be injurious. We sometimes hear of prelates, like the Cardinal de Retz, who were a shame to their order, and still more of worldly prelates, like the Cardinal Richelieu, who though not proved to be immoral lowered the ideals of ecclesiastical devotion to the Church, which had given the Counter-Reformation so much of its first vigour. Other weak points in the progress of the Counter-Reformation in France may be studied in the careers of Edmond Richer and of the Abbé of Saint-Cyr.
mission was due to the magnanimous soul of Cardinal Allen, whose noble sentiment opert meliora non expectare sed facere (Letters, p. 367) conceived as it was in the face of overwhelming persecution, gives us the measure of his lofty spirit. “This Church here,” wrote Campan, “shall never fail, so long as priests and pastors shall be found for the sheep, rage man or so much as.” So true to the See, first at Douai, then at Reims, sent forth, year after year, its small quota of missionaries, and the Jesuits, with the lesser seminaries, added a few more. It was an heroic struggle, for no persecution can be heavier than that of the law remorselessly applying itself to the whole Catholic body (numerically small) rose to the occasion, and if there were many failures, as also some serious quarrels and scandals, there was an astonishingly high average of courage and perseverance. In time their worst persecutors died off, and calmer days ensued, but at the close of the period the Puritans were renewing Elisabeth’s cruelties, and priests’ blood was flowing almost as fast as ever. This same religious enthusiasm manifested itself during the last decade or so of the period, in the foundation of new convents, orders, etc., on the Continent. The movement roughly corresponded with the similar movement in England. The name of Mary Ward (q. v.) is one of the most noteworthy in England. The mission of the English Jesuits to Maryland (q. v.) in spite of home trials is another manifestation of the same spirit.

Ireland.—During Elizabeth’s reign the Irish were almost always engaged in a struggle for life against the ever increasing forces of the English “planters”. Sometimes they had their hour of victory, but there never had been time for reform. The process of the Irish martyrs claims about a hundred sufferers in this reign, headed by Dermot O’Hurley, Archbishop of Cashel. There were also many missionaries of note, the most famous was a priest named Wolfe, S. J., sent by Pope Pius V; there were also several heroic bishops like Richard Creagh of Armagh, and many notable Franciscans and Jesuits.

But it was not until the comparative peace under King James that it was possible to fill up the gaps in the episcopate, to found colleges on the Continent, at Paris, Salamanca, Lisbon, Douai, etc. (only one or two had commenced earlier), to organize anew the religious orders (especially the Franciscans). The old life revived in many secluded sanctuaries; synods were actually held at Kilkenny, Dublin, and Armagh. All over elsewhere literature multiplied. (See Four Masters; Wadding, Luke.) There were many notable bishops like Peter Lombard, David Rothe, etc. Though the persecution never wholly ceased (Bishop Cornelius O’Devany, 1612, and some sixty others were martyred during this period), the Counter-Reformation made great progress, and there were moments when it seemed about to triumph, as, for example, in 1625 and 1641-49. But at the close of the period Cromwell was to blot out with cruelties worse than those of the Tudors all the good that had been accomplished.

Scandinavia.—The Counter-Reformation can hardly be said to have affected Scotland and Scandinavia, so complete had been the victory of Protestantism. Yet while Queen Mary reigned in Scotland there had been renewed signs of life. Fathers de Gouda, Edmund Hay, James Gordon, S. J., Bishop John Heselden, Wust, etc., were notabilities of this period. Mention must also be made of John Ogilvie, S. J., martyred in 1615, and the heroic resistance made by many Catholic nobles to the tyranny of the Kirk. There was no local ecclesiastical superior or government, the mission depending directly on the Holy See. In 1653, however, a college for the secular clergy at Rome, Douai, Paris, and Madrid. In Scandinavia the fall of Catholicism did not come about in a day or a generation—Father Possesson, S. J., as also several papal nuncios strove hard to avert it—but the Counter-Reformation as a movement did not reach any of its peoples.

The Netherlands.—In the Netherlands every effort was made to exterminate Catholicism in the United Provinces, which had revolted from Spain, contrary to the wishes of the pope. It was a bitter struggle. Still considerable numbers retained their faith—their spiritual needs being cared for by missionaries—though it was impossible to keep up the ancient hierarchy. In Catholic Flanders the revival ran a more or less uniformly prosperous course. Amongst the new prelates was the name of Bellarmine. In Spain, Cardinal Boimart, Bishop of Romermond, Justus Lipsius, Leonard Lessius, Cornelius Lepide, Martin Began, Thomas Stapleton (an Englishman), etc. But the controversies occasioned by Baius form a less pleasant episode, and the wars at the end of this period were most injurious. Campaigns and battles ruined the country, and the final terms of peace notably reduced its power.

Poland.—In this country there was a long struggle between Catholicism, which was held by the Crown and the people, and Protestantism, which filtered in from the neighbouring Protestant countries and universities, and was affected by many of the faction-law nobles and the Jesuits. Catholicism at last gained the decided upper hand, through the efforts of Stanislas Hosius and other bishops, preachers like Scarga, and the Jesuit colleges. King Sigismund II and Vladislaus IV, co-operating with a series of very active and able papal nuncios, ensured the Church’s victory; the Protestants, however, still retained much power.

VIII. ECCLESIASTICAL LITERATURE.—The high spirit of this period manifested itself in literature in many characteristic forms. The age was one of the greatest for theology the world has ever known. It produced many works of distinction, and the name of Bellarmine, Baron Gapado, Ximenes, Vasques, Petavius, and many others who have been alluded to already. More characteristic still were the writers on personal or interior reform, foremost among them St. Ignatius, whose “Spiritual Exercises”, for their profound spiritual and practical wisdom, must be placed in a class apart. Similarly distinguished writers were St. Francis of Sales (declared, in 1877, a Doctor of the Church), St. Teresa, Scupoli, Blosius. Louis of Granada, M. Olier, Alfonso Rodrigues. The teachings of the Church were set forth in the admirable catechisms of Canisius (1554—1632) and of the Dominican of Trent. It was reserved to the sixteenth century to bring them to their perfection the revised editions of the Vulgate (1590—98), the Roman Breviary (1568), the Roman Missal (1570), the Roman Martyrology (1682), the Corpus Juris Canonici (1582), the Decretum Gratianae (1682). Father Campan’s “Decem Rationes” (1581) and Father Arrighi’s “Christian Directory”, exercised an extensive influence, doctrinal and religious, on contemporary opinion, which was also deeply affected by the religious poems of Tasso and Calderon, of Southwell and Cranage. The music of the age also partook in the revival, as is testified by the great name of Palestrina and the pleasant memories of the exercises of the Oratory of St. Philip Neri.

IX. CLOSE OF THE PERIOD AND RETROSPECT.—It has been said before that a period of fervour and zeal comes to an end when that zeal dies down to mediocrity in many countries, or among the large body of people not notable. This happened in the year 1648. In Germany the period is generally said to close in 1618, but elsewhere, i. e. in France and in Ireland, the tide of fervour was still flowing in many places, while in Rome and Italy it was still fairly strong. But this does not prevent our regarding the broad movement as having spent its forces. Though the level of education had risen, the diminution in the number of men of genius was marked.
There were but few new foundations; some great missions (Japan, Abyssinia, the Congo) were given up or in full decline, though others still were growing and flourishing. And the reason was that the interior fervour, the enthusiasm had cooled down. The same thing was true about the Council in Ferrara (Jos., xi, 8, 18). After a fair mediocrity had taken the place of the fiercely keen ardour of the previous century. In this there was no wonder. It is the ordinary course of human nature to slacken down after unusual effort, to wax cool after an effervescence of excitement. What was not more was that this Heraclius, as he was the strangest things in the history of the world, was the display of life and vigour which had been given by the Church just when she seemed to be about to fall behind, and to be beaten out of the field by her rivals. Under such circumstances the Counter-Reformation may be regarded as one of the most terrific manifestations of the inherent vitality of the Church which Providence has ever vouchsafed, only to be paralleled by her triumph over the persecutions of the Roman Empire, the invasions of the Barbarians, or the subversive forces of the French Revolution.

The subject has occasioned an immense literature, no adequate account of which can be given here, though its classifications may be followed by referring to The Church, in which various persons and the above mentioned are treated in detail. Very few writers, however, have studied the broad but subtle influence of ideas, in vogue in their time, this revised original, passed from this land, grew, flourished and failed. No Catholic writer has described the whole movement with greater knowledge than Hasenclever.

The hierarchies which were the most contemporary witnesses were the Roman nunneries, whose special business it was to study these subjects and to report upon the results. Their authors are how they passed their time except those relating to Germany. The reports of the nunneries to Germany (Nunnenlitteratur von Deutschland) are being edited (since 1889) by the Austrian and the German Historical Institutes at Rome and partly by the Görres Gesellschaft.

Dr. Hinüber, Los desparos de la diplomacia pontificia en España (Madrid, 1883), has compared the Cauca, Prophetas y profetas del paganismo, 1550-1583 (Polzen, 1850-1854); Poland, Papal Negotiations with Henry VIII, 1539-1544 (London, 1891); France in the Sixtine-Quart (Paris, 1870); PASTOR, History of the Popes from the Close of the Middle Ages; JASBER, History of the German People, with criticisms, by BAGNOLD, Gesch. der Katholischen Reformations (1880, then one volume published), and counter criticism by DITTRICH in Jahrbuch der Görres Ges., ii, 1-10.

There are several monographs on the details of the progress, first of the Reformation, then of the Counter-Reformation, in particular parts of Germany, e.g. WIEDEMANN, Gesch. der Reformation und Gegenreformation im Lande unter den Enns (5 vols., 1879-98); others by GINDERT (Bohemia), KELLER (Würtemberg), LEMKE (Switzerland), MEYER (Switzerland), SCHMITZ (Schleswig), etc.; DURR, Gesch. der Jesuiten in den Ländern deutscher Zunge (1877); DIERKING, Gesch. der Gegenreformation in Deutschland (1879); Schmitz, Geschichte des Gegenreformationszwanges im heutigen Deutschland. The hardest to follow, Consult VICTORET DE MEAUX, L'histoire religieuse de France sous Louis XIV, 1610-1715 (Paris, 1879); FRANZEN, La Cour de Rome et la reforme calvin, in Lambricht, Histoire de la France (Paris, 1877).

A more objective treatment of the period is to be desired. For the essential period of the time, see HUNTER, Nomenclator; Sommerroeder, Brief. der c. d. f. (1890-1900); HILGERS, Der Inhalt der verblichenen Bücher (Freiburg, 1904).

J. H. PoLLEN.

Court (in Scripture).—I. OPEN SPACE.—The word court, in the English Bible, corresponds to the Hebrew חֵקָר (hêqâr) enclosed space. The latter is used to designate: (1) an encampment of nomads; (2) a space protected by a stockade or palisades, or by a rampart of stones or earth, hence a village; (3) the court-yards of the houses or temples. In the first sense the word occurs in Gen. xvi, 5; Lev. xxvii, 13; Ps. xxxvi, 8; Jer. xix, 1, in various ways: “castle” (Gen., xxxv, 16), “cities of the desert” (Is., xiii, 11), “private places” (i.e. places of ambush near the settlements, Ps., ix, 8). The word village usually expresses the second meaning (Lev., xxv, 31; Jos., xxii, 8, 11, etc.; 1 Par., iv, 33, etc. Jer., xiv, 13; etc.); a separate word for court-yard). In connexion with this sense it may be amiss to notice that the Hebrew word, either in the form חֵקָר, or in the slightly different form חֵקָר, was not infrequently used in proper names. One of the first encampments of the Hebrews after their departure from the foot of Mount Sinai was at a place called Harsor (Num., xi, 34). There was a Chanaanite city of Asor near the waters of Elah in the days of King Solomon (1 Kings, vi, 14), which the Israelites did not succeed in capturing. This city, taken and burned by Josue (Jos., xi, 10, 11), was allotted to the tribe of Neftali (Jos., xix, 36), but probably rebuilt by the Chanaanites (Judges, iv, 2), fortified by Solomon (III K., ix, 15), and seized by Thelahthphasah (IV K., xv, 29). This Asor or Asorath was, according to the Greek text of the New Testament, the place of Tobias (Tob., i, 2), and at a short distance from it Jonathan Machabeus defeated the army of Demetrius (1 Mach., xi, 67). We read (Jos., xv, 23) of another Asor, called Eron, in Jos., xv, 3, and Hermon, xv, 25 on the southern frontier of Juda. The same text (xv, 25) even mentions in the same borders a New Asor. A third Asor existed, at least after the Captivity, near Jerusalem, in the territory of Benjamin (II Esd., xi, 33). Among the compound proper names may be mentioned: Hassar Adar (D., ‘the town called Adar’, Num., xxxiv, 4); Asear Ahidra (Jos., xx, 18; Hassar Asar, Num., xxxiv, 4); Hassar Adara (Jos., xix, 5; I Par., iv, 31); Hassar Enon (D., “court of Enan”, Ex., xlviii, 17; xlviii, 1; “village of Enan”, Num., xxxiv, 9, 10); Hassar or Hasarshul (Jos., xv, 28; xiv, 3; I Esd., xx, 1; I Par., iv, 28); Hassar battikhon (D., “the house of the Asor”, Ex., xlviii, 20); Baalshasor (II K., xiii, 23); Enhosor (Jos., xix, 37).

The recent excavations in Syria and Palestine, as well as the modern customs inherited from older times, give precise indications concerning the house-courts, not seldom alluded to in Holy Writ. When, as occurs frequently, the house does not open directly on the street, there is a first court-yard extending between the outer wall and the building. From this outer court an entrance doorway leads into the inner court, around which the various apartments are located. The inner court sometimes contains in the centre a well (II K., xvii, 18) or a fountain surrounded with fine trees; the walls, porches, and verandas are usually covered with vines and creepers, and an awning may be stretched overhead to keep off the sun. From the narration of the Passion we may infer that such was the arrangement in the high-priest’s house. While Jesus was being tried in one of the halls, the sanhedrin and ministered ambition and pride of the Jewish rulers made the court a scene of intolerable trial and persecution. Peter was kept alone in the inner court; thither Peter came to warm himself, and there he denied his Master. From the judgment-hall, Jesus turning (Luke, xxii, 61) could easily look outside (Matt., xxi, 69) on Peter. Then the latter, smitten with remorse, betook himself to the outer court (Mark, xiv, 68; Luke, xvi, “before the court”, a literal translation of the awkward Latin rendering ante atrium), there to weep freely. Royal residences displayed, on a larger scale and in a more elaborate way, a similar general arrangement. The Bible speaks of the courts of the palaces of Solomon (III K., xiv, 21, etc.); Ezocochis (III K., xiv, 43), and Sedecias (Jer., xxxii, 2, 12; xxxiii, 1; xxxiv, 20; xxxv, 30, etc.); as well as those of Assuerus at Susa (Esth., ii, 11; iv, 11; v, 2; etc.) of and Seleucus at Tyrre (II Mach., iv, 40).

In connexion with sacred places, courts are most frequently mentioned. We learn from Ex., xxvi, 8 sq. that the place of meeting in the wilderness was in process of time a court, a hundred cubits long and fifty cubits broad, encompassed by pillars supporting hangings of fine twisted linen. The sacred precincts contained, besides the tabernacle and its furniture, the altar of holocausts and the brazen laver (Ex., xvi, 6, 7). Still more famous are Solomon’s constructions. All the buildings erected by this prince on Mount Zion were surrounded by a wall encompassing what may be styled “the greater court”. Southernmost in the lowest court were the public halls, namely: the “house of the
court encompassed two distinct spaces: the eastern part, called "the women's court", which, among other things, contained the beth-din; the western part, the "priests' court", containing the temple proper and the altar of holocausts and all their appurtenances, from the place ascended to the lay people.

2. Arrangement of the Temple.—In the English Bible the word court is occasionally used also to mean the retinue of a person of high rank and authority (Gen., xlv, 16; IV K., vii, 9; Esth., xi, 3). It then stands generally for the Hebrew word הֶרֶם, "house", the only word which, in the sacred language, might in some instances receive the sense of "courtyard" to which the English words now concern. The Latin Bible in such places usually has the noun aula, and once in the N. T. exercitus (Luke, xxiii, 11). Although mention of a court is seldom made in connection with the kings of Israel and Judah, they nevertheless naturally had their court, consisting, besides their family and body-guard, of counsellors, secretaries, recorders, chancellors, ministers, superintendents of public works, governors of the house, even the high dignitaries of the temple. Glowing descriptions are given of the splendid courtyard of such courts as David (II K., xxiii; 1 Par., xi) and Solomon (Cant., iii, 7, 8); there is no record where the Jewish writers the place with which to describe the glory of the palace of God. For Yahweh is king, not only over Israel, but over the whole world, and as becomes a king, he must have his court. This is constituted by the innumerable host of the angels, ever ready to do his will. Several (seven, in the received text) uncensingly stand in II's presence; legions of seraphim surround his throne, as a body-guard; thousands of heavenly spirits form his council (Tob., xii, 15; Is., vi, 2, 6; Ps. lxxxii, lxxxix). Ecclesiastical writers, developing this idea, oftentimes describe the heavenly court, made up not only of the angels, but also of the host of all those blessed souls who enjoy the beatific vision. On the other hand the courts of the Temple have sometimes been regarded by mystic writers as a figure of the soul striving for Christian perfection: the brazen laver represents the purifying of the house, whereas the altar of holocausts signifies Christ's ascending the mountain which was once the house of Jacob, but which was smaller, the arrangement and dimensions were about the same as those of Solomon's temple. In Herod's time the temple area was extended towards the north, according to some; towards the south, in the opinion of others, so that the outer court had probably the same extent as the actual temple. This court was surrounded by a high wall covered with spikes. Along the walls on the inside, north, west, and east (Solomon's Porch), were double porticoes, and on the south a triple portico, the "royal porch". Eight gates gave access from the outside: four on the west, two on the south (Hulda's gate), one on the east, and one on the north (Tadmor gate): between the gates, along the outer walls, halls and chambers had been erected, among which we may mention the Beth-Din, or meeting-place of the Sanhedrin. Within this outer court, towards the north, a wall forty cubits high, limited the inner court. All around this wall extended a terrace (the מִרְכָּבָה) ten cubits wide and reached by a flight of fourteen steps. A stone parapet, about a cubit high, encircled the inner edge of the מִרְכָּבָה, to which thirteen openings gave access: on the parapets tables, under penalty of death, the non-Jews against trespassing. From the מִרְכָּבָה nine gates and stairways led the Israelites into the temple: On the western side, along the wall, twenty-five cubits high. The ground was some fifteen cubits higher than the court of the Gentiles. ten porticoes, and cells for sundry purposes had been erected between the gates. The walls of the inner

CHARLES L. SOUVAY.

COURTENAY, WILLIAM, Archbishop of Canterbury, b. in the parish of St. Martin's, Exeter, England, a. 1342; d. at Maidstone, 31 July, 1396; was the son of Hugh Courtenay, Earl of Devon, and Margaret, daughter of Humphrey Bohun, Earl of Hereford. He studied at Oxford, where he took the degree of D.C.L. In 1367 he was elected chancellor of the university. On this occasion the university successfully resisted the Bishop of Lincoln's claim to the right of conferring its choice, and later Courtenay obtained from Richard V a Bull declaring a chancellor's election valid without the confirmation of the diocesan. After holding prebends in the churches of Exeter, Wells, and York, he was elected Bishop of Hereford and consecrated, 17 March, 1370. As his bishop he supported was given to the Prince of Wales and Bishop Wykeham against the anti-clerical movement led by the Duke of Lancaster, and later his efforts to suppress the Lollards were unavailing. In the Convocation of 1373 he strongly opposed the granting of a subsidy to the king until the latter should try to remedy the evils then afflicting the Church. Courtenay was
transferred to the See of London, 12 Sept., 1375. In 1377 Pope Gregory XI issued a Bull of excommunication against the Florentines and Courtenay published it at Paul's Cross. The result was that the Florentines in London were attacked by the populace; the magistrates had to interfere, and the king extended his protection to the foreigners. Courtenay was accused of violating the law by publishing the Bull. When his answer was rejected and he was summoned to appear before the archbishop of Canterbury, he was found guilty of having published annulling the Pope's Bull. Though his answer was made through a official, who declared from the pulpit that the bishop's words had been misunderstood, and there the matter ended. When the Convocation was summoned in 1377, the archbishop, in the interests of John of Gaunt, omitted to summon the archbishops of Canterbury and York; Courtenay and his bishop, against this act succeeded in getting Wykeham's rights recognized. Then followed his attempts to press the Lollards, and Wyclif was cited to appear before the archbishop at St. Paul's. Wyclif came accompanied by John of Gaunt, who insisted upon a seat being provided for the accused; an altercation ensued which resulted in the court breaking up in confusion. Courtenay's authority alone restrained the citizens from using violence towards Lancastrian. Again, in obedience to the pope, 18 Dec., he summoned Wyclif, but nothing came of the summons, and the Lollards continued to increase in numbers and influence. In 1378, he was offered to create Courtenay a cardinal; whether this was or was not, he was never raised to that dignity, but on 30 July, 1381, he became Archbishop of Canterbury. Then followed his appointment to the chancellorship of the kingdom 10 Aug., 1382, an office which he shortly afterwards resigned (15 Nov., 1382). Urged by Parliament he again turned his attention to the Lollards, calling a council which condemned their heretical opinions. Rigez, the Chancellor of Oxford and a leading Lollard, retracted and sued for pardon on his knees, but on his return to the university he continued as before. The Oxford Lollards were finally brought to submission on 18 Nov., when the recantation of their leaders was received at St. Frideswide's. The archbishop then obtained a statute commanding sheriffs and other officers of the king to imprison heretics when certified as such by a bishop. Though this law was repealed the next year, he still had the power of recommending all heretics in their own prisons. After the subjugation of Oxford he turned to Leicester (1380), placed the town under an interdict, and in the end received the recantation of the leaders. About 1382 he began a general visitation of his province and met with much opposition in his interference with the Bishops of Exeter and Salisbury, though both finally submitted. The Benedictine abbots also organized a strong opposition to his proposed visitation of Gloucester College, Oxford (1389); on his arrival he was treated with due respect, but they so firmly refused to acknowledge his right that he abandoned his design. Though a strong defender of the rights of the Church in England, he was always true and loyal to the pope. He so fearlessly condemned the extravagance of the king that he once (1385) had to take refuge in Devonshire to escape the royal anger. When the relations between king and Parliament became so strained as almost to lead to war, it was Courtenay who acted as mediator and averted the danger. He was first buried at Maidstone, where he had founded the College of St. Mary and All Saints; afterwards his body was removed to Canterbury and buried, in the king's presence, at the feet of the Black Prince, in one of St. Thomas's Monuments Academia, ed. Aubrey (London, 1868), I, 229; Facsimile Augustini, ed. Shirley (London, 1860), 22, 272-5, 336, 491; Hook, Lives of Archbishops of Canterbury (London, 1888), 237-8; Oxoniensis, ed. W. A. J. Courts, Ecclesiastical.—I. Judicial Power in the Church.—In instituting the Church as a perfect society, distinct from the civil power and entirely independent of it, Christ gave her legislative, judicial, and executive power to be exercised over her members without any interference on the part of civil society. It does not fall within our scope to prove that the Church is a perfect society, consequently endowed with the above-mentioned power. If one admits the Divine institution of the Church, and its authenticity and authority of the Gospel, he must acknowledge that Christ so constituted His Church as to enable her rulers to make laws and regulations for the faithful conducive to the attainment of eternal happiness. Moreover, as John XXII (1316-34) wisely remarks: "It would be folly to make laws unless there were some one to enforce them" (Cap. un. de Judicis, II, 1, in Extravag. Comm.). It is evident, therefore, that Christ in conferring legislative power upon the Church also gave judicial and coercive power. In proof of this we have, besides theological arguments, the practice of the Church which we have already referred to, as well in the beginning (II Cor., x. 8; xiii, 2 sqq. etc.) as during the subsequent centuries of her existence; and, moreover, made frequent use of it. Suffice it to recall the institution of canonical penances, the constitutions and laws of so many pontiffs and councils, containing not only positive enactments, but also sanctions to be incurred ipso facto by the rebellious and obstinate, or to be inflicted upon them at the discretion of ecclesiastical superiors.

Now the infliction of punishment certainly presupposes evidence of the crime, since, according to natural law, no one should be so punished whose guilt has been established. Hence the Church, in making use of her powers of legislation and coercion, must have also exercised judicial power. It is, moreover, historically evident that the Church often exercised these powers either through the Roman pontiff alone, by the agency of his delegates, through councils, individual bishops, other judges, ordinary or delegated. St. Paul plainly refers to a perfect judicial procedure when he cautions his disciple Timothy (I Tim., v, 19) not to receive an accusation against a priest except in the presence of two or three witnesses. In the next century, Marcion, after receiving absolution, vainly appealed to the Apostolic See for restoration to his office. In the trial, degradation, and excommunication of Paul of Samosata by the Council of Antioch (c. 268) we meet with a formal ecclesiastical trial. The Council of Elvira (c. 300) threatens with excommunication every accuser of a bishop, a priest, or a deacon who fails to prove his charge. The Third Council of Carthage (397) discusses regulations regarding appeals, and the Fourth Council of Carthage (398) prescribes the manner in which bishops are to exercise judicial authority. Finally, in the Apostolic Constitutions, which certainly are representative of the ancient practice of the Church, we find that certain days are set for conducting trials; the mode of procedure and other details are also clearly set forth. For later periods evidence abounds.

The Historical Development of This Power.—In the early centuries, when the Christians were still few in number; when their faith and new moral life constrained the followers of Christ to carry out all His precepts (especially the one by which He wished them to be distinguished from all other men in this period); and when there existed, generally, among the faithful the one heart and one soul
it was customary, in case a controversy arose, to appear before the bishop and accept his decision. This was in accordance with the grave admonition of St. Paul (Rom. vi., 11), that clerics who strive to bring their lawsuits or disputes before secular judges should be deprived of their clerical dignity and removed from their offices. Innocent III reprehended the Archbishop of Pisa (c. 12, De foro competenti. X. (II, 2)) for maintaining that clerics must, at least in this matter, be denounced to the pagans: "Ibidem [in ecclesia] etiam exhortationes castigationes et censura divina: nam et judicatur magno cum pondere, ut apud certos de Dei spectculo", i.e. the Church is wont to warn and punish, but a Divinely appointed censor, whose weighty decisions are accepted by all who are involved in the presence of God. Many similar utterances from the Fathers and the councils could easily be cited. It was, of course, impossible for the ecclesiastical magistrates (the bishops) to make use at that time of the legal solemnities introduced at a later period. Though rather summary, the judicial proceedings of the primitive ecclesiastical tribunals were in every respect in the strict sense of the word. In the work of Bishop Fessler concerning the early history of canonical procedure (Der kanonische Proces... in der vorjustinianischen Periode, Vienna, 1860) may be found details of interest concerning the ecclesiastical tribunals. Original documents, Paul of Samosata, Athanasius, and others.

When the Christians obtained control of the civil power of Rome, the reasons that moved St. Paul to persuade or command the faithful to avoid the civil tribunals were, of course, no longer pertinent. Gradually the Church allowed the faithful to submit their differences either to ecclesiastical or to civil tribunals. From the beginning of the new era the bishops shared with the secular magistrates the power of settling the disputes of the faithful. Constantine the Great published two constitutions (321, 331) wherein he not only permits laymen to have their cases tried before their bishops, but also decrees that all cases which until then were wont to be tried by the preotrian, i.e. by the civil, law should, when once settled before the episcopal courts, be considered as finally adjudicated. It was rightly established, however, that the law of the civil courts, even if given for civil courts, nor could all persons have recourse to them. To decide a controversy the judge must first have jurisdiction over the matters in question and the parties engaged in the controversy. A private individual, for instance, could not hand down a decision in a case which only pertains to the Church. In the case of a secular judge, his jurisdiction comes from the civil authority. In purely spiritual matters the latter is powerless, since God has committed them exclusively to the Church. In this domain the civil power has neither legislative nor judicial authority. Whatever, therefore, concerns the Faith, Divine worship, the sacraments, or ecclesiastical discipline is foreign to the civil order. With regard to such matters the Church has ever asserted her exclusive judicial authority [c. 1, dist. 96; c. 8, de arbitrio, X. (I, 43); c. 2, de judicis, X. (II, 1)]. This solemn contention of the ecclesiastical power was recognized and confirmed by the Roman emperors in their civil constitutions [Cod. Theod., de religione (XVI, 2), an. 309; VII, De episcop. audiencia, C. (I, 4)]. Likewise, not all persons are to be judged by secular courts. The Church could not permit her clergy to be judged by the common law; nor was it permitted for persons of superior dignity to submit themselves to their inferiors for judgment. The clergy, therefore, were exempt from civil jurisdiction, and this ancient rule was sanctioned by custom and confirmed by written laws. On this point the Church has always taken a firm stand; concessions have been wrung from her only where greater evils were to be avoided. Thus, in Christian antiquity, a Council of Aquileia condemned the bishop, Palladius, for defying a civil trial, and the Council of Milbo declared that clerics who strive to bring their lawsuits or disputes before secular judges should be deprived of their clerical dignity and removed from their offices. Innocent III reprehended the Archbishop of Pisa (c. 12, De foro competenti. X. (II, 2)) for maintaining that clerics must, at least in this matter, be denounced to the pagans: "Ibidem [in ecclesia] etiam exhortationes castigationes et censura divina: nam et judicatur magno cum pondere, ut apud certos de Dei spectculo", i.e. the Church is wont to warn and punish, but a Divinely appointed censor, whose weighty decisions are accepted by all who are involved in the presence of God. Many similar utterances from the Fathers and the councils could easily be cited. It was, of course, impossible for the ecclesiastical magistrates (the bishops) to make use at that time of the legal solemnities introduced at a later period. Though rather summary, the judicial proceedings of the primitive ecclesiastical tribunals were in every respect in the strict sense of the word. In the work of Bishop Fessler concerning the early history of canonical procedure (Der kanonische Proces... in der vorjustinianischen Periode, Vienna, 1860) may be found details of interest concerning the ecclesiastical tribunals. Original documents, Paul of Samosata, Athanasius, and others.

When the Christians obtained control of the civil power of Rome, the reasons that moved St. Paul to persuade or command the faithful to avoid the civil tribunals were, of course, no longer pertinent. Gradually the Church allowed the faithful to submit their differences either to ecclesiastical or to civil tribunals. From the beginning of the new era the bishops shared with the secular magistrates the power of settling the disputes of the faithful. Constantine the Great published two constitutions (321, 331) wherein he not only permits laymen to have their cases tried before their bishops, but also decrees that all cases which until then were wont to be tried by the preotrian, i.e. by the civil, law should, when once settled before the episcopal courts, be considered as finally adjudicated. It was rightly established, however, that the law of the civil courts, even if given for civil courts, nor could all persons have recourse to them. To decide a controversy the judge must first have jurisdiction over the matters in question and the parties engaged in the controversy. A private individual, for instance, could not hand down a decision in a case which only pertains to the Church. In the case of a secular judge, his jurisdiction comes from the civil authority. In purely spiritual matters the latter is powerless, since God has committed them exclusively to the Church. In this domain the civil power has neither legislative nor judicial authority. Whatever, therefore, concerns the Faith, Divine worship, the sacraments, or ecclesiastical discipline is foreign to the civil order. With regard to such matters the Church has ever asserted her exclusive judicial authority [c. 1, dist. 96; c. 8, de arbitrio, X. (I, 43); c. 2, de judicis, X. (II, 1)]. This solemn contention of the ecclesiastical power was recognized and confirmed by the Roman emperors in their civil constitutions [Cod. The Church could not permit her clergy to be judged by the common law; nor was it permitted for persons of superior dignity to submit themselves to their inferiors for judgment. The clergy, therefore, were exempt from civil jurisdiction, and this ancient rule was sanctioned by custom and confirmed by written laws. On this point the Church has always taken a firm stand; concessions have been
COURTS of the first tribunal, may then appeal from a lower to a higher court, and this appeal may be renewed as often as the law allows it; thus there may be two, three, or even more courts wherein a case may be tried. It may also happen that any given controversy must be settled by several judges, even though diverse tribunals exist, because the case, on account of their "quantity"—to use the terminology of the Roman law—i.e. on account of their varying importance, come under the cognizance of various judges and tribunals. In this case separate tribunals are so arranged that there exists a highest and a lowest, between which at least two other tribunals, or even several other tribunals. Or again a mixed system may prevail, in which are found both systems of regulating the administration of justice.

In the Church it is precisely this last intermediate system that prevails. For, as we have already seen, there are certain causes majores reserved to the judgment of the Roman pontiff exclusively; and as he has no superior there can be no higher court of appeal, nor, indeed, is it becoming that his judgment be reconsidered by any other, much less that it be revised. In these cases, therefore, there can be but one court of appeal, the court of the papal vicar. But it need not be remarked here that, as the Roman pontiff does not generally judge personally, but through delegates who give sentence in his name, he usually allows a hearing of the case by different judges, if it should happen that one of the contending parties, not satisfied with the first judgment, requests a revision from the pontiff himself. All other ecclesiastical cases, however, in which inferior courts give judgment admit of an appeal to higher ecclesiastical authority, and one may appeal not once only, but twice. Hence in ecclesiastical law there are, generally speaking, three courts of judgment, neither more nor less. This assertion admits of one exception, viz., when there is question of the validity of a marriage, or of similarly important matters, appeal to a fourth court is then at times admitted. In the twelfth and thirteenth centuries, however, vicars-general succeeded the archdeacons, and after the Council of Trent, during the seventeenth and eighteenth centuries, the archdeacons' courts ceased to exist. Consequently the first ecclesiastical court is now regularly that of the bishop or of his vicar-general. The second court is that of the metropolitan. But if it should happen that the bishop who gave judgment is not a metropolitan, but a suffragan, or an exempt bishop, or if the case was, in the first instance, brought before a provincial council, then the tribunal of first appeal is none other than the tribunal of second and last appeal, and this is always and for all parties the tribunal of the Roman pontiff. In this case, therefore, only two appeals are possible. This is the provision made by the common law, though sometimes an approved custom—more frequently an express privilege—provides differently. Thus, for instance, in the Austro-Hungarian Empire the ecclesiastical court of Prague is the court of appeal for the Archdeacon of Hlinsko and Sulzbach; for Prague it is Olmütz; for Olmütz, Vienna. So, too, in Latin America, if the first two sentences do not agree, an appeal may be taken in the third instance to the bishop who resides nearest to the one who first gave judgment. This was decreed by Leo XIII in his bull "Tertiis Occasionibus," 18 April, 1897. It must be borne in mind, however, that, owing to the special pre-eminence of the Roman pontiff, an appeal may always be made from the tribunal of an inferior judge to his tribunal immediately, thus passing over the intermediate courts, to which, according to the general rules, the appeal must otherwise be directed.

What has been said above applies to the ecclesiastical discipline now in force. It must be

IV. CLASSIFICATION OF ECCLESIASTICAL COURTS.—

In every society courts may be classified in two ways, according to the twofold manner in which justice may be administered. Thus it may happen that in a certain society the administration of justice is so settled that controversy is not determined by one sentence, but several appeals may be made. The defendant, if unwilling to abide by the decision
added that in the Eastern Church the title of metropolitan is generally, though not always, a merely honorary title, the metropolitan power being almost entirely in the hands of the patriarch himself; it is consequently to him that an appeal lies from the judgment of the bishop. With regard to the ancient ecclesiastical discipline it is worthy of remark that in former times and in certain provinces, for instance, a metropolitan's cases were thereby referred to the judgment of the Church court of the metropolitan to that of the primate or patriarch. Actually, with exception of the Primate of Hungary in certain cases, this primate's court no longer exists. Where appeals are possible, the courts are said to be subordinate one to the other, and are so in fact; thus, for instance, a metropolitan's case, by a genuine order or mandate, require such data from the inferior court as may seem to it necessary for a proper cognizance of the case. Here we must carefully note the difference which oftentimes exists between subordinate courts in ecclesiastical and in civil law. In the latter the superior court frequently exercises a certain, true, disciplinary power over the inferior court, either by instituting an inquiry into its proceedings, or by delegating a substitute, if the inferior judge should be prevented from exercising his office or should be rendered incapable. All this is foreign to ecclesiastical law, where courts of suffragan sees are subject to the metropolitan court in such matters only as regard the appeal actually before the metropolitan. In all other matters the episcopal courts are quite independent of metropolitan authority. Other courts, however, whether metropolitan or episcopal, act in no way subordinate, but are entirely independent of one another, though this does not relieve them from the obligation of mutual assistance. Thus it may often happen that the administration of justice in one locality necessitates proceedings in the territory of another judge. Should this happen, the court whose case in hand may request the local judge of the locality in which some proceeding necessary to the administration of justice or to a proper cognizance of the case must be instituted (e.g. the examination of witnesses or the execution of a summons) to see to its performance. And the court to which such a petition has been addressed through requisitional letters by another court is obliged to render this subsidiun tiris, or legal assistance, unless the request be evidently unlawful. But the obligation arises, not from the authority of the court requesting assistance, but from the authority of the law, which, so far as it is evidently just, for all such courts are courts of one ecclesiastical society, the one Catholic Church, whose welfare demands that in it justice be rightly administered.

V. CONSTITUTION OF THE COURTS.—In ecclesiastical law the Roman pontiff and the bishops, as also the metropolitans in cases of appeal, likewise all those who in their own right (ordinario iure) exercise judicial power in the Church, may pronounce sentence personally in all cases brought before their tribunal. They may also, if they think fit, entrust the hearing of the case to judges delegated by them; and they may thus delegate, not only one person, but also several, either—to use the canonical terms—in solidum or collegiátil. If they were delegated in solidum, or severally, then he who first took the case in hand must examine it and pronounce judgment. But if they are to proceed collegiátil, we have a true collegial defendant of the judge, in whom may be observed which the law prescribes and the nature of things demands in the exercise of collegiate acts. We have many examples, both in ancient and modern times, of judges who had thus to proceed as a college. We have already made mention of the ancient discipline that prevailed, principally in the African Church, and according to which certain gravé cases were to be referred to provincial councils. This regulation was retained, partly at least, by the Council of Trent. It decreed that the more important criminal cases of bishops should be reserved to the pope, whilst those of lesser importance are left to the cognizance of provincial councils. This is also the origin of the celebrated tribunal called the Rota, endowed from the funds of the Church to which the metropolitan power was.

The Roman congregations themselves are simply collegiate courts whenever they exercise judicial authority. In not a few dioceses the so-called Officialiatus (Officialitates) exist, which also administer justice as a college. Gregory XVI erected in the States of the Church council for criminal cases which were truly collegiate bodies and proceeded as such; though herein the pope acted, not as pope, but as temporal sovereign. Hence this case does not properly belong to canon law. In these courts the number of judges is not definitely fixed, though there are usually, besides the president, two or four judges, seldom more than six. Therefore it is generally the rule that the number of judges be uneven, as the case might otherwise often be left undecided. A majority of votes decides, especially in giving sentence; if the votes for both sides are equal, the case is undecided. But this is not always the case, however. It is often provided that the vote of the president shall be decisive, or that the case shall be decided in favour of the defendant and not of the plaintiff, unless the case be a privileged one, v. g., if the validity of a marriage is in question. What the powers of the president are in a college of judges must be gathered from the decree which established the court in question, or also from the latter's practice and tradition. It is to be noted that sometimes a court resembles a college of judges without being such in fact. Thus a bishop can order his vicar-general in giving judgment in certain cases, particularly in cases of the greater moment, to name two or more assessors, whose counsel he must hear before pronouncing sentence. In this case it is evident that there is no real college of judges, as only the vicar-general can pronounce sentence; still the case must be examined by the assessors, who can and ought to manifest to the judge all which they think may conduce to a just sentence.

The Judge.—It is evident that in every trial the judge has the leading rôle, whether this judge be an individual or a college, and his obligation is to apply the law between the two contending parties. But it is also his duty to pronounce sentence in conformity with the rights and the law, without prejudice to the right and equity; and as his office is to see to the execution of the law, he has the right to require from the contending parties reverence and obedience. For this same reason he is empowered to do whatever is necessary to make his jurisdiction effective, and therefore to use all measures for obtaining the same end. This coercion can be exercised not only against the contending parties, if they are disobedient, but also against others who have an accessory part in the trial, e.g. the procurators and advocates. In his capacity as a public person the judge is worthy of public confidence; hence the presumption is in his favour that the legal formalities have been properly observed in his judicial proceedings, and that what he testifies to as judge is true. Canon law commonly requires that in ecclesiastical tribunals there shall be other persons present besides the judge; thus there are always a notary public, a defender of the Church, a prosecutor, and finally a fiscal, who in criminal cases, and a fiscal promoter (promotor fiscalis) in the great majority of criminal cases. Ordinarily other persons are admitted, not by mandate, but through permission of the law, for the rapid and better administration of justice, v. g. assessors and auditors.

The Notary (actarius), whose presence was
decreed by Innocent III in the Fourth Lateran Council (cap. 38, c. 11 de probat., X. (II 19)) is a public person whose obligation it is to transcribe with fidelity the acts of the case. As this office is merely that of a clerk for the sake of private profit; nor is the judicial power or jurisdiction, it may be held in ecclesiastical courts even by a layman. Still, clerics are not excluded from this office, nor does cap. 8, "Ne cleric vel monachi", etc., X. (III, 50) contradict this, as there it is a question only of clerics who hold the office for the sake of private profit; nor is the contrary affirmation of Fagani of any weight, as it is not supported by conclusive reasons. This is shown also by the actual practice of ecclesiastical courts. It is sufficient here to call to mind the notaries of ancient times who wrote down the acts of the courts; since this service must be performed by the councils, and still more the class of the prothonotaries, who have recently been divided by Pius X (21 Feb., 1905) into four classes, and rank among the highest prelates.

The Auditor is sometimes a delegated judge, to whose power a certain amount of jurisdiction, v. e. the formal opening of a case (contestation litis): in the practice of the present day he would be called an instructing judge. He may also be an ordinary official to whom has been assigned, but without any jurisdiction, a part of the proceedings, e. g. the simple act of taking evidence, witnessed properly called auditor. It follows from this that the duties and powers of the auditor must be deduced as from the mandate itself. It was customary to have auditors even in the Middle Ages, especially in the Roman Curia, and there still remains some vestige of this office in the auditors of the Rota Romana, who after the time of the Papacy,IX formed a special college (Durandus, in Speculum).

Assessor.—The title of assessor has also a twofold meaning, i. e., he may be a judge in a collegiate tribunal (Dig. I, 22; Cod. I, 51), or one who assists the presiding judge in interpreting the law. In the latter meaning assessors are simply advisers of the judge, who aid him to obtain a full knowledge of the case and by their advice help him to decide justly.

There are some other inferior ministers of the judge in an ecclesiastical court, whose names it will be sufficient to mention, e. g. the appariatores, tabelliones, curatones, exerentores, etc., according to the different customs of the courts.

Fiscal Promoter.—After having spoken of the judges and of those who assist them in the administration of justice in the different courts, it is necessary to say a few words on the fiscal promoter (promotor fiscalis). The reference was made in criminal cases. Although not on the side of the judge, as, by public authority, he rather takes the place of accuser or public prosecutor, still he contributes greatly to the end for which the courts were established. The fiscal promoter (fiscus, public treasury)—should it attend to the most important service of his office, a better title would be "promoter of justice"—is a person who, constituted by ecclesiastical authority, exercises in the ecclesiastical courts and in his own name the office of a public prosecutor, especially in criminal cases (Instr. S. C. Episc. et Reg., 11 Jan., 1880, art. 13). If we wish to include in the definition all that is comprehended in his office, he might be defined as a public person legitimately appointed to defend the rights of the church, especially in court. Périès, in his article "Le procureur fiscal ou promoteur" (Revue des sciences ecclésiastiques, April, 1897), rightly says that the whole office of the fiscal promoter must be summed up in three points: solicitude for the observance of discipline, particularly among the clergy; attendance at the processes of beatification and canonization in episcopal courts; and defense of the validity of marriage and of religious profession. All these functions, it is true, are not always carried out by one and the same person; they are all, however, included in the full idea of the promotor fiscalis, for it is this official's duty to defend the honor of the Church and the dignity of Divine service, the dignity of the clergy, the holiness of matrimony, and perseverance in the perfect state of life.

It is unnecessary here to say more about the plaintiff and the defendant in ecclesiastical courts, or about the person appointed to assist both, e. g. advocates and procurators.

VI. The Competence of Ecclesiastical Judges.

—As already explained, there are different kinds of judges and courts in the ecclesiastical forum. Nevertheless contending parties cannot choose their judge; the judge, as a rule, must be appointed by the party (proprius iudex), i.e. by one who can exert his jurisdiction against the accused: in other words, he must be a competent judge. Moreover, as the accused is brought to court against his will, it is further necessary that the judge have the power to summon him elsewhere. This was often the case, and there were courts by which an accused party comes under the jurisdiction of a certain judge: residence or domicile, contract, situation of object in dispute, place of crime committed. It is self-evident that, if in the civil courts it was necessary for the proper administration of justice to place a restriction on the competence of jurisdiction, this same restriction was much more necessary in canon law, since the jurisdiction of the Church extends to the entire world. Otherwise great confusion would have resulted and the administration of justice itself would have suffered, since it would have been very difficult to hear many cases if, in a given case, the parties were to be heard at a great distance from the court. For this reason the famous principle of the Roman law: "He who acts as judge out of his district can be disobeyed with impunity" [extra territorium jus dicenti impune non potest, § 20. De jurisdict., D. (I, 1)], adopted also by modern civil codes, was accepted in canon law. This territorial character of certain courts affects not only persons, but also things (res) and rights (jura); competent judges, therefore, have power not only over persons, but also over things situated in their territory. In both civil and criminal cases (therefore, all can be sued), all classes of the place of residence (iudex domiciliis). This residential forum is considered the most natural of all, therefore the ordinary and general forum for all cases, so that a person may be summoned to trial by the judge within whose jurisdiction he resides, whether the trial was committed at his own request, or not. Hence it is accepted that the jurisdiction of such a judge always concurs with the jurisdiction of any other judge or any other forum.

A person may also "acquire" forum, i. e. become subject to trial in any place by reason of a crime committed there. It is, therefore, often that other persons, having fact brought him within the jurisdiction of a judge of a given place who can punish him, and of whom he would otherwise be independent. It is easy to see the reasonableness of this; for it is just that where a person has given scandal by his bad conduct he should there make amends for it by accepting the deserved punishment. Again it is much easier to establish the fact and inquire into the authorship of a crime in the very place where it has been committed. Thus a person who makes a contract in a certain place thereby acquires right of forum in the same place, though not one of its citizens nor in any sense a resident, provided of course, he may be present in that place at the time of the contract (de foro competenti, II, 2, in 6°), it being much easier to adjudicate disputes about a contract in the place where it was entered into. Finally the possessor of a chattel (res) may be summoned before the judge of
the territory where the object in question is situated, because it is only natural that where a chattel is in question (actio rei), precisely such chattel, and not the chattel itself, should be taken, etc. Therefore, also, the trial becomes more easy and rapid. In addition there are other (extraordinary) ways by which a person can obtain "right of forum" in a certain place; it will suffice to indicate them briefly. Besides the "forum" that everybody is considered to have, there should be taken the "forum his" granted by reason of the prorogation or suspension of a case, to which should be added the prevention (queasing of indictment) and transfer of a case.

VII. ECCLESIASTICAL PROCEDURE.—Two methods of judicial procedure are recognized in canon law: one is called full (longa) and the other simple, extraordinary, and summary. In the ordinary procedure all the solemnities prescribed by the law are observed. These are described in the second book of the "Decretals" of Gregory IX, devoted entirely to the conduct of ecclesiastical courts. They may be summarized as follows:—The party intending to bring suit must first send to the judge a written petition manifesting his intention, and setting forth his claim. If the judge thinks the claim reasonable and therefore worthy of a hearing, he issues a summons (citatio) calling the accused before his court. In modern civil codes a similar order could be given his fellow-citizen to present himself before the judge for the examination of a case. Though found in the Roman law of the Twelve Tables, the canon law does not recognize in the private individual any such right, and holds to the later procedure of Roman law, that dates from Ulpian and Paulus, and was afterwards confirmed by the laws of Justinian. According to this procedure, the summoning of the accused implies power of jurisdiction, and must therefore proceed from the judge himself. Generally an ecclesiastical judge ought not to be satisfied with one summons; it should be repeated three times before the accused can be considered contumacious. However, if in the summons itself it be clearly stated that it must be considered as final, a repetition of the summons is not necessary. The defendant, being summoned, must appear before the judge, and, unless the case be a criminal one, is entitled to be heard by counsel, provided the judge does not think him guilty, or one of certain other exceptional cases, he may, after hearing the cause of the summons, immediately enter a counterpleas against the plaintiff before the same judge.

When the defendant is summoned, whether it be to his wish to enter a counter-plea or some other plea along with the plaintiff before the judge, and within the time fixed by the latter. When they have come before the judge, the plaintiff states clearly and precisely what he demands of the defendant, and the defendant on his part either admits the justice of the plaintiff's demand, in which case he receives satisfaction, or he denies it (at least in part), and makes known his wish to contest the matter judicially; we then have a contested case (his contestata). Such a contestation accomplishes two things: first, it fixes precisely the object of the trial, and, second, the parties bind themselves by a quasi-contract to prosecute the trial, and agree from that moment to accept all the obligations imposed by the sentence, including the obligation of the condemned party to make payment: in a word, they agree to abide by the legitimate finding of the court. Then follows the "oath of calumni" (juramentum calumnie), i.e. the oath demanded by either plaintiff or defendant covers the entire case, and can therefore be taken but once in the course of the same trial. Its object is the credibility which both plaintiff and defendant are anxious to maintain, convinced as each is that he has a just case. By this oath each party affirms that he will continue the trial solely for the purpose of litigation, and not of calumni; he promises, moreover, to observe good faith. If the oath is dispensed with, each litigant may produce a full argumentation (positiones et articulis) of his case, and may produce his evidence. Finally, the judicial interrogatory of the two parties cannot be omitted, whether it takes place at the request of the litigants, or because the judge considers it his duty.
Summary proceedings are commonly entered upon for one of two reasons: either because the cases are of such a nature as to demand prompt settlement (alimony or necessary support, marriage cases, and many cases of ecclesiastics, e.g., elections, offices not vacant, benefices); or because the cases are of minor importance, slight and easily remediable injuries, comparable to civil lawsuits for trifling debts. In all such cases the judge is allowed to base his sentence on evidence somewhat less conclusive than would be called for in cases of greater importance (semiplena probatio). Summary procedure is now frequently practiced in civil cases of minor importance; the canon law, however, by an instruction of the Congregation of Bishops and Regulars (11 June, 1880), restricts its use to countries whose bishops have formally obtained the right to proceed according to said instruction, originally granted to the bishops of France. In 1883 the Congregation of Propaganda extended its use to the bishops of the United States of America. (See also the decrees of the First Plenary Council of South America, art. 965–991.)

It may be asked, finally, what influence has the Roman law exercised on the canon law. The answers to this question are very brief. It is certain, on the one hand (Fesseler, op. cit.), that the judicial procedure of the canon law was already quite elaborate in form when, early in the sixth century, the Emperor Justinian published his "Institutes," "Digest," and "Code." On the other hand, it is equally evident that Roman law, and particularly that of Justinian, has exercised a very great influence upon canon law; it is universally admitted as one of the subsidiary sources (fontes) of canon law, especially in court procedure. The canonical law, however, has wisely perfected certain enactments of the Roman law. Thus, the right of personal possession, possession in the Roman law, was amplified and highly developed by canon law, which gave additional legal protection in the case of actual possession obtained by injunction (interdictum) of the magistrate. The possessory interdict (unde n), it is well known, was granted by Roman law for immovable objects only; the canon law extended it to movable objects, and even to abstract rights (jura incorporalia). Moreover, whereas by Roman law only a strictly legal suit (actio spolii) was open to a person deposed of his goods, the canon law allowed him an additional suit in equity (actio spoliationis). In the same way, the Roman law, a suit lay only against the deposer (spoliator) or the one who ordered or approved the act (spolium mandatorum, rahabentem), whereas the canon law permitted the entering of suit against any third person found in possession of the plaintiff's goods, whether such detection was in good faith or not.

Benedetto Oezetti.

Cousin, Jean, a French painter, sculptor, etcher, engraver, and geometrician, b. at Soucy, near Sens, 1600; d. at Sens before 1593, probably in 1590. Cousin began his long art-life in his native town with the study of glass-painting under Hympé and Grasoot. At the age of 19 he went to Paris, where he began to make a master, the young man became a great student of mathematics and published a successful book on the subject. He also wrote on geometry in his student-days. In 1530 Cousin finished the beautiful windows for the Sens cathedral, the subject chosen being the "Legend of St. Eutropius." He had also painted the windows of many of the noble châteaux in and around the city. The latest date on any of his Sens work (1530), points to the year 1590, when he began work as a goldsmith; but the amount and kind of his productions in the precious metals are alike unknown.

In Paris Cousin continued his eminent career as a glass-painter, and his masterpiece, the windows of the Sainte-Chapelle in Paris, are considered the finest examples of glass-painting in all France. He subsequently devoted himself to painting in oil, and is said to be the first Frenchman to use the "new medium." For this and other reasons Cousin has been called "The Founder of the French School," but his work in oil, while graceful, refined, reserved, and even classically severe, is more that of an Italian "Eclectic" than of a "founder of a national school." Pictures attributed to him, all of much merit, are found in several of the large European collections, but, excepting "The Last Judgment," none is known to be authentic. "The Last Judgment" is lent possession, position, noble in conception, and beautiful and harmonious in colour, strongly suggesting Correggio. For a long time this masterpiece, which won him the name of the "French Michelangelo," lay neglected in the sacristy of the church of the Minims, Vincennes, until it was rescued by a priest and became one of the important works in the Louvre. It is also celebrated for being the first French picture to be engraved.

In the sixteenth century Cousin's renown came from his historical and glass-paintings; to-day he is best known as an illustrator of books. He made many fine designs for books, and often executed them himself. The "Bible" published in 1590 by Le Clerc, and the "Metamorphoses" and "Epistles" of Ovid (1566 and 1571 respectively) contain his most celebrated work as an illustrator. Cousin etched and engraved many plates after the manner of Mazzuola of Parma, to whom the invention of etching has been ascribed, but he excels all his contemporaries in facility of execution and classical breadth and simplicity of idea and feeling. His etched work approaches in excellence the oil-paintings of the great masters. Cousin's sculptures are full of strength and dignity. The mausoleum of Admusolle at Chabot is the best piece of French sculpture of the sixteenth century; the strikingly beautiful tomb of Louis de Brezé (Rouen) is another celebrated achievement. In addition to his early writings on mathematics, he published, in 1560, a learned treatise on perspective, and, in 1571, an excellent work on portrait-painting. During his life Cousin successfully pursued every branch of the fine arts, and enjoyed the favour of, and worked for four kings of France: Henry II, Francis II, Charles IX, and Henry III. Among his paintings, in addition to the "Last Judgment," he should be mentioned for the miniatures in the prayer book of Henry II now in the Bibliothèque Nationale; among his etchings and engravings, the "Annunciation" and the "Conversion of St. Paul"; among his woodcuts, the "Entrée de Henry II et Catherine de Médicis à Rouen" (1561).}

Benedetto Oezetti.

Charles-Edmond-Henride, French historian of music, b. at Bailléul, department of Nord, France, 19 April, 1805; d. at Lille, 10 January, 1876. Coussemaker rendered great service to musical science by bringing out, during the early development and history of harmony and counterpoint, as shown by the treatment of these divisions of music in that section of the "Musica Enchi-
Coustant, Pierre, a learned Benedictine of the Congregation of Saint-Maur, b. at Compiegne, France, 30 April, 1654; d. at the Abbey of Saint-Germain-des-Prés, near Paris, 18 October, 1721. After receiving his classical education in the Jesuit College at Compiegne, he entered the Benedictine monastery of Saint-Rémi at Reims as novice at the age of seventeen, and took vows on 12 August, 1672. He made his philosophical and theological studies partly at Saint-Rémi, partly at the monastery of Saint-Médard in Soissons whither he was sent to study philosophy under François Lamy. In 1681 his superiors sent him to the Abbey of Saint-Germain-des-Prés to assist his confère Thomas Blampin in editing the works of St. Augustine. Coustant's chief contribution to this publication, which still remains the best edition of St. Augustine, consists in the separating of the spurious from the genuine writings. He also aided his fellow Benedictines Edmond Martène and Robert Morel in making the indexes for the fourth volume containing the commentaries on the Psalms. In an appendix to the fifth volume he collected all the spurious homilies and traced them to their true sources.

The learning and acumen which Coustant displayed in his share of the edition of St. Augustine's works did not remain unnoticed by the Abbot General of the Maurist Congregation. When Mabillon suggested a new edition of the works of St. Hilary of Poitiers, it was Coustant whom the abbot general selected for this difficult undertaking. There was before this time practically only one edition of this great Gallic Doctor of the Church, namely the defective and unmetrical one published by Erasmus (Basle, 1523). The subsequent editions of Migne (Paris, 1844), Lipsius (Basle, 1550), Grynaeus (Basle, 1570), Gallotius (Paris, 1572), and the one issued by the Paris Typographical Society in 1605 were all in Latin, and not in the genuine text. After making himself thoroughly conversant with St. Hilary's terminology and train of thought, Coustant compared numerous manuscripts with a view to restoring the original text. In an extensive general preface he proved the Catholicity of St. Hilary's doctrine concerning the Holy Trinity, and in the Virgin Mary, the Holy Eucharist, Grace, the Last Judgment, the Holy Trinity, and other Catholic dogmas. The preface is followed by two biographical sketches of the saint, the former of which was composed by Coustant himself from the writings of Hilary, while the latter is a reproduction of the life written by Fortunatus of Poitiers. Each treatise is preceded by a special preface stating its occasion and purpose, and the time when it was written. Difficult and obscure passages are explained in foot-notes. This edition of St. Hilary is a model work of its kind and ranks with the most successful of the Maurist Congregation. It was published in one folio volume at Paris in 1693 and bears the title: "Sancti Hilarii Pictavorum episoped ad manuscriptorum codices gallicanos, romanos, belgicos, nec non ad veteres editiones castigata, aliquot aucta opusculis", etc. The work was reprinted with a few additions by Scipio Maffei (Verona, 1730) and by Migne, P. L., IX and X.

Coustant's love for study did not prevent him from being an exemplary monk. Though often overwhelmed with work, he was punctual in attending the common religious exercises and found time for private works of piety. After completing the edition of St. Hilary's works he requested his superiors to release him temporarily from literary labours and to allow him to devote more of his time to prayer and meditation. The wish was granted, though not as he expected. He was appointed prior of the monastery of Sainte-Croix in Compiègne, but was soon recalled to Saint-Germain-des-Prés. For some time he worked on the new edition of the Maurist Breviary; then he assisted his confère Claude Guesmié in making the elaborate general index to the works of St. Augustine.

Immediately upon the publication of St. Augustine's works in 1700, Coustant was entrusted by his superiors with the editing of a complete collection of the letters of the popes from St. Clement I to Innocent III (c. 88-1216). To understand the colossal labour which such an undertaking entailed, it must be borne in mind that very little had been done in this direction before. There were, indeed, the papal decretals from Clement I to Gregory VII, collected by Cardinal Antonio Caraffa and published by Antonio d'Aquino in 1591, but they were incomplete and their chronological order was frequently incorrect. There were also the "Annales" of Baronius and the "Concilia antiqua Galliae" of the Jesuit Jacques Sirmond, and other works containing scattered letters of the popes; but no one had ever attempted to make a complete collection of papal letters, much less to sift the spurious from the authentic, to restore the original texts and to order the letters chronologically. After devoting some twenty years to this gigantic undertaking, Coustant was able to publish the first volume in 1721. It contains the letters from the year 67 to the year 440, and is entitled "Epistole Romanorum Pontificum et quod ad eos scriptae sunt a S. Clemente I usque ad Innocentium III, quotquot reperiri potuerunt." (Paris, 1721). In the ex-
tensive preface of 150 pages Coquot explains the origin, meaning and extent of the papal primacy and criticism of the existing jurisdiction of canons and papal letters. The letters of each pope are preceded by a historical introduction and furnished with copious notes, while the spurious letters are collected in the appendix. Coquot had gathered a large amount of material for succeeding volumes, but he died the same year in which the first volume was published, and the work, which had assisted Coquot in the preparation of the first volume, was entrusted with the continuation of the work, but he also died (11 October, 1724) before another volume was ready for publication. About twelve years later, Ursin Durand undertook to continue the work; in his case the disorders in which he became involved prevented the publication of the material he had prepared. Finally the French Revolution and the dissolution of the Maurist Congregation gave the deathblow to the great undertaking. A new edition of Coquot's volume was brought out by Schönenmann (Göttingen, 1796); a continuation, based chiefly on Coquot's manuscripts and containing the papal letters from 461-521, was published by Thié (Brussels, 1857). There are extant in the Bibliothèque Nationale at Paris fourteen large folio volumes containing the material gathered by Coquot and his Benedictine coauthors. Coquot himself also took part in the controversy occasioned by Mabillon's "De Re Diplomatica" between the Jesuit Germain and the Maurist Benedictines. In two able treatises he defends himself and his confrères against Germain who disputed the genuineness of some sources used in the Benedictine edition of the works of St. Hilary and St. Augustine.

CATHEDRAL AND TOWN, COUTANCES

DIOCES OF COUTANCES.—The catalogue of the bishops of Coutances, as it was made out at the end of the eleventh century, gives as the first bishop St. Eptiulius and St. Exuperatus (fourth century). Leontius, the first bishop historically known, attended the Council of Orleans in 511. Coutances counted among its prelates St. Léonard (Laute), prominent in the great councils of the middle of the sixth century; St. Rumpharius, apostle of Barbierd (d. about 586); St. Frémond (Frodonius), who, assisted by Thierry III, founded a monastery and a church in honour of the Blessed Virgin in 679 at Ham, near Valognes; Blessed Geoffroy de Montmay (1049-1093), friend of William the Conqueror, whose episcopate was signalized by the building of the cathedral of Coutances, to which purpose he devoted large sums of money that he had gathered in Apulia, and also by the founding of the Benedictine Abbeys of Lessy, Saint-Sauveur-la-Visconte, and Montereau, and of the canonsries of Cherbourg, Hugues de Morville (1202-1238), organizer of charities in the diocese and founder in 1209 of the celebrated Hôtel-Dieu of Coutances; Philippe de Montjeu (1424-1439), who presided over the deputation of theologians sent by the Council of Basle to the Bohemians and Moravians in order to reconcile them to the Church, and Giuliano della Rovere (1476-1478), afterwards pope under the name of Julius II. The account book of Thomas Marest, curé of Saint-Nicolas of Coutances (1397-1433), is very interesting for the history of social life during the Hundred Years' War. The Huguenots took possession of the city in 1522, but were banished in 1575. Through the efforts of the Venerable Pére Eudes the cathedral of Coutances was the first church in the world to have an altar dedicated to the Sacred Heart.
 Dioecese of Avranches.—Nepos, the first bishop known to history, assisted at the Council of Orange in 441; his bishops are in the church of St. Pair, or Paternus (d. 665), a great founder of monasteries, notably that of Sessiacum, near Granville, which took the name of Saint-Pair; St. Leodevaldus (second half of sixth century); St. Rægertmannus, Abbot of Juniemèue (about 622); St. Aubert, who is the bishop of the Archdiocese of Mont St. Michel; Robert Ceneau (1533-1560), author of numerous works against the Calvinists; and Pierre-Daniel Huet (1689-1699), a celebrated savant who assisted Bossuet in educating the son of Louis XIV and directed the publication of the Delphine edition of the classics. Green in the 14th century were the victories of the Bretons and the incursions of the Normans, the archbishops of Rouen were titulars of the See of Avranches. In the Middle Ages the bishops of Avranches were at the same time barons of Avranches, barons of Saint-Polbert-sur-Mer, and proprietors of numerous domains in England and Jersey. The school of Avranches, in which Lanfranc taught and Anselm studied, was famous in the eleventh century. The cathedral church, in September, 1171, Henry II of England swore before the legates of Alexander III that he, innocent of the murder of St. Thomas Becket was a beautiful monument of the eleventh and twelfth centuries. It collapsed during the Revolution. (See Mont St.-Michel.)

The Diocese of Coutances and Avranches honours in a special way St. Piétrie (Pierce), put to death in the third century for having facilitated the burial of St. Nicasius, the apostle of Véchin, and conspicuously honoured in the liturgy of Avranches; St. Floquel, born in the district of Cotentin, and martyred at the beginning of the fourth century; St. Sevillio, companion of the bishop St. Païr, and founder of the monastery of Mont Tombe (subsequently Mont St.-Michel); St. Stéphane, Gourd, and Fraisage, monks of Sessiacum; St. Germanus of Scotland, who, in the fifth century, evangelized the Saxons colonies of the district of Bezen; St. Severus, the shepherd (sixth century), who was perhaps Bishop of Avranches; the monk St. Marcouf (sixth century), founder of an abbey called after him, and his name is borne by an island to which he retired each Lent for extraordinary mortification; St. Édel, disciple of St. Marcouf, beheaded in a grotto at Jersey; St. Ortaire, Abbot of Landelles (end of sixth century); St. Paternus of Coutances, monk at Sessiacum, and finally assassinated (eighth century); St. Leo of Carentan, born about 810, a protege of Louis the Debonair and martyred at Bayonne, the English hermit St. Clair (ninth century); St. Guillaume Firmat (eleventh century), hermit, pilgrim to the Orient, and patron of the collegiate church of Mortain; St. Thomas Hélus of Biville, chaplain to St. Louis (thirteenth century); Julie Postel, known in religion as Sainte Madeleine (1756-1846), a native of Barfleur, declared Venerable in 1897.

Many men worthy of mention in ecclesiastical history were natives of this diocese: Alexandre de Villedieu (thirteenth century), canon of Avranches and author of a Latin grammar universally studied during the Middle Ages; the learned but visionary Guillaume Postel (d. 1581), professor of mathematics and Oriental languages in the College of France; the Franciscan friar Feuardent (1539-1610), prominent in the Wars of the League; Cardinal du Perron (1514-1574), who became a classic publicist Benjamin Basnage (1580-1652); the physician Hamon (1618-1687), well known in the history of Jansenism; Jean de Launoy (1603-1678), celebrated for his critical work in ecclesiastical history; Marie des Vallées, the demoniac (d. 1658), who made a great sensation in her day and whose sayings were gathered into four volumes by the Venerable Père Eudes, who had exercised her; the Abbé de Fouvac (1731-1810) and the Jesuit Neuville (1683-1747), both great preachers; the Abbé de Saint-Pierre (1658-1743), author of the "Paix perpétuelle," and the Eudist Le Franc, superior of the Coutances seminary in the eighteenth century and the first Catholic publicist to write against Freemasonry.

Before the enforcement of the law of 1901 there were in the diocese Oratorians, Sulpicians, Eudists, and a local congregation of Brothers of Mercy of the Christian Schools, founded in 1842 (motherhouse at Montebourg), and there are Trappists still at Briquèques. The diocese includes several congregations of women: the Tertiary Sisters of Our Lady of Mount Carmel, founded in 1686; the Sisters of the Sacred Heart of Jesus, founded in the seventeenth century by Père du Pont, a Eudist, and in 1783 placed under the patronage of the Sacred Heart, being the oldest French congregation known by that title; the Sisters of Mercy of the Christian Schools, founded in 1802 at Saint-Sauveur-le-Vicomte by the Venerable Sœur Postel. Diocesan missionaries are installed at Biville, near the tomb of Blessed Thomas Hélie, a much frequented place of pilgrimage.

In 1900 the diocese included in religious institutions, 28 infant schools, 1 orphanage for boys and girls, 3 boys' orphanages, 24 girls' orphanages, 41 industrial schools, and 35 hospitals, homes, and asylums, 30 houses of nursing sisters, and 3 insane asylums. The statistics for the end of 1905 (close of the Concordat period) indicate a population of 491,372, with 61 parishes, 612 succursals (mission churches), and 284 curacies, then remunerated by the State.

Gaulia Christiana (ed. nova, 1759). XI, 465-509, 583-3, 893-911, 983, and Instrumenta, 105-24, 217-52. L'histoire chronologique des évêques d'Avranches de maître Julien Nicolle (1800) and L'Histoire ecclésiastique du diocèse de Coutances, also written in the seventeenth century by René Toussaint de Béja (1643-1708), are works of sufficient historic value to have been republished in our day, the first by Beaurepaire, the second by Héron (Rouen, 1834-6). Lécard, Histoire du diocèse de Coutances et Avranches (Coutances, 1877); Pigeon, Le diocèse d'Avranches (Coutances, 1880); Vies des saints du diocèse de Coutances et Avranches, 1882, 1892; Le Cachoux, Essai historique sur l'Espèce-Dieu de Coutances (Paris, 1860); Duchesne, Festes épiscopales, II, 221-4, 229-40; Chavallier, Topo-bibl., 816-818, 286-7.

Georges Goyau.

Couturier, Louis-Charles, Abbot of the Benediction monastery of Saint-Pierre at Solesmes and President of the French Congregation of Benedictines; b. 12 May, 1817, at Chémillé-sur-Dême in the Diocese of Tours; d. 29 October, 1890, at Solesmes. He was educated at the petit séminaire de Combré in Anjou and at the grand séminaire of Angers. He was ordained priest 12 March, 1842. After teaching history at Combré from 1836 to 1854, he entered, in the latter year, the Benedictine monastery of Saint-Pierre at Solesmes, then newly restored by Dom Guéranger.
COVARRUVIAS

His religious zeal and ascetical learning endeared him to the latter, who appointed him master of novices one month after his profession, and towards the end of 1861 made him prior of the monastery. As prior, Couturier was so esteemed that on the death of Guéranger he was unanimously elected Abbot of Solesmes. In 1872, Cardinal Curley, presidente of the Council of Vatican II, named him consultor of the Sacred Congregation of the Index, and granted him and his successors the privilege of wearing the capa magna.

Couturier was a worthy successor of the great Guéranger. Despite the persecutions of the French Government, he continued to maintain the Congregation of Solesmes, and to make it a veritable martyrdom for the abbot and his community. The monks of Solesmes did not only uphold but even enhanced the high prestige for piety and learning which they had gained during the rule of Guéranger. Couturier and his monks were forcibly expelled from their monastery by the French Government on 6 November, 1880, and, having attempted to recoup it, they were driven out a second time on 29 March, 1882. During the remainder of Couturier's life the community lived in three separate houses in the town of Solesmes, using the parochial church as their abbey church. Nevertheless the community continued to flourish. By word and example Couturier encouraged the numerous learned writers among his monks, and contributed to the spread of the Benedictine Order by restoring old and deserted monasteries and by fostering the foundations made by Guéranger. On 29 March, 1876, he raised the priory of St. Mary Magdalene at Marseilles to the dignity of an abbey; in 1880 he restored and re-peopled the monastery of Silos in Spain; in July, 1889, he established the priory of Saint-Paul at Wincques, in the Diocese of Arras; and on 15 September, 1890, shortly before his death, he reopened the ancient monastery of St. Martin in the Diocese of Paris, deserting the French Revolution in 1789. His literary labours are confined chiefly to his collaboration in the publication of "Les Actes des Martyrs", a French translation of the Acts of the martyrs from the beginning of the Christian Era to our times. The third edition of the work appeared in four volumes (Paris, 1900).

HOUTIN, Dom Couturier, abbé de Solesmes (Angers, 1890); BABBIN in Revue Benedictine (Maredsous, 1890), VII, 570–588; BABBIN in Bulletins des bénédictins de la congrégation de France (Paris, 1906), S. V.

MICHAEL OTT.

COVARRUVIAS (or Covarrubias y Leyva), DIEGO, b. in Toledo, Spain, 25 July, 1512; d. in Madrid, 27 Sept., 1577. According to his biography by Schott (in the Geneva, 1879, edition of Covarruvias), his maternal grandfather was the architect of the Toledo cathedral. His master in law, both canonical and civil, was the famous Martin Aspilcueta (q. v.), who was wont to glory in having such a disciple. At the age of twenty-one, Covarruvias was appointed professor of canon law in the University of Salamanca. Later on he was entrusted with the work of reforming that institution, already venerable for its age, and the legislation which he drew up looking to this end remains in effect long after his time. Such was the recognized eminence of his legal science that he was styled the Bartholo of Spain. His vast legal learning was always set forth with a peculiar beauty of diction and lucidity of style, says Von Scherer (see below). His genius was universal, and embraced all the sciences, both civil and canon; and his works, in that field, were of high authority. If report be true, the large library of Oviedo, where at the age of twenty-six he became professor, did not contain a single volume which he had not richly annotated. In 1549 Covarruvias was designated by Charles V for the archiepiscopal See of San Domingo in the New World, whither, however, he never went. Eleven years later he was made Bishop of Ciudad Rodrigo in Spain. In this capacity he attended the Council of Trent, where, according to the statement of his nephew, conjointly with Cardinal Ugo Buoncompagni (afterwards Gregory XIII), he was authorized to formulate the famous reform-decrees (De Reformatione) of the council. Pressure of other duties having prevented Cardinal Buoncompagni from doing his part of the work, the task devolved upon Covarruvias alone. The text of these far-reaching decrees, therefore, formally approved by the council, we apparently owe to him. (Von Scherer, in Kirchenlexikon, II, 1170, doubts the accuracy of this tradition). Covarruvias died in 1565 transferred to the See of Seville. Up to this time his extraordinary talents had been discovered in matters more or less scientific only; they were hereafter to reveal themselves also in practical affairs of state. Appointed in 1572 a member of the Council of Castile, he was two years later raised to the presidency of the Council of State. In the discharge of this office he was eminently successful. While president of the Council of State he was nominated by Philip II for the Bishopric of Cuenca, but death prevented him from assuming the duties of this new see. The principal work of Covarruvias is his "Variae resolutionum ex jure Libri IV". He wrote also on testaments, betrothal and marriage, oaths, communication, prescription, restitution, etc. Quite distinct in character from his other productions is his imagistic treatise, "Veterum numismatum collatio cum his qua modo exponduntur" etc. (1594). His complete works have been several times edited, the Antwerp edition (5 vols., 1762) being the best. Among his manuscripts have been found notes on the Council of Trent, a treatise on punishments (De penitentia) and an historical tract, "Catalogo de los reyes de España y de otras cosas", etc.

JOHN WEBSTER MELODY.

COVENANTERS, the name given to the subscribers (practically the whole Scottish nation) of the two Covenants, the National Covenant of 1638 and the Solemn League and Covenant of 1643. Though the Covenanters as national bonds ceased with the conquest of Scotland by Cromwell, a number continued to uphold them right through the period following the Restoration, and these too are known as Covenanters. The object of the Covenant was to bring the Presbyterian Church together in defence of its religion against the attempts of the king to impose upon it an episcopal system of church government and a new and less anti-Roman liturgy. The struggle that ensued was a struggle for supremacy, viz.: as to who should have the last word, the king or the Kirk, in deciding the religion of the country. How this struggle arose must first be briefly explained.

The causes of this Protestant conflict between Church and State must be sought in the circumstances of the Scottish Reformation. (For a summary of the history of the Scottish Reformation down to the see ch. ii of Gardiner's "History of England".) Owing to the fact that Scotland, unlike England, had accepted Protestantism, not at the dictates of her rulers, but in opposition to them, the Reformation was not merely an ecclesiastical revolution, but a rebellion. It was, therefore, perhaps no mere chance that made the Scottish nation, under the parties of the Restoration of James II, substitute for the Stuarts the member of Andrew Melville, adopt that form of Protestantism which was, in its doctrine, farthest removed from Rome, to which their French regents adhered, and which in its theory of church government was the most democratic. Presbyterianism meant the subordination of the State to the Kirk, as Melville plainly told James VI at Cupar in 1596, on the famous occa-
When he seized his sovereign by the sleeve and called him "God's silly vassal". In the Church, king and beggar were on an equal footing and of equal importance; king or beggar might equally and without distinction be excommunicated, and be submitted to a degrading ceremonial if he wished to be released from the same system the preacher was subject to. The civil power was to be the secular arm, the instrument, of the Kirk, and was required to inflict the penalties which the preachers imposed upon such as contemned the censure and discipline of the Church. The Kirk, therefore, believing that the Presbyterian system, with its preachers, lay elders, and elders for sessions and general assemblies, was the one, Divinely appointed means to salvation, claimed to be absolute and supreme. Such a theory of the Divine right of Presbytery was not likely to meet with the approval of the kings of the Stuart line with their exaggerated ideas of their own right Divine and preceptive. Nor could a Church where the ministers and elders in their kirk sessions and assemblies judged, censured, and punished all offenders high or low, craftsman or nobleman, be pleasing to an aristocracy that looked with feudal contempt on all forms of labour. Both noble and king were therefore anxious to humble preachers and ministers, if possible, to their influence. James VI was soon taught the spirit of the Presbyterian clergy; in 1592 he was compelled formally to sanction the establishment of Presbytery; he was threatened with rebellion if he failed to rule according to the Gospel as interpreted by the ministers. If his kingly authority was to endure, James saw that he must seek for some means by which he could check their excessive claims. He first tried to draw together the two separate representative institutions in Scotland—the Parliament, representing the king and the nobility, and the General Assembly, representing the Kirk and the majority of the nation—by granting them a common forum in Parliament. Owing, however, to the hostility of clergy and nobility, the scheme fell through. James now adopted that policy which was to be so fruitful of disaster; he determined to re-introduce episcopacy in Scotland as the only possible means of bringing the clergy to submit to his own authority. He sent abroad in the system the preacher accomplishing his object when his accession to the English throne still further strengthened his resolve. For he considered the assimilation of the two Churches both in their form of government and in doctrine essential to the furtherance of his great design, the union of the two kingdoms.

By 1612 James had succeeded in carrying out the first part of his policy, the re-establishment of diocesan episcopacy. Before his death he had also gone a long way towards effecting changes in the ritual and doctrine of Presbyterianism. On Black Saturday, 4 Aug., 1621, the Five Articles of Perth were read before the Estates. Imposed as these were upon an unwilling nation by means of a packed Assembly and Parliament, they were to be the source of much trouble and bloodshed in Scotland. Distrait of their rulers, hatred of bishops, and hatred of all ecclesiastical changes was the legacy bequeathed by James to his son. James had sowed the wind and Charles I was soon to reap the whirlwind. Charles' very first action, his "matching himself with the daughter of Heth", i.e. France (see Leighton, "Sion's Plea against Prelacy", quoted by Gardiner, "Hist. of England, ed. 1884, VII, 146"); aroused suspicion as to his orthodoxy, and in the light of every action to interpret it, wrongly we know, as some subtle means of favouring popery. His wisest course would have been to annul the hated Five Articles of Perth, which to Scottsmen were but so many injunctions to commit idolatry. In spite of concessions, however, he let it be known that the Articles were to remain (Row, "Historie of the Kirk of Scotland", p. 340; Balfour, "Annals", II, 142; Privy Council Register, N.S., 1, 91-93). Further, he took the unwise step of increasing the powers of the bishops; five were given a place in the Privy Council, and Archbishop Spottiswoode was made President of the Exchequer and ordered as private to take precedence of every other subject. This provoking the preachers of the Kirk was too much, and the Kirk and the people and the nobles rebelled. All to humble the ministers. But he now took a step which alienated his only allies. James had always been careful to keep the nobles on his side by lavish grants of the old church lands. By the Act of Revolution, which passed the Privy Seal, 12 October, 1625 (Privy Council Register, I, 193), Charles I touched the pockets of the nobility, raised at once a serious opposition, and led the barons to form an alliance with the Kirk against the common enemy, the king. It was a fatal step and proved "the ground-stone of all the mischief that followed after, both to this king's government and family" (Balfour, "Annals", II, 128). Thus, before he had set foot in Scotland he had already kindled the flame of his people. His visit to Scotland made matters worse; Scotchmen were horrified to see at the coronation service such "popish rage" as "white rochet and white sleeves and copes of gold having blue silk to their foot" worn by the officiating bishops, which bred great fear of incurring of popery" (Spalding, "Hist. of the Troubles in England and Scotland", 1624-45, I, 30). Acts, too, were passed through Parliament which plainly showed the king's determination to change the ecclesiastical system of Scotland. Scotland was therefore ready for an explosion.

The New Service Book. Both Charles and Laud had been shocked at the bare walls and pillars of the churches, all clad with dust, sweepings, and cobwebs; at the trafficking that went on in the Scottish churches; at the lengthy "conceived prayers" often spoken by ignorant men and not infrequently as seditious as the sermons (Baillie, O.S.B., writing in 1627, cited in Macd. "Ecclesiastical History", pp. 23, 24; also, "Large Declaration", p. 16). The king desired to have decency, orderliness, uniformity. Hence he ordered a new service book, prepared by himself and Laud, to be adopted by Scotland. The imposition of a new Service Book was a piece of work on the part of the king; it had no ecclesiastical sanction whatever, for the General Assembly, and even the bishops as a body, had not been consulted; neither had it any lay authority, for it had not the approval of Parliament; it went counter to all the religious feeling of the majority of the Scottish people; it offended their national sentiment, for it was English. Row summed up the objections to it by calling it a "Popish-English-Scottish-Mass-Service-Book" (op. cit., p. 398). There could, therefore, be very little doubt as to how Scotland would receive the new liturgy. The famous riot in the streets of Edinburgh on 15 March, 1637 (account of it in the King's "Large Declaration" and Gordon's "Hist. of Scots Affairs", I, 7), when at the solemn inauguration of the new service somebody, probably some woman, threw the stool at the dean's head, was but an indication of the general feeling of the country. From all classes and ranks and from every part of the country petitions came pouring into the Council for the withdrawal of the liturgy. Every attempt to enforce the prayer book led to a riot. In a word, the resistance was general. The Council was powerless. It was suggested therefore, that each of the four orders—nobles, lairs, burghears, and ministers—should choose four commissioners to represent them and transact
business with the Council, and that then the crowd of petitioners should return to their homes. Accordingly four committees or "Tables" (Row, pp. 485, 0) were chosen, the petitioners dispersed, and the riots in Edinburgh ceased. But this arrangement also gave the opposition the one thing necessary for a successful action, a government. The sixteen could, if only united, direct the mobs effectively. The effect of having a guiding hand was at once seen. The demands of the petitioners became more definite and peremptory and on 21 December the Table repeated the Council a collective "Supplication" which not only demanded the recall of the liturgy, but, further, the removal of the bishops from the Council on the ground that, as they were parties in the case, they should not be judges (Balfour, Annals, II, 244–5; Rothes, Relation, etc., p. 26 sq.), gives an account of the formation of the Tables. The suppliants, in other words, looked upon the quarrel between king and subjects as a lawsuit.

Charles' answer to the "Supplication" was read at Sterling on 19 February, 1638. He defended the prayer book and declared all protesting meetings illegal and prohibited by both. A committee of the petitioners had been deliberately prepared by the suppliants and no sooner had the king's answer been read than Lords Home and Lindsay, in the name of the four orders, lodged a formal protestation. The same form was gone through in Linlithgow and Edinburgh. By these formal protestations the movement, which had been virtually setting up a government against a government, and as there was no middle party to appeal to, it became necessary to prove to the king that the suppliants, and not he, had the nation behind them. The means was ready to hand. The nobility and gentry of Scotland had been in the habit of entering into "hands" for mutual protection. Archibald Johnston of Warris- toun is said to have suggested that such a band or covenant should now be adopted, but not as heretofore by nobles and lairds only, but by the whole Scottish people; it was to be a national covenant, taking as its basis the Negative Confession of Faith which had been drawn up by order of James VI in 1581. The great document was composed. After reciting the reason of the band, that the innovations and evils contained in the supplications have no warrant in the word of God, they promise and swear "to continue in the profession and obedience of the aforesaid religion, that with the same and all errors and corruptions, according to our vocation, and to the uttermost that power that God hath put in our hands all the days of our life." Yet, whilst uttering oaths that seem scarcely compatible with loyalty to the king, they likewise promised and swore "that we shall, to the uttermost of our power with our means and lives, stand to the defence of our dread sovereign, his person and authority, in the defence of the foresaid true religion, liberties and laws of the kingdom" (Large Declaration, p. 57), and they further swore to mutual defence and assistance. In these proclamations the Covenanters in so far as they are "now called the suppliants," were probably sincere; during the whole course of the struggle the great majority never wished to touch the throne, they only wished to carry out their own idea of the strictly limited nature of the king's authority. Charles was to be king and they would obey, if he did as they commanded. That was soon seen in the Covenant. Men were ready to take up arms immediately. It was completed on 28 February and carried for signature to Greyfriars church. Tradition tells how the parchment was unrolled on a tombstone in the churchyard and how the people came in crowds weeping with emotion to sign the band. This strange scene is often reenacted in the Highlands of Scotland, if we except the Highlands and the North-East. Several copies of the Covenant were distributed for signature. Gentlemen and noblemen carried copies of it in portmanteaux and pockets requiring subscriptions thereunto, and using their utmost endeavours with their friends in private for to subscribe. And such was the zeal of many subscribes, that for a while many subscribed with tears on their cheeks; and it is even said "that some did draw their blood, and used it in place of ink to underwrite their name" (Gordon, Scots Affairs, I, 46). Not all, however, were willing subscribers to the Covenant. For many persuasion was sufficient to make them join the cause; a while many subscribed with tears on their cheeks; A those refused to sign were not merely looked upon as ungodly, but as traitors to their country, as ready to help the foreign invader. And "as the greater that the number of subscriber grew, the more impious they were in exacting subscriptions from others who refused to subscribe, so that by degrees they proceeded to tumultu and reproaches, and some were threatened and beaten who durst refuse, especially in the greatest cities" (ibid., p. 45). No blood, however, was shed till the outbreak of the war. Ministers who had refused to sign were silenced, ill-treated, and driven from their homes. Toleration and freedom of conscience became more and more than the Scottish Presbyterians. Scotland was in truth a covenanted nation. A few great landowners, a few of the clergy, especially the Doctors of Aberdeen who feared that their quiet studies and intellectual freedom would be overwhelmed, stood aloof from the movement. Many, however, were virtuous in appearance of what they were doing, some because they were frightened, but more still because they were swayed by an overpowering excitement and frenzy. Neither side could now retreat, but Charles was not ready for war. So to gain time he made a show of concession and promised a General Assembly. The Assembly met at Glasgow 21 Nov., and at once brought matters to a head. It attacked the bishops accusing them of all manner of crimes; in consequence Hamilton, as commissioner, dissolved it. Nothing daunted, the Assembly then resolved that it was entitled to remain in session and competent to judge the bishops, and it proceeded to pull down the whole ecclesiastical edifice built up by James and Charles. The Service Book, Book of Canons, the Articles of Perth were swept away; episcopacy was declared forever abolished and all assemblies held under episcopal jurisdiction were null and void; the bishops were all ejected and some excomunicated; Presbyterian government was again established.

War was now inevitable. In spite of their protestations of loyalty the Covenanters had practically set up a theory in opposition to the monarchy. The question at issue, as Charles pointed out in his proclamation, was whether he was to be king or not. Was he the supreme head of the Church or was he not? Toleration was the only basis of compromise possible; but toleration was deemed a heresy by both parties, and hence there was no other course but to fight it out. In two short wars, known as the Bishops' Wars, the Covenanters were soundly thrashed and the monarchy reestablished; and for the next ten years Charles was only nominally sovereign of Scotland. A united nation could not be made to change its religion at the command of a king. The triumph of the Covenanters, however, was destined to be short-lived. The outbreak of the Civil War in England was soon to split the Covenanting party in two great factions. The Scotchmen in spite of their past actions still firmly adhered to the monarchical form of government, and there cannot be much doubt that they would much rather have acted as mediators between the king and his Parliament than have interfered with their allegiance to monarchy and their allegiance to the Covenant. Scotchmen in spite of their past actions still firmly adhered to the monarchical form of government, and there cannot be much doubt that they would much rather have acted as mediators between the king and his Parliament than have interfered with their allegiance to monarchy and their allegiance to the Covenant. But the royalist successes of 1643 alarmed them. Presbyterianism would not endure long in Scotland if Charles won. For this reason the majority of the
nation sided with the Parliament, but it was with reluctance that the Covenanters agreed to give the English brotherly assistance. This assistance they were determined to give only on one condition, namely, that they should refrain from religion according to the Scottish pattern. To this end England and Scotland entered into the Solemn League and Covenant (17 Aug., 1643). It would have been well for Scotland if she had never entered the League to enforce her own church system upon England. If she had been satisfied with a simple alliance and assistance she might have been successful. But by means of helping the English Parliament to win at Marston Moor she had helped to place the decision of affairs of state in the hands of the army, which was predominantly Independent and hated presbyters as much as bishops. If the Scotch had recrossed the Tweed in 1646 and left the Parliament and the army to fight out for themselves the question of ecclesiastical government, England would not have interfered with their religion; but the Covenanters thought it their duty to extirpate idolatry and Baal-worship and establish the true religion in England, and so came in conflict with the Independents and with the Independents a war began which determined immovably on the other side. They would not defile themselves by making common cause with the unconverted. The preachers cursed and thundered against the Engagers and the levies that were being raised for an invasion of England. Scotland thus divided against itself had not much chance against the forces of Cromwell and Lambert. After Preston, Wigan, and Warrington (17–19 Aug., 1648) the Scottish Royalist forces were no more. The destruction of Hamilton's force was a triumph for the Kirk and the anti-Engagers. But an event now occurred that once more divided the nation. On 30 January, 1649, Charles I was executed. Scotland at first did not know what to do. They looked upon the deed as a crime and as a national insult. The day after the news reached Scotland, they proclaimed Charles II King, not only of Scotland, but of England and Ireland. The acceptance of Charles II, however, had been saddled with the condition that he should pledge himself to the two Covenants. After some hesitation and after the failure of all his hopes to use Ireland as a basis of an invasion of England Charles II swore to the Covenants, 11 June, 1650.

To the more extreme portion of the Covenanters this agreement with the king seemed hypocrisy, an iniquitous surrender. They must have a king who would convert to the Covenanters, that he had no intention of keeping them, that he had perjured himself, and they refused to have dealings with the king. Argyll with the more moderate wing, still anxious to avoid a definite rupture with the extremists, had perfused to make concessions to these feelings; he had the unfortunates might walk through the very depths of humiliation (Peterkin, Records, p. 599). This split was to prove fatal. Only a united Scotland could have defeated Cromwell. Instead, to propitiate the Deity, Charles was kept apart from the army, and while every available man was wanted to meet the soldiers of Cromwell, the Argylls and the Latinists were given an easy time. The Loyalists and Malignants (op. cit., P. 623). To allow them to fight would be to court disaster. How could Jehovah give victory to the children of Israel, if they fought side by side with the idolatrous Amalekites? The purging of the army went merrily on daily, and the preachers were handed over to the infamous and blasphemous sectaries. Like the Scots Cromwell also looked upon war as an appeal to the god of battles, and the judgment was delivered at Dunbar, 3 Sept., 1650. "Surely it's probable the Kirk has done their do. I believe their king will set up upon his own ground now." But this was Cromwell, over the upsurging victory he was right. The rout of Dunbar destroyed the ascendancy of the Covenanters. The preachers had promised victory, but Jehovah had sent
them defeat. The extremists, under such leaders as Johnstone of Warristoun, James Guthrie, and Patrick Gillespie, attributing their defeat to the unholy alliance with the Malignants gained in veci before, and present to the Roman Committee of Edinburgh (30 Oct. 1655) a “Remonstrance” arraigning the whole policy of Argyll’s government and refusing to accept Charles as their king “till he should give satisfactory evidence of his real change” (ibid.). Seeing his power gone with the “Remonstrants” or “Protesters,” Argyll determined to effect a treaty of peace, and the Covenanters joined hands. In answer to the Remonstrance the Committee of Estates passed, 25 November, a resolution condemning it and resolved to crown Charles at Soone. On 1 January, 1651 the coronat took place. Cromwell’s answer was the battle of Worcester, 3 September, 1651. For nine years Scotland was a conquered country kept under by the military saints. It was a sad time for the Presbyterians. The English soldiers allowed all Protestants, as long as they did not disturb the peace, to worship in their own way. In October, 1651, Monk forbade the Presbyterians to meet in parishes as “soldiers,” and prohibited the civil magistrates from molesting excommunicated persons, or seizing their goods, or boycotting them. Lest the Remonstrants and Revolutioners, who all the while with ever increasing bitterness quarrelled as to which was the true inheritor of the Covenant, should cause trouble to the commonwealth, the High Commission was broken up (July, 1653), and all such assemblies forbidden for the future (Kirkton, Secret and True History of the Church of Scotland, p. 54).

Dunbar, Worcester, and the Cromwellian domination destroyed the ascendancy of the Covenanters. But not on that account did the extreme wing, the Remonstrants, abate a jot of their pretensions; they still believed in the eternally binding force of the two Covenants. On the other hand neither had the king fully learnt the lesson from his father’s fate. Like him he considered it his right to force his ecclesiastical views upon his people. Episcopacy was restored, but without the prayer book, and the meetings of synods were forbidden. Partly because he had the support of the nobility and gentry, partly because even many Presbyterians had wearied of the strife, and partly because of his dishonesty Charles succeeded in gaining his ends, but the most of the time was spent in relations with his subjects. It only required the attempt of James II to introduce hated Catholicism into the country to sweep the Stuarts forever from the throne of Scotland. The history of the Covenanters from the Restoration to the Revolution is the history of a fierce persecution various, occasional, and merciless, for the treatment to win the weaker members to the moderate side. As the Covenanters would no longer meet in the churches they now began to meet in their own homes and have private conventicles. Against these proceedings an Act was passed (1663) declaring preachers by “ousted” ministers seditious, and it was rigorously enforced, but such of the exiled ministers as were permitted to return to their own homes the Covenanters took to holding their gatherings in the open air, in distant glenns, known as field-meetings or conventicles. The Pentland Rises (1666) was the result of these measures and proved to the Government that its severities had been unsuccessful. On the advice of Lauderdale Charles issued Letters of Indulgence, June, 1669, and again in August, 1672, allowing such “ousted” ministers as had lived peaceably and orderly to return to their livings (Wodrow, Hist. of the Sufferings, etc., II. 130). These inducements, however, were in vain; for many of the ministers yielded and conformed. Stung by the secessions the remnant became more irreconcilable; their sermons were simply political party ora-

tions denunciatory of king and bishops. They were especially wroth against the indulged ministers; they broke into their houses, bullied and tortured them to force them to swear the oaths of abjuration. These Lauderdale detestable little “ousted” ministers were crushed by a persecution of the utmost severity. Soldiers were quartered in the disaffected districts (the West and South-West), ministers were imprisoned, and finally, as conventicles still increased, a band of half-savage Highlanders, “The Highland Host” (Lauderdale’s Fifty-five, 93 sqq.), was sent loose on the wretched inhabitants of the Western Lowlands, where they marauded and plundered at will.

The Covenanters now became reckless and wild, for again torn asunder by the “cess” controversy (a dispute arose as to whether it was lawful to pay the tax or “cess” raised for an unlawful object, the carrying in of a Government persecuting the true Kirk) they were but a remnant of the once powerful Kirk, and every year became less capable of effectual resistance. They patrolled the country in arms protecting conventicles; and their leaders, Welsh, Cameron, and others, went about as “half-pay” soldiers, engaging in private quarrels, even murdering the soldiers of Claverhouse, who was engaged in dispersing the conventicles. The murder of Archbishop Sharpe (2 May, 1679), regarded by them as a glorious action and inspired by the spirit of God, was the signal for a general rising in the Western Lowlands. At Rutherglen they publicly burnt the covenant letters of the Government Assembly; at honour, at Loudoun Hill, or Drumellog, defeated the troops under Claverhouse. It was therefore deemed necessary to send a strong force under Monmouth to suppress the rebellion. At Bothwell Bridge (22 June, 1679) the insurgents were utterly defeated. There followed a third Act of Indulgence, which again cut deep into the ranks of the Covenanters. But in spite of persecution and secessions a minority continued faithful to the Covenant and the fundamental principles of Presbyterianism. Under the leadership of Richard Cameron and Donald Cargill, and styling themselves the “Society People,” they con-
tinued to defy the royal authority. At Sanquhar they published a declaration, 22 June, 1680 (Wodrow, III. 213) disowning the king on the ground of “his perjury and breach of covenant to God and his Kirk”. At a conventicle held at Torwood (1680) Cargill solemnly “ascended the throne of the Covenant, and the Dissenter, and others (ibid., III. 219). These proceedings served no further purpose than to embitter parties and make the Government all the more determined to extirpate the sect. But what raised the Government more than anything else was the “Apologetical Declaration” (ibid., IV. 148) of October, 1684, inspired by Renwick who had taken up the standard of Cameron. The document threatened that anyone connected with the Government, if caught, would be judged and punished according to his offences. These threats were carried out by the Cameronians or Renwickites; they attacked and slew dragoons, and punished with the utmost severity. It was not till the Act of 1691 that the persecution waxed fiercer. An Act was passed which made attendance at field-conventicles a capital offence. Claverhouse carried out his instructions faithfully, many were summarily executed, while many more were shipped off to the American plantations. The last victor for the Covenant was James Renwick (Jan., 1688). He founded the Convincing principles and even at the Revolution they refused to accept an unconverted king; one last brief day of triumph and of vengeance they had, when they “rab-
COVENTOUSNESS

NOEL J. CAMPBELL.

COVENTOUSNESS, generally, an unreasonable desire for what we do not possess. In this sense, it differs from concupiscence only in the implied notion of non-possession, and thus may cover all things which are sought after inordinately. Classified under this general head, we may have covetousness of honours, or pride; of the flesh, or concupiscence properly so called; of riches, or covetousness proper (Lat. avaritia), or avarice. When covetousness of the flesh or of wealth has for its object that which is already the lawful possession of another, it falls under the ban of the Ninth or Tenth Commandment of God; and such desires, wilfully indulged, partake, as we are told by the Lord (Mark 12:25), of the nature of the devils, and act themselves. For he who deliberately desires the possession of another man's lawful wife or goods has already in his heart committed the sin of adultery or theft. In its specific meaning, covetousness looks to riches in themselves, whether of money or of property, whether those possessed or not, and, if, of the kind, is their acquisition rather than to their possession or accumulation. Thus defined, it is numbered among the sins which are called capital, because it is, as St. Paul says (Tim., vi), a radix omnium peccatorum.

The capital sin of covetousness is in reality rather a vice or inclination to sin, which is sinful only in that it proceeds from the unholy condition of original sin in which we are born, and because it leads us into sin. And so far is the desire—natural in us all—to acquire and hold possessions from being reproved as offensive by God, that, if kept within the bounds of justice and resisted strongly and implacably in its inordinate cravings, it is positively mitigating. Even when indulged, covetousness is not a grievous sin, except in certain conditions which involve offence of God or the neighbour, e.g. when one is prepared to employ, or does actually employ, illicit or unjust means to satisfy the desire of riches, holds to them in defiance of the authority of his superiors, or refuses charity, makes them the end rather than the means of happiness, or suffers them to interfere seriously with one's bounden duty to God or man. Nourished and developed into an unrestricted habit, it becomes the fruitful mother of all manner of perfidy, heartlessness and unrest.

BLAKELY, Manual of Moral Theology (New York, 1906), I; Leimkühler, Theologia Moralis (Freiburg, 1898), I; STAPLETON.

COVINGTON, Diocese of (Covingtonensis), comprises that part of Kentucky, U. S. A., lying east of the Kentucky River, and of the western limits of Carroll, Owen, Franklin, Woodford, Jessamine, Garrard, Rockcastle, Laurel, and Whitley Counties, an area of 17,286 square miles. It was established 29 July, 1853, by the division of the Diocese of Louisville, then embracing the whole State of Kentucky. This portion of the State had been ministered to by a body of clergy conspicuous for ability, learning, and devotion to duty. White Sulphur, the first organized congregation in this jurisdiction, rejoiced in the zealous administration of a Kenrick, who in later years graced the metropolitan See of Baltimore, and of a Reynolds, destined to become successor of the great Bishop England of Charleston. Lexinton was growing into an important parish under the watchful guidance of Rev. John McGill, afterwards Bishop of Richmond, Virginia. All of the clergy manifested in their lives the glorious traditions of Flaget, Bardin, David, and Nerinckx, whose successors they were. Catholic immigration has been almost exclusively confined to two nationalities: German and Irish. The former compose a large majority of the Catholic population of the cities and towns along the Ohio River, while the latter have sought the interior of the diocese. In Covington and Newport German Catholics predominate, while in Lexington, Frankfort, and Paris, the Irish are in the majority. Lying south of Mason and Dixon's Line, although rich in raw material, the diocese has been handicapped by a lack of industrial and mineral development. Within its confines there is a total population of about 900,000, of whom 54,423 are Catholic. The attitude of non-Catholics is uniformly respectful, considerate, and kind.

BISHOPS.—(1) The choice of the Holy See for the first bishop of the new diocese fell upon the Rev. George Aloysius Carrall, S. J., rector of St. Francis Xavier's Church, Cincinnati. He was born in Philadelphia, 13 June, 1803, ordained priest 20 December, 1827, and entered the Society of Jesus 19 August, 1835. He was consecrated 1 November, 1853, at Cincinnati. The burden resting on the shoulders of the new bishop of a diocese sparsely settled by 3000 Catholics, a without influence or material resources, was a heavy one; but at his death (25 Sept., 1868), after fourteen years of zealous labours, he left it thoroughly organized with a Catholic population three times as great as he found there, a self-sacrific-
COWGILL, J. R. See Leeds, Diocese of.

DOV. The Frenchmen have a smaller hood fixed to their habit; canons wear it on their monseatts, and bishops and cardinals on the cappa. With the Augustinians and Servites it is still a separate hood not attached to anything. Ducange (a. v.) says the name is a diminutive of *caula*—"quasi minor celia". A cope fixed to a cloak is still commonly worn in Tyrol, parts of Austria and Switzerland. The word *gregario* occurs occasionally as a general name for monastic orders (Ducange). The colour of the cloak is that of the habit, black among Benedictines, white with the Cistercians, etc.

COXIE, MICHEL, Flemish painter, imitator of Raphael, known as the Flemish Raphael; b. at Mechlin, 1490; d. there 1592. There are several spellings for his name: *Coxie, Cozie, Cozis, Cozzen, Cozyzen*. He was a pupil of his father, and afterwards studied under Van Orley, with whom he visited Rome in 1532, where he made the acquaintance of Vassari. In 1567 he married his first wife, whom he returned to Mechlin, in 1539, and the same year became a member of the Academy of that place. In 1561 he was in Brussels, and after that back in Mechlin, where, at the age of seventy, in 1589, he married his second wife, Jeanne van Schelle. By his first wife he had three children. Anne, a nun, William, and Raphael, painters; by his second, two sons, Michel, a painter, and Conrad. Coxie painted several large works for the Emperor Charles V and for Philip II, King of Spain, to whom he was court painter. He designed thirty-two subjects from the life of Cupid and Psyche, which were engraved, and, in conjunction with Van Orley, he directed the execution of some tapestry made from the designs of Raphael. He copied part of the great Van Eyck altar-piece for Philip II of Spain, and portions of his copy are in Berlin and Munich and the remainder in Ghent. Several of his paintings are to be seen at Brussels, Antwerp, Bruges, Berlin, Madrid, St. Petersburg, and Vienna. In his paintings he bestowed special care on the figures of women, and they are well modelled and invariably graceful. In male figures he too often exaggerated the anatomy and selected awkward and unreasonable attitudes. His composition is very Italian in character, sometimes too academic in line and grouping, but most of the time he was a first-rank artist. His best works are signed and dated and are remarkable for their splendid colouring and harmonious result.

George Charles Williamson.

COYSEVOX, CHARLES-ANTOINE, a distinguished French sculptor, b. at Lyons, 29 Sept., 1640; d. at Paris, 10 Oct., 1720; he belonged to a family originally from Spain. At the age of seventeen he executed a much admired Madonna. In 1671 he was employed by Louis XIV on various statues at Versailles and at Marly. He was elected a member of the Academy in 1676, and had among his pupils his two nephews, Nicolas and Guillaume Costot. Coysevox made two bronze statues of Louis XIV, the "Charlemagne" at Saint- Louis-des Invalides, and other famous works, but his most famous is probably "La Renommée" at the entrance of the Tuileries—two winged horses bearing Mercury and Fame. Napoleon is said to have delighted in the sculptor's fancy that the horse of Mercury should have a bridle, but not that of Fame. Coysevox also produced some fine sepulchral monuments for the churches of Paris. We owe him a special debt for his contemporary portraits.

M. L. Handley.
researches. As yet there exists no biography of him. "Onorae rese a Giuseppe Cozza-Luzi (Rome, 1868) contains a list of his principal writings.

U. BENIGNI.

CRACOW (Pol. Kraków), the Prince-Bishopric of (Cracoviensis); comprises the western portion of Poland in Austria, and bishopric on the Diocese of Kielce in Russian Poland, Breislaw in Prussia, Tarnow in Galicia, and Zips in Hungary.

It has long been disputed at what time the Diocese of Cracow was created. There is no doubt that it was already in existence in the year 1000; for at that time Poppo, its bishop, was made a suffragan to Radzimir, Bishop of Znojmo. In 1197 the name of Hugus is found as bishop of Cracow (Aediot, Chronicon, II, 196, in P., XCIix, 1225). Father Augustine Arndt, S. J. (Zeitschrift für kath. Theologie, XIV, 45-47, Innsbruck, 1890) adduces some reasons in support of the opinion that the Diocese of Cracow was founded by the Polish King Mieszko I as early as 984, and that Poppo, who had been tutor of Duke Henry of Bavaria until 983, became its first bishop; but most authorities agree that it was not created until 1000 or shortly before. There are extant five lists of the bishops of Cracow. The oldest was compiled about 1266 (Mon. Germ. Hist.: Script. XIX, 309-310, and 1347 in 1001, 1001); the others are of a later date. During the invasion of the Bohemians in 1039, and the succeeding period of anarchy, all ecclesiastical documents were lost, and the names and dates of the bishops of Cracow up to Bishop Aaron (1046-1059) are very unreliable.

Prochorus and Proculus, who are mentioned in the lists as predecessors of Poppo, are entirely legendary. Three of the bishops of Cracow are publicly venerated: St. Stanislaus Szczepanski (1072-1079), who suffered martyrdom at the hands of King Boleslaw, canonized in 1253, patron of Poland; St. Anna of the Diocese of Tarnow; and St. Fosio, Blessed Vincent Kadubek (1208-1218), the early Polish historian of Poland, resigned his see and entered the Cistercian monastery of Jedrzejow in 1218, died 8 March, 1223, beatified in 1764; John Prandotho (1242-1296), who drove the heretical Flagellants from his diocese, and was venerated until the seventeenth century, when his veneration ceased, owing to the same interpretation of the Bull "De cultu servorum Dei" issued by Pope Urban VIII. 5 July, 1634. Other renowned bishops were: Matthew (1143-1165) a historian; Zbigniew Olesnicki (1423-1455), a great statesman and fearless opponent of the Hutules, 1639; and John Cracov his successor (1591-1600), founder of seminaries and hospitals.

Originally the Diocese of Cracow seems to have comprised the towns and districts of Sandomir, Cracow, and Lublin, and the castellans of Sierads, Spicimir, Rozposna, Lemberg, and Wolborg; but its area underwent various changes. We owe also to Cozza-Luzi the publication of the eighth and ninth volumes of Mai's "Nova Bibliotheca Patrum", and a part of the cardinal's correspondence.

Among the theological treatises of Cozza-Luzi is an important study on the evidence of the Greek liturgies to the papal supremacy (De Rom. Font. auct.). Among his most interesting publications is an edition of the Greek version of St. Gregory the Great's account of St. Benedict's "History of St. F. N. Benedict's Pontificate," with a descripta et a Zacharia Mere reddita, Tivoli, 1890). Many of his writings are scattered in various Italian periodicals, ecclesiastical and historical. Though possessed of a strong intellect and a broad culture he often lacked scientific accuracy and it is regrettable that no organic plan dominated his numerous studious

MICHAEL OTT

THE UNIVERSITY OF CRACOW.—The first documentary evidence regarding the scheme that King Casimir the Great conceived of establishing a university dates from 1362. Urban V favoured the plan, and King Casimir issued the charter of the university, 12 May, 1364. It was modelled after the schools of Padua and Bologna, consequently the faculty of law and the study of Roman law held the first place. The pope gave his approval, 1 September, 1364, but excluded theology. Casimir's school, however, was refounded during the reign of Jagiello and Hedwig of the house of Anjou. The charter of Boniface IX was given, 11 February, 1397, and King Jagiello confirmed it on 26 July, 1400. The university now included all four faculties and was, therefore, patterned on that of Paris. The first chancellor was Bishop Peter Wys of Cracow, who also gave the opening lecture. The first professors were Bohemians, Germans, and Poles, most of whom had been trained at Prague. In the first year the number of matriculated students was 205; in the course of the fifteenth century it rose to 500.

The university took an active part in the ecclesiastical controversies of the fifteenth century and showed itself a strong supporter of the conciliar doctrine: e.g., 1414, the council of Pisa (i.e., a Laizepapst or lay pope). It maintained nevertheless a strictly Catholic position during the Hussite troubles. In the struggle between the Nominalists and Realists it took but little part, Realism having almost exclusive sway at the school. Still the effect on the university of the active intercourse with the West was, at the time, both bright and transient. King Jagiello died in 1434; in the period following, the university was controlled by its powerful chancellor, Zbigniew Olesnicki, who was also Bishop of Cracow from 1423 to 1455. A circle of learned men who followed the new tendencies gathered around him. Among these scholars was Poland's great historian, Dlugoz, At the time of the Council of Basle the university and its chancellor were partisans of the council, and Olesnicki even accepted the cardinaliate from Felix V. After the Union of Florence Olesnicki went over to the side of Nicholas V, but the university did not submit to the control of the Council. It was not until 1449, however, that the number of great scholars, among whom were: the physician and astronomer, Martin Krol; the decretalist, Johann Elgot; the theologians, Benedict Hesse and Jacobus of Paradysz. St. John Cantius, student and later professor of theology, was distinguished for virtue even more than for learning. He died, 1473; was canonized by Clement XIII, 1767; his feast is observed 20 October. Olesnicki showed favour to men who were not Poles, suppressed the Hussite tendencies with a firm hand, and was very generous to the university. He died in 1455.

The causes which finally brought the university into line with the new order numbered. Poland was then the great power of Eastern Europe, the court of Casimir of the Jagellon dynasty was a brilliant one, and Cracow was a very rich city. It was, therefore, not surprising that many famous men were drawn to this centre. From 1470 to 1496 Callimachus was preceptor in the royal household. Attracted by the fame of Callimachus, Conrad Celtis, the celebrated Humanist, made his appearance at Cracow before the end of the century. Printing also soon had its representatives here; towards the close of the fifteenth century Haller established his press in Cracow and began his patronage of art and letters. In this way the number of those who followed the new humanistic tendencies of the West continually increased, but unfortunately there was also an increase in profanity. In 1492, John I Albert, the pupil and friend of Callimachus, ascended the throne of Poland; he did not

Monumenta Polonia hist. vetus etnova (Lemberg, 1872), II, 190 and (Cracow, 1878), III, 132-327; MALRECIT, The Original Constitution of the University of Cracow (Lemberg, 1875), 107; STROWISI, Vita et pontificij Carolini Cracov. (Cracow, 1655); ROSEFFEL, Geschichte Polens (Hamburk, 1840); CHOTKOWSKI in IV.—30
however, fulfill the expectations excited by him. Claudius died in 1496; as time went on the seeds which he and Colots had sown produced its fruit, as is shown in Rhagius Sommerfeld, also called Eystecipanicus, and in Heinrich Bebel. Thus, at the opening of the sixteenth century, the classic writers were more and more read, at first outside of the lecture-rooms of the university, in the students' halls. In 1516 a study of Greek was introduced into the university, the professors being Constanze Claretti, Wenzel of Hirschberg, and Libanous. Hebrew was also taught in spite of the opposition of the "Judaizers" and the notorious Italian, Francesco Stancani, arrived at Cracow in 1546.

The University.—In the midst of this progress signs of decay were visible, though the decline did not originate in the university itself. The national policy of Poland, the founding of the universities of Wittenberg and Frankfort-on-the-Oder, and a strong anti-German tendency, caused the University of Cracow to lose its original cosmopolitan character and to become rather a national Polish university; thus a gradual decline ensued. Nevertheless it maintained during this period a remarkably high standing. Such scholars as Martin Krol, Martin Bylices, and finally Adalbert Rudzewski made the school the seat of a theological and philosophical activity of the name of Nicholas Copernicus, the pupil of Brudzewski, sheds upon its undying lustre. Elementary studies were taught, consequently students of from fourteen to sixteen years of age entered from Hungary, Moravia, Silesia, Prussia, and the provinces of the Polish crown. At first the students lived in private houses, but gradually halls were established in which "communs" were provided, and a clerical dress was worn. The expenses of these halls were covered by the fees which the students paid for board, matriculation, room rent, and fuel. The rector of the university was a committee of doctors of letters. Up to 1419 a rector was chosen for the whole year, but from this date until 1778 one was selected for each semester. Other officers were: the curators who watched over the rights and privileges of the university, the procurator and notarius, and the consilii who had to decide in case of an appeal. From this time the professors lived together in common houses, and were divided according to faculties. They had a common table, decided as to the reception of members, and bestowed the positions of canon and prebend of, which each faculty, with the exception of the medical, had often as many as twelve at its disposal. During the fifteenth and sixteenth centuries the wealth of the university sank to a very low ebb. J. Gorski, in his "Apology" (1851), and Petrycz give as the chief reasons for this the utter insubordination of the students, complete indifference of the professors to the advances of learning in the West, and lack of means for the support of the university. Above all, there arose after the opening of the seventeenth century, a bitter conflict on the part of the university against the Jesuits, who, on the strength of their constitutional privileges, had opened schools in Cracow, Posen, Lemberg, and other places, to protect Polish youth against the advances of Protestantism. The university, however, appealed to a privilege, the jura exclusiones, and demanded the closing of the Jesuit institutions. For nearly one hundred and fifty years this conflict was carried on with incredible tenacity. The common people, nobility, clergy, kings, bishops, and popes were drawn into it, and the struggle ended in the disaster for the cause of the Jesuits (42). The University of Cracow (II, III). When, towards the close of the eighteenth century, national misfortunes overtook the country, and the three Partitions of Poland put an end to Polish freedom, the life of the university came to a complete standstill. It is true that Bishop Soltyk, after him the energetic Kolata, undertook a thorough reform by breaking with the medieval routine and giving prominence to the natural sciences. But the political conditions in the decades following these efforts were unfavourable to quiet and serious study. Modern Times.—After Cracow had become, in 1846, a part of the Austrian Empire, the central Government at Vienna endeavoured to make the university more German, but did nothing to improve it. A new constitution was not open until 1873. When Joseph I permitted Polish to be again used as the language of instruction and official life, and the Government allowed a new building to be erected for the university. The number of professors and students now increased each year. While, in 1853 there were 3 professors, of which 27 were 19 assistant professors, and 8 docents, in 1900, the fifth centennial of the university, there were 103 professors; of this number 48 were regular, 36 assistant professors, and 19 docents and lecturers. In 1907 the professors numbered 115. In 1853 there were 175 students; in 1907, 1320; in 1907, 1320; in 1907, 1320. The university now contains 250,000 works in 330,000 volumes; 5500 manuscripts in 7000 volumes (some of them very valuable and as yet unpublished); about 10,000 coins, and 1200 alhasses. The university has a college of the physical sciences, and a medical college for anatomical and physiographical study. The medical school is entirely modern in its equipment and possesses very fine collections. There are also surgical, gynaecological, and ophthalmical clinics, besides one for internal and nervous diseases: an agricultural institute is in process of construction. Among the distinguished scholars connected with the university (1908) are: professors Obolszewski, the discoverer of a new method for liquefying gases, the surgeon Professor Kader, and Professor Wicherewicz, the oculist.

Oscar Rudski.

Craige, Pearl Mary Teresa, better known, under the pseudonym which first won her fame, as John Oliver Hobbes, English novelist, dramatist, and converter; b. 3 November, 1867; d. 13 August, 1906. She was the eldest daughter of John Morgan Richards, a successful man of business in Boston, Massachusetts, U. S. A., and of Laura Hentzen Arnold, a lady of distinguished colonial descent. Her father came of an intensively Calvinistic stock long settled in and about New York and New Jersey; and her grandfather, the Rev. James Richards, D.D., was a preacher and theological writer of some distinction in his time. In February, 1857, before she had completed the twelfth year, Miss Richards was married to Mr. Reginald Wallpole Craigie, an English gentleman of good connections. The union, however, proved an uncongenial one, and Mrs. Craigie soon sought and obtained a legal separation with the right to the custody of her child. In 1892, as the result, it would seem, of much reflection on the part of the Jesuit, she entered upon a life of cloistered devotion. Two years later, the Good Mother of St. Mary announced that the soul of her daughter had been preserved intact. She had begun to turn her thoughts seriously to literature some time before this event; for already in 1891 she had ventured before the public under the pseudonym which she insisted on retaining long after her identity was known, and challenged the puzzled critics by a book to which she gave the uncen
ventital title of "Some Emotions and a Morall". Success waited upon her from the start: "The Singer’s Comedy" (1892); "A Study in Temptations" (1893); "A Bundle of Life" (1894); "The Gods, Some Mortals, and Lord Wickenham" (1885); "The Herb Moon" (1896); "The School for Saints" (1897); "Robert Orange" (1900); "A Serious Wooing" (1901); "Love and the Dower Huns" (1902); "Fables About Temperaments" (1902); "The Vineyard" (1904); "The Flute of Pan" (1905); "The Dream and the Business" (published after her death in 1906);—
these with plays like "Journeys End in Lovers Meeting: Proverb, in one act, written for Miss Ellen Terry" (1894); "The Ambassador", produced at the St. James’s Theatre in London (1888); "Osehna and Ursyne", a tragedy in three acts, published in the "Anglo-Saxon Review" (1899); "A Repentance", a drama in one act, produced at the St. James’s Theatre and afterwards at Carisbrooke Castle (1899); "The Wisdom of the Wise", produced at the St. James’s Theatre (1900); and "The Bishop's Move" (1902), of which she was author only in part, represent the sum of her considered work, the output she preferred to be judged by. As she grew older in the wisdom of her art, the religious quality which seems to lie inevitably behind all her theory of life emerged more and more strongly. Her collection "The School for Saints" and its sequel "Robert Orange". Whether in literary form or in artistic intention she never rose beyond the achievement of these two books. They are intensely serious, intensely human, and almost too religious; yet they are modern and alive. Mrs. Craige was in the full enjoyment of a well-deserved fame, yet hardly at all except in her own mind when death came to her suddenly from heart disease.

Crashaw, Richard, poet, Cambridge scholar and convert; d. 1649. The date of his birth is uncertain. All that can be affirmed positively is that he was the only child of a one-time famous Puritan divine, William Crashaw, by a first marriage, and that he was born in London, probably not earlier than the year 1613. Of the mother nothing is known except that she died in her child's infancy, while his father was one of the preachers in the Temple; and not even her family name has been preserved to us. William Crashaw, the father, was a Yorkshireman, whose family, which had been settled for some generations in or about Handsworth, a place some few miles to the east of the present town of Sheffield. He was a man of unchallenged repute for learning in his day, an argumentative but eloquent preacher, strong in his Protestantism, and fierce in his denunciation of "Romish falsifications" and "besotted Jesuitries". He married a second time in 1619, and was once more made a widower in the following year. Richard, the future poet, could scarcely have been more than a child of six when this event took place; but the relations between the boy and his step-mother, brief as they must have been, were affectionate to an unusual degree. She was but four and twenty when she died in child-birth early in October, 1620, and she was buried in Whitechapel. No other details of this period of Crashaw's life have come down to us, but the few to which reference has been made make it abundantly evident that not one of the qualities we afterwards displayed for the more mystical side of Christianity can be explained altogether by heredity or even by early environment.

Owing to the elder Crashaw's fame as a Temple preacher and the scarcely less notable distinction which must have attached to him as a hard-bitten Protestant pamphleteer, it was only natural that, in the then state of public opinion, a career should in time be opened to his promising son. On the nomination of Sir Randolph Crewe and Sir Henry Yelverton, the latter one of the judges of the King's Bench, the boy was placed on a foundation in the Charterhouse School where he was brought under the influence of Robert Brooke, a master of high ideals and great practice. Trashaw did not receive any financial aid to his education, left his son unprovided for; but the influence of his friends was exerted in the boy's behalf, and on 6 July, 1631, some five years after his father's death, Richard entered Pembroke Hall in Cambridge. He did not formally matriculate as a scholar until 26 March of the following year, when he succeeded in getting elected to a Mastership. That was the last of the Pembroke previous to his actual election on one of the foundations there seems to be proved by the poems composed on the death of William Herrys (or Harris) which took place in October, 1631. Life at Cambridge was not rigorously to Crashaw in spite of the imprisonment which led him to deplete his uncertain resources by spending his little all on books. From this time forth books and friends and religion were to make up the staple of existence for him.

It is significant of the essential aloofness of his spirit, during even the chief formative years of his life, that his poems bear no reference to his home life or to his own. His kindly Charterhouse master, however, he commemorates more than once in affectionate terms both in Latin and in English; and the ties of university friendship seem ever to have been strong with him. Benjamin Laney, the Master of Pembroke, a man of Landian views, who came into his own, after the Cromwellian troubles were over, by being appointed successively to the Sees of Peterborough, Lincoln, and Ely; John Tournay, the High Churchman, tutor of his college, who was refused a divinity degree because of his temerity in attacking the Lutheran doctrine of justification by faith alone; Nicholas Ferrer, the enthusiast who dreamed of reviving the cenobitical idea in the Anglican Church in his home at Little Gidding; Cosin, the Royalist master of Peterhouse; John Beaumont, the author of "Psyche"; and most characteristic of all, perhaps tenderest of all, and certainly not the least notable of the "Metaphysicals", the poet, Abraham Cowley;—these were the intimates who watched the ripening of those Cambridge years during which Crashaw achieved his titles to permanent fame. His feeling for the remote and more learned sense of words, which accounts in part for the defects as well as for the felicities of his poetic work, had manifested itself early in his career; and he had been but a short while at the University before he was known as an adept in five languages. His knowledge of Greek and Latin was above the average, even for a generation distinguished in no small degree for its classical scholarship, and one famous line on the Miracle of the Marriage Feast of Cana, in his "Epigrammatum Sacrum Liber", issued from the University Press in 1634, will probably be quoted as long as the Latin tongue retains its spell over Western Christianity: "Nympha pudica Deum vidit, et erubuit". (The conscious water saw its Lord, and blushed.) Cf. Aaron Hill's translation, 1688-1750. The year in which the "Epigrammatum Sacrum Liber" appeared was the year in which Crashaw took his bachelor's degree. He could scarcely have been more than twenty-one at the time, and two years later, possibly on the promise of a more lucrative fellowship, he joined his friend and friend of Cosin at Peterhouse and proceeded M.A. in 1638.

For the details of his life during the next ten or eleven years we are indebted largely to the conjectures of the late Dr. Grosart, based upon the chance statements of his friends and an entry here and there in registers and diplomatic correspondence; that it was a life sincerely devoted to religious meditation is proved by the pre-
Grasset, JEAN, ascetical writer, b. at Dieppe, France, 3 January, 1618; d. at Paris, 4 January, 1692. He entered the Society of Jesus in 1638, became professor of humanities and philosophy, was director for twenty-three years of a famous sodality of men connected with the professed house of the Jesuits in Paris, and was also a successful preacher. Grasset is the author of many ascetical works, among which are: "Méthode d'oraison"; "Considérations chrétiennes pour tous les jours de l'année"; "Le chrétien en solitude"; "Disseration sur les oracles des Sibylles", which was vigorously attacked: "Entretiens pour la jeunesse". He also published in 1689 a "Histoire de l'église du Japon" which has been translated into several languages but which is considered inferior to that of Charlevoix. Grasset's history was scarcely original, for it was drawn in great part from the work when Father Solier had died in 1658. It touched the style and continued the narrative from 1624 to 1658. The objection is made that the work lacks precision, is heavy, and is crowded with details. The author attributed the origin of the persecution of 1697 to the imprudence of the friars in making their religious ceremonies too public. There is a famous work of his entitled: "La foy victorieuse de l'infidélité et du libertinage". On 9 September, 1656, the Bishop of Orléans issued an interdict against him for having in one of his sermons charged several ecclesiastics with sustaining the propositions condemned by the Bull of Innocent X, "Cum occasione" (31 May, 1652). The interdict was removed in the following February.

T. J. CAMPBELL.

Evren, MRS. AUGUSTUS (PAULINE-MARIE-ARMAND-AGLAE-FERRON DE LA FERRONNAYS), b. 12 April, 1808, in London; d. in Paris, 1 April, 1891. Her parents, Comte Auguste-Marie de la Ferronnays, of old Breton stock, and Marie-Charlotte-Albertine de Sourches de Montsoreau, likewise of ancient family, had undergone all the miseries attendant on the emigration during the French Revolution, including the loss of estates. Their attachment to the Due de Berry brought about their return to France shortly afterwards by the appointment of M. de la Ferronnays as ambassador to St. Petersburg, where he continued for eight years. In 1827 he returned to France as Minister of Foreign Affairs to Charles X.
and Pauline was introduced into the brilliant society of the Restoration. In 1830 her father was given the post of ambassador to Rome, where he was accompanied by his family. It was probably in Naples that she met Augustus Craven, son of Keppel Craven and grandson of the Margravine of Anspach, who in 1830 had been made a cardinal in the Spanish nation at Naples. Their marriage was celebrated, 24 August, 1834, in the chapel of the Acton Palace, Naples, and a few days afterwards Augustus Craven was received into the Church. In 1836 Mr. and Mrs. Craven returned to England, whence they went successively to Lisbon, Brussels (staying at the house of Mr. Craven held diplomatic appointments. Up to this time Mrs. Craven’s life had been intimately bound up with those of her immediate family, whom the world has come to know and love in the pages of “Le Récit d’une Sœur”. She took a keen interest in English politics, and in 1851 wrote a protest against an attack in the House of Commons on conventual life as it was being revived in England.

In 1851 Mr. Craven made an unsuccessful stand for Parliament, which caused him severe financial losses. In 1853 the Cravens took up their residence at Naples in the Palazzo Chiatamone, or as it came to be called, the Casa Farnese, formerly the home of Craven’s father, who had died in 1851. During the years that followed, this became the centre of the brilliant Neapolitan society depicted in Mrs. Craven’s “Le mot de l’ennéagme”. By 1864 she had arranged the mass of materials for “Le Récit d’une Sœur”, and had begun “Anne Severin”. “Le Récit”, appeared in January, 1866. In March, 1868, the first part of “Anne Severin” began in “Le Correspondant”, and Lady Fullerton commenced the translation.

The winters of 1868-69 and 1869-70 were spent in Rome, and at the Craven apartments numbers of distinguished people met, among them the diplomatic and aristocratic present at the Vatican Council. Mrs. Craven’s best known novel, “Fleurange”, appeared in 1872 simultaneously at Paris in “Le Correspondant” and at New York in English through the efforts of Father Hecker in “The Catholic World”. This work was crowned by the Academy. It was followed in 1874 by “Le mot de l’ennéagme”. In the same year Mrs. Craven’s answer to Gladstone’s article in the “Contemporary Review”, entitled “Ritualism and Ritual”, and his subsequent pamphlet, appeared in “Le Correspondant” on the same day as Cardinal Newman’s “Letter to the Duke of Norfolk”.

Mrs. Craven’s life was spent chiefly in Paris, varied by lengthy visits to English friends, and more particularly to Monabri, the beautiful chalet of Princess Sayn Wittgenstein, between Lausanne and Ouchy, where the Empress Auguste was also a frequent guest. The life of Natalie Narieskin, on which Mrs. Craven had long been at work, appeared in 1876. Mr. Craven died at Monabri, 4 October, 1884, and was buried at Boury. During the remaining seven years of Mrs. Craven’s life she was busy with various articles for reviews, but chiefly with her last novel, “Le Valbriant”, and the life of her friend, Lady P., published posthumously in 1884, adapted by Father Coleridge in his life. On 5 June, 1890, she was attacked by a species of paralysis, which after ten months, during which she was deprived of speech, resulted in her death.

Crayer, Gaspard de, Flemish painter, b. at Antwerp, 1582; d. at Ghent, 1669. He was a pupil of Raphael van Coccie, but speedily surpassed his master, and was appointed painter to the Governor of the Low Countries at Brussels, was given a considerable pension, and employed in the churches and public edifices of that place. He resigned his position, however, and removed to Ghent, where he painted his most celebrated works. Of his picture of the “Centurion and Christ”, painted for the refectory of the abbey at Affligem, Rubens is said to have declared: “Crayer, nobody will surpass you.” He was one of the first Englishmen employed in the art, and, although not a man of profound genius, was a perfect draughtsman and an admirable colourist. His compositions are simple, correct, and pleasing, his colouring clear and fresh, comparable only in his own school to that of Van Dyck. In many of his important works he employed De Hooch and Achtscellinck to paint the landscapes, he himself being responsible for the composition and figures. His chief work is the “Death of the Virgin” in Madrid, and his principal portrait is that of the Cardinal Inf. Don Ferdinand, brother of the King of Spain, on horseback. There are several of his paintings at Brussels, three in Ghent, one at Antwerp, and others at Amsterdam, Munich, Nancy, Paris, St. Petersburg, and Rotterdam. His portrait was painted by Van Dyck and engraved by Pontius, and he himself is said to have been responsible for more than one woodcut.

Craygh, Richard, Archbishop of Armagh, Ireland, b. at Limerick early in the sixteenth century; d. in the Tower of London, in 1588. The son of a merchant, he followed the same calling in his youth and made many voyages to Spain. A providential escape from a shipwreck left an impression on him, and after some years of study abroad he was ordained priest. Returning to Ireland, he taught school for a time at Limerick. He refused nominations for the sees of Limerick and Cashel, but the papal nuncio, David Wolfe, determined to conquer his humility, named him for the primacy when it became vacant, and would accept no refusal. Creagh was consecrated at Rome, and in 1564 returned to Ireland as Archbishop of Armagh. Shane O’Neill was then the most potent of the Ulster chiefs. From the first he and Creagh disagreed. O’Neill hated England; Creagh preached loyalty to England in the cathedral of Armagh, even in his name. O’Neill had his men burning down the cathedral. Creagh then cursed him and refused to absolve him because he had put a priest to death. Shane retaliated by threatening the life of the primate, and by declaring publicly that there was no one on earth he hated so much, except the Queen of England, whom he confessed he hated more. In spite of all this, Creagh was arrested and imprisoned by the English. Twice he escaped, but he was retaken and in 1567 lodged in the Tower of London, and kept there till his death. From his repeated examinations before the English Privy Council his enmity to Shane O’Neill and his unwavering loyalty to England were made plain. But his steadfastness in the Faith and his great popularity in Ireland were considered crimes, and in consequence the Council refused to set him free. Not content with this his moral character was assailed. The daughter of his jailer was urged to charge him with adultery. The charge was investigated in public court, where the girl retracted, declaring her accusation absolutely false. It has been said that Creagh was poisoned in prison, and this, whether true or false, was believed at the time of his death. His grandson, Peter Creagh, was Bishop of Cork about 1678. He was imprisoned for two years in consequence of the false accusations of Titus Oates, but
acquitted (1682), was transferred to the Archdiocese of Tuam in 1686. He followed James II to the Continent, was appointed Archbishop of Dublin in 1693, but was never able to return and take possession. He became Coadjutor Bishop of Straburs, where he died (July, 1705).

E. A. D’Alton.

Creation (Lat. creatio).—I. DEFINITION.—Like other words of the same ending, the term creation signifies both an action and the object or effect thereof. Thus, in the latter sense, we speak of the "kingdoms of creation", "the whole creation", and so on. In the former sense the word sometimes stands for productive activity generally (e.g. to create joy, trouble, etc.), but more especially for a higher order of such efficiency (e.g. artistic creation). In technically theological use it is employed to signify what God brings into existence. The entire substance of a thing into existence from a state of non-existence—e.g. a statue or a marble—is called "creation". To be peculiar to creation is the entire absence of any prior subject-matter—e.g. a statue out of crude marble; but what is peculiar to creation is the entire absence of any prior subject-matter—e.g. a statue out of crude marble; but what is peculiar to creation is the entire absence of any prior subject-matter—e.g. a statue out of crude marble; but what is peculiar to creation is the entire absence of any prior subject-matter. The proposition "exnihilo" in the above definition does not mean "origin" or "something"; it simply states that the "material" to be conceived as the material out of which a thing is made—matera ex qu.to; a misconception which has given rise to the puible objection against the possibility of creation conveyed by the phrase, exnihilo qui nihil fit—"nothing comes of nothing". The phrase means (a) the negation of a pre-existing material, out of which the product might otherwise be conceived to proceed, and (b) the order of succession, viz., existence after non-existence. It follows, therefore, that (1) creation is not a change or transformation, since the latter process includes an actual underlying pre-existent subject that is destroyed by the one real state, which subject creation positively excludes; (2) it is not a process within the Deity, like the inward emission of the Divine Persons, since its term is extrinsic to God; (3) it is not an emanation from the Divine Substance, since the latter is utterly indivisible; (4) it is an act in which, while it abides within its cause (God), has its term or effect distinct therefrom; formally immanent, it is virtually transitive; (5) including, as it does, no motion, and hence no successive, it is an instantaneous operation; (6) its immediate term is the substance of the effect, the "accidents" (q. v.) being "non-created"; (7) since the word creation means substance expressed in the term or object of the creative act, or, more strictly, the object in its entitative independence on the Creator, it follows that, as this independence is essential, and hence incommunicable, the creative act once placed is coextensive in duration with the creature's existence. However, as this contention has been stated cogently (Dublin, 1784), we shall not dwell on the subject. The fact of the creator's operation must be taken into consideration, which is nothing else than the unceasing influx of the creative cause upon the existence of the creature. Inasmuch as that influx is felt immediately on the creature's activity, it is called concurrence. Creation, conservation, and concurrence are, therefore, really identical and only notionally distinguished. Other characteristics there are, the more important of which will come out in what follows.

II. HISTORY OF THE IDEA.—1. The idea of creation thus outlined is intrinsically consistent. Given a personal First Cause possessing infinite power and wisdom, creative productivity would a priori be necessarily one of His perfections, i.e. absolute independence of the external limitations imposed by material things. Besides, the fecundity which organic creatures possess, and which, in the present supposition, would be derived from that First Cause, must be found typically and eminently in its source. But creative productivity is just the transcendent exemplar of organic fecundity. Therefore, a concept of God that we should find it in the first being of the universe. The act by which the creature is produced, how something comes from nothing, is of course quite unimaginable by us, and extremely difficult to conceive. But this is scarcely less true of any other mode of production. The intimate connexion between cause and effect is in every case hard to understand. The fact, however, of such a connexion is not denied except by a few theologians; and even they continually admit it in practice. Consequently the indistinctness of the notion of creation is no valid reason for doubting its inner coherence. Moreover, though the idea of creation is not, of course, based upon immediate experience of the act of creation (for there is no concern, aided by the principle of sufficient reason, to interpret experience. Creation, as will presently appear, is the only consistent solution that has ever been given to the problem of the world's origin.

2. On the other hand, though the idea of creation is self-consistent and naturally attainable by the mind interpreting the world in the light of the principle of causality, nevertheless such is not its actual source. The conception has a distinctly theological origin. The early Christian writers, learning from Revelation that the world was produced from nothing, and seeing the necessity of having a term to designate such an act, coined the word "creation," which they then employed to express any form of production, e.g. creare solum (Cicero). The theological usage afterwards passed into modern language. Probably the idea of creation never entered the human mind apart from Revelation. Though some of the pagan philosophers attained to a relatively high conception of God as the supreme ruler of the world, they seem never to have drawn the next logical inference of His being the absolute cause of all finite existence. The truth of creation, while not a mystery—not supernatural in its very nature (quod essentium)—is supernatural in its influence. In another respect, if not in another natural, it is explicitly revealed. The distinct conception of his created origin which primitive man, as described in Genesis, must have received from his Creator was gradually obscured and finally lost to the majority of his descendants when moral corruption had darkened their understanding; and they substituted for the Creator the fantastic agencies conjured up by polytheism, dualism, and pantheism. The overarching sky was conceived of as divine, and the heavenly bodies and natural phenomena as its children. In the East this gradually gave rise to the identification of God with nature. Whatever exists is but the manifestation of the One—i.e. Brahma. In the West the forces of the universe were separately deified, and a more or less esoteric conception of the Supreme Being as the father of the gods and of man was feebly held by some of the Egyptians and probably by the Greek and Roman sages and priests. The Creator, however, did not create them, and His own act, in fact, is attributed to the Creator. The descendants of Sem and Abraham, of Isaac and Jacob, preserved the idea of creation clear and pure; and from the opening verse of Genesis to the closing book of the Old Testament the doctrine of creation runs unmistakably outlined and absolutely unmodified by any extraneous element. In the beginning God created the heavens and the earth.” In this, the first sentence of the Bible we see the foundation of the
stream which is carried over to the new order by the declaration of the mother of the Machabees: "Son, look upon heaven and earth, and all that is in them: and consider that God made them out of nothing" (II Mach., vii, 28). One has only to compare the Mosaic account of the creative work, with that recently discovered on the clay tablets unearthed from the ruins of Babylon to discern the immense difference between the adulatorated revealed tradition and the puerile story of the cosmogony corrupted by polytheistic myths. Between the Hebrew and the Chaldean account there is just sufficient similarity to warrant the supposition that both are versions of some antecedent record or tradition, though no one can avoid the conviction that the Biblical account represents the pure, even if incomplete, truth, while the Babylonian story is both legendary and fragmentary (Smith, "Chaldean Account of Genesis", New York, 1875). Throughout the New Testament, wherein God's creative activity is seen to merge with the redemptive, the same idea is continuous, now reaffirmed to the Greek pagan in explicit forms, now recalled to the Hebrew believer by expressions that presuppose it too obvious and fully admitted to need explicit reiteration.

3. The extra-canonical books of the Jews, notably the Book of Hemoeh and the Fourth Book of Esdras, represent the teaching of the second creation of the world by God, as the original of which they developed as the basis of their teaching on creation; the Fathers and Doctors of the early Church in the East and West everywhere proclaim the same doctrine, confirming it by philosophical arguments in their controversies with Paganism, Gnosticism and Manichaeism; while the early Roman symbols, that of Niceus and those of Constantinople repeat, in practically unvarying phrase, the universal Christian belief "in God the Father Almighty, Creator of Heaven and earth, of all things visible and invisible".

4. After the controversy with Paganism and the Oriental heresies had waned, and with the awakening of a new intellectual life through the introduction of Aristotelian into the Western schools, the doctrine of creation was set forth in greater detail. The revival of Manichaeism by the Cathari (q. v.) and the Albigenses (q. v.) called for a more explicit expression of the contents of the Church's belief regarding creation. This was formulated by the Fourth Lateran Council in 1215 in "Enchiridion", 426 (355). The council teaches the unicity of the creative principle—

**unus solus Deus**; the fact of creation out of nothing (the nature of creation is here for the first time, doubtless through the influence of the schools, designated by the formula, *condit ex nihilo*); its object (the visible and invisible universe and noblest in it, and man); its temporal character (ab initio temporis); the origin of evil from the fact of free will.

5. The conflict with the false dualism and the emanationism introduced into the schools by the Arabian philosophers, especially Avicenna (1030) and Averroes (1195), brought about the most philosophically elaborate doctrinal theory of creation found in the works of the greater Scholastics, such as Blessed Albert, St. Thomas, and St. Bonaventure. The Aristotelian theory of causes is here made use of as a defining instrument in the synthesis which is suggested by the well-known dictum—

Efficient causa Deus est, formalis idea,
Finalis bonitas, materialis hyle
(Albert. Magn., Summa, I, Tr. xiii; Q. liv, Vol. XXXI, p. 551 of Bosquet ed., Paris, 1895). On these lines the Schoolmen built their system, embracing the relation of the world to God as its efficient cause, the continuous action of God's creative power in concurrence with every phase of the creature's activity; the conception of the Divine idea as the archetypal cause of creation; the doctrine that God is moved to create (speaking by analogy with the finite will) by His own goodness, to which He gives expression in creation in order that the rational creature recognising it may be led to love it and, by a corresponding mental and moral adjustment thereto in the present life, may attain to its complete fruition in the life to come; in other words that the Divine goodness and love is the source and final cause of creation both active and passive. Thus the application, by a constantly sustained analogy of the three causes—efficient, final, and formal (eternal)—resolves the problem of the Scholastics between the primary and metaphorical view of creation. There being no previously existing material cause (hyle) of creation, the application of the fourth cause appears in the Scholastic theory on potency and *materia prima*, the radical and undifferentiated constituent of nature.

The new view of creation developed by the Scholastics passed without substantial change along that current of modern thought which preserved the essential elements of the Theistic-Christian world-view—that of Descartes, Malebranche, Leibniz—and of course along the continuous stream of traditional teaching within the Catholic Church. In the opposing current it disappears with Spinoza, and gives way to realistic Pantheism; with Fichte, Schelling, Hegel, its place is taken by some phase of varying idealistic Pantheism; while in our own day Agnosticism (Spencer), materialistic Monism (Haeckel), and spiritualistic Monism (Neo-Hegelianism and the New Theology) have been developed. Among modern theologians there is a practically uniform tendency to interpret the traditional and Scriptural data as postulating the creative act to account for the origin of embodied spirits (the angels), of the primordial matter of the universe, and of the human soul. The development of the universe, the introduction of plant and animal life, the formation of the first human bodies can be explained by the administrative or formative activity of God, an activity which is sometimes called second creation (secunda creatio), and does not demand the creative act as such. Catholic philosophers develop the purely rational arguments for these same positions, except for the origin of the angelic world, which of course lies beyond the sphere of philosophy. The remainder of this article will offer a summary of the aforesaid theological and philosophical positions and their bases.

III. ARTICLES FOR CREATION.—1. For the doctrine of the Church on the origin of the spiritual world the reader is referred to the article Angel.

2. That the material of which the universe is composed was created out of nothing is the implicit, rather than specifically explicit, statement of the Bible. The Scriptural teaching on God and the relation of the universe to God is not contradictory, but complementary. God alone is declared to be underived, self-existent (Ex., iii., 14), and in comparison with Him all things else are as nothing (Wisdom, xi, 23; Is., xi, 17). God is said to be the beginning and end of all things (Is., xlviii, 12; Apoc., i, 8); all things else are from Him, and in Him (Rom., i, 28; I Cor., vii, 8; Coloss., i, 16). God is the absolute and independent sovereign (Ps., xlix, 12, and Is., xliv, 24; Heb., i, 10). That these texts equivalently assert that God is the Creator of all things finite is too obvious to call for further comment. The most explicit Scriptural statement respecting the created origin of the universe is found in the first verse of Genesis: "In the beginning God created heaven and earth". The objects here designated evidently comprise the material universe; whether the originative act is to be understood as specifically creative, depends upon the meaning of the Hebrew verb bara. Of this process by unimpeachable authority may be adduced. Gesenius says: "The use of this verb [bara] in Kal, the conjugation here employed, is entirely different from its primary signification (to cut, shape, fashion); it signifies rather the new production of a thing than the shaping or elaborating of the pre-existing material. That the first verse of Genesis teaches
that the original creation of the world in its rude and chaotic state was from nothing while the remaining part of the chapter teaches the elaboration and distribution of the matter thus created, the connection of the whole section shows sufficiently clearly" (Theaurus, p. 357 b). Mühlau and Vollck in the extended edition (Debrett leaves) (Gen., p. 11) "The word bara in its etymology does not exclude a previous material. It has, as the use of Kal shows, the fundamental idea of cutting or hewing. But as in other languages words which define creation by God have the same etymological idea at their root, so bara has acquired the idiomatic meaning of a divine creating, which, whether in the kingdom of nature, or of history, or of the spirit, calls into being that which hitherto had no existence. bara never appears as the word for human creation, differing in this from the synonyms soch, yataar, yaid, which are used both of material and of moral creation, it is never mentioned in a separate sense of the material, and even from this it follows that it defines the divine creative act as one without any limitations, and its result, as to its proper material, as entirely new; and, as to its first cause, entirely the creation of divine power." Again Kalisch observes (Gen. p. 1): "God called the universe into being out of nothing; not out of formless matter coeval with Himself" (Geikie, Hours with the Bible, I, 16).

3. The patriarchic teaching as to the created origin of the world is too explicit and well known to require citation here. The few ambiguous expressions occurring in the works of Origen and Tertullian are more the exception than the rule; for the patriarchal conceptions of these same writers, while their most exceptional divergencies are as nothing in comparison with the unanimous and continuous teaching of the other Fathers and Doctors of the Church.

4. Approaching the problem of origin from the purely rational side, we find the field preoccupied almost from the beginning of the history of philosophy by two directly opposite solutions: one maintaining that the world-matter is self-existent, undervived from any extraneous source, and hence eternal; the world has therefore attained its present complex condition by a gradual process of growth out of the undifferentiated state (materialistic Monism); the other asserting that the world is derived from an extraneous cause, either by emanation from or evolution of the Divine being (Pantheism) or by creation (Creationism). Creationism, though an essentially philosophical solution, is never found divorced from Revelation. Materialistic Monism includes a varying number of philosophies; but all agree in maintaining that the world-matter is eternal, unproduced, and absolutely indestructible. They differ in that some attribute the formation of the universe to chance (the amentea of God); others to a sort of uncountable chemical life or world-soul (Anaxagoras, Plato, Pana- psychists, Fechner, Lotze, Paulsen), others to forces essentially inherent in matter (Feuerbach, Büchner, Häckel). Against materialistic Monism Catholic philosophers (Creationists) argue thus: The world-matter is not self-existent; for it is essential, immutable, absolute, infinite. But the world-matter is not necessary; its essence as such furnishes no reason why it should exist rather than not exist, nor why it is definitely determined as to number, extension, and space. It is not immutable, for it undergoes incessant change; not absolute, since it is subject to its states; not infinite as to extent, since, being extended, it is measurable, and hence finite; nor infinite in active power, since it is inert and essentially limited by external stimulation. The aggregate of natural forces must also be finite, otherwise there could be no change, no laws of inertia, no constancy and equivalence of energy. The world-substance is not eternal. For that substance must be preserved either as possessing external matter in that which the world contains, or as possessing external matter which may be added. If eternally active it would have passed through an infinite number of changes, which is self-contradictory. Moreover, the supposed evolutionary process would not have begun so late as geology teaches that it did, and would long since have come to an end, i.e. to a state of equilibrium of forces tending to the law of entropy. If the primal matter was not endowed with an eternal activity, evolution could not have begun—not from within, the law of inertia forbidding; nor from without, since the materialistic hypothesis admits no extraneous cause. Moreover, since chance is no cause, but the negation thereof, some reason must be assigned for the differentiation of the original matter into the various chemical elements and compounds. That reason may be supposed either intrinsic or extrinsic to the primary matter. If intrinsic, it does not explain why just these elements (or compounds) in this amount and number become differentiated; if extrinsic, the supposition contradicts the very basis of materialism which negates transmutability of agency.

A similar line of argument may be used to prove the impossibility of explaining, on the materialistic hypothesis, the order prevailing everywhere throughout the universe. To the counter argument that, given an infinite series of atomic arrangements, the present order must needs result, it may be answered: (a) the order of both atoms and motion still remains unexplained; (b) an infinite series of combinations would demand infinite time, while geology indicates a limited time; (c) the same sort of order might result from a chance concurrence of atoms, but no constant and universal order; (d) the present order presupposes some disposition of the elements for this rather than another order. Now the question still remains: Whence came precisely this disposition, and why did not the atoms concur in a way unfavourable to a continuous evolution, since the number of possible arrangements of an infinite number of atoms must be infinite?

The hypothesis of a world-soul exhibits another group of inconsistencies. If the universe was "formed" by a principle of life, there would not be that essential difference between inanimate and animate bodies which both science and philosophy establish; inanimate bodies would manifest signs of life, such as spontaneous and immanent activity, organs, etc. The materialistic principle, "No matter without force, no force without matter" (Büchner), though, with some obviousqualification, true as to its first part, is untrue as to its second. Force is the proximate principle of action, and may be or not be, but it is not of necessity conjoined with matter. The principle of action in man is not intrinsically dependent on matter.—For the development of these and more serious arguments against materialistic Monism see "Institutiones Philosophicae Naturales", by Willems or Peuch.

Pantheistic differs from materialistic Monism in asserting a being, in some sense unitary, which unfolds itself in the material universe and in human consciousness. That such a being is self-existent is essentially the essence of language. Moreover, God is indivisible, spiritual, eternal, necessary, immutable, omnipresent, absolute, and cannot, therefore, "evolve" into a universe of matter which possesses just the contrary attributes. For a like reason bodies cannot be modes, either real (Spinoza) or logical (Hegel), of the divine substance. Since we live, our nature is self-existent, produced, and that from some antecedent material (for such a supposition would
only defer and not solve the problem); since, moreover, the world-substance has not emanated from the divine nature, it follows that it must have been produced by some extraneous cause, from no pre-existing material, i.e. it must be of infinite intelligence and power. That this extraneous cause is God, the self-existent, necessary, absolute, infinite, and consequently personal Deity, is proved from the finality and order manifest in the cosmos that has developed from the original material, which order demands an efficient and a directive cause of supreme if not infinite intelligence and power. From this further fact that the creative act can proceed only from a truly infinite and therefore personal agent, as will be shown towards the end of this article.

To the question: In what condition was the world-matter created, whether homogeneous or differentiated into various specific substances? Neither Revelation nor science gives answer. Until lately the practically universal opinion of Catholic philosophers favoured an original essential differentiation of the elements. Since, however, the tendency of physico-chemical experimentation and inference now points with some probability to a radical homogeneity of matter, particularly in chemistry, which is brought to its simplest principles, the opinion seems justified that the original matter was created actually undifferentiated, but with inherent potency toward elemental and, subsequently, compound diversification through the action, reaction, and grouping of the ultimate elements.

When—probably through some such processes as are suggested by the well-known nebular hypothesis (Kant, Laplace) and by the inductions of geology—the material universe was disposed for the simplest forms of life, then God said: “Let the earth bring forth the green herb, and such as may seed, and the fruit tree, yielding fruit after its kind, which may have seed in itself upon the earth. And it was so done” (Gen., i, 11)—the work of the third creative day. At a subsequent, “God created the great whales and every living and moving creature, which the waters brought forth, according to their kinds, and every winged fowl according to its kind” (ib., 21)—the work of the fifth day. And again, “God said: Let the earth bring forth the living creature in its kind, cattle and creeping things, and beasts of the earth, according to their kinds. And it was so done. And God made the beasts of the earth according to their kind, and crept for every beast of the earth after its kind” (ib., 24, 25)—part of the work of the sixth day. In these simple words the inspired author of Genesis describes the advent of life, plant and animal, on our earth. It does not fall within the scope of the present article to discuss the various meanings that have been assigned to “the days of creation.” Suffice it to say that Catholic exegetes are allowed the widest liberty of interpretation compatible with the obvious substance and purport of the sacred narrative, viz., that God is “the creator of heaven and earth.” Accordingly, we find some theologians perfectly free in faith, ad libitum, in their choice of explanation. We know that the six days signify only a logical (not a real) succession, i.e. in the order in which the creative works were manifested to the angels. Others interpret the days as indefinite cosmical periods. Others, though these are at present a vanishing number, still follow the literal interpretation. An immense amount of time, perhaps a year, and in many cases, and in the task of harmonizing the successive stages of terrestrial evolution, as deciphered by geologists from the records of the rocks, with the Mosaic narrative; but the highest tribute to the success of these efforts is that they more or less graphically corroborate what must be already present and true. And the believer, that between the truth of Revelation and the truth of science there is, and can be, no discord. But whatever may be thought of the effort to vindicate in detail the parallelism claimed to exist between the geological succession of living forms and the order described in the Bible, it is certain that some general parallelism exists; that the testimony of the strata corroborates the story of the Book, according to the lowest forms of plant life, “the green herb,” appeared first, then the higher, “the seed-bearing tree,” followed in turn by the simpler animal types, the water creature and the winged fowl, and finally by the highest organisms, “the beasts of the earth and the cattle”—V. CREATION and IV. CREATION. According from the general interpretation of the Biblical account of creation, we turn to the biologico-philosophical problems which it suggests, and which revert to it for what solution it may have to offer, we find Catholic thinkers exercising an equally large liberty of speculation. “Considered in connection with the entire account of creation,” says a recent eminent Jesuit exegete, “the words of Genesis cited above proximately maintain nothing else than that the earth with all that it contains and bears, together with the plant and animal kingdoms, has not produced itself nor is the work of chance; but owes its existence to the power of God. Each particular magnitude or class of the animal kingdoms received their existence: whether all species were created simultaneously or only a few which were destined to give life to others: whether only one fruitful seed was placed on mother earth, which under the influence of natural causes developed into the first plants, and another method to the other animals; and in the first animals—all this the Book of Genesis leaves to our own investigation and to the revelations of science, if indeed science is able at all to give a final and unquestionable decision. In other words, the article of faith contained in Genesis remains firm and intact even if one explains the manner in which the different species originated according to the principle of the theory of evolution” (Knabenbauer, “Stimmen aus Maria-Laach,” XIII, 74; cf. Muckermann, “Attitude of Catholics towards Darwinism and Evolution,” 78.)

The two general biological problems connected with the Biblical cosmogony are the origin of life and the succession of organisms. Concerning both these problems all that Catholic Faith teaches is that the beginnings of plant and animal life are due in some way to the productive power of God. Whether, with St. Augustine and St. Thomas, one holds that only the primordial elements, endowed with dispositions and powers (rubiones rerum creatae) for development in the created in the strict sense of the term, and the rest of nature—plant and animal life—was gradually evolved according to a fixed order of natural operation under the supreme guidance of the Divine Administration (Harper, “Metaphysics of the School,” II, 746); or whether, with other Fathers and Doctors of the Church, one holds that life and the classes of living beings—orders, families, genera, species—were each and all, or only some few, strictly and immediately created by God—whichever of these extreme views he may deem more rational and better motivated, the Catholic thinker perfectly free in faith, ad libitum, in his choice of explanation. It is known that the theory of spontaneous generation of certain animalculae, worms, insects, etc. was held by theologians and philosophers alike until comparatively recent times, until, indeed, experimental evidence proved the opposite thesis. The establishment of the universal truth of biogenesis (cf. v.), was then seen to corroborate the teaching of the Bible, that life, plant and animal, is due to the Divine productive agency. Since the characteristics of living substance are contrary to those of the non-living substance, the characteristics of life being spontaneity and immanent activity, those of inanimate matter being and inalienable, Divine efficiency, to which the origin and differentiation of life are ascribed, has received the distinctive name of administration. The idea conveyed by the
latter term is thus explained by a philosopher who has drawn it out from the suggestion supplied by St. Thomas. God, in the absolute sense, is the Causer: he operates as he does in the creative act, without the cooperation of the creature, it is absolutely impossible for the creature to elicit even the smallest act without the co-operation of the Creator. Now the Divine Administration includes this and more, two things, namely, as regards the three present subjects. The one is the constant order, the natural law of the case, e.g., that all living things should be ordinarily propagated by seed belongs to the Divine Administration. The second, which may be called exceptional, relates to the initial organisms, the first plant, fish, bird, and beast, upon which hereditary propagation must have subsisted, which is supposable. This original principle should have been evolved out of the potency of matter without parentage—that the matter, otherwise incapable of the task, should have been proximately disposed for such evolution—belongs to a special Divine Administration. In other words, God must have been the sole efficient cause—utilising, of course, the material cause—of the organism requisite, and hence may strictly be said to have formed such pairs, and in particular the human body, out of the pre-existent matter (Harper, op. cit., 745). It need hardly be said that the distinctions between creation and co-operation, administration and formation, are not to be considered as ever overcome. They are only so many aspects of which the analytical mind must take note of in the fundamental and essential relation of dependence—contingency—in which the creature stands to the First Cause. For a sympathetic account of the evolution of Creationism, the reader may be referred to Muckermann (who has popularized Wasmann’s technical illustrations of specific transformations among the ant-guests), Harper, Mivart, Guibert, Didiot, Farges, etc., mentioned in the bibliography below. A more vigorous criticism of Evolutionism is to be found in the works of Gerard, Guterlet, Pesch, Willems, Hunter, Thein, and Hughes.

V. FINAL CAUSE OF CREATION.—Since the production of something from nothing, the bridging of the chasm between non-existence and existence demands infinite power, and since the reason for the action of an infinite being must lie within that being Himself, the creative motive must be the Creator’s love of His own intrinsic goodness. The love of that absolute good is conceived by us as “inducing” the Creator to give it an extrinsic embodiment (creation in its passive sense, the universe). The type-idea according to which this embodiment is conceived must exist within the Creator’s contingency and as such is called the “exemplary” or archetype-typical cause of creation (passive). The objective realization hereof is the absolutely final objective end, or final cause, of creation. In the material universe this realization, exhibited in the purposiveness of each individual part conspiring to the purposiveness of the whole, remains imperfect and is but a reflection of the original design. In the rational creature it reaches a certain completeness, inasmuch as man’s personality, with its intellectual and volitional endowments, is a sort of (analogous) “image” of the Creator, and, as such, a more perfect realization of the creative plan. Moreover, in man’s consciousness the creative purpose comes to explicit manifestation and reflective recognition. His intelligent reaction thereon by reverential attitude and orderly conduct realizes the absolutely final purpose of creation, the actual “formal glorifying” of the Creator, so far as that is possible in the present life. But even as the orderly or normal activity of the individual organisms and subordinate parts of the universe develop and complete those organisms and parts, so man’s rational conduct perfects him and, as a consequence, results in a state of happiness, the full complement whereof is attainable, however, only in a life beyond the present. This completion and happiness of man are said to be the relatively ultimate end of creation, and therefore the creative plan is absolutely completed, the Creator is finally glorified by the return of the creature, carried up by and in man to conscious inter-communion with the Source and End of the creative act. Lactantius thus sums up the hierarchy of finality in creation: “The world was made that we might be born. We were born that we might know Him and love Him; that we may worship Him. We worship Him that we may earn immortality. We are rewarded with immortality that, being like unto the angels, we may serve Our Father and Lord forever, and be the eternal kingdom of God” (Instit., VII, vi). When man is said to be the (relatively) ultimate end of creation, this obviously does not exclude other coexistent and subordinate purposes.

VI. CREATION THE PREROGATIVE OF GOD ALONE.—The Fourth Lateran Council defined that “God is the sole principle of all things visible and invisible, the creator of all” (Denzinger, op. cit., 428 (355)); and the Bible throughout ascribes the creative act to Him alone: “I am the Lord, that make all things... and there is none with me” (Is., xliv, 24; cf. xl, 25; Ps. cxxxv, 4). As to the question, whether it is intrinsically possible for a creature to be endowed with creative power, theologians answer with a distinction. (1) No creature can be a perfect copy of the act of creation. This is the unanimous teaching of the Fathers. The philosophical reasons are: (a) the creative act, being absolutely independent of material and instrument, supposes an absolutely independent subject (agent); (b) the term of the creative act is the complete substance of the effect (spiritual or material), and the act can extend indefinitely to whatever is intrinsically possible, while the act of the created agent reaches only to the accidents, or partial constituents, of bodies, and is definitely limited in range; (c) the creative act produces its effects by will alone; it is immanent, while its term is extraneous; it is as unlimited as is the extent of will power; it is instantaneous. No finite cause can thus operate. (2) Some theologians (Peter the Lombard and Suarez) have thought that a creature might be used by God as an instrumental cause of creation. The general opinion, however, is that it can be used as a means in the sense that it includes materia ex gud there is no subject whereon the dispositive influence of an instrument could be exerted.

God was absolutely free to create or not to create, and to create the present or any possible world. This is the teaching of Scripture, God “worketh all things according to the counsel of his will” (Eph., i, 11), and of the Fathers generally. It is an obvious rational deduction from the infinite and absolute self-sufficiency of God. The creative act, as a subjective aspect of the Divine Will, is necessary, but the existence of a term is a free. This doctrine of creative freedom excludes the exaggerated optimism of Leibniz and others, who held that God was bound to create the best possible world. The Divine act must be perfect, but the effect need not, and indeed cannot, be absolutely perfect; the creature being necessarily finite, a more perfect creature is always possible and creatable by infinite power. The world is the very best possible for the Creator’s purpose; it is relatively, not absolutely, perfect. (See Optimism).
sible, St. Thomas, in his solicitude that infidels might have no ground to cavil with the arguments which believers assign for the temporal origin of creation (passive creature) and that the world has not always existed is held by faith alone, and cannot be demonstrated' (Summa, I, Q. xvi, a. 2). St. Bonaventure and many others maintain that the inherent impossibility of eternal creation is demonstrable. Arguments too subtle for discussion here are adduced by both sides of the controversy.

VII. SPECULATIVE AND PRACTICAL POSITION OF THE DOCTRINE OF CREATION.—From what has been said it follows that belief in "God the Creator of heaven and earth" is the theoretical basis of all religious and theological truth, the real foundation underlying all other truths concerning God, and the objective principle whence all other truths proceed. The Incarnation completes in the supernatural order the creative purpose and plan by the Divine Personal Idea, the Word, assuming to Himself man's nature, wherein the natural order of creation is synthesized, and thus carrying back completely the whole creation to God. The Word and the sacramental system are obviously the extension of the Incarnation, and so, through the medium of the latter mystery, follow from creation. The proposition that the Infinite is the absolutely primary source of all other reality is also the first philosophical truth in our contingent order of being. "All created being, truth, goodness, beauty, perfection are eminently contained in the Creator's essence, conceptually in His creative intelligence, poten
tially in His creative omnipotence, and are determined to his measure of actual objectivity by the creative will. The real distinction of the finite from the Infinite opposes every form of exaggerated monism, while the entitative contingency and dependence of the creature on the Creator refutes an exaggerated dualism. A rational mediating dualistic monism is based on the truth of creation. Lastly, the end and purpose of creation sets before man the first ideal and norm of life; and thus the final reason of the distinction between right and wrong conduct is found in the conformity of the one and the dissimilarity of the other with the original exemplar in the Creator's mind. Acting up to his complete nature, man is at once self-consistent and accordant proximately with the create
d being, much less the ultimate and the eternal pattern in the eternal design of his Creator. (See COSMOLOGY, COSMOGENY, EVOLUTION, GOD, LIFE, MAN, SOUL, WORLD, MATERIALISM, PANTEISM.)

F. P. SIEGFRIED.

Creationism (Lat. creatio) 1. In the widest sense, the doctrine that the material of the universe was created by God out of no pre-existing subject. It is thus opposed to all forms of Pantheism. 2. Less widely, the doctrine that the various species of living beings were immediately and directly created or produced by God, and are not therefore the outcome of an evolutionary process. It is thus opposed to Transmutation. 3. In a restricted but more usual sense, the doctrine that the individual human soul is the immediate effect of God's creative act. It is thus opposed to Traducianism. The first two acceptations of the term are treated in the article CREATION; the third alone is here considered. The proposition that the human soul is immediately the product of the creative act, and not a corollary of the soul's spirituality. Certain psychical phenomena, viz. intellectual and volitional—especially when these regard immaterial objects—indicate that their radical principle subsists essentially and intrinsically independent of the purely corporeal organism. This transcendental subject, the soul, is the corresponding mode of origin; for that the soul must have had a beginning follows obviously from its finitude and contingency. That origin cannot be: (a) by way of emanation from God, as Pantheists declare, since the Divine substance, being absolutely simple, cannot be divided; or (b) by way of generation from the souls of parents—as the German theologian Froshammer (1821—1893) maintained—because human souls, being essentially and integrally simple and indivisible, can give forth no spiritual germs or reproductive elements; (c) by birth by generation (as the Traducianists suppose), since such a mode of production plainly conflicts both with the essential simplicity and the spirituality of the soul. The only other intelligible source of the soul's existence is God; and since the characteristic and exclusive act of the Divine Cause is creation (q. v.), the soul must owe its origin to that operation.

As regards the time when the individual soul is created, philosophical speculations vary. The ancient Platonic doctrine of the pre-natal existence of souls and their subsequent incorporation in bodies may be passed over as poetic fiction and not scientific theory. The same may be said of the ancient hypothesis of transmigration, which, however, still survives in Buddhism and is revived by recent Theosophy. Besides being entirely gratuitous, metempsycho
dysis rests on a false view which conceives of body and soul as only accidentally, not essentially, conjoined in the individual being. According to the traditional philosophy of the Church holds that the rational soul is created at the moment when it is infused into the new organism. St. Thomas, following Aristotle's embryology, taught that the human fetus passes through progressive stages of formation wherein, it is thus we are constituted by the imputative, sensitive, and rational principles, each succeeding form summing up virtually the potencies of its prede
cessor. Accordingly, the rational soul is created when the antecedent principles of life have rendered the fetus an appropriate organism for rational life, though some time is required after birth before the sensory organs are in a condition to activate the functions of intelligence. In this view the embryonic history of man is an epiphenomenon of the stages through which the upward march of life on our globe is now held by paleontologists to have passed. On the other hand, most neo-Scholastics hold that the rational soul is created and infused into the incipient human being at the moment of conception. It should be noted that the doctrine of Creationism is not an appeal to the supernatural or the "miraculous" to account for a natural effect. The creation of the soul by the First Cause, when second causes have possessed the pertinent conditions, is within the order of nature; it is a so-called "law of nature", not an interference therewith, as is the case in a miracle.

So much for the philosophical or purely rational aspect of Creationism; as regards the theological, it
should be noted that while none of the Fathers maintained Traducianism—the parental generation of the soul by the parents of human souls in nature, that is, by the created origin of the soul of Adam and Eve), and to incline to the opposite opinion, which seemed to facilitate the explanation of the transmission of original sin. Thus, writing to St. Jerome, St. Augustine says: "If that opinion of the creation of new souls is not opposed to this established article of faith [see original sin] let it be also mine; if it is, let it not be thine" (Ep. clxvi, n. 25). Theodorus Aburaca (Opusc. xxxv), Macarius (Hom. xxx), and St. Gregory of Nyssa (De Opif., Hom., c. xxix) favoured this view. Amongst the Scholastics there were no defenders of Traducianism. Hugh of St. Victor (De Sacr., VII, c. xii) and Alexander of Hales (Summa, I, Q. ix, mem. 2, a. 3) alone characterize Creationism as the more probable opinion; all the other Scholastics hold it as certain and differ only in regard to the censure which should be attached to the opposite error. Thus Peter Lombard simply says: "The Catholic Church teaches that souls are created at their infusion into the body" (Sent. II, d. xviii); while St. Thomas is more emphatic: "It is heretical to say that the intellectual soul is transmitted by process of generation" (I, Q. cxviii, a. 2). For the rest, the following citation from the Angelic Doctor sums up the diverse opinions: "Regarding this question various opinions were expressed in antiquity. Some held that the soul of the child is produced by the soul of the parent just as the body is generated by the parent-body. Others maintained that all souls are created apart, moreover that they are united with their respective bodies, either by their own volition or by the command and action of God. Others, again, declared that the soul in the moment of its creation is infused into the body. Though for a time these several views were upheld, and though it was doubtful which came nearest the truth (as appears from Augustine's commentary on Gen., x, and from his books on the origin of the soul), the Church subsequently condemned the first two and approved the third" (De Potentia, Q. iii, a. 9). Others (e.g. Gregory of Valencia) speak of Generationism as "certainly erroneous", or (e.g. Estius) as maxime temerarius. It should, however, be noted that while there are no such explicit definitions authoritatively put forth by the Church as would warrant our calling the doctrine of Creationism de fide, nevertheless, as a recent eminent theologian observes, "there can be no doubt as to which view is favoured by ecclesiastical authority" (Pesch, Prael. Dogm., V, 3, p. 66). Leo IX (1050), in the symbol presented to the Bishop Peter for subscription, lays down: "I believe and profess that the soul is not a part of creation (that is, is created out of nothing, and that, without baptism, it is in original sin" (Denzinger, Enchir., n. 296). That the soul sinned in its pre-existent state, and on that account was incarcerated in the body, is a fiction which has been repeatedly condemned by the Church. Divested of this fiction, the theory that the soul exists prior to infusion into the organism, while not explicitly repudiated, is obviously opposed to the doctrine of the Church, according to which souls are multiplied correspondingly with the multiplication of human organisms (De Inc. Lat. V, in Denzinger, op. cit., 621). But whether the rational soul is infused into the organism at conception, as the modern opinion holds, or some weeks subsequently, as the Scholastics suppose (St. Thomas, Q. i, a. 2, ad 2), is an open question with theologians (Kleutgen, Phil. d. Vorzeit, II, 557). (See also MAN; METEMPSYCHOSIS; SOUL; TRADUCIANISM.)

Credence (of Credence-Table).—A small table of wood, marble, or other suitable material placed within the sanctuary of a church and near the wall at the Epistle side, for the purpose of holding the cruets, acolytes' candles, and other utensils required for the celebration of the Holy Sacrifice. The credence, properly so called, is contemplated only in connection with a solemn Mass; on it the chalice, paten, corporal, and veil are placed from the beginning of the Mass until the Offertory. When a bishop celebrates a Mass, it should be of larger dimensions than usual, the ordinary size being about forty inches long, twenty broad, and thirty-six high. On various days of the Christian festival it should be covered with a linen cloth extending to the ground on all sides, or less solemn occasions the cloth should not extend so far, while on days of simple rites it should merely cover the superficies. For low Masses the rubrics contemplate a niche or bracket in the wall, or some small arrangement for holding the cruets, finger-bowl, and towel, but custom now favours the use of a credence-table. (Cerimoniae Episcoporum, i, xli sq.; Rubr. Gen. Miss. XX; van der Steappen, De Missa Celebratio, (Mech. 1903).)

PATRICK MORRISSEY.

Credi, Lorenzo di, Florentine painter, b. at Florence, 1459; d. there, 1537. Vasari gives his family name as Scarpelli, but his original name seems to have been Barducci. He was a pupil first of the
goldsmith Credi, from whom he took his name, and then of the sculptor Verrocchio, having as fellow-pupils Perugino and Leonardo da Vinci. To the latter painter Lorenzo attached himself in terms of friendship, and he copied the manner of Leonardo with great success. When Verrocchio went to Venice to cast the bronze equestrian statue of Colleoni, he left to Lorenzo the entire administration of all his affairs, and in his will charged him to complete the statue, which he had been unable to finish, adding the following remark: "Because he had renounced to finish it properly". Leonardo was, however, instructed by the Venetians to complete the figure. Di Credi was a devout follower of Savonarola and a man of deeply religious character. He was an eminent portrait-painter, and his religious pictures were in great demand for the churches and convents of Florence and the neighbourhood. One of the finest is at Pistoja, originally painted for the hospital of the Celestine. The portrait of Verrocchio is at Florence. Other examples are at Berlin, Dresden, London, Paris, Rome, and Turin. They are all remarkable for their magnificence of colour, exquisite composition, and the luminous quality and skill in the rendering of the human and natural features, with the appearance of metal work in many cases and revealing the original training as a goldsmith which the artist received. He died at the age of seventy-eight in his own house in Florence, near Santa Maria Nuova, and was buried in San Pietro Maggiore. While his body lay unburied at the hospital of Santa Maria Nuova a farm which he had purchased at Casciano. He was said to have been a very slow painter, but took immense pains in the execution of all he did, prepared and ground all his own colours, and finished his paintings with exquisite refinement and care.

CREDITOR

Cree (a contraction of CRISTINO or KENISTENO, their Ojibwa name, of uncertain meaning; they commonly call themselves simply ETHNYNYWUK, men), the largest and most important Indian tribe of Canada, and one of the largest of the north of Mexico. They are of the Great Algonquin family, related to their southern neighbours, the Ojibwa, although only remotely cognate to the Blackfeet, farther to the west. Until confined to reservations their various bands held most of the extensive territory about Lakes Winnipeg and Manitoba, the lower Red and Saskatchewan rivers, and the whole extent of the Maakegon about Hudson Bay, from whom they are hardly to be distinguished. Most of their former territory is now included in the Canadian provinces of Manitoba, Assiniboia, and Saskatchewan. Their chief alliance was with the Assiniboin; their war parties were of such magnitude as to make them feared by all tribes. They are said to number about fifteen thousand. They are not very far to the west of the Maakegon. With both French and English they have generally been on friendly terms. When first known to the Jesuit missionaries, about the year 1650, the Cree lived farther to the south-east, but, on obtaining fire-arms from the English trading-posts established on Hudson Bay some twenty years later, they pushed out into the open plains in pursuit of the buffalo. They drove the Blackfeet before them, and at the same time began a war of invasion and extermination against the weaker Tineh tribe, as far even as the Mackenzie River and the Rocky Mountains. A great small-pox epidemic in 1781 so far reduced their number that they removed to the Saskatchewan River, which has since remained the extreme limit of their claims in that direction.

In physique and intelligence the Cree do not differ markedly from the general Indian type, but are persons slightly below the general "plains" standard. Mackenzie, who knew them before they had been greatly modified by contact with the whites, describes them (1780) as naturally generous, good-tempered, and methodical. Their clothes were fashioned from stone, bone, and horn. They used the canoe of birch-bark and the tipi of buffalo skins. They had no agriculture or pottery art, but their women were expert skin-dressers and workers in porcupine quills. For their food they depended on hunting buffalo, beaver, and the gathering of wild roots and fruits. Wild plums and cherries were pounded, dried, and preserved in rawhide bags or boxes. Buffalo meat was cut into strips, and dried in the sun for immediate use, or was pounded, covered with melted grease, and kept in skin bags as pemmican for winter. Two principal feasts were held at the beginning and at the end of the year. These were the first of the gods, their principal myths centring about a supernatural hero called Wisukatek. They were also great believers in conjunctions and witchcraft, and had an influential order of priesthood in four degrees. Their great religious ceremony was the annual Sun Dance. Their two main divisions were distinguished as Wood and Plain Cree. Each of which was again subdivided into bands differentiated by slight peculiarities of dialect and custom. With these were sometimes included the Maakegon, under the name of Swammy Cree. On account of the wide extent of their former range the early estimates of Cree population vary greatly. They number now about 15,000, of whom nearly two-thirds are located upon reservations in Manitoba.

The earliest missionaries in the Cree country were the French Jesuits, who accompanied the commander Verendrye in his explorations of the Saskatchewan and Assiniboine rivers from the west. Among the priests among these were Fathers Nicholas Gonnor, Charles Mosaiger, and Jean Aulneau. No attempt was made at this time to found permanent mission settlements, and the work thus begun was allowed to lapse in consequence of the withdrawal of the French from Canada until after the establishment of the Red River colony by Lord Selkirk. In 1818 Fathers Joseph Norbert Provencher and Sévère Dumoulin established the first regular mission station at Saint Boniface, opposite the present city of Winnipeg. In 1822 Father Provencher was made bishop, with jurisdiction over all Rupert's Land and the North-West Territories. From this time onwards the Catholics proceeded to organize a systematic mission work throughout the whole vast region. Upon his death in 1853 he was succeeded by the noted Oblate Father Alexander Tache, who had come out eight years before. Among other distinguished workers in the same field, all Oblates, may be noted Father Albert Lacombe, author of a monumental grammar and dictionary of the Cree language, besides a number of religious and other translations; Father Valentin Végréville, founder of five missions, and author of a manuscript grammar and dictionary of the language; Father Jean Thibault; and Father Emile Petitot, better known for his work among the remote Tineh and Ekeim tribe. The Fathers were assisted by sisters of the Order of Gray Nuns. Protestant work was begun by the Episcopal Rev. John West, as chaplain for the Hudson's Bay Company in 1820, the
Wesleyan Methodists and Presbyterians coming later. The most distinguished Protestant worker was the Wesleyan Rev. James Evans (1840–1861), inventor of the creed, who was a member of the Church of England. The creed has been in successful use in the tribe for literary purposes by all denominations. Of the whole number of Cree officially reported as Christian the majority are Catholic and rank high in morality.

JAMES MOONEY.

Credo (Lat. credo, I believe), in general, a form of belief. The word, however, as applied to religious belief has received a variety of meanings, two of which are specially important. (1) It signifies the entire body of beliefs held by the adherents of a given religion; and in this sense it is equivalent to doctrine or to faith where the latter is used in its objective meaning. Such is its significance in expressions like "the conflict of creeds", "workable and individual creed", "the ethics of conformity to credo", etc. (2) In a somewhat narrower sense, a creed is a summary of the principal articles of faith professed by a church or a community of believers. Thus the "creeds of Christendom" are understood those formulations of the faith in which statements of faith have been drawn up and accepted by one or the other of the Christian churches. The Latins designate the creed in this sense by the name symbolum, which means either a sign (σημύβολον) or a collection (συμβολή). A creed, then, would be the distinctive mark of those who hold a given belief, or a formulary made up of the principal articles of that belief. A "profession of faith" is enjoined by the Church on special occasions, as at the consecration of a bishop; while the phrase "profession of faith" is commonly applied to Protestant formularies, such as the "Augsburg Confession", the "Confession of Bâle", etc. It should be noted, however, that the Rule of Faith is not identical with creed, but, in its formal signification, means the norm or standard by which one ascertains what doctrines are to be believed.

The principal creeds of the Catholic Church, the Augsburg Confession, and Nicene, are treated in special articles which enter into the historical details and the content of each. The liturgical use of the Creed is also explained in a separate article. For the present purpose it is chiefly important to indicate the function of the creed in the life of religion and especially in the work of the Catholic Church. That the teachings of Christianity were to be cast in some definite form is evidently implied in the commission given the Apostles (Math. xxviii., 19–20). Since they were to teach all nations to observe whatsoever Christ had commanded, and since this teaching was to carry the weight of authority, not merely of opinion, it was necessary to formulate at least the essential doctrines. Such formulation was the more needful because Christianity was destined for all men and for all ages. To preserve unity of belief, the first requisite was to have the belief itself quite clearly stated. The creed, therefore, is fundamentally an authoritative declaration of the truth that are to be believed.

The Church, moreover, was organized as a visible society (see CHURCH). Its members were called on not only to hold fast the teaching they had received, but also to express their beliefs. As St. Paul says: "With the heart we believe unto justice; but, with the mouth, confess is made unto salvation" (Romans, x. 10).

Nor is the formal content of the creed necessarily invariable. For instance, statements he insists that his followers shall hold the form of sound words which thou hast heard of me in faith" (II, Tim. i. 13), "embracing that faithful word which is according to doctrine, that he [the bishop] may be able to exhort in sound doctrine and to convince the gainsayers" (Titus i. 9). Hence we can understand that a profession of faith was required of every one who was to be baptized, as in the case of the eunuch (Acts viii. 37); in fact, the baptismal formula prescribed by Christ himself is an expression of faith in the Blessed Trinity. Apart from the question regarding the composition of the Apostles' Creed, it is clear that from the beginning, and even before the New Testament had been completed, the form of this formula, however concise, would have been employed both to secure uniformity in teaching and to place beyond doubt the belief of those who were admitted into the Church.

Along with the diffusion of Christianity there sprung up, in the course of time various heretical views regarding the doctrines of faith. It thus became necessary to define the truth of revelation more clearly. The creed, in consequence, underwent modification, not by the introduction of new doctrines, but by an expression of the traditional belief in terms that left no room for error or misunderstanding. In this way the "Filioque" was added to the Nicene Creed and the Trinitarian Profession set forth, in full and definite statements the Catholic Faith on those points especially which the Reformers of the sixteenth century had assailed. At other times the circumstances required that special formulas should be drawn up in order to have the teaching of the Church concerning such points declared in a manner such was the profession of faith prescribed for the Greeks by Gregory XIII and that which Urban VIII and Benedict XIV prescribed for the Orientals (cf. Denzinger, Enchiridion). The creed therefore, is to be regarded not as a lifeless formula, but rather as a manifestation of the Church's vitality. While the duty of preserving the faith once delivered to the saints, they are also an effectual means of warding off the incessant attacks of error.

On the other hand it should be remarked that the authoritative promulgation of a creed and its acceptance imply no infringement of the rights of reason. The mind tends naturally to express itself and especially to utter its thought in the form of language. Such expression, again, results in greater clearness and a firmer possession of the mental content. Whoever, then, really believes in the truths of Christianity cannot consistently object to such expressions of belief as the use of the creed implies. It is also obviously illogical to condemn this use on the ground that it makes religion simply an affair of repeating or subscribing empty formulas. The Church insists that the internal belief is the essential element, but this must find its outward expression. While the duty of believing rests on each individual, there are further obligations resulting from the social organization of the Church. Not only is each member obliged to refrain from what would weaken the faith of his fellow-believers; he is also bound, so far as he is able, to uphold and quicken their belief. The profession of his faith is part and parcel of his profession of allegiance to the Church. If the creed is at once an object-lesson in loyalty and a means of strengthening the bonds which unite the followers of Christ in "one Lord, one faith, one baptism."

Such motives are plainly of no avail where the selection of his beliefs is left to the individual. He may, of course, adopt a series of articles or propositions and call it his creed; but it remains his private possession, and any attempt on his part to demonstrate its correctness can only result in disagreement. But the attempt itself would be inconsistent, since he must concede to every one else the same right in the matter of framing a creed. The final consequence must be, therefore, that faith is reduced to the level of views, opinions, or theories such as are entertained on purely scientific matters. Hence it is not easy to explain, on the basis of consistency, the action of the Protestant Reformers. Had the principle of private judgment...
been fully and strictly carried out, the formulation of creeds would have been unnecessary and, logically, impossible. The subsequent course of events has shown how little was to be accomplished by confession of faith, once the essential element of authority was rejected. From the inevitable multiplication of creeds has grown in large measure that denominationalism which under the guise of a "creedless Gospel" which contrasts so strongly with the claim that the Bible is the sole rule and the only source of faith. (See DOGMA, FAITH, PROTESTANTISM.)

GEORGE J. LUCAS.

Creeed, Liturgical Use of.—The public use of creeds began in connexion with baptism, in the Traditio and Reddito symboli, as a preparation for that sacrament, and in the preliminary interrogations. This use is found as early as the "Canons" of Hippolytus, and is found in the "Doxologies" of the Eastern and Western Churches.

A more universal and official form of creed has been that adopted at Constantinople by the Patriarch Timotheus in 511. Both intended to protest, as Monophysites, against Chalcedonian "innovations", but in spite of this heretical origin the practice spread, though Rome did not finally adopt it until the eleventh century. The Nicene Creed is the only one in use in the Latin Church, the Eastern Orthodox, Monophysite, or Nestorian, or in the corresponding Uniat bodies, though the East Syrians, both Nestorian and Uniat, have a variant of their own (see EAST SYRIAN RITE) which may have been originally understood in a Nestorian sense, and the Copts and Abyssinians have also a shortened form for use at baptism. The Roman Rite, besides the Nicene Creed, which it recites only at Mass, uses also the Apostles' Creed and the so-called Athanasian. These three creeds have been retained in the Anglican Rite. The following is the use of creeds in various rites:

Apostles' Creed:—Apostles' Creed in full, followed by a shortened creed in interrogative form.—Ambrusian, Gallican, and Mozarabic: nearly the same.—Celtic: either the Apostles' Creed in full or a shortened form, both as interrogatives.—Anglican, complete Apostles' Creed in interrogative form.—Orthodox Eastern: Nicene Creed in full in the preliminary eulogia et τα προσόντα κατάχωσιν.—West Syrian (Jacobite, Syrian Uniat, and Maronite) and Armenian: Nicene Creed in full.—East Syrian: variant of Nicene Creed in a similar position to that which it holds in the Eucharist, on the model of which the baptismal service is constructed.—Coptic and Ethiopic: a short confession of faith in the Trinity, the Resurrection, and the Church.

Eucharist.——All rites use the Nicene Creed, though in different positions, as part of the declaration of fellowship (of which the Kiss of Peace is another part) with which the Missæ Eiusdem begins. This aspect is further enhanced in Eastern rites, where, in the removal of the Pax to another position. The positions are:—(1) Immediately after the Gospel: Roman, Celtic, Anglican, Armenian. (2) After the Offertory, but quite unconnected with the Pax: Ambrusian. There is good reason to think that the Ambrosian Pax originated now in that position, and is the beginning of the Offertory. (3) After dismissal of catechumens and Offertory, but before the Pax: Coptic, Greek St. James, West Syrian, East Syrian. (4) After dismissal, Offertory and Pax: Orthodox Eastern (Byzantine), Greek St. Mark. (5) After the Consecration, during the Fraction: Mozarabic. This last seems to follow the use ordered by the Emperor Justin at Constantinople, that the Creed should be said before the Pater Noster at Mass, but it is probably of much later introduction.

The Divine Office.—Roman: Apostles' Creed at the beginning of Matins and Prime, ferially with proce to the course of Prime and Compline, and at the end of Compline. Athanasian on Sundays at Prime. The earliest mention of this is in the "Capitulare" of Hayto, Bishop of Balse, c. 820. Many Roman derivatives (e. g. the Sarum) said the Athanasian daily at Prime. The monastic rites and the French breviaries of the seventeenth and eighteenth centuries mostly follow the Roman practice. Ambrusian: the Apostles' Creed in the course of Prime and Compline, the Athanasian daily at Prime. Mozarabic: The Nicene Creed at Prime on Sundays and festivals. This was ordered by the Council of Toledo of 589.—Celtic: The Apostles' Creed is given with the Pater Noster in the "Bangor Antiphoner", and at the end of the sketch of the "Celtic Psalter", but it is not certain how it was used. Anglican: The Apostles' Creed is said with proce at morning and evening prayer, daily, except that on thirteen fast-days (roughly, once a month, and on Trinity Sunday) the Athanasian takes its place at morning prayer. Brompton: Nicene Creed at the Midnight Office (Secompactio) after the Psalms, except on Sundays, and at the Little Compline (διακονια των μυστηριων) after the Great Doxology.—East Syrian: Nicene Creed at the end of the morning and evening services.—Coptic: At the "Offering of the Morning Incense", at Lauds, Compline, and the "Prayer of the Curtain". Other uses of creeds exist, e. g. in the creed sung on Eastertide, uses either the Apostles' or Athanasian Creed in the "Ordo Compendianum Animas".—The Celtic used either the full Apostles' Creed or a shortened confession of faith in the Trinity, eternal life, and the Resurrection (both forms are found) before theunction of the sick.—The Anglican uses the Apostles' Creed in an interrogative form (as at baptism) in the visitation of the sick.—The Mozarabic introduces a three-fold repetition of a Spanish variant of the Apostles' Creed into a "Sermon ad populum" before the Epistle at Mass on Palm Sunday, which is the ancient Traditio Symboli.—The Byzantine has a recitation of the Nicene Creed in answer to the question, καλ τι ποιετες; at the consecration of bishops. This is followed by two more elaborate confessions of faith, resembling the "Interrogato" at the same service in the Roman Pontifical.—In the Roman ordination of priests the Apostles' Creed is recited just before the Eucharistus Sanctum. At the beginning of the coronation of the Russian emperor he is required to recite the Nicene Creed in token of orthodoxy.

Creek, Nicene. See NICENE CREED.

Creeks, an important confederacy of Indian tribes and tribal remnants, chiefly of Muskogian stock, formerly holding the greater portion of Central and Southern Georgia and Alabama, but now settled in Eastern Oklahoma. The name by which they are known is commonly applied to the Indians, but to their home territory, i.e. the "Creek Country". The dominant tribe is the Maasoki (Mus-
COUGEOE, who constitute about one-half of the whole. Besides these there are Hichitee, Koasati, and Yuchi, each with a distinct language; there are also several smaller broken tribes. The Seminole, too, are originally a separated band of Creeks. According to traditional and linguistic evidence, the Muscogee and their cognate tribes had in ancient times lived west of the Mississippi River, but they were eventually settled in Georgia and Alabama as early as 1540 by De Soto, who crossed their territory from east to west. In the colonial period they held the balance of power between the English of Carolina on the one side and the Spaniards and French of Florida and Louisianans on the other. Their most constant alliance was with the English, who were supplied with guns, and it was chiefly by this means that the English accomplished the utter destruction of the flourishing Franciscan missions of upper Florida in 1702–8. In the final inroad, 1400 of the Christianized mission Indians were carried off and distributed as slaves among the English of Carolina and their savage allies. This unfortunate outcome of more than a century of devoted missionary effort was due to the short-sighted policy of the Spaniards, who refused guns to their own Indians, even in the face of threatened invasion. The Creeks adhered to the English side in the war of the Revolution, but made a treaty of peace with the United States in 1790. English instigation in the War of 1812 led to another war with the Creeks in 1813–14, in which they suffered such heavy losses that they were obliged to purchase peace by the surrender of half their remaining territory. Other land-cessions followed in quick succession until, in 1832, they sold their last acre east of the Mississippi and were removed to a new home in the Indian Territory, where they were permitted to organize an autonomous government under the name of the Creek Nation. In 1906, by previous treaties, this Indian government was formally dissolved, the Indians being admitted to citizen-rights and their country incorporated into the new State of Oklahoma. They number now about 10,000 souls, besides half as many more "freedmen," descendants of their former negro slaves.

In their old homes the Creeks were a sedentary and agricultural, but brave and warlike, people. Their houses were well constructed of logs, and their villages were regularly built around a central square devoted to public games and ceremonies, chief of which was the great annual Buekita, or Creek Corn Dance, when every fire in the settlement was extinguished, the flames being kindled from a new fire by means of friction. There was no recognized central authority, but neighbouring or closely cognate villages commonly acted together. They had the clan system, intermarriage within the clan being strictly prohibited. No systematic mission work was attempted among them until after their removal to the Territory, when a beginning was made by the Presbyterians. A few of their children are now attending the neighbouring Catholic mission schools.

Creighton University, an institution located at Omaha, Nebraska, U. S. A., and conducted by the Jesuit Fathers. It comprises high school and college departments, a free classical day college, and schools of medicine, dentistry, pharmacy, and law. The faculty numbered 104 members in 1907–8. There is no charge for tuition in the high school and college departments. The attendance at the university is about 800, divided among the different departments as follows: Liberal Arts, 390; Medicine, 178; Law, 61; Pharmacy, 108; Dentistry, 107. The Medical College free dispensary treats between 3000 and 4000 annually; the Dental College Infirmary, 400 or 500.

Creighton University was the first free Catholic college founded in the United States. Edward Creighton, after whom it was named, had proposed during his lifetime to establish a free school for higher education, but he died intestate, before making arrangements for carrying out his project. His wife, Mary Lucretia Creighton, inheriting his fortune, determined to carry out his intention. She died 31 Jan., 1876, but her will made a bequest, which in the settlement of the estate amounted to about $200,000, one-fourth of which was devoted to the endowment of the college, the balance being reserved for foundation. In accordance with the terms of this will, the executors, 1 July, 1878, conveyed the entire property and securities in trust to the Rt. Rev. James O'Connor, Bishop of Omaha. On 27 February, 1879, the Legislature of Nebraska passed an act to provide for the incorporation of universities under certain circumstances. The District Court then permitted Bishop O'Connor to turn over his trust to a corporation called the Creighton University, and he appointed five members of the Society of Jesus as the Board of Trustees, 14 August, 1879. The corporation was chartered, and the name merely represented what was left in trust by Mrs. Creighton. When the Creighton University accepted the trust, the endowment fund amounted to about $147,500. Mrs. Sarah Emily Creighton, who died 3 Sept., 1888, wife of John A. Creighton, bequeathed to Creighton University a business block, according to the same terms and conditions as were designated in the bequest of her sister, Mrs. Mary Lucretia Creighton. During 1900 John A. Creighton, desirous of making the university an institution fully equipped for its educational work, generously subscribed $25,000 for the construction of the Science Building. The School of Medicine was founded 30 May, 1892, and the School of Law in October, 1904. The Edward Creighton Institute, erected in 1905, is now the home of the Law Department. The Dental School, opened in 1905, is located with the Law School. The School of Pharmacy, a distinct department of the university since 1879, holds the unique possession of its splendidly equipped new addition to the Medical Building in September, 1908.

Edward Creighton was born 31 Aug., 1820, in Belmont County, Ohio, near the present town of Barnesville; and died 5 Nov., 1874. John A. Creighton was born 15 Oct., 1821, in Beloeil County, Quebec, Canada, and died 7 Feb., 1907. He was educated at St. Joseph's College, Somerset, Ohio, under the Dominican Fathers, and for these teachers he always retained a feeling of gratitude. Though desirous of becoming a civil engineer, he was obliged to shorten his course of study by the necessity of earning a livelihood. He married Sarah Emily Wareham of Dayton; and her sister, Mary Lucretia, became the wife of Edward Creighton. Both these men were remarkable for courage, enterprise, and a strong sense of justice. John was one of the first members of the Vigilance Committee, which effectually freed Montana of the desperadoes who made life and property insecure in that territory. Both also made their start in life by constructing roads and telegraph lines in the West and South; John was moreover actively engaged in mining, stock-raising, and investments in land. He left by will large bequests to Creighton University, the Creighton Memorial Hospital and other Catholic institutions in which he was interested during life. Though these sums were somewhat lessened by litigation and compromise with contestants, the university received nearly a million and a quarter dollars, the Hospital nearly a quarter of a million, and the other institutions smaller amounts. The entire revenue-produc-
Cremation.—I. History.—The custom of burning the bodies of the dead dates back to very early times. The Pre-Canaanites practised it until the introduction of inhumation among them along with the civilization of the Semitic people about 2500 B.C. History reveals no trace of incineration among the Jewish people, except in extraordinary circumstances, in violence. It was likewise unknown, in practice at least, to the Egyptians, Phoenicians, Carthaginians; or to the inhabitants of Asia Minor—the Carians, Lydians, and Phrygians of the Babylonians, according to Herodotus, embalmed their dead, and the Persians punished capitaly such attempt at cremation, special regulations being followed in the purification of fire so desecrated. The Greeks and Romans varied in their practice according to their views of the after life: those who believed in a future existence analogous to the present buried their dead, even leaving food in the tomb for the nourishment and enjoyment of the departed; such as, on the other hand, held the opinion that on the decay of the body life was continued in the shade or image, practised cremation, the more expeditiously to preserve the body for the land of shadows. But the practice of cremation never entirely superseded what Cicero tells us (De Leg., II, xxii) was the older rite among the Greeks and Phoenicians.

The Christians never burned their dead, but followed from earliest days the practice of the Semitic race and the personal example of their Divine Founder. It is recorded that in times of persecution many risked their lives to recover the bodies of martyrs for the holy rites of Christian burial. The pagans, to destroy faith in the resurrection of the body, often cast the corpses of martyred Christians into the flames, fondly believing thus to render impossible the resurrection of the body. What Christian faith has ever held in this regard is clearly put by the third-century writer Min- cius Felix, in his dialogue "Octavius," reflushing the assertion that cremation made the resurrection an impossibility: "Nor do we fear, as you suppose, any harm from the mode of sepulture, but we adhere to the old, and better, custom" ("Nee, ut creditis, ulum damnum sepultura timorum sed veterem et

---

Cremation.—II. Modern Times.—Since the latter half of the eighteenth century, this custom has been in use in England, and the last half of the nineteenth century saw it spread widely in the United States of America. ""The custom was perhaps first noticed in the Moslem countries, and has since been adopted by the Chinese. It is most popular in the Orient, and is in use in India, Japan, and China. It is also common in the Scandinavian countries, where it is known as "cremation." The practice has also been adopted in certain parts of South America, where it is called "cremation."

II. CREMATION LEGISLATION.—(1) In the Middle Ages. —In the Middle Ages, the legislation of the Church placing the body in the earth or tomb was a part of Christian burial. In the acts of the Council of Braga (Har- doun, III, 352), in the year 563, while we read that bodies of the dead are by no means to be buried within the basilicas where rest the remains of Apostles and martyrs, we also read that they may be buried outside the wall; and that if cities have long forbidden the interment of the dead within their walls, with much greater right should the reverence due the holy martyrs claim this privilege. The same may be seen in the canons of other councils—e.g. of Nantes, between the fourth and sixth centuries; of Mainz, in the ninth century; of Tribur, in the ninth century. This legislation evidently supposes the long-standing custom of burial such as the Church practises to-day, and shows that in the sixth century, in other places than Rome, where even to-day the old law of the Twelve Tables exerts a moral influence, the Church held so far conquered the prejudice of the past as to have gained the privilege of burying her dead within the city walls and within the enclosure of the churchyard.

Once in the course of the Middle Ages did there seem to be on the part of some a retrogression to the pagan ideals, and as a consequence Boniface VIII, in his bull, "Extravagantia" promulgated a law which was in substance as follows: They were ipso facto excommunicated who disemboweled bodies of the dead or inhumanly boiled them to separate the flesh from the bones, with a view to transportation for burial in their native land. "De sancta fide et sancta ritu aedita," he calls it, and it was practised in case of those of noble rank who had died outside of their own territory and had expressed a wish to be buried at their place of birth. He speaks of it as an abomination in the sight of God and horrifying to the minds of the faithful, decreeing that, thereafter, such bodies are either to be conveyed whole to the spot chosen or buried at the place of death until, in the course of nature, the bones can be removed for burial elsewhere. Those who were party to these enormities either as the cause or agent of their occurrence were to incur excommunication reserved to the Holy See. Hence the body treated could not afterward be given ecclesiastical burial ("Extrav. Comm.", Lib. III, Tit. vi, c. i.).

(2) Decrees of Roman Congregations.—This rigid adherence to the principles of the early teaching of the Church may be seen in the later decrees of the Roman Congregations. The Vicar Apostolic of Vasagapatam, in the year 1884, proposed the following difficulty to the Sacred Congregation of Propaganda: The bodies of two neophytes had been cremated, the parents testifying that there had been no idolatrous ceremonies.

Should the missionaries in such cases protest against what is considered a privilege of caste, or may the following statement be the basis of a decree?—"If a person seeks baptism at the hour of death, the missioner grants it, without questioning what mode of sepulture is to be given the body after death, persuaded that the pagan parents will make no account of his desire to be buried, not cremated. The answer was: You must not approve of cremation, but remain passive in the matter and confer baptism; be careful also to instruct your people according to the principles which you set forth." (Cremationem approbare non debeas, sed passive te habeas, collato semper baptismate, et populos instruendos eures justa ea quae te exponuntur). This was given on 27 September, 1885. "It 1886 another decree forbade membership in cremation societies and declared the unlawfulness of demanding cremation for one's own body or that of another. On 15 December in the same year a third decree was issued of more or less the same tenor, and finally on 27 July, 1892, the Archbishop of Freiburg, among other questions, asked whether it was lawful to cooperate in the cremation of bodies of medical counsel, or to take part as doctor, official, or labourer working in the crematory. It was answered that formal co-operation, the assent of the will to the deed, is never allowed, either by command or counsel. Material co-operation, the mere aiding in the physical act, may be tolerated on condition (1) that cremation be not considered Cicero's definition of a restriction of sect; (2) that there be nothing in it which of itself, directly and solely, expresses reprobation of Catholic doctrine and approbation of a sect; (3) if it be not clear that the officials and others have been assigned or invited to take part in contempt of the Catholic Religion. And when the co-operators are to be left in good faith, they must always be warned not to intend co-operation in the cremation. (See "Collectanea S. C. F. P.", n. 1608, 1609; "Acta S. Sedis", XXV, 63; "Am. Eccl. Rev.", XIII, 469.)

(3) Motives of this Legislation.—The legislation of the Church in forbidding cremation rests on strong motives; for cremation in the majority of cases to-day is knit up with circumstances that make of it a public profession of irreverence and materialism. It was the Freemasons who first obtained official recognition of this practice from various governments. The camels of the Saxon emperor, Frederick I, were cremated by Brunetti, at Padua, in 1873. Numerous societies were founded after this, at Dresden, Zurich, London, Paris. In the last city a crematory was established at Père Lachaise, on the passing of the law of 1889 dealing with freedom of funeral rites. The Church has opposed from the beginning a practice which has been used chiefly by the enemies of the Christian Faith. Reasons based on the spirit of Christian charity and the plain interests of humanity have been strengthened by her opposition. She holds it unseemly that the human body, once the living temple of God, the instrument of heavenly virtue, sanctified so often by the sacraments, should finally be subjected to a treatment that filial piety, conjugal and fraternal love, or even mere friendship seems to revolt against as inhuman. Another argument against cremation, and drawn from medico-legal sources, lies in this: that cremation destroys all signs of vice or pain, and makes investigation impossible, whereas a judicial autopsy is always possible after inhuman, even of some months.

Is cremation a sign of culture?—The report of the French Cremation Society for 1905 has the following:

In France there are 3 crematories, in the United States 29, in Great Britain 12, in Italy 30, in Germany 9, in Switzerland 4, in Sweden 2, in Denmark, Canada, the Argentine Republic, Australia, one each. "Let us number here the appliances of Tokio, let us not speak of pyres raised in the Indies, in China, in Siam, in Cambodia, at all points of the Asiatic Continent, from time immortal Asia has burned her dead." At first sight 125,000 seems a large number; but a glance at the Paris statistics will help us to realize its true value. From 1889 to 1903 there were 73,590 cremations in Paris. Only 32,848 were by request; 37,082 were hospital debris; 32,757 were embryos. Of the requested cremations there were 216 in 1894, 354 in 1904—an increase in ten years of 138—not a large number, and it serves to prove that even Paris is progressing in the use of cremation very slowly indeed. Two arguments in favor of cremation may be reduced to a few heads: (1) it will prevent the corruption of the soil; (2) drinking water will be safeguarded against contamination; (3) corruption of the air will be avoided in localities bordering on cemeteries, with a consequent lessening of the danger of infection in
times of epidemic. In answer it has been urged that cemeteries are not a cause of the infection of the air. In any well-ordered cemetery putrefaction takes place six or seven feet below the surface. In the open air, with an abundance of oxygen, corruption proceeds more quickly, with continuous discharge of noxious gases in large quantities highly deleterious to health, but it is not so in the grave. Mantegazza, a celebrated bacteriologist, has shown ("Civiltà Catolica", Ser. IX, Vol. X-XII) that, where there is but a small supply of oxygen, putrefaction would proceed with the emanation of any odour whatever. Often, too, the human body is so reduced before death that in the earth it suffers little or no corruption at all, but is first mummified and then slowly reduced to dust. Again, earth-pressure prevents chemical decomposition to a great extent, producing in the place of gas a liquid which enters into various combinations with the materials in the soil, without the slightest danger to the living. Earth is a powerful agent of disinfection. Even were noxious gases to escape in any quantity, they would be absorbed on their way upwards, so that a very small part would ever reach the surface, or were the soil not fit for absorption (as was said to be the case at Père-Lachaise, Paris) the process would be taken up by the vegetable matter on the surface. It is held, also, that it is no more true to say that cemeteries are a menace to water wells. Charnock, Delacroix, and Dalton have proved that in the parts of rain water only one part Penetrates the soil, the other two either evaporating or flowing into rivers. Now corpses in cemeteries are not so placed as to form continuous strata, but a moderate distance intervenes between any two bodies or rows of bodies. Of the third part of rain, then, which penetrates the soil a graveyard a very little will touch the bodies at all, and what does will not all reach the water streams, but will be absorbed by the earth, so that the remaining drops that would ultimately trickle into the stream would have absolutely no effect, were the stream large or small. Two experiments have proved this. The doctors above mentioned selected a tank 64 feet high, filled it with sand, and for many months filtered through it sewer water taken from the drainage pipes of Paris. The water received at the bottom of the vessel was always found pure, clear and drinkable. A like experiment was made with a smaller vessel with like results. To anticipate the difficulty, that experiment held for small quantities would prove untrue were the amount of water very great, a large tract of ground near Genvillars was inundated for many months with the same putrid and reeking waters of the Seine after they had passed through the sewers of Paris. The result was the same. Wells were dug in the inundated portion, and the water was again found pure and clear, purer, as it chanced, than that of other wells outside the boundary of the place of experiments. In like manner, the waters in the cemeteries of Leipzig, Hanover, Dresden, and Berlin were examined and found purer and freer from impure matter than the water of the town.

In conclusion, it must be remembered that there is nothing directly opposed to any dogma of the Church in the practice of cremation, and that, if ever the leaders of this sinister movement so far control the governments of the world as to make this custom universal, it would not be a lapse in the faith confided to him who collaborated to its revival. WILLIAM DEVLIN.

CREMONA, DIOCESE OF (CREMENENSIS), suffragan of Milan. Cremona is a city (31,861 in 1901) in the Province of Lombardy, Italy, on the left bank of the Po. It was built by the Cenomanni Gauls, but later became a Roman colony and a frontier fortress; it succumbed, however, to Hannibal. After the victory of Octavian over Antony, the territory was divided among the veterans of the conqueror. Caligula Vitellius defended it unsuccessfully against Vespasian, by whom it was pillaged, but it rose again from its ruins. About A.D. 600 Cremona, until then Byzantine, was captured by the Lombard king, Agilulf. Under the Emperors Otto I (I-III) its bishops acquired temporal sovereignty, but in 990 the people expelled Bishop Oldericus and adopted a republican form of government. The Emperor Henry IV (1056-1106), however, confirmed Bishop Landulf in all imperial grants made to his predecessors. On the other hand Henry V (1106-25) restored to the people their communal rights. Thenceforth Cremona became a citadel of Ghibellinism and was greatly favoured by Frederic Barbarossa and Frederick II, though for the same reason frequently at war with the neighbouring cities. In later medieval times it had many lords or "tyrants", the Pallavicini, the Bovara, the Cavalcabò, the Visconti, the Sforza, until it became part of the Duchy of Milan (1328). In 1702 it was taken by imperial troops, and in 1796 and 1800 fell into the hands of the French.

The people of Cremona venerate St. Sabinus as their first missionary and first bishop; he is said to have lived in the first century of our era. Among the better-known early bishops are St. Syrus (c. 340), a valiant apologist of the Faith against the Arians, and St. Silvinus (733); the latter is held in great veneration. Liudprand of Cremona was sent (946) as ambassador to Constantinople by the Emperor Otto II, and is the most famous historical writer of the tenth century. Other important bishops were Gualtiero (1096), in whose time the cathedral was begun; Sicardo (1185), author of a chronicle; Cacciaconte da Somma (1261), under whom was erected the belfry of the cathedral; Nicolò Sfondrati (1560), later Pope Gregory XIV; his nephew Paolo (1607); also the zealous and charitable Omodeo di Offredi (1791). The cathedral of Cremona is a splendid specimen of
CREMONA

Romanesque architecture, dates from the beginning of the twelfth century, and is noted for its façade in alternating coats of red and white marble. It contains many famous paintings and sculptures. Its two marble pulpits were brought thither from the suppressed church of the Olivetans. Near the cathedral is the baptistery (1167), surrounded by ranges of narrow Lombard arches, and bearing aloft an octagonal cupola. The famous brick campanile, known as the Torrazzo, built in 1283 as a peace monument, is 396 feet high and is said to be the tallest in Italy. An ancient saying runs: *Unus Petrus in Româ, una turris in Cremona* (One Peter in Rome, one Tower in Cremona). Other noteworthy churches are those of Sant’ Agata and Sant’ Agostino, the latter externally quite similar to the Sforza Castle at Milan, and San Michele are believed to date from the time of the Lombard Queen Theodolinda (c. 590). There are many industries at Cremona, especially silk manufactures; in the history of music it is known as the birthplace of four famous makers of violins: Amati, Guarneri, Stradivari, and Malmigh.

The population of the diocese is 350,000; it has 345 parishes, 530 churches and chapels, 536 secular and 38 regular clergy, 9 houses of religious men, and 77 of women. It has also 15 educational institutions.

CREMONA, GUIDO DA. See FREDERICK I.

CRÉPEUL, FRANÇOIS DE, Jesuit missionary in Canada and vicar Apostolic for the Montagnais Indians: b. at Arras, France, 16 March, 1638; d. at Quebec in 1702. As a youth he studied in the Jesuit college of his native town and in that of Douai, becoming a member of the order at Tournay in 1559. He continued his studies at Lille and Douai, taught at Lille and Cambrai, and in 1670 sailed for Canada. Upon the completion of his theological studies in the college of Quebec, he was assigned in October, 1671, to the Tadousag region, where, with untiring devotion and great success he toiled among the Montagnais and Algonquin tribes for twenty-eight years. Writing to his brethren he tells them: "I have been a member of a Montagnais mission for ten years and a half, with the labors and toils of a missionary, and in the midst of a long and toilsome and long and toilsome and protracted missionary life, it is a great favor to have renewed the old and the new."

For the benefit of his fellow missionaries Crépeul wrote a series of instructions embodying the results of his long service among the Indians, which are interesting and instructive. These observations are given in the sixty-third volume of Thwaites' "Relations". In 1696 or 1697 he was appointed vicar Apostolic for the Montagnais and, on the discontinuance of the mission a few years later, repaired to Quebec, where he spent the rest of his life. Daubion, Superior of all the missions in Canada, styles him a "veritable apostle".

EDWARD P. SPILLANE.

CRESCENTIUS, the name of several leaders of the Roman aristocracy in the tenth century, during their opposition to the imperial government of the time.

**CRESCENTIUS THE ELDER.**—With the disappearance of the Carlovingian dynasty the papal government of Rome lost its most powerful protector, and the Romans in their matters involving the secular aristocracy there arose a powerful family, which assumed the practical charge of all governmental affairs in Rome, controlled the nominations to the papal throne, and held the power for many years. At the beginning of the tenth century the family was represented by Theophylactus, securitarius or high dignitary of the papal palace, who was the constant subject of the emperors in Rome affairs for the first time in 974. At the death of Pope John XIII (965-72), who was a brother of Crescentius, the Emperor Otto I (936-73) designated as his successor the Cardinal-Deacon Benedict, who took the name Benedict VI (972-74). The Romans bore the constant interference of the emperor in the papal elections with ill-concealed indignation. About a year after the death of Otto I, when his successor Otto II (973-83) was engaged in wars at home, they rebelled against the imperial regime under the leadership of Crescentius. The unfortunate Pope Benedict VI was deposed, thrown into the Castle of Sant’Angelo, and strangled there in 975. The descent of Frank, a Roman, son of Ferrucius, was chosen to succeed, and he took the name of Boniface VII (974). The protests of the imperial envoy Sicco were of no avail against this manifestation of national aspirations on the part of the Romans. Soon, however, the imperial party
Crescentius the Younger.—The aspirations of the Roman aristocracy did not vanish with the death of the elder Crescentius. The latter left a son, also called Crescentius, who after the death of Boniface VII was recognized as the successor of the imperial power in the city without opposition; circumstances seemed to be particularly favourable. The Emperor Otto III (983–1002) was still a child, and the empress mother, Theophano, although an energetic princess, was absent from Rome. Crescentius the Younger took the title of Patriarius Romanorum, by which he meant to express that he was ruler in Rome, though not altogether independent of the imperial authority; he considered himself as a lieutenant of the emperor. It is quite likely that the election of Pope John XV (985–98), who succeeded Boniface VII, was accomplished with the participation of Crescentius, although the regulars of that time are unknown. In some of the official documents of the time, issued by the pope, the name of Crescentius and his title of Patriarius appear together with the name of John XV; and for a number of years Crescentius exercised his authority apparently without opposition. When the Empress Theophano came to Rome in 989, she conducted herself as empress and sovereign, while leaving Crescentius his subordinate position. Meanwhile the young Emperor Otto III assumed the reins of government, and in 996 made his first journey to Italy, induced by various considerations, especially by the opposition of Pope Peter V. However, death overtook the pope at the beginning of April, 996, and Otto reached Rome; it was at Pavia that the emperor was apprised of the fact. As the Romans and their leader, Crescentius, did not care at this time to nominate a successor to the deceased pope, they sent a delegation to the emperor with the request that he provide a suitable candidate for the Roman See. Otto III was at Ravenna when the delegates from Rome arrived. After a consultation with his counsellors he chose his own cousin, Bruno, a young ecclesiastical, only twenty-three years of age, who seemed to have the necessary qualifications. Early in May he was consecrated by Pope Peter V (996–99), being the first pope of German nationality. A few weeks afterwards Otto III himself was crowned in Rome by the new pope (21 May) in the basilica of St. Peter. On the 25th of the same month the pope and the emperor held in St. Peter's a synod, which was at the same time a high court of justice. The rebellious Romans, including those who had excommunicated the pontificate of Pope John XV, were summoned to give an account of their doings. The result was that a certain number, among them Crescentius, were sentenced to banishment. Pope Gregory V, who wished to inaugurate his pontificate with acts of mercy, pleaded for the guilty, and the emperor withdrew his sentence of exile. Crescentius was deprived of his title of Patriarius, but was permitted to live in retirement at Rome.

The clemency shown to Crescentius by the pope was repaid with deeds of violence. Only a few months after the departure of the emperor for Germany a revolt broke out in Rome under the leadership of Crescentius. The foreign poele and the armed foreign citizens were installed throughout the Papal States on offensive in the sight of the Romans. The rebellion succeeded so well that in September, 996, the pope was forced to flee with only a few attendants. At Pavia he held a synod in February, 997, in which he pronounced sentence of excommunication against Crescentius, the unwise and impetuous champion of Rome. Crescentius, far from being moved by these proceedings against him, completed his work of rebellion by appointing an antipope, Philagathus, Bishop of Piacenza, who had just returned from an embassy to Constantinople on behalf of Emperor Otto III. Born in Calabria, Philagathus was a Greek, and owed his elevation to the episcopacy to the Empress Theophano and her son, but was willing to betray his master. In April, 997, he assumed the title of Pope John XVI (997–98). In February, 998, Otto III returned to Rome with Pope Gregory V and took possession of the city without opposition. The antipope sought safety in flight, while Crescentius shut himself up in the Castle of Sant' Angelo. The unfortunate John XVI was soon captured by the emissaries of the emperor; his nose and ears were cut off, his eyes and tongue were torn out, and in this pitiable condition he was made to ride backwards on an ass. At the intercession of St. Nilus, one of his countrymen, his life was spared, and he lived until 1013. Towards the end of April the Castle of Sant' Angelo was taken; Crescentius was made prisoner and executed and his corpse hung on a gibbet erected on Monte Mario. Afterward the Empress Theophano visited the church of S. Pancrazio on the Janiculum.

John Crescentius, son of Crescentius the Younger.—Early in 1001 a revolt broke out in Rome against Otto III, who now permanently resided in the Eternal City. The emperor and Pope Silvester II (999–1003), the first pope of French nationality, were compelled to flee; it is quite likely that John Crescentius was the prime mover of the rebellion. At any rate, after this he assumed supreme authority in Rome, and after the death of the Emperor Otto III (24 January, 1002) took the title of Patriarius Romanorum. Pope Silvester II had permitted him to do so, as he had little to do with the temporal government. The pontificate of his three immediate successors: John XVII (1003), John XVIII (1003–09), and Sergius IV (1009–12), all of whom were appointed through the influence of John Crescentius. The patriarius himself died in the spring of the year 1012, and with him the Crescentii disappeared from the history of Rome.

Francis J. Schaeffer

Crescentius of Jesi. See Franciscans.

Crescimbeni, Giovanni Mario, Italian historian of literature, chronicler, and poet, b. in Macerata, 9 Oct., 1663; d. 8 March, 1728. He was educated at Rome for the law, but gave most of his time to poetry and literature. In 1679 he was made doctor of laws, and appointed by Clemens XI to the chair of Latin in the University of Santa Maria in Cosmedin. A few years later (1719) the same pontiff appointed him archpriest, and in the same year he was ordained to the priesthood. Crescimbeni composed tragedies and rime of various kinds, and translated into Italian verse two books of Lucan's "Pharsalia". His prose is superior to his verse, and it is especially as a literary critic that he is
known. His special studies in Italian literature helped to pave the way for the general histories of that subject. His greatest work, "Dell’ Istoria della volgar poesia" (Venice, 1698), was one of the best productions of its kind and is still of considerable value. In it he treats of the origin and development of Italian poetry, appreciates the works of the one hundred chief Italian poets, arranges the poets in chronological order, and discusses the arts and kinds of poetry. This huge work was followed in 1701 by the "Conservatore dell’ istoria della volgar poesia," in 5 volumes, which was at first undertaken to supersede the "Istoria"; but since this had met with such favour, the new work became a supplement to it.

Crescimbeni will also be remembered as one of the founders of the Academy of "Arcadia, conversazion di belle lettere", over which he presided from its foundation in 1690 to the time of his death. "Arcadia" was a kind of pastoral republic, whose members included the leading scholars and poets of Italy who strove to root out the perverted taste of the seventeenth century for art and literature, and to introduce a simpler and more natural style into Italian prose and poetry. The society grew out of a somewhat similar society which had been patronized by Queen Christine of Sweden (d. 1689), who had taken up her residence in Rome. "Arcadia" grew in size and number; "Colonies" were established in the principal Italian cities; and its influence extended even beyond the borders of Italy. The members assumed shepherds' names, and took as their device a Pan's pipes surrounded by laurels. (See ACADEMIES, ITALIAN.)

The life of Crescimbeni, with a list of his works edited and inedited, written by a contemporary, Francesco Mancurti, is in the final edition of the "Istoria" (Venice, 1730-1731), VI, 213 sq. This biographical article also gives much information on the history of the "Arcadia". The rime were edited in Rome in 1805, and more completely in 1723.

JOSEPH DUNN.

Cresconius (or Cresconius), a Latin canonist of uncertain date and place, flourished probably in the latter half of the seventh century, and he is mentioned in the annals of St. Patrick at the end of the sixth or even in the eighth century. He was probably a bishop of the African Church. We owe to Crescens a collection of canons, known as "Concordia canonum", inclusive of the Apostolic Canons (see CANONS, APOSTOLIC), nearly all the canons of the fourth and fifth century councils, and many of those decrees from the end of the fourth to the end of the fifth century. The content is taken from the collection of Dionysius Exiguus, but the division into titles (301) is copied from the "Brevisatio canonum" of Fulgentius Ferrandus, a sixth-century descan of Carthage. In many manuscripts the text of Crescens is preceded by an index or table of contents (brevarium) of the titles, first edited in 1558 by Pithon. In its entirety the work was first published by Voellus and Justellus in the appendix (33-112) to their "Bibliotheca Juris canonici" (Paris, 1661), and is in P. L., LXXXVIII, 829 sq. One of its best manuscripts, the tenth-century "Vallesianus" (Rome), has a note in which Crescens is declared the author of a metrical account of the "bella et victorias" of the "Patricius" Johannes in Africa over the Saracens. This was formerly interpreted to mean the African victory of the Byzantine "Patricius Johannes" in 697, hence the usual date of Crescens. Some, however, hold the position that the text in question is the "Johannis" of Flavius Cresconius Corippus, a Latin poet of about 550, and on this basis identify him with our canonist, thus placing the latter in the sixth century. Others (with Massen, p. 810) while admitting that the poem in question can be none other than the "Johannis" of the aforesaid Latin poet (unknown to Fabricius, and first edited by Marschelli, Milan, 1820), maintain that it has been wrongly attributed to our Crescens, and that it cannot therefore aid in fixing his date. The "Concordia canonum" was much used by the Romanists in the assisntial legislation by the churches of Africa and Gaul as late as the sixteenth century. Few of its manuscripts postdate that period.

The best account of Crescens and his work is in MAASES, Geschichte der Quellen und Lit. des Rel. Rechts in Arabien, ete. (Graz, 1870), 809-13, 846-47, corrective of FABRICIUS, Biblioth. 400-01; see also VINARDUS in Dict. of Christ. Biog., 1, 712-13.

JOHN WEBSTER MELODY.

CRESSEY, HUGH PAULINUS SERENUS, Doctor of Theology and English Benedictine monk, b. at Thorpesalvin, Yorkshire, about 1605; d. at East Grinstead, Sussex, 10 August, 1674. He was the son of Hugh Cressey by Margery, daughter of Thomas d'Oylye, a London physician belonging to the old Oxford family of that name. Educated first at Wakefield Grammar School, when fourteen years old he went to Oxford (1619) where he took the degree of B.A. in 1623 and that of M.A. in 1627. He was elected a Fellow of Merton College and took orders in the Established Church. Leaving Oxford he became chaplain, first to Thomas, Lord Wentworth, and afterwards to Lucius Cary, Lord Falkland, whose heir he became in 1638. During his sojourn in Ireland he was appointed Dean of Leighlin, but returned to England the following year (1639). A canony in the collegiate church of Windsor, which he received in 1642, he was never able to enjoy, owing to the disturbed state of the country; the following year (1643) his patron, Lord Falkland, was killed at Newbury. Cressey then attached himself to Charles Berkeley, afterwards Lord Falmouth, and travelled with him through several Catholic countries of Europe; this experience resulted in his conversion to the Catholic Faith at Rome in 1646. From Rome he went to Paris where he received further instruction from Henry Holden, a doctor of the Sorbonne. He then wrote his "Exomologia" (Paris, 1647), a work in which he published to the world the motives which led him to change his religion.

After becoming a Catholic Cressey's first inclination was to be a Carthusian monk; this intention was set aside, and he joined the English Congregation of the Order of St. Benedict at St. Gregory's, Douai, but so poor was he at the time that Queen Henrietta Maria provided him with money for his journey; he was professed at St. Gregory's, 22 August, 1649. From 1651 to 1652 he acted as chaplain to the Benedictine monks in Paris, returned to Douai (1653-60), and was then sent to the mission in England, residing at Somerset House as one of the chaplains to Charles the Second's queen. In the English Benedictine Congregation he held the office of definitor of the province in 1656 and was appointed the titular cathedral prior of Rochester in 1659. His last years were spent with the Caryll family at East Grinstead, Sussex, where he died in his sixty-eighth year. The moderate party in the Church of England respected him as a prudent and learned man, and when Dr. Stillingfleet charged him with credulity and want of historical judgment, his defence was taken up by Anthony Wood who commended him for "his grave and good style, proper for an ecclesiastical historian" and spoke of him as one who "doth mostly quote his author and leaves what he says to the judgment of his readers". Cressey's "Church History Made Easy" and "History of the Monks of Ireland" are all that have been written on the Norman Conquest" (Rouch, 1668) brings the narrative down to about the middle of the fourteenth century. A second part, "From the Conquest Downwards", was discovered at Douai in 1856, but is yet in MSS. (Gillow). His other works are: Appendix to "Exomologia" (Paris, 1647);
"Arbor virtutum," a MS. preserved at Ugbrooke, Devonshire; "The Scale (or Ladder) of Perfection" by Walter Hilton, ed. Cressey (London, 1569); "Sancta Sophia, Venice," by Fr. Aug. Baker (London, 1643) (Donau, 1657); "Certain Patterns of Devout Exercise" (Donau, 1657); "Roman Catholic Doctrines no Novelties" (1633); "A Non Est Inventus" (London, 1662); "A Letter to an English Gentleman concerning Bishop Morley" (London, 1662); "Sixteen Revelations, or Luminous Images, from Lourdes," by Cressey (Donau, 1657); "Fanaticism Fanatically Imputed to the Catholic Church by Dr. Stillingfleet" (1672); "First Question: Why Are You a Catholic?" etc. (London, 1672); "An Answer to Dr. Stillingfleet's Book intituled Idolatry practised in the Church of Rome" (1674); "Embrace at Jago's; First of a Penitential for Honour" (1674); "An Abrigment of the Book called 'The Cloud of Unknowing' by Maurice Chaunecy" (MS.).

G. E. HIND.

 Creswell, Joseph (see ARTHUR), controversialist, b. 1537 of Yorkshire stock in London; d. about 1623. He married in 1560, and after her death, was ordained priest and martyred (22 August, 1582) at York. Creswell joined the Society of Jesus in Rome 11 Oct., 1583, having previously studied at Reims and at the Roman College. Having been rector (1589-1592) after Father Pearson of the English College, Rome, he also succeeded Persons as vice-prefect for English Jesuit interests in Spain. Creswell's character and conduct in connexion with his difficulties over the seminaries of Seville and Valladolid, and his controversy about Benedictine vocations have been severely criticized (cf. Camm, Life of Ven. John Roberts, and pollen, The Month, London, Sept.--Oct., 1899). Father Creswell had considerable intercourse with Sir Charles Cornwallis, the English resident at Madrid, till the Powder Plot, when Creswell was summoned to Rome. Sent to Belgium in 1614, he was at St-Omer in 1620; and a chance receipt of Augus showed the chief works are: "A Latin treatise, 'De Vita Beata'; "Exemplar Literaturarum ecclesiasticarum," (Sive Burleigh), 1592, under the pseudonym "John Permoi", against Elizabeth's proclamation of 29 Nov., 1591; "Vida y Martyrio del P. Henrique Valpoco," (Madrid, 1590); transcripts James First of S. Cina proclamation (4 to, St-Omer, 1611); "Meditations upon the Rosary" (St-Omer, 1620); translation into Spanish, under the name "Peter Marrique", of Father William Bathe's "Preparation for administering Penance and the Eucharist" (Milan, 1614); translation into English and Spanish, under initials N. T. of Salvian's "Quis diversa salvi?" (St-Omer, 1618); "Religio de Inglaterrar", Ms X, 14, National Library, Madrid; memoir for Philip III of Spain on affairs of the Society; "Responsio ad calumnias," Stonyhurst Library; Letters, Vatican Archives (Lettere di particolari, I, 1).

PATRICK RYAN.

Creta. See Candia.

Crétin, Joseph, first Bishop of St. Paul, Minnesota, U. S. A., b. at Montul, department of Ain, France, 19 December, 1799; d. at St. Paul, Minnesota, 22 February, 1857. He made his preparatory studies in the petits séminaires of Moximieux (Ain) and L'Argentière (Rhône), his studies of philosophy at Alix (Rhône), and of theology in the Seminary of Saint-Sulpice, Paris. He was ordained priest 20 December, 1823, and soon afterwards was appointed vicar in the parish of Perney, once the home of Voltaire, and eventually of the bishop of Cressey (Donau, 1657). He had built there a new and beautiful church with funds largely gathered by himself on a tour through France, founded a college for boys, and revived the Catholic Faith among his parishioners, many of whom had become indifferent towards it, owing to the surviving influence of the philosophes in the close proximity of the Protestant cantons of Switzerland. But Crétin longed for a larger field of activity; at one time he thought earnestly of going as a missionary to China. His perplexities in that regard were solved by the advent of Bishop Loras, first Bishop of Dubuque, Iowa, who arrived in France in 1838 in quest of priests for his Western diocese. Crétin was one of the few who volunteered, and on 16 August, 1838, he secretly left his parish, embarked at Le Havre with Bishop Loras, and landed in New York in October of the same year. The winter of 1838-39 was spent in St. Louis, Missouri, and on his arrival at Dubuque, 18 April, 1839, he was at once appointed vicar-general of the new diocese. For over eleven years he exercised his priestly ministry in these new and unopened regions, dividing his time chiefly between Dubuque, Iowa, Prairie du Chien, Wisconsin, and the Winnebago Indians in the new, unexplored lands in LaSalle County, Illinois, and Winneeshiek Co., Iowa. Only once, in 1847, did he absent himself, when he made a journey to Europe in the interest of his missions. In 1850, St. Paul, Minnesota, became the seat of a new diocese. Crétin was appointed its first bishop, and went to France, to be consecrated, 28 January, 1851, at Bayeux by Bishop Devie, who had ordained him to the priesthood.

After having obtained some donations and several ecclesiastics for his new diocese, he returned to America and arrived in St. Paul 2 July, 1851. The same evening he made his first appearance in the log chapel of St. Paul, his first cathedral, and gave the first episcopal blessing to his flock. Within less than five months a large brick building was completed, which served as a school, a hospital, and a second cathedral. Another structure, begun in 1855, was finished after his death, and served the cathedral until 1872. In 1853 a hospital was built; during the same year, and again in 1856, he bought land for cemetery purposes. For the instruction of the children he introduced, in 1851, a community of the Sisters of St. Joseph, and in 1855 the Brothers of the Holy Family. He also planned the construction of the church, always eagerly fostered vocations for the priesthood, keeping at his residence seminarians in their last period of preparation. He supported likewise the cause of temperance not only by personal example, but also by organizing in January, 1852, the Catholic Temperance Society of St. Paul, the first of its kind in Minnesota. Another work to which he applied himself was that of Catholic colonization. With an eye to the future he endeavored to provide for the growth of his diocese by bringing Catholic immigrants from European countries to the fertile plains of Minnesota. Withal he did not neglect his ministerial and pastoral office. He was often alone in St. Paul without the help of a priest, and at times travelled through the vast extent of his diocese bestowing on his people the consolations of religion. Bishop Crétin's memory is held in esteem and veneration, especially by the old settlers of St. Paul.

For most of the material for this biography, see St. Paul. The above details are from letters written by his own hand to the Diocesan of St. Paul in the Société de Pères Ecclésiastiques de Jésus-Christ. A few documents and references on the subject are found in Acta et Dicta (St. Paul, 1907), I, No. 1; De Conciliis, II, (St. Paul, 1892); DE CATLY, Memoirs of Bishop Loras (New York, 1897); O'GORMAN, History of the Roman Catholic Church in the United States.
Crétineau-Joly, Jacques, journalist and historian; b. at Fontenay-le-Comte, Vendée, France, 23 Sept., 1803; d. at Vincennes near Paris, 1 Jan., 1875. At first he studied theology at the seminary of Saint-Sulpice, Paris, but, feeling that he had no vocation, he left after a stay of three years, during which he had received the tonsure. He was now in his twentieth year; he quickly obtained the professorship of philosophy at the college in his native town, but soon resigned the position on account of ill-health, and went in 1823 to Rome, as companion and private secretary to the French ambassador, the Duke of Laval-Montmorency.

In 1826 he published at Rome "Chants romains", which contained poor verses of an irreverent character. After his return home in 1828 he issued a number of volumes of poems and dramas, as "Les Trappistes" (Angoulême, 1833), and other poems, all of which proved, however, that he was no poet. He accomplished much more as a polemical journalist in the struggle against the liberalism, which, after the revolution of July, directed the State during the reign of the Duke of Orleans and then under Louis Napoleon (1852). He was an enthusiastic adherent of the hereditary royal house, and with fiery zeal defended its rights in several Legitimist newspapers of which he was editor. In 1837 he went to reside in Paris in order to devote himself to historical research concerning the history of Vendée, but in 1839 he added for a time to these labours the editing of "L'Europe monarchique", a newspaper devoted to the interests of the Bourbons. Before this he had published two writings on Vendée: "Episodes des guerres de la Vendée" (1834) and "Histoire des généraux et chefs vendéens" (1838). He now combined the two, made use of a large number of sources until then unknown, and issued his most important work: "Histoire de la Vendée militaire" (Paris, 1840-41), 4 vols.; the fifth edition appeared in 1865. Although he did not lay sufficient weight on the religious side of these struggles, the work brought him reputation on account of the animated description of the great mass of material, the correctness and painstaking care in the use of authorities. It must be acknowledged that he was by no means scrupulous how he obtained his materials, and in the prosecution of the narrative he was constantly influenced by practical considerations, for history had no value to him except as a storehouse of weapons against the foe of the moment.

His reputation outside of France was gained largely by his religious-political writings. The most important of these is his great history of the Society of Jesus: "Histoire religieuse, politique et littéraire de la Compagnie de Jésus" (Paris, 1844-45; 4 vols.; 2d German translation, 1845, 3d ed., 1851). The work was written under the auspices of the Society and was drawn from authentic and unpublished sources; it is an excellent apology for the much-abused Society, although at times it shows a lack of critical judgment and of moderation in treating the subject. A companion volume was his much-discussed work: "Clément XIV et les Jésuites" (Paris, 1847, 3d ed., 1848). To this Theiner wrote a rejoinder on behalf of Pope Pius IX, and Ravigon one on behalf of the Society, whereon Crétineau-Joly, after making careful research and in agreement with the pope, published "L'Église romaine en face de la Révolution" (1852, 2 vols.; 2d ed., 1863), a work which testifies to his unwavering fidelity to the Catholic Church. His other writings generally treat some burning question of the day and possess, therefore, less general interest.

Maynard, Jacques Crétineau-Joly, as vie politique, religieuse et littéraire (Paris, 1873). Patricius Schlegel, "Crétineau-Joly, Histor. St. John de, a French agriculturist, b. at Caen, France, 1731; d. at Saint-Yrieix near Paris, 1813. At the age of sixteen he went to England, whence in 1754 he emigrated to America, and for many years resided on a farm. In 1780 he was obliged to return to France to settle some of his affairs, and when he went to New York to take passage he was arrested by the English on suspicion of being a spy. After being in confinement for several months he was released and permitted to proceed on his journey unmolested. During his stay in his native land he succeeded in interesting the farmers of Normandy in the cultivation of the potato, and its culture was taken up by them. After a stay of about three years he once more came to America. It was largely due to his description of the wonderful productiveness of the land that several hundred of his countrymen emigrated to America. They established a colony in Pennsylvania, which for a time flourished. It was last destroyed by the savages and its inhabitants massacred. The American Revolution having come to a close, Crévecoeur was appointed consul at New York by the French Government, in which capacity he served for a long term. It was while occupying this post that he assisted in the founding of St. Peter's, the first Catholic church in the city, and served as one of his first trustees. He is the author of the following works: "Lettres d'un cultivateur américain" (1784); "Voyage dans la haute Pennsylvanie et dans l'état de New York" (1801). These works have been translated into English and German, and are admired for the beauty of their style. They were very popular throughout France. DeCourcy and Sera, Hist. of Cath. Ch. in U. S. Thomas Gaffney Taffe.
THE PLACE OF THE CRIB NOW VESTIGED. From the earliest times, no one ever ecclesiastical writer has been witness to this tradition. Thus St. Justin, who died a martyr in 165, says that “Having failed to find any lodging in the town, Joseph sought shelter in a neighbouring cavern of Bethlehem” (Dial. e. Phryg., 70). About half a century later, Origen writes: “If any one desires to satisfy himself without appealing either to the prophecies of the Old Testament or to the history of the New, he is justified by his disciples, that Jesus was born in Bethlehem, let him know that, in accordance with the Gospel narrative, at Bethlehem is shown the grotto where he first saw the light!” (C. Cela., I, 51).

St. Helena first converted the grotto into a church and herself placed it in costly precious and other fine ornaments. The first basilica erected over the crypt is due most probably to the devotion and munificence of her son Constantine, of whom Eusebius says that “The emperor himself, eclipsing even the magnificence of his mother’s design, adorned the same place in a truly royal style” (Vita Const., III, 45). Both the grotto itself and the basilica have undergone numerous restorations and modifications made necessary in the course of centuries by the ravages of war and invasion; but, at the present time, little remains of the splendid mosaics and paintings described in detail by Quaresimus and other writers. The Crypt of the Nativity is approached from the upper floor of the basilica by a flight of stairs leading from the north side of the choir of the basilica to the grotto below, and converging at the place where according to tradition the Infant Saviour was born. The exact spot is marked by a star cut out of stone, surrounding which are the words:

HIC DE VIRGINE MARIA JESUS CHRISTUS NATUS EST.

A short distance to the southwest is the manger itself where Christ was laid and where, as tradition asserts, he was adored by the Magi. In 1873 the grotto was plundered by the Greeks and everything of value, including two paintings by Murillo and Masetto respectively, was carried off. No restitution of the stolen treasures has since been made.

II. The relics of the crib that are preserved at St. Mary Major’s in Rome were probably brought there from Palestine and during the pontificate of Pope Theodore (640–649), who was himself a native of Palestine, and who was well aware of the dangers of plunder and pillage to which they were exposed at the hands of the Musulmans and other marauders. We find at all events that the basiliaca erected by Liberius on the Esquilina first received the name of Sancta Maria ad Fresneppe under Pope Theodore. During the pontificate of Hadrian I the first altar was erected in the basilica, and in the course of succeeding centuries the places where the relics are preserved came to be visited by the devout faithful from all parts of the Christian world. At the present time the remains of the crib preserved at St. Mary Major’s rest on five pieces of board which, as a result of the investigation conducted by Father Lais, sub-director of the Vatican Observatory, during the restorations of 1893 were found to be taken from a sycamore tree of which there are several varieties in the Holy Land. Two of the pieces, which like the other three, must have been originally much longer than they are at present, stood upright in the form of an X, upon which three other pieces rested, supported by a sixth piece, which, however, is missing, placed across the base of the upper angle of the X. We may conclude from this that these pieces of wood were probably speaking more supports for the altar itself which was probably made from the soft lignum of which the cave was formed. The rich reliquary, adorned with bas-reliefs and statuettes, which at present contains the relics of the crib was presented by the Duchess of Villa Hermosa in 1830. Plus IV (1559–65) restored the high altar upon which the relics are solemnly exposed for the veneration of the faithful every year on the eve of Christmas.

III. Devotion to the crib has no doubt of very ancient origin; but it remained for St. Francis of Assisi to popularize it and to give it the tangible form in which it is known at the present time. When St. Francis visited Rome in 1225, he made known to Pope Honorius III the plans he had conceived of making a scenic representation of the place of the Nativity and he hastened gladly to the details of the project and gave it his sanction. Leaving Rome, St. Francis arrived at Greccio on Christmas Eve, when, through the aid of his friend Giovanni Vetala, he constructed a crib and grouped around it figures of the Blessed Virgin and St. Joseph, the ass, the ox, and the shepherd who came to adore the new-born Saviour. He acted as deacon at the midnight Mass. The legend relates that having sung the words of the Gospel and they laid him in a manger” he knelt down to meditate briefly on the sublime mystery of the Incarnation, and there appeared in his arms a child surrounded by a brilliant light. A painting by Giotto representing St. Francis celebrating Christmas at Greccio is preserved in the Basilica of St. Francis at Assisi. Devotion to the crib has since spread throughout the Christian world. Yearly, from the eve of Christmas until the day of the octave of Epiphany, a crib representing the birthplace of Christ is set up in all Catholic parishes in Italy. The faithful of the mystery of the Incarnation and to recall according to tradition and the Gospel narrative the historical events connected with the birth of the Redeemer. The old Franciscan church of Ara Coeli possesses perhaps one of the largest and most beautiful cribs in the world. In this crib the famous Santo Bambino di Ara Coeli is exposed from the eve of Christmas to the feast of the Epiphany. The Santo Bambino is a figure carved out of wood representing the new-born Saviour. It is said to have come from the Holy Land, and in the course of time it has been decorated with numerous jewels of great value. It is carried in procession yearly on the feast of the Epiphany by the Minister General of the Friars Minor who solemnly blesses the city with it from the top of the high flight of stairs that lead to the main entrance of Ara Coeli.

STEPHEN M. DONOVAN.

Orimen, Impediment of, nullifies marriage according to ecclesiastical law, and arises from adultery and homicide separately or together. The Roman civil law prohibited the marriage of a man with a woman with whom he had committed adultery during the lifetime of her husband or pregnant wife. The law of Gratian (Pt. II, c. xxx, q. 41) whether the Church ever accepted this law. Ecclesiastical law since the twelfth century certainly supposes other circumstances in such adultery in order that it may effect a nullification of the marriage.

According to the actual law (Decretal, Greg. IX, Lib. 4 X tit. 7: De eo qui duxit. Cap. i, Proposition 2—who v. Significasti) there are two cases in which an adulterer may not marry one with whom the crime was committed: (1) When the adulterer promises to the partner in guilt marriage after the death of the other’s legitimate spouse; (2) When the fruit of the marriage and this was consummated during the lifetime of a legitimate spouse. Hence neither adultery alone without promise of marriage nor the promise of marriage without adultery forms a diriment, or nullifying, impediment. The promise must be accepted, and if it precede the adultery, must not have been recalled
before the sin. Silence alone is not sufficient evidence of the acceptance of the promise. The adultery to which the promise is attached must be formal and known by both. If Titus should corrupt a woman who believed him to be free, he could marry her after his wife's death, even if he attempted marriage with her before his wife's life, provided she were unaware of his marriage.

Affected ignorance, certainly, and, most probably, gross ignorance does not excuse from the sin or its penalties. The adultery must be consummated, but it is not required that the promise be united to it. He should be sincere, because the impediment does not depend upon the value of the promise, which is essentially null, and because a fictitious promise, if apparently true, is naturally inductive to the sin; and this the Church, by establishing such an impediment, strives to prevent as far as possible. In regard to the impediment, it is indifferent whether the promise precede or follow the adultery, if both occur during the marriage. If the promise were made during the life of a first spouse, and the adultery were committed during the life of a second, the impediment would be doubtful. In any case, it is to be noted that a promise of two persons to marry after the death of a legitimate spouse is recognized as criminal and null, even if confirmed by oath and made without any thought of adultery.

One murdering a spouse to marry another cannot contract marriage with this other (1) when there was co-operation in the murder for the purpose of this marriage, (2) when, without co-operation in the murder, adultery was committed by them, and the murder committed for the sole purpose of their contracting marriage. Thus, if the homicide is apart from adultery, both must concur in this murder. If the adultery occurs with the homicide, it suffices that one of the guilty should take part in the murder. In both cases, one at least must intend to marry the other. That the adultery and homicide, apart or joined, form a dirempt impediment certain conditions are necessary: (1) the homicide must take place; an attempt to kill or the infliction of a wound not mortal would not entail it; (2) the homicide must be of the spouse of one of those who wish to be married; so, when the homicide is apart from the adultery, both must be accomplices by a physical or moral action which influences the murder, either by a command or previous approval. Approval of the event after its occurrence does not create such a command or approval had been recalled. The intention of marriage need not have been mentioned, where there was co-operation in the homicide. In the public ecclesiastical court credence is not given to the murderer of a spouse, who may deny the intention of marrying one with whom he had intercourse was held. This impediment holds if only one of the parties is a Christian. The Church claims the right to legislate for her children in their relations with infidels. The impediment is incurred even if not known. The Church may dispense from it, as the impediment is established by her authority in the case of public homicide, however, whether due to only one or both of the parties, the pope never dispenses (Laurentius, no. 659).

Crime, from a canonical standpoint, at times carries with it its own legal punishment, at others it awaits the decision of a court. Thus we have seen its effect in causing an impugned marriage to be declared null, a crime determined by ecclesiastical law, the "right of patronage" may be lost to the guilty party or, in some cases, to his heirs; ecclesiastical benefices may also be lost to the holder when guilty of a crime determined in the law. Homicide, fornication, or adultery, however, may, and, necessarily deprive a cleric of the dignity, order, or office, though he may be deposed by his superior in punishment of these or similar crimes. Unless the law is explicit in determining such privation as resulting from the fact, a legal investigation is required for the punishment. (See IMPEDMENTS; ADULTERY; HOMICIDE; MURDER.)

R. L. BURKE.

Crimont, Joseph R. See ALASKA.

Crisium, Diocese of (Greco-Slavonic Rite), in Croatia.—Crisium is the Latin name of a little town some miles north-east of Agram (Zagreb), on the Glagovitsza. Its Croatian name is Križevac (pronounced Križevci); Slavic, Križ; Hungarian, Kök; German, Kreuz. It has 4,000 inhabitants; trade of cattle, wood, and wine.

About the year 1600 numerous Serbs emigrated from Servia and Bosnia to Croatia, where they found coreligionists, known to historians since the fourteenth century as Wallachians. The emigrants soon took the same name. Some of them went over to Catholicism through the efforts of Dimitrievich, Latin Bishop of Agram, who granted their leader, the monk Simeon Vratanica, the monastery of St. Michael on Mount Marza, near Ivanitz. In 1611 Simeon was appointed bishop of all the Catholic Serbs; he remained a staunch friend of Rome, as did his successors and their flock, in spite of defections caused by the schismatic Servian propaganda and conflicts with the Bishops of Agram. They bore the title "Episcopus Plateacensis" from Platea in Bocotia, while the government called their see "Episcopatus Svićinskius", a name that has not yet been explained satisfactorily. In 1671 Bishop Paul Zorčic accepted for himself and his successors the position of vicar-general of the Bishop of Agram for the Catholics of the Slavonic Rite. It was not until 16 June, 1777, that Pius VI re-established the Uniat diocese with the title "Episcopatus Crisienisius". Since then its bishops have resided at Križevac, as stated above, they first resided at Mount Marza, but after 1690 had no settled abode, on account of the persecutions caused by the schismatic Serbs.

The list of the bishops is given by Nilles in his "symbolica"; p. lxxxii (index), 765-68. The Greco-Slavonic Uniat Diocese of Križevci is a suffragan of the Latin Archbishop of Agram, includes to-day 20,700 Catholics, in 23 Servian and Ruthenian parishes situated in Croatia, Slavonia, Dalmatia, and the county of Vîces-Bodrog in Hungary. The languages spoken are Croatian, Ruthenian, and Hungaritan; the liturgical language is of course Slavonic. There are 29 secular priests, 30 churches, 22 with a resident priest, and 2 chapels. The schismatic number 225,000; there are also in this territory 17,000 Calvinists, 47 Lutherans, and 7,000 Jews.

S. VALLE.

Crispina, Saint, a martyr of Africa who suffered during the Decian persecution; b. at Thubara in the Province of Africa; d. by beheading at Thebeste in Numidia, 5 December, 304. Crispina belonged to a distinguished family and was a wealthy matron with children. At the time of the persecution she was brought before the proconsul Anulinus; on being ordered to sacrifice to the gods she declared herself to be a worshipper of only one God. Her head was shaved at the command of the judge, and she was exposed to public mockery, but she remained steadfast in the Faith and
was not moved even by the tears of her children. When condemned to death, she thanked God and offered her head with joy for execution. The Acts of her martyrdom, written not long after the event, form a valuable historical document of the period of the persecution. The day of St. Crispin’s death was observed in the time of St. Augustine; in his sermons Augustine repeatedly mentions her name, as well known in Africa and worthy to be held in the same veneration as the names of St. Agnes and St. Thecla. Pictorial representation of the martyrs gives the account of her examination.

**Gabriel Meier.**

Crispin and Crispinian, Saints, martyrs of the Early Church who were beheaded during the reign of Diocletian; the date of their execution is given as 25 October, 285 or 296. It is stated that they were brothers, but the fact has not been positively proved. The legend relates that they were Romans of distinguished descent who went as missionaries of the Christian Faith to Gaul and chose Soissons as their field of labour. In imitation of St. Paul they worked with the courage shown by St. Paul and earned a reputation for their trade to support themselves and also to aid the poor. During the Diocletian persecution they were brought before Maximianus Hercilius whom Diocletian had appointed co-emperor. At first Maximianus sought to turn them from their faith by alternate promises and threats. But they replied: “Thy threats do not terrify us, for Christ is our life, and death is our gain. Thy rank and possessions are sought of us, for we have long before this sacrificed the like for the sake of Christ and rejoice in what we have done. If thou shouldst acknowledge and love Christ thou wouldst give not only all the treasures of this life, but even the glory of thy crown itself in order through the exercise of compassion to win eternal life.” When Maximianus saw that his efforts were of no avail, he gave Crispin and Crispinian into the hands of the governor Rictius Varus, Rictius Varus, a most cruel persecutor of the Christians. Under the order of Rictius Varus they were stretched on the rack, thongs were cut from their flesh, and awls were driven under their finger-nails. A millstone was then fastened about the neck of each, and they were thrown into the Aisne, but they were able to swim to the opposite bank of the river. In the same manner they suffered no harm from a great fire in which Rictius Varus, in despair, sought death himself. Afterwards the two saints were beheaded at the command of Maximianus.

This is the story of the legend which the Bohlandists have incorporated in their great collection; the same account is found in various variaries. This narrative says that a large church was built over the graves of the two saints, consequently the legend could not have arisen until a later age; it contains, moreover, many details that have little probability or historical worth and seems to have been compiled from various false sources. In the sixth century a stately basilica was erected at Soissons over the graves of these saints, and St. Eligius, a famous goldsmith, made a costly shrine for the head of St. Crispinian. Some of the relics of Crispin and Crispinian were carried to Rome and placed in the church of San Lorenzo in Formula. The relics of the saints were given by Charlemagne to the cathedral, dedicated to Crispin and Crispinian, which he founded at Osnabruck. Crispin and Crispinian are the patron saints of shoemakers, saddlers, and tanners. Their feast falls on 25 October.

**Gabriel Meier.**

Crispin of Viterbo, Blessed, Friar Minor Capuchin; b. at Viterbo in 1668; d. at Rome, 19 May, 1750. When he was five years old, his pious mother took him to a sanctuary of the Blessed Virgin, a short distance from Viterbo, and there consecrated him to the Mother of God and placed him under her special protection. The child grew beyond his years in virtue and the science of the saints; so that the townsmen of Viterbo went to call him il Santarello, the little saint. As Crispin one day saw the Capuchin novices walking in procession, and inspired him with the desire to embrace the religious life. He was shortly afterwards received into the Franciscan Order as a simple lay brother. Having been employed for some time as cook in the convent at Viterbo, he was sent to Tolfa, a town not far distant from Civita Vecchia, to fulfil the same office. Thence he was sent to Rome and finally to Albano. Here Crispin was visited by men of the world, by bishops and cardinals, and even by the pope himself, who always took delight in conversing with the humble lay brother. It was Crispin’s constant endeavours to imitate the virtues of his patron, St. Felix of Capua, whom he had chosen as his model of perfection at the age of life. Like St. Felix, he used to call himself the sea or beast of burden of the Capuchins, and, having on one occasion been asked by a stranger why he went bareheaded, Crispin answered jocosely, that “an ass does not wear a hat”. Enfeebled by old age and by his herculean labours, he sought the superior’s, there to end his holy life. His body, which even at the present time is still in a remarkable state of preservation, rests under one of the side altars in the church of the Capuchin Fathers in Rome. Blessed Crispin was solemnly beatified by Pope Pius VII in 1806. His feast is celebrated only by the Capuchins.

**Leo, Lives of the Saints and Blessed of the Three Orders of St. Francis (Taunton, 1888), II, 280–83.**

Stephen M. Donovan.

**Criticism, Biblical.** In its fullest comprehension is the examination of the literary origins and historical values of the books composing the Bible, with the state in which these exist at the present day. Since the sacred Scriptures have been down through the ages a variety of copies and ancient versions, showing more or less divergence of text, it is the province of that department of Biblical criticism which is called *textual, or lower*, to study these documents with a view to arriving at the purest possible text of the sacred books. The name *higher criticism* is now employed by the German Biblical scholar Eichhorn, in the second edition of his *Einleitung*, appearing in 1787. It is not, as supposed by some, an arrogant denomination, assuming superior wisdom, but it has come into use because this sort of criticism deals with the larger aspects of Bible study; viz., with the authorship, date, composition, and authority of whole books or large sections, as distinguished from the discussion of textual minutiae, which is the sphere of the lower, or textual, criticism. The subject will, therefore, be treated in this article under the two heads: I. Higher Criticism; II. Textual Criticism.

**I. Higher Criticism.**—Taken in this limited sense, Biblical criticism, in the light of modern philological, historical, and archeological science, and by methods which are recent in their development, subjects to severe tests the previously accepted and traditional views on the human authorship, the time and manner of composition, of the books of the Bible, and discriminates as to their objective historical value. In reaching its results it sets more store on evidences internal to the books than on external traditions or attestations, and its undeniable effect is to depreciate tradition in a great measure, so that there exists a sharply
drawn line between the exegetes of the critical and those of the traditional school. In the process by which the critics arrive at their conclusions there is a divergence of attitude towards the supernatural element in Holy Writ. Those of the rationalistic wing ignore, at least implicitly, the distinctly divine inspiration that underlies the theological meaning of the term, and without any doctrinal preoccupations, except some hostility to the supernatural, proceed to apply critical tests to the Scriptures, in the same manner as if they were merely human productions. Moderate critics of Protestant persuasion, on the other hand, hold that supernatural inspiration—God's voice—actually does exist in the Christian Church. Catholic Biblical critics, while taking as postulates the plenary inspiration and the inerrancy of the sacred writings, admit in a large measure the literary and historical conclusions reached by non-Catholic workers in this field, and maintain that these are not excluded by Catholic faith. With the exception of Abbé Loisy and his followers, no Catholic scholar has claimed autonomy or complete independence for criticism, all proceeding on the principle that it cannot validly, and may not lawfully, contradict the established teaching of the Church. Its chief exponents insist that a reverent criticism is quite within its rights in sifting the elements which enter into human aspects of the Bible, as a means of a better understanding of the written word, since its component parts were given their form by men in certain historical environments, and under some of the limitations of their age and place, and since, moreover, inspiration does not dispense with ordinary human industry and methods in literary composition. (See Inspiration.)

Higher Criticism may be called a science, though its results do not admit of name a science of control and demonstration, as its principles are of the moral-psychological order. Hence its conclusions, even in the most favourable circumstances, attains to no greater force than what arises from a convergence of probabilities, begetting a moral conviction. While some attempts have been made to elaborate a system of canons for the higher criticism, it has not, and probably never will have, a strictly defined and generally accepted code of principles and rules. Some broad principles, however, are universally admitted by critical scholars. A fundamental one is that a literary work always betrays the imprint of the age and environment in which it was written. A second is that a plurality of authors is proved by well-marked differences of diction and style, at least when these coincide with distinctions in view-point or discrepancies in a double treatment of the same subject. A third received canon holds to a radical dissimilarity between ancient Semitic and modern Occidental, or Aryan, methods of composition.

History.—Before the eighteenth century.—The early ecclesiastical writers were unconscious of nearly all the problems to which criticism has given rise. Their attention was concentrated on the Divine content and authority of sacred Scripture as the source and ground of the Church's teaching. In the Middle Ages, the focus was on the infallibility of the Church, not on the possibility of a historicity in the biblical narratives. The Reformers, in their criticism of the Church, were more concerned with the theology and the moral content of Scripture, rather than with the literary and historical issues that would later be the focus of modern critical methods.

Since the eighteenth century.—(1) Old Testament Criticism outside the Church.—In 1753 Jean Astruc, a French Catholic physician of considerable note, published a little book, "Conjectures sur les meroires originaux dont il paraist que Moise s'est servi pour composer le livre de la Genese", in which he concluded, from the alternation of the names of God in the Hebrew Genesis, that Moses had incorporated therein two pre-existing documents, one of which employed Elohim and the other Jehovah. The idea attracted little attention till it was taken up by a German scholar, who, however, claims to have made the discovery independently. The Independent Rev. fried Eichhorn, the author of an Introduction to the O. T., issued 1780-83, and distinguished by vigour
and scientific acumen. Eichhorn was indebted not a little to his friend Herder, the noted German litterateur, and the two conjointly originated the critical habit of looking upon the O. T. as a collection of Oriental literature whose several parts are to be read and interpreted as the productions of the Semitic genius. Eichhorn greatly developed Astruc’s hypothesis by observing that the Elohim and Jehovah sections of Genesis bear other characteristics, and by extending the analysis thus derived to the whole Pentateuch. But the German savant was not so orthodox as to allow the Mosaic stratum to stand since he left to the Hebrew legislator a very uncertain part of the work. When Eichhorn composed his “Introduction” he was somewhat influenced by free-thinking views which later became very pronounced. His criticism, therefore, had as its antecedents not only Astruc’s fruitful conjecture and Herder’s poetic insight into Oriental literature, but also eighteenth-century German rationalism. This was in part native to the soil, but it drew much nurture from the ideas of the English Deists and Sceptics, who flourished towards the end of the seventeenth century and in the first half of the eighteenth. In vain that reader (1654–93) and Collins (1676–1729) had impugned miracles and prophecy and in general the authority of the O. T. writings. The standpoint of the German Orientalist Reimar was that of the English Deists; the whole drift of his “Wolkenbüttel Fragments”, first appearing in 1774–75, is one of separation to the supranatural. Lessing (1729–81), his literary executor, without departing so offensively from the path of orthodoxy, defended the fullest freedom of discussion in theological matters. Contemporary with Lessing was J. S. Semler, who rejected inspiration, attributed a mythical character to episodes in O. T. historical books, and, on lines parallel to Lessing’s philosophy of religion, distinguished in Scripture elements of permanent and others of transitory and negligible value.

Eichhorn is the first typical representative of modern Biblical criticism, the especial home of which has been Germany. He gave the first impulse to the literary analysis of the Scriptures, applying it not only to the Pentateuch, but also to Isaiah and other portions of the O. T. Outside of Germany the views of Eichhorn and his school found little currency. Yet it was a Catholic priest of Scottish origin, Alexander Geddes (1737–1802), who broached a theory of the origin of Biblical books that bore a danger of exceeding in boldness either Simon’s or Eichhorn’s. This was the well-known “Fragment” hypothesis, which reduced the Pentateuch to a collection of fragmentary sections partly of Mosaic origin, but put together in the reign of Solomon. Geddes’ opinion was only adopted in England in 1805 by Vater. A more fuller account of this and later stages of the criticism of the Pentateuch the reader is referred to the article under that heading. With some essays of a young scholar, De Wette, which were published 1805–07, properly began the historical criticism of the Bible. De Wette joined to the evidences supplied by vocabulary and style to the literary criticism (text criticism) by means of the piecing together from history, as contained in the sacred narratives themselves, and the discoveries of antiquarian research. He refused to find anything but legend and poetry in the Pentateuch, though he granted it a unity of plan, and a development in accordance with history. The development of the law is Eichhorn’s hypothesis, and the Catholic Movers (1806–56), while following critical methods, opposed the purely negative criticism of De Wette and his school, and sought to save the authenticity of some Mosaic books and Davidic psalms by sacrificing that of others. Bleek revived, and brought into prominence, the conclusion of Geddes, that the book of Josue is in close literary connexion with the rest of the books of the Bible, and henceforth the idea of a Hexateuch, or sixfold work, has been maintained by advanced exegetes. Hupfeld, in 1853, found four instead of three documents in the Pentateuch, viz., the first Elohist, comprising the priestly law, a second Elohist (hitherto unsuspected except by a forgotten investigator, Iger), the Jehovist, and the Deuteronomic. He was compelled to none of these a Mosaic origin. With Hupfeld’s view the idea of one large source, or Grundschript, supplemented by smaller ones, began to give place to the “Document” hypothesis. Meanwhile these conclusions, so subscribe of ancient traditions regarding the Five Books, were stoutly contested by a number of German scholars, prominent among whom stood Ranke, Hävernike, Hengstenberg, and Keil, among Protestants; and Jahn, Hug, Herbst, and Welte, representing Catholic learning. These, while refusing to allow the testimony of Jewish tradition to be ruled out by the arguments against internal authorship, were compelled to employ the methods of their adversaries in defending the time-honoured views. The questions were agitated only in countries where Protestantism predominated, and, among these, in England the conservative views were strongly entrenched.

The criticism of books was well as the critical discussion of the text, and is accomplished on the ground of diversity of vocabulary and style, the phenomena of double narratives of the same event varying from each other, it is claimed, to the extent of discrepancies, and differences of religious conceptions. The critics appeal for confirmation of this literary analysis to the historical books. For example, Moses could not have enacted an elaborate ritual legislation for a people leading a nomad life in the desert, especially since we find (say the critics) no trace of its observance in the earliest periods of Israel’s settled existence. These and like tests are applied to nearly every book of the O. T., and result in conclusions which, if allowed, profoundly modify the traditional beliefs regarding the authorship and integrity of these Scriptures, and are incompatible with any strict notion of their inerrancy.

The Hegelian principle of evolution has undoubtedly influenced German criticism, and indirectly Biblical criticism in general. Applied to history, it has powerfully helped to beget a tendency to regard the religion of Israel as evolved by processes not transcending nature, from a polytheistic worship of the elements to a spiritual and ethical monotheism. This theory was first elaborated by Abram Kuenen, a Dutch theologian, in his "Religion of Israel" (1899–70). Without being essential to it, it harmonizes with the current system of Pentateuchal criticism, sometimes called "the Development Hypothesis", but better known as "the Grafin". This hypothesis is accepted to-day by the great body of non-Catholic Biblical scholarship. It makes the Pentateuch gradually develop from the piecing together of documents representing distinct epochs. Of these the oldest is the Jehovahist, or J, dating from the ninth century B.C.; E, the Elohist work, was composed a little later. These elements are prophetic in spirit and narrative in matter. D, the Deuteronomic Code, was the organ and summary of the prophetic reform under Josia; it appeared 621 B.C. P, the great document containing the Priestly Code, was drawn up after the Babylonian Exile, and is the outcome of the sacerdotal and ritual formalism distinguishing the restored Jewish community: it therefore dates from the fifth century B.C. This ingenious and coherent hypothesis was formulated first by E. Reuss of the University of Strasbourg, but presented to the public many years later (1866) by his disciple H. K. Graf. It was skilfully elaborated.
by Julius Wellhausen, professor (in 1898) at the University of Göttingen, in works published in 1883 and 1885. Job is an epic, and articles in "Composition of the Hexateuch and the Historical Books of the O. T.", and to-day it dominates the critical treatment of the Hexateuch. The shifting of the Priestly Code (formerly called the First Elohist) from the earliest to the latest in time, a characteristic of the Grafian system, has had a marked influence on the historical criticism of the books of the O. T., as well as regard to the books of Paralipomenon. It has reversed the chronological order of the prophetic and priestly elements running through the greater part of the O. T.

Only within the last two decades has higher criticism made notable progress in English-speaking lands, and this has been rendered possible by the moderation of its leading spokesman there. Foremost among these semi-orthodox critics of the O. T. is Professor Driver of Oxford, whose "Introduction to the Literature of the Old Testament" first appeared in 1891. W. Robertson Smith in "The Old Testament and the Jewish Church," had previously (1880), though less systematically, presented the Grafian hypothesis to the English-speaking world. The results of British conservative criticism are embodied in Hastings' "Dictionary of the Bible", while the radical wing in England is represented by the "Biblical Commentaries" edited by Professors Cheyne and Black. In America most of the conclusions of German criticism have found advocates in Professors C. H. Briggs ("The Bible, the Church and Reason", 1892; "Higher Criticism of the Hexateuch", 1893), H. F. Smith, and C. H. Toy.

The higher criticism claims to have discerned great inequalities in the value of those portions of the O. T. which are historical in form. In the same book we may find, it asserts, myth, legend, and material of real historical worth, the last of these elements being abundant in Judges and the Books of Kings, a portion of the Bible, however, succinctly treated by the Hebrews in the "early Prophets." The Psalms have few if any compositions by David; they are the religious poetry of Israel. Isaiah is a composite, containing messages of prophets widely separated in time and circumstances. The prophets spoke and wrote primarily in view of definite contemporaneous situations. Job is an epic, and articles in pastoral drama. The book of Daniel is an apocalyptic of the Machabean period, describing history of the past and present under the semblance of visions of the future. To conclude this outline of the critical results, the human element in Scripture is given prominence and represented as clothed with the imperial costumes, and errors of the times of its origin; many books are exhibited as the products of successive literary accretions, excluding any unity of authorship; in fact, for most of the histories, the unknown writers retire into the shadow to give place to the unifying labours of the equally unknown "redactor" or "redactors." (2) The Reaction against Criticism. — This has been aided by the antithesis between the conclusions of certain Assyrologists of note (viz., A. H. Sayce and F. Hommel) and the prevailing school of criticism. Recent discoveries in Egypt, Mesopotamia, and Persia prove that a developed civilization existed in Western Asia in times contemporaneous with Abraham, and earlier. (See BABYLONIA; ASSYRIA.) The inference drawn by the above scientists (Sayce, "Higher Criticism and the Verdict of the Monuments", 1895; Hommel, "Ancient Hebrew Tradition", tr., 1897) is that the elaborate ritual and legal code of the Israelites could well have been framed by Moses. They charge the critics with the scientific fallacy of large premises and small conclusions. 

In Great Britain the conservative have been represented in recent times by Alfred Cave, J. J. Litt, and others. In Germany, J. K. F. Keil, who died in 1888, was the last exegete of international name who stood without compromise for tradition. But a contemporary group of Protestant German theologians and Orientalists have championed the claims of the O. T. as a Divinely inspired literature, whose narratives, on the whole, are worthy of belief. Prominent among these are Dr. F. E. König of Bonn ("Neue Prinzipien der attestamentlichen Kritik", 1902; "Bibel-Babel Frage und die wissenschaftliche Methode", 1904); Julius Böhm, a pastor; Dr. Samuel Oettli, professor at Greifswald. Germany has been greatly stimulated by the radical positions recently taken by some Assyriologists, beginning with a lecture delivered in 1902 before the German court by Friedrich Delitzsch. The still-continuing discussion is provoked as the Bible-Babel controversy. Delitzsch, Jensen, and their followers contend that the Bible stories of the Creation, the Fall, the Deluge, etc., were borrowed from the Hebrews from Babylonia, where they existed in their pure and original form. This school relegates all the events and personages of Genesis to the region of myths and attributes a Chaldean origin to the Jewish conception of Paradise and Sheol, angels and devils. Of still more recent beginning and extraneous character is the theory of astral myths defended by Stucken, Winckler, and Jeremias, according to which the narrations not only of the Pentateuch, but of large portions of the later books as well, represent purely the nature and movements of the heavenly bodies.

In replying to the critical systems, conservatives, both Catholic and Protestant, re-enforce the argument from Jewish and Christian traditions by methods borrowed from their opponents; linguistic distinctions are utilized, and the conservative critics also employ the process of comparing the data of one book with another, in an endeavour to bring all into harmony. Not the methods so much as the conclusions of criticism are impugned. The difference is largely one of interpretation. However, the conservative critic arbitrarily rules out as interpolations extraneous literary elements which are unfavourable to their hypotheses. The advocates of tradition also charge the opposite school with being swayed by purely subjective fancies, and in the case of the more advanced criticism, by philosophico-religious prejudices. Moreover, they assert that such a piece-meal formation of a book by successive strata, as is alleged for many parts of the O. T. is without analogy in the history of literature. The Catholic criticism of the O. T. will be described in a separate section of this article. (3) New Testament Criticism Outside the Church. — Before the eighteenth century N. T. criticism did not go beyond that of the Latin and Greek texts, if we except the ancient remarks on the authorship of the Epistle to the Hebrews and the Apocalypse already noticed. When the German Rationalism of the eighteenth century, in imitation of the English Delam
of the seventeenth, had discarded the supernatural, the N.T. became the first object of a systematic attack. Reimarus (1694–1768) assailed the motives of its writers and cast aspersions on the honesty of Jesus Himself. J. S. Semler (1725–91) used the greatest latitude in discussing the origin and credibility of the sources of the Gospels, Epistles, and Apocalypse, and maintained that if a Divine character is ascribed to Jesus, that is sufficient to cast doubt upon all the historical data relating to the subject. The primary object of his criticism was to question the authenticity of the N.T. books from a critical standpoint. His exegetical principles, if admitted, would largely destroy the authority of the Gospels. Paulus (1761–1851), professor at Erlangen, was one of the most prominent critics, and maintained that the Gospels and their authors' honesty of purpose, but taught that in narrating the miraculous and supernatural the Apostles and Evangelists recorded their delusions, and that all the alleged superhuman occurrences are to be explained by merely natural causes. Eichhorn, the pioneer of modern German criticism, carried his inquiries into the field of the N.T., and, beginning with 1794, proposed a theory to explain the similaties and differences of the Synoptics, i.e. Matthew, Mark, and Luke. Some phases of what is now known as "the Synoptic Problem" were examined by Griesbach as early as 1773, but it was left to his disciple, among others, in 1818, to formulate it as a problem of Biblical exegesis, and to establish the priority of Mark and the dependence of the other Synoptics. This new method of criticism, as that of Baur, has left a deep impress on later N.T. criticism. He first practised on a consistent and developed plan the habit of scrutinising the sacred documents themselves for evidences of the times which gave them birth, and led the way in the present critical trend towards a division of the N.T. into Judaistic, Pauline, and Johannine elements.

The Tübingen idea evoked a reaction against their destructive and purely rationalistic conclusions. This movement has been twofold: on one side it is orthodox Protestant, though critical in its method; this side was represented by Schleiermacher's attitude; he referred to the "scientific" and evolutionary school. The Evangelistic school of Protestant German commentators, represented by Gericke, Ohlhausen, Neander, and Bleek, were in the main adherents to the genuineness and truthfulness of the Gospels, though influenced by the mediating or mystico-rationalistic tendencies of Schleiermacher. As N.T. scholars they belong between 1823 and 1859.

The "Life of Jesus" by David Friedrich Strauss, which appeared in 1835, marked a new departure in view with regard to the N.T., and made a great sensation. Strauss was able to do what the "Christian" critics and his school of the seventeenth had been unable to do. He declared that the Millenarianism and "Vie de Jésus" of Renan's "vie de Jesus" Strauss introduced a new trend in the religious study of the N.T. He emphasized the religious significance of Jesus, and thereby obscured the objective facts, while it rested upon them. He held that the orthodox conception of Christ was the creature of the ardent Messianic hopes of the Jewish Christians of the primitive Church, who imagined that Jesus fulfilled the O.T. prophecies, and who, soon after His death, in their personal and the whole tenor of His life with mystical qualities, in which there was nothing but a bare kernel of objective truth, viz., the existence of a rabbi named Jesus, who was a man of extraordinary spiritual power and penetration, and who had gathered about Him a band of disciples, who after His death became the authors of the Bible. Thus, the "Life of Jesus" soon called forth refutations and "echoes of the school", and the attacks on the historical character of the Gospels and the finishing stroke was not given to it until Ferdinand Christian Baur, the founder of the Tübingen, or "Tendency", school of exegesis and criticism, published the mature fruit of his speculation under the title "Paulinus der Apostel Jesu Christi", in 1845. Baur, like Strauss, was a disciple of Hegel, but had taken from that philosopher a different key to the significance of the N.T., viz., the principle of the evolution of all truth through the conciliation of contradictions. He taught that the N.T. is the outcome of an antagonism between Jewish, or Petrine, and Pauline tendencies in the primitive Church. The Pauline concept of Christianity—one of a philosophic and universal order—is represented by the Epistles to the Romans, Corinthians, Galatians. The Pauline Epistles, however, are submitted as the certain authentic works of St. Paul. The Apocalypse was composed in direct opposition to the spirit of the Pauline writings. The above works were written before A.D. 70. Between 70 and 140 appeared St. Matthew's Gospel, Petrine in character; St. Luke's Gospel, Pauline, though Paul touched on it in a conciliatory spirit; Acts is accepted similarly to St. Luke and late the Gospel of St. Mark, also of an irenic type. This second period is one of transition between antagonism and complete reconciliation. This latter is the note of the third period, reaching to about A.D. 170, which produced the Gospels and Epistles bearing the name of St. John, and the pastoral Epistles, which therefore cannot have come from St. Paul. The scheme excluded the authenticity of all the Gospels. Baur's theory has not survived except in the very mitigated form seen in the works of Hilgenfeld and Pfleiderer. Nevertheless, the whole process of exegesis, methods of Baur have left a deep impress on later N.T. criticism. He first practised on a consistent and developed plan the habit of scrutinising the sacred documents themselves for evidences of the times which gave them birth, and led the way in the present critical trend towards a division of the N.T. into Judaistic, Pauline, and Johannine elements.

In Great Britain, N.T. criticism with few exceptions has been moderate and, on the whole, conservative. Excellent service has been done in the recent editions of contested books by the British divines J. B. Lightfoot, B. F. Westcott, W. H. Sanday, and others.
Holland has produced a small group of radical critics, Van Manen, Pierson, Loman, who, with Steck in Germany, have revived Bruno Bauer's total denial of authenticity to St. Paul's Letters. In France and French Switzerland conservatism has been the keynote of the Protestant scholars Frossé and Godet; a doctrine of evolutionism that of Sabatier. Abbé Loisy's work will be spoken of below.

A brief summary of the situation of particular books in contemporary non-Catholic criticism follows:

The Synoptic Gospels.—The prevalent critical solution of the problem they present is the "two-document" hypothesis, which explains what is common to all of them by supposing that Matthew and Luke drew from the very early Gospel bearing St. Mark's name or an anterior Apostolic document on which Mark is based, and refers the material which is common to Matthew and Luke only to a primitive Aramaic source compiled by one or more immediate disciples of Christ, possibly St. Matthew. St. Luke's Gospel is recognized as authentic; our canonical Mark as at least virtually so.

Acts.—The integrity and entire genuineness of the Acts of the Apostles have been assailed by a few recent critics: Hilgenfeld, Spitta, Clemen. They were unable to work into a coherent narrative of different authors, including St. Luke, rearranged by successive editors, and containing materials varying much in value. No conscious falsification was used, but legendary narratives crept in. These critics are by no means unanimous as to particulars.

Ephesians, Romans, Corinthians, and Galatians are acknowledged by all serious scholars to be authentic writings of the Apostle of the Gentiles. About Ephesians, Philippians, Colossians, Thessalonians, and Philo'emon there is diversity of opinion. First Thessalonians is generally admitted to be genuine, but the Pauline authorship of the second letter of that name is strongly contested. The weight of non-Catholic critical opinion is against the authenticity of the pastoral Epistles, viz., the two to Timothy and the one to Titus. The Epistle to the Hebrews is assigned to an Alexandrian Jewish convert, contemporary, or almost so, with St. Paul, and a disciple of his teaching. This is the view of Catholic and of non-Catholic critics alike.

First Peter is generally held to be the work of that Apostle, but the composition of Second Peter is placed in the second century, even some Catholics inclining to this date. The question whether the Epistles of St. James and St. Jude are from the pens of those names is variously answered outside the Church.

The Johannine Writings.—The authenticity and authority of St. John's Gospel form the great battlefield of present N.-T. criticism. They had been attacked as early as 1792 by a certain Evanson. The majority of contemporary critics incline to Harnack's view, which is that the Fourth Gospel was composed by John the Presbyter or the "elder" referred to in a fragment by Papias, and asserted by the Harnackists to be distinct from the Apostle and a disciple of the latter. He wrote in the beginning of the second century. Loisy attributes it to an unknown writer of the second century who had no affiliations with St. John. But the historical value of this Evangel is the more vital aspect of the question. The German school of criticism characterizes the Gospel as theology and symbolism, not history; Loisy agrees with them. The Apostolic authorship and historicity of the Fourth Gospel is vindicated by scholars as Sanday, Stanton, and Drummond in England, and Zahn and B. Weiss in Germany. Orthodox Catholic exegetes, while always holding to the Catholic tradition of the Johannine authorship and historical quality of the Fourth Gospel, admit that St. John's theology indicates reflection and a development over and beyond that of the Synoptics. The first Epistle of St. John is universally admitted to be by the same hand as the Gospel. The criticism of Apocalypse is still in an immature stage. There is much diversity of view as to its author, the Anglican school inclining to St. John. It has been recently proposed that the book is a Jewish apocalypse retouched by a Christian (V. Pössenhofen). A notable attack on this view is that of Van Manen.

(4) The Critical Movement Within the Church.—Old Testament Criticism.—France, the country of Richard Simon and Abbe Lamy, has been since the beginning of the present-day Catholic criticism. François Lenormant, a distinguished Catholic Orientalist, in the preface to his "Origines de l'Histoire d'après la Bible et les traditions des peuples Orientaux" (1880-84), declared no longer tenable the traditional unity of authorship for the Pentateuch, and admitted as demonstrated that the fundamental sources of its first four books were a Jehovah and Elohist document, each inspired and united by a "final redactor". Minor discrepancies exist between them. The earlier chapters of Genesis contain mythical and legendary elements common to Semitic peoples, whilst in the hands of the final redactor became the "figured vestments of eternal truths". The same preface bespeaks entire liberty for the critic in the matter of dates and authors. Lenormant's work was placed on the Index, 19 December, 1887.

The basis of his literary analysis was supplied by the conclusions of higher criticism, up to that time unaccepted, at least publicly, by any Catholic savant. E. Ruse, a liberal Protestant professor at the university of Strasbourg, had published at Paris, in 1879, "L'Histoire Sainte et la Loi; Pentateuque et Jouxé". In 1883 appeared Wellhausen's influential "Prolegomena to the History of Israel", re-edited in 1889 under the title, "Composition of the Hexateuch and the Historical Books of the O.T."

Alfred Loisy, then professor of Sacred Scripture at the Institut Catholique of Paris, in his inaugural lecture for the course of 1892-93 made a clear-cut plea for the exercise of criticism in the study of the sacred text. First Peter is generally held to be the work of that Apostle, but the composition of Second Peter is placed in the second century, even some Catholics inclining to this date. The question whether the Epistles of St. James and St. Jude are from the pens of those names is variously answered outside the Church.

The Johannine Writings.—The authenticity and authority of St. John's Gospel form the great battlefield of present N.-T. criticism. They had been attacked as early as 1792 by a certain Evanson. The majority of contemporary critics incline to Harnack's view, which is that the Fourth Gospel was composed by John the Presbyter or the "elder" referred to in a fragment by Papias, and asserted by the Harnackists to be distinct from the Apostle and a disciple of the latter. He wrote in the beginning of the second century. Loisy attributes it to an unknown writer of the second century who had no affiliations with St. John. But the historical value of this Evangel is the more vital aspect of the question. The German school of criticism characterizes the Gospel as theology and symbolism, not history; Loisy agrees with them. The Apostolic authorship and historicity of the Fourth Gospel is vindicated by scholars as Sanday, Stanton, and Drummond in England, and Zahn and B. Weiss in Germany. Orthodox Catholic exegetes, while always holding to the Catholic tradition of the Johannine authorship and historical quality of the Fourth Gospel, admit that St. John's theology indicates reflection and a development over and beyond that of the Synoptics. The first Epistle of St. John is universally admitted to be by the same hand as the Gospel. The criticism of Apocalypse is still in an immature stage. There is much diversity of view as to its author, the Anglican school inclining to St. John. It has been recently proposed that the book is a Jewish apocalypse retouched by a Christian (V. Pössenhofen). A notable attack on this view is that of Van Manen.
letter, "Vigilantiae," establishing the Biblical Commission, 30 October, 1902.

In a paper read before the Catholic Scientific Congress of Fribourg, 1897 (Revue Biblique, January, 1908), Father M. A. Lagrange, superior of the Dutch-French school of Biblical studies at Jerusalem, defended a literary analysis and an evolution of the Pentateuch which are substantially identical with those of the Graf-Wellhausen hypothesis. He distinguished between the tradition that Moses was the historical author or founder of the Pentateuch, which he retained, and the tradition that the Moses literature, superior of the Biblical scholars, which he abandoned. Like Loisy, he maintained that the literary methods of the ancient Orient are sharply differentiated from those of our civilization. During the last decade a considerable number of Catholic Biblical scholars have coalesced into what has been called the "progressive" school. Naturally disagreeing somewhat in details, they agree in holding (a) the composite text and progressive formation of a number of sacred books, and in abandoning therefore their traditional unity of authorship; (b) in allowing a theological and moral development in the text, and in admitting an evolution of the content of the popular traditions and written sources, which contain unhistorical statements. Nevertheless, these exegetes hold firmly to the objective truth of the essential and larger lines of the history of the Old Dispensation as embodied in the Bible. They assert the incoherence in the question of the literary procedure of Biblical writers is not one of faith. Their position has met with repeated attacks by Catholic adherents of the conservative school, who have combated them with arguments drawn chiefly from the irreconcilability of the views of the Catholic dogmatic tradition of inspiration and inerrancy as witnessed, it is alleged, by the N.T., the Fathers, the teachings of the councils of Trent and the Vatican, and particularly the encyclical of Leo XIII. (See Inspiration). The principal adversaries of the advanced conclusions are the Jesuit Delattre (Autour de la question biblique, 1904), Brunner (contributions to the "Etudes" between 1894 and 1905), Fontaine, Fonck, Pesch (De Inspirazione Sac. Scrip., 1900), Murillo, Billo, also Professor Herberg and Abbé Mangenot (L'Authenticité du Pentateuque, 1907).

The Biblical Commission (q. v.), whose decisions have now the force of acts of the Roman Congregation for the Propagation of the Faith, has fixed the number of implicit citations in the Bible might be admitted, provided solid arguments prove that they are really citations, and that the sacred writer does not adopt them as his own. The Commission conceded on 23 June, 1905, that some passages may be historical in appearance, but are borrowed or inspired from the sense and document of the Church. On 27 June, 1906, the commission declared that the arguments alleged by critics do not prove the substantial authorship of the Pentateuch by Moses. This decision has necessarily modified the attitude of such Catholic writers and teachers as regard the text and the interpretation of the Graf-Wellhausen hypothesis. The decree of the Inquisition "Lamentabili" (3 July, 1907) and the encyclical "Pasce Domini Regli" (8 September, 1907) reasserted against the Modernists the sound Catholic principles to be followed in the study of Sacred Scripture.

In regard to the Pentateuch criticism, Catholic scholars who were willing to accept some of the critical theories have drawn a line of distinction between the criticism of the Old and that of the New Testament, not only because of the greater delicacy of the latter field, but because they recognize that the documents of the Old and New Testaments were produced under quite different conditions. In the province of N.T. higher criticism Catholics have defended the traditional authenticity, integrity, and veracity of the books in question. Some exegetes admit in a slight measure divergencies in the Evangelical narratives, and the employment of older documents by at least two of the Synoptic writers. As to the "Synoptic problem," it is allowed that the "St. John," utilized the "Marion Gospel" and the "St. Matthew" in the "St. Mark" Gospel; so Batiffol, Minocchi, Lagrange, Loisy, Bonacorsi, Gigot. Unduly influenced by contemporary German criticism, Abbé Loisy has in recent times broken with the orthodox traditions of N.T. exegesis. In a reply to Harnack's "What is Christianity?" he defended Catholic dogma as an evolution with its roots in the primitive Church. He made dangerous concessions regarding Christ's claim to Divinity, His Messianic vocation, knowledge, miracles, and Resurrection ("L'Evangile et l'Eglise," 1902; "Autour d'un petit livre," 1903). In "Le Quatrième Evangile" (1903) Loisy rejects the Johannean authorship and the historicity of the Fourth Gospel, both of which were affirmed by the Biblical Commission (29 May, 1907). His system virtually severs the Catholic Faith from its historical credentials as found in the N.T., and the above works have been condemned by the Congregation of the Index. They have drawn a number of refutations from Catholics of repute, such as the Abbé Lequin's "Jésus Messie et Fils de Dieu" (1904). More recently Loisy published a work on the Synoptic Gospels (Les évangiles synoptiques, 1908) in which he follows the most extravagant rationalistic criticism. Loisy was excommunicated 7 March, 1908. As has been rumored, the abbe has renounced the exercise of criticism according to sound principles unbiased by rationalistic presuppositions, but it must condemn undue deference to heterodox writers and any conclusions at variance with revealed truth. When doubt arises as to the veracity of hypotheses, it is for ecclesial authority to decide how far they conform with the deposit of faith or are expedient to the welfare of religion.

George J. Reid.

CRITICISM TEXTUAL—The object of textual criticism is to restore as nearly as possible the original text of a work the autograph of which has been lost. In this textual criticism differs from higher criticism, in that its object is not that of a literary work, study its composition, determine its date and trace its influence and various transformations through the ages.

A. Necessity and processes of textual criticism.—Textual criticism has no application except in regard to a work whose original autograph no longer exists; for, if except it could easily be reproduced in photogravure, or published, once it had been correctly deciphered. But no autograph of the inspired writings has been transmitted to us, any more than have the originals of profane works of the same era. The ancients had not that superstitious veneration for original manuscripts which we have to-day. In very early times the Jews were wont to destroy the sacred books no longer in use, either by burning them with the remains of holy persons or by hiding them, in what was called a...
This explains why the Hebrew Bibles are, comparatively speaking, not very ancient, although they have always made a faithful copy of the Holy Books on skin or parchment. In the first centuries of the Christian era the Greeks and Latins generally used papyrus, a material that quickly wears out and falls to pieces. It was not until the fourth century that parchment was commonly used, and it is also from that time that our oldest manuscript of the Septuagint and the New Testament date. Nothing short of a continuous miracle could have brought the text of the inspired writers down to us without alteration or corruption, and Divine Providence, who exercises, as it were, an economy of the supernatural, and never needlessly multiplies prodigies, did not will such a miracle. But the originals and the manuscripts that are not agree with one another or with the first editions, we are not sure of having the authentic text in its minutest details. From which example it is easy to appreciate the necessity of textual criticism in the case of works so ancient and so often transcribed as the books of the Bible.

Corruptions introduced by copyists may be divided into two classes: involuntary errors, and those which are either wholly or partly intentional. To these different causes are due the observed variations between manuscripts.

(a) Involuntary Errors may be distinguished as those of sight, hearing, and memory, respectively. Sight readily confounds similar letters and words. Thus it is that the נ and the ג are easily interchanged in square Hebrew writing, ע and ו and א and א in Greek uncial writing, and ό and υ in Greek cursives, etc.

(b) Errors Wholly or Partly Intentional.—Deliberate corruption of the Sacred Text has always been rather rare, Marcion's case being exceptional. Hort (Introduction, 2d ed., 1866), p. 283, states the opinion that "even among the unquestionably spurious readings of the New Testament there are no signs of deliberate falsification of the text for dogmatic purposes." Nevertheless it is true that the scribe often selects from various readings that which favours either his own individual opinion or the doctrine that is just then more generally accepted. It also happens that the perfect copyists may, through a fault of writing the scribe accidentally or without rhyme or reason corrupt, because he fails to understand them, that he adds a word which he deems necessary for the elucidation of the meaning, that he substitutes a more correct grammatical form, or what he considers a more exact expression, and that he harmonizes the parallel passages. Thus it is that the form of the Lord's Prayer in Luke, xi, 2-4, is in almost all Greek manuscripts lengthened out in accordance with Matthew, vi, 9-13. Most errors of this kind proceed from inserting in the text marginal notes which, in the copy to be transcribed, were but variants, explanations, parallel passages, simple remarks, or perhaps the_thumb of the original. Thus it is that the interpolations stand a far better chance of being perpetuated than an omission.

From the foregoing it is easy to understand how numerous would be the readings of a text transcribed as often as the Bible, and, as only one reading of any given passage can represent the original, it follows that all the others are necessarily faulty. Mill estimated the variants of the New Testament at 35,000, and since the dura and the cursive are unknown to Mill this number has greatly increased. Of course by far the greater number of these variants are in unimportant details, as, for instance, orthographic peculiarities, inverted words, and the like. Again, many others are totally improbable, or else have such slight warrant as not to deserve even cursory notice. Hort (Introduction, 2) estimates that a reasonable doubt does not affect more than the sixth part of the words: "In this second estimate the proportion of comparatively trivial variations is beyond measure larger than in the former; so that the amount of what can in any sense be called substantial variation is but a small fraction of the whole residuary variation, and can hardly form more than a thousandth part of the entire text." Perhaps the same thing might be said of the Vulgate; but in regard to the primitive Hebrew text and the Septuagint version there is a great deal more doubt.

The object of textual criticism is to restore a work to what it was upon leaving the hands of its author. But it is, absolutely speaking, possible that the author himself may have issued more than one edition of his work. This hypothesis was made for Jeremiah, in order to explain the differences between the Greek and the Hebrew text. But it cannot be claimed so as to account for the variations between the "Codex Beza" and other Greek manuscripts in the third Gospel and the Acts of the Apostles; and for other writers. These hypotheses may be insufficiently founded, but, as they are neither absolutely nor impossible, they are not to be rejected a priori.

B. General principles of textual criticism.—In order to re-establish a text in all its purity, or at least to eliminate as far as possible, its successive falsifications, it is necessary to consult and weigh all the evidence. And this may be divided into: external, or that furnished by documents reproducing the text in whole or in part, in the original or in a translation; diplomatic evidence—and internal, or that resulting from the examination of the text itself independently of its extrinsic attestation—paradiplomatic evidence. We shall consider them separately.

1. External (Diplomatic) Evidence.—The evidence for the work of the scribe when a manuscript is lost is furnished by (a) copies, (b) versions, and (c) quotations. These three do not always exist simultaneously, and the order in which they are here enumerated does not indicate their relative authority.

(a) Manuscripts.—In regard to the copies of an-
cient works three things are to be considered, namely: (a) age, (b) source, and (c) genealogy; and we shall add a word on (d) critical nomenclature or notation.

(a) Age is sometimes indicated by a note in the manuscript itself; but the date, when not suspected of falsification, may simply be transcribed from the exemplar. However, as dated manuscripts are usually not very old, recourse must be had to various parallels found with sufficient accuracy the age of Greek and Latin manuscripts. Hebrew paleography, though more uncertain, presents fewer difficulties, inasmuch as Hebrew manuscripts are not so old. Besides, the exact age of a copy is, after all, only of minor importance, as we know that an ancient manuscript may be very corrupt while a later one, copied from a better exemplar, may come nearer to the primitive text. However, other things being equal, the presumption is naturally in favour of the more ancient document, since it is connected with the original by fewer intervening links and consequently has been exposed to fewer possibilities of error. (b) It is more important to ascertain the relative value than the age of a manuscript. Some evidences inspire but little confidence, because they have frequently been found to be defective, while others are readily accepted because critical examination has in every instance shown them to be veracious. But how are we to discriminate? Prior to examination, the readings of a text are divided into three or four classes: the certainly or probably true, the doubtful, and the certainly or probably false. A manuscript is rated good or excellent when it presents in general true readings and contains few or none that are certainly false; under contrary conditions it is considered mediocre or worthless. Needless to add, the intrinsic excellence of a manuscript is not measured according to the greater or less care exercised by the scribes; a manuscript may teem with copyist's errors, though it be made from a very correct exemplar: and one transcribed from a defective exemplar may, considered merely as a copy, be quite faultless. (c) The genealogy of documents, from a critical view-point, is most interesting and important. As soon as it is proved that a manuscript, no matter what its antiquity, is simply a copy of another existing manuscript, or, for that manner, derives finally the line of authorities, since its particular testimony is of no value in establishing the primitive text. This, for instance, is what happened to the "Codex Sangermanensis" (E of the Pauline Epistles) when it was proved to be a defective copy of the "Codex Claromontanus", and the Pauline Epistles were preserved in ten manuscripts, nine of which had sprung from a common ancestor, we would not therefore have ten independent testimonies but two, as the first nine would count for only one, and could not, therefore, outweigh the tenth, unless it were shown that the common exemplar of the nine was a better one than that from which the tenth was taken. The consequences of this principle are obvious, and the advantage and necessity of grouping the testimonies for a text into families is readily understood. It might be supposed that the critic would be mainly guided in his researches by the birthplace of a manuscript; but the ancient manuscripts often travelled a great deal, and their nationality is rarely known with certainty. Thus, many are of the opinion that the Vaticanus and the Sinaiticus emanated from Ceresarea in Palestine, while others maintain that they were written in Egypt, and Hort inclines to the belief that the Codex Bezae was copied in the mountains (see Codex Vaticanus; Codex Sinaiticus). Hence the critics' chief guide in this matter should be the careful comparison of manuscripts, upon the principle that identical readings point to a common source, and when the identity between two or more manuscripts is constant, especially in exceptional and eccentric variants—the identity of the exemplar is established. But this procedure is beset with two difficulties. A first, and a very embarrassing, complication arises from the mixture of texts. There are but few texts that are pure; that is to say, that are taken from a single exemplar. The ancient scribes were nearly all to a certain extent editors, and made their choice from various depending upon two exemplars. Moreover, the correctors or the readers often introduced, either on the margin or between the lines, new readings which were subsequently embodied in the text of the manuscript thus corrected. In such a case the genealogy of a manuscript is liable to become very complicated: It is sometimes the case that two manuscripts which are closely related in certain books are totally unrelated in others. As a matter of fact, the separate books of the Bible, in ancient times, used to be copied each upon its own roll of papyrus, and when they came to be copied from these separate rolls upon sheets of parchment, and bound together in one enormous "codex", texts belonging to quite different families might very possibly be placed together. All these facts explain why critics frequently disagree in determining genealogical groupings. (On this subject consult Hort, "Introduction", pp. 58-59; "Genealogical Evidence".)

Critical nomenclature or critical numbers. If the copies of a text are not numerous each editor assigns them whatever conventional symbols he may choose; this was for a long time the case with the editions of the original Greek and Hebrew, of the Septuagint and the Vulgate, not to mention other versions. But when, as nowadays, the number of manuscripts becomes greatly increased, it is necessary to adopt a uniform notation in order to avoid confusion. Hebrew manuscripts are usually designated by the figures assigned them by Kennicott and De Rossi. But this system has the disadvantage of not being continuous, the series of numbers recommending itself only three times: Kennicott MSS., De Rossi MSS., and other MSS. catalogued by De Rossi, but not belonging to his collection. Another serious inconvenience arises from the fact that the manuscripts not included in the three preceding lists have remained without symbol, one can only be indicated by mentioning the number of the catalogue in which they are listed.

The notation of Greek manuscripts of the Septuagint is almost the same as that adopted by Holmes and Parsons in their Oxford edition 1798-1827. These two scholars designated the uncials by Roman figures (from I to XIII) and the cursive by Arabic figures (from 14 to 311). Not all the manuscripts, however, as certain manuscripts were counted twice, while others which were numbered among the cursive were uncials either wholly or in part, etc. For cursive the Holmes-Parsons notation is still retained; the uncials, including those found since, are designated by Latin capitals; but no symbols have been assigned to recently discovered cursive. (See the complete list in Swee, "An Introduction to the Old Testament in Greek", Cambridge, 1902, p. 120-170.)

The nomenclature of the Greek manuscripts of the New Testament also leaves much to be desired. Wetstein, the author of the usual notation, designates uncials by letters and cursive by Arabic figures. His list was continued by Birch and by Schoel, and afterwards by Scrivener, independently, by Gregory. The same letters answer for many manuscripts, hence the necessity of distinguishing indices, thus Δρα= "Codex Bezae", ΔραΙ= "Codex Claromontanus", etc. Moreover, the series of figures prove by its four groups (Gospels, Acts and Catholic Epistles, Epistles of Paul, Apocalypse), so that a cursive containing all the books of the New Testament must be designated by four different numbers accomplished by their index. Thus the MS. of the British Museum, "Addit. 17409," is for
Scrivener 5847, 2295, 260p, 97pp (i.e. the 584th MS. of the Gospel on his list, the 229th of Acts, etc.), and for Gregory 4906, 1982, 255p, 97pp. To remedy this confusion Von Soden lays down as a principle that uncials should not have a different notation from the minuscules and that each manuscript should be designated by a single abbreviation. Hence he adopted a system which is not fully satisfactory, and proceeded by one of the three Greek initial letters, α, έ, ζ, according as it contains the Gospels only (ευαγγελια), or does not contain the Gospels (ευαγγελοι), or contains both the Gospels and some other part of the New Testament (ευαγγελα). The number is chosen so as to indicate the approximate age of the manuscript. The notation is unquestionably better than the other; the main point is to secure its universal acceptance, without which endless confusion will arise.

For the Vulgate the most famous manuscripts are designated either by a conventional name or its abbreviation (e.g. "A" = "Ammianus", fuld = "Fulda"); the other manuscripts have no generally admitted symbol. (The present nomenclature is altogether imperfect and deficient. Critics should come to terms and settle upon special symbols for the genealogical groupings for manuscripts which are as yet almost unknown, but which are necessary for the study of the present writer's article, "Manuscripts biblices" in Vigouroux, "Dict. de la Bible", IV, 666-668).

(b) Versions.—The importance of the ancient versions in the textual criticism of the Sacred Books arises from the fact that the versions are often far anterior to the most ancient manuscripts. Thus the translation of the Septuagint antedated by ten or twelve centuries the oldest copies of the Hebrew text that have come down to us. And for the New Testament the Italic and the Peshito versions are of the second century, and the Coptic of the third, while the Vatican and the "Sinaiticus" which are our oldest manuscripts, date only from the fourth. These translations, moreover, were made on the initiative and under the supervision of the ecclesiastical authorities, or at least approved and sanctioned by the Churches that made public use of them, have undoubtedly followed the exemplars which were esteemed the best and which were retained by posterity as models of purity. Unfortunately, the use of versions in textual criticism offers numerous and sometimes insurmountable difficulties. First of all, unless the version be quite literal and scrupulously faithful, one is often at a loss to determine which of the variations which it introduces is due to a corruption of the text or to an error. Furthermore, we have few or no ancient versions edited according to the exigencies of rigorous criticism; the manuscripts of these versions differ from one another considerably, and it is often hard to trace the primitive reading. When there have been several versions in the same language, as is the case, for example, in Latin, Syriac, and Coptic, it is seldom that one version has not in the long run reacted on the other. Again, the different copies of a version have frequently been retouched or corrected according to the original, and at various epochs some sort of recensions have been made. The case of the Septuagint is well enough known by what St. Jerome tells of it, and by the examination of the manuscripts themselves, which offer a striking diversity. For these various reasons the use of the versions in textual criticism is rather a delicate matter, and many critics try to evade the difficulty by not taking them into account. But in this they are wrong, for we can never pass judgment on what use the Septuagint version may be put in the reconstruction of the primitive text of the Old Testament.

(c) Quotations.—That the textual criticism of the Greek New Testament, the Septuagint and the Vulgate has profited by quotations from the Fathers is beyond question; but in using this authority there is need of caution and reserve. Very often Biblical texts are quoted from memory, and many writers have the habit of quoting inaccurately. In his Prolegomena to the eighth edition of Tischendorf (pp. 1141-1142), Gregory gives three very instructive examples on this subject. Charles Hodge, the author of every reader, and the "system" which has been called after him, has the quotation from Genesis, iii, 15, "The seed of the woman shall bruise the serpent's head", was a serious inaccuracy, refused to change it on the ground that this translation had passed into use. In his history of the Vulgate the learned Kaulen twice quoted the "well-known saying of St. Augustine, once accurately: "verbum tenacius est totius pericleris"", and once inaccurately: "verbum tenacius est totius sermonis perspicuus". Finally, out of nine quotations from John, iii, 3-5, made by Jeremy Taylor, the celebrated theologian, only two agree, and not one of the nine gives the words of the Anglican version which the author meant to follow. Surely we should not look for greater rigour or accuracy from the Fathers, many of whom lacked the critical spirit. Furthermore, it should be noted that the text of our editions is not always to be depended upon. We know that copyists, when transcribing the works of the Fathers, were often in doubt as to the exact wording; and it is difficult to say whether they substitute for Biblical quotations that form of text with which they are most familiar, and even the editors of former times were not very scrupulous in this respect. Would anyone have suspected that in the edition of the commentary of St. Cyril of Alexandria on the fourth Gospel, published by Pusey in 1872, the text of St. John, instead of being reproduced from St. Cyril's manuscript, is borrowed from the New Testament printed at Oxford? From this standpoint the edition of the Latin Fathers undertaken in Austria and that of the ante-Nicene Greek Fathers published at Berlin, are works of entire confidence. Quotations have a greater value in the eyes of the critic when a commentary fully guarantees the text; and the authority of a quotation is highest when a writer whose reputation for critical habite is well established, such as Origen or St. Jerome, formally attests that a given reading was to be found in the best or most ancient manuscripts at some time. It is only too possible that such evidence overrules that furnished by a single manuscript of the same epoch.

(2) Internal or Parodiagramatic Evidence.—It frequently happens that the testimony of documents is uncertain because it is discordant, but even when it is unanimous, it is not uncommon to find that the text leads to improbable or impossible results. It is then that internal evidence must be resorted to, and, although of itself it seldom suffices for a firm decision, it nevertheless corroborates, and sometimes modifies, the verdict of the documents. The rules of internal criticism are simply axioms of grammar and congruity to the purport of the rest of the sentence and of the larger context; to which may rightly be added congruity to the usual style of the author and to his matter in other passages. The process may take the form either of simply comparing two or more rival readings under these heads, and
giving the preference to that which appears to have the advantage, or of rejecting a reading absolutely for violation of one or more of the congruities, or of adopting a reading with all the difficulties it presents. The application of this rule rarely produces certainty; it usually leads only to a presumptive assumption of perfection of truth. The reader is all too liable to imagine that he penetrates their thought, and to make them talk as he himself would have talked on a like occasion. It is but a step from this to conjectural criticism which has been seen to be inextricably involved in the phraseology of the text.

Rule 2. Among several readings that is preferable which explains all others and is explained by none. — Gregory, in his “Prolegomena” (8th critical ed. of the New Testament by Tischendorf, p. 63), says apropos of this rule: “Hoc si latiore vel latissimo sensu accepistis, omnium regularum principium haberi potest; sed est eum modi quod alias alter iure quidem suo, ut cuique videtur, definit sequaturque.” It is, in fact, subject to arbitrary applications, which only proves that it must be employed with prudence and circumspection.

Rule 3. Where both readings are equally difficult is also the more probable. — “Procli scptioni praeferendum” (Bengel). Although it may seem entirely paradoxical, this rule is, in a certain measure, founded on reason, and those who have contested it most vigorously, like Wetstein, have been obliged to replace it with something similar. But it is true only on condition that the clause be added “ad all other things being equal; else we should have to prefer the barbarisms and absurdities of copists solely because they are more difficult to understand than the correct expression or the intelligently turned phrase. Indeed, copists never change their text merely for the pleasure of rendering it obscure or corrupting it; on the contrary, they rather try to explain or correct it. Hence a harsh expression, an irregular phrase, and an overlooked thought are possibly primitive, but always, as we have said, on this condition: ceteris paribus. Nor must it be forgotten that the difficulty of the reading may arise from copists’ mistakes, such as, for instance, to describe or the defects of the exemplar which he copies. Rule 4. The shortest reading is, in general, the best. — “Brevere lectio, nix testium vetusorum et gravium auctoritate petitus est vestitatur, preferenda est vestri. Librariam enim multo proniciores ad addendum furuent, quam ad omnium (Griesbach). The reason given by Griesbach, author of this rule, is confirmed by experience. But it should not be too generally applied; if certain copists are inclined to put in an insufficiently authorized interpolation, others, in their haste to finish the task, are either deliberately or unknowingly guilty of omissions or abbreviations. We are, therefore, bound to be cautious in applying the rules of textual criticism, as the readings, even as they can be of any use, are suggested by common sense. Other norms formulated by certain critics are based on nothing but their own imaginations. Such is the following proposed by Griesbach: “Inter plures unius loci lectiones ea pro suspecta merito habeatur quae orthodoxorum dogmatibus manifeste prae ceteris factae.” It would then follow that the variants suspected of heresy have all the probabilities in their favor, and that heretics were more careful of the integrity of the sacred text than were the orthodox. History and reason combined protest against this principle.

C. Conjectural Criticism. — As a principle, conjectural criticism is not inadmissible. In fact, it is possible in that all existing documents, manuscripts, writings, and quotations, there are primitive errors which can only be corrected by conjecture. The phrase primitive errors is here used to denote those that were committed by the scribe himself in dictated works or that crept into one of the copies substituted for the original. The criterion of all the documents that have come down to us. Scrivener, therefore, seems too positive when he writes (“Introduction”, 1894, Vol. II, p. 224): “It is now agreed among competent judges that Conjectural Emendation must never be resorted to even in passages of acknowledged difficulty; the absence of proof of the correctness of the reading and the complete absence of difficulties in the text of the common one is actually supported by some trustworthy document being of itself a fatal objection to our receiving it.” Many critics would not go thus far, as there are passages that remain doubtful even after the efforts of documentary criticism have been exhausted, and we are left to be bidden to seek a remedy in critical conjecture. Thus Hort justly remarks (“Introduction”, 1896, p. 71): “The evidence for corruption is often irresistible, imposing on an editor the duty of indicating the presumed unsoundness of the text, although he may be wholly unable to propose any endurable way of correcting it, or have to offer only suggestions in which he cannot place full confidence.” But he adds that, in the New Testament, the role of conjectural emendation is extremely weak, because of the abundance and variety of documentary evidence, and he agrees with Scrivener in admitting that the conjectures proposed are often entirely arbitrary. Comments are, however, fortunate, and of such a nature as to satisfy only their own inventor. To sum up, conjectural criticism should only be applied as a last resort, after every other means has been exhausted, and then only with prudent scepticism.

D. Application of the principles and processes of textual criticism. — It remains briefly to explain the modifications which the principles of textual criticism undergo in their application to Biblical texts, to enumerate the chief critical editions, and to indicate the methods followed by the editors. We shall here speak only of the Hebrew text of the Old Testament and of the Greek text of the New.

1. Hebrew text of the Old Testament. (a) The critical apparatus. — The number of Hebrew manuscripts is very great. Kennicott (“Dissertatio generalis in Vet. Test. hebraicum”, Oxford, 1780) and De Rossi (“Variae lectiones in Vetus Testamentum” 1784–88) have catalogued over 1300. Since their day this figure has greatly increased, thanks to discoveries made in Egypt, Arabia, Mesopotamia, and above all in the Crimea. Unfortunately, for the reason given above under A. Necessity and Processes, the Hebrew manuscripts are comparatively recent; none is anterior to the tenth century or at any rate the ninth. The “Codex Babylonicus” of the Prophets, now at St. Petersburg and bearing the date 916, generally passes for the oldest. According to Ginsburg, however, the manuscript numbered “Oriental 4445” of the British Museum dates back to the middle of the twelfth century. But manuscripts on papyrus are not to be trusted. (See on this subject, Neubauer, “Earliest MSS. of the Old Testament” in “Studia Biblica”, III, Oxford, 1891, pp. 22–36.) When the Hebrew manuscripts are compared with one another, it is amazing to find how strong a resemblance exists. Kennicott and De Rossi, who collected the variants, found hardly any of importance. This fact produces at first a favourable impression, and we are inclined to believe that it is very easy to restore the primitive text of the Hebrew Bible, so carefully have the copists performed their task. But this impression is modified when we consider that the manuscripts agree even in material imperfections and in the most conspicuous errors. Thus they all present, in the same places, letters that are larger or smaller than usual, that are placed above or below the line, that are inverted, and sometimes unfinished or broken.
Again, here and there, and precisely in the same places, may be noticed spaces indicating a hiatus; finally, on certain words or letters are points intended to annul them. (See Cornill, "Einleitung in die Kanzon. Bücher des A. T.", 5th ed., Tübingen, 1905, p. 310.) All these considerations led Kitzinger to suggest that the famous Paul de Lagarde to prove (Anmerkungen zur griechischen Uebersetzung der Proberiiben, 1863, pp. 1, 2) that all the Hebrew manuscripts known come down from a single copy of which they reproduce even the faults and imperfections. This theory is now generally accepted, and the opposition it has met has only served to make its success more evident. It has even been made more specific and has been proved to the extent of showing that the actual text of our manuscripts was established and, so to speak, canonized between the first and second century of our era, in an epoch, that is, when, after the destruction of the Temple and the downfall of the Jewish nation, all Judaism was reduced to one school. In fact, this text does not differ from that which St. Jerome used for the Vulgate, Origen for his Hexapla, and Aquila, Symmachus, and Theodorus for their versions of the Old Testament, although it is far removed from the text of the Septuagint.

As centuries elapsed between the composition of the various books of the Old Testament and the determination of the Masoretic text, it is but likely that more or less serious modifications were introduced, the more so as, in the interval, there had occurred two events highly unfavorable to textual correctness, namely a change in writing—the old Phoenician having given way to the square Hebrew—and a change in spelling, consisting, for example, of the separation of words formerly united and in the frequent and rather irregular use of mairres lections. The variants that supervened may be accounted for by comparing parallel parts of Samuel and Kings with the Paralipomena, and above all by collating passages twice reproduced in the Bible, such as Ps. xviii (xviii) with II Sam., xxii, or Is., xxxvi–xxxix, with II Kings, xviii, 17–xx, 19. (See Touzard, "De la conservation du texte hébreu" in "Revue biblique" VI (1897), 31–47, 183–206; VII (1898), 511–524; VIII (1899), 83–108.)

An evident consequence of what has just been said is that the comparison of extant manuscripts enlightens us on the Masoretic, but not on the primitive text. On the latter subject the Mishna and, for still stronger reasons, the remainder of the Talmud cannot teach us anything, as they have no connexion with the constitution of the Masoretic text; nor can the Targums, for the same reason and because they may have since been retouched. Therefore, outside of the Masoretic text, our only guides are the Samaritan Pentateuch and the Septuagint version. The Samaritan Pentateuch offers us an independent recension of the Hebrew text, dating from the fourth century before our era, that is, from an epoch in which the Samaritans, under their high-priest Manasseh, separated from the Jews; and this recension is not suspected of any important modifications except the rather inoffensive, in the nature of substitutions or of Gerizim for Mount Hebal in Deut., xxvii, 4. As to the Septuagint version, we know that it was begun, if not completed, about 280 n. c. To Paul de Lagarde especially belongs the credit of drawing the attention of scholars to the value of the Septuagint for a critical edition of the Hebrew Bible. The use of the critical apparatus. The Samaritan Pentateuch, and the Septuagint version of the Hebrew text.—After the publication of the Psalms at Bologna in 1477, of the Pentateuch at Bologna in 1482, of the Prophets at Soncino in 1495, and of the Hagiographa at Naples in 1497, the entire Old Testament appeared at Soncino (1488), at Naples (1491–93), at Brescia (1494), at Padua (1514–15), and at Augsburg between 1516 and 1568, came the four Rabbinic Bibles of Venice. It is the second, edited by Jacob ben Chayim and printed by Bomberg in 1524–1525, that is generally looked upon as containing the textus receptus (received text). The list of the innumerable editions which followed is given by Pick in his "History of the Printed Editions of the Old Testament" (1881), p. 124. All later editions are dependent on the original ones, for the most important editions see Ginsburg, "Introduction to the Masoretic-critical edition of the Hebrew Bible" (London, 1897), 779–976. The editions most frequently reprinted are probably those of Van der Hooft, Hahn, and Theile; but all these older editions are now supplanted by those of Baeer and Delitzsch, of Ginsburg, and Kittel. The textus receptus is correct. The Baeer and Delitzsch Bible appeared in fascicules at Leipzig, between 1896 and 1895, and is not yet complete; the entire Pentateuch except Genesis is wanting. Ginsburg, author of the "Introduction" mentioned above, has published an edition in two volumes (London, 1894). Finally, Kittel, who had called attention to the necessity of a new edition (Ueber die Notwendigkeit und Möglichkeit einer neuen Ausgabe der hebräischen Bibel, Leipzig, 1902) has just published one (Leipzig, 1905–06) with the assistance of several collaborators, Ryssel, Driver, and others. Almost all the biblical editions reproduce the textus receptus by correcting the typographical errors and indicating the interesting variants; all adhere to the Masoretic text, that is, to the text adopted by the rabbis between the first and second centuries of our era, and found in all the Hebrew MSS. A group of German and American scholars, under the direction of Haupt, have undertaken an edition which claims to go back to the primitive text of the sacred authors. Of the twenty parts of this Bible, appearing in Leipzig, Baltimore, and London, and generally known under the name of the "Polyglott Bible", sixteen have already been published: Genesis (Ball, 1899), Leviticus (Driver, 1894), Numbers (Paterson, 1900), Joshua (Bennett, 1895), Judges (Moore, 1900), Samuel (Buddle, 1894), Kings (Stade, 1904), Isaiah (Cheyne, 1899), Jeremiah (Cornill, 1895), Ezekiel (Toy, 1899), Psalms (Wellhausen, 1895), Proverbs (Kautzsch, 1901), Job (Siefried, 1899), and Chronicles (Kittel, 1895); Deuteronomy (Smith) is in press. It is needless to state that, all who have thus far endeavored to restore the primitive text of certain books, the editors of the "Polyglott Bible" allow a broad margin for subsequent critical conjectures. desktop critical apparatus. 2. Greek text of the New Testament. (a) Use of the critical apparatus. The Greek text of the New Testament. (b)桌面的批判性 apparatus.
(b) Brief history of the critical editions and principles followed by editors.—The first New Testament published in Greek is that which forms the fifth volume of the Polyglot of Alcala, the printing of which was finished in 1569, 1580, and 1581, the first three at Paris and the fourth at Geneva, although founded on the text of the Polyglot of Alcala, presented variants from about fifteen manuscripts, and into the last, that of 1581, was introduced the division of verses now in use. Theodore Beza’s ten editions which appeared between 1565 and 1611 differ but little from the last of Robert Estienne’s. The Elsevier brothers, Bonaventure and Abraham, printers at Leyden, followed Estienne and Beza very closely; their small editions of 1624 and 1653, so convenient and so highly approved by booklovers, furnish what has been agreed upon as the tezze receptus—textus erga omnes dignus de omnibus in quo nihil immutatum aut corruptionem damus” (Edition of 1633). It must suffice to mention here the editions of Courcelles (Amsterdam, 1658) and of Fell (Oxford, 1675), both of which add many new readings to that of Estienne, but enrich it by the addition of variant manuscripts resulting from the collection of numerous manuscripts. The principal editors who followed—Wetstein (Amsterdam, 1751-1752), Matthaei (Moscow, 1782-1788), Birch (Copenhagen, 1788), and the two Catholics, Alter (Vienna, 1786-1787), and Scholz (Leipzig, 1830-1836) are noted chiefly for the abundance of new manuscripts which they discovered and collated. But we must here limit ourselves to an appreciation of the latest and best-known editors, Griesbach, Lachmann, Tregelles, Tischendorf, Westcott and Hort.

In his second edition (1796-1806) Griesbach, applying the theory that had previously been suggested by Bengel and subsequently developed by Semler, distinguished three great families of texts: the Alexandrian family represented by the codices A, B, C, by the Coptic versions, and the quaternions of Origen; the Western family, represented by D of the Greek, in the Acts, by the bilingual codices, the Latin versions, and the Latin Fathers; and lastly the Byzantine family, represented by the mass of other manuscripts and by the Greek Fathers from the fourth century onward. Agreement between two of these families would have been decisive; but, unfortunately, Griesbach’s classification is questioned by many, and it has been proved that the agreement between Origen and the so-called Alexandrian family is largely imaginary. Lachmann (Berlin, 1842-1850) endeavoured to reconstruct his text on too narrow a basis. He took as a correct text one which was either entirely unknown or imperfectly known, and of the ancient Latin versions. In his choice of readings the editor adopted the majority opinion, but reserved to himself the conjectural amendment of the text thus established—a defective method which his successor Tregelles has not sufficiently avoided. The last edition of 1797-1807, which is the last that was completed by his friends. Tischendorf contributed no less than eight editions of the New Testament in Greek, but the differences among them are decidedly marked. According to Scrivener (Introduction, II, 280) the seventh edition differs from the six preceding, and in 1865 it goes back to the received text. After the discovery of the “Scrip¬

Criticism, Historical, is the art of distinguishing the true from the false concerning facts of the past. It has for its object both the documents which have been handed down to us and the facts themselves. We may distinguish three kinds of historical sources: written documents and ex post facto traditions. As further means of reaching a knowledge of the facts there are three processes of indirect research, viz.: negative argument, conjecture, and a priori argument. It may be said at once that the study of sources and the use of indirect processes will avail little for proper criticism if one is not guided chiefly by an ardent love of truth such as will prevent him from turning aside from the object in view through any prejudice, religious, national, or domestic, that might trouble his judgment. The rôle of the critic differs much from that of an advocate. He must, moreover, consider that he has to fulfil not only the duty of a disinterested magistrate and an expert jurymen, for whom elementary probity, to say nothing of their oath, makes it a conscientious duty to decide only on the fullest possible knowledge of the details of the matter submitted to their examination, and in keeping with the conclusion which they have drawn from these details; guarding themselves at the same time against that false feeling either of affection or of hatred respecting the litigants. But inexorable impartiality is not enough; the critic should also possess a fund of that natural logic known as common sense, which enables us to estimate correctly, neither more nor less, the value of a conclusion in strict keeping with given facts. If, moreover, the investor of the "Scrip¬

one in 3369 places. Such an amount of variation can only inspire distrust. Nor did the edition contributed by Westcott and Hort (The New Testament in the Original Greek, Cambridge and London, 1881) win universal approval, because, after eliminating in turn each of the great families of documents which they designate respectively as Syrian, Western, and Alexandrian, the editors rely almost exclusively on the "Neutral" text, which is only represented by the "Vaticanus" and the "Sinaiticus", and, in case of disagreement between them, prefer the "Vaticanus" alone. The excessive preponderance thus given to a single manuscript was criticized in a special manner by Scrivener (Introduction, II, 284-297). Finally, the edition announced by Von Soden (Die Schriften des N. T. in ihrer ältesten erreichbaren Textgestalt) gave rise to lively controversies even before it appeared. (See "Zeitschrift fur neutest. Wissenschaft", 1907, VIII, 34-47, 110-124, 234-237.) All this would seem to indicate that, for a time to come, we shall not have a definite edition of the Greek New Testament.

The encyclopedias and dictionaries of the Bible have no separate article on textual criticism which deals in a particular manner with Biblical texts, but most of the Introductions to Scripture dedicate one or several pages to the subject. Usu¬

which elements often appear quite meaningless to the untrained observer, we may consider him thoroughly fitted for the study of criticism. He must now proceed to familiarize himself with the historical method, i.e. with the rules of the art of historical criticism. In the remainder of this article we shall present a brief résumé of these rules apropos of the various kinds of documents and processes which the historian employs in determining the relative degrees of certainty with which he attributes to the facts that engage his attention.

**Written Documents.—** There are two kinds of written documents. Some are drawn up by ecclesiastical or civil authority, and are known as public documents; others, emanating from private individuals and possessing no official guarantee, are known as private documents. Public documents, all such documents raise at once three preliminary questions: (1) authenticity and integrity; (2) meaning; (3) authority.

**Authenticity and integrity.—** Does the document which confronts us as a source of information really belong to the time and the author claimed for it, and do we possess it in the shape in which it left that author’s hand? There is little or no difficulty in the case of a document printed during the author’s lifetime, and given at once a wide distribution. It is otherwise when, as often happens, the document is both ancient and rare. The nature of these writings is historical, or auxiliary works of history, e.g. paleography, diplomacy, epigraphy, numismatics, sigillography, or sphylographies, furnish practical rules that generally suffice to determine approximately the age of a manuscript. In this preliminary stage of research we are aided by the nature of the material on which the manuscript is written, e.g. papyrus, parchment, cotton or rag paper; by the system of abbreviations employed, character of the handwriting, ornamentation, and other details that vary according to countries and epochs. It is rare that a document claiming to be an original or an autograph, when submitted to such a series of tests, leaves room for reasonable doubt regarding its authenticity or non-authenticity. More frequently, however, ancient documents survive only in the form of copies, or copies of copies, and their verification thus becomes more complicated. We must pass judgment on each manuscript and compare the manuscript with other manuscripts or copies, comparing the handwriting, or, as the case may be, the manuscripts, and, by the rules of paleography, on the other, it reveals a number of variant readings. In this way it becomes possible to designate some as belonging to one family, i.e. as transcribed from one original model, and thus eventually more or less to form the class of the original or the primitive text as it left the author’s hand. Such labour (merely preliminary, after all, to the question of authenticity), were every one forced to perform it, would deter most students of historical science at the very outset. It becomes, however, daily less necessary. Men specially devoted to this important and arduous branch of criticism, and of a literary probity beyond suspicion, have published and continue to publish, with the generous aid of their governments and of learned societies, more or less extensive editions of ancient historical sources which place at our disposal, one might almost say more advantageously, the manuscripts themselves. In the prefaces of these scholarly publications all the known manuscripts of each document are carefully described, classified, and often partially represented in fac-simile, thereby enabling us to verify the paleographic features of the manuscript in question. The edition itself is usually made after one of the best manuscripts. The so-called auxiliary sciences, i.e. we find an exact summary (sometimes in apparently excessive detail) of all the variant readings found in the other manuscripts of the text. With such help the authenticity of a work or of a text may be discussed without searching all the libraries of Europe or tiring one’s eyes in deciphering the more or less legible handwriting of the Middle Ages.

By being classified and classified, we must examine whether all, even the most ancient, bear the name of the author to whom the work is generally attributed. If it be lacking in the oldest, and be found only in those of a later date, especially if the name offered by the earlier manuscripts differ from that given by the later copies, we must regard certain characters of the transcription. Such doubt will often occur apropos of a passage not met in the oldest manuscripts, but only in the more recent, or vice versa. Unless we can otherwise explain this divergence, we are naturally justified in suspecting an interpolation or a mutilation in the later manuscripts. While the authenticity of a manuscript may be presumed, the truth is, however, that, in the case of manuscripts, it is possible further to confirm it by the testimony of ancient writers who quote the work under the same title, and as a work of the same author; such quotations are especially helpful if they are rather extensive and correspond well to the text as found in the manuscripts. On the other hand, if one or several of such quoted passages are not met with in the manuscript, or if they be not reproduced in identical terms, there is reason to believe that we have not before us the document quoted by ancient writers or at least that our copy has suffered notably from the negligence or bad faith of a later editor. The writer, the authenticity, called extrinsic as they are based on testimony foreign to the author’s own work, may be added certain intrinsic signs based on an examination of the work itself. When dealing with official and public acts care must be taken to see that not only the handwriting, but also the opening and closing formulae, the titles of persons, the manner of noting dates, and other similar corroborative indications conform to the known customs of the age to which the document is attributed. Amid so many means of verification it is extremely difficult for a forgery to escape detection. Words and phraseology furnish another test. Each century possesses its own peculiar diction, and amid so many pitfalls of this nature it is scarcely possible for the forger to cloak successfully his misdeed. This is also true for the style of each particular author. In general, especially in the case of the great writers, each one has his own peculiar stamp by which he is easily recognized. Treating, or what is more, inclining to the same pen compositions quite unequal in style. In the application of this rule, no doubt, care should be taken not to exaggerate. A writer varies his tone and his language according to the subject of which he treats, the nature of his literary composition, and the persons to whom he addresses it; and, nevertheless an acute and practised mind will have little difficulty in recognizing among the various works of a given author certain qualities which betray at once the character of the writer and his style or habitual manner of writing. Another and a surer means for the detection of positive forgery or the alteration of a document is the commission of anachronisms in facts or dates, the mention in a work of persons, institutions, or customs that are certainly of a later date than the period to which it claims to belong; akin to this are plagiarism and the servile imitation of more recent writers.

**Meaning.—** The critic must now make the best possible use of the written sources at his disposal, i.e. he must understand them well, which is not always an easy matter. His difficulty may arise from the obscurity of certain words, from their grammatical form, or from their grouping in the phrase he seeks to interpret, or from the way in which it is interpreted. To these it is supremely important that the critic should be able to read the documents in the language in which they were written rather than in translations. Doubtless there are excellent translations, and they may be very helpful; but it is always dangerous to trust them blindly.
The scholar who enters conscientiously upon the work of criticism will always feel it a strict duty to warn his readers whenever he quotes a text from a famous authority. It is a fact unfavourable to the religious or political cause which he otherwise defends with much acumen that he thus gains no particular advantage, but on the contrary subjects himself to serious disadvantage; in a word, whenever his statements or avowals are in manifest opposition to his interests, his prejudices, and his inclinations, it is clear that his evidence is far weightier than that of a perfectly impartial authority. Again, if the preceding considerations apply not only to the immediate witnesses of the fact in question, but also to all the intermediaries through whom their evidence is transmitted to us. The trustworthiness of the latter must be established as well as that of the authorities to which they appeal.

Given the necessity of observing so much caution in the use of historical texts, it may appear very difficult to reach complete certainty regarding the facts of history. How may we be sure, especially in dealing with ancient times, that our witness presents every desirable guarantee? Often he is scarcely known to us, or quite anonymous. How many facts that could be established, have been eliminated from the pages of history. And for how many more must we indefinitely suspend our judgment for lack of sufficiently convincing authority. Historical certitude would indeed be difficult to reach if for each fact we had but one isolated piece of evidence. Fundamentally, this is possible only when it could be shown that the character and position of a witness were such as to preclude any reasonable doubt as to the exactness of his statements. But if the veracity of the witness is guaranteed only by negative data, i.e. if we are merely aware that no known circumstances warrant us in suspecting carelessness or bad faith, there arises in us a more or less vague belief, such as we easily accord to any quite unknown person who seriously relates an event which he says he has seen, while on our part we have no reason to suppose either that he himself is deceived or that he is deceiving us. Strictly speaking, our belief in such a witness cannot be called a halting faith. On the other hand it differs considerably from a belief that is based on more solid foundations. We shall not, therefore, be much surprised if the occurrence be later described in an entirely different manner, nor shall we be inclined to abandon a former belief when better informed by more reliable witnesses. We must our passions would be to blame for causing us to hold to a belief, flattering perhaps, but unsupported by sufficient evidence. We frankly admit, therefore, the possibility of a more or less wavering mental adhesion to facts that rest on a single testimony and whose value we are unable properly to appreciate. It is otherwise in the case of facts confirmed by several witnesses placed in entirely different conditions. It is very difficult, nay generally speaking morally impossible, that three, four, or even more persons, not subject to any common influence, should be deceived in the same manner, or arrive at the same conclusion. When, therefore, we find a fact established by several statements or narratives taken from different sources, yet all concordant, there is scarcely any further room for reasonable doubt as to the entire truth of the fact. At this stage, however, we must be very certain that the historical sources are truly different. Ten or twenty writers who copy the narrative of an ancient author, without any new source of knowledge at their disposal, in general add nothing to the authority of him from whom they have gleaned their information. They are but echoes of an original testimony, already well known. It may happen, however, that in some localities or at some time the witness on different sources exhibit more or less disagreement. How then shall we form our judgment?

Right here an important distinction is necessary. The various narratives of a fact often exhibit a perfect
harmony as to substance, their divergence appearing only in matters of detail upon which information was had with greater difficulty. In such cases the partial disagreement of the witnesses, far from lessening their authority regarding the principal fact serves to confirm it; disagreement of this kind shows on the one hand an absence of collusion, and on the other a reliance of witnesses on certain sources of information common to all. There is, however, an exception. It may happen that several writers, whose veracity we are otherwise justified in suspecting, agree in narrating with much precision of detail a fact favourable to their common likes and dislikes. They either report it as eye-witnesses or they declare that they reproduce facts relative to events concerning which they have no personal experience. In such cases with writers of this character the critic must examine carefully all their statements, down to the minutest detail; often a very insignificant circumstance will reveal the deception. We may recall here the ingenious questioning by which Daniel saved the life and reputation of Susanna (Dan., xiii, 52-60). Similar means are often employed with success in the law courts to overthrow clever systems of defence built up by culprits, or to convict a party who has suborned false witnesses in the interest of a bad cause. Occasionally such measures might be advantageously applied in the conjectural examination of the evidences we measure, there exists a conflict of opinion about the substance of a fact, and that it has been found impossible to reconcile the witnesses. It is clear that they disagree. At this point, evidently, we must cease to insist on their absolute value and weigh them one against the other. Keeping always in view the circumstances of time, place, and personal position of the different witnesses, we must seek to ascertain in which of them the conditions of knowledge and veracity appear to predominate; this examination will determine the measure of confidence to be reposed in them, and, consequently, the greater value or probability that attaches to the fact they narrate. Frequently, though no indispensable preliminary of mental conviction, a careful comparison of more or less discordant versions of a fact or an event will reveal in the rejected witnesses the very sources or causes of their errors, and thereby exhibit in much clearer light the complete solution of problems whose data seemed at first sight confused and contradictory.

Unwritten Testimony.—To hang a man, a clever examining magistrate does not always need one line of his writing. Silent witnesses have often convicted a criminal more efficaciously than positive accusers. The frequent object or servant, knowing him well from the time of his crime, another found in his possession, an uncommon degree of prodigality, a hundred other equally trifling tokens, lay bare very often the most ingeniously planned schemes for avoiding detection by the law. Even so in the science of history. Here nothing is negligible (or unimportant). Monuments of architecture, objects of plastic art, coins, weapons, implements of labour, household utensils, material objects of every kind may in one way or another furnish us precious information. Certain classes of historical sources have long since attained the dignity of special auxiliary sciences. Such are heraldry, or armorial science; glyptics, which deals with engraved stones; ceramics, or the study of pottery in all its epochs. To these we may add numismatics, sigillography, and especially linguistics, not so much for a aurer interpretation of the texts as for procuring data from which may be conclusively established the origin of peoples and their institutions. Archeology, in its broadest sense, comprehends all these sciences; in its most restricted sense it is confined to objects which are beyond their scope. Truly it is a vast province that here spreads out before the historical pioneer, and he needs much erudition, acumen, and tact to venture therein. Fortunately, as with manuscripts and inscriptions, it is no longer necessary for the historical student to possess a thorough knowledge of all these auxiliary sciences before entering on his proper task. For most of them there exist excellent special works in which we may easily find any archeological details needful in the discussion of an historical question. It is to these works and to the advice of men learned in such matters that we must have recourse in order to solve the two preliminary questions regarding all evidence, whether written or unwritten: that of authenticity or provenance, and that of meaning, i.e., in archeological remains, the use to which the objects discovered were once put. In dealing with unwritten evidence these questions are more delicate; similarly the rules for our guidance are much more difficult to apply. It is here, particularly, that shrewdness and acumen, and the prophetic insight that comes of long practice, offer help more important by far than the most exact rules. It is only by dint of observation and comparison that we learn eventually to distinguish with accuracy. These preliminaries once satisfied, we enter on the task of historical criticism properly speaking. Through it these precious relics of the past are called to shed light on certain writings, to confirm their evidence, to reveal a fact not committed to them; more frequently they furnish a sure basis of conjecture which ultimately forms an inestimable gain of great importance. Here, however, and it cannot be repeated too often, the path of the historical student is perilous indeed. The misadventures of amateur archeologists, whether in the matter of pretended discoveries or in dissertations based on them, have probably cost no little raiillery, not only among severely-minded professional critics, but also among romancers and dramatic writers. As already stated, it is especially by the judicious use of conjecture that we obtain from these silent witnesses such information as is in their power to furnish. For more specific treatment of this problem, of historical criticism we refer the reader to a subsequent section of this article: CONJECTURE IN HISTORY.

Tradition.—Every student of history must eventually face a problem very embarrassing for a conscientious scholar. Facts appear which have left no traces in any writing or contemporary monument. Buried in obscurity for centuries they suddenly appear in publicity and are accepted as incontrovertible. Every one repeats the story, often with minute detail, though no one is able to offer any credible evidence of the trustworthiness of the current statement or narrative. It is then said that such facts rest on the evidence of tradition, and the methods of historical criticism are held to be powerless against them. Perhaps a rather natural comparison will help us to a clear solution of this question. We may note at once a striking analogy between tradition concerning the past and public rumour about present events. There are in both cases numberless intermediary and anonymous witnesses, concordant as to the substance of the facts, but as to the details often quite contradictory of one another; in both cases also there is an identical ignorance concerning the original witnesses; in both cases, finally, many instances in which the current information was verified and many others in which it was found to be altogether false. Let us suppose the case of a prudent man from the hinterland, who upon hearing the news from a traveler, proceeds to the nearest city to examine with all possible accuracy what is happening in a distant country; one who, moreover, takes much pains to be well informed. What does he do when he learns by public rumour of an important event said to have occurred in the place in which he is interested? Does he accept blindly every detail thus bruited abroad? On the other hand, does
he pay no attention whatever to rumour? He does neither. He gathers eagerly the various narratives current and compares them with one another, notes their points of agreement, and their elements of divergence. Nor does he conclude in haste. He suspends belief, he does not report to his friends who are on the spot to learn from them reliable news, i.e., confirmation of the facts on which men agree, solutions of the difficulties which arise from discordant versions of the event. Possibly he has no confidence in the persons charged with drawing up the official reports; possibly, too, he cannot correlate the versions from one to another. All these communications by reason of war or other causes. In a word, if such a man found himself dependent on public rumour alone he would remain indefinitely in a state of doubt, content with a more or less probable knowledge until some more certain source of information offered.

Why should we not deal similarly with popular tradition? It appeals in just this way to our attention and we have the same motives for mistrusting it. More than once it has been helpful to judicious critics and pointed the way to important discoveries which they would not have made without it. In hand, is a collection of the documents or monuments. Let us look at the matter in another way. Have not all students of historical documents come across the same peculiar, one might say capricious mixture of true and false which meets us at every step in the case of popular traditions? It would be equally rash on the one hand to reject all tradition and place faith only in written testimony or contemporary monuments; and on the other to accord to tradition an implicit confidence merely because it was not formally contradicted by other historical data, though it received from them no confirmation. The historian should collect with care the popular traditions of the countries and epochs he is treating, compare them with one another, and determine their value in the light of other information scientifically acquired. Should this light, too, eventually fail him, he must wait patiently until fresh discoveries renew it, content in the meantime with such measure of probability as tradition affords. In this way the already acquired historical wealth will be retained, yet no danger run of exaggerating its value, or, finally, of casting suspicion on its trustworthiness by incorporating with it false or doubtful statements.

Negative Argument.—The negative argument in history is that which is drawn from the silence of contemporary or quasi-contemporary documents concerning a given fact. The great masters of historical science have often used it with success in their refutation of historical errors, sometimes long intrenched in popular belief. It is to be noted that on such occasions they have always held firmly to two principles: first, that the author whose silence is invoked as a proof of the falsity of a given fact, could not have been ignorant of it had it really occurred as related; second, that if he were not ignorant of the fact, he would not have failed to speak of it in the work before us. The ground of this latter rule is of some weight, for the writer is the negative argument. Whenever all doubt in regard to them is removed, we are quite right in holding that a writer’s silence concerning a fact in question is equivalent to a formal denial of its truth. There is nothing more rational than this process of reasoning; it is a rule laid down in our common law, a legal line of attack or defence broken by purely negative evidence. Honourable men are brought before a judicial tribunal who would certainly, in the hypothesis of their truth, have knowledge of the facts alleged by one of the contending parties. If they affirm that they have no knowledge of them, their depositions are rightly considered as positive of the falsity of the allegations. Now, evidence of this kind does not differ substantially from the negative argument in the above conditions. In one case, it is true, the witnesses formally state that they know nothing, while in the other we learn as much from their silence. Nevertheless this silence, in the given circumstances, is as significant as a positive assertion.

The absence of records or memoranda who claim that a negative argument can never prevail against a formal text. But this assertion is not even admissible respecting a contemporary text. If the writer to whom it belongs does not offer an absolute and incontestable guarantee of knowledge and veracity, his authority may be very much weakened or even destroyed by the silence of a reliable and more trustworthy witness. What happens in courts of law that the deposition of an eye or ear-witness is questioned, or even rejected, in view of the deposition of some other witness, equally well-placed to see and hear all that occurred, but who yet declares that he neither saw anything nor heard anything. Mahillon was certainly wrong in maintaining that the negative argument could never be used unless one had before him all the works of all the authors of the time when the event happened. On the contrary, a single work of a single author may in certain cases furnish a very sound negative argument. Launay, on the other hand, maintains that the universal silence of writers for a period of about two centuries furnishes a sufficient proof of the falsity of facts not mentioned by them; it is quite possible that no author of this period was morally bound by the nature of his subject-matter to state such facts. In this case the silence of such authors is by no means equivalent to a denial. But, it is objected, in order to raise a doubt as to a fact related by later writers, have not the best critics often relied on this universal silence of historians for some considerable time? This is true, but the epoch in question was one already carefully studied and conscientiously described by several historians. Moreover, the disputed fact, if true, would necessarily have been so public, and such, in kind and importance, that neither ignorance nor willful omission could be posited for all these historians. We have here, therefore, the two conditions needed to make inexplicable the silence of these authors; consequently, the negative argument loses none of its strength, and is powerful in proportion to the number of silent witnesses. Of course, this line of argument does not apply in the case of some obscure detail, which may easily have been unknown to, or little remarked by some contemporary authors and quite neglected by others, moreover such documents are almost all extant, especially few historical writings. In the latter case, the fact of a universal silence on the part of all writers for a considerable period, may, indeed, weaken the certainty of a fact; in reality we do no more than ascertain thereby the absence of all positive evidence in its favour, other than a tradition of uncertain origin. However, once the lack of information is admitted, it is not permissible to advance a step further and present the silence of documents as proof of the falsity of the fact. Their silence in this case is not the negative argument as described above.

The rule laid down in the preceding paragraph seems to lack no element of precision and practical advantage. But in applying it to ancient times some caution is necessary. In an age of widespread publicity like our own, no important event can occur in any part of the civilized world without being immediately and everywhere known by word of mouth. But events, indeed, are at once so fixed in the memory of all interested parties that they will not easily be effaced within a long period. It is astonishing to see how easily some modern writers forget that the former conditions of mankind were very different. They seek to establish an irrefutable negative text; but on the hypothesis given public fact of importance could not have been unknown to a certain person of education and refinement who lived shortly afterwards. Such writers
might learn to be more cautious by recalling a series of curious historical facts. It is enough to remind our readers that when St. Augustine was created auxiliary Bishop of Hippo (391) he did not know, on his own authority, that the formula of the Council of Nice (315) forbade any consecration of this kind.

Conjecture in History.—Conjecture or hypothesis occurs in history when the study of documents leads us to suspect, beyond the facts which they directly reveal, other facts, so closely related to them from a historical point of view, that we may proceed to the latter. Such facts are most frequently related as cause and effect. Let an important event happen. How shall we explain it? How was it brought about? Evidently by another fact or a group of other facts which constitute its cause or sufficient reason. These new facts are revealed to us in the documents, and to arrive at least we have hitherto perceived them. At once the investigator sees that here it is possible to discover more than is known from the extant documents. With this hope he begins to read extensively, to set afoot various researches, to interrogate in every sense a great many works and all the monuments relating to the facts and persons concerned in it, the age in which it took place; and in this order to recover the thread which connects this fact with details that were originally unnoticed or set aside as unimportant. Absorbed in intense meditation, sometimes made needlessly obscure by the leaden illumination of the times in which he lived, he seeks the right path, he seeks with earnestness the truth that the positive evidence before him still withholds; he passes from one hypothesis to another; he calls to his aid all the treasures of his memory; thus reinforced he turns again to the study of the documents, and collects with minute care every hint or indication that may avail to demonstrate their accuracy or falsity. From such close verification it sometimes appears that the path first struck out was misleading and must be abandoned; often the investigator is led by this hard toil to modify more or less his original ideas; on the other hand, he sometimes meets with striking confirmation of them. Feeble rays which seemed at first quite uncertain grow in power and number until they seem a torch that pours a flood of light before which all uncertainty must vanish. In this way, also, many new aspects are revealed to the enraptured eye of the investigator, that make known to him a vast field of knowledge of the highest interest.

As already stated conjecture enables us to conclude from effect to cause, but it may also follow an inverse method and help us to conclude from cause to effect. This process, however, is generally less reliable in historical research, and calls for more caution and reserve than when it is applied to physical facts. In the latter case the agents are necessary causes; once their mode of operation is known it is possible to predict with almost absolute certainty their results in given conditions, and conjecture avails us merely to arouse the idea of an effect certain to follow, but which may not be produced. Moreover, generally speaking, in the physical sciences it is easy to imagine a variety of methods by which an hypothesis may be tried and its accuracy verified. In historical science the situation is not quite the same. It deals largely with the moral laws that regulate the actions of free beings, and these are far from being as invariable in their application as physical laws. Much caution is therefore requisite before risking any judgment as to what a man must have done in given circumstances, all the more as his acts may have been influenced by the free acts of others, or by a number of accidental circumstances now unknown to us, but which may have not only modified in a given case the ideas and ordinary sentiments of the person in question. Prudence is not necessary when the hypothesis is principally based on analogy; i.e., when, to complete our knowledge concerning a fact, certain details of which are not known to us from historical documents, we have recourse to another fact strikingly similar to the one under consideration and conclude thence, in a manner sufficiently analogous, a similarity of details that are known to us with certainty only in respect of the second fact. Nevertheless we must not reject absolutely this method of investigation; skilfully treated it may render valuable service. A conjecture appeals to the mind all the more convincingly when it solves at once as a number of facts the whole body of documents that present any sort of correlation. Frequently enough, a given hypothesis, taken separately, yields only slight probability. On the other hand, full certitude often results from the moral convergence of several plausible solutions, all of which point in the same direction. Let it be added that in historical research we shall not easily obtain too many hints nor exceed the limit in verification; also that we must be ever watchful against our own preconceptions that easily tempt us to exaggerate the strength of a conclusion favourable to our hypothesis. Nor must we refuse to consider the arguments that tend to weaken or eliminate the latter. On the contrary, it is precisely in cases of conjecture that the most acute study with most care and sift in every sense so that, given their truth, we may abandon opportunely our too seductive conjecture, or at least modify it, and again and again if needful, until eventually it acquiesce in fact, and that appeal to accuracy and precision as to satisfy the most exacting, a scientific work not being the end of truths which men call erudition. Not every learned historian makes brilliant discoveries on the basis of lucky hypotheses; but learning is generally requisite for such discoveries. In historical scholarship, as in all other walks of life, toil and patience are the usual price of success.

The A Priori Argument.—Historical criticism has at its disposition one other source of truth, the a priori argument, a delicate weapon, indeed, but very useful in all cases provided to a certain extent we are convinced of a fact. In history, this argument is based on the intrinsic nature of a fact, leaving aside the time being all evidence for or against it. In presence of the facts thus bared of all extrinsic relations the a priori process undertakes to show that it does or does not conform to the general laws which regulate the world. These laws fall into three principal classes. The first comprises fundamental or metaphysical laws, e.g., the principle of contradiction, according to which there cannot co-exist in the same subject elements absolutely contradictory of one another, also the principle of causality, according to which no being exists without a cause or sufficient reason for its existence. The second class comprises physical laws which govern the phenomena of the world of nature and the activity of the beings which compose it. To this class also belong the laws which govern spiritual natures and faculties that are independent, or in so far as they are independent, of the action of free will. The third class, finally, comprises the moral laws that govern the activity of free beings, considered as such. No one who has acquired, under good guidance, a little experience of the human heart, will deny the existence of this class of laws, i.e., that in given conditions and under certain influences we can forecast in free beings certain habitual activities. Thus, one well-known law is that no man will love and follow evil for itself, save only when it appears to him in the guise of good; another such law is that a man, unless he be a monster of perversity,
CROAGH PATRICK—"THE SINAI OF IRELAND"

THE CHAPEL ERECTED UPON THE SUMMIT IS FAMOUS AS A PLACE OF PILGRIMAGE
will naturally tell the truth if he have absolutely no interest in lying.

But now, can these three classes of laws, rightly considered, help us to pronounce on the truth of an historic fact? First, if the fact in question present absolutely contradictory and irreconcilable details it must evidently be rejected without further examination. However, it must be clearly proved that there really is an absolute and irreconcilable contradiction between details presented for simultaneous acceptance. It is important, moreover, to ascertain with certainty whether the contradiction affects the substance of the fact, or only accidental circumstances wrongly connected with it in the imagination of the witness, as frequently happens with popular traditions. In such cases it is much safer to detail the facts which need to be rejected as is done when dealing with more or less conflicting testimonies. Physical impossibility, i. e. manifest opposition between well known laws of nature and an historical statement, is also a conclusive argument against the acceptance of such a statement. Non-believers to the contrary notwithstanding, the possibility of miraculous intervention never seriously troubles at this point the judgment of Catholic critics.

They know quite well when to admit, in a particular case, such a possibility. Nor are these cases very frequent. They are also aware that for the acceptance of a miracle rather far greater and more certain evidence than when it is question of purely natural facts. We have in the Catholic process of canonization (see BEATIFICATION AND CANONIZATION) an excellent example of the manner in which the proof of miracles is handled by the tribunal which Catholics most respect. It may not be superfluous to add that prudence suggests a certain hesitation or reserve when the physical impossibility of a fact is in question. The laws of nature are not all so thoroughly understood that we run no danger of confounding a strange or new fact with one utterly impossible. The treatment of moral laws is something more delicate, since they are less absolute in application than physical laws. The mysteries of liberty are even more hidden than those of material nature. Consequently, before asserting the moral impossibility of a fact it is well to consider attentively whether there be not some circumstance, however trivial, which may have acci-
dentially produced a given effect capable of making him act in a manner opposed to the habitual current of his ideas and sentiments. Such exceptions to moral laws, very rare in the multitude, appear more frequently among individuals. Care must be taken, however, not to admit them without good reason; for in opposition to a conjecture that the a priori argument is mostly used; frequently enough conjecture is confounded with it. Indeed, it is often through the effort to reproduce mentally what certain persons in given conditions must have done, that we finally hit on what they did do; the next step is the collection of more precise evidence, such as may confirm and establish quite satisfactorily the truth that we first saw with the eye of the imagination. We should always remember, however, that mere possibility or non-repugnance must not be considered the equivalent of positive probability, any more than mere ignorance of the causes of a fact is equivalent to its improbability, still less its impossibility, when it is sufficiently attested by direct evidence. Superficial or passionate minds are very much exposed to this kind of confusion.

In formulating, as has been done above, the proper rules for the guidance of the mind in its search after historical truth, I would say that the mind must bring to this pursuit certain preliminary qualities and dispositions indicated at the beginning of this article, the first and most essential of which is a sincere and constant love of truth. Nothing can take the place of this sentiment. It is the rule of rules, the vital and efficient principle in all the processes of criticism. Without it they are quite sterile.

CH. DE SMEDT.

Crivelli, CARLO, an Italian painter. Little is known of his life, and his b. and d. are usually reckoned by his earliest and latest signed pictures, 1468-93. He may have been a pupil of Antonio and Bartolommeo Veneziano. Crivelli worked in the style of which he was a master. He early attained a style of his own and his pictures, though sometimes stiff, are decorative and beautiful in colouring. He could not compose, in the modern sense, but was lavish in his treatment of single figures. Architectural features were often introduced by him and life-like fruits and flowers are placed in vivid relief against beautifully finished marbles. Crivelli, it would seem, worked for twenty-two years in cities lying within the Marches of Ancona, especially near Ascoli. He signed himself "Crivellus" and after 1490, when he was knighted by Ferdinand II of Naples, added "miles" to his signature. The cathedral of Ascoli contains a "Virgin and Child" dated 1493. Among his earliest work is the altar-piece of San Silvestro, Massa, signed and dated 1468, while the "Coronation of the Virgin" (1493) in the Oggione Collection, Milan, is probably the latest. The National Gallery, London, has a number of Crivelli's paintings and the galleries of the Continent are also well supplied. His work is best seen in a half light and at a little distance. His more celebrated pictures are: "Madonna and Child" 1476, altar-piece for San Domenico, Ascoli (National Gallery, London); "The Dead Christ" (National Gallery); "Pietà" (Cathedral, Ascoli); "St. Francis of Assisi" (Brussels); "Pietà" (Vatican); "Virgin and Saints" (Lateran).

Leigh Hunt.

Croagh Patrick, a mountain looking out on the Atlantic ocean from the southern shore of Clew Bay, County Mayo, Ireland, called an "Island of the Holy Land." In pagan times it was known as Cruachan Aighil. It rises in a perfect cone to a height of 2510 feet. The account given below is taken from sources that post-date the saint's death by three to four hundred years. There are, however, good reasons to believe that the traditions of the "Aghill or Aghillen" are genuine. St. Patrick was wearied and fatigued when he came to this remote part of the country. He longed to retire for a while to refresh his soul in solitude, and for that purpose, on the Saturday before Ash Wednesday in the year 441, he betook himself to the mountain top. Here he spent the days of Lent, chastising his body with fast, pouring out his heart to God, and entreating Him with prolonged importunity and with tears that the Faith might never fail in the land of Erin. The "Book of Armagh" mentions that God summoned all the saints of Erin, past, present and future, to appear before their Father in the Faith to comfort him with a vision of the teeming harvest of his labours would produce, and to join him in blessing their kinsmen and their country. The "Tripartite Life" relates that when Patrick was on Cruachan Aighil in 441, word was brought to him that a new pope ruled the Church in Rome. The new pope was called Leo the Great, who died in 461, according to Sept., 440. Patrick, as soon as he heard it, dispatched one of his disciples named Munis to bear his filial homage to the Vicar of Christ, to render an account of his labours and his teaching, and to beg a blessing for the infant church in Ireland. The "Annals of
**Croatia** relate that Munia came back from Rome bearing sacred relics which the pope had given him for the purpose that Patric was erecting a church through the country. The same event is briefly referred to in the "Annals of Ulster" under date of 441: "Leo ordained forty-second Bishop of the Church of Rome; and Patrick the Bishop was approved in the Catholic Faith." It adds a special glory to Crag Patrick that the first tribute of homage to the Church to the Chair of Peter was sent from its hoary summit. From that sacred spot, on Holy Saturday, Patrick with outstretched hands solemnly blessed the men of Erin that they might cling to the Faith, and the land of Erin that no poisonous reptile might infest it. Then, refreshed with Divine grace and comforted with the assurance that his labours would fructify forever, he came down from the mountain to celebrate Easter with the little flock he had left at Aughagower.

From the days of the saint himself pilgrims began to do penance on his holy mountain. References to them are found in many pages of the annals of the country. It is recorded that in the year 1113, on the night of the 17th of March, during a thunderstorm, thirty of the pilgrims perished on the summit. The "Annals of Boyle" relate that Hugh O'Connor, King of Connaught, who came to the throne in the year 1212, placed the hands and feet of an avatar who dared to molest a pilgrim on his way to Cragh Patrick. The following document of Pope Eugene IV, dated 28 September, 1432, shows how this ancient pilgrimage was recognized and honoured in Rome. "A relaxation of two years and two quarantines of enjoined penance, under the usual conditions, to those penitents who visit and give alms for the repair of the chapel of St. Patrick, on the mountain which is called Cragh Patrick whither resorts a great multitude of persons to venerate St. Patrick the Sunday before the feast of St. Peter's Chains" (Calendar, etc., of Papal Registers, Vol. IV). From St. Patrick's own time there had been some sort of a little chapel on the summit.

The "Tripartite Life" relates that the apostle himself celebrated Mass on the mountain, from which we infer that he had an altar and a place to shelter it. For several centuries the Archbishops of Armagh paid the relic of the holy mountain to the Archbishops of Tuam on the grounds that it was founded by St. Patrick and that they were his successors; but the Archbishops of Tuam contended that it belonged to their jurisdiction. Finally, Pope Honorius III on the 30th of July, 1216, assigned it to the Archbishops of Tuam (Calendar Pap. Reg., Vol. I). But in penal times when Murrick Abbey on the mountain's base was dismantled, the venerable relic on the summit was demolished. Still the pilgrims never ceased to go there. It was not, however, until 1903 that the chapel on the heights was rebuilt, and then on the 30th of July, Archbishop Healy dedicated it to St. Patrick in the presence of many pilgrims. The day of annual pilgrimage from time immemorial has been the last Sunday in July. On that day about twenty Masses are celebrated within the little chapel while often there have been more than 20,000 persons kneeling without.

Croatia, with Slavonia, an autonomous state. It is bounded on the north by the Danube and the Drave; on the east by Serbia; on the south by the Save; and on the west by Istria, the River Krka, and the Adriatic Sea from Fiume (Ricks) in the north-west to Obrovac on the Dalmatian frontier.

**History.**—The name Croatia is derived from that of a people called Croata (Hrvat, Xropatos), i. e. "the nation ready to defend its home and rights," whose migration from South-western Russia and Galicia of to-day—when known as "White Croats," or "Great Croats" (Veliki Hrvati)—had only Illyrians and Dalmatia began in the early part of the fifth century. There were several migrations at different times. The people settled during the first half of the sixth century in Pannonia Inferior, now Lower Hungary, and on the eastern banks of the Danube. Here they struggled for their very existence with the bloodthirsty people, and then crossed the Drave to Pannonia Superior and Dalmatia, provinces of the Roman Empire, to which they gave the name of Croatia. From 610 to 641 the Croats established their settlements on a firm basis. From that time forward they suffered various vicissitudes owing to the constantly changing political life. The provinces occupied by the Croats were already peopled by Illyrian and Celtic tribes as Roman domains. Friendly terms were maintained, however, and together they made war against the common enemy, the Avars, conquered them, and finally established their own state.

The executive head of the Croats was the ban, a title still in use, and he had unlimited power as leader and governor of the people. Heraclius, the Byzantine emperor, was compelled to abandon his provinces in the western part of the Balkan Peninsula.

At that time the Croats occupied the following provinces: Illyrium, Liburnia, Pannonia, Dalmatia, and a part of Histria, now known respectively as Croatia, Slavonia, Dalmatia, Istria, Bosnia, and Herzegovina. Their kinsmen, the Serbs, settled in Montenegro, Northern Albania, Old Servia, and the western part of the Servian Kingdom. The cities Zara (Zadar or Jadro), Traù (Tragor or Tragurion), Spalato (Spiljet), and Ragusa (Dubrovnik), on the Dalmatian coast, and the islands Veglia (Krk) and Arbe (Rab or Absoros), in the Adriatic, remained Latin in character.

Elsewhere, however, the assimilative power of the Croats was stronger and the Latin race disappeared. Christianity flourished in Illyria, Dalmatia, and the other provinces before the coming of the Croats. At the time of migration the Croats were heathens; they did not accept Christianity until the seventh century, when they and the Serbs were baptized by priests of the Roman Church. The Croats promised the pope that they would be in peace with other nations if he would help them in case an enemy invaded their territory. Pope John IV (640–42) sent the Abbot Martin to the Croatsians, and St. Martin I commissioned John of Ravenna to evangelize this vigorous and adventurous nation.

He created John Archbishop of Salona and Salona itself a city of the Holy Roman Empire to protect it against the invasion of the Croats. Many moved to the neighbouring Spalato. Here John laboured also, and the imperial mausoleum in the palace of Diocletian was converted by the people into a Christian temple. Cyril and Methodius came in 863, devised a special alphabet (the Glagolitic for the translation of the Greek and liturgical books into the Old Slavonic tongue, and spread Christianity through the western part of the Balkan Peninsula. Even before this time bishops resided at Salona (Solin), Nona (Nin), Narona (Mostar), Epidaurus (Ragusa Vecchia), Sucea (Sisak), Mur sia (Ovejek), and Symium (Mitrovica) in the eighth century Croatia was divided into several provinces, the principal of which were the independent territories of White and Red Croatia and the Banatus Sciacienisi et Symiensis. The progress of the people attracted the attention of Charlemagne, who occupied Istria in 788 and Northern Croatia in 792. In the year 800, when he was crowned in Rome, the Croats sent a representative. The rule of Louis the Pious (814–40), whose government was in the hands of favourites, was unfortunate in its consequences for the Croats. Their struggle for freedom lasted from 879 until 925, when the people elected...
their own king, Tomislav, on the field of Đunovo before the cathedral. He was crowned by the legate of John X. The bishops of the kingdom were on the north, the Danube and the Drave; on the east, the River Drina; on the west and south, the Adriatic. The reigns of Zvonimir and Peter Kresimir, successors of Tomislav, are glorious in the records of Croatian history, and both Church and State became free. Native rulers were signed until 1102, when the last, Peter Svachich, died in defence of his country, and Croatia offered the crown to King Coloman of Hungary. The Croats, represented by twelve deputies, administered the oath and stipulated that the new monarch should observe the Constitution and rules of the Croats, exercise the usual police of the Croats, and must study the laws when on Croatian soil, and allow no Hungarian to settle upon Croatian territory. This agreement was only partially kept. Croatia was ruled by the Arpád dynasty from 1102 to 1301, but was not made a part of Hungary. The monarchs never resided permanently in Croatia, but were represented by bans, who, as supreme administrators of the kingdom, convened the legislature, exercised the highest judicial power in the State, and commanded the army. The national sabor regulated the coinage of gold and silver. The Arpád rulers introduced the feudal system in opposition to public opinion, reorganized the nobility, and granted the lands taken from the peasants (tenem) to the holders of titles. During the reign of Croatian rulers the Church flourished. The primas (primate) held the office of chancellor of State and the bishops were the principal advisers, spiritual and temporal, of the kings. There were nine bishoprics. Under the Arpád rulers, a change was made, and new sees were erected suffragan to the ecclesiastical province of Hungary. The following religious orders were represented in the kingdom: the Benedictines, favoured by Croatian rulers; Cistercians, Dominicans, Franciscans, Templars, Hermits of St. Paul, or White Friars. Literature, both secular and religious, made much progress and the arts were cultivated.

Andrew, the last of the Arpád, died while making preparations for war against the Croats and their ban, Paul Šlubich, who had declared for Charles Robert of Anjou, nephew of the King of Naples, as King of Croatia, Bosnia, and Dalmatia. Charles was crowned in the church of St. Stephen in Agram (Zagreb), the capital of the state, by Archbishop Gregory. The family of Anjou occupied the throne of Croatia from 1301 to 1386, mainly through the support of Pope Boniface VIII. Charles as a ruler was an absolutist and a monarchist, eliminating the nobility and the judiciary, and in raising money. His son, Louis the Great (d. 11 Nov., 1382), waged war against Venice. He became King of Poland 15 November, 1370. Upon the recommendation of Urban V, Louis appointed his relative, Charles Drachchi, Ban of Croatia, and then set out to capture Naples from Queen Joanna. At his death he was succeeded on the throne of Croatia by his daughter Mary, who reigned jointly with her consort Sigismund of Brandenburg, son of Emperor Charles IV, and later emperor. During Mary's reign there was great hostility among the people both towards her and Elizabeth, her mother. Foremost in the opposition was John Paliza, prior of the Knights of St. John, Paul Horvat, the saintly and patriotic Bishop of Agram (Zagreb), and the bishop's brother John. Declaring that a woman had no right to the Croatian throne, Bishop Horvat offered the crown to Charles III Drachchi, King of Naples. Charles, unable to get the crown, was crowned by Pope Urban at Stuhlweissenburg in the presence of Mary and Elizabeth, but was murdered at Buda, Hungary, thirty-seven days later (24 Feb., 1386), by Elizabeth's hired assassin. Civil war followed. Sigismund (1387-1409) was taken captive by Ivan Horvat, and fresh difficulties arose with the Turks in the eastern part of the Balkan Peninsula. The coronation of Ladislav, King of Ladislav, at Zara, 5 August, 1393, did not result in peace. Internal discord existed among the Frankopani, Zrinski, Gorjanski, Biagaji, Kurjakovici, etc. Gregory XII organized a crusade in Siena to help Sigismund, and Ladislav, seeing that he could not hold his ground on the Eastern Adriatic, sold Dalmatia to Venice for 100,000 ducats, the agreement being signed in the church of St. Silvestro, 9 July, 1400.

In the fourteenth century there were in Croatia three archbishoprics and seventeen dioceses, subdivided into archdeaconries and parishes. At the beginning of the century the See of Bosnia was transferred to DJakovo. Each diocese had an average of four or five hundred parishes in addition to chapters and collegiate churches. Blessed Augustine of Gazo-

**Collegiate Church (X Century) and Bell Tower**

(1577), Pieve
Balkan invaded Croatia in 1493. He was met by the Croatian forces under Ban Derenchin on the field of Krbava. The Croats were defeated and left the survivors of the battle in the field. In 1513. However, the Turkish army was defeated by the Ban Bishop Peter Berislavich, and Leo X, upon receiving the news of victory, sent the warrior-bishop a blessed saber. Bishop Berislavich's appeal to Charles V was unheeded, and the former was killed in the battle of Krenice (1526). His death was a terrible blow to the Christians who became either slaves or pillagers in the Empire. The pasha in Boenin in retaliation for the defeat, pillaged the country and slew the Christians.

After the defeat at Mohacs where King Louis and so many of his warriors were slain, the Croats fled to Austria, but the Austrian forces were unable to follow them. The Croats subsequently having the same rulers as Austria. The king took an oath to defend the rights and boundaries of his new kingdom, a promise which was never fully observed, and the hopes of the national heroes Simeon Bakatch, Bishop of Zagreb and Krsto Jakic, Bishop of Lepoglava, were to be fruitless. The latter left to Varadin while the former died of grief. Profiting by the indifference of Ferdinand, the Turks took the fortress of Jazice and Kla in 1536 as well as a large part of Eastern Croatia. With Religionis religiarium regni Croatiarum for a battle-cry, the climax of the struggle was reached at Sisak, where Vratislav Zrinski met the Turks under Solymann, with 700 picked men. Having fired the city behind them, they made an onslaught in which they all perished. The Turks left 20,000 men on the field. Solymann died two days later and a shameful peace was concluded by Maximilian. Neglected and misused, the people rose under Mathias Gubec. They failed and Gubec was put to death with a red hot crown of iron. Ever ready to take advantage of internal strife, Ferhad Pasha defeated General Auersperg at the River Radonja, in 1575. Rudolf, who succeeded Maximilian (1576), had little interest in the welfare of the State. Hassan Pasha Frédejovich crossed the border and besieged the fortresses of Bihac, and plans for a future attack on Sisak. He was met by Jurak and Fintichi, canons of Agram, and Ban Bakatch, with an army. The Turks were defeated and lost 18,000 men.

Among the apostles of the Reformation in Croatia were the Ungnad family and George Zrinski who established a printing plant for the propagation of their teaching. The Croats, however, were not won over to Luther's doctrine. Catholicism was too firmly rooted and Anthony Dalmatin and Stephen Istranin preached the new creed in vain. When asked, at a meeting of the Sabor, to grant toleration to Protestantism, Ban Bakatch made answer: "I prefer rather to break off relations with the Hungarian Crown than allow this pest to spread." The conflicts occurred with the Turks at Novi Vinj (1664), and at St. Gothard. The misery and oppression of the people led to an uprising under Peter Zrinski and Krsto Frankopani against the German military rule. Leopold, however, beheld the leaders, 30 April, 1671, at Wiener Neustadt, imprisoned their children, and confiscated their possessions. Despite the injustices done the people the struggle against the Turks was heroically continued under Stjoe Janovitch and Elias Smiljitch in Dalmatia, Friar Luke Imbrisimivitch in Slavonia, and Peter Fink amidst the Debrecen of Hungary. The Turks by the expulsion of the Turks from the Balcan Peninsula and Constantinople was prevented in 1688 by Louis XIV. The conference of war in Vienna established the Military Council between Turkey and Croatia; every male Croat was obliged to serve in the army at his own expense and to be ready at any moment. This organization was dissolved in 1673.

In 1712 the Imperial Court adopted a Pragmatic Sanction, by which Charles VI secured the succession to his daughter Maria Theresa. In the Thirty Years War and the Seven Years War between Maria Theresa and Frederick the Great the Croats took a prominent part. During the reign of Leopold I (1658-1705) hundreds of families of the Schismatic Greek Church and entered Croatia and Hungary from the Turkish rule. Jealousy existed between the Catholics of the country and the newcomers because the rulers did not favour any but the Catholic religion. In 1777 Maria Theresa secured the erection of a diocese for the Uniat Greeks, with the Eastern Rite and the Old Slavonic Liturgy. She hoped in this way to bring about the union with Rome, but the breach was only widened. Education reached a high standard in the sixteenth century under the Hermits of St. Paul. Later on the Jesuits became their co-workers in the field. They established an excellent institution in Zagreb. The Croatian youth also attended the universities at Rome, Padua, and Bologna.

The absolutist, Joseph II (1780-90), who succeeded Maria Theresa, failed in his reforms, though he stopped at nothing in his attempts to carry them out. In Croatia he suppressed religious orders, confiscated monasteries and seminaries, and hampered the progress of education. The last attempt of action against Latin began in 1835, and the native speech was revived in church, university, and street. In 1809 Napoleon, having conquered Croatia, set up the Kingdom of Illyria, a union of all the Croatian provinces, under French control. In the first half of the nineteenth century, as an outcome of the revival of the language, a vigorous nationalizing movement began under Louis Gaj. Representatives of the people, 300 in number, demanded of the king the same rights for Croatia as those possessed by Hungary: independence under the king; the election of the ban by the people and his presentation for the king's approval; the ban was to be ex officio president of Croatian cabinet and responsible to the Sabor, at its annual meeting; the Croatian army with its head was to take an oath of fidelity to the king; the Military Frontier to be abolished; and Croatia made the official tongue. The only point gained was the appointment, as ban, of Joseph Jelacic. Jelacic's assassination in 1824 put an end to the movement and the assent of the Emperor. In 1861, Jelacic became the first Croatian Consul in France. In 1867 the Emperor Petro II of Serbia was driven from power and replaced by the Prussian Prince Mihai Karadjorski, who was more liberal and more sympathetic to the movement. On 21 July, 1868, a compromise was effected between Croatia and Hungary. Croatia, Slavonia, the Military Frontier, and Dalmatia constitute a separate political body; Fiume (Rijeka) and its district were left condominium, with two representatives in the Croatian-Slavonian Sabor. The Military Frontier had been suppressed and part was annexed to Transylvania in 1851 part to Hungary in 1872; and part to Croatia-Slavonia in 1881. Dalmatia remained separate, with eleven representatives in the Austrian parliament (Reichsrath). Croatia has autonomy in administrative, educational, and judicial affairs. The national legislative body is the Sabor; the executive body, the Royal Croatian-Slavonian-Dalmatian Government. The head of Croatia-Slavonia is the ban, appointed by the king upon the recommendation of the Hungarian prime minister, responsible to the Sabor. All State business in common with Hungary is regulated in the Croatian-Slavonian Government. A large number of civil and military ministries are also executive ministries for the administration of national affairs, with separate departments for Croatian interests. The Croatian Minister stands as a mediator between the King of Croatia and the Croatian
Government. He is a member of the Hungarian cabinet and is responsible to the Hungarian Parliament. Croatia is represented in the House of Magnates and the House of Representatives by forty delegates. On Delegations for National Affairs Croatia-Slavonia is represented by one member from the Upper House and four from the Lower.

**Education and Religion.**—There is a university at Zagreb with three faculties: philosophy, theology, and law; three theological seminaries; and an academy founded and endowed by Bishop Strossmayer. There are twenty-five high schools and gymnasia each with eight grades, and over a thousand public schools of five grades, all supported by the Government, with the exception of some private institutions.

Ecclesiastical. Croatia constitutes one province, erected by Bull "Auctorem omnium" of Pius IX., 11 Dec., 1852. The archiepiscopacal see is at Zagreb (Zagreb), and there are three suffragan dioceses: Drajko, Senj-Modrus, and Kruse (Krizevci) (Uniat Greek). Theoretically the relations between Church and State are regulated by a concordat of 18 Aug., 1858; in practice, the clerical disregard. Civil marriage is not recognized and ecclesiastical regulations are in force.

Of the population of 2,186,410, 71 per cent. is Catholic; 26 per cent. Schismatic Greek; 1.6 per cent. Protestant; and 1 per cent. Jewish. Freedom of worship is guaranteed by the State law. Religious schools under Government supervision, the State paying such teachers and supplying textbooks out of the public revenues. Churches are incorporated under the name of the parish or community to which they belong, subject to the requirements of canon law. Church property is taxed, but the clergy are exempt from military and jury service. They are also subject to the civil penal law, have the power to make wills but not witness to them, and can dispose of their personal property according to canon law. Cemeteries are regulated by ecclesiastical and civil law, each denomination having its own.

Religious orders may be established with the consent of the Church and State; the Francisans, Capuchins, Jesuits, and Salvators are represented. Bishops are nominated by the king, on the recommendation of the Government, and appointed by the pope. Canons are appointed by the king on the recommendation of the Government, and the latter appoints the interim priests from the terna, i.e. from three names proposed, or regardless of the terna. Each diocese has its own seminary. The Catholic press has a number of weekly, and a few daily, papers.

**Causes of Emigration.**—The people are overtaxed. Industry and commerce are handicapped by the centralization of common carriers and by a transportation tariff upon export goods. The import and export tariffs are unjustly apportioned, and agriculture and stock-raising are unprofitable except for domestic purposes. State monopolies prevent free commerce, and bureaucracy hampers the development of trade and industry. The land is generally cultivated and is rich in forests. Quicksilver, gold, copper, iron, coal, oil and sulphur are found, but the production is small. The rivers are navigable, and there are excellent roads, but the railroads have not kept pace with the needs of the people.

In the United States there are over 200,000 Croats distributed in all sections, working in mines, factories, and upon farms. Many of these are well-to-do. The immigration began in the early part of the nineteenth century and numbers fought in the Civil War. There are about 250 Croatian societies under the patronage of various saints. Owing to the scarcity of the priests the number is small, only twelve in November (1908) and four parish schools. It must be remembered, however, that the first Croatian priest came to the United States only ten years ago, while the people had been coming in large numbers for thirty years, with no one to look after their spiritual needs. The Croatian parishes which have been organized are:—Visitation of the Blessed Virgin Mary, Rankin, Pennsylvania; St. Nicholas, Allegheny, Pennsylvania; St. Rock, Johnstown, Pennsylvania; St. Paul, Cleveland, Ohio; St. Joseph, St. Louis, Missouri; St. John, Calumet, Michigan; St. John, Kansas City, Kansas; Assumption of the Blessed Virgin, Chicago, Ill.; St. Peter and Paul (Greek Uniat), Chicago, Ill.; St. Peter and Paul, Great Falls, Montana; St. Mary of Grace, Steelton, Pennsylvania; Church of the Visitation, San Francisco, California.

**Croce, Giovanni, composer, b. at Chioggia near Venice in 1557? d. 15 May, 1608. Under the tutelage at Venice of Gioseffo Zarlino, Croce became one of the noted composers of the Venetian School. After entering the priesthood he was attached to the church of Santa Maria Formosa. In 1593 he was given charge of the choir boys at San Marco with the title of vice-director. On the death of Baltazzaro Donati, 13 July, 1603, Croce became his successor as choirmaster. He composed a great deal of music particularly cultivated in his time, such as the madrigal and the canzonetta, but his chief productions are those destined for the Church. Their characteristics are clarity of form and a devotional spirit. Many of his compositions form part of Froso's "Musica Divina" and Lucke's collection contains three motets: "O sacrum convivium", "Cantate Domino", and "Exaudi Deus."**

**Croia, a titular see of Albania. Croia (pronounced Kryua, Albanian, "Spring") stands on the site of Erbaa, a town mentioned by Ptolemy (III, xiiii, 13, 41). Georgius Acropolites (lxxix) mentions it as a fortress in 1251. A decree of the Venetian senate gave it in 1343 to Marco Barbarigo and his wife. In 1395 it was held by the Castriote (Mas-Latrige, Trésor de chronologie, 1773), and it was the birthplace of the Lion of Albania, the national hero, George Castriota or Scanderbeg (d. 17 Jan., 1468). It was captured by Mohammed II 14 June, 1478, and the whole population was slaughtered together with its possessions, except the few who embraced Mohammedanism.

Since the thirteenth century Croia has been a Latin suffragan of Dyrrachium (Durazzo). Farlati (Illyricum sacrum, VII, 411-432) mentions fourteen bishops from 1286 to 1694 (Gams, 404; Lequen, III, 955, incomplete); Eubel (1, 224, II, 156) adds four names and corrects the town of a kaimakamlik in the vilayet of Scutari, with about 10,000 inhabitants, all Mussalmans. The Venetian citadel, 1500 feet above the sea, is still preserved together with Turkish guns and bells dating from the days of Skanderbeg. Croia is renowned among the Bektaši dervishes for the tombs of many of the sk pinterest-33
CROISET, Jean, ascetical writer, b. at Marseilles, 1666; d. at Avignon, 31 January, 1738. He entered the order of Jesuits in 1687, became rector of the novitiate at Avignon, which he governed with great wisdom. He became famous as a director of consciences, and as a writer of many spiritual books which have been translated into several languages. His "Devotion to the Sacred Heart" appears to have been the basis of his publications. He wrote: "Retreats for Each Day of the Month"; "The Lives of the Saints for Each Day of the Year"; in eighteen volumes, in the last of which is "The Life of Our Lord" and "The Life of the Blessed Virgin"; "The Model of Youth"; "Spiritual Illusions and Delusions"; "Dialogues of the Angels"; "Paradise and Purgatory"; "Paradise and the Moral Age, with the Morality of Christ", etc. He also published collections of prayers. De Backer accuses Lamennais of having plagiarised from Croiset in his little work called "Guide du jeune âge". Feller attributes a book of meditations also to Croiset. He is regarded as one of the great masters of the spiritual life.

De Backer, Bld. de la c. de J. (Liège, 1853 and 1861); Feller, Bldg. Univ. (Paris, 1813).

T. J. Campbell.

CROCK, Thomas William, Archbishop of Armagh, b. at Ballykilbeg, near Downpatrick, 8 June, 1790; d. 6 April, 1849. At fourteen he was sent to a classical school in Downpatrick, conducted by Rev. Mr. Nelson, a Unitarian minister, as there were no Catholic schools in the north of Ireland. In November, 1801, he went to Maynooth, and obtained first place in dogmatic theology in 1803. At Parliament House the following year he was ordained priest by Dr. Troy, Archbishop of Dublin, and for six years lectured in logic, metaphysics, and ethics. In 1812 he took charge of the parish of Belfast, which comprised not only the entire town but also a district more than thirty miles in extent. On being appointed Bishop of Down and Connor in 1825, he induced the Holy See to change the episcopal parish from Downpatrick to Belfast, the real centre of the diocese. During the ten years he spent as bishop of this see he built a large church in almost every parish, and founded St. Malachy's Seminary. Owing to the death of Cardinal Cullen in 1838, Dr. Crock was obliged to allow Catholic children to attend Protestant schools, a course of action which caused a fierce controversy after his death. In 1835 he was appointed to the archdiocese of Armagh. Up to his time no primate had been allowed to reside in that town, but he lived alternately there and in Drogheda, where most of the primate's had dwelt in penal times. His first care was to find St. Patrick's Seminary in Armagh, which was opened in 1838. His great work however, was the foundation of the cathedral, which was not completed till twenty-four years after his death. Having with some difficulty acquired a site on an historic hill by the side of the town, he laid the foundation stone on St. Patrick's Day, 1840, amid a vast assemblage of clergy and laity. The work of construction went steadily on until the famine years, and the primate visited several cities in Ireland, making an appeal in person. The famine, however, stopped the progress of the work. When the question of the Queen's colleges arose, the primate was one of those bishops who looked favourably on the project. It is certain, however, that if he had lived till the Synod of Thurlow, in which these colleges were formally condemned as pernicious to the Faith, he would have sided against his own primate and opposed the project, and submitted to the decision of the Holy See. He died in Drogheda of the cholera, on Good Friday (6 April), 1849, and was buried on Easter Sunday in the centre of the choir of the still unfinished cathedral of Armagh. A collection of the "Select Sermons" of the primate was published shortly after his death.

II. ST. CRONAN, Abbot-Bishop and Patron of Roscrea, a see afterwards incorporated in that of Killaloe, Ireland; b. in the territory of Ely O'Carroll; d. 28 April, 640. After spending his youth in Conacht, he returned to his native district about the year 610 and founded the Abbey of Roscrea, where he established a famous school. Previously he settled at a place known as Seile rog or Loch Cre, a warded monastic, far from the haunts of men; in fact, it was utterly wild, so much so, that St. Cronan abandoned it and moved to the wood of Cre, that is, Ros cre, County Tipperary. Like those of so many other Irish saints the Acts of St. Cronan abound in miracles. The most surprising legend related to the head of the transcribing of the Four Gospels by one of his monks, named Dimma. It appears that Dimma could only undertake one day's task, from sunrise to sunset. St. Cronan, however, bade him write, and then Dimma set to work, never ceasing till he had finished the Four Gospels, the sun continuing to shine for the space of forty days and forty nights—the scripture being unconscious that the work had occupied more than a day. Whatever may be thought of this legend, it is certain that a magnificent Evangelistarium, known as the "Book of Dimma", was for centuries preserved in St. Cronan's Abbey at Roscrea, and is now in the library of Trinity College, Dublin. The scribe, Dimma MacNathi, signs his name at the conclusion of each of the Gospels, and he has been identified with Dimma, subsequently Bishop of Connor, who is mentioned with St. Cronan in the letter of Pope John IV in 640, in regard to Pelagianism in Ireland, but this identification cannot be sustained. The case containing the "Book of Dimma" was richly gilt by order of O'Carroll, Lord of Ely, in the twelfth century. Notwithstanding the conflicting statements arising from the number of contemporary Irish saints bearing the name of Cronan, it is more than probable that the man of Roscrea, as les Petit de Bol, for they say, lived as late as the year 640, and his death occurred on 28 April of that year. His feast is celebrated on 28 April and as such is included in all the Irish calendars, as also in the Calendar of Drummond.

Butler, Lives of the Saints; O'Hanlon, Lives of the Irish Saints (Dublin, 1875); IV; Guberry, National Manuscripts of Ireland (1884); Les Petits Bollandistes (Paris, 1880); XV; Lanigan, Ecclesiastical History of Ireland (Dublin, 1829); II; Healy, Ireland's Ancient Schools and Scholars (4th ed., Dublin, 1902).

A number of other saints of this name find a place in Irish calendars. The three most important are St. Cronan Mochua, of Clashmore (10 February); St. Cronan, Abbot of Clonmacnoise (18 July); and St. Cronan of Moville. Of Cronan of Roscrea, the name is frequently quoted as of this name is really St. Cuanan (Cuananus Sapiens), whose feast occurs on 9 February. There is also a St. Cronan Mochua of Stiah Eibhlim (4 May).

W. H. Grattan-Flood.

Crosier (or Pastoral Staff). The, is an ecclesiastical ornament which is conferred on bishops at their consecration and on mitred abbots at their investiture, and which is used by these prelates in performing certain solemn functions. It is sometimes stated that archbishops use the crosier, but this is not so, the truth being that in addition to the pastoral staff they have also the right to have the archiepiscopal cross borne before them within the territory of their juris-

diction. According to present-day usage the Roman pontiff does not use the crosier. That this practice is a departure from primitive discipline is now thoroughly established, for in the early representations of the popes found on tablets, coins, and other monuments, the crosier is to be seen (Krause, Geschichte der christlichen Kunst, II, 500). But in the eleventh century this custom must have disappeared, since Innocent III (d. 1216) intimates that it no longer prevailed (Epistola ad Patr. Const.). As a reason why the pope does not use a crosier symbolists allege the giving by St. Peter of his staff to one of his disciples in order to raise a dead companion to life. The pastoral staff will here be treated under: (1) the symbolism of the crosier; (2) its origin and antiquity; (3) early forms and subsequent artistic development.

(1) Symbolism.—The crosier is a symbol of authority and jurisdiction. This idea is clearly expressed in the words of the Roman Pontiff with which the staff is presented to the bishop elect: "Acceperat aculum pastoralis officii; et eis in corrigendis vititis pie saeviens, judicium sine ira tenens, in fovendis virtutibus post mortem animos mulcens, in tranquillitate severtissima censuram non deserens" (Pont. Rom., 77). It is then, as Durandus (Rationale Divin. Off., III, xv) says, borne by prelates to signify their authority to correct vices, stimulate piety, administer punishment, and thus rule and govern with a gentleness that is tempered with severity. The same author goes on to say that, as the rod of Moses was the seal and emblem of his Divine commission as well as the instrument of the miracles he wrought, so is the episcopal staff the symbol of that doctrinal and disciplinary power of bishops in virtue of which they may sustain the weak and comfort the anxious, confirm the wavering in faith, and lead back the erring ones into the true fold. Barbosa (Pastoralis Sollicitudinis, etc., Tit. I, ch. v) alluding to the prevalent form of the staff, says that the end is sharp and pointed wherewith to prick and goad the slothful, the middle is straight to signify righteous rule, while the head is bent or crooked in order to draw in and attract souls to the ways of God. Bona (Rerum liturgic., I, xxiv) says the crosier is to bishops what the sceptre is to kings. In deference to this symbolism bishops always carry the crosier with the crook turned outwards, while inferior prelates hold it with the head reversed. Moreover, the crosiers of abbots are not so large as episcopal crosiers, and are covered with a veil when the bishop is present.
(2) Origin.—The origin of the pastoral staff is at times associated with the shepherd’s crook. Whether the usage was borrowed from this source is doubtful. Some writers trace an affinity with the *situla*, or rod used by the Roman augurs in their divinations, while others again see in the crozier an adaptation of the Oriental staffs which were used for support on journeys and in churches before the introduction of seats (Catalani, Pont. Rom., Proleg., xx). At all events, it came at a very early date to be one of the principal insignia of the episcopal office. Just how soon is not easily determined, since in the early passages others in which the word occurs it cannot be ascertained whether it is to be taken literally or metaphorically (see I Cor., iv, 21), or whether it designates an ecclesiastical ornament at all. In liturgical usage it probably goes back to the fifth century (Kirchenlex., s. v. Hirtenstab). Mention of it is made in a letter of Pope Celestine I (d. 432) to the Bishops of Vienne and Narbonne. Staffs have indeed been found in the catacombs that belong to the fourth century but their ceremonial character has not been established. The first unequivocal reference to the crozier as a liturgical instrument occurs in the twenty-seventh canon of the Council of Toledo (633). At present it is employed by bishops whenever they perform solemn pontifications, by right in their own dioceses and by privilege outside, and by inferior prelates whenever they are privileged to exercise pontifical functions.

(3) Form and Development.—The evolution of the staff is of interest. Ecclesiologists distinguish three early forms. The first was a rod of wood bent or crooked at the top and pointed at the lower end. This is the oldest form and was known as the *pudum*. The second had, instead of the crook, a knob which was often surmounted by a cross, and was called the *ferula* or *cambula*. It was sometimes borne by popes. In the third form the staff consisted of a *cruce decussata*, or Greek T, the arms of the cross being often so twisted as to represent two serpents opposed. This, known as the *crocia*, was borne by abbots and bishops of the Eastern Rite. The original material was generally cypress-wood, often cased or inlaid with gold or silver. Later on the staffs were made of solid ivory, gold, silver, and enamelled metal. From many specimens preserved in churches as well as from the representations in old sculptures, paintings, and miniatures, something may be formed of the artistic development of the staff and of the perfection it attained. In the cathedral of Bruges is preserved the crozier of St. Malo, a bishop of the sixth century. The staff consists of several pieces of ivory joined together by twelve copper strips; but the volute is modern (Bouquet, *Dictionnaire des arts* [Antwerp, 1769], viii, 453; Baumer, *Manuel liturgique* [Paris, 1890], ii, 258; Huet, *Jesus, Ecclésiastique* [1908]).

CROSIERS \(\times\) 516

CROSIERS

CROSIO, PATRICK MORRISSEY

Crosiers (of Canons Regular of the Holy Cross).—The, a religious order, founded by Théodore de Celles, who, after following the Emperor Frederick Barbarossa on the Crusade, obtained a canonical in the Cathedral of St. Lambert at Liège. On the feast of the Exaltation of the Holy Cross (14 Sept., 1211), Théodore with four of his fellow-canons pronounced his religious vows before the Bishop of Liège. Having received from him the blessing of St. Theodorus of Clair-Lieu, near Huy, de Celles founded there the first convent of the order. Pope Innocent III verbally approved the new order in 1215, and Pope Honorius III gave his written approbation, which was confirmed by Innocent IV on the feast of the Finding of the Holy Cross (2 May, 1248). The new institution soon extended to France, the Netherlands, Germany, and also to England. The Canons of the Holy Cross preached to the Albigensians with St. Dominic. Albert, Bishop of Prague, took several Crosiers and other monks with him to Livonia, where a great many of them gained the glory of martyrdom (1249). Some other Fathers accompanied St. Lisias on his journey to the Holy Land in 1248. After returning, he enabled them to build the main convent of the order in Paris. The Canons of the Holy Cross practise both interior and exterior self-denial, in order to imitate the Saviour crucified. Contemplating Christ’s Passion they try to sanctify themselves, and, preaching the mysteries of the Cross, they endeavour to save others, inducing them to follow in the footsteps of the Man of Sorrows.

The order formerly possessed about ninety convents, nineteen of which were in England. These latter were destroyed during the troublesome times of the sixteenth century. The Dutch houses were depopulated at the time of the Reformation. Only two of them were spared. Finally, the French Revolution expelled the Crosiers from France and Belgium. The two remaining convents in Holland (at St. Agatha) and Uden in North Brabant were wiped out by King William, who ordered them not to admit novices. His successor, however, retracted this interdict (14 Sept., 1840), and, from that time, the order commenced to flourish again. From these convents three large branches were founded in Belgium and France (1845); at Maasmechelen (1847); and in Switzerland (1904); while the convent of Uden has been totally renewed (1905), and the mother-house at St. Agatha...
restored (1907). In 1857 the master general of the order sent some missionaries to Bay Settlement, Wisconsin, U. S. A., but the undertaking failed on account of insuperable difficulties. Pope Urban VIII gave to the master general, August Neerius, and his successors, the privileges of purple, cross-staff, mitre, and pontificalia, together with some other exceptional favors. The Leo X. conferred the special faculty of blessing rosaries or chaplets, so that on a rosary indulgenced by Crosiers 500 days of indulgence are to be gained each time a Pater or Ave is said. The indulgence is also applicable to the souls in purgatory (Gregory XVI, decree of 15 Sept., 1842; 13 July, 1849; Pius IX, 12 June, 1867). Pius X. decreed that both the Crosiers and the Dominican Indulgences may be gained together on condition that a whole chaplet is said.

After one year of probation the Crosier novice enters into the order by a simple but perpetual profession; the solemn profession follows three years thereafter. The priests and the professed clerics wear a white tunic, over which is a black scapular; a short black mantle (mocella) and a hood of the same colour complete their costume. Upon the breast of the scapular a cross is sewed, the upright bar of which is red, and the cross-bar presides over each part, and the order is governed by a master general, elected for life, fifty-two having ruled from the foundation to 1908. As their particular patronesses the Crosiers venerate St. Odilia, a companion of St. Ursula, who is said to have appeared in Paris to a lay brother of the order; named Jean de Novellian (1387), after which her relics were found at Cologne and brought to the mother-house at Huy. A great many pilgrims visit the churches of the Crosiers during the octave of St. Odilia’s Feast (18 July), in order to obtain her protection, and to be cured of ophthalmia, and water blessed in honour of St. Odilia is sent on request by the Crosiers all over the world. The life of the Crosier Fathers is both contemplative and active. They give missions, retreats, and assist the secular clergy when asked. They also educate young men aspiring to the priesthood in their colleges.

CROSS, WAY OF THE. See Way of the Cross.

CROSS and Crucifix, The.—For greater clearness and convenience the article under this general heading will be divided, to correspond as nearly as possible with three broad aspects of the subject, into three principal sections, each of which will again be divided into subsections, as follows:

I. ARCHEOLOGY OF THE CROSS: (1) Primitive Cruciform Signs; (2) The Cross as an Instrument of Punishment in the Ancient World; (3) The Crucifixion of Jesus Christ; (4) Gradual Development of the Cross in Christian Art; (5) Later Development of the Crucifix.

II. THE TRUE CROSS AND REPRESENTATIONS OF IT AS OBJECTS OF DEVOTION: (1) Growth of the Christian Cult; (2) Catholic Doctrine on the Veneration of the Cross; (3) The Feast of the True Cross; (4) Principal Feasts of the Cross.

III. CROSS AND CRUCIFIX IN LITURGY: (1) Material Objects in Liturgical Use; (2) Liturgical Forms Connected with Them; (3) Festivals Commemorative of the Holy Cross; (4) Rite of the “Adoration” ; (5) The Cross as a Manual Sign of Blessing; (6) Dedication of Churches, etc., to the Holy Cross; (7) The Cross in Religious Orders and in the Crusades; (8) The Cross outside of the Catholic Church.

I. ARCHEOLOGY OF THE CROSS.—(1) Primitive Cruciform Signs.—The sign of the cross, represented in its simplest form by a crossing of two lines at right angles, greatly antedates, in both the East and the West, the Christianization of Christianity. It goes back to a very remote period of human civilization. Many have sought to attach to the widespread use of this sign, a real ethnographic importance. It is true that in the sign of the cross the decorative and geometrical concept, obtained by a juxtaposition of lines pleasing to the sight, is remarkably prominent; nevertheless, the cross was originally not a mere mere ornament, and from the earliest times had certainly another—i. e. a symbolico-religious—significance. The primitive form of the cross seems to have been that of the so-called “gamma” cross (crux gammata), better known to Orientalists and students of prehistoric archeology by its Sanskrit name, swastika. The commonest form of this sign is 

At successive periods this was modified, becoming curved at the extremities, or adding to them more complex lines or ornamental points, which latter also meet at the central intersection. The swastika is a symbol very anciently spread throughout the East. It has a solemn meaning among both Brahmins and Buddhists, though the elder Burnouf (“Le lotus de la bonne loi, traduit du sanscrit”, p. 625; Journ. Asiat. Soc. Great Britain, VI, 454) believes it more common among the latter than among the former. It seems to have represented the apparatus used at one time by the fathers of the human race in kindling fire; and for this reason it was the symbol of living flame, of sacred fire, whose mother is Maia, the personification of productive power (Burnouf, La science des religions). It is also, according to Milani, a symbol of the sun (Bertrand, La religion des Brahmanes, p. 159), and of life and generation. Others have seen it in the mystic representation of lightning or of the god of the tempest, and even the emblem of the Aryan pantheon and the primitive Aryan civilisation. Emile Burnouf (op. cit., p. 625), taking the Sanskrit word literally, divided it into the tertius swastika, equivalents of the Greek θύρα.

In this way, especially through the adverbial particle, it would mean “sign of benediction”, or “of good omen” (esasti), also “of health” or “life.” The particle ka seems to have been used in a causative sense (Burnouf, Dictionnaire sanscrit-francais, 1896). The swastika sign was very early spread throughout the ancient Orient, the seat of the oldest civilizations. The Buddhist inscriptions carved in certain caves of Western India are usually preceded or closed by this sacred sign (Thomas Edward, “The Indian Swastika”, 1890; Philip Greg, “On the Meaning and Origin of the Fylfol and Swastika”). The earliest excavations of Schliemann at Hissarlik on the site of ancient Troy brought to light numerous examples of the swastika: on spindle-racks, on a cube, sometimes attached to an animal, and even cut upon the womb of a female idol, a detail also noticeable on a small statue of the goddess Athis. The swastika sign is seen on Hittite monuments, e. g. on a cylinder (“The monuments of the Hittites,” in “Transactions of the Soc. of Bibl. Archaeology”, VII, 2, p. 259. For its presence on Galatian and Bithynian monuments, see Guillaume and Perrot, “Exploration archéologique de la Galatie et de la Bithynie”, Atlas, Pl. IX. We find it also on the coins of Lydia and of Caria. On a Persian coin of Cyprus it is found on earthenware vessels. It originally represents, as again at Athens and Mycenae, a flying bird. In Greece we have specimens of it on urns and vases of Creteon, on an Attic vase representing a Gorgon, on coins of Corinth (Rotec), “Hercules saynien”, 377-384; Minervin on “But...
Cross

arch. Napolit.”, Ser. 2, II, 178-179), and in the treasury of Orchomenus. It seems to have been unknown in Assyria, in Phoenicia, and in Egypt. In the West it is most frequently found in Etruria. It appears on a cinerary urn of Chiusi, and on the fibula found in the famous Etruscan tomb at Cere (Griff. Mon. di Cere, Pl. VI, no. 1). There are many such emblems on the urns from Cerveteri, Campania, Apulia, and Illyricum; also in a Samnite tomb at Capua, where it appears in the centre of the tunic of the person there depicted (Minervini, Bull. arch. Napol., ser. 2, Pl. II, 178-179). This sign is also found in Pompeian mosaics, on Italo-Greek vases, on coins of Syracuse in the collection of the E. Rothenstein of London; on the so-called "inscr." Pl. XVI, pt. II, 302 sqq.; Minervini, "Bull. arch. Napol."., ser. 2, Pl. II, p. 178-179; finally, among the ancient Germans, on a rock-carving in Sweden, on a few Celtic stones in Scotland, and on a Celtic stone discovered in the County of Norfolk, England, and now in the British Museum. The swastika appears in an epigraph on a pagan tombstone of Tebes in Roman Africa (Annuaire de la Société de Constantine, 1858-59, 205, 87), on a mosaic of the ignispicium (Ennio Quirino Visconti, Opere varie, ed. Milan, I, 141, sqq.), and in a Greek votive inscription at Porto. In this last monument the swastika is imperfect in form, and is described as "Phoenician". But whatever the swastika may be below the value and symbolical meaning of this cruz gammata when found on Christian monuments. But the swastika is not the only sign of this kind known to antiquity. Cruciform objects have been found in Asia. The statues of Kings Asnamasipal and San-srasuman, now in the British Museum, have cruciform jewels about the neck (Layard, Monuments of Nineveh, II, pl. IV). Cruciform earrings were found by Father Delattre in Punic tombs at Carthage.

Another symbol which has been connected with the cross is the anased cross (cruza sancia) of the ancient Egyptians, who considered the "key of the Nile" as a symbolic sign in the hands of the goddess Sekhet. From the earliest times also it appears among the hieroglyphic signs symbolic of life or of the living, and was transliterated into Greek as Αἰων (Aion). But the modern sign is very ancient, for it may be traced back to the time of earliest Croton. In the Recognita de origine de l'Egypte, 1896-98; it may have been originally, like the swastika, an astronomical sign. The anased cross is found on many and various monuments of Egypt (Prisse d'Avennes, L'Art Egyptien, 404). In later times the Egyptian Cross (Cruza Bia), attracted all the veneration, and perhaps by its symbolism adopted it as the emblem of the cross (Gayet, "Les monuments copites du Musee de Boulaq", in Mémoires de la mission francaise du Caire", VIII, fasc. III, 1889, p. 18, pl. XXXI-XXXII and LXX-LXXI). (For further information regarding the resemblance between the cross and the oldest symbolic signs, see G. de Mortillet, "Les signes de la croix avant le christianisme", Paris, 1866; Letronne, "La croix anseé égyptienne" in "Mémoires de l'académie des inscriptions", XVI, pt. II, 1846, p. 236-84; L. Müller, "Über Sterne, Kreuze und Kränze als religiöse Symbole der alten Kulturvölker", Copenhagen, 1885; W. W. Blake, "The Cross, Ancient and Modern", New York, 1888; Anquetil, "Mémoire sur le culte de la croix avant Jésus-Christ", Paris, 1891.) We may add that some have claimed to find the cross on Greek monuments in the letter X (ξ), which, sometimes in conjunction with P (π), represented on certain legal immemorial letters of the Cretan word "gold", or other words indicative of the value of the coin, or the name of the coiner (Madden, "History of Jewish Coinage", London, 1864, 83-87; Eckhel, "Doctrina nummorum", VIII, 89; F. X. Kraus, "Real-Encyclopädie der christlichen Alterthümer", II, 224-225). We shall return, later on, to these letters.

In the bronze age we meet in different parts of Europe a more accurate representation of the cross, as conceived in Christian art, and in this shape it was soon widely diffused. This more precise characterization coincides with a corresponding general change in customs and beliefs. The cross is now met with, in various forms, on many objects: fibulae, cineraria, earthenware fragments, and on the bottom of drinking vessels. In the North of Germany, and in Britain, the sign was not merely ornamental, but rather a symbol of consecration, especially in the case of objects pertaining to burial. In the proto-Etruscan cemetery of Goloseevo every tomb has a vass with a cross engraved on it. True crosses of more or less artistic value have been found in Thracia, Pannonia, Dacia, and on a fibula from Vulci. These pre-Christian figures of the cross have misled many writers who saw in them types and symbols of the manner in which Jesus Christ was to expiate our sins. Such inferences are unwarranted, being contrary to the just rules of criticism and to the exact interpretation of ancient monuments.

(2) The Cross as an Instrument of Punishment in the Ancient World.—The crucifixion of living persons was not practised among the Hebrews; capital punishment among them consisted in being stoned to death, e. g. the protomartyr Stephen (Acts, vii, 52). But when we come to the Greeks, the cross is introduced as a form of punishment, more particularly for those who could not prove their Roman citizenship; later on it was reserved for slaves andverified. Cisternas were crucified under the Emperors of the East; the cross was introduced as a form of punishment, more particularly for those who could not prove their Roman citizenship; later on it was reserved for thieves and malefactors (Josephus, Antiq., xx, 4, 2; Bell. Jud., II, xii, 6; XIV, 9; V, xi, 1). Though not infrequent in the East, it was but rarely that the Greeks made use of it. It is mentioned by Demosthenes (c. Mid.) and by Plato (Rep., II, 5; also Gorgias). The stake and the gibbet were more common, the criminal being suspended on them or bound to them, but not nailed. Certain Greeks who had befriended the Carthaginians were crucified near Motya by order of Dionysius of Syracuse (Diodor. Sic., XIV, 53). Both in Greece and in the East the cross was a customary punishment of brigands (Hermann, Grundzüge und Anwendung des Strafrechts, Götingen, 1885). It was at Rome, however, that from the beginning of the 2nd century the cross was most frequently used as an instrument of punishment, and amid circumstances of great severity and even cruelty. It was particularly the punishment for slaves found guilty of any serious crime. Hence in two places (Pro Cluent., 66; I Philipp., 11), Cicero calls it simply "servile supplicium", the "cross"—more explicitly (In Verr. 66), "servitutis extremum summumque supplicium"—the final and most terrible punishment of slaves. Hörncke, however (Die Multa), does not admit that it was originally a servile punishment. It was inflicted also, as Cicero tells us (XII Phil., xii; Verr., xiv, vii), on Indians convicted of brigandage. It is certain, however, that it was absolutely forbidden to inflict this degrading and infamous punishment on a Roman citizen (Cic., Verr. Act., I, 5; II, 3, 5; III, 2, 24, 26; IV, 10 sqq.; V, 28, 32, 61, 66); moreover, an illegal application of this punishment would have constituted a violation of the leges sacræ. Concerning a slave, the master might act in one of two ways; he might condemn the slave arbitrarily (Horace, Sat. iii; Juvenal, Sat. vi, 219), or he might turn him over to the triumvir capitalis, a magistrate whose duty it was to look after capital punishment.

The Roman citizen was somewhat modified when the poorer citizens (homines liberi) were declared subject to the punishment of the cross (Paul., "Sent.", V, xii, i; Sueton., "Galba", ix; Quintil., VIII, iv). The punishment of the cross was regularly inflicted for such grave crimes as highway robbery and piracy (Petron., lxxx; Flor., III, xii), for public accusation of his master by a slave (delatio dominii),
The penalty of the cross goes back probably to the arbor infelix, or unhappy tree, spoken of by Cicero (Pro Rabir., iii sqq.) and by Livy, sproses of the crucifixion of Horatius after the murder of his sister. According to Hübchik (Die Multa, 190) the structures known as duoviri perduelliones pronounced this penalty (cf. Liv., i, 266), styled also infelix lignum (Senec., Ep. ci; Plin., XVI, xxvi; XXIV, ix; Macrobr., I, xvi). This primitive form of crucifixion on trees was long in use, as Justinus Lipsiæus notes ("De cruce", ii, 3; cf. Tert., Apol., xii, 3, 4). "(Auctores palatinum hominem, "Sulpicius, Faphnutius", 25 Sept.). Such a tree was known as a cross (crux). On an ancient vase we see Prometheus bound to a beam which serves the purpose of a cross. A somewhat different form is seen on an ancient cross at Freneste (Palestrina), upon which Andromeda is represented nude, and, to the left of the instrument of punishment like a military yoke, i.e. two parallel, perpendicular stakes, surmounted by a transverse bar. Certain it is, at any rate, that the cross originally consisted of a simple vertical pole, sharpened at its upper end. Macedonians (Seneca, Epist. xvii, 1) calls it acru cruci, and it is also called cruci- plex. To this upright pole a transverse bar was afterwards added to which the sufferer was fastened by nails or cords, and thus remained until he died, whence the expression cruci figere or affigere (Tac., "Ann.", XV, xlv; Petron., "Satyr.", iii). The cross, especially in the earlier times, usually called the instrument of punishment only in exceptional cases, particularly when it was desired to make the punishment more exemplary or when the crime was exceptionally serious. Suetonius (Galba, ix) tells us that Galba did this in the case of a certain criminal for whom he caused to be made a very high cross painted white—"multo pretior altiorem et delectabili stratum crucem jusserat," etc.

Lastly, we may note, in regard to the material form of the cross, that somewhat different ideas prevailed in Greece and Italy. The cross, mentioned even in the Old Testament, is called in Hebrew, "eg. 1. e. "wood", a word often translated cruz by St. Jerome (Gen., xi, 19; Jos., viii, 29; Esther, v, 14; viii, 7; ix, 25). In Greek it is called σταυρός, which Burnouf would derive from the Sanskrit śāvara. The word was, however, frequently used in a broad sense. Speaking of Prometheus nailed to Mount Caucasus, Lucian uses the substantive σταυρός and the verbs σταυρώσαται and δραπετεύειν. This is derived from στελεύω, which also signifies a cross. In the same way the rock to which Andromeda was fastened is called cruz, or cross. The Latin word cruz was applied to the simple pole, and indicated directly the nature and purpose of this instrument, being derived from the word cruci or crucis. The word was also applied to the turber crucis (Isid., Or., v, xvii, 33; Forcellini s. v. Crucio, Cruix). It is also to be noted that the word forca must have been at least partially equivalent to cruz. In fact the identification of these two words is constant in the legal dictum of Justinian (Fr. xxviii, 18; Fr. xxvii, 15; Diet. Patr., xxvii, 12). (3) The Crucifixion of Jesus Christ. Among the Romans the cross never had the symbolic meaning which it had in the ancient Orient; they regarded it solely as a material instrument of punishment. There are in the Old Testament clear allusions to the Cross and Crucifixion of Jesus Christ. Thus the Greek letter T (tau or than) appears in Ezekiel (4, 4) according to St. Jerome and other Fathers, as a solemn symbol of the Cross of Christ—"Mark Than upon the foreheads of the men that sigh". The only other symbol of crucifixion indicated in the Old Testament is the brazen serpent in the Book of Numbers (xxi, 8-9). Moses lifted up the serpent in the desert; so the son of Man be lifted up" (John, iii, 14). The Psalmist predicts the piercing of the hands and the feet (Ps. xxi, 17). This was a true prophecy, insasmuch
as it could not be conceived from any custom then existing; the practice of nailing the condemned to a T-shaped cross being, as we have seen, at that time exclusively Western.

The cross on which Jesus Christ was nailed was of the kind known as immisca, which means that the verticle trunk to which the nails were driven in the transverse beam; it was thus higher than the crosses of the two thieves, his crime being judged a graver one, according to St. John Chrysostom (Hom. v. c. i, on 1 Corinthians.). The earliest Christian Fathers who speak of the Cross describe it as thus constructed. We gather as much from St. Matthew (xxvii, 37), where he tells us the titulus, or inscription, was nailed to the Cross because of His death, was placed τράμαν, "over", the head of Jesus Christ (cf. Luke, xxiii, 38; John, xix, 19). St. Ireneus (Adv. Haer., ii, xxiv) says that the Cross had five extremities: two in its length, two in its breadth, and the fifth a projection (habitus) in the middle—"Fines et summatis habet quinque, duas in longitudine, duas in latitudine, unam in medio". St. Augustine agrees with him: "Erat latum in quo porrecta sunt manus; longitudo a terrâ surgens, in quâ erat corpus infimus; altitudo ab illo dextra ligno sursum quod imminet" (Enarr. in Ps. ciii; Serm. i, 44) and other sentences quoted by Zöckler (Das Kreuz, 1857, pp. 430, 431).

Nonnus confirms the statement that Jesus Christ was crucified on a quadrilateral cross (ἐς ὄψιν τέρματα περιβάλλοντα). St. Ireneus, in the passage cited above, says that the Cross had a fifth extremity, on which the Crucified One was seated. St. Justin calls it a horn, and compares it to the horn of a rhinoceros (Dialogus cum Tryphone, xci). Tertullian calls it sedilis excessus, a projecting seat, or shelf (Ad. Nat., i, xii). This little seat (equaleus) prevented the weight of the body from completely tearing the nail-pierced hands, and it helped to soothe the sufferer. The more nearly the nakedness was observed, however, in representations of the Crucifixion. On the Cross of Christ was placed the titulus, as to the wording of which the Four Evangelists do not agree. St. Matthew (xxvii, 37) gives, "This is Jesus the King of the Jews"; St. Mark (xv, 26), "The King of the Jews"; St. Luke (xxiii, 38), "This is the King of the Jews"; St. John, an eyewitness (xix, 10), "Jesus of Nazareth, the King of the Jews". In representations of the Crucifixion there often appears beneath the feet a wooden support (ισσαρίωδος, suppedaneum); that it ever existed is very doubtful. The first express mention of it occurs in Gregory of Tours (De Glorificatione Christi, vi). St. Cyril, Theodoret, and Rufinus hint at it.

A microscopic examination of the fragments of the Cross scattered throughout the world in the form of relics reveals the fact that it was made from a pine-tree (Rohault de Fleury, "Mémoire sur les instruments de la Passion"; Paris, 1865). According to an ancient, but somewhat dubious, tradition the Cross of Jesus Christ measured in length very nearly 189 inches (4.80 metres), from 90 ½ to 102 ½ inches (2.30 to 2.60 metres). As noted by the Evangelists, two thieves were crucified, one on either side of Christ. Their crucifixion must have resembled the one on which He suffered; in Christian art and tradition they generally appear lower (St. John Chrysostom, Hom. i, xxvi, on I Cor.; on Rom., v, 5). A large portion of the cross of the good thief (traditionally known as Dismas) is preserved at Rome in the altar of the Chapel of the Relics at Santa Croce in Gerusalemme.

The narrative of the Passion and Crucifixion of Jesus Christ, as found in the Four Gospels, agrees exactly with all we have set down above concerning this form of punishment. Jesus Christ was condemned for the crime of sedition and tumult, as were also some of the Apostles (Malalas, "Chronogr."); X, p. 228). His Crucifixion was preceded by the scourging. He then bore His Cross to the place of punishment. Finally the legs of Jesus would have been broken, according to the custom of Palestine, in order to permit of burial that very evening, had not the soldiers, on approaching Him, seen that He was already dead (John, xix, 32, 33). Besides, in ancient Christian art and tradition, the Crucifixion of Christ appears as done with four nails, certain legends of persecuting and defacing (St. Paulinus of Nola, "Carmin. in Natal. S. Felicius", XI, 612; Prudent., "Adv. Symm.", I, 486). It is not, therefore, altogether strange or inconceivable that, from the beginning of the new religion, the cross should have appeared in Christian homes as an object of religious veneration, although no such monument of the earliest Christian art has been preserved. Early in the third century Clement of Alexandria ("Strom.", VI, in P. G., IX, 305) speaks of the Cross ἀνερκείσθαι εὐφαγός ἐκμικτός, i.e. σιγνον Christi, "the symbol of the Lord" (St. Augustine, Tract. xxvii, in Joan.; De Corpus, "Bull. d'archéol. chrétiennes" quoted by Zöckler (Das Kreuz, 1857, pp. 430, 431). St. Gregory of Tours tells us (De Miraculis S. Martini, I, 80) that in his time Christians habitually had recourse to the sign of the cross. St. Augustine says that by the sign of the cross and the invocation of the Name of Jesus, things are sanctified and consecrated to God. In the earliest Christian, he points out that we cannot see from the metaphorical language of the primitive faithful, the cross was the symbol of the principal Christian virtue, i.e. mortification or victory over the passions, and suffering for Christ's sake and in union with Him (Matt., x, 38; xvi, 24; Mark, viii, 34; Luke, x, 25; xiv, 27; Gal., ii, 16; Phil., iii, 18, 21). Very soon the sign of the cross was the sign of the Christian. It is, moreover, very probable that a reference to this sign is made in the Epistle of James (vii, 2): "And I saw another angel ascending from the rising of the sun, having the sign of the living God.

It is from this original Christian worship of the cross that arose the custom of making on one's forehead the sign of the cross. Tertullian says: "Frontem crucis sagitta vel tergo" (Cor. Cor. mil., iii), i.e. "We Christians wear out our foreheads with the sign of the cross." The practice was so general about the year 200, according to the same writer, that the Christians of his time were wont to sign themselves with the cross before undertaking any action. He says that it is not condemned in Holy Scripture. It is a master of Christian tradition, like certain other practices that are confirmed by long usage and the spirit of faith in which they are kept. A certain Scriptural authority for the sign of the cross has been sought by some in a few texts rather freely interpreted, especially in the above-mentioned words of Ezekiel (ix, 4), "Mark this upon the foreheads of the elders of Israel;" also in several expressions of the Apocalypse (vii, 3; ix, 4; xiv, 1). It would seem that in very early Christian times the sign of the cross was made with the thumb of the right hand (St. John Chrysostom, Hom., ad pop., Antioch.) ; but Jerome, in Eustochium; a practice still in use among the faithful.
during Mass, e. g. at the reading of the Gospel, and generally on the forehead; gradually, by reason of its symbolism, this sign was made on other parts of the body, with particularized intention (St. Ambrose, De Isaac et anima, Migne, P. L., XIV, 501-34). Afterwards these different signs of the cross were united in one large sign such as we now make. In the Western Church, the cross was sometimes carried on the left to the shoulder; in the Eastern Church, on the contrary, it was brought from the right shoulder to the left, the sign being made with three fingers. This apparently slight difference was one of the (remote) causes of the fatal Eastern Schism. This is as far as we have no historical evidence for, that the primitive Christians used the cross to distinguish one another from the pagans in ordinary social intercourse. The latter called the Christians "cross-worshippers," and ironically added, "id colunt quod mentur," i. e. they worship that which they deceive. The Christian apologists, such as Tertullian (Apol., xvi; Ad. Nationes, xii) and Minucius Felix (Octavius, Ix, xii, xxvii), felicitously replied to the pagan taunt by showing that their persecutors themselves adored cruciform objects. Such observations throw light on a peculiarity of primitive Christian life, i. e. the almost total absence from Christian inscriptions of the time, unadorned crosses (E. Reussene, "Éléments d'archéologie chrétienne," 1st ed., 110). The truculent sarcasms of the heathens prevented the faithful from openly displaying this sign of salvation. When the early Christians did represent the sign of the cross on their monuments, nearly all sepulchral in character, they felt obliged to disguise it in some artistic and symbolical way.

One of the oldest of these symbols of the cross is the anchor, sometimes carved thus and sometimes thus. The latter is found most generally on the stone slabs of the oldest sections of the Roman catacombs, especially in the cemeteries of Callistus, Domitillas, Priscilla, and others. The anchor, originally a symbol of hope in general, takes on in this way a much higher meaning: that of hope based on the Cross of Christ. The similarity of the anchor to the cross is probably an admission of Christ's Passion. Another cruciform symbol of the early Christians, though not very common, and of a somewhat later date, is the trident some examples of which are seen on sepulchral slabs in the cemetery of Callistus. In one inscription from that cemetery the symbolism is even more evident, the instrument standing erect as the main axis of a ship entering port, symbolical of the Christian soul saved by the Cross of Christ. We must note, too, the use of this peculiar symbol in the third century in the region of Tauric Chersonesus (the Crimea) on coins of Titus, King of the Bosporus, dated 270, 276, and 303 (De Hucqne, "Des ancres de la tempe à Kotschou- bey, II, 348, 360, 416; Cavedoni, "Appendice alle ricerche crittine intorno alle med. Costantine, 18, 19—extract from the "Opuscoli litterari e religiosi di Modena, in "Bull. arch. Napolit.," ser. 2, anno VII, 39). We shall speak again of this sign apropos of the dolphin. On a picture in the Crypta di Lus- cina, artistically unique and very ancient, there seems to be an allusion to the Cross. Turned towards the altar are two doves gazing at a small tree. The scene appears to represent an image of souls looked for from the bonds of the body and saved by the power of the Cross (De Rossi, Roma Sotterranea Cristiana, I, Pl. XII.).

Before passing to the study of other, more or less disguised, forms of the cross, e. g. various monograms of the name of Christ, it may be well to say a word of various known forms of the cross on primitive monuments of Christian art, some of which we shall meet with in our early study of the said monograms. — The crucifix etocrisa X or decussated cross, so called from its resemblance to the Roman decussis, or symbol for the numeral 10, is in shape like the Greek letter chi; it is also known as St. Andrew's Cross, because that Apostle is said to have suffered martyrdom on such a cross, his hands and feet bound to its four arms (Sandini, Hist. Apostol., 130). The cross-hatched cross (form commissa, or carried across the shoulder) is in the Greek form (form commissa) is probably represented by the Greek letter tau (T), and is identical with the "sign" mentioned in the text of Ezekiel (iv, 4) already quoted. Tertul- lian comments (Contra Marc., III, xxii) as follows on this text: "The Greek letter T and our Latin letter T are the true form of the cross, which, according to the Prophet, will be imprinted on our foreheads in the true Jerusalem." Specimens of this veiled form of the cross are met with on the monuments of the Roman catacombs, a very fine one, e. g. in an epitaph of the third century found in the cemetery of St. Callis- tus, which reads iniuriae aegri (De Rossi, "BBulletino d'archeologia cristiana," 1863, 45). In the Roman catacombs of the eighth century a sarcophagus exhibits clearly the gallow-cross formed by the intersection of the letters T and V in the monogram of a proper name carved in the centre of the cartella, or label. This second letter (V) was also figurative of the cross, as is evident from the inscriptions scratched on rock-surfaces at Mount Sinai (Lenormant, "Sur l'origine chrétienne des inscriptions sinaitiques," 26, 27; De Rossi, loc. cit.). A monogram of a proper name (perhaps Marturius), discovered by Armellini on the Via Latina, shows the cross commissa above the intersection of the letters. Other monograms show similar forms, such as the "P" monogram (De Rossi, "Bulletino d'archeologia cristiana," 1867, page 13, fig. 10, and page 14).

It has been attempted to establish a connexion between this form and the crus anxata of the Egyptians, mentioned above, but we see no reason for this (cf. Le- nomart, "Les monuments de l'art chrétien en Egypte, en Nubie, et en Abyssinie"). It would seem that St. Anthony bore a cross in the form of tau on his cloak, and that it was Egyptian in origin. Such a cross is still used by the Antonine monks of Vienne in Dauphiny, and appears on their churches and on the monuments of art even to the present day. The name of Zeno of Verona, who in the second half of the fourth century was bishop of that city, relates that he caused a cross in form of a tau to be placed on the highest point of a basilica. There was also another motive for choosing the letter T as symbolical of the cross. As, in Greek, this letter stands for 300, that number in Aposto- lic times was taken as a symbol of the instrument of our salvation. The symbolism was carried farther, and the number 318 became a symbol of Christ and His Cross: the letter τ (tota) being equal to 10, and Η (eto) to 8 in Greek (Allard, "Le symbolisme chrétien d'après Prudence," in "Revue de l'art chrétien," 1885; Hefele, Ed. Exp. St. Baptisme, 9).
Both the Latin and Greek crosses play an important part in the architectural and decorative styles of church buildings during the fourth and subsequent centuries. The church of Santa Croce at Ravenna is in the form of a Latin cross; and on the pillars of a church built by Bishop Paulinus at Tyre in the fourth century, a cross is illustrated in this Latin way. The façade of the Catholicon at Athens shows a large Latin cross. And this style of cross was adopted by West and East until the schism occurred between the two churches. Indeed, at Constantinople the church of the Apostles, the first church of St. John, was consecrated by Constantine, through the monastery of St. John at Studium, of St. Demetrius at Salonica, of St. Catherine on Mount Sinai, as well as many churches at Athens, are in the form of the Latin cross; and it appears in the decorations of capitals, balustrades, and mosaics. In the far-off lands of the Franks, the Bretons, and the Saxons, it was carved on stones and rocks, with elaborate and complex Runic decorations. And even in the Catholicon at Athens, crosses no less lavishly ornamented are to be found. In out-of-the-way places in Scotland, too, it has been discovered (cf. Dictionnaire de l’Académie des Beaux-Arts, V, 98). A disguised image of the gibbon on which the Redeemer died (De Rossi, Rom. Sott. I, p. 333, PL XVIII). It is to be found also painted into the mantle of Moses in a fresco from the Catacomb of St. Saturninus on the Via Salaria Nova (Perret, Cat. de Rome, III, PL VI). In later times it is to be seen in the church at Paris, built by King Childerich (Lenoir, Statistique monumentale de Paris) and carved on the pedestals of the columns in the basilica of Constantine in the Agro Verano; also on the roofs and pillars of churches, to denote their consecration. More often, as we might expect, we find it on the façades of the Byzantine basilicas and on church monuments, such as alts, iconostases, sacred curtains for the enclosure, thrones, ambones and sacerdotal vestments. When the Emperor Justinian erected the church of Santa Sophia at Constantinople, with the aid of the architect Artemius of Tralles, and Isidore of Miletius, a new architectural type was created which, because the churches subsequently built within the Byzantine Empire, and the Greek cross inscribed in a square thus became their typical ground-plan. Perhaps, too, the church of the Twelve Apostles may have been built upon this plan, as a famous epigram of St. Gregory Nazianzen would seem to indicate. There are other forms of cross, such as the crux gammata, the crux florada, or flowering cross, the pectoral cross, and the patriarchal cross. But these are noteworthy rather for their various uses in art and liturgy than for any peculiarity of style.

The complete and characteristic form of Christ's monogram is obtained by the superposition of the two initial Greek letters, chi and rho, of the name ΧΡΙΣΤΟΣ. This is inexact, as the Constantinian monogram, although it was in use before the days of Constantine. It gained this name, however, because on his day it was much in use and became a triumphal signification from the fact that the emperor placed it on his new standard, i.e. the Labarum (Marucchi, "Di una pregevole ed inedita inscrizione cristiana," in "Studi in Italia," anno VI, II, 1883). Older, but less complete, forms of this monogram are made up of the crux decussata accompanied by a defecive letter Τ, differing only slightly from the letter I, or encircled by a crown. These forms, which were used principally in the third century, present a striking resemblance to a cross, but all of them are manifest allusions or symbols. Another symbol largely employed during the third and fourth centuries, the swastika already spoken of at some length, still more closely resembles the cross. One form of this cross—in the Christian era it is known as the crux gammata, because it is made up of joining four gammas at their bases. Many fantastic significations have been attached to the use of this sign on Christian monuments, and some have even gone so far as to conclude from it that Christianity is nothing but the descendand of ancient religions and myths of the people of India, Persia, and Asia preceding these theories go on to point out the close relationship that exists between Christianity, on the one hand, and Buddhism and other Oriental religions, on the other. At the very least they insist upon seeing some relation between the symbolic concepts of the ancient religions and those of Christianity. Such was the opinion held by Emile Burnouf (cf. Revue des Deux Mondes, 15 August, 1868, p. 874). De Rossi ably refuted this opinion, and showed the real value of this symbol on Christian monuments (Bull. d'arch. crist., 1868, 88–91). It is fairly common on the Christian monuments of Rome, being found on some sepulchral inscriptions, besides occurring twice, painted, on the Good Shepherd's tunic in an arcosolium in the Catacomb of St. Generosa in the Via Portuensis, and again on the tunic of the fessor Diogenes (the original epitaph is no longer extant) in the Catacomb of St. Domitilla in the Via Ardeatina. Outside of Rome it is less frequent. There is one example in an inscription found at Chiusi (see Cavedoni, Raggugliaggio di due antichi cimiteri di Chiusi). A stone in the museum at Bergamo bears the monogram joined to the gamma cross, but it would seem to be of Roman origin. Another stone in the Museum at Milan, which was built in the time of certain Hugulius, belongs to the fifth or sixth century. In a sarcophagus at Milan belonging to the fourth century it is repeated over and over again, but evidently as a mere ornamental motive (see Allegranza, Mon. di Milano, 74). De Rossi (Rom. Sott. Cist., II, 318) made researches into the etymology of this symbol, and the examples of it be found in the catacombs at Rome, and he observed that it was seldom or never used until it took the place of the anchor, i.e. about the first half of the third century, whence he inferred that, not being of ancient tradition, it came into fashion as the result of studied imitation after the model linking the beginnings of Christianity with Asiatic traditions. Its genesis is reflex and studied, not primitive and spontaneous. It is well known how anxiously the early Christians sought out meanings whereby they could at once portray and conceal the Cross of Christ. That in this way they should have discovered and adopted the crux gammata, is easily intelligible, and it is explained not merely by what has already been said, but also by the similarity between the Greek character gamma (Γ) and the Phoenician character tan. The latter has been famous since Apostle times as a symbol of the Cross of Christ and of the Redemption (cf. Barnabae Epist. ix, 9).

The so-called Constantinian monogram prevailed during the whole of the fourth century, assuming various forms, and combining with the apocalyptic letters A and D (see Alpha and Omega), but ever approaching more and more closely to the form of the cross pure
THE APPARITION OF THE CROSS TO CONSTANTINE

EXECUTED BY PUPILS OF RAFAEL. SALA DI COSTANTINO, VATICAN
and simple. In the latter part of that century what is known as the "monogrammatic cross" makes its appearance; it closely resembles the plain cross, and foreshadows its complete triumph in Christian art. At the same time, the Holy Places around Jerusalem, and the importance of the Cross in the redemption of the human race, become more evident. Constantine, by the Edict of Milan, had given definitive peace to the Church; yet, for another century the faithful did not judge it opportune to abandon the use of the Constantinian monogram in one or other of its many forms. But the fifth century marks the period when Christian art broke away from old fears, and, secure in its triumph, displayed before the world, now become Christian also, the sign of its redemption. To bring about profound changes in the artistic traditions of Christianity, besides the altered condition of the Church in the eyes of the Roman State, two facts of great importance played a part: the miraculous discovery of the True Cross to Constantine and the finding of the Holy Wood. Constantine having declared war on Maxentius had invaded Italy. During the campaign which ensued he is said to have seen in the heavens one day a luminous cross together with the words "IN HOC SIGNO VINCE." This was the sign he sought. At the end of his life, which he thought was about to follow that day, he saw again, in sleep, the same cross, and Christ, appearing with it, admonished him to place it on his standards. Thus the Labarum took its origin, and under this glorious banner Constantine overcame his adversary near the Milvian Bridge, on 28 October, 312 (see CONSTANTINE THE GREAT). The second event was of even greater importance. In the year 326 the mother of Constantine, Helena, then about 80 years old, having journeyed to Jerusalem, undertook to rid the Holy Sepulchre of the mound of earth heaped upon and around it, and to destroy the pagan buildings that profaned its site. Some revelations which she had received gave her confidence that she would discover the Saviour's Tomb and His Cross. The work was carried on diligently, with the co-operation of St. Macarius, bishop of the city. The Jews had hidden the Cross in a ditch or well, and covered it over with stones, so that the faithful might not come and venerate it. Only among the Jews was the exact place where it had been hidden, and one of them, named Judas, touched by Divine inspiration, pointed it out to the excavators, for which act he was highly praised by St. Helena. Judas afterwards became a Christian saint, and is honoured under the name of "Cyriae." During the excavations three crosses were found, but because the titulus was detached from the Cross of Christ, there was no means of identifying it. Following an inspiration from on high, Macarius caused the three crosses to be carried, one after the other, to the bedside of a worthy woman who was about to die. In each case the death of the woman was instantaneous; and so were the two of avail; but on touching that upon which Christ had died the woman got suddenly well again. From a letter of St. Paulinus to Severus inserted in the Breviary of Paris it would appear that St. Helena herself had sought by means of a miracle to discover which was the True Cross; and that she caused a man almost dead and buried to be carried to the spot, whereupon, by contact with the third cross, he came to life. From yet another tradition, related by St. Ambrose, it would seem that the titulus, or inscription, had remained fastened to the Cross. After the happy discovery, St. Helena, at Constantine's request, had the entire basilica over the Holy Sepulchre, and that is the reason why the church bore the name of St. Constantin. The precise spot of the finding was covered by the atrium of the basilica, and there the Cross was set up in an oratory, as appears in the restoration executed by de Vogüé. When this noble basilica had been destroyed by the infidels, Arculfus, in the seventh century, enumerated four buildings upon the holy ground, and wrote that one of them was "the Church of the Invention" or "of the Finding." This church was attributed by him and by topographers of later times to Constantine. The Frankish monks of Mount Olivet, writing to Leo III, style it St. Constantin. Perhaps the oratory built by Constantine suffered destruction at the hands of the Moslems, and only one of the buildings, and so could still retain the name and style of Martyrium Constantinianum. (See De Rossi, Bull. d' arch. crist., 1865, 88.)

A portion of the True Cross remained at Jerusalem enclosed in a silver reliquary; the remainder, with the nails, must have been sent to Constantinople, and it must have been this second portion that he caused to be enclosed in the statue of himself which was set on a porphyry column in the Forum at Constantinople; Socrates, the historian, relates that this statue was to make the city impregnable. One of the nails was fastened to the emperor's helmet, and one to his horse's bridle, bringing to mind the words of the Fathers, what had been written by Zacharias the Prophet: "In that day that which is upon the bridle of the horse shall be holy to the Lord" (Zach., xiv, 20). Another of the nails was used later in the Iron Crown of Lombardy, preserved in the treasury of the cathedral of Monza. Exercising his gift for describing the work of excavating and building on the site of the Holy Sepulchre, does not speak of the True Cross. In the story of a journey to Jerusalem made in 333 (Itinerarium Burgidigalei) the various tombs and the basilica of Constantin are referred to, but no mention is made of the True Cross. The earliest reference to it is in the "Catecheses" of St. Cyril of Jerusalem (P. G., XXXIII, 468, 668, 776), written in the year 348, or at least twenty years after the supposed discovery. In this tradition of the "Invention," or discovery, of the True Cross, a word is said as to the smaller portions of it scattered up and down the world. The story, as it has reached us, has been admitted, since the beginning of the fifth century, by all ecclesiastical writers, with, however, many more or less important variations. By many critics the tradition of the finding of the Cross through the work of St. Helena in the vicinity of Calvary has been held to be historically, without any historical reality, these critics relying chiefly upon the silence of Eusebius, who tells of all else that St. Helena did in Jerusalem, but says nothing about her finding the Cross. Still, however difficult it may be to explain this silence, it would be unsound to annihilate with a negative argument a universal tradition dating from the fifth century. The wonders related in the Syriac book "Doctrina Addai" (sixth century) and in the legend of the Jew Cyriacus, who is said to have been inspired to reveal to St. Helena the place where the Cross was buried, are responsible for the belief of so many, and all of this is held true by this matter. These beliefs are universally held to be apocryphal. (See Duchesne, Lib. Pont., I, p. evii.) However that may be, the testimony of Cyril, Bishop of Jerusalem from 350 or 351, who was on the spot a very few years after the event took place, and was a contemporary of Eusebius of Caesarea, is explicit and formal as to the finding of the Cross at Jerusalem during the reign of Constantine; this testimony is contained in a letter to the Emperor Constantius (P. G., XXXIII, 52, 1167; and cf. 686, 687). It is true that the authenticity of this letter is questioned, but without solid grounds. St. Ambrose (De obit. Theod. cap. 45 in P. L. XVI, 401) and Rufinus (Hist. ecc., I, viii in P. L., XXI, 476) bear witness to the fact of the finding. Silvia of Aquitaine (Peregrinatio ad loca sancta, ed. Gamurrini, Rome 1888, p. 76) assures us that in her time
the feast of the Finding was commemorated on Calvary, that event having naturally become the occasion of a special feast under the name of "The Invention of the Holy Cross". The feast dates from very early times at Jerusalem, and it was gradually introduced into other Churches. Paprock (ActaSS., 3 May) tells us that it did not become general until about 720. In the Latin Church it is kept on the 3rd of May; the Greek Church keeps it on the 14th of September, the same day as the Exaltation, another feast of very remote origin, supposed to have been instituted at Jerusalem to commemorate the dedication of the basilica of the Holy Sepulchre (335) and thence introduced at Rome.

Constantine's vision of the Cross, and perhaps another apparition which took place in Jerusalem in 346, would seem to have been commemorated in this same feast. But its chief glory is itsconnexion with the restoration of the True Cross to the Church of Jerusalem, after it had been carried away by the Persian king, Chosroes (Khusrav) II, the conqueror of Phocas, when he captured and sacked the Holy City. This Chosroes was afterwards vanquished by the Emperor Heraclius in 628 and was assassinated by his own son Sirees (Shihr), who restored the Cross to Heraclius. It was therefore brought to Constantinople and thence, in the spring of the year 629, to Jerusalem. Heraclius, who wished to carry the Holy Cross upon his own shoulders on this occasion, found it extremely heavy, but when, upon the advice of the Patriarch Zacharias, he laid aside his crown and imperial robes of state, the sacred burden became light, and he was able to carry it to the church. In the following year Heraclius was conquered by the Mahommedans, and in 647 Jerusalem was taken by them.

In reference to this feast the Paris Breviary associates with the memory of Heraclius that of St. Louis of France, who, on 14 September, 1241, barefoot and divested of his royal robes, carried the Holy Cross sent to him by the Templars, who had received it as a pledge from Baldwin. This fragment escaped destruction during the Revolution and is still preserved at Paris. There, also, is preserved the incomparable cross left to the abbey of Saint-Germain-des-Prés by the Princess Anna Gonzaga, together with two portions of the Nails. Very soon after the discovery of the True Cross its wood was cut up into small relics and quickly scattered throughout the Christian world. We know this from the writings of St. Ambrose, of St. Paulinus of Nola, of Sulpicius Severus, of Rufinus, mentioned, among the Gothic kingdoms, by Theodoret (cf. Ducebene, "Lib. Pont.", I, p. evi; Marcelli, "Basilique de Rome", 1902, 348 sq.; Pennacchi, "De Inventà Ierosolymin Constântino magno Imp. Cruce D. N. I. C.", Rome, 1882; Baroniùs, "Annales Ecl.", ad an. 336, Luces, 1739, IV, 178). Many portions of it are preserved in Santa Croce in Gerusalemme at Rome, and in Notre-Dame at Paris (cf. Rohault de Fleury, "Mémoire", 45-163; Gosselin, "Notice historique sur la Sainte Couronne et les autres Instruments de la Passion de Notre-Dame de Paris", Paris, 1828; Sauvage, "Documents sur les reliques de la Vraie Croix", Rouen, 1893). St. Paulinus in one of his letters refers to the redintegration of the Cross, i.e. that it never grew smaller in size, no matter how many pieces were detached from it. And the same St. Paulinus received from Jerusalem a relic of the Cross enclosed in a golden tube, but so small that it was almost an atom, "in segmento pene atomo hastula butrum proprium mensura et sigillum externum servante" (Epist. xxxvi ad Severum).

The historical detail we have been considering sufficiently accounts for the appearance of the cross on monuments dating from the end of the fourth and the beginning of the fifth century. In an acrosoom in the Catacomb of St. Callistus a cross composed of flowers and foliage with two doves at its base is still partially disguised, but begins to be more easily recognizable (cf. De Rossi, Rom. Sott., III, Pl. XII). Especially in Africa, where Christianity had made more rapid progress, the cross began to appear openly during the course of the fourth century. The most ancient text we have relating to a carved cross dates from later than ca. 350. The cross was used on the coinage of Christian princes and monasteries, inscription, Salus Mundi. The "adoration" of the Cross, which up to this time had been restricted to private cult, now began to assume a public and solemn character. At the end of the fourth century Christian poets were already writing: "Plecto genu lignumque Christus venerabile sub ponere" (Theod. of Nicaea, among other precepts that deal with images, lays down that the Cross should receive an adoration of honour, "honorariam adorationem". (See Section II of this article.) To the pagans who taunted them with being as much idolators as they accused the pagans of being towards their gods, they replied that they took their stand on the nature of the cult they gave: that it was not latria, but a relative worship, and that the material symbol only served to raise their minds to the Divine Type, Jesus Christ Crucified (cf. Tert., "Apol.", xvi; Minucius Felix, "Octav.", ix). Wherefore, when speaking on the adoration of the Cross, it thought it opportune to explain the idea: "Let us adore Christ, our King, who hung upon the wood, and not the wood" (Regem Christum quis peperund in ligno... non lignum."—In obit. Theod., xvi). The Western Church observes the solemn public veneration (called the "Adoration") on Good Friday. In the Gregorian Sacramentary we read: "Venit Pontifex et adoratam deoseculatum". In the Eastern Church the special veneration of the Cross is performed on the Third Sunday in Lent (Κυριακή της σταυροφορίας, "Sunday of the Cross-veneration") and during the week that follows it. The gradual spread of the celebration of the Cross-veneration occasioned abuses in the piety of the faithful. Indeed, we learn from the edicts of Valentinian and Theodosius that the cross was at times set up in very unseemly places. The evil-minded, the ignorant, and all those who practised spells, charms, and other such superstitions perverted the widespread devotion to their own corrupt uses. To deceive the faithful and turn their piety into lucre, those people associated the sign of the cross with their superstitions and magical symbols, winning thereby the confidence and trust of their dupes. To all this corruption the religious Church, under the teaching of the teachers and exhorting the faithful to true piety, and to beware of superstitious talesmen (cf. St. John Chrysostom, Hom. vii in Epist. ad Coles., vii, and elsewhere; De Rossi, "Bull. d'archeol. crist.", 1899, 62-64).

The distribution of portions of the wood of the Cross led to the making of a remarkable number of crosses from the fourth century onwards, many of which have come down to us. Known under the names of encolpia and pectoral crosses they often served to enclose fragments of the True Cross; they were merely crosses worn on the breast out of devotion—"To wear upon the breast a cross, hung from the neck, with the Sacred Wood, or with relics of saints, which is what they call an encolpium" (Anastasius Bibliothecarius on Act. V of VIII Dec. Conc.). On the origin and use of pectoral crosses see Giovanni Scandella, "Considerazioni sopra uno encolpio euno rinvenuto in Corfu" (Trieffe, 1854). St. John Chrysostom, in his polemic against the Manichees and Gentiles, with whom he compared the upholding of the Cross, testifies that whoever, man or woman, possessed a relic of it had it enclosed in gold and wore it around the neck (St. John Chrysostom, ed. Montfaucon, I, 571). St. Maeria (d. 379), sister of St. Gregory Nazianzen, wore an iron cross on her breast; we do not really know its shape, perhaps it was the monogrammatic one taken by her brother from
her dead body. Among the belongings of Maria, the daughter of Stilicho and wife of Honorius, laid away together with her body in the Vatican basilica, and found there in 1544, there were counted no fewer than ten small crosses in gold adorned with emeralds and garnets, as may be seen in the illustrations preserved by Lucio Fauno (Antich. Rom., V, x). In the Kircherian Museum there is a small gold cross, hollowed for relics, and dating from the fifth century. It has a ring attached to it for securing it around the neck, and seems to have had grapevine ornamentation at the extremities, described by De Rossi and by him attributed to the sixth century, was found in a tomb in the Agro Verano at Rome (Bull. d'arch. Crist., 1863, 33–38). The general characteristic of these more ancient crosses is their simplicity and lack of inscription, in contrast to those of the Byzantine era and times later than the sixth century. Among the most noteworthy is the saurotheca of St. Gregory the Great (590–604), preserved at Monza, which is really a pectoral cross (cf. Bugatti, "Memorie di S. Celso," 174 sq.; Borgia, "De Crucie Veliternae," pp. cxxii sq.). Scandella (op. cit.) points out that St. Gregory was first to mention the crucified Christ given to these golden reliquaries. But, as we have seen, they date from much earlier times, as is proved by the one found in the Agro Verano, among others. Some writers go too far in wishing to push their antiquity back to the beginning of the fourth century. They have determined it as a crossing on documents in the time of the martyrs under Diocletian. In those of the martyrdom of St. Procopius we read that he caused a gold pectoral cross to be made, and that there appeared on it miraculously in Hebrew letters the names Emmanuel, Michael, Gabriel. The Bollandists, however, reject these acts, which they demonstrate to be of little authority (Acta SS., July II, p. 556). In the history of St. Eustratius and other martyrs of Lesser Armenia, it is related that a soldier named Orestes was recognized to be a Christian because, during some military manoeuvres, a certain movement of his body displayed the fact that he wore a golden cross on his breast (cf. Aringhi, Rom. Subt., II, 343); but even this history is far from being entirely accurate.

The recent opening of the famous treasury of the Sancta Sanctorum near the Lateran has restored to our possession some objects of the highest value in connexion with the wood of the Holy Cross, and bearing on crosses of the fifth century. The Cappelletto collection at Holy Wood, and of churches built in the fifth and sixth centuries in its honour. Among the objects found in this treasury was a votive cross of about the fifth century, inlaid with large gems, a cruciform wooden box with a sliding lid bearing the words $422 2Z0H (light, c.), and lastly, a stone ornamented with cloisonnés enamels. The first of these is most important because it belongs to the same period (if not to an even earlier one) as the famous cross of Justin II, of the sixth century, preserved in the treasury at St. Peter's, and which bears a relic of the True Cross set in it. It is held, up to the present day, to be the oldest cross extant in a precious metal (De Waal in "Römische Quartalschrift," VII, 1893, 245 sq.; Molière, "Hist. générale des arts: L'orfèvrerie religieuse et civile," Paris, 1901, vol. IV, pt. I, p. 37). This cross, containing relics of the Holy Cross, was discovered by Pope Sergius I (687–701) in the sacristy of St. Sophia (cf. Duchesne, Lib. Pont., I, 347, s. v. Sergius) in a sealed silver case. It contained a jewelled cross enclosing a piece of the True Cross, and dates, perhaps, from the fifth century. Enamelled crosses of this nature, an inheritance of Byzantine art, do not date earlier than the sixth century. The oldest example known is a fragment of the reliquary adorned with cloisonnés enamels in which a fragment of the Cross was carried to Poitiers between 565 and 575 (cf. Molière, op. cit.; Barbier de Montault, "Le trésor de la Sainte Croix de Poitiers," 1883). Of later date are the Cross of Victory at Limburg near Aachen, Charlemagne's cross, and that of St. Stephen at Vienna. Besides these we have in Italy the enamelled cross of Cosenza (eleventh century), the Gaeta cross, also enamelled, crosses in the Christian section of the Vatican Museum, and the celebrated cross of Veltrette (eighth or tenth century), adorned with precious gems and enamel, and discussed by Cardinal Stefano Borgia in his work, "De Crucie Veliternae."

The world-wide devotion to the Cross and its relics during the fifth and succeeding centuries was so great that even the iconoclast Emperors of the East in their suppression of the cult of images had to respect that of the Cross (cf. Banduri, "Numism. imp.," II, p. 702 sq.; Niceph., "Hist. Eccl.", XVIII, iv). This cult of the Cross called forth the building of many churches and oratories wherein to treasure its precious relics. The church of S. Croce at Ravenna was built by Galla Placidia before the year 450 "in honorem sanctae crucis Domini, a quæ habet et nomen et formam" (Muratori, Script. rer. ital., I, Pl. II, p. 544a). Pope Symmachus (498–514; cf. Duchesne, Lib. Pont., I, 347, s. v. Symmachus, no. 79) built an oratory of the Holy Cross behind the baptistery at St. Peter's, and placed in it a jewelled gold cross containing a relic of the True Cross. Pope Hilarius (461–468) did the like at the Lateran, building an oratory communicating with the baptistery, and placing in it a same cross (cf. Duchesne, op. cit., I, 242: "ubi lignum possit dominii crucem aereum cum gemmis quæ pensi, lib. XXV").

The unvarying characteristic style of cross in the fifth and sixth centuries is for the most part decked with flowers, palms, and foliage, sometimes sprouting from the root of the cross itself, or adorned with gems and precious stones. Sometimes on two small chains hanging from the arms of the cross one sees the apocalyptic letters A, Ω, and over them were hung small lamps or candles. On the mosaics in the church of St. Felix at Nola, St. Paulinus caused to be written: "Cerne coronatum domini super aetra Christi stare crucrem" (Ep. xxxii, 12, ad Sever.). A flowered and jewelled cross is that painted on the baptismal of the Catacomb of Ponzianus on the Via Portuensis (cf. Bottari, Rom. Sott., Pl. XLIV). The cross is also depicted on the mosaic in the baptistery built by Galla Placidia, in the church of San Vitale, and in the mosaics at Ravenna prison, and in the baptistery from St. Sophia at Constantinople. In 1687, at Berezov Island, on the River Amazon, in Siberia, there was found a silver plate, or liturgical paten, of Syrian workmanship, which now belongs to Count Gregory Stroganov. In the centre of it is a cross standing on a terrestrial globe studied with stars; on either side stands an angel with a staff in his left hand, the right being raised in adoration; four rivers flow from its base and indicate that the scene is in Paradise. Some learned Russians attribute the plate to the ninth century, but De Rossi, more correctly, places it in the seventh century. The same same cross was of frequent use in liturgical rites and processions of great solemnity. It was carried in the churches where the stations were; the bearer of it was called draconarius, and the cross itself stationalis. These crosses were often very costly (cf. Bottari, Rom. Sott., Pl. XLIV), the most famous being the cross of Ravenna and that of Veltrette.

The sign of the cross was made at liturgical functions over persons and things, sometimes with five fingers extended, to represent the Five Wounds of Christ sometimes with three, in sign of the Persons of the Trinity, and sometimes with one, symbolical of the Unity of God. Furthermore, the processions of the clergy and the oblations Leo IV prescribed that two fingers be extended, and the thumb placed beneath them. This is the only true sign of the Trinitarian cross.
pope warmly recommended his clergy to make this sign with care, else their blessing would be fruitless. The sign was accompanied by the words: "In nomine Patris, etc." Another use of the cross was in the solemn dedication of churches (see ALPHABET; CONSECRATION). The bishop who performed the ceremony wrote the alphabet in Latin and Greek on the floor of the church along two straight lines crossing in the nave of the Roman basilica. The letters, which in the land-plottings of the Roman augurs represented, with its two component lines, the *cardo maximus* and the *decumanus maximus*, was the same *decus et munus* used by the Roman *agrimensori* in their surveys of farms, to indicate boundaries. This sign was approved by its crusading shape and identity in shape with the initial letter of His name, Ἱορδάνει, in Greek. For this reason it was one of the genuine forms of the *sigillum Christi*.

The use of the cross became so widespread in the fifth and following centuries that anything like a complete enumeration of the monuments on which it appears is well-nigh impossible. Suffice it to say that there is hardly a remnant of antiquity dating from this century, whether lowly and mean or noble and grand, which does not bear the sign. In proof of this we shall give here a cursory enumeration. It is quite frequent on sepulchral monuments, on the imperial tombs as well as on the tombs of courtiers; it is found on the *loculi* (resting-places) in the catacombs, especially of Rome, in a painting in a Christian cemetery at Alexandria in Egypt, on a mosaic at Boville near Rome, on an inscription for a tomb made in the form of a cross and now in the museum at Marseilles, on the interior walls of sepulchral chambers, on the front of marble sarcophagi dating from the fifth century. In these last instances it is common to see the cross mounted by the monogram and surrounded by a laurel wreath (e.g. the sarcophagi at Arles, and in the Lateran Museum). A very fine specimen was found recently in excavations in St. Domitilla's Catacomb on the Ostian Way; it is a symbolic picture of souls freed from the trammels of the body, and saved by means of the Cross, which has two doves on its arms, while armed guards are asleep at its base. Lastly, in England, crosses have been found on sepulchral monuments. So much for the faithful that they put it even on household utensils, on medals of devotion, on pottery lamps, spoons, cups, plates, glassware, on clasps dating from Merovingian times, on inscriptions and votive offerings, on seals made in the form of a cross, on toys representing animals, on ivory combs, on the seals of winemakers, on religious medals, and even on relics in a chalice. In the way of liturgical use we meet it on Biblical codices, on vestments, pallia, on lesten thongs inscribed with exorcising formule, and it was signed on the foreheads of catechumens and candidates for confirmation. The architectural details of churches and basilicas were ornamented with crosses: the facades, the marble slabs, the transoms, the pillars, the capitals, the keystones of arches, the altar-tables, the bishops’ thrones, the diptychs, and the bells were also ornamented in the same way. In the artistic monuments the so-called cruciform nimbus around Our Saviour’s head is well known. The cross appears over His head, and near that of the orante, as in the oil-stocks of Santo Menna. It is also to be met with on monuments of a symbolical nature: on the rocks whence flow the four celestial rivers the cross finds its place; on the vase and on the symbolical ship, on the head of the tempting serpent on the line of the dromos, of the Psyche.

When Christianity had become the official religion of the empire, it was natural that the cross should be carved on public monuments. In fact it was from the first used to purify and sanctify monuments and temples originally pagan; it was prefixed to signatures and to inscriptions placed on public work; it was borne by consuls on their sceptres, the first to do so being Basil the Younger (a.d. 859, cf. Gori, Thes. dipht. II, pl. XX). It was also cut in marble, stone, and in brickyards, and on the gates of cities (cf. de Vogué, Syrie Centrale; Architecture du VII siècle). At Rome there is still to be seen on the Gate of St. Sebastian the figure of a Greek cross surrounded by a circle with the invocations: AΓΩΣ ΚΩΝΩΝ AΓΩΣ ΠΡΩΤΟΣ BΟΛΩΝ. In another form it also set the salutation of salvation in the public streets.

According to tradition, these crosses are very ancient, and four of them date from the time of St. Peter. Some of them were restored in the ninth and tenth centuries (cf. Giovanni Gossadini, Delle eruci monumentali che erano nelle vie di Bologna nel secolo xiii).

The cross also played an important part in heraldry and diplomatic science. The former does not directly come into our scope; of the second we shall give the briefest outlines. Crosses are to be found on documents of early medieval times and, being placed at the head of a deed, were equivalent to an invocation of heaven, whether they were plain or ornamental. They were at times placed before signatures, and they have even been equivalent to signatures in themselves. Indeed, from the tenth century we find, under contracts, roughly-made crosses that have all the appearance of signatures. They were made by Robert Capet, Henry I, and Philip I sign their official documents. This usage declined in the thirteenth century and appeared again in the fifteenth. In our own day the cross is reserved as the attestiation-mark of illiterate people. A cross was characteristic of the signature of Apostolic notaries, but this was carefully designed, not rapidly written. In the early Middle Ages crosses were decorated with even greater magnificence. In the centre were to be seen medallions representing the Lamb of God, Christ, or the saints. Such is the case in the Velletri cross and that which Justin II gave to St. Peter, mentioned above, and again in the silver cross of Agnello at Ravenna (cf. Ciampini, Vet. mon., II, pl. XIV). All this kind of decoration displays the substitution of some more or less complete symbol for the figure of Christ on the cross, of which we are about to speak.

There may be well-grounded reasons bearing on the departments of the subject just treated, and containing illustrations which has not been opportune to quote in the present part of the article: *Prooce de l’histoire et de l’art religieux* (Paris, 1845); *Kreuzas* (Schaffhausen, 1870); *Grimaud de Saint-Laurent, L’Histoire de la Croix et de l’eglise christianisée de la chrétienné de l’europe (articles *la Croix* et *la chrétienné de l’europe* in *Dictionnaire des antiquités chrétiennes*, s. v. *Crucifix*); *Bayer, Recherches pour servir à l’histoire de la pensée religieuse en orient et en occident* (Paris, 1877); *Histoire des anciennes chrétiennes de l’Italie (l’Étienne de Jean VII*) in *Rev. archéol.*, 1877, II; *Labarte, Histoire des arts industriels*, II; *Kraus, Real-Encyclopedia der christlich. Alterthumen* (Freiburg, 1882).

(5) Later Development of the Crucifix.—We have seen the progressive steps, artistic, symbolical, and allegorical, through which the representation of the Cross passed from the first centuries down to the Middle Ages; and we have seen some of the reasons which prevented Christian art from making an earlier display of the figure of the cross. Now the cross, as it was seen during all this time was only a symbol of the Divine Victim and not a direct representation. We can thus more easily understand, then, how much more circumscription was necessary in proceeding to a direct portrayal of the Lord’s actual Crucifixion. Although in the fifth century the cross began to appear on public monuments, it was not for a century afterwards that the figure on the cross was shown; and it was not until the fifth or sixth century, even the middle of the sixth century, did it appear without disguise. But from the sixth century onward we find many images—not allegorical, but historical and realistic—of the crucified Saviour. To proceed in order, we will first examine the rare allusions, as it were, to the Crucifixion in Christian art down to the sixth century,
and then look at the productions of that art in the later period.

Seeing that the cross was the symbol of an ignominious death, the repugnance of the early Christians to any representation of Christ's torments and ignominy is easily understood. On a few sarcophagi of the fifth century (e.g. one in the Lateran, no. 171) scenes from the life of Christ are represented, such as the raising of Lazarus, etc. None of the shame and horror attaching to that instrument of death which was, as St. Paul says, "to the Jews a scandal, and to the Gentiles foolishness." Yet, from the first ages Christians were loth to deprive themselves altogether of the image of their crucified Redeemer. Indeed, a similar representation is found in catacombs, because of the "Discipline of the Secret" (q. v.), they could not represent the scene openly. The Council of Elvira, c. 300, decreed that what was to be adored ought not to be used in mural decoration. Wherefore recourse was had to allegory and to veiled forms, as in the case of the cross itself. (Cf. Brethier, Les origines du Crucifix dans l'art religieux, Paris, 1904.)

One of the most ancient allegories of the Crucifixion is considered to be that of the lamb lying at the foot of the anchor—symbols respectively of the Cross and of Christ. A very ancient inscription in the Crypt of S. Cosma e Damiano, Rome, has the figure of a lamb and a cross, which is otherwise somewhat rare (cf. De Rossi, Rom. Sott. Christ., I, Pl. XX).

The symbol was in use at the end of the fourth and beginning of the fifth century. In the description of the mosaics in the basilica of St. Felix at Nola, St. Paulinus shows us the same verse in connexion with the mystical lamb, evidently an allusion to the Crucifixion, and he adds the well-known verse: "Sub cruce sanguiné nescat Christus in agno." We saw above that the trident was a veiled image of the cross. In the Catacomb of St. Callistus we have a more complicated study: the mystical dolphin is twisted into a trident—a representation of the Crucifixion. The early Christians in their artistic labours did not disdain to draw upon the symbols and allegories of pagan mythology, as long as these were not contrary to Christian faith and morals.

In the Catacomb of St. Callistus a sarcophagus, dating from the third century, was found, the front of which shows Ulysses tied to the mast while he listens to the song of the Sirens; near him are his companions, who with ears filled with wax, cannot hear the alluring song. All this is symbolic of the Cross, and of the Crucified, who has closed against the seductions of evil. It is a faithful representation of the treacherous sea of life in the ship which will bring them to the harbour of salvation. Such is the interpretation given by St. Maximus of Turin in the homily read on Good Friday (S. Maximini opera, Rome, 1874, 151. Cf. De Rossi, Rom. Sott., I, 344–345, Pl. XXX, 6). A very important fragment belonging to the beginning of the third century shows the Crucifixion openly. This would seem to contradict what we have said above, but it should be remembered that this is the work of pagan, and not of Christian, hands (cf. De Rossi, Bull. d'arch. crist., 1863, 72, and 1867, 75), and therefore it has no real value as a proof among purely Christian works. On a beam in the Pedagogium on the Palatine there was discovered a grafito on the plaster, showing a man with an ass's head, and clad in a perizoma (or short loin-cloth) and fastened to a cruz immisca (regular Latin cross). Near by there was inscribed: "In nomine dei." The words seem in an attitude of prayer with the legend Adventura beati Iesu Christi filii Dei, in honor of the God. This grafito is now to be seen in the Kirchermuseum in Rome, and is but an impious caricature in mockery of the Christian Alexemones, drawn by one of his pagan comrades of the pedagogium. (See Art.)

In fact Tertullian tells us that in his day, i.e. precisely at the time when this caricature was made, Christians were accused of adoring an ass's head, "Sonniamis caput seminum esse Deum nostrum" (Apol., xvi; Ad Nat., I, ii). And Minucius Felix confirms this (Octav., ix). The Palatine grafito is also important as showing that the Christians used the crucifix in their private devotions at least as early as the third century. It would not have been possible for Alexemones' companions to trace that figure if they had not seen such a figure made use of by the Christians. Professor Haupt sought to identify it as a caricature of a worshipper of the Egyptian god Seth, the Typho of the Greeks, but his explanation was rejected by Krauss.

Undoubtedly, a similar representation is found in catacombs because of the "Discipline of the Secret," q. v., in which Wünsch, who takes his stand on the letter Y which is placed near the crucified figure, and which has also been found on a tablet relating to the worship of Seth; he therefore concludes that Alexemones of the grafito belonged to the Sethian sect. (With reference to the Alexemones grafito, which certainly has a bearing on the crucifix and its use by the early Christians, see Raffaele Garucci, "Un crocifisso grafato da mano pagana nella casa dei Cesari sul Palatino," Rome, 1857; Ferdinand Becker, "Das Spott-Crucifix der römischen Kaiserpaläste", Breslau, 1866; Kraus, "Das Spott-Crucifix aus der Villa reinsta", Breisgau, 1872; Visconti, "Di un nuovo griffito palatino relativo al cristiano Alessamena," Rome, 1870; Visconti and Lanciai, "Guida del Palatino," 1873, p. 86; De Rossi, "Rom. Sott. Crist.," 1877, pp. 353–354; Wünsch, ed., "Setianische Verfluchungstafeln aus Rom," Leipzig, 1898, p. 110 seqq.; Vignoux, "Les livres saints et la critique rationaliste," I, 94–102.)

The crucifix and representations of the Crucifixion became general after the sixth century, on manuscripts, then on public monuments, and finally even on public monuments. But its appearance on monuments up to about the eighth century surely indicates a public cult of the crucifix as a public devotion, or, at least, not clearly and decidedly public. As a matter of fact, it is noteworthy that, in the year 692, i.e. at the end of the seventh century the Quinsext Council of Constantinople, called the Trullan, ordered the symbolic and allegorical treatment to be laid aside. The earliest MS. bearing a representation of Christ crucified is in a miniature of a Syriac codex of the Gospels dating from a. d. 586 (Codex Syriacus, 56), written by the scribe Rabula, and which is in the Laurentian Library at Florence. Therein the figure of Christ is robed (Assemani, Biblioth. Laurent. p. 189, Pl. XII, 1). The first representation of the crucifix belong to the sixth century. Gregory of Tours, in his work "De Gloriat Martyrum," I, xxx, speaks of a crucifix robed in a coalbum, or tunic, which in his day was publicly venerated at Narbonne in the church of St. Genesius, and which he considered a public devotion—so far was the public cult of the crucifix from having become general up to that time. A cross belonging to the sixth century is to be found in the treasury at Monza, on which the image of the Saviour is wrought in enamel (cf. Mozzonii, "Tavole cronologiche-crítiche della stor. eccl. secolo IV", 79), and which seems to be identical with that given by St. Gregory the Great to Theodolinda, Queen of the Lombards. We know also that he gave a cross to Recared, King of the Visigoths, and to others (cf. S. Gregorii Lib. III, Epist. xxxii; Lib. IX, Epist. cxxii; Lib. XIV, Epist. xlii; Lib. XIV, Epist. xliii). It is certain, then, that in the earlier centuries displaying the Redeemer on the Cross began with the close of the sixth century, especially on encolpium. Yet such examples of the crucifix are rare. As an example, we have a Byzantine encolpium, with a Greek inscription, which was erroneously thought to have been discovered in the Roman Catacombs in 1862, and of which the renowned Leo Allatius has written learnedly (cf. "Codice Chigiano", VI; Fea, "Miscellanea..."
...another very important monument of this century, and perhaps dating even from the preceding one, is the Crucifixion carved on the wooden doors at S. Sabina on the Aventine Hill, at Rome. The Crucified Christ, stripped of His garments and on a cross, but not nailed to the cross, and between two thieves, is shown as an orante, and the scene of the Crucifixion is, to a certain extent, artistically veiled. The carving is roughly done, but the work has become of great importance, owing to recent studies thereon, wherefore we shall briefly indicate the various writings dealing with it: Grisar, "Analecta Romana", 427 sqq.; Berthier, "La Palaeo Sarbinà a Rome; Etude archéologique" (Fribourg, Switzerland, 1892); Pérot, "L'Archéologie chrétienne" in "Bibliothèque de l'enseignement des beaux arts" (Paris, 1892, pp. 330-36); Bertram, "Die Thüren von Sta. Sabina in Rom; das Vorbild der Bernward's Thüren am Dom zu Hildesheim" (Fribourg, Switzerland, 1892); Ehrhard, "Die altechristliche Frachthüre der Basilika Sta. Sabina in Rom" in "Der Katholik", LXXIII (1899), 444 sqq., 538 sqq.; "Civitá Cattolica", IV (1892), 68-89; "Römische Quartalschrift", VII (1893), 102; "Analecta Bollandiana", XIII (1894), 53; Forrer and Müller, "Kreuz und Kreuzigung Christi in ihrer Kunstentwicklung" (Strasburg, 1894), 15, Pl. II and Pl. III; Strzygowski, "Das Berliner Mosselrelief und die Thüren von Sta. Sabina in Rom" in "Archiv für indische, orientalische, und neuzeitliche Kunst und Kulturwissen", XVI (1893), 65-81; Ehrhard, "Frachthüre von S. Sabina in Rom und die Domhüre von Spalato" in "Ephemeris Spalatensis" (1894), 9 sqq.; Grisar, "Kreuz und Kreuzigung auf der altesten Thüre von S. Sabina in Rom" (Rome, 1894); Dobbert, "Zur Entstehungsgeschichte des Crucifixus" in "Jahrb. der preuss. Kunstsammlungen", I (1880), 41-50.

To this same period belongs a crucifix at Mount Athos (see Smith's "Dictionary of Christian Antiquities", London, 1875, I, 514), as well as an ivory in the British Museum. Christ is shown wearing only a loin-cloth: He appears as if alive, and not suffering physical pain. To the left, Judas is seen hanged, and below is the purse of money. In the sixteenth century the Crucifixion is still sometimes represented with the restrictions we have noticed, for instance, in the mosaic made in 1642 by Pope Theodore in S. Stefano Rotondo, Rome. There, between Sta. Prima and Feliciana, the cross is to be seen, with the bust of the Saviour just above it. In the sixteenth century, also, the scene of the Crucifixion is shown in all its historic reality in the crypt of St. Valentine's Catacomb on the Via Flaminia (cf. Marucchi, La cripta sepolcrale di S. Valentino, Rome, 1878). Bosio saw it in the sixteenth century, and then in a better state of preservation than it is to-day (Bosio, Roma Sott., III, lxv). Christ crucified appears betwixt Our Lady and St. John, and is clad in a long, flowing tunic (colobium), and fastened by four nails, as was the ancient tradition, and as Gregory of Tours teaches: "Clavorum ergo dominorom gratia quod quatur fuerint hae est ratio: duos sunt affixi in palmarum, et duos in plantas" ("De Gloriar Martyrum", I, vi, in P. L., XXI, 710).

The last objections and obstacles to the realistic reproduction of the Crucifixion disappeared in the beginning of the eighth century. In the oratory built by Pope John V in the Vatican, A. D. 705, the crucifix was represented realistically in mosaic. But the figure was robed, as we may learn from the drawings made by Grimaldi in the time of Paul V, when the oratory was pulled down to make room for the modern façade. Part of such a mosaical pavement in the grottoes at the Vatican similar in treatment to that of John VII. Belonging to the same century, though dating a little later, is the image of the Crucified discovered a few years ago in the apse of the old church of S. Maria Antiqua in the Roman Forum. This remarkable picture, now lost, was visible for a little while in the month of May, 1702, and is mentioned in the diary of Valesio. It dates from the time of Pope St. Paul I (757-768), and stands in a niche above the altar. The figure is draped in a long tunic of a greyish-blue colour, is very lifelike, and has wide-open eyes. The soldier Longinus is in the act of wounding the side of Christ with the lance. On
either hand are Mary and John; between them and the Cross stands a soldier with a sponge and a vessel filled with vinegar; above the Cross the sun and moon dim the rays by a veil. Another interesting picture is that in the crypt of SS. Giovanni e Paolo at Rome, in their dwelling-house on the Celian Hill. It is Byzantine in style and shows the crucifix. In the ninth century the crucifix of Leo IV is of importance (840-847). It is a stripped figure, with a periscope, and four nails are used. Another figure is in the paintings of St. Stefano alla Cappella. To the same century belongs a diptych from the monastery of Rambona of about the year 898, and now in the Vatican Library (Buonarroti, "Osservazioni sopra alcune frammenti di vetro", Florence, 1716, 257-263, and P. Germano da S. Andrea, figure in the facsimiles of the SS. Giovanni e Paolo", Rome, 1895). To bring this list to a close we may mention an eleventh-century diptych in the cathedral of Tournai, a twelfth-century Roman cross preserved at the Porte de Halle, at Brussels, and an enamelled crucifix in the Spitzer collection.

We bring to an end, the field of Christian archaeology not extending further. In the artistic treatment of the crucifix there are two periods: the first, which dates from the sixth to the twelfth and thirteenth centuries; and the second, dating from that time to our own day. We shall here treat of the former, and naturally of the latter.

In the first period the Crucified is shown adoring to the cross, not hanging forward from it; He is alive and shows no signs of physical suffering: He is clad in a long, flowing, sleeveless tunic (colobium), which reaches the knees. The head is erect, and surrounded by a nimbus, and bears a royal crown. The figure is fastened to the cross with a nail (cf. Gaurucci, "Storia dell' arte crist."). III, fig. 139 and p. 61; Marucchi, op. cit., and "Il cimitero e la basilica di S. Valentino", Rome, 1890; Forrer and Muller, op. cit., 20, PI. III, fig. 6). In a word, it is not Christ suffering, but Christ triumphing and glorious on the Cross. Moreover, Christian art for a long time objected to stripping Christ of his garments, and the traditional colobium, or tunic, remained until the ninth century. In the East the robed Christ was preserved to a much later date. Again, in miniatures from the ninth century the figure is robed, and some are associated with the crucified in the act of blessing.

The scene of the Crucifixion, especially after the eighth century, includes the presence of the two thieves, the centurion who pierced Christ's side, the soldier with the sponge, the Blessed Virgin and St. John. Mary is never shown weeping and afflicted, as became the custom in later ages. Old iconography shows Christ erect near the cross, as St. Ambrose says, in his funeral oration on Valentine: "I read of her standing; I do not read of her weeping." Moreover, on either side of the Cross the sun and moon, often with human faces, veil their brightness, being placed there to typify the two natures of Christ; the sun, the Divine, and the moon, the human (cf. St. Gregory the Great, Homily ii in Evang.). At the foot of the Cross the female figures are symbolical of the Church and the Synagogue, the one receiving the Saviour's blood in a cup, the other veiled and dis- crowned, holding in her hand a torn banner. With the tenth century realism began to play a part in Christian art, and the colobium becomes a shorter garment, reaching from the waist to the knees (peri- soma). In the "Hortus deliciarum" in the "album" belonging to the Abbess Herrada of Landsberg in the twelfth century the colobium is short, and approaches the form of the peri.soma. From the eleventh century in the East, and from the Gothic period in the West, the head drops onto the breast (cf. Borgia, De Cruci Veliternâ, 191), the crown of thorns is introduced, the arms are bent back, the body is twisted, the face is wrung with agony, and blood flows from the wounds. In the thirteenth century complete realism is reached by the substitution of one nail in the feet, instead of the old one in the old tradition, and the resulting crossing of the legs. All this was done from motives to bring about a more devout and devotional pose. The living and triumphant Christ gives place to a Christ dead, in all the humiliation of His Passion, the agony of His death being even accentuated. This manner of treatment was afterwards generalized by the schools of Cister and Cologne. It may be noted that the custom of placing the crucifix over the altar does not date from earlier than the eleventh century. (See Section III of this article.)

II. The True Cross and Representations of it as Objects of Devotion.—(1) Growth of the Christian Cult.—The Cross to which Christ had been nailed, and on which He had died, became for Christians a symbol of their belief and a focus of their respect and worship. St. Paul says, in I Cor., i, 17: "For Christ sent me not to baptize, but to preach the gospel: not in wisdom of speech, lest the cross of Christ should be made void"; in Gal., ii, 19: "With Christ. I am nailed to the cross!"; in Eph., ii, 16: "Christ reconciliehu "nailed to the cross" with the "God in one body by the cross"; in Phil., iii, 18: "For many enemies of the cross of Christ"; in Col., ii, 14: "Blotting out the handwriting of the decree that was against us, which was contrary to us. And he hath taken the same out of the way, fastening it to the cross!"; and in Gal., vi, 14: "But God forbid that I should glory, save in the cross of our Lord Jesus Christ; by whom the world is crucified to me, and I to the world!"

It seems clear, therefore, that for St. Paul the Cross of Christ was not only a precious remembrance of Christ's sufferings and death, but also a symbol closely associated with the Cross as an object of the Passion. It was, moreover, natural that it should be venerated and become an object of a cult with the Christians who had been saved by it. Of such a cult in the Primitive Church we have definite and sufficiently numerous evidences. Tertullian meets the objection that Christians adore the cross by answering, with an argumentum ad hominem, not by a denial. Another apostate, Minucius Felix, replies to the same objection. Lastly we may recall the famous caricature of Alexamenos, for which see the article Ass. From all this it appears that the pagans, without further consideration of the matter, believed that the Christians adored the cross; and that the apologists either answered indirectly, or contented themselves with saying that they do not adore the cross, without denying that a certain form of veneration was paid to it.

It is also an accepted belief that in the decorations of the catacombs there have been found, if not the cross itself, at least more or less veiled allusions to the holy symbol. A detailed treatment of this and other historical evidence for the early prevalence of the cult will be found in Section I of this article.

This cult became more extensive than ever after the discovery of the Holy Places that had Walk Cross. Since the time when Jerusalem had been laid waste and ruined in the wars of the Romans, especially since Hadrian had founded upon the ruins his colony of Aelia Capitolina, the places consecrated by the Pae-
sion, Death, and Burial of Christ had been profaned and, it would seem, deserted. Under Constantine, after peace had been vouchsafed to the Church, Mac-
clusius, Bishop of Jerusalem, began to be made (about A. D. 327, it is believed) in order to
ascertain the location of these holy sites. That of
Calvary was identified, as well as that of the Holy
Sepulchre; it was in the course of these excavations
that the wood of the Cross was recovered. It was
removed to Jerusalem, and for it was built a chapel, or
crypt, which is mentioned by Eusebius, also by
St. Cyril of Jerusalem, and Silvia (Etherea). From
A. D. 347, that is to say, twenty years after these ex-
cavations, the same St. Cyril, in his discourses (or
catecheses) delivered in these very places (iv, 10; x, 14), speaks of this discovery of the wood of
the cross. Thus we find the image of the cross on
the coins of the Iconoclast emperors, Leo the Isaurian,
Constantine Copronymus, Leo IV, Nicephorus,
Imperat. Rom., II). Sometimes this cult involved
the veneration of the Stab of the wood. Those who adore
the cross; the Chazisgari (from chrus, cross), a sect of Armenians who adore the cross.
The Second Council of Nicaea (A. D. 787), held for the purpose
of reforming abuses and putting an end to the dis-
putes of Iconoclasm, fixed, once for all, the Catholic
discipline and doctrine on this point. It defined that
the veneration of the faithful is due to the form of the
precious and vivifying cross, as well as to images
or representations of Christ, of the Blessed Virgin,
and of the saints. But the council points out that we
must not render to these objects the cult of latris,
which, according to the teaching of the faith, belongs
to the Divine mystery. The priest makes the sign of
the cross on his chair; before him is a table covered with a cloth;
the deacons are standing around him. The silver-gilt
reliquary is brought and opened, and the sacred wood
of the Cross, with the Title, is placed on the table.
The bishop stretches out his hand over the holy relic,
and the deacons keep watch with him while the faith-
ful and catechumens defile, one by one, before the
table, bow, and kiss the Cross; they touch the Cross
and the Title with forehead and eyes, but it is for-
bidden to touch them with the hands. This minute
watchfulness was not unnecessary, for it has been
told in fact how one day one of the faithful, making
as though to kiss the Cross, was so unceremonious as
to bite off a piece of it, which he carried off as a relic.
It is the duty of the deacons to prevent the repetition
of such a crime. St. Cyril, who also tells of this cere-
mony, makes his account much more brief, but adds
the important detail that relics of the true Cross
are to be found all over the world. He adds some
information as to the silver reliquary which contained
the True Cross. (See Cabrol, La Peregriinito ad loca
sancr, 105.) In several other passages of the same
work Silvia (also called Egeria, Echeria, Etherea,
and Etherea) speaks to us of the veneration of the
Cross, especially between the basilicas of the Anastasis and the Mar-
tyrium) which plays so great a part in the paschal
liturgy of Jerusalem.
A law of Theodosius and of Valentinian III (Cod.
Justin., I, tit. vii) forbade under the gravest penalties
any painting, carving, or engraving of the cross on
pavements, so that this august symbol of our salvation
might not be trodden under foot. This law was re-
vised by the Trullan Council, A. D. 691 (canon lxxii).
Julian the Apostate, on the other hand, according to
St. Cyril of Alexandria (Contra Julian., vi, in
Opp., VI), made it a crime for Christians to adore
the wood of the Cross, to trace its form upon their fore-
heads, and to engrave it over the entrances of their
homes. St. John Chrysostom more than once in his
writings makes allusion to the adoration of the cross;
one citation will suffice: "Kings removing their dia-
dems take up the cross, the symbol of their Saviour's
death; on the purple, the cross; in their prayers, the
cross; on the helmet, the cross; on the table, the
Cross; throughout the universe, the cross. The
cross shines brighter than the sun." These quota-
tions from St. Chrysostom may be found in the au-
thorities to be named at the end of this article. At
the same time, pilgrimages to the holy places became
more frequent, and especially for the purpose of fol-
lowing the example set by St. Helena in venerating
the True Cross, and by Constantina, who, on the
pilgrimage of St. Paula to the Holy Places, tells us that
"prostrate before the Cross, she adored it as though
she had seen the Saviour hanging upon it." (Ep. eviil.
It is a remarkable fact that even the Iconoclasts, who
fought with such zeal against images and representa-
tions of the Cross, and for an exception, described the
cross. Thus we find the image of the cross on the
coins of the Iconoclast emperors, Leo the Isaurian,
Constantine Copronymus, Leo IV, Nicephorus,
Imperat. Rom., II). Sometimes this cult involved
the veneration of the Stab of the wood. Those who adore
the cross; the Chazisgari (from chrus, cross), a sect of Armenians who adore the cross.
The Second Council of Nicaea (A. D. 787), held for the purpose
of reforming abuses and putting an end to the dis-
putes of Iconoclasm, fixed, once for all, the Catholic
discipline and doctrine on this point. It defined that
the veneration of the faithful is due to the form of the
precious and vivifying cross, as well as to images
or representations of Christ, of the Blessed Virgin,
and of the saints. But the council points out that we
must not render to these objects the cult of latris,
which, according to the teaching of the faith, belongs
to the Divine mystery. The priest makes the sign of
the cross on his chair; before him is a table covered with a cloth;
the deacons are standing around him. The silver-gilt
reliquary is brought and opened, and the sacred wood
of the Cross, with the Title, is placed on the table.
The bishop stretches out his hand over the holy relic,
and the deacons keep watch with him while the faith-
ful and catechumens defile, one by one, before the
table, bow, and kiss the Cross; they touch the Cross
and the Title with forehead and eyes, but it is for-
bidden to touch them with the hands. This minute
watchfulness was not unnecessary, for it has been
told in fact how one day one of the faithful, making
as though to kiss the Cross, was so unceremonious as
to bite off a piece of it, which he carried off as a relic.
It is the duty of the deacons to prevent the repetition
of such a crime. St. Cyril, who also tells of this cere-
mony, makes his account much more brief, but adds
the important detail that relics of the true Cross
are to be found all over the world. He adds some
information as to the silver reliquary which contained
the True Cross. (See Cabrol, La Peregriinito ad loca
sancr, 105.) In several other passages of the same
work Silvia (also called Egeria, Echeria, Etherea,
and Etherea) speaks to us of the veneration of the
Cross, especially between the basilicas of the Anastasis and the Mar-
tyrium) which plays so great a part in the paschal
liturgy of Jerusalem.
A law of Theodosius and of Valentinian III (Cod.
Justin., I, tit. vii) forbade under the gravest penalties
any painting, carving, or engraving of the cross on

(2) Catholic Doctrine on the Veneration of the Cross.

In passing to a detailed examination of the Catho-
lic doctrine on this subject of the cult of the True Cross,
it will be well to recall the theories of Brock, the
Abbe Ansaull, le Mortillet, and others, who pretend
to have discovered that cult among the pagans
before the time of Christ. For a demonstration of
the purely Christian origin of the Christian dev-
otion the reader is referred to Section I of this
article. See also the works of de Harlay, Laffar-
ge, and others cited at the end of this section.
With reference, in particular, to the anastas cross
of Egypt, Letronne, Raoul-Rochette, and Lajard discus-
much learning the symbolism of that simple
hieroglyphic of life, in which the Christians of Egypt
so readily perceived their redemption. In the veneration
of the Christian Cross, and which they employed in their
monuments. According to the text of the Second
Council of Nicaea cited above, the cult of the Cross
is based upon the same principles as that of relics
and images in general, although, to be sure, the True Cross
holds the highest place in dignity among all relics.
The observation of Petavius (XV, xiii, 1) should be
noted here: that this cult must be considered as not
belonging to the substance of religion, but as being
one of the διδάξεως, or things not absolutely neces-
sary to salvation. Indeed, while it is of faith that
this cult is useful, lawful, even pious and worthy of
praise and of encouragement, and while we are not
permitted to speak against it as something pernicious,
still it is one of those devotional practices which the
Church can encourage, or restrain, or stop, according
to circumstances. This explains how the veneration

---
of images was forbidden to the Jews by that text of Exodus (xx, 4 sqq.) which has been so grossly abused by Iconoclasts and Protestants: "Thou shalt not make to thyself a graven thing, nor the likeness of any thing that is in heaven above, or in the earth beneath, or in the water under the earth. Thou shalt not adore them, nor serve them: I am the Lord thy God," etc. It also explains the fact that in the first ages of Christianity, when converts from paganism were so numerous, and the impression of idol-worship was so fresh, the Church found itself obliged to combat the development of this cult of images; but later, when the Church had disarmed them and when Christian traditions and Christian instinct had gained strength, the cult developed more freely. Again, it should be noted that the cult of images and relics is not that of latia, which is the adoration due to God alone, but is, as the Second Council of Nicaea teaches, a relative veneration paid to the image or relic and referring to that which it represents. Precisely this same doctrine is repeated in Sess. XXV of the Council of Trent: "Images are not to be worshipped because it is believed that some divinity or power resides in them and that they must be worshipped in return, for because we ought to ask anything of them, or because we should put our trust in them, as was done by the gentiles of old who placed their hope in idols; but because the honour which is shown to them is referred to the prototypes which they represent; so that through the images which we kiss, before which we kneel, we may adore Christ and venerate the saints, whose semblances they bear." (See also Imager.)

This clear doctrine, which cuts short every objection, is also that taught by Bellarmine, by Bossuet, and by Petavius. It must be said, however, that this view was not always so clearly taught. Following Bl. Albertus Magnus and Alexander of Hales, St. Bonaventure, St. Thomas, and a section of the Schoolmen who appear to have overlooked the Second Council of Nicaea teach that the worship rendered to the Cross and the image of Christ is that of latia, but with a distinction: the same worship is due to the image and its exemplar, but the exemplar is honoured for Himself (or for itself), with an absolute worship; the image because of its exemplar, with a relative worship. The object of the adoration is the same, though it be primary in regard to the exemplar and secondary in regard to the image. To the image of Christ, therefore, there is a word of latia, "worship," devoted to Him as Person. The image, in fact, is morally one with its prototype, and, thus considered, if a lesser degree of worship must be rendered to the image, that worship must reach the exemplar lessened in degree. Against this theory an attack has recently been made in "The Tablet," the opinion attributed to the Fathers being sharply combated. Its adversaries have endeavoured to prove that the image of Christ should be venerated but with a lesser degree of honour than its exemplar. The cult paid to it, they say, is simply analogous to the cult of latia, but in its nature different and inferior. No imago of Christ, then, should be honoured with the worship of latia, and, moreover, the term "relative latia," invented by the Thomists, ought to be banished from theological language as equivocal and dangerous.—Of these opinions the former rests chiefly upon considerations of pure reason, the latter upon ecclesiastical tradition, notably upon the Second Council of Nicaea and its confirmation by the Fourth Council of Constantinople and upon the decree of the Council of Trent.

(3) Relics of the True Cross.—The testimony of Silvia (Ethiopia) proves how highly these relics were regarded, while the marvels of Jerusalem, her contemporary, testify explicitly that "the Cross is full of relics of the wood of the Cross." In 1889 two French archaeologists, Letaille and Audellent, discovered in the district of Sétif an inscription of the year 369 in which, among other relics, is mentioned the sacred wood of the Cross (de ligno crucis et de terrâ promissionis ubi natus est Christus). Another inscription, from Rasquinia (Cape Matiû), somewhat earlier, in date than the preceding, mentions another relic of the Cross ("santico ligno salvatoris adlatu").—See Duchesne in Acad. des inscr., Paris, 6 December, 1889; Morel, "Les missions catholiques," 25 March, 1890, p. 156; Catech. iv in P. G., XXXIII, 489; cf. also ibid., 800; Procopius, "De Bello Persico," II, xi. The Church has, therefore, venerated the fragments of the True Cross are kept in golden reliquaries, which must reverently wear upon their persons. The passage in the "Peregrinatio" which treats of this devotion has already been cited. St. Paulinus of Nola, some years later, sends to Silpicius Severus a fragment of the True Cross with these words: "Receive a great gift in a little [compasse]; and take, in [this] almost atomic segment of a short dart, an armament [against the peril] of the present and a pledge of everlasting safety" (Epist. xxxi, n. 1, P. L., LXI, 325). About 455 Julianus, Patriarch of Jerusalem, sends to Pope St. Leo a fragment of the precious wood (S. Leonis episcopi a. 455, Can. 19, P. L., 118). If we are to accept the authenticity of its statement, tells us that, in the pontificate of St. Sylvester, Constantine presented to the Sessorian basilica (Santa Croce in Gerusalemme) in Rome a portion of the True Cross (Duchesne, Liber Pontif., I, 60; Sulpicius, Lib. hist. eccles. p. 175, 178, 179,Hist. sacrae p. 338, 68) and under Symmachus (498-514) we are again told that fragments of the True Cross are enclosed in altars (op. cit., I, 242 sqq. and 261 sqq.). About the year 500 Avitus, Bishop of Vienne, asks for a portion of the Cross from the Patriarch of Jerusalem (P. L., LXIX, 236, 239).

It is known that Radegunda, Queen of the Franks, having retired to Poitiers, obtained from the Emperor Justin II, in 569, a remarkable relic of the True Cross. A solemn feast was celebrated on this occasion, and the monastery founded by the queen at Poitiers received from that moment the name of Holy Cross. It was also upon this occasion that Venantius Fortunatus, Bishop of Poitiers, and a celebrated poet of the period, composed the hymn "Vexilla Regis" which is still sung at feasts of the Cross in the Latin Rite. St. Gregory I sent, a little later, a portion of the True Cross to Theodolinda, Queen of the Lombards (Ep. xiv, 12), and as witness of the reception of the King of Spain (Ep. ix, 122). In 690, under Sergius I, a casket was found containing a relic of the True Cross which had been sent to John III (560-74) by the Emperor Justin II (cf. Bordis, "De Crucie Vaticana"); Rome, 1779, p. 63, and Duchesne, "Liber Pontificalis," I, 374, 375). We have no given in detail the history of other relics of the Cross (see the works of Grether and the articles of Kraus and Bäumer quoted in the bibliography). The work of Rohault de Fleury, "Mémoire sur les instruments de la Passion" (Paris, 1870), deserves more prolonged attention; its author has sought out and collected all the relics of the True Cross, drawn up a catalogue of them, and, thanks to this labour, he has succeeded in showing that, in spite of what various Protestant or Rationalistic authors have pretended, the fragments of the Cross brought together again would not only not "be comparable in bulk to a battleship," but would not reach one-third that of a cross which has been supposed to have been three or four metres in height, with a transverse branch of two metres (see above, under I), proportions not at all abnormal (op. cit., 97-179). Here is the calculation of this savant: Suppose the Cross to have been of pine-wood, as is supposed by the savants. The dimensions of the subject, and giving it a weight of about seventy-five kilograms, we find that the volume of this cross was.
178,000,000 cubic millimetres. Now the total known volume of the True Cross, according to the finding of M. Rohault de Fleurly, amounts to about 4,000,000 cubic millimetres, allowing the missing part to be as large as will be found; and connected with the theory of the finding of the Cross and the building, by Constantine, of churches upon the sites of the Holy Sepulchre and Calvary. In 335 the dedication of these churches was celebrated with great solemnity by the bishops who had assisted at the Council of Tyre, and a great number of other bishops. This dedication took place on the 13th and 14th of September. This feast of the dedication, which was known by the name of the Encarnación, was most solemn; it was on an equal footing with those of the Epiphany and Easter. The description of it should be read in the "Perigrinatio", which is of great value upon this subject. The origin of the solemnity at Jerusalem a great number of monks, from Mesopotamia, from Syria, from Egypt, from the Thebaid, and from other provinces, besides laity of both sexes. Not fewer than forty or fifty bishops would journey from their dioceses to be present at Jerusalem for the event, which terrified as well as, visiting, and, he thinks himself guilty of a grave sin who during this period does not attend the great solemnity". It lasted eight days. In Jerusalem, then, this feast bore an entirely local character. It passed, like so many other feasts, to Constantinople and thence to Rome. There was also an endeavour to give it a local feeling, and the church of "The Holy Cross in Jerusalem" was intended, as its name indicates, to recall the memory of the church at Jerusalem bearing the same dedication.

The feast of the Exaltation of the Cross sprang into existence at Rome at the end of the seventh century. It is made to be the pontificate of Sergius I (687-701), but, as Dom Bäumer observes, the very terms of the text (Lib. Pontif., I, 374, 378) show that the feast already existed. It is, then, inexact, as has often been pointed out, to attribute the introduction of it to the Byzantine church, which, at the period here referred to, do not yet know of this feast of the 14th September, have another on the 3rd of May, of the same significancy. It seems to have been introduced there in the seventh century, for ancient Gallican documents, such as the Lectionary of Luxeuil, do not mention it; and Gregory Tours also seems to ignore the feast. Mgr. Duchesne, the date seems to have been borrowed from the legend of the Finding of the Holy Cross (Lib. Pontif., I, p. cviii). Later, when the Gallican and Roman Liturgies were combined, a distinct character was given to each feast, so as to avoid sacrificing either of liturgical origins was its solemnity associated to the Feast of the Finding of the Cross, and it commemorated in a special manner St. Helena's discovery of the sacred wood of the Cross; the 14th of September, the feast of the Exaltation of the Cross, commemorated above all the circumstances in which Heraclius recovered from the Persians the True Cross, which they had carried off. Nevertheless, it appears from the history of the two feasts, which we have just examined, that that of the 13th and 14th of September is the older, and that the commemoration of the Finding of the Cross was at first combined with it.

The Good Friday ceremony of the Adoration of the Cross in Jerusalem, as we have seen, and is a faithful reproduction of the rites of Adoration of the Cross of the fourth century in Jerusalem which have been described above, in accordance with the description given by the author of the "Perigrinatio".

This worship paid to the Cross in Jerusalem on Good Friday soon became general. Gregory of Tours speaks of the Wednesday and Friday consecrated to the Cross—prolepsis (the premonitory feasts of the inferior grades, and lastly the people, each one comes in his turn; they salute the cross, during the singing of the anthem, "Ecce lignum crucis in quo salus mundi peependit. Venite, adoremus" (Behold the wood of the cross on which the salvation of the world did hang. Come, let us adore) and then Ps. cxviii. (See Mabillon, Mus. Ital., Paris, 1689, II, 23."

The Latin Church has kept until to-day the same liturgical features in the ceremony of Good Friday, added to it is the song of the Improperia and the hymn of the Cross, "Pange, lingua, gloriosi laurum pennis"

Besides the Adoration of the Cross on Good Friday and the September feast, the Greeks have still another feast of the Adoration of the Cross on the 1st of August as well as on the third Sunday in Lent. It is probable that Gregory the Great was acquainted with this feast during his stay in Constantinople between the translation of Santa Croce in Gerusalemme, on Easter Sunday (the fourth Sunday in Lent), is a souvenir, or a timid effort at imitation, of the Byzantine solemnity.

III. The Cross and Crucifix in Liturgy.—(1) Material Objects in Liturgical Use.—A. The Altar-Cross.—As a permanent adjunct to the altar, the cross or crucifix can hardly be traced farther back than the thirteenth century. The third canon of the Second Council of Lateran (637) “instructs that one in the sanctuary in imaginary order sed sub crucis titulo componatur,” which has sometimes been appealed to to prove the early existence of an altar-crucifix, almost certainly refers to the arrangement of the particles of the Host upon the corporal. They were to be arranged in the form of a cross and not according to any fanciful idea of the celebrant (see Hefele, Concilien-geschichte). On the other hand, Innocent III at the beginning of the thirteenth century in his treatise on the Mass says plainly, “a cross is set upon the altar, in the middle between two candlesticks,” but this is obviously restricted only to the Sacred Tithe, the Holy Sacrifice. From the ninth to the eleventh century the rule is several times repeated: “Let nothing be placed on the altar except a chest with relics of saints or perhaps the four gospels or a pyx with the Lord’s Body for the viaticum of the sick” (cf. Thiers, Sur les principaux autels des églises, 129 sqq.).

The papal chronicle just referred to also mentions a silver cross which was erected not over, but close beside, the high altar of St. Peter’s in the time of Leo III (795—816): “There also he made the cross of purest silver, gilded, which stands beside the high altar, and which weighs 22 pounds” (Lib. Pont., Leo III, c. lxxxvii). It is probable that when the cross was first introduced it was used as an ornament for the altar but was most commonly plain and without any figure of Our Saviour. Such is the cross which a well-known Anglo-Saxon manuscript represents King Chroft as presenting to his people (W. 355). The association of the figure of Christ with the cross was familiar in England as early as 678, when Benedict Biscop brought a painting of the Crucifixion from Rome (Bedes, Hist. Abb., §9), and we can hardly doubt that a people capable of producing such sculptural work as the stone crosses at Ruthwell and Bewcastle, or the Franks’ easket, would soon have attempted the same subject in the solid. We know at any rate that a gold crucifix was found in the tomb of St. Edward the Confessor, and a crucifix is mentioned in one of the later Lives of St. Dunstan. That such objects were sometimes used for the altar seems highly probable. Still, Innocent III speaks only of a cross, and it is certain that for several centuries later neither cross nor crucifix was left upon the altar except at Mass time. Even so late as the beginning of the sixteenth century an engraving in the Giunta “Corpus Juris” shows the altar-crucifix being carried in at high Mass by the celebrant, while in many French dioceses this or some similar custom lasted down to the time of Claude Lebert (Explication...). An altar crucifix, the “monstrance Episcoporum” assumes the permanency of the crucifix on the altar, with its attendant candlesticks [see Altar-Crucifix, under Altar (in Liturgy)].

(1) B. The Processional Cross.—When Bode tells us that St. Augustine of England and his companions came before Ethelbert “carrying a silver cross for a standard” (veniebant crucem pro vexillo ferentes argenteam) while they said the litanies, he probably touches upon the fundamental idea of the processional cross. Its use seems to have been general in early times and is so mentioned in the Roman “Ordines” (as to be included in the Mass of Dominica). An ancient specimen of the twelfth century still survives in the Cross of Cong, preserved in the museum of the Royal Irish Academy, Dublin. This is made of oak covered with copper plates, but much decoration is added in the form of gold filigree work. It lacks most of the shaft, but is two feet six inches high, and one foot six inches across the arms. In the centre is a boss of rock crystal, which formerly enshrined a relic of the True Cross, and an inscription tells us that it was made for Turloch O’Conor, King of Ireland (1123). It seems never to have had any figure of the Crucified, but a processional cross of the thirteenth and fourteenth centuries are for the most part true crucifixes. In a great number of cases the shaft was removable, and the upper portion could be set in a stand to be used as an altar-cross. Indeed it seems not improbable that this was the actual origin of the altar-cross employed during Mass (Rohault de Fleury, La croix, V, 125-127, 1927). As the seven candlesticks carried before the pope in Rome were deposited before or behind the altar, and probably developed into the six altar-candlesticks (seven), it will be remembered, when a bishop celebrant with which we are now familiar, so the processional cross seems also to have had a stand, which ultimately took its place upon the altar itself. To this day the ritual books of the Church seem to assume that the handle of the processional cross is detachable, for in the funeral of infants it is laid down that the cross is to be carried without its handle. All Christians are supposed to be the followers of Christ, hence in procession the crucifix is carried first, with the figure turned in the direction in which the procession is moving.

(1) C. Archiepiscopal and Papal Cross.—It is not easy to determine with certainty at what period the archiepiscopal cross came into separate use. It was probably at first only an ordinary processional cross. In the tenth “Ordo Romanus” we read of a deacon who is set aside to carry the cruz papalix. If this specially papal cross had been in existence for some time it is likely that it was imitated by patriarchs and metropolitan as a mark of dignity which went with the diaconate. In the liturgy of the eastern Church the figure of Christ with the cross was generally recognized, and in the dispute regarding the primacy between the Archbishops of Canterbury and York the right to carry their cross before them played a prominent part. In 1125 Pope Honorius II admonished the Southern bishops of England that they should allow Archbishop Thurstan
of York crucem ante se deferre juxta antiquam consecrundinem. In all ecclesiastical functions an archbishop in his own province has a right to be preceded by his cross-bearer with cross displayed. Hence an archbishop when solemnly giving his blessing gives it with head uncovered out of reverence for the cross which is held before him. An ordinary bishop, who is not privileged to have such a cross, blesses the people with his mitre on. As regards form, both the papal and the archiepiscopal cross consists in practice of a simple crucifix mounted upon a staff, the material being silver or silver gilt. The crosses with double and triple bars, which are sometimes termed distinctively apostolic, patriarchal, or episcopal crosses, have for the most part only a heraldic existence (see Barbiere de Montault, La croix à deux croisillons, 1833). An archiepiscopal cross is borne with the figure turned towards the archbishop.

(1) D. Pectoral Crosses.—These objects seem originally to have been little more than costly ornaments upon which much artistic skill was lavished and which usually contained relics. A jewel of this kind which belonged to Queen Theodolinda at the end of the sixth century is still preserved in the treasury of Mons. Another of much later date, but wrought with elaboration, is preserved in the church of Queen Dagmar and is at Copenhagen. When the present Queen Alexandra came to England in 1863 to marry the then Prince of Wales, she was presented with a facsimile of this jewel containing, among other relics, a fragment of the True Cross. Such encolpia were probably at first worn by bishops not as insignia of rank, but as objects of devotion. For example, a famous and beautiful jewel of this kind was found in the tomb of St. Cuthbert and is now at Durham. When they contained relics they often came later on to be enclosed in processional crosses. This no doubt was the case with the Cross of Cong, mentioned above, used by the school of Irish ex-voto in the Latin of Huc cruce crux tegitur qua passus conditor orbis.—See Journ. Soc. Antiq. Ireland, vol. XXXI (1901). As a liturgical cross, and part of the ordinary episcopal insignia, the pectoral cross is of quite modern date. No word is said regarding it in the first edition of the "Ceremoniale Episcoporum" of 1600, but later editions speak of it, and its liturgical character is fully recognized by all modern rubricians. It is worn by all bishops at Mass and solemn functions, and also forms part of their ordinary walking-dress. It is usually a plain Latin cross of gold suspended round the neck by a gold cord of silk or velvet. Its use in processions gradually to have been introduced during the seventeenth and eighteenth centuries in imitation of the pectoral cross which we know to have been regularly worn by the popes from a much earlier date. Certain metropolitans (e.g. the Patriarch of Lisbon and the Archbishop of Armagh) are accustomed to wear a cross with two bars or transoms (Anal. Jur. Pont., 1896, 344). The privilege of wearing a pectoral cross has also been conceded to certain canons.

(1) E. Consecration Crosses.—These are the twelve crosses, usually merely painted on the wall, which mark the places where it is probable that ancient walls were anointed with chrism in a properly consecrated church. A candle-bracket should be inserted immediately below. Some of these consecration crosses are even yet distinguishable on the walls of old churches which go back to the Romanesque period. The Carlovigiano oratory in Nimesque preserves, perhaps, the most ancient form. In other cases, in St. Paul's, in St. Peter's in Rome, in Fürstenfeld, some of the old Romanesque candle-brackets also remain. Owing to the number of uncions, it was not infrequently the custom to place these consecration crosses on shields, each borne by one of the twelve Apostles. In the St.-e-Chapelle at Paris, built by St. Louis in the thirteenth century, we find twelve statues of the Apostles carrying discs used for this purpose. In England it was the custom to mark twelve consecration crosses on the outside walls of the church as well as twelve on the inside. The Roman Pontifical only prescribes the latter. (See Consecration.) Salisbury cathedral still preserves some remarkable examples of consecration crosses.

At Ottery St. Mary, Devon, the old crosses are carved in high relief on shields in the church-panels, a quatrefoil in a square. Those inside have marks of the remains of iron brackets for candles or a lamp. (See, on English examples, Middleton in "Archologia," XLVIII, 1885.)

(1) F. Churchyard or Monumental Crosses.—In the context contemporary life of the Anglo-Saxon period (c. 700) there is a significant mention of the Anglo-Saxon custom of erecting a cross instead of a church as a rendezvous for prayer. Many ancient stone crosses still surviving in England are probably witnesses to the practice, and the conjecture of Prof. Baldwin Brown (Arts in Anglo-Saxon England), that the cross and graveyard often preceded the church in date, has much to commend it. Certain it is that the earliest known forms for blessing a cemetery (q. v.) contain five blessings pronounced at the four points of the compass and one in the centre, thus forming a cross, while they were later on planted in the ground at the four ends of these places. Throughout the Middle Ages, both in England and on the Continent, there seems always to have been one principal churchyard cross. This was commonly an object of great importance in the Palm Sunday procession, when it was saluted with prostrations or genuflexions by the whole assembly. There was also a scattering of boughs and flowers, and the cross was often decorated with garlands of yew or box. For this reason it was often called cruz buzzata (cf. Gasquet, Parish Life, 1906, pp. 171-4). Many beautiful churchyard crosses are still preserved in England, France, and Germany; the most remarkable being the English ex-voto in the Lady Chapel of St. John's, Oxford, Crucis, near Cirencester, and Bag Endon, Lincolnshire. The famous ancient Northumbrian crosses at Bewcastle and Ruthwell (which English scholars still assign to the seventh and eighth centuries, despite the plea for a much later date put forward by Prof. A. S. Cook of Yale) may possibly have been principal churchyard crosses. The fact that they were probably memorial crosses as well does not exclude this. When St. Aldhelm died in 709, his body had to be transported fifty miles to Malmesbury, and at each stage of seven miles, where the body rested for the night, a cross was erected. Its use in churchyards were still standing in the twelfth century (William of Malmesbury, Gestas Pont., 383). An even more famous example of such memorial crosses, but of much later date, is supplied by the removal of the body of Eleanor, Queen of Edward I, from Lincoln to London. Several of these crosses in a more or less mutilated form exist at the present day. The most famous of the series, however, Charing († Chère Reine) Cross in London, is a modern reconstruction. The route followed by the body of St. Louis of France on its way to St.-Denis was similarly honoured, and it is said that the solemnity of the services originated in this manner. No stronger testimony of the early connection of the cross with the cemetery could be desired than the directions given by St. Cuthbert for his own burial: "Cum autem Deum susceperint animam meam, sepeleite me in hac mansione justa oratorium meum ad meridiam, contra orientalem planum sanctissima quam ibidem erant" (Bede, Vita S. Cuthberti).

(1) G. Rood, Rood-Screen, and Rood-Loft.—From very early times it seems to have been not unusual to introduce a plain cross in such a way into the mosaics of the apse or of the main arch (Trabulum Bogen) as to dominate the church. Notable examples may be found at S. Apollinare in Classe at Ravenne, at S. Pudenziana...
in Rome, and at the Lateran basilicas. There are also, as already noticed, incontestable examples both of crosses surmounting the cofin on the altar, and of the large crosses suspended, with or without a corona, from the under side of the ciborium. It must, however, be pronounced very doubtful whether the rood, which in so many churches of the fourteenth and fifteenth centuries occupied the great space reserved as such, should be regarded as a crucifixion. This point will be more fully treated under Rood-Screen. It will be sufficient to notice here that in the thirteenth century a practice grew up of screening off the choir from the nave of the greater churches by a structure broad enough to admit a narrow bridge or gallery spanning the chancel and surmounted by a great crucifix with the figures of Our Lady and St. John. The rood-loft of the cathedral of Sens, as described by J. B. Thierry (Traité sur les jubés) affords a valuable hint of how this process was effected. It consisted, he tells us, of two stone pulpsits quite separate from each other, supported by columns, and with a crucifix between them, each having an entrance on the choir side and an exit down into the nave, on either side of the principal door of the choir. From this it seems probable that the two amboes (q. v.) from which the Gospel and Epistle were sung in earlier times, became gradually connected by a continuous gallery (jubé) which was erected previously over a rood loft, and that in this way we may trace the development of the rood-loft, or jubé, which was so conspicuous a feature in later medieval architecture. There can at least be no doubt that this loft was used on certain occasions of solemnity for reading the Epistle and Gospel and for making announcements to the people. The great rood above the rood-screen was saluted by the whole procession, as they re-entered the church on Palm Sunday, with the words: _Ave Rex noster._

(1) H. Absolution Cross.—These have already been spoken of in the article _Burial_. They seem for the most part to have been rude crosses of lead laid upon the breast of the corpse. It is only in some few examples, of which the most important is that of Bishop Godfrey of Chichester (1088), that a formula of absolution is found inscribed upon them entire. We may infer that the practice in the West was a very late one, and that it is only with the absolution paper, which is uniformly placed in the hand or on the breast of the corpse in the Eastern Church, which explains them and gives them a certain importance as a liturgical development.

(1) J. Crosses on Vestments, etc.—Rubrical law now requires that most of the vestments, as well as some of the ornaments immediately connected to the service of the altar, should be marked with a cross. Speaking generally, this is a comparatively modern development. For example, the large majority of the stoles and maniples of the Middle Ages do not exhibit this feature. At the same time Dr. Wickham Legg goes much too far when he says with qualification that such crosses were not used in pre-Reformation times. For example, the stole of St. Thomas of Canterbury preserved at Sens has three crosses, one in the middle and one at each extremity, just as a modern stole would have. That the archiepiscopal pallium, like the Greek epaulettes (see CONSTANTINOPLE, RITE OF) was always marked with crosses, is not disputed. The large cross conspicuous upon most modern chasubles, which appears behind in the French type and in front in the Roman, does not seem to have been originally adopted with any symbolic purpose. It probably came into existence accidentally, with the orphreys having been so arranged in a sort of Y-cross to conceal the seams. But the idea, once suggested to the eye, was retained, and various symbolic reasons were found for it. In somewhat of the same way a cross was marked in the Missal before the Canon. And this the priest was directed to kiss when beginning this portion of the Mass; probably this cross first arose from an illumination of the initial T, in the hand of the scribe, _Te ignav cor unum canem_, as Innocent III writes, "Et forte divinâ factum est providentia ut ab ea literâ T [auctore canonice recteque] crucis ostendit et exprimit in figurâ"; and Belth further comments, "Unde profecto est, quod istor crucis imago adpingi debet." (See Eber, Quellen und Urkunden, 443.) And it is expected in the picture of the Crucifixion which precedes the Canon in every modern Missal. The five crosses commonly marked on altar-stones depend closely on the rite of the consecration of an altar.

(1) K. Crosses for Private Devotion.—These may all be held to wear a close connexion with the Church in the "Rituale," provides for a form for their blessing, and presupposes that such a cross should be placed in the hands of the dying. The crosses which surmount the Stations of the Cross, and to which the Indulgences are directly attached may also be noticed. In the Greek Church a little wooden cross is used for the blessing of holy water, and is dipped into it in the course of the ceremony.

(2) Liturgical Forms connected with the Material Objects.—A. Blessing of Consecration Crosses.—The "Pontifical Romanum" directs that towards the close of the dedication ceremony the twelve consecration crosses should be set upon the walls of the church; three upon each wall, to be each anointed by the bishop with chrism, the following form of words being spoken over each: "May this Temple be hallowed + and consecrated + in the name of the Father + and of the Son + and of the Holy Ghost + in honour of God and the glorious Virgin Mary and of all the Saints, to the name and memory of Saint N. Peace be to thee." This is prescribed in practically identical terms in English pontificales of the tenth century; and the Pontifical of Egbert (7768) describes the anointing of the walls, though it does not give the form of the cross. What is more, an analogous ceremony must have existed in the Celtic Church from a very early date, for a liturgical fragment in the Leabhar Breac describes how the bishop with two priests is to go round the outside of the church marking crosses upon the "tel-colums" with his knife, while the three other priests keep them upright, and it is quoted in "Trans. St. Paul's Eccles. Soc.," IV, 103). In this case, however, the use of chrism is not mentioned. From this Celtic practice the Anglo-Saxon and Sarum uses seem to have derived the custom of affixing consecration crosses outside the church as well as within.

(2) B. In the consecration of an altar, also, crosses are to be marked in it, with almost the same form of words as that used for the walls. This practice may equally claim Celtic analogues, whose antiquity is shown by the fact that the altar to be consecrated must have been of wood. The Tract in the "Leabhar Breac" says: "The bishop marks four crosses with his knife on the four corners of the altar, and he marks three crosses over the middle of the altar, a cross over the middle on the east to the edge, and a cross over the middle on the west to the edge, and a cross exactly over the middle." This makes seven crosses, but the Roman usage for many centuries has provided five only.

(2) C. Pontifical Blessings of Crosses. — The consecration crosses on the walls of churches and on altars are clearly not substantive and independent objects of cultus; the blessing they receive is only a detail in a longer ceremony. But the "Pontifical Romanum" includes a solemn form of episcopal blessing under the title, _Benedictio nova Crucis_, which, besides containing several prayers of considerable length, includes a consecratory preface and is accompanied with the use of incense. At the conclusion of the ceremony we find the rubric: "Tum Pontifex, flexis ante crucem genus, ietum devote adorat et osculatur." This
rite is of great antiquity, and many of the prayers occur in identical terms in pontificals of the tenth century or earlier, e. g. in the Benedictine of Archbishop Robert (Henry Bradshaw Soc.). But the ancient ceremony the cross was first washed with holy water and then anointed with chrism precisely as in the form for the blessing of bells (see Bells). For cemetery crosses in this connexion, see CEMETERY.

(2) D. Blessings of Crosses in the Ritual. The "Rituale Romanum" (tit. VIII, cap. xxiv) supplies an ordination (Henrio Bradshaw Soc.). But the ancient priest. It consists only of a short prayer, with a second prayer whose use is optional, and only holy water is used; but the same rubric directing the priest to kneel and "devoutly adore and kiss the cross" is added, which we have just noticed in the solemn epi
cle in indulgence. The form was found and duly used first of all in St. Louis' own private chapel; but the incident seems to suggest that the practice of blessing and kissing partly fallen into desuetude. (See Galfridi, De Bello Loco cap. xxxvi.)

(2) E. Blessings of Crosses for Indulgences, etc.—The indulgences commonly attached to crosses, crucifixes, etc., are: first, the so-called "Apostolic Indulgences", which are the same as those attached to objects blessed by the Holy Father in person. These are numerous and, amongst other things, enable the possessor who has habitually worn or used such a cross to a plenary indulgence at the hour of death; secondly, the indulgences of the Stations of the Cross, which under certain conditions may be gained by the sick and others unable to visit a church upon the reci
tion of twenty Psalms, Aves, and Gloriaes before the indulgenced cross which they must hold in their hand; thirdly, the so-called "Bona Mora" indulgence for the use of priests, enabling the priest by the use of this cross to communicate a plenary indulgence to any dying person who is in the requisite dispositions to receive the special indulgence, but is unable to communicate such indulgences to crosses, etc., though in the case of the "Apostolic Indulgences" these faculties are easily obtained. The only blessing required is the making of a simple sign of the cross over the crucifix or other object with the intention of imparting the blessing. For further details, the reader must be referred to the article INDULGENCES and to such treatises upon indulgences as those of Beringer, "Les Indulgences", or of Mocchegiani, "Collectio Indulgentiarum" (Quaracchi, 1897). (See also Blessings.)

Festivals of the Holy Cross.—A. The Invention of the Holy Cross. This is now kept by the Western Church upon 3 May, but so far as our somewhat uncer
tain data allow us to judge, the real date of St. Helena's discovery was 14 September, 326. Upon this same day, 14 September, took place the dedication of Constantine's two churches, that of the Ana
sia and that of Golgota, Ad Crucem, both built on the Calvary, within the precincts of the present church of the Holy Sepulchre. The portion of the Holy Cross preserved in Jerusalem afterwards fell into the hands of the Persians, but was recovered by the Emperor Heraclius, and, if we may trust our authorities, was solemnly brought back to Jerusalem on 3 May, 629. This day, strangely enough, seems to have attracted special attention among Celtic liturgists in the West and, though disregarded in the East, has passed through Celtic channels (we meet it first in the Lec
tionary of Silos and in the Bobbio Missal) into general recognition under the mistaken title of "Invention of the Cross". Curiously enough the Greek Church keeps a feast of the Expiration of the Cross to St. Cyril of Jerusalem on 7 May, though that of 3 May is unknown in the East.

(3) B. The Feast of the Exaltation of the Cross, 14 September, though apparently introduced into the West somewhat later than the so-called "Invention", on 3 May, seems to preserve the true date of the dis
closure of the Cross by St. Helen. It has always been kept in the East, and especially at Jeru
salem, on that day, under the name of εωτις, i. e. "elevation", which probably meant originally the "bringing to light".

(3) C. Other Feasts of the Cross.—We might in some 
nesses regard the 14th of September as a festival as that of the Holy 
Lance and Nails as a festival of the Cross, but it should perhaps rather be grouped with feasts of the Passion. In the East, however, we find other celebrations strictly connected with the Cross. For example, on 1 August the Greeks commemorate the taking of the Cross from the House of Constantine without the inter
dence of the church of St. Sophia, and on 7 May, as we have seen, they recall an apparition of the Cross to St. Cyril of Jerusalem. The Armenians, on the other hand, observe one principal feast of the Cross, under the name Chatz, which occurs in autumn almost immediately after the feast of the Assumption. The last, considered as one of the most important feasts of the year, is preceded by a week's fast, and followed by an octave or its Armenian equivalent. See also above under 1.

(4) The "Adoration".—From a theological standpoint this is treated above under Section II. (See also LARTIA.) As a liturgical function the veneration of the Cross on Good Friday must no doubt be traced back as Amalarius already in the ninth century cor
crectly divined, to the practice of honouring the relic of the True Cross at Jerusalem which is described in detail in the "Pilgrimage of Etheria", c. 380 (see Sec
tion II of this article). The ceremony came to prevail everywhere where relics of the True Cross existed, and by a very natural development, where relics failed any ordinary cross supplied their place as an object of cultus. As Amalarius again sensibly remarks, "although every church cannot have such a relic, still the True Cross is received by the faithful to these, as those crosses which are made in imitation of it." Neither was this veneration, in the case, at any rate, of relics of the True Cross, confined to Good Friday. St. Gregory of Tours uses language which may pos
sibly imply that in Jerusalem the True Cross was venerated every Wednesday and Friday. It is certain that at Constantinople a Sunday in Mid-Lent, the first of August, and the 14th of September were similarly privileged. Even from early times there was no hesitation about using the word adoratio. Thus, St. Paulinus of Nola, writing of the great Jeru
salem relic (c. 410), declared that it had been offered to the people for worship (creucem quotidie adoro
dam populo promit), and first adored it himself. (See P., LXI, 325.) A curious practice was also introduced of anointing the cross, or, on occasion, any image or picture, with balm (balsamo) before presenting it for the veneration of the faithful. This custom was transferred to Rome, and we hear much of it in connexion with the very ancient reliquary of the True Cross and also the supposed miraculous por
trait of Our Saviour (achetropoeta, i. e. not made by the hand of man) preserved in the Sancta Sanctorum of the Lateran, both of which recently, together with a multitude of other objects, have been examined and reported on by papal permission (see GRIAS, DIE RÖMISCHE KAPELLE SANTA SANCTORUM UND IHR SCHATT, Freiburg, 1908, 91, 92). The objects mentioned were completely covered in part with solidified balm. Pope
Adrian I, in vindicating the veneration of images to Charlemagne, mentions this use of balm and defends it (Mansi, Concilia, XIII, 778). The ceremony of the adoration of the Cross in Rome was spread through the West in the seventh and eighth centuries, for it appears in the Gelasian Sacramentary and is presupposed in the Gregorian Antiphonary. Both in Anglo-Saxon England and in the England of the later Middle Ages the "Creeping to the Cross" was a ceremony which made a deep impression on the popular mind. St. Louis of France and other pious princes dressed themselves in haircloth and crept to the cross barefoot. At present, instead of creeping to the cross on hands and knees, three profound double genuflexions are made before kissing the feet of the crucifix, and the sacred ministers remove their shoes, and the now commonly made on this occasion for the support of the Holy Places seems also to date from medieval times.

(5) For the Figure of the Cross as a Manual Sign of Blessing the reader must be referred to the article Sign or the Cross, also subtitled (4) (Section I and 1) of this article.

(6) Dedications of Churches, etc. to the Holy Cross.—Possibly one of the earliest dedications to the Cross, if we put aside Constantine's church upon Calvary known in Ethiopia's time as Ad Crucem and also the Sessorian basilica which was its Roman counterpart, which he erected after his conversion by St. Ambrose in the sixth century. In behalf of this foundation the saint begged and obtained a relic of the True Cross from the Emperor Justin II at Constantinople. The bringing of the relic to Poitiers was the occasion of the composition of the two famous hymns by Venantius Fortunatus, "Verilis regina" and "Fons lingua, gloriosi praelium certaminis". In England perhaps the most famous monastery bearing this dedication was the Holy Cross Abbey at Waltham, founded by King Harold. At present about sixty ancient English churches are dedicated to the Holy Cross, while twenty more bear the same dedication in the distinctively English form of "Holy Rood". The famous Holyrood Palace in Edinburgh, once occupied by Mary Queen of Scots, derives its name from a monastery of the Holy Rood upon the site of which it was erected, and its church, now in ruins, was originally the church of the monks.

The Religious Orders and the Crusades.—Although the older orders were earnest in conforming to the general usage of the Church as regards the veneration of the Cross, no distinctive cultus seems to be attributable to the monasteries. The practice of carrying a crucifix as part of the ordinary religious habit is not so accurately and invariably dated. It is significant that, although in most modern congregations of nuns the bestowal of the crucifix is a prominent feature of the ceremony of profession, the service in the Roman Pontifical, "De Benedictione et Consecratione Virginum", knows nothing of it. It provides for the giving of rings and crosses but not of crucifixes. Probably much of the stimulus given to devotion to the crucifix may be traced ultimately to Franciscan influences, and it is not mere coincidence that the development in art of the agonised and thorn-crowned type of figure upon the Cross coincides more or less exactly with the great Franciscan revival of the thirteenth century. Somewhat earlier than the time of Francis an Italian Order of crocifere (cross-bearers), distinguished by carrying as part of their costume a plain cross of wood or metal, was founded in the neighbourhood of Bologna to tend the sick, and several other orders, particularly one established shortly after Francis, in the fourteenth and fifteenth centuries, have since borne the same or a similar name. In the case of the Military Orders, for example, that of St. John of Jerusalem or Knights Hospitallers, the cross impressed upon their habit has gradually become distinctive of the order. It seems to have been originally only the badge of the crusaders, who wore a red cross upon their right shoulders as a token of the obligation they had taken upon themselves. The Roman Pontifical still contains the ceremonial for the blessing and imposition of the cross upon those who set out for the aid and defence of the Christian Faith or for the recovery of the Holy Land. After the cross has been blessed the bishop imposes it upon the candidate with the words: "Receiving the sign of the Cross in the name of the Father + and of the Son + and of the Holy Ghost + in token of the Cross, Passion, and Death of Christ, for the defence of thy body and thy soul, that by the favour of the Divine Goodness when thy journey is accomplished thou mayest return to thy family safe and amended ..., Through Christ Our Lord, Amen." The crosses confined to the papal arms in connexion with various orders of knighthood may probably be traced to the same idea.

The various types of cross have rather to do with heraldry or art than with the history of Christianity. The names and shapes of the more common varieties can best be gathered from the earliest extant, although the vast majority the form is purely conventional and artificial. Their divergence from the normal type is a mere freak of fancy and corresponds to no attempt to reproduce the shape of the gibbet on which Our Saviour died, or to convey any symbolical meaning. The terms "cross ansata" or "long cross", "cross alabaster", "cross mala", or "lyfole", are much more ancient than Christianity. (See in Section I of this article, (1) Primitive Cruciform Signs.) The chiromon, or chi-rho, has already been mentioned as the earliest forms in which the cross appears in Christian art (Section I (4)). The forms which it took varied considerably and it is difficult to classify them chronologically. With regard to the great Celtic stone crosses, particularly in Ireland, we may note the tendency conspicuous in so many specimens to surround the cross with a circle. It is just conceivable that there is foundation for regarding this circle as derived from the loop of the Egyptian cross ansata.

(8) The Cross outside of the Catholic Church.—In the Russian Church the conventional form in which the cross is usually shown is in fact a three-barred cross, like this ☧ of which the upper bar represents the title of the cross, the second the arms, and the lowest, which is always inclined at an acute angle, the foot-rest. In England it may be said that in the early years of Elizabeth's reign a clean sweep was made of the crosses so long venerated by the people. All the roods were ordered to be pulled down, and the crosses were removed from the altars, or rather the communion-tables which replaced the altars. The only check in this movement was the fact that the queen herself, for some rather obscure reason, insisted at first on retaining the crucifix in her own private chapel. The presence of a crucifix or even a plain cross upon the altar was long held to be illegal in virtue of the "Ornaments Rubric". In recent years, however, there has been a notable reaction, and crosses, or even crucifixes, are quite commonly seen upon the altar of Anglican churches. Again, in the recent years recently erected in St. Paul's Cathedral in London a large crucifix, with the figures of St. Mary and St. John, forms the most conspicuous feature. In Lutheran churches there has always been much tolerance for the crucifix either upon or behind the altar.

It would not be easy to provide an adequate bibliography for such a wide field covered by this subject. Some may be mentioned of a more general kind.—Bäumer in Kirchenlex., VII, 1054-1058; QUILLIET in Dict. de théol. cath., 1869, 234-236; Hofstetter, Le crucifix dans l'histoire (Lille, 1900); Seton-Watson, The Cross in Tradition, History and Art (New York, 1896).—Both these last works are very comprehensive and useful, but unfortunately quite unsuitable for an article on Cross in the Life and Literature of the Anglo-Saxons (New York, 1896).—Rouault de Fleury, Croix et croisd (Paris, 1896); an invaluable for its illustrations of liturgical crosses, Krauss, Geschichte der christlichen Kunst (Freiburg, 1895-1906); Cox and

CROSS

Cross-Bearer, the cleric or minister who carries the procesional cross, that is, a crosier provided with a long staff or handle. An archbishop’s cross is borne with the figure of the crucifix towards the prelate, but in all other cases the figure should be turned forward. The cross-bearer should, whenever possible, be a cleric (Council of Milan, seventeenth century), but in lay processions the most worthy of the laity should be selected for the office. In the more solemn processions such as those of the Blessed Sacrament, Palm Sunday, and Good Friday, the cross should be borne by a subdeacon vested in amice, alb, and tunic; on less solemn occasions by a clerk in surplice. The staff is held with both hands so that the figure is well above the head. The cross-bearer and the two acolytes by whom he is accompanied on the more solemn occasions should walk at the head of the procession, except when the bishop is there, and should not make any reverence whilst engaged in this function.

Ceremonial Episcoporum, passim; De Hert, Praxis Liturgiae Sacrae (Louvain, 1904); III, 316; Le Vavasseur, Ceremonial Romain (Paris, 1876), I, 682.

PATRICK MORRISBROE.

Cross of Jesus, Brothers of the, a congregation founded in 1820 at Lyons, France, by Father C. M. Bochard, Doctor of the Diocese of Lyons. Father Bochard was the first superior general (1820–34). He had as successors the Rev. Father Corsiain (1834–65) and the Rev. Father Bernard (1865–74). Until then the direction of the principal houses was entrusted to Fathers who were members of the congregation. In 1873 Bishop Richard of Belley, afterwards Cardinal and Archbishop of Paris, employed the Fathers as parish priests and the congregation was henceforward composed of Brothers only. The superiors general, from this epoch, have been the Reverend Bros. Pierre-Joseph (1873–85), Lucien (1885–98), and Firmin (1898–92).

The name of the congregation indicates its distinctive spirit. It grew during the nineteenth century in eastern France and in Switzerland, until the persecution of 1903, which destroyed nearly all its establishments. Brother Evariste, Superior General, and Brother Evariste with 32 religious to establish a province in North America, under the patronage of the Right Rev. A. A. Blais, Bishop of Rimouski, Canada. The institution, incorporated in Canada by a bill of the Legislative Assembly of Quebec (May, 1905), possesses at Rimouski, a “house of formation” (novitiate and scholasticate), where the young members of the congregation are taught all the high-school branches and the commercial courses both in English and French. At the request of the Most Rev. L. P. A. Langevin, Archbishop of St. Boniface, Manitoba, the institution was opened, since 1929, the college of St. Jean-Baptiste and of St. Pierre, Joly, Manitoba.

BROTER CHARLES.

Crotus, Johann (properly Johannis Jager, hence often called Venator, “hunter”, but more commonly, in grecised form, Crotus, “archer”), German Humanist, b. at Dornheim, in Thuringia, c. 1480; d. probably at Halle, c. 1539. From the name of his birthplace he received the latinized appellation Rubianus and is generally known as Crotus Rubianus. At the age of eighteen he went to Strasbourg, then Erasmus’ chief centre of German Humanism, where he obtained his baccaulaureate degree in 1500. Friendship with Conrad Mutianus and Ulrich von Huten led him from being an upholder of Scholasticism to become an enthusiastic partisan of Humanism and a violent opponent of the older learning. In 1505 he induced von Huten to leave the monastery of Fulda, but in 1506 came back with the latter from Cologne to Erfurt, where in 1508 Crotus obtained the degree of Master of Arts. After this he was absent from Erfurt for a short time as tutor to Count von Henneberg, but by 1509 he had again returned to his studies and in 1510 was the head of the monastic school at Fulda. He now formed close relations with Reuchlin’s supporters in Cologne; about 1514 he was for a short time in Cologne but soon returned to Fulda where he was ordained priest and obtained a small benefice. About 1515 he wrote the larger part of the “Epistola Obscuriorum Vlrorum”; the letters composed by him are of violent character, full of venom and stinging acumen against Scholasticism and monasticism. In 1517 he settled in Bologna as tutor of the Fuchs brothers, and during his stay at this city, up to 1519, he studied successively jurisprudence and theology. Before leaving Italy he went in company with Eoban Hesse to Rome (1519) in order to observe for himself the “see of corruption”. While in Bologna he had become acquainted with Luther’s writings and actions, learned of the violent stand he had taken and approved it as the beginning of a greatly needed reform of the Church; apparently also he had a share in the anonymous broadsides which appeared in Germany. From 1520 he was at Erfurt, where he was made rector of the university, and here in 1521 he gave Luther a warm greeting when the latter passed through Erfurt on his way to Worms. Soon after this Crotus returned to Fulda where Meunchthon visited him in 1524. In the same year Crotus entered the service of Duke Albrecht of Prussia at Königsberg and endeavoured to justify the duke’s withdrawal from the old Faith in a pamphlet directed against the new master of the Teutonic Order entitled “Christliche Vermahung” (1526).

Weary of his position at Königsberg as early as 1525, he went first, in 1530, to Leipsic and soon afterwards to Halle; here Crotus accepted service under Cardinal Albrecht of Brandenburg as councillor and received a canony. As a genuine Humanist Crotus had for a long time felt disgusted with the public disturbances and the bitter polemies that resulted from the Luther’s movement; he still suffered from the grave disorder in morals and religion. Thus in Halle, probably through the influence of its canons, he positively returned to Catholicism, which he seems, however, never to have abandoned conscientiously. The first clear notice of this change of views is the “Apologia, qua respondetur temeriti Romanorum non communem populum odium protrahere reverendissimam in Christo patrem et dominum Albertum” (Leipzig, 1531). The “Apologia” contained a positive denial of the accusations made by Alexander Croner or Luther that Cardinal Albrecht, in the persecution of the new doctrine and its propagators, had granted the cup to the laity, and had acted with extreme cruelty and lack of consideration. Crotus showed that the Reformation had resulted in the sanctioning of all kinds of immorality and blasphemy, and that where the “Antipopes’” rule, those of other beliefs were cruelly oppressed, denounced by spies, and persecuted. Various pamphlets, chiefly anonymous, were issued in reply to the “Apologia” and the author was violently attacked by Justus Jonas and other of his former friends. After this Luther always gave the name of Dr. Kröte (toad) to his one-time adherent, the dreaded opponent in former days of Scholasticism and monasticism, and attempted no longer to make his stand. The church was returned to the assembly of all kinds of immorality and blasphemy, and that where the “Antipopes’” rule, those of other beliefs were cruelly oppressed, denounced by spies, and persecuted. Various pamphlets, chiefly anonymous, were issued in reply to the “Apologia” and the author was violently attacked by Justus Jonas and other of his former friends. After this Luther always gave the name of Dr. Kröte (toad) to his one-time adherent, the dreaded opponent in former days of Scholasticism and monasticism, and attempted no longer to make his stand.
As soon as the formal break with the Church, and the pretended reform movement produced only anarchy in religion and morals, he turned his back on it without giving a thought to the hatred of his friends of earlier days. In a letter dated 1532 to Duke Albrecht he states his religious views clearly: “with the belief in the future is not attached to the Church and allow all innovations to pass over like a disagreeable smoke”’. Crotus appears to have spent the last years of his life entirely at Halle, but nothing positive is known on the subject. Most probably Georg Witzel urged him at different times to write again in defence of the Church, and he did, indeed, make an effort to do this. But afterwards we hear that the position, "unworthy of a man", in which he was placed, did not permit him to take up his pen on behalf of religion. It is not entirely certain whether his cannony or his character of official in the service of Cardinal Albrecht laid these limitations on him. Yet he apparently had an important influence on the writings of others, e.g. on those of Witzel. Crotus himself, as a Humanist of strong intellectual tastes, preferred above all the quiet of his study. It may be that the revolutionary tumult in religious and social life took from him both the need and the strength to use the pen with which he had formerly so unmercifully scourged the weaknesses of his opponents. He seems, however, to have influenced the religious demeanour of his master, Cardinal Albrecht, in the cardinal's later years. The last scanty information concerning Crotus reaches to the year 1599; his death occurred, if not in this year, certainly not much later.

JOSEPH SÄUER.

CROWN, FRANCISCAN (OF SERAPHIC ROSARY), A ROSARY consisting of seven decades in commemoration of the seven joys of the Blessed Virgin (the Annunciation, Visitation, Birth of Our Lord, Adoration of the Magi, Finding of the Child Jesus in the Temple, the Resurrection of Our Lord, and the Assumption of the Blessed Virgin and her Coronation in heaven), in use among the members of the three orders of St. Francis. The Franciscan Crown dates back to the 14th century. It consists of a three-inch string which can be wrapped around the head seven times, and is known as the "Rosary of St. Francis". From this time the practice of reciting the crown of the seven joys became general in the order. The manner of reciting the Franciscan Rosary is as follows: The Apostles’ Creed, The Our Father, and three Hail Marys having been said as usual, the mystery to be recited is introduced from the start of the first Hail Mary of each decade, thus: "Jesu, whom thou didst joyfully conceive", "Jesus, whom thou didst joyfully carry to Elizabeth", and so on for the remaining five decades, which are given in most manuals of Franciscan devotion. At the end of the seventh decade two Hail Marys are added to complete the number of 50 that the Franciscan is said to have lived on earth. There are other ways of reciting the Crown but the one given seems to be in more general use. The plenary Indulgence attached to the recitation of the Franciscan Crown, and applicable to the dead, may be gained as often as the crown is recited. It is not required that the beads be blessed, or in fact that beads be used at all, since the indulgence is attached to the recitation of the crown, and participation in the recitation of the prayers as such. In 1905 Pope Pius X, in response to the petition of the Procurator General of the Friars Minor, enriched the Franciscan Crown with several new Indulgences that may be gained by all the faithful. Those who assist at a public recitation of the Franciscan Crown participate in all the Indulgences attached to the Seraphic Rosary that are gained by the members of the Franciscan Order. It is required, however, that beads be used and that they be blessed by a priest having the proper faculties. A translation of the pontifical Brief is given in "St. Anthony's Almanac" for 1909.

Crown of Thorns.—Although Our Saviour’s Crown of Thorns is mentioned by three Evangelists and is often alluded to by the early Christian Fathers, such as Clement of Alexandria, Origen, and others, there are comparatively few writers of the first six centuries who speak of it as a relic known to be still in existence and venerated by the faithful. It is remarkable that St. Jerome, who expatiates upon the Cross, the Title, and the Nails discovered by St. Helen (Tobler, Itinerar Hierosolymi, II, 36), says nothing either of the Lance or of the Crown of Thorns, and the silence of Andreas of Crete in the eighth century is even more surprising. Still there are some exceptions. St. Paulinus of Nola, writing after 409, refers to "the hands to which Our Saviour was crowned" as relics held in honor with the Cross to which He was nailed and the pillar at which He was scourged (Ep. ad Macar. in Migne, P. L., LXI, 407). Cassiodorus (c. 570), when commenting on Ps. XXXVI, speaks of the Crown of Thorns among the other relics which are the glory of the earthly Jerusalem. "There", he says, "we may behold the thorny crown, which was only set upon the head of Our Redeemer in order that all the thorns of the world might be gathered together and broken" (Migne, P. L., LXX, 621). When Gregory of Tours ("De gloriæ mart."") in Mon. Germ. Hist.: Scrib. Merov. II, 492) avers that the thorns in the Cross of the Saviour are miraculously renewed each day, he does not much strengthen the historical testimony for the authenticity of the relic, but the "Breviarium", and the "Itinerary" of Antoninus of Piacenza, both of the sixth century, clearly state that the Crown of Thorns was preserved at that period in the church upon Mount Zion (Geyer, Itinerar Hierosolymitanas, 154 and 174). From these fragments of evidence and others of later date—the "Pilgrimage" of the monk Bernard shows that the relic was still at Mount Zion in 870—it is certain that what purported to be the Crown of Thorns was preserved at that period for seven hundred years. If we may adopt the conclusions of M. de Mery, the whole Crown was only transferred to Byzantium about 1063, although it seems that smaller portions must have been presented to the Eastern emperors at an earlier date. In any case Justinian, who died in 565, is said to have given a thorn to St. Germanus, Bishop of Paris, which was long preserved in Notre Dame-des-Prés, while the Empress Irene, in 798 or 802, sent Charlemagne several thorns which were deposited by him at Aachen. Eight of these are known to have been there at the consecration of the basilica of Aachen by Pope Leo III, and the subsequent history of several of them can be traced without difficulty. Four were given to Saint-Remi-Corneille of Compiegne in 877 by Charlot.
the Bald. One was sent by Hugh the Great to the Anglo-Saxon King Athelstan in 927 on the occasion of certain marriage negotiations, and eventually found its way to Malmesbury Abbey. Another was presented to a Spanish princess about 1160, and again another was taken to Genoa in 1468. The third was given to Venice in 1200.

In 1238 Baldwin II, the Latin Emperor of Constantinople, anxious to obtain support for his tottering empire, offered the Crown of Thorns to St. Louis, King of France. It was then actually in the hands of the Venetians as security for a heavy loan, but it was redeemed and conveyed to Paris where St. Louis bought the relic. This complete relic is still in France.

There the great relic remained until the Revolution, when, after finding a home for a while in the Bibliothèque Nationale, it was eventually restored to the Church and was deposited in the Cathedral of Notre-Dame in 1806. Ninety years later (in 1896) a magnificent new reliquary of rock crystal was made for it, covered for two-thirds of its circumference with a silver case splendidly wrought and jewelled. The Crown thus preserved consists only of a circlet of rushes, without any trace of thorns. Authorities are agreed that a sort of helmet of thorns must have been platted by the Roman soldiers, this band of rushes being employed to hold the thorns together. It seems likely according to M. de Mély, that already at the time when the circlet was brought to Paris the sixty or seventy thorns, which seem to have been afterwards distributed by St. Louis and his successors, had been separated from the band of rushes and were kept in different reliquaries. None of these now remain at Paris. Some small fragments of rush are also preserved apart from the sainte Couronne at Paris, e.g. at Arras and at Lyons. With regard to the origin and character of the thorns, both tradition and existing remains suggest that they must have come from the bush botanically known as Zizia plus caerulea, more popularly, the jujub-tree. This reaches the height of fifteen or twenty feet and is found growing in abundance by the wayside around Jerusalem. The crooked branches of this shrub are armed with thorns growing in pairs, a straight spine and a curved one commonly occurring together at each point. The relic preserved in the Capella della Spina at Pisa, as well as that at Trier, which though their early history is doubtful and obscure, are among the largest in size, afford a good illustration of this peculiarity.

That all the reputed holy thorns of which notice has survived cannot in any possibility be authentic will be disbelieved by M. de Mély, who has been able to enumerate more than 700 such relics. The statement in one medieval pietist that Peter de Avorio gave to the cathedral of Angers "unam de spinis quae fuit apposita corone spines nostri Redemptoria" (de Mély, p. 362), meaning seemingly a thorn which has touched the real Crown of Thorns, throws a flood of light upon the probable origin of many such relics. Again, even in comparatively modern times it is not always easy to trace the history of these objects of devotion, which were often divided and thus multiplied. Two "holy thorns" are at present venerated, the one at St. Michael's church in Ghent, the other at Stonyhurst College, both professing, quite what was the evidence, to be the thorn given by Mary Queen of Scots to Thomas Percy Earl of Northumberland (see "The Month", April, 1882, 540-556). Finally, it should be pointed out that the appearance of the Crown of Thorns in art, notably upon the head of Christ in representations of the Crucifixion, is capable of the thorn of St. Louis and the building of the Sainte-Chapelle. Some archaeologists have professed to discover a figure of the Crown of Thorns in the circle which sometimes surrounds the chi-rho emblem on early Christian sarcophagi, but it seems to be quite as probable that this is only meant for a laurel-wreath.

The one recent and authoritative study of the whole subject is that of de Mély, forming the third volume of Histoire Constantinopolitaine (Paris, 1901). Herbert Thurston.

Croyland (or Crowland), Abbey of, a monastery of the Benedictine Order in Lincolnshire, sixteen miles from Stamford and thirteen from Peterborough. It was founded in memory of St. Guthlac, early in the eighth century, by Ethelbald, King of Mercia, but was entirely destroyed and the community slaughtered by the Danes in 886. Refounded in the reign of King Edred, it was again destroyed by fire in 1091, but rebuilt about twenty years later by Abbot Joffrid. In 1170 the greater part of the abbey and church was once more burnt down and once more rebuilt, under Abbot Edward. From this time the history of Croyland was one of growing and almost unbroken prosperity down to the time of the Dissolution. Richly endowed by royal and noble visitors to the shrine of

St. Guthlac, it became one of the most opulent of East Anglian abbeys; and owing to its isolated position in the heart of the fen country, its security and peace were comparatively undisturbed during the great civil wars and other national troubles. The first abbot (in Ethelbald's reign) is said to have been Kenulph, a monk of Evesham; and one of the most notable was Ingulphus, who ruled from 1075 to 1106, and whose pseudo-chronicle was long considered the chief authority for the history of the abbey, though it is now acknowledged to be a compilation of the fifteenth century. At the time of the Dissolution the abbey was John Welles, or Bridges, who with his twenty-seven monks subscribed to the Royal Supremacy in 1534, and five years later surrendered his house to the king. The revenue of the abbey at this time has been variously estimated at £1053 and £1217. The site and buildings were granted in Edward VI's reign to Edward Lord Clinton, and afterwards came into the possession of the Hunter family. The remains of the abbey were fortified by the Royalists in 1643, and burnt and taken by Cromwell in May of that year. The abbey church comprised a nave of nine bays with aisles, 183 feet long by 87 wide, an apsidal choir of five bays 90 feet long, a central tower and detached bell-tower at the east end. The remaining exists consist of the north aisle, still used (as it was from the earliest times) as the parish church; the splendid west front, the lower (twelfth century) and the upper part (fourteenth century) elaborately decorated with arcading and statues, it is thought in imitation of Wells cathedral; and a few piers and arches of the nave. Much careful restoration and repair has been carried out since 1860, under Sir Gilbert Scott, Mr. J. L. Pearson, and other eminent architects.

CRUELTY TO ANIMALS.—The first ethical writers of pagan antiquity to advocate the duty of kindness towards the brute creation were Pythagoras and Empedocles. Holding the doctrine of metempsychosis, or the transmigration of human souls into the bodies of lower animals after death, these philosophers taught that man's many kindred was the spokesman for animals, and that to slay the innocent animal was a crime to kill them. These ideas, together with an appreciation of the services rendered by domestic animals to man, found some expression in early Roman legislation. The error of ascribing human rights to animals is condemned by Cicero (De Finibus, bk. III, xxi). The New Testament inculcates kindness towards animals. The Jews were forbidden to muzzle the ox that treadeth out the corn (Deut., xxv, 4) or to yoke together an ox and an ass (ibid., xxvii, 10). Some other texts which are frequently quoted as instances are not so much to recommend kind treatment of animals as to impose on duty of neighbours to one another. Thus, the prohibition against seething the kid in its mother's milk, a process in which there is no cruelty at all, and the one against taking a mother-bird with her young, seem to have a religious rather than a humanitarian significance.

The New Testament is almost silent on this subject. Even when St. Paul cites the Mosaic prohibition against muzzling the ox, he brushes aside the literal in favour of a symbolic signification (I Cor., ix, 9 sq.). The Fathers of the Church insist but little on this point of duty. Nevertheless, Christian teaching and practice from the beginning reflect in a general way the Scriptural ideal of righteousness which is expressed in the words: "The just regardeth the lives of his beasts: but the bowels of the wicked are cruel" (Prov., xii, 10). The hagiological literature of monastic life in the Middle Ages, which so largely formed and guided the moral sentiment of the Church, is replete with such examples of kindness. From St. Francis of Assisi and some of his followers it to a degree that seems almost incredible.

The scholastic theologians condemn the infliction of needless suffering on animals, chiefly because of the injurious effects on the character of the perpetrator. Thus St. Thomas, in his "Summa Contra Gentiles" (bk. II, xxi), after refuting the error that it is not lawful to take the lives of brutes, explains the importance of the above-mentioned texts of Scripture. He says that these prohibitions are issued either "lest anyone by exercising cruelty towards brutes may become cruel also towards men; or, because an injury to brutes may result in loss to the owner, or on account of some symbolic signification". Elsewhere (Summa Theologica, I-II, Q. cii, a. 6, ad 3um) he states that God's purpose in recommending kind treatment of the brute creation is to dispose men to pity and tenderness for one another. While the scholastics rest their case on the power of creature animals for moralizing influence, their general teaching concerning the nature of man's rights and duties furnishes principles which have but to be applied in order to establish the direct and essential sinfulness of cruelty to the animal world, irrespective of the results of such conduct on the character of those who practise it.

Catholic ethics has been criticized by some sophists because it refuses to admit that animals have rights. But it is indisputable that many have understood and fairly judged, Catholic doctrine, though it does not concede rights to the brute creation, denounces cruelty to animals as vigorously and as logically as do those moralists who make our duty in this respect the correlative of a right in the animals. In order to establish a brute's wanton infliction of pain on the brutes, it is not necessary to acknowledge any right inherent in them. Our duty in this respect is part of our duty towards God. From the juristic standpoint, the visible world with which man comes in contact is divided into persons and non-persons. For the latter term the word "things" is usually employed. Only a person, that is, a being possessed of reason and self-control, can be the subject of rights and duties; or, to express the same idea, to be interested in others as such, in the perfection of other beings, can possess rights. Rights and duties are moral ties which can exist only in a moral being, or person. Beings that may be treated simply as means to the perfection of persons can have no rights, and to this category the brute creation belongs. In the Divine plan of the universe the lowerCreated beings are subordinated to the higher. But while these animals are, in contradistinction to persons, classed as things, it is none the less true that between them and the non-sentient world there exists a profound difference of nature which we are bound to consider in our treatment of them. The very essence of the moral law is that it rests on and obliges the order established by the Creator. Now, the animal is a nobler manifestation of His power and goodness than the lower forms of material existence. In imparting to the brute creation a sentient nature capable of suffering—a nature which the animal shares in common with ourselves—God placed on our dominion over them a restriction which does not exist with regard to our dominion over the non-sentient world. We are bound to act towards them in a manner conformable to their nature. We may lawfully use them for our reasonable wants and welfare, even though such use may be not only harmful but cruel. But the wanton infliction of pain is not the satisfaction of any reasonable need, and, being an outrage against the Divinely established order, is therefore sinful. This principle, by which, at least in the abstract, we may solve the problem of the lawfulness of vivisection and other cruel investigations, is that enunciated by Zigiara: "The service of man is the end appointed by the Creator for brute animals. When, therefore, man, with no reasonable purpose, treats the brute cruelly he does wrong, not because he violates the right of the brute, but because his action conflicts with the order of the Creator." (Philosophia Moralis, 9th ed., Rome, p. 136). With more feeling, but with no less exactness, the late Cardinal Manning expressed the same doctrine: "It is perfectly true that obligations and duties are between moral persons, and therefore the lower animals are not susceptible of the moral obligations which we owe to one another; but we owe a second obligation to the Creator of those animals. Our obligation and moral duty is to Him who made them; and if we wish to know the limit and the broad outline of our obligation, I say at once it is His nature and His perfections, and among these perfections one is, most profoundly, that of Eternal Mercy. And therefore, although a poor mule or a poor horse is not, indeed, a moral person, yet the Lord and Maker of the mule is the highest Lawgiver, and His nature is a law unto Himself. And in giving a dominion over His crea-
CRUCES

CRUSADES

ures to man, He gave it subject to the condition that it should be used in conformity to His perfections which is His own law, and therefore our law" (The Zoopolist, London, 1 April, 1887). While Catholic ethical doctrine insists upon the merciful treatment of animals, it does not place kindness towards them on the same plane of duty as benevolence towards our fellow-men. Nor does it approve of unduly magnifying the value of any of our animal friends, or patronizing animals concerning animals. Excessive fondness for them is no sure index of moral worth; it may be carried to un-Christian excess; and it can coexist with great laxity in far more important matters. There are many imitators of Schopenhauer, who love his dog and live in a world of morality.

JAMES J. FOX.

Cruet, a small vessel used for containing the wine and water required for the Holy Sacrifice of the Mass. The Roman Missal (Missale Romanum, Gen., XX) directs that they should be made of glass. This is the most suitable material because easily cleaned, and its transparency obviates danger of confounding the water and wine. Other materials, however, are used, such as gold, silver, and other precious metals. In this case, however, it is advisable to name it V (Vinum) on the wine and an A (aqua) on the water cruets, so that one may be easily distinguished from the other. In shape nothing is prescribed, but the vessels should have a good firm base on which to stand securely and a fairly wide neck so as to admit of being easily used. They should have a cover to keep away flies and insects. Formerly the wine for the Holy Sacrifice was brought by the faithful in a jar-shaped vessel. It was then received by the deacon and poured into the chalice, a vestige of which custom is still observable at the consecration of a bishop.

VAN DER STAPPEN, De Missa Celebratio (Mayr, 1868).

PATRICK MORRISHOE.

CRUSADES—BULL OF THE, a Bull granting indulgences to those who took part in the wars against the infidels. These indulgences were similar to those which, as far back as the eleventh century, had been granted to the faithful of the Spanish Mark who took part in the wars against the infidels. In the Crusades, however, these Crusade Bulls which concerned Spain was that of Urban II to the Comte Berenguer Ramón de Barcelona and Armenegal de Besalú in 1098 at the time of the reconquest of Tarragona, and that of Gelasius II to Alfonso I of Aragon, when he undertook to reconquer Saragossa in 1118. Clement IV in 1265 issued a general Bull for the whole of Spain, when the Kings of Aragon and Castile joined in the expedition against Murcia. In the course of time these pontifical concessions became more and more frequent; in the reign of the Catholic kings alone they were granted in 1478, 1479, 1481, 1482, 1485, 1494, 1503, and 1505, and were renewed during the reigns of the Popes. papal indulgences granted by Gregory XIII in 1573 being renewed by his successors.

The aims given by the faithful in response to this Bull, which were at first used exclusively for carrying on the wars against the infidels, were afterwards used for the construction and repair of churches and other pious works; sometimes they were also used to defray expenses of the State. The Cortes of Valladolid of 1523 and that of Madrid of 1592 petitioned that this money should not be used for any other purpose than that for which it had originally been intended by the donors, but, notwithstanding the provisions made by Pope Julius II in compliance with this request, the abuse already mentioned continued. After 1487 the bulls issued from this source were devoted to the enlargement of churches and the clergy, this disposition being ratified by a law in 1849 and in the Concordat of 1851, still in force.

In virtue of the concessions granted by this Bull, the faithful of the Spanish dominions who had fulfilled the necessary conditions would gain all the indulgence, granted to those who fought for the reconquest of the Holy Land and to those who went to Rome in the year of Jubilee, provided they went to confession and received Holy Communion. They enjoyed also the privilege of being absolved twice of sins and censures reserved to the Holy See, except open heresy, and others concerning ecclesiastics; to have vows which could not be fulfilled without difficulty commuted by their confessor, unless failure to fulfil them would be to the disadvantage of another; also simple vows of perpetual chastity, of religious profession, and of pilgrimage to the Holy Land. Those who visited five churches or altars, or the same altar five times, and prayed for the intentions of the Crusade, could gain the indulgences granted to those who visited the stations in Rome. The Bull, moreover, permitted the faithful of the Spanish dominions to eat meat on all the days of Lent and other days of fast and abstinence, except Ash Wednesday, the Fridays of Lent, the last four days of Holy Week, and the vigils of the feasts of the Nativity, Pentecost, the Assumption, and Sts. Peter and Paul.

CRUSADES.—The Crusades were expeditions undertaken, in fulfilment of a solemn vow, to deliver the Holy Places from Mohammedan tyranny. The origin of the word may be traced to the cross made of cloth and worn as a badge on the outer garment of those who took part in these enterprises. Medieval writers use the terms cruz (pro cruces transmarina, Chapter of 1284, cited by Du Cange s. v. cruz), croisement (Joinville, croisierie (Monstrelet), etc. Since the Middle Ages the meaning of the word crusade has been extended to include all wars undertaken in pursuance of a vow, and directed against infidels, i.e. against Mohammedans, pagans, heretics, or those under the ban of excommunication. The wars waged by the Spaniards against the Moors constituted a continual crusade from the eleventh to the sixteenth century; in the north of Europe countries were at war with the Prussians and Lithuanians; the extermination of the Albigensian heresy was due to a crusade, and, in the thirteenth century, the popes preached crusades against John Lackland and Frederick II. But modern literature has abused the word by applying it to all wars of a religious character, as, for instance, the expedition of Heraclius against the Persians in the seventh century and the conquest of Saxony by Charlemagne. The idea of the crusade corresponds to a political conception which was realized in Christendom only from the eleventh to the fifteenth century; this supposes a union of all peoples and sovereigns under the direction of the popes. All crusades were announced by preaching. After pronouncing a solemn vow, each warrior received a cross from the hands of the pope or his legates, and was thenceforward considered a soldier of the Church. Crusaders were also granted Indulgences and temporal privileges, exemption from jurisdiction, inviolability of persons or lands, etc. Of all these wars undertaken in the name of Christendom, the most important were the Eastern Crusades, which are the only ones treated in this article.

PRESENT KNOWLEDGE OF THE CRUSADES.—A history of the Crusades was begun in France in the seven-
CRUSADES

Teenth century by the Benedictines of the Congregation of St. Maur. (Bongars had previously published the first collection of the Orient, the "Annales Historiae orientales et orientis orientem" of 1810; Migne, "Protopsychia," XI, 1856—7; Thomas, "Diplomatarium Veneto-Levantino" (Venice, 1880).)

(2) Judicial Documents. — Such are the "Assisses de Jérusalem" (Beugnot, ed., 2 vols., Paris, 1841) and the "Règle du Temple" (Curzon, ed., Paris, 1886).

(3) Chronicles. — These have not yet been gathered in a single collection. The Benedictins, however, have compiled chiefly the "Collection de l'histoire des Croisades," published by the Académie des Inscriptions, and the "Série Historique" of the Société de l'Orient Latin. The most detailed account of the Christian states is that in the chronicle of William, Archbishop of Tyre (see p. 140). It contains no geographical information about the number of forgers (See L. Delisle, "Bibliothèque de l'Ecole des Chartes," 1888, 304; Cartellieri, "Philipp II August," Leipzig, 1906, II, 302 sqq.) It is only within the last thirty years that the history of the Crusades has been studied in a truly scientific manner, thanks to the Société de l'Orient Latin founded by Count Riant in 1875 (principal seats at Paris and Geneva). Its publications were at first divided into geographical and historical series, the former containing the itineraries of pilgrims and the latter, chronicles, letters, and charters. The "Archives de l'Orient Latin" were published in 1881 (2 vols., Paris), but since 1893 the publications have been included in the "Revue de l'Orient Latin," a periodical bibliography of the history of the Crusades. Moreover, in all European countries national collections of documents ("Monumenta Germaniae," "Société de l'histoire de France," "Collectanea rerum auctorum," etc.) have been made toward providing us with sources of the history of the Crusades. Owing to these labors the student of the Crusades may now consult:

(1) Documents in Archives. — Röhricht's "Regesta regum barbarorum," I (1885), and Delaveau-Leroux's "Cartulaire général des Hospitaliers de S. Jean de Jérusalem," 4 vols., fol. (Paris, 1894). The correspondence of the popes, preserved in the Vatican archives, is one of the most important sources for the history of the Crusades. After these archives were made accessible to scholars by order of Leo XIII in 1881, the Ecole Française of Rome inaugurated the publication of the registers of the popes of the thirteenth century (Library of the Ecole Française de Rome)—Gregory IX (Avrany, ed.); Innocent IV (E. Berger, ed.); Alexander IV (de la Roncière, ed.); Urban IV (Guiraud, ed.); Clement IV (Jordan, ed.); Gregory X and John XXI (Guiraud and Cardier, ed.); Nicholas III (Gay, ed.); Martin IV (Soehne, ed.); Honorius IV (Prou, ed.); Nicholas IV (Langois, ed.); Boniface VIII (Faucon, ed.); Benedict XI (Grandjean, ed.). To these must be added the registers of Honorius III (Pressati, ed.; Rome, 1898) and Alexander III (Fontevraud, ed.; Paris, 1888). For the other popes see Migne's "Patrologia Latina" and the "Annales Ecclesiastici" of Baronius and Raynald (Mansi, ed., Luca, 1738—59). The archives of the Italian states of Venice, Genoa, and Naples have also been of great value for throwing new light on the history of the Crusades, e. g. Tufel and Thomas, "Urkunden zur älteren Handels- und Staatsgeschichte der Republik Venedig" (Venice, "Collectanea rerum auctorum," XI, 1856—7; Thomas, "Diplomatarium Veneto-Levantino" (Venice, 1880).

(2) Judicial Documents. — Such are the "Assises de Jérusalem" (Beugnot, ed., 2 vols., Paris, 1841) and the "Règle du Temple" (Curzon, ed., Paris, 1886).

and the Ottoman invasion: LX. The crusade in the fifteenth century; X. Modifications and survival of the idea of the crusade.

I. ORIGIN OF THE CRUSADES. — The origin of the Crusades is directly traceable to the moral and political condition of Western Christendom in the eleventh century. At that time Europe was divided into numerous petty states, in a fit of national spasm and petty territorial disputes while the emperor, in theory the temporal head of Christendom, was wasting his strength in the quarrel over Investitures. The popes alone had maintained a just estimate of Christian unity; they realized to what extent the interests of the Church demanded no less than the political and the Mohammedan tribes, and they alone had a foreign policy whose traditions were formed under Leo IX and Gregory VII. The reform effected in the Church and the papacy through the influence of the monks of Cluny had increased the prestige of the Roman pontiff in the eyes of all Christian nations; hence none but the pope could inaugurate the international movement that culminated in the Crusades. But despite his eminent authority the pope could never have persuaded the Western peoples to arm themselves for the conquest of the Holy Land had not the immemorial relations between Syria and the West favored an invasion. Even Urban II because of their own inclination and historic traditions impelled them towards the Holy Sepulchre. From the end of the fifth century there had been no intermission in their intercourse with the Orient. In the early Christian period colonies of Syrians had introduced the religious ideas, art, and culture of the East into the large cities of Gaul and Italy. The Western Christians in turn journeyed in large numbers to Syria, Palestine, and Egypt, either to visit the Holy Places or to follow the ascetic life among the monks of the Thebaid or Sinai. There is still extant the itinerary of a pilgrim from Rome to Jerusalem written by St. Jerome and St. Pauls founded the first Latin monasteries at Bethlehem. Even the Barbarian invasion did not seem to dampen the ardor for pilgrimages to the East. The Itinerary of St. Silvia (Ethiops) shows the organization of these expeditions, which were directed by clerics and escorted by armed troops. In the year 600, St. Gregory the Great had a hospice erected in Jerusalem for the accommodation of pilgrims, sent alms to the monks of Mount Sinai ("Vita Gregorii" in "Acta SS.", March II, 132), and, although the deplorable condition of Eastern Christendom after the Iconoclast Controversy had rendered this course more difficult, it did not by any means cease.

As early as the eighth century Anglo-Saxons underwent the greatest hardships to visit Jerusalem. The journey of St. Willibald, Bishop of Eichstätt, took seven years (722-29) and furnishes an idea of the varied and severe trials to which pilgrims were subjected (Itiner. Latina, I, 241-283). After their conquest of the West, the Carolingians endeavored to improve the condition of the Latins settled in the East; in 762 Pepin the Short entered into negotiations with the Caliph of Bagdad. In Rome, on 30 November, 800, the very year in which Leo III invaded Egypt and Charlemagne, ambassadors from Haroun al-Raschid delivered to the King of the Franks the keys of the Holy Sepulchre, the banner of Jerusalem, and some precious relics (Einhard, "Annales", ad an. 800, in "Mon. Germ. Hist. Script.", I, 187; this was an act of homage to France, and not of the Christians of Jerusalem. That churches and monasteries were built at Charlemagne’s expense is attested by a sort of a census of the monasteries of Jerusalem dated 808 ("Commemoratio de Casia Dei" in "Itiner. Hieros.", I, 209). In 870, at the time of the pilgrim- ages, the monks (Itiner. Hierosol., I, 314), these institutions were still very important, and it has been abundantly proved that alms were sent regularly from the West to the Holy Land. In the tenth century, just when the political and social order of Europe was most troubled, knights, bishops, and abbots, actuated by devotion and a taste for adventure, were wont to visit Jerusalem and pray at the Holy Sepulchre without being molested by the Mohammedans. Suddenly, in 1009, Hakem, the Fatimite Caliph of Egypt, was heard to utter threats against the Holy Sepulchre and all the Christian establishments in Jerusalem. For years thereafter Christians were cruelly persecuted. (See the recital of an eyewitness, Ishjâ of Antioch, in Schlumberger’s “Epo­ pée byzantine”, II, 442.) In 1027 the Frankish protectorate was overthrown and the papal Legate of the Byzantine emperors, to whose diplomacy was due the reconstruction of the Holy Sepulchre. The Christian quarter was even surrounded by a wall, and some Amalfi merchants, vassals of the Greek emperors, built hospices in Jerusalem for pilgrims, e.g. the Hospital of St. John, cradle of the Order of Hospitaliers.

Instead of diminishing, the enthusiasm of Western Christians for the pilgrimage to Jerusalem seemed rather to increase during the eleventh century. Not only princes, bishops, and knights, but even men and women of the humbler classes undertook the holy journey (Rudolphus Glaber, IV, vii). Whole armies of pilgrims traversed Christian Europe, and those of the Danube hospices were established where they could replenish their provisions. In 1026 Richard, Abbot of Saint-Vannes, led 700 pilgrims into Palestine at the expense of Richard II, Duke of Normandy. In 1065 over 12,000 Germans who had crossed Europe under the command of Günter, Bishop of Bamberg, while on their way through Palestine had to seek shelter in a ruined fortress, where they defended themselves against a troop of Bedouins (Lambert of Hersfeld, in "Mon. Germ. Hist. Script.", V, 168). Thus it is evident that at the close of the eleventh century the road to Palestine was far more open than ever before. Christians who looked upon the Holy Sepulchre as the most venerable of relics and were ready to brave any peril in order to visit it. The memory of Charlemagne’s protectorate still lived, and a trace of it is to be found in the medieval legend of this emperor’s journey to Palestine (Gaston Paris in "Romania", 1850, p. 23). The rise of the Seljuk Turks, however, compromised the safety of pilgrims and even threatened the independence of the Byzantine Empire and of all Christendom. In 1070 Jerusalem was taken, and in 1081 Diogenes, the Greek emperor, was deposed and made a captive at Antioch, and all of Asia became the prey of the Turks. Anti­ och succumbed in 1084, and by 1092 not one of the great metropolitan sees of Asia remained in the possession of the Christians. Although separated from the communion of Rome since the schism of Michael Cerularius (1054), the Bishop of Constantinople implored the assistance of the popes; in 1073 letters were exchanged on the subject between Michael VII and Gregory VII. The pope seriously contemplated leading a force of 50,000 men to the East in order to re-establish Christian unity, repulse the Turks, and repossess the Holy Sepulchre. But the idea of the crusade constituted only a part of this magnificent plan. (The letters of Gregory VII are in P. L., CXLIXI, 300, 325, 339, 386; cf. Riant’s critical discussion in Archives de l’Orient Latin, I, 58.) The conflict over the Investitures in 1076 compelled the pope to abandon his projects; the Exon Romanus, the plan of Alexius Comnenus were unfavourable to a religious union with Rome; finally war broke out between the Byzantine Empire and the Normans of the Two Sicilies. It was Pope Urban II who took up the plans of Gregory VII and gave them more definite shape. A letter from Alexius Comnenus to the Abbot of St. Paul at Regensburg, recorded by the chronicler Guibert de Nogent ("Historiens Occidentaux des Croisades", ed
by the Académie des Inscriptions, IV, 131) and Hugues de Fleury (in "Mon. Germ. Hist. Script.", IX, 392), seems to imply that the crusade was instigated by the Byzantine emperor, but this has been questioned. Peter the Hermit, a recluse of Picardy, who, after a pilgrimage to Rome and a vision in the church of the Holy Sepulchre, went to Urban II and was commissioned by him to preach the crusade. However, though eyewitnesses of the crusade mention his preaching, they do not ascribe to him the all-important role assigned him later by various chroniclers, e.g. Albert of Aix and especially the valley of Tyrius, Hagenmeyer, Peter der Ermeits Leipziger, 1879.)

The idea of the crusade is chiefly attributed to Pope Urban II (1095), and the motives that actuated him are clearly set forth by his contemporaries: "On beholding the enormous injury that all, clergy or people, brought upon the Christian Faith... at the news that the Turkish power was about to cross the Bosphorus and land on the continent, and being told by the Christians by the Turks, moved with compassion and impelled by the love of God, he crossed the mountains and descended into Gaul" (Foucher de Chartres, I, in "Histoire des Croisés", III, 321).

Of course it is possible that in order to swell his forces, Urban II promised the crusaders that those who died in the Holy Land should be raised to heaven, or that the crusading chiefs hesitatingly assumed the same obligation; Raymond of St-Gilles, however, remained obdurate.

Transported into Asia Minor, the crusaders laid siege to the city of Nicaea, but Alexius negotiated with the Turks, having delivered to him, and prohibited the crusaders from entering it (1 June, 1097). After their victory over the Turks at the battle of Dorylaeum on 1 July, 1097, the Christians entered upon the high plateaux of Asia Minor. Constantly harassed by a relentless enemy, overcome by the excessive heat, and sinking under the weight of their leather armour covered with iron scales, their sufferings were wellnigh intolerable.

In September, 1097, Tancred and Baldwin, brothers of Godfrey of Bouillon, left the bulk of the army and entered Armenian territory. At Tarsus a feud almost broke out between them, but fortunately they became reconciled. Tancred took possession of the town, and Baldwin, summoned by the Armenians, crossed the Euphrates in October, 1097, and, after marrying an Armenian princess, was proclaimed Lord of Edessa. Meanwhile the crusaders, revictualled by the Armenians of the Taurus region, made their way into Syria, and on 20 October, 1097, reached the fortified city of Antioch, which was protected by a wall flanked with 450 towers, stocked by the Ameer Jaga-Sian with immense quantities of provisions. Thanks to the assistance of carpenters and engineers who belonged to a Genoese fleet that had arrived at the mouth of the Orontes, the crusaders were enabled to construct battering-machines and to begin the siege of the city. Eventually Bohemond negotiated with a Turkish chief who surrendered one of the towers, and on the night of 2 June, 1098, the crusaders took Antioch by storm. The very next day they were in turn besieged within the city by the army of Kerboga, Ameer of Mosul. Plague and famine cruelly decimated their ranks, and many of them, among others Stephen of Blis, escaped by giving way of night. The army was on the verge of giving way to discouragement when its spirits were suddenly revived by the discovery of the Holy Lance, restored to the dream of a priest named Pierre Barthelemy. On 28 June, 1098, Kerboga's army was effectually repulsed, but, instead of marching on Jerusalem without delay, the chiefs spent several months in a quarrel due to the rivalry of Raymond of Saint-Gilles and Bohemond.
CORONATION OF BALDWIN I, KING OF JERUSALEM, BY ENRICO DANDOLO, DOGE OF VENICE

VASSILACCHI (L’ALIENSE). DOGE’S PALACE, VENICE
both of whom claimed the right to Antioch. It was not until April, 1099, that the march towards Jerusalem was begun. Bohemond remained in possession of Antioch while Raymond seized Tripoli. On 7 July, 1098, the siege of Jerusalem began. Their predicament would have been serious, indeed, had not another Genoese fleet arrived at Jaffa and, as at Antioch, furnished the engineers necessary for a siege. After a general procession which the crusaders made barefooted around the city walls amid the insults and inscriptions of Mohammedan soreresses, the attack began 14 July, 1099. Next day the Christians entered Jerusalem from all sides and slew its inhabitants regardless of age or sex. Having accomplished their pilgrimage to the Holy Sepulchre, the knights chose as lord of the new conquest Godfrey of Bouillon, who called himself "Defender of the Holy Sepulchre." They had then to repulse an Egyptian army, which was defeated at Ascalon, 12 August, 1099. Their position was nevertheless very insecure. Alexius Comnenus threatened the principality of Antioch, and in 1100 Bohemond himself was made prisoner by the Turks, while most of the cities on the coast were still under threat. On the 20th of July, 1099, Urban II more proclaimed the crusade. In 1101 three expeditions crossed Europe under the leadership of Count Stephen of Blois, Duke William IX of Aquitaine, and Welf IV, Duke of Bavaria. All three managed to reach Asia Minor, but were repulsed by the Turks. To strengthen his position Bohemond attacked the Byzantine Empire, but was surrounded by the imperial army and forced to acknowledge himself the vassal of Alexius. On Bohemond's death, however, in 1111, Tancred refused to live up to the treaty and retained Antioch. Godfrey of Bouillon died at Jerusalem 18 July, 1100. His brother and successor, Baldwin of Edessa, was crowned King of Jerusalem in the Basilica of Bethlehem, 25 December, 1100. In 1112, with the aid of Norwegians under Sigurd Jorsalafari and the support of Genoese, Pisan, and Venetian fleets, Baldwin I began the conquest of the ports of Syria, which was completed in 1124 by the capture of Tyre. Ascalon alone kept an Egyptian garrison until 1123.

At this period the Christian states formed an extensive and unbroken territory between the Euphrates and the Egyptian frontier, and included four almost independent principalities: the Kingdom of Jerusalem, the Principality of Antioch, the Principality of Galilee, and the Countship of Rhoes (Edessa). These small states were, so to speak, the common property of all Christendom and, as such, were subordinate to the authority of the pope. Moreover, the French knights and Italian merchants established in the newly conquered cities soon gained the upper hand. The authority of the sovereigns of these different principalities was restricted by the fief-holders, vassals, and under-vassals who constituted the Court of Lieges, or Supreme Court. This assembly had entire control in legislative matters; no statute or law could be established in any Christian states except by order of his fief without its decision; its jurisdiction extended over all, even the king, and it controlled also the succession to the throne. A "Court of the Burgesses" had similar jurisdiction over the citizens. Each fief had a like tribunal composed of knights and citizens, and in the ports there were police and mercantile courts (see ASSIZES OF JERUSALEM). The authority of the Church also helped to limit the power of the king; the four metropolitan sees of Tyre, Cmasarea, Bessan, and Petra were subject to the Patriarch of Jerusalem, similarly seven suffragan sees and a great many parishes, including those of Mount Zion, Mount of Olives, the Temple, Joseph, and the Holy Sepulchre. Through rich and frequent donations the clergy became the largest property-holders in the kingdom; they also received from the crusaders important estates situated in Europe. In spite of the aforesaid restrictions, in the twelfth century the King of Jerusalem had a large income. The customs duties established in the ports and administered by natives, the tolls exacted from the merchants, and the monopoly of certain industries were a fruitful source of revenue. From a military point of view all vassals owed the king unlimited service as to time, though he was obliged to compensate them, but to fill the ranks of the army it was necessary to enroll natives who received a life annuity ("fie de soude"). By this way the forces included in the crusades were formed; men-at-arms and armed men, armed in Saracenic style. Altogether these forces barely exceeded 20,000 men, and yet the powerful vassals who commanded them were almost independent of the king. So it was that the great need of regular troops for the defence of the Christian dominions brought about the creation of a unique institution, the religious orders of knighthood, viz.: the Hospitallers, who at first did duty in the Hospital of St. John founded by the aforesaid merchants of Amalfi, and were then organized into a militia by Gérard du Puy that they might fight the Saracens for a fee; the commandery of Hugues de Payens and received the Rule of St. Bernard. These members, whether knights drawn from the nobility, bailiffs, clerks, or chaplains, pronounced the three monastic vows, but it was chiefly to the war against the Saracens that they pledged their services. Being religious and possessing temporal privileges, they easily gained recruits from among the younger sons of feudal houses and acquired both in Palestine and in Europe considerable property. Their castles, built at the principal strategic points, Margat, Le Crec, and Tortosa, were strongholds protected by several concentric enclosures. In the Kingdom of Jerusalem these military orders virtually formed two independent commonwealths. Finally, in the cities, the public power was divided between the native citizens and the Italian colonists, Genoese, Venetians, Pisans, and also the Marseillais who, in exchange for their services, were given supreme power in certain districts wherein small self-governing communities had their consuls, their churches, and on the outskirts their farm-land, used for the cultivation of cotton and sugar-cane. The Syrian ports were regularly visited by Italian fleets which obtained there the spices and silks brought by the merchant ships. The first half of the twelfth century the Christian states of the East were completely organized, and even eclipsed in wealth and prosperity most of the Western states.

III. First Destruction of the Christian States (1144-87).—Many dangers, unfortunately, threatened this prosperity. On the south were the Caliphate of Egypt, on the east the Seljuk Ameers of Damascus, Hamah and Aleppo, and on the north the Byzantine emperors, eager to realize the project of Alexius Comnenus and bring the Latin states under their power. Moreover, in the presence of so many enemies the Moslem invasion and devastation could be repelled only by the help they received from the West was too scattered and intermittent. Nevertheless these Western knights, isolated amid Mohammedans and forced, because of the torrid climate, to lead a life far different from that to which they had been accustomed at home, displayed admirable bravery and energy in their efforts to save the Christian colonies. In 1137 John Comnenus, Emperor of Constantinople, appeared before Antioch with an army, and compelled Prince Raymond to do him homage. On the death of this potentate (1143), Raymond endeavoured to shake off the influence yoke and sought the help of the emperor, but was hemmed in by the imperial army and compelled (1144) to humble himself at Constantinople before the Emperor Manuel. The Principality of Edessa, completely isolated from the other Christian states, could
not withstand the attacks of Imad-ed-Din, the prince, or atabeg, of Moeul, who forced its garrison to capitulate 25 December, 1144. After the assassination of Imad-ed-Din, his son Nour-ed-Din continued hostilities against Egypt. At Vézelay, 31 March, 1149, the Abbot of Cluny became the apologist of the crusade and conceived the idea of writing all Egypt was to be attacked by the infidels simultaneously in Syria, in Spain, and beyond the Elbe. At first he met with strong opposition in Germany. Eventually Emperor Conrad III acceded to his wish and adopted the standard of the cross at the Diet of Speyer, 25 December, 1146. However, there was no such enthusiasm displayed elsewhere in Italy. Just as the crusaders started on their march, King Roger of Sicily attacked the Byzantine Empire, but his expedition merely checked the progress of Nour-ed-Din’s invasion. The sufferings endured by the crusaders while crossing Asia Minor prevented them from advancing on Edessa. They contented themselves with burning it, which it was ready to do in the end of a few weeks (July, 1148). This defeat caused great dissatisfaction in the West; moreover, the conflicts between the Greeks and the crusaders only confirmed the general opinion that the Byzantine Empire was the chief obstacle to the success of the Crusades. Nevertheless, Michael Ceremus encouraged to strengthen the bonds that united the Byzantine Empire to the Italian principalities. In 1151 he married Mary of Antioch, and in 1157 gave the hand of one of his nieces to Amalric, King of Jerusalem. This alliance resulted in thwarting the progress of Nour-ed-Din, who, losing all hopes of success, laid siege to Edessa, and was taken; its garrison was saved by the intervention of John Fili, a Frankish knight, who took the cross in 1154, learned the art of arms and of the crusades. King Amalric profited from this respite to interpose in the affairs of Egypt, as the only remaining representatives of the Fatimite dynasty were children, and two rival viziers were disputing the supreme power amid conditions of absolute anarchy. One of these disputants, Shawer, being exiled from Egypt, took refuge with Nour-ed-Din, who sent his best general, Shirkh, to reinstat him. After his conquest of Cairo, Shirkh endeavoured to bring Shawer into disfavour by caliph; Amalric was taking advantage of this, allied himself with Shawer. In 1164 and 1167, he forced Shirkh to evacuate Egypt; a body of Frankish knights was stationed at one of the gates of Cairo, and Egypt paid a tribute of 100,000 dinars to the Kingdom of Jerusalem. In 1168 Amalric made his second attempt to conquer Egypt, but failed. After ordering the assassination of Shawer, Shirkh had himself proclaimed Grand Vizier. At his death on 3 March, 1169, he was succeeded by his nephew, Salah-ed-Din (Saladin). During that year Amalric, aided by a Byzantine fleet, invaded Egypt, but was defeated at Damietta. Saladin retained full sway in Egypt and appointed no successor to the last Fatimite caliph, who died in 1171. Moreover, Nour-ed-Din died in 1174, and, while his sons and nephews disputed the inheritance, Saladin took possession ofDamascus and conquered all Mesopotamia except Mosul. Thus, when Amalric died in 1173, leaving no royal power to Baldwin IV, “the Leprous”, a child of thirteen, the kingdom of Jerusalem was threatened on all sides. At the same time two factions, led respectively by Guy de Lusignan, brother-in-law of the king, and Raymond, Count of Tripoli, contended for the supremacy. Baldwin IV died in 1186, and was succeeded by his nephew Baldwin V. Despite the resistance of Saladin was already under way, it was fortunately conducted without order or discipline. Notwithstanding the truce concluded with Saladin, Renaud de Châtillon, a powerful feudatory and lord of the trans-Jordanic region, which included the sea of Montferrat, the great castle of Krak, and Alleran, became so powerful that he managed to divert the enemy’s attention by attacking the holy cities of the Mohammedans. Oarless vessels were brought to Acre on the backs of camels in 1182, and a fleet of five galleys traversed the Red Sea for a whole year, ravaging the coast as far as Aden; a number of knights even attempted to sail to India, to reach the end this fleet was destroyed by Saladin’s, and, to the great joy of the Mohammedans, the Frankish prisoners were put to death at Mecca. Attacked in his castle at Karak, Renaud twice repulsed Saladin’s forces (1184-86). A truce was then signed, but Renaud broke it again and carried off a caravan in which was the sultan’s own sister. In his repugnance Saladin invaded the Kingdom of Jerusalem and, although Guy de Lusignan gathered all his forces to repel the attack, on 4 July, 1187, Saladin’s army annihilated that of the Christians on the shores of Lake Tiberias. The king, the grand master of the Temple, Renaud, and many nobles and men in the realm were made prisoners. After slaying Renaud with his own hand, Saladin marched on Jerusalem. The city capitulated 17 September, and Tyre, Antioch, and Tripoli were the only places in Syria that remained to the Christians.

THE IMPERIAL CRUSADE AND THE CRUSADE AGAINST SAINT-JEAN D’ACRE.

The news of these events caused great consternation in Christendom, and Pope Gregory VIII strove to put a stop to all dissensions among the Christian princes. On 21 January, 1189, Philip Augustus, King of France, and Henry II, Count of Anjou, were at Gisors and took the cross. On 27 March, at the Diet of Mainz, Frederick Barbarossa and a great number of German knights made a vow to defend the Christian cause in Palestine. In Italy, Pisa made peace with Genoa, Venice with the King of Hungary, and William of Sicily with the Byzantine Empire. Moreover, a Scandinavian fleet consisting of 12,000 warriors sailed around the shores of Europe; when passing Portugal, it helped to capture Alvor from the Mohammedans. Enthusiasm for the crusade was again cultivated at a high pitch: but, on the other hand, diplomatic relations and commerce came increasingly important in its organization. Frederick Barbarossa entered into negotiations with Isaac Angelus, Emperor of Constantinople, with the Sultan of Iconium, and even with Saladin himself. It was, moreover, the first time that all the Mohammedan forces were united under a single leader: Saladin, while the holy war was being preached, organized against the Christians something like a counter-crusade. Frederick Barbarossa, who was first ready for the enterprise, to whom chroniclers attribute an army of 100,000 men, led Ratisbon, 11 May, 1189, but he took the Balkan passes by assault and tried to flank the hostile movements of Isaac Angelus by attacking Constantinople. Finally, after the sack of Adrianople, Isaac Angelus surrendered, and between 21 and 30 March, 1189, the Germans succeeded in crossing the Strait of Gallipoli. As usual, the march across Asia Minor was most arduous. With a view to replenishing provisions, the army took Iconium by assault. On their arrival in the Taurus region, Frederick Barbarossa tried to cross the Sebek (Kalykadnos) on horseback and was drowned. Thereupon many German princes returned to Europe, the others, under the emperor’s son, the Hereditary Count of Swabia, Frederick, crossed the sea of Marmora and proceeded thence to Saint-Jean d’Acre. It was before this city that finally all the crusading troops assembled. In June, 1189, King Guy de Lusignan, who had been released from captivity, appeared there.
with the remnant of the Christian army, and, in September of the same year, the Scythian fleet arrived, followed by the English and Flemish fleets commanded respectively by the Archbishop of Canterbury and Jacques d'Avesnes. This heroic siege lasted two years. In the spring of each year reinforcements arrived from the West, and a veritable Christian city sprang up outside the walls of Acre. But the winters were long and the crusaders were decimated by disease brought on by the inclemency of the rainy season and lack of food. Saladin came to the assistance of the city, and communicated with it by means of carrier pigeons. Missile-hurling machines (pierrées), worked by powerful machinery, were used to drive off the enemy. He was often wounded, but the Moors also had strong artillery. This famous siege had already lasted two years when Philip Augustus, King of France, and Richard Cœur de Lion, King of England, arrived on the scene. After long deliberation they had left Véselay together, 4 July, 1190. Richard embarked at Marseille, Philip at Genoa, and they met at Messina. During a sojourn in this place, lasting until March, 1191, they almost quarrelled, but finally concluded a treaty of peace. While Philip was landing at Acre, Richard was shipwrecked off the coast of Cyprus, then independent under the Lusignans. With the aid of Guy de Lusignan, Richard reconquered the island, and joined the Kings of France and England before Acre brought about the capitulation of the city, 13 July, 1191. Soon, however, the quarrel of the French and English kings broke out again, and Philip Augustus left Palestine, 29 July. Richard was now leader of the crusade, and, to punish Saladin for the nonfulfillment of the treaty conditions within the time specified, had the Mohammedans hostages put to death. Next, an attack on Jerusalem was mediated, but, after beguiling the Christians by negotiations, Saladin brought numerous troops from Egypt. The enterprise failed, and Richard concentrated himself for these reasons on brilliant but useless exploits which made his name legendary among the Mohammedans. Before his departure he sold the Island of Cyprus, first to the Templars, who were unable to settle there, and then to Guy de Lusignan, who reconquered the Kingdom of Jerusalem in, avowedly, the name of God. After it was pre-empted between his pitted loyal and Boniface of Montferrat to turn the crusade towards Constantine, and a passage in the "Gesta Innocentii" (83, in P. L., CCXIV, CXXXII) indicates that the idea was not new to Boniface of Montferrat when, in the spring of 1202, he made it known to the pope. Meanwhile the crusaders assembled at Venice, under the amount called for by their contract, so, by way of exchange, the Venetians suggested that they help recover the city of Zara in Dalmatia. The knights accepted the proposal, and, after a few days' siege, the city capitulated, November, 1202. But it was in vain that Innocent III urged the leaders to act out the plan of the Hospitallers, their rule being approved by Innocent III in 1199.

V. THE CRUSADES AGAINST CONSTANTINOPLE (1204). —In the many attempts made to establish the Christian states the efforts of the crusaders had been directed solely toward the object for which the Holy War had been instituted; the crusade against Constantinople shows the first deviation from the original course. For the crusaders were not taking the direction of the crusade out of the pope's hands, this new movement was, of course, a triumph, but for Christendom it was a source of perplexity. Seemingly had Innocent III been elected pope, in January, 1198, when he inaugurated a policy in the East and took the cross. He subordinated all else to the recapture of Jerusalem and the reconquest of the Holy Land. In his first Encyclical he summoned all Christians to join the crusade and even negotiated with Alexius III, the Byzantine emperor, trying to persuade him to re-enter the Roman communion and use his troops for the liberation of Palestine. Peter of Capua, the papal legate, brought about a truce between Philip Augustus and Richard Cœur de Lion, January, 1199, and popular preachers, among others the parish priest Fouques of Neufly, attracted large crowds. During a tournament at Eyry-sur-Arve 23 November, 1199, five day before the winter solstice, and a great number of knights took the cross; in southern Germany, Martin, Abbot of Pairs, near Colmar, won many to the crusade. It would seem, however, that, from the outset, the pope lost control of this enterprise. Without even consulting Innocent III, the French knights, who had elected Thibaud de Champagne as their leader, decided to attack the Mohammedans in Egypt and in March, 1201, concluded with the Republic of Venice a contract for the transportation of troops on the Mediterranean. On the death of Thibaud the crusaders chose as his successor Boniface, Marquis of Montferrat, and cousin of Philip of Swabia, then in open conflict with the pope. Just at this time the son of Isaac Angelus, the deposed Emperor of Constantinople, sought refuge in the West and asked Innocent III and his own brother-in-law, Philip of Swabia, to reinstate him on the imperial throne. The question has been raised elsewhere whether it was pre-conceived between Boniface and Boniface of Montferrat to turn the crusade towards Constantinople, and a passage in the "Gesta Innocentii" (83, in P. L., CCXIV, CXXXII) indicates that the idea was not new to Boniface of Montferrat when, in the spring of 1202, he made it known to the pope. Meanwhile the crusaders assembled at Venice, under the amount called for by their contract, so, by way of exchange, the Venetians suggested that they help recover the city of Zara in Dalmatia. The knights accepted the proposal, and, after a few days' siege, the city capitulated, November, 1202. But it was in vain that Innocent III urged the leaders to act out the plan of the Hospitallers, their rule being approved by Innocent III in 1199.

V. THE CRUSADES AGAINST CONSTANTINOPLE (1204). —In the many attempts made to establish the Christian states the efforts of the crusaders had been directed solely toward the object for which the Holy War had been instituted; the crusade against Constantinople shows the first deviation from the original course. For the crusaders were not taking the direction of the crusade out of the pope's hands, this new movement was, of course, a triumph, but for Christendom it was a source of perplexity. Seemingly had Innocent III been elected pope, in January, 1198, when he inaugurated a policy in the East and took the cross. He subordinated all else to the recapture of Jerusalem and the reconquest of the Holy Land. In his first Encyclical he summoned all Christians to join the crusade and even negotiated with Alexius III, the Byzantine emperor, trying to persuade him to re-enter the Roman communion and use his troops for the liberation of Palestine. Peter of Capua, the papal legate, brought about a truce between Philip Augustus and Richard Cœur de Lion, January, 1199, and popular preachers, among others the parish priest Fouques of Neufly, attracted large crowds. During a tournament at Eyry-sur-Arve 23 November, 1199, five day before the winter solstice, and a great number of knights took the cross; in southern Germany, Martin, Abbot of Pairs, near Colmar, won many to the crusade. It would seem, however, that, from the outset, the pope lost control of this enterprise. Without even consulting Innocent III, the French knights, who had elected Thibaud de Champagne as their leader, decided to attack the Mohammedans in Egypt and in March, 1201, concluded with the Republic of Venice a contract for the transportation of troops on the Mediterranean. On the death of Thibaud the crusaders chose as his successor Boniface, Marquis of Montferrat, and cousin of Philip of Swabia, then in open conflict with the pope. Just at this time the son of Isaac Angelus, the deposed Emperor of Constantinople, sought refuge in the West and asked Innocent III and his own brother-in-law, Philip of Swabia, to reinstate him on the imperial throne. The question has been raised elsewhere whether it was pre-conceived between Boniface and Boniface of Montferrat to turn the crusade towards Constantinople, and a passage in the "Gesta Innocentii" (83, in P. L., CCXIV, CXXXII) indicates that the idea was not new to Boniface of Montferrat when, in the spring of 1202, he made it known to the pope. Meanwhile the crusaders assembled at Venice, under the amount called for by their contract, so, by way of exchange, the Venetians suggested that they help recover the city of Zara in Dalmatia. The knights accepted the proposal, and, after a few days' siege, the city capitulated, November, 1202. But it was in vain that Innocent III urged the leaders to act out the plan of the Hospitallers, their rule being approved by Innocent III in 1199.
of tedious waiting, those of their number cantoned at Galata lost patience with the Greeks, who not only refused them hospitality, but also treated them with open hostility. On 5 February, 1204, Alexius IV and Isaac Angelus were deposed by a revolution, and Alexius Mursuphila, a usurper, under-took the defence of Constantinople against the Latin crusaders who were preparing to besiege Constantino- ple. By a treaty concluded between, 1204, between the Venetians and the crusading chiefs, it was pre-arranged to share the spoils of the Greek Empire. On 12 April, 1204, Constantinople was carried by storm, and the next day the ruthless plundering of its churches and palaces began. The mausoleums of the emperors, piled up as a ground, the Hippodrome, were utterly destroyed. Clerics and knights, in their eagerness to acquire famous and priceless relics, took part in the sack of the churches. The Venetians received half the booty; the portion of each crusader was determined according to his rank of baron, knight, or bailiff, and most of the churches of the West were enriched with ornaments stripped from those of Constantinople. On 9 May, 1204, an electoral college, formed of prominent crusaders and Venetians, assembled to elect an emperor. Dandolo, Doge of Venice, refused the honour, and Boniface of Montferrat was not considered. In the end, Baldwin, Count of Flanders, was elected and enthroned in the church of St. Sophia. Constantinople and the empire were divided among the emperor, the Venetians, and the chief crusaders; the Marquis of Montferrat received Thessalonica and Macedonia, with the title of king; Henry of Flanders became Lord of Adrianopolis; Louis of Blois was made Duke of Nicea, and fiefs were bestowed upon six hundred knights. Meanwhile, the Venetians reserved to themselves the ports of Thrace, the Peloponnesus, and the islands. Thomas Morosini, a Venetian priest, was elected patriarch.

At the news of these most extraordinary events, in which he had no hand, Innocent III bowed down his head in submission to the designs of Providence and, in the interests of Christendom, determined to make the best of the new conquest. His chief aim was to suppress the Greek schism and to place the forces of the new Latin Empire at the service of the crusade. Unfortunately, the Latin Empire of Constantinople was in too precarious a condition to furnish any material support to the papal policy. The emperor was unable to impose his authority upon the barons. At Nicea, not far from Constantinople, the former Byzantine Government gathered the remnant of its authority and its forces, and the Lascaris were proclaimed emperors. In Europe, Joaninna, Tsar of the Wallachians and Bulgarians, invaded Thrace and destroyed the army of the crusaders before Adrianople, 14 April, 1205. During the battle the Emperor Baldwin fell. His brother and successor, Henry of Flanders, devoted his reign (1206–1211) to the impossible conflicts with the Bulgarians, the Lombards of Thessalonica, and the Greeks of Asia Minor. Nevertheless, he succeeded in strengthening the Latin conquest, forming an alliance with the Bulgarians, and establishing his authority even over the feudatories of Morea (Parliament of Ravennika, 1209); however, far from leading a crusade into Palestine, he had to solicit Western help, and was obliged to sign treaties with Theodore Lascaris and even with the Sultan of Iconium. The Greeks were not reconciled to the Church of Rome; most of their bishops abandoned their sees and took refuge at Nicea, leaving the churches to the Latins, who replaced them Greek churches were replaced by Cistercian monasteries, commanderies of Templars and Hospitallers, and chapters of canons. With a few exceptions, however, the native population remained hostile and looked upon the Latin conquerors as foreigners. Having failed in all his attempts to induce the barons of the Latin Empire to undertake an expedition against Palestine, and understanding at last the cause of the failure of the crusade in 1204, Innocent III resolved (1207) to organize a new crusade and to take no further notice of Con- stantinople. Circumstances, however, were unfa- vourable. Instead of concentrating the forces of Christendom against the Mohammedans, the pope himself disbanded them by proclaiming (1209) a crusade against the Albigeens in the Albigensian Crusade against the Almohades of Spain (1213), the pagans of Prussia, and John Lackland of England. At the same time there occurred outbursts of mystical emotion similar to those which had preceded the first crusade. In 1212 a young shepherd of Vendôme and a youth of Cologne gathered the fanatical and deluded, and they proposed to lead to the conquest of Palestine. The movement spread through France and Italy. This “Children’s Crusade” at length reached Brindisi, where merchants sold a number of the children as slaves to the Moors, while nearly all the rest died of hunger and exhaustion. In 1213 Innocent III had a crusade preached throughout Europe and sent Cardinal Pelagius to the East to effect, if possible, the return of the Greeks to the fold of Roman unity. On 25 July, 1215, Frederick II, after his victory over Ottò of Brunswick, took the cross at the tomb of Charle- magne at Aachen. On 11 November, 1215, Innocent III solemnized the crusade with an exalta- tory homily to all the faithful to join the crusade, the departure being set for 1217. At the time of his death (1216) Pope Innocent felt that a great movement had been started.

VI. THE THIRTEENTH-CENTURY CRUSADES (1217–52).—In Europe, however, the preaching of the crusade met with great opposition. Temporal princes were strongly averse to losing jurisdiction over their subjects who took part in the crusade. Absorbed in political schemes, they were unwilling to send so far away the military forces on which they depended. As early as December, 1216, Frederick II was unable to a first delay in the fulfilment of his vow. The crusade as preached in the thirteenth century was no longer the great enthusiastic movement of 1095, but rather a series of irregular and desultory enterprises. Andrew II, King of Hungary, and Casimir, Duke of Poland, in their wars with the Turks, sold their crusades to Venice; and while an army of Scandinavians made a tour of Europe. The crusaders landed at Saint-Jean d’Acre in 1217, but confined themselves to incursions on Mussulman territory, whereupon Andrew of Hungary returned to Europe. Receiving reinforcements in the spring of 1218, John of Brienne, King of Jerusalem, proclaimed a new crusade and attack on the Holy Land by way of Egypt. The crusaders accordingly landed at Damietta in May, 1218, and, after a siege marked by many deeds of heroism, took the city by storm, 5 November, 1219. Instead of profiting by this victory, they spent over a year in idle quarrels, and it was not until May, 1221, that they set out for Cairo. Surrounded by the Saracens at Mansurah, 24 July, the Christian army was routed. John of Brienne was compelled to purchase a retreat by the surrender of Damietta to the Saracens. Meanwhile Emperor Frederick II, who was to be the leader of the crusade, had remained in Europe and continued to importune the pope for new postponements of his departure. On 9 November, 1225, he married Isabelle of Brienne, heiress to the Kingdom of Jerusalem, the ceremony taking place at Brindisi. Completely ignoring his father-in-law, he assumed the title of King of Jerusalem. In 1227, he returned to Palestine, Greece, and Italy; IX, elected pope 19 March, 1227, summoned Frederick to fulfill his vow. Finally, 8 September, the emperor embarked but soon turned back; therefore, on 29 September, the pope excommunicated him. Nevertheless, Frederick set sail again 18 June, 1238, but instead of leading a crusade he played a game of diplomacy. He won over Mald-
el-Khamil, the Sultan of Egypt, who was at war with the Prince of Damascus, and concluded a treaty with him at Jaffa, February, 1229, according to the terms of which Jerusalem, Bethlehem, and Nazareth were restored to the Christians. On 18 March, 1229, without any religious ceremony, Frederick assumed the royal crown of Jerusalem in the church of the Holy Sepulchre, armed with his sword and regal arms, and solemnly crowned his head conforme to Gregory IX, August, 1230. The pontiff ratified the Treaty of Jaffa, and Frederick sent knights into Syria to take possession of the cities and compel all feudalies to do him homage. A struggle occurred between Richard Filangieri, the emperor's marshal, and the conquerors of Palestine, and the latter's leader was Jean d'Belin, Lord of Beirut. Filangieri vainly attempted to obtain possession of the Island of Cyprus, and, when Conrad, son of Frederick II and Isabelle of Brienne, came of age in 1243, the High Court, described above, named as regent Alix of Champagne, Queen of Cyprus. In this way German power was abolished in Palestine.

In the meantime Count Thibaud IV of Champagne had been leading a fruitless crusade in Syria (1239). Similarly the Duke of Burgundy and Richard of Cornwall, brother of the King of England, who had under- taken the Crusade to Acre and Ecossois—after a treaty with Egypt (1241). Europe was now threatened with a most grievous disaster. After conquering Russia, the Mongols under Jenghiz Khan appeared in 1241 on the frontiers of Poland, routed the army of the Duke of Silesia at Liegnitz, annihilated that of Breslau, King of Hungary, and reached the Adriatic. Palestine felt the consequences of this invasion. The Mongols had destroyed the Mussulman Empire of Kharizm in Central Asia. Fleeing before their conquerors, 10,000 Khazars offered their services to the Sultan of Egypt, meanwhile seizing Jerusalem as they passed by, in September, 1244. The news of this catastrophe came like a thunderbolt upon the crusaders. The Emperor Frederick II was at Lyon (June-July, 1245) Pope Innocent IV proclaimed a crusade, but the lack of harmony between him and the Emperor Frederick II foreclosed the pontiff to disappointment. Save for Louis IX, King of France, who took the cross in December, 1244, no one showed any willingness to lead an expedition to Palestine. On being informed that the Mongols were well-disposed towards Christianity, Innocent IV sent them Giovanni di Pianocarini, a Franciscan, and Nicolas Ascelin, a Dominican, as ambassadors. Pianocarini was in Karakorum 5 April, 1246, the day of the enter of the Khan, but except to offer his assistance, made no attempt at an alliance with the Mongols against the Mohammedans. However, when St. Louis, who left Paris 12 June, 1248, had reached the Island of Cyprus, he received there a friendly embassy from the great Khan, and, in return, sent him two Dominicans. Encouraged, perhaps, by this assurance, the King of France decided to attack Egypt. On 7 June, 1249, he took Damietta, but it was only six months later that he marched on Cairo. On 19 December, his advance-guard, commanded by his brother, Robert of Artois, began imprudently to fight in the streets of Mansurah and were destroyed. The king himself was cut off from communication with Damietta and made prisoner 5 April, 1250. At the same time, the Aqubite dynasty founded by Saladin was overthrown by the Mamduke militia, whose ameer took possession of Egypt. St. Louis negotiated with the latter and was set at liberty on condition of surrendering Damietta and the coup de grace to the Crusade. The king, at the news of the death of his mother, Blanche of Castile, who had been acting as regent, he returned to France. Since the crusade against Saint-Jean d'Acre, a new Frankish state, the Kingdom of Cyprus, had been formed in the Mediterranean opposite Syria and became a valuable point of support for the crusades. By lavish distribution of lands and franchises, Guy de Lusignan succeeded in attracting to the island colonists, knights, and their vassals, and the feudal system which had been introduced was continued, and a government modelled after that of the Kingdom of Jerusalem. The king's power was restricted by that of the High Court, composed of all the knights, vassals, or under-vassals, with its seat at Nicosia. However, the feuds were less extensive than in Palestine, and the feudal system could exist only in a direct line. The Island of Cyprus was soon populated with French colonists who succeeded in winning over the Greeks, upon whom they even imposed their language. Churches built in the French style and fortified castles appeared on all sides. The Cathedral of St. Sophia in Nicosia, erected between 1217 and 1251, was almost a copy of a church in Champagne. Finally, commercial activity became a pronounced characteristic of the cities of Cyprus, and Famagusta developed into one of the busiest of Mediterranean ports.

The Western arms were now divided, the West, and ruled by internal disorders, the Christian colonies owed their temporary salvation to the changes in Mussulman policy and the intervention of the Mongols. The Venetians drove the Genoese from Saint-Jean d'Acre and treated the city as conquered territory; in a battle where Christians fought against Christians, and in which Hospitallers were pitted against Templars, 20,000 men perished. In revenge the Genoese allied themselves with Michael Palaeologus, Emperor of Nicaea, whose general, Alexius Staretzopoulos, had no sooner in entering Constantinople and overthrowing the Latin Emperor, Baldwin of Flanders (1261), restored the throne to the Greek Byzantines. The Crusaders were defeated by Michael at Bagdad by the Mongols (1258) and their invasion of Syria, where they seized Aleppo and Damascus, terrifed both Christians and Mohammedans; but the Mameluks of Egypt, a great power, defeated the Mongols and wrested Syria from them in September, 1260. Proclaimed sultan in consequence of a conspiracy, in 1260, Biafas began a merciless war on the remaining Christian states. In 1263 he destroyed the church at Nazareth; in 1265 took Cessarea and Jaffa, and finally captured Antioch (May, 1268). The question of a crusade was always being agitated in the Western States, and it came of a sudden to that mind, like St. Louis, there was no longer any earnestness in the matter among European princes. They looked upon a crusade as a political instrument, to be used only when it served their own interests. To prevent the preaching of a crusade against Constantinople, Michael Palaeologus promised to work for the union of the Churches; but Charles of Anjou, brother of St. Louis, whom the conquest of the Two Sicilies had rendered one of the most powerful princes of Christendom, undertook to carry out for his own benefit the Eastern designs hitherto cherished by the Franks. And when the Emperor of the West, Louis of Bavaria, the successor of Amalyr II, bequeathed him the rights he claimed to have to the crown of Jerusalem, he signed the treaty of Viterbo with Baldwin II (27 May, 1267), which assured him eventually the inheritance of Constantinople. In no wise troubled by these diplomatic combinations, St. Louis thought of a crusade. While the parliament held at Paris, 24 March, 1267, he and his three sons took the cross, but, despite his example, many knights resisted the exhortations of the preachers. At the Council of Tournai, 1267, he was present, but instead of encouraging his
brother's ambition the saint endeavoured to thwart it. Charles had tried to take advantage of the vacancy of the Holy See between 1268 and 1271 in order to secure by negotiation the pope with Michael Paleologus for religious union having heretofore prevented him. St. Louis received the embassy of the Greek emperor very graciously and ordered Charles of Anjou to join him at Tunis. The crusaders, among whom was Prince Edward of England, were back in Africa on 17 January 1277, but 17 January 1277, and broke out in their camp, and on 25 August, St. Louis himself was carried off by the scurrile. Charles of Anjou then concluded a treaty with the Mohammedans, and the crusaders reimbarked. Prince Edward alone, determined to fulfil his vow, and set out for Saint-Jean d'Acre; however, after a few mysterious Saracen territory, he concluded a truce with Gibars.

The field was now clear for Charles of Anjou, but the election of Gregory X, who was favourable to the crusade, again frustrated his plans. While the emissaries of the King of the Two Sicilies traversed the Balkan peninsula, the new pope was awaiting the union of the Western and Eastern Churches, which event was solemnly proclaimed at the Council of Lyons, 6 July, 1274; Michael Paleologus himself promised to take the cross. On 1 May, 1275, Gregory X effected a truce between this sovereign and Charles of Anjou, on the terms of France, the King of England, and the King of Aragon made a vow to go to the Holy Land. Unfortunately the death of Gregory X brought these plans to nought, and Charles of Anjou resumed his scheming. In 1277 he sent into Syria Roger of San Severino, who succeeded in planting his banner on the castle of Acre and in 1278 took possession of the principality of Achaia in the name of his daughter-in-law Isabelle de Villehardouin. Michael Paleologus had not been able to effect the union of the Greek clergy with Rome, and in 1281 Pope Martin IV excommunicated him. Having signed an alliance with Venice, Charles of Anjou prepared to attack Constantinople, and his expedition was set for April, 1283. On 30 March, 1282, however, the revolt known as the Sicilian Vespers occurred, and once more his projects were defeated. In order to subdue his own rebellious subjects and to wage war against the King of Aragon, Charles cast compulsion to proselitism on the East. Meanwhile Michael Paleologus remained master of Constantinople, and the Holy Land was left defenceless. In 1280 the Mongols attempted once more to invade Syria, but were repulsed by the Egyptians at the battle of Hima; in 1286 the inhabitants of Acre deserted the Ayyubids and called to their aid Henry II, King of Cyprus. Kaeloum, the successor of Bibars, now broke the truce which he had concluded with the Christians, and seized Margat, the stronghold of the Hospitallers. Tripoli surrendered in 1289, and on 5 April, 1291, Malek-Ashraf, son and successor of Kaeloum, appeared before Saint-Jean d'Acre with 120,000 men. The 25,000 Christians who defended the city were not even under one supreme commander; nevertheless they resisted with heroic valour, filled breaches in the wall with stakes and bags of cotton and wool, and communicated by sea with King Henry II, who brought them help from Cyprus. However, 28 May, the Mohammedans made a general attack and penetrated into the town, and its defenders fled in their ships. The strongest opposition was offered by the Templars, the garrison of whose fortress held out ten days longer, only to be completely annihilated. In July, 1291, the last Christian towns in Syria capitulated, and the Kingdom of Jerusalem ceased to exist.

VIII. THE FOURTEENTH CENTURY CRUSADE AND THE OTTOMAN INVASION.—The loss of Saint-Jean d'Acre did not lead the princes of Europe to organize a new crusade. Men's minds were indeed, as usual, directed towards the East, but in the first years of the fourteenth century the idea of a crusade inspired principally the works of theorists who saw in it a means of propaganda. The treatise by Pierre Dubois, law-officer of the crown at Coutances, "De Recuperatione Terrae Sanctae" (Langlois, ed., Paris, 1881), seems like the work of a dreamer, yet some of its views are truly modern. The establishment of peace between Christian princes by means of the marriage of the daughters of magnates, or by a prince hereditary emperor, the secularization of the Principality of St. Peter, the consolidation of the Orders of the Hospitallers and Templars, the creation of a disciplined army the different corps of which were to have a special uniform, the creation of schools for the study of Oriental languages, and the terrifying stories of Christian maidens with Saracen is the principal it propounded (1307). On the other hand the writings of men of greater activity and wider experience suggested more practical methods for effecting the conquest of the East. Persuaded that Christian defeat in the Orient was largely due to the mercantile relations which the Italian cities Venice and Genoa continued to hold with the Mohammedans, these authors sought the establishment of a commercial blockade which, within a few years, would prove the ruin of Egypt and cause it to fall under Christian control. For this purpose the commissaries of the crusades were the least fitted, since the ambassadors of Christian princes and made to do police duty on the Mediterranean so as to prevent smuggling. These were the projects set forth in the memoirs of Fidentius of Padua, a Franciscan (about 1291, Bibliothèque Nationale, Latin MSS., 7247); in those of King Charles II of Naples (1293, 72, National, Frankish MSS., 6049); Jacques de Molay (1307, Baluze, ed., Vitae paparum Avienio., II, 176-185); Philip II, King of Cyprus (M. Latier, ed., Histoire de Chypre, II, 118); Guillaume d'Adam, Archbishop of Sultanieh (1310, Kohler, ed., Collect. Hist. of the Crusades, Armenian Documents, II); and Marino Sanudo, the Venetian (Bougan, ed., Secreta fideliem Crucis, II). The consolidation of the military orders was also urged by Charles II. Many other memoirs, especially that of Hayton, King of Armenia (1307, ed. Armenian Documents, I), considered an alliance between the Christians and the Turks of Persia as the only chance of defending Christendom. From the end of the thirteenth century many missionaries had penetrated into the Mongolian Empire; in Persia, as well as in China, their propaganda flourished. St. Francis of Asisi and Raymond Lully had hoped to substitute for the warlike crusade a peaceful Christian convocation of Mohammedans to convert the Turk, and Raymond Lully, born at Palma, on the island of Majorca, in 1235, began (1275) his "Great Art", which, by means of a universal method for the study of Oriental languages, would equip missionaries to enter into controversies with the Mohammedan doctors. In the same year he prevailed upon the King of Majorca to found the College of the Fraternity at Miramar, where the Friars Minor could learn the Oriental languages. He himself translated catechetical treatises into Arabic and, after spending his life travelling in Europe trying to win over to his ideas popes and kings, suffered martyrdom at Bougie, where he had begun his work of evangelization (1314). Among the Mohammedans this propaganda encountered insurmountable difficulties, whereas the Mongols, some of whom were still members of the Nestorian Church, received it willingly. During the pontificate of John XXII (1316-34) permanent Dominican and Franciscan missions were established in Persia, China, Tatarsy, and Turkistan, and in 1318 the Archepiscopate of Sultanieh was created in Persia. In China Giovanni de Monte Corvino, created Archbishop of Cambaluc (Peking), organized the religious hierarchy, founded monasteries, and converted to Christianity

CRUSADES

men of note, possibly the great khan himself. The account of the journey of Blessed Orderic de Porletrones (Cordier, ed.) across Asia, between 1304 and 1330, shows us that Christianity had gained a foothold in the maritime leagues of the oriental Asia. By thus leading up to an alliance between Mongols and Christians against the Mohammedans, the crusade had produced the desired effect; early in the fourteenth century the future development of Christianity in the East seemed assured. Unfortunately, however, by the mid-forties, when Armenia was suffering from the weakening of the political influence of the popes, the indifference of temporal princes to what did not directly affect their territorial interests rendered unavailing all efforts towards the re-establishment of Christian power in the East. The popes endeavoured to secure the blockade of Egypt by prohibiting commercial intercourse with the Muslims and by organizing a squadron for the prevention of smuggling, but the Venetians and Genoese defiantly sent their vessels to Alexandria and sold slaves and military stores to the Mamelukes. Moreover, the consolidation of the military orders could not be effected. By causing the suppression of the Templars, the Council of Aquitaine (1311), King Philip the Fair dealt a cruel blow to the crusade; instead of giving to the Hospitallers the immense wealth of the Templars, he confiscated it. The Teutonic Order having established itself in Prussia in 1228, there remained in the East only the Hospital, the Templars, and the Hospitallers. Henry II, King of Cyprus, had offered them shelter at Limassol, but there they found themselves in very straitened circumstances. In 1310 they seized the Island of Rhodes, which had become a den of pirates, and took it as their permanent abode. Finally, the contemplated alliance with the Mongols was never fully realized. It was in vain that Argoun, Khan of Persia, sent the Nestorian monk, Raban Sauma, as ambassador to the pope and the princes of the West (1258–88); his offers elicited but vague replies. On 23 December, 1299, Casan, successor to Argoun, inflicted a defeat upon the Christians at Hims, and captured Damascus, but he could not hold his conquests, and died in 1304 just as he was preparing for a new expedition. The princes of the West assumed the cross in order to appropriate to their own use the tithes which, for the defrayal of crusade expenses, they had exacted upon the property of the clergy. In theory the sovereigns of the crusade had no longer an ecclesiastical or a fiscal interest. In 1336 King Philip VI of France, whom the pope had appointed leader of the crusade, collected a fleet at Marseilles and was preparing to go to the East when the news of the projects of Edward III caused him to return to Paris. War then broke out between France and England, and proved an insurmountable obstacle to the success of any crusade just when the combined forces of all Christendom would have been none too powerful to resist the new storm gathering in the East. From the close of the thirteenth century a band of Ottoman Turks, driven out of Asia Minor by Mongols, had invaded a military state in Asia Minor and now threatened to invade Europe. They captured Ephesus in 1308, and in 1326 Othman, their sultan, established his residence at Brousse (Prusa) in Bithynia; under Othman, moreover, they organized the regular foot-guards of janizaries against whom the undisciplined troops of Western knights could not hold out. The Turks entered Nicomedea in 1328 and Nicea in 1330; when they threatened the Emperors of Constantinople, the latter renewed negotiations with the popes with a view towards the reconciliation of the Greek and Roman Churches, for which purpose Bartholomew was sent as papal legate to Avignon, in 1339. At the same time the Egyptian Mamelukes destroyed the port of La- jazzo, commercial centre of the Kingdom of Armenia Minor, where the remnants of the Christian colonies had sought refuge after the taking of Saint-Jean d’Acre (1337). The commercial welfare of the Venetians themselves was threatened; with their support Pope Clement VI in 1344 succeeded in reorganizing the maritime leagues of the eastern Asia. The crusade was defeated by the war between France and England. Genoa, the Hospitallers, and the King of Cyprus all sent their contingents, and, on 28 October, 1344, the crusaders seized Smyrna, which was ceded to the care of the Hospitallers. In 1345 reinforcements came under the leadership of John I offy, who was at the Archipelago, but the new leader of the crusade was utterly disqualified for the work assigned him; unable to withstand the piracy of the Turkish amees, the Christians concluded a truce with them in 1348. In 1356 the Ottomans captured Gallipoli and intercepted the route to Constantinople.

The cause of the crusade then found an unexpected defender in Peter I, King of Cyprus, who, called upon by the Armenians, succeeded in surprising and storming the city of Adalia on the Cilician coast in 1351. Urged by his chancellors, Philippe de Mézières, and Pierre Thomas, the papal legate, Peter I undertook the passage to the West (1362–65) in the name of making the enthusiasm of the Christian princes. Pope Urban V extended him a magnificent welcome, as did also John the Good, King of France, who took the cross at Avignon, 20 March, 1363; the latter's example was followed by King Edward III, the Black Prince, Emperor Charles of France, and Count Jean de Villiers. Everywhere King Peter was tendered fair promises, but when, in June, 1365, he embarked at Venice he was accompanied by hardly any but his own forces. After rallying the fleet of the Hospitallers, he appeared unexpectedly before the Old Port of Alexandria, landed without resistance, and plundered the city for two days, but at the approach of an Egyptian army his soldiers forced him to retreat, 9–16 October, 1365. Again in 1367 he pillaged the ports of Syria, Tripoli, Tortosa, Laodicea, and Jaffa, thus destroying the commerce of Egypt. Later, in another voyage to the West, he made a supreme effort to interest the princes in the crusade, but on his return to Cyprus he was assassinated, as the result of a conspiracy. Meanwhile the Ottomans continued their progress in Europe, taking Philippopolis in 1363 and, in 1365, capturing Adrianople, which became the capital of the state. At the end of the reign of Basileios, and of Amadeus VII, Count of Savoy, the cross and on 15 August, 1366, his fleet seized Gallipoli; then, after rescuing the Greek emperor, John V, held captive by the Bulgarians, he returned to the West. In spite of the heroism displayed during these expeditions, the efforts made by the crusaders were too intermittent to be productive of enduring results. Philippe de Mézières, a friend and admirer of Pierre de Lausignan, eager to seek a remedy for the ills of Christendom, dreamed of founding a new militia, the Order of the Passion, an organisation whose character was to be at once clerical and military, and whose members, although married, lived in military houses and consecrate themselves to the conquest of the Holy Land. Being well received by Charles V, Philippe de Mézières established himself at Paris and propagated his ideas among the French nobility. In 1390 Louis II, Duke of Bourbon, took the cross, and at the instigation of the Genoese went to besiege el-Mahadis, an African city on the coast of Tunis. In 1392 Charles VI, who had signed a treaty of peace with England, appeared to have been won over to the crusade project just before he became deranged. But the time for expeditions to the Holy Land was now past, and henceforth Christian Europe was forced to defend itself against Ottoman invasions. In 1389 John V, Paleologus, went to Rome and abjured the schism; thereafter the popes worked valiantly for the preservation of the remnant of the Byzantine Empire
and the Christian states in the Balkans. Having become master of Servia at the battle of Kosovo in 1389, the Sultan Bajazet imprisoned the sovereigns of John V and, in July, 1396, was joined at Buda by English and German knights. The crusaders invaded Servia, but despite their prodigies of valour Bajazet routed them completely at the Battle of Nicopolis, 25 September, 1396. The Count of Nevers and a great many lords became Bajazet's prisoners and were relieved only on the payment of enormous ransoms. Notwithstanding this defeat, due to the misguided ardour of the crusaders, a new expedition left Aiguesmortes in June, 1399, under the command of the Marshal Boucicaut and succeeded in breaking the blockade which the Turks had established around Constantinople. Moreover, between 1400 and 1402, John Paleologus made another voyage to the West in quest of reinforcements.

IX. THE CRUSADE IN THE FIFTEENTH CENTURY.—

An unlooked-for event, the invasion by Timur and the Mongols, saved Constantinople for the time being. The Persians, under Timur and his chief, Alguacir, were defeated at Ankara, 2 May, 1402, and, dividing the Ottoman Empire among several princes, reduced it to a state of vassalage. The Western rulers, Henry III, King of Castile, and Charles VI, King of France, sent ambassadors to Timur (see the account by Ruy Gonzales de Clavijo, Madrid, 1779), but the vastness of Bajazet's empire, the defeat of his armies, and his death, in July, 1396, were a fatal blow to his power. The national revolt of the Chinese which overthrew the Mongol dynasty in 1368 had resulted in the destruction of the Christian missions in Farther Asia; in Central Asia the Mongols had been converted to Mohammedanism, and Timur showed his hostility to the Christians by taking Smyrna from the Hospitallers. Marshal Boucicaut took advantage of the defection into which the Mongol invasion had thrown the Mohammedan powers to sack the ports of Syria, Tripoli, Beirut, and Sidon in 1403, but he was unable to conquer his conquests; while Timur, on the other hand, thought only of obtaining possession of China and returned to Samarkan, where he died in 1405. The civil war that broke out among the Ottoman princes gave the Byzantine emperor a few years' respite, but Murad II, having re-established the Turkish power, in August, 1421, had no difficulty in capturing the city in 1422, and John VIII, Paleologus, was compelled to pay him tribute. In 1430 Murad took Thessalonica from the Venetians, forced the wall of the Hexamilion, which had been erected by Manuel to protect the Peloponnese, and subdued Servia. The idea of the crusade was always popular in the West, and, on his death-bed, Henry V of England regretted that he had not taken Jerusalem. In her letters to Bedford, the regent, and to the Duke of Burgundy, Joan of Arc alluded to the union of Christendom against the Saracens, and the popular belief expressed in the poetry of Christine de Pisan was that, after having delivered France, the Maid of Orleans would lead Charles VII to the Holy Land. But this was only a dream, and the civil wars in France, the crusade against the Hussites, and the Council of Constance, prevented any action from being taken against the Turks. However, in 1421 Philip the Good, Duke of Burgundy, sent a relievo of ten thousand men to Hungary, and in 1432, Bertrand de la Broquière, to the East as secret emissaries to gather information that might be of value for future a crusade. At the same time negotiations for the religious union which would facilitate the crusade were resumed between the Byzantine emperors and the popes. Emperor John VIII came in person to attend the council convoked by Pope Eugene IV at Ferrara, in 1438. Thanks to the good will of Bessarion and of Iosifre of Kiev, the two Greek prelates, the pope had elected to the patriarchate, the council, which was consecrated at Florence, established harmony on all points, and on 6 July, 1439, the reconciliation was solemnly proclaimed. The union was received in bad part by the Greeks and did not induce the Western princes to take the cross. Adventurers of all nationalities enrolled themselves under the command of Cardinal Giuliano Cesarini and went to Hungary to join the armies of János Hunyad, Waywode of Transylvania, who had just repulsed the Turks at Hermanstadt, of Wladislaus Jagello, King of Poland, and of George Brzozowski, Prince of Servia. Having defeated the Turks at Nisch, 3 November, 1442, the former seemed able to conquer Servia, owing to the defection of the Albanians under George Castriota (Scanderbeg), their national commander. Murad signed a ten years' truce and abdicated the throne, 15 July, 1444, but Giuliano Cesarini, the papal legate, did not favour peace and wished to push forward to Constantinople. At his instigation the crusaders broke the truce and invaded Bulgaria, whereupon Murad again took command, crossed the Bosphorus on Genoese galleys, and destroyed the Christian army at Varna, 10 November, 1444. This defeat accomplished that which had been achieved by the Turks in conquering Morea, and when, two years later, János Hunyad tried to go to the assistance of Constantinople he was beaten at Kosovo. Scanderbeg alone managed to maintain his independence in Epirus and, in 1449, repelled a Turkish invasion. Mohammed II, who succeeded Murad in 1451, was preparing to besiege Constantinople when, 12 December, 1452, Emperor Constantine XII decided to proclaim the union of the Churches in the presence of the papal legates. The expected crusade, however, did not take place; and when, in March, 1453, the armed forces of Mohammed II, numbering 100,000, completely surrounded Constantinople, the Greeks had only 5000 soldiers and 2000 Western knights, commanded by Giustiniani of Genoa. Notwithstanding this serious disadvantage, the city held out against the enemy for two months, but on the night of 28 May, 1453, Mohammed II, who succeeded Murad in 1451, was preparing to besiege Constantinople when, after a desperate conflict, in which Emperor Constantine XII perished, the Turks entered the city from all sides and perpetrated a frightful slaughter. Mohammed II rode over heaps of corpses to the church of St. Sophia, entered it on horseback, and turned it into a mosque.

The capture of "New Rome" was the most appalling calamity sustained by Christendom since the taking of Saint-Jean d'Acre. However, the agitation which was caused in Europe was more apparent than genuine. Philip the Good, Duke of Burgundy, gave an allegorical entertainment at Lille in which Holy Church solicited the help of knights who pronounced the most extravagant vows before God and a pious lady (sur le farson). Æneas Sylvius, Bishop of Siena, and St. John Capistran, the Franciscan, preached the crusade in Germany and Hungary; the Diets of Ratisbon and Frankfort promised assistance, and a league was formed between Venice, Florence, and the Duke of Milan, but nothing came of it. Pope Callistus III succeeded in collecting a fleet of sixteen galleys, which, under the command of the Patriarch of Aquileia, guarded the Archipelago. However, the defeat of the Turks before Belgrade in 1457, due to the breach of the bridge and to the bloody conquest of the Peloponnese in 1460, finally revived Christendom from its torpor. Æneas Sylvius, now pope under the name of Pius II, multiplied his exhortations, declaring that he himself would conduct the crusade, and towards the close of 1469 bands of crusaders began to assemble at Ancona.
The Doge of Venice had yielded to the pope's entreaties, whereas the Duke of Burgundy was satisfied with sending 2000 men. But when, in June, 1494, the pope looked upon that host as inadequate to the expedition, he fell sick and died, whereupon most of the crusaders, being unarmed, destitute of ammunition, and threatened with starvation, returned to their own countries. The Venetians were the only ones who invaded the Peloponnesus and sacked Athens, but they looked from that, and acted in no further manner. Indeed threatened by the Turks, and which had supreme control of the Mediterranean, realized that it would be to its advantage to maintain a certain interest in the crusade. Until the end of the sixteenth century, when a diet of the German princes was held at Ratisbon, the question of war against the Turks was frequently raised, and Luther himself, modifying his first opinion, exhorted the German nobility to defend Christendom (1528-29). The war in Hungary always partook of the character of a crusade and, on different occasions, the French nobles enlisted under the imperial banner. Anur the Duke of Mercœur was authorized by Henry IV to enter the Hungarian service. In 1644 Louis XIV, eager to extend his influence in Europe, sent the emperor a contingent which, under the command of the Count of Coligny, repulsed the Turks in the battle of St. Gothard. But such demonstrations were of no importance because, from the time of Francis I, the kings of France, to maintain the balance of power in Europe against the House of Austria, had not hesitated to enter into treaties of alliance with the Turks. When, in 1683, Kara Mustapha advanced on Vienna with 30,000 Turks or Tartars, Louis XIV made no move against him, unless we count the blockade of Belgrade, that the emperor owed his safety. This was the supreme effort made by the Turks in the West. Overwhelmed by the victories of Prince Eugene at the close of the seventeenth century, they became henceforth a passive power.

On the Mediterranean, Genoa and Venice beheld their commercial monopoly destroyed in the sixteenth century by the discovery of new continents and of new water-routes to the Indies, while their political power was absorbed by the House of Austria. Without allowing the crusaders to deter them from their continental enterprises, the Hapsburgs dreamed of gaining control of the Mediterranean by checking the Barbary pirates and arresting the progress of the Turks. When, in 1571, the Island of Cyprus was threatened by the Ottomans, who cruelly massacred the garrisons of Famagusta and Nicosia, these towns having surrendered on stipulated terms, Pope Pius V issued a crusade in force, and met success. The Venetians invaded, sacked and burned against Sultan Selim, and secured the co-operation of Philip II by granting him the right to tithes for the crusade, while he himself equipped some galleys. On 7 October, 1571, a Christian fleet of 200 galleys, carrying 90,000 men under the command of Don Juan of Austria, met the 150 Xebec of the Turks off of Lepanto, destroyed it completely, and liberated thousands of Christians. This expedition was in the nature of a crusade. The pope, considering that the victory had saved Christendom, by way of commemorating it instituted the feast of the Holy Rosary, which is celebrated on the first Sunday of October. But the allies pushed their advantages no further. When in the seventeenth century, France superseded Spain as the great Mediterranean power, she strove, despite the treaties that bound her to the Turks, to defend the last remnants of Christian power in the East. In 1669 Louis XIV sent the Duke of Beaufort with a fleet of 7000 men to the defence of Candia, a Venetian province, but, notwithstanding some brilliant sallies, he succeeded in putting off its capture for a few weeks only. However, the diplomatic action of the kings of France in regard to Eastern Christians who were Turkish subjects was more efficacious. The regime of "Capitulations" was established under Francis I in 1536, renewed under Louis XIV in 1673, and Louis XV in 1740, ensured Catholics religious freedom and the jurisdiction of the French ambassador at Constantinople; all Western pilgrims were allowed access to Jerusalem and to the Holy Sepulchre, which were con-
fided to the care of the Frains Minor. Such was the
modus vivendi finally established between Christendom
and the Mohammedan world.

Notwithstanding these changes it may be said that,
until the seventeenth century, the imagination of
Western Christendom was still haunted by the idea of
the Crusades. Even the least chimerical of statesmen
nowadays have their papal dependencies on the Holy
Land, or have aspirations to it. This was the case in
their time, when the crusading spirit was at its height.

The Crusades were essentially a papal enterprise.
The idea of coining all divisions among Christians,
of uniting them under the same standard and sending
them forth against the Mohammedans, was conceived
in the eleventh century, that is to say, at a time when
there were as yet no organized states in Europe, and
when the pope was the only potentate in a position to
know and understand the common interests of Chris-
tendom. At this time the Turks threatened to invade
Europe, and the Byzantine Empire seemed unable to
withstand the enemies by whom it was surrounded.

Urban II then took advantage of the veneration in
which the holy places were held by the Christians of the
West and entrusted the latter to direct their com-
bined forces against the Mohammedans and, by a bold
attack, check their progress. The result of this effort
was the establishment of the Christian states in Syria.

While the authority of the papacy remained undisputed
in Europe, they were in a position to furnish these
Christian colonies the help they required; but when
this authority was shaken by dissensions between the
priesthood and the secular powers, the crusading army lost
the unity of command so essential to success. The
maritime powers of Italy, whose assistance was indis-
pensable to the Christian armies, thought only of using
the Crusades for political and economic ends. Other
princes, first the Hohenstaufen and afterwards Charles
of Anjou, followed in the footsteps of the crusaders
by open rebellion against the pontifical will.

Finally, when, at the close of the Middle Ages,
all idea of the Christian monarchy had been definitively
east aside, when state policy was the sole influence
that actuated the Powers of Europe, the crusade
seemed a respectable but troublesome nuisance.

The fifteenth century witnessed the Turks to
seize Constantinople, and princes were far less con-
cerned about their departure for the East than about
finding a way out of the fulfilment of their vow as
crusaders without losing the good opinion of the
public. Thereafter all attempts at a crusade partook
of the nature of political schemes. Notwithstanding
their final overthrow, the Crusades hold a very impor-
tant place in the history of the world. Essentially the
idea of crusading to strengthen pontifical authority; they
afforded the popes an opportunity to interfere in the wars
between Christian princes, while the temporal and
spiritual privileges which they conferred upon crusaders
virtually made the latter their subjects. At the same
time they preserved the princes of the Catholic
Church from any conflict with the Church itself.

The crusades were defensive wars and checked the
advance of the Mohammedans who, for two centuries,
concentrated their forces in a struggle against the
Christian settlements in Syria; hence Europe is largely
indebted to the Crusades for the maintenance of its
independence. Besides, the Crusades brought about
results of which the popes had never dreamed, and
which were perhaps the most important of all. They
re-established traffic between the East and West,
transformed trade and communication, and the result of
these events was the birth of new civilizations. Finally,
it is with the Crusades that we must couple the
origin of the geographical explorations made by
Marco Polo and Orderic of Pordenone, the Italians
who brought to Europe the knowledge of continental
Asia and China. At a still later date, it was the spirit
of the true crusader that animated Christopher Co-
lumbus when he undertook his perilous voyage to the
then unknown America, and Vasco da Gama when he
set out in quest of India. If, indeed, the Christian
civilization of Europe has become universal culture,
in the highest sense, the glory redounds, in no small
measure, to the Crusades.

POL, Selahen and the Fall of the Kingdom of Jerusalem (New
Crutched Friars (or Crossed Friars), an order of mendicant friars who went to England in the thirteenth century from Italy, and which was produced, when and where they were called "Fraters Cruciferi" (see below). Their first appearance in England was at a synod of the Diocese of Rochester in 1244, when they presented documents from the pope and asked to be allowed to settle in the country (Matthew Paris). Each friar carried in his hand a wooden staff surmounted by a cross and had also a cross of red cloth upon his habit, from which circumstances originated the name by which they became commonly known. Their rule was that of St. Augustine and their habit, originally brown or black, was later on changed by Pope Pius. They were described as having eight or nine houses in England, the first being either at Chester (according to Dugdale), or at Reigate (according to Reynier), founded in 1245. They settled in London in 1249, where they gave their name to the locality, near Tower Hill, still called "Crutched Friars." Other houses were at Oxford (1249), York, Great Waltham (Suffolk), Leicester (1258), at Otford (Kent), Wotton-under-Edge (Gloucestershire), Brackley (Northants), and Kildare (Yorkshire).

Fraters Cruciferi. — The origin of these friars is somewhat uncertain. They claimed to have been founded in the East, in the first century, by St. Cletus, and to have been at Constantinople on the occasion of the church council of Nicaea in the year 787. This is not known when they came to Italy, but they were certainly there in the twelfth century, for in 1169 Pope Alexander III gave them constitutions and a rule of life similar to that of the Augustinians. Pope Pius II prescribed for them a blue habit and substituted a small silver cross for the larger wooden one they had hitherto been accustomed to carry in their hands. It was from this custom that they obtained their name. The championship were at one time numerous in Italy, numbering two hundred and eight, divided into five provinces: Bologna, Venice, Rome, Milan, and Naples. The priory of S. Maria di Moresi at Bologna was made the chief house of the order by Pope Clement IV, and it was from this that the English Crutched Friars came. In later times corporations were allowed to creep in, and from that and other causes their numbers dwindled down to not more than fifteen houses in 1656, when the order was suppressed by Pope Alexander VII. A similar order of friars, known by the same name and like them claiming to come from the East, also existed in France and the Low Countries, having been introduced or organized in 1211 by Théodore de Celles. Hélyot says their houses were numerous, but the order suffered extinction in the French Revolution. These friars wore a black habit with a plain cross upon it. One house of these friars is known to have been found in Bohemia in the thirteenth century and some are said to have existed in Ireland, but there is practically no reliable information to be obtained about them.

G. CYPRILAN ALSTON.
Crypt (or Lower Church).—The word originally meant a hidden place, natural or artificial, suitable for the concealment of persons or things. When visits to the burial-places without the walls of Rome fell into disuse there ensued a curious change. The Church, no longer able to go out to honour the martyrs, brought the martyrs within the walls, and instead of building churches above the tombs, dug tombs under the churches in which the precious relics were deposited. This was the origin, first of the confesso of a church, and, at a later period, of the crypt, which answered the same purpose in the churches of the early Middle Ages. In this way the Romanesque crypt is the direct descendant of the hypogoeum or excavation of the early Christian catacomb. The term crypt is sometimes used to signify the lower story of a two-storied building, e.g. the lower chapel of the Sainte-Chapelle at Paris, and of the church of San Francesco at Assisi; and in England the overground crypt of St. Ethelreda’s Chapel in London, which is all that remains of the great episcopal palace called Ely Place.

The crypt has a long and venerable history. What was done at Rome set a precedent for Christendom in general. There is an early example of a crypt at Ravenna, at Sant’ Apollinare in Classe (534). At first the crypts were sometimes as deep sunk as the cubicula of the catacombs themselves, e.g. in Saint-Germain, at Auxerre, and in the Chartres cathedral. Or they were but partly above ground, and were lighted by small windows placed in their side walls, e.g. Ernulph’s crypt at Canterbury. Occasionally their floor was but little below the surface of the ground, as in the eastern crypt at Canterbury; or it was on a level with the pavement of the nave, as in San Miniato, Florence. In these latter cases the crypt practically became a second or lower church, e.g. St. Faith’s, under Old St. Paul’s, London. Such a crypt, however, entailed a raised choir; hence it is that one ascends high flights of steps to such choirs as those of San Miniato, Rochester, Canterbury, etc. Almost all the crypts now found in England were built during the Norman period, or very early, in the pointed style. That at Gloucester, Rochester, Worcester, Winchester, St. Peter’s at Oxford, Bayeux, Chartres, Saintes, Bourges, Holy Trinity at Caen, Padua, Florence, Pavia,Palermo, and Modena.

THOMAS H. POOLE.

Oszáli, Diocese of includes the counties of Temes, Torontál, Kassa-Stéropolis, Arad, Oszalód, and a part of Görmén and Békes, Hungary, an area of 13,713 square miles. It is suffragan of Kalocsa, and has a population of 2,060,000 souls, of whom 824,000 are Catholics and 58,000 Uniat Greeks. The diocese has a cathedral chapter, 8 regular and 6 titular canons, 8 titular abbeys, 1 provostship, 2 titular provostships, 6 arabisdeaners, 24 subordinate deaneries, 290 parish churches, 1,099 filial churches, 231 parish priests, 122 chaplains, 28 regular ecclesiastics, 24 clerics, 8 retired ecclesiastics, 8 priests outside of the diocese. The male orders and congregations have 11 houses and 91 members, divided as follows: Piarists (who also conduct 3 gymnasia), 3 houses; Franciscans, 2; Minorites, 4; Brothers of Charity, 1, and priests of the Order of the Divine Saviour, 1. The School Sisters of Notre-Dame, Sisters of Charity of St. Vincent de Paul, and Holy Cross Sisters have 28 convents and 484 members in the diocese. There is a seminary for priests (with a lyceum), a preparatory one for boys, and two training-schools, for male and female teachers. The cathedral built in baroque style, 1739-64, is dedicated to St. George. The residence of the bishop is at Temesvár. Oszalód is one of the oldest sees of Hungary. It was created by King Stephen in 1035 and its first bishop was the Italian Abbot Gerardus, the tutor of Stephen’s son, Emmerich. In the thirteenth century the diocese suffered greatly from the invasion of the Mongols; in the fourteenth century, after the Turkish con-

Cathedral of Oszalód.

quest of Servia, from the immigration of schismatic Serbs called Rascians into Hungary; in the sixteenth century from the rebellion of the peasantry (1514). By order of Dózsa, the leader of the peasants, Bishop Nicholas Cukcy was impaled. After the battle of Mohács (1526) in which Bishop Frans Csholy (1514-26) was killed, almost the entire diocese fell into the hands of Zápolya, the ally of the Turks. When in 1552 Temesvár also was taken by the Turks the diocese was nearly ruined. The see had henceforth merely a nominal existence and the residence of the bishop was transferred in 1574 to Szegedin. It was only after the Treaty of Passarowitz (1718) freed the land from the yoke of the Turks that Bishop Ladislaus Nádasdy (1710-30) re-entered the diocese; the depopulated territory was largely settled anew by German colonists. During the Revolution of 1848 Bishop Joseph Lonovics von Krivina (1834-48) was driven into exile; later the Hungarian minister of worship, Michael Horvath, was appointed bishop but was not consecrated. During the episcopate of Ladislaus Köszeghy (1800-28) the seminary for priests was founded; during that of Alexander Cságyi (1851-60) the School Sisters of Notre-Dame were brought into the diocese, and during the administration of Alexander Bánas (1860-89) the seminary for boys was erected.

JOSEPH LINN.

Ouba, "The Pearl of the Antilles", is the largest and westernmost island of the West Indies. Its extent, geographical position, the great number of its ports, the fertility of its soil, and its climate make it one of the most interesting countries in the New World. It
lies at the entrance to the Gulf of Mexico, between 19° and 23° N. latitude, and 74° and 85° W. longitude. Its western extremity, Cape San Antonio, approaches to within 130 miles of Yucatan, and its easternmost point, Cape Maisí, is within 50 miles of Haiti, the Windward Passage separating the two islands, while the southern end of Florida is less than 100 miles from the northern coast of Cuba. The island thus occupies a strategic position, as apossession of it commands the entrance to the Gulf of Mexico. It has a length of almost 750 miles from east to west, and its width varies from 100 miles, at the eastern end, to 30 miles in the western portion. Its area is about 45,000 square miles, including the Isle of Pines, which lies immediately off the western part. Cuba was formerly a little less in size than the State of Virginia and about the size of England. It is divided politically into six provinces in the following order from west to east: Pinar del Río, Havana, Matanzas, Santa Clara, Puerto Príncipe (Camagüey), and Santiago de Cuba.

**Natural Characteristics.**—The coast line, especially along the southern shore, is dotted with numerous small islands, while both the north and south coasts have many excellent bays and harbours; those of Bahía Honda, Havana, Matanzas and Cárdenas, on the north coast, and Batabanó, Cienfuegos, Santiago de Cuba, and Guantanamo, on the south, being especially fine. In dry years, droughts occur, and the physical geography of Cuba is a range of mountains which, more or less broken, runs through the central portion of the island from one end to the other. From this backbone the rivers run generally north and south, in short courses, to the sea. For the most part, low terraces intervene between the central elevations and the sea. The forests are extensive and almost impenetrable, there are no large wild animals. There are more than two hundred species of birds, many of them of exceedingly beautiful plumage. The varieties of fish are even more abundant. Insects are extremely numerous and of many trouble-some kinds, the most to be feared are ants and mosquitoes; the most beautiful, the large fire-flies or luciérnagas, which emit a mild, steady light. Although the mineral riches of Cuba have not as yet been fully explored, it is known not to be deficient in this respect. The precious metals have been found, but not in sufficient quantities to repay the cost of working. There are deposits of copper, alum, iron, marble, and manganese.

Lying just within the tropical zone, Cuba enjoys a warm climate throughout the year. This is tempered, during the summer months, by the cool north-east trade-winds which blow almost every day in the year from early morning until sunset, and also by the rains which are most frequent during these months. The year is divided between the hot, wet season, and the cold, dry season. From May to October rain and thunder are of almost daily occurrence; from November to April is the dry season, during which period the rainfall is comparatively light. The temperature at Havana during the hottest month, August, averages 82° F. fluctuating between a maximum and a minimum of 88° F. and 72° F. During January, the coldest month, the average temperature is 72° F., the maximum 78° F., and the minimum 58° F. The average for the year is about 77° F. In the interior, and especially in the higher parts of the island, a thermometer occasionally drops to the freezing-point, and thin ice may be seen on the surface of pools. Snow, however, is unknown throughout the island. There are no diseases specially endemic to the island. Yellow fever was formerly very common and virulent, especially in Havana and other seacoast towns, though unknown in the interior. During the American occupation, however, such vigorous and thorough sanitary measures were adopted that Havana, from being a plague spot and a menace to the ports of the United States, became one of the cleanest cities in the world.

**History.**—Cuba was discovered by Columbus during his first voyage, on the 28th of October, 1492. He named the islands Cuba and Haiti, from the Indian word for an island. In 1511, Captain Diego Velázquez, who had accompanied Columbus on his second voyage, was sent to Cuba to subjugate and colonize the island. He landed near Cape Maisí, the eastern extremity, and there was founded Baracoa, the first colony in Cuba. In 1514 Velázquez founded Trinidad and Santiago de Cuba on the south coast, Sancti Spiritus, Remedios, and Puerto Príncipe in the central portion; and, on the site of the present city of Batabanó, towards the western extremity of the south coast, San Cristóbal de la Habana; this last name, however, was given, in 1519, to a settlement existing on the present site of Havana. The name of Havana was raised to a capital city and a bishopric, and was made the capital, as it continued to be until 1522, when both the capital and bishopric were transferred to Santiago de Cuba. Havana became the capital in 1532, and has remained so ever since.

Upon the death of Ferdinand, 23 January, 1516, Velázquez changed the name of the island to Fernandina in honour of that monarch. Later, the name was changed to Santiago in honour of Spain’s patron saint, and still later, to Ato María in honour of the Blessed Virgin. During all these official changes, however, the island continued to be known by its original name of Cuba, given it by the natives, and it has retained that name to the present day. The aborigines (Siboneyes) whom the Spaniards found in Cuba, were a mild, timid, inoffensive people, entirely unable to resist the invaders of their country, or to endure slavery. Hardships imposed, the taxes levied, the nine independent caciques or chiefs, and possessed a simple religion devoid of rites and ceremonies, but with a belief in a supreme being, and the immortality of the soul. They were reduced to slavery by the white settlers, among whom, however, the energetic and persevering Father Bartolomé de Las Casas, "The Aborigen of the Indians," who had earned a high reputation in history by his philanthropic efforts. (See CABA, BARTOLOMÉ DE LAS.) In 1524, the first cargo of negro slaves was landed in Cuba. Then began the iniquitous traffic in African slaves upon which corrupt officials fattened for many years thereafter. The negroes were subjected to great cruelties and hardships, their natural increase was checked, and their numbers had to be recruited by repeated importations. This traffic constantly increased, until at the beginning of the nineteenth century, slaves were being imported at the rate of over 10,000 per year.

In 1538, Havana was reduced to ashes by the French, and was destroyed a second time in 1554. In 1762, the city was taken by the English, but within a year, under the terms of the Treaty of Paris, which ended the Seven Years War, it was returned to Spain in exchange for Florida. From this time the progress of Cuba was rapid. Luis de Las Casas, who was sent to Cuba as captain general, was especially energetic in instituting reforms, and he did much for the prosperity and advancement of the island. During the nineteenth century, however, Cuba was governed by a succession of captains general, some of whom were hon-
CUBA 560

CUBA

ouorable in their administration, while others seemed to regard their office solely as the means of acquiring a fortune. Various oppressive measures instituted by some of these governors, deporting the Spanish Cubans of political and civil liberty, excluding them from public office, and burdening them with taxation, gave rise to the deadly hatred between the Cubans and the Spaniards, which manifested itself from time to time in uprisings for greater privileges and freedom. Of this kind was the conspiracy of Narciso Lópe (1849), and the insurrection of the black population (1844), all of which gave occasion to repressive measures of great cruelty. The rebellion of 1868-78, however, compelled Spain to promise the Cubans representation in the Cortes, with other concessions that were never entirely carried out. She could not keep many of her promises, and the general discontent continued, with the result that in 1895, a new and formidable revolt broke out. The insurgents, under able leaders, were able to keep the field, in spite of the extremely energetic and even cruel measures that were adopted to crush them. They were able to maintain the semblance of a government, and their heroic resistance, as well as the conduct of Spain, aroused great sympathy for them throughout the United States.

From the time that Florida became a part of the United States, this government had taken a deep interest in Cuba, and it is not to be wondered at that in 1894-95 the people of the United States turned to Spain to other hands, especially England or France. In 1848, President Polk had authorized the American minister at Madrid to offer $100,000,000 for the purchase of Cuba, but Spain rejected the offer. The subject had been revived in 1854, following the Ostend Manifesto, but again it came to nothing. During the last uprising of the Cuban people, already mentioned, not only the United States government, but the entire American people were watching the struggle with intense interest, when, on the night of 15 February, 1898, a terrific explosion destroyed the United States battleship Maine in Havana harbour, whether she had gone on a friendly visit by invitation of the Spanish government. Relations between the two governments became strained, and they finally went to war in April of the same year. The war was of only a few months duration, and as a result of it, under the terms of the Treaty of Paris (10 December, 1898), Spain relinquished her right over Cuba, which she had held for 400 years. Beginning 1 January, 1899, the United States occupied the island and appointed a military governor, pending the formation of a native government. This was eventually installed with the inauguration as president of Don Tomás Estrada Palma (21 June, 1899), and the American occupation was not definitely ceased on that day. Cuba now seemed to be entering upon an era of peace and prosperity, but it was to be of short duration. Differences between the Moderate and Liberal parties occasioned by the second presidential election, in 1905, culminated, in July, 1906, in a revolutionary movement started by the Liberal leaders. The Government soon lost control of the situation, so that in September, 1906, the United States was forced to intervene. A provisional government was then established under authority from Washington, with Charles E. Magoon at its head. During 1917, a new census was undertaken, upon which to base new elections for president and members of Congress.

Agriculture.—For two hundred and fifty years after the discovery of the island, cattle raising seems to have been the principal industry, and very little attention was paid to agriculture. In 1892, however, Cuba is essentially an agricultural country. The agricultural products are sugar, tobacco, and fruits. As for coffee, little more is grown than is needed for domestic consumption, although the soil and climate of the eastern portion of the island are adapted to the cultivation of a superior quality of coffee. Oranges, limes, lemons, olives, pineapples, and many other fruits are also grown, as well as all kinds of vegetables, which grow almost the year around. The Cuban orange is noted for its exquisite taste, and its cultivation is an important Cuban industry until Californian and Florida competition impaired its value. Bananas are grown throughout the island, but the best come from the central and eastern portions. The most important of all the products, however, are sugar and tobacco. The former was introduced into Cuba by its first governor, Velázquez, and from a small beginning the industry grew, with improved methods of cultivation and the introduction of improved machinery, until, just before the last insurrection (1895), the annual output amounted to over 1,000,000 tons. The product next in importance, sugar is tobacco. This, unlike the former, is indigenous in Cuba, and was in use by the natives when the Spaniards first visited the island. Cuban tobacco is universally admitted to be the finest in the world, especially that grown in a section of the province of Pinar del Río known as Vuelta Abajo. Many attempts have been made to reproduce the tobacco of this region in other parts of the world, and even in other parts of Cuba, but always without success. The superiority of the Vuelta Abajo product being probably due to peculiar conditions of soil and climate, and especially to the peculiar topography of the country in which it is grown, which explains the fact that it was grown previous to the last census (1899), the production for the island amounted to 62,000,000 lbs. valued at $22,000,000.

Transportation.—Cuba had very few railroads until within recent years, when there has been great activity in building new lines and extending old ones. The completion of the road running through the centre of the island, and connecting Havana with Santiago de Cuba, marks the realization of a long-felt commercial need and the attainment of a political end of great importance.

Population.—The official census of 1899 showed a total population of 1,572,797 divided by provinces as follows:

<table>
<thead>
<tr>
<th>Province</th>
<th>Population</th>
</tr>
</thead>
<tbody>
<tr>
<td>Havana</td>
<td>424,804</td>
</tr>
<tr>
<td>Matanzas</td>
<td>202,444</td>

</tr>
<tr>
<td>Santiago de Cuba</td>
<td>327,715</td>
</tr>
</tbody>
</table>

Of the inhabitants, 1,400,262 are natives, and 172,535 foreign-born. The white population constitutes 68 per cent. of the total, the remaining 32 per cent. being composed of negroes, mixed elements, and Chinese. The native white population are nearly all descendants of the Spaniards. Although since the evacuation of Cuba by the Spaniards there has been entire freedom of worship, the population is almost exclusively Catholic. Spanish is the official language of Cuba, though it is characterized by certain slight local peculiarities of pronunciation.

Religion.—In 1518, Leo X established the Diocese of all Cuba, which included also the Spanish possesions of Louisiana and Florida. The see was established at Baracoa in Santiago de Cuba, and in 1522, by a Bull of Adrian VI, it was transferred to the city of Santiago de Cuba, where it has remained to the present day. Prior to the nineteenth century, there appears to have been no question regarding the titles of property held by the Church in Spain or in Cuba. But in the beginning of that century, the property held by the Church in Spain was confiscated by the State and transferred to the Church in Cuba. In 1837, Captain General Tacón sought to make this Spanish confiscation act applicable to the holdings of the monastic orders in Cuba, and in 1841, Valdés, who was then governor, actually seized these

properties and diverted them to the uses of the State.

Among the main seizures were the conven of the Franciscans, which was used as the Custom House; the conven of the Dominicans, used for a time by the University of Havana; the conven of the Augustinians, used as the Academy of Sciences; the conven of San Isidro, used by the Spaniards as military barracks, and later, by the Americans, as a relief station. In 1828, the property of the American occupation of these and other valuable properties, formerly held by the Catholic Church, had been held by Spain, subject to the results of a long series of negotiations between the Crown of Spain and the Holy See. The Spanish Government also held a large amount of censos, or moral property, in the island which had been given to the Church for religious purposes, but which had been taken over by the State for purposes of administration. The Crown, however, annually paid the Church a large sum for its maintenance. With the American occupation these annual payments ceased, and the American Government continued to use the property for the same governmental purposes to which it had been put by the Spaniards. The Church then claimed the right to take back the property. This gave rise to a long discussion and investigation, until the whole matter was finally referred to the American commission, and the present decision adopted in favour of the claims of the Church, and the matter was adjusted to the satisfaction of all.

The Government of Intervention agreed to pay a rental of 5 per cent. upon the appraised value of the property, which amounted to about $2,000,000, with a five years' option to the Government of Cuba, when organised, to buy the property at the appraised value, receiving credit against the purchase price for 25 per cent. of the rental paid; and the matter of the censos was adjusted by the Government of Intervention taking them at 50 cents on the dollar and permitting the debtors to take them up at the same rate.

The island of Cuba is divided ecclesiastically into one archdiocese and three suffragan dioceses as follows: the Archdiocese of Santiago de Cuba, created as such in 1804, comprising the civil province of the same name and that of Puerto Principe; the Diocese of Havana, established in 1788, comprising the civil provinces of Havana and the province of the Havana Mission; the Diocese of Cienfuegos, established in 1903, which includes the province of Santa Clara; the Diocese of Cienfuegos, established at the same time as the preceding in 1903, and comprising the civil province of the same name and the Isle of Pines. In 1889 the remains of Christopher Columbus were removed to the cathedral of Havana and deposited in the crypt, where they have remained to this day.

The Archbishop of Santiago de Cuba is metropolitan of the island. Francisco Barnaba Aguilera, the first native incumbent of this metropolitan see, was consecrated by Archbishop Chapelle, 2 July, 1898.

Under Spanish rule all the bishops, as well as most of the priests of the island were appointed from Madrid. An Apostolic Delegate for Cuba and Porto Rico now resides at Havana. He is not accredited to the Cuban Government, and Cuba has no official representative at the Vatican. The first delegate was Archbishop Cha-

pelle of New Orleans, who was sent by Leo XIII to look after the interests of the Church in Cuba during the American occupation. There are in the island 199 secular, and 129 regular priests. Of institutions conducted by religious orders, there are 13 colleges for boys conducted by the Jesuits, the Order of the Good Shepherd, 3 hospitals, 1 reform school, 2 hospitals for the aged, and 2 hospitals. The clergy are exempt from military service and jury duty. There are no chapels in the prisons; wills and inheritances are subject only to civil law; cemeteries are owned in some instances by the municipalities, in others, as at Havana, by the Church.

Church property is held in the name of "the Roman Catholic Church." Both civil and religious marriages are legal and binding, and persons may be married either in church or civil form. Divorce is not legally recognised.

Education.—During the early history of Cuba, the clergy seemed to have been the principal if not the only agents of education. By the Bull of Adrian VI (28 April, 1522), the Scholastia was established at Santiago de Cuba for giving instruction in Latin. In 1869, the College of San Ambrosio was founded in Havana under control of the Jesuits, for the purpose of preparing young men for the priesthood. The foundation of another Jesuit college in Havana was the next step that gave a fresh impulse to education; this was opened in 1874 under the name of the College of the Society of Jesus. The old College of San Ambrosio was then united with it, although it still retained its character as a foundation-school for the Church. As early as 1888, the city council of Havana petitioned the royal Government to establish a university in that city, in order that young men desirous of pursuing the higher studies might not be compelled to go to Europe to do so. This was not immediately granted, but finally, by a letter of Innocent XIII (12 September, 1721), the fathers of the Convent of San Juan de Letran were authorized to open the institution desired, and, after some years of preparation, the University of Havana was opened in 1728. The rectors, vice-rectors, counsellors, and secretaries were to be Dominicans. In 1793, under the administration of Don Luis de las Casas, who is always gratefully remembered by the Cubans, was founded La Sociedad Económica de la Habana, which has always been the prime mover in the educational advancement of the island.

Not until the last century was well advanced, was there a free institution in all Cuba where children could be taught to read and write. The first opened was that of the Bethlehemite Fathers in Havana, and that through the generosity of a private citizen. In 1899, at the date of the American occupation, private schools abounded in Cuba, but the benefits of these could be enjoyed only by the children of the rich. The children of the poorer classes who attended the so-called municipal schools, received only a rudimentary education. But soon after the American intervention, the wonderful work of religious orders who had been working for adequate school buildings were provided, the number of teachers was rapidly increased, and measures were adopted to compel children to attend the classes. When the Cuban Government assumed control, it continued the good work along the same lines, so that now all children of Cuba, whatever their position in life, are compelled to attend schools superior to the private ones, at least as to furniture and teaching apparatus. Primary education, according to the Constitution, is gratuitous and compulsory. The expenses are paid by the municipality or, in any case of municipal inability to pay, by the Federal Government. Secondary and higher education are controlled by the State. The children of the public schools receive religious instruction in what are known as doctrinae, of which there is one in every parish, and at the head of it is the parish priest. These doctrinae are like Sunday schools, except that sessions are held on Saturday instead of Sunday. The teachers are all volunteers, and are usually ladies who live in the parish. According to the census of 1899, the proportion of illiteracy was about 60 per cent. But with the extraordinary increase in the number of schools and facilities for teaching, this proportion is (in 1908) rapidly decreasing.

The faculty of Letters comprises five faculties: Letters and Sciences; Medicine and Pharmacy; Law; The faculty of Letters and Sciences consists of the schools of letters and philosophy, of pedagogy, of sciences, of engineering, electricity, of architecture, and of agriculture. The faculty of Medicine and Pharmacy consists of the schools of medicine, of pharmacy, of dental surgery, and of veterinary sur-
CUCURUMACIUM. See CATACOMBS.

Cuca (Conca in Italian) Diocese of, a suffragan of Quito, in the Republic of Ecuador, South America, created 13 June, 1779. The episcopal city, which has 30,000 inhabitants, is situated 7700 feet above the sea, in a broad plain of the province of Azuay, about seven miles southwest of Guayaquil. Peruvian antiquities abound in the vicinity. Cuenca is the second see in importance of the Ecuadorian provinces. It includes the civil divisions of Azuay, of which Cuenca is the capital, and Canar, the capital of which is Azogues. The first missions were centred in the eastern portion of the republic owing to the slow progress of civilization elsewhere. The Jesuits were first in the field followed by the Franciscans, Fathers of Mercy, Dominicans, and some secular priests. In 1590 the Jesuit Rafael Ferrer penetrated to Cofanes, and his associates in the Society of Jesus, Lucas de la Cuerva and Jerónimo de la Maza, later organized the country with so much success for religion and civilization during 130 years, until the Society was expelled in 1767. A mission, under the Salesian Fathers, is now in operation in the Vicariate of Guayaquil, east of Cuenca. To this diocese belonged the Franciscan Vicente Solano (1730-1805), famous as a Catholic controversialist.

The first bishop of the see was José Carrión y Marfil, consecrated in 1786, and he has had nine successors, during whose administrations the faith of the people has been loyally preserved in spite of all difficulties. The organization of the diocese is mainly due to the energetic efforts of Bishop Toral (1861-1883), who also assisted at the Vatican Council. Devotion to the Blessed Sacrament has been so notable a characteristic of the diocese that Cuenca has won the title of the “Eucharistic City”. A special Eucharistic feast known as “The Cuenca Septenary” is kept with great fervour. Owing to the domination of radicalism in national politics the Church is not now able to make very special progress in the republic, and the secular spoliation of ecclesiastical property has given rise to scandalous usurpations of her rights. The effects of continual civil strife have been disastrous to religious progress as they have been debilitating and destructive to commercial and industrial prosperity. The appointment by the Holy See, after a vacancy of seven years, on 1 January, 1907, of Bishop Manuel María Politi has had beneficial results.

STATISTICS.—Parishes, 60; priests, secular 130, secularized 10; religious 10; diocesan sisters 20; religious of women, contemplative 70, active 140, novices 50; 1 college, 120 students; 2 literary academies, 40 pupils; 2 schools, Christian Brothers, 1300 pupils; 55 parish schools (boys), 1500 pupils; 48 (girls), 755 pupils; 2 hospitals; 1 home for aged, 20 inmates; 1 Orphanage; 1 House of Good Shepherd, 14 penitents; 1 asylum, 50 children. Catholic population 200,000.

TOMÁS ALVARADO.

Cuenca (Conca), Diocese of, in Spain, suffragan of Toledo. The episcopal city, (10,756) is also the capital of the civil province of the same name, and the diocese includes, in addition, a portion of the provinces of Guadalajara and Albacete. Cuenca was made a diocese in 1183 by Luis III, but it was not completely conquered from the Moors by Alfonso IX (1177). The first bishop was Juan Yanes. Among its famous prelates were (1577) the great jurist Diego de Covarruvias y Leyva (q. v.), Isidoro de Carvajal y Lancaster (1706), and (1858) Cardinal Miguel Paz, Archbishop of Santiago, one of the most distinguished prelates of the Vatican Council. The cathedral of Cuenca is a magnificent Gothic edifice begun at the end of the twelfth and finished in the thirteenth century. One of its chapels bears the name and was built at the expense of the Albornoz family to which belonged the great cardinal Gil de Albornoz (q. v.). The church of Santa María de Gracia who founded a synagogue, is remarkable for its fine sculptures.

EDUARDO DE HINOJOSA.

Cuernavaca, Diocese of (Cuernavacensis), erected 23 June, 1891, comprises all the State of Morelos in the Republic of Mexico, and is bounded on the north and the west by the Archdiocese of Mexico, on the east by the Archdiocese of Puebla, and on the south by the Bishopric of Chilapa. It has an area of 7184 square kilometers, with a population of 161,697. The Gospel was first preached in the territory of the present diocese by the Franciscans, who first landed on with so much success for religion and civilization during 130 years, until the See was expelled in 1767. A mission, under the Salesian Fathers, is now in operation in the Vicariate of Guayaquil, east of Cuenca. To this diocese belonged the Franciscan Vicente Solano (1730-1805), famous as a Catholic controversialist.

The first bishop of the see was José Carrión y Marfil, consecrated in 1786, and he has had nine successors, during whose administrations the faith of the people has been loyally preserved in spite of all difficulties. The organization of the diocese is mainly due to the energetic efforts of Bishop Toral (1861-1883), who also assisted at the Vatican Council. Devotion to the Blessed Sacrament has been so notable a characteristic of the diocese that Cuenca has won the title of the “Eucharistic City”. A special Eucharistic feast known as “The Cuenca Septenary” is kept with great fervour. Owing to the domination of radicalism in national politics the Church is not now able to make very special progress in the republic, and the secular spoliation of ecclesiastical property has given rise to scandalous usurpations of her rights. The effects of continual civil strife have been disastrous to religious progress as they have been debilitating and destructive to commercial and industrial prosperity. Cuernavaca, Diocese of (Cuernavacensis), erected 23 June, 1891, comprises all the State of Morelos in the Republic of Mexico, and is bounded on the north and the west by the Archdiocese of Mexico, on the east by the Archdiocese of Puebla, and on the south by the Bishopric of Chilapa. It has an area of 7184 square kilometers, with a population of 161,697. The Gospel was first preached in the territory of the present diocese by the Franciscans, who first landed on with so much success for religion and civilization during 130 years, until the See was expelled in 1767. A mission, under the Salesian Fathers, is now in operation in the Vicariate of Guayaquil, east of Cuenca. To this diocese belonged the Franciscan Vicente Solano (1730-1805), famous as a Catholic controversialist.

The first bishop of the see was José Carrión y Marfil, consecrated in 1786, and he has had nine successors, during whose administrations the faith of the people has been loyally preserved in spite of all difficulties. The organization of the diocese is mainly due to the energetic efforts of Bishop Toral (1861-1883), who also assisted at the Vatican Council. Devotion to the Blessed Sacrament has been so notable a characteristic of the diocese that Cuenca has won the title of the “Eucharistic City”. A special Eucharistic feast known as “The Cuenca Septenary” is kept with great fervour. Owing to the domination of radicalism in national politics the Church is not now able to make very special progress in the republic, and the secular spoliation of ecclesiastical property has given rise to scandalous usurpations of her rights. The effects of continual civil strife have been disastrous to religious progress as they have been debilitating and destructive to commercial and industrial prosperity. The appointment by the Holy See, after a vacancy of seven years, on 1 January, 1907, of Bishop Manuel María Politi has had beneficial results.

STATISTICS.—Parishes, 60; priests, secular 130, secularized 10; religious 10; diocesan sisters 20; religious of women, contemplative 70, active 140, novices 50; 1 college, 120 students; 2 literary academies, 40 pupils; 2 schools, Christian Brothers, 1300 pupils; 55 parish schools (boys), 1500 pupils; 48 (girls), 755 pupils; 2 hospitals; 1 home for aged, 20 inmates; 1 Orphanage; 1 House of Good Shepherd, 14 penitents; 1 asylum, 50 children. Catholic population 200,000.

FRANCISCO PLANCIANTE Y NAVARRETE.

Cueva, Juan de la, poet and dramatist, b. of a 
noble family at Seville, Spain, in 1550; d. in 1607.
Little is known of his life save that in his later years 
he visited the West Indies and lived for some time 
in Portugal. It is as a dramatic writer that Cueva 
merits notice. He was a prolific writer for the stage, 
yet but few of his plays have been preserved. They 
were represented in 1570 and the years following, 
and are important because most of them are his- 
torical. He must be given credit also for his dramatic 
initiative, for he ignored Greek and Latin traditions, 
and developed his plots, characters, incidents, and 
situations with little regard for the "unities" of the 
classical model. He was thus one of the first to for-
magnify the classical and the romantic drama. In addition, 
he reduced the number of jornadas, or acts, from five 
to four, and introduced a number of metrical forms 
hitherto unknown upon the stage. Several of the 
plays are on national subjects, such as "La Libertad de 
España por Bernardino del Carpio" and "Los Siete 
Infieltes." Among these dealing with incidents in 
history may be mentioned "La Muerte de Ajax", "
Telamón Sobre las Armas de Aquiles", and "La 
Muerte de Virginia y Apio Claudia." One of them, 
"El Saco de Roma y Muerte de Borbón", deals with 
a great event which was then recent, and describes 
the Italian triumphs of Charles V. Another, "El In-
famador", foreshadows in one of its characters, Leu-
cino, the type of libertine which Tirso de Molina 
continued afterwards immortalized with his Don Juan.

These plays are somewhat crude in structure, and 
notable fault is that the author makes all the 
characters, whether of high or low degree, talk in 
the same lofty vein. Again, he involves his char-
acters in difficulties and situations whence escape 
seems impossible, and then, without regard to 
plausibility, grasps the first solution that presents 
itself, such as a murder or some supernatural inter-
vention. His talent for dramatic works is best shown 
in a collection of lyric poems and sonnets, published 
under the title "Obras de Juan de la Cueva" (Seville, 
1582); "Coro Feobo de Romances historiales", 
a collection of one hundred romances (1587), of which 
A. Duran has reproduced sixty-three in his "Ro-
mancero"; and an epic poem in twenty-four cantos 
"La Conquista de la Bética" (Seville, 1603), descri-
ing the conquest of Seville by the King Saint Jer-

Cujas, Jacques. See Law.

Culdees, a word so frequently met with in histories 
of the medieval Churches of Ireland and Scotland, 
and so variously understood and applied, that a well-
formed writer (Reeves) describes it as the best-
abused word in Scotie church-history. The etymol-
ogy of the term, the persons designated by it, their 
orign, and history, are so various, that they, by 
they lived, the limits of their authority and privileges 
have all been matters of controversy; and on these 
questions much learning and ability has been shown, 
and not a little partizan zeal. In the Irish language 
the word was written Céide, meaning companion, 
or fellow, and in the Latin, Colide, with the Latin 
equivalent in the plural, Colides, anglicized into Culdees; in Scot-
land it was often written Kridi, All admit that, in 
in the beginning at all events the Culdees were separated 
from the mass of the faithful, that their lifetime de 
veded to religion, and that they lived in community. 
But the Scotch writers, unwilling to trace the name 
to an Irish source, prefer to derive it from cultores 
Dei, worshippers of God, or from caed, a shelter, or 
from kud, a church. The Irish derivation, however, 
is the easiest and the most natural, and is also 
generally accepted. From Céide-De the transition is 

easy to Culdeus and Culdees; and in the Irish annals 
the epithet Céide-De is appropriately given to St. 
John, one of the twelve Apostles, to a missionary 
from abroad whose coming to Ireland is recorded in the 
Four Masters at the year 521. St. John is also the 
well-known monk and author of Tallaght, whose 
penances and mortifications, whose humility, piety, 
and religious zeal, would specially mark him out as 
the companion of God.

Taking him as an example of the class to which he 
belonged, probably the highest example which could 
be given, when we remember the character of his life, 
we find that the Culdees were holy men who loved 
solitude and lived by the labour of their hands. 
Gradually they came together in community, still 
occupying separate cells, still much alone and in 
communion with God, but no longer in the church, 
and giving obedience to a common superior. St. 
Maolruan, under whom Aengus lived, 
and who died as early as 792, drew up a rule for the 
Culdees of Tallaght which prescribed the time and 
manner of their prayers, fasts, and devotions, the 
frequency with which they ought to go to confession, 
the penances to be imposed for faults committed. 
But we have no evidence that this rule was widely 
accepted even in the other Culdean establishments. 
Nor could the Culdees at any time be said to have 
attained to the position of a religious order, composed 
of many houses, scattered over many lands. Such a 
rule, by a common rule, revering the memory and imita-
ing the virtues of their founder, and looking to the 
parent house from which they sprang, as the children 
of Columbanus looked to Luxeuil or Bobbio, or the 
Columban monks looked to Iona. After the death of 
Maolruan Tallaght is forgotten, and the name 
Céide-De disappears from the Irish annals until 919, 
when the Four Masters record that Armagh was plun-
dered by the Danes, but that the houses of prayer, 
"with the people of God, that is Céide-De", were 
spared. Subsequent entries in the annals show that 
Culdees were Culdees of Clonmacnoise, Clonclonke, 
and Clonard, at Monasmucha in Tipperary, and at Scattery 
Island.

To those of the eighth century, such as were repre-
sented by Aengus, were soon added secular priests 
who assumed the name of Culdees, lived in 
community, subjected themselves to monastic discipline, but 
were not bound by monastic vows. Such an order of 
priests had, in the middle of the eighth century, been 
founded at Metz. As they lived according to rules 
and canons of councils, they came to be called secular 
canons and were usually attached to collegiate or 
corporate churches. They were not, however, 
quickly extended even to Ireland, and it is significant 
that in the accounts given of the Culde establishments at 
Clones, Devenish, and Scattery Island, Culdees 
and canon are taken as convertible terms. The Danish 
war, which brought ruin on so many proud monastic 
establishments, easily affected the daily life of the 
whole houses with their feeble resisting powers. Some, 
such as Clonclonke and Clonard, disappeared 
altogether, or dragged out a miserable existence which 
differed little from death. At Clonmacnoise, as early 
as the eleventh century, the Culdees were laymen 
and married, while those at Monasmucha and Scattery 
Island, being utterly corrupt and unable, or unwilling 
to reform, gave way to the regular canons, with their
purer morals and stricter discipline. (See Canonns and Canonesses Regular.)

Those at Armagh were more tenacious of existence. Like their brethren throughout Ireland, they had felt the corrupting influence of the Danish wars; and while lay abbots ruled at Armagh the Cudees had so far forgotten their primary mission of religious and spiritual duties. In the twelfth century regular canons were introduced into the cathedral church and henceforth took precedence of the Cudees. But the latter, six in number, a prior and five vicars, still continued a corporate existence at Armagh. They were specially charged with the care of the church and Divine offices, and the estates of the church building, had separate lands, and sometimes had charge of parishes. When a chapter was formed, about 1160, the prior usually filled the office of precentor, his brethren being vicars choral, and himself ranking in the chapter next to the chancellor. He was elected by his brother Cudees and confirmed by the primate, and had a voice in the election of the archbishop by virtue of his position in the chapter. As Ulster was the last of the Irish provinces to be brought effectually under English rule, the Armagh Cudees long outlived their brethren throughout Ireland. By the end of Elizabeth’s reign, however, they had disappeared. The new body was inaugurated by Charles I—the “Prior and Vicars Choral”—of the cathedral church of Armagh—to which were transferred the lands formerly held by the Cudees. Five years later, the Catholyke primate, O’Reilly, announced to Rome that he had been elected “Prior of the College of the Cudees”, and he wanted to know if in assuming the title he had acted in accordance with canon law. We do not know what was the nature of the answer he received, but this is the last mention made of the Irish Cudees.

At York was their only English establishment, where, formed in the tenth century the double duty of officiating in the cathedral church and of relieving the sick and poor. When a new cathedral arose under a Norman archbishop, they ceased their connexion with the cathedral, but, with resources augmented by many donations, they continued to relieve the destitute. The date at which they finally disappeared is unknown. Nor do we know the fate of the single Cudean house in Wales, which existed at Bardsey in the days of Giraldaus Cambrensis. In Scotland they were more numerous even than in Ireland. No less than thirteen monastic establishments were placed in relation to them, eight of which were in connexion with cathedral churches. National pride induced some of the Scotch writers to assert that the Cudees were Scotch and not Irish. But the influence of Ireland on the primitive Christian Church of Scotland was so overwhelming, and facts to show this are so many, that the ablest among the Scotch historians, such as Biscoe, Dynan, and Hill-Burton, are compelled to admit that the first Cudees were Irish, and that from Ireland they spread to Scotland. They were not, however, Columban monks, for there is no mention of any Cudees at any Columban monastery, either in Ireland or in Scotland, until long after Columban’s time. Nor was it till 1164 that Cudees were mentioned as being in Iona, and then only in a subordinate position. Appearing, then, first in Ireland, they subsequently appeared in Scotland, and in both countries their history and fate are almost identical. Attached to cathedral or collegiate church, living in monastic fasting, and reciting monastic vows, the Scotch, like the Irish Cudees, were originally men of piety and zeal. The turbulence of the times and the acquisition of wealth sowed the seeds of decay, zeal gave way to indifference and neglect, a celibate community to married men, church property was squandered and丧失, offices, granted by avarice, were diverted to personal uses, and by the end of the thirteenth century the Scotch Cudees houses had in almost every case disappeared. Some, like Dunkeld and Abernethy, were superseded by regular canons; others, like Brechin and Dunblane, were extinguished with the introduction of cathedral chapters; and one at least, Monifieth, had passed into the hands of laymen. At St. Andrews the priests and laymen, of the regular canons, and still clung to their ancient privilege of electing the archbishop. But their claim was disallowed at Rome, and in 1273 they were debarred even from voting. Before the Reformation they had finally disappeared, and in 1616 the lands they once held were annexed to the See of St. Andrews.

E. A. D’Alton,

Cullen, Paul, Cardinal, Archbishop of Dublin, b. at Prospect, Co. Kildare, Ireland, 29 April, 1803; d. at Dublin, 24 October, 1878. His first school days were passed at the Shackleton School in the neighbouring village of Ballytore. He entered Carlow College as alumnus in 1816, and proceeded, in 1820, to the College of Propaganda in Rome where his name is registered on the roll of students under date of 29 December, 1820. At the close of a distinguished course of studies he was selected to hold a public disputation in the halls of Propaganda on the 11th of September, 1828, in 224 theses from all theology and ecclesiastical history. This theological tournament was privileged in many ways, for Leo XIII presided on the occasion, while no fewer than ten cardinals assisted at it, together with all the elite of ecclesiastical Rome. The youthful Abate Pecchi, the future Leo XIII, was present at the disputation, and referring to it at a later period declared that it made an indelible impression upon him, and that he was filled with admiration for the brilliant talent and singular modesty of the Irish student. During his course of studies, Paul Cullen had acquired a profound knowledge of the classical and Oriental languages, and it was a novel thing to see a young Irish priest immediately after ordination appointed to the charge of Hebrew and Sacred Scripture in the Propaganda, and receiving at the same time the charge of the famed printing establishment of the Sacred Congregation. This latter charge he resigned in 1832, when appointed rector of the Irish College in Rome, but during the short term of his administration he published a standard edition of the Greek and Latin Lexicon of Hebercius, which still holds its place in the Italian colleges; he also edited the Acta of the Congregation of Propaganda in seven quarto volumes, and other important works.

While rector of the Irish College (1832-1850) he was admitted to the intimate friendship of Gregory XVI and Pius IX. He profited by the influence which he thus enjoyed to safeguard the interests of the Irish Church, and to unmask the intrigues of the British agents who at this period were untrammelled in their attempts to force their political views upon the Vatican, and to forge fetters for Catholic Ireland. During the troubled period of the Roman Revolution, Dr. Cullen, at the request of the Sacred Congregation, accepted the responsible position of rector of the College of Propaganda, retaining, however, the charge of Rector of the Irish College. Soon after his appointment the Revolutionary Triumphvaire in the frenzy of their triumph issued an order that the College of Propaganda was to be dissolved and the
buildings to be appropriated for government purposes. Without a moment's delay the rector appealed to Lewis Cass, the United States minister, for the protection of the citizens of the United States who were students of the college. Within an hour the American flag was floating over the Propaganda College. The mandate of the Triumvirate was withdrawn, and a decree was issued to the effect that the Propaganda should be maintained as an institution of world-wide fame of which Rome was justly proud. Thus through the Irish rector and the American flag the venerable edifices of the college were preserved.

Dr. Cullen was promoted to the primatial See of Armagh on 19 December, 1849, and was consecrated by the Cardinal Prefect of Propaganda at the church of the Irish College, Rome, 24 February, 1850. A wider field was assigned to his zeal and piety when he was transferred to the See of Dublin 1 May, 1852. He was elevated to the cardinalate as Cardinal Priest of San Pietro in Montorio in 1867, being the first Irish bishop on whom that high dignity was ever conferred.

The first great duty which as Delegate of the Apostolic See devolved on the newly appointed Archbishop of Dublin would have no counterpart even in England. In 1850, the first national synod held with due public solemnity in Ireland since the beginning of the Reformation period. The main purpose of the synod was to restore the vigour of ecclesiastical discipline in Ireland, and this was in the fullest measure attained. Twelve years later, Cardinal Cullen, once the delegate of the Apostolic Delegate, presided at the national synod held at Maynooth in 1875. This second synod added a crowning grace to the manifold blessings that had accrued to the Irish Church from the First Plenary Synod. Throughout his episcopate it was his most anxious care to check proselytism, to promote the beauty of the House of God, and to multiply institutions of enlightenment, charity, and benevolence. In all this his efforts were admirably seconded by the clergy and the various sisterhoods whose devotion to the sacred cause of religion was beyond all praise.

He was particularly intent on bringing the blessings of religious education within reach of the poorest Catholics in the land. The system of national education adopted by the Government for Ireland in 1832 was a great improvement on the proselytising systems hitherto carried on by anti-Catholic agencies receiving government aid. The working of the system, however, was frustrated by the skill of the Irish Catholics in enlisting the services of the Protestant Archbishop of Dublin (Dr. Whatley) and his Presbyterian ally, Rev. James Carlile, both of whom were unceasing in unscrupulous efforts to make it an engine of attack on the Catholic faith of the Irish people. Dr. Cullen from the beginning of his episcopate till his closing hour never relaxed his endeavours on the one hand to counteract those proselytising agencies and to remove all dangers to the faith of the Catholic children, and on the other to bring gradually the literature and methods of the system into harmony with the national traditions and social requirements of Ireland. He was the private secretary on the Commission in Ireland, given before the Earl Powis' Royal Commission in 1869, has been pronounced by experts to be a most complete statement of the Catholic claims in the matter of primary education. The national system of to-day is no longer what it was in 1849, and almost all the improvements that have been made are on the lines suggested in the evidence of Cardinal Cullen.

From the first days of his episcopate Archbishop Cullen had set his heart on the erection of a Catholic university for Ireland. The project was hailed with enthusiasm by the Irish race at home and abroad, and the charter of the institution in Dublin gave promise of success. Countless difficulties, however, arose over which the Archbishop had no control, and hence the Catholic University of Ireland was attended with only partial success (see Ireland). Throughout his whole episcopate he continued to extend his patronage to it. He used often to repeat: "No one can question the justice of Ireland's claim to a Catholic University." Even when its fortunes were at the lowest ebb, he would say: "We must keep the flag flying", being assured of final triumph. Another project most dear to him was a diocesan seminary for Dublin. The great ecclesiastical College of Holy Cross which he erected at Clonliffe in the immediate suburbs of the city will long remain a conspicuous monument to his munificence and a crown of immortal glory to the holy prelate who raised it.

In political matters Cardinal Cullen was quite heedless of popularity, and he made it a rule to support every measure from whatever political party it came that he considered conducive to the interests of Ireland. He condemned the Young Irelanders as sowers of dissension, and a source of ruin to the Irish cause. He highly esteemed the literary merit of many of the writers for "The Nation", but he felt so convinced that some of those connected with that newspaper were in the secret pay of the British Government that he even circulated the evidence that he had collected of this. He regarded them as the worst enemies of Ireland. For the same reasons he relentlessly opposed the Fenian movement. It was his constant endeavour to bring together all the friends of Ireland so as to form a united phalanx in order to redress by constitutional means the wrongs of the oppressed and to lift up Ireland from her oppressed and prostrate condition. His policy was attended with success. The Protestant Church in Ireland was disestablished, the condition of the poor in the workhouses was ameliorated, the Industrial Schools' Act was passed, the laws affecting land tenure were amended, and in many other matters victory after victory crowned the constitutional campaign of Ireland's friends.

One of the accusations most frequently repeated to stir up popular prejudice against the cardinal was to the effect that he was a frequent visitor at the vice-regal castle in search of favours for himself or friends. As a matter of fact the only such visit he paid was toward the close of 1867. The Fenian leader, General Thomas F. Burke, had been sentenced to death and every effort to obtain a reprieve had been made in vain. He had fought with distinction in the Civil War of the United States, and the British Government and the Irish Government were both too anxious of their interests to be slow to enlist their services in aid of the Irish cause. The orders for execution from London were peremptory. The scaffold was already erected and the next morning General Burke was to be hanged. Through information received from the Archbishop of York and other American friends the cardinal was convinced of the upright character of the accused who had been betrayed by false reports to engage in the Fenian enterprise, impelled by the sole motive of love of his native land. At noon on the vigil of the day fixed for the execution, the cardinal accompanied by the private secretary on the Commission in Ireland, and the vicar-general, set out for the vice-regal castle on the forlorn errand to obtain a reprieve for the brave man. The interview with the viceroy lasted for more than an hour. The cardinal on personal grounds justified his right to be heard in the case, since none had in public or private more strenuously opposed Fenianism than himself. He insisted that the execution of a brave man would only add fuel to the flame, while the exercise of clemency would serve to open men's eyes to the recklessness of the whole Fenian enterprise. The viceroy listened to the cardinal's reasoning with due respect, but at the same time was quite inexcusable. He telegraphed, however, from the whole of his papers to his quarters in London. Late at night the response came. The reprieve was granted and the life of the brave man was spared. This was the first and last visit of Cardi-
viceroyal castle to petition for personal favours.

He paid frequent visits to Rome. He took part in the solemn celebrations connected with the definition of the dogmas of the Immaculate Conception of the Blessed Virgin Mary in 1854, and with the centenary of the martyrdom of Sts. Peter and Paul in 1867. On these and similar occasions he took up his residence at the Irish College. From the opening of the Vatican Council, Cardinal Cullen took an active part in its debates and discussions. His first discourse was on the defence of the prerogatives of the Holy See, mainly on historical grounds, in reply to the Bishop of Rottenburg, was regarded as one of the ablest discourses delivered in the council. At its close the hall resounded with applause, and during the afternoon about eighty bishops called at the Irish College to pay their respects to the Grand Master. He received them in his study, and after requirements were made, a homily on the duties of the bishop was delivered to the assembled bishops. They then went to the Hall of Congress, and after some appropriate words of greeting and farewell, the IX in token of appreciation of the singular ability of the discourse forwarded to the cardinal a gift of a very fine Carrara marble reliqua representing St. Paul addressing the Areopagus. This work of art now adorns a side chapel in the church attached to the diocesan seminary of St. Austin, near the High Church of the Knights of Malta.

The condition of the Catholic Church in Ireland, in 1878, in contrast with what it was in 1850, afforded abundant proof of the fruitfulness of Cardinal Cullen's zeal and of the beneficent results achieved during his episcopate. Those twenty-eight years marked a continuous period of triumphant progress in all matters connected with religion, discipline, education and charity. The eloquent Dominican Father Thomas N. Burke (q. v.) wrote in 1878: "The spirit animating, encouraging and directing the wonderful work of the Irish Catholic Church for the last twenty-eight years was that of Cardinal Cullen, and to his untiring labours must we record the events of his administration as, perhaps, the most wonderful and glorious epoch in the whole ecclesiastical history of Ireland. The result of his labours was the wonderful revival of Catholic devotion and piety which in our day has restored so much of our ancient splendour. It is to him we owe the, Cathedral Church, which was erected in 1862, the first Catholic cathedral built in Ireland since the Reformation. He also restored the diocesan seminary at Clonlara, and founded the Irish College of Catholic Missions in Rome. He was a most generous benefactor of the Church, and his liberality, both in the Church of Rome and in the diocese of Clonfert, is proverbial.

Culm, Diocese of, a bishopric in the north-eastern part of Prussia, founded in 1234, suffragan to Gnesen. The territory on the Vistula and Baltic, which the Teutonic Order had obtained partly by gift and partly by conquest, was divided in this year by the papal legate, William Bishop of Modensis, into the four dioceses of Culm, Ermland, Pomesania, and Samland; in 1255 the Archbishop of Riga became the metropolis of these dioceses. The Bishopric of Culm embraced the province of Culm, that is, the land between the Vistula and the Neisse, and in 1272 the see was transferred to the cathedral district. Pope Innocent IV consecrated as first bishop the Dominician, Heidenreich (1245; d. 1293). Originally the seat of the diocese was Culmsee, where Heidenreich began in 1254 the construction of a cathedral. The bishop possessed the highest authority, both spiritual and secular, in his diocese; he was the ruler of the land, but was in some measure dependent on the Teutonic Order. During the episcopate of the first bishop, the cathedral chapter, founded in 1251, followed the Rule of St. Augustine, but the second bishop, Friedrich of Hausen (1264–74), allowed the chapter to enter the Teutonic Order, taking its endowment with it. Not only was Friedrich a member of the Teutonic Order, but most of his successors in the see were obeyed in it. The Teutonic Order, when it was moved from Riga to Culm in 1466 also belonged to it. Under the powerful protection of the Knights rapid progress was made in cultivating the soil and in Christianizing the inhabitants. Many flourishing communities and numerous schools and churches were founded, an excellent system of education was instituted, and the clergy, as well as the laymen, were educated. In 1473, the Teutonic Order was divided into two provinces, the first, called the Teutonic and Cistercian orders. As early as 1616 the reformed, Otto (1324–49), who was a secular priest, there were 113 parishes and 538 priests. The most celebrated schools of the diocese were the "Johannes" school at Thorn and the cathedral school at Culm. The latter was transferred to the see of Stettin in 1473 into a studium particularium and had celebrated professors, among whom were Johannes Dantisca, Eobanus Hessus, etc.

On account of its close connexion with the Teutonic Order, the diocese was involved in the disputes of the Council of Trent. By the Bull of Pope Julius III, the fourth chapter of the Council of Trent, which was held in 1572 at Culm, was dissolved, and the diocese was united to the diocese of Breslau. The bishops were the representatives of the bishops of Breslau at the Council of Trent, and the dean was called a vicar capitular. The bishopric was again re-established as a secular diocese, and the diocese of Culm was united to the diocese of Breslau. The bishops were the representatives of the bishops of Breslau at the Council of Trent, and the dean was called a vicar capitular. The bishopric was again re-established as a secular diocese, and the diocese of Culm was united to the diocese of Breslau. The bishops were the representatives of the bishops of Breslau at the Council of Trent, and the dean was called a vicar capitular.
fell into decay. For lack of a proper residence, the forty-ninth bishop, Franz Xaver Count Wrba-Rydzynski, was only once in his diocese. After his death, 1894–99, the see was administered by the coadjutor bishop, Nałęcz Wilczczyki. The Bull "De salute animarum", 1821, which provided for the reorganization of the Prussian dioceses, gave Culm new boundaries; to the old diocese were added parts of the Dioceses of Leszna, Cuiavia, and Elblag, and the bishops of the former sees were removed. In 1824 the seat of the bishop and the chapter was fixed at Pelplin, where it still remains. The new diocese suffered above all from the lack of priests, the suppression of the monasteries, and the poverty of the Catholic population. Bishop Ignatius Matthys (1824–52) bent all his energies to the founding of a seminary (Kulturkampf) (1847–86) and of middle schools (1854–56) made it his aim to give the diocese a uniform administration, to safeguard the property still remaining to the Church after its great losses, to promote the development of a capable clergy, and to increase the number of priests. In the same way Johannes Nesper (1856–86) and Augustinus Rosentretter (consecrated 9 July, 1889). In this period the diocese in some measure recovered from its losses; the suppressed monasteries have been partly refilled with religious, and new institutions of learning under the supervision of the Church have been founded. However, it still suffers from the effects of its earlier losses, and from the lack of labourers in the vineyard of the Lord.

Statistics.—The present Diocese of Culm includes the Prussian province of West Prussia with the exception of five Government districts; it also includes two districts of East Prussia, two of Pomerania, and that of Bromberg belonging to Posen. The see embraces altogether 409 square miles. In 1900 it had a Catholic population of 769,166 souls; in 1907, 780,000. The cathedral chapter is composed of two dignitaries, the cathedral provost and the cathedral dean, and eight prebends. In 1897 there were 60 parishes, 90 parochial churches, 27 parochial missionaries, 27 parishes, 476 priests, 275 parish churches, 77 dependent churches, 9 other churches, and 37 chapels. Institutions of learning under religious control are: the episcopal seminary for priests at Pelplin with 5 professors; the episcopal seminary for boys at Pelplin with 12 ecclesiastical teachers, the episcopal houses of study at Culm, Konitz, and Neustadt. In the three towns just mentioned the gymnasiums are Catholic in character. The diocese also possesses 4 Catholic seminaries for teachers, and 2 higher schools for girls. Orders for men have not existed in the diocese since the religious struggle (Kulturkampf) with the Government. The orders and congregations for women devote their attention almost exclusively to the care of the sick, the poor, and the children; but they are not permitted to give elementary instruction. In 1906 the orders and congregations of female religious were: Sisters of Mercy of St. Vincent de Paul, 6 houses with 102 religious; Sisters of Mercy of St. Charles Borromeo, 2 houses with 39 religious; Sisters of St. Elisabeth, 12 houses with 103 religious; Sisters of St. Francis, 2 houses with 22 religious. These religious have under their care 11 hospitals and sanatoriums, 8 day-nurseries, 1 boarding school, 1 needle-work school, 1 institution for sick and old religious, 1 home for servants, 1 reform institution for girls, 4 orphanages, and 12 stations for visiting nurses.

The cathedral, formerly a Cistercian abbey church, is the most important church building of the diocese; it is a brick Gothic structure with three naves, was erected in the fourteenth century, and completely rebuilt 1294–99. At the old cathedral until 1824; the parochial church of Culmese, built 1254–94 and used as the cathedral until 1824; the parochial church of Culm, built in 1223; the churches of St. John, St. James, and St. Mary, all three erected in the thirteenth or fourteenth century. The most frequented places in the church of note are: the parish church of Culmese, built 1254–94 and used as the cathedral until 1824; the parochial church of Neumark (the miraculous picture of the Mother of God is in the parish church of Neumark), and Mount Calvary near Neustadt with twenty-four chapels.

Cummings, Jeremiah Williams, publicist, b. in Washington, U. S. A., April, 1814; d. at New York, 4 January, 1886. His father's death caused his mother to move to New York in his boyhood, and he was there accepted as an ecclesiastical student by Bishop Dubois, who sent him to the College of the Propaganda at Rome to make his theological studies. He displayed much ability, and after winning his doctor's degree returned to New York, where he was assigned as one of the assistants at St. Patrick's Cathedral. He there proved himself an accomplished linguist, writer, and musician, and an interesting and popular preacher and lecturer. In 1848 Bishop Hughes selected him to found St. Stephen's parish, New York, and to erect a church. Dr. Cummings was then, and had been for several years previously, the intimate friend and disciple of Orestes A. Brownson, who was its first pastor. He was instrumental in having Brownson change his domicile from Boston to New York, took charge of his lecture arrangements, and wrote frequent articles for the "Review". "It was often complained of in Brownson", says his son (Middle Life, Detroit, 1899, p. 102), "that he was lacking in policy, and no doubt he was in the habit of plain speaking; but Cummings was more so, and some of the most violent attacks on the editor and his 'Review' were occasioned by unpalatable truths plainly stated by Cummings".

Cummings was one of the leading spirits in a little club of priests and laymen, who were opposed to what they called the "Americanizing" of the Church in the United States by the foreign-born teachers, to the system of teaching in vogue in the Catholic colleges and seminaries, and who were in favour of conciliating those outside the Church by the use of milder polities. In an article on "Vocations to the Priesthood" that appeared in "Brownson's Review" of October, 1860, he severely criticized the management and mode of instruction in Catholic colleges and seminaries which he styled "cheap priest-factories". This aroused a bitter controversy, and brought out one of the noted essays by Archbishop Hughes, his "Reflections on the Catholic Press".

Under the administration of Dr. Cummings St. Stephen's, which he had completed in March, 1854, became the most fashionable and most frequented church in New York. Its sermons and music making
it a local attraction. He continued his pastoral till his death, which followed a long illness that incapacitated him for active service. Besides his articles in "Brownson's Review" he was also a contributor to "Appleton's Encyclopedia" and published in New York: "Italian Legends" (1890); "Songs for Catholic Schools" (1892); "Spiritual Progress" (1895); "The Silver Stole".

THOMAS F. MEEHAN.

Cuncoilm, Martyrs of.—On Monday, 25 July, 1583 (N. S.), the village of Cuncoilm in the district of Salsete, territory of Goa, India, was the scene of the martyrdom of five religious of the Society of Jesus: Fathers Rudolph Acquaviva, Alphonseus Pacheco, Peter Berno, and Anthony Francis, also Francis Aranha, lay brother. Rudolph Acquaviva was born 2 October, 1550, at Atri in the Kingdom of Naples. He was the fifth child of the Duke of Atri, and nephew of Fra Aquaviva, the founder of the Congregation of Jesus, while on his mother's side he was a cousin of St. Aloysius Gonzaga. Admitted into the Society 2 April, 1568, he landed in Goa 13 September, 1578. Shortly after his arrival he was selected for a very important mission to the court of the Great Mogul Akbar, who had sent an embassy to Goa which a request that two learned missionaries might be sent to Fatehpur-Sikri, his favourite residence near Agra. After spending three years at the Mogul court, he returned to Goa, much to the regret of the whole Court and especially of the emperor. On his return to Goa, he was appointed superior of the Salsete mission, which post he held until his martyrdom. Alphonseus Pacheco was born about 1551, of a noble family of New Castile, and entered the Society on 8 September, 1567. In September, 1574, he arrived in Goa, where he so distinguished himself by his rare prudence and virtue that in 1578 he was sent to Europe on important business. Returning to India in 1581, he was made rector of Rachol. He accompanied two punitive expeditions of the Portuguese to the village of Cuncoilm, and was instrumental in destroying the pagodas there. Peter Berno was born of humble parents in 1550 at Ascona, a Swiss village at the foot of the Alps. After being ordained, he went to Rome, he entered the Society of Jesus in 1577, arrived in Goa in 1579, and was soon appointed to Salsete. He accompanied the expeditions to Cuncoilm, and assisted in destroying the pagan temples, destroyed an ant-hill which was deemed very sacred, and killed a cow which was an object of paganism. He used to say constantly that no fruit would be gathered from Cuncoilm and the hamlets around it till they were bathed in blood shed for the Faith. His superiors declared that he had converted more pagans than all the other fathers put together.

Francis Aranha, born in 1553, was a poor student of Coimbra in Portugal. He joined the Society in 1571, accompanied Father Pacheco to India in 1581, and was shortly afterwards ordained priest in Goa. It is said that whenever he said Mass, he prayed, at the Elevation, for the grace of martyrdom; and that on the day before his death, when he was saying Mass at the church of Orlim, a miracle prefigured the granting of this prayer.

Brother Francis Aranha was born of a wealthy and noble family of Braga in Portugal, about 1551, and went to India with his uncle, the first Archbishop of Goa, Dom Gaspar. There he joined the Society of Jesus 1 November, 1571. Being a skilled draughtsman and architect, he built several fine chapels in Goa.

These five religious met in the church of Orlim on the 15th of July, 1583, and thence proceeded to Cuncoilm, accompanied by some Christians, with the object of erecting a cross and selecting ground for building a church. Seeing an opportunity of doing away with these enemies of their pagodas, the pagan villagers, after holding a council, joined by the male members, armed with swords, lances, and other weapons, towards the spot where the Christians were. Gonzalo Rodrigues, one of the party, levelled his gun, but Father Pacheco stopped him, saying: "Come, come, Senhor Gonzalo, we are not here to fight. Then, speaking to the crowd in Konkani, their native language, "Do not be afraid." The pagans then fell upon them; Father Rudolph received five cuts from a seimitar and a spear and died praying God to forgive them, and pronouncing the Holy Name. Father Berno was next horribly mutilated, and Father Pacheco, wounded with a spear, fell on his knees extending his arms in the form of a cross, and praying God to forgive his murderers and send other missionaries to them. Father Anthony Francis was pierced with arrows, and his head was split open with a sword. Brother Aranha, wounded at the outset by a seimitar and a lance, died while digging a piece of corn in a crop of a rice-field, where he lay until he was discovered. He was then carried to the idol, to which he was hauled to bow his head. Upon his refusal to do this, he was tied to a tree and, like St. Sebastian, was shot to death with arrows. The spot where this tree stood is marked with an octagonal monument surmounted by a cross, which was repaired by the Patriarch of Goa in 1885.

The bodies of the five martyrs were thrown into a well, the water of which was afterwards sought by people from all parts of Goa for its miraculous healing properties. The bodies themselves, when found, after two and a half days, showed no signs of decomposition. They were solemnly buried in the church of Our Lady of the Snows at Rachol, and remained there until 1597, when they were removed to the college of St. Paul in Goa, and in 1862 to the cathedral of Old Goa. Some of these relics have been sent to Europe at various times. All the bones of the entire right arm of Blessed Rudolph were taken to Rome in 1600, and his left arm was sent from Goa as a present to the Jesuit college at Naples. In accordance with the request of the Pacheco family, an arm and leg of Blessed Alphonseus were sent to Europe in 1869. The process of canonization of the five martyrs began in 1741, and it was only in 1741 that Benedict XIV declared the martyrdom proved. On the 14th of April, 1893, the solemn beatification of the five martyrs was celebrated at St. Peter's in Rome. It was celebrated in Goa in 1894, and the feast has ever since then been kept with great solemnity at Cuncoilm, even by the descendants of the murderers. The Calendar of the Archdiocese of Goa has fixed 26 July as their feast-day.

Along with the five religious were also killed Gonzalo Rodrigues, a Portugeuse, and fourteen native Christians. Of the latter, one was Domine, a boy of Cuncoilm, who was a stepbrother of the five martyrs. He accompanied the fathers on their expeditions to Cuncoilm and pointed out to them the pagan temples. His own heathen uncle dispatched him. Alphonseus, an altar-boy of Father Pacheco, had followed him closely, carrying his breviary, which he would not part with. The pagans therefore cut off his hands and cut through his knee-joints to prevent his escape. In this condition he lived till the next day, when he was found and killed. This boy, a native of either Margao or Verna, was buried in the church of the Holy Ghost at Maragao. Francis Rodrigues, who was also a page, used the same escape, but was captured by the fathers for slight fault, that he hoped to atone for them by shedding his blood as a martyr. Paul da Costa, another of those who died at the hands of the pagans, was an inhabitant of Rachol, and had been
distinguished by his desire of dying for the Faith. Speaking of these fifteen courageous Christians, Father Goldie says: "For reasons which we have now no means of knowing, the cause of these companions of the five Martyrs was not brought forward before the Archbishop of the time; nor since then has any special cultus, or the interposition of God by miracle, called the attention of the Church to them. But we may hope that their blood was in the odour of sweetness to God."

Cungenudes, Blessed, Poor Clare and patroness of Poland and Lithuania; b. in 1224; d. 24 July, 1292, at Sandecze, Poland. She was the daughter of King Bela IV and niece of St. Elisabeth of Hungary, and from her infancy it pleased God to give tokens of the eminent sanctity to which she was later to attain. With extreme reluctance she consented to her marriage with Boleslaus II, Duke of Cracow and Sandomir, who afterwards became King of Poland. Not long after their marriage, the pious couple made a vow of perpetual chastity in the presence of the Bishop of Cracow, and Cungenudes, amidst the splendour of the pomp of the royal household, gave herself up to the practice of the severest austerities. She often visited the poor and the sick in the hospitals, and cared even for the lepers with a charity scarcely less than heroic. In 1279, King Boleslaus died, and Cungenudes, despite the entreaties of her people that she should take in hand the government of the kingdom, sold all her earthly possessions for the relief of the poor and entered the monastery of the Poor Clares at Sandecze. The remaining thirteen years of her life she spent in prayer and penance, edifying her fellow religious by her numerus virtues, especially by her heroic poverty. She never permitted anyone to refer to the fact that she had once been a queen and was foundress of the community at Sandecze.

The cult of Blessed Cungenudes was approved by Pope Alexander VIII in 1690; in 1895 she was made chief patroness of Poland and Lithuania by a decree of the Congregation of Rites, confirmed by Clement XI. Her feast is kept in the Order of Friars Minor on the 27th of July.

CUNEO, DIOCESE OF (CUNENSIS), suffragan to Turin. Cuneo is the capital of the province of that name in Piedmont, Northern Italy, agreeably situated on a hill between the Rivers Stura and the Gesso. Originally the city belonged to the Diocese of Mondovi. In 1817 Pius VII made it an episcopal see. The painting over the main altar representing St. John the Baptist and St. Michael is the work of the Jesuit Father Fossi, who also decorated the Church of the Holy Spirit. The first bishop of Cuneo was Amadeo Bruno di Samone. The diocese has a population of 111,200, with 61 parishes, 190 churches and chapels, 220 secular and 20 regular priests, 3 religious houses of men, 27 of women, and 13 educational institutions.

Cunningham, J. B. See Concordia, Diocese of.

Cuoc, André-Jean, philologist, b. at LePuy, France, 1821; d. at Oka near Montreal, 1888. Jean Cuoc entered the Company of Saint-Sulpice in 1844, and two years later was sent to Canada. In 1847 he was put in charge of the mission at the Lac des Deux-Montagnes. So ambitious was he to fulfill well the mission, that in a short time he acquired a perfect knowledge of the Iroquois and the Algonquin dialects. His numerous works, all published at Montreal, gained him admission to many scientific societies of Europe and America. We have from his pen: "Le Livre des sept nations" (1860); "Jugement de M. Ernest Renan sur les langues sauvages" (1864); "Etudes philologiques sur quelques langues sauvages" (1866); "Quels étaient les sauvages que rencontrait Jacques Cartier sur les rives du S.-Laurent?" in "Annales de philosophie chrétienne" (1889); "Lexique de la langue iroquoise" (1892); "Lexique de la langue algonequine" (1893); "Grammaire du langage des sauvages dans les mémoires (IX-X) de la société royale du Canada" (1891-92); "Anecdot Kekon" (ibid., 1893); "Nouveau manuel algonequin" (1893). He wrote also many other works destined to further the christianization of the Indians.

Cupula.—A spherical ceiling, or a bowl-shaped vault, rising like an inverted cup over a circular, square, or multangular building or any part of it. The term, properly speaking, is confined to the under side, or ceiling, of a dome, and is frequently on a different plane from the dome which surrounds it outside. It is also sometimes applied to the dome (but for this there is no authority), and to a small room, either circular or polygonal, standing on the top of a dome, which is called by some a lantern. A cupula does not necessarily pre-suppose a dome, and the latter is often found surrounding flat surfaces. The significance of the term is in its language and has nothing to do either with the material used or with its method of construction. According to Lindsay, the cupula of San Vitale, at Ravenna, became the model of all those executed in Europe for several centuries. This cupula is of remarkable construction, being built wholly of hollow earthen pots, laid spirally in cement, a light construction common in the East from early times. The cupulas of the Pantheon at Rome, the cathedral at Florence, the churches of St. Peter at Rome, and Santa Sophia at Constantinople are of solid construction, and the support of the cup-shaped vault is either by squinches or by a continuous wall. In some cases, however, the cupula is of masonry, and the outer shell of the cupula is of wood covered with lead, as at St. Paul's, London, and at St. Mark's, Venice, the five masonry cupulas have the outer shell of wood and metal. The dome of the Invalides, in Paris, has a wood and metal covering above two inner structures of stone. In the later Byzantine buildings of Greece and other parts of the Levant, many of the cupulas have singularly lofty drums, which are pierced with windows, and the cupula proper becomes a mere roof to a tall cylindrical shaft. Cupulas in modern construction are generally of wrought iron, and the space filled in with some tile formation. The term is sometimes applied to a small roof structure, used for a look out or to give access to the roof.

THOMAS H. POOLE.

CURAÇAO, VIGARIA APOSTOLIC OP, includes the islands of the Dutch West Indies: Curacao, Bonaire, and Aruba; Saba, St. Eustatius, and the Dutch part of St. Martin (Leverick Islands). These islands are
In the first three centuries of the Church there was but one church in each diocese, located generally in the principal city, i.e. in the city where the bishop resided. To this church the faithful of the city and the surrounding villages went on Sundays and feasts to assist at Mass and receive the sacraments. When the faithful became more numerous as the Church developed, several smaller churches were established, not only in the city but also in the surrounding country, and services were performed in these churches by priests, who, however, were not permanently appointed; i.e. the bishop remained the only parish priest, but had a certain number of priests to assist him in the administration of the sacraments. This arrangement is known as a parochia, or diocese (Lesèvre, La Paroisse, Paris, 1906; Duchesne, The Origin of Christian Worship, London, 1906, 11–13). After the fourth century parishes began to be formed in the rural districts, but it was not until after the year 1000 that they were formed in episcopal cities (Lupi, De parochiis antiquitum annum millesimum, Bergamo, 1788; Vering, Kirchenrecht, 3d ed., 1883, p. 598). From this it will be seen that just as the bishop found his diocese too large for individual ministrations and care, so the parish priest, in the course of time, found it necessary to secure the aid of other priests in attending to the spiritual needs of his people.

In English-speaking countries, also in a number of European states, at the present day, the curate holds his faculties directly from the bishop, but exercises them according to the wish and direction of the parish priest or rector. This applies not only in the case of a true parish priest or a missionary rector (both irremovable), but also in the case of a simple rector, who by the authority of the bishop governs a given area styled a mission. Curates are, in general, removable at the will of the bishop. Nevertheless, this power of the bishop ought to be exercised with prudence and charity, and in such a case the curate shall suffer no loss of reputation, e.g. by being sent without just and reasonable cause from one mission to another, such arbitrary change being legitimately interpreted by common consent as tantamount to a punishment. In such a case, if the curate feels that he has been unfairly treated, he has (in England) the right of appeal to the Commission of Investigation, which exists in each diocese. Meanwhile he must obey the order of the bishop. The form of investigation and trial is the same for curates as for rectors and parish priests (see Wernz, op. cit. below, I, 1582). The order of the Commission is as follows:

J. J. A. van Baars.

Curate (Lat. curatus, from cura, care), literally, one who has the care (cure) or charge of souls, in which sense it is yet used by the Church of England, "All Bishops and Curates." In France, also, the cognate curé (Spanish, cura) is used to denote the chief priest of a parish. In English-speaking countries, however, the word curate has gradually become the title of those priests who are assistants to the rector, or parish priest, and perform the general pastoral work of the entire parish, in place of the position which they are sent by the bishop of the diocese or his delegate. Technically speaking the curate is the one who exercises the cure of souls, and his assistants are vicars and coadjutors; but in this article the word curate is used in its accepted English sense of assistant parish priest, and corresponds, in general, to the vicarius territorialis, auxiliaris presbyter, coadjutor parochi.
determines their salary and may remove them from one mission to another. By a particular reply of the Congregatio de Bollandistæ in 1883, it is
explicitly provided that this custom, derogatory to the common law, shall be observed until the Apostolic See makes other provision.

The bishop can assign to the curate a salary from the income of the church. If the income of the church is not sufficient the parish priest is not
suffer; but according to the common opinion, the bishop, as far as he can, must provide from other sources for the curate. By common law the stole fees (q.v.) belong to the parish priest, therefore the bishop
cannot make them part of the salary of the curate. Still, the Council of Trent says that the bishop can assign to the curate the fruit of the
oil vessel, registers, and all other things which pertain to the church; should the priest die, his colleagues are to take the utmost care that all papers, letters, etc. are locked up and so safeguarded from the danger of falling into the hands of unauthorized lay people. The Second Council of Orange, conversely, provides that the bishop shall confer with the ecclesiastical status (rights and duties) of curates in French Canada (see Discipline du Diocèse de Québec, Quebec, 1895, pp. 211, 252, and Gignac, Compend. jur. eccl. ad usum Cleri Canad. ibid., 1901, De personis, 308 sqq.). In the United States also, and in other English-speaking countries, the statutes of various dioceses and the legislation of some provincial synods (e.g. Fifth New York, 1886) regulate in similar detail the duties of a curate, e.g. the continuous residence that his office calls for (see RESIDENCE, OBLIGATION OF), and other statutory priestly obligations.

Apropos of the relations between parish priests and their curates, many modern diocesan and provincial synods repeat with insistence the immemorial principles that govern the exercise of ecclesiastical authority in all that pertains to the care of souls (cura animarum), viz.: on the part of the parish priest, paternal benevolence and mildness of direction, due recognition of the priestly character of his assistants, equitable distribution of the parochial duties and burdens, good example in religious zeal and works, wise counsel of the young and inexperienced, practical guidance in all that pertains to the spiritual and even the temporal welfare of the parish; on the part of the curate, willing obedience to his superior, due consultation in all matters of importance, filial co-operation, respect for the parish priest's office and priestly reputation, a peaceful and even patient attitude when the curate seems wronged, and recorse to the diocesan hierarchy only upon urgent necessity. (Synod of Müster, 1897, 147 sqq., in Laurentius, op. cit. below, pp. 170-71.) Similar advice and suggestions are found in many modern writings on the priesthood (e.g. the works of Cardinals Manning, Gibbons, Vaughan, and those of Mach, Keating, etc.).

See COMPETENT PERSON; VICAR; CHAPLAIN; PRIEST.

DAVID DUNFORD.

Curator (Lat. curare), a person legally appointed to administer the property of another, who is unable to undertake its management himself, owing to age or physical incompentence, necessity or other reasons. The term is often confounded with tutors, but they differ in many respects. Tutors are appointed principally for the guardianship of persons, and only secondarily for the care of property; while curators are deputed mainly and sometimes solely for temporal concerns and only incidentally as guardians of persons. The curator, in his capacity as a tutor, is appointed for minors, while a curator,
may have charge of incompetent persons of any age. Finally, a tutor cannot be commissioned for a particular or determined duty, though a curate may receive such an appointment. When the ward of a tutor has reached his majority, the tutor may become curate until the ward is twenty-five years of age; but he cannot be compelled to undertake such a charge. Curators to law, are be constituted for those who are mentally weak, for prodigals, and those addicted inordinately to gambling. The administration of property cannot, however, be taken from a person merely because he lives luxuriously. Curators may also be appointed for captives, for the absent, and the deceased. A husband may not be constituted curate for his wife.

Before the curate enters upon the administration of property, he is obliged to give proper bond for his fidelity. Whatever salary he receives must be determined by a judge. If he did not demand a salary at the beginning of his administration, but later requests one, the judge is to fix the amount of such salary only for the future, not for the past. The obligation of a curate to render an account of his administration after the time of wardship has past constitutes an ecclesiastical impediment to entrance into the religious state until such obligation has been duly discharged. As regards the rendering the property, curators are obliged to take such care of it as would a diligent parent. They are therefore to see that the rents are collected, that the yearly income be not lessened, that useless goods be sold, and that money be not allowed to lie idle. In case the property of the ward suffer by the administration of the curate, the latter is obliged in conscience to make restitution, if the deterioration was caused by culpable negligence on his part.

Oue d'Arts. See Jean-Baptiste Vianney, Blessed.

Cure of Souls (Lat. cura animarum), technically, the exercise of a clerical office involving the instruction, by sermons and admonitions, and the sanctification through the sacraments, of the faithful in a determined district, by a person legitimately appointed for the purpose. Those specially having care of souls are the pope for the entire Church, the bishops in their dioceses, and the parish priests in their respective parishes. Others may likewise have part in the cure of souls, in opposition to it. Thus in missionary countries where episcopal sees have not yet been erected, those who labour for the salvation of souls are in a special manner sharers of the particular responsibility of the Vicar of Christ for those regions. In like manner, a parish priest may have curates who attend to the wants of a particular portion of the parish, subordinate to himself. The object of the cure of souls is the salvation of men, and hence it is a continuation of Christ's mission on earth. As the Redeemer established a church which was to govern, teach, and sanctify the world, it necessarily follows that those who are to assist in the work of the Church must obtain their mission from her alone. "How shall they preach, unless they be sent?" (Rom., x, 15).

The canonical mission of a priest is derived from the Apostolic succession in the Church. This succession is twofold: Holy orders and authority. The first is perpetuated by means of the bishops and the hierarchy of the Church, of which the head is the pope, who is the source of jurisdiction. Both elements enter into the mission of him who has cure of souls: Holy orders, that he may offer sacrifice and administer the sacraments, which are the ordinary channels of sanctification employed by the Holy Ghost; and jurisdiction, that he may teach correct doctrine, free his subjects from sins and censures, and govern them in accordance with the canons of the Church. The power of Holy orders is radially common to all priests by virtue of their valid ordination, but the power of jurisdiction is ordinary only in pope, bishops, and parish priests, and extraordinary or delegated in others. It is plain, then, that while valid orders may evert outside the Catholic Church, jurisdiction cannot, as its source is the Vicar of Christ and it is possessed only so far as he confers it or does not limit it. The duties of those who have cure of souls are all carefully defined in the sacred canons. (See Pope; Bishop; Parish Priest.)

We have here touched only upon what is common to the idea of a pastor of the faithful. It is plain that the closer the bond existing between the subordinate members of the hierarchy and their superiors, and between pastors and their people, the more effective will be the work done for the salvation of souls. If the pastor be earnest in preaching and admonishing, unremitting in the tribunal of penance and visitation of the sick, charitable to the poor, kind yet firm in his dealings with all the members of his flock, observant of the regulations of the Church as to his office and particularly that of dwelling among his people (see RESIDENCE, ECCLESIASTICAL), that he may know them all and be known by them all, and if, on the other hand, the people be truly desirous for their own salvation, obedient towards their pastor, zealous to obtain and employ the means of sanctification, and mindful of their obligations as members of a parish to enable their pastor to institute and improve the parochial institutions necessary for the proper furtherance of the object of the Church, we shall have the true idea of the cure of souls as intended by Christ and as legislated for in the canons of His Church.

Curitiba do Paraná, Diocese of (Curitubenses de Parana), suffragan of Sao Sebastiao (Rio de Janeiro), Brazil. The city of Curitiba, on the Iguaçu River, was settled in 1564 and became the capital of the State of Paraná in 1845. It lies 12 miles inland from the sea and is 840 feet above sea-level, and has gold mines in the vicinity. Erected by Bull of Leo XIII, "Ad Universas" (27 April, 1892), the Diocese of Curitiba embraces the states of Paraná and Santa Catarina, an area of 114,067 sq. m., and contains a Catholic population of 600,900, with 69 parishes, 65 seculars and 21 regular priests, 2 religious orders of men and 3 of women, 1 seminary, 2 colleges, and 1 Catholic school with an attendance of 350.

Ouirium, a titular see of Cyprus, suppressed in 1222 by the papal legate, Pelagius. Kourees, son of King Ras, is said to have founded Korin on the south-west coast of Cyprus, west of Cape Kourias (now Gata), and to have settled a colony of Argives there in 559 B.C. The city became the capital of one of the kingdoms in the island. On the site of the ruins is the modern village of Episkopi ("Beauvoir"), near Larnaca, on the latter island, it is said that Csesalphe discovered the many precious antiquities now in the Metropolitan Museum, New York City. In the Middle Ages Episkopi belonged first to the Erbil family, counts of Jaffa, and later to the Venetian family of Cornaro, who owned valuable sugar-cane plantations there. It is still the centre of a very fertile district. The tomb of St. Hermogone and his
S. PÉTRIDIS.

Ourley, James, astronomer, b. at Athlone, County Roscommon, Ireland, 26 October, 1796; d. at Georgetown, District of Columbia, U. S., 34 July, 1866. His early education was limited, though his talent for mathematics was discovered, and to some extent developed, by a teacher in his native town. He left Ireland in his youth, arriving in Philadelphia, 10 October, 1817. Here he worked for two years as a bookkeeper and then taught mathematics at Frederick, Maryland. In 1826 he became a student at the old seminary in Washington, intending to prepare himself for the priesthood. He spent two terms time at one of its classes. The seminary, however, which had been established in 1826, was closed in the following year and he entered the Society of Jesus, 29 September, 1827. After completing his novitiate he again taught in Frederick and was sent (1831) to the Seminary of Henry IV, at Rome, where he also studied theology and was ordained priest on 1 June, 1833. His first Mass was said at the Visitation Convent, Georgetown, where he afterwards acted as chaplain for fifty years. He spent the remainder of his life at Georgetown, where he taught natural philosophy and mathematics for forty-eight years. He planned and superintended the building of the Georgetown Observatory in 1844 and was its first director, filling this position for many years. One of his earliest achievements was the determination of the longitude of Washington. His results did not agree with those obtained at the Naval Observatory, and it was not until after the laying of the first transatlantic cable in 1858 that his determination was found to be near the truth. The coincidence, however, was partly accidental, as the method which he employed was not susceptible of very great precision. Father Ourley was also much interested in the publication of the 'Apostolicae Curae' (13 vols., 1885). He was himself never considered for the papacy. He was writing a life of his brother, the Bishop of Sacramento, when he died.

Patrick Ryan.

Curry, John, doctor of medicine and Irish historian; b. in Dublin in the first quarter of the eighteenth century; d. there, 1780. He studied medicine at Paris and Reims and returned to Dublin to practise his profession. He was a Jesuit and, according to the inquisitors' report against him in 1747, he was a "Brief Account from the most authentic Protestant Writers on the Irish Rebellion, 1641". This was bitterly attacked by Walter Harris in a volume published in Dublin, 1782, and in reply Curry published his "Historical Memoirs", afterwards enlarged and published in two volumes (1775) under the title "An Historical and Critical Review of the Civil Wars in Ireland". This is his best work; a new edition of it, enlarged from Curry's manuscript, was published by Charles O'Connor of Belnagore, in 2 vols. (Dublin, 1786), and in one vol. (Dublin, 1810). In this work, after a brief glance over the developments in Ireland after the death of Henry II, he takes up the problem of the reign of Elizabeth and carries it down to the Settlement under William III. Curry took a prominent part in the struggle of the Irish Catholics for the repeal of the Penal Laws, and was one of the founders of the Irish Catholic Committee which met in Essex Street, Dublin. Besides the works already mentioned, he published "An Essay on Ordinary Fencers" (London, 1743) and "Some Thoughts on the Nature of Fencers" (London, 1774). Memoir by Charles O'Connor in the edition of Historical Reviews published at Dublin, 1786, 1810; Trask, Sketch of the Catholic Association (London, 1820); Webb, Compendium of Irish Biography (Dublin, 1873).

James Macaffrey.

Currying.—In its popular acceptation currying is often confounded, especially in the phrase "cursing and swearing", with the use of profane and insulting language; in canon law is considered as a form of excommunication pronounced by the Church. In its more common Biblical sense it means the opposite of blessing (cf. Num., xxiii). 27, and is generally either a threat of the Divine wrath, or its actual visitation, or its prophetic announcement, though occasionally it may simply be a request that God may visit all by God on persons or things in requital for wrongdoing. Thus among many other instances we find God cursing the serpent (Gen., i, 14), the earth (Gen., i, 17), and Cain (Gen., iv, 11). Similarly Necho curses Chanaan (Gen., ix, 25); Josue, him who should build the city of Jericho (Jos., xii, 26). In the Vulgate of the Old Testament there are long lists of curses against transgressors of the Law (cf. Lev., xxvi, 14-25; Deut., xxvii, 15, etc.). So, too, in the New Testament, Christ curses the barren fig-tree (Mark, xi, 14), pronounces his denunciation of woe against the incredulous cities (Matt., xi, 21), against the worldlings, the scorners and the Pharisees, and foretells the awful malediction that is to come upon the damned (Matt., xxv, 41). The word curse is also applied to the victim of expiation for sin (Gal., iii, 13), to sins temporal and eternal (Gen., i, 7; Matt., xxv, 41). In moral theology, to curse is to call down evil upon God or creatures, rational or irrational, living or dead. St. Thomas treats of it under the name maledictio, and says that imprecation may be made either efficaciously and by way of command, as when made by
God, or inexcusably and as a mere expression of desire. From the fact that we find many instances of curses made by God and his representatives, the Church and the Prophet, it is seen that the act of cursing is not necessarily sinful in itself; like other moral acts it takes its sinful character from the object, the end, and the circumstances. Thus it is always a sin, and the greatest of sins, to curse God, for to do so involves both the irreverence of blasphemy and the malice of hatred of the Divinity. It is likewise blasphemy, consequently a grievous sin against the Second Commandment, to curse creatures of any kind precisely because they are the work of God. If, however, the imprecation be directed towards irrational creatures not on account of their relation to God, but simply as they are in themselves, the guilt is no greater than that which attaches to vain and idle words, except where grave scandal is given, or the evil wished to the irrational creature cannot be separated from serious lust to a rational creature, as would be the case were one to wish the death of another's horse, or the destruction of his house by fire, for such wishes are serious violations of charity.

Curses which imply rebellion against Divine Providence, or denial of His goodness or other attributes, such as curses of the weather, the winds, the world, the Christian Faith, are not generally grievous sins, because the full content and implication of such expressions is seldom realized by those who use them. The common imprecations against animate or inanimate objects which cause vexation or pain, those against enterprises which fail of success, so, too, the imprecations that spring from impatience, little outbreaks of anger over petty annoyances, and those spoken lightly, inconsiderately, under sudden impulse or in jest, are, as a rule, only venial sins—the evil being slight and not seriously desired. To call down moral evil upon a rational creature is always illicit, and the same holds good of physical evil, unless it be desired not as evil, but only in so far as it is good, for example, as a punishment for meekness, or a means to amendment, or an obstacle to commission of sin; for in such cases the principal intention, as St. Thomas says, is directed per se towards what is good. When, however, evil is wished another precisely because it is evil and with malice prepense, there is always sin, the gravity of which varies with the seriousness of the evil; if it be of prodigious magnitude, the sin will be grievous. If of trifling character, then the sin will be venial. It is to be noted that merely verbal curses, even without any desire of fulfillment, become grievous sins when uttered against and in the presence of those who are invested with special claims to reverence. A child, therefore, would sin grievously who should curse his father, mother, or grandfather, or those who hold the place of parents in his regard, provided he does so to their very face, even though he does this merely with the lips and not with the heart. Such an act is a serious violation of the virtue of piety. Between other degrees of kindred verbal curses are forbidden only. To curse the sins of another, whether of himself or of another, is forbidden; to curse the sin of another, not of itself a sin; to curse the dead is not ordinarily a grievous sin, because no serious injury is done them, but to curse the saints or holy things, as the sacraments, is generally blasphemy, as their relation to God is generally perceived.

J. H. FISHER.

Cursores Apostolici, Latin title of the ecclesiastical heralds or pursuivants pertaining to the papal court. Their origin is placed in the twelfth century, and they fulfilled for the pontifical government the duties entrusted to heralds by civil states. From the sixteenth century onward they formed part of the Roman Curia in its broader sense, and are at present reckoned members of the pontifical family. Their number is fixed at sixteen, and they are subject to the major-domo. The principal duties of the cursors are to invite those who are to take part in consistory and functions in the papal chapel; to act as servers in the pontifical palace and as doorkeepers of the cloister; to affix papal rescripts to the doors of the greater Roman basilicas; to issue the summons for attendance at canonizations, the principal funerals of cardinals, etc. As the cursors are representatives of the pope, they must be received with the respect becoming the personage in whose name they speak, and their invitation has the force of a judicial summons. In the early ages of the Church, an institution somewhat similar to that of the cursores is found in messengers, chosen from among the clergy, to carry important tidings from one bishop to another bishop to his flock. They were much used in times of persecution and they are frequently referred to in the writings of the Fathers as precones, internatui, etc. As guards of the assembly of the faithful, they were called vigilis. Despite these resemblances to the modern cursores, however, it seems evident that the latter took their rise from the employment of heralds by civil states, rather than from the precones of the early Church. Episcopal courts have likewise cursores or such officers among the clergy.

CAISSON, Mem. jur. can. (Paris, 1890); ANDRAU-WARNE, Dict. du droit can. (Paris, 1901).

WILLIAM H. W. FANNING.

Cursus Mundi (The RUNNER of the WORLD), a Middle-English poem of nearly 30,000 lines containing a sort of summary of universal history. From the large number of manuscripts in which it is preserved, it must have been exceptionally popular. It was originally written, as certain indication and vocabulary clearly show, somewhere in the north of England, but of the author nothing can be learnt except the fact, which he himself tells us, that he was a cleric. He must have lived at the close of the thirteenth and at the beginning of the fourteenth century, and his poem is conjecturally assigned to about the year 1300. In form it is written in eight-syllabled couplets, but in his account of the Passion of Christ the author adopts a new metre of lines of eight and six syllables rhyming alternately. Although the poem deals with universal history, the author contrives to give some sort of unity by linking it about the work of God's redemption. He explains in an elaborate prologue how folk desire to read old romances relating to Alexander, Julius Caesar, Troy, Brutus, Arthur, Charlemagne, etc., and how only those men are esteemed that love "paramours". But earthly love is vain and full of disappointments.

Therefore bless I that paramour [i.e. Our Lady] That in my need does me soucor That saves me on earth from sin And heaven bless me helps to win.

Mother and mayden never-the-less Therefore of her took Jesus flesh.

He goes on to say that his book is written in honour of Mary and purposes to tell about the Old and the New Law and all the world, of the Trinity, the fall of the Angels, of Adam, Abraham, and the patriarchs, then of Christ's coming, of His birth, and of the three nifty, etc., of His public life and of His Passion and Crucifixion, and of the "Harrowing of Hell". Thence he will go on to the Ascension and Assumption, the Acceptation of Our Lady, the Finding of the Cross, and then to Antichrist and to the Day of Doom. As a sort of devotional appendix he also proposes to deal
with Mary's mourning beneath the Cross and of her Conception. This work he has undertaken.

In to English Tongue to rede
For the love of English lede [people]
English lede of England
For the common [folk] to understand.

This ambitious programme is faithfully carried out with considerable literary skill and a devotional feeling quite out of the common. The author shows himself to have been a man of wide reading. Although his main authority for the "Cambridge Scholastics" of Peter Comestor he has made himself acquainted with a number of other books in English, French, and Latin, and his work may be regarded as a storehouse of legends not all of which have been traced to their original sources. Special prominence is given throughout the work to the history of the Cross which for some reason (possibly because St. Helena, the mother of Constantine, was reputed to have been of British birth) was always exceptionally popular in England.

After commending the author's "keen eye for the picturesque", a recent critic, in the "Cambridge History of English Literature", remarks, "The strong humanity that runs through is one of its most attractive features and shows that the writer was full of sympathy for his fellow-men."

The main authority upon the Curser Mundus is the elaborate edition of the "Early English Text Society", and the "Cambridge History" of English literature, of which the best is the "Cambridge History", edited by A. W. Ward (Cambridge, 1907). See also especially Kalden in "English Studien", Vol. XI.

HERBERT THURSTON.

Cururis, a titular see of Africa Proconsularis. The town was fortified about 46 a. c. by P. Attius Varus and C. Considius Longus, generals of Pompey, and proclaimed by Caesar a Roman colony under the name of Colonia Julia Cururis. It is mentioned in Pliny, Ptolemy, "The Itinerary of Antoninus", etc. In 557, Cyprian was exiled to Cururis for refusing to sacrifice to the gods (Vita Pontii, c. xii, d. Hartel, III, and the year following he was called thence to Carthage to be put to death. Four bishops are known (one Donatist), from 411 to 648 (Morelli, Africa christiana, I, 140). Cururis is to-day Kourba, a little town on the coast, between Cape Mustapha and Ras Mamoura. The region is hilly and woolly; it has always been inhabited by more or less savage people, for which reason the Christians were often exiled there. S. VAILHÉ.

Cussack, Thomas F. See NEW YORK, ARCHBISHOP OF.

Cussa, a titular see of Egypt. The Coptic name of this town was Kósóü; in Greek it becomes Kousos, Akousa, Akousa, Koussis, Kousai, Kousni; in Latin we find Cussa, Cussa, Chusse, etc. It is now the fellah-town, El-Koshlyet (El-Koshlyat, El-Kosldje, El-Kuslyat, Qushlyat), on the western bank of the Nile, inland between the railway stations Dréit el-Sherif and Montfalòt. Near it stands Deir-el-Moharaj, the largest, richest, and most peopled of the seven great Coptic monasteries; the Holy Family is said to have sojourned there and it is the centre of an important pilgrimage. The city figures in the "Syrismeniou of Hierocles (730, 9), Georgius Cyprius (764), and Parthey's "Notitia Prima" (about 840). It was a saffron of Antioch in the Thebas Prima. Lequien (II, 597) mentions two bishops, Achilles, a Melitian, in 322, and Theonas, present at Constantinople in 535. Cussa is bishop of Kyrenia in the southern part of the Great Asia, now Dush el-Kal'a.

BRUSCHI, Geogr. des alten Aegypten, I, 222; BARDEH, Aegypten (1881), part II, 45; JULLIEN, L'Egypte, Mouvement historique et chrétien (Lille, 1890), 248.

S. PETRIDIÉ.

Cush (son of Cham; D. V. Chua), like the other names of the ethnological table of Genesis, is the name of a race, but it has generally been understood to designate also an individual, the progenitor of the nations and tribes known in the ancient world as Cushites. The list of the Cushites is given in Gen., x, 7-8. The country known to the Greeks as Ethiopia is called Cush (Heb. Каš). In the Bible. In its broadest extension the term designated the region south of Assuan, on the Upper Nile, now known as Nubia, Sennaar, Kordofan, and northern Abyssinia. This region is referred to in Egyptian inscriptions as Keš or Kaš. More often, however, the name Cush was given to a part of the territory just mentioned, called by the Greeks the Kingdom of Meroë, at the confluence of the Nile and the Astaboras (now Tchad). It is from this kingdom that came the eunuch of Candace, Queen of Ethiopia (Acts, viii, 26-40). Cush was long a powerful nation. In the course of the eighth century, n. c., its Kings became rulers of Egypt. Shabitiku, one of them, was the principal opponent of the great Sennacherib, King of Assyria. It was in vain that Isaiah warned his people not to place their trust in such princes (Is., xviii, 1; xx, 9).

The African Cush is best known; but there were Cushites in Asia. The "land of Cush" of Gen., ii, 13 (Heb. text), watered by the Gheon, one of the four rivers of Paradise, was doubtless in Asia. Regma, Saba, and Dadan (Gen., x, 7) were in Arabia. The Cushite wife of Manahel, Queen of Cushan (Ex., ii, 16, 21; Num., xii, 1—Heb. text). Nemrod, son of Cush, rules over cities in the valleys of the Euphrates and Tigris (Gen., x, 8—12). This text points to the foundation of the first empire in this region by Cushites. It is chiefly the relics of a Semitic civilization that have been brought to light by archaeological discoveries. But traces are not lacking, according to competent scholars, of an older civilization.

W. S. HEILY.

Cuspinian (properly Spieshaw or Spiesham), Johannes, distinguished humanist and statesman, b. at Schweinfurt, Lower Franconia, in 1473; at Vienna, 19 April, 1529. In 1490 he matriculated at the University of Leipzig, went to the University of Vienna (1493) to continue his humanistic studies, and in 1494 entered there on a course of medicine. At this early age he edited the "Liber Hymnorum" of Prudentius, and made a reputation by his lectures on Virgil, Horace, Sallust, and Cicero. He was acquainted with Emperor Frederick III. In 1493, in reward for a panegyric on the life of St. Leopold of Austria, he was crowned as poet laureate and received the title of Master of Arts from Maximilian. Soon after this he was made a doctor of medicine, and in 1500 rector of the university. Maximilian made him his confidential counsellor and appointed him curator of the university for life. Cuspinian also received the position of chief librarian of the Imperial Library, and superintendent of the archives of the imperial family. As curator of the university he exercised great influence on its development, although he was not able to prevent the decline caused by the political and religious disturbances of the second decade of the sixteenth century. He was on terms of friendship with the most noted humanists and scholars; the calling of his friend Celtes (q. v.) to Vienna is especially due to him. Celtes and he were the leading spirits of the literary association called the "Sodomaian litterarius club". In 1515 Cuspinian was prefect of the city of Vienna. Emperor Maximilian, also Charles V at a later date, sent him on numerous diplomatic missions to Hungary, Bohemia, and Poland. He brought about a settlement of the disputed succession between
the Hapsburg line and the King of Hungary and Bohemia; another of his missions was to accompany Bona Sforza, the bride of King Sigismund of Poland, to Cracow. His literary activity covered the most varied domains. Although his poetical writings are of little importance, and his manuscript "Collectanea medicinae" of no great value, nevertheless he attained a high reputation as a collector and, to some degree, as an editor of ancient and medieval manuscripts. Among other publications, he edited in 1611 L. Florus, in 1515 the "Libellus de lapidibus" of Marbodius, and the medieval chronicler Otto von Freising. Important as a contribution to the study of ancient history is the publication which first appeared, after his death in 1553, namely, "De Pasti consuetudine", which edited the "Chronicle" of Cassiodorus and the "Breviarium" of Sextus Rufus. Another valuable work of Cuspinian is the "History of the Roman Emperors" prepared during the years 1512-22 (in Latin, 1540, and in German, 1541). For a long time, especially after the battle of Mohács, he busied himself with the Turkish question and printed both political and historical writings on the subject, the most important of which is his "De Turcarum origini, religioni et tyrannide". His best work is "Austriae sive Commentarius de rebus Austriæ", etc., edited by Brusch in 1553 with critical notes. A kind of diary (1600-84) with remarks on light on his public and private activity, was published in "Fontes rerum austriacarum" (1885), I, 1 sqq. A life of Cuspinian, not always reliable, is found in the complete edition of his works by Gerbelius (Commentationes Cusp., Strasbourg, 1540); a more complete edition of his works appeared at Frankfort in 1601.

JOSEPH SAUER.

**CUSTOM** (in Canon Law) is an unwritten law introduced by the consent of the faithful with the consent of the legitimate legislator. Custom may be considered as a fact and as a law. As a fact, it is simply the frequent and free repetition of acts concerning the same thing; as a law, it is the result and consequence of that fact. It is derived from consuetudo or conuacefacio and denotes the frequency of the action. (Cap. Consuetudo v. Dist. i.)

I. Division.—(a) Considered according to extent, a custom is universal, if received by the whole Church; or general (though under another aspect, particular), if an entire community adopts it; special, if it obtains among smaller but perfect societies; or most special (specialissima) if among private individuals and imperfect societies. It is obvious that the last-named cannot elevate a custom into a legitimate law. (b) Considered according to duration, custom is prescriptive or non-prescriptive. The former is qualified, according to the amount of time requisite for a custom of fact to become a custom of law, into ordinary (i.e. ten or forty years) and immemorial. (c) Considered according to method of introduction, a custom is judicial or extrajudicial. The first is that derived from forensic usage or precedent. This is of great importance in ecclesiastical circles, as the same prelates are generally both legislators and judges, i.e. the pope and bishops. Extrajudicial custom is introduced by the people, but its sanction becomes the more easy the larger the number of learned or prominent men who embrace it. (d) Considered in its relation to law, a custom is in accordance to law (jus actum legem) when it interprets or confirms an existing statute; or beside the law (prater legem) when no written legislation on the subject exists; or contrary to law (contra legem) when it derogates from or abrogates a statute already in force.

II. Conditions.—The true efficient cause of an ecclesiastical custom, in as far as it constitutes law, is solely the consent of the competent legislating authorities. All church laws, though spiritual jurisdiction, which resides in the hierarchy alone, and, consequently, the faithful have no legislative power, either by Divine right or canonical statute. Therefore, the express or tacit consent of the church authority is necessary to give a custom the force of an ecclesiastical law. This consent is denominated when only expressed and antecedently, reasonable customs receive approbation. Ecclesiastical custom differs, therefore, radically from civil custom. For, though both arise from a certain conspiration and accord between the people and the lawgivers, yet in the Church the entire juridical force of the custom depends upon the acquiescence of the hierarchy, while in the civil state, the people themselves are one of the real sources of the legal force of custom. Custom, as a fact, must proceed from the community, or at least from the action of the greater number constituting the community. These actions must be free, uniform, frequent, and public, and performed with the intention of imposing an obligation. The usage, of which there is question, must also be of a reasonable nature. Custom either introduces a new law or abrogates an old one. But a law, by its very concept, is an ordination of reason, and so no law can be constituted by an unreasonable custom. Moreover, as a statute is given to the people except for just cause, it follows that the custom which is to abrogate the old law must be reasonable, for otherwise the requisite justice would be wanting. A custom, considered as a fact, is unreasonable when it is contrary to Divine law, positive or natural; or when it is prohibited by proper ecclesiastical authority; or when it is the occasion of sin and opposed to the common good.

A custom must also have a legitimate prescription. Such prescription is obtained by a continuance of the act in question during a certain length of time. No canonical statute has positively defined what this length of time is, and so its determination is left to the wisdom of canonists. Authors generally hold that for the legalizing of a custom in accordance with or beside the law (jus actum or prater legem) a space of ten years is sufficient; while for a custom contrary (contra) to law custom and demand of the people must be given for the necessity of so long a space as forty years is that the community will only slowly persuade itself of the opportuneness of abrogating the old and embracing the new law. The opinion, however, which holds that ten years suffices to establish a custom even contrary to the law may be safely rejected. It is to be noted, however, that the Roman Congregations scarcely tolerate or permit any custom, even an immemorial one, contrary to the sacred canons. (Cf. Gasparri, De Sacr. Ordin., n. 53, 69 sqq.)

In the introduction of a law by prescription, it is assumed that the custom was introduced in good faith, or at least through ignorance of the opposite law. If, however, a custom is introduced through connivance (vid. connivencia), good faith is not required, for, as a matter of fact, bad faith must, at least in the beginning, be presumed. As, however, when there is question of connivance, the proper legislator must know of the formation of the custom and yet does not oppose it when he could easily do so, the contrary law is then supposed to be abrogated directly by the tacit revocation of the legislator. A custom which is contrary to good morals or to the natural or Divine positive law is always to be rejected as an abuse, and it can never be legal. It is a custom constituting a new law in the strict sense of the word;
Its effect is rather to confirm and strengthen an already existing statute or to interpret it. Hence the axiom of jurists: Custom is the best interpreter of laws. Custom, indeed, considered as a fact, is a witness to the true sense of a law and to the intention of the legislator. If, then, it brings about that a determinate sense be obligatorily attached to an indeterminate legal phrase, it takes rank as an authentic interpretation of the law and as such acquires true binding-force. Wernz (Jus Decretalium, n. 191) refers to this same principle as explaining why the oft-recurring phrase in ecclesiastic law, "this is, the expression, "this is, the Church, approved by the Holy See," indicates a true norm and an obligatory law. (b) The second species of custom (præter legem) has the force of a new law, binding upon the entire community both in the internal and external forum. Unless a special exception can be proved, the force of such a custom extends to the introduction of prohibitive, permissive, and preceptive statutes, as well as to penal and nullifying enactments. (c) Thirdly, a custom contrary (contrar) to law has the effect of abrogating, entirely or in part, an already existing ordinance, for it has the force of a new law. As regards ecclesiastical legislation, such a custom may directly remove an obligation in conscience, while the duty of submission to the punishment for transgressing the old precept may remain, provided the punishment in question be not a censure nor so severe a chastisement as necessary punishment by law. On the other hand, this species of custom may also remove the punishment attached to a particular law, while the law itself remains obligatory as to its observance. Immemorial custom, provided it be shown that circumstances have so changed as to make the custom reasonable, has power to abrogate or change any human law, even though a clause had been originally added to it for bidding any custom to the contrary. To immemorial custom is also attached the unusual force of inducing a presumption of the existence of an Apostolic privilege, provided the said privilege be not reckoned among abuses, and the holder of the presumed privilege be a person legally capable of acquiring the thing in question without first obtaining a special and express Apostolic permission for it (cf. Wernz, op. cit., who has been followed particularly in this paragraph). Ferraris notes that no immemorial custom, if it be not confirmed by Apostolic privilege, express or presumption, has the force for the abrogation of ecclesiastical liberties or immunities, inasmuch as both canon and civil law declare such custom to be unreasonable by its very nature. In general, it may be said that a valid custom, both in the constitution and the abrogation of laws, produces the same effects as a legislative act.

IV. CONCERNING TRIDENTINE DECREES.—A special question has been raised by some canonists as to whether the laws of the Council of Trent may be changed or abrogated by custom, even if immemorial, or whether all such contrary customs should not be respected. Some of them maintain that their denial of the value of contrary customs to ordinary, some also to immemorial ones (cf. Lucidi, De Via Sac. Lim., I, ch. iii, n. 111). It is unquestionably a general principle in canon law, that custom can change the disciplinary statutes even of oecumenical councils. The main reason for rejecting this principle in favour of the Tridentine enactments in particular is that any contrary custom would certainly be unreasonable and therefore unjustifiable. It is by no means evident, however, that all such contrary customs must necessarily be unreasonable, as is plain from the fact that some authors allow and others deny the value of such regulations. It is in cases, even when they agree in reproving the force of ordinary customs. As a matter of fact, there is no decree of the Sacred Congregation of the Council which declares, absolutely and generally, that all customs contrary to the laws of the Council of Trent are invalid. Moreover, the Tribunal of the Rota has allowed the force of immemorial customs contrary to the disciplinary decrees of Trent, and the Sacred Congregation of the Council has not least tolerated them in cases in which the salient instance of the Roman official view is the statement of the Holy Office (11 March, 1868) that the Tridentine decrees on clandestine marriages, even after promulgation, was abrogated in some regions by contrary custom (Collect. S. C. de Prop. Fid., n. 1408). The confirmation of the Council of Trent by Pope Pius IV (26 Jan., 1564; 17 Feb., 1565) abolishes, it is true, all contrary existing customs, but the papal letters contain nothing to invalidate future customs. Owing to the comparatively recent date of the Council of Trent and the urgency of the Holy See that its decrees be observed, it is not easy for a contrary custom to arise, but whenever the conditions of a legitimate custom are fulfilled, there is no reason why the Tridentine decrees should be more immune than those of any other oecumenical council (cf. Laurentius, op. cit., below, n. 307).

CUSTOMS.—Any custom is to be rejected whose existence as such cannot be proved legally. A custom is a matter of fact, and therefore its existence must be tested in the same way as the existence of other alleged facts is tested. In this particular, the decrees of synods, the testimony of the imperial ordinances and of other persons worthy of credit are of great value. Proofs are considered the stronger the more closely they approximate public and official monuments. If there be a question of proving an immemorial custom, the witnesses must be able to affirm that they themselves have been cognizant of the matter at issue for a space of at least forty years, that they have heard it referred to by their progenitors as something always observed, and that neither they nor their fathers have ever been aware of any fact to the contrary. If the fact of the existence of an alleged custom is not sufficiently proved, it is to be rejected as constituting a source of law. Customs may be revoked by a competent ecclesiastical legislator, in the same way and for the same reasons as other ordinances are abrogated. A later general law contrary to a general custom will nullify the latter, but a particular custom will not be abrogated by a general law, unless a clause to that effect be inserted. Even in such a case it will not be the abrogation of the custom itself but of the abrogation of immemorial customs. The latter must be mentioned explicitly, for they are held not to be included in any general legal phrase, however sweeping its terms may be. Customs may likewise be abrogated by contrary customs, or they may lose their legal force by the mere fact that they fail into desuetude. Finally, an authentic declaration that a custom is absolutely contrary to good morals (rumens nervum discipline) and detrimental to the interests of the hierarchy or of the faithful deprives it of its supposed legal value.

WILLIAM H. W. FANNING.

CUSTOS (1), an under-sacristan. (See SACRISTAN.)

(2) A superior or an official in the Franciscan Order. The word has various acceptations in ancient as well as in modern Franciscan legislation. Nor do the three great existing branches of the order—the Friars Minor, Conventuals, and Capuchins—attach the same meaning to the term at the present day. Saint Francis sometimes applies it to an ordinary order—guardians, provincials, and even to the general (see Rule, IV and VIII, and Testament). Sometimes he restricts it to officials presiding over a certain number of convents in the larger provinces of the
order with restricted powers and subject to their respective provincials. It is in this latter sense that he refers (Rule, VIII) to the custodes as having power,窜写发 the provincials, to elect and to depose the minister general. The convents over which a custos (in this latter sense) presided were collectively called a custodia. The number of custodies in a province varied according to its extent. Already at an early period it was deemed expedient that only one of the several custodies should possess a seat in the general chapter with his respective provincial for the election of the minister general, although the rule accorded the right of vote to each custos. This custom was sanctioned by Gregory IX in 1230 ("Quo elongato", Bull. Rom., III, 450, Turin edition) and by other popes, evidently in the view to invent unessential expense. The custos thus chosen was called Custos custodium, or, among the Observantines until the time of Leo X ("Ite et vos", Bull. Rom., V, 694), discretus discretorum. This ancient legislation, which has long since ceased in the Order of Friars Minor, still obtains in the Order of Friars Minor Conventuals, as may be seen from their constitutions confirmed by Urban VIII (see below). The present-day legislation on the point among the Capuchin and Friars Minor may be briefly summed up as follows: In the Capuchin Order there are two kinds of custodes—custodes general and provincial. Two custodes general are elected every three years at the provincial chapters. The first of these has a right to vote at the election of the minister general should a general chapter be held during his term of office. Besides, he has the obligation of presenting to the general chapter an official report of the state of his province. The provincial custodes, on the contrary, have no voice in the general chapters, and their rights and duties are much restricted and unimportant. In the constitutions of the Order of Friars Minor there is also mention of two kinds of custodes—one called custos province, the other custos regimini. The former is elected at the provincial chapter and holds office for three years. Besides having a voice in all capitular acts of his province he takes part in the general chapter, should his provincial be impeded. The custos regimini is a prelate who rules over a custody, or small province. He possesses ordinary juridical and spiritual rights and privileges of a provincial. The number of convents in a custodia regimini ranges from four to eight.

GREGORY CLEARY.

Cuthbert, Saint. Bishop of Lindisfarne, patron of Durham, b. about 635; d. 20 March, 687. His emblem is the head of St. Oswald, king and martyr, which he is represented as bearing in his hands. His feast is kept in Great Britain and Ireland on the 20th of March, and he is patron of the Diocese of Hexham and Newcastle, where his commemoration is inserted among the Suffrages of the Saints. His early biographers give no particulars of his birth, and the accounts in the "Libellus de ortu", which represent him as the son of an irish king named Muridach, though corrected by Cardinal Moran and Archbishop Healy, are rejected by later English writers as legendary. Moreover St. Bede's phrase, Britannia ... genuit (Vita Ceratina, c. i.), points to his English birth. He was probably born in the neighbourhood of Mairros (Melrose) of lowly parentage, for as a boy he used to tend sheep on the mountain-sides near that monastery. While still a child living with his foster-mother and having his education from a little priest, these two circumstances had a lasting effect on his character. He was influenced, too, by the holiness of the community at Mairros, where St. Eata was abbot and St. Boisil prior. In the year 651, while watching his sheep, he saw in a vision the soul of St. Aidan carried to heaven by angels, and inspired by this became a monk at Mairros. Yet it was not until several years after the death of the country hindered him from carrying out his resolution at once. Certain it is that at one part of his life he was a soldier, and the years which succeed the death of St. Aidan and Osuin of Deira seem to have been such as would call for the military service of most of the able-bodied men of Northumbria, which was constantly threatened at this time by the ambition of its southern neighbour, King Penda of Mercia. Peace was not restored to the land until some four years later, as the consequence of a great battle which was fought between the Northumbrians and the Mercians at Winwickfield. It was probably after this battle that Cuthbert found himself free to turn once more to the life he desired. He arrived at Mairros on horse-back and armed with a spear. Here he soon became eminent for holiness and learning, while from the first his life was distinguished by a perpetual asceticism. He was consecrated to the monastery at Ripon he went there as guest-master, but in 661 he, with other monks who adhered to the customs of Celtic Christianity, returned to Mairros owing to the adoption at Ripon of the Roman Usage in celebrating Easter and in other matters. Shortly after his return he was struck by a pestilence which then attacked the community, but he recovered, and became prior in place of St. Boisil, who died of the disease in 664. In this year the Synod of Whitby decided in favour of the Roman Usage, and St. Cuthbert, who accepted the decision, was sent by St. Eata to be prior at Lindisfarne, in order that he might introduce the Roman customs into that house. This was a difficult matter which needed all his gentle tact and patience to carry out successfully, but the fact that one so renowned for sanctity, who had himself been brought up in the Celtic tradition, was loyally conforming to the Roman use, did much to support the adoption of the latter by the church of God. Cuthbert's influence on his time was very marked. At Lindisfarne he spent much time in evangelizing the people. He was noted for his devotion to the Mass, which he could not celebrate without tears, and for the success with which his zealous charity drew sinners to God.

At length, in 676, moved by a desire to attain greater perfection by means of the contemplative life, he retired, with the abbot's leave, to a spot which Archbishop Eyre identifies with St. Cuthbert's Island near Lindisfarne, but which Raine thinks was near Harbourn, where "St. Cuthbert's Cave" is still shown. Shortly afterwards he removed to Farne Island, opposite Bamborough in Northumberland, where he gave himself up to a life of great austerity. After some years he was called from this retirement by a synod of bishops held at Twyford in Northumberland, under St. Theodore, Archbishop of Canterbury. At this meeting he was elected Bishop of Lindisfarne, as St. Eata was now translated to Hexham. For a long time he withstood all pressure and only yielded after a long struggle. He was consecrated at York by St. Theodore in the presence of six bishops, at Easter, 684. For two years he continued as bishop, devoting himself to labouring without intermission, with wonderful results. At Christmas, 686, foreseeing the near approach of death, he resigned his see and returned to his cell on Farne Island, where two months later he was seized with a fatal illness. In his last days, in
March, 687, he was tended by monks of Lindisfarne, and received the last sacraments from Abbot Herefrid, to whom he spoke his farewell words, exhorting the monks to be faithful to Catholic unity and the traditions of the Fathers. He died shortly after midnight, and at exactly the same hour that night his friend, Eadwald, the hermit, also died, as St. Cuthbert had predicted.

St. Cuthbert was buried in his monastery at Lindisfarne, and his tomb immediately became celebrated for remarkable miracles. These were so numerous and extraordinary that he was called the Wonderworker of another age. The first translation of the relics took place, and the body was found incorrupt. During the Danish invasion of 875, Bishop Eardulf and the monks fled for safety, carrying the body of the saint with them. For seven years they wandered, bearing it first into Cumberland, then into Galloway and back into Northumberland. In 883 it was placed in a church at Chester-le-Street, near Durham, given to the monks by the converted Danish king, who had a great devotion to the saint, like King Alfred, who also honoured St. Cuthbert as his patron and was a benefactor to this church. Towards the end of the tenth century, the shrine was removed to Ripon, owing to a Danish invasion. A few months later it was being carried back to be restored to Chester-le-Street, when, on arriving at Durham a new miracle, tradition says, indicated that this was to be the resting-place of the saint's body. Here it remained, first in a chapel formed of boughs, then in a wooden and finally in a stone church, built on the present site of Durham cathedral, and finished in 998 or 999. While William the Conqueror was ravaging the North in 1069, the body was once more removed, this time to Lindisfarne, but it was soon restored. In 1104, the shrine was transferred to the present cathedral, when there it remains to the present day. It has been declared a national monument.

Cuthbert was excellent in the Gospels and his moralism and monasticism were qualities that marked him as a seventh-century saint of the Church. His body is believed to be the same as that of the infant St. John (now in possession of the Jesuit College at Stonyhurst, England) found in 1105 in the grave of St. Cuthbert.

The Historia Translatioz was printed by the Bollandists (loc. cit.) and the text of the translation was copied from an imperfect and erroneous copy, and must be used with caution, their version being superseded by the Surtees edition and that printed in the Rolls Series. EDWIN BURTON.

Cuthbert, Abbot of Wearmouth, a pupil of the Venerable Bede (d. 735). He was a native of Durham, but the dates of his birth and death are unknown. Becoming a monk at Jarrow, he studied under St. Bede and acted as his secretary, writing various works from his dictation. Bede dedicated to his work "The De Mortibus et Vita, when Bede died, and wrote to Cuthwin, one of his fellow-pupils, a detailed account of all that happened.

OCTHERT 579 OCTHERT
after the death of Huibert, who succeeded Ceolfrid as Abbate of Wearmouth, Cuthbert was elected in his place. His correspondence with Lullus, the disciple and successor of St. Boniface, Archbishop of Mainz, is still preserved. He is also supposed to have written many other letters now lost. Priscus mentions a manuscript bearing his name which contains an addition to Bede's Ecclesiastical History. His letter describing Bede's death is also worthy of note because of the mention therein of the Rogation procession with the relics of the saints.

G. E. HIND.

Cuthbert, Archibishop of Canterbury, date of birth not known; d. 25 October, 758. He is first heard of as Abbate of Lingham, Kent. consecrated bishop by Archbishop Nothelm, he succeeded Wahlotod in the See of Hertford in 736 and was translated to Canterbury about 740. Journeying to Rome he received the pallium, and on his return assisted at the Council of Clovesho in 742. At this council Ethelbald, King of Mercia, confirmed many privileges to churches and monasteries. His friendship with St. Boniface, Archbishop of Mainz, accounts for the intimate knowledge that St. Boniface had of the evil life of Ethelbald, which prompted the saint to correspond with the king in the hope of inducing him to reform. Cuthbert, in obedience to the wish of Pope Zachary, called a second Council of Clovesho, in 747, which formulated many canons for the guidance of monastic life and the duties of bishops and priests. It especially insisted on catechetical instruction being given in the English tongue. The proceedings of this council were sent to St. Boniface and prompted him to act similarly in Germany. Some have thought that St. Boniface took the initiative and not Cuthbert, but most now admit that the proceedings in Germany for promoting a greater union with Rome took place after this council of Clovesho and in imitation of Cuthbert brought about a great change with regard to the precedence of the Cathedral Church of Canterbury. Christ Church, Canterbury, was considered inferior in dignity to the Church of Sts. Peter and Paul where all the archbishops were interred. The parish of St. Paul's is the See of the archbishops at Christ Church and King Eadbert confirmed this. A chapel was then built at the east end of the cathedral dedicated to St. John the Baptist to serve as the baptistery, the court of the archbishops and their place of burial. Fearing opposition from the monks of St. Peter and Paul, church Cuthbert was stealthily buried in the new chapel several days before his death was generally known. From that time until the Conquest at least, every Archbishop of Canterbury except one was buried at Christ Church. A letter of his to Lullus, Archbishop of Mainz, is still extant and also two short poems preserved by William of Malmsbury. Leland speaks of a volume of his epigrams in the library of Malmsbury Abbey. This volume is now lost.

Cuthbert, College of Saint Paul. See Ushaw.

Cuyabá, Diocese of (Cuyabenses), suffragan of São Sebastião (Rio de Janeiro), Brazil. The city, founded by miners about 1720, became the capital of the province of Matto Grosso in 1840. The present population is somewhat more than 5,000. The prelature of Cuyabá, erected by Bull of Benedict XIV, 'Candor lucis aternae' (6 Dec., 1745), was raised to the rank of a bishopric (9 Nov., 1779) by Bull of Leo XIII, 'Sola Ecclesia Christi gregis' (15 July, 1826). The diocese embraces the province of Matto Grosso, an area of 532,705 sq. miles, and has a Catholic population of 100,700, with 17 parishes, 20 churches, 12 secular priests and 10 regulars. BATTANDIER, Ann. pont. cath. (1906); HERDEN, Konzilia-Loz., s. v.; WERNER, Orbis terrarum Cath. (Freiburg im Br., 1800), 213.

Cuyo. See San Juan de Cuyo.

Cuzco, Diocese of (Cuzcos), suffragan of Lima, Peru. The city of Cuzco, capital of the department of the same name, is located on the eastern end of the Knot of Cuzco, 11,000 feet above sea-level. The original capital is said to have been founded in the eleventh century, was destroyed by Pizarro in 1535. There is still remains, however, of the palace of the Inca, the Temple of the Sun, and the Temple of the Virgins of the Sun. Among the most noteworthy buildings of the city is the cathedral over 15,000. The diocese, erected by Paul III (5 Sept., 1536), comprises the departments of Cuzco and Apurimac, an area of 21,677 sq. m., containing a Catholic population of 480,000, with 106 parishes, 650 churches and chapels, 150 priests, a seminary, and school. BATTANDIER, Ann. pont. cath. (Paris, 1906); Ann. ecle. (Rome, 1906).

F. M. RUDGE.

Oyebatra, a titular see of Cappadocia in Asia Minor. Ptolemy (5, 7, 7) places this city in Lycosia; Strabo (12, 535) in Cilicia; Cicero (Epist. ad frius, 15, 2) 4) in Cappadocia, near the boundary of Cilicia, and not far from Taurus. It is mentioned as a suffragan of Tyana, metropolis of Cappadocia Secunda,
in the "Synecdemus" of Hierocles (700), and in some early "Notitiae episcopatum". It was captured by Harun in 805, and by Almanman in 832. Afterwards, probably in the eleventh century, it was made an independent archbishopric (Farthey's Notitiae, 10 and 11); it remained a Byzantine possession and a great part of Cappadocia had passed into Turkish hands. From the eighth to the eleventh centuries we hear often of a fortress Heraclia, now known to have been near (Cibistra and united with it in one bishopric (Notitiae, 10). The name of this fortress has been preserved in the modern form, Eregli, a poor village and a castrum in the village of Konia. Five bishops are quoted by Lequien (I, 403); the first was present at Nicea in 325, the last at Constantinople at the end of the twelfth century. 

**S. PÉTRIDÉS.**

**Cyclades.** A group of islands in the Εgean Sea. The ancients called by this name only Delos and eleven neighbouring islands, Andros, Tenos, Mykonos, Siphnos, Serifos, Naxos, Syros, Paros, Kythnos, Keos, and Gyaros. According to mythology they were nymphs metamorphosed into rocks for having refused to sacrifice to Poseidon. They are in fact remains of an ancient continent that disappeared in the tertiary epoch. Successively Cretan, Dorian, and Ionian colonies, they were made subject to Athens by Miltiades. Under Byzantine rule the Dodékanoso (twelve islands) were included in the fifth European theme. Plundered by the Saracens in the seventh and eight centuries, they became, after the Fourth Crusade, a duchy belonging to the Venetian families of Sanudo and Crispo. The Turks conquered them in the sixteenth century. The Cyclades are now a nomos, or department, of Greece, but under this name are comprised also Melos, Kimolos, Sikinos, Amorgos (birthplace of Simonides), Thera or Santorin, Ios, Anaphe, and other islands between them. The population is about 130,000. Silk, wine, cotton, fruit, sponges, marble (Paros), and emery (Naxos), are the chief products. There is also a coasting trade; Hermoupolis in Syros is an important port.

There were in the Cyclades many Greek sees suffragan to Rhodes. Under the Frankish rule, Latin sees were also established at Naxos, Andros, Keos, Syros, Tenos, Mykonos, Ios, Melos, and Thera, as suffragans of Rhodes and Athens, later only of Naxos. The Archbishop of Naxos included Andros until 1822. An archbishop of Paros died in 1879. It has 500 Catholics, some 10 churches or chapels, and 10 priests. Among the latter are Capuchins, and Oblates of St. Francis de Sales; Ursuline nuns conduct the schools. Naxos and Paros were Greek bishoprics early united under the name of Paroxnaxia. It was a metropolitan see in 1088, and its episcopal list is in Lequien (I, 937). Several of its metropolitanates united with Rome from the fourteenth to the eighteenth century. The list of the Latin archbishops is in Lequien (III, 1001). Gama (448), and Eubel (I, 375, II, 221). The See of Naxos is now confided to the Bishop of Paros as administrator apostolic. Andros was likewise a Greek see; its episcopal list is in Lequien (I, s. v.). The Latin list is found there also (III, 559), in Gams (449), and more complete in Eubel (I, 89, II, 99). From 1702 the see was administered by a vicar-Apostolic dependent directly on Rome; and in 1824 it was confided to the Bishop of Tenos.

Melos (Milo) is famous for the statue of Venus found there; it has thermal springs and saltlaturas, and there are ruins of the ancient city. The Greek episcopal list is in Lequien (I, 945). The Latin list is also in Lequien (III, 1053), and in Gams (449); see also Eubel (I, 355, II, 221). In 1702 the see was united with Naxos and in 1830 with Thera. The list of the Latin bishops of Keos (Cea, Zea) is in Lequien (III, 867), Gams (449), Eubel (I, 194, II, 143). Ios (Nio, Nea), according to tradition the site of Homer's death, had a series of Latin bishops (see Lequien, III, 1135, and Gams, 448). As to Mykonos (Moene) we know only that the see was united with Tenos as early as 1400. (See Syros, Tenos, and Thera.)

**S. PÉTRIDÉS.**

**Cycle.** See Calendar.

**Cycle (Dionysian).** See Chronology.

**Cydonia**, a titular see of Crete. According to old legends Cydonia (or Kydonia) was founded by King Kydon, on the northwest shore of Crete. It was afterwards occupied by the Achaeans and Ασιολιανοί, but remained one of the chief cities of the island till it was taken by Q. C. Metellus (a. n. 69). The Venetians rebuilt and fortified it in 1252; it was taken by the Turks in 1645. The Arabs called it Rabhib el-Djebn, the modern Greeks and Turks Khania, the Western peoples Canea. Lequien (II, 272) knows of only two Greek bishops: Sebon, in 418, and Nictas, in 692. Gams (404) adds Meliton, in 737. After the Frank occupation there was in Crete a Latin see, Agrienis, or Aegeanis, which must have been the same as that of Cydonia, or Canea. Lequien (III, 923–928) knows of sixteen Latin bishops, from 1310 to 1645. Eubel (I, 76; II, 93) numbers seventeen for the period from about 1300 to 1481 (see also ibid., II, 312). The last occupant retired to Italy when the city had been taken by the Turks. The population of Canea is now about 20,000, mostly Greeks, with 200 Latins. It was the residence of the Latin Bishop of Candia, after the see had been re-established by Pius IX. The Catholic parish is held by Capuchins. There are some Christian Brothers and Sisters of St. Joseph de l'Apparition, with two schools and an orphanage. Canea still remains a Greek see. (See Canea; Candia.)

**S. PÉTRIDÉS.**

**Cyme,** a titular see of Asia Minor. Kyme (Doric, Kyme) was a port on the Kymania Kolpos (Tzendarli Bay), the most important city of Ασις, and was founded by the Ασιολιανοί about the eleventh or the thirteenth century B.C., according to old traditions, by Pelops on his return from Greece. After defeating Oenomano and expelling the native inhabitants, he gave the city the name of the Amazon Kyme. Another uncommon name was Phrykonia. Cyme is mentioned in the "Synecdemus" of Hierocles and in the "Notitiae episcopatum" as late as the thirteenth or fourteenth century. Five bishops are mentioned in Lequien (I, 729), from 431 to 787. There was another John, in 1218. Cyme is identified with the small village of Lamourt, in the vilayet of Smyrna. The name is sometimes transcribed Cume, or even Cume, possibly a source of confusion with Cuma in Italy. There was also a Cyme in Αίγυπτος Secunda, a suffragan of Cebasa.

**S. PÉTRIDÉS.**

**Cynewulf.** That certain Anglo-Saxon poems still extant were written by one Cynewulf is beyond dispute, for the author has signed his name in them by spelling it out in runes letters which may be so read as to make sense in the context of the poem. It is, however, quite uncertain who this Cynewulf was. Despite strong expressions of opinion to the contrary, there seems good reason for identifying him with Cynewulf, Bishop of Lindisfarne, though Professor A. S. Cook of Yale advocates the claims of a certain Cynulf, an ecclesiastic whose signature appears on the Decrees of the Council of Clovesho in 803, and who may or may not have been a priest of the Diocese of Dunwich. In any case it has been conclusively shown of late that Professor
CYNIC

CYPRIAN

Cock's chief reason for rejecting the bishop's claim, viz. the supposed dependence of some of Cynewulf's poems on Aeclin's "De Trinitate", written about 602, is baseless (see C. P. Jones in Pup, of. Mod. Lang. Ass'n, of N. Am. X V I I I , 308). Nevertheless, he has possibly derived certain knowledge from Cynewulf's poem, the only certain knowledge of Cynewulf's verse is derived from what he tells us of himself in the four runic passages. He had received gifts in a hall amid scenes of revelry, which may mean that he had been in youth a sort of gleeman or minstrel. He was converted, and his writings were devoted himself; but now, in old age he still dreaded the punishment of past sins. Four poems, the "Christ", the "Elenel", the "Juliana" and the "Fates of the Apostles" may be attributed to Cynewulf with certainty in virtue of their runic signatures. The "Christ", as it is preserved in "The Exeter Book", is a version of the hymn of the Advent of Christ, the Ascension, and His second coming upon Doomsday. As in all the other poems the writer shows literary gifts of a very high order and must evidently, from his knowledge of earlier writers, especially St. Gregory, have been a man of considerable learning. The poem "Christ" be paraphrases several of the anthems, known as the great O's, in the Advent liturgy and in doing so introduces passages of much beauty breathing the most intense devotion to Our Blessed Lady (cf. II. 35-49, 71-103, etc.), and differing little in feeling from such passages of the English language as are sixty centuries old. The poem also contains a remarkable testimony (I. 1307-1326) to the practice of confession. "Juliana", also preserved in "The Exeter Book", is a poetical version of the Acte of the martyrdom of St. Julian. The "Elenel", with these next mentioned, became known only in 1836 upon the discovery of the Vercelli code, Anglo-Saxon manuscript in prose and verse, which for some unknown reason had found its way to Vercelli in Italy. The "Elenel" is generally reputed Cynewulf's masterpiece. It contains a narrative based on earlier Latin legends of the discovery of the true Cross by St. Helen. The "Fates of the Apostles" is a fragment chiefly important as forming a connecting link between Cynewulf who signs it, and the kindred poem "Andreas" in the same manuscript. This also is consequently by most authorities assigned to Cynewulf, though Knapp, its latest editor (Boston, 1869), regards it as the work of another, possibly a source of inspiration to Cynewulf. The remaining works conjecturally attributed to this poet the beautiful "Dream of the Rood" is the most important. Some verses apparently derived from this allegory and engraved upon the famous Ruthwell Cross have led to much controversy regarding both the date of the manuscript and the authorship of this poem. Other doubtful works sometimes attributed to Cynewulf are the "Guthlac", the "Phoenix" and certain riddles in "The Exeter Book." It is safe to say that unless fresh evidence comes to light the authorship can never be settled.

Cynic School of Philosophy.—The Cynic School, founded at Athens about 400 n. c., continued in existence until about 200 n. c. It sprang from the ethical doctrine of Socrates regarding the necessity of moderation and self-denial. With this ethical element it combined the dialectical and rhetorical methods of the Eleatics and the Sophists. Both these influences, however, it perverted from their primitive uses; the Socratic ethics was interpreted by the Cynics into a coarse and even vulgar depreciation of all human rights, refinements, refinements, and the common decencies; while the methods of the Eleatics and the Sophists became in the hands of the Cynics an instrument of contention (Eristic Method) rather than a means of attaining truth. The Cynic contempt for the refinements and conventions of polite society is generally said to be the result of the material change of the time, by which the first representatives of the school were known. According to some authorities, however, the name Cynic arose from the fact that the first representatives of the school were accustomed to meet in the gymnasion of Cynoaeaeus. Antisthenes, was Antisthenes, an Athenian who was born about 436 n. c., and was a pupil of Socrates. The best known among his followers are Diogenes of Sinope, Crates, Menedemus, and Menippus. Antisthenes himself seems to have been a serious thinker and a writer of ability. In his theory of knowledge he advocated intellectualism, sensism as opposed to Plato's intellectualist theory of ideas; that is to say, he taught that the sense-perceived individual alone exists and that there are no universal objects of knowledge. In ethics he maintained that virtue is the only good and that all desire is always against one of these: the love of the beautiful, of wealth, of wisdom, of fame, of friendship, of self-control, he said, is the essence of virtue, and a wise man will learn above all things to despise material needs and the artificial comforts in which worldly men find happiness.

Diogenes, generally referred to as "Diogenes the Cynic", is one of the most striking figures in Greek history; at least, his personality with its eccentricities, its coarse humour, its originality, and its defiance of the commonplace, has appealed with extraordinary force to the popular imagination. His interview with Alexander, of which the simplest version is to be found in Plutarch, was greatly exaggerated by subsequent tradition. The followers of Diogenes, namely, Crates, Menedemus, and Menippus, imitated all his eccentricities and so exaggerated the anti-social elements in the Cynic system that the school finally fell into disrepute. Nevertheless, there were in the Cynic philosophy elements, especially the ethical element, which later found a home in some of the sects of the School. This element, combined with the broader Stoic ideas of the usefulness of intellectual culture and the more enlightened Stoic concept of the scope of practical good deeds, reappeared in the philosophy of Zen and Chinese men, and was the central ethical doctrine of the last great system of philosophy in Greece.

William Turner.

Cyprian, Saint, Bishop of Toulon, b. at Marseilles in 476; d. 3 Oct., 546. He was the favourite pupil of St. Caesarius of Arles by whom he was trained, and who, in 508, ordained him to the diaconate, and, in 510, consecrated him. The episcopate of Cyprian appears to have been present in 524 at the Synod of Arles and in the following years to have attended a number of councils. At all these assemblies he showed himself a vigorous opponent of Semipelagianism. Soon after the death of Caesarius (d. 543) Cy-

H. T. W. STANLEY.
as well as by the priest Messianus and the deacon Stenianus. The first part of the 24th chapter of the first book was most probably written by Cyprian himself. Within the last few years another writing of his has become known, a letter to Bishop Maximus of Geneva, which discusses some of the disputed theological questions of that age. The feast of St. Cyprian falls on 21 April, 104-178; Hist. litt. de la France, III, 237-241; WAWRA gives the letter to Maximus in Theolog. Quartalschr. 1890, 3-10, 1892, 572-594; MONTGOLFFIER, Bull. Episc. III, 434-436, also gives the letter; the life of St. Cæcilius can be found in the following collections: Acta SS., Aug. VI, 94-95; Addison, Mon. Germ. Hist.; KRUSCH, Scriptores Meroving., III, 457-501.

Cyprian, Saint, and JUSTINA, Saint, Christians of Antioch who suffered martyrdom during the persecution of Diocletian at Nicomedia, 26 September, 304, the date in September being afterwards made the day of their feast. Cyprian was a heathen magician of Antioch who had dealings with demons. By their aid he sought to bring St. Justin, a Christian virgin, to ruin; but she foiled the threefold attacks of the devils by the sign of the cross. Brought to despair Cyprian made the sign of the cross himself and in this way was freed from the toils of Satan. He was received into the Church, was made pre-eminent by miracles, and became in succession deacon, priest, and finally bishop, while Justina became the head of a convent. During the Diocletian persecution both were seized and taken to Damascus where they were shockingly tortured. As their faith never wavered they were brought before Diocletian at Nicomedia, where at his command they were beheaded on the banks of the river Gallus. The same fate befell another Christian, Theoctistus, who had come to Cyprian and had embraced him. After the bodies of the saints had lain unburied for six days they were taken by Cyprian sail to Rome where they were interred on the estate of a noble lady named Rufina and later were entombed in Constantine’s basilica. This is the outline of the legend or allegory which is found, adorned with diffuse descriptions and dialogues, in the unreliable “Symeon Metaphrastes”, and was made the subject of a poem by the Empress Eudocia II. The story, however, must have arisen as early as the fourth century, since it was retained both by St. Cyril Nazianzen and Prudentius; both, nevertheless, have confounded our Cyprian with St. Cyprian of Carthage; a mistake often repeated. It is certain that no Bishop of Antioch bore the name of Cyprian. The attempt has been made to find in Cyprian a mystic, for his gift of eloquence is extolled; in his writings, the story as the basis of a drama: “El magico prodigioso”. The legend is given in Greek and Latin in Acta SS. September, VII. Ancient Syriac and Ethiopic versions of it have been published within the last few years.

GABRIEL MEIER.

Cyprian of Carthage (Tatius Cæcilius Cyprianus), Saint, bishop and martyr. Of the date of the saint’s birth and of his early life nothing is known. At the time of his conversion to Christianity he had, perhaps already the life of a convert or orator and pleader, considerable wealth, and held, no doubt, a great position in the metropolis of Africa. We learn from his deacon, St. Pontius, whose life of the saint is preserved, that his mien was dignified without severity, and cheerful without effusiveness. His gift of eloquence was extolled: in his writings he was not a thinker, a philosopher, a theologian, but eminently a man of the world and an administrator, of vast energies, and of forcible and striking character. His conversion was due to an aged priest named Cecilianus, with whom he seems to have gone to live. Cecilianus in dying commended to Cyprian the care of his wife and family. While yet a catechumen the saint decided to observe chastity, and he gave most of his revenues to the poor. He was not the owner of any property, including his gardens at Carthage. These were restored to him (Dei indulgentiæ restituti, says Pontius), being apparently bought back for him by his friends; but he would have sold them again, had not the persecution made this imprudent. His baptism probably took place c. 246, presumably on Easter eves 2 April.

Cyprian’s first Christian writing is “Ad Donatum”, a monologue spoken to a friend, sitting under a vineclad pergola. He tells how, until the grace of God illuminated and strengthened the convert, it seemed impossible to conquer vice; the decay of Roman society is pictured, the gladiatorial shows, the theatre, the unjust law-courts, the hollowness of political success; the only refuge is the temperate, studious, and prayerful life of the Christian. At the beginning should probably be placed the few words of a Donatus to Cyprian which are printed by a Latin letter. The style of the epistle is affected and reminds us of the bombastic unintelligibility of Pontius. It is not like Tertullian, brilliant, barbarous, unceut, but it reflects the preciosity which Apuleius made fashionable in Africa. In his other works Cyprian addresses a Christian audience; his own fervour is allowed full play, his style becomes simpler, though forcible, and sometimes poetical, not to say flowery. Without being classical, it is correct for its date, and the cadences of the sentences are in strict rhythm in all his more careful writings. On the whole his beauty of style has rarely been equalled among the Latin Fathers, and never surpassed except by the matchless energy and wit of St. Jerome.

Another work of his early days was the “Testimonia ad Quirinum”, in two books. It consists of passages of Scripture arranged under headings to illustrate the passing away of the Old Law and its fulfilment in the New. A third book, added later, contains texts dealing with Christian ethics. This work is of the greatest value for the history of the Old Latin version of the Bible. It gives us an African text closely related to that of the Bobbio MS. known as α (Turin). Hartel’s edition has taken the text from a MS. which contains a revised version of the books; this MS. can be fairly well restored from the MS. cited in Hartel’s notes as L. Another book of excerpts on martyrdom is entitled “Ad Fortunatum”; its text cannot be judged in any printed edition. Cyprian was certainly only a recent convert when he became Bishop of Carthage c. 248 or the beginning of 249; but he passed through all the grades of the ministry. He had declined the charge, but was constrained by the people. A minority opposed his election, including five priests, who remained his enemies; but he tells us that he was validly elected “after the Divine judgement, the vote of the people and the consent of the bishopric”.

The Decian Persecution.—The prosperity of the Church during a peace of thirty-eight years had produced great disorders. Many even of the bishops were given up to worldliness and gain, and we hear of worse scandals. In October, 250, an edict against Christians. Bishops were to be put to death, others to be punished and tortured till they recanted. On 20 January Pope Fabian was martyred, and about the same time St. Cyprian, bishop of Carthage, in a safe place of hiding. His enemies continually reproached him with this. But to remain at Carthage
was to court death, to cause greater danger to others, and to leave the Church without government; for to elect a new bishop would have been as impossible as it was at Revillon. He made of much property to a consecrated priest, Bogatian, for this need. With the clergy lapsed, others fled; Cyprian suspended their pay, for their ministrations were needed and they were in less danger than the bishop. From his retreat he encouraged the confessors and wrote eloquent panegyrics on the martyrs. Fifteen soon died in these conditions. About the arrival of the proconsul in April the severity of the persecution increased. St. Mappalusie died gloriously on the 17th. Children were tortured, women dishonoured. Numidius, who had encouraged many, saw his wife burnt alive, and was himself half burnt, then stoned and left for dead; his daughter found him yet living; he recovered and Cyprian made him a priest. Some, still being twice tortured, were dismissed or banished, often beggared.

But there was another side to the picture. At Rome terrified Christians rushed to the temples to save their property apostatized. Some would not sacrifice, but purchased \textit{libellati}, or certificates, that they had done so. Some bought the exemption of their family at the price of their own sin. Of these \textit{libellati} there were several thousands in Carthage. Of the fallen some did not repent, others joined the heretics, but most of them clamoured for forgiveness. On its restoration, rejected under torture, returned to be tortured afresh. Castus and Emilinus was burnt for recanting, others were exiled; but such cases were necessarily rare. A few began to perform canonical penance. The first to suffer at Rome had been a young Carthaginian, Celsus. He recovered, and Cyprian made him a lector. His grandmother and two uncles had been martyrs, but his two sisters apostatized under fear of torture, and in their repentance gave themselves to the service of those in prison. Their brother was very urgent for their restoration. His letter from Rome to Lucian, a confessor at Carthage, was extant, with the reply of the latter. Lucian obtained from a martyr named Paul before his passion a commission to grant peace to any who asked for it, and he distributed these “indulgences” with a vague formula: “Let such a one with his family communicate.”

Tertullian speaks of the “custom” of those who would make at peace with the Church to beg this peace from the martyrs. Much later, in his Montanist days (c. 220), he urges that the adulterers whom Pope Callistus was ready to forgive after due penance would now get restored by merely imploring the confessors and those in the mines. Correspondingly we find Lucian issuing pardons in the name of confessors who were still alive, a manifest abuse. The heroic Mappalusie had only interceded for his own sister and mother. It seemed now as if no penance was to be enforced upon the lapsed, and Cyprian wrote to remonstrate.

Meanwhile official news had arrived from Rome of the election of Urban. The new Pope, Fabian, signed and ungrammatical letter to the clergy of Carthage from some of the Roman clergy, implying blame to Cyprian for the desertion of his flock, and giving advice as to the treatment of the lapsed. Cyprian explained his conduct (Ep. xx), and sent to Rome copies of thirteen of the letters he had written from his hiding-place to Carthage. The five priests who opposed him were now admitting at once to communion all who had recommendations from the confessors, and the confessors themselves issued a general indulgence, in accordance with which the bishops were to restore to communion all whom they had examined. This was an outrage on discipline, yet Cyprian was ready to give some value to the indulgences thus improperly granted, but all must be done in submission to the bishop. He proposed that \textit{libellati} should be restored, when in danger of death, by a priest or even by a deacon, but that the rest should await the cessation of persecution, when councils could be held at Rome and at Carthage, and a common rule be agreed upon. Some regard must be had for the prayers of the confessors, yet the lapsed must surely not be placed in a better position than those who had stood fast, and had been tortured, or beggared, or exiled. The guilty were terrified by marvels that occurred. A man was struck dumb on the very Capitol where he had denied Christ. His rival did not arrive in the public baths, and gnawed the tongue which had tasted the pagan victim. In Cyprian’s own presence an infant who had been taken by its nurse to partake at the heaen altar, and then to the Holy Sacrifice offered by the bishop, was as though in torture, and vomited the Sacred Species it had received in this holy chalice. A lapsed woman of advanced age had fallen in a fit, on venturing to communicate unworthily. Another, on opening the receptacle in which, according to custom, she had taken home the Blessed Sacrament for private Communio, was deterred from sacrilegiously touching it by fire which came forth. Yet another found nought within; and about September, Cyprian received promise of support from the Roman priests in two letters written by the famous Novatian in the name of his colleagues. In the beginning of 251 the persecution waned, owing to the successive appearance of two rival emperors. The confessors were restored to communion, who had recanted under torture in Carthage. By the perfidy of some priests Cyprian was unable to leave his retreat till after Easter (23 March). But he wrote a letter to his flock denouncing the most infamous of the five priests, Novatus, and his deacon Felissimus (Ep. xiii). To the bishop’s order to delay the reconciliation of the lapsed until the council, Felissimus had replied by a manifesto, declaring that none should communicate with himself who accepted the large alms distributed by Cyprian’s order. The subject of the letter is more fully developed in the treatise \textit{De Ecclesiis Catholicae Unitate}, which Cyprian wrote about this time (Benson wrongly thought it was written against Novatian some weeks later).

This celebrated pamphlet was read by its author to the council which met in April, that he might get the support of the bishops against the schism started by Felissimus and Novatus. The unity with which St. Cyprian deals is not so much the unity of the whole Church, the necessity of which he rather postulates, as the unity to be kept in each diocese by union with the bishop; the unity of the whole Church is maintained by the close union of the bishops who are “glued to one another,” however who soever is not with his bishop is cut off from the unity of the Church and cannot be united to Christ; the type of the bishop is St. Peter, the first bishop. Protestant controversialists have attributed to St. Cyprian the absurd argument that Christ said to Peter what he really meant for all, in order to give a type or picture of unity. Whence with St. Clement’s they dispute that Christ, using the metaphor of an edifice, founds His Church on a single foundation which shall manifest and ensure its unity. And as Peter is the foundation, binding the whole Church together, so in each diocese is the bishop. With this one argument Cyprian lays down the unity of all his episcopates and schisms. It has been a mistake to find any reference to Rome in this passage (De Unit., 4).

\textbf{Church Unity.—}About the time of the opening of the council (251), two letters arrived from Rome. One of these, announcing the election of a pope, St. Cornelius, was read by Cyprian to the assembly; the other contained such violent and improbable accusations against the new pope that he thought it better to pass it over. But two bishops, Caldonius and Fortunatus, were dispatched to Rome for further infor-
CYPRIAN

mation, and the whole council was to await their return—such was the importance of a papal election. Meantime another message arrived with the news that Novatian, the most eminent among the Roman clergy, had been received by Bede, pope of the two African prelates, Pompeius and Stephanus, who had been present at the election of Cornelius, arrived also, and were able to testify that he had been validly set "in the place of Peter", when as yet there was no other claimant. It was thus possible to reply to the reclamation of Novatian's admission by Bede, which had been made by the MSS., and a short time later was sent to Rome, explaining the discussion which had taken place in the council. Soon afterwards came the report of Caldonius and Fortunatus together with a letter from Cornelius, in which the latter complained somewhat of the delay in recognizing him. Cyprian wrote to Cornelius explaining his prudent conduct. He added a letter to the confessors who were the main support of the antipope, leaving it to Cornelius whether it should be delivered or no. He sent also copies of his two treatises, "De Unitate" and "De Lapeis" (this had been composed by him immediately after the other), and he wishes the confessors to take care that in any similar case a fearful thing is schism. It is in this copy of the "De Unitate" that Cyprian appears most probably to have added in the margin an alternative version of the fourth chapter. The original passage, as found in most MSS. and as printed in Hartel's edition, runs thus:

"If any will consider this, there is no need of a long treatise and of arguments. The Lord saith to Peter: 'I say unto thee that thou art Peter, and upon this rock I will build My Church, and the gates of hell shall not prevail against it; to thee I will give the keys of the kingdom of heaven, and what thou shalt have bound on earth shall be bound in heaven, and what thou shalt have loosed shall be loosed in heaven.' Upon one He builds His Church, and though to all His Apostles after His resurrection. He gives an equal power and says: 'As My Father hath sent Me, even so send I you: Receive the Holy Ghost, whosoever sins you shall have remitted shall be remitted unto them, and whosoever sins you shall have retained they shall be retained', yet that He might make unity manifest, He disposed the origin of that unity beginning from one. The other Apostles were indeed what Paul had called "the pillars of the church", but they had no such unity and uniformity of power, but the commencement proceeds from one, that the Church may be shown to be one. This one Church the Holy Ghost in the person of the Lord designates in the Canticle of Canticles, and says, One is My Dove, My perfect one, one is she to her Mother, one to her that bare her. He that holds not this unity of the rock, does he believe that he holds the faith? He who strives against and resists the Church, is he confident that he is in the Church?" The substituted passage is as follows: "... bound in heaven. Upon one He builds His Church, and to the same He says after His resurrection, 'Feed My sheep'. . . . And all are pastors, but the flock is shown to be one, which is led by all the Apostles with one mind and heart. He who holds not this unity of the Church, does he think that he holds the faith? He who deserts the chair of Peter, upon whom the Church is founded, is he confident that he is in the Church?" These alternative versions are given one after the other in the chief family of MSS., which contains them, while in some other families the two have been partially or wholly combined into one. The combined version is the one which has been printed in many editions, and has played a large part in controversy with Protestants. It is of course spurious in this conformed form, but the alternative form given above is not only found in eighth- and ninth-century MSS., but it is found written for his predecessor Pelagius II., and by St. Gelasius; indeed, it was almost certainly known to St. Jerome and St. Optatus in the fourth century. The evidence of the MSS. would indicate an equally early date. Every expression and thought in the passage cannot be paralleled in Cyprian and a short time later, and it seems to be now generally admitted that this alternative passage is an alteration made by the author himself when forwarding his work to the Roman confessors. The "one chair" is always in Cyprian the episcopal chair, but in Rome that chair was the chair of Peter, and Cyprian has been careful to emphasize this point, and to add a reference to the other great Petrine text, the Charge in John, xxi. The assertion of the equality of the Apostles as Apostles remains, and the omissions are only for the sake of brevity. The old contention that it is a Roman forgery is at all events quite out of the question. Another passage which is identical in the same MS. with the "interpolation"; it is a paragraph in which the humble and pious conduct of the lapsed "on this hand" (hic) is contrasted in a long succession of parallels with the pride and wickedness of the schismatics "on that hand" (ille); but in the delicate manner of Cyprian he refrains from using the latter word to the general way. In the "interpolated" MSS. we find that the lapsed, whose cause had now been settled by the council, are "on that hand" (ille), whereas the references to the schismatics—meaning the Roman confessors who were supporting Novatian, and to whom the book was being sent—are made as pointed as possible, being brought into the foreground by the repeated hic, "on this hand".

Novatianism.—The saint's remonstrance had its effect, and the confessors rallied to Cornelius. But for two or three months the confusion throughout the Catholic Church had been terrible. No other event in these early times shows us so clearly the enormous importance of the bishops in East and West. St. Dionysius of Alexandria joined his great influence to that of the Carthaginian primate, and he was very soon able to write that Antioch, Cæsarea, and Jerusalem, Tyre and Laodicea, Cyprus, Egypt, Syria and Arabia, Mesopotamia, Pontus, and Bithynia, had returned to union and that their bishops were all in concord (Eusebius, Hist. Eccl., VII, v). From this we gauge the area of disturbance. Cyprian says that Novatian "assumed the primacy" (Ep. ix, 8) and sent out his new apostles to very many cities, and where in all provinces and cities there were long established, orthodox bishops, tried in persecution, he dared to create new ones to supplant them, as though he could range through the whole world (Ep. iv, 24). Such was the power assumed by a third-century antipope. Let it be remembered that in the first days of schism there was no question of the establishment of Novatian only enunciated his refusal of forgiveness to the lapsed after he had made himself pope. Cyprian's reasons for holding Cornelius to be the true bishop are fully detailed in Ep. iv to a bishop, who had at first yielded to Cyprian's arguments and had commissioned him to inform Cornelius that "he had communicated with him, that is with the Catholic Church", but had afterwards wavered. It is evidently implied that if he did not communicate with Cornelius he would be outside the Catholic Church. Writing to the pope, Cyprian apologizes for his delay in acknowledging him: he had at least urged those who sailed to Rome to make sure that they acknowledged and held the womb and root of the Catholic Church (Ep. xlvii, 3). By this is probably meant "the womb and root which is the Catholic Church".
but Harnack and many Protestants, as well as many Catholics, find here a statement that the Roman Church is the womb and root. Cyprian continues that he had waited for a formal report from the bishops who had been sent to Rome, before committing all the bishops of Africa, Numidia, and his own to a decision, in order that, when no doubt could remain, all his colleagues "might firmly approve and hold your communion, that is the unity and charity of the Catholic Church". It is certain that St. Cyprian held that one who was in communion with an anti-episcopate held not the root of the Catholic Church, was not nourished by the bread, drank not at her fountain. So little was the rigorism of Novatus the origin of his schism, that his chief partisan was no other than Novatus, who at Carthage had been reconciling all the lapsed indiscriminately without penance. He seems to have arrived at Rome just after the election of Cornelius, and his adhesion to the party of rigorism had the curious result of destroying the opposition to Cyprian at Carthage. It is true that Felicissimus fought manfully for a time; he even procured five bishops, all excommunicated and deposed, who consecrated for the party a certain Fortunatus in opposition to St. Cornelius, in order not to undervalue the Novatian party, who had already a rival bishop at Carthage. The faction even appealed to St. Cornelius, and Cyprian had to write to the pope a long account of the circumstances, ridiculing their presumption in "sailing to Rome, the primatial Church (ecclesia principis), the Chair of Peter, whence the unity of the Episcopate had its origin, not recollecting that these are the Romans whose faith was praised by St. Paul (Rom., i, 8), to whom unfaith could have no access". But this embassy was naturally unsuccessful, and the party of Fortunatus and Felicissimus seems to have made no headway.

The lapsed.—With regard to the lapsed the council had decided that each case must be judged on its merits, and that libellati should be restored after varying, but lengthy, terms of penance, whereas those who had actually sacrificed might after life-long penance receive Communion in the hour of death. But any one who put off sorrow and penance until the hour of sickness must be refused all Communion. The decision was a severe one. A recrudescence of persecution, announced, Cyprian tells us, by numerous visions, caused the assembling of another council in the summer of 252 (so Benson and Nolke, but Rich. H. H. and Gaisser, 251). The council decided to restore at once all those who were doing penance, in order that they might be fortified by the Holy Eucharist against trial. In this persecution of Gallus and Volusianus, the Church of Rome was again tried; but this time Cyprian was able to congratulate the pope on the firmness shown; the whole Church of Rome, he says, had confessed unanimously, and once again its faith, praised by the Apostle, was celebrated throughout the whole world (Ep. Ix). About June 253, Cornelius was exiled to Centumcellae (Civitavecchia), and died there, being counted as a martyr by Cyprian. The rest of the Church. His successor, St. Lucia, was at once sent to the same place on his election, but soon was allowed to return, and Cyprian wrote to congratulate him. He died 5 March, 254, and was succeeded by Stephen, 12 May, 254.

Rebaptism of heretics.—Tertullian had characteristically long before the time of Cyprian said, "the same God, the same Christ with Catholics, therefore their baptism is null. The African Church had adopted this view in a council held under a predecessor of Cyprian, Agrippinus, at Carthage. In the East it was also the custom of Cilicia, Cappadocia, and Galatia to rebaptize Montanists. Cyprian's opinion of baptism by heretics was strongly expressed: "Non abhuntrut illis hereticis, sed potius sordidantur, nec purgantur delicta sed immo cumulantur. Non Deo nativitas illa sed diabolo filios generat" ("De Unit.", xi). A certain bishop, Magnus, wrote to ask if the baptism of the Novatians was to be respected (Ep. Lxix). Cyprian's answer may be of the year 255; he denies that they are to be distinguished from any other heretics. Later we find a letter in the name of Cyprian, probably of the spring of 255 (autumn, according to d'Alèze), from a council under Cyprian of thirty-one bishops (Ep. Lxx), addressed to eighteen Numidian bishops; this was apparently the beginning of the controversy. It appears that the bishops of Mauretania did not in this letter treat the question of the baptism of African and Numidian, and that Pope Stephen sent them a letter approving their adherence to Roman custom.

Cyprian, being consulted by a Numidian bishop, Quintus, sent him Ep. Lxxi, and replied to his difficulties (Ep. Lxxi). The spring council at Carthage in the following year, 256, was more numerous than usual, and sixty-one bishops signed the conciliar letter to the pope explaining their reasons for rebaptizing, and claiming that it was a question upon which bishops were free to differ. This was not Stephen's view, and he immediately issued a decree, couched evidently in much peremptory language, that "no one may be made (this is taken by some moderns to mean "no new baptism"), but the Roman tradition of merely laying hands on converted heretics in sign of absolution must be everywhere observed, under pain of excommunication. The letter was evidently addressed to the African bishops, and contained some severe censures on Cyprian himself. Cyprian writes to Jubaianus that he is defending the one Church, the Church founded on Peter—why then is he called a prevaricator of the truth, a traitor to the truth? (Ep. Lxxii, 11). To the same correspondent he sends Ep. Lxxii, 11: he makes laws for others, but retains his own liberty. He sends also a copy of his newly written treatise "De Bono Patiensinii". To Pompeius, who had asked to see a copy of Stephen's rescript, he writes with great violence: "As you read it, you will note his error more and more clearly; in approving the baptism of all the heretics, he has heaped into his own breast the sins of all of them; a fine tradition indeed! What blindness of mind, what depravity!"—"ineptitude", "hard obstinacy"—such are the expressions which run from the pen of one who declared that opinion on the subject was free, and who in this very letter explains that a bishop must never be unadvisable, and that the Pope, in which he did not take a position, 256, a yet larger council assembled at Carthage. All agreed with Cyprian; Stephen was not mentioned; and some writers have even supposed that the council met before Stephen's letter was received (so Ritschl, Grisar, Ernst, Bardenhewer). Cyprian did not wish the responsibility for it to be his own. He declared that no one made himself a bishop of bishops, and that all must give their true opinion. The vote of each was therefore given in a short speech, and the minutes have come down to us in the Cyprianic correspondence under the title of "Sententiae Episcoporum". But the messengers sent with the document were refused an audience and even denied all hospitality by the pope. They returned consequently to Carthage, and Cyprian tried for support from the East. He wrote to the famous Bishop of Caesarea in Cappadocia, Firmilian, sending him the treatise "De Unitate" and the arguments hitherto used, the heretics having taken the middle of November Firmilian's reply had arrived, and it has come down to us in a translation made at the time in Africa. Its tone is, if possible, more violent than that of Cyprian. (See FIRMILIAN.) After this we know no more of the controversy.
that the East was largely committed to the same wrong practice, the question was tacitly dropped. It should be remembered that, though Stephen had demanded unquestioning obedience, he had apparently, like Cyprian, considered the matter as a point of discipline. St. Cyprian supports his view by a wrong inference from the unity of the Church, and no one that he mentions in a pagan letter. He had taught Augustine, that, since Christ is always the principal agent, the validity of the sacrament is independent of the unworthiness of the minister: *ipsae est qui baptizat.* Yet this is what is implied in Stephen’s insisting upon nothing more than the correct form, “because baptism is given in the name of Christ” and “the effect is due to the majesty of the Name.” The laying on of hands enjoined by Stephen is repeatedly said to be in *pontentiam,* yet Cyprian goes on to argue that the gift of the Holy Ghost by the laying on of hands is not the new birth, but must be subsequent to it and implies it. This has led some moderns into the notion that Stephen meant confirmation to be given (so Duchesne), or at least that he has been so misunderstood by Cyprian (d’Alès). But the passage (Ep. lixiv, 7) need not mean this, and it is most improbable that confirmation was even thought of in this connection. Cyprian does not consider the laying on of hands as an essence to be a giving of the Holy Ghost. In the East the custom of rebaptizing heretics had perhaps arisen from the fact that so many heretics disbelieved in the Holy Trinity, and possibly did not even use the right form and matter. For centuries the practice persisted, at least in the case of some of the heresies. But in the West to rebaptize was regarded as heretical, and Africa came into line soon after St. Cyprian. St. Augustine, St. Jerome, and St. Vincent of Lérins are full of praise for the firmness of Stephen as befitting his place. But Cyprian’s unfortunate letters became the chief support of the puritanism of the Donatists. St. Augustine in his *De Baptismo* goes through them one by one. He will not dwell on the violent words *qua in Stephanum irritatus effudit,* and expresses his confidence that Cyprian’s glorious martyrdom will have atoned for his excesses.

Appeals to Rome.—Ep. lixviii was written to Stephen before the breach. Cyprian has heard twice from Faustinus, Bishop of Lyons, that Marcianus, Bishop of Arles, has joined the party of Novatian. The pope will certainly have been already informed of this by Faustinus and by the other bishops of the province. Stephen is given in the name of Christ, and full letters to our fellow-bishops in Gaul, not to allow the obstacle and proud Marcianus any more to insult our fellowship. . . . Therefore send letters to the province and to the people of Arles, by which, Marcianus having been excommunicated, another shall be suitably substituted in his place, and the whole conurbus of bishops is joined together by the glue of mutual concord and the bond of unity, in order that if any of our fellowship should attempt to make a heresy and to lacerate and devastate the flock of Christ, the rest may give their aid. . . . For though we are many shepherds, yet we feed one flock. It seems inconceivable that Cyprian is here explaining to the pope why he ventures to interfere, and that he attributes to the pope the power of deposing Marcianus and ordering a fresh election. We should compare his witness that Novatian usurped a similar power as an example.

Another letter dates perhaps somewhat later. It emanates from a council of thirty-seven bishops, and was obviously composed by Cyprian. It is addressed to the priest Felix and the people of Legio and Asturica, and to the deacon Eleius and the people of Eximia in Spain. St. Januarius, the martyrs and Sabinus, had come to Carthage to complain. They had been legitimately ordained by the bishops of the province in the place of the former bishops, Basiliades and Martianis, who had both accepted libelli in the persecution. Basiliades had further blasphemed God in sickness, had confessed his blasphemy, and had voluntarily resigned his bishopric, and had been thankful to be allowed lay communion. Martianis had indulged in pagan banquets and had buried his son in a pagan tomb. He had been before the proconsul Dencenarius that he had denied Christ. Wherefore, says the letter, such men are unfit to be bishops, the whole Church and the late Pope Cornelius having decided that such men may be admitted to penance but never to ordination; it does not profit them that they have denied Christ, for those who were afar off and unaware of the facts, so that they obtained to be unjustly restored to their seats; nay, by this deceit they have only increased their guilt. The letter is thus a declaration that Stephen was wickedly deceived. No fault is imputed to him, nor is there any claim to reverse his decision or to deny his right to give it; it is simply pointed out that it was founded on false information, and was therefore null. But it is obvious that the African council had heard only one side, whereas Felix and Sabinus must have pleaded their case at Rome before they came to Africa. On the whole ground the Africans seem to have made too harsh a judgment. But nothing more is known of the matter.

Martyrdom.—The empire was surrounded by barbarian hordes who poured in on all sides. The danger was the signal for a renewal of persecution on the part of the Emperor Valerian. At Alexandria St. Dionysius was exiled. On 22 May, 257, Cyprian was brought before the Proconsul Paternus in his secretarium. His interrogatory is extant and forms the first part of the “Acta proconsularia” of his martyrdom. Cyprian declares himself a Christian and a bishop. He serves one God to Whom he prays day and night for all men and for the safety of the emperors. “Do you persevere in this?” asks Paternus. “A good will which knows God cannot be altered.” “Can you, then, go into exile at Curibus?” “I go.” He is asked for the names of the priests also, but replies that his compel is forbidden by the laws; they will not be enough to dispose of them. In September he went to Curibus, accompanied by Pontius. The town was lonely, but Pontius tells us it was sunny and pleasant, and that there were plenty of visitors, while the citizens were full of kindness. He relates at length Cyprian’s dream on his first night there that he was bidden to proconsularis not to send him to death, but to the monastery of the emperors. But he was reproved at his own request until the morrow. He was the excommunicators, but once awake he awaited that morrow with calmness. It came to him on the very anniversary of the dream. In Numidia the measures were more severe. Cyprian writes to nine bishops who were working in the mines, with half their hair shorn, and with insufficient food and clothing. He was still rich and able to help them. Their replies are preserved, and we have also the authentic Acts of several African martyrs who suffered soon after Cyprian.

In August, 258, Cyprian learned that Pope Sixtus had been put to death in the catacombs on the 6th of that month, together with four of his deacons, in consequence of a new edict that bishops, priests, and deacons should be at once put to death; senators, knights, and others of rank are to lose their goods, and if they still persist, to be disinherited. Cæsarians (officers of the fiscus) to become slaves. Galerius Maximus, the successor of Paternus, sent for Cyprian back to Carthage, and in his own gardens the bishop awaited the final sentence. Many great personages urged him to fly, but he had now no vision to promise, and the bishop did not even wish to remit others. Yet he hid himself rather than obey the proconsul’s summons to Utica, for he
declared it was right for a bishop to die in his own city." On the return of Galerius to Carthage, Cyprian was brought from his gardens by two *principes* in a chariot, but the proconsul was ill, and Cyprian passed the night in the house of the first princes in the company of his friends. Of the rest we have a vague description by Pontius and a detailed report in the prosconsular Acts. On the morning of the 14th a crowd gathered "at the villa of Sextus", by order of the authorities. Cyprian was tried there. He refused to sacrifice, and added that in such a matter there was no conflict of powers between the son of a humane man. The proconsul read his condemnation and the multitude cried, "Let us be beheaded with him!" He was taken into the grounds, to a hollow surrounded by trees, into which many of the people climbed. Cyprian took off his cloak, and knelt down and prayed. Then he took off his dalmatic and gave it to his deacons, and stood in his linen tunic in silence awaiting the executioner, to whom he ordered twenty-five gold pieces to be given. The brethren cast cloths and handkerchiefs before him to catch his blood. He bandaged his own eyes with the help of a priest and a deacon. He was not Julia's. For the rest of the day his body was exposed to satisfy the curiosity of the pagans. But at night the brethren bore him with candles and torches, with prayer and great triumph, to the cemetery of Macrobius Candidianus in the suburb of Mapalia. He was the first Bishop of Carthage to obtain the crown of martyrdom. The collection of Cyprian consists of eighty-one letters. Sixty-two of them are his own, three more are in the name of councils. From this large collection we get a vivid picture of his time. The first collection of his writings must have been made just before or just after his death, as it was known to Pontius. It consisted of ten treatises and seven letters on martyrdom. To these were added in Africa a set of letters on the baptismal question, and at Rome, it seems, the correspondence with Cornelius, except Ep. xlviii. Other letters were successively aggregated to these groups, including letters to Cyprian or connected with him, his collections of Testimonies, and many spurious works. The treatises already mentioned we have to add a well-known exposition of the Lord's Prayer; a work on the simplicity of dress proper to consecrated virgins (these are both founded on Tertullian); "On the Mortality", a beauty in the Latin language composed at the time which reached Carthage in 252, when Cyprian, with wonderful energy, raised a staff of workers and a great fund of money for the nursing of the sick and the burial of the dead. Another work, "On Almsgiving", its Christian character, necessity, and satisfac-

tory value, was perhaps written, as Watson has pointed out, in reply to the calumny that Cyprian's own lavish gifts were bribes to attach men to his side. Only one of his writings is couched in a poignant strain, the "ad Demetrianum", in which he replies in a spirited manner to the accusation of a heathen that Chris-

tians, on the occasion of the plague, subjected to the short works, "On Patience" and "On Rivalry and Envy", apparently written during the baptismal controversy, were much read in ancient times. St. Cyprian was the first great Latin writer among the Chris-

tians, for Tertullian fell into heresy, and his style was harsh and unintelligible. Until the days of Jerome and Augustine, Cyprian's writing had no rivals in the West. Their praise is sung by Prudentius, who joins with Pacian, Jerome, Augustine, and many others in attesting their extraordinary popularity.

**DOCTRINE.**—The little that can be extracted from St. Cyprian on the Holy Trinity and the Incarnation is connected with the Baptism and regeneration, on the Real Presence, on the Sacrifice of the Mass, his faith is clearly and repeatedly expressed, especially in Ep. Ixiv on infant baptism, and in Ep. Ixiii on the mixed chalice, written against the sacra-

teligous custom of using water without wine for Mass. On penance he is clear, like all the ancients, that for those who have been separated from the Church by sin there is no return except by an humble confession (exomologesis apud sacerdotes), followed by remissio facta per sacerdotes. The ordinary minister of this sacrament is the sacerdos par excellence, the bishop; but priests can administer it subject to him, and in case of necessity the lapsed might be restored by a deacon. He does not add, as we should at the pres-

cent day, that he cannot make this distinction according to the other, theological distinctions were not in his line. There was not even a beginning of canon law in the Western Church of the third century. In Cyprian's view each bishop is answerable to God alone for his action, though he ought to take counsel of the clergy and of the laity also in all important matters. The Bishop of Carthage had a great position as honorary chief of all the bishops in the provinces of Proconsular Africa, Numidia, and Mauretania, who were about a hundred in number; but he had no actual jurisdiction over them. They seem to have met in some numbers at Carthage, but their opinions, by the end of the century, had no real binding force. If a bishop should apostatize or become a heretic or fall into scandalous sin, he might be deposed by his compatriarchs or by the pope. Cyprian probably thought that questions of heresy would always be too obvious to need much dis-

cussion. It is certain that where internal discipline concerned universal doctrine, he did not interfere, and that uniformity was not desirable—a most unpractical notion. We have always to remem-

ber his experience as a Christian was of short duration, that he became a bishop soon after he was converted, and that he had no Christian writings be-

sides Holy Scripture to study but those of Tertullian. He evidently knew no Greek, and probably was not acquainted with the translation of Ireneus. Rome is to him the centre of the Church's unity; it was inaccessible to heresy, which had been knocking at its doors for a century in vain. It was the See of Peter, who was the type of the bishop, the first of the Apostles. Difference of opinion between bishops as to the right occupant of the Sees of Arles or Emerita would not involve breach of communion, but rival bishops at Rome would divide the Church, and to communi-

cate with the wrong one would be schism. It is con-

ceived that whether the justification of the sacrifice was strongly urged upon priests in his day. The consecrated virgins were to him the flower of his flock, the jewels of the Church, amid the profiliation of paganism. Spuria.—A short treatise, "Quid Odola dil non sint", is printed in all editions as Cyprian's. It is made up of Tertullian and Minucius Felix. Its genuineness is accepted by Benson, Monceaux, and Bardenhewer, as it was anciently by Jerome and Augustine. It has been attributed by Hausliefer to Novatian, and is rejected by Harnack, Watson, and von Soden. "De Spectaculis" and "De bono pudi-

um" are with some reason ascribed to Nova-

tian. They are well-written letters of an absent bishop to his flock. "De Laudе martyrii" is again attributed by Harnack to Novatian; but this is not generally accepted. "Adversus Judaeos" is perhaps by a Novatianist, and Harnack ascribes it to Nova-

tian himself. "Ad Novatianum" is ascribed by Har-

nack to Pope Sixtus II. Ehrhard, Benson, Nelke, and Weyman agree with him that it was written in Rome. This is denied by Jülicher, Bardenhewer, Monceaux. Rombold thinks it is by Cyprian. "De Rebaptismate" is apparently the work attributed by Gennadius to a Roman named Ursinus, c. 400. It is followed by Blunt under Ursinus, by Routh and Oudin, and lately by Zahn. But it was almost certainly written during the baptismal controversy under Stephen. It comes from Rome (so Harnack and
others) or from Mauretania (so Ernst, Monecaux, d’Albe), and is directed against the view of Cyprian. The little homily "De Aleatoribus" has had quite a literature of its own within the last few years, since it was attributed by Harnack to Pope Victor, and therefore to the early Latin ecclesiastical writing. The controversy has at least made it clear that the author was either very early or not orthodox. It has been shown to be improbable that he was very early, and Harnack now admits that the work is by an anti-pope, either Novatianist or Donatist. References to all the brochures and articles on the subject will be found in Ehrhard, in Bardenhewer, and especially in Harnack (Chronol., II, 370 sqq.):

"De Montibus Sina et Sion" is possibly older than Cyprian's time (see Harnack, and also Turner in Journal of Theol. Studies, July, 1906). Harnack, Ad Vigilium Episcopum de Judaeis incredulitate" is by a certain Celsus, and was once supposed by Harnack and Zahn to be addressed to the well-known Vigilius of Thaphesus, but Macholz has now convinced Harnack that it dates from either the persecution of Valerian or that of Maxentius. The two "Orations" are of uncertain date and authorship. Tularitan clerics, who have been attributed by Dom Morin and by Harnack to the Donatist Bishop Macrobius in the fourth century, "De duplicita Martyrio ad Fortunatum" is found in no MS., and was apparently written by Erasimus in 1530. "De Paschá computus" was written in the year preceding Easter, 145, and all the above spurious texts may be found in Harnack, Handbuch of Cyprian. The "Exhortatio de penitentia" (first printed by Trombelli in 1761) is placed in the fourth or fifth century by Wundt, but in Cyprian's time by Monecaux. Four letters are also given by Hartel; the first is the original commencement of the "Ad Donatum". The others are forgeries; the third, according to Mercati, is by a fourth-century Donatist. The six poems are by one author, of quite uncertain date. The amusing "Cena Cypriana" is found in a large number of Cyprianic MSS. Its date is uncertain; it was re-edited by Blessed Rhabanus Maurus. On the use of it at pageant in the early Middle Ages see Mann, "History of the Popes", II, 289.

The principal editions of the works of St. Cyprian are: RUBI, 1471 (the ed. princeps), dedicated to Paul II; reprint, Venice, 1471, and 1483; Memminger, c. 1477; DEVEREUX, c. 1477; Paris, 1506; ed. by Remboul (Paris, 1806) and by Lumbard (Leipzig, 1862). The first MS text was printed in 1544 at Cologne). A careful critical edition was prepared by Latino Latini, and published by Manutius (Rome, 1583); Morel also wt. to the MSS. (Paris, 1584); so did Pamète (Antwerp, p. 1588), but with less success; Rigault did somewhat better (Paris, 1648), Bishop Oxford and Dean of Christ Church, published a well-known edition from MSS. in England (Oxford, 1802). The dissertations by Dodwell and the "Annales Cypriani" by Pearson, who arranged the letters in chronological order, may or may not have been made this edition important, though the edition prepared by John Baluze was brought out after his death by Dom Prudence Maran (Paris, 1726), and has been several times reprinted, especially by Migne (P. L., IV and V). The best edition is that of the Vienna Academy (C. S. E. L., vol. III, in 3 parts, Vienna, 1868-71), edited from the MSS. by Hartel. Since much work has been done upon the history of the text, and especially on the order of the letters and treatises as witnessing to the genealogy of the codices.

The above is only a selection from an immense literature on Cyprian and the pseudo-Cyprianic writings, for which see BUNDI, Bibliotheque Archéologique, 1907.

Good lists in von Soden, and in HARNACK, Chronol., II; the very full references in BARDENHEWER are conveniently classified.

JOHN CHAPMAN.

Cyprus, an island in the Eastern Mediterranean, at the entrance of the Gulf of Alexandretta. It was originally inhabited by Phoenicians and Greeks, and was famous for its fertility and wealth. It was long autonomous, in the sixth century b. c. dominion over it was disputed by the Egyptians and the Persians, the latter ruling it till the invasion of Alexander the Great. From the Ptolemies of Egypt it passed to the Romans (59 b.c.). Despite Roman invasions from the 1st century a.d. it remained a part of the Eastern Empire until the end of the twelfth. In 1191 it was conquered by Richard the Lion-Hearted, who gave it to Guy de Lusignan, King of
Jerusalem; in 1373 it fell to the Genoese, in 1489 to the Venetians. Finally, in 1671, it became Moslem territory under Sultan Selim II. In 1788 it was occupied by England and is now administered by an English high commissioner, assisted by a board of four Englishmen, 1100 Maro (580 Muslims, 580 Christians, few Protestants and Jews, and the rest Greeks). It produces dates, carobs, oranges and other fruits, oil, wine, and corn. It has also sponge fisheries. Gypsum is mined there and copper mines were worked in ancient times. Christianity was successfully preached in Cyprus by St. Paul, St. Barnabas (a native of the island), and St. John Mark. At Paphos the magician Elymas was blinded and the Proconsul Sergius Paulus was converted (Acts, xi, xiii, xv). The Byzantine "Synaxaria" mention many saints, bishops, and martyrs of this early period, e.g. St. Lazarus, St. Haralides, St. Nicanor (one of the first seven deacons), and other fourth-century names, that of St. Spiridon, the shepherd Bishop of Trimithus, present at the Council of Nicea in 325 with two other Cypriot bishops, whose relics were removed to Corfu in 1460, and that of St. Epiphanius (d. 403), Bishop of Salamis, the zealous adversary of all heresies and author of many valuable theological works. The Bishop of Salamis (later Constantia) was then metropolitan of the whole island, but was himself subject to the Patriarch of Antioch. During the Arian quarrels and the Eustathian schism, the Cypriote Church began to claim its independence. Pope Innocent I (399) united the rights of the Antiochene patriarchate, Alexander I. However, it was not long before the Council of Ephesus (431) in its seventh session acknowledged the ecclesiastical independence of Cyprus: the cause was gained by the metropolitan, Rhexenus, who was present at Ephesus with three of his suffragans. In 486 Peter the Dyer (Petrus Fullo), the famous Monophysite patriarch, made an effort to recover the ancient Antiochene jurisdiction over the island. During the conflict, however, the Cypriote metropolitan, Anthimus, claimed to have learned by a revelation that the site of the sepulchre of St. Barnabas was quite near his own city of Salamis; he then had the Apostle's Tome, the Apocalypse and Matthew's Gospel, brought the relics to Constantinople, and presented them to the Emperor Zeno. Acacius of Constantinople decided in favour of Cyprus against Antioch, since which time the ecclesiastical independence (autocephalia) of the island has no more been called in question, the archbishop, known as archbishop of the island, reigning immediately after the five great patriarchs.

From the fifth to the twelfth century the following Archbishops of Constantia (Salamis) are worthy of note: Acadius, biographer of St. Symeon Stylites the Younger, and an uncompromising opponent of the Episcopate (v.), this document in a council and sent the pertinent decree to Pope Theodore I, but became afterwards infected with the very error he had formerly condemned; George, a defender of the holy images (icons); Constantine, who played a conspicuous part in their defence; and Nicephorus Phocas, Bishop of Mazalon, appointed Patriarch of Constantinople in 1147. Another remarkable prelate is St. Demetrius, Bishop of Chytraea (ninth and tenth century). After the conquest of Cyprus by the Arabs, 632-647, the Christian population with its bishop emigrated to the mainland. The Emperor Isaac II appointed themselves generally worthy of their mission, by resisting the encroachments of the kings, sometimes also of the Latin Patriarchs of Jerusalem, and even of the pontifical legates. The only reproof they deserve is a want of tact in their behaviour towards the Greeks, and also that their clergy, at certain times, were guilty of moral laxity. Few saints appear in Latin Cyprus; we hear only of the saintly Francisca, Ugo di Fagiano, and the Dominical, Pierre de La...
Pala, Patriarch of Jerusalem and administrator of the See of Limsal. Blessed Pierre Thomas, a Carmelite and papal legate, who strove hard to convert the Greeks, died at the siege of Famagusta in 1666.

After frightful massacres, the Turks allowed the Greeks to retain their churches and their synods, with an archbishop styled “Most Blessed Archbishop of Nea Justiniana [a blunder for Justinianopolis] and all Cyprus”, and three bishops at Paphos, Citium, and Karpassia. In the seventeenth century the last-named see was suppressed, and its territory given to the archbishop of Jerusalem, and its mere name of “Paphos” became a diocese. The problem of conduct, and assuming, as has been said, the Socratio doctrine that the chief aim of conduct is happiness, they concluded that happiness is to be attained by the production of pleasurable feelings and the avoidance of painful ones. Pleasure, therefore, is the chief aim in life. The good man is he who obtains or strives to obtain the maximum of pleasure and the minimum of pain. Virtue is not good in itself; it is good only as a means to obtain pleasure. This last point raises the question: What did the Cyrenaeans really mean by pleasure? They were certainly sensualists, yet it is not entirely certain that by pleasure they meant mere sensuous pleasure. They speak of a hierarchy of pleasures, in which the pleasures of the body are subordinated to virtue, culture, knowledge, artistic enjoyment, which belong to the higher nature of man. Again, some of the Cyrenaeans reduced the vices to state, painlessness; and others, later still, substituted for pleasure “cheerfulness and indifference”. The truth seems to be that in this, as in many other instances, sensism was satisfied with a superficial and loosely-jointed system. There was no consistency in the Cyrenaeic theory, and the founders of the school looked for. Indeed, in spite of the example of the founders of the school, the later Cyrenaeans fell far below the level of what was expected from philosophers, even in Greece, and their doctrine came to be merely a set of maxims to justify the careless manner of living of men whose chief aim in life was a pleasant time. But, taken at its best, the Cyrenaeic philosophy can hardly justify its claim to be considered an ethical system at all. For good and evil it substituted the pleasant and the painful, without reference, direct or indirect, to obligation or duty. In some points of doctrine the school descends to the commonplace, as when it justify obedience to law by remarking that the observance of the law of the land leads to the avoidance of punishment, and that one should act honestly because one thereby increases the sum of pleasure. The later Cyrenaeans made common cause with the Epicureans. Indeed, the difference between the two schools was one of details, not of fundamental principles.

S. Petrides.

Cyrenian School of Philosophy.—The Cyrenian School of Philosophy, so called from the city of Cyrene, in which it was founded, flourished from about 400 to about 300 B.C., and had for its most distinctive tenet Hedonism, or the doctrine that pleasure is the chief good. The school is generally said to have derived its doctrines from Socrates on the one hand and from the sophists, Protagoras, on the other. From Socrates, by a perversion of the doctrine that happiness is the chief good, it derived the doctrine of the supremacy of pleasure, while from Protagoras it derived its relativistic theory of knowledge. Aristippus, a pupil of both, was the founder of the school, and counted among his followers his daughter Arete and his grandson Aristippus the Younger. The Cyrenians started their philosophical inquiry by agreeing with Protagoras that all knowledge is relative. That is true, they said, which seems to be true; of things in themselves we can know nothing. From this they were led to maintain that we can know only our feelings, or the impression which things produce upon us. Transfer-

William Turner.
Synesius; the latter, a convert to Christianity, died Bishop of Ptolemais. Lequien (II, 621) mentions six bishops of Cyrene, and according to Byzantine legend the last of them, St. Theodore, suffered martyrdom under Diocletian; about 370 Philo dared to consecrate by himself a bishop for Hydra, and was succeeded by his own nephew, Philo; Rufus sided with Dioscorus at the Robber Synod (Latrocinium) of Ephesus in 449; Leontius lived about 600. Lequien (II, 621) also lists six Latin bishops, from 1477 to 1557. The Latin titulus see was suppressed by a papal decree of 1894. The old city, ruined by the Arab invasion in the seventh century, is not inhabited, but its site is still called Qrennah (Cyrene). Its necropolis is one of the largest and best preserved in the world, and the tombs, mostly of Dorian style.

S. PÉTRIDES.

Cyril and Methodius (of Constantine and Methodius), Saints, the Apostles of the Slavs, were two brothers, born in Thessalonica, in 827 and 826 respectively. Though belonging to a senatorial family, they renounced secular honours and became priests. They were living in a monastery on the Boeoporus, when the Khazars sent to Constantinople for a Christian teacher. Cyril was selected and was accompanied by his brother. They learned the Khazar language and converted many of the people. Soon after the Khazar mission there was a request from the Moravians for a preacher of the Gospel. German missionaries had already laboured among them, but without success. The Moravians wished a teacher who could instruct them in the art of language in the Slavonic tongue. On account of their acquaintance with the language, Cyril and Methodius were chosen for the work. In preparation for it Cyril invented an alphabet and, with the help of Methodius, translated the Gospels and the necessary liturgical books into Slavonic. They went to Moravia in 863, and laboured for four and a half years. Despite their success, they were regarded by the Germans with distrust, first because they had come from Constantinople where schism was rife, and again because they held the Church services in the Slavonic language. In his account the brothers were summoned to Rome by Nicholas I, who died, however, before their arrival. His successor, Adrian II, received them kindly. Convinced of their orthodoxy, he commended their missionary activity, sanctioned the Slavonic Liturgy, and ordained Cyril and Methodius bishops. Cyril, however, was not to return to Moravia. He died in Rome, 4 Feb., 869.

At the request of the Moravian princes, Rastislav and Svatopluk, and the Slav Prince Kocel of Pannonia, Adrian II formed an Archdiocese of Moravia and Pannonia, made it independent of the German Church, and at length (Methodius) an Archbishop. In 870 King Louis and the German bishops summoned Methodius to a synod at Ratibon. Here he was deposed and condemned to prison. After three years he was liberated at the command of Pope John VIII and reinstated as Archbishop of Moravia. He zealously endeavoured to spread the Faith among the Bohemians, and also among the Moravians. Soon, however, he was summoned to Rome again in consequence of the allegations of the German priest Wiking, who impugned his orthodoxy, and objected to the use of Slavonic in the Liturgy. But John VIII, after an inquiry, sanctioned the Slavonic Liturgy, decreeing, however, that in the Mass the Gospel should be read first in Latin and then in Slavonic. Wishing, in the meantime, had been nominated one of the suffragan bishops of Methodius. He continued to oppose his metropolitan, going so far as to produce spurious papal letters. The pope, however, assured Methodius that they were false. Methodius went to Constantinople about this time, and, with the assistance of several priests, he completed the translation of the Holy Scripture, with the exception of the Books of Machabees. He translated also the "Nomocanou", i.e. the Greek ecclesiastico-civil law. The enemies of Methodius did not cease to antagonize him. His health was worn out by the long struggle, and he died 6 April, 885, recommending as his successor Gorazd, a Moravian Slav who had been his disciple.

Formerly the feast of Saints Cyril and Methodius was celebrated in Bohemia and Moravia on 9 March; but Pius IX changed the date to 5 July. Leo XIII, by his Encyclical "Grande Munus" of 30 September, 1880, extended the feast to the universal Church. (See Moravia; Slavonic Liturgy; Bohemia; Poland; John VIII.)

L. ABRAHAM.

Cyril of Alexandria, Saint, Doctor of the Church, has his feast in the Western Church on the 28th of January; in the Greek Church it is found on the 9th of June, and (together with St. Athanasius) on the 8th of January, Divinae. He seems to have been of an Alexandrian family, and was the son of the brother of Theophilus, Patriarch of Alexandria; if he is the Cyril addressed by Isidor of Pelusium in Ep. xxv of Bk. I, he was for a time a monk. He accompanied Theophilus to Constantinople when that bishop held the "Synod of the Oak" in 403 and deposed St. John Chrysostom. Theophilus died 15 Oct., 412, and on the 18th Cyril was consecrated his uncle's successor, but only after a riot between his supporters and those of his rival, Timotheus. Socrates complains bitterly that one of his first acts was to order the absence of the Novatians. He also drove out of Alexandria all the Jews, who had formed a flourishing community there since Alexander the Great. But they had caused tumults and had massacred the Christians, to defend whom Cyril himself assembled a mob. This may have been the only possible defense, since the Prefect of Egypt, Orestes, who was very angry at the expulsion of the Jews, was also jealous of the power of Cyril, which certainly rivalled his own. Five hundred monks came down from Nitria to defend the patriarch. In a disturbance which arose, Orestes was wounded in the head by a stone thrown by a monk named Ammonius. The prefect had Ammonius tortured to death, and the young and fiery patriarch honoured his remains for a time as those of a martyr. The Alexandrians were always riotous, as we learn from Socrates (VII, vii) and from St. Cyril himself (Hom. for Easter, 419). In one of these riots, in 422, the prefect of Nitria, named Poles, called for a mob to whom he was committed the murder of the female philosopher Hypatia, a highly-respected teacher of neo-Platonism, of advanced age and (it is said) of many virtues. She was a friend of Orestes, and many believed that she prevented a reconciliation between prefect and patriarch. A mob led by a lector, named Peter, dragged her to a church and tore her flesh with potherbs
till she died. This brought great disgrace, says Socrates, on the Church of Alexandria and on its bishop; but a lector at Alexandria was not a council (Socr., V, xxii), and Socrates does not suggest that Cyril was himself to blame. Damascius, indeed, accuses him, but he is a late authority and a hater of Christians.

Theophilus, the persecutor of Chrysostom, had not the least reason of communion with Rome from that saint’s death, in 406, until his own. For some years Cyril also refused to insert the name of St. Chrysostom in the diplomas of his Church, in spite of the requests of Chrysostom’s supplanter, Atticus. Later he seems to have yielded to the representations of his spiritual father. (See also, Ep. I, 370 (n. 12), and even after the Council of Ephesus that saint still found something to rebuke in him on this matter (Ep. I, 310). But at that date Cyril seems to have been long since trusted by Rome.

It was in the winter of 427–28 that the Antiochene Nestorius became Patriarch of Constantinople. His heretical teaching soon became known to Cyril. Against him Cyril taught the use of the term Theotokos in his Paschal letter for 429 and in a letter to the monks of Egypt. A correspondence with Nestorius followed, in a more moderate tone than might have been expected. Nestorius sent his sermons to Pope Celestine and was received with approbation; for the latter wrote to St. Cyril for further information. Rome had taken the side of St. John Chrysostom against Theophilus, but had neither censured the orthodoxy of the latter, nor consented to the patriarchal powers exercised by the bishops of Constantinople. To St. Celestine Cyril was not only the first prelate of the East, he was also the inheritor of the traditions of Athanasius and Peter. The pope’s confidence was not misplaced. Cyril had learnt prudence. Peter had attempted unsuccessfully to appoint a Bishop of Constantinople; Theophilus had deposed another. Cyril, though in this case Alexandria was in the right, does not act in his own name, but denounces Nestorius to St. Celestine, since ancient custom, he says, persuaded him to bring the matter before the pope. He relates all that had occurred, and begs Celestine to decree what he thinks fits (τὸν ναόν ἀνάθημα ἢ μιμοῦν—a phrase which Dr. W. Bright chooses to weaken into “formulate’); and communicate it also to the bishops of Alexandria, to the bishops of Rome and of Egypt; (i.e. the Antiochene Patriarchate).

The pope’s reply was of astonishing severity. He had already commissioned Cassian to write his well-known treatise on the Incarnation. He now summoned through Roman synods (and councils had something to do with the office of the modern Roman Congregations), and despatched a letter to Alexandria with enclosures to Constantinople, Philippi, Jerusalem, and Antioch. Cyril is to take to himself the authority of the Roman See, and to admonish Nestorius that unless he recants within ten days from the receipt of the ultimatum, he is separated from “our body” (the popes of the day have the habit of speaking of other churches as the members of which they are the head; the body is, of course, the Catholic Church). If Nestorius does not submit, Cyril is to provide the Church of Constantinople. Such a sentence of excommunication and deposition is to be conveyed with the usual withdrawal of actual communion by the popes from Cyril himself at an earlier date, from Theophilus, or, at Antioch, from Flavian or Meletius. It was the decree Cyril had asked for. As Cyril had twice written to Nestorius, his citation in the name of the pope is to be counter as a third warning, after which no grace is to be given.

St. Cyril summoned a council of his suffragans, and composed a letter to which were appended twelve propositions for Nestorius to anathematize. The epistle was not conciliatory, and Nestorius may well have been taken aback. The twelve propositions did not emanate from Rome, and were not at all equally those one or two years later among the authorities invoked by the Monophysite heretics in their own favour. Cyril was the head of the rival theological school to that of Antioch, where Nestorius had studied, and was the hereditary rival of the Constantinopolitan would-be patriarch. Cyril wrote also to John of Antioch, informing him of the position and intimating that if John should support his old friend Nestorius, he would find himself isolated over against Rome, Macedonia, and Egypt. John took the hint, and urged Nestorius to yield. Meanwhile, in Constantinople itself large numbers of the people held their council from Nestorius, and the Emperor Theodosius I had been persuaded to summon a council to meet at Ephesus. The imperial letters were dispatched 19 November, whereas the bishops sent by Cyril arrived at Constantinople-only on 7 December. Nestorius, somewhat naturally, refused to accept the message sent by his rival, and on the 13th or 14th of December preached publicly against Cyril as a calumniator, and as having used bribes (which was probably as true as it was usual); but he declared himself willing to use the word Theotokos. These sermons he sent to John of Antioch, who referred them to the anathematizations of Cyril. Nestorius, however, is said to have received with approbation, for the latter wrote.

If Cyril’s propositions might be taken to deny the two natures in Christ, those of Nestorius hardly veiled his belief in two distinct persons. Theodoret urged John yet further, and wrote a treatise against Cyril, to which the latter replied with some warmth. He also wrote an “Answer” in five books to the sermons of Nestorius.

As the fifteenth-century idea of an ecumenical council superior to the pope had yet to be invented, and there was but one precedent for such an assembly, we need not be surprised that St. Celestine welcomed the initiative of the emperor, and hoped for peace through the assembly. (See Ephesus, Council of.) Nestorius found the churches of Ephesus closed to him, when he arrived with the imperial commissioner, Count Candidian, and his own friend, Count Ireneus. Cyril came with fifty of his bishops. Palestine, Crete, Asia Minor, and Greece added their “yes,” but Antioch and the suffragans were delayed. Cyril may have believed, rightly or wrongly, that John did not wish to be present at the trial of his friend Nestorius, or that he wished to gain time for him, and he opened the council without John, on 22 June, in spite of the request of sixty-eight bishops for a delay.

This was an initial error, which had disastrous results.

The legates from Rome had not arrived, so that Cyril had no answer to the letter he had written to Celestine asking “whether the holy synod should receive a man who condemned what it preached, or, because the time of delay had elapsed, whether the sentence was still in force”. Cyril might have presumed that the pope, in agreeing to send legates to the council, intended Nestorius to have a complete trial, but it was more convenient to assume that the Roman ultimatum had not been suspended, and that the council was bound by it. He therefore took the place of president, not only as the highest in rank, but also as still holding the place of Celestine, though he cannot have received any fresh commission from the pope.

Nestorius was summoned, in order that he might explain his neglect of Cyril’s former monition in the name of the pope. He refused to recognize the bishops whom the council sent to him. Consequently nothing remained but formal procedure. For the council was bound by the canons to depose Nestorius for contumacy, as he would not appear, and by the letter of Celestine to condemn him for heresy, as he had not recanted. The correspondence between
