TABLES OF ABBREVIATIONS.

tr. translation or translated. By itself it means “English translation”, or “translated into English by”. Where a translation is into any other language, the language is stated.

t., tr., tract tractate.
v. see (Lat. vide).
Ven. Venerable.

II.—ABBREVIATIONS OF TITLES.

Acta SS. Acta Sanctorum (Bollandists).

Hast., Dict. of the Bible Hastings (ed.), A Dictionary of the Bible.
Kirchenlex. Wetzer and Welte, Kirchenlexicon.
P. G. Migne (ed.), Patres Graeci.
Vig., Dict. de la Bible. Vigouroux (ed.), Dictionnaire de la Bible.

NOTES I.—Large Roman numerals standing alone indicate volumes. Small Roman numerals standing alone indicate chapters. Arabic numerals standing alone indicate pages. In other cases the divisions are explicitly stated. Thus “Rashdall, Universities of Europe, I, ix” refers to the ninth chapter of the first volume of that work; “I, p. ix” would indicate the ninth page of the preface of the same volume.

Notes II.—Where St. Thomas (Aquinas) is cited without the name of any particular work the reference is always to “Summa Theologica” (not to “Summa Philosophiae”). The divisions of the “Summa Theol.” are indicated by a system which may best be understood by the following example: “I-II, Q. vi. a. 7, ad 2 ss.” refers the reader to the seventh article of the sixth question in the first part of the second part, in the response to the second objection.

Notes III.—The abbreviations employed for the various books of the Bible are obvious. Ecclesiastical is indicated by Eccl., to distinguish it from Ecclesiastes (Eccles.). It should also be noted that I and II Kings in D. V. correspond to I and II Samuel in A. V.; and I and II Par. to I and II Chronicles. Where, in the spelling of a proper name, there is a marked difference between the D. V. and the A. V., the form found in the latter is added, in parentheses.

Diocese (Lat. dioecesis), the territory or churches subject to the jurisdiction of a bishop (q. v.).

I. ORIGIN OF TERM.—Originally the term diocese (Gr. διοίκησις) signified management of a household, hence administration or government in general. This term was soon used in Roman law to designate the territory dependent for its administration upon a city (civitas). What in Latin was called ager, or territorium, namely a district subject to a city, was habitually known in the Roman East as a diocese. But as the Christian bishop generally resided in a civitas, the territory subject to a bishop by reason of his being usually contemnous with the juridical territory of the city, came to be known ecclesiastically by its usual civil term, diocese. This name was also given to the administrative subdivision of some provinces ruled by legates (legei) under the authority of the governor of the province. Finally, Diocletian designated by this name the twelve great divisions which he established in the empire, and over each of which he placed a vicarius (Paulus-Wis-Now, Real-Encyclopädie der classischen Altertums-wissenschaft, Stuttgart, 1903, V, I, 716 sqq.). The original term for local groups of the faithful subject to a bishop was τεκτωνία (church), and at a later date, τομογονία, i. e. the neighbourhood (Lat. parochia, paro-cho), The Apostolic Canons (xiv, xv), and the Council of Nicea in 325 (can. xvi) applied this latter term to the territory subject to a bishop. This term was retained in the East, where the Council of Constantinople (381) reserved the word diocese for the territory subject to a patriarch (can. ii). In the West also parochia was long used to designate an episcopal see. About 850 Leo IV, and about 1050 Urban II, still employed parochia to denote the territory subject to the jurisdiction of a bishop. Alexander III (1159-1181) designated under the name of parochiani the subjects of a bishop (c. 4, C. X, qu. 1; c. 10, C. IX, qu. 2; c. 9, X, De testibus, II, 20). On the other hand, the present meaning of the word diocese is met with in Africa at the end of the fourth century (cc. 50, 51, C. XVI, qu. 1), and afterwards in Spain, where the term parochia, occurring in the ninth canon of the Council of Antioch, held in 341, was translated by "diocese" (c. 2, C. IX, qu. 5). See also the ninth canon of the Synod of Toledo, in 589 (Hefele, ad b. an. and c. 6, C. X, qu. 3). This usage finally became general in the West, though diocese was sometimes used to indicate parishes in the present sense of the word (see Parish). In Gaul, the words terminus, territorium, or territorius, were also used.

II. HISTORICAL ORIGIN.—It is impossible to determine what rules were followed at the origin of the Church in limiting the territory over which each bishop exercised his authority. Universality of ecclesiastical jurisdiction was a personal prerogative of the Apostle; their successors, the bishops, enjoyed only a jurisdiction limited to a certain territory: thus Ignatius was Bishop of Antioch, and Polycarp, of Smyrna.

The first Christian communities, quite like the Jewish, were established in towns. The converts who lived in the neighbourhood naturally joined with the community of the town for the celebration of the Sacred Mysteries. Exact limitations of episcopal territory could not have engrossed much attention at the beginning of Christianity; it would have been quite impracticable. As a matter of fact, the extent of the diocese was determined by the domain itself over which the bishop exercised his influence. It seems certain, on the other hand, that, in the East at any rate, by the middle of the third century, the power of the bishop of a town of any importance had become the residence of a bishop and constituted a diocese. There were bishops in the country districts as well as in the towns. The choreopiscopi (ἐκχορεύοντες), or rural bishops, were bishops, it is generally thought, as well as those of the towns; though from about the second half of the third century their powers were little by little curtailed, and they were made dependent on the bishops of the towns. To this rule Egypt was an exception; Alexandria was for a long time the only see in Egypt. The number of Egyptian dioceses, however, multiplied rapidly during the third century, so that in 320 there were about a hundred bishops present at the Council of Alexandria. The number of dioceses was also quite large in some parts of the Western Church, e. g. in Southern Italy and in Africa. In other regions of Europe, either Christianity had as yet a small number of adherents, or the bishops reserved to themselves supreme authority over extensive districts. Thus, in this early period but few dioceses existed in Northern Italy, Gaul, Germany, Britain, and Spain. In the last, however, their number increased rapidly during the third century. The increase of the faithful in small towns and country districts soon made it necessary to determine exactly the limits of the territory of each church. The cities of the empire, with their clearly defined suburban districts, offered limits that were easily acceptable. From the fourth century on it was generally admitted that every city ought to have its bishop, and that his territory was bounded by that of the neighbouring city. This rule was stringently applied in the East. Although Innocent I declared in 415 that the Church was not bound to conform itself to all the civil divisions which the imperial government chose to introduce, the Council of Chalcedon ordered (451) that if a civitas were dismembered by imperial authority, the ecclesiastical organization ought also to be modified (can. xvii). In the West, the Council of Sardica (344) forbade in its sixth canon the establishment of dioceses in towns not populous enough to render desirable their elevation to the dignity of episcopal residences. At the same time many Western sees included the territories of several civitates.

From the fourth century we have documentary evidence of the manner in which the dioceses were created. According to the Council of Sardica (can. vi),
DIOCESE

2

DIOCESE

districts where both the Western and the Eastern Rite are followed. Whatever, therefore, pertains to the creation or suppression of dioceses, changes in their boundaries, and the like is within the pope's exclusive province. As a general rule, the papal work is done in the establishment of dioceses by Propaganda when the question relates to territories subject to this congregation, and by the Congregation of Extraordinary Ecclesiastical Affairs when the establishment of a diocese is governed by concordats (q. v.), or when the civil power of the country has the right to institute a church. We shall take up successively (1) the creation of new dioceses; (2) the various modifications to which they are subject, included by canonists under the term Innovatio.

(1) Creation of Dioceses.—Strictly speaking, it is only in missionary countries that there can be question of the creation of a diocese, either because the country was never converted to Christianity or because its ancient hierarchy was suppressed, owing to conquest by infidels or the progress of heresy. Regularly, before becoming a diocese, the territory is successively a missionary district, a parish, an Aon district, only from the twelfth century. To the Apostolic See also was due the establishment of dioceses in that part of Germany which had been evangelized by St. Boniface. In the Frankish Empire the boundaries of the dioceses were earlier determined than those of the bishopric system, though the Merovingian kings never hesitated to change them by royal authority and without pontifical intervention. In the creation of new dioceses no mention is made of papal authority. The Carolingian kings and their successors, the Western emperors, notably the Ottons (930-1002), sought papal authority for the creation of new dioceses. Since the eleventh century it has been the rule that the establishment of new dioceses is peculiarly a right of the Apostolic See. St. Peter Damian proclaimed (1059-60) this as a general rule, and his dictum is confirmed in the well-known "Dictatus" of Gregory VII (1073-1085). The papal decretales (see DECRETALIA, PAPAL) consider the creation of a new diocese as one of the causes jura, i.e., matters of special importance, reserved to the pope alone (c. 1, X, De translatione episcopi, I, 7; c. 1, X, De officio legisati, I, 30) and of which he is the sole judge (c. 5, Exuvam, communis, De praebendis et dignitatis, III, 2). A word of mention is here due to the missionary or reginary bishops, episcopi gentium, episcopi (archiepiscopi) in gentibus, still very widely used. They had a fixed territory or diocese, but were sent into a country or district for the purpose of evangelizing it. Such were St. Boniface in Germany, St. Augustine in England, and St. Willibrord in the Netherlands. They were themselves the organizers of the diocese, after their apostolic labours had produced happy results. The bishops met with in some monasteries of Gaul in the early Middle Ages, probably in imitation of Irish conditions, had no administrative functions (see BESSELMANN, Gesch. d. kath. Kirche in Irland, I, 220-30, and below).

III. Creation and Modification of Dioceses.—We have noticed above that after the eleventh century the sovereign pontiff reserved to himself the creation of dioceses. In the actual discipline, as already stated, all that touches the diocese is a causa major, i.e., one of those important matters in which the bishop possesses no authority whatever and which the pope reserves exclusively to himself. Since the episcopate is of Divine institution, the pope is obliged to establish dioceses in the Catholic Church, but he remains sole judge of the time and manner, and alone determines what dioceses will be established to each bishop. Generally speaking, the diocese is a territorially circumscribed, but sometimes the bishop possesses authority only over certain classes of persons residing in the territory; this is principally the case in

III. Creation and Modification of Dioceses.—We have noticed above that after the eleventh century the sovereign pontiff reserved to himself the creation of dioceses. In the actual discipline, as already stated, all that touches the diocese is a causa major, i.e., one of those important matters in which the bishop possesses no authority whatever and which the pope reserves exclusively to himself. Since the episcopate is of Divine institution, the pope is obliged to establish dioceses in the Catholic Church, but he remains sole judge of the time and manner, and alone determines what dioceses will be established to each bishop. Generally speaking, the diocese is a territorially circumscribed, but sometimes the bishop possesses authority only over certain classes of persons residing in the territory; this is principally the case in
A city or town suitable for the episcopal residence; the ancient discipline which rules that sees should be established only in important localities is still observed.

Third, a proper endowment (dos congrua) is requisite. The bishop should have at his disposal the resources necessary for his own maintenance and that of the ecclesiastics engaged in the general administration of the diocese, and for the establishment of a cathedral church, the expenses of Divine worship, and the general administration of the diocese. Formerly it was necessary that in part, at least, this endowment should consist of property; but this is not always possible. It suffices if there is a prospect that the new bishop will be able to meet the necessary expenses. In some cases, the civil government grants a subsidy to the bishop; in other cases, he must depend on the liberality of the faithful and on a contribution from the parishes of the diocese, known as the cathedricalum (q. v.).

Fourth, generally, the consent of the civil power is not required; this would be contrary to the principles of the distinction and mutual independence of the ecclesiastical and civil authority. In many countries, however, the consent of the civil authority is indispensably required, either because the Government has pledged itself to endow the occupant of the episcopal sees, or because concordates have regulated this matter, or because a suspicious government would not permit a bishop to administer the new diocese if it were created without civil intervention (see Nussi, Conventiones de rebus ecclesiasticis, Rome, 1889, pp. 19 sqq.).

At present, the creation or division of a diocese is done by a pastoral Brief, forwarded by the Secretary of Briefs. As an example, we may mention the Brief of 11 March, 1884, which established the new Diocese of Fall River. The motive prompting this division was the incrementum religionis and the major bonum animarum; the Bishop of Providence himself requested the division, and this request was approved by the Archbishop of Boston and by all the clergy of the Diocese of Fall River. The question of the division was submitted to Propaganda and to the Apostolic Delegate at Washington. The pope then created, motu proprio, the new diocese, indicated its official title in Latin and in English, and determined its boundaries, which correspond to political divisions, and, finally, fixed the revenues of the bishop. In the case before us these consist in a moderate cathedraticum to be determined by the bishop (discreto arbitrio episcopi imponendum). According to the practice of Propaganda, all the priests who at the time of the division were in the diocese and not membered territory belong to the clergy of the new diocese (Rescript of 13 April, 1891, in Collectanea S. C. de P. F., new ed., no. 1781).

(b) Union of Dioceses.—As in the case of the division of a diocese, the union of several dioceses ought to be justified by motives of public utility, e.g. the small number of the faithful, the loss of resources. As in the case of division, the pope is influenced by the advice of persons familiar with the situation; sometimes he takes the advice of the Government, etc. It is a general principle that the union of dioceses should not be forced upon the people, that such union takes effect only after the death of the actual occupant of the see which is to be united to another; at least when he has not given his consent to this union. Though the pope is not bound by this rule, in practice it must be taken into account. The union of dioceses takes place in several ways. There is, first, the unio aequis principatis or aequalis when the two dioceses are entrusted for the purpose of administration to a single bishop, though they remain in all other respects distinct; each of them has its own cathedral church, revenues, rights, and privileges, but the bishop of one see becomes the bishop of the other by the mere fact of appointment to one of the two. He cannot resign one without ipso facto resigning the other. This situation differs from that in which a bishop administers both sees, or even perpetually another diocese; in this case there is no union between the two sees. It is in reality a case of plurality of ecclesiastical benefices; the bishop holds two distinct sees, and his nomination must take place according to the rules established for each of the two dioceses. On the contrary, in the case of two or more united dioceses, the election or designation of the candidate must take place by the agreement of those persons in both dioceses who possess the right of election or of designation. Moreover, in the case of united dioceses, the spiritual rule of the bishop is that of the bishop, e.g. that he shall reside in each diocese for a part of the year. If the pope makes no decision in this matter, the bishop may reside in the more important diocese, or in that which seems more convenient for the purposes of administration, or even in the diocese which he delibera at the time of the formation of the new diocese; he resides in one of his dioceses he is considered as present in each of them for those juridical acts which demand his presence. He may also convocate at his discretion two separate diocesan synods for each of the two dioceses or only one for both of them. In other respects the administration of each diocese remains distinct. There are two classes of unequal unions of dioceses (uniones inaquae): the unio subjectiva or per accessorium, seldom put into practice, and the unio per confusionem. In the former case, the one diocese retains all its rights and the other loses its rights, obtains those of the principal diocese, and thus becomes a dependency. When a diocese is thus united to another there can be no question of right of election or of designation, because such a dependent diocese is conferred by the pope upon a bishop already appointed to the principal diocese (titular). But the administration of the property of each diocese remains distinct and the titular of the principal diocese must assume all the obligations of the united diocese. The second kind of union (per confusionem) suppresses the two pre-existing dioceses in order to create a new one, whose name and territory are a new diocese to exist. To perpetuate the names of the former sees the new bishop sometimes assumes the titles of both, but in administration no account is taken of the fact that they were formerly separate sees. Such a union is equivalent to the suppression of the dioceses.

(c) Suppression of Dioceses.—Suppression of dioceses, properly so called, in a manner other than by union, takes place only in countries where the faithful and the clergy have been dispersed by persecution, the ancient dioceses becoming missions, prefectures, or vicariates Apostolic. This has occurred in the Orient, in England, the Netherlands, etc. Changes of this nature are not regulated by canon law.

(d) Change of Boundaries.—This last mode of innovation is made by the Holy See, generally at the request of the bishops of the particular diocese. Among the sufficient reasons for this measure are the difficulty of communication, the existence of a high mountain or of a large river, disputes between the inhabitants of one part of the diocese, also the fact that they belong to different countries. Sometimes the settlement of the boundaries of two dioceses is necessary because the limits of each are not clearly defined. Such a settlement is made by a Brief, sometimes also
by a simple decretum or decision of the Congregation of the Consistory approved by the pope, without the formalities of a Bull or Brief.

IV. DIFFERENT CLASSES OF DIOCESES.—There are several classes of dioceses. There are dioceses properly so called and archdioceses (q. v.). The former are the territorial circumscriptions administered by a bishop; the archdiocese is placed under the jurisdiction of an archbishop. Considered as a territorial circumscription, no difference exists between them; the power of their pastors alone is different. Generally, several dioceses are grouped in an ecclesiastical province and are subject to the authority of the metropolitan archbishop. Some, however, are said to be exempt, i. e. from any archiepiscopal jurisdiction, and are placed directly under the authority of the Holy See. Such are the dioceses of the ecclesiastical province of Rome, and several other dioceses or archdioceses, especially in Italy, also in other countries. The exempt archbishops are called titular archbishops, i. e. they possess only the title of archbishop, have no suffragan bishops, and administer a diocese. The term "titular archbishop", it is to be noted, is also applied to bishops who do not administer a diocese, but who have received with the episcopal consecration a titular archiepiscopal. For the better understanding of this it must be remembered that archbishop and bishop are to be distinguished in the Roman Rite. The bishop of a residential see administers his diocese personally and is bound to reside in it, whereas the titular bishops have only an episcopal title; they are not bound by any obligations to the faithful of the dioceses whose titles they bear. These were formerly called bishops or archbishops in partibus infidelium, i. e. of a diocese or archdiocese fallen into the power of infidels; but since 1882 they are called titular bishops or archbishops. Such are the vicars Apostolic, auxiliary bishops, administrators Apostolic, nuncios, Apostolic delegations, etc. (see TITULAR). Mention must also be made of the suburbanicarian dioceses (dioceses suburbaniae), i. e. the six dioceses situated in the immediate neighbourhood of Rome and each of which is administered by one of the six cardinal-bishops. These form a special class of dioceses, the titulars or occupants of which possess certain special rights and obligations (see SUBURBICARIAN DIOCESES).

V. NOMINATION, TRANSLATION, RENUNCIATION, AND DEPOSITION OF A BISHOP.—The general rules relating to the nomination of a residential bishop will be found in the chapter on Bishops. The deposition, however, may be made for whatever may have been the cause of the vacancy of the diocese, except in the case of a contrary order of the Holy See. The Church admits the principle of the perpetuity of ecclesiastical benefices. Once invested with a see the bishop continues to hold it until his death. There are, however, exceptions to this rule. The bishop may be allowed by the pope to resign his see when actuated by motives which do not spring from personal convenience, but from concern for the public good. Some of these reasons are expressed in the laws of the Church, if he has been guilty of a crime of conscience (conscientia criminis), if he is in failing health (debilitas corporis), if he has not the requisite knowledge (defectus scientiae), if he meets with serious opposition from the faithful (multitudo pelehis), if he has been a cause of public scandal (scandalum populi), if he is irregular (irregularitas)—c. 10, X, De renuntiatione, I, 9; c. 18, X, De regularibus, III, 32. The pope alone can accept this renunciation and judge of the sufficiency of the alleged reasons. Pontifical authority is also necessary for an exchange of dioceses between two bishops, which is not allowed except for grave reasons. The same principles apply to the transfer (translatoio) of a bishop from one diocese to another. Canonical legislation compares with the indissoluble marriage the tie which binds the bishop to his diocese. This comparison, however, must not be understood literally. The pope has the power to sever the mystical bond which unites the bishop to his church, in order to grant him another diocese or to promote him to an archiepiscopal see. A bishop may, in such a case, be deposed from his functions for a grave crime. In such a case the pope generally requires the resign of his own accord, and deposes him only upon refusal. As the Holy See alone is competent to try the crime of a bishop, it follows that the pope alone, or the congregation to which he has committed the bishop's trial (Congregation of Bishops and Regulars, the Propaganda, sometimes the Inquisition), can inflict this penalty or pronounce the declaratory sentence required when the law inflicts deposition as the sanction of a specified delinquency. Finally, the pope has always the right, strictly speaking, to deprive a bishop of his diocese, even if the latter is not guilty of crime; but for this act there must be grave cause. After the conclusion of the Concordat of 1801 (q. v.) with France, Pius VII removed from their dioceses all the bishops of France. It was, of course, a very extraordinary measure, but was justified by the gravity of the situation.

VI. ADMINISTRATION OF THE DIOCESE.—The bishop is the general ruler of the diocese, but in his administration he must conform to the general laws of the Church (see BISHOP). According to the Council of Trent he is bound to divide the territory of his diocese into parishes and to reside in them. He is bound to impart to his parishes the diocesan laws for their titulars (Sess. XXIV, c. xiii, De ref.), unless circumstances render impossible the creation of parishes or unless the Holy See has arranged the matter otherwise (Third Plenary Council of Baltimore, nos. 31-33). The bishop needs also some auxiliaries in the administration of a diocese. It is customary for each diocese to possess a chapter (q. v.) of canons in the cathedral church; they are the counsellors of the bishop. The cathedral itself is the church where the bishop has his seat (sede). The pope reserves to himself the right of authorising canons in the same manner as that of a chapter of canons. In many dioceses, principally outside of Europe, the pope does not establish canons, but gives as auxiliaries to the bishop other officials known as consultores cleri diocesani, i. e. the most distinguished members of the diocesan clergy, chosen by the bishop, often in concert with his clergy or some members of it. The bishop is bound to ask the advice of those counsellors, canons or consultants, in the most important matters. The canons possess, in some cases, the right to nullify episcopal actions taken without their knowledge. Strictly speaking, however, possess but a consultative voice (Third Plen. Council of Baltimore, nos. 17-22; Plen. Conc. America Latina, no. 246.—See CONSULTORS, DIOCESAN). After the bishop, the principal authority in a diocese is the vicar-general (vicarius generalis) in episcopal see, if there is one, or the bishop's substitute in the administration of the diocese. The office dates from the thirteenth century. Originally the vicar-general was called the "officiali" (officialis); even yet officialis and vicarius generalis in spiritualibus are synonyms. Strictly speaking, however, he is the bishop's substitute in the administration of the diocese. The office dates from the thirteenth century. Originally the vicar-general was called the "officiali" (officialis); even yet officialis and vicarius generalis in spiritualibus are synonyms. Strictly speaking, however, he is the bishop's substitute in the administration of the diocese.

* The Ruthenian bishop for the United States has neither a diocese, properly so called, nor ordinary jurisdiction.
† One of these dioceses has been suppressed by the Russian Government.

* The Apostolic Delegate of Arabia also includes Egypt.

* Includes also some Chilean territory.
† Bulls have been issued but these dioceses have not been erected.
with the civil law of the country may sometimes offer many advantages (Second Plenary Council of Baltimore, no. 75). In certain very extensive dioceses the powers of the chanceller are exercised by a vicar, or auxiliary bishop, whose duty it is to apply the rules of canon law to the diocesan bishop in the exercise of those functions of the sacred ministry which demand episcopal order. In the appointment of this bishop the pope is not bound to observe the special rules for the appointment of a residential bishop. These titular bishops possess no jurisdiction by right of their office; the diocesan bishop, however, can grant them, e. g., the powers of a vicar-general.

The common ecclesiastical law contains no enactments respecting the rights and powers of the chancellor, an official analogously situated (see Archdeacon). The Second Plenary Council of Baltimore (no. 71) advises the establishment of a chancery in every diocese of the United States. The chancellor is specially charged with the affixing of the episcopal seal to all acts issued in the name of the bishop, in order to prove their authenticity. He appears also in the conduct of ecclesiastical lawsuits, e. g. in matrimonial cases, to prove the authenticity of the alleged documents, to vouch for the depositions of witnesses, etc. Besides these formal functions, the chancellor sometimes holds the office of vicar-general and spiritualibus. By episcopal chancery is sometimes understood the office where are written the documents issued in the name of the bishop and to which is addressed the correspondence relating to the administration of the diocese; sometimes also the term signifies the persons employed in the exercise of these functions. The taxes or dues which the episcopal chancery may claim for the issuing of documents were fixed by the Council of Trent (Sess. XXI, c. 1, De ref.); afterwards by Innocent XI (hence the term Tace Inocenciata) in 8 Oct., 1678; finally by Leo XIII, 10 June, 1896. The fiscal of the bishop, also known as promotor or procurator fiscalis, is the ecclesiastical charged with attending to the interests of the diocese in all trials and especially with endeavouring to secure the punishment of all omissions cognizable in the ecclesiastical tribunals. An assistant, who is called fiscal advocate (advocatus fiscalis), may be appointed to aid this officer.

Formerly the diocese was divided into a number of archdeaconries, each administered by an archdeacon, who exercised considerable authority in that part of the diocese placed under his jurisdiction. The Council of Trent restricted very much their authority, and since then the office of the archdeacon has gradually disappeared. It exists at the present day only as an honorary title, given to a canon of the cathedral chapter (see Archdeacon). On the other hand, the ancient office of vicarii foranei, decani rurales, or archiepiscopi still exists in the Church (see Archpriest; Dean). The division of the diocese into deaneries is not obligatory, but in large dioceses the bishop usually entrusts to certain priests known as deans or vicars forane the oversight of the clergy of a portion of his diocese, and generally delegates to them special jurisdictional powers (Third Plen. Council of Baltimore, nos. 27-30). Finally, by means of the diocesan synod all the clergy participate in the general administration of the diocese. According to the common law, the bishop is bound to assemble a synod at least every year, to which he must convocate the vicar-general, the deans, the canons of the cathedral, and at least a certain number of parish priests. Here, however, custom and provincial privileges have departed in some points from the general legislation. At this meeting the subject relating to the moral and the ecclesiastical discipline of the diocese are publicly discussed and settled. In the synod the bishop is the sole legislator; the members are, at the request of the bishop, give their advice, but they have only a deliberative voice in the choice of the examinatores dii diocesani, i. e. the ecclesiastics charged with the examination of candidates for the parishes (Third Plen. Council of Baltimore, nos. 23-26). It is because the diocesan statutes are generally elaborated and promulgated in a synod that they are sometimes known as the synodal or episcopal laws. In their general character, juridically speaking, they correspond to the general laws of the Church and the enactments of national or plenary and provincial synods, the bishop may regulate by statutes, that are often real ecclesiastical laws, the particular discipline of each diocese, or apply the general decisions of the Church to the special needs of the diocese. Since the bishop alone possesses all the legislative power, and is not bound to propose, in a synod these diocesan statutes, he may modify them or add to them on his own authority.

VII. VACANCY OF THE DIOCESE. If the bishop has already explained how a diocese becomes vacant (see V above); here it will suffice to add a few words touching the administration of the diocese during such vacancy. In dioceses where there is a coadjutor bishop with right of succession, the latter, by the fact of the decease of the diocesan bishop, becomes the residential bishop or ordinar (q. v.) of the diocese. Otherwise the government of the diocese during the vacancy belongs regularly to the chapter of the cathedral church. The chapter must choose within eight days a vicar capitular, whose powers, although inferior to those of a bishop, are, andact like those of a bishop. If the chapter does not fulfill this obligation, the archbishop appoints ex officio a vicar capitular. In dioceses where a chapter does not exist, an administrator is appointed, designated either by the bishop himself before his death, or, in case of his necessity, by the Roman pontiff by the senior bishop of the province (see Administrator).

VIII. CONSPICUS OF THE DIOCESAN SYSTEM OF THE CATHOLIC CHURCH.—The accompanying table of the diocesan system of the Church shows that there are as many degrees in the diocesan system as there are in the Latin, 6 of the Oriental Rites; 6 suburbanicar dioceses; 136 (or 166 with the Patriarchates of Venice, Lisbon, and Gos, in reality archdioceses) archdioceses of the Latin, and 20 of the Oriental Rites; 676 dioceses of the Latin, and 52 of the Oriental Rites; 137 vicariates Apostolic of the Latin, and 5 of the Oriental Rites; 58 prefectures Apostolic of the Latin Rite; 13 Apostolic delegations; 21 abbeyes or prelatures aedificii diocesan; i. e. exempt from the jurisdiction of the diocesan bishop. There are also 89 titular archdioceses and 432 titular dioceses.
 Dioecletian, a titular see of Phrygia in Asia Minor. Dioeces is mentioned by Ptolemy (V, ii, 23), where the former editions read Dokeia; this is probably the native name, which must have been hellenized at a later time; in the same way Dioeces in Dalmatia is more commonly called Dioeces. The autonomous rights of Dioeces are proved by its coins struck in the reign of Elagabalus (Head, Hist. Num., 592). It figures in the "Synecdemus" of Hierocles, in Farthey, "Nova Apocographa" (17 Sept., 284), X. II. His career is called "Nova Tactica", i. e. as late as the twelfth or thirteenth century, as a bishopric in Phrygia Paeastians, the metropolis of which was Laodicea. Only two bishops are known, in 431 and 451 (Lequien, Or. Christ., I, 523). An inscription found near Doghla, or Dolis, a village in the valley of Smyrna, shows that it must be the site of Dioeces, though there are no ruins.

S. Pétrides.

Dioecletian (Valerius Diocletianus), Roman Emperor and persecutor of the Church. b. of parents who had been slaves, at Dioeces, near Salona, in Dalmatia. A.D. 245; d. at Salona, A.D. 313. He entered the army and by his marked abilities attained the offices of Governor of Moesia, consul, and commander of the guards (Hist. Eccl., VIII, ii). In the Persecution, he lost his rank of governor, or as he afterwards styled himself, he became a private citizen. When the son and successor of Carus, Numerian, was murdered at Chalcedon, the choice of the army fell upon Diocletian, who immediately slew his own hand and the sons of Carus. As the last of the Roman emperors, as a general, and as a private citizen, he belongs to the story of the empire. Here only a summary will be given. The reign of Diocletian (284-305) marked an era both in the military and political history of the empire. The triumph which he celebrated together with his colleague Maximian (Nov. 29, 284) was the last triumph within Rome ever beheld. Britain, the Rhine, the Danube, and the Nile furnished trophies; but the proudest boast of the conqueror was that Persia, the persistent enemy of Rome, had at last been subdued. Soon after his accession to power, Diocletian realized that the empire was too unwieldy and too much exposed to attack to be safely ruled by a single head. Accordingly, he associated with himself Maximian, a bold but rude soldier, at first as Caesar and afterwards as Augustus (286). Later on, he further distributed his power by granting the title of Augustus to two generals, Galerius of the Province of Thrace, and Constantius (292). He reserved for his own portion Thrace, Egypt, and Asia; Italy and Africa were Maximian's provinces, while Galerius was stationed on the Danube, and Constantius had charge of Gaul, Spain, and Britain. But the supreme control remained in Diocletian's hands. None of the rulers resided in Rome, and thus the way was prepared for the downfall of the imperial court. Moreover, Diocletian undermined the authority of the Senate, assumed the diplomas, and introduced the servile ceremonial of the Persian court. After a prosperous reign of nearly twenty-one years, he abdicated the throne and retired to Salona, where he lived in magnificence until his death.

Diocletian's name is associated with the last and most terrible of all the persecutions of the early Church. Nevertheless it is a fact that the Christians enjoyed peace and prosperity during the greater portion of his reign. Eusebius, who lived at this time, describes in glowing terms "the glory and the liberty with which the doctrine of piety was honoured," and he extols the eminence of the emperors towards the Christian governors whom they appointed, and towards the Christian members of their households. He tells us that the rulers of the Church "were courted and honoured with the greatest subserviency by all the rulers and governors." He speaks of the vast multitudes that flocked to the religion of Christ, and of the spacious and splendid churches erected in the place of the humble buildings of earlier days. At the same time he bewails the falling from ancient fervour by reason of excessive liberty. Had Diocletian remained sole emperor, he would probably have allowed this toleration to continue undisturbed. It was his subordinate Galerius who first induced him to turn persecutor. These two rulers of the East, at a council held at Nicomedia in 302, solved to suppress Christianity throughout the empire. The cathedral of Nicomedia was demolished (24 Feb., 303). An edict was issued "to tear down the churches to the foundations, and to destroy the Sacred Scriptures by fire; and commanding also that those who were in honourable stations should be degraded if they persevered in their adherence to Christianit" (Euseb., op. cit., VIII, ii). Three further edicts (303-304) marked successive stages in the severity of the persecution: the first ordering that the bishops, presbyters, and deacons should be imprisoned; the second that they should be tortured and compelled by every means to sacrifice; the third including the laity as well as the clergy. The atrocious cruelty with which these edicts were enforced, and the vast numbers of those who suffered for the faith are attested by Eusebius and the Acts of the Martyrs. We read even of the massacre of the whole population of a town because they declared themselves Christians (Euseb., loc. cit., xi, xii; Lactant., "Div. Instit.", V, xi). The abdication of Diocletian (1 May, 305) and the subsequent partition of the empire brought relief to many provinces. In the East, however, two Galerius and Maximian held sway, and the persecution continued to rage. Thus it will be seen that the so-called Diocletian persecution should be attributed to the influence of Galerius; it continued for seven years after Diocletian's abdication. (See PERSECUTIONS.)

T. B. Scannell.

Dioecletianopolis, a titular see of Palestina Prima. This city is mentioned by Hierocles (Synecdemus, 719, 2), Georgius Cyprius (ed. Gelzer, 1012), and in some "Novum Testamentum" in the name of Cæsarea. Its native name is unknown, and its site has not been identified. One bishop is known, Elion, in 359 (Lequien, Oriens Christianus, III, 646).

(2) Another Dioecletianopolis was a suffragan see of Philippopolis in Thrace. Its site is unknown. Two bishops are mentioned, Cyrus and Epictetus, in 451 and 458. A third, Elias, in 553, is doubtful (Lequien, op. cit., I, 1161).

(3) Still another Dioecletianopolis was a suffragan of Ptolemais in Thessalica Secunda (Farthey, Notit. Episc., 1). This city is also mentioned by Hierocles (op. cit., 792, 3), and by

Emperor Diocletian (Capitoline Museum, Rome).
Diodorus

Georgius Cyprianus, 772. Gelzer thinks that Dio- cle
tianus is a later name of Apolinoplis Minor, the
Coptic Koch Berbir, and the Arabian Koch, still existing
near Keft (Coptus). (Amélineau, "Geographie de l'
tonis Minor is known, Fabricius, mentioned in 431
(Loquien, II, 603).

S. PÉTRIDES.

Diodorus of Tarsus, date of birth uncertain; d. about A.D. 392. He was of noble family; a probable
of Antioch. St. Basil calls him a "nursling" of Sil
vanus, Bishop of Tarsus, but whether this discip
ship was at Antioch or at Tarsus is not known. He
studied at Athens, then embraced the monastic state.
He became head of a monastery in or near Antioch, and
St. Chrysostom was his disciple. When Antioch
sweated under Arian bishops, he did not join the
small party of irreconcilables headed by Paulinus,
yet when Bishop Leontius made Aetius a deacon,
Diodorus and Flavian threatened to leave his com
munion. He added, pseudoded, that he had been
yielded. These two holy men, though not priests,
taught the people to sing the Psalms in alternate
choirs (a practice which quickly spread throughout
the Church), at first in the chapels of the martyrs,
then, at Leontius' invitation, in the church. When
at a council held at 691, they were exiled and an arian
bishop in the person of St. Meletius, Diodorus was
made priest. He seems to have written some of his
works against the pagans as early as the reign of
Julian, for that emperor declared that Diodorus had
used the learning and eloquence of Athens against the
immortal gods, who had punished him with sickness
of the throat, emaciation, wrinkles, and a hard
and bitter life. In the persecution of Valens (364-
78), Flavian and Diodorus, now priests, during the
exile of Aetius, far from incurring the wrath of the
assembling them on the northern bank of the Orontes,
the Arian emperor did not permit Catholic worship
within the city. Many times banished, Diodorus, in
372, made the acquaintance of St. Basili in Armenia,
whether that saint had come to visit Meletius. On
the return of the latter to his flock, he made Diodorus
Bishop of Tarsus and Metropolitan of Cilicia. Theodo-
siius soon after, in a decree, named Diodorus and St.
Pelagius of Laodice as norms of orthodoxy for
the whole East. Diodorus was at the Councils of
Nicaea and of Constantinople. Some men makes him responsible at the latter council for the
proposal of Nectarius as bishop of that city, and
represents him as one of the chief movers in the
appointment of St. Flavian as successor to Meletius, by
which the unhappy schism at Antioch was prolonged.
Diodorus came to Antioch in 386 or later, when St.
Chrysostom was already a priest. In a sermon he
spoke of Chrysostom as a St. John the Baptist, the Voice
of the Church, the Rod of Moses. Next day Chrysos-
tom ascended the pulpit and declared that when the
people had added, pseudoded, that he had been
yielded, and was Diodorus, his father, who was John the
Baptist; the Antiochenes could bear witness how he had lived
without possessions, having his food from alms, and
persevering in prayer and preaching; like the Baptist
he had taught on the other side of the river, often he had
been imprisoned—say he had been often be
headed, at least in will, for the Faith. In another
sermon he likens Diodorus to the martyrs: "See his
mortified limbs, his face, having the form of a man,
but the expression of an Angel.

Dioctetus, a name of Diodorus to disown a ficti-
tious letter circulated in his name, permitting mar-
rriage with a deceased wife's sister. In the following
year he criticizes the rhetorical style of the longer of the two
treatises sent him by Diodorus, but gives warm praise
to the shorter. Diodorus's style is praised by Chrysos-
tom, Theoret, and Photius, but of his very numer-
ous writings only a few unimportant fragments have
been preserved, chiefly in Catena (q. v.). He wrote
against some of the heresies and still more against
heathen philosophy. Photius gives a detailed sum-
mary of his eight books "de Fato"; they were evi-
dently very dull from a modern point of view. Ac-
cording to Leontius he composed commentaries on
the whole Bible. St. Jerome says that these were
imitations of those of Eusebius of Emess, but less
distinguished by secular learning. Diodorus rejected
the allegorical interpretation of the Arians, and
adhered to the literal sense. In this he was followed
by his disciple Theodore of Mopsuestia, and by
Chrysostom in his unequalled expositions. The
Antiochene School of which he was the leader was
credited by the synod of 265 with the title of Doctor
himself. Theodore of Mopsuestia was the precursor.
Theodore wrote to exculpate Diodorus,
but St. Cyril declared him a heretic. The damned
passages cited by Marius Mercator and Leontius seem,
however, to belong to a work of Theodore, not of
Diodorus; nor was the latter condemned when
Theo-
dores and passages of Theodoret and Ibas (the Three
Chapters) were condemned by the Fifth General
Council (533). It seems certain that Diodorus went
too far in his opposition to (the younger) Apollinaris
of Laodicea. We are not sure, according to the
Christ was supplied by the Logos. Diodorus, in
emphasizing the completeness of the Sacred Human-
ity, appears to have asserted two hypostases, not
necessarily in a heretical sense. If the developments
by Theodore throw a shade on the reputation of
Diodorus, the praise of all his contemporaries and
especially of his disciple Chrysostom tend to make
more strongly to exculpate him. It will be best to
look upon Diodorus as the innocent source of Nestorianism
(q. v.) only in the sense that St. Cyril of Alexandria
admittedly had been influenced by him, through some incorrect corrections. Against this
view are Julicher [in Theol. lit. Z. (1902), 82–86] and
Funk [in "Rev. d'hist. eccl.", III (1902), 947–71;
reprinted with improvements in "Kirchengesch.
Abhandl."] (Paderborn, 1907, II, 323).

The fragments of his Commentaries on the Old
Testament are collected in Migne, P. G., XXXIII,
from the Catena of Nicoplous and that published by
Corderius (Antwerp, 1643–6), also from Mai, "Nova
Biblia Vetus Bibl."; V. A. Fontenelle, "Leuer du
Spicilegium de la Genese" (Paris, 1852). I. A. list
of the lost works is in Fabricius, "Bibl. Gr.", V,
24 (reprinted in Migne, loc. cit.). Some Syriac
dogmatic fragments are in Lagarde, "Analecta Syriae"
(Leipzig and London, 1888). Four treatises of
Psuedo-Justinian the Martyr have been attributed to
Diodorus by Harnack ("Texte und Unter", N. F., VI,
4, 1901).

JOHN CHAPMAN.

Diogennus, Epistle to (EPISTOLA AD DIGNEBEN) — This beautiful letter to Christianity is cited
by no ancient or medial writer, and came down to
us in a single MS. which belonged to the Abbey of
Strasburg (1870). The identification of Diogennus
with the teacher of Marcus Aurelius, who bore the
same name, is at most plausible. The author's name
is unknown, and the date is anywhere-between the
Apostles and the age of Constantine. It is probably
dated during a severe persecution. The manu-
DIONYSIUS, a titular see in Arabia. This city, which figures in the "Synecdemos of Hierocles" (723, 3) and Georgius Cyprius (1072), is mentioned only in Parthey's "Prima Notitia," about 840, as a suffragan of Bostra. Lequien (Or. christ., II, 885) gives the names of three Greek bishops, Severus, present at Nicea in 325, Elpidius at Constantinople in 335, and Maras, mentioned in 451. Another, Peter, is known by an inscription (Waddington, Inscriptions ... de Syrie, no. 2327). Fifteen or sixteen titular Latin bishops are known throughout the fifteenth century (Lequien, op. cit., III, 1309; Eubel, f. 232, II, 160). Waddington (op. cit., 529 sqq.) identifies Dionysius (Lord of the Pumping) with Shoba, now Khob, a town in the vilayet of Damascus, where many inscriptions have been found. Soada, though an important city, is not alluded to in ancient authors under this name; inscriptions prove that it was built by a "lord builder" named Dionysius" and that it was a metropolis. No late feature admits this view. Gesenius identifies Dionysius with Shohib (Philippopolis), but this is too far from Damascus.

GELZER, ed., Georgii Cyprii descriptio orbis Romani, 209. S. FERDINAND.

DIONYSIUS, SAINT, POPES, date of birth unknown; d. 26 or 27 December, 268. During the pontificate of Pope Stephen (254-57) Dionysius appears as a presbyter of the Roman Church and as such took part in the controversy concerning the validity of Apostolic baptism (see Baptism under sub-title Rebpastism). This caused Bishop Dionysius of Alexandria to write him a letter on baptism in which he is described as an excellent and learned man (Eusebius, Hist. ecc., VII, vii). Later, in the time of Pope Yesuits, the same Bishop of Alexandria addressed Dionysius a letter concerning Lucianus (ibid., VII, ix); who this Lucianus was is not known. After the martyrdom of Sixtus II (6 August, 258) the Roman See remained vacant for nearly a year, as the violence of the persecution made it impossible to elect a new head. It was not until the persecution had begun to subside that Dionysius was raised (22 July, 259) to the office of Bishop of Rome. Some months later the Emperor Gallienus issued his edict of toleration, which brought the persecution to an end and gave a legal existence to the Church (Eusebius, Hist. ecc., VII, xiii). Thus the Roman Church came again into possession of its buildings for worship, its cemeteries, and other properties, and Dionysius was able to bring its administration once more into order. About 260 Bishop Dionysius of Alexandria wrote his letter to Ammonius and Euphranor against Sabellianism in which he expressed himself with inexactness as to the Logos and its relation to God the Father (see Dionysius of Alexandria). Upon this an accusation against him was laid before Pope Dionysius; when he went to Rome, about 260 for the settlement of the matter. The pope issued, in his own name and that of the council, an important doctrinal letter in which, first, the erroneous

DIONYSIUS, SAINT, POPES, date of birth unknown; d. 26 or 27 December, 268. Later, in the time of Pope Yesuits, the same Bishop of Alexandria addressed Dionysius a letter concerning Lucianus (ibid., VII, ix); who this Lucianus was is not known. After the martyrdom of Sixtus II (6 August, 258) the Roman See remained vacant for nearly a year, as the violence of the persecution made it impossible to elect a new head. It was not until the persecution had begun to subside that Dionysius was raised (22 July, 259) to the office of Bishop of Rome. Some months later the Emperor Gallienus issued his edict of toleration, which brought the persecution to an end and gave a legal existence to the Church (Eusebius, Hist. ecc., VII, xiii). Thus the Roman Church came again into possession of its buildings for worship, its cemeteries, and other properties, and Dionysius was able to bring its administration once more into order. About 260 Bishop Dionysius of Alexandria wrote his letter to Ammonius and Euphranor against Sabellianism in which he expressed himself with inexactness as to the Logos and its relation to God the Father (see Dionysius of Alexandria). Upon this an accusation against him was laid before Pope Dionysius; when he went to Rome, about 260 for the settlement of the matter. The pope issued, in his own name and that of the council, an important doctrinal letter in which, first, the erroneous
Pope Soter had sent alms and a letter to the Corinthians:—"For this has been your custom from the beginning, to do good to all the brethren in many ways, and to send alms to many Churches in different cities, now realizing the posthumous achievement, while the Holy Scriptures declare Him to have been begotten; passages in the Bible, such as Deut., xxxii, 6, Prov., viii, 22, cannot be cited in support of false doctrines such as these. Along with this doctrinal epistle Pope Dionysius sent a separate letter to the Alexandria Bishop in which the latter was called upon to explain his views. This Dionysius of Alexandria did in his "Apologia", (Athanasius, De sententia Dionysii, V, xiii; De decreta Nicaeanae synodi, xxvii). According to the ancient practice of the Roman Church Dionysius also addressed a consolatory letter to the Church of Cesarea and sent a large sum of money by messengers for the redemption of enslaved Christians (Basilii, Epist. xxx, ed. Garnier). The great synod of Antioch which deposed Paul of Samosata sent a circular letter to Pope Dionysius and Bishop Maximus of Alexandria concerning its proceedings (Eusebius, Hist. eccl., VII, xxx). After death the body of Dionysius was buried in the catacombs of Alexandria.

Dionysius, Saint, Bishop of Corinth about 170. The date is fixed by the fact that he wrote to Pope Soter (c. 165 to 176; Harnack gives 165-7 to 173-5). Eusebius in his Chronicle placed his "Boruit" in the eleventh year of Marcus Aurelius (171). When Hegesippus wrote in the time of the Antiochian Primus who was bishop about (150-5), while Bacchylus was Bishop of Corinth at the time of the Paeschal controversy (about 190-8). Dionysius is only known to us through Eusebius, for St. Jerome (De viris ill., xxvii) has used no other authority. Eusebius knew a collection of seven of the "Catholic Letters to the Churches" of Dionysius, together with a letter to him from Pinytus, Bishop of Cnosus, and a private letter of spiritual advice to a lady named Chrysophors, who had written to him. The subscription a letter to the Lacedemonians, teaching orthodoxy, and enjoining peace and union. A second was to the Athenians, stirring up their faith exhorting them to live according to the Gospel, since they were not far from apostasy. Dionysius spoke of the recent martyrdom of their bishop, Publius (in the persecution of Marcus Aurelius), and says that Dionysius the Areopagite was the first Bishop of Athens. To the Nicomedians he wrote against Marcionism. Writing to Gortyna and the other dioceses of Crete, he praised the bishop, Philip, for his asceticism. To the Gortynians and Amastrians in Pontus he wrote at the instance of Bacchylides and Elipistus (otherwise unknown), mentioning the bishop's name as Palmas; he spoke in this letter of marriage and continence, and recommended the charitable treatment of those who had fallen away into sin or heresy. Writing to the Cносians, he recommended their bishop, Pinytus, not to lay the yoke of continence too heavily on the brethren, but to consider the weakness of most. Pinytus replied, after polite words, that he hoped Dionysius would send strong meat next time, that his people might not grow up on the milk of babes. This severe prelate is mentioned by Eusebius (IV, xxi) as an ecclesiastical writer, and the historian praises the tone of his letter.

But the most important letter is that to the Romans, the only one from which extracts have been preserved.
DIONYSIUS

African Council of Carthage (419).—(c) Of another
bilingual version of Greek canons, undertaken at the
instance of Pope Hormidas, only the preface has been
preserved. (2) A collection of papal Constitutions
(Collectio decretorum Pontificum Romanorum) from
Sicily in the year 283.

In chronology Dionysius has left his mark con-
misiously, for it was he who introduced the use of the
Christian Era (see CHRONOLOGY) according to which
dates are reckoned from the Incarnation, which he
assigned to 25 March, in the year 754 from the founda-
tion of Rome (A. u. c.). By this method of computa-
tion he intended to supersede the "Era of Diodo-
letion" previously employed, being unwilling, as he tells us,
that the name of an impious persecutor should be thus
kept in memory. The Era of the Incarnation, often
called the Dionysian Era, was soon much used in Italy
and, to some extent, a little later in Spain; during the
eight and ninth centuries it was adopted in England.
Charlemagne is said to have been the first Christian
ruler to employ it officially. It was not until the tenth
century that it was employed in the papal chancery
(Lesch, Chronologie, Freiburg, 1899, p. 233). Dionys-
us also gave attention to the calculation of Easter,
which so greatly occupied the early Church. To this
end he advocated the adoption of the Alexandrian
Cycle of nineteen years, extending that of St. Cyril for
a year and a half. This is the system on which we
work this that he adopted the Era of the Incarnation.

DIONYSIUS, works in P. L., LXVII, and the testimony of
Canons also see bib. exer., Canones der Dian-
sius, Rechts im Abendlande (Gras, 1870); Bardemhawe,
Gesch. der altkirch. Lit. (Freiburg in Br., 1902).

JOHN GERARD.

Dionysius of Alexandria (bishop from 247–8 to
264–5), called "the Great" by Eusebius, St. Basil,
and others, was undoubtedly, after St. Cyprian, the
most eminent bishop of the third century. Like St.
Cyprian, he was not a mere pope, but a great pastor
and administrator. Like St. Cyprian his writings usually
took the form of letters. Both saints were converts
from paganism; both were engaged in the controver-
sies as to the restoration of those who had lapsed in
the Decian persecution, about Novatian, and with re-
gard to the iteration of heretical baptism; both corre-
spended with the popes of their day. Yet it is curi-
os that neither mentions the name of the other.
A single letter of Dionysius has been preserved in Greek
causen law. For, the one was dependent on the caud set up
by Eusebius, and the other in the name of the
works of his great successor St. Athanasius.

Dionysius was an old man when he died, so that his
birth will fall about 190, or earlier. He is said to have
been of distinguished parentage. He became a Chris-
ian when still young. At a later period, when he was
warned by a priest of the danger he ran in studying
the books of heretics, a vision—so he informs us—assured
him that he was capable of proving all things, and that
this facility had in fact been the cause of his conver-
sion. He studied under Origene. The latter was ban-
ished by Eusebius in 321, and Heraclas took his
place at the head of the catechetical school. On the
death of Demetrius very soon afterwards, Heraclas
became bishop, and Dionysius took the headship of
the famous school. It is thought that he retained
this office even when he himself had succeeded Her-
clas as bishop. In the last year of Philip, 249, although
the emperor himself was reported to be a Christian, a
riot at Alexandria, roused by a popular prophet and
poet, had all the effect of a severe persecution. It is
described by Dionysius in a letter to Fabius of Ant-
iok. The mob first seized an old man named Metras,
beaten with clubs when he would not deny his faith,
plied his eyes and face with reeds, dragged him out
of the city, and stoned him. Then a woman named
Quintus, who would not sacrifice, was drawn along the
rough pavement by the feet, dashed against mill-
stones, scourgcd, and finally stoned in the same sub-
urb. The houses of the faithful were plundered.
Not one, so far as the bishop knew, apostatized. The
aged virgin, Apollonia, after her teeth had been
knocked out, sprang of her own accord into the fire
prepared for her by the mob. After his head had
been lodged in the upper story of his own house. It was
impossible for any Christian to go into the streets, even
at night, for the mob was shouting that all who
would not blaspheme should be burnt. The riot was put
down by the civil war, but the new Emperor Decius insti-
tuted a legal persecution in January, 250. St. Cyprian
describes how at Carthage the Christians rushed to
sacrifice, or at least to obtain false certificates of hav-
ing done so. Similarly Dionysius tells us that at
Alexandria many conformed through fear, others on
account of official position, or persuaded by friends;
some pale and trembling at their act, others boldly as-
serting that they had never been Christians. Some
endured imprisonment for a time; others abjured only
at the sight of tortures; others held out until the tortures
conquered their resolution. But there were noble in-
stances of constancy. Julian and Kronion were
scourged through the city on camels, and then burnt
to death. A soldier, Bessas, who protected them from
the insults of the people, was beheaded. Macar, a
Libyan, was burnt alive after long imprisonment and many tortures, were also
burnt, with four women. The virgin Ammoniarion
also was long tortured. The aged Mercuria and Dio-
ynsia, a mother of many children, suffered by the sword.
Heron, Ater, and Isidore, Egyptians, after
many tortures were given to the flames. A boy of
fifteen, Dioscorus, who stood firm under torture, was
dismissed by the judge for very shame. Nemesis
was tortured and scourged, and then burnt between
two robbers. A number of soldiers, and with them an
old man named Cletus, was beheaded; the former was
who was on his trial and about to apostatise. When
called to order they cried out that they were Christians
with such boldness that the governor and his assessor
were taken aback; they suffered a glorious martyr-
dom. Numbers were martyred in the cities and vil-
lages. A steward named Ischyron was pierced
through the stomach by his master with a large stake
because he refused to sacrifice. Many fled, wandered
in the deserts and the mountains, and were cut off by
hunger, thirst, cold, sickness, robbers, and wild animals.
A bishop named Semas, was beheaded with his wife
(prima?) to the Arabian mountain, and was no more
heard of. Many were carried off as slaves by the Sar-
cens and some of these were later ransomed for large
sums.

Some of the lapsed had been readmitted to Christian
fellowship by the martyrs. Dionysius urged upon
Fabius, Bishop of Antioch, who was inclined to join
Novatian, that it was right to respect this judgment
delivered by blessed martyrs "now seated with Christ,
and sharers in His Kingdom and co-assessors in His
judgment." He adds the testimony of an old man, Sar-
pion, who after a long and blameless life had sacrificed,
and could obtain absolution from no one. On his
death-bed he sent his grandson to fetch a priest.
The priest was ill, but he gave a particle of the Eucharist
to the child, telling him to moisten it and place it in the
old man's mouth. Sarpiion received it with joy, and
immediately expired. Sabinus, the prefect, sent a
frumentarius (detective) to search for Dionysius di-
rectly the decree was published; he looked everywhere
but in Dionysius's house, which was shut up; quietly remained. On the fourth day he was inspired
to depart, and he left at night, with his domestics and
certain brethren. But it seems that he was soon made
prisoner, for soldiers escorted the whole party to Ta-
posiris in the Marcots. A certain Timotheus, who
had not been taken with the others, informed a passing
countryman, who carried the news to a wedding-feast he was attending. All instantly rose up and rushed to release the bishop. The soldiers took to flight, leaving their wounded in their charge. Dionysius, believing his rescuers to be robbers, held out his clothes to them, retaining only his tunic. They urged him to rise and fly. He begged them to leave him, declaring that they might as well cut off his head at once, as the soldiers would shortly do so. He let himself down on the ground on his back; but they seized him by the hands and feet and dragged him away, carrying him out of the little town, and setting him on an ass without a saddle. With two companions, Gaius and Peter, he remained in a desert place in Libya until the persecution ceased in 261. The persecution of the Christian world was then thrown into confusion by the news that Novatian claimed the Bishopric of Rome in op. seition to Pope Cornelius. Dionysius at once took the side of the latter, and it was largely by his influence that the whole East, after much disturbance, was brought in a few months into unity and harmony. Novatian wrote to him for support. His curt reply has been preserved entire: Novatian can easily prove the truth of his protestation that he was consecrated against his will by voluntarily retiring; he ought to have suffered more than divided by the Church. Indeed it would have been a particularly glorious martyrdom on behalf of the whole Church (such is the importance attached by Dionysius to a schism at Rome); if he can even now persuade his party to make peace, the matter will seem to have been of no value. The saint of whom the Church of Chalcedon had need, indeed, was much edified by the docile spirit and love of truth which he found. At length Korakion, who had introduced the book and the doctrine, declared himself convinced. The chief interest of the incident is not in the picture it gives of ancient Church life and of the wisdom and gentleness of the bishop, but in the remarkable disquisition, which Dionysius append, on the authenticity of the Apocalypse. It is a very striking piece of "higher criticism," and for clearness and moderation, keenness and insight, is hardly to be surpassed. In 262 the saint dropped down from the book of Novatian to be a full of hidden mysteries, and doubtless really by a man called John. (In a passage now lost, he showed that the book must be understood allegorically.) But he found it hard to believe that the writer could be the son of Zebedee, the author of the Gospel and of the Catholic Epistle, on account of the great contrast of character, style, and "what is called working out." He shows that the one writer calls himself John, whereas the other only refers to himself by some periphrasis. He adds the famous remark, that "it is said that there are two tombs in Ephesus, both of which are called that of John." He demonstrates the close likeness between the Gospel and the Epistle, and points out the wholly different vocabulary of the Apocalypse; the latter is full of solemnism and barbarisms, while the former are in good Greek. This acute criticism was not without effect. The frequent rejection of the Apocalypse in the Greek-speaking Churches, even as late as the Middle Ages. Dionysius's arguments appeared unanswerable to the liberal critics of the nineteenth century. The martyrdom of the Pope Sixtus II, guided by Bouisset, Harnack, and others, to be impressed rather by the undeniable points of contact between the Gospel and the Apocalypse, than by the differences of style (which can be explained by a different aorist and imperfect since, since the author of both books was certainly a Jew), so that even Loisy admits that the opinion of the numerous and learned conservative scholars "no longer appears impossible." But it should be noted that the modern critics have added nothing to the judicious remarks of the third-century patriarch.

The Emperor Valerian, whose accession was in 253, did not persecute until 257. In that year St. Cyprian was banished to Curibus, and St. Dionysius to Kephros in the Mareotis, after being tried, together with one priest and two deacons, before Emilianus, the prefect of Egypt. He himself relates the fact that he was made to the prefect, writing to defend himself against a certain Germanus, who had accused him of a disgraceful flight. Cyprian suffered in 258, but Dionysius was spared, and returned to Alexandria directly after toleration was decreed by Galerius in 256. Not to peace, for in 261-2 the city was in a state of tumult, little less dangerous than a persecution. The great
DIONYSIUS

thoroughfare which traversed the town was impassable.
the bishop had to communicate with his flock by letter, as though they were in different countries.
was easier, he writes, to pass from East to West, than from Alexandria.
for this and previous silence raged anew.
the inhabitants of what was still the second city of the world had decreased so that the
buses between fourteen and eighty were now scarcely so numerous as those between forty and seventy and
had been in any year before.
Controversy arose in the latter years of Dionysius of which the half-Arian
Eusebius has been careful to make no mention. All
we know is from St. Athanasius. Some bishops of the
Pentapolis of Upper Libya fell into Sabellianism and
rejected the distinctness of the Three Persons of the
Nicaean formula. Dionysius, a former convert to Christ,
was separated from St. Paul, and
the bishop of Alexandria in the fourth century.
But Athanasius defended Dionysius by
seeing to the sequel of the history.
Catharist brethren of Alexandria, being offended at the words of their bishop,
and in reply to St. Athanasius (259-268), who wrote a letter, in which he declared
that to teach that the Son was made or was a
creation was an impious equal, though contrary to, that of
St. Athanasius. He also wrote to his namesake of
Alexandria informing him of the accusat the Ground against him.
the latter immediately composed books enti-
tled "Refutation" and "Apology"; in these he explicitly declared that there never was a time when
God was not Father, that Christ always was, being
Word and Wisdom and Power, and coeternal, even as being
not anterior to the light from which he
proceeds. He teaches the "Trinity in Unity and the
Unity in Trinity"; he clearly implies the equality
and eternal procession of the Holy Ghost. In these last
points he is more explicit than St. Athanasius himself.
A less familiar correspondent of Dionysius later
before his error emerged. When we consider the
vagueness and incorrectness in the fourth century
of even the supporters of orthodoxy in the East, the
decision of the Apostleic See will seem a marvellous tes-
timony to the doctrine of the Fathers as to the unfail-
ing faith of Rome.
We find Dionysius issuing yearly, like the later bishops of Alexandria, festal letters announcing the
date of Easter and dealing with various matters.
When the heresy of Paul of Samosata, Bishop of Anti-
och, began to trouble the East, Dionysius wrote to the
Church of Antioch on the subject, as he was obliged to
decline the invitation to attend a synod there, on the score of his age and infirmities. He died soon after
wards.
Dionysius is in the Roman Martyrology on 17 Nov., but he is also intended, with the companions of this
file in the eastern Asia, among the
natives on 3 Oct.: Dionysius, Faustus, Gaius, Peter,
and Paul, Martyrs(). The same error is found in
Greek monographs.

Dionysius the Pseudo-Areopagite.—By "Dionys-
ius the Areopagite" is usually understood the judge of
the Areopagus who, as related in Acts, xvii, 34, was
converted to Christ by St. Paul, and, according to Dionysius of Corinth (Eusebius, Hist.
Ecc]). III, iv) was Bishop of Athens. In the course of time, however, two errors of far-reaching import arose in
connexion with this name. In the first place, a series of famous writings were ascribed to St.
Paul and Dionysius the Areopagite and, secondly, he was popularly identified with the holy martyr of Gaul, Dion-
ysius, the first Bishop of Paris. It is not our purpose to take up directly the latter point; we shall concern
ourselves here (1) with the person of the Pseudo-
Areopagite; (2) with the classification, contents,
and characteristics of his writings; (3) with their history
and transmission; under this head the question as to the
genuineness, origin, first acceptance, and gradual spread of these writings will be answered.

Deep obscurities still surround the person of the Pseudo-Areopagite. External evidence as to the time
and place of his birth, his education, and later occupa-
tion is entirely wanting. Our only source of information regarding this problematical personage is the writings themselves. The clues furnished by the first appearance and by the character of the writings enable us to
conclude that the author belongs at the very earliest
to the latter half of the fifth century, and that, in all probability, he was a native of Syria. His thoughts,
phrases, and expressions show a great familiarity with the works of the neo-Platonic philosophers,
from Proclus and Proclus. He is also thoroughly versed in the sacred books of the Old and the New Testament, and in the works of the Fathers as early as the
Cyril of Alexandria.

(Lessages from the Areopagite writings are
dicated by title and chapter. In this article D. B.
Clement is prefixed to “Clement’s name; C. H.
for “Clement’s name; E. H. for “Ecclesiastical hierarchia;” Th. M. for “Theologia mystica,” which are all found in Migne, P. G., vol. III.)
In a letter to Poly-
carp (Ep. vii, P. G., III, 1080 A) and in “Cels. hier.”
(2); P. G., III, 250 D) he intimates that he was a
former of a pagan, and this seems quite probable,
considering the peculiar character of his literary work.
But one should be more cautious in regard to certain
other personal references, for instance that he was
chosen teacher of the “newly-baptized” (D. D. N., iii
2; P. G., III, 681 B); that his spiritual father
and guide was a wise and saintly man, Hierotheus by name;
that he was advised by the latter and ordered by his
own superiors to compose these works (ibid., 681 sq.).
And it is plainly for the purpose of deceiving that he
has not a few passages of the New Testament of
Crucifixion (Ep., vii; P. G., III, 1081 A) and of
having, with Hierotheus, the Apostles (Peter and James), and other hierarchs, looked upon "the Life-
Begetting, God-Receiving body, i. e. of the Blessed
Virgin" (D. D. N., iii; 2; P. G., 1187 C). The
former of these accounts is based on Matt., xxvii, 45,
and Mark, xv, 33; the latter refers to apocryphal descriptions of the “Dormition Mary”. For the same purpose, i.e. to create the impression that the author himself composed the works of which he and they were identical with the Areopagite mentioned in the Acts, different persons, such as John the Evangelist, Paul, Timothy, Titus, Justus, and Carpus, with whom he is supposed to be on intimate terms, figure in his writings.

The doctrinal attitude of the Pseudo-Areopagite is not clearly defined. A certain vagueness, which was perhaps intended, is characteristic of his Christology, especially in the question concerning the two natures in Christ. We may well surmise that he was not a stranger to the later, and rather modern, form of Monophysitism and that he belonged to that conciliatory group which sought, on the basis of the Henotician issued in 452 by the Emperor Zeno (Evagrius, Hist. Ecl., III, xiv), to reconcile the extremes of orthodoxy and heresy. This reserved, indefinite attitude of the author explains the remarkable fact that opposite factions claimed him as an adherent. As to his social rank, a careful comparison of certain details scattered through his works shows that he belonged to the class of scholars who were known at the time as ascetics.

The writings themselves form a collection of four treatises and ten letters. The first treatise, which is also the most important in scope and content, presents in thirteen chapters an explanation of the Divine names. Setting out from the principle that the names of God are to be learned from Scripture only, and that they afford us but an imperfect knowledge of God, Dionysius discusses, among other topics, God’s goodness, being, life, wisdom, power, and justice. The one underlying thought of the work, recurring again and again under different forms and phrases, is: God, the One Being (ο ίδιος), transcending all quality and predication, all affirmation and negation, and all intellectual conception, by the very force of His love and goodness gives to beings outside Himself their countless gradations, unites them in the closest bonds (συναφή), keeps each by His care and direction in its appointed sphere, and draws them again in an ascending order to Himself (τριαγωνον) While he illustrates the inner life of the Trinity by metaphors of blossom and light and similar symbols.

Third Persons (D. D. N., ii, 7 in P. G., III, 646 B), Dionysius opposes the postulate of all created things from God by the exuberance of being in the Godhead (το θειοκτενσ), its outpouring and overflowing (D. D. N., ix, 9 in P. G., III, 909 C; cf. E. 10 in P. G., III, 648 C; xiii, 1 in P. G., III, 977 D), as well as the power of God’s thought (D. D. N., iv, 6 in P. G., III, 701 A; iv, 1 in P. G., III, 693 B). Exactly according to their physical nature created things absorb more or less of the radiated light, which, however, grows weaker the farther it descends (D. D. N., xi, 2 in P. G., III, 952 A; i, 2 in P. G., III, 588 C). As the mighty root sends forth a multitude of plants which it sustains and controls, so created things owe their origin and conservation to the All-Ruling Deity (D. D. N., x, 1 in P. G., III, 936 D).

Patterned upon the original of Divine love, righteousness, and peace, is the harmony that pervades the universe (D. D. N., chapters iv, vii, xi). All things tend to God, and in Him all are merged and completed, just as the circle returns into itself (D. D. N., iv, 14 in P. G., III, 712 D), as the radii are joined in the centre, or as the tautological equality is in unity (D. D. N., xvi, 6 in P. G., III, 820 sq.). These and many similar expressions have given rise to frequent charges of Pantheism against the author. He does not, however, assert a necessary emanation of things from God, but admits a free creative act on the part of God (D. D. N., iv, 14 in P. G., III, 705 B; cf. C. E. 11, 1 in P. G., III, 177 C); still the echo of neo-Platonism is unmistakable.

The same thoughts, or their applications to certain orders of being, recur in his other writings. The second treatise develops in fifteen chapters the doctrine of the celestial hierarchy, comprising nine angelic choirs which are seven and the rest (triads). The names of the nine choirs are taken from the canonical books and are arranged in the following order. First triad: seraphim, cherubim, thrones; second triad: virtues, dominations, powers; third triad: principes, archangels, angels (C. H., vi, 2 in P. G., III, 200 D). The grouping of the second triad exhibits some variations. From the etymology of each choir-name the author labours to evolve a wealth of description, and, as a result, lapses frequently into tautology. Quite characteristic is the dominant idea that for different choirs of beings less intense in their love and knowledge of God the farther they are removed from Him, just as a ray of light or of heat grows weaker the farther it travels from its source. To this must be added another fundamental idea peculiar to the Pseudo-Areopagite, namely, that the highest choirs transmit the light received from the Divine Source only to the intermediate choirs, and these in turn transmit it to the lowest. The third treatise is but a continuation of the other, and in essence, as it is in substance, the same.

It deals with the nature and grades of the “ecclesiastical hierarchy” in seven chapters, each of which is subdivided into three parts (σαρκον, ψυχιακόν, θειικόν). After an introduction which discusses God’s purpose in establishing the hierarchy of the Church, and in particular the Church’s holiness and supremacy, Dionysius treats of three sacraments (baptism, the Eucharist, extreme unction), of the three grades of the Teaching Church (bishops, priests, deacons), of three grades of the “Learning Church” (monks, people, and a class composed of catechumens, inquirers, and penitents) and, lastly, of the burial of the dead (C. H., iii, (3), 6 in P. G., III, 432 sq.; vi in P. G., III, 529 sq.). The main purpose of the author is to discourse and turn to the uses of contemplation the deeper mystical meaning which underlies the sacred rites, ceremonies, institutions, and symbols. The fourth treatise is entitled “Mystical Theology”, and presents in five chapters guiding principles concerning the mystical union with God, which is entirely beyond the compass of sensible or intellectual knowledge. In twenty letters, four addressed to a monk, Caesius, and one each to a deacon, Dorothoeus, to a priest, Sopater, to the bishop Polycarp, to a monk, Demophilus, to the bishop Titus, and to the Apostle John, contain, in part, additional or supplementary remarks on the above-mentioned principal works, and are, as a whole, part of the larger section of the apokyphal, are addressed to unbelievers. Since in all these writings the same salient thoughts on philosophy and theology recur with the same striking peculiarities of expression and with manifold references, both in both in both matter and form, and from one work to another, the assumption is justified that they are all to be ascribed to one and the same author. In fact, at its first appearance in the literary world the entire corpus of these writings was combined as it is now. An eleventh letter to Apollonius, given in Migne, P. G., III, 1119, is a medieval forgery based on the seventh letter. Apokryphal, also, are a letter to Timothy and a second letter to Titus.

Dionysius would lead us to infer that he is the author of still other learned treatises, namely: “Theological Outlines” (D. D. N., ii, 3 in P. G., III, 640 C); “Sacred Hymns” (D. D. N., i, 2 in P. G., III, 952 B); “Symbolic Theology” (C. H., xxv, 6 in P. G., III, 338 A); and treatises on “The Righteous Judgment of God” (D. D. N., iv, 35 in P. G., III, 736 B), on “The Soul” (D. D. N., iv, 2 in P. G., III, 696 C); and on “The Object of Intellect and Sense” (E. H., i, 2 in P. G., III, 378 B). No reliable trace, however, of any of these writings has ever been discovered, and in his references to them Dionysius is as uncontrollable as in
Having ascertained a terminus post quem, it is possible by means of evidence taken from Dionysius himself to fix a terminus ante quem for the texts of the treatise. About thirty years the period within which these writings must have originated. The earliest reliable citations from the writings of Dionysius are from the end of the fifth and the beginning of the sixth century. The first is by Severus of Antioch, a disciple of Monophysites who later, after him, and Patriarch of Antioch (512–518). In a letter addressed to a certain abbot, John (Maï, Script. vett. nov. coll., VII, i, 71), he quotes in proof of his doctrine of the ματαιώτης φθορά in Christ the Dionysian Ep. iv (P. G., III, 1072 C 3), where a similar expression occurs. Again, in the treatise "Adversus anathem. Juliani Halicarn." (Cod. Syr. Vet. 140, fol. 100 b), Severus cites a passage from D. N. ii, 9, P. G., III, 648 A (Ἀλλὰ σαλῶν ἐκείνως—σοις διδάκτεροι), and returns once more to Ep. iv. In the Syrian "History of the Church" of Zacharias (ed. Ahrens-Krüger, 134–5) it is related that Severus, a man well-versed in the writings of Dionysius (Areop.), was present at the Synod in Tyre (513). Andreas, Bishop of Caesarea in Cappadocia, wrote (about 520) a commentary on the Apocalypse, which makes use of at least three of his works (Migne, P. G., CVI, 257, 305, 356, 780; cf. Diefkamp in "Hist. Jahrb." XVIII, 1897, pp. 1–36). Like Severus, Zacharias rhetor and, in all probability, also Andreas of Cappadocia, had knowledge of the Dionysian treatise. The Areopagites were formerly supposed to have made their first appearance, or rather to have been first noticed by Christian writers, in a few pseudo-epigraphical works which have now been proved to be the products of a much later period; as, for instance, in the following: Pseudo-Dionysius Expositus, "De divinis congreg."; Pseudo-Athanasius, "Questions ad An- thochum duceum"; Q. viii; Pseudo-Hippolytus, against the heretic Beron; Pseudo-Chrysostom, "Sermo de pseudo-prophetis". Until quite recently more credit was given to other lines of evidence on which Franz Hippler endeavoured to support his entirely new thesis, to the effect that the author of the writings lived about the year 375 in Egypt, as Abbot of Rhinokorura. Hippler's attempts, however, at removing the textual difficulties, ἑκδοσις, ἐκδόσεις, ec., prove to be unsuccessful. In fact, those very passages in which Hippler thought that the Fathers had made use of the Areopagite (e. g. in Gregory of Nazianzus and Jerome) do not tell in favour of his hypothesis; on the contrary, they are much better explained if the converse be supposed. A most important witness in favour of his view is Hippler himself, convinced by the results of recent research, has abandoned this opinion. Other events also, both historical and literary, evidently exerted a marked influence on the Areopagite: (1) the Council of Chalcedon (451), the Christological terminology of which was afterwards followed by the writings of Dionysius; (2) the writings of the neo-Platonist Proclus (411–485), from whom Dionysius borrowed to a surprising extent; (3) the introduction (c. 476) of the Credo into the liturgy of the Mass, which is alluded to in the "Ecclesiastical History" (iiii, 2, in P. G., III, 426 C 2 and iii, 3, 7 in P. G., III, 420 C 9, c. f. the explanation of Maximus in P. G., IV, 144 B); (4) the Henotic of the Emperor Zeno (482), a formula of union designed for the bishops, clerics, monks, and faithful of the Orient, as a compromise between Monophysitism and other heterodoxies. The Areopagite correspond fairly to the sense of the Henotic; and one might easily infer that they not only originated in the same sphere, but that they were made to further the purpose of the Henotic. The result of the foregoing data is that the first appearance of the pseudo-epigraphical writings cannot be placed earlier than the latter half, in fact at the close, of the fifth century.
jected as spurious all these citations, and showed that Cyril never made the slightest use of them, though on various occasions they would have served his purpose admirably. He suspects that these falsifiers are Apollinarists. When the Severians rejoined that they could point out in the polemical writings of Cyril against Diodorus and Theodore the use made of such evidence, Hypatius persisted in the stand he had taken: "sed nunc viduis, omnis et in illa libri [Cyrilli] hereticis falsantes addicuerunt ea". The references to the archives at Alexandria had just as little weight with him, since Alexandria, with its libraries, had long been in the hands of the heretics. How could an interested party of such books have been inserted into the treatises? Hypatius refers again especially to Dionysius and successfully puts down the opposition: "illa enim testimonia quae vos Dionysii Arecopagii dicitis, unde potestis ostendere vera esse, sicut suspicamini? Si enim eius erant, non potuisset lateae beatum Cyrillum. Quid autem de besto Cyrillo dico, quando et beatus Athanasius, si pro certo scissem eius fuise, ante omnia in Niceno concilio de consubstantiali Trinitate cadem testimonia protulisset adversus Arii diverse substantiae blasphemas". Indeed, as to the consubstantiality of the Holy Spirit, there are documents that leave no room for misinterpretation; and had these come from a disciple of the Apostles, they would have been all the more valuable. Hereupon the Severians dropped this objection and turned to another.

The fact must, indeed, appear remarkable that these very writings, though rejected outright by such an authority as Hypatius, were within little more than a century looked upon as genuine by Catholics, so that they could be used against the heretics during the Lateran Council in 649 (Hardouin, III, 689 sq.). How had this reversion been brought about? As the following groupings will show, it was chiefly heretic writers, Monophysites, Nestorians, and Monothelites, who during several decades appealed to the Arecopagite. But among Catholics also there were not a few who assumed the genuineness, and as some of these were persons of consequence, the way was gradually paved for the authorization of his writings in the above-mentioned council. To the group of Monophysites belonged: Themistius, deacon in Alexandria about 537 (Bardy, III, 784, 1249 sq.); Colluthus of Alexandria, about 540 (Hardouin, III, 786, 895, 898); John Philoponus, an Alexandrian grammarian, about 546-549 (W. Reichardt, "Philoponus, de opificio mundi"); Petrus Callinicus, Monophysite Patriarch of Alexandria, in the latter half of the sixth century, in his polemics against the Patriarch Damians of Alexandria (II, xii and xvii; cf. Frothingham, op. cit., after Cod. Syr. Vat., 108, f. 282 sq.). As examples of the Nestorian group may be mentioned Joseph Husaia, a Syrian monk, teacher about 580 at the school of Nisibis (A. W. Schwenzer, Bibl. orient., vol. III, pt. I, p. 163); also Iacobjebet, catholics, from 580 or 581 to 594 or 595 (Braun, "Buch der Synodes", p. 229 sq.); and John of Apamea, a monk in one of the cloisters situated on the Orontes, belonging probably to the sixth century (Cod. Syr. Vat., 25). The heads of the Monothelites, Sergius, Patriarch of Constantinople (610-638), Cyrus, Patriarch of Alexandria (630-643), Pyrrhus, the successor of Sergius in Constantinople (639-641), took as the starting point in their heresy the fourth letter of Dionysius in this polemical dispute. They put into it the quoted formula, θεοτοκος ιερος into μια θεοτοκος ιερος.

To give briefly at the Catholic group we find in the "Historia Euthymiaca", written about the middle of the seventh century, a passage the citation of John Damascene (P. G., XCVI, 748), from D. D. N., iii, 2, P. G., III, 882 D: ταγοσκρεβ δε τραγοκρεβο

Another witness, who at the same time leads over to the Latin literature, is Liberatur of Carthage (Breviarium causa Nestor. et Eutych., ch. v). Johannes Malalas, Historia, vii, 660, a.d. 711 (Cod. Syr. Vat., 12), in his "Universal Chronicle", the conversion of the judge of the Areopagus through St. Paul (Acts, xvii, 34), and praises our author as a powerful philosopher and antagonist of the Greeks (P. G., XCVII, 914; cf. Krumbacher, Gesch. d. byz. Lit., 3rd ed., p. 115 sq.). Another champion was Theodorus, presbyter. Though it is difficult to locate him chronologically he was, according to Le Noury (P. G., III, 11, auctor antiquissimus who flourished, at all events, before the Lateran Council in 649 and, as we learn from CIL, iii, 505, was a doctor of the Church, that is, he defended the genuineness of the Arecopagitic writings. The repute, moreover, of these writings was enhanced in a marked degree by the following eminent churchmen: Eulogius, Patriarch of Alexandria (580-607), knew and quoted, among others, the D. D. N., xiii, 2, verbatim (P. G., III, 1061; cf. Der Katholik, 1897, II, p. 95 sq.). From Eulogius we naturally pass to Pope Gregory the Great, with whom he enjoyed a close and honourable friendship. Gregory the Great (590-604), in his thirty-fourth Homily on Luke, xv, 1-10 (P. L., LXXVI, 1254 B), has some things to say teaching regarding the Angels: "Fertur vero Dionysius Areopagita, antiquissimus, videlicet et venerabilis Pater, dicere" (et. c. C. H., viii, xix, ii). As Gregory admits that he is not versed in Greek (Ewald, Reg., f. 28, III, 63; X, 10, 21), he uses furtur not to express his doubt of the genuineness, but to imply that he had to rely on the testimony of others, since at the time no Latin version existed. It is, indeed, most probable that Eulogius directed his attention to the work.

About the year 620, Antiochus Monachus, a member of the Sabas monastery near Jerusalem, compiled a collection of moral "sentences" designed for the members of his order (P. G., LXXXIV, 1415 sq.). In the "Homilia (capitulum) LII" we discover a number of similar expressions and Biblical examples which are borrowed from the eighth letter of Dionysius "ad Demophilum" (P. G., III, 1083 sq.). In other passages frequent reference is made to the D. D. N. In the following years, two Patriarchs of Jerusalem, both from monasteries, defend Dionysius as a time-honoured witness of the true doctrines. The first is the Patriarch Macarius (631-634), formerly abbot of the Theodosius monastery in the desert of Juda. In a panegyric on the Assumptio Mariae (P. G., LXXXVI, 3277 sq.) he quotes sentences from the D. D. N., i, 4; ii, 10; from the "Theologia Mystica", i, 1; and from "Ep. iii. De sancta Missa in骦um in the Church in the Patr. rch Sophros (634-638), formerly a monk of the Theodosius monastery near Jerusalem. Immediately after his installation he published an epistula symodica, "perhaps the most important document in the Monothelite dispute". It gives, among other dogmas, a lengthy exposition of the doctrine of two energies in Christ (Hefele, Conciliation, 2nd ed., III, 140 sq.). Citing from "Ep. iv ad Caium" (θεοτοκος ιερος), he refers to our author as a man through whom God speaks and who was won over by the Divine Paul in a Divine manner (P. G., LXXXVII, 3177). Maximus Confessor evidently rests upon Sophronius, whose friendship he had gained while abbot of the monastery of Chrysopolis in Alexandria (633). In accordance with Sophronius he explains the Dionysian term θεοτοκος ιερος in an orthodox sense and proves its use in the life and nature of Christ and nature in their distinct properties and yet in closest union (P. G., XCI, 345). Following the example of Sophronius, Maximus also distinguishes in Christ three kinds of actions (θεοπορησις, θεοςεσθεναι and θεονομιστεῖν) (P. G., XCVII, 339). His strongest weapon, and the Lateran Council found the saving word (Hefele, op. cit., 2nd ed., III, 129). In other regards also Maximus plays an important part in the
compelled many Greek and Oriental monks to abandon their homes and settle in Italy. In Rome itself, a monastery for Greek monks was built under Stephen II and Paul I. It was also Paul I (757–767) who in 757 sent the writings of Dionysius, together with other books, to Pepin of France. Adrian I (772–795) also sent the said books. The first manarily accompanying the Latin translation of the Acts of the Nicene Council (787) which he sent to Charlemagne. During the first half of the ninth century the facts concerning Dionysius are mainly grouped around the Abbot Hilduin of Saint-Denis at Paris. Through the latter the false identity of the Gaiter Monastery of the third century, whose relics were preserved in the monastery of Saint-Denis, was identical with the Areopagite rose to an undoubted certainty, while the works ascribed to Dionysius gained in repute. Through a legation from Constantinople, Michael II had sent several gifts to the Frankish Emperor Louis the Pious (827), and among them were the writings of the Areopagite, which gave particular joy and honour to Hilduin, the influential arch-chaplain of Louis. Hilduin took care to have them translated into Latin, the work of P. L. (CXCII, 1026 sq.). About the year 858 Scotus Eriugena, who was versed in Greek, made a new Latin translation of the Areopagite, which became the main source from which the Middle Ages obtained a knowledge of Dionysius. The work of the instance of Charles the Bald, at whose court Scotus enjoyed great influence (P. L., CXCII, 1026 sq.); cf. Trabeu, “Poet. lat. ev. Carol.” (II, 520, 859 sq.). Compared with Hilduin’s, this second translation marks a decided step in advance. Scotus, with his keen dialectical skill and his soared speculative mind, found in the Areopagite a kindred spirit. Hence, despite many errors of translation due to the obscurity of the Greek original, he was able to grasp the connexions of thought and to penetrate the problems. As he accompanied his translations with explanatory notes and as, in his philosophical and theological writings, particularly in the work “De divisione naturae” (P. L., CXCII), he recurs again and again to Dionysius, it is readily seen how much he did towards securing recognition for the Areopagite.

The works of Dionysius, thus introduced into Western literature, were readily accepted by the medieval Scholastics. The great masters of Saint-Victor at Paris, foremost among them the much-admired Hugh, based their teaching on the doctrine of Dionysius. Peter the Carthusian and the Franciscan scholars, Alexander of Hales, Albertus Magnus, Thomas Aquinas, Bonaventure, adopted his theses and arguments. Master poete, e.g. Dante, and historians, e.g. Otto of Freising, built on his foundations. Scholars as renowned as Robert Grosseteste of Lincoln and Vincent of Beauvais drew upon him freely. Popular religious books, such as the “Legenda aurea” of Giacomo da Varagine and the “Life of Mary” by Brother Philip, gave him a cordial welcome. The great mystics, Eckhardt, Tauler, Suso, and others, entered the mystical obscurities of Dionysius with a holy reverence. In rapid succession there appeared a number of translations: Latin translations by Joannes Sarrazenus (1170), Robert Grosseteste (about 1220), Thomas Verceilinus (1400), Ambrosius Camaldulensis (1436), Marinus Ficinus (1492); in the sixteenth century those of Faber Stapellensis, Periornius, etc. Among the commentaries that of Hugh of Saint-Victor is notable for its warmth, that of Albertus Magnus for its extent, that of St. Thomas for its accuracy, that of Denys the Carthusian for its pious spirit and its mastery inclusion of all previous commentaries.

It was reserved for the period of the Renaissance to break with the time-honoured tradition. True, some of the older Humanistes, as Pico della Mirandola, Mar
DIOSCUROS

DIOSCUROS, BISHOP OF ALEXANDRIA (also written Dioscorus; Dioscurus from the analogy of Dioscurus), date of birth unknown; d. at Gangra, in Asia Minor, 11 April 454, and he caused to be written much from these Cyril, whom he succeeded in 444. Soon afterwards Theodorot, who had been on good terms with Cyril since 433, wrote him a polite letter, in which he speaks of the report of Dioscurus's virtues and his modesty. In such a letter no contrary report would be mentioned, and he caused to be written much from these vague expressions. The peace established between John of Antioch and Cyril seems to have continued between their successors until 448, when Domnus, the successor and nephew of John, had to judge the case of two priests of Valentine, who, in 445, were accused of heresy and many crimes by the Cyrilian party. Domnus acquitted Ibas. The Cyrilian monks of Osroene were furious, and betook themselves to Dioscurus as their natural protector. Dioscurus wrote to Domnus, complaining that he championed the Nestorian Ibas and Theodorot. Domnus and Theodore both replied defending themselves, and showing their perfect orthodoxy. The accusers of Ibas went to the court at Constantinople, where the feeble Theodosius II was only too ready to mix in ecclesiastical quarrels. From him there was archimandrite brought before the Nestorians, and in particular against Irenaeus, who had befriended the Nestorians at the council of Ephesus, where he was in authority as imperial representative; he was now deposed from the Bishopric of Tyre which he had obtained. Theodorot was forbidden to leave his Diocese of Cyprus. In September a new Bishop of Tyre was appointed, and the Patriarch Domnus, feeling that Dioscurus was about to triumph, wrote to Flavian of Constantinople in order to get his support. Alexandria had of old been the first see of the East and was now only surpassed in power by the imperial city. The Egyptian patriarcho had vast civil and political influence, as well as an almost autocratic sway over a hundred bishops and a great army of monks, who were heart and soul devoted to the memory of Cyril, and rather fervent than discriminating in their orthodoxy. Constantinople always tended to support Constantinople, and Domnus, who had come from the city. Dioscurus, he said, had already complained that he, Domnus, was betraying the rights of Antioch and Alexandria in admitting the canon of 381, which had never been accepted by Alexandria or Rome. But Flavian was not a helpless ally, for he had neglected to obtain the favour of the eunuch Chrysaphius, who was all-powerful at court. An unforeseen incident was now to set the world in a blaze. At a council held by Flavian in November of the same year, 448, Eusebius of Doryleum accused the Archimandrite Eutyches, on one charge only in prison. He was treated with all consideration, but his obstinacy made it unavoidable that he should be depos ed and excommunicated. Now Eutyches was godfather to Chrysaphius, and "one nature" was precisely the unfortunate expression of St. Cyril, which his followers were already interpreting in a heretical sense. Eutyches therefore at once became the martyr of Cyrilianism; and though he was not a writer nor a theologian, he has given his name to the Monophysite heresy, into which the whole Cyrilian party now plunged.

The Cyrilians were further incensed by the failure of their second attempt to convict Ibas. They had procured an order from the emperor, 25 Oct., 448, for a fresh trial. The bishops who met for this purpose at Tyre in Feb., 449, were obliged by the violence of the Western monks to transact so much of their business at Beirut. At the end of the month Ibas was excul pated, though the emperor was known to be against him. Dioscurus and his party replied by an unex pected stroke; in March they induced the emperor to have Ibas given an invitation to come under their roof, with their suffragans a general council to be held at Ephesus in August. It was indeed not unreasonable to desire some permanent settlement of the intermittent war, and the pope, St. Leo I, warmly accepted the emperor's proposition, or rather order. Eutyches had written to him, and finding that he had been appointed at the time of his condemnation, and promising to abide by his judgment. He wrote also to other bishops, and we still possess the reply sent to him by St. Peter Chrysologus, Bishop of Ravena, where the spirit of Valentinian III, the Western emperor, had its head-quarters. St. Peter tells him to await the decision of the pope, who alone can judge a case concerning the Faith. St. Leo at first complained that the matter had not at once been referred to him, then, on finding that a full account sent by St. Flavian had been accidentally delayed, wrote a compendious explanation of the whole doctrine involved, and sent it to St. Flavian as a formal and authoritative decision of the question. He reproves Flavian's council for want of severity to an expression of Eutyches, but adds that the most famous of all Christian antiquity, is known as "St. Leo's Tome." He sent as legates to the council a bishop named Julius, a priest, Renatus (he died on the way), and the deacon Hilarus, afterwards pope. St. Leo expresses his regret that the shortness of the notice must prevent the presence of any other bishop of the West. It is probable that this difficulty had been anticipated by Dioscurus, who had answered an appeal from Eutyches in a different strain. He regarded him as a down-trodden disciple of the great Cyril, persecuted by the Nestorian Flavian. As his predecessor Peter had appointed a bishop for Constantinople, and as Theophilus had judged St. Chrysostom, so Dioscurus, with the air of a superior, actually declared Eutyches absolved and restored. In April Eutyches obtained a slight revision of the Acts of the council which had condemned him. In the same month the case of Ibas was again examined, by the emperor's order, this time at Edessa itself, and by a lay inquisitor, Cherasse, the Governor of Osroene. The people received him with shouts of rejoicing against Ibas. The emperor, hearing of Cherasse's report, the emperor wrote commanding the presence of Ibas's most furious accusers, the monk Bar Tasouma (Barsuma), and other monks at the approaching council. In all this we see the influence of Dioscurus dominant. In March Theodorot had prohibited Theodoret from coming to the council. On 8 August he shows some fear that his order may be disregarded, in a letter in which he constitutes Dioscurus president of the synod.

The council met at Ephesus on 8 Aug., 449. It was to have been completed in one month, but it was dubbed by St. Leo a latrocinium, and "The Robber Council" has been its title ever since. A full history of it would be out of place here (see Euphrasius, Rostra Council of). It is only necessary to say that the assembly was wholly dominated by Dioscurus. Flavian was not allowed to sit as a bishop, but was on his trial. When Stephen, Bishop of Ephesus, wished to give Communion to Flavian's clergy, he was attacked by soldiers and monks of Eutyches, 300 in number, who cried out that Stephen was the enemy of the emperor, since he had condemned Eutyches. Eutyches was admitted to defend himself, but the other side was only so far heard that the Acts of the council which had condemned him were read in full. Not content with restoring Eutyches, Dioscurus proceeded to the deposition of Flavian, and measures could only be carried by terrorism. The soldiers and monks were brought into the council, and many
bishops were forced to sign a blank paper. The papallegate Hilarus uttered the protest Contra dicturici, and saved himself; others present, when the foundation of the Dorylkiwm (q. v.) appealed to the pope, and their letters, only lately discovered, were probably taken by Hilarus to Rome, which he reached by a devious route. St. Flavian was thrown into prison, and died in three days of the blows and ill usage he had received. The bishops who were present, nine in number, gave testimony, when the Acts were publicly read at the Council of Chalcedon, to the violence used at Ephesus. No doubt they exaggerated somewhat, in order to excuse their own base compliance. But there were too many witnesses to the facts, and we have the验证 of the witness of the witnesses of the letters of Hilarus, of Eusebius, and of Flavian, and the martyrdom of the latter, to confirm the charges against Dioscurus.

No more was read at Chalcedon of the Acts. But at this point begin the Syriac Acts of the Robber Council, which tell us of the carrying out by Dioscurus of a thoroughgoing but short-sighted policy. The papal legates came no more to the council, and Domnus excused himself through illness. A few other bishops withdrew or escaped, leaving 101 out of the original hundred, or nine less without a test of total 110. The deposition of Ibas was voted with cries, such as "Let him be burned in the midst of Antioch." The accused was not present, and no witnesses for the defence were heard. Daniel, Bishop of Haran, nephew of Ibas, was degraded. Irenacus of Tyre, already deposed, was anathematized. Then it was the turn of the leaders of the Antiochenes party. Ibas had been accused of immorality and a misuse of ecclesiastical property, as well as of heresy; no such charges could be made against the great Theodoret; his character was unblemished, and his orthodoxy had been admitted by St. Cyril himself. Nevertheless his earlier writings, in which he had incautiously and with incorrect expressions attacked St. Cyril and defended Nestorius, were now raked up against him. None ventured to dissent from the sentence of deposition pronounced by Dioscurus, which ordered his writings to be burnt. If we may believe the Acts, Domnus, from his bed of real or feigned sickness, gave a general assent to all that the council had done. But this could not save him from the accusation of favouring Nestorius. He was deposed without words of defence being heard, and a new patriarch, Maximus, was set up in his place.

So ended the council. Dioscurus proceeded to Constantinople, and there made his own secretary, Anatolius, bishop of the city. One by one the remaining Dioscurans avoided the pope's wrath by the Council of Ephesus, though he promised more than once to do so. He evidently could not then venture to contest the pope's rules as to the Faith. But now, with his own creatures on the thrones of Antioch and Constantinople, and sure of the support of Chrysaphius, he stopped at Nicea, and with ten bishops launched an excommunication against St. Leo himself. It would be vain to attribute all these acts to the desire of his own aggrandizement. Political motives could not have led him so far. He must have known that in attacking the pope he could have no help from the bishops of the West or from the Western emperor. It is clear that he was genuinely infatuated with his heresy, and was fighting in its interests with all his might.

But he was on hearing the report of Hilarus, immediately annulled the Acts of the council, absolved all those whom it had excommunicated, and excommunicated the hundred bishops who had taken part in it. He wrote to Theodosius II insisting on the necessity of the assembly in 3 in Italy, under the council's sanction. The emperor, with the concurrence of a weak man, supported the council, and paid no attention to the intervention of his sister, St. Pulcheria, nor to that of his colleague, Valentinian III, who, with his mother Galia Placidia, and his wife, the daughter of Theodosius, wrote to him at St. Leo's suggestion. The reason given in the pope by Theodosius is unknown, for his letters to Leo are lost. In June or July, 450, he died of a fall from his horse, and was succeeded by his sister Pulcheria, who took for her colleague and nominal husband the excellent general Marcellian. St. Leo, now sure of the support of the rulers of the East, declared a council unnecessary; many bishops had already signed his Tome, and the remainder would do so without difficulty. But the new emperor had already taken steps to carry out the pope's wish, by a bull not indeed in Italy, which was out of reach of his jurisdiction, but in the ancient neighbourhood of Constantineopolis, where he could himself watch its proceedings and ensure its orthodoxy.

St. Leo therefore agreed, and sent legates who this time were to preside.

The council, in the intention of both pope and emperor, was to accept and enforce the definition given long since from Rome. Anatolius was ready enough to please the emperor by signing the Tome; and at Pulcheria's intercession he was accepted as bishop by St. Leo. There was permitted the restoration to communion of those bishops who had voted against the pope at the Robber Council, with the exception of Dioscurus and of the leaders of those synod, whose case he first reserved to the Apostolic See, and then committed to the council. The synod met at Chalcedon, and its six hundred bishops made it the largest of ancient councils (see CHALCEDON, ECUMENICAL COUNCIL OF). The papal legates presided, supported by lay commissioners appointed by the emperor, who were in practice the real presidents, since the legates did not speak Greek. The first point raised was the position of Dioscurus. He had taken his seat, but the legates objected that he was on his trial. The commissioners asked for the charge against him to be formulated, and it was replied that he had held a council without the permission of the Apostolic See, a thing which had never been permitted. This statement was difficult to explain, before the discovery of the Syriac Acts; but we now know that Dioscurus had continued his would-be general council for many sessions after the papal legates had taken their departure. The commissioners ordered him to sit in the midst as accused. (A sentence in this passage of the Acts is wrongly translated in the old Latin version; this was carelessly followed by Hefele, who thus led Bright into the error of supposing that the commissioners addressed to the legates a rebuke they meant in reality for Dioscurus.) The first letter of the synod, which was not much deserted by his own party as his victims had been deserted at Ephesus by their natural defenders. Some sixty bishops, Egyptian, Palestinian, and Illyrian, were on his side, but were afraid to say a word in his defence, though they raised a great commotion at the introduction into the assembly of Theodoret, who had been especially excluded from the Council of Ephesus. The Acts of the first session of the Robber Council were read, continually interrupted by the disclaimers of the bishops. The leaders of that council, Juvenal of Jerusalem, Thealarius of Caesarea, Maximus of Antioch, now declared that Flavian was orthodox; Anatolius had long since gone over to the winning side. Dioscurus alone stood his ground. He was at least no time-server, and he was a convinced heretic. After this session he refused to sit in the midst as accused. At the second session (the third, according to the printed texts and Hefele, but the Ballerini are right in inverting the order of the second and third sessions) the case of Dioscurus was continued. Petitions against him from Armenia and Egypt were heard. He was greatly accused of injustice and cruelty to the family of Cyril, and of other crimes, even against the emperor and the State. How much of this was true it is impossible to say, as
Dioscorus refused to appear or to make any defence. The accusations were dropped, and judgment must necessarily go against Dioscorus, if only for contempt of court. The bishops therefore repeatedly demanded that the legates should deliver judgment. Permission came to deliberate the crimes of Dioscorus—but he absolved Eutyches contrary to the canons, even before the council; he was still conscientious when others asked for pardon; he had not had the pope's letter read; he had excommunicated by the canons—evidently excommunicated, and had refused to appear—"Wherefore the most holy and blessed Archbishop of elder Rome, Leo, by us and the present most holy council, together with the three blessed and praiseworthy Peter the Apostle, who is the rock and base of the Catholic Church and the foundation of the orthdox Faith, has stripped him of the episcopal and of all sacramental dignity. Wherefore this most holy and great council will decree that which is in accordance with the canons against the aforesaid Dioscorus." All the bishops signified their agreement in a general word, and then all signed the papal sentence. A short notice of his deposition was sent to Dioscorus. It is taken almost word for word from that sent to Nestorius by the Council of Ephesus twenty years before. With the rest of the council, the decree was imposed upon by Pope Leo, its rehabilitation of Theodoret of Idumea etc.—we have nothing to do. Dioscorus affected to ridicule his condemnation, saying that he should soon be restored. But the council decreed that he was incapable of restoration, and wrote in this sense to the emperors, reciting his crimes. He was banished to Gangra in Paphlagonia, where he died three years later. The whole of Egypt revered him as the true representative of Cyrilian teaching, and from this time forth the Patriarchate of Alexandria was lost to the church. Dioscorus has been honoured in it as its teacher, and it has remained Eutychian to the present day.

The chief authority for the events which preceded the Robber Council (besides some letters of Theodoret) is the Syriac version of the Acts of that council, published from a codex of 535 in the Brit. Mus.; Secondum Synodum Ephesinum necnon expositionem ad eam pertinentem... Perry ed. (Oxford, 1875); The second Synod of Ephesus, from Syriac MSS. by Perry (Beaune, 1866); by Hoyos, Verhandlungen der Kirchenversammlung zu Ephesos am zii. August CDLXIX aus einer syrischen HS. (Kiel, 1873); the best dissertations on it are those of C. Lewis in Mém. d'histoire et de littérature ecclésiastique de l'Empire by Roux, and by a Frenchman conçu dans son contexte historique et dans son cadre...personne de brigandage d'Ephese, publié d'après ses actes, en syriaque (Brussels, 1874), and in Rev. des Sciences Eccl., IX-X; also Laroë in Rev. des Hist. XXVII (1880); Rigottin, The Roman Council of Ephesus (London, 1880). Rigottin has not the mistakes of Bright, but he has fallen into some himself. e.g. when he calls Dioscorus the nephew of St. Cyril or bishop of Alexandria under the name of Constantopolitana Creed. The appeals of Flavian and Eusebius were first published by Aubry; see Leonce Magnus of Paris (Rome, 1881, and Mepteca, 1890) and with other documents in his Spicileg. Cassin. (Montecassino, 1883); also by Mahnem, in Neues Archiv der Gesellschaft für ältere deutsche Geschichtsquellen, 1 (1868). The older historians, who wrote before the discovery of the Syriac Acts, are anticipated and corrected by Dioscorus, including Hefele, but we await the next volume of the new French edition by Lecerf, and Bright, with the exception of his posthumous The Councils of Ephesus (London, 1898). For more contemporary literature see Chalcedon; a fragment of a letter of Dioscorus written from Gangra to the German scholar in the Jambourin, in Pire, Spicileg. Selena, IV. 390. A passage on Macarius of Tchad, preserved in Copit, is noted by Aubry, and is to be found in the Catalogue of the MSS. of the Monastery of the striped Gentile, at l'Eglise chr. ou 1er et 2e siècles (Paris, 1888), as Revillout in Rev. Égyptien, 1886-91. A Copit life has been published by F. Laux, Introduction à la Doctrine...sur son disciple Théophane, in Journal Archéologique, and in a fragment of the Syriac life pub. by Curti, in Proceedings of Soc. des Bibl. Archéol. (1893), xxvii, 267. A letter to Dioscorus from Syr. Leon, 21 June, 440 is given by F. Laux. Rigottin notes the fact that it is the only Syriac letter which amongst others all ordinations of priests and deacons to be on the list, and between Satur and Dioscorus, also the story of the sheep. There is great concurrence the Sacrifice is to be repeated as often as the basilica is built, none may be deprived of his devotion.

JOHN CHAPMAN.

Dioscorus, Synod of. See Pelagianism.

Diplomacy, Papal.—The word "diplomacy," following a Continental usage which long ago found recognition in Mabillon’s "De Re Diplomatica," has of late been used to mean all the most important official documents, more especially of those emanating from the chanceries of popes, kings, emperors, and other authorities possessing a recognized jurisdiction. Etymologically diplomatique should mean the science of diplomat, and diplomacy, in its classical acceptation, signified only a permit to use the curas publica (i.e. the public posting-service), or else a discharge accorded to veteran soldiers and imparting certain privileges. But the scholars of the Renaissance erroneously supposed that diploma was the correct classical term for any sort of charter, and from then the word came into use among jurists and historians and obtained general currency.

History of Diplomacy.—There is abundant evidence that during the Middle Ages a certain watchfulness, necessitated unfortunately by the prevalence of forgeries of all kinds, was exercised over the authenticity of papal bulls, royal charters, and other instruments. In this control of documents and in the precautions taken against forgery the Chancery of the Holy See set a good example. Thus in a Decree of 1237 restraining the usual legal seal to a Bull for fear it should fall into unscrupulous hands and be used for fraudulent purposes (Dubitativus, sigillum plumbeum ponere ne si illud inimici caperent de solis etiam aliquam facerent, Daffe-Löwenfeld, Regesta, no. 5525; cf. no. 5342); while we owe to Innocent III various rudimentary instructions in the science of diplomacy with a view to the detection of forgeries (see Migne, PL, CCXIV, 202, 322, etc.). Seeing that even an ecclesiastical of the standing of Lanfranc has been accused of counterfeiting at the fabrication of Bulls (H. Böhmer, "Die Falschungen Erzbischof Lanfranks," 1902; cf. Liebermann’s review in "Deutsche Literaturzeitung," 1902, p. 2798, and the defence of Lanfranc by L. Salfet in "Bulletin de litt. eccl.," Toulouse, 1907, 227 sq.), the need of some system of tests is obvious. But the medieval criticism of documents was not very satisfactory even in the hands of a jurist like Alexander III (see his comments on two pretended privileges of Pope Zachariae and Leo, Daffe-Löwenfeld, Regesta, no. 11,896), and though Laurentius Vales, the humanist, was right in denouncing the Donation of Constantine, and though the Magdeburg Centuriator, Matthias Flacius, was right in attacking the forged Decretals, their methods, in themselves, were often crude and inconclusive. The true science of diploma (in fact, only from the great Benedictine Mabillon (1632-1707), whose fundamental work, "De Re Diplomatica" (Paris, 1681), was written to correct the misleading principles advocated in the criticism of ancient documents by the Bollandist Father Papenbroeck (Tchapbrock). To the latter’s credit be it said that he at once publicly recognized the value of his rival’s work and adopted his system. Other scholars were not so discerning, and assailants, like Germon and Hardouin in France, and, in less degree, George Hickes in England, rejected Mabillon’s criteria; but the verdict of posterity is entirely in his favour, so that M. Giry quotes with approval the words of Dom Toustain: "His system is the true one. Whoever follows any other road cannot fail to lose his way. Whoever seeks to build on any other foundation will build upon the sand."

In point of fact, however, Mabillon’s work has been to develop his methods and occasionally to modify his judgments upon some point of detail. After the issue of a "Supplement" in 1704, a second, enlarged and improved edition of the "De Re Diplomatica" was prepared by his pupil, and published in 1705, after his death, by his pupil,
Dom Ruinart. Seeing, however, that this pioneer work had not extended to any documents later than the thirteenth century and had taken no account of certain classes of papers, such as the ordinary letters of the popes and privileges of the more important churches and of the Eremitani, the Dominicans of St-Maixent, Dom Tournalet, and Dom Tassin, compiled a work in six large quarto volumes, with many facsimiles etc., known as the "Nouveau Traité de Diplomatique" (Paris, 1750–1765), which, though it marks but a small advance on Mabillon, is, in the main, to be valued, and has been presented in a more summary form by Dom Vaines and others.

With the exception of some useful works specially consecrated to particular countries (e. g. Maffei, "Istorie diplomatiche", Mantua, 1727, published; and Muratori, "De Diplomatibus Antiquis", included in his "Antiquitates Italianae", 1740, vol. III), as also the treatise of G. Marini on papyrus documents (I papiri diplomatici, Rome, 1805), no great advance was made in the science for a century and a half after Mabillon's death. The "Dictionnaire raisonné de diplomatique chrétienne", by M. Quentin, which forms part of Migne's "Encyclopédie", is a rather unskilful digest of older works, and the sumptuous "Eléments de paléographie" of de Wally (2 vols, 4to, 1838) has little authority. But the century has seen a considerable advance. An immense progress has been made in all diplomatic knowledge, and not least of all in the study of papal documents. In the bibliography appended to the articles BULLS AND BRIEFS and BULLARIUM, the reader will find references to the more important works. Amongst the pioneers of this revival the names of Léopold Delisle, the chief librarian of the Bibliothèque Nationale, Paris, and of M. de Mas-Latrie, professor at the Ecole de Chartres, as well as that of Julius von Flugel–Harttung, the editor of a magnificent series of fragments of bulls, described as a "Cabinet de toilette" place; but their work has been carried on in Germany and elsewhere, often by those who are not themselves Catholics. It must be obvious that the photographic reproductions of documents which can now be procured so easily and cheaply have enormously facilitated that process of minute comparison of documents which forms the basis of all palaeographic studies. Further, the improvement in the cataloguing and the extension of facilities under Pope Leo XIII in such great libraries as that of the Vatican have made their contribution to the field, and accredited above all the annual periodical, such a calendar of early papal Bulls as has been appearing since 1902, being the result of the researches of Messrs. P. Kehr, A. Brackmann, and W. Wiederhold, in "Nachrichten der Göttingischen Gesellschaft der Wissenschaften". Of the several works already being published by various scholars, especially by members of the Ecole Française de Rome, a sufficient account has been given in the second part of the article BULLARIUM. Still greater progress in the study of diplomacy is no doubt to be looked for from the facilities afforded by the recently founded journal, "Archiv für Urkundenforschung" (Leipzig, 1907), edited by Messrs. Karl Brandl, H. Breslau, and M. Tangl, all acknowledged masters in this subject.

SUBJECT-MATTER OF PAPAL DIPLOMATICS.—As this topic has already been treated in part in the article BULLS AND BRIEFS, it will be sufficient here to recall the principal elements in the process of expediting ancient papal documents, all of which need special attention.

We have first of all the officials who are concerned in the preparation of such instruments and who collectively form the "Chancery". We are here concerned with the constitutions of the Chancery, which in the case of the Holy See seems to date back to a schola notariorum, with a primicerius at its head, of which we hear under Pope Julius I (387–392), varied from period to period, and the people holding certain different offices, composing it, varied also. Besides the Holy See, each bishop also had some sort of chancery for the issue of his own episcopal Acts. An acquaintance with the procedure of the Chancery is clearly only a study preparatory to the examination of the documents themselves.

The position of the Holy See became more fully realised, the business of the Chancery increased, and we note a marked tendency to adhere strictly to the forms prescribed by traditional usage. Various collections of these forms, of which the "Liber Diurnus" is one of the most important, have been and are still in being. Many others will be found in the "Recueil général des formules" by de Rosières (Paris, 1861–1871), though these, like the series published by Zeumer (Formulare Merovingici et Karolinii avii, Hanover, 1888), are mainly secular in character. After the text of the document, which of course varies according to its nature, and in which not merely the wording but also the rhythm (the so-called curvenus) has often to be considered, attention must be paid (1) to the manner of dating, (2) to the signatures, (3) to the attestations of witnesses etc., (4) to the seals and the attachment of the seals, (5) to the material upon which it is written and to the manner of folding, as well as (6) to the handwriting—under this last heading the whole science of paleography may be said to be involved.

All these studies in diplomatics, and all offer different tests for the authenticity of any given document. There are other details which often need to be considered, for example the Tironian (or shorthand) notes, which are of not infrequent occurrence in primitive Urkunden, both papal and imperial, and which have only begun of late years to be adequately investigated (see Tangl, "Die tironischen Noten", in "Archiv für Urkundenforschung"), 1907, I, 87–168). A special section in any comprehensive study of diplomacy is also likely to be devoted to spurious documents, as, already stated, the number is surprisingly great.

Besides the books referred to in the course of this article see the bibliography of the article BULLS AND BRIEFS. A larger selection of authorities may be found in such treatises as those of Giry, *Manuel de Diplomatique* (Paris, 1891;); and Breslau, *Handbuch der Urkundenlehre* (Leipzig, 1889), I. One very useful work for the study of papal diplomacy, the *Practica Conciliorum Apostolicorum*, ed. SCHMIDT-KALLENBERG (Münich, 1904), though confined to the working of the Chancery at the close of the fifteenth century, is valuable for the indirect light thrown on other periods. It resulted also in an important papal handbook in German (Leipzig, 1880). In these last two books have little direct to do with papal documents. In the view of the study of modern diplomatics, the *Anfänge der modernen diplomatischen Geheimnisse* (Paderborn, 1902), the papal Chancery is hardly mentioned (see, however, p. 54). Finally, the best summary of the subject is to be found in the section contributed by SCHMIDT-KALLENBERG to the *Grundriss der Geschichtswissenschaft* (Leipzig, 1906), vol. I, pp. 172–230.

HERBERT THURSTON.

**Diptych** (or *Diptichon*, Gr. *dīptēkeus* from *dīpe*, twice, and *tēkeus*, to fold), is a sort of notebook, formed by the union of two tablets, placed one upon the other and united by rings or by a hinge. These tablets were made of wood, ivory, bone, or metal. Their inner surfaces had ordinarily a raised frame and were covered with wax, upon which characters were scratched by means of a stylus. Diptychs were known among the Greeks of the sixth century before Christ. They served as copy-books for the exercise of penmanship, for correspondence, and various other uses. The Roman military certificates, *præstigia militum*, were a kind of diptych. Between the two tablets of a diptych there was a hinge so that the diptych would then be called a triptych, polyptych, etc. The term diptych is often restricted to a highly ornamented type of notebooks. They were generally made of ivory with carved work, and were sometimes of precious stones. They are attested in the first century B.C.
IVORY DIPTYCH, X CENTURY THE LOUVRE
IVORY DIPTYCH (LEGEND OF S. DENIS), XIV CENTURY, MUSÉE DE CLUNY
aro between profane and ecclesiastical (liturgical) diptychs, the former being frequently given as presents by high-placed persons. It was customary to commemorate in this way one's elevation to a public office or a benefice, e. g. the bishopric, to a benefice, e. g. the bishopric, to the Church, to the emperor. The consuls, on the day of the installation, were wont to offer diptychs to their friends and even to the emperor. Those presented to the latter often had a border of gold and were quite large. Their tablets often exhibited on a central plate the portrait of the sovereign, surrounded by four other plates. The (undated) Barberini ivory at the Louvre is thus constructed and once served as an ecclesiastical diptych (see below). Some believe it to be the binding of a book devoted to the emperor. Strasewski holds that these tablets of Egyptian origin and thinks that the portrait is that of Constantine the Great, defender of the Faith. The oldest dated consular diptych is that of Probus (406); it is kept in the treasury of the cathedral of Asta, Piedmont. The latest is that of the Eastern consul, Basiliius (841), one tablet of which is at the Uffizi Museum in Florence and the other at the Brera in Milan. The Theodosian Code (384) forbade the offering of ivory diptychs to any but the regular (i.e. not honorary) consuls. The tablet at the Mayer Museum, New York, of St. Aurelius (c. 180), is prior to this enactment. The consular diptyches are recognizable by their inscriptions or by the figure of the consul which they bear. On the diptych of Boetius at Brescia (487) and several others of the same type, the consul is clad in a tunic (a kind of toga); he holds in his left hand the cista consularis sceptra) and in his right the mappa circensis, or white cloth which he used to wave as the signal for the games in the circus. These games (ludi) or other festivities offered to the people by the consul were frequently represented on the tablets of the diptychs. There is less certainty concerning the diptychs of officials other than consuls, e.g. praetors, questores, etc. The diptych of Rufius Probianus V.C. (i.e. vir deditismissus) vicarius urbis Roma, in the Berlin Mu-

The perfective of the profane diptychs was carved at the time of the marriage between the Symmachi and the Nicomachi (392 to 394, or 401). It represents on each leaf (one of which bears a relief of the other, in a very damaged condition, at Cluny) a woman performing a sacrifice. Many of the profane diptychs were preserved in the treasuries of the churches, where they were eventually used for liturgical purposes or were engraved on the build in goldsmith work. The diptych of Boetius, among others, bears, on the interior, some liturgical texts and religious paintings, attributed to the seventh century. The Lègue diptych of the consul Anastasius (517), one leaf of which is at Berlin and the other at South Ken-

Direction, Spiritual.—In the technical sense of the term, spiritual direction is that function of the sacred ministry by which the Church guides the faithful to the attainment of eternal happiness. It is part of the commission given her in the words of Christ: "Going, therefore, teach ye all nations... teaching them to observe all things whatsoever I have commanded you" (Matt., xxviii., 19 sq.). She exercises this function both in her public teaching, whether in word or writing, and in the private guidance of souls according to their individual needs; but it is the private function which is generally understood by the term "spiritual direction".

I. In one way the Church requires all her adult members to submit to such private direction, namely, in the Sacrament of Penance. For she entrusts to her priests in the Confessional, not only the part of the judge to absolve or retain the sins presently confessed, but also the part of a director of consciences. In the latter capacity he must instruct his penitents if ignorant of their duties, point out the wrong or the danger in their conduct, and suggest the proper means to be employed for amendment or improvement. The penitent, on his part, must submit to this guidance. He must also, in cases of serious doubt regarding the lawfulness of his action, ask the advice of his director. For a person who acts in a practical doubt, not knowing whether he is offending God or not, and yet consenting to do what he thinks to be morally wrong, thereby offends his Creator. Such consultation is the more necessary as no one is a good judge in his own cause: a business man is sometimes blind to the injustice of a tempting bargain, and passion often invents motives for unlawful desires.

II. Still more frequently is spiritual direction required in the lives of Christians who aim at the attainment of perfection (see Perfection). All religious are obliged to do so by their profession; and many of the faithful, even of the laity, find it an invaluable worldly cares aspire to such perfection as is attainable in their states of life. This striving after Christian perfection means the cultivation of certain virtues and watchfulness against faults and spiritual dangers. The knowledge of this constitutes the science of asceticism (q. v.). The spiritual director must be well versed in this difficult science, as his advice is very necessary for such souls. For, as Cassian writes, "by no vice does the devil draw a monk headlong and bring him to death sooner than by persuading him to neglect the counsel of the Elders and trust to his own judgment and determination" (Conf. of Abbot Moses).

III. Since, in teaching the Faith, the Holy Ghost speaks through the sovereign pontiff and the bishops of the Church, the work of the private spiritual director must never be at variance with this infallible guidance. Therefore the Church has condemned the doctrine of Molinos, who taught that directors are independent of the bishops, that the Church does not judge about secret matters, and that God and the director alone enter into the inner conscience (Den- zinger, Enchiridion, nos. 1152, 1123). Several of the most learned Fathers of the Church devoted much attention to spiritual direction, for instance, St. Jer- one, who directed St. Paula and her daughter St. Eustochium; and of some of them have left us learned treatises on ascetic theology. But while the hierarchy of the Church is charged with the general guidance of the purity of faith and morals, the Holy Spirit, who "breatheath where he will; and thou heardest his voice, but thou knowest not whence he cometh, and whither he goeth" (John, iii, 8), has often chosen priests or religious, and even simple laymen and women, and filled them with supernatural beings, in order to provide for the spiritual direction of others.

IV. Whoever the director be, he will find the principal means of progress towards perfection to consist in the exercise of prayer (q. v.) and mortification (q. v.). But in this the species and methods of these two means, spiritual guides have been led by the Holy Spirit in various directions. Different is the type for the solitary in the desert, the cenobite in the community, for a St. Louis or a Blanche of Castile in a palace, St. Frances of Rome in her family, or a St. Zita in her kitchen, for contemplative and for active religious orders and congregations. Another marked difference is in the direction of souls arises from the presence or absence of the mystical element in the life of the person to be directed (see Mysticism). Mysticism involves several phases, of which the first, by which the Ghost illumines a soul in ways which transcend the normal use of the reasoning powers. The spiritual director who has such persons in charge needs the soundest learning and consummate prudence. Here especially and in no other case should he be guided by presumption and imprudent zeal, for men of distinction in the Church have gone astray in this matter.

V. Even in ordinary cases of spiritual direction in which no mysticism is involved, numerous errors must be guarded against; the following deserve special notice: (1) The false principles of the Jansenists, who demanded of their penitents an unattainable degree of purity of conscience before they allowed them to receive Holy Communion. Many priests, not members of the sect, were yet so far tainted with its severity as gradually to alienate large numbers of their penitents from the sacraments and consequently from the Church. (2) The condemned propositions summarised under the headings "De perfectione christianae" in Denzinger's "Enchiridion Symbolorum et Definitionum," (Würzburg, 1923, pp. 495, 496), which are largely the principles of Quiros. They mean: To obtain perfection a man ought to deaden all his faculties; he should take no vows, should avoid external work, ask God for nothing in particular, not seek sensible devotion, not study science, not converse with persons outside of the religious life, and never pray. (3) The errors and dangers pointed out in the Encyclical of Leo XIII, "Testem Benevolentie". In it the pope singles out for particular condemnation: "First, all external guidance is set aside for those souls which are striving after Christian perfection as being superfluous, or indeed not useful in any sense, the contention being that the Holy Spirit pours richer and more abundant graces into the soul than formerly; so that, without human intervention, he teaches and guides them by some hidden instinct of His own." In the same document warnings are given against inculcating an exaggerated esteem of the natural virtues, thus depreciating the supernatural ones; also against casting contempt on religious vows, "as if these were alien to the spirit of our times, in that they restrict the bounds of human liberty, and that they are not suitable to weak than to strong minds".

VI. An important document of Leo XIII bearing specifically on the direction of religious souls is the decree "Quemadmodum" of 1890. It forbids all religious superiors who are not priests "the practice of thoroughly inquiring into the state of their subjects' consciences, which is a thing exclusively reserved to
the Sacrament of Penance”. It also forbids them to refuse to their subjects an extraordinary confessor, especially if it be a priest of personal good repute, or if he refuses to deprive them of the privilege of being accompanied by him to Mass; and also to take it on themselves to permit at their pleasure their subjects to approach the Holy Table, or even sometimes to forbid them Holy Communion altogether. The pope abrogates all constitutions, usages, and laws in force, and it is ordered that they are to be entirely abolished, so as to cause their performance of any such practices to be held with great reverence by all the clergy; and this without regard to the authority of the pope, to whom the pope absolutely forbids such superiors as are here spoken of to induce in any way their subjects to make to them any such manifestations of conscience. (See the decree “Quemadmodum”, with explanations, in the Acta Leonis, I. 3, and H. H. Vol. viii., 1895.)

VII. Catholic literature is rich in works of ascetic and mystical theology; of which we mention a few below. It must be noticed that such works cannot be recommended for the use of all readers indiscriminately. The higher the spiritual perfection aimed at, especially when mysticism enters into the case, the more care should be used in selecting and consulting the guide-books, and the more danger there is that the direction given in them may be misapplied. Spiritual direction is as much a matter for the personal supervision of each one, which, in the times of the Church, was in the hands of the notable practice of medicine; the latter deals with abnormal defects of the body, the former with the acquisition of uncommon perfection by the soul.

CHARLES OPPENS.

Directories, CATHOLIC. — The ecclesiastical sense of the word directory, as will be shown later, has become curiously confused with its secular use, but historically speaking the ecclesiastical sense is the earlier. Directorium simply means guide, and in the later Middle Ages is used in a sense related to the office of the Directory of Office and Mass. For example, in the early part of the fifteenth century one Clement Maydston, probably following earlier foreign precedents, adopted the title “Directorium Sacerdotum” for his reorganized Sarum Ordinal. In this way the words “Directorium Sacerdotum” came to stand at the head of a number of books, some of them among the earliest products of the printing press in England, which were issued to instruct the clergy as to the form of Mass and Office to be followed from day to day throughout the year. This employment of the word directorium was by no means peculiar to England. To take one convenient example, though not the earliest that might be chosen, we find a very similar work published at Augsburg in 1501, which bears the title: "Index sive Directorium Missarum Horarumque secundum ritum chori Basilianorum Aliciae dioecesis dicendum". As this title suffices to show, a directorium or guide for the recitation of Office and Mass had to be constructed according to the needs of a particular diocese or group of dioceses, for as a rule each diocese has certain saints’ days and other feasts peculiar to it, often taken account of in regulating the Office, a single volume of the "Directorium Sacerdotum" which in England was often called the "Fye", a collection of portions of the office. According to the various regulations for the Recitatio of offices, etc., matters only affecting the clergy, it is apt to acquire a somewhat professional character.

How long a separate and annual "Ordo recitandi" has been printed for the use of the English clergy it is impossible to discover. Possibly Bishop Chaloner, Vicar Apostolic from 1741 to 1781, had something to do with its introduction. But in 1759 a Catholic London printer conceived the idea of translating the official "Directorium", or Ordo, issued for the clergy, and accordingly published in that year: "A Lay Directory or a help to find out and assist at Vespers . . . . on Sundays and Holy Days". Strange to say, another Catholic printer, seemingly the publisher of the official Ordo, shortly afterwards, conceiving his privileges invaded, produced a rival publication: "The Layman’s Directory or the Order of the (Catholic) Church Service for the year 1764". This "Layman’s Directory" was issued year by year for three-quarters of a century, gradually growing in size, but in 1837 it was supplanted by "The Catholic Directory", which since 1855 has been published in London by Messrs. Burns & Lambert, now Burns & Oates. The earliest numbers of the "Layman’s Directory" contained nothing save an abbreviated translation of the clerical "Ordo recitandi", but towards the end of the eighteenth century it began to contain lists of the schools in London, arrangements of schools, obituary notices, important ecclesiastical announcements, and other miscellaneous matters began to be added, and at a still later date we find
an index of the names and addresses of the Catholic clergy serving the missions in England and Scotland. This directory has been included in the "Irish Catholic Directory" and the "Catholic Directory of the United States. Hence the widespread idea that Catholic directories are so called because they commonly form an address book for the churches and clergy of a particular country, but an examination of the early numbers of the "Laity's Directory" conclusively shows that it was only to the calendar with its indication of the daily Mass and Office that the name originally applied.

Former Usage.—In the Middle Ages, and indeed almost down to the invention of printing, the books used in the services of the Church were much more divided up than they are at present. Instead of one book, our modern Breviary for example, containing the whole Office, we find at least four books—the Psalterium, the Hymnarium, the Antiphonary, and the Legendarium, or book of lessons, all in separate volumes. Rubrics or ritual directions were rarely written down in connexion with the text to which they belonged (we are speaking here of the Mass and Office, not of the services of rarier occurrence such as those in the Pontifical), but they were probably at first commonly familiar to the members of the clergy. It is when they began to be recorded that they took only such summary form as we find in the "Ordines Romani" of Hittorp and Mabillon. However, about the eleventh century there grew up a tendency towards greater elaboration and precision in rubrical directions for the services, and at the same time we notice the beginning of a more or less strongly marked division of these directions into two classes, which in the case of the Sarum Use are conveniently distinguished as the Customary and the Ordinal. Speaking generally, we may say that the former of these rubrical books contains the principles and the latter their application; the former determines those matters that are constant and primarily the duties of persons, the latter deals with the arrangements which vary from day to day and from year to year. It is out of the latter of these books, i. e. the Ordinal (often called Ordinarium and Liber Ordinarium), that the "Directorium", or "Pye", and eventually also our own modern "Ordo recitandi" were in due time evolved. These distinctions are not clear-cut. The process was thus a gradual one, distinct in the English and also in the Continental Ordinals two different stages. We have, first, the type of book in common use from the twelfth to the fifteenth century, and represented by the "Sarum Ordinal", edited by W. H. Frere, or the "Ordinaria of Leon", edited by G. A. de Molina. Here is a mass of miscellaneous information respecting feasts, the Office and Mass to be said upon them according to the changes necessitated by the occurrence of Easter and the shifting of the Sundays, as well as the "Incipit" of the details of the service. a. g. of the lessons to be read and the commemorations to be made. The second stage took the form of an adaptation of this Ordinal for ready use, an adaptation with which, in the case of Sarum, the name of Clement Maydston is prominently connected. This was the "Directorium Sacerdotum", the complete "Pye" (known in Latin as Piae Sarum), abbreviated editions of which were afterwards published in a form which allowed it to be bound up with the respective portions of the Breviary. The idea of this great "Pye" was to give all the thirty-five possible combinations of three to each Dominical letter (q. v.), which the fixed and movable elements of the ecclesiastical year admitted of, assigning a separate calendar to each, more or less corresponding to our present "Ordo recitandi". This arrangement was not peculiar to England. One of the earliest printed books of the kind was that issued about 1475 for the Diocese of Constance, of which a rubricated copy is to be found in the British Museum. It is a small folio in size, of one hundred and twelve leaves, and after the ordinary calendar it supplies summary rules, under thirty-five heads, for drawing up the books of the Diocese of Constance. For example, the title of such a book printed for the Diocese of Liége in 1492 runs: "In nomine Domini Amen ... Incipit liber Ordinarium ostendens qualsiter legatur et cantetur per totum anni circulum in ecclesia leodiensi tam de tempore quam de festis sanctorum in nocturnis officiis et misericordia." Such books were also made for the monasteries and religious orders. An "Ordinarius Ordinis Praemonstratensis" exists in manuscript at Jesus College, Cambridge, and an early printed one in the British Museum. When the use of printing became universal, the step from these rather coping directives, which served for all possible years, to a shorter guide of the type of our modern "Ordo recitandi", and intended only for one particular year, was a short and easy one. Since, however, such publications are useless after their purpose is once served, they are very liable to destruction, and all the more because of the difficulty of a first attempt at producing an Ordo after our modern fashion. The fact that at the Council of Trent (Sess. XXIII, De Reform., cap. xviii) it was thought necessary to urge that ecclesiastical students should be trained in the understanding of the Old Rites by which they could determine the ordo recitandi in each year for themselves, seems to imply that such Ordos as we now possess were not in familiar use in the middle of the sixteenth century.

Modern Directories.—At the present day it may be said that in every part of the world not only is a printed Ordo provided for the clergy of every diocese and religious institute, but that almost everywhere some adaptation of this is available for the use of the laity. The earliest English attempt at anything of the sort seems to have been a little "Catholic Almanac", which appeared for three or four years in the reign of James II (see The Month, vol. CXI, 1908). But this was a mere calendar of feasts without any directions for the Office and Mass. In Ireland the work which at present appears to be the title "The Irish Catholic Directory and Almanac for 1909, with a complete Directory in English" seems to have existed under various names since 1837 or earlier. It was first called "A Complete Catholic Directory", and then, in 1846, "Battersea's Registry", from the name of the publisher. It is a great deal larger than the earlier works and are included in the "Catholic Directory" published in London, there is also a separate "Catholic Directory for the Clergy and Laity of Scotland" which began under a slightly different name in 1868. CatholicDirectories also exist for the Australian and Canadian provinces, and occasionally for separate dioceses, e. g. the Diocese of Birmingham, England, possesses an "Official Directory" of its own. Attention may briefly be called, also, to two Roman handbooks of a character somewhat analogous to our Directories, which supply names and details regarding the Catholic hierarchy throughout the world and especially regarding the cardinals, the Roman Congregations and their personnel, the prelates and cameralia, etc., in attendance upon the papal court. The first of these, called "La Casser" published by "La Géte" in the Pontificia", was first published in 1716 and was long familiarly known as "Crasset" from the name of the publisher. Officially, the early numbers were simply called "Notizie per l'Anno 1716, etc." (see Moroni, Dizionario, XX, 26 sqq.). The other work, which is very similar in character, but differs from its information, has appeared since 1898 under the title "Annuario Ecclesiastico". Finally we notice the
existence of the “Directorium Chori”, a work originally compiled by Guidetti in 1882, possessing a quasi-official character and often reprinted since. It is intended for the use of the hebdomadarians and cantors in collegiate churches, and is quite different in character from that of which we have spoken above.

See Scooch in Kirchenzettelk., s. v. Directorium. For the Psa and Ordo, see especially Frenz, The Use of Sarum (Camb.). 11th edition. 17th century which contains the Directorium Sacramentum of Clement Meylant (Henry Bradshaw Society, London, 1884). It is also mentioned by G. M. and W. in the same series, The Tracts of Clement Meylant (London, 1864); Chevalier, Bibliothèque liturgique (Paris, 1897 —), in which is included the Ordinalium 

HERBERT THURSTON.

The United States.—These publications begin in the United States with an “Ordo Divini Officii Residui”, published at Baltimore, in 1801, by John Hayes. It had none of the directory or almanac features. The Catholic Lay’s Directory to the Church in the United States. This directory continued under the editorship of Mathew Field, who was born in England of an Irish Catholic family and left home for New York in 1812. He died in Baltimore in 1832. His son Henry Field, was six years old when he arrived in New York, and became a prolific and brilliant writer, dying at Mobile in 1856. Joseph’s daughter, Kate Field, was later the well-known author and lecturer. Though both were baptized, neither was a professor Catholic. This field production, in addition to the ordinary almanac calendars, had a variety of pious and instructive reading matter with an account of the churches, colleges, seminaries, and institutions of the United States. It made up a book of sixty-eight pages. Among other things, it was one of the first of its kind to prepare a Catholic magazine which, however, was never started. Only one issue of this almanac was made. The next effort in the same direction, and on practically the same lines, was also at New York, in 1822, by W. H. Creagh. It was edited by the Rev. Dr. John Power, rector of St. Peter’s church, and says in the preface that it was “intended to accompany the Missal with a view to facilitate the use of the same”. The contents include “Brief Account of the Appearances of the Virgin Mary in the United States”; “Present Status of religion in the respective Dioceses”; “A short account of the present State of the Society of Jesus in the U. S.” and obituary of priests who had died from 1814 to 1821. This was the only number of this almanac.

In 1834 Fielding Lucas of Baltimore took up the idea and brought out “The Metropolitan Catholic Calendar and Lay’s Directory” for that year, to be published annually. He said in it that he had “intended to present it in 1832 but from circumstances over which he had control it has been delayed to the present period”. It prints a list of the hierarchy and the priests of the several dioceses, with their stations. In this publication and its various successors the title Directory is used in its purely secular meaning, as the issues include no ecclesiastical calendar or Ordo. James Meyers “at the Cathedral” is the publisher of the subsequent volumes until 1838, when Fielding Lucas, Jr., took hold and changed the name “U. S. Catholic Almanac”, that Meyers had given it, back to “Metropolitan Catholic Almanac”. In the issue of his death, in 1880, there is inserted a map of the United States, “prepared at much expense to exhibit at a glance the extent and relative situation of the different dioceses”, with a table of comparative statistics, 1835 to 1845. A list of the clergy in England and Ireland was added in the volume for 1850. “Lucas Brothers” is the imprint on the almanac for 1856–87, and the Baltimore publication then ceased, to be taken up in 1858 by Edward Dunigan & Brother of New York, as “Dunigan’s American Catholic Almanac and List of the Clergy”. All general reading matter was omitted in this almanac, publications of which form the Almanac of John Murphy & Co. of Baltimore resumed there the compilation of the “Metropolitan Catholic Almanac”.

Owing to the Civil War no almanacs were printed during 1862 or 1863. In 1864 D. & J. Sadlier of New York started “Sadler’s Catholic Directory, Almanac and Ordo” which John Gilmary Sheehy compiled and edited for them. It made a volume of more than 600 pages and gave lists of the clergy in the United States, Canada, Great Britain, Ireland, and Australasia, with diocesan statistics. This publication continued alone in the field until 1888, when Hoffman Brothers, a German firm of publishers of Milwaukee, brought out “Hoffman’s Catholic Directory”, which the Rev. James Fagan, a Milwaukee priest, compiled for them. In contents it was similar to the New York publication. This directory continued under the editorship of the Hoffman Company failed, and their plant was purchased by the Wiltzius Company, which has since continued the directory. The Sadlier “Directory” ceased publication in 1895.

The Wiltzius “Catholic Directory, Almanac and Clergy List” has for all dioceses in the United States, Canada, Alaska, Cuba, Sandwich Islands, Porto Rico, Philippine Islands, Newfoundland, England, Ireland, Scotland, and Wales, together with statistics of the Austro-Hungarian Monarchy, Belgium, Costa Rica, Guatemala, British Honduras, Nicaragua, San Salvador, German Empire, Japan, Luxemburg, The United States of Mexico, Netherlands, Norway, Oceanica, South Africa, The United States of Brazil, Curacao, Dutch Guiana, Switzerland, and the West Indies. It contains also an alphabetical list of all clergymen in the United States and Canada, as well as a map of the ecclesiastical provinces in the United States. It gives a list of English-speaking confessors abroad, American colleges in Europe, and the leading Catholic societies; statistics of the Catholic Indian and Negro missions, and a list of Catholic papers and periodicals in the United States and Canada.

In the almanac for 1837 it is noted, concerning the statistics, that “the numbers marked with an asterisk are not given as strictly exact, though it is believed as nearly so as could be ascertained from the statements forwarded to the editor from the several dioceses”. On the same topic “Hoffman’s Directory” for 1899 says: “It is much to be regretted that the statistics are not more carefully kept. In every diocese there are parishes that fail to report and many dioceses report statistics only partially, so that any general summary that can be made up at best is only an approximation.”

Dealing with this long-standing and well-founded complaint of inaccurate Catholic statistics, the archbishops of the United States, at their 1906, when the United States Census Bureau in an effort to collect correct figures. Archbishop Glennon of St. Louis was appointed a special census official by the Government for this purpose, and under his direction an enumeration of the Catholics of every parish in the United States was made. The figures thus obtained were used in the “Directory” for 1909. It is the first, therefore, of these publications giving statistics of population on which any reliance can be placed in respect to accuracy. Out of the United States.

CANADA.—In 1886 “Le Canada Eclesiastique, Almanach Annuaire du Clergé Canadien”, printed in French, was begun in Montreal. The contents are similar to those of the directories in English. Recent issues have a number of illustrations of local and historical interest, such as a series of portraits of the
Discernment of Spirits.—All moral conduct may be summed up in the rule: avoid evil and do good. In the language of Christian asceticism, spiris, in the broad sense, is the term applied to certain complex influences, capable of compelling the will, the ones toward good, the others toward evil; we have the worldly spirit of error, the spirit of rascism, the spirit of Christianity, etc. However, in the restricted sense, spiris indicate the various spiritual agencies which through various movements, may influence the moral value of our acts. Here we shall speak only of this second kind. They are reduced to four, including, in a certain way, the human soul itself, because, in consequence of the original Fall, its lower faculties are in variance with its superior powers. Concupiscence, that is to say, disturbances of the imagination and errors of sensibility, thwart or pervert the operations of the intellect and will, by detracting from the original and the other from the good (Gen., vii, 21; James, i, 14). In opposition to our vitiated nature or, so to speak, to the flesh which drags us into sin, the Spirit of God acts within us by grace, a supernatural help given to our intellect and will to lead us back to good and to the observance of the moral law (Rom., vii, 22-25). Besides these two spirits, the human and the divine, there is a third of a different kind: the Devil's devices, to which others must be observed. The Creator willed that there should be communication between angels and men, and as the angels are of two kinds (see Angels), good and bad, the latter try to win us over to their rebellion and to the observance of the moral law (Rom., vii, 22-25). Besides these two spirits, the human and the Angelic, the Devil, the second of the three, has a very different way of acting. Hence four spirits lay siege to our liberty, the angelic and the Divine seeking its good and the human (in the sense heretofore mentioned); the diabolical its misery. In ordinary language they may, for brevity sake, be called simply the good and the evil spirit.

Discernment of spirits is the term given to the judgment whereby to determine from what spirit the impulse of the soul emanate, and it is easy to understand the importance of this judgment both for self-direction and the direction of others. Now this judgment may be formed in two ways. It is made by means of an intuitive light which infallibly discovers the quality of the movement; it is then a gift of God, a grace gratis data, vouchsafed mainly for the benefit of our neighbour (I Cor., xii, 10). This charism or gift was granted in the early Church and in the course of the lives of the saints as, for example, St. Philip Neri. Second, discernment of spirits may be obtained through study and reflection. It is then an acquired human knowledge, more or less perfect, but very useful in the direction of souls, if procured, as a means of the occurrence of grace, by the reading of Holy Writ, of works on theology and asceticism, of autobiographies, and the correspondence of the most distinguished ascetics. The necessity of self-direction and of directing others, when one had charge of souls, produced documents, preserved in spiritual libraries, from the perusal of which one may see that the discernment of spirits is a science that has always flourished in the Church. In addition to the special treatises enumerated in the bibliography the following documents may be read for the benefit of the subject: there are the "Shepherd of Hermas" (I, II, Mand. VI, c. 2); St. Anthony's discourse to the monks of Egypt, in his life by St. Athanasius; the "De perfectione spirituali" (ch. 30-35) by Marcus Diadochus; the "Confessions" of St. Augustine; St. Bernard's "Les gens de dieu"; "De discernitione spiritualium"; Gerson's treatise, "De diversis dialebolii tenationibus"; St. Theresa's autobiography and "Castle of the Soul"; St. Francis de Sales' letters of direction, etc.

An excellent lesson is that given by St. Ignatius Loyola in his "Spiritual Exercises." Here we find rules for the discernment of spirits and, being clearly and briefly formulated, these rules indicate a secure course, containing in embryo all that is included in the more extensive treatises of later date. For a complete explanation of them the best commentaries on the "Exercises" of St. Ignatius may be consulted, especially those by P. Gagliardi and a few authors like Godinez, Lopez Esquerra, and Scaramelli who, setting aside the other parts of the "Exercises", are manifestly imbued with the doctrine of this book on the discernment of spirits. Of the rules transmitted to us by a saint inspired by Divine light and a learned psychologist taught by personal experience, it will suffice to recall the principal ones. Ignatius gives two kinds and we must call attention to the fact that in the second category, according to the above, he sometimes considers a more delicate discernment of spirits adapted to the extraordinary course of mysticism. Be that as it may, he begins by enunciating this clear principle, that both the good and the evil spirit act upon a soul according to the attitude it assumes toward them. If it pose as their friend, they flatten it; if it resist them, they torment it. But the evil spirit speaks only to the imagination and the senses, whereas the good spirit acts upon reason and conscience. The evil labours to excite concupiscence, the good to intensify love for God. Of course it may happen that a perfectly well-disposed soul suffers from the attacks of the devil deprived of the sustaining consolations of the good angel; but this is only a temporary trial the passing of which must be awaited in patience and humility. On the contrary, if the good angel may be the author of the consolation; this remains to be judged from the consequences. As the
good angel's object is the welfare of the soul and the bad angel's its defects or unhappiness, if, in the progress of our thoughts all is well and tends to good there is no occasion for uneasiness. Contrarily, if we perceive any deviation whatsoever towards evil or even a slight unpleasant agitation, there is reason to fear. Such, then, is the substance of these brief rules which are nevertheless so greatly admired by the masters of the spiritual life. Although requiring an attention even under the most peaceful circumstances, they act as a preservative against many illusions.

**Disciple.**—This term is commonly applied to one who is learning any art or science from one distinguished by his accomplishments. Though derived from the Latin *discipulus*, the English name conveys a meaning somewhat narrower than its Latin equivalent: *disciple* is opposed to *master, as scholar to teacher*, whilst both *disciple* and *scholar* are included under the term *student*. For the English writers on asceticism and the Old Testament the word *disciple* occurs only once (Is., viii, 16); but the idea it conveys is to be met with in several other passages, as, for instance, when the Sacred Writer speaks of the "sons* of the Prophets (IV K., ii, 7); the same seems, likewise, to be the meaning of the terms *children* and *son* in the Sapiential books (e.g. Prov., iv, 1, 10, etc.). Much more frequently does the New Testament use the word *disciple* in the sense of pupil, adherent, one who continues in the Master's word (John, viii, 31). See also of John, ix, 25); of John, xx; John, xxii; Luke, xxii; John, iii, 25). These, however, are only incidental applications, for the word is almost exclusively used of the Disciples of Jesus.

In the Four Gospels it is most especially applied to the Apostles, sometimes styled the "twelve disciples" (Matt., x, 1; xi, 1; xx, 17; xxvi, 20); the sixteenth verse of chapter xxviii, having reference to events subsequent to Christ's Passion, mentions the "seven disciples", more properly called "the disciples" (Matt., xiv, 19; xv, 33, 36; etc.). The expression "his disciples" frequently has the same import. Occasionally the Evangelists give the word a broader sense and make it a synonym for believer (Matt., x, 42; xxvii, 57; John, iv, 1; ix, 27, 28; etc.). Besides the significance of "Apostle" and that of "believer" there is finally a third one, found in St. Luke, and perhaps also in the other Evangelists. St. Luke narrates (vi, 13) that Jesus "called unto him his disciples, and he chose twelve of them (whom also he named apostles)". The disciples, in this context, are not the crowd of believers who flocked around Christ, but a smaller body of His followers. They are commonly identified with the seventy-two (seventy, according to the received Greek text, although several Greek MSS. mention seventy-two, as does the Vulgate) referred to (Luke, x, 1) as having been chosen by Jesus. The names of those disciples are given in several lists (Chronicon Paschale, and Pseudo-Dorothius in Migne, P. G., XCI, 521–524; 543–545; 1061–1065); but these lists are unfortunately not uniformly the same, and none of them contains the names of all the disciples. In the list of disciples, no such roll existed in his time, and mention among the disciples only Barnabas, Sozathenes, Cephas, Matthias, Thaddeus, and James "the Lord's brother" (Hist. Eccl., i, xii). In the Acts of the Apostles the name disciple is exclusively used to designate the converts, the believers, both men and women (vi, 1, 2, 7; ix, 1, 10, 19, etc.; in reference to the latter connotation see in particular ix, 36), even such as were only imperfectly instructed, like those found by St. Paul at Ephesus (Acts, xix, 1).

**Charles L. Souvay.**

**Disciples of Christ, a sect founded in the United States of America by Alexander Campbell. Although the largest portion of his life and work was spent in the United States, Alexander Campbell was born, 12 Sept., 1788, in the County Antrim, Ireland. On his father's side he was of Scotch extraction; his mother, Jane Connelie, was of Huguenot descent. Both parents are reported to have been persons of deep piety and high literary culture. His father, after serving as minister to the Anti-Burgher Church in Aboyne and director of a prosperous academy at Richhill, emigrated to the United States and engaged in the oft-attempted and ever futile effort "to unite all Christians" into one "scriptural basis", the hallucination of so many noble minds, the only outcome of which must always be, against the will of the Founder, to increase the discord of Christendom by the creation of a new sect. In 1808 Alexander embarked with the family to join his father, but was shipwrecked on the Scottish coast and took the opportunity to prepare himself for the ministry at the University of Glasgow. In 1809 he migrated to the United States, and found in Washington County, Pennsylvania, the nucleus of the new movement in "Christian, or Disunion, Association of Washington", under the auspices of which was issued a "Certificate of Address", setting forth the objects of the association. It was proposed "to establish no new sect, but to persuade Christians to abandon party names and creeds, sectarian usages and denominational strife, and associate in Christian fellowship, in the common faith in a divine Lord, with no other terms of religious communion than faith in and obedience to the Lord Jesus Christ". An independent church was formed at Brush Run on the principles of the association, and, 1 Jan., 1812, Alexander was "ordained". His earnestness is attested by the record of one hundred and six sermons preached in one year; but he wrecked every prospect of success by finding in his reading of the Scriptures the invalidity of infant baptism, and the necessity of baptism by immersion, thus severing all fellowship with the existing Christian churches. The sect was termed "Christian", but when pressed as to "peculiarities", numbered only one hundred and fifty persons. Campbell's mission as a mediator of peace was a failure; as time went on he developed a polychromatic nature, and became a sharp critic in speech and in writing of the weaknesses and vices of all religious sects. Only once did he come in direct contact with the Catholics, on the occasion of his five days' debate, in 1837, with Archbishop Purcell of Cincinnati, which excited great interest at the time but is now forgotten. His sixty volumes are of no interest. Campbell was twice married and was the father of twelve children.
He died at Bethany, West Virginia, where he had established a seminary, 4 March, 1866.

According to their census prepared in 1906 the sect then had 6475 ministers, 11,633 churches, and a membership of 1,236,296. In the West and South-West, Missouri, Indiana, Illinois, Kentucky, and Ohio having the largest bodies. J. H. Garrison, editor of their organ "The Christian Evangelist", outlines (1906) the belief of his sect. According to their investigations of the New Testament the confession of faith made in 1,226,296 on which their sect is built will be held by his Church, namely "Thou art the Christ the Son of the living God", was the creed of Christianity and the essential faith, and that all those who would make this confession from the heart, being penitent of their past sins, were to be admitted by baptism into the membership of the early Church; that baptism in the early Church consisted of the burial of a penitent believer in water in the name of the Father, and of the Son, and of the Holy Spirit, and that only such were fit subjects for baptism; that the form of church government was congregational; that each congregation had its deacons and elders or bishops, the former to look after the temporal and the latter the spiritual interests of the church. They practise weekly communion and consider it not as a sacrament but a meal of the church. Authority and both New and Old Testaments to be equally inspired, both are not equally binding upon Christians. Accepting the Bible as an all-sufficient revelation of the Divine will, they repudiate all authoritative creeds and human grounds of fellowship.

JAMES F. LOUGHLIN.

Discipline, Ecclesiastical.—Etymologically the word discipline signifies the formation of one who places himself at school and under the direction of a master. All Christians are the disciples of Christ, desirous to form themselves to His school and to be guided by His teachings and precepts. He called Himself, and we, too, call Him, Our Master. Such, then, is evangelical discipline. However, in ecclesiastical language the word discipline has been invested with various meanings, which must here be enumerated and specified.

Discipline, Disciplinarian.—All discipline may be considered first in its author, then in its subject, and finally in itself. In its author it is chiefly the method employed for the formation and adaptation of the precepts and directions to the end to be attained, which is the perfect conduct of subjects; in this sense discipline is said to be severe or mild. In those who receive it discipline is the more or less perfect conformity of acts to the directions and formation received; it is in this sense that discipline may be said to flourish in a monastery. Or, again, it is the obligation of subjects to conform their acts to precepts and directions, and is thus defined by Cardinal Cavagnis: Praecepta fidei consistere "conduct conforming itself to faith" (Inst. jur. publ. eccl. Bk. IV, n. 147). More frequently, however, discipline is considered objectively, that is, as being the precepts and measures for the practical guidance of subjects. Thus understood ecclesiastical discipline is the aggregate of laws and directions given by the Church to the faithful for their conduct both private and public. This is discipline in its widest acceptation, and includes natural and Divine as well as positive laws, and faith, worship, and morals; in a word, all that affects the conduct of Christians. But if we eliminate laws merely formulated by the Church as the exponent of natural or Divine law, there remain the laws and directions laid down and formulated by ecclesiastical authority for the guidance of the faithful; this is the restricted and more usual acceptation of the word discipline. Nevertheless, it must be understood that this distinction, however justified, is not made for the purpose of separating ecclesiastical laws into two clearly divided categories in so far as practice is concerned; the Church does not always make known to what extent she speaks in the name of natural or of Divine law, and with this corresponds the observance of laws by her subjects.

II. Object of Discipline.—Since ecclesiastical discipline should direct every Christian life, its object must differ according to the obligations incumbent on each individual. The first duty of a Christian is to believe; hence dogmatic discipline, by which the Church proposes what we should believe and so regulates our conduct that it shall not fail to society by faith. Dogmatic discipline springs from the power of magisterium, i. e. the teaching office, in the exercise of which power the Church can proceed only by declaration; therefore it is ecclesiastical discipline only in a broad sense. The second duty of Christians is to observe the Commandments, hence moral discipline (disciplina morum). Strictly understood the latter does not depend much more upon the Church than does dogmatic discipline, as the natural law is anterior and superior to ecclesiastical law; however, the Church approves it and sanctions it only in so far as she specifies and perfects it; hence it is that we generally call moral discipline whatsoever directs the Christian in those acts that have a moral value, including the observance of positive laws, both ecclesiastical and secular. Among the chief duties of a Christian the worship of God must be assigned a place apart. The rules to be observed in this worship, especially public worship, constitute liturgical discipline. This cannot be said to depend absolutely upon the Church, as it derives the essential part of the Holy Sacrifice and the sacraments from Jesus Christ; however, for the most part, liturgical discipline has been regulated by the Church and includes the rites of the Holy Sacrifice, the administration of the sacraments and of the sacramentals, and other ceremonies.

There still remain the obligations incumbent on the faithful considered individually, either on the members of different groups or classes of ecclesiastical society, or, finally, on those who are to any extent whatever depositaries of a portion of the authority. This discipline properly so called, exterior discipline, established by the legislations of the Church, of course, in a way absolutely independent of natural or Divine law, but outside of, yet akin to this law, for the good government of society and the sanctification of individuals. On individuals it imposes common precepts (the Commandments of the Church); then it states their mutual obligations, in conjugal society and matrimonial discipline, in larger societies by determining relations with ecclesiastical superiors, parish priests, bishops, etc. Special classes also have their own particular discipline, there being clerical discipline for the clergy and religious or monastic discipline for the religious. The government of Christian society is in the hands of prelates and superiors who are subject to a special discipline either for the conditions of their recruitment, for the determining of their privileges and duties, or for the manner in which they should fulfill their functions. We may include here the rules for the administration of temporal goods. Finally, any authority from which emanate orders or prohibitions should have power to ratify the same by penal measures applicable to all transgressors; hence, another object of discipline is the imposing and enforcing of disciplinary sanctions. It must be noted, however, that the object of these measures is to ensure observance or to chastise infractions of the natural and Divine as well as of ecclesiastical laws.

III. Disciplinary Power of the Church.—It is evident, therefore, that the disciplinary power of the
Church is a phase, a practical application, of its power of jurisdiction, and includes the various forms of the latter; namely, legislative, administrative, judicial, and executive. As discipline is proved by the very fact of its exercise; it is an organic necessity in every society whose members it guides to their end by providing them with rules of action. Historically it can be shown that a disciplinary power has been exercised by the Church uninterruptedly, first by the Apostles and then by the bishops, and finally by the council at Jerusalem formulated rules for the conduct of the faithful (Acts, xv). St. Paul gave moral advice to the Christians of Corinth on virginity, marriage, and the eucharist (1 Cor., vii, xi). The Pastoral Epistles of St. Paul are a variety of disciplinary doctrine. The Church, moreover, has never ceased to represent herself as charged by Christ with the guidance of mankind in the way of eternal salvation. The Council of Trent expressly affirms the disciplinary power of the Church in all that concerns liturgical discipline and Divine worship. The Council taught that in the sacraments, the substance of the latter remaining intact, the Church has always had power to establish or to modify whatever she considered most expedient for the utility of those who receive them, or best calculated to procure respect for the sacraments in the faithful. According to the Canons of Trent, the Church can, and does in fact, exercise a power which, without changing the substance of the sacrament, accords with the dispensations of time and place. In fact, we need only to recall the numerous laws enacted by the Church in the course of centuries for the maintenance, development, or restoration of the moral and spiritual life of Christians.

IV. Eclesiastical discipline should be subject to change as is made for men and by men. To claim that it is immutable would render the attainment of its end utterly impossible, since, in order to form and direct Christians, it must adapt itself to the variable circumstances of life, of peoples and races, being, in a certain sense, like St. Paul, all things to all men. Nevertheless, neither the actual changes nor the possibility of further alteration must be exaggerated. There is no change in those disciplinary powers through which the Church teaches and enforces the precepts of the Gospel, either before the faithful and confirms the natural and the Divine law, nor in those strictly disciplinary regulations that are closely related to the natural or Divine law.

Other disciplinary rules may and must be modified in proportion as they seem less efficacious for the social or individual welfare. Thomasius aptly says [Vetus et nova Ecclesiae disciplina (ed. Lyons, 1706), preface, n. xvii]: "Whoever has the least idea of ecclesiastical laws, those that concern government as well as those that regulate morals, knows well that they are of two kinds. Some represent immutable rules of eternal truth, itself the fundamental law, the source and origin of these laws, from the observance of which there is no dispensation, against which no prescription obtains, and which are not modified either by diversity of custom or vicissitudes of time. Other ecclesiastical rules and customs are statutory, or depend on the peculiar institutions in the first (loc. cit., n. xv): "While the Faith of the Church remains the same in all ages, it is not so with her discipline. This changes with time, grows old with the years, is rejuvenated, is subject to growth and decay. Though in its early days admirably vigorous, with time defects crept in. Later it overcame these defects and although along some lines its usefulness increased, in other ways its first splendour was dimmed. That in its present form it is not free from the leniency and indulgence which now seem absolutely necessary. However, all things fairly considered, it will appear that old age and youth have each their defects and good qualities." Were it necessary to exemplify the mutability of ecclesiastical discipline it would be perplexing indeed to make a choice. The ancient catechumenate exists only in a few rites; the Latin Church no longer gives Communion to the laity under two kinds; the discipline relating to penance and indulgences has undergone a profound evolution; matrimonial law is still subject to modifications; fasting is not what it formerly was. Indeed, the Council of Trent in its disciplinary power is but the shadow of what it was in the Middle Ages. Many other examples will easily occur to the mind of the well-informed reader.

V. DISCIPLINARY INFALLIBILITY. What connexion is there between the discipline of the Church and her infallibility? Is there a certain disciplinary infallibility? It does not appear that the question was ever discussed in the past by theologians unless apropos of the canonization of saints and the approbation of religious orders. It has, however, found a place in all the dogmatical textbooks. The authors of these treatises decide unanimously in favour of a negative and indirect rather than a positive and direct infallibility, inasmuch as in her general discipline, i.e. the common laws imposed on all the faithful, the Church cannot be anything contrary to the natural or the Divine law, nor prohibit anything that the natural or the Divine law would exact. If well understood this thesis is undeniable; it amounts to saying that the Church does not and cannot impose practical directions contradictory of her doctrine. It is, however, necessary to inquire how far this infallibility extends, and to what extent, in her disciplinary activity, the Church makes use of the privilege of inerrancy granted her by Jesus Christ when she defines matters of faith and morals. Infallibility is directly related to the teaching office (magisterium), and although this office and the disciplinary power reside in the same ecclesiastical authorities, the disciplinary power does not necessarily depend directly on the teaching office. Teaching pertains to the order of truth; legislation to that of justice and charity. Nevertheless, the laws are based on certain fundamental truths, but as laws their purpose is neither to confirm nor to condemn these truths. It does not seem, therefore, that the Church needs any special privilege of infallibility to prevent her from enacting laws contradictory of her doctrine. To claim that disciplinary infallibility consists in regulating, without possibility of error, the adaptation of a general law to its end, is equivalent to the assertion of a (quite unnecessary) positive infallibility, which the incessant abrogation of laws would demonstrate. It is only by a mingling of this belief with the supervision of the chalice in the Communion of the laity. This has often been violently attacked as contrary to the Gospel. Concerning it the Council of Constance (1415) declared (Sess. XIII): "The claim that it is sacreligious or illicit to observe this custom or law [Communion under one
kind must be regarded as erroneous, and those who ostentatiously affirm it must be cast aside as heretics. The opinion is naturally limited by theologians, that the Church is infallible in her approbation of religious orders, must be interpreted in the same sense; it means that in her regulation of a manner of life destined to provide for the practice of the evangelical counsels she cannot commit any error which would conflict with the counsels as received from Christ together with the rest of the Gospel revelation. (See Roman Congregations.)

Discipline of the Secret (Lat. Disciplina Arcanum; Ger. Arcadisciplina), a theological term used to express the custom which prevailed in the earliest ages of the Church, by which the knowledge of the more intimate mysteries of the Christian religion was carefully kept from the heathen and even from those who were instructed in the Christian doctrine. The custom itself is beyond dispute, but the name for it is comparatively modern, and does not appear to have been used before the controversies of the seventeenth century, when special dissertations bearing the title "De disciplina arcanis" were published both on the Protestant and the Catholic side.

The origin of the custom must be looked for in the recorded words of Christ: "Give not that which is holy to dogs; neither cast ye your pearls before swine; lest perhaps they trample them under their feet, and turning upon you, they tear you" (Matt. vii, 6), while the practice in Apostolic times is sufficiently vouched for by St. Paul's assurance that he had fed the Corinthians "as . . . little ones in Christ" giving them "milk to drink, not meat" because they were not yet able to bear it (I Cor. iii, 1-2). With this passage we may compare also Heb. v, 12-14, where the same illustration is used, and it is declared that "solid food is for the perfect; for them who by custom have their senses exercised to the discerning of good and evil." Although the origin of the custom is thus to be traced back to the very beginnings of Christianity, it does not appear to have been so general, or to have been carried out with so much strictness in the earlier centuries as it was immediately after the persecutions had ceased. This may be due in part to the fact that mischief was reserved to the earlier period, but it is probable enough that the discipline was growing more strict all through the second and third centuries on account of the pressure of persecution and that, when persecution was at last relaxed, the need for reserve was felt at first, while the Church was still surrounded by hostile Paganism, to be increased rather than diminished. After the fifth or sixth century, when Christianity was thoroughly established and secure, the need of such a discipline was no longer felt, and it passed rapidly away. The practice of reserve (escusade) was exercised mainly in two directions, in dealing with catechumens, and with the heathen. It will be convenient to treat of these separately, as the reasons for the practice, and the mode in which it was carried out, differ somewhat in the two cases.

(1) Catechumens.—It was desirable to bring learners slowly and by degrees to a full knowledge of the Faith. A convert from heathenism could not profitably assimilate the whole Catholic religion at once, but must be taught gradually. It would be necessary for him to learn first the most essential truths of the unity of God, and not until this had sunk deep into his heart could he safely be instructed concerning the Blessed Trinity. Otherwise tritheism would have been the inevitable result. So again, in times of persecution, it was necessary to be very careful about those who offered themselves for fully instructed. We must not be misled by the doctrine to which the reserve was more especially applied were those of the Holy Trinity and the Sacrament of the Holy Eucharist. The Lord's Prayer, too, was jealously guarded from the knowledge of all who were not not only instructed, who might be required to utter the prayer, but the Eucharist and the Lord's Prayer some relics of the practice still survive in the Church. The Mass of the Catechumens, that earlier portion of the Eucharistic service to which learners and neophytes were admitted, was still practiced, and in which certain portions from Holy Scripture and sometimes included a sermon, is still quite distinguishable, though the custom no longer survives in the Western Liturgy, as it does in the Eastern, of formally bidding the uninitiated to depart when the more solemn part of the service is about to begin. So also the custom of saying the Lord's Prayer in silence in all public services, except the latter part of the Mass, when catechumens would according to the ancient use no longer have been present, owes its origin to this discipline.

The exact time when the custom seems to have become Tertullian (Apoll., viii: Omnibus mysteriis silentii fidei adhibetur. Again, speaking of heretics, he complains bitterly that their discipline is lax in this respect, and that evil results have followed: "Among those who are both heretics and a believer; all can come in alike; they eat and drink and pray together; even heathens, if any chance to come in. That which is holy they cast to the dogs, and their pearls, though to be sure they are not real ones, they fling to the swine" (Prescr. adv. Haer., xii.). Other passages from Tertullian which may be cited are St. Basil (De Spir. Sanct., xxvii: "These things must not be told to the uninitiated"; St. Gregory Nazianzen (Oratio xi, in. bapt.) where he speaks of a difference of knowledge between those who are within and those who are within, and St. Cyril of Jerusalem whose "Catechetical Discourses" are entirely built upon this principle, and who in his first discourse cautions his hearers not to tell what they have heard. "Should a catechumen ask what the teachers have said, tell nothing to a stranger; for we deliver to thee a mystery . . . let no man say to thee, or what harm, if I also know it? . . . See thou let out nothing, not that what is said is not worth telling, but because the ear that hears does not deserve to receive it. Thou thyself wast once a catechumen, and then I told thee not what the communication was, or if one of thee should experience the height of what is taught thee, thou wilt know that the catechumens are not worthy to hear them" (Cat., Lect. i, 12). St. Augustine and St. Chrysostom in like manner frequently stop short in their public addresses, and, after a more or less veiled reference to the mysteries, continue with: "The initiated will understand what I mean." The Lord's Prayer was in St. Augustine's time taught eight days before baptism (Hom. xii, cf. "Enchir.", lxxi, and the "Apostolic Constitutions", VII, xii, al. x., x. in Matt.) The Creed in like manner was taught just before baptism. So St. Ambrose, writing to his sister Marcellina (Epist. xxv, Benedict. ed.), says that on Sunday, after the catechumens had been dismissed, he was teaching the Creed in the baptistery of the basilica to those who were sufficiently advanced. (Cf. St. Jerome, Epist. xxxviii, adv Fannum.) More detailed teaching about the Holy Trinity and about the other sacraments was only given after baptism. Other passages which may be consulted are: Chrys., "Hom. in Matt.", i. "If thou speakest the words of the sign, "Serm. ad Neoph.," i; St. Ambrose, "De his qui mysteriis i. planitieratur, Gaudentius, "Ser. ii ad Neoph.," xi. Apost. Constit., III, v, and VII, xi. The rule of reti-
Discipline applied to all the sacraments, and no catechumen was ever allowed to be present at their celebration. St. Basil (De Spir. S. ad Amphilochium, xxvii) speaking of the sacraments says: "One must not circulate in writing the doctrine of mysteries which none but the initiated are allowed to see." For baptism refers to the mystery of the covenant. (St. Decret., xviii), St. Cyril of Alexandria (Contr. Julian., i), and St. Gregory Nazianzen (Orat. xi, de bapt.).

The discipline with respect to the Holy Eucharist of course requires no proof. It is involved in the very essence of the Mosaic Law, and one cannot possibly turn to any passage of the Fathers which deals with the subject in which the reiteration to be observed is not expressly stated. Confirmation was never spoken of openly. St. Basil, in the treatise already quoted (De Spir. S., xxx, 11), says that no one has ever ventured to speak openly in writing of the holy oil of unction, and Innoceus I, writing to the Bishop of Gubbio on the sacramental "form" of this ordinance answers: "I dare not speak the words, lest I should seem rather to betray a trust, than to report to St. Chrysostom (Hom. xvii in II Cor.), in speaking of the practice of begging the prayers of the faithful for those who are to be ordained, says that they are "admonished in a secret manner."

For it is not lawful to reveal everything to those who are yet uninstructed." So also St. Augustine (Tract xi, in Joann.) : "If you say to a catechumen, Doest thou believe in Christ? he will answer; I do, and will sign himself with the Cross,... Let us ask him, Doest thou eat the Flesh of the Son of Man and drink the Blood of the Son of Man? He will not know what we mean, for Jesus has not trusted himself to him.

(2) The Heathen.—The evidence for the reserve of Christian writers when dealing with religious questions in books which might be accessible to the heathen is, naturally, to a large extent of a negative character, and therefore difficult to produce. Theodosius (Praep. xvi) lays down the general principle in terms which are quite clear and unmistakable: "We speak in obscure terms concerning the Divine Mysteries, on account of the initiated, but when these have withdrawn we teach the initiated plainly. That passage alone would suffice to refute the assertion of the anti-Christian Diodorus, who beclouded the Secret line of the Secret was a confinement of the knowledge of the mysteries of the Faith to a chosen few, and was introduced in imitation of the heathen "mysteries". On the contrary all Christians were taught the whole truth, there was no esoteric doctrine, but they were brought to full knowledge slowly, and precautions were taken, as was very necessary, to prevent heathens from learning anything of which they might make an evil use. A very striking example of the way in which the discipline worked may be found in the writings of St. Chrysostom. He says, in a letter to Pope Innocent I, that he is told that in the course of a disturbance at Constantinople an act of irreverence had been committed, and "the blood of Christ had been spilt upon the ground". In a letter to the pope there was no reason for not speaking plainly. But Palladius, his biographer, speaking of the same incident in a book for general reading, says only, "They overturned the symbols" (Chrys. ad Inn., i, 3 in P. G., LII, 534; cf. Döllinger, "Lehre der Eucharistie", 15). It is, no doubt, on this account that almost all the early apologists who wrote in the name of the Church, Justin Martyr, and Theophilus, are absolutely silent on the Holy Eucharist. Justin Martyr and to a less degree Tertullian are more outspoken; the frankness of the former has been unduly urged to prove the non-existence of this institution in the first half of the second century. So again, as Cardinal Newman has observed (Development, 27), both Minucius Felix and Arnobius in controversy with heathens deny absolutely that Christians used altars in their churches. The obvious meaning was that they did not use altars in the heathen sense, and they must not be taken as denying the tradition of the Epistle to the Hebrews, that, in a Christian sense, "we have an altar".

The controversial importance of this subject in more recent times is, of course, obvious. The Catholics answered the accusation of Protestant writers, that their special deniability was not found in the writings of the early Fathers, by showing the existence of this practice of reserve. It was forbidden to speak or write publicly of these doctrines, silence was completely accounted for. So again, if here and there in early writings terms were used which seemed to countenance Protestant teaching—as for instance by speaking of the Holy Eucharist as symbols—it became necessary always to examine whether these terms were not used intentionally to conceal the true doctrine from the uninstructed, and whether the same writers did not, under other circumstances, use clear and definite language. Protestant controversialists, therefore, endeavoured first of all to deny that the practice had ever really existed, and then when they were driven from this position, they asserted that it was unknown to the earliest Christians, as shown by the fact that Justin Martyr speaks on the subject of the Holy Eucharist, and that it was the result of persecution. They alleged therefore that Catholics could not use it to account for the silence of any writer before the latter part of the second century at the earliest. To this Catholics responded that, although no doubt the practice may have been intensified through persecution, it goes back to the very beginnings of Christianity, and to Christ's own words. Moreover it can be shown to have been in force before St. Justin's time, and his action may be regarded as an exception, rendered necessary by the need for putting before the emperor an account of the Christian religion which should be true and full.

The monuments of the earliest centuries afford interesting examples of the principle of the Discipline of the Secret. Monuments which could be seen by all could only speak of the mysteries of religion under veiled symbols. So in the catacombs there is scarcely any instance of a painting the subject of which is directly Christian, although all spoke of Christian truth. Those who were admitted to the knowledge of the Christian mysteries were commonly chosen, while the representation of Christ under the name and form of a fish (see Pisces) made the allusion to the doctrine of the Holy Eucharist possible and plain. There is, for example, the famous Autun inscription (see Piscinum): "Take the food, honey-sweet, of the redeemer of the saints, eat and drink holding the Fish in thy hands"; words which every Christian would understand at once, but which conveyed nothing to the uninstructed. The inscription of Abercious (q. v.) is another notable instance.

The need for this reticence became less pressing after the fifth century, as Europe became Christianized and the discipline gradually passed away. We may, however, still trace its effects in the seventh century in the absurd misstatements contained in the Koran on the subject of the Blessed Trinity and the Holy Eucharist. This, perhaps, is almost the last instance which could be brought forward. Once the doctrines of the Church had been publicly set forth, any such discipline became impossible and no return was practical. The second Epistle of C. G. Anrich (Das antike Mysterienwesen, 1894), that the primitive Christians borrowed this practice from the mysteries of Mithra, see Cuman, "The Mysteries of Mithra" (London, 1903), 186-99.
Discus. See Paten.

Discussions, Religious (Conferences, Disputations, Debates), as contradistinguished from polemical writings, designate oral dialectical duels, more or less formal and public, between champions of divergent religious beliefs. For the most part, the more celebrated of these discussions have been held at the instigation of the civil authorities; for the Church has rarely shown favor to this method of ventilating revealed truth. This attitude of opposition on the part of the Church is wise and intelligible. A champion of orthodoxy, unless his questions essential to the debate, is not easily to be found. Moreover, it seems highly improper to give the antagonists of the truth an opportunity to assail mysteries and institutions which should be spoken of with reverence. The fact that the Catholic party to the controversy is nearly always obliged to be on the defensive places him at a disadvantage before the public, who, as Demosthenes remarks, "listen eagerly to revilings and accusations." At any rate, the Church, as custodian of Revelation, cannot abdicate her office and permit a jury of incompetents to decide upon the truths committed to her care.

St. Thomas (II-II, Q. x, a. 7) holds that it is lawful to discuss publicly with unbelievers, under certain conditions. To discuss as doubting the truth of the faith, is a sin: to discuss for the purpose of refuting error, is praiseworthy. At the same time the character of the audience must be considered. If they are well instructed and firm in their belief, there is no danger; if they are simple-minded, then, where they are solicited by unbelievers to abandon their faith, a public controversy is considered to be undertaken by competent parties. But where the faithful are not exposed to such pervertent influences, discussions of the sort are dangerous. It is not, then, surprising that the question of disputations with heretics has been the subject of ecclesiastical legislation. By a decree of Alexander IV (1254-1261) inserted in "Sextus Decretalium", Lib. V, c. ii, and still in force, all laymen are forbidden, under threat of excommunication, to dispute publicly or privately with heretics on the Catholic Faith. The text reads: "Inhibemus quocumque, qui ipsius laici persone licite publice vel privatim de fide catholica disputare. Qui vero contra fecerit, excommunicatione laqueo innoctetur." (We furthermore forbid any lay person to engage in dispute, either private or public, concerning the Catholic Faith. Whosoever shall act contrary to this decree, let him be bound in the letters of excommunication.) This law, like all penal laws, must be very narrowly construed. The terms Catholic Faith and dispute have a technical signification. The former term refers to questions purely theological; the latter to disputations more or less agreeable to the mind of the public. There are various questions, somewhat connected with theology, which many laymen who have received no scientific theological training can treat more intelligently than a priest. In modern life, it frequently happens that an O'Connell or a Montalembert must stand forward as a defender of Catholic interests upon occasions when a theologian would be out of place. But when there is a question of dogmatic or moral theology, every intelligent layman will concede the propriety of leaving the exposition and defence of it to the clergy.

But the layman are not free to engage in public disputations on religion without due authorization. In the "Collectanea S. Cong. de Prop. Fide" (p. 102, n. 294) we find the following decree, issued 8 March, 1625:

The Sacred Congregation has ordered that public discussions shall not be held with heretics, because for the most part, either owing to their lowness or audacity or to the applause of the audience, error prevails and the truth is crushed. But should it happen that such a discussion is unavoidable, notice must first be given to the S. Congregation, which, after weighing the circumstances of time and persons, will prescribe in detail what is to be done.

The Sacred Congregation enforced this decree with such vigour, that the custom of holding public disputes with heretics well nigh fell into desuetude. [See the decree of 1631 regarding the missionaries in Constantinople; also the decrees of 1645 and 1662, the latter forbidding the General of the Capuchins to authorize such disputes (Collectaneas, 1674, n. 302).]

That this legislation is still in force appears from the letter addressed to the bishop of Iepo by Cardinal Rospigliosi, in the name of the Cong. for Ecclesiastical Affairs (27 Jan., 1902) in which it is declared that discussions with Socialists are subject to the decrees of the Holy See regarding public disputes with heretics; and, in accordance with the decree of Propaganda, 7 Feb., 1845, such public disputations are not to be permitted unless there is hope of producing greater good and unless the conditions prescribed by the theologians are fulfilled. The Holy See, it is added, considering that these discussions often produce no result at all or even result in harm, has frequently forbidden them in virtue of ecclesiastical authority. Where this cannot be done, care must be taken that the discussions are not held without the authorization of the Apostolic See; and that only those who are well qualified to secure the triumph of Christian truth shall take part therein. It is evident, then, that no Catholic priest is ever permitted to become the aggressor or to issue a challenge to such a debate. If he receives from the other party to the controversy a public challenge under circumstances which make a non-acceptance impossible, he is allowed to appeal to the superior ecclesiastical authorities where this cannot be done, care must be taken that the discussions are not held without the authorization of the Apostolic See; and that only those who are well qualified to secure the triumph of Christian truth shall take part therein. It is evident, then, that no Catholic priest is ever permitted to become the aggressor or to issue a challenge to such a debate. If he receives from the other party to the controversy a public challenge under circumstances which make a non-acceptance impossible, he is allowed to appeal to the superior ecclesiastical authorities.

We thus reconcile two apparently contradictory utterances of the Apostles: for according to St. Peter (I Pet., iii, 15) you should be "ready always to satisfy every one that seeketh you a reason of that hope which is in you," while St. Paul admonishes Timothy (Tim. ii, 14), "Contend not in words, for it is to no profit, but to the subverting of the hearers."

Historic Disputations in Early Times.—The disputes of St. Stephen and St. Paul, mentioned in the Acts of the Apostles, were rather in the nature of an Apostolic pleading than of formal discussions. St. Justin's "Dialogue with Tryphon" was, in all probability, a literary effort after the model of Plato's dialogues. St. Augustine, the ablest disputant of all time, engaged in several set debates with Arians, Manicheans, Donatists, and Pelagians. An interesting summary of each of these great disputations is preserved among the saint's works, and ought to be closely studied by those who are called to defend the Catholic cause. Of particular interest is the celebrated Conference of Carthage, consisting of the chief bishops of the Western churches to insist the ineradicable schism of the Donatists. It opened 1 June, 411, and lasted three days. The tribune Marcianus represented the emperor, and in the presence of 286 Catholic and 270 Donatist bishops, St. Augustine, as chief spokesman of the Catholics, so completely upset the sectarian arguments, that the victory was
the final decision had been reserved, Erfurt declined to intervene and returned the documents; Paris sat in judgment upon Luther's writings, attaching to each of his opinions the proper theological censure. The most tangible outcome of the diet was, while it opened the eyes of Duke George to the true nature of Luther's revolt and attached him unalterably to the Church of his fathers, on the other hand it gained for the Lutheran cause the valuable aid of the youthful Melanchthon, who never understood the merits of the controversy, but was overawed by the vigorous personality of the Reformer.

The Leipzig Disputation was the last occasion on which the ancient custom of swearing to advance no tenet contrary to Catholic doctrine was observed. Yet all subsequent debates between Catholics and Protestants, the bare text of Holy Writ was taken as the sole and sufficient fountain of authority. This, naturally, placed the Catholics in a disadvantageous position and narrowed their prospect of success. This was particularly the case in Switzerland, where Zwingli and his lieutenants organized a number of one-sided debates under the presidency of town councils already won over to Protestantism. Such were the disputations of Zurich, 1523, of Swic Baden, 1526, and of Berne, 1526. In these disputations, supposedly the same, the abolition of Catholic worship and the desecration of churches and religious institutions.

Passing over the numerous futile attempts made by the Protestants to heal their intestine quarrels by means of colloquies, we come to the still more hopeless efforts of Charles V to bring the religious troubles of Germany to a "speedy and peaceful termination" by conferences between the Catholic and the Protestant divines. Since the Protestants proclaimed their determination to adhere to the terms of the Augsburg Confession, and, in addition, formally repudiated the authority of the Roman pontiff and "would admit no other judge of the controversy than Jesus Christ," it was to be foreseen that the result of conferences thus conducted could only be to waste time and increase the acrimony already existing between the parties. This was as clear to Pope Paul III as it was to Luther, both of whom predicted the inevitable failure. However, since the emperor and his brother, King Ferdinand, persisted in making a trial, the pope authorized his nuncio, Morone, to proceed to Speyer, whither the meeting had been transferred from Augsburg in the preceding May, to excommunicate Luther; and as the ambiguous opening was raging in that city the conference took place in Hagenau. Neither the Elector of Saxony nor the Landgrave of Hesse could be induced to attend. Melanchthon was absent through a heavy illness brought on by grief and shame at the ignoble part he had taken in the affair of the Landgrave's bigotry. The leading Protestant theologians at the conference were Bucer, Myconius, Brenz, Blauver, and Urbanus Rheugius. The most prominent on the Catholic side were Bishop Faber of Vienna and Dr. Eck. Present and actively intruding in the discussion and accommodation was John Calvin, then exiled from Geneva; he appeared as confidential agent of the King of France, whose settled policy it was to perpetuate religious discord in the domains of his rival. After a month wasted in useless wrangling, King Ferdinand pronounced the conference to be reassembled at Worms on 28 October.

Undismayed by the failure of the Hagenau conference, the emperor made more strenuous efforts for the success of the coming colloquy at Worms. He dispatched the Inquisitor General to the papal court. The latter brought with him the celebrated Jesuit, Father Peter Faber. The pope sent the Bishop of Feltre, Tommaso Campeggio, brother of the great cardinal, and ordered Morone to attend. They were not to take any active part in the debates, but to watch events closely and report to Rome. Granvella opened the proceedings at Worms, 25 Nov., with an
stout and conciliatory address. He pictured the evils which had befallen Germany, "once the first of all nations in fidelity, religion, piety, and divine worship," and warned his hearers that "all the evils that shall come upon you now, and your stubbornly to preconceived notions, you prevent a renewal of concord, will be ascribed to you as the authors of them." On behalf of the Protestants, Melanchthon returned "an intrepid answer"; he threw all the blame upon the Catholics, who refused to accept the Augsburg Confession.

A great deal of time was spent in wrangling over points of order; finally it was decided that Dr. Eck should be spokesman for the Catholics and Melanchthon for the Protestants. The debate began 14 Jan., 1541. A tactical blunder was committed in accepting the Augsburg Confession as the basis of the conference. That document had been drawn up to meet an emergency. It was apologetic and conciliatory, so worsened as to persuade the young emperor that there was no radical difference between the Catholics and the Protestants. It permitted the spiritual jurisdiction of the bishops and tacitly acknowledged the supremacy of the pope by laying the ultimate appeal with a council by him convened. But many changes had taken place in the ten intervening years. The bishoprics had been revived out of existence in Germany; the Smalkald confederates had solemnly abjured the pope and scorned his proffer of a council; each petty territorial prince had constituted himself the head and exponent of religion within his dominions. For all practical purposes the Augsburg Confession was as useless as the laws of Lycurgus. Moreover, as Dr. Eck pointed out, the Augsburg Confession of 1540 was a different document from the Confession of 1530, having been changed by Melanchthon to suit his sacramentarian view of the Eucharist. His attitude toward Worms at Wolfspring and his demand on every point of doctrine, the discord in Germany would have continued none the less; for the princes had not the remotest idea of giving up their lucrative dominion over their territorial churches. Eck and Melanchthon battled four days over the topic of original sin and its consequences, and a formula was drafted to which both parties agreed, the Protestants with a reservation.

At this point Granvella suspended the conference, to be resumed at Ratisbon, whether the emperor had succeeded in his negotiations. This diet, from which the emperor anticipated brilliant results, was called to order 5 April, 1541. As legate of the pope appeared Cardinal Contarini, assisted by the nuncio Morone. The inevitable Calvin was present, ostensibly to defend his views in reality to foster discord in the interest of France. As collatorists at the religious conference which met simultaneously, Charles appointed Eck, Pflug, and Groppe for the Catholic side, and Melanchthon, Bucer, and Pistorius for the Protestants. A document of mysterious origin, the "Ratisbon Book," was presented by Joachim of Brandenburg as the basis of agreement. This strange compilation, it developed later, was the result of secret conferences, held during the meeting at Worms, between the Protestants, Bucer and Capito, on one side, and the Lutheranizing Groppe and a secretary of the emperor named Veltvick on the other. It consisted of twenty-three chapters, in which, by an ingenious phraseology, the attempt was made so to formulate the controverted doctrines that each party might by its own words express views which each party, in the transaction, is unknown; they certainly knew and approved of it. The "Book" had been submitted by the Elector of Brandenburg to the judgment of Luther and Melanchthon; and their contemplated treatment of it and its success. It was shown to the legate and Morone, the latter was for rejecting it summarily; Contarini, after making a score of emendations, notably emphasizing in Article 14 the dogma of Transubstantiation, declared that now "as a private person" he could accept it; but as legate he must consult with the emperor; and then he substituted the following text: "De interpretatione doctrinae Justificationis.

The Book" was presented to the collatorists by Granvella for consideration. The first four articles, treating of man before the fall, free will, the origin of sin, and original sin, were accepted. The last article in each of the fifth and sixth articles, on justification, was reached. After long and vehement debates, a formula was presented by Bucer and accepted by the majority, so worded as to be capable of bearing a Catholic and a Lutheran interpretation. Nothing in the text of the formula was unacceptable to both parties. The Holy See condoned it and administered a severe rebuke to Contarini for not protesting against it. No greater success was attained as to the other articles of importance.

On 22 May the conference ended, and the emperor was informed as to the articles agreed upon and those on which agreement was impossible. Charles was sorely disappointed, but he was powerless to effect anything further. The decree known as the "Ratisbon Interim," published 28 July, 1541, enjoining upon both sides the obstinate articles of the house of Bishops and the theologians, was by both sides disregarded. Equally without result was the last of the conferences summoned by Charles at Ratisbon, 1546, just previously to the outbreak of the Smalkaldic War.

The Council of Trent in 1545 was attended by French cardinals and thirty-eight archbishops and bishops, with a host of minor prelates and doctors, wasted in a barren controversy with the Calvinists an entire month, which might have been spent far more advantageously to the Church and more in consonance with the duties of the Council and the agreement on every point of doctrine, the discord in Germany would have continued none the less; for the princes had not the remotest idea of giving up their lucrative dominion over their territorial churches. Eck and Melanchthon battled four days over the topic of original sin and its consequences, and a formula was drafted to which both parties agreed, the Protestants with a reservation.

DISPARITY

general council because the majority of the Fathers were not French, chose as authoritative expounders of the doctrine of the Church the Genevan Bessar and the Italian Vermigli.

It was a deep humiliation for the proud hierarchy of France to be compelled to listen to a long tirade by Bessar against the most cherished of Catholic doctrines, the Real Presence of Christ in the Eucharist. They suspected that his feelings, out of respect for the King, until the hardy Reformer, in the heat of argument, gave utterance to his conviction that the Body and Blood of Christ were as far distant from the bread and wine, as the highest heaven is from the earth. This was a reproach to the Church and they cried out, “He blasphemes.” It was too much for Catherine herself, and proved to her that the fundamental dogma of the Catholic Church was at stake. Bessar’s speech, revised and emended, was scattered broadcast among the people of France. We are told that the Cardinal of Lorraine confuted the heretic at the next session in a masterly address; but since he did not set it down in writing its value cannot be ascertained.

The only sensible speech made at this colloquy was that of the Jesuit Laynez, who had the courage to remonstrate against the place of contention on the subjects concerning the Faith was Tournai, near Paris; that the Divinely appointed judge of the religious controversies was the supreme pontiff, not the Court of France. Catherine wept; but instead of following the Jesuit’s wise counsel, she appointed a committee of five Calvinists and five lukewarm Catholics, who drafted a vague formula which could be interpreted in a Catholic or a Calvinistic sense, and was consequently condemned by both parties.

The spread of Protestantism and the application of its fundamental principle of private judgment naturally produced far-reaching differences in belief. To heal these and so bring about unity, various conferences were held: at Weimar (1560), between the Luthcrans, Striezel and Flacius, on free will; at Altenburg (1566-68), between the Jesuits theologians and those from Wittenberg, on free will and justification; at Monthbiard (1568), between Bessar and the Tübinger theologians, on predestination. None of these resulted in harmony; they rather emphasised diversities in belief and intensified partisanship.

Dissension in Munster, 1552-1555. — The Conference of Passau was the last attempt made to reconcile or stave off the radical differences of Catholicity and Protestantism. There have been some notable oral debates between champions of the rival religions in more recent times; but in these each side laboured to establish its dogmas. There was no common sentiment. The most memorable and successful of these modern disputations was the “Conference on the Authority of the Church,” held 8 March, 1579, between Bossuet and the Calvinist minister Jean Claude. This was a model of close debate, in which, with due courtesy, each antagonist kept strictly to the subject in hand, the relation of the Church and the Bible. The fondness of English-speaking peoples for public disputes has often shown itself in challenges, generally delivered by Protestant controversialists, to discuss religious topics in public. As a rule, they have produced no good results, since both sides revived worn-out arguments and wandered over too wide a field. Such was the “Controversial Discussion between Rev. Thomas Maguire and Rev. Richard T. Pope.” held in the College, 12 Dec., 1827, Daniel O’Connell being one of the presiding officers. It was printed and widely circulated. Of a similar nature was the “Debate on the Roman Catholic Religion,” held in Cincinnati from 13 to 21 Jan., 1837, between Alexander Campbell, of the Cumberland, Bishop John P. Puresll. More satisfactory, because confined within closer limits, was the celebrated “Discussion of the Questions, Is the Roman Catholic Religion, in any or in all its Principles or Doctrines, Inimical to Civil or Religious Liberty? and of the Question, Is the Presbyterian Religion, in any or in all its Principles or Doctrines, Inimical to Civil or Religious Liberty?” debated in Philadelphia in 1836 between Rev. John Hughes, later Archbishop of New York, and Rev. John Breckinridge of the Presbyterian Church. Both parties kept their tempers remarkably well; but to judge from the tone of the controversy, it was not long after the debate had little effect in extinguishing unreasoning prejudices. With the exception of a debate on the question of St. Peter’s residence in Rome, held in the Eternal City in 1872, there have been no oral religious discussions in recent times, and this method of elucidating religious truth may be regarded as discomfited by modern public opinion.

Disibod, Sane, Irish bishop and patron of Disen-

berg (Disibodenberg) born c. 619, died July 650. His life was written in 1170 by St. Hildegard, from his own visions. St. Disibod journeyed to the Continent about the year 653, and settled in the valley of the Nahe, not far from Bingen. His labours continued during the latter half of the seventh century, and, though he led the life of an ascetic, he had a numerous community, who built bee-hive cells, in the Irish fashion, on the eastern slopes of the mountains. Before his death he had the happiness of seeing a church erected, served by a colony of monks following the Rule of St. Columba, and he was elected abbot of the monastery then being named Mount Disibod, subsequently Disenberg, in the Diocese of Mainz. Numerous miracles are recorded of the saint. Some authors are of opinion that his death really took place on 8 Sept., whilst the date 8 July is that of the translation of his relics in the year 754, St. Boniface being present; Acta SS., 8 July: Marillon, Annal. Ord. S. Ben. (Lodoe, 1792), IV: Butler, Lives of the Saints 3 Sept.; O’HANLON, Lives of the Irish Saints (London, 1870), VI: W. H. GHATTAN-FLOOD.

Disparity of Worship (Disparitas Cultus), a diri-

ment impediment introduced by the Church to safeguard the sanctity of the Sacrament of Marriage. To effect this purpose a law was necessary that would debar Catholics from contracting marriage with persons unfit to receive the sacrament. The only fitness test enunciated in (a) either the non-reception of the Sacrament of Baptism, which is the door to the other six sacraments; or (b) in an unbelief in the sacramental character of marriage or in either or both of its essential properties (unity and indissolubility); or (c) in a profession of belief or unbelief that endangers the three ends and threafold substantial blessings or advantages of this “great sacrament . . . in Christ and the church”. This unfitness, in whole or in part, is to be found in all persons who are not of the Catholic Faith and worship. Disparity of worship, in a general way, signifies a difference of religion or worship between two persons. This state of disagreement may be antecedent to, or consequent upon, their marriage. Consequent disparity occurs in the case of two pagans or unbaptised persons, one of whom, becoming a convert, is baptised in the Catholic Church. Consequent disparity occurs in the case of two pagans or unbaptised persons, one of whom, becoming a convert, is baptised in the Catholic Church. Antecedent disparity is twofold: considered in its strict and proper sense it is called perfect disparity of worship,
or simply disparity of worship, and implies a different relation on the part of the contracting parties in the marriage than that of the Church to the world. It is the impairment of Baptism. Viewed in a less strict, but still a proper, sense, it is named imperfect disparity of worship, or, more commonly, mixed religion (mixtæ religionis), which presupposes an equality as to the reception of baptism, but denotes a diverseness as to form of baptism or religious worship. This disparity, or mixed religion, does not render void the marriage of a Catholic with a baptized non-Catholic; but it does make it (unless dispensations intervene) illicit and sinful. However, such a marriage may be nullified by the consent of either of the parties to the marriage. Disparity of worship, in its strict sense, and as the subject of this article, is that diversity which exists between two persons, one of whom has, and the other has certainly not, received Christian baptism. This disparity exists between a baptized Christian, whether Catholic or non-Catholic, and a pagan, Mohammedan, Jew, or even a catechumen (believer in the Catholic Faith yet not baptized). Imperfect disparity of worship, or mixed religion, might more strictly and properly be called disparity of worship, but not of the mind (intellect), nor of the will (voluntas), nor of the heart (cordis), is the fixed point of dissimilarity. Baptism has been chosen as the basis of this diriment impediment for a twofold reason: (1) it is an external ceremony, easy of recognition and proof, and (2) it is a sacrament which imprints an indelible character upon the soul of the receiver and so presents a proof of the religious condition which is fixed and unchangeable. Personal faith, on the contrary, viewed either as the internal assent of the mind or as the outward profession of the internal act, is subject to change and not always easy of demonstration, and hence could not afford a certain and innominate foundation. The primary reason why Catholics are debarred from intermarriage with unbaptized persons is because the latter are not capable of receiving the Sacrament of Matrimony, as baptism is the door to all the other sacraments. Furthermore, according to the more probable of the two opinions which the Catholic party who, with a dispensation, marries an unbaptized person, does not receive the sacrament or the concomitant graces (cf. Sanchez, Bk. II, disp. viii, n. 2; Pirining, Bk. IV, tit. I, n. 71; Schmilzgruber, Bk. VIII, n. 307; Visscher, "Canonum," pars posterior, 559 sqq.; Hurll, III, 583, n. 598; and Werns, who examines the reasons for the opposite opinion and answers them, "Jus Decreti," IV, 63 sqq.). The Church has not decided this question; hence the opinion of Dominicus de Soto (In IV Sent., art. 11, ad 3. n. 165), Perenez (II, 306), Resten, who holds that it is the more probable (De Sacr. Matri monii, I, 284 sqq.), and Tanquerey (Synopsis Theol. Dogmat., II, 648, n. 31), to wit, that the Catholic does receive the sacrament, is tenable. The marriage, according to both opinions, is certainly sacred (Leo XIII, "Acanznum", 10 Feb., 1880) and indissoluble.

**Extent of the Impediment.**—This impediment exists only in instances where the disparity is of such nature that one of the contracting parties is, and the other party is certainly not, baptized. Every baptized person, Protestant as well as Catholic, is subject to this disqualifying and annulling impediment, because Christ gave the Church jurisdiction over all who belong to it by baptism. Under the name "Catholic" are here included, besides practical Catholics, all who received the baptism of the Church, but who never reared or instructed in her teachings, Catholics who have fallen away or apostatized from the Catholic Faith and have joined other denominations or turned infidel. Once baptized always baptized, and always subject to the laws of Christ and His infallible Church, jurisdiction and power to ordain, embrace, and ordain the marriage of a Catholic with a pagan, Mohammedan, Jew, or catechumen, and (5) of baptized non-Catholics, e. g. heretics and schismatics, with unbaptized persons. It does not extend to perfect or perfect disparity, or mixed religion, does not render void the marriage of a Catholic with a baptized non-Catholic; but it does make it (unless dispensations intervene) illicit and sinful. However, such a marriage may be nullified by the consent of another diriment impediment, e. g. clandestinity.

Disparity of worship, in its strict sense, and as the subject of this article, is that diversity which exists between two persons, one of whom has, and the other has certainly not, received Christian baptism. This disparity exists between a baptized Christian, whether Catholic or non-Catholic, and a pagan, Mohammedan, Jew, or even a catechumen (believer in the Catholic Faith yet not baptized). The marriage, according to both opinions, is certainly sacred (Leo XIII, "Acanznum", 10 Feb., 1880) and indissoluble.

**Extent of the Impediment.**—This impediment exists only in instances where the disparity is of such nature that one of the contracting parties is, and the other party is certainly not, baptized. Every baptized person, Protestant as well as Catholic, is subject to this disqualifying and annulling impediment, because Christ gave the Church jurisdiction over all who belong to it by baptism. Under the name "Catholic" are here included, besides practical Catholics, all who received the baptism of the Church, but who never reared or instructed in her teachings, Catholics who have fallen away or apostatized from the Catholic Faith and have joined other denominations or turned infidel. Once baptized always baptized, and always subject to the laws of Christ and His infallible Church, jurisdiction and power to ordain, embrace, and ordain the marriage of a Catholic with a pagan, Mohammedan, Jew, or catechumen, and (5) of baptized non-Catholics, e. g. heretics and schismatics, with unbaptized persons. It does not extend to perfect or perfect disparity, or mixed religion, does not render void the marriage of a Catholic with a baptized non-Catholic; but it does make it (unless dispensations intervene) illicit and sinful. However, such a marriage may be nullified by the consent of another diriment impediment, e. g. clandestinity. Seeing that the parties in the second and third classes have been baptized, it is evident that their marriages are outside the domain of the diriment impediment, whose aim is to protect the sacrament.

Difificulties as to the marriages of Catholics with non-Catholics, and of non-Catholics with one another, or with pagans or other unbaptized persons have in these days multiplied, due either to absolute omission of baptism, or its careless and often invalid administration, or its absence, or occasionally of its contrived omission. Doubts about the administration (dubium facti) or valid administration (dubium juris) of baptism in these acts are as a consequence frequent, and render complex the question whether or not disparity of worship exist. The safe guide in this confusion is the axiom: a doubtful baptism, as regards a marriage already, or about to be, celebrated, is presumed to be valid if, after due investigation, the doubt is still insoluble or it is not prudent (on account of delay, etc.) to remove it. This rule, so different from that governing baptism as a necessary means for salvation, is based upon the principle that the right to marry yields but to the evidence (not doubt) of the non-baptism. Accordingly, disparity of worship invalidates the matrimonial union of one doubtfully baptized with another certainly not baptized. The doubt may concern the act of baptizing or the validity of the ceremony. Investigation on these points must proceed in this manner: search must be made of the ritual belonging to the denomination of the party concerning whose baptism there is doubt, and if the ritual teaches the necessity of baptism, and prescribes the use of the valid matter and form in its administration, and, further, if the parents are strict adherents and observers of their religion, there is a certainty (sufficient for marriage) that the baptized was validly baptized. Hence, a marriage with the necessary matter and form, but, upon investigation, a serious doubt remains, the baptism is still considered valid. If, on the contrary, the sect repudiates baptism, forbids infant-baptism, or admits to baptism only adults of thirty years, or the parents assert that they do not belong or wish to belong to any sect or denomination, but are satisfied with pleasing the Supreme Being by a good, moral life rather than by any fixed form of worship, then there is no certainty, no even a presumption, in favour of the baptism in childhood. Should the parents be careless and negligent in the observances of the sect of which they are members, or belong to a denomination which, whilst not rejecting baptism, yet does not admit its necessity, and in which, ordinarily, baptism is not administered, then there is no presumption for or against the baptism of their offspring, and each individual case must be referred to Rome (Congreg. of the Inquisition, 1 Aug., 1883).

Disparity of worship does not affect the marriage of a Catholic or baptized non-Catholic with one whose baptism is not administered, even after careful investigation concerning the baptismal ceremony or its validity, remains doubtful. Neither does it in any way influence the marriage of two who, after diligent examination, are still
considered doubtfully baptized. There is a difference of opinion among the jurists and theologians as to the influence of this diriment impediment upon the marriage of two doubtfully baptized, if after investigation it turns out for a certainty that one was certainly unbaptized. The more common opinion is that dispensation of marriage may not be granted for this marriage. Gasparri gives as reason that the consuetudinary law never contemplated this case, and hence does not influence it (De Matrimonio, I, nos. 597 and 601). Werns (IV, 772, note), Guru-Ballerini (II, 531), and others say that the marriage was invalid, but as it does not give as reason the Church's dispensation, either special or general. Lehmkohl (II, 536) distinguishes and asserts that if a dispensation from the prohibitive impediment of "mixed religion" has been granted antecedent to the marriage, the union is valid; his reason, however, that the Church in dispensating with the prohibitive did implicitly dispense with the diriment impediment, seems to be at variance with a decree of the Holy Office (29 April, 1840, n. 2) which clearly states that the Holy See dispenses with the impediment of disparity of worship, when the dispensation has been granted, he holds that the marriage is null on account of the existing disparity of worship and must be revalidated. He recognises, however, as valid the marriage of the doubtfully baptized, if they have been baptized in the Eastern Churches and had followed Catholic pracitces, and afterwards it was discovered that one of them had not been baptized (loc. cit. in note).

Origin of the Impediment.—This impediment, inasmuch as it is diriment, is not enjoined by the natural, Divine, or written ecclesiastical law, but has been introduced by a universal custom and practice in the Eastern and Western Churches since the twelfth century. The natural and Divine laws do, however, repudiate and prohibit such marriages as tend to frustrate the main ends of marriage by exposing believers and their offspring to the loss of their Catholic faith, and this prohibition continues in force so long as the danger exists and no proportionately grave cause dictates the necessity of such marriage. The Mosaic Law (Deut., vii, 3) prohibits marriage between the Israelites and the Chanaanites, and even the Samaritans (who kept the Law and had the Book of Moses), on account of the heathenish ceremonies they observed, lest the Jews might be turned away from the service of the true God and cling to the worship of the false. Thus they are to be divided into the two classes: the diriment impediments (I Cor., vii, 39), "...let her marry to whom she will but only in the Lord" and (II Cor., vi, 14): "...bear not the yoke with [i.e. do not marry] unbelievers"; do not, indeed, declare invalid the marriages of Christians with unbelievers, but certainly do earnestly forbid the faithful to marry unbelievers unless the ends of Christian marriage are safeguarded and grave and weighty reasons exist for the union. Certainly in the time of St. Paul and immediately afterwards the proportionately small number of Christians with unbelievers, but certain do earnestly forbid the faithful to marry unbelievers unless the ends of Christian marriage are safeguarded and grave and weighty reasons exist for the union. Certainly in the time of St. Paul and immediately afterwards the proportionately small number of Christians with unbelievers, but certainly do earnestly forbid the faithful to marry unbelievers unless the ends of Christian marriage are safeguarded and grave and weighty reasons exist for the union. Certainly in the time of St. Paul and immediately afterwards the proportionately small number of Christians with unbelievers, but certainly do earnestly forbid the faithful to marry unbelievers unless the ends of Christian marriage are safeguarded and grave and weighty reasons exist for the union. Certainly in the time of St. Paul and immediately afterwards the proportionately small number of Christians with unbelievers, but certainly do earnestly forbid the faithful to marry unbelievers unless the ends of Christian marriage are safeguarded and grave and weighty reasons exist for the union. Certainly in the time of St. Paul and immediately afterwards the proportionately small number of Christians with unbelievers, but certainly do earnestly forbid the faithful to marry unbelievers unless the ends of Christian marriage are safeguarded and grave and weighty reasons exist for the union.

With the development of the Church and its growth in numbers, opportunities for Christian marriage increased, proportionately grave reasons for mixed unions (unless in rare cases ceased), and then the natural and Divine laws asserted their right to prohibit such marriages as tended to frustrate the ends of the sacrament by exposing the Catholic to a weakening or loss of faith, the offspring to a lack of Christian instruction, to Jewish influence, to the likelihood of Jewish love which is its own corner-stone. The Christian laity, as well as clergy, realized from sad experience and observation the ordinary tendency of mixed unions to a compromise or loss of faith on the part of the Catholic, and the un-Catholic bringing-up, or at least religious indifference, of the children, and, finally, injury to domestic peace and happiness by the constant exposure to disputes, and sometime bitter quarrels, about the fundamental principles of Catholic Faith, and the consequent weakening, if not total extinction, of Christian love between husband and wife (Ambrose, In Jovinianum, Augustine, In Jov. de Fide et operibus, ch. xix), yet after the death of the latter, and especially from the seventh to the twelfth century, the destitution of them so increased, and the conviction that they were not Christian marriages, and therefore to be shunned and not contracted, grew so strong and general throughout the entire Church as that far back as the twelfth century it was a universal custom and practice which even had the force of a universal law (Benedict XIV, De Divin. Luv., ch. xxiii). The Sacrament of Matrimony, Bk. I, ch. xxiii; Benedict XIV, Constit. "Singulari nobis", paragraphs 9 and 10.

This impediment is binding on Christians of newly converted or even pagan unions, whereas there has been no such condition of exercising the Church and nations, as there have been no Catholic marriages. The opinion of Lessius and others to the contrary is clearly refuted by the granting of faculties by Gregory XIII to the Christian missionaries of Japan to dispense with this impediment in the case of newly converted Japanese Catholics. Many theologians and canonists say that there is one exception to this nullifying law, that is that the instance of an emigrant Catholic family settled in a pagan country without a single Catholic neighbour, forty or fifty days journey removed from the nearest collegium, and unable on account of the distance or want of means to leave the country or procure a dispensation from the impediment, and thus compelled to remain their whole lives single or marry pagans (Santi-Leitner, IV, 74; Gasparri, De Matrimonio, I, 428). It does not seem that disparity of worship holds in a case of this kind; the ecclesiastical law under such circumstances does not bind a man so as to deprive him of his natural right to marry. Werns, however (Jus Decret., IV, 775, n. 37), holds the opposite opinion.

Dispensation from the Impediment.—The Church can dispense from this impediment, inasmuch as it is of ecclesiastical institution. It never does so unless for gravest reasons and upon the fulfillment of certain conditions and guarantees that safeguard, as far as possible, the ends of the Sacrament of Matrimony. The natural and Divine laws, before permitting marriages, exact the removal of all danger to the faith of the Catholic and to the baptism and Catholic bringing-up of all the children of the marriage. The Church cannot dispense with this necessary requirement, and, the better to ensure its observance, institutes and promises, which must be committed to writing and signed and, in some instances and countries, also sworn to, by the unbaptised party to the pact. The unbeliever promises faithfully to comply with the requirements of the Church, and the Church on her part grants the permission for the marriage. The promises on the part of the unbaptized party are: (1) that he (or she) will afford the Catholic partner full and perfect freedom to practise the Catholic Faith, and that he (or she) will abstain from saying or doing ought to weaken him or change that faith, and if he be an inhabitant of a pagan country, that he will not practise polygamy; (2) that he (or she) will permit all children of their union to be baptized and reared in the Catholic Faith and practice, and that he (or she) will do or say nothing calculated to lessen their faith or tur-
them away from it or its practices. The Catholic petitioner for the dispensation must also give promise (usually also written, in order that the dispensee may have a moral certainty of the absence of danger to the sanctity of the grave and to the sacrament) that his (or her) personal religious duties and have all the children baptized and properly reared and trained in the Catholic doctrine and practices, and that by prayer and good example and other legitimate and prudent means he (or she) will constantly labour to bring about the conversion to the Catholic Faith of his (or her) unbaptized partner. The promise to strive to effect the conversion of the unbeliever is of special importance, although too frequently lost sight of. The conversion most assuredly eliminates the last vestige of possible perversion of the Catholic party, ensures the primary end of marriage, i.e., the bearing and rearing of children for the Church and heaven, and rounds out, by the perfect unity of the married couple in faith and Christian love, their marriage according to its great type, the union of Christ with the Church. Even with all these promises, written and sworn to as safeguards to Christian marriage, a dispensation cannot be literally given unless a grave necessity, proportionate to the great risks to be encountered, justifies the marriage.

The dispensation, in former times very rarely granted in Catholic countries, is now more frequent occurrence, owing to the existence of "civil marriage" and the growing indifference on the part of parents in the matter of their children's baptism. The rule of the Church was, and is, not to grant a dispensation from this impediment unless in provinces or countries where the Catholics are largely outnumbered by the non-baptized inhabitants. Rather than dispense from the dispensation of worship, the Church will more willingly and readily grant dispensation from impediments of poverty and concord, precisely for the reason that in the latter cases there is no danger to the faith of either Catholic or offering, while in the case of the former, even though the necessary promises are made and kept, there is always danger of religious indifference on the part of the Catholic party, and especially of the children on account of the example of the non-baptized parent. The pope alone suo jure can dispense with this impediment; bishops cannot. They, however, are delegated to do so, but in the pope's name and by virtue of the dispensation. Thus, dispensations in countries—China, Japan, Africa, etc.—and in countries where the unbaptized largely outnumber the Catholics, as England, United States, etc., have ample faculties in respect to this impediment. To-day the only cases in which a dispensation is granted in delay is not; see Formula T, 11 June, 1907) reserved to Rome. In the faculties granted to bishops of the United States is that of a Catholic with an orthodox Jew, i.e., a circumcised follower of Judaism. The case of a Jew un-circumcised, or even circumcised if he has abandoned Judaism, is not reserved.

This delegated faculty to bishops is given only for a specified period of five years or for a certain number of cases and requires that the bishop in granting a dispensation must state that it was conceded by virtue of Apostolic delegation of specified date. Where the impediment is occult, and there is danger in delay, bishops may dispense without express faculty of Rome, which in such cases is presumed to grant it. All bishops can (decrees of Congreg. of Inquis., 20 Feb., 1888, and 1 March, 1889) dispense, and delegate the faculty to their suffragans, to their diocese, and to others. The dispensations of these faculties are not governed by the constitutions of the general Church law, which is subject to the provisions of the civil law. The aforesaid promise cannot be omitted. The sick party must promise absolutely to observe the requirements of the natural and Divine laws, and to carry out the injunctions of the civil law as far as possible (Collectanea S. C. de Prop. Fide, n. 2188). Bishops cannot dispense in instances where the ends, purposes, and substantial blessings of the sacrament are well protected, unless there also exists the necessity of the dispensation. There are sixteen canonical reasons, some grave and others still more grave (Instruct. S. C. de Prop. Fide, 9 May, 1877). Should the bishop dispense without cause, the dispensation would be null and void. The pope's dispensation, in a similar case labouring under the same defects, would be valid. The reason of this difference is that a bishop cannot violate the law of his superior (in this instance the universal law), whereas the pope, who is supreme legislator, can dispense from universal ecclesiastical laws. He cannot, however, dispense with the prohibition of the natural and Divine laws; hence he must have, before conceding the dispensation, a moral certainty that the practice of the Faith by the Catholic, and the Catholic baptism and rearing of the children, are amply protected. The Holy See dispenses from this impediment only for the gravest reasons and only in express terms (Collectanea S. C. de Prop. Fide, n. 948, 2); hence a dispensation from mixed religion instead of dispensation of worship would not suffice for the validity of the marriage.

All the European Governments (except Austria) ignore this impediment. The Austrian impediment is different from the ecclesiastical impediment. Its basis is the profession of faith, and not the baptism of the parties, and so far as Catholicism is concerned, this civil impediment is more injurious than otherwise. According to the Austrian law, the marriage of a Catholic with a Jew, or other unbaptized party, is civilly invalid as long as the Catholic remains in the Catholic Church. Should the Catholic leave the Church, and announce that he (or she) held no belief in any faith, the marriage would be cleared of invalidity and held civilly valid. Unbaptized parties can, on the other hand, enter into civilly valid marriage with baptized Protestants. The Church in granting dispensation from disparity of worship, thus permitting the marriage of a Catholic and an unbaptized person, by that act dispenses also from all impediments of purely ecclesiastical institution, from which the unbaptized is exempt (except clandestinity; cf. "Praxis Curiae Romanae"; "Ne Temere", 2 Aug., 1907); the Church does this in order that the exemption of the unbaptized be not a bar to the marriage. The unbaptized marriage, to be communicated to the Catholic party (Congreg. of Inquis., 3 March, 1825). This dispensation never includes dispensation in any degree in the direct line nor in the first degree of the transverse line (except by dispensation, 701, 19). This impediment, which is publica juris, can only be involved by any Catholic to annul a marriage contracted without the necessary dispensation. The burden of proof rests upon the challenger, who must clearly demonstrate that there was either no act of baptismal administration or that the act of administration which actually took place was certainly invalid. The usual canonical laws of evidence are supplemented by special laws laid down for the demonstration of the ceremony or the validity of the baptism. The customary norm (c. III, X, De Baptesi, non-bapt., III, xliii) in case of practice, Catholics does not govern the cases of non-Catholics or negligent Catholics. The rules prescribed by the Congreg. of the Inquisition (1 Aug., 1883, and 5 Feb., 1885) for the verification of the fact or non-fact of the baptism, also of the validity of the act, must be strictly followed. The penalties are severe. Schallabrunner, Bk. IV, tit. vi, sect. 4; Ferrariss, Bibliotheca (Rome, 1890), V, 301 sqq.; Pieriuss, Jus Can. (Dillingen, 1911), r. 3, sect. 1, sect. 6; Fuchs, Elementa (Louvain, 1874), XXX, 318 sqq.; Ballerini, Opera Thes. Marciana (Florence, 1894, VI, De Matrimonio, 2, 701, 19); Elementa (Louvain, 1900), IV, 138 sqq.; Werten, Jus Decret. (Rome, 1904), IV, 728-81; Romani, De Jure Matrimonii
Dispensation (Lat. dispensatio), an act whereby in a particular case a lawful superior grants relaxation from an existing rule. This article will treat: I. Dispensation in General; II. Matrimonial Dispensation. 

For dispensations from vows see VOWS and RELIGIOUS ORDERS; and from fasting and abstinence, FAST, ABSTINENCE.

I. Dispensation in General: 
Dispensation differs from abrogation and derogation, inasmuch as these suppress the law totally or in part, whereas a dispensation leaves it still in vigour; and from epieikeia, or a favourable interpretation of the purpose of the legislator, which supposes that he did not intend to include a particular case within the scope of his law, whereas by dispensation the judge or the pope makes the proper point of the law a case which otherwise would fall under it. 

The reason d'être for dispensation lies in the nature of prudent administration, which often counsels the adapting of general legislation to the needs of a particular case. This is especially the case of ecclesiastical administration. Owing to the universality of the Church, the adequate observance by all its members of a single code of laws would be very difficult. Moreover, the Divine purpose of the Church, the welfare of souls, obliges it to reconcile as far as possible the general interests of the community with the spiritual needs or even weaknesses of its individual members. Hence we find instances of ecclesiastical dispensations from the very earliest centuries; such early instances, however, were meant rather to legitimate accomplished facts than to authorize beforehand the doing of certain things. 

Later on antecedent dispensations were frequently granted; as early as the eleventh century Yves of Chartres, among other canonists, outlined the theory on which they were based. With reference to matrimonial dispensations we may mention, in the sixth and seventh centuries, with a few examples of general dispensations granted to legitimatize marriages already contracted, or permitting others about to be contracted. It is not, however, until the second half of the eleventh century that we find frequent dispensation in individual cases. The earliest examples relate to already existing unions; the first certain dispensation for a future marriage dates from the beginning of the thirteenth century. In the sixteenth century the Holy See began to give amplius faculties to bishops and missionaries in distant lands; in the seventeenth century such privileges were granted to other countries. Such was the origin of the ordinary faculties (see FACULTIES, CANONICAL) now granted to bishops.

(1) Kinds of Dispensation.—(a) A dispensation may be accorded in respect of a fact as such, or it may modify a fact, or by silence under circumstances amounting to acquiescence, or solely by its connexion with another positive act that presupposes the dispensation. 
(b) It may be granted in foro interno, or in foro externo, according as it affects only the personal conscience, or conscience and the community at large. Although dispensations in foro interno are used for secret cases, they are also often granted in public cases; hence they must not be identified with dispensations in casu oculato. (c) A dispensation may be either direct or indirect, according as it affects the law directly, by suspending its operation, or indirectly, by modifying the object of the law in such a way as to withdraw it from the latter's control. For instance, when a dispensation is granted from the matrimonial impediment of a vow, the pope remits the obligation resulting from the promise made to God, consequently also the impediment it raised against marriage. 
(d) A dispensation may be in forma gratiatum, in forma commissi, or in forma commissi minz. Those of the first class need no execution, but contain a dispensation granted ipso facto, and superior in the sense of sending it. Those of the second class give jurisdiction to the person named as executor of the dispensation, if he should consider it advisable; they are, therefore, favours to be granted. Those of the third class command the executor to deliver the dispensation if he can verify the accuracy of the facts on which such dispensation is asked; they seem, therefore, to contain a favour already granted. From the respective nature of each of these forms of dispensation result certain important consequences that affect delegation, ob- reption, and revocation in the matter of dispensations (see DELEGATION; OBSESSION; REVOCATION).

(2) The Dispensing Power.—It lies in the very notion of dispensation that only the legislator, or his lawful successor, can of his own right grant a dispensation from the law. His subordinates can do so only in virtue of a mandate. If such a mandate of ecclesiastical authority is made to an inferior by reason of an office he holds, his power, though derived, is known as ordinary. If it is only given him by way of commission it is known as delegated power. 

When such delegation takes place through a permanent law, it is known as delict vivum, that is, it is valid even when the law has fallen into abeyance, according to the dictum: 

"ut dispensationem, in qua est fuerit, liceat semper evidere in eodem exercendi rem, sicut dulcedomum et beneficium dispensationis et dispensationis implemen tum, et non oblitum esse quod fuerit).

The power of dispensation rests in the following persons: (A) The Pope.—He cannot of his own right dispense from the Divine law (either natural or positive). When he does so it is done by virtue of a mandate or authority derived from his successors, his mandate being inferior only in scope to the mandate of his predecessors, but not in that of a不如"
DISPENSATION

INTENDED by some authors, viz., that the bishop can grant all dispensations which the pope has not reserved to himself, cannot be admitted. But by derived right (either ordinary or delegated according to the terms of the grant) the bishop can dispense from those laws that expressly permit him to do so or from those for which he has received an indulgence by that effect. Moreover, by ordinary right, based on custom or the tacit consent of the Holy See, he may dispense: (a) in a case where recourse to the Holy See is difficult and where delay would entail serious danger; (b) in doubtful cases, especially when the doubt affects the negative validity of the dispensation or the competency of the motive; (c) in cases of frequent occurrence but requiring dispensation, also in frequently occurring matters of minor importance; (d) in decrees of national and provincial councils, although he may not pronounce a general decree to the contrary; (e) in pontifical laws specially passed for his diocese.

It should be always remembered that to fix the exact limit of those various powers legitimate custom and the interpretation of reputable authors must serve as guides. Superiors of exempt religious orders (see Exterritorial) have not the plenitude of ordinaries. Individual dispensations from ecclesiastical laws which the bishop grants by his ordinary power. When there is question of the rules of their order they are bound to follow what is laid down in their constitutions (see Regulars, Dispensation).

(4) The Vicar-General.—He enjoys by virtue of his appointment the ordinary dispensing power of the bishop, also the delegated powers of the latter, i.e., those granted him not personally but as ordinary (according to present discipline, the pontifical faculties known as ordinary); except in matters for which he is the vicar, also for those powers which require a special mandate like those of the chapter Liceat, for dealing with irregularities and secret cases. The vicar capitular likewise has all the dispensing power which the bishop has of his own right, or which has been delegated to him as ordinary.

(D) Parish Priest.—By his own ordinary right, founded on custom, he may dispense (but only in particular cases, and for individuals separately, not for a community or congregation) from the observance of any obligation which he may have imposed. He may also dispense, within his own territory, from the observance of diocesan statutes when the latter permit him to do so; the terms of these statutes usually declare the extent of such power, also whether it be ordinary or delegated.

Dispensation being an act of jurisdiction, no person can exercise dispensation for another. Thus, the powers of the bishop and the parish priest, except in circumstances governed by special enactments, acquire jurisdiction over a member of the faithful by reason of his domiciliary or quasi-domiciliary in a diocese or parish (see Domicile).

Moreover, in their own territory they can use their dispensing power in respect of persons without fixed residence (excep), probably also in respect of travellers temporarily resident in such territory. As a general rule he who has power to dispense others from certain obligations can also dispense himself.

(3) Causes for Granting Dispensations.—A sufficient cause is always required in order that a dispensation may be both valid and licit when an inferior dispensation from a superior's law, but only for the liceity of the act when a superior dispenses from his own law. Nevertheless, in this latter case a dispensation granted without a motive would not (in se), except for some special reason, e.g., scandal, constitute a serious fault. One may be seen to be a probable sufficient cause, or with a cause less than one that, of itself and without any dispensation, would excuse from the law. It is always understood that a superior intends to grant only a licit dispensation. Therefore a dispensation is null when in the motives set forth for obtaining it a false statement is made which has influenced not only the causa impulsi, i.e., the reason inclining the superior more easily to grant it, but also the causa moti, i.e., the really determining reason for the grant in question. For this, and in general for the information which should accompany the petition, in order that a dispensation be valid, see below apropos of obreption and subreption in receipts of dispensation. Consequently a false statement or the fraudulent withholding of information, i.e., done with malicious intention of giving up the privilege of the dispensation and annuls the dispensation, unless such statement bear on a point foreign to the matter in hand. But if made with no fraudulent intent, a false statement does not affect the grant unless the object of the statement be some circumstance which ought to have been expressed under pain of nullity, or unless it affects directly the motive cause as above described. Even then false statements do not always nullify the grant; for (a) when the dispensation is composed of several distinct and separable parts, that part or element alone is invalid which contains the false statement; (b) if the case is such as the case may be; (c) when several adequately distinguished motive causes are set forth, the dispensation is null and void only when the obreption or subreption in question affects them all. It is enough, moreover, that the accuracy of the facts be verified at the moment when the dispensation is received or, therefore, in the case of dispensations ex gratia (or in forma gratissim), i.e., granting favours, the facts must be true when the dispensation is expedited; on the other hand, in the case of dispensations in forma commissis and according to the general opinion, in those in forma commissis mizata, the causes alleged must be verified only when the dispensation is actually executed.

(4) Form and Interpretation.—It is proper, generally speaking, that dispensations be asked for and granted in writing. Moreover, the Roman Congregations are forbidden, as a rule, to receive petitions for dispensations or to answer them by telegram. The execution of a dispensation made on receipt of telegraphic information that such dispensation had been granted would be null, unless such means of communication were permitted by the pope or, in the case of an ordinary, in the form of dispensation from the pope. Except when the interest of a third party is at stake, or the superior has expressed himself to the contrary, the general dispensing power, whether ordinary or delegated, ought to be broadly interpreted, since its object is the common good. But the dispensing power given to a person (e.g., in the case of dispensing power given for a particular case) ought to be strictly interpreted unless it is a question of a dispensation authorized by the common law, or one granted mota proprio (by the superior spontaneously) to a whole community, or with a view to the public good. Again, that interpretation is lawful without which the dispensation would prove hurtful or useless to the beneficiary, also that which extends the benefits of the dispensation to whatever is juridically connected with it.

(5) Cessation of Dispensations.—(a) A dispensation ceases when it is renounced by the person in whose favour it was granted. However, when the object of the dispensation is an obligation exclusively resulting from one's own will, e.g., a vow, such renunciation is not valid until accepted by the competent superior. Moreover, neither the non-use of a dispensation nor the fact of having obtained another dispensation incompatible with the former is, in itself, equivalent to a renunciation. Thus, if a girl had received a dispensation to marry Peter and another to marry Paul, she would remain free to marry either of them. (b) A dispensation ceases when it is revoked after due notice to the recipient. The legislator can validly revoke a dispensation. even without causa, though in
Dispensation

the latter case it would be illicit to do so; but without a case an inferior cannot revoke a dispensation, even validly granted, and in such a case, however, he can do so if he has dispensed by virtue of his general powers (ordinary or delegated); not so, however, when his authority extended merely to one particular case, since thereby his authority was exhausted. (c) A dispensation cesses by the death of the superior when, if dispensing having been granted in fomtd commiss. mend., the executor had not yet begun to execute it. But the grant holds good if given ex gratia (as a favour) and even, more probably, if granted in fomtd commiss mzd. In any case, the new pope is wont to re- view the decisions of the grandfather in the immediately preceding year by his predecessor and not yet availed of. (d) A conditional dispensation ceases on verification of the condition that renders it void, e. g. the death of the superior when the dispensation was granted with the clause ad beneplacitum nostrum (at our good pleasure). (e) A dispensation ceases by the absolute and total cessation of its motive causes, the dispensation thereupon ceasing to be legitimate. But the cessation of the influencing causes, or of a part of the motive causes, does not affect the dispensation. If the permitted expressly expressed, and substantially one, it is rightly held to cease with the disappearance of one of its essential elements.

II. Matrimonial Dispensations.—A matrimonial dispensation is the relaxation in a particular case of an impediment prohibiting or annulling a marriage. It may be granted: (a) in favour of a contemplated marriage, or to legitimize one already contracted; (b) in secret cases, or in public cases, or in both (see IMPEDMENTS OF MATRIMONY); (c) in foro interno only, or in foro externo (the latter includes also the former). Power of dispensing in foro internus is not always restricted to secret cases (casus occulti). These expressions, as stated above, are by no means identical. We shall classify the most important considerations in this very complex matter, under four heads: (1) general powers of dispensation; (2) particular inducements of dispensation; (3) causes for dispensations; (4) costs of dispensations.

(1) General Powers of Dispensation.—(A) The Pope.

—The pope cannot dispense from impediments found on Divine law—except, as above described, in the case of grave reasons, especially the non-consummated marriages, or valid and consummated marriage of neophytes before baptism (see NEOPHYTE). In doubtful cases, however, he may decide authoritatively as to the objective value of the doubt. In respect of impediments arising from ecclesiastical law the pope has full and absolute power to grant by him is valid, and when he acts from a sufficient motive it is also licit. He is not wont, however, out of consideration for the public welfare, to exercise this power personally, unless in very exceptional cases, where certain special impediments are in question. Such cases are error, violence, Holy orders, disparity of worship, public conjugicide, consanguinity in the direct line or in the first degree (equal) of the collateral line, and the first degree of affinity (from lawful intercourse) in the direct line. As a rule the pope exercises his power of dispensation directly through Roman Congregations and Tribunals.

Up to recent times the Dataria was the most important channel for matrimonial dispensations when the impediment was public or about to become public with certainty; and there cases (i. e. when the pope had exclusive control in foro externo over all impediments connected with or juridically bearing on matters of faith, e. g. disparity of worship, mista religio, Holy orders, etc.) The dispensing power in foro interno lay with the Penitentiary, and in the case of pauperes or paucares was in many cases that of the pope himself. The dispensing power over public impediments in foro externo. The Penitentiary held as pauperes for all countries outside of Italy those whose united capital, productive of a fixed revenue, did not exceed 5370 lire (about 1850 dollars); and that he could do so if he has dispensed by virtue of his general powers (ordinary or delegated); not so, however, when his authority extended merely to one particular case, since thereby his authority was exhausted. (c) A dispensation cesses by the death of the superior when, if dispensing having been granted in fomtd commiss. mend., the executor had not yet begun to execute it. But the grant holds good if given ex gratia (as a favour) and even, more probably, if granted in fomtd commiss mzd. In any case, the new pope is wont to re- view the decisions of the grandfather in the immediately preceding year by his predecessor and not yet availed of. (d) A conditional dispensation ceases on verification of the condition that renders it void, e. g. the death of the superior when the dispensation was granted with the clause ad beneplacitum nostrum (at our good pleasure). (e) A dispensation ceases by the absolute and total cessation of its motive causes, the dispensation thereupon ceasing to be legitimate. But the cessation of the influencing causes, or of a part of the motive causes, does not affect the dispensation. If the permitted expressly expressed, and substantially one, it is rightly held to cease with the disappearance of one of its essential elements.

II. Matrimonial Dispensations.—A matrimonial dispensation is the relaxation in a particular case of an impediment prohibiting or annulling a marriage. It may be granted: (a) in favour of a contemplated marriage, or to legitimize one already contracted; (b) in secret cases, or in public cases, or in both (see IMPEDMENTS OF MATRIMONY); (c) in foro interno only, or in foro externo (the latter includes also the former). Power of dispensing in foro internus is not always restricted to secret cases (casus occulti). These expressions, as stated above, are by no means identical. We shall classify the most important considerations in this very complex matter, under four heads: (1) general powers of dispensation; (2) particular inducements of dispensation; (3) causes for dispensations; (4) costs of dispensations.

(1) General Powers of Dispensation.—(A) The Pope.

—The pope cannot dispense from impediments found on Divine law—except, as above described, in the case of grave reasons, especially the non-consummated marriages, or valid and consummated marriage of neophytes before baptism (see NEOPHYTE). In doubtful cases, however, he may decide authoritatively as to the objective value of the doubt. In respect of impediments arising from ecclesiastical law the pope has full and absolute power to grant by him is valid, and when he acts from a sufficient motive it is also licit. He is not wont, however, out of consideration for the public welfare, to exercise this power personally, unless in very exceptional cases, where certain special impediments are in question. Such cases are error, violence, Holy orders, disparity of worship, public conjugicide, consanguinity in the direct line or in the first degree (equal) of the collateral line, and the first degree of affinity (from lawful intercourse) in the direct line. As a rule the pope exercises his power of dispensation directly through Roman Congregations and Tribunals.

Up to recent times the Dataria was the most important channel for matrimonial dispensations when the impediment was public or about to become public with certainty; and there cases (i. e. when the pope had exclusive control in foro externo over all impediments connected with or juridically bearing on matters of faith, e. g. disparity of worship, mista religio, Holy orders, etc.) The dispensing power in foro interno lay with the Penitentiary, and in the case of pauperes or paucares was in many cases that of the pope himself. The dispensing power over public impediments in foro externo. The Penitentiary held as pauperes for all countries outside of Italy those whose united capital, productive of a fixed revenue, did not exceed 5370 lire (about 1850 dollars); and that he could do so if
being ready a delay would be defamatory or would cause scandal; (3) when there is a serious doubt of fact as to the existence of an impediment; in this case the dispensation seems to hold good, even though in course of time the impediment is shown to be certain, and even public. In cases where the law is doubtful no dispensation is necessary; but the bishop may, if he thinks proper, declare authentically the existence and sufficiency of such doubt. (b) By virtue of a decree of the Congregation of the Inquisition or Holy Office (20 February, 1888) diocesan bishops and other ordinaries (especially vicars Apostolic, administrators Apostolic, and prefects Apostolic, having jurisdiction over an allocated territory, also vicars general in spiritualibus, and vicars capitular) may dispense in any urgent (praeternum) danger of death from all diriment impediments (secret or public) of ecclesiastical law, except priesthood and affinity (from lawful intercourse) in the direct line. However, they can use this privilege only in favour of persons actually living in real concubinage or united by a merely civil marriage, and only when there is no time for recourse to the Holy See. They may also legitimize the children of such unions, except those born of adultery or sacrilege. In the decree of 1888 it also included the impediment of clancularium, and the same decree (as already stated) dispensed, in the case of concubinage or civil marriage, with the presence of the priest and of the two witnesses required by the Decree "Ne temere" in urgent cases of marriage in extrema. Canonists do not agree as to whether bishops hold these faculties by virtue of their ordinary power or by general delegation of the law. It seems to us more probable that those just described under (a) belong to them as ordinaries, while those under (b) are delegated. They are, therefore, empowered to delegate the former; in order to subdelegate the latter they must be guided by the limits fixed by the decree of 1888 and its interpretation dated 9 June, 1889. That is, if it is a question of habitual delegation parish priests only should receive it, and only for cases where there is no time for recourse to the bishop.

Besides the fixed perpetual faculties, bishops also receive from the Holy See habitual temporary indults for a certain period of time or for a limited number of cases. These faculties are granted by fixed "formulae"; if the name of the Holy See occurs in them, or if the occasion requires it, makes some slight modifications. (See FACULTIES, CANONICAL.) These faculties call for a broad interpretation. Nevertheless it is well to bear in mind, when interpreting them, the actual legislation of the Congregation whenever they issue, so as not to extend them beyond the limits necessary, and to grant them except in the most urgent cases. Indulments laid down in a given indult. Faculties thus delegated to a bishop do not in any way restrict his ordinary faculties; nor (in se) do the faculties issued by one Congregation affect those granted by another. Wherever different faculties are granted to different ordinals, it may happen that the bishop, by an act of beneficord, may not be able to dispense from any of them. Even when the bishop has faculties for each impediment taken separately he cannot (unless he possesses the faculty known as de cumulo) use his various faculties simultaneously in a case where, all the impediments being public, one of them exceeds the bishop's powers, he may not dispense from any of them. Even when the bishop has faculties for each impediment taken separately he cannot (unless he possesses the faculty known as de cumulo) use his various faculties simultaneously in a case where, all the impediments being public, one of them exceeds the bishop's ordinary faculties. It is not necessary for a bishop to delegate his faculties to his vicar-general; since 1897 they are always granted to the bishop as ordinarius. Therefore the decree of the Holy Office (14 Dec., 1898) declares that for the future temporary faculties may be always subdelegated unless the indult expressly states the contrary. These faculties are valid from the date when they were granted, even if there is any serious doubt of fact as to the existence of an impediment, or not expire, as a rule, at the death of the pope nor of the bishop to whom they were given, but pass on to those who take his place (the vicar capitular, the administrator, or succeeding bishop). Faculties granted for a fixed period of time or for a limited number of cases, or when the period or number of cases has been reached; but while awaiting their renewal the bishop, unless culpably negligent, may continue to use them provisionally. A bishop can use his habitual faculties only in favour of his own subjects. The matrimonial discipline of the Decree "Ne temere" (2 Aug., 1907) contemplates as such all persons having a true canonical domicile, or continuously resident for one month within his territory, also vagi, or persons who have no domicile anywhere and can claim no continuous stay of any duration. All diriment impediments is common to both parties the bishop, in dispensing his own subject, dispenses also the other. (C) Vicars Capitular and Vicars-General.—A vicar capitular, or in his place a lawful administrator, enjoys all the dispensing powers possessed by the bishop in virtue of his ordinary jurisdiction or of delegation of the law; according to the actual discipline he enjoys even the habitual powers which had been granted the deceased bishop for a fixed period of time or for a limited number of cases, even if the indult in question had been obtained from the Holy See, and N. Considering the actual praxis of the Holy See, the same is true of particular indults (see below). The vicar-general has by virtue of his appointment all the ordinary powers of the bishop over prohibitive impediments, but requires a special mandate to give him common-law faculties for diriment impediments. As for habitual temporary faculties, since they are now addressed to the ordinary, they belong also ipso facto to the vicar-general while he holds that office. He can also use particular indults when they are addressed to the ordinary, and when they are not so addressed the bishop can always subdelegate him, unless the contrary be expressly stated in the indult.

(D) Parish Priests and Other Ecclesiastics.—A parish priest by common law can dispense only from an interdict laid on a marriage by him or by his predecessor. Some canonists of note accord him authority to dispense from secret impediments in what are called embarrasing (perplexes) cases, i.e. when there is no time for recourse to the bishop, but with the obligation of subsequent recourse ad cautelam, i.e. for greater security. This is formally ticked to him by a proper Congregation and addressed to confessor. This opinion seems yet gravely dubious, though the Penitentiaria continues to grant among its habitual faculties a special authority for such cases and restricts somewhat its use.

(2) Particular Indults of Dispensation.—When there is occasion of some number of cases in which the dispensation of the faculties is needed, or when there are special reasons for direct recourse to the Holy See, procedure is by way of supplica (petition) and private rescript. The supplica need not necessarily be drawn up by the petitioners, nor even signed by them; it does not, however, become valid until he accepts it. Although, since the Constitution "Sapiens," all the faithful may have direct recourse to the Congregations, the suppliaca is usually forwarded through the ordinary (of the person's birthplace, or domicile, or, since the Decree "Ne temere", residence of one of the petitioners), who transmits it to the proper Congregation either by letter or through his accredited agent; but if there is any question of sacramental secrecy, it is sent directly to the Penitentiaria, or handed to the bishop's agent (per curiam) or to a superior of the Penitentiaria. The suppliaca ought to give the name of the father (and Christian) of the petitioners (except in secret cases) as well as the name of the church, the place, the nature of the marriage, the consanguinity and affinity; their religion, at least
when one of them is not a Catholic; the nature, degree, and number of all impediments (if recourse is had to the Congregatio de Disciplinis Sacramentorum or other appropriate body); and, in a case in which the Congregatio de Disciplinis Sacramentorum or other competent body is not in existence at the same time in a secret one, it is necessary that the latter should know of the public impediment and that recourse has been had to the competent Congregation). The supplies must, moreover, contain the causes set forth for granting the dispensation and other circumstances impeded in the Propaganda Instruction of 9 May, 1877 (it is no longer necessary, either for the validity or licitity of the dispensation, to observe the paragraph relating to inaccessible intercourse, even when probably this thing had been overlooked), nor may, under the guise of granting the dispensation, when there is question of consanguinity in the second degree bordering on the first, the supplies ought to be written by the bishop's own hand. He ought also to sign the declaration of poverty made by the petitioners when the dispensation is sought from the Penitentiaris in formam commiss. mzdzd, i.e. they are entrusted to an executor who is thereby obliged to proceed to their execution, if he finds that the reasons are as alleged (sine sint exposita). Canoniasts are divided as to whether recourse should be had to the lists of the parties granted from the moment of their being sent off, or to be granted when the execution actually takes place. Gasparri holds it as received practice that it suffices if the reasons alleged are true at the moment when the petition is presented. It is not certain, however, that the executor required by the Penitentiary receipts may safely fulfil his mission even if the pope should die before he had begun to execute it. The executor named for public impediments is usually the ordinary who forwards the supplies and for secret impediments an appointed confessor chosen by the petitioner. Except when specially authorized the person delegated cannot validly execute a dispensation before he has seen the original of the rescript. Therein it is usually prescribed that the reasons given by the petitioners must be verified. This verification can only no longer a condition for valid execution, can be made, in the case of public impediments, extrajudicially or by subdelegation. In foro interno it can be made by the confessor in the very act of hearing the confessions of the parties. Should the inquiry discover that the reason alleged is erroneous, the rescript is invalid. The necessity of the case, the difficulty the latter experience in coming to her home; the hope of safeguarding the faith of a Catholic relation; the danger of a mixed marriage; the hope of converting a non-Catholic party; the keeping of property in a family; the preservation of an illustrious family; the fear of scandalous example; the influence and prestige of the parties; defamation to be avoided, or scandal pre-
DISPERSION

vented; intercourse already having taken place between the petitioners, or rape; the danger of a civil marriage; of marriage before a Protestant minister; revealed or displayed wedding vows; and, lastly, finally, all reasonable causes judged such in the opinion of the pope (e.g. the public good), or special reasonable causes actuating the petitioners and made known to the pope, i.e. motives which, owing to the social status of the petitioners, it is opportune should remain unexplained out of respect for their reputation. These various causes have been stated in their briefest terms. To reach their exact force, some acquaintance is necessary with the stultus curiae and the pertinent works of reputable authors, always avoiding anything like extraneous foreign laws. This list of causes in no means exhaustive; the Holy See, in granting a dispensation, will consider any weighty circumstances that render the dispensation really justifiable.

4) Costs of Dispensations.—The Council Trent (Sess. XXIV, cap. v, De ref. matrim.) decreed that dispensions should be free of all charges. Diocesan chanceries are bound to conform to this law (many pontifical documents, and at times clauses in indults, remind them of it) and neither to exact nor accept anything but an actus certior as contributed to the chancery expense sanctioned by an Instruction approved by Innocent XI (8 Oct., 1678), and known as the Innocentian Tax (Tassa Innocentiana). Rosset holds that it is also lawful, when the diocese is poor, to demand payment of the expenses it incurs for dispensions. Sometimes the Holy See grants ampliar freedom in this matter, but nearly always with the monition that all revenues from this source shall be employed for some good work, and not go to the diocesan curia as such. Henceforth every rescript requiring execution will state the sum which the diocesan curia is authorized to collect for its execution.

In the Roman Curia the expenses incurred by petitioners fall under four heads: (a) expenses of carriage (postage, etc.), also a fee to the accredited agent, when one has been employed. This fee is fixed by the Congregation in question; (b) a tax (tassa) to be used in defraying the expenses incurred by the Holy See in the organized administration of dispensations; (c) the componendum, or eleemosynary fine to be paid to the Congregation and applied by it to pious uses; (d) an alms imposed on the petitioners and to be distributed by themselves in good works. The moneys paid under the first two heads do not affect, strictly speaking, the gratuity of the dispensation. They constitute a just compensation for the expenses the petitioners occasion at the Curia. As to the componendum, besides the fact that they do not profit the pope nor the members of the Curia personally, but are employed in pious uses, they are justifiable, either as a fine for the faults which, as a rule, give occasion for the dispensation, or as a check to restrain a too great frequency of petitions often based on frivolous grounds. And if the Tridentine prohibition be still urged, it may be truly said that the pope has the right to abrogate the decree of councils, and is the best judge of the reasons that legitimize such abrogation. We may add that the custom of tax and componendum is neither uniform nor universal in the Roman Curia.

JULES BESSON.

Dispersion of the Apostles (Lat. Divisio Apostolorum), a feast in commemoration of the missionary work of the Twelve Apostles. It is celebrated as a double major on 15 July. The first vestige of this feast is found in the sequence composed for it by a certain Eunomius in the fourth century (d. 1098), who offers a prayer to the Haardt; he also introduced this feast at Aschen, when provost of the church of Our Lady. The sequence is authentic beyond doubt (G. M. Drees, Hymnographi Latini, L. 399, Leipzig, 1907; Idem, Hodgescalus Liturgicepars, ib., 1907). It is next mentioned by William Durandus, Bishop of Mende (Rationale Div. Off. 7.15), in the second half of the thirteenth century. Under the title, "Dimissio," "Dispersion," or "Divisio Apostolorum" it was universally celebrated in the northern countries of Europe, but was unknown during the Middle Ages in Spain and Italy. The object of the feast (so Hodgescalus) is to commemorate the departure (dispersion) of the Apostles from Jerusalem for the various parts of the world, some fourteen years after the Ascension of Christ. According to Durandus some of his contemporaries honoured this feast the (apopryphal) division of the relics (of St. Peter and St. Paul by St. Sylvester (Schulting, Bibl. eccl., 1591, 2, 2, 173 sqq.; M. Armellini, Chiese di Roma, 1891, 902 sqq.). The feast is now kept with solemnity by modern missionary societies, in Germany and England, also in mission dioceses, and in the United States by the ecclesiastical provinces of St. Louis, Chicago, Milwaukee, Dubuque, and Santa Fè.

Dispersion of the Jews. See Diaspora.

DISSEN, HEINRICH von, b. 18 Oct., 1415, at Osnabrück, in Westphalia; d. at Cologne, 26 Nov., 1484. After studying philosophy and theology at Cologne under Heinrich von Ortenheim (Gorkum), a celebrated divine of that time and vice-chancellor of the university, he became a monk in the Carthusian monastery of the same place, and took his solemn vows 14 Jan., 1437. He remained there all his life, which was a very laborious one, for he read much, copied many books, and both in the II. and especially in the III. century, had charge of the monastery, the books, etc. He composed a good many works. He was appointed subprior 23 March, 1457, and continued in that office until his death. His literary productions, all in Latin, comprise commentaries on the Psalms, on the Apocalypse, on the Cespils of Sunday readings, on the Creed of St. Athanasius, on the Lord's Prayer, and a great number of sermons and homilies, treatises, and devotional writings, such as "De Sacrdoti dignit"
tate"; "De multiplici bonorum verecundia"; "Quo pacto hereticum et fraudem debrepredi quiescat"; "Ex positio in totum Missale"; "Expositio in Archiepiscopii"; "Consolationes in Cantica Cantiorum"; "De XII manusibius", etc. It does not appear that any of these works have ever been printed.

Dissenters, Abbey of, a Benedictine monastery in the Canton Grisons in eastern Switzerland, dedicated to the Virgin Mary and the Blessed Virgin, and located in the Diocese of Chur, but Moshiil places the date two years earlier. The history of the abbey has been somewhat chequered, but it has at times risen to positions of great importance and influence. It was destroyed by the Avars in 670, when its abbots and monks suffered martyrdom, but was rebuilt by Charles Martel and Abbot Firmi- nius in 711. Charlemagne visited the abbey on his return journey from Rome in 800 and bestowed upon it many benefactions. Abbot Udalric I (831-1055) was a prelate of the highest rank, while Abbot Frits Schuller, who succeeded him in 1056, ranked in the empire, which dignity was subsequently held by several other of its abbots; many of them also became bishops of the neighbouring sees. In 1581 the abbey was honoured by a visit from St. Charles Borromeo. After suffering from the incursions of the pirates for a thousand years, it was incorporated into the newly formed Swiss Confederation in 1617, since which date it has, in common with the other five Benedictine abbeys of Switzerland, been subject to the jurisdiction of the president of that Confederation. In 1799 it was burned and plundered by the soldiers of Napoleon's army, who, when among other valuable treasures, a seventh century MS. chronicle of the abbey perished. The printing press that had been set up in 1729 was also destroyed at the same time, but much of the melted type and other metal was saved and from it were made the pipes of the organ of St. Martin's church at Dissenters, which is still in use. The abbey was rebuilt by Abbot Anselm Hunder, the last of its superiors to enjoy the rank and title of Prince of the Empire. During the nineteenth century the monastery suffered greatly from mismanagement of various kinds, and so great was the relaxation of discipline in consequence that its recovery was almost despaired of. Abbot Paul Birker came from his abbey of St. Boniface at Munich to assist in restoring regular observance, but so little success he made of his efforts that he left Dissenters in 1851 and returned to Munich as a simple monk. The abbey has, however, survived those evil times and is in a satisfactory and flourishing condition. Dom Benedict Prevost, the eightieth who has ruled over its fortunes, was abbot in 1908 of a community of between thirty and forty monks, who, among their other duties, served five public oratories and conducted successfully a gymnasium of nearly a hundred boys.

Dissidents in Poland. See Poland.

Dissertation (Lat. dissimulare, canonically termed distributiones quotidianae), are certain portions of the revenue of a church, distributed to the canons present at Divine service. There are many regulations concerning these distributions in the " Corpus Juris". The latest law on the subject is found in the decrees of the Council of Trent (Sess. XXII, cap. iii, De ref.), where it is ordained that bishops have power to set aside one-third of the revenues of officials and dignitaries of the cathedral and churches and convert this third into distributions for those who satisfy exactly their obligation of being personally present every day to the service to which they are bound. Canons retired on account of their age retain their right to the distributions, as do also capitulars who have received coadjutors, and supernumerary canons who are waiting a regular stall in the chapter. To earn these distributions it is necessary to chant the office in common, according to the custom of the particular church to which the beneficiary belongs. A mere corporal presence, however, without mental application to the services performed, will not entitle one in conscience to these emoluments.

Distich (Thietmar), bishop of Merseburg and medieval chronicler, b. 23 July, 975; d. 1 Dec., 1018. He was a son of Count Grabben, however, according to the common accepted teaching, do not rob prayer of its essential character. To be sure one must have had the intention to pray and therefore in the beginning some formal adverence; otherwise a man would not know what he was doing, and his prayer could not be described even as a human act. So long, however, as nothing is done outwardly which would be incompatible with any degree whatever of attention to the function of prayer, the lack of explicit mental application does not, so to speak, invalidate the prayer. In other words, it keeps its substantial value as prayer, although, of course, when the dissipation of thought is willful our addresses to the throne of mercy lose a great deal in efficacy and acceptability. This doctrine has an application, for example, in the case of those who are bound to recite a prayer at the time when they are esteemed to have fulfilled their obligation substantially even though their distractions have been abundant and absorbing. Voluntary distractions, that is the conscious deliberate surrender of the mind to thoughts foreign to prayers, are sinful because of the obvious irreverence for God with Whom at such times we are presuming to hold intercourse. The guilt, however, is judged to be venial. In the administration of the sacraments their validity cannot be assailed merely because the one who confers them has lost to, here and now, this thing that he has provided he the required intention and posite the essentials of the external right proper to each sacrament, no matter how taken over he may be by outside reflections, his act is distinctly a human one and as such its value cannot be impugned. Such a state of mind, however, when it is willful, is sinister, and not mortal unless one has thereby laid himself open to the danger of making a mistake in what is regarded as essential for the validity of the sacrament in question.

Joseph F. Delany.

Distributions (from Lat. distribuire), canonically termed distributiones quotidianae, are certain portions of the revenue of a church, distributed to the canons present at Divine service. There are many regulations concerning these distributions in the " Corpus Juris". The latest law on the subject is found in the decrees of the Council of Trent (Sess. XXII, cap. iii, De ref.), where it is ordained that bishops have power to set aside one-third of the revenues of officials and dignitaries of the cathedral and churches and convert this third into distributions for those who satisfy exactly their obligation of being personally present every day to the service to which they are bound. Distich (Thietmar), Bishop of Merseburg and medieval chronicler, b. 23 July, 975; d. 1 Dec., 1018. He was a son of Count Grabben, however, according to the common accepted teaching, do not rob prayer of its essential character. To be sure one must have had
diocese which had been almost ruined by Giseler, the second Bishop of Merseburg, in his unholy ambition to become Archbishop of Magdeburg in 981. At the same time he fearlessly defended the canonical liberty of ecclesiastical elections against the encroachments of the secular princes.

While Bishop of Merseburg he composed his famous chronicle "Chronicon Thietmari", which comprises in eight books the reigns of the Saxon Emperors Henry I (called the Fowler), the three Ottos, and Henry II (the Saint). The first three books, covering the reigns of Henry I and the first two Ottos, are largely based on previous chronicles, most of which are still extant; the fourth book, comprising the reign of Otto III, contains much original matter; while the remaining four books, which describe the reign of Henry II to the year 1018, are the independent narrative of Dithmar.

As councillor of the emperor and participant in many important political transactions, he was well equipped for writing a history of his times. The spirit of sincerity which pervades his chronicle is abundant compensation for the barbarous expressions which occasionally mar the literary style. The last four books, besides being the principal source for Saxon history during the reign of the holy emperor Henry II, contain valuable information, not to be found elsewhere, regarding the contemporary history and civilization of the Slavic tribes east of the river Elbe, and of the Hungarians and Magyars. Dithmar's original manuscript, with corrections and additions made by himself, is still preserved at Dresden.

A facsimile edition of it was prepared by L. Schmidt (Dresden, 1905). The chronicle was also published by Kursen in "Script. Rer. Germ." (Hannover, 1889), and by Lappenberg in "Mon. Germ. Hist.: Script." III, 733-871, whence it was reprinted in Migne, P. L., CXXXIX, 1183-1422. A German translation was made by Laurent (Berlin, 1848, and Leipzig, 1895).

MICHAEL OTT.

DIURNAL (hors diurne).—See HOURS.

DIVES (Latin for rich).—The word is not used in the Bible as a proper noun; but in the Middle Ages it came to be employed as the name of the rich man in the parable of the rich man and Lazarus, Luke, XVI, 19-31. It has often been thought that this in connection with the Christ's spoken of in the persons and events. The "House of Dives" is still pointed out in Jerusalem; but, of course, if such a house ever existed, it must have long since disappeared.

RENAUD in VIG., Diction. de la Bible, s. v. Lazar; Commentary on this passage of St. Luke.

W. S. REILLY.

Divination, the seeking after knowledge of future or hidden things by magic or means. Hence being inadequate they must, therefore, be supplemented by some power which is represented all through history as coming from gods or evil spirits. Hence the word divination has a sinister signification. As prophecy is the lawful knowledge of the future, divination, its superstitious counterpart, is the unlawful. As magic aims to do, divination aims to know. Divination is practically as old as the human race. It is found in every age and country, among the Egyptians, Chaldeans, Hindus, Romans, and Greeks; the tribes of Africa had the sangomas of Africa their maggars, the Celtic nations their druids, the aborigines of America their medicine-men—all recognized diviners and wizards. Everywhere divination flourished and nowhere, even to-day, is it completely neglected. Cicero's words were, and apparently always will be, true, that there is no nation, civilized or barbarian, which does not believe that there are signs of the future and persons who can interpret them. Cicero divided divination into natural and artificial. Natural (untaught, unskilled) includes dreams and oracles in which the diviner was a passive subject of inspiration. He obtained them from a power supposed to be then and there within him. Artificial (taught, studied) comprised all foretelling from signs found in nature or produced by man. Here the diviner was active, and the divination came apparently from his own invention. This division is almost the same as that given by St. Thomas with respect to the invocation of demons: divination with express invocation of spirits, embracing dreams, portents or prodigies, and necromancy, and divination with tacit invocation through signs and movements observed in objects in nature, such as stars, birds, figures, etc., or through signs and arrangements produced by man, such as molten lead poured in water, casting of lots etc. Dreams here mean those expressly prepared and prayed for with hope of some revelation; the fingers saying, "These are unusual and marvellous sights coming from the lower world. Here we are considering artificial divination.

METHODS.—The variety of divinatory methods is very great. Scarce an object is not sometimes employed for the purpose. Birds, beasts, the air or earth, in the air or water escaped being metamorphosed into a messenger of futurity. To add to these the inventions of man, and there is a glimpse of the immense entanglement of superstitions in which pagan people groped their way. They can, however, be grouped into three classes, as seen from St. Thomas's division. A detailed list has been given by Cicero, Clement of Alexandria in his "Stroma", and others of the Fathers. Under the first class, express invocation, come oneirocramy or divination by dreams; necromancy, by so-called apparitions of the dead or spirits; apparitions of various kinds, which may be either external or in imagination, as Cajetan observes; Pythonism or by possessed persons, as the Delphic Pythons; hydromancy, by signs in water; aeromancy, by signs in air; geomancy, by signs in terrestrial substances (geomancy has another meaning); aruspices, by signs in the entrails of sacrificial victims, etc. The second class, tacit invocation and signs found ready-made in nature, embraces judicial or genealogic astrology, pretending to tell the future through nature; stars, ages of the world, ages of history; signs of birds, and later covering prediction through their mode of acting, feeding, flying, and also the weighing of horses and meening of men, etc.—with us it comprises all foretelling by signs; omens, when chance words are turned into signs; chirodancy, when the shape of the hand is read; and many similar modes. The third class, tacit invocation and signs prepared by man, includes geomancy from points or lines on paper or pebbles thrown at random; drawing of straws; throwing dice; cutting cards; letting names and things be drawn, and so forth. The most that will, I will not"; opening a book at random, called "Sorciæ Virginæ", so much was the Æneid used in this fashion by the Romans; etc. This last transferred to the Bible is still common in Germany and elsewhere. Hypnotism is also used for purposes of divination.

History.—To attempt to trace the origin of divination is a waste of time, since like religion it is universal and indigenous in one form or another. Some nations cultivated it to a higher degree than others, and their influence caused certain modes of divination to spread. Such, for instance, among the Chaldeans, the Egyptians, the Chinese, the Mexicans, the Indians of America, the Indians of Africa their maggars, the Celtic nations their druids, the aborigines of America their medicine-men—all recognized diviners and wizards. On the whole, divination flourished and nowhere, even to-day, is it completely neglected. Cicero's words were, and apparently always will be, true, that there is no nation, civilized or barbarian, which does not believe that there are signs of the future and persons who can interpret them. Cicero divided divination into natural and artificial. Natural (untaught, unskilled) includes dreams and oracles in which the diviner was a passive subject of inspiration. He obtained them from a power supposed to be then and there within him. Artificial (taught, studied) comprised all foretelling from signs found in nature or produced by man. Here the diviner was active, and the divination came apparently from his own invention. This division is almost the same as that given by St. Thomas with respect to the invocation of demons: divination with express invocation of spirits, embracing dreams, portents or prodigies, and necromancy, and divination with tacit invocation through signs and movements observed in objects in nature, such as stars, birds, figures, etc., or through signs and arrangements produced by man, such as molten lead poured in water, casting of lots etc. Dreams here mean those expressly prepared and prayed for with hope of some revelation; the fingers saying, "These are unusual and marvellous sights coming from the lower world. Here we are considering artificial divination.

METHODS.—The variety of divinatory methods is very great. Scarce an object is not sometimes employed for the purpose. Birds, beasts, the air or earth, in the air or water escaped being metamorphosed into a messenger of futurity. To add to these the inventions of man, and there is a glimpse of the immense entanglement of superstitions in which pagan people groped their way. They can, however, be grouped into three classes, as seen from St. Thomas's division. A detailed list has been given by Cicero, Clement of Alexandria in his "Stroma", and others of the Fathers. Under the first class, express invocation, come oneirocramy or divination by dreams; necromancy, by so-called apparitions of the dead or spirits; apparitions of various kinds, which may be either external or in imagination, as Cajetan observes; Pythonism or by possessed persons, as the Delphic Pythons; hydromancy, by signs in water; aeromancy, by signs in air; geomancy, by signs in terrestrial substances (geomancy has another meaning); aruspices, by signs in the entrails of sacrificial victims, etc. The second class, tacit invocation and signs found ready-made in nature, embraces judicial or genealogic astrology, pretending to tell the future through nature; stars, ages of the world, ages of history; signs of birds, and later covering prediction through their mode of acting, feeding, flying, and also the weighing of horses and meening of men, etc.—with us it comprises all foretelling by signs; omens, when chance words are turned into signs; chirodancy, when the shape of the hand is read; and many similar modes. The third class, tacit invocation and signs prepared by man, includes geomancy from points or lines on paper or pebbles thrown at random; drawing of straws; throwing dice; cutting cards; letting names and things be drawn, and so forth. The most
DIVINATION

in the development of divination, especially in connexion with celestial phenomena, is attributed to the Chaldeans, a vague term embracing here both Babylonians and Assyrians. In Greece from the earliest historical times are found diviners, some of whose methods came from Asia and from the Egyptians, a people famous for their skill in divination. Greeks of the Hellenic own, their intercourse with Greece introduced new forms, and principally through these two nations they spread in the South and West of Europe. Before Christianity divination was practised everywhere according to rites mentioned in the Scriptures. In early days priest and diviner were one, and their power was very great. In Egypt the pharaoh was generally a priest; in fact, he had to be initiated into all the secrets of the sacerdotal class, and in Babylonia and Assyria almost every movement of the monarch and his courtiers was regulated by forecasts of the official diviners and astrologers. The cuneiform inscriptions and the papyri are filled with magical formulæ. Witness the two treaties, one on terrestrial and the other on celestial phenomena, compiled by Sargon several centuries before Christ. Necromancers, whose services were paid to aerial signs, the diviners were held in high esteem and assisted at the public assemblies. The Romans, who placed most reliance in divination by sacrifices, had official colleges of augurs and aruspices who by an adverse word could postpone the most important business. No law was enacted without consulting the gods, and at critical moments the most trifling occurrence, a sneeze or a cough, would be invested with meaning. Alongside all this official divining there were practised secret rites by all kinds of wizards, magicians, wise men, and witches. Chaldean soothsayers and strolling sibyls spread everywhere telling fortunes for gain. Between the regulars and the irregulars there was a very bitter feeling, and as the latter often invoked gods or demons regarded as hostile to the gods of the country, they were regarded as illicit and dangerous and were often punished and prohibited from exercising their art. From time to time in various countries the number and influence of the regular diviners were diminished on account of their pride and oppression, and no doubt at times they in turn may have adversely mitigated the tyranny of rulers. With an increase of knowledge the fear and respect of the cultivated people for their mysterious powers so decreased that their authority suffered greatly and they became objects of contempt and satire. Cicero says: "Directions are no longer so much in regard to the past as the present; Horace and Juvenal launched many a keen arrow at diviners and their dupes, and Cato's saying is well known, that he wondered how two augurs could meet without laughing at each other. Rulers, however, retained them and honoured them panditly, the better to keep the people in subjection, and outside classical lands, workers of magic still held sway.

Wherever Christianity went divination lost most of its old-time power, and one form, the natural, ceased almost completely. Divination by means of fates and omens, and after some centuries it disappeared as an official system though it continued to have many adherents. The Fathers of the Church were its vigorous opponents. The tenets of Gnosticism gave it some strength, and neo-Platonism won it many followers. Within the Church itself it proved so strong and attractive to her new converts that synods forbade it and councils legislated against it. The Council of Ancyra (c. xxiv) in 314 decreed five years penance to consulters of diviners, and that of Laodicea (c. xxxvi), about 360, forbade cures. "Some magicians or to make an augur," to quote those who would be driven out of the Church. A canon (xxxvi) of Orleans (511) excommunicates those who practised divination, auguries, or lots falsely called Sortes Sanctorum (Bibliorum), i.e., deciding one's future conduct by the first passage found on opening a Bible. This method was evidently a great favourite, as a synod of Vannes (c. xvi) in 461 had forbidden it to clerics under pain of excommunication, and that of Agde (c. xliii) in 506 condemned it as against piety and faith. Sixtus IV, Sixtus V, and the Fifth Council of Lateran likewise condemned it. Government have always used divination, but the practice of it and the penalty of death for diviners. The authorities may have feared that some would be prophets might endeavour to fulfill forcibly their predictions about the death of sovereigns. When the fear of the North, which swept over the old Roman Empire, entered the Church, it was only to be expected that some of their lesser superstitions should survive. All during the so-called Dark Ages divining arts managed to live in secret, but after the Crusades they were followed more openly. At the time of the Renaissance and again preceding the French Revolution, there was a marked growth of noxious methods. The latter part of the nineteenth century witnessed a strange revival, especially in the United States and England, of all sorts of superstitions. Whether there is a basis of truth in these, the only sure way of establishing the number of persons who believe in signs and seek to know the future is much greater than appears on the surface. They abound in communities where dogmatic Christianity is weak.

The natural cause of the rise of divination is not hard to discover. There was a natural curiosity to know the future, and coupled with this is the desire of personal gain or advantage; some have essayed, therefore, in every age to lift the veil, at least partially. These attempts have at times produced results which cannot be explained on merely natural grounds, they are so disproportionate or foreign to the means employed. They cannot be regarded as the direct work of God nor as the effect of any purely material cause; hence they must be attributed to created spirits, and since they are inconsistent with what we know of God, the spirits causing them must be evil. To put the question directly: can man know future events? Let St. Thomas answer: Substance: Future things can be known either in their causes or in themselves. Some causes always and necessarily produce their effects, and these effects can be foretold with certainty, as astronomers announce eclipses. Other causes bring forth their effects not always and necessarily, but they generally do so, and these can be foretold as well-founded conjectures or sound inferences, like a physician's diagnosis or a diviner's prophecy. But a third class of causes whose effects depend upon what we call chance or upon man's free will, and these cannot be foretold from their causes. We can only see them in themselves when they are actually present to our eyes. Only God alone, to whom all things are present in His eternity, can see them before they occur. Hence we read in Isaiah (xli, 23), "Shew the things that are to come hereafter, and we shall know that ye are gods." Spirits can know better than men the effects to come from the second class of causes due to human free will. Hence divers and soothsayers can have second guesses, and sometimes they may even be right. The advantage in these cases is due to the limitations of our knowledge. The multiplicity and complexity of causes prevent us from following their effects. Future contingent things, the effects of the third class, spirits cannot, for certain exceptions, affect the future. They may even be conjecture about them because of their wide knowledge of human nature, their long experience, and their judgments based upon our thoughts as revealed to them by our words, countenances, or acts. Unless we wish to deny the value of
human testimony, it cannot be doubted that diviners foretold some contingent things correctly and magicians produced at times superhuman effects. The very survival of divination for so many centuries will be of more interest than any role in history, as an insoluble problem. On religious grounds, to say that divination and kindred arts were complete impositions would be to contradict Scripture. In it we read laws forbidding magic, we have facts like the deeds of Jannes and Jambres before Pharaoh, and we have a divination of God of going, it is impossible that a sign or wonder be foretold by false prophets and to come to pass (Deut. xiii, 1-12). But, except when God gave them knowledge, their ignorance of the future resulted in the well-known ambiguity of the oracle.

Attempts to give artificial divination a merely natural basis have not succeeded. Chrysippus (De Divinatione, ii, 63) spoke about a power in man to recognize and interpret signs, and Plutarch (De Oraclulis) wrote on the special qualifications an augur should have and the nature of the signs; but a prenaturale influence was recognized in the end. Some modes may have been natural in their origin, especially when necessary causes were concerned, and many a prediction made without occult intervention, but these must have been non-operatively represented, always the seer, generally believed in supernatural assistance. That some analogy may be traced between an eagle and victory, an owl and sadness—though to the Athenians a welcome omen—and that to lose a tooth is to lose a friend, may readily be admitted, but to try to connect these with future contingent events would be to reason badly from a very slight analogy, just as to stab an image, to injure the person it represents, would be to mistake an ideal connexion for a real one. Human instinct demanded a stronger foundation than found it in the belief in an intervention of some supernatural agency. Reason demands the same. A corporeal sign is either an effect of the same cause of which it is a sign, as smoke of fire, or it proceeds from the same cause as the effect which it signifies, as the falling of the barometer foretells rain, i.e., the change in the instrument and the change in the weather come from the same cause. Man’s future actions and signs in nature stand in no such relation. The sign is not an effect of his future act; neither does the sign and his act proceed from the same cause. The other kinds of signs, while they are supposed to have been overtaken over and over again in the same manner, they are usually said to have been foreseen, or rather the present seer of the "familiar spirits".

Theological Aspect.—From a theological standpoint divination supposes the existence of devils who have great natural powers and who, actuated by jealousy of man and hatred of God, ever seek to lessen His glory and to draw man into perdition, or at least to obscure Him, bodily, mentally, and spiritually. Divination is not, as we have seen, foretelling what comes from necessity or what generally happens, or from spirits expected (see ANIMISM). Every event, as a matter of fact, divination and sacrifice were so closely connected that no strict line could have been drawn in practice between divination with and without express invocation of gods or demons. The client came to offer sacrifice, and the priest, the diviner, tried to answer all his questions, while the private wizards boasted of their "familiar spirits".

DIVINATION IN THE BIBLE.—The Hebrews coming from Egypt, a land teeming with diviners, and dwelling in a country surrounded by superstitious tribes that had always been familiar with their diviners, was intensified by the spirit of the times and their environment; but God forbade them repeatedly to have anything to do with charmers, wizards, diviners, necromancers, etc., all of whom were abomination in His sight (Deut. xvii, 12). The ideal was in Balak’s day when "there is no soothsaying in Jacob nor divination in Israel" (Num. xxiii, 23), and to preserve this, the soul that went aside after diviners God declared He would destroy (Lev. xx, 6), and the man or woman in whom there was a divining spirit was to be stoned to death (Lev. xx, 27). God, however, as St. Chrysostom puts it, humoured the Hebrews like children, and to preserve them from excessive temptation, lots were allowed under certain conditions (Jos. vii, 14; Num. xxvi, 53; Prov. xvi, 33, and in N. T. great reliance also, besides revel. verbs of divination). The scripture in Deut. xxxii, 32, 33, 34, 35, is a true word: "I will move the Jews away from their own land, and they will seek me and find me when they are in distress, and I will make myself known to them in those days." Prophecy might be consulted on private affairs (I K., ix, 6), and the high priest could respond in greater matters by the Urim and Thummim. Gifts were offered to seers and prophets when consulted, but the greatest prosperity was as God’s representatives (IV K., v, 20). When the
Hebrews fell into idolatry, divination, which always accompanied idolatry, revived and flourished, but all during their history it is evident that secretly and again more openly wrongful arts were used, and as a result condemning were frequent (1 K., xvi, 22; I xvi, 7). It is evident that the Talmud shows the downward tendency. The various methods of divination and kinds of diviners are not always clearly distinguished in Scripture, the Hebrew words being differently interpreted and sometimes merely synonymous. The following list is based mainly upon Lesèvre's article in Vigouroux's B.D.D. (1): 1. Divination by consulting the Teraphim (תֵּרָפֶּם), or small household gods of which we first read in the time of Abraham and Laban (Gen., xxi, 19). How they were consulted is not known. It was apparently a Chaldean form, as Laban came from that country. They sometimes dealt with them in the temple and elsewhere. They sometimes deceived their inquirers (Zech., x, 2). 2. The Ḥarmamim (חָרָםָם), a name translated by "interpreters" (Vulg. coniunctores) in the Douay version, xlii, 8, but elsewhere (Dan., ii, 2) by "diviners" (Vulg. ariol) and other names, especially "Chaldeans". 3. The Hakamim (חָקָם) are the wise men (Vulg. sacerdotes) of the Bible (Gen., xlii, 8), a name given to those skilled in divination in Egypt, Idumea (Abd., vii, 8), Persia (Esth., i, 13), and Babylon (Jer., i, 35). 4. Qēdēm or Maqām (קְדֵה, מַכְוָּמָה) designated divinators in general and is always used in the Scripture in a bad sense except in Prov., xvii, 10. By it the witch of Endor raised up the dead Samuel (I K., xxvi, 8). "The king of Babylon stood in the highway, at the head of two ways, seeking divination [qēdēm], shuffling arrows; he inquired of the idols [teraphim], and consulted enthralls" (Ezech., xxii, 21). The arrows bore the signs or names of towns, and the word shebbeh (בְּשֶׁבָּה) was a Babylonian mode. The Arabs practised it so: three arrows were prepared and the first inscribed "The Lord wills it", the second "The Lord wills it not", and the third was blank. If the blank came a new drawing followed until an inscribed arrow was taken. The last method mentioned in text quoted was aspuary (Vulg. exta consulae). 5. Nabāḏ (נַבָד) is soothsaying (Vulg. augurium) in the Bible (Num., xxiii, 23). The precise method signified by it is in dispute. The versions make it equivalent to interpretation by the flight of birds, but this mode, so common among the Greeks and Romans, was apparently not used by the Hebrews except towards the time of Christ. From its derivation, as commonly accepted, it would mean divination by serpents, ophismancy, but on the other hand it is never in this sense in the Scriptures. Baalism's divination by animal sacrifices is so termed (Num., xxiv, 1) and also Joseph's (Gen., xlv, 5, 15) which remains a vexed question in spite of Calmet's triumphant solution (Dict. of the Bible, III, p. 30) except the reason of the oblique expression (hummelauer, Com. in Gen., p. 561). 6. Mokhāḵēḵ (מֹכְחָקֶךָ) is the magician (Vulg. maleficus) in Ex., vii, 11, and the wizard in Deut., xviii, 10, who not only seeks the secrets of the future but works wonders. St. Paul mentions two of their leaders, Jannes and Mambres, and their modes are styled sorceries (Vulg. vénéficia) in IV K., ix, 22 and (Vulg. maleficia) Micheas, v, 11. 7. The word 'ōḇh (אֹבוּ) signifies the spirit called and the person calling him, the necromancer. In Deut., xviii, 11, it is expressly forbidden "seeking the spirits from the dead" (the best known case is that of the witch of Endor) and elsewhere by Pythians (Is., viii, 19), divining spirits (I K., xxviii, 7). The Septuagint translates the words by "ventriculo qui" because when the necromancers failed or wished to deceive the people they muttered at it and trampled under the ground as though spirits so spoke; it recalls Shakespeare's "squeak and gibber". (Cf. Is., xxix, 4.) A bottle or skin waterbag is 'ōḇh; the use of the word here may come from the diviner containing the spirit or being inflamed by it. 8. The Vadde 'onim (בְּדֵדֶה אֹןִיִּים) were diviners whom we generally find connected with necromancers, and the two terms are perhaps practically synonymous (1 K., xxviii, 3; 4 K., xxi, 6, etc.). 9. Divining by Me'ōmēn (מִעֹמָן) included apparently many methods: divination by chance words, such as Abraham's: "You shall find sustenance for your life in Gen., xxi, 14; I K., xiv, 9; III K., xx, 33; auguries (Is., xi, 6); observers of dreams (Deut., xviii, 10), etc. There were also modes by charming serpents (Jer., vii, 17, astrology (Is., xlvii, 13), and by consulting the Ephod (1 K., xxii, 9). In the N. T. diviners are not specifically mentioned except in Acts, xvi, 16, concerning the girl who had a pytho nical spirit; but it is altogether likely that Simon Magus (Acts, viii, 9), Elymas (Acts, xii, 6, and others (II Tim., iii, 13), including the possessors of the magical books burnt at Ephesus (Acts, xix, 19), practised divination and that it is included in the wonders by which Antichrist will seduce many (Apoc., xiii, 20). Under the New Law all divination is forbidden to be practised, because, placed on a higher plane than under the Old Dispensation, we are taught not to seek the morrow (Matt., vi, 34), but to trust Him perfectly. Who numbers the very hairs of our heads (Matt., x, 30). In divination, apart from the fraud of the Father of Lies, there was much merely human fraud and endless deception; the predictions were generally as vague as was possible as modern fortune-telling, and the general result then as now favoured vice and in jured virtue. Divine Charity, Society of (Societas Divinae Chastitatis), founded at Maria-Mentana near Kaisers- ezech, in 1903, by Joseph Tillmanns for the solution of the social question through the pursuit of agriculture and trades (printing, etc.) as well as by means of intellectual pursuits. The society consists of both priests and laymen.

TILLMANNS und OECDEN, Die wahre Lösung der sozialen Frage (Mentana, 1905).

Sisters of Divine Charity, founded at Besançon in 1799, by a Vincentian Sister, and modelled on the Sisters of Mercy of St. Vincent de Paul. The motherhouse, originally at Naples, is now in Rome, and there are many filial establishments in Italy, in Malta, and
Usso. The sisters have charge of educational institutions, orphanages, hospitals, and insane asylums.

Daughters of Divine Charity, founded at Vienna, 21 November, 1888, by Franziska Lechner (d. 1894) on the Rule of St. Augustine, and approved by the Holy See in 1884 and definitively confirmed 22 July, 1891. The purpose of the congregation is to found schools for girls without positions, shelter, care and the means of obtaining a position, without compensation, likewise to care for servants no longer able to work. The sisters are also engaged in schools, orphan asylums, and kindergartens. The novitiate and novitiate are at Vienna; the congregation has 38 filial houses, 776 sisters, and 59 postulants.

F. M. RUDGE.

Divine Compassion, Institute of the, founded in the City of New York, U. S. A., by the Rt. Rev. Thomas Stanislaus Preston. On 8 September, 1869, Father Preston began a semi-weekly gathering of the poor and abject children of the streets in one of the most wretched quarters of the city; after this came the opening of a house for the reformation of young girls not yet hardened in vice, and the preservation of children and older girls from the moral danger in which they lived. The founder called it the House of the Holy Family and became its spiritual director. The work was fostered by many prominent Catholic ladies of New York under the name of The Association for Boarding and Young Folks. Foremost among these ladies was Mrs. Mary C. D. Starr (in religion Mother Veronica; d. at White Plains, 9 Aug., 1904), who became the president of the association and devoted all her time and energies to this work of charity under the direction of Father Preston. Seeing the necessity of a religious community which should be trained to this work and perpetuate it, Father Preston compiled a rule of life for those who desired to devote their lives to it. The first draft was written 5 September, 1873, and was observed in its elemental form until 1886, when it was elaborated and obtained the formal approbation of the Archibishop of New York. The constitutions, which are an enlargement of the rule, and represent the norm of living in the institute, were written gradually, as it developed, and reached their completion in 1899. On the 28th of September, 1900, the rule and constitutions received the express canonical approbation of Archbishop Corrigan of New York. The object of the institute is (1) the reformation of erring girls; (2) the training, religious, mental, and moral, of the girls, and securing them from ignorance, indolence, or waywardness, or dangerous influences. The institute is composed of two classes, choir sisters and little (or lay) sisters. In addition to the House of the Holy Family the sisters are in charge of a training school for girls at White Plains, and a working-girls' home in New York City. The institute comprises about 40 sisters in charge of 215 girls.

Divine Office. See Office.

Divine Providence, Sisters of.—I. Sisters of Divine Providence of St. Vincent de Paul, founded at Molaise, in the Diocese of Strasbourg, by Vicar Ludwig Kremp (1783). After the Revolution the community was disbanded and, in 1807, received both ecclesiastical and civil approbation, the former from the Archbishop of Strasbourg, the latter from Napoleon I. In 1819 the mother-house was definitely located at Rappoltsweiler, and in 1839 the institute received papal confirmation. The congregation has members over 1500 of the sisters teach in 357 primary schools of Alsace. The sisters have over 44,000 children under instruction; they conduct boarding and day schools, orphan asylums, reformatories, a housekeeping school, a high school for girls, and a "leaf and dust institute." Attached to the novitiate are a teacher's seminary and practice school.

II. The Society of Divine Providence, founded, in 1842, at St. Mauritius near Müsten by Eduard Michelis, chaplain and private secretary to Archbishop Droste zu Vischoering of Cologne. He shared the immense comfort and success with which the congregation was founded with St. Mauritius, where, with the help of two other priests, he founded an orphan asylum. He selected several teachers whom he sent to the Sisters of Divine Providence at Rappoltsweiler to be trained in the religious life. The rule followed there was adopted with a few alterations by the new community and received episcopal approbation. The congregation took as its special work the care of poor, neglected, and orphaned children, as well as teaching in general. In 1878 the work of the sisters was interrupted by the Kulturkampf, and they were forced to take refuge at Steyl, Holland. In 1887, when they resumed their work in Germany, the mother-house was removed to Friedrichshurg near Müsten, where a boarding and a trade school were opened. In the city of Müsten the sisters have charge of the care of the poor and charitable, of five episcopal institutions, and in the city and diocese they conduct boarding schools, orphan asylums, proctors, trade schools, elementary schools, Sunday schools, a working-women's home (Rheine), and a Magdalen asylum (at Marienberg). In Bremen they conduct an oratory, a secondary school, and an orphanage. This congregation has 50 branch houses in Germany, and 14 in Holland, among the latter the convent of St. Joseph at Steyl, that of Maria-Roepaan at Oterum, and of St. Aloysius at Kessel. In 1895 a colony of sisters went to Brazil, where they now have six institutions. The congregation numbers (1906) 1115 members.

F. M. RUDGE.

III. Sisters of Divine Providence, founded at Finthen near Mains (whence they are sometimes called the Finthen Sisters) in 1851 by Bishop Wilhelm Emmanuel Freiherr von Ketteler. The first superior was sent to the Sisters of Divine Providence at Ribeauville, Alsace, to be formed in the religious life, and the rule followed there was made the basis of the new institute, which later received the papal approbation. The congregation was founded primarily for the work of teaching and for the care of the sick so far as consonant with their duties as teachers. The right of corporation was not obtained until 1858, but as early as 1856 the Finthen Sisters had charge of the community in Neustadt. At the time of the Kulturkampf they had 24 foundations in the Grand Duchy of Hesse. When they were allowed to resume their activities they devoted themselves less to purely educational work and took charge of hospitals, children's asylums, homes for girls, industrial and housekeeping schools, orphan asylums, servants' homes, endowed infirmaries, and almshouses. Connected with the mother-house at Mains are 76 branch houses with 730 members, 70 in the Diocese of Mainz, and 6 in that of Limburg. In Mainz the sisters conduct a boarding, technical, and housekeeping and trade courses. At Oberursel they direct the Johannesstift for abandoned children founded by Johannes Janssen. Wherever these sisters have houses they care for the sick in their homes.

IV. Sisters of Divine Providence, mother-house at Pittsburg, Pennsylvania, U. S. A., founded in 1876 by six sisters from Mains (see III), who were later joined by other sisters from Mains. The congregation now numbers about 200, in charge of 29 schools in the Diocese of Pittsburg, one in the Wheeling, and 2 in the Columbus, Diocese.

Sister M. Theresa.

Divine Providence, Congregation of the Sisters of, founded in Lorraine, 1762, by the Venerable Jean-Matin Moyer (b. 1730; d. 1783), priest of the
Diocese of Metz, afterwards missionary to China, for "the propagation of the faith, the ensuring of a Christian education to children, especially those of the rural population, for the care of the sick, and other good works approved by Bishop de Lorme in 1762, and recommended to the solicitude of his clergy, within six years the congregation had exceeded the limits of his diocese and planted itself on the banks of the Vosges. Marie Morel was the first superior. Suppressed in 1792, the congregation was re-established after the Revolution; in 1816 the Rules and Constitutions were formally approved by Louis XVIII. The mother-house general is at St-Jean-de-Bassel, in the Diocese of Metz, Lorraine, with establishments in Lorraine, Alsace, Belgium, and the United States. About 500 sisters in the Diocese of Metz, and 300 in the Diocese of Strasbourg, who direct schools, boarding schools, industrial schools, domestic economy institutes, hospitals, etc. At St-Jean-de-Bassel there is a normal institute devoted exclusively to training of the young teachers of the congregation, generally 185 in number, and connected with this institute is a model school, all under the supervision of the educational boards of the German Imperial Government. In Belgium there are about 100 sisters. At Peccq, near Tournai, they direct a normal school as Father Jordan, Bishop of Cambrai, where they have charges of schools and kindergartens.

Archives and Unpublished Annals of Congregation, Directoire des missions de la Provence (St-Germain-en-Laye, 1838); Whyland, Une Ëme apostolique (Mets, 1901); Marchal, Vie de M. l'Abbé Moye (Paris, 1872).

Sisters of Divine Providence, of Kentucky, incorporated American provincial house at Mt. St. Martin's convent, Newport, Kentucky. Mother Anna Hounlé, superior general (d. 1903) of the congregation succeeded in placing the Sisters of St-Jean-de-Bassel in the hands of the bishop of Covington, Bishop Moïe, longing to see them labour for the Christian education of youth in America, where she rightly judged the labourers to be few. In 1888 Bishop Maes of Covington, Kentucky, visited the mother-house general at St-Jean-de-Basel, and arranged to have the sisters introduced into his diocese. Accordingly, in August, 1889, three sisters arrived in Covington and took up residence in one of the historical mansions of northern Kentucky, now known as Mt. St. Martin's convent. The growth of the American mission work in Bruxelles, a new branch of St. Martin's, was encouraged by Bishop Moïe, whose death in 1900 left the congregation without a superior general, and the work was continued by the sisters. In October, 1908, a considerable estate was acquired at Melbourne, Kentucky, the site of a new St. Ann's Convent, where it is designed to erect the new provincial house. Mother Anna visited the American province in 1892. There are 215 sisters; until 1903 occasional small colonies were added from the mother-house general; about one-third of the subjects are American. At Mt. St. Martin's convent are the novitiate and normal school for the province. Teaching is the primary object of the sisters. They conduct an academy and many parish schools, an infant asylum, a home for French emigrant and working girls, and a home for the aged. The sisters are working in the dioceses of Covington, Providence, and Cleveland, and the archdioceses of New York, Baltimore, and Cincinnati. Sister M. CAMILLUS.

VI. SISTERS OF DIVINE PROVIDENCE, founded at Castrovilla, Texas, U. S. A., 1868, by Sister St. Andrew from the mother-house at St-Jean-de-Bassel, Lorraine, at the instance of Bishop Dubuis of Galveston. In 1896 the mother-house moved to San Antonio. The Constitutions were approved by Pope Leo X, 28 May, 1907. The sisters have charge (1908) of 67 schools and academies in Texas, Louisiana, and Oklahoma. Mother Mary FLORENCE.

VII. SISTERS OF DIVINE PROVIDENCE OF ST. ANDREW, founded at Hambourg-la-Porteuse, in 1896, by Father Anton Gapp, "for the Christian instruction of children in the primary schools and higher schools for girls". The congregation received the authorization of the French Government in 1826, and the mother-house was established at Forbach, Lorraine, but in 1830 it was removed to Feltre. Decrees by the flames which swept the whole district, it was rebuilt after the close of the Franco-Prussian War. The congregation has now in Lorraine 138 institutions, among them 7 higher schools for girls, 20 trade and several housekeeping schools, and 9 hospitals. In Belgium they have 35 foundations. There are altogether 900 sisters, who teach 17,000 children in Lorraine and 4000 in Belgium. Heinhauser, Die Orden und Konegemuetzung (Paderborn, 1908, III; Issow in Kirchenkreis, s. v. Versuchung.

Divine Redeemer, Daughters of the, mother-house at Oedenburg, Hungary; founded in 1863 from the Daughters of the Divine Saviour of Vienna. This congregation has 37 filial houses and 30 sisters, who conduct schools of all kinds and care for the sick.

Divine Saviour, Society of the, founded at Rome, 8 Dec., 1881, by Johann Baptist Jordan (b. 1848 at Gatwilli in Breisgau), elected superior general 1866, and abbe as Father Joseph, Bishop of Paderborn. The name of the congregation was changed in 1871 to that of Divine Saviour, Society of Catholic Instruction, was changed some years after its foundation to the present title. The first papal approbation was granted in the "Decretum laudabiliter" of 27 May, 1905. The foundress imposed on his congregation, in addition to the vows of poverty, chastity, and obedience, a fourth of apostolic mission work. The rules and constitutions are based largely on those of the Society of Jesus. The habit is black with a black cincture, in which four knots are tied to remind the wearer of his four vows. In tropical countries the habit is worn on the shoulders. On 13 Dec., 1899, the newly erected Prefecture Apostolic of Assam was placed in charge of the society, which has now 7 principal and 32 dependent stations, served by 13 missionaries, aided by 12 native catechists. The Fathers have published many books in the Khasi dialect, and since September, 1906, a periodical, "Ka ing Khristan". At Locchau, near Bregens, a German college was established 15 Sept., 1893; in the same year a station was founded at Corvallis, Oregon, U. S. A.; in 1896 several members began work in Bengal; in 1898 the mission was extended to Fiji, being given in thirteen languages from the various centres. The Salvatorians have establishments in Italy, Sicily, Austria, Poland, Moravia, Galicia, Hungary, Germany, Switzerland, Belgium, England, the United States, Brazil, and Columbia. The congregation numbers 400 members, 175 priests, the rest scholastics, lay brothers, and novices, in 35 foundations, of which 28 are Marian Colleges and 7 mission centres. Among the periodicals issued by the society, in addition to the Apostel-Kalender (in German and Hungarian), are the "Yunus Romanus", "Il Missioneario" (in German "Der Missionar"), since 1907 "Illustrirte Monatshefte für christl. Haus"; also in Polish, "L'amico dei fanciulli" (in German "Manna für Kinder"; also in Polish), and the "Salvatorianische Mitteilungen" (German and Polish), containing reports of the work of the society. Connected with the society are a Third Order for lay men and women; the "Academica literaturam", the members of which cooperate with the fathers in the advancement of Catholic knowledge and literature; the Angel Sodality, founded 8 Dec., 1882, for children under the aged, which has as its organ "L'amico dei fanciulli", and a membership of 40,000.

Sisters of the Divine Saviour, founded 8 Dec., 1888, by Father Jordan, to supplement the work of the Salvatorian Fathers, and placed under the Third Rule of St. Francis. The mother-house is in Rome and
there are stations in Amman (where the sisters conduct 6 orphan asylums), Austria, Hungary, Belgium, Switzerland, Italy, Sicily, British Burns, and in the United States. They conduct orphan asylums, kindergartens, and schools, and visit the sick in their homes. The congregation numbers about 200.

**DAUGHTERS OF THE DIVINE SAVIOUR**, mother-house at Vienna, a branch of the Niederbrunn Sisters of the Most Holy Saviour, established 1857. The congregation has over 1200 sisters, choir and lay, who care for the sick in hospitals and in their own homes, and conduct schools for girls, primary and grammar schools, trade schools, kindergartens, etc. The sisters have 72 houses in the Dioceses of Vienna, St. Polten, Seckau, Koettern, Klagenfurt, Salzburg, and Parma-Polonia.

**HEIMBUCHER, Orden und Kongregationen** (Paderborn, 1908); *Die Gesellschaft des göttlichen Heilandes* (Rome, 1903); **MÜNZLER, Die ep. Präfektur Assam** (Rome, 1999).

### Divine Service. See Breviary; Feasts; Liturgy; Mass; Worship.

### Divine Word, Society of the (Societas Verbi Divini), the first German Catholic missionary society established. It was founded in 1875 during the period of the Kulturkampf at Steyl, near Tegelen, Holland, by Rev. Arnold Janssen (d. 12 June, 1909), for the propagation of the Catholic religion among pagan nations. It is composed of priests and lay brothers. On completion of their philosophical studies the students make a year of novitiate, during which they promise the orthodox vows binding for three years. Before ordination the members of the society make perpetual vows. The coadjutor brothers renew their vows every three years for nine years, when they take perpetual vows.

The first mission of the society was established in 1882 in Southern Shantung, China, a district containing 158 Catholics and about 10,000,000 pagans. According to the statistics of 1906-07, this mission numbered 35,378 Catholics, 36,847 catechumens, 1 seminary with 64 Chinese seminarians, 46 European priests, 12 Chinese priests, 13 coadjutor brothers of the society, 3 teaching brothers, and 19 nuns. The second mission founded was in Togo, West Africa, in 1892. There were then scarcely a hundred Catholics in the district. In 1906 the mission had a prefect Apostolic, 31 European priests, 12 coadjutor brothers, 14 nuns, 53 native teachers, and 68 mission stations. There were nearly 3000 children attending the schools; the Catholics numbered 3300. The third mission was in German New Guinea. It is a comparatively new colony. Dangerous fevers are common. The native population (New Guinea) is all semiliterate, recognizing no form of authority, having no fixed customs, or administration of justice. The greatest difficulty experienced by the missionaries is the incredible number of languages. Thus in the entire mission district, 407 sq. m., probably more than a hundred languages are spoken. The first Catholic missionarjies arrived in German New Guinea in August, 1896. At the close of 1906, there were in the mission a prefect Apostolic, 16 European priests, 13 coadjutor brothers, 16 nuns, 1000 native Catholics, and 400 children in the schools.

In the Argentine Republic the society numbers 51 priests, 31 coadjutor brothers, and 41 nuns. They have charge of colleges, seminaries, and of 12 parishes in the four Dioceses of Buenos Ayres, La Plata, Santa Fe, and Paraná. Part of the mission district includes the territory once occupied by the famous Jesuit Reductions of Paraguay. The mission was established in 1898. In Brazil there are 39 priests, 14 coadjutor brothers, and 13 nuns. The society also has a mission in the United States, at Shreveport, La., and Cochee, Ill. There are 13 priests and 37 coadjutor brothers in charge of a technical school, and 30 nuns who conduct a home for the aged. In Europe the society has six houses or colleges with 126 priests, 546 coadjutor brothers, and 1089 students for the society. The training convent for the nuns has 231 members. Among their foundations are: (1) St. Michael, at Steyl near Tegelen, Holland, founded 8 Sept., 1875. The superior general resides here with 47 priests, 314 coadjutor brothers, and 282 students for the society. (2) Heiligkreuz (Holy Cross) near Neisse, Silesia, founded 24 Oct. 1892. There are 23 priests, 84 coadjutor brothers, and 241 students. (3) St. Wendel, in the Diocese of Trier, with 18 priests, 68 coadjutor brothers, and 185 students. (4) St. Gabriel, near Vienna, established 4 Oct., 1888. There are 26 priests, 370 novices and students of philosophy. The number of members is 179. (5) Doorn, near Utrecht, with 5 priests and one coadjutor brother. (6) Bischofshofen, near Salzburg in Austria, established 17 Aug., 1904. NUNN,—The Society of the Servants of the Holy Ghost (Societas Servarum Spiritus Sancti) was founded in 1889, at Steyl, Holland, by the Rev. Arnold Janssen. It numbers about 300 nuns who help the fathers in their missions, chiefly by teaching.

### Divinity of Christ. See Jesus Christ.

Dvivish, Propofios, Premonistratensis, b. at Senftenberg, Bohemia, 26 March, 1898; d. at Prenditz, Moravia, 21 December, 1765. He was christened Wenceslaus, but took the name of Propocius when he became a religious. He began his studies at the Znayrn Gymnasium and later entered the cloister school of Premonstratensians at Znajm, in Styria. In 1726 he was ordained and soon after became professor of philosophy at the school. His lectures on physics were illustrated by numerous interesting experiments. He received the doctorate in theology at Salzburg in 1753, his thesis being "Practatus de Dei unitate sub inscriptione A et O." In 1736 he took charge of the little parish of Prenditz near Znayrn. Here he had sufficient leisure for work and experiment in his favourite subjects, hydraulics and electricity, constructing the necessary instruments himself. His fame soon spread abroad, and he was called to Vienna to repeat his electrical experiments before the Emperor Francis and the Empress Maria Theresa. He was one of the first to apply electricity in the treatment of disease. In 1750, prior to the publication of the French treatise of Franklin (1751), he knew of the discharging property of pointed rods and applied his knowledge to the performance of curious tricks. The first lightning-rod was erected by Dvivish at Prenditz, in 1754, before Franklin's suggestions were known and before they had been carried out elsewhere. Dvivish's device is quite different from that proposed by the Philadelphian. He petitioned the emperor in 1755 to put up similar rods all over the country and thus protect the land from lightning. This proposal was rejected on the advice of the mathematicians of Vienna. He also constructed the Demondor (Denis, "Dvivich", d'or, "of gold"), a musical instrument, imitating string and wind instruments and producing orchestral effects. His theories are expounded in his published work, *Theoretischer Tractat oder die lenger vernunft der Physik und der meteoorologischen Electricität* (Tubingen, 1765; Frankfort, 1768; Bohemian tr. Prague, 1889).

**PETZL, Abhandlungen böh. und mähr. Ges. Vienn, 1777:** No. 15; Propofois (Prague, 1890); Propofois's *Corpus Elektric. & Physic.* (Leipzig, 1879).

**WILLIAM FOX.**

### Divorce.—This subject will be treated here under two distinct heads: I. In Moral Theology; II. In Civil Jurisprudence.

I. In Moral Theology.—The term divorce (divorciamento, from disentere, divortere, "to separate") was
employed in pagan Rome for the mutual separation of married people. Etymologically the word does not indicate whether this mutual separation included the dissolution of the marriage bond, and in fact the word is used by the Church and in ecclesiastical law in three different senses: a) The dissolution of the marriage bond; b) The absolute divorce of the marriage; c) The separation of the marriage (separation de corps).

The Catholic doctrine on divorce may be summed up in the following propositions: A. In Christian marriage, which implies the restoration, by Christ Himself, of marriage to its original indissolubility, there can be never an absolute divorce, at least after the marriage has been consummated; B. Non-Christian marriage may be dissolved by absolute divorce under certain circumstances in favour of the Faith; C. Christian marriage before consummation can be dissolved by solemn profession in a religious order, or by an act of papal authority; D. Separation from bed and board (divortium perfectum) is allowed in various cases; E. Adultery, fornication, and desertion, are grounds for non-marital divorce.

A. In Christian marriage, which implies the restoration, by Christ Himself, of marriage to its original indissolubility, there can be never an absolute divorce, at least after the marriage has been consummated.

1. The Original Indissolubility of Marriage and Its Restoration by Christ.—The inadmissibility of absolute divorce was ordained by Christ Himself according to the divine exposition of the Mosaic law: "Whosoever shall put away his wife and marry another, committeth adultery against her. And if the wife shall put away her husband, and be married to another, she committeth adultery" (Mark, x, 11, 12; cf. Matt., xix, 9; Luke, xvi, 18). In like manner, St. Paul: "To them that are married, not I but the Lord commandeth, that the wife depart not from her husband. And if she depart, that she remain unmarried, or be reconciled to her husband. And let not the husband put away his wife" (I Cor., viii, 10, 11). In the course of time, the indissolubility of marriage as it had been ordained by God in the Creation and was grounded in human nature. This is expressly stated by Him against the Pharisees, who put forward the separation allowed by Moses: "Moses by reason of the hardness of your heart permitted you to put away your wives: but from the beginning it was not so" (Matt., xix, 8): "He who made man from the beginning, made them male and female. And he said: For this cause shall a man leave father and mother, and shall cleave to his wife: and they two shall be one flesh. Therefore now they are not two, but one flesh. What therefore God hath joined together, let no man put asunder" (Matt., xix, 4-6).

The indissolubility of all marriage, not merely of Christian marriage, is here affirmed. The permanence of marriage for the whole human race according to natural law is here confirmed and ratified by a Divine positive ordinance.

No Catholic can doubt that even according to the natural law marriage is in a certain sense indissoluble. The following proposition is condemned in the Syllabus of Errors: "According to the natural law, the bond of marriage is not indissoluble, and in certain cases divorce in the strict sense can be sanctioned by civil authority." The meaning of this condemnation is clear from the document whence it has been taken. This is the papal Brief ("Ad apostolicæ sedis festigium", 22 August, 1851, in which several works of the Turin professor, J. N. Nuyts, and a series of propositions defended by him were condemned, as is expressly said, "de Apostolice potestatis pluridumine"). A certain indissolubility of marriage whenever contracted must therefore be admitted and cannot be sanctioned by civil authority, at least in the sense that marriage, unlike other contracts, may not be dissolved at the pleasure of the contracting parties. Such indissolubility would be in direct contradiction with the essential purpose of marriage, the proper propagation of the human race, and the education of the children. That in exceptional cases, in which continued cohabitation would nullify the essential purpose of marriage, the dissolution may nevertheless not be permitted, can hardly be proved as postulated by the natural law from the primary purpose of marriage. However, even such indissolubility would not be in accord with the secondary purposes of marriage, and it is therefore regarded by St. Thomas (IV Sent., dist. xxxii, Q. ii, a. 1) and most Catholic scholars as against the secondary demands of the natural law. In the sense of marriage, considered merely according to the natural law, is intrinsically indissoluble. That it is also extrinsically indissoluble, i.e. that it cannot be dissolved by any authority higher than the contracting parties, cannot be asserted without exception. Civil authority, indeed, has no such right of dissolving marriage. The evil consequences which would follow so easily, on account of the might of passion, in case the civil power could dissolve marriage, seem to exclude such a power; it is certainly excluded by the original Divine positive law: "What therefore God hath joined together, let no man put asunder" (Matt., xix, 6). However, that part of the proposition condemned by Pius IX, in which it is asserted, "and in certain cases divorce in the strict sense of the word must be allowed by civil authority," need not necessarily be understood of marriage according to the purely natural law, because Nuyts, whose doctrine was condemned, asserted that the State had this authority in regard to Christian marriages, and because the corresponding section of the Syllabus treats of the errors about Christian marriage. (cf. Schrader, Der Papst und die modernen Ideen, II (Vienna, 1865), p. 77.)

2. Divorce among the Israelites.—In spite of the Divine law of the indissolubility of marriage, in the course of time divorce in the sense of dissolution of marriage became prevalent to a greater or less extent among all nations. Moses found this custom even among the people of Israel. As lawyer, he ordained in the name of God (Deut. xxiv, 1): "If a man take a wife, and have her, and she find not favour in his eyes for some uncleanness: he shall write a bill of divorce, and shall give it in her hand, and send her out of his house." The rest of the passage shows that this divorce was understood as justifying the wife in her marriage with another husband, hence as a complete annulment of the first marriage. Some regard it only as a freedom from penalty, so that in reality the remarriage of the divorced wife was not allowed, and was adultery, because the bond of the first marriage had not been dissolved. This opinion was held by the Master of the Sentences, Peter Lombard (IV Sent., dist. xxxii, 3), St. Bonaventure (IV Sent., dist. xxxiii, art. 3, Q. i), and others. Others again, however, believe that there was a real permission, a dispensation granted by God, as otherwise the practice sanctioned in the law would have been impossible. Part of this opinion is confirmed by Jesus. Moreover, Christ (loc. cit.) seems to have rendered illicit what was illicit in the beginning, but what had really been allowed later, even though it was allowed "by reason of the hardness of your heart" (St. Thomas, III, Suppl., Q. lvii, a. 5; Belarmino, Contr. errores de matrim. i, xvii; Sanches, De matrim., x, disp. 1).
n. 7; Palmieri, “De matrimonio christ.”, Rome, 1880, 133 sqq.; Wernz, “Jus decretalium”, IV, n. 696, not. 12; etc.). This second opinion maintains and must maintain that the expression “for some uncleanness” (in Matthew) does not necessarily exclude a divorce at will, but a grievous stain, something shameful directed against the purpose of marriage or marital fidelity. A separation at will, and for slight reasons, at the pleasure of the husband, is against the primary principles of the natural moral law, and is not subject to Divine dispensation in such a way that it could be made licit in every case. It is different with separation in serious cases governed by special laws. This, indeed, does not correspond perfectly with the secondary purposes of marriage, but on that account it is subject to Divine dispensation, since the inconvenience to be feared from such a separation can be corrected or avoided by Divine Providence. In the time of Christ there was an acute controversy between the recent, lax school of Hillel and the strict, conservative school of Schammai about the meaning of the phrase רבי פירגיה. Hence the question with which the Pharisees tempted Our Lord: “Is it lawful...for every cause?” The putting-away of the wife for frivolous reasons had been sharply condemned by God through the Prophets Micah (6, 8) and Malachi (2, 16) and was therefore extremely prevalent. Christ abolished entirely the permission which Moses had granted, even though this permission was strictly limited; He allowed a cause similar to the רבי פירגיה as reason for putting away the wife, but not for the dissolution of the marriage bond.

3. The Dogmatic Basis and Practical Application of the Complete Indissolubility of Consummated Marriage within the Catholic Church.—(a) Its Foundation in Scripture. —The complete exclusion of absolute divorce (divortium perfectum) in Christian marriage is expressed in the words quoted above (Matthew xix; Luke, xvii; I Cor., vii). The words in St. Matthew’s Gospel (xix, 9), “except it be for fornication”, have, however, given rise to the question whether the putting-away of the wife and the dissolution of the marriage bond were not allowed on account of adultery. The Catholic Church and Catholic theology have always maintained that such an explanation of St. Matthew would be made to contradict Sts. Mark, Luke, and Paul, and the converts instructed by St. Paul could have — without regard to the real doctrine of Christ. As this is inconsistent both with the infallibility of the Apostolic teaching and the inerrancy of Sacred Scripture, the clause in Matthew must be explained as the mere dismissal of the unfaithful wife without the dissolution of the marriage bond. Such a dissolution is not allowed by the parallel texts in Mark and Luke, while Paul (I Cor., vii, 11) clearly indicates the possibility of such a dismissal: “And if she depart, that she remain unmarried, or be reconciled to her husband.” Grammatically, the clause in St. Matthew may modify one member of the sentence (that which refers to the putting-away of the wife) without applying to the following member (the remarriage of the other), though we must admit that the construction is a little harsh. If it means, “Whoever shall put away his wife, except it be for fornication, and shall marry another, commiteth adultery”, then, in case of marital infidelity, the wife may be put away; but that, in this case, adultery is not committed by a new marriage cannot be concluded from these words. The following words, “And be that shall marry her that is put away, therefore also the woman who is dismissed for adultery—‘commiteth adultery’, say the contrary, since they suppose the permanence of the first marriage. Moreover, the brevity of expression in Matthew, xix, 9, which seems to us harsh, is explicable, because the Evangelist’s purpose was to give a distinct explanation of the same subject, and exactly laid down what was justified by the reason of fornication: “Whosoever shall put away his wife, excepting for the cause of fornication, maketh her to commit adultery: and he that shall marry her that is put away, commiteth adultery.”

(b) Tradition and the Historical Development in Doctrine and in Practice. —The doctrine of Scripture about the illicitness of divorce is fully confirmed by the constant tradition of the Church. The testimonies of the Fathers and of the councils leave us no room for doubt. In numerous places they lay down the teaching that not even in the case of adultery can the marriage bond be dissolved, and a new marriage can proceed to a new marriage. They insist rather that the innocent party must remain unmarried after the dismissal of the guilty one, and can only enter upon a new marriage in case death intervenes.

We read in Hermaeus (about the year 160), “Pastor”, mand. IV, i, 6: “Let him put her [the adulterous wife] away and let the husband abide alone; but if after putting away his wife he shall marry another, he likewise commiteth adultery.” (ed. Funk, 1901). The expression in verse 5, “For the sake of her repentance, therefore, the husband ought not to marry”, does not weaken the absolute command, but it gives the supposed reason of this great command. St. Justin Martyr (d. 176) says (Apolog. I, xv, in P. G., VI, 549), plainly and without exception: “He that marries her that has been put away by another man commiteth adultery.” In like manner Athenagoras (about 177) in his “Legatio pro christ.”, xxxiii (P. G., VI, 965): “For whosoever shall put away his wife and shall marry another, commiteth adultery.”

Guiltinanicius and Cyprian, however, are in such a view of the rule that marriage after divorce, except union when they do not put away their wives;
DIVORCE

so are not allowed even to marry, although we put our wives away." Clement of Alexandria (d. 217), "Strom." II, xxiii (P.G., VIII, 1096), mentions the ordinance of Holy Scripture in the following words: "You shall not put away your wife except for fornication, and [Holy Scripture] considers it adultery a remarriage of the person who has been divorced survives." Similar expressions are found in the course of the following centuries both in the Latin and in the Greek Fathers, e.g. St. Basil of Cæsarea, "Epist. can. ii," in Ad Amphilochnem", can. xlviii (P.G., X.XI, 732), St. Chrysostom, "Ad libello repud." (P.G., LI, 218); Theodoretus, on I Cor., vii, 39, 40 (P.G., LXXII, 275); St. Ambrose, "in Luc.," VIII, v, 18 sqq. (P.L., XV, 1855); St. Jerome, Epist. iv (ad Amant.); n. 3 (P.L., XXII, 562); St. Augustine, "De adulterrinis conjugal.ii," IV, iv (P.L., XI, 473), etc., etc.

The occurrences of passages in some Fathers, even among those just quoted, which treat the husband more mildly in case of adultery, or seem to allow him a new marriage after the infidelity of his spouse, do not prove that these expressions are to be taken, and must be granted the decrees of marriage, but of the lesser canonical penance and of exemption from punishment by civil law. Or if they refer to a command on the part of the Church, the new marriage is supposed to take place after the death of the one whose divorce was granted, and not, as mentioned, not without reason, as a concession for the innocent party, because at some periods the Church's laws in regard to the guilty party forbade forever any further marriage (cf. can. vii of the Council of Complum, 757). It is well known that the civil law, even of the Christian emperors, permitted in several cases a new marriage after the separation of the wife. Hence, without contradicting himself, St. Basil could say of the husband, "He is not condemned," and "He is considered excusable" (Ep. clxxvii, can. ix, and Ep. can. xx, n. 10 (P.G., X.XII, 630, 731)). The second marriage, if it is speaking distinctly of the milder treatment of the husband than of the wife with regard to the canonical penance imposed for adultery. St. Epiphanius, who is especially reproached with teaching that the husband who had put away his wife because of adultery or another crime was allowed by Divine law to marry another (Hæres., ix, 4, in P.G., XLI, 1024), is speaking in reality of a second marriage after the death of the divorced wife, and, whilst he declares in general that such a second marriage is allowed, but is less honourable and less indissoluble, than the marriage of a man in part in favour of one who had long been separated from his first wife. The other Fathers of the following centuries, in whose works ambiguous or obscure expressions may be found, are to be explained in like manner.

The practice of the faithful was not indeed always in perfect accord with the doctrine of the Church. On account of defective morality, there are to be found regulations of particular synods which permitted unjustifiable concessions. However, the synods of all ages, and most of all the Synods of the popes, have constantly declared that divorce which annulled the marriage and permitted remarriage was not allowed. The Synod of Elvira (a. d. 300) contains without the least ambiguity the permanence of the marriage bond, even in the case of adultery. Canon ix decreed: "A faithful woman who has an adulterous husband and is marrying another, let her be prohibited from marrying; and if she is married, let her not receive communion until he man she has left shall have departed this life, unless illness make this an imperative necessity." (ibid., "Cassian. i, 7"). The Synod of Arles (314) states indeed: counselling, as far as possible, that the young men who had dismissed their wives for adultery should take no second wife" (ad, in quantum possit, consentiendum est detur); but it declares at the same time the illicit character of such a second marriage, because it says of these husbands, "They are forbidden to marry" (prohibentur nubere, Labbe, II, 472). The same declaration is to be found in the Second Council of Mileve (418), canon xvii (Labbe, IV, 432), and of Hereford (673), canon x (Labbe, VII, 554); the Council of Formi (Forum Julii), in northern Italy (791), canon x (Labbe, IX, 46); all of these teach distinctly that the marriage bond remains even in case of dismissal for adultery, and that new marriage is therefore forbidden. John Chrysostom, "Ad libello repud."

The following decisions of the popes on this subject deserve special mention: Innocent I, "Epist. ad Exuper.", vi, n. 12 (P.L., XX, 500): "Your diligence has asked concerning those, also, who, by means of a deed of separation, have contracted another marriage. It is manifest that they are adulterers on both sides." Compare also with "Epist. ad Vict. Rothom.", xiii, 15 (P.L., XX, 479): "In respect to all cases the rule is kept that whoever marries another man, while her husband is alive, must be held to be an adulteress, and must be granted no leave to go to another man, when the men shall have died." The impossibility of absolute divorce during the entire life of married people could not be expressed more forcibly than by declaring that the permission to perform public penance must be granted only after the death of the spouse, because this peneance presupposed the cessation of sin, and to remain in a second marriage was to continue in sin.

Besides the adultery of one of the married parties, the laws of the empire recognized other reasons for which marriage might be dissolved, and remarriage permitted, for instance, protracted absence as a prisoner of war, or the choice of religious life by one of the spouses. In these cases, also, the popes pronounced decidedly for the indissolubility of marriage, e.g. in Inno
cent I, "Epist. ad Prot. de laudibus," in Leo I, "Epist. ad Nicetam Aquil.," in P.L., LIV, 1136; Gregory I, "Epist. ad Uricum Abb.," in P.L., LXXXVII, 833, and "Epist. ad Hadrian. notar.," in P.L., LXXXVII, 1169. This last passage, which is found in the "Decretum" of Gratian (C. xxvii, Q. ii, c. xxi), is as follows: "Although the civil law provides that, for the sake of conversion (i.e. for the purpose of choosing the religious life), a marriage may be dissolved, though either of the parties be unwilling, yet the Divine law does not permit it to be done." That the Church's decision has been held to have been indicated by Pope Zacharias in his letter of 5 January, 747, to Pepin and the Frankish bishops, for in chapter vii he ordains "by Apostolic authority," in answer to the questions that had been proposed to him: "If any layman shall put away his own wife and marry another, or if he shall marry a woman who has been put away by another man, let him be deprived of communion." [Monum. Germ. Hist.: Epist. III: Epist. Merovingici et Karolini svi, I (Berlin, 1892), 482]

(c) Laxer Admissions and their Correction—Whilst the popes constantly rejected the practice of divorce in all cases, we find some of the Frankish synods of the eighth century which allowed it in certain acute cases. In this regard the Councils of Verbeire (752) and Complum (757) erred especially. Canon ix of the first council is undoubtedly erroneous (Labbe, VIII, 407). In this canon it is laid down that if a man must go abroad, and his wife, out of attachment to home and relatives, will not go with him, she must remain unmarried so long as the husband is alive whom she refused to follow; on the other hand, in contrast to the blameworthy woman, a second marriage is allowed to the husband: "If he has no hope of returning to his own country, if he cannot abstain, he can receive another wife with a penance." So deeply was the pre-Christian custom of the people engraven in their hearts that it was believed allowance should be
made for it to some degree. Canon v seems also to grant the unqualified permission for a second marriage. It treat of the case in which the wife, with the help of other men, seeks to murder her husband, and he escapes from the plot by killing her accomplices in self-defense. Such a husband is allowed to take another wife: "If the husband cannot put away the first wife, and, if he will, let him take another. But let that woman who made the plot undergo a penance and remain without hope of marriage." Some explain this canon to mean that the husband might marry again after the death of his first wife, but that the criminal wife was forbidden forever to marry. This last is in agreement with the penitential discipline of the age, because the crime in question was punished by lifelong canonical penance, and hence by permanent exclusion from married life.

In its thirteenth canon (according to Labbe, VIII, 452; others call it the sixteenth), the Council of Compiègne gives a somewhat ambiguous decision and may seem to allow absolute divorce. It says that a man who has dismissed his wife in order that she might choose the state of marriage again. But can the Council have intended a wife when the first has carried out her resolution. Nevertheless, the intended choice of the state of Christia in the subject of the Church, however, is not infallible, yet it is not doubted that the Council intended, or we shall speak here. This must also be the meaning of canon xvi (Labbe, VIII, 453; others, canon xix), which allows the dissolution of a marriage between a leper and a healthy woman, so that the woman is authorized to enter upon a new marriage, whereas we suppose that here there is question of the medical impediment of impotence. If these canons were really intended in any other sense, then they are contrary to the general doctrine of the Church. Other canons, in which separation and second marriage are allowed, refer un derlined to the circumstances and their particular state. These Penitential Books had indeed no official character, but they influenced for a time the ecclesiastical practice in these countries. However, their influence did not last long. In the first decades of the ninth century, the Church began to proceed energetically against them (cf. the Synod of Châlons, in the year 813, canon xxxvii; Labbe, IX, 367). They were not completely suppressed at this time, especially in the Orient, where Christian morality took place in the tenth and early part of the eleventh century. Towards the end of the eleventh century, however, every concession to the laxer practice as regards divorce had been corrected. The complete indissolubility of Christian marriage had become so firmly fixed in the juridical conscience that the authentic collections of church laws, the Decretals of the twelfth century, do not even see the necessity of expressly declaring it, but simply suppose it, in other juridical decisions, as a matter of course and beyond discussion. This is true of the entire series of cases in IV Decretal, xix. In all cases, whether the cause be criminal plotting, adultery, loss of faith, or anything else, the bond of marriage is regarded as absolutely indissoluble and entrance upon a second marriage as impossible.
that the interpretation of the so-called ecclesiastical officials, their approbation or disapprobation of the establishment of the marriage, is the case should they refuse to bless an intended marriage of people who had been divorced when the reason for the divorce seemed to them to be too much opposed to Scripture. It is not surprising that in this respect the tendency should have been downwards, when we remember that in the various sects of Protestantism the growth of liberalism has advanced even to the denial of Christ [Dr. F. Albert, Verbrechen und Strafen als Ehescheidungsgrund nach evangel. Kirchenrecht (in Stu., Kirchenr. Abhandlungen, Stuttgart, 1903), I, IV]. Impropriety and nullity must be carefully distinguished from divorce proper. It can be called divorce only in a very improper sense, because it presupposes that there is and has been no marriage. However, as there is question of an alleged marriage and of a union which is considered by the public as a true marriage, we can understand why a previous ecclesiastical judgment should be required, declaring the presence of a diriment impediment and the consequent invalidity of a supposed marriage, before the persons in question might be free to enter into another valid marriage. It is only when the invalidity of a marriage becomes publicly known, and further cohabitation gives scandal, or when other important reasons render a prompt separation of domicile necessary or advisable, that such a separation should take place at once, to be made definitive by a later judicial sentence. When the invalidity of a marriage is publicly known, official procedure is necessary, and the ecclesiastical process of nullification must be introduced. In the case of impediments which refer exclusively to the rights of the husband and wife, and which can be removed by consent, only one of the supposed spouses whose right is in question is permitted to impugn the marriage by complaint before the ecclesiastical court, provided it is desired to maintain this right. Such cases are the impediments of fear or violence, of essential error, of impotence on the part of the other not fully established, and failure to comply with some fixed condition. In cases of the other possible impediments, every Catholic, even a stranger, may enter a complaint of nullity if he can bring proofs of such nullity. The only possible title excluded are those who, on account of private advantage, were unwilling to declare the invalidity of the marriage before its dissolution by death, or who knew the impediment when the banns of marriage were proclaimed and culpably kept silence. Of course it is allowed to the married parties to impugn the nullity of that marriage and to appeal against their marriage (Wernz, "Jus decretalium", IV, n. 743).

That separation and remarriage of the separated parties may not take place merely on account of private convictions of the invalidity of a supposed marriage, but only in consequence of an ecclesiastical judgment was taught by Alexander III and Innocent III in IV Decretal., xix, 3, and II Decretal., xii, 13. In the earlier centuries the summary decision of the bishops sufficed; at present the Constitution of Benedict XIV, "De matrimonio", 3 November, 1741, must be followed. This prescribes that in matrimonial cases a "defender of the matrimonial tie" (defensor matrimonii) must be appointed. If the decision is for the validity of the marriage, there need be no appeal in the matter. If it be for the invalidity, and the first decision and continue in married life. If the decision is for the invalidity of the marriage, an appeal must be entered, and sometimes even a second appeal to the court of third instance, so that it is only after two concordant decisions on the invalidity of the marriage in question that it can be considered invalid, and that the parties are allowed to proceed to another marriage. (Cf. III Conc. plen. Baltim., App. 262 sqq.; Conc. Americ. latin., II, n. 16; Laurentius, "Instit. iuris ecclei.", 2nd ed., n. 696 sqq.; Wernz, "Jus decretal., IV, n. 744 sqq."") Some concordant decisions in cases of nullity are conscientious.
1. The Pauline Privilege.—The Magna Charta in favour of Christian faith is contained in the words of the Apostle (1 Cor., vii, 12–15): "If any brother hath a wife that believeth not, and she consent to dwell with him, let him not put her away. And if any woman hath a husband that believeth not, and the unbelieving husband be sanctified by the believing wife, and the unbelieving wife is sanctified by the believing husband: otherwise your children should be unclean; but now they are holy. But if the unbeliever depart, let him depart. For a brother or sister is not under servitude in such cases. But God hath called us to peace. Obey them that have the rule over you, and submit yourselves: for they watch for your souls, as they that must give account; that they may do well unto them that do well, and for those who deal wrongfully. Let us live in harmony with the Roman Catholic Church, which is the depositary of the Christian faith, and the only means of obtaining the true interpretation of the Scriptures, as well as of avoiding the errors and corruptions of heretical sects." The same interpretation is given, in the next verse, as to whether these words are dependent on the preceding sentence, "For to the rest I speak, not the Lord," or whether that sentence refers to the one preceding it, is of no importance in this question. In the first supposition, we should seem to have here an ordinance which is not immediately Divine, but was established by the Apostle through the power of Christ. In the second supposition, it may be an immediately Divine ordinance.

In both cases the Apostle tells us that in all cases when one of the married parties has received the Christian faith, and the other remains an infidel and is not willing to live in peace with the Christian, the believer is not bound but is free. The Apostle does not indeed say expressly and formally that the marriage bond has been dissolved, but if it were not at least in the power of the Christian to dissolve the previous bond and to enter upon another marriage, the words would not have their full truth. Hence the Church has understood the words in this sense, and at the same time has fixed more exactly how and under what conditions this so-called Pauline privilege may be exercised. Innocent III declares authoritatively (IV Decretal., xix, 7, in cap. "Quanto") that the convert is justified in entering upon another marriage if he will, provided the non-Christian is unwilling either to live with the other or such cohabitation would cause the blasphemy of the Divine name or be an incentive to mortal sin: "Si enim alter infidelium conjugum ad fidem conversatur, altero vel nullo modo, vel non sine blasphemia divini nominis, vel ut eum pertractat ad mortalem pecatum vel cohabitationem venit; qui relinquatur, ad secunda, si voluerit, vota transibit: et in hoc casu intelligimus quod ait Apostolus: Si infidelis desiderat, etc., et canone etiam in quo dicitur: Contumelia creatoris solvit jus matrimonii circa eum qui reliquisset." According to the Church's interpretation and practice, the dissolution of a marriage bond which was contracted before conversion is not effected by the separation of the married parties, but only when a new marriage is contracted by the non-Christian party because of this privilege. The Holy Office says this expressly in the decree of 8 August, 1790, ad 2: "Then only may the yoke of the matrimonial bond with an infidel be understood to be loosed when the convert spouse...proceeds to another marriage with a believer" (Collectan. S. Congr. de Prop. F., n. 1312). The manner of obtaining this right to enter upon a new marriage is fixed by the Church under penalty of invalidity, and consists in a demand (interpellatio) made of the non-Christian party whether he or she is willing to live with the other in peace or not. If this interpellation is not possible, an Apostolic dispensation ab interpellatione must be obtained (Collectan. S. Congr., n. 1311; Pius IX, "Mortal." 3d ed., VI, n. 648). If, however, the non-Christian party refuses to continue further in married life, not from hatred of the Faith or for other sinful reasons, but because the Christian, by sinful conduct (for instance by adultery), has given just reason for separation, the Christian would not be justified in entering upon a new marriage. The privilege, however, would still be his if the non-Christian party wished to maintain as reason for separation adultery committed before the time of conversion. (Collectan., n. 1312, 1318, 1322.) The integrity of the Christian Church, which must take place before the remarriage of the Christian, must as a general rule be about living together in peace or not, but as peaceful cohabitation can only be imagined in a case where there are no serious dangers, and such dangers may arise in certain circumstances from continued living with the non-Christian party, it is readily understood that the Holy See is justified in making the interpellation mean, whether the non-Christian party be willing to accept the Christian faith; and in such cases after careful deliberation, then, as a result of this refusal, permission may be granted to the Christian party to enter upon a new marriage and thereby to dissolve the previous one. This procedure, allowed by Sixtus V, received new confirmation and direction under Leo XIII by the decree of the Holy Office, 29 November, 1882 (Collectan., n. 1358, ad 3).

The Pauline privilege is said to be in favour of the Christian faith, but the meaning of the privilege and the right in such cases to absolute divorce is not exactly defined thereby. Doubt might arise in regard to catechumens, and also in regard to such as join a Christian denomination but do not belong to the Roman Catholic Church. The solution of these doubts is contained in the following proposition: The Pauline privilege is attached to baptism. That the privilege is granted to Nobody before the actual reception of baptism is beyond question from the decree of the Sacred Congregation of Propaganda, 16 January, 1803 (Collectan., n. 1319), and also from the decree of the Holy Office, 13 March, 1901 (Acta S. Sedis, XXXII, p. 590). Even the interpellation of the non-Christian party ought to be postponed until after the baptism of the other. It requires a papal dispensation to proceed to such an interpellation validly before baptism (Cf. Instructio S. Officii, under the authorization of Pius IX, 5 June, 1874, in Collectan., n. 1557). It is certain that the privilege is not limited to the marriages of pagans, but to all marriages of unbaptized persons, even though they should belong to some non-Catholic Christian denomination (Acta S. Sedis, loc. cit.). Whether, however, the privilege is so restricted that it belongs to Christian adherents of a non-Catholic denomination when they profess the Christian Faith by the reception of baptism is a question disputed by theologians. Some theologians of repute assert that the privilege is granted in this case, and that a practical decision to this effect has been made by a Roman Congregation, according to the testimony of Köring, "Theol. mor.", II, 394 (New York, 1878). (Cf. Palmieri, "De matrimon. christ.", th. xxvii, p. 224; Tarquini in "Archiv für kath. Kirchenrecht", L, 224 sqq.; Werns, "Jus de Relig.", II, 604 (1922) n. 35; note 122; Thiene, "D. Ch.", II, n. 1331; Ballerini-Palmieri, "Opus theol. mor.", 3d ed., VI, 457 sqq.) Even in the early ages, the Venerable Bede and St. Augustine seem to have understood the passage from St. Paul (I Cor.) in this sense.

2. The Papal Authority to Dissolve a Non-Christian Marriage.—From the ecclesiastical decisions that have been already quoted, it is clear that the Church
has at least the authority of explaining the Pauline privilege, of limiting, and extending it. This would make it appear which was generally supposed to be expressed in I Cor., vii, 15, were an immediate Apostolic ordinance and only mediately Divine, inasmuch as Christ would have granted the power in general in a case of necessity to dissolve in favour of the Faith a marriage contracted in infidelity. For the entire Apostolic power passed to the supreme head of the Church, and as the Apostle could determine fixed rules and conditions for the dissolution of the marriages in question, the pope would have precisely the same authority. Yet on this point there is a diversity of opinion among theologians, and the Church has not settled the dispute. For even if the promulgated by St. Paul was of immediate Divine right, the Church's power to make at least modifications in case of necessity can readily be explained because such a power belongs to her without a doubt in other matters that are of Divine right. The first opinion seems to have been held in the fourteenth century by eminent scholars like P. de Palude and de Tudeschis, and in the fifteenth century by St. Antoninus; in recent times it is defended by Gasparri, Rossi, Fahrner, and others. The second opinion is held by Th. Sanchez, Benedict XIV, St. Alphonsus, and many others. The instruction of the Holy Office, 11 July, 1866 (Collectan., n. 1353), calls the privilege a Divine privilege "promulgated by the Apostle." However, in spite of the disagreement in regard to the Pauline privilege, the defender of both opinions agree that there is another method for the dissolution of the marriage of infidels when one of the parties receives baptism, namely, by papal authority. This power is indeed not admitted by all theologians. Even Lamberti (who later became Pope Benedict XIV) doubted it when he was secretary of the Sacred Congregation of the Council, in the causa Florentina, in the year 1726. But earlier papal decisions, as well as the actual decision in this very case, leave no room for doubt that the pope attributes to themselves this power and acts accordingly.

If the Pauline privilege alone be applied, it will follow that when a pagan is converted who has been living in polygamy, he can be permitted to choose any one of his wives who may be willing to receive baptism. If the father be willing to give him and provide for him in peace or, under the circumstances to be converted to the Faith. Hence it is that the answers of Roman Congregations based on the Pauline privilege always include the phrase nisi prima voluntas converti. Now several of the popes have at times granted permission in such cases. The first of whom was General, without adding the clause "unless the first will be willing to be converted." This was done for India by St. Pius V, 2 August, 1571, in the Constitutions Romani Pontificis. Urban VIII, 20 October, 1626, and 7 September, 1627, did the same for the South American nations, and expressly declares: "Considering that such pagan marriages are not so firm that in case of necessity they cannot be dissolved;" similarly, Gregory XIII, 25 January, 1585 (cf. Ballerini-Palmieri, Opus theolog. mor., 3d ed., VI, nn. 444, 451, 482). The theological proof of this papal authority is easy for those who, as has been said, regard the Pauline privilege as an immediate Apostolic ordinance. For it is then expressly testified by Holy Scripture that the Apostolic authority, hence also the papal authority, can also in such matters. The method of proof is that marriage contracted in infidelity. The method of procedure and the precise application in various cases would naturally be committed to the bearer of the Apostolic authority. Those who consider that the Pauline privilege is an immediate Divine determination of the Church, Paulus and others, easily prove the papal authority in another way. Since it follows from I Cor., vii, 15, that marriage contracted in infidelity is not absolutely indissoluble according to Divine right, it follows from the general power of love, which was given to the Church by Christ, St. Matt., xvi, 19—"Whatever thou shalt loose on earth, it shall be loosed also in heaven"—that this power extends also to our present matter. Moreover, the successors of St. Peter are themselves the best interpreters of their power. Whenever the exercise of an authority that has hitherto been clearly recognised occurs, not merely on one occasion but frequently, there can be no more doubt that such authority is rightfully exercised. Now this is precisely what took place in the grants of Pius V, Gregory XIII, and Urban VIII for the vast territories of India, the West Indies, etc.

3. The Dissolution of Marriage Contracted in Infidelity by Profession in a Religious Order.—When the doctrine explained above, which now is practically admitted beyond doubt, has been established, the question, whether a marriage contracted in infidelity can be dissolved by the religious profession of the converted party, is not very important. It is so to be understood that the baptized party may choose the religious life, even against the will of the one still unbaptized, and, in consequence of this, the other may remain in the state in which he was when he married. From the instruction of the Holy Office we have just explained, it is clear that the pope, at least in single cases, can permit this. Whether, according to a general law, and by immediate Divine ordinance, without the intervention of the pope, this privilege belongs to the baptized party, is somewhat connected with another question, vis., for what reason Christian (i.e. sacramental) marriage, not yet consummated, can be dissolved by religious profession. This leads us to the third proposition about this subject of divorce.

C. Christian Marriage before Consummation Can Be Dissolved by Solemn Profession in a Religious Order, or by an Act of Papal Authority.

1. Dissolution by Solemn Profession.—The fact that religious profession causes the dissolution of the marriage bond, provided the marriage has not been consummated, is distinctly taught in the Extrav. Joan., XXII (tit. VI, cap. unico.), and was solemnly defined by the Council of Trent (Sess. XXIV, can. vi). The reason why this dissolution takes place is a theological question. The decision reads: "If any one shall say that a marriage contracted, but not consummated, is not dissolved by the solemn religious profession of either one of the parties to the marriage, let him be anathema." The expression, by the solemn profession, is important. Neither the mere entrance into a religious order, nor the profession of simple vows, even though they be for life, as is customary in modern congregations, is capable of dissolving a previous marriage. The simple vows which are pronounced in the Society of Jesus, either as vows of scholastics or as vows of tertiary/novices, do not dissolve a marriage which has been contracted and not yet consummated, though they cause a diriment impediment in regard to any future marriage. The question as to how and for what reason such marriage is dissolved by solemn religious profession is answered by some by pointing to an immediate Divine right, as if God himself had so ordained immediately. Others, however, ascribe it to the power which the Church has received from God, and to its ordinance. The first opinion is defended by theologians like Palmieri, Soto, The Angelic. Gasparri, Fahrner, and others. The tradition of the Church is nothing new in this respect, which is an analogous to a consummated marriage. Scholars, however, are not unanimous.
about the limits of its dissolubility. Many facts from
the lives of the saints, of St. Thecla, St. Cecilia, St.
Alexius, and others, such as for example as are narrated
by Gregory the Great (III Dialog., xiv, in P. L.,
XXXIII) and by the Venerable Bede (Hist Angl.,
xix, in P. L., XC, 201 sqq.), are proof of the un-
violated state of matrimony after a marriage had been
contracted, it was free for either of the
married parties to separate from the other in order to
choose a life of evangelical perfection. Now this
would be a violation of the right of the other spouse if
in such circumstances the marriage bond was not dis-
solved. On at least one occasion the Church seems
to have provided that carnal intercourse shall not have taken
place between them; and it is allowed to the one who
is left to proceed to a second marriage.” A similar
decision was made by Innocent III, op. cit., cap.
xxiv, in which he says: “It is not possible to
speak of a marriage that is not regular. If one of the
parties should return to the state of religious profession
alone has this effect, and that therefore
those who wished to practise a life of higher per-
fecion in any other manner could be obliged by the
other spouse either actually to choose the religious
state or else to consummate the marriage. Under
earlier ecclesiastical conditions, long delays were im-
poused upon the other party before entering upon
another marriage, because religious profession might be
made without a long novitiate. The introduction of a
novitiate of at least one year by the Council of Trent, and
the time of three years prescribed by Pius IX and Leo XIII
was for simple vows before the solemn profes-
sion, and the general restriction of solemn profession
by the establishment of simple profession, which does
not dissolve the marriage bond, have rendered diffi-
cult the dissolution of unconsummated marriage by
religion profession. So that not only is it unnecessary that
if one of the married parties should choose the state of evangelical perfection before the consummation of the marriage, the marriage bond should be dissolved by papal authority.

The Pope's authority is supreme head of the Church to dissolve Christian marriage not yet con-
summated is proved on the one hand from the words of Christ to Peter, Matt., xvi, 19 (see above, under B 2), and on the other, from the dissolubility of such a marriage by religious profession, inasmuch as this prof-
ession must be solemn, for according to the declara-
tion of Boniface VIII (III Sexti Decretal., xv, c.
unic.), solemn vows as such depend entirely upon the
ordinate of the Church—“votum solemnitates ex sola
commissione non invocabtur nisi cum effectu solemnitatis, as long as there is no doubt that the dissolution of a marriage by solemn profession could never take place without the
exercise of the Church’s authority. Now if the
Church can cause such a dissolution according to a
general law, a fortiori she can do this in single cases—
not indeed arbitrarily, but for grave reasons—because
this power has been granted by God to dispense in
matters of Divine Right, and a delegated authority
may not be exercised without a sufficient reason (cf.
Werns, “Jus decretal.”, IV, n. 698, not. 59). The ac-
tual exercise of this power in the part of an pope, which has become constant and general, is a further proof
of its propriety and its actual existence. Clear
instances occur during the pontificates of Martin V
(1417-31) and Eugene IV (1431-47). St. Antoninus
tells us that he had seen several Bulls of these popes
which granted such a dispensation or a dissolution of a
marriage that had not been consummated, so that
thereafter they might proceed to a new marriage
(Summa theol., III, tit. i, c. xxi). We can find traces
of such a practice even in much earlier times. A de-
creed of Honorius in 277, after a marriage
had been contracted, it was free for either of the
married parties to separate from the other in order to
choose a life of evangelical perfection. Now this
would be a violation of the right of the other spouse if
in such circumstances the marriage bond was not dis-
solved. On at least one occasion the Church seems
to have provided that carnal intercourse shall not have taken
place between them; and it is allowed to the one who
is left to proceed to a second marriage.” A similar
decision was made by Innocent III, op. cit., cap.
xxiv, in which he says: “It is not possible to
speak of a marriage that is not regular. If one of the
parties should return to the state of religious profession
alone has this effect, and that therefore
those who wished to practise a life of higher per-
fecion in any other manner could be obliged by the
other spouse either actually to choose the religious
state or else to consummate the marriage. Under
earlier ecclesiastical conditions, long delays were im-
poused upon the other party before entering upon
another marriage, because religious profession might be
made without a long novitiate. The introduction of a
novitiate of at least one year by the Council of Trent, and
the time of three years prescribed by Pius IX and Leo XIII
was for simple vows before the solemn profes-
sion, and the general restriction of solemn profession
by the establishment of simple profession, which does
not dissolve the marriage bond, have rendered diffi-
cult the dissolution of unconsummated marriage by
religion profession. So that not only is it unnecessary that
if one of the married parties should choose the state of evangelical perfection before the consummation of the marriage, the marriage bond should be dissolved by papal authority.

The Pope's authority is supreme head of the Church to dissolve Christian marriage not yet con-
summated is proved on the one hand from the words of Christ to Peter, Matt., xvi, 19 (see above, under B 2), and on the other, from the dissolubility of such a marriage by religious profession, inasmuch as this prof-
ession must be solemn, for according to the declara-
tion of Boniface VIII (III Sexti Decretal., xv, c.
unic.), solemn vows as such depend entirely upon the
ordinate of the Church—“votum solemnitates ex sola
commissione non invocabtur nisi cum effectu solemnitatis, as long as there is no doubt that the dissolution of a marriage by solemn profession could never take place without the
exercise of the Church’s authority. Now if the
Church can cause such a dissolution according to a
general law, a fortiori she can do this in single cases—
not indeed arbitrarily, but for grave reasons—because
this power has been granted by God to dispense in
matters of Divine Right, and a delegated authority
may not be exercised without a sufficient reason (cf.
Werns, “Jus decretal.”, IV, n. 698, not. 59). The ac-
tual exercise of this power in the part of an pope, which has become constant and general, is a further proof
of its propriety and its actual existence. Clear
instances occur during the pontificates of Martin V
(1417-31) and Eugene IV (1431-47). St. Antoninus
can be the mere cessation of married life (separatio quadam lato sensu), or a complete separation as regards duties. A person living with a husband or wife addicted to adultery might seem to be a scandalous approval of this criminal life. For this latter reason, even nowadays, circumstances may arise making the dismissal of the guilty party a duty (cf. St. Alphonsus, VI, n. 963 sqq.). Commonly, however, at least for a single violation, there is no duty of separation; still less is there any duty of permanent separation; in fact, charity may in certain cases demand that after a temporary separation the contrite party might be invited or admitted to a renewal of the married life. There is, however, never any obligation of justice or reason against the guilty party. The most that some theologians recognize is an obligation of justice when the party originally innocent has meanwhile become guilty of the same crime. The innocent party always retains the right in justice to recall or to demand the return of the guilty party. If the innocent husband or wife wishes to give up this right forever, then he or she can enter a religious order, or he may receive Holy orders, without the necessity of consent on the part of the guilty wife or husband who has been dismissed, or without any further obligation (see the case of Ann.; cf. Decretal., xxxii, 15, 16). The guilty party can, however, proceed to the religious life or to the reception of Holy orders only with the consent of the innocent. This consent must either be granted expressly or be deduced with certainty from the constant refusal to be reconciled. It is the business of ecclesiastical authority to decide in any case, whether such certainty exists or not. A further obligation, such as the vow of perpetual chastity, is not imposed upon the innocent party, but the freedom to remarry is allowed after the death of the other spouse (cf. III Decretal., xxxii, 10; Werns, op. cit., n. 710, not. 128; St. Alphonsus, VI, n. 969).

3. Heresy or Deception from the Faith.—Next to adultery, a reason for separation almost equivalent to it is defection from the Faith, whether by the rejection of Christianity or by heresy (IV Decretal., xxxii, 6, 7). However, there are some important differences to be noted:—

(a) In the case of adultery, a single action, if proven, is enough for permanent separation, but in the case of heresy or heresy, a certain persistence in the sin is required (cf. St. Thomas, IV Sent., dist. xxxix, Q. i, a. 1), such for example as adhesion to a non-Catholic denomination.

(b) An ecclesiastical sentence is necessary in this case for the right of permanent separation. If this sentence has not been obtained, the guilty party can receive Holy orders, and thereby render it impossible to return to married life. It need hardly be mentioned that infidelity or heresy, as such, gives no just cause for separation of any kind, if it existed before the marriage was contracted, and if a dispensation from the impediment of disparity of worship between a baptized and a non-baptized person has been granted, or if a valid marriage, even without ecclesiastical dispensation, has taken place between a Catholic and a baptized non-Catholic. In such cases, passage from one religious life to another does not give a reason for separation.

4. Danger to Body or Soul.—Besides these special cases of separation founded on ecclesiastical law, many other cases may arise, which, of their nature, justify temporary separation. They are summed up under the general notion of "danger to body or soul" (periculum corporis aut animae). There must, of course, be question of an approximate danger of great
II. In Civil Jurisprudence.—Divorce is defined in civil jurisprudence as "the dissolution or partial suspension by law of the marriage relation" (Bouvier's Law Dictionary). Strictly speaking, there is but one form of absolute divorce, known, under the name derived from the civil and canon law, as divorce aiceps or divorce a vinculo matrimonii, i.e., from the bed and board. In addition, in some states courts grant decrees declaring marriages absolutely void, ob initio, i.e., from the beginning. Such marriages never having been valid, the parties cannot be said to have been divorced; however, proceedings for nullity are frequently provided for under divorce statutes.

Pre-Christian Divorce Legislation among the Hebrews, Greeks, and Romans.—Before the adoption of Christianity as the state religion of the Roman Empire, it would appear that divorce in some form was known, at least, in the Greek and Roman cultures where the foundations of the European civilisation is derived. Among the Hebrews no precedent for divorce can be found prior to the Mosaic Law. It became frequent afterwards, though it would seem that the husband alone possessed the power necessary to justify separation for any length of time. Other inconveniences must be borne with Christian patience. Great crimes of one party, provided they are not against marital fidelity, or do not include any incentive to sin on the part of the other, do not, according to Catholic law, of themselves, justify divorce; neither do unnatural acts that might be inflicted on the guilty party in consequence of such crimes, even when this punishment be joined with dishonour. The Catholic view of this matter is directly opposed to the non-Catholic, which, as we have seen above under A. 3. (e), permits in such cases the dissolution of the marriage bond.

By private authority, i.e., without previous application to an ecclesiastical court and its decision, a temporary separation may take place when delay would bring danger. The church law does not allow a separation of the sexes under the title "division," II In matrimonio, (Fribourg, 1900), iv, 714; St. Alphonsus, "Theol. mor.," VI, n. 971), although, where there are evident and public reasons for separation, the non-observance of the Church's regulations can more easily be overlooked. Separation becomes a mere question of convenience never allowed to Catholics. (Cf. III Conc. plen. Baltim., tit. IV, c. ii.)

Aug. Lehmkuehl
DIVORCE

To make his declaration in the presence of seven witnesses, all Roman citizens of full age. Divorce remained, however, a private legal act. Women could obtain divorce without any fault of their husbands. Under the Roman law of the early imperial period, there was a separation pronounced, first, between parties whose marriage engagements were not legally contracted; second, where parties were separated when the contract of espousals had been made but not consummated by actual marriage. This was known as *repudium*. *Divortium* was a separation of persons, already married, and included divorce a *mensa et tora* and a *vinculo matrimonii*.

**Imperial Christian Legislation.** In 331 Constantine the Great restricted the causes for divorce to three on the part of the man, viz., if he was a murderer, a poisoner, or a robber of graves; and three on the part of the woman, viz., if she was an adulteress, a poisoner, or a corrupter of youth. Among soldiers an absence of four years was sufficient to entitle the petitioner to a divorce. This edict was ratified by Theodosius the Great and Honorius. Under Justinian seven causes of divorce were named: adultery, sterile marriage, and for divorce by mutual consent was restored by his nephew Justin (565-78). No change was now made in the Roman law until after a lapse of 340 years, when Leo the Philosopher (886-912) made a collection of laws known as the *Libri Basilici*, from which included the edicts of Justin.

**English Legislation.** According as Catholic doctrine penetrated more profoundly the medieval life, the laws of European nations were gradually accommodated to its demands. In this way, for example, the teaching of the Council of Trent (1563), which anathematized the error that marriage could so far be dissolved by divorce that it was lawful to marry again, was universally accepted among the nations adhering to the Catholic Church. This council, however, introduced thereby no essential change in the divorce law of the Church. Originally, under the common law of England, there was no jurisdiction on the subject of divorce excepting in the ecclesiastical courts, they having jurisdiction in all matters relating to marriage and divorce, the restitution of goods, and all other cases. But the statute of 1677 vested in the secular courts the jurisdiction of marriage. This followed from the Catholic doctrine that marriage, being a sacrament, could not be dissolved; for the same reason any question relative to its validity or to a suspension of conjugal rights was also heard by the ecclesiastical courts. The ecclesiastical law of England, though originating differently from the other branches of the common law and distinguished by special rules, was part of the unwritten law of the State, just as what are technically called the common law of admiralty and equity.

The Protestant Reformers rejected the sacramental theory of marriage, and agreed that absolute divorce should be granted for adultery and for malicious desertion, and that the innocent party might then remarry. But they also had divorce jurisdiction, and the ecclesiastical courts it was for some time a question among them whether marriage was dissolved *ipso facto* by the commission of one of these offenses, or whether it was necessary to have the dissolution declared by public authority. Luther recommended the parish priest as the proper tribunal. Appeals were sometimes taken to the prince or sovereign. Gradually ecclesiastical courts were created, of both lay and clerical members, under sanction of the civil power. In England under Henry VIII, after his separation from the Catholic Church, the law, under this view, was substantially changed. An effort was made in the time of Edward VI to secure the adoption of a new code of ecclesiastical laws, drafted by Cranmer, under which separation a *mensa et tora* was not recognized and complete divorce was granted in cases of extreme conjugal faithlessness; in cases of conjugal desertion or cruelty; in cases where a husband not guilty of desertion of his wife, had been several years absent from her, provided there were reason to believe him dead; and in cases of such violent hatred as rendered it in the highest degree improbable that the husband and wife would survive their animosities and again love one another. Divorce was denied when both parties were guilty of unfaithfulness, and when only one was guilty the innocent party might marry again. The ecclesiastical court was to decide all questions concerning these causes. It is said by Howard (Hist. of Matrim. Institutions, p. 80) that the principles of this code, known as the "Reformatio Legum", were carried out in practice, though not enacted into law. He adds that "according to the ancient form of judgment divorce was probably still pronounced only a *mensa et tora*; but what ever the shape of the decrees, there is strong evidence that from about 1548 to 1602, except for the short period of Mary's reign, 'the community, in cases of adultery, relied upon them as justifying a second act of matrimonial degeneration'. The law says aliter, but nearly the whole of Elizabeth's reign new marriages were freely contracted after obtaining divorce from unfaithful partners. However, in 1602 the Star Chamber pronounced a marriage invalid which had been contracted after separation from bed and board by the decree of an ecclesiastical judge (Foljambe's case, 3 Salk. 138).

Following this decision the canon law was administered in the English spiritual courts with such rigour that it required an Act of Parliament to permit a remarriage after divorce. In the tenth year of James I (1613) an Act was passed to restrain remarriage by one party while the other was alive, excepting, however, cases where sentences of divorce had been pronounced by ecclesiastical courts. There were some cases where, after sentence had been pronounced by an ecclesiastical court, a second marriage was upheld, but the decisions are generally to the effect that a perfect marriage cannot be dissolved excepting by death. Oughton says (tit. 216) "that the marriage tie once perfected cannot be dissolved by man, but only by natural death." The Act of 1657 permitted the granting of a decree of absolute divorce by any court having jurisdiction vested in Parliament. Precedents of divorce by Parliament strictly so called are not found earlier than 1698, but it came to be understood that if a divorce a *mensa et tora* had been granted by the spiritual court, a divorce would be granted by Parliament absolutely dissolving the marriage, though only for the cause of adultery on the part of the wife. By the Act of 1857 the entire jurisdiction in matrimonial questions was transferred to a new civil court for divorce and matrimonial causes, and since the Judicature Act of 1873 the marriage has been vested in the Supreme Court of Admiralty, and the admiralty division of the High Court of Justice. Its power is restricted, however, to England alone. The principles upon which divorce legislation may be based and which may be traced in the legislation of those countries that permit divorce, are stated by Bishop (Marriage, Divorce and Separation, §46, ed. of 1891) as follows:

"Matrimony is a natural right, to be forfeited only by some wrongful act. Therefore the government should permit every suitable person to be the husband of another, with the duty of performing the duties of the matrimonial relation; and when it is in good faith entered into, and one of the parties without the other's fault so far fails in those duties as practically to frustrate its ends, the government should provide some means whereby, the failure being estab-
lished and shown to be permanent, the innocent party may be freed from the mere legal bond of what has in fact ceased to be marriage, and left at liberty to form another. The principle of this policy, however, is one which has no claim to be protected in a second marriage; and whether it should be permitted to him or not is a question, not of right with him, but of public expediency, upon which there is considerable diversity of opinion.

Modern European Legislation.—A full collection of laws and statistics relating to marriage and divorce in European countries will be found in the report of the United States Commissioner of Labor, Carroll D. Wright, for 1889. It is therein stated that "prior to 1860 the ecclesiastical courts of most of the countries named more or less complete jurisdiction over matrimonial causes, but the civil courts have now exclusive jurisdiction over such matters in all of them". In Austria-Hungary absolute divorce is not allowed to members of the Catholic Church. Prior to 1 January, 1876, all the cantons of Switzerland had their own peculiar laws of divorce, but subsequent to that date a general law governing the subject took effect. In Germany perpetual separation equivalent to limited divorce was abolished throughout the empire in 1861, and the causes for such separation were reduced to causes for absolute divorce. In Hungary divorce has been legal for Protestants since 1786 and for Hebrews since 1863. The laws of their respective churches apply to Latin Catholics, Greek Catholics, and Orthodox Greeks. Questions of divorce or validity of marriage among Protestants are subject to the jurisdiction of the civil courts. Excepting for Protestants and Hebrews, the ecclesiastical courts of other bodies have jurisdiction. In case of mixed marriage the court of the defendant's confession has jurisdiction. In Italy, Spain, and Portugal, still Catholic countries, no absolute divorce is permitted. In Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, Mexico, and Cuba, limited divorce alone is permitted.

The following causes in Austria and in Hungary for absolute divorce are typical: in Austria, adultery; commission of a crime punishable by five years imprisonment; malicious abandonment or non-appearance after one year's solicitation where the absentee's residence is known; assault endangering life or health; repeated cruelty; unconquerable aversion, on account of which the parties demand a divorce; and any other cause which may be obtained by mutual consent on certain terms and conditions, but must be approved by the courts. In France divorce was introduced by the law of 1792. This law was modified in 1806 and in 1803 (Code Napoléon), was subsequently abrogated in 1816, and reintroduced in 1844; the grounds of divorce being adultery of either party; excesses, cruelty, grave injury inflicted by one spouse on the other; condemnation to infamous penalty of either of the spouses; mutual and persevering agreement of the parties to separate, if said consent is expressed and established as prescribed. By recent legislation, after the lapse of a fixed period of time, a decree of separation can be changed into a judgment of divorce on the application of either of the parties. (Civil Code, Sec. 307.) In the German Empire perpetual judicial separations have been abolished, and all suits for the relief of marriage with regard to that religious status may avail themselves of the laws of divorce which exist in their respective states. In Prussia there are seven causes known as major causes for divorce and six as minor causes. Among the major causes are: false accusations of serious crimes suffered by one of the parties against the other, and endangering the life, honour, or office of the other spouse; among the minor causes are: insanity, disorderly conduct or mode of living, refusal of maintenance or support by the husband. It may be noted that in the case of the minor causes, when the party seeking divorce is in a similar position as regards the causes for divorce. In Scotland divorce is granted for adultery and malicious desertion; the former since 1560; the latter since 1573. The injured party has the right to choose either a judicial separation or an absolute divorce. In Ireland the civil courts have no jurisdiction to grant divorce of absolute divorce. In Canada exclusive authority was conferred upon the Parliament by the British North America Act of 1867 (Sec. 91). At that time courts of divorce existed in Nova Scotia, New Brunswick, Prince Edward Island, and British Columbia, and they still continue to exercise the functions. Excepting in Prince Edward Island, the divorce courts appear to have been modelled upon the English court of divorce and matrimonial causes. A court of divorce and alimony was established in Prince Edward Island as early as 1836. In the other provinces of Canada no divorce court has ever been constituted and divorces are granted only by special Act of Federal Parliament. The courts of Quebec, however, can grant séparation de corps under the English divorce act. A divorce court for divorce and annulment on the ground of impotence.

In Australia, at the time of the formation of the Federal Commonwealth, there were divorce courts in all or almost all of the constituent states. Under the Constitution (Act of 1902, 2 Com. Stat. 144), power was granted to the Parliament of the Commonwealth of Australia, comprising the states of New South Wales, Victoria, South Australia, Queensland, Tasmania, and Western Australia, with respect to divorce and matrimonial causes and in relation to parental rights and the custody and guardianship of infants. The object of this subsection is stated to have been to avoid "the great mistake made by the framers of the Constitution of the United States of America, who left the question to the states to deal with as they respectively thought proper" and "to provide for uniformity in the law of divorce" (Quick and Garran, Aust. Const., pp. 262-609). The local statutes in the various states still prevail, however, with the right of appeal to the High Court with respect to judgments of the Supreme Court of a state (Act of 1903, 2 Com. Stat. 148). In New South Wales, divorce is a part of the Australian Commonwealth; divorce is allowed for adultery on the part of the wife, and adultery with certain aggravating circumstances, or with cruelty, on the part of the husband. (New Zealand Divorce.)

Divorce in the United States.—Colonial Period (1607-1787).—At the time of the settlement of the various colonies which subsequently declared their independence of Great Britain, there were no ecclesiastical courts; as in England, therefore, the practice of the special acts of legislatures obtained. Sometimes it was in the form of a private statute directly dissolving the marriage; sometimes the court was empowered to investigate the cause and grant the divorce if the complaint was sustained. There are many instances of legislative divorces granted in the New England colonies, all being divorces in vinculo. Adultery and adultery with cruelty were sufficient reasons, though male adultery would require additional circumstances. In the Southern colonies there was no court having jurisdiction to grant divorce, though in some of them the practice of the special acts of legislatures obtained. Under the Dutch government of New York the divorce jurisdiction was exercised by the courts of absolute, as well as for limited, separation, but the English took possession of the colony, this jurisdiction was not continued.Vandelius v. Vandelius (1810) 3 Pick. 195 was decided under "The Great Law of 1892"; divorce was authorized.
In New Jersey there was no divorce jurisdiction granted the courts. It may be said, therefore, that outside of New England during its colonial period there was no such thing as a judicial divorce.

From 1878-1906.—The Constitution of the United States does not grant the Federal Government any power over the subject of divorce. In this matter, therefore, Congress can legislate only for the District of Columbia and the territories. The only act created the territories give power to their legislatures over all "rightful subjects of legislation not inconsistent with the constitution of the laws of the United States"; special and general divorce laws are, therefore, in force when we come to the Act of 30 July, 1866, all special divorce acts have been expressly forbidden. The various states of the Union succeeded to the full sovereign rights exercised by the Parliament of England over all subjects relating to marriage and divorce, but in the absence of special divorce statutes, there being no tribunal having jurisdiction, the law would remain the same as in the colonies prior to the Revolution. However, all states of the Union have adopted divorce statutes, excepting South Carolina, and have clothed the courts with power to grant divorces. In some states the courts and territories divorce a vinculo and a mensis et toro are provided for, and in some of the states courts of equity take jurisdiction over special proceedings for a divorce of nullity of marriage. In some states it is a civil contract and in others forbidden. The causes for which a divorce may be granted vary from the single cause of adultery on the part of either husband or wife (law of New York and the District of Columbia) to nine separate causes in the State of Washington, the last being known as the "omnibus provision," which permits a divorce for any other cause deemed by the court sufficient, provided that the court shall be satisfied that the parties can no longer live together. In most of the states there is no restriction upon the parties remarrying after divorce, though in some, as in New York, the court may forbid the guilty party to remarry during the lifetime of the innocent, and in others, as in Pennsylvania, marriage of the guilty party with a paramour during the lifetime of the innocent party is null and void.

Great uncertainty as to the effect of the divorce statutes of the different states has arisen where relief has been sought by a party whose husband or wife was resident of a different state from that in which the proceeding was brought. While it is a fundamental principle that courts of any state have entire control over their own right of contract and divorce, a different question arises when the husband is a resident of one state and the wife of another. The English doctrine that the domicile of the husband is that of the wife, irrespective of where she may actually be living during coverture, does not prevail in the United States. For the purpose of a divorce proceeding the wife may have a domicile separate from that of her husband. In consequence of this rule of American law it has frequently happened that actions for divorce have been initiated and carried to a conclusion without the respondent receiving any actual notice of the proceeding. This is made possible by provisions in the state statutes providing for service of notice by publication, where actual service cannot be had upon a respondent by reason of absence from the state. While decrees granted in accordance with the statutes of any state are good in that state, there is no power to enforce a recognition of their validity in other states, and in consequence it frequently happens that a divorce may be valid in one state and invalid in another; the children of a second marriage are void, in some jurisdictions under a separate proceeding, in others under the form of a proceeding for divorce. These cases are (1) impotence, (2) consanguinity and affinity properly lim-
The growth of divorce in the United States under the general divorce laws has been unprecedented, and exceeds in number those of any other modern nation, except England. An analysis of statistics prepared by Carroll D. Wright, Commissioner of Labor, in 1889, showed the total number of divorces for a period of twenty years, from 1867 to 1887, to be 328,716, an increase of 157 per cent, while the increase in population for the same period was 60 per cent. The Commerce House of the Congress of the United States, issued by the Department of Labor and Commerce under authority of an Act of Congress, in 1908, shows that the total number of divorces for the entire country from 1887 to 1906 inclusive was 945,625. For the earlier investigation covering the twenty years from 1867 to 1886 inclusive, the number reported was 328,716, or hardly more than one-third of the number reported in the second twenty years.

At the beginning of the forty-year period covered by the two investigations, divorces occurred at the rate of 10,000 per year. At the end of that period the annual number was about 66,000. This increase, however, must be considered in connexion with the increase in population. An increase of 30 per cent in population between the years 1870 to 1880, was accompanied by an increase of 79 per cent in the number of divorces granted. In the next decade, 1880 to 1890, the population increased 25 per cent and divorces 70 per cent. In the following decade, 1890 to 1900, an increase of 21 per cent in population was accompanied by an increase of 66 per cent in the number of divorces. In the six years from 1900 to 1906, population, as estimated, increased 10.5 per cent and divorces 29.3 per cent. It thus appears at the end of the forty-year period that divorces were increasing about three times as fast as the population, while in the years 1870 to 1880 they increased only about two and two-thirds as fast.

The divorce rate per 100,000 population increased from 29 in 1870 to 82 in 1905. In the former year there was one divorce for every 3,441 persons and in the latter year one for every 1,218. The rate per 100,000 married population was 81 in the year 1870 and 200 in the year 1900. This comparison indicates that divorce is at present two and one-half times as common, compared with married population, as it was forty years ago. Divorce rates appear to be much higher in the southern states than in the northern states. Divorce is the annual death rate of families. In the United States and in many of the foreign countries for which statistics relating to this subject have been obtained, two-thirds of the total number of divorces granted in the twenty-year period covered by this investigation were granted to the wife. The most common single ground for divorce is desertion. This accounts for 38.9 per cent of all divorces (period 1887 to 1906), 49.4 per cent or almost one-half of those granted to the husband, and 33.5 per cent or one-third of those granted to the wife. The next most important ground of divorce is for, husbands, adultery, cruelty, and neglect of the marital duties; and for, wives, cruelty to husbands (1887 to 1906), 28.8 per cent were for adultery, and of those granted to wives 27.5 per cent were for cruelty. Only 10 per cent of the divorces granted to wives were for adultery of the husband, and 10.5 per cent of divorces granted to husbands were for cruelty on the part of the wife. Divorce rates were highest for divorce in 3.3 per cent of the cases for which the wife brought suit, and in 1.1 per cent of the cases in which the suit was brought by the husband. Intemperance was reported as an indirect or contributory cause for divorce in 5 per cent of the divorces granted to the husband, and in 18 per cent of the divorces granted to the wife, and appeared as a direct or indirect cause in 19.5 per cent of all divorces, and 26.3 per cent of those granted to wives, and 61 per cent of those granted to husbands. Only 15 per cent of the divorces were returned as contested and probably in many of these cases the contesting was hardly more than a formality. Alimony was demanded in 18 per cent of the divorces granted to the wife and was granted in 12.7 per cent. The proportion of husbands who asked that alimony be granted was 10.5 per cent obtaining it was 2 per cent. The average duration of marriages terminated by divorce is about ten years. Sixty per cent or three-fifths last less than ten years and forty per cent last longer. Of the divorces granted to husbands only 25 per cent known to have been married in the United States 38.5 per cent were granted in the same state in which they were divorced. Of the divorced couples known to have been married in foreign countries 36.9 per cent were married in Canada, 12.7 per cent in England, 10.1 per cent in Germany and 1.9 per cent in Ireland. Children were reported in 39.8 per cent of the total number of divorced cases. The proportion is much larger for divorces granted to the wife than for divorces granted to the husband; children being present in 46.8 per cent of the former class of divorces and 26 per cent of the latter. A suggestion has been made that the children are usually assigned by the court to the mothers, and to her, therefore, divorce does not imply separation from her children, while to the husband it involves a severance of the parental as well as the marital relation. In 1900, 16.9 per cent of the population in the United States in 1901 nineteen. In England there were 284 in 1902, as compared with 177 in 1901. In Germany at the same time there were about 10,000 annually, and in France 21,939, with a tendency towards a rapid increase. Among the Japanese there are about 100 divorces per annum. It is estimated that about fifty per cent of divorced couples have children, and it is urged "that consideration for the children of divorced people should be a first concern in stimulating restrictive legislation." It has been stated that three- fourths of the boys in 1887 to 1889, they increased only about two and two-thirds as fast.

Divorce Congress of 1906.—A well concerted effort was made in 1906, upon the initiative of the State of Pennsylvania, to secure uniform legislation by the various states and territories of the Union so as to eliminate as far as possible fraudulent proceedings for divorce. It resulted in the meeting of a Divorce Congress in the City of Washington, where all of the states, territories and districts of the United States, excepting those which had no representation, and one in Illinois, come from families broken up by death or divorce, "mainly by divorce" (The Divorce Question in New Hampshire, Rev. W. Stanley Emery). "Divorce Congress of 1906.—A well concerted effort was made in 1906, upon the initiative of the State of Pennsylvania, to secure uniform legislation by the various states and territories of the Union so as to eliminate as far as possible fraudulent proceedings for divorce. It resulted in the meeting of a Divorce Congress in the City of Washington, where all of the states, territories and districts of the United States, excepting those which had no representation, and one in Illinois, come from families broken up by death or divorce, "mainly by divorce" (The Divorce Question in New Hampshire, Rev. W. Stanley Emery)."
all uncontroverted cases, and in any other case where in
the judgment of the court it is wise, a disinterested
attorney should be assigned to defend the cause. No
decree should be granted on affirmative proof aside from
the answer to the complaint. A decree dissolving marriage so as to permit remarriage of either
party should not become operative until the lapse of a
reasonable time after hearing or trial upon the merits
of the case. If an inhabitant of one state should go
to another state or territory to obtain a divorce for a
cause which occurred in the matrimonial domicile, or
for a cause which would not authorize a divorce by the
laws of that domicile, such divorce should have no
force or effect in the state of the domicile. Fraud or
collusion in obtaining or attempting to obtain divorces
should be made a statutory crime. The legitimacy of
children born during coverture, except in the case of
bigamous marriages, should not be affected by divorce
of the parents. On the subject of causes each state
should legislate for its own citizens and the common
sentiment of that state should be properly expressed
by the enumeration of causes in its own statute. Those
heretofore given are recognized as representing the
view of the great majority as covering offenses against
the marriage contract of so serious a character as to
defeat the purpose of the marital relation. The con-
gress that the number of causes of divorce would be reduced rather than increased and declared its opinion that in such jurisdictions as New
York and the District of Columbia, where the only
cause is adultery, no change is called for. It was
recommended that where conviction of crime is made
a cause, it must be followed by imprisonment for two
years, but no absolute divorce should be granted for
infancy, and that desertion should not be a cause un-
less persisted in for at least two years. Practically
the same causes for divorce a mensa et thoro were
enumerated. The provisions of this statute have already been adopted in Delaware and New Jersey and
are under consideration (1908) in other states. While
the reforms thus suggested will not put an end to what
is known as the divorce evil, it is believed that they
will have the effect of safeguarding trials and abating
fraud upon the courts.

Philosophical thinkers recognize the fact that the
prevalence of divorce in the United States arises from
two causes. The first of these causes is the gradual
degradation in the attitude of society towards women in
the treatment of their individual rights to their own
property, and of their capacity to earn their own living
in many vocations heretofore closed to them. The
legal fiction that the identity of the woman was merged
in that of her husband has given place to a growing
recognition of her individuality in all relations of life.
This has weakened the dependence of women upon
their husbands for support and has affected the con-
cept of the family relation. The theory of the
Protestant leaders of the sixteenth century, that mar-
rriage is but a civil contract, void of sacramental
character, has been strengthened by the vicissitudes of
modern life, while the facility with which divorces can
be obtained has tended to a constant increase of their
number. Marriage, not being accounted a sacrament
by non-Catholic Christians, is entered into with greater
caution than a contract of far less moment affecting
property alone. The knowledge that in case of disagree-
ment the parties may obtain a divorce no doubt has
in effect. The second cause is the gradual increase
and development of irreligion and materialism among
the male members of the community. Leaders of
both the Church and State have been co-opted at the
progress of divorce, and have perceived the danger
involved in their various denominations to make
concessions as would restrict it to flagrant cases and
abolish it entirely. It is evident that the preva-
ence of divorce is an indication of an unsound con-
sciousness of society. Those who now endeavour to

reform the civil statutes in the interest of honest trials,
may succeed in abating some of the evils flowing from
lax methods of administering the divorce statutes in
some of the states, and in obtaining restrictive legis-
lation in all of them, but it is not probable that the
demoralization will be stopped until the
people of the civilized nations return to the belief in
the supernatural sanction of marriage and that it is
a sacramental union, productive of the graces necessary
to bear with one another's shortcomings; an indissolu-
bly united society as that of separate and disposable
bodies dissolved only in death. This means a return to
the Catholic view of marriage, and this return alone can
remove the national evil of divorce. (See MARRIAGE;
WOMAN; PARENTS; also the articles on various
states and countries for divorce legislation.)

Walter George Smith.

DIXON, Joseph, Archbishop of Armagh, Ireland.
b. at Coalisland, Co. Tyrone, in 1806; d. at Armagh, 29
April, 1866. Having entered Maynooth College at the
age of sixteen he was ordained priest in 1829. In 1834
he was appointed to the chair of Sacred Scripture and
Hebrew, a post he worthily occupied for the next
eighteen years. His class had an average of 200 stu-
dents, amongst whom was John McEvilly, afterwards
Archbishop of Tuam and a distinguished writer on
Scriptural subjects. Dr. Dixon's professorship was signali-1ed by his "Introduction to the Sacred Scrip-
tures", a work highly praised by Cardinal Wiseman
and which was very much needed at the time. The
first edition appeared in 1852 and a second in 1875.
As Primate of Armagh he held an important synod in
1854, at which all the bishops of the northern province
assisted with their theologians. In the same year he
began the heavy task of reorganizing the archiepiscopal
cathedral of Armagh and almost accomplished the
work before his death. In 1856 he formed the dio-
cesan chapter consisting of thirteen members. Dur-
ing his incumbency he brought some religious congre-
gations into the diocese, viz. the Little Sisters of Charity of
St. Vincent de Paul (1855), who opened a house in
Drogheda; the Marist Fathers (1861) who opened a
college and novitiate in Dundalk, and the Vincentian
Fathers who were placed in charge of the ecclesiastical
senatorial the same year. The primatial was a stanch
and fearless defender of the rights of the Holy See and
at a public meeting in Drogheda denounced Napoleon
III for complicity in the acts of the Italian revolution-
ists. His speech and subsequent letter to the "Free-
man's Journal" created a great sensation and the em-
bassador made them a subject of complaint to Pius IX.
The primatial was the organizer of the Irish Brigade in
the papal service.

Ambrose Coleman.

Dlugosz (Lat. Longinus), Jan, an eminent medi-
 eval Polish historian, b. at Brzezina, 1415; d. 19 May,
1480, at Cracow. He was one of the twelve sons born
of the family of John and Beata. Having decided to
emigrate in 1472 to Cusco, he entered the Academy of
Cracow, where he studied literature and philosophy.
He was ordained priest in 1440, and appointed secre-
tary of Cardinal Zbigniew Oleśnicki, Bishop of Cra-
oc. Later he became a prelate of the cathedral and
preceptor for the children of the Polish King.
Casmir IV, Jagiellończyk. He was employed as the ambassador of the Polish king to different foreign countries, and especially to Bohemia and Hungary, where he settled political disturbances. His ecclesiastical superiors sent him as their representative to Pope Eugenius IV, and as delegate to the Council of Basel. He reached the episcopacy of P† three years before his death was appointed Archbishop of Lemberg. Dlugosz expended his great income for religious and philanthropic purposes; he founded both churches and monasteries, also burse for the maintenance of poor scholars.

The most beautiful church which he founded, and beneath which he was buried, is in Cracow, and is called Na Skale (meaning, "Upon Rock"), as the church was built on an enormous rock. As a Polish historian he outranks all who preceded him. He was not content to repeat the statements made by other chroniclers, but examined for himself the oldest Polish, Bohemian, Hungarian, Ruthenian, and German documents, to understand which thoroughly he studied, in his old age, several foreign languages. His works are original and relate material not only for Polish, but also for general, historical.

Dlugosz paid less attention to beauty of style than to veracity of statement, and wrote in a philosophic manner, as one who saw the action and purposes of Providence in all historical events. His great history of Poland (Historia Poloniae in volutis) was composed by order of his friend and master Cardinal Oleśnicki. The works of Dlugosz were first published incompletely in 1614, and fully in 1711. The best edition is that in fourteen volumes by Carl Mecher-yszynski: "Ioannis Dlugoszis Senioris Canonici Cracovien-ensis Opera Omnia." (Cracow, 1863–87). It includes his heraldic work "Banderia Prutenorum," also his "Life of St. Stanislaus," "Life of St. Kings," lives of many Polish bishops (Sees of Wroclaw, Poznán, Płock, Cracow, etc.), "Liber beneficiorum diocesis Cracoviana," "Lives of five generals inter Poloni medieae Cruciferorum," "Annales seu cronices inediti regni Poloniae".

JOHN GODRYCK.

Dobeneck. See CIECHŁUS.

Dobrny, Marian, a distinguished Benedictine theologian, b. 24 Oct., 1765, at Schwandorf, Bavaria; d. 21 Dec., 1825, at Amberg, Bavaria. He first entered the Society of Jesus, and after its suppression in 1773 joined the Benedictines in the monastery of Weissenhoe, Diocese of Bamberg, where he was professed in 1775 and in 1778 ordained priest. He was successively professor of philosophy at Neuburg, Bavaria (1751–87), of dogmatic theology and ecclesiastical history at Amberg (1787–94), and of dogmatic theology and patrology at the University of Ingolstadt (1794–99). On the reorganization of the latter school in 1798 he returned to his monastery of Weissenhoe, where he remained until his death. He then retired to Amberg, where he taught theology until his death. In 1798 he published at Amberg a "Con- spectus Theologiae Dogmaticae," his chief work is the "Syntagma Theologie Catholicae," edited after his death by P. Benestrey in eight volumes (Stuttgart, 1807–19). The work is very learned and devoid of all harshness in its controversial parts.

FRANCIS J. SCHAEFER.

Dobrhiößler, Martin, missionary, b. in Graz, Styria, 7 Sept., 1717; d. in Vienna, 17 July, 1791. He became a Jesuit in 1736, and twelve years later set out for the missions of South America, where he laboured among the Guarani and the Abipones for eighteen years. On the expulsion of the Jesuits from the Spanish possessions in 1767, he returned to his native land.

The Empress María Theresa frequently sent for Dobrhiößler that she might hear his adventures from his own lips; and she is said to have taken great pleasure in his cheerful and animated conversation. He is the author of a work in three volumes entitled "Historiae de Abiponis, equestri bellicosissiique Paraguayana natione..." etc. (Vienna, 1783–1784), a German translation of which, by Professor Keil of the University of Pesth, was published in Vienna the same year. This work is of great ethnological value. In the preface he says, "A seven years residence in the other colonies of the Abipones has afforded me opportunities of closely observing the manners, customs, superstitions, military discipline, slaughters inflicted and received, political and economical regulations, together with the most important institutions in that country was unhappily effected. The English translation (An Account of the Abipones, an Equestrian People of Paraguay, London, 1822), commonly ascribed to Southey, is the work of Sara Coleridge, daughter of Samuel Taylor Coleridge, who judged it a performance "unsurpassed for pure mother-English by anything I have read for a long time".

Dobrhiößler in 1773 was appointed preacher to the Court in Vienna, a post which he held till his death.

EDWARD P. SPILLANE.

Docetae (Gr. σόκτηος), a heretical sect dating back to Apostolic times. Their name is derived from σόκτηος, "appearance" or "semblance," because they taught that Christ only "appeared" or "seemed" to be a man, to have been born, to have lived and suffered, but did not deny the divinity of Christ. They held together, some of His human body or of His birth or death. The word Docetae, which is best rendered by "Illusionists," first occurs in a letter of Serapion, Bishop of Antioch (190–203) to the Church at the see, where troubles had arisen about the public reading of the apocryphal Gospel of Peter. Serapion at first unsuspectingly allowed, but soon after forbade, this, saying that he had borrowed a copy from the sect who used it, whom we call Doctae. He suspected a communion with Marcionism, and found in this Gospel "some additions to the right teaching of the Saviour." A fragment of this apocryphon was discovered in 1866 and contained three passages which savoured strongly of Illuminism. The name further occurs in Clement of Alexandria (d. 215) Strom., III, xii, xvi, xvii, where these sectaries are mentioned together with the Damascenes as instances of heretics being named after their own special error. The heresy itself, however, is much older, as it is combated in the New Testament. Clement mentions a certain Julius Cassianus as a "Disciple of the Docetae," "the founder of Illuminism." This name is also applied to St. Jerome and Theodoret; and Cassianus is said to be a disciple of Valentinian, but nothing more is known of him. The idea of the unreality of Christ's human nature was held by the oldest Gnostic sects and
cannot therefore have originated with Cassianus. As clearly distinguished the Docetists from other Gnostic sects, he probably knew something of the substance of whose errors consisted in this illusion theory; but Docetism, as far as at present known, was always an accompaniment of Gnosticism or of Manicheism. The Docetism described by Hippolytus (Philos., VIII, i, xvi) are likewise a Gnostic sect: these perhaps extended their illusion theory to all material substances.

Docetism is not properly a Christian heresy at all, as it did not arise in the Church from the misunderstood doctrine of the incarnation. Yet a principle of antagonism between matter and spirit, and making all salvation consist in becoming free from the bondage of matter and remaining as pure spirit to the Supreme Spirit, could not possibly accept the sentence "the Word was made flesh," in a literal sense. In order to borrow from Christianity the doctrine of the Saviour who was Son of the Good God, they were forced to modify the doctrine of the incarnation. Their embarrassment with this dogma caused many misunderstandings and errors, and hence the undying allusion of an Aeon in a body which was incorruptible, but was not his own; others denying the actual objective existence of any body or humanity at all; others allowing a "psychic," but not a "hylic" or really material body; others believing in a real, yet not human body. The latter may have possessed nothing of the reality of the body but not the reality of the birth from a woman, or the reality of the passion and death on the cross. Christ only seemed to suffer, either because he ingeniously and miraculously substituted some one else to bear the pain, or because the whole occurrence on Calvary was a visual deception. Simon Magus first spoke of a "putative" passion of Christ and blasphemously asserted that it was really he, Simon himself, who underwent these apparent sufferings. As the angels governed this world badly because each angel coveted the principality for himself, be (Simon) came to improve matters, and was transfigured and rendered like unto the Virtues and Powers and Angels, so that he appeared amongst men as man though he was no man and was believed to have suffered in Judea though he had not suffered "passum in Judaeo putatum cum non esset passus"—Irenaeus, Adv. Her., I, xxiii seq.). The mention of the demiglory angels stamps this passage as a piece of Gnosticism. Soon after a Syrian Gnostic of Antioch, Saturninus or Saturnus (about 125) made Christ the chief of the Demiurgos, his subordinates, and body, by such a body (forma) and without body (formae) and without form (formae) and only apparently (φαναιρός) seen as man (Irenaeus, Adv. Her., XXV, ii).

Another Syrian Gnostic, Cerdo, who came to Rome under Pope Hyginus (132) and he, as the master of Marcion, taught that "Christ, the Son of the Highest God, appeared without birth from the Virgin, yea without any birth on earth as man." All this is natural enough; for matter not being the creation of the Highest God but of the Demiurgos, Christ could have none of it. This is clearly brought out by Tertullian is his polemic against Marcion. According to this heresarch (140) Christ, without passing through the womb of Mary and endowed with only a putative body, suddenly came from heaven to Capharnaum in the eleventh year of Tiberius; and Tertullian remarks: "All these tricks about a putative corporeality Marcion has adopted lest the truth of Christ's birth should be argued from the reality of his human nature, and thus Christ should be vindicated as the work of the Creator (Demiurgus) and be shown to have had human body as he had human birth" (Adv. Marcianum, III, xii). Tertullian further states that Marcion's chief disciple, Apelles, slightly modified his master's system, accepting indeed the truth of Christ's flesh, but strenuously denying the truth of His birth. He contended that Christ had an astral body made of superior substance, and he maintained the appearance of the angel to Abraham. This, Tertullian sarcastically remarks, is getting from the frying-pan into the fire, "de calcari in carbonariam." Valentinus the Egyptian attempted to accommodate his system still more closely to the Chaldean doctrine by admitting not merely the reality of the Saviour's body but even a seeming birth, saying that the Saviour's body passed through Mary as through a channel (διὰ διαδουλής) though he took nothing from her, but had a body from above. This approximation to orthodoxy, however, was too apparent, and the distinction between Christ and Jesus. Christ and the Holy Ghost were emanations from the Aeon Nous; and from all Aeons together proceeded Jesus the Saviour, who became united with the Messias of the Demiurgus.

In the East, Marinus and the school of Bardesanes, though not Bardesanes himself, held similar views with regard to Christ's astral body and seeming birth. In the West, Ptolemy reduced Docetism to a mere dogma by saying that Christ was indeed a real man, but his subsidence in the human body was of a pneumatic and the psychic (spiritual and ethereal). The pneumatic He received from Ahamoth or Wisdom, the psychic from the Demiurge; His psychic nature enabled him to suffer and feel pain, though He never suffered anything of a physical nature (Irenaeus, Adv. Her., I, xii, iv). As the Docetists objected to the reality of the birth, so from the first they particularly objected to the reality of the passion. Hence the clumsy attempts at substitution of another victim by Basilides and others. According to Basilides, Christ seemed to be a man and he have performed miracles. It was not, however, Christ who suffered but Simon of Cyrene, who was constrained to carry the cross and was mistakenly crucified in Christ's stead. Simon having received Jesus' form, Jesus assumed Simon's and thus stood by and laughed. Simon was crucified and Jesus returned to his father (Irenaeus, Adv. Her., I, xxv). According to some apocrypha it was Judas, not Simon the Cyrenian, who was thus substituted. Hippolytus describes a Gnostic sect who took the name of Docetis, though for what reason is not apparent, especially as their semblance theory was the least pronounced feature in their system. Their views were in close affinity to those of the Valentinians. The primal Being is, so to speak, the seed of a fig-tree, small in size but infinite in power; from it proceed three quincunes, tree, leaves, and flower; but most, but the perfect number ten, become thirty. These thirty Aeons together fructify one of themselves, from whom proceeds the Virgin-Saviour, a perfect representation of the Highest God. The Saviour's task is to hinder further transfiguration of souls from body to body, which is the work of the Great Archon, the Creator of the world. The Saviour enters the world unnoticed, unknown, obscure. An angel announced the glad tidings to Mary. He was born and did all the things that are written of him in the Gospels. But in baptism he received the figure and seal of another body besides that born of the Virgin. The object of this was that when the Archon condemned his own peculiar and of the flesh to the death of the cross, the soul of Jesus—that soul which had been nourished in the body born of the Virgin—might strip off that body and nail it to the accursed tree. In the pneumatic body received at baptism Jesus could triumph over the Archon, whose evil intent he had eluded. This heresy, which destroyed the very meaning and purpose of the incarnation, was combated even by the Apostles. Possibly St. Paul's statement that in the flesh dwelt the fulness of the Godhead corporaliter (Col., i, 19, ii, 9) has some reference to Docetic errors.

Beyond doubt St. John (I John, i, 1-3, iv, 1-3; II
John, 7) refers to this heresy; so at least it seemed to Dionysius of Alexandria (Eusebius, H. E., VII, xxv) and Tertullian (De carne Christi, xxiv). In sub-Apostolic times this sect was vigorously combated by St. Ignatius and Polycarp. The former made a warning to the Church to designate the heretics by the term "monsters in human shape" (μητρινοὶ ἄνθρωποι) and bids the faithful not only not to receive them but even to avoid meeting them. Pathetically he exclaims: "If, as some godless men {shows}, I mean unbelievers, say, He has suffered only in outward things, more than in themselves are mourning but outward show. Why am I in bonds? Why should I pray to fight with wild beasts? Then I die for nothing, then I would only be lying against the Lord," (Ad Trall., x; Eph., vii, xvii; Smyrn., 1-v). In St. Ignatius' day Docetism seems to have been closely connected with Judaism (cf. Magn., vii, 1, x, 3; Phil., vi, viii). Polycarp in his letter to the Philippian re-echoes St. John, iv, 2-4, to the same purpose. St. Justin nowhere expressly combats Docetic errors, but he mentions several Gnostics who were notorious for their Docetic aberrations, as Basilideans and Valentinians, and in his "Dialogue with Trypho the Jew" he strongly emphasizes the birth of Christ from the Virgin. Tertullian wrote a treatise "On the flesh of Christ" and attacked Docetic errors in it. In his "De that Marcus Aurelius in his "Philosophoumena" refutes Docetism in the different Gnostic errors which he enumerates and twice gives the Docetic system as above referred to.

The earlier Docetism seemed destined to die with the death of Gnosticism, when it received a long lease of life as a parallel error to another great heresy, that of Manicheism. Manichean Gnostics started with a twofold eternal principle, good (spirit) and evil (matter). In order to add Christian soteriology to Iranian dualism, they were forced, as the Gnostics were forced, with the tenets of Manicheism to distinguish between a Jesus patibilis and a Jesus impatibilis or Christ. The latter was the light as dwelling in, or symbolized by, or personified under, the name of the Sun; the former was the light as imprisoned in matter and darkness; of which light each human soul was a spark. Jesus patibilis was therefore but a figure of speech, an abstraction for the Good in the world; Jesus impatibilis, the unallyed Good, the pure light alone. In the reign of Tiberius Christ appears in Judaea, Son of the Eternal Light and as such in the world but not in the world; this is a technical Manichean term for the Μέγιστος και Αληθινός; both διάνοια and ενόρια are emanations of the Deity. Though Christ is son of man He has only a seeming body, and only seemingly suffers. His passion was called the mystical death, so that it was obvious that this doctrine borrowed from that of the Incarnation nothing but a few names. Scattered instances of Manichean Docetism are found as far west as Spain among the Priscillanists of the fourth and the fifth century. The Paulicians in Armenia and the Selicians in Cappadocia confessed these errors. The Paulicians existed even in the tenth century, denying the reality of Christ's birth and appealing to Luke, vii, 20. God, according to them, sent an angel to undergo the passion. Hence they worshipped not the cross but the Gospel, Christ's word. Among the Slavs the Bogomilism revived the ancient fancy that Jesus entered Mary's body by the right ear, and receiv- ered from her but an appendant body. In the West a council of Orleans in 1022 condemned thirteen Catharist heretics for denying the reality of Christ's birth and death. In modern theosophic and spiritist circles this early heresy is being renewed by ideas scarcely less fantastic than the wildest vagaries of old.

J. P. ARENDZEN.

Docetism. See DOCETISM.

Docetism, a titular see of Phrygia in Asia Minor. This city, as apparent from its coins where the inhabitants are called Macedonians, must have been founded by Antigonos Dokimos. Its name is written Dokimeion, Dokimia, Kome, Dokimaon, later Dokimiou. It was famous for its marble-quarries, and is now identified with İle, near the ancient north-eastern limit of Afion. The Charioteers, in the villagio of Brusa. On this site have been found many Christian inscriptions, later than Constantine. Docetism was a suffragan of Siamyd in Phrygia Salutaris. Six or seven bishops are known, from 344 to 679 (Lequien, Or. Christ., i, 832); another bishop is mentioned in an inscription.

S. PÉTRÉDIEU.

Doctor (Lat. docere, to teach), the title of an authorized teacher. In this general sense the term occurs in the O. T.; the "doctors" are mentioned with the "princes and ancients" (Deut., xxix, 10; xxxi, 19); and the "philosopher" in (1 Paral., xvi, 3) that "many days shall pass in Israel, without the true God, and without a priest a teacher, and without the law" (absque sacerdoti docente, et absque leges). It was the duty of these doctors to expound the law, and they performed at the time of Christ, who was found in the Temple "in the midst of the doctors" (St. Luke, ii, 46). Another meeting of Our Lord with the "doctors of the law" is recorded in St. Luke, v, 17. The later Jewish teachers also received the title (doctor gemaricius, doctor minicarius—see Talmud). Under the New Law the doctors were those who had a special gift or charisma (see Charismata) such as the "prophets and doctors" of the Church at Antioch (Acts, xiii, 1), and of which St. Paul says that "God indeed hath set some in the church; first apostles, secondly prophets, thirdly doctors (1 Cor., xii, 28; Eph., iv, 11). St. Paul speaks of himself as a doctor of the Gentiles in faith and truth (I Tim., ii, 7), and Doctor gentilum is one of the titles given him in the Liturgy. In the early Church, teachers in the catechetical schools were known as doctrines (Cyprian, Ep. xxi, ed. Chatier) to express the fact that the most illustrious theologians were designated as "Doctors of the Church" (q. v.).

The use of Doctor as an academic title dates from the founding of the medieval universities. Before this there was no such title. The Council of Orange in 1274 ordained that any teacher who gathered about him a number of students was a doctor, dominus, or magister. During the first half of the twelfth century, the title Doctor acquired a more special significance, though it still implied personal excellence rather than official position. The "Four Doctors" who succeeded Irenæus at Antioch were the distinguished jurists, Martinus (d. before 1166), Bulgarus (d. 1166), Hugo (d. 1168), and Jacobus (d. 1178). But when the doctors formed a collegium they prescribed conditions on which other persons might be admitted to the title. Thus, in 1274, they laid the foundation of the system of academic degrees. The doctorate was first granted in civil law (doctoris legum), later in canon law (doctoris decretorum), and, during the thirteenth century, in medicine, grammar, logic, and philosophy. The doctorate was conferred on Oxford and Cambridge in the fifteenth century. For graduates in arts and theology, magister was more generally employed than doctor, but for a long time these titles were synonymous. The English universities, adopting the usage of Paris, at first designated teachers of law as doctors, and pro-
The chief significance of the doctorate lay in the fact that it authorized the recipient to teach everywhere without undergoing further examination—*jus ubique docendi*. This prerogative developed gradually out of the *licentia docendi* which the degree itself implied, i.e., the right to teach in the university which conferred the doctorate. But as the older universities, Bologna, Paris, and Oxford, grew in importance and attracted students from all parts, the idea naturally spread that their graduates had the right to teach everywhere. Subsequently, this authorization was expressly granted to newly founded universities: by Gregory V to Toulouse (1229) and by Alexander IV to the University of Monte- nesta (1255). It was long, however, before the universities came to a mutual recognition of their degrees. Paris held tenaciously to its rights; Oxford was more liberal, but would not permit a Parisian doctor to teach merely on the strength of his degree. The doctors themselves were not always anxious to exercise their prerogative; the teaching devolved in large measure upon the bachelors, and the masters were classified as regents (those who taught) and as non-regents, who were content with the prestige implied by the title for other reasons.

The essential meaning of the doctorate as fixed by the medieval universities is preserved in modern academic usage; the degree implies a qualification to teach. It has, however, undergone various modifications in its application to the development of the sciences and partly to changes in educational theory and practice. The degree, Doctor of Laws, is often conferred as an honorary title. The doctorate in theology, or divinity, has been retained by Catholic institutions as a degree to be given either after a course of study and an examination or as a distinction (honoris causa); while the tendency among non-Catholic universities is to confer it only as an honorary degree. Of late the doctorate in philosophy has attained great importance, and its value has been enhanced as the result of stricter requirements. For this and for the other doctorates, research is now generally considered the principal qualification, and in consequence the candidate's work is becoming more specialized.

The influence of the Holy See, in regard to the doctorate, especially in theology, has been exerted in various ways, e.g., by authorizing universities to confer the degree, by prescribing through papal legates the conditions for obtaining it, and by correcting abuses, notably laxity of requirements, which crept in from time to time. The historical details will be found in the articles above. Concerning the ecclesiastical side of the subject may be summarized as follows:

1. The power of creating doctors belongs to the pope; but he may, and often does, delegate it to universities, seminaries, and other institutions of learning. Charters granted by civil authority are valid, but to obtain canonical recognition, doctorates in theology and canon law must be conferred in virtue of pontifical authorization.

2. The candidate for the degree must be a baptized Christian and must subscribe to the profession of faith formulated by Pius IV. As a rule, only priests receive the doctorate in theology and canon law. It is not, however, necessary that the recipient should be in Sacred orders. Laymen as well as priests are allowed to appear as advocates before the Roman tribunals (Rota, Signatura) and are required to have the doctorate at least in canon law (Const. "Sapientia consilio", 29 June, 1908).

3. The doctoral biretta, or four-cornered cap, may be worn on academic occasions, but not in choir (Cong. of Rites, "In Venustas", 1844, and reply to the Archbishop of Santiago de Chile, 6 Sept., 1893); the ring may be worn at all times except at Mass and other ecclesiastical functions (Cong. of Rites, 12 Feb., 1892).

4. The Council of Trent (Sess. XXII, c. ii, "de
Ref." deemed that a bishop must be either a doctor or licentiate in theology or in canon law; if a religious, he should have proper testimonials from his superiors. It enacted the same requirement for the archdeacon (Sess. XXIV, c. xii., "de Ref."). Regarding the vicar capitular and the penitentiarius, it prescribed that they should either have the degree or be otherwise well qualified. The Congregation of Studies recently decided (7 March, 1908) that the penitentiary and theologian of the cathedral chapter, if not already doctors, must receive the degree within a year. The Const. "Sapienti consilio" (29 June, 1866) prescribed the doctorate in theology and canon law for the officials of the Rota and Signatura. It has been a matter of controversy whether the vicar-general is obliged to be a doctor, and whether the Tridentine decree concerning the archdeacon is still in force. For the divergent opinions, see Card. Gennari, "Questioni Canoniche" (Rome, 1908), pp. 372, 292. The whole tenor of ecclesiastical legislation has been in favour of requirements which secure scientific qualifications in those who are appointed to official positions in the Church.

DOCTORS, SURNAMES OF FAMOUS. It was customary in the Middle Ages to designate the more celebrated among the doctors by certain epithets or surnames which were supposed to express their characteristic excellence or dignity. This was especially the case with the doctors in law and theology. The following list exhibits the principal surnames with the dates of death.

**Doctors in Theology:**

Abstractionum—Francis Mayron, O.F.M., 1325 or 1327.

Acutissimus—Sixtus IV, 1484.

Acus—Gabriel Vasque, S.J., 1604.

Amaenus—Robert Conton, O.F.M., 1340.

Angelicus—St. Thomas Aquinas, O.P., 1274.

Angelicus—St. Anthony of Padua, 1231.

Authenticus—Gregory of Rimini, O.S.A., 1358.

Averroista et philosophiae pares—Urbanus, O.S.M., 1403.

Beatus et fundatissimus—Egidius of Colonna, O.S.A., 1316.

Bonus—Walter Brinkley, O.F.M., 1310.

Christianus—Nicholas of Cusa, 1464.

Clarus—Louis of Montesinos, 1621.

Clarus ac subtus—Denis of Citateux, 15th cent.

Collegetii—Landolf Caracciolo, O.F.M., 1351.

Columna doctorum—William of Champexus, O.B.S., 1121.

Contradictionum—Johann Wessel, 1489.

Doctor doctorum, Scholasticus—Anselm of Laon, 1117.

Dulcitius—Antonio Andreas, O.F.M., 1320.

Ecstaticus—Denys the Carthusian, 1471.

Eminens—St. John of Matha, O. Tr., 1213.

Emporium theologorum—Laurent Servais, O.P., 1483.

Exemptissimus—Antonio Corsetti, 1503.

Eximius—Francisco Suarez, S.J., 1617.

Facundus—Petrus Aureoli, O.F.M., 1322.

Famosissimus—Petrus Alberti, O.S.B., 1426.

Famigerus—Bertrand de la Tour, O.F.M., 1354.

Familius—Francis of Cambia, O.F.M., 15th cent.

Flavius mundi—Maurice O'Fielphy, O.F.M., Abp. of Tuam, 1513.

Fundamentalis—Joannes Faber of Bordeaux, 1350.

Fundatissimus—see Beatus.

**DOCTOR**

Fundatus—William Ware, O.F.M., 1270.

Illuminatus—Alexander Alamannicus, O.F.M., 15th cent.

Illuminatus—Francis Mayron, O.F.M., 1325–27.

Raymon Luliy, O.F.M., 1315.

Illuminatus et sublimis—Joannes Tauler, O.P., 1351.

Illuminatus et sublimis—Franciscus Picensus, O.F.M., 14th cent.

Illuminatus—Adam of Marisco, O.F.M., 1308.

Inclitus—William Mackselfield, O.P., 1300.

Ingeniosissimus—Andrew of Newchurch, O.F.M., 1300.

Inter Aristotelicos Aristotelicissimus—Haymo of Faversham, O.F.M., 1244.

Invincibilis—Peter Thomas, O.F.M., 14th cent.

Irreprehibilis—Alexander of Hales, O.F.M., 1245.

Magister Sententiarum—Peter Lombardi, 1164.

Magnus—Albertus Magnus, O.P., 1280; Gilbert of Oteaux, O.Cist., 1280.

Marinus—St. Anselm of Canterbury, O.S.B., 1109.

Melius—St. Bernard, O.Cist., 1153.

Melius—Antonio Perez, S.J., 1649; Roger Bacon, O.F.M., 1294.

Moralis—Gerard Eudo, O.F.M., 1349.

Notabilis—Pierre de l'Ille, O.F.M., 14th cent.

Ordinatisissimus—Johannes de Bassolis, O.F.M., c. 1347.

Oratum et suicientes—Petrus de Aquila, O.F.M., 1344.

Parisius—Guy de Perpignan, O.Carm., 1342.

Planus et utilis—Nicolas de Lyre, O.F.M., 1340.

Practicus—Peter of Kaiserslautern, O.Prem., 1330.

Presbantisissimus—Thomas Netter (of Walden), O.Carm., 1431.

Profundus—Thomas Bradwardine, 1349.

Refulgidus—Alexander V, 1410.

Resolutissimus—Durandus of Saint-Pourçain, O.P., 1334.

Resolutus—John Bacon, O.Carm., 1348.

Scholasticus—Peter Abelard, 1142; Gilbert de la Porre, 1154; Peter Lombard, 1164; Peter of Poitiers, 1205; Hugh of Newcastle, O.F.M., 1322.

Seraphicus—St. Bonaventure, O.F.M., 1274.

Singulari et invincibili—William of Occam, O.F.M., 1247 or 1359.

Solenius—Henry of Ghent, 1293.

Solidus, Copiosus—Richard of Middleton, O.F.M., 1300.

**Speculatius**—James of Viterbo, O.S.A., 1307.

Sublimis—Francis de Bachone, O.Carm., 1372; Jean Courte-Cuisse, 1425.

Subtilis—Duns Scotus, O.F.M., 1308.

Subtilissimus—Pater de Mantus, 14th cent.

Sucinctissimus—Francis de Ascoli, c. 1344.

Universales—Alanus of Lille, 1202; Gilbert, Bishop of London, 1134.

Venerabilis et Christianissimus—Jean Gerson, 1429.

Venerandus—Geoffroy de Fontibus, O.F.M., 1240.

Vitus Arbor—Johannes Wallensis, O.F.M., 1300.

**Doctors in Law:**

Aristotelis anima—Francis Donatus, 1380.

Doctor a doctoribus—Antonius Franciscus, 1525.

Fons canonum—Johannes Andreae, 1348.

Fons juris utriusque—Henry of Susa (Ostia), 1287–91.

Lucerna juris—Baldus of Ubaldis, 1400.

Lucerna juris pontifici—Nicholas Todeschi, O.S.B., 1445.

Lumen juris—Clement IV, 1268.

Lumen legum—Irnerius, 13th cent.
THE MADONNA AND DOCTORS OF THE CHURCH—MORETTO

STÄDL ART INSTITUTE, FRANKFURT

ST. AMBROSE  ST. AUGUSTINE
ST. GREGORY  ST. JEROME
DOCTORS

E. A. PACE.

Doctor Angelicus. See THOMAS AQUINAS, SAINT. DOCTOR OF THE LAW. See LAW; SCIENCE.

DOCTORS OF THE CHURCH (Lat. Doctores Ecclesiae).—Certain ecclesiastical writers have received this title on account of the great advantage the whole Church has derived from their doctrine. In the Western Church four Doctors stand in the highest honour in the early Middle Ages: St. Gregory the Great, St. Ambrose, St. Augustine, and St. Jerome. The “four Doctors” became a commonplace among the Scholastics, and a decree of Boniface VIII (1298) ordering their feasts to be kept as doubles in the whole Church is contained in his sixth book of Decretals (cap. “Glorious,” de reliqu. et vener. sanctorum, in Sexto, III, 22). In the Eastern Church three Doctors were pre-eminent: Chrysostom, Basil, and Gregory Nazianzen. The feasts of these three saints were made obligatory throughout the Eastern Empire by Leo VI, the Wise, the deposer of Phocas. A common feast was later instituted in their honour on 30 January, called “the feast of the three Hierarchs.” In the Menae for that day it is related that the three Doctors appeared in a dream to John, Bishop of Euchaites, and commanded him to institute a festival in their honour, in order to put to the rivalry of their votaries and panegyrists. This was under Alexius Comnenus (1081-1118; see “Acta SS.”, 14 June, under St. Basil, c. xxxviii). But sermons for the feast are attributed in MSS. to Coemans Vestinae, who flourished in the tenth century. The three are as common in Eastern art as the four are in Western. Durandus (i, 3) remarks that Doctors should be represented with books in their hands. In the West analogy led to the veneration of four Eastern Doctors, St. Athanasius being very rarely added to the three hierarchs.

To these great names others have subsequently been added. The requisite conditions are enumerated as three: eminens doctrina, insigne viti sanctitas, Ecclesia declaratio (i.e. eminent learning, a high degree of sanctity, and proclamation by the Church). Benedict XIV explains the third as a declaration by the supreme pontiff or by a general council. But though general councils have acclaimed the writings of certain Doctors, no council has actually conferred the title of Doctor of the Church. In practice the procedure consists in extending to the Universal Church the use of the Office and Mass of a saint in which the title of Doctor is applied to him. The decree is issued by the Congregation of Sacred Rites and approved by the pope, after careful examination, if necessary, of the saint’s works. As a matter of education, nor does it even amount to a declaration that no error is to be found in the teaching of the Doctor. It is, indeed, well known that the very greatest of them are not wholly immune from error. No martyr has ever been included in the list, since the Office and Mass of the Saint have already been decreed; hence, as Benedict XIV points out, St. Ignatius, St. Irenaeus, and St. Cyprian are not called Doctors of the Church.

The proper Mass of Doctors has the Introit “In medio”, borrowed from that of the Theologus par excellence, St. John the Evangelist, together with special prayers and Gospel. The Credo is said. The papal peculiarity of the Office is the antiphon to the Magnificat at both Vespers, “O Doctor optime”, and it is rather by this antiphon than by the special Mass that a saint is perceived to be a Doctor (S. R. C., 7 Sept., 1754). In fact, St. John Damascene has a Mass of his own, while Athanasius, Basil, Leo, and Cyril of Jerusalem have not the Gospel of Doctors, and several have not the collect. The seal of the four Latin Doctors were not added to until the sixteenth century, when St. Thomas Aquinas was declared a Doctor of the Dominican St. Pius X, in his new edition of the Breviary (1568), in which the feasts of the four Greek Doctors were also raised to the rank of doubles. The Franciscan Sixtus V (1588) added St. Bonaventure. St. Anselm was added by Clement XI (1720), St. Isidore by Innocent XIII (1722), St. Peter Chrysologus by Benedict XIII (1729), St. Leo I (a well-deserved but belated honour) by Benedict XIV (1754), St. Peter Damian by Leo XII (1828), St. Bernard by Pius VIII (1830). Pius IX gave (1851) the honour to St. Hilary and to two more modern saints, Alphonse X of Liguori (1787) and Francis of Sales (1797). Benedict XIV promoted (1853) the Easterns, Cyril of Alexandria, Cyril of Jerusalem, and John Damascene, and last of all the Venerable Bede (1899). The same pope, when, in 1882, he introduced the simplification of double feasts, made an exception for Doctors, whose feasts are always to be transferred.

There are therefore now twenty-three Doctors of the Church, of whom seven are Eastern, sixteen Western. Two are popes, two are cardinals, all but five are bishops. They include a Dominican, a Franciscan, a Redemptorist, and five Benedictines. For some of these the Office had previously been granted to certain places or orders—St. Peter Damian to the Camaldolese, St. Isidore to Spain, St. Bede to England and to all Benedictines. St. Leander of Seville and St. Fulgentius are kept as Doctors in Spain, and the former by Benedictines, as also he was in earlier times claimed as a monk. St. Ildoephonus has the Introit “In medio” in the same order (for the same reason) and in Spain, without the rank of Doctor.

JOHN CHAPMAN.

DOCTINARIANS. See BUS, CESAR DE, VENERABLE.

DOCTRINE, CHRISTIAN.—Taken in the sense of “the act of teaching” and “the knowledge imparted by teaching”, this term is synonymous with CATECHESIS and CATECHISM. Διακρίνω, διδάξω, in the Vulgate, doctrine, are often used in the N.T., especially in the Apostolic Epistles. As we might expect, the Apostle insists upon “doctrine” as one of the most important duties of a bishop (1 Tim., iv, 13, 16; v, 17; II Tim., iv, 2, etc.). The word εὐαγγέλιον means instruction by word of mouth, especially by questioning and answering. Though it may apply to any subject-matter, it is commonly used for instruction in the elements of religion, especially preparation for initiation into Christianity. The word and others of the same origin occur in St. Luke’s Gospel: “That thou mayest know the verity of those things in which thou hast been instructed” (Acts, xv, 29). In the Acts, xviii, 25, Apollo is described as “instructing razors, and doctors in the way of the Lord”. St. Paul uses the word twice: “I had rather speak five words with
DOCTRINE

my understanding, that I may instruct [σαρώγον, instrum] others also ’ (1 Cor. xiv, 19); and ’Let him that is instructed [ὁ σωρώγον, qui catechizatur] in the word, communicate to him that instructeth [τῷ σωρώγον, et qui catechizatur] him, in all good things’ (Gal. v. 14). Hence the technical training of oral religious instruction, passed into ecclesiastical use, and is applied both to the act of instructing and the subject-matter of the instruction. The word catechism was also formerly used for the act of instructing (’To say ay, and no, to these, particular, is more of a catechising in a catechism’—As You Like It, act iii, sc. 2), as catechism is still used in French; but it is now more properly applied to the little printed book in which the questions and answers are contained. The subject will be treated in this article under the three heads: I. History of Catechetics; II. Practical Catechetics; III. Modern Catechisms.

I. History of Catechetics.—(1) Oral instruction by means of questions and answers has occupied a prominent place in the scholastic methods of the moral and religious teachers of all countries and of all ages. The Socratic dialogues will occur to everybody as brilliant examples. But many centuries before Socrates’ day this method was practised among the Hebrews (Exod. xii, 26; Deut. vi, 7, 20, etc.). They had three forms of catechizing: domestic, conducted by the head of the family; religious, benefiting the child’s life; scholastic, by teachers in schools; and ecclesiastical, by priests and Levites in the Temple and the synagogues. Proselytes were carefully instructed before being admitted to become members of the Jewish faith. The regular instruction of children began when they were twelve years old. Thus we read of Christ “in the temple, sitting in the midst of the doctors [αδειαν διδάσκοντας], hearing them, and asking them questions. And all that heard him were astonished at his wisdom and his answers” (Luke ii, 46, 47). During his public life Jesus made use of the Socratic method to impart instruction: “What think ye of Christ? Whose son is he?” ’Whom do men say that the son of man is? . . . Whom do you say that I am?” etc. In his final charge to His Apostles He said: “Teach ye [μαθήτρες, make disciples, or scholars?] all nations; . . . Teaching [διδασκαλούντας, instructing?] them to observe all things whatsoever I have commanded you” (Matt. xxviii, 19). And after this instruction they were to initiate them into the Church, “baptizing them in the name of the Father, and of the Son, and of the Holy Ghost” (ibid., Acts xi). (2) In obedience to Christ’s command, St. Peter, “standing up with the eleven”, declared to the Jews on Pentecost day, and proved to them from the Scriptures that Jesus, whom they had crucified, was “Lord and Christ.” When they had been convinced of this truth, and had compunction in their heart for their crime, they asked, “What shall we do?” And Peter answered, “Do penance, and be baptized . . . in the name of Jesus Christ, for the remission of your sins.” ’And with very many other words did he testify and exhort, saying, “Repent ye, and be converted, that your sins may be blotted out” (Acts v. 31). This was the first formal abridgment of the first catechetical instruction given by the Apostles. It is both doctrinal and moral—the hearers are to believe and to repent. This twofold element is also contained in St. Peter’s second discourse after healing the lame man in the Temple (Acts iii). St. Stephen goes further, and brings out that belief in Jesus as the Christ (Messiah) meant the ending of the Old Covenant and the coming in of a New (Acts vi, vii). St. Philip the Deacon preached “of the kingdom of God, in the name of Jesus Christ”; and the Samaritans “were baptized, both men and women” (Acts viii). Furthermore, St. Peter and St. John came from Jerusalem and “prayed for them, that they might receive the Holy Ghost”; and doubtless declared to them the doctrine of that Holy Spirit (ibid.). The same deacon’s discourse to the eunuch deals with the proof from Scripture, and notably Isaias (xlii, 7), that “Jesus Christ is the Son of God”, and the necessity of baptism. No mention is made of penance or repentance, as the eunuch was just a man anxious to do God’s will. So, too, Cornelius, “a religious man, and fearing God with all his house”, received the Holy Spirit, and “always praying to God”, did not need much moral instruction; accordingly St. Peter speaks to him of Jesus Christ who “is lord of all . . . Jesus of Nazareth: how God anointed him with the Holy Ghost, and with power, who went about doing good, and healing all that were oppressed by the devil, for God with him. And we are witnesses of all things that he did in the land of the Jews and in Jerusalem, whom they killed, hanging him upon a tree. Him God raised up on the third day, and gave him to be made manifest . . . even to us who did eat and drink with him after he arose again from the dead; and he commanded us to preach to the people, and to testify that it is he who was appointed by God, to be judge of the living and of the dead. To him all the prophets give testimony, that by his name all receive remission of sins, who believe in him” (Acts, x). In this discourse we have the chief articles of the Creed: the Trinity (God, Jesus Christ “Lord of all things”, the Holy Ghost), the Crucifixion, Death, and Resurrection of Our Lord; His coming to judge the living and the dead, and the remission of sins. These are a basis for the catechism. Theologians, though of course, in addressing the pagans, whether peasants at Lystra or philosophers at Athens, he deals with the fundamental truths of the existence and attributes of God (Acts, xiii, xiv, xvii). As he himself summed up the matter, he taught “publicly, and from house to house, testifying both to Jews and Gentiles penance towards God, and faith in [εἰς] our Lord Jesus Christ” (Acts xx). We find also that though Apollo was “instructed [σωρώγον] in the way of the Lord”; Priscilla and Aquila “exposed unto him the way of the Lord” (6 κατορθοποιοῦντες—Acts, xviii.—See Apostles’ Creed).

(3) The materials for describing the catechetical teaching of the ages immediately succeeding the Apostles are scanty. The books of the New Testament were available, and all that would be needed would be to supplement these. Thus, in the Didache we find little but moral instruction; but it is clear that those to whom it is addressed must have already received some knowledge of what they were to believe. Later on we find more explicit dogmatic teaching for the Gentiles, in St. Justin’s Apologies, and in the writings of Clement of Alexandria. Still, even this is not much more advanced than what we have seen above as taught by St. Peter, except that Justin dwells on the Creation and proves the Divinity of Christ, the Logos and only-begotten Son of the Father.

(4) In the ages of persecution it became necessary to exercise great caution in admitting persons to membership in the Church. The danger of falling away, or even of betraying, must be guarded against by a careful and moral and moral training. By the institution of the catechumenate and the Discipline of the Secret. The work of the Apostles had been to remove prejudices against Christianity, and to set forth its doctrines and practices in such a way as to appeal to the fair-minded pagan. If anyone was moved to embrace the true religion, he was not at once admitted, as in the days of the Apostles. At first he was treated as an inquirer, and only the fundamental doctrines were communicated to him. As soon as he had given proof of his knowledge and fitness he was admitted to the catechumenate proper, and was further instructed. After some years spent in this stage he was promoted to the ranks of the Competentes, i.e. those ready for baptism. As might be expected, he was now instructed more especially in the rites for this purpose. Even when he had been
initiated, his instruction was not yet at an end. During the third week after Easter when the valuable first favour was still upon him, the various rites and mysteries in which he had just participated were more fully explained to him.

In considering the catechetical writings of the Fathers we must bear in mind the distinction of these different grades. When addressing a mere inquirer they would naturally be more guarded and less explicit than if they had to do with one who had passed through the catechumenate. Sometimes, indeed, the language was so chosen that it conveyed only half the truth, to point out the elements of the instruction without the beginner understanding the whole. The distinction between the elementary and advanced instruction is noted by St. Paul: "As unto little ones in Christ. I gave you milk to drink, not meat; for you were not able as yet." (I Cor., iii, 2).

For our present purpose it will be best to take as typical examples of catechetics in the patristic times the works of St. Cyril of Jerusalem (315-386) and St. Augustine (354-430), merely noting by the way the work done by St. Ambrose (the instructor of St. Augustine) and St. Gregory of Nyssa ("The Catechetical Order of the New Church, 1960 in a NEW from St. Cyril twenty-four catechetical discourses connected together a complete course of moral and doctrinal instruction. In the first of these, called the "Procatechesis", he sets forth the greatness and efficacy of the grace of initiation into the Church. The "Catechetical Catechism novitium in Christo" is divided into two parts: i-v, repeating the leading ideas of the "Procatechesis" and, treating of sin and repentance, baptism, the principal doctrines of the Christian religion, and the nature and origin of faith; vi-xvii, setting forth, article by article, the baptismal Creed of the Church of Jerusalem. The "Procatechesis" and the eighteen discourses were intended for the "catechumenae" during Lent, in immediate preparation for reception into the Church. The remaining discourses (xix-xxiv) began the "Catechesis Mystagogica" and were delivered during Easter week to those who had been baptized at Easter; and these, though much shorter than the others, treat clearly and openly of baptism, confirmation, and the Holy Eucharist, the veil of secrecy being now removed. This is not the place to enter into the details of the Catholic teaching; the "catechumenae" were the tools by which the Church teaches the doctrine of St. Cyril (see CYRIL OF JERUSALEM; TRANSMUTATION), and what valuable information he gives of the details of the Liturgy in his day. In studying these "Catechismi" we should bear in mind that they were intended for catechumens; hence they are not couched in the simple language which we have to use in our instructions to children. They resemble, rather, the instruction given to converts, for which purpose they are still of great use. The same remark applies to all the catechetical writings of the Fathers.

St. Augustine's treatise "De Catechizandia Rudio" deals with both the theory and the practice of catechizing. It is divided into twenty-seven chapters: i-xiv theory, xv-xxvii practice. This short work, written about the year 400, shows that the great Doctor did not disdain to devote much careful attention to the work of instructing those who wished to learn the rudiments of the Faith. It could be written only by one who had much experience of the difficulties and tediousness of the task, and who had also pondered deeply on the best method of dealing with the different classes of converts. The deacon Deogratias, who had consulted Augustine on the subject, complained (as so many of us still do) of the weariness of going over the same old ground, and of his inability to put any fresh life into his instructions. St. Augustine, beginning by some words of encouragement, points out that we must judge of our discourses not by their effect upon ourselves, but by their effect upon our hearers. The story may be familiar enough to us, who go on repeating it over and over again, but it is so to those who listen to us for the first time. Bearing this in mind, the catechist should put himself in the position of the hearer, and speak as though he were telling something new. Hilaritas, a bright and cheerful manner, must be one of the chief qualifications of an instructor; "God loveth a cheerful giver", and the giving of the word of God is the most precious of gifts to the giver of the word. He should so speak that the hearer should believe, believing should hope, and hoping should love (Quidquid narras ipse narras, ut ille cui loquereus audiendo credit, credendo speret, sperare amet, etiam si quasi in die alicuius avertas, et vis habeas, quin in te fuerit fides, "fora sordem, or rather, for he happens that anyone wishes to become a Christian without being moved thereto by some fear of God." If he comes from some worldly motive he may be only pretending, though indeed a mere pretender may sometimes be turned into a genuine convert by our efforts. Hence, the holy Doctor, it is of great importance to ascertain the state of mind and the motives of those who come to us. If we are satisfied that they have received a Divine call, we have a sure and opening for the giving of the word. We should go briefly through the story of God's dealings with men, from the time when He made all things even to our own days; showing especially that the Old Testament was a preparation for the New, and the New a fulfillment of the Old (in veteri testamento est seminale, in nouo testamento est seminale semper). This is a theme developed at greater length in the "De Civitate Dei". After we have finished our story we should go on to excite hope in the resurrection of the body—a doctrine as much ridiculed in St. Augustine's day as it is in St. Paul's day, and as it is in ours. Then should come the account to be rendered at the last judgment, and the reward of the just, and the punishment of the wicked. The convert should be put on his guard against the dangers and difficulties in trying to lead a good life, especially those arising from scandals within as well as without the Church. Finally, he should be reminded that the grace of his conversion is not due either to his merits or to ours, but to the goodness of God. So far the Saint has been speaking of persons of little or no education. In p. viii he goes on to discuss the case of those who are well educated, and are already acquainted with the Scriptures and other Christian writings. Such persons require briefer instruction, and this should be imparted in such a way as to let them see that we are aware of their knowledge of the Faith. Doubtless St. Augustine had in mind the case of one who presented himself to be received into the Church by St. Ambrose. We note, too, the wisdom of this piece of advice, especially when we have to deal with Anglican converts. But though less instruction is needed in such cases, continues the holy Doctor, we may rightly inquire into the causes which have induced these persons to wish to become Christians; and in particular as to the books which have influenced them. If these are the Scriptures or other Catholic books we should praise and recommend them; but if these are heretical we should point out wherein they have distorted the true faith. Throughout our instruction we should speak with modesty, but also with authority, that he who hears us may have no scope for presumption but rather for humility. Humility is also the principal virtue to be urged upon that intermediate class of converts who have received some education but not of the higher sort. These are disposed to scoff at Christian writings, and even at the Scriptures for their want of correctness of language. They should be made to see that it is the matter rather than the language which is of importance; it is more right to listen to a true discourse than to one which is eloquent. The whole of this chapter should be taken to heart by many who join the Church nowadays. After dealing
with these different classes of inquirers, the saint de-
votes no less than five lengthy chapters (x to xiv) to
the causes of weariness (the opposite of hilaritas)
and the remedies for it. This portion is perhaps the
most valuable of the whole treatise, at least from a
practical point of view. Only too often have we
St. Augustine’s advice as to the remedies can be given
here. We must bring ourselves down to the level of
the lowest of our hearers, even as Christ humbled
Himself and took upon Himself “the form of a serv-
ant”. We must vary the subjects, and we must in-
crease in earnestness of manner so as to move even
the most sluggish. If it seems to us that the fault is ours,
we should reflect, as already pointed out, that the in-
struction, though not up to our ideal, may be exactly
suited to our hearer and entirely fresh and new to
him; in any case the experience may be useful as an
trial to our humility. Other occupations may be
dearer, but we cannot say that they are certainly
more profitable; for duty should come first, and we
should submit to God’s will and not try to make Him
submit to ours. After laying down these precepts,
St. Augustine goes on to give a short, catechetical in-
struction as an example of what he has been inculc-
at ing. It is supposed to be addressed to an ordinary
type of inquirer, neither grossly ignorant nor highly
educated (xvi to xxv), and might well be used at the
principles that spatially and temporally are the ad-
is the admirable way in which the saint brings out the
prophetical and typical character of the Old-Testa-
ment narrative, and insinuates gradually all the arti-
cles of the Creed without seeming to reveal them.
The sketch of Christ’s life and passion, and the doc-
trine of the Church and the sacraments are also note-
worthy. The discourse ends with an earnest exhorta-
tion to perseverance. This short work has exercised
the greatest influence on catechetics. In all ages of
the Church it has been adopted as a textbook.

In the ear of the early Church, the empire had become almost entirely Christian,
the necessity for a prolonged period of trial and in-
struction no longer existed. About the same time the
teacher on the subject of original sin, occa-
sioned by the Pelagian heresy, gradually led to the
administration of baptism to infants. In such cases
instruction was, of course, impossible, though traces
of it are still to be seen in the rite of infant baptism,
where the godparents are put through a sort of cate-
chesis in the name of the child. As the child grew, it
was gradually left in the care of both the Church and
the house of education in church. This instruction was necessarily more
simple than that formerly given to grown-up catechum-
ens, and gradually came to be what we now under-
stand by catechetical instruction. Meantime, how-
ever, the barbarian invaders were being brought into
the Church, and in their case the instruction had to be
of an elementary character. The missionaries had to
go back to the methods of the Apostles and content
themselves with executing a renunciation of idolatry
and a profession of belief in the great truths of Chris-
tianity. The practice of St. Patrick in Ireland, St.
Remigius among the Franks, St. Augustine in Eng-
land, St. Boniface in Germany. “We should bear in
mind that in those ages religious instruction did not
cease with baptism. Sermon texts were rarer than in our
time; the priest spoke rather as a catechist than as a
preacher. We may take the practice among the Anglo-
Saxons as typical of what was done in other countries.

Among the duties incumbent on the parish priest
the first was to instruct his flock in the doctrines and
duties of Christianity, and to extirpate from among
them all living and even lurking heresies. . . . He was ordered to explain to his parishioners the ten com-
mandments; to take care that all could repeat and
understand the Lord’s Prayer and the Creed; to ex-
plain in English on Sundays the portion of Scripture
proper to the Mass of the day, and to preach, or if he
were unable to preach, to read at least from a book
some lesson of instruction” (Lingard, “Anglo-Saxon
Church”, c. iv). The laws enacting these duties will be
found in Thorpe, “Ecclesiastical Institutes”, i, 378;
ii, 35, 34, 191.

St. Augustine was no less interested in the possible
assumption of non-Catholic writers to assert that
during the Middle Ages, “the Ages of Faith”
, religious instruction was entirely neglected,
and that the Protestant Reformers were the first to
restore the practice of the Early Church. In the “Dict.
de théol. cath.”, s. v. “Catechisme”, and in Bareille,
“Le Catéchisme Romain”, Introd., pp. 36 sqq., will
be found long lists of authorities showing how false are
these assertions. We must here content ourselves
with stating what was done in England. Abbot Gasquet
has thoroughly gone into the subject, and declares that
“in pre-Reformation days the people were well in-
structed in their faith by priests who faithfully dis-
charged their plain duty in their regard” (Old English
Bible and other Essays, p. 186). In proof of this he
quotes the constitutions of John Peckham, Arch-
bishop of Canterbury (1261), in which it is enjoined
that every priest shall explain to his people in English,
and without any elaborate subtleties (vulgariet abaque
cujuslibet substituta textura fantastica), four times a
year, the Creed, the Ten Commandments, the two pre-
cepts of the Gospel (viz. love of God and man), the
four last words of Christ (the last words of the chancel
and cardinal), and the seven sacraments. In these
constitutions is contained a brief instruction on all
these heads, “lest anyone should excuse himself on
the ground of ignorance of these things which all the
ministers of the Church are bound to know”. This
legislation, after all, was nothing but an insisting on a
practice dating from Saxon days, as we have already
seen. Moreover, it is constantly referred to in subse-
quent synods and in countless catechetical writings.
John Peckham’s predecessors, St. Edmund Rich
(1234–1240), had missed away, not only the catechist,
but also a zealous teacher of Christian doctrine among
the people. He wrote familiar instructions on prayer,
the seven deadly sins, the Commandments, and the
sacraments. Cardinal Thoresby, Archbishop of York,
published in 1357 a catechism in Latin and English, the
“Lay Folks Catechism”, for the purpose of carrying
out Peckham’s Constitutions, and it is based on Peck-
ham’s instruction. The two, with the English transla-
tion in rude verse, have been reprinted by the Early
English Text Society, No. 115. In the episcopal Regi-
num Anglicanum, and at this time the bishop wished to
know whether his pastor fulfilled his duties, and they con-
stantly answer that they are taught bene et optime.
Chaucer’s Poor Parson may be taken as a type:

But rich he was holy thought and work.
He was also a learned man, a clerk.
That Christes Gospel trewly wolde preche,
His parishens devouned wolde he teche.
His tale is practicael a treatise on the Sacrament of
Penance. As regards catechetical manuals we need
only mention the “Par Ocui Sacerdotis” (about the
middle of the fourteenth century), which is less
popular; “Pupilla Ocui”, by John de Burgo (1355);
“Speculum Christiani”, by John Wotton, containing
simple English rhymes as well as the Latin text. “One
of the earliest books ever issued from an English
press by Caxton . . .” was a set of four lengthy discourses
published, as they expressly declare, to enable priests
to fulfill the obligation imposed on them by the Consti-

tutions of Peckham” (Gasquet, op. cit., p. 191).
The part which pictures, statues, reliques, pageants,
and especially the miracle plays to the religious
education of the people must not be forgotten. All of
these give proof of an extensive knowledge of sacred
history and an astonishing skill in conveying doctrinal
and moral lessons. It is enough to refer to Ruskin’s “The
Story of Amiens”; and to the Townley, Chester, and Cov-
erry miracle plays. (G. Bareille, op. cit., pp. 42 sqq.)
(7) The invention of printing and the revival of learning naturally had great influence on catechetical instruction. The first great name to be mentioned, though it indeed belongs to a slightly earlier period, is that of John of Damascus (d 824). He wrote "the needed reform of the Church should begin by the instruction of the young; and though he was chancellor of the University of Paris he devoted himself to this work. He composed a sort of little catechism entitled "The A B C of Simple Folk". To enable the clergy to teach children he composed the "Tractatus de Preceptis Decalogi", de Confessione, et de Arte bene Moriendi", in which he briefly explained the Creed, the Commandments of God, the sins to be mentioned in confession, and the art of dying well. This was printed many times and was translated into French. It was the forerunner of the Catechism of the Council of Trent. In the year 1470, before Luther was born, a German catechism, "Christenekrippel" (the Christian Mirror), written by Dederich, was printed, and at once became very popular. Two other catechisms, "The Soul's Guide" and "The Consolation of the Soul", were printed a little later and issued in many editions. In Jansen's great "History of the Cenar People at the Close of the Middle Ages" will be found a complete refutation of the popular notion that under the supervision of the Council of Trent, the first to revive catechetical instruction and to print catechisms. It is, however, proper to acknowledge their activity in this matter, and to note that this activity stirred up the zeal of the Catholics to counteract their influence. Luther's famous "Enchiridion", which was the third edition of his smaller catechism, was published in 1529, and speedily ran through a number of editions; it is still used in Germany and is known in other Protestant countries. In 1536 Calvin composed a catechism in French: "Le formulaire d'instruction des enfants en la christendom, faict en maniere de dialogue ou le ministre interroge et l'enfant repone". He candidly admits that it was always the custom in the Church to instruct children in this way. Of course it is the duty of the priest to introduce the first points of his holy office: the certainty of salvation, the impossibility of losing justice (righteousness), and the justification of children independently of baptism. It is noteworthy that as regards the Eucharist he teaches that we receive not merely a sign, but Jesus Christ Himself, really and effectually by a true and substantial wafer which is reversed. The catechism (1549) contained a catechism with a brief explanation of the Commandments and the Lord's Prayer. The explanation of the sacraments was not added until the year 1564. If this catechism be compared with that of Catholic divines, many Commandments of God, the Commandments of the Church and the Councils, the Sacraments, the Theological and Cardinal Virtues, the Gifts of the Holy Ghost, the Works of Mercy, Sins, the Last Things, and the Rosary. It is an improvement on Canisius' catechisms, and hence it was recommended at the Vatican Council to serve as a model for the projected universal catechism.

The first catechism in English after the Reformation was "A Catechism or Christian Doctrine necessary for Children and Ignorant People, briefly compiled by Laurence Vaux, Bachelor of Divinity". Its first ed. was 1557; reprinted 1574, 1593 (twice), 1599, 1605; 1850. This has been reprinted for Chetham Society, new series, vol. IV, Manchester, 1883. The next came a small volume, "A Briefe Instruction by way of Dialogue concerning the principal points of Christian religion gathered out of the Holy Scriptures, Fathers and Councils. By the Four Last Things. To obtain and to preserve both wisdom and justice the sacraments are necessary, and hence he places the treatment of the sacraments between the two parts. After the Council of Trent (1563) Canisius compiled his larger work on Catechism and Justification. The form of the Dutch is that of questions and answers, some of the latter being as long as four or five pages. In striking contrast to the Protestant catechisms, the tone throughout is calm, and there is an absence of controversial bitterness. The success of Canisius' catechism is not a matter of historicity. There were translated into every language in Europe, and were reprinted in many hundreds of editions, so that the name Canisius came to be synonymous with Catechism (Barville, op. cit., p. 61).

The Catechism of the Council of Trent ("Catechismus Romanus") is not a catechism in the ordinary sense of the word. It is rather a manual of instruction for the clergy ("Catechismus ad Parochos") to enable them to catechize those entrusted to their spiritual care. The fathers of the council "deemed it of the utmost importance that a work should be written which would explain the authority of the Holy Synod, from which parish priests and all others on whom the duty of imparting instruction devolves may be able to seek and derive certain precepts for the edification of the faithful; that as there is 'one Lord one Faith' so also there may be one common rule and prescribed form of delivering the faith, and instructing the Christian people unto all the duties of piety" (PREF.), viii). The composition of the work was entrusted to four distinguished theologians (two of them archbishops and one a bishop), and three of the most distinguished of them were present at the Council of Trent. Borromeo was the presiding spirit. The original draft was turned into elegant Latin by Pogianus and Manutius, and this version was translated by command of the pope (St. Pius V) into Italian, French, German, and Polish. Brought out under such conditions (1566), the authority of this catechism is higher than that of any other, but is, of course, not on a level with that of the canons and decrees of a council. As to its value Cardinal Newman's estimate may be gathered from these words: "I rarely preach a sermon, but I go to these beautiful and complete Catechism to get both my matter and my doctrine" (Apologia, p. 425).
Appendix of the Fall of Man and Justification. Translated into English (by Fr. Garnet) at St. Omeres for John Heigham. With permission of Superiors: 1622;
"A Catechism of Christian Doctrine in fifteen Conferences. Paris: 1637", 2nd ed., 1638. The author was Thomas White, alias Blacklow, of Liéon and Douai. The most important among these, however, was the book which came to be known as "The Doaway Catechism", "An Abrigement de Christian Doctrine with proofs of Scripture for points controverted. Catechetically explained by way of question and answer", printed at Douai, 1st ed. 1632, and so constantly. The last editions mentioned by Gillow are London, 1793, and Dublin, 1828; the author was Henry Turberville, a Douai priest. There was also a smaller edition, "An Abstract of the Doaway Catechism. For the use of children and ignorant people. London, printed in the year 1688"; it was reprinted many times, and continued in use until the Douai students came to England. In 1626, the Franciscaan Florence O'Conry published an Irish catechism at Louvain, entitled "Mirror of a Christian Life". This, like the catechisms of O'Flusseney (Louvain, 1608) and Stapleton (Brussels, 1639), was written for the benefit of the Irish troops serving in the Netherlands. In the same century another member of the Franciscan order, Father Francis Molloy, a native of the County Meath, Ireland, and at the time professor of theology in St. Isidore's College, Rome, published a catechism in Irish "Luocerna Fidelium" (Rome, Propaganda Press, 1670). We should also mention Andrew Doneley's "The Catechism or Christian Doctrine by way of question and answer, Paris, 1742". This was in English and Irish on opposite pages. "The Poor Man's Catechism or the Christian Doctrine explained with short admonitions", 1st ed., 1752; it was edited by the Rev. George Bishop. The author's name does not appear, but a later writer tells who he was: "The Poor Man's Controversy, By J. Marnock, O. S. B., the author of the Poor Man's Catechism, 1760." Dr. James Butler Archbishop of Cashel, published his catechism in 1775, and it was soon adopted by many Irish bishops for their dioceses. An account of it was given by Archbishops Walsh in the "Irish Eccl. Record", Jan., 1892. In 1747 Bishop Challoner published "The Catholic Christian instructed in the Sacraments, Sacrifice, Ceremonies, and Observances of the Church by way of question and answer. By R. C. London 1737." There is also "An Abrigement of Christian Doctrine with a short Daily Exercise", corrected by the late Rev. C. O'Conry, 1753. Bishop Hay's "The Sincere Christian instructed in the Faith of Christ from the Written Word" (1781); "The Devout Christian instructed in the Faith of Christ" (1783); and "The Fious Christian" are catechisms on a large scale. During the eighteenth century catechetical instruction received a fresh impulse from Pope Benedict XIII, who issued (1725) three ordinances prescribing in detail the methods: division into small classes and special preparation for confession and Communion. Against the rationalistic tendencies in the pevangelical movement of the century, Clement XIII uttered a protest in 1761. Pius VI wrote (1787) to the Orientals, proposing for their use a catechism in Arabic prepared by the Propaganda. In Germany the "Pastoral Instruction", issued by Raymond Anton, Bishop of Eichstätt (1768; new ed., Freiburg, 1902) emphasized the need and indicated the method of instruction (Tit. XIV, Cap. V). Prominent among the writers on the subject were Franz Neumayr, S. J., in his "Rhetorica cathedrica" (1768); M. I. Schmidt, "Katechisten"; and J. J. F. Schäfer, "Die katholischen katechisieren" (Vienna, 1774). In France, during the same century, great activity was shown, especially by the bishops, in publishing catechisms. Each diocese had its own textbook, but though occasional attempts

were made at uniformity, they were not successful. Several catechisms composed by individual writers other than the bishops were put on the Index (see Migne, "Catechismes", Paris, 1842). The French original of "An Abrigement of the Quebec Catechism" (Quebec, 1817) appeared in Paris (1702) and Quebec (1782). The pedagogical activity of the nineteenth century naturally exerted an influence upon religious instruction. German writers of the first rank were Overberg (d. 1826), Sailer (d. 1832), Gruber (d. 1838), and Hirscher (d. 1855) of whom advocated the psychological method and the catechism for preparation. Deharbe's "Catechism" (1847) was translated between 1853 and 1860 into thirteen languages, and his "Erklärungen des Kathismaus" (1857-61) has passed through numerous editions. In France, Napoleon (1806) imposed upon all the churches of the empire uniformity in the matter of catechisms and, in spite of the opposition of Pius VII, published the "Imperial Catechism", containing a chapter on duties towards the emperor. This was replaced after the fall of the empire by a large number of diocesan catechisms which again led to various plans for securing uniformity. Dupanloup, one of the foremost writers on education, published his "Catechisme chrétien" in 1865. At the time of the Vatican Council (1869-1870) the question of having a single universal catechism was discussed. There was much difference of opinion, and the matter was not finally settled under the Pope at the Council. Consequently the discussion led to no result (see Martin, "Les travaux du concile du Vatican", pp. 113-115). The arguments for and against the project will be examined when we come to speak of catechisms in the third part of this article. The most important event in the recent history of catechetics has been the publication of the Encyclical "Acerbo nimis" on the teaching of Christian doctrine (15 April, 1905). In this document Pius X attributes the present religious crisis to the widespread ignorance of Divine truth, and lays down strict regulations concerning the duty of catechizing (see below). For the purpose of discussing the best methods of carrying out these orders a number of catechetical congresses have been held: e. g., at Munich, 1905 and 1907; Vienna, 1905 and 1908; Salzburg, 1906; Lucerne, 1907; Paris, 1908, etc. At these gatherings scientific, yet practical, lectures were delivered, demonstrations were given of actual catechizing in school, and an interesting feature was the exhibition of the best literature and appliances. Two periodicals have likewise appeared: "Katechistisches Jahrhundert" (Berlin) and "Christlich-pädagogische Blätter" (Vienna). In the United States, the few priests who in the early days toiled in this vast field were so overburdened with work that they could not produce original textbooks; other editions were used. The first attempt to edit a catechism, so far as is known, was the Jesuit Father Robert Molyneux, an Englishman by birth and a man of extensive learning, who, till 1806, laboured among the Catholics in Maryland and Pennsylvania. Copies of this work are not known to exist now, but, in letters to Bishop Carroll, Father Molyneux mentions two catechisms which he issued—one in 1875, "a spelling primer for children with a Catholic catechism annexed"—the other in 1778. The latter was published in New York which in all likelihood was a reprint of "Butler's Catechism" mentioned above. Bishop Hay's "Abrigement of Christian Doctrine" (182 p.), appeared in Philadelphia in 1800; another edition (140 p.) in 1808.
and one with some alterations in the language in Baltimore in 1809 (108 pp.). Many editions were published of the catechism entitled "A Short Abridgment of Christian Doctrine," published by Archbishop Carroll, was generally used throughout the United States until about 1821. In that year Bishop England published his catechism for his own diocese, and in 1825 appeared the "Catechism of the Diocese of Bardstown," recommended as a class-book by Bishop Flaget of Bardstown, Kentucky. The author of the latter catechism was Jean-Baptiste David, coadjutor of Bishop Flaget. It comprised the "First or Small Catechism for Little Children" (13 pp.), and the "Second Catechism" (149 pp.). The English was criticized by Archbishop Mairechal and others; but the English language [was] the catechism of Bishop Connell of Philadelphia, and, at the request of the archbishop, the author suppressed the book. An old English catechism, the "Abridgment of Christian Doctrine," by Henry Turner, Bishop of the Diocese of Doulas in Ireland, was reprinted in New York in 1833. Whereas this edition preserved the quaint old language of the original, another edition of the same book appeared in Philadelphia, as revised by the Right Rev. James Doyle and prescribed by him for the united dioceses of Kildare and Leighlin (Ireland). In the New England States, the "Boston Catechism" was used for a long time, the "Short Abridgment of Christian Doctrine," newly revised and augmented by Bishop Fenwick of Boston. But the catechisms which were used most exclusively during several decades were Butler's "Larger Catechism" and "Abridged Catechism." In 1788 Samuel Campbell, New York, published "A Catechism for the Instruction of Children. The Seventh Edition with Additions, Revised and Corrected by the Author." This seems to be the first American edition of the "Larger Catechism," for Dr. Troy, Bishop of Oswego, wrote, soon after Butler's Catechism had appeared: "It has been printed here under the title: 'A Catechism for the Instruction of Children,' without any mention of Dr. Butler's "Butler's Catechism of the United States," the First Provincial Council of Canada (1851) prescribed it for the English-speaking Catholics of the Dominion. Some other American catechisms may be briefly mentioned: the so-called "Dubuque Catechism" by Father Hattenberger; the Small and the Larger Catechism of the Jesuit mission in Kentucky (Weininger, 1865); and the three graded catechisms of the Redemptorist Father Muller (1874). Far more extensively used than these was the English translation of Deharbe. From 1869 numerous editions of the small, medium and large catechisms, with various modifications, were published in the United States. An entirely new and much improved edition was issued in New York in 1901.

Repeated efforts have been made in the United States towards an arrangement by which a uniform textbook of Christian Doctrine might be used by all Catholics. As early as 1829, the bishops assembled in the First Provincial Council of Baltimore decreed: "A catechism shall be written which is better adapted to the circumstances of this Province; it shall give the essentials of Butler's Catechism; and when approved by the Holy See, it shall be published for the common use of Catholics" (Deer. xxxiii). The clause recommending Bellarmine's Catechism as a model was added at the special request of the Congregation of Propaganda. It may be mentioned here that, beginning with a "revised" edition of Bellarmine's Catechism, Italian text with English translation, was published at Boston, in 1853. The wish of the bishops was not carried out, and the First and Second Plenary Councils of Baltimore (1852 and 1866) repeated the decree of 1829. In the Third Plenary Council (1894) many bishops were in favour of a "revised edition of Butler's Catechism, but finally the matter was given into the hands of a committee of six bishops. At last, in 1885, was issued "A Catechism of Christian Doctrine, Prepared and Enjoined by Order of the Third Council of Baltimore" (Acta et Decr., p. 219), theologians and teachers criticized several points (Niles, "Commentaria," II, 265, 188). Soon various editions came forth with additions of word-meanings, explanatory notes, some even with different arrangements, so that there is now a considerable diversity in the books that go by the name of Catechism of the Council of Baltimore. Besides, in recent years several new catechisms have been published, "one or two a decided improvement over the council Catechism," says Deaver ("Studia Romana," p. 558). Among the recent catechisms are the two of Father Faerber, the large and small catechisms of Father Groenings, S. J., and the "Holy Family Series of Catholic Catechisms," by Francis H. Butler, of the Diocese of Charleston. All the catechisms of this series give on the last page the questions and answers, on the right side a "Reading Lesson," dealing in fuller, and connected, form with the matter contained in the questions and answers. Some very practical features (reading part, followed by questions and answers, appropriate hymns, and pictorial illustrations) mark the "Text-books of Religion for Parochial and Sunday Schools," edited since 1898 by Father Yorke. These last two series to some extent depart from the traditional method and indicate a new movement in catechetical teaching. A more radical change in the style of the catechism, namely the complete abandonment of the question-and-answer method, has recently been proposed (see below, under II and III of this article, and "Am. Ecc. Rev." 1907; Jan. and Feb., 1908). The First Plenary Council of Balti-more (1852) appointed a committee of six bishops to revise, a German catechism the use of which, after its approbation by the archbishop and all the German-speaking bishops, should be obligatory. This decree shared the fate of the council's demand for a uniform English catechism. The Third Provincial Council of Canada (1851) decreed that the catechism to be issued by its order should be translated into the languages of those parishes in which religious instruction is given in any other than the English tongue. But the translation of the council catechism met with little favour. Another regulation, however, contained in the same decree of the council (ceex), was gradually carried into effect. The bishops assembled expressed an earnest desire that in schools where English was not used the Christian Doctrine should be taught not only in the foreign tongue there used, but also in English. Undoubtedly this was a wise provision. For the young people of the second or third generation it is difficult to understand the native language of their parents; hearing discussions or attacks on their religion, they are hardly able to answer if they have not learnt the catechism in English. Moreover, after leaving school, many young people have to live among English-speaking peoples, in places where there is no congregation of their own nationality; if they have not been taught religion in English they are tempted not to attend sermons, they feel embarrassed in the Church and gradually drift away from the Church. In order to obviate these dangers, various catechisms (Deharbe,
Faerber, Groenings, etc.) have been published with German and English texts on opposite pages. Similarly, there are Polish-English, Bohemian-English, and other editions with this tendency. In most Catholic schools catechism is taught chiefly in English, and only the prayers in Italian. Unwise as it would be to force a change of languages in catechetical teaching, it would be equally injudicious to artificially retard the onward progress of those who are in the minority. The tendency is towards the gradual adoption of the English language in preaching and teaching catechism, and it seems but reasonable to think that some day there will be among the Catholics in the United States not only unity in faith in the substance of the catechism, but also in language.

A number of German immigrants entered Pennsylvania about 1700, a considerable portion of them being Catholics. In 1759 the German Catholics in Philadelphia outnumbered those of the English tongue, and in 1799 they opened the church of the Holy Trinity, the first exclusively national church in the United States. Since 1741 German Jesuits have ministered to the spiritual needs of their countrymen, and Catholic schools have been established in the Pennsylvania settlements. The Jesuit Fathers John V. S. Olier and Father Jean-François de Sales, which latter made a great American edition that was universally used throughout Germany. The best known American edition of this famous catechism is that printed in Philadelphia, in 1810: "Catholicischer Catechismus, worin die Katholische Lehre nach den Turning Points in der jesuitischen Aus der Gesellschaft Jesu, erklärt wird."

The author or editor of this book was Adam Brit, pastor of the Holy Trinity Church, Philadelphia, who died at Cone-waga (1822) as a member of the Society of Jesus. During several decades the Catechism of Csius was generally used by the German Catholics in the United States. The Redemptorists came to this country in 1833 and soon had charge of flourishing German parishes in nearly all the more important cities. The Venerable John N. Neumann, afterwards Bishop of Philadelphia, wrote, while rector of the Redemptorist house at Pittsburg, about the year 1845, a small and a large catechism. These texts, also known as the "Redemptorist Catechisms", had a wide circulation, whereas those written later by Father Wening, S. J., and Father Müller, C. S. R., never became popular. The second half of the nineteenth century may be called the era of Deharbe's Catechism. In 1850 the "Katholischer Catechismus der Lehrbegriffe" was issued in Cincinnati, which by this time had become a centre of German Catholic population with flourishing parishes. This edition, which was given the name "Deharbe's Large Catechism", since that time numerous editions of the different catechisms of Deharbe appeared with various adaptations and modifications, and for nearly fifty years Deharbe reigned supreme. This supremacy has been challenged within the last two decades. Father Muller, C. S. R., in the preface to his catechism, severely criticized Deharbe's as a book "which is difficult for children to learn and to understand". Father Faerber, who devoted forty years to catechetical instruction, produced in 1905 a textbook which commands itself by its simplicity and clearness, although the critics, who charged it with incompleteness and a certain lack of accuracy, were not altogether wrong. Almost simultaneously with Father Faerber's book appeared an excellent, thoroughly revised, edition of Deharbe's text, from which the following text is quoted.

Finally, in 1900, Father Groenings, S. J., published two catechisms, a small and a large one.

Development of Catechizing after the Council of Trent.

-Mindful that the work of catechizing was more important than the issue of catechisms, the Council of Trent decreed that "the Bishop shall have the care, at least on the Lord's day and other festivals the children in every parish be carefully taught the rudiments of the faith and obedience to God and their parents" (Sess. IV, De Ref, c. iv). In 1660 the Confraternity of Christian Doctrine was established by a Milanese, and was approved by St. Pius V in 1571. St. Charles Borromeo in his provincial synods laid down excellent rules on catechizing; every Christian was to know the Lord's Prayer, the Hail Mary, the Creed, and the Ten Commandments; confessors were not to examine the catechumens and missionaries were to teach the catechism twice a day during each mission. In his own parish of Châlillon he established the Confraternity for the Assistance of the Poor, and one of the duties of the members was to instruct as well as to give material aid. So, too, the Sisters of Charity not only took care of the sick and the poor but also taught the children. M. Oliver, both in the seminary and in the parish of Saint-Sulpice, laid special stress on the work of catechizing. The method which he introduced will be described in the second part of this article. The Brothers of the Christian Schools, founded by St. Jean-Baptiste de La Salle, devoted themselves especially to religious as well as to secular instruction. Finding that the very poor were unable to attend school on weekdays, the saintly founder introduced secular lessons on Sundays. This was in 1599, nearly a century before such teaching was given in Protestant England.

II. PRACTICAL CATECHETICS. Catechizing (catechisme), as we have seen, is instruction which is at once religious, elementary, and oral.

Catechizing is not simply because it treats of religious subjects, but because its end or object is religious. The teacher should endeavour to influence the child's heart and will, and not be content with putting a certain amount of religious knowledge into its head; for, as Aristotle would say, the end of catechizing is not knowledge, but practice. Knowledge, indeed, there must be, and the more of it the better in this age of widespread secular education; but the knowledge must lead to action. Both teacher and child must realise that they are engaged in a religious work, and not in one of the ordinary lessons of the day. It is the neglect to realize this that is responsible for the little effect produced by long and elaborate teaching. Religious knowledge comes to be looked upon by the child merely as a branch of other knowledge, and having as little to do with conduct as the study of vulgar fractions. "When the child is fighting its way through the temptations of the world, it will have to draw far more largely on its stock of piety than on its stock of knowledge." (Furniss, "Sunday School or Catechism"). The work of a teacher in the Church will be directed toward the faithful earnestly desire 'to know Jesus Christ and Him crucified', and that they be firmly convinced and with
the innermost piety and devotion of heart believe, that there is no other name under heaven given to man whereby we must be saved, except the name of our Lord Jesus Christ, for salvation (for our sins)." But as in this we do know that we have known Him, if we keep His commandments, the next consideration and one intimately connected with the foregoing, is to show that life is not to be spent in ease and sloth, but that we 'ought to walk even as He walked,' and with all earnestness 'pursue justice, godliness, faith, charity, mildness;' for He gave Himself for us that He might redeem us from all iniquity, and purify unto Himself a people acceptable, pursuing good works;" which things the Apostle commandeth, as he speaketh: "Let us therefore, as the Father and the Lord and Saviour has not only declared, but has also shown by His own example, that the Law and the Prophets depend on love, and as also, according to the confirmation of the Apostle, 'the end of the commandments and the fulfilment of the Law is charity, no one can doubt that this, as a paramount duty, should be attended to with the utmost assiduity, that the faithful people be excited to a love of the infinite goodness of God towards us; that, inflamed with a sort of divine ardour, they may be powerfully attracted to the supernatural good, that they may be made 'hapshapers' (Catech. of the Council of Trent, Pref., x.).

The persons concerned in catechizing (teachers and taught) and the times and places for catechizing can hardly be treated apart. But it will be best to begin with the duty of religious instruction for children primarily incumbent on their parents. This they may fulfil either by teaching them themselves or by entrusting them to others. Next to the natural parents the godparents have this duty. The parish priest should remind both the parents and godparents of their obligation; and he, too, as the spiritual father of those entrusted to his care, is bound to instruct them. In Pius X's Encyclical Letter on the teaching of Christian doctrine it is enacted "(1) that all parish priests, and in general, all those entrusted with the care of souls, shall on every Sunday and feast day throughout the year, without exception, give boys and girls an hour's instruction from the catechism on those things which every one must believe and do in order to be saved; (2) at stated times during the year they shall prepare boys and girls for the Eucharist, and instruct them to receive the sacraments of penance and confirmation; (3) they shall likewise and with special care on all the weekdays in Lent, and if necessary on other days after the feast of Easter, prepare boys and girls for the Sacrament of the Altar, and for first Communion in a holy manner; (4) in each and every parish the society, commonly called the Confraternity of Christian Doctrine, shall be canonically erected; through this the parish priests, especially in the places where there is a scarcity of priests, will have lay helpers for the catechetical instruction in pious lay persons who will devote themselves to the office of teaching." In countries where there are Catholic schools religious instruction is given on weekdays either before or after the secular instruction. As is well known, for the sake of this privilege the faithful have contributed enormous sums of money to build and support schools. Where this is the case the difficulty is only a financial one. Nevertheless, the First Provincial Council of Westminster warns the pastor not to make over this duty of catechizing "so far to others, however good or religious they may be, as not to visit the schools frequently and instil into the tender minds of youth the principles of true faith and piety."

We see, then, that the work of giving religious instruction belongs to the parents, to priests with the care of souls, to the teachers in Catholic schools, and to other lay helpers. Turning now to those who are to be taught, we may consider first the young and then those who are grown up. The young may be divided into those who are receiving elementary education (primary scholars) and those who have passed through the primary education and are. Although in many dioceses the scholars are arranged in classes corresponding to the secular classes, we may consider them for our present purpose as divided into three groups: those who have not been to confession; those who have been to confession but not made their first Communion; and those who have made their first Communion. In the case of the first group the instruction must be of the most rudimentary kind; but, as already pointed out, this does not mean that the little ones should be taught nothing except the first part of some stories about God and the Lord and Saviour, and the Commandments, the Our Father and the Hail Mary, explained to them, together with the forgive ness of sin by the Sacraments of Baptism and Penance. The principal events in the life of Christ will be found to be an ever-interesting subject for them. How far it is wise to talk to them about Creation and the Fall, the Deluge and the stories of the early patriarchs, may be a matter of discussion among teachers. In any case great care should be taken not to give them any notions which they may afterwards have to discard. It is important in telling to young children the simplest language something about the services of the Church, for they are now beginning to be present at these. Any one who has charge of them there, or, better still, who will recall his own early memories, will remember what it meant to be a child to have to sit through a high Mass with a sermon. The second group (those preparing for first Communion) will of course be able to receive more advanced instruction in each of the four branches mentioned above, with special reference to the Holy Eucharist. In instructing both groups the subjects should be taught dogmatically, that is, authoritatively, appealing rather to the children's faith than to their reasoning powers. The after-Communion instruction of elementary scholars will be almost similar to the instruction given to younger secondary scholars, and will consist in imparting wider and deeper knowledge and insisting more upon proofs. When they grow up their difficulty will be not only the observance of the law, but the reason of it. They will ask not only: What must I believe and do? Also, Why must I believe it or do it? Hence the importance of the religious instruction in the authority of the Church, Scripture texts, and also appeals to right reason. This brings us to the subject of catechizing grown-up persons. Pius X goes on to speak of this matter, after laying down the regulations for the young: "It is not less than the young stand in need of religious instruction. All parish priests, and others having the care of souls, in addition to the homily on the Gospel delivered at the parochial Mass on all days of obligation, shall explain the catechism to the faithful in an easy style, suited to the intelligence of their bearers, at such time of the day as they may deem most convenient for the people, but not during the hour in which the children are taught. In this instruction they shall make use of the Catechism of the Council of Trent; and they shall so order it that the whole matter of the Creed, the Sacraments, the Decalogue, the Lord's Prayer, and the Precepts of the Church shall be treated in the space of four or five years."

The subjects to be treated of are laid down by Pius X: "As the things divinely revealed are so many and so various that it is no easy task either to acquire a knowledge of them, or, having acquired that knowledge, to retain them in the memory, . . . our predecessors have very wisely reduced this whole force and scheme of saving doctrine to these four distinct heads: the Apostle's Creed; the Sacraments; the Ten Commandments; and the Lord's Prayer. In the doctrine of the Creed are contained all things which are to be held according to the discipline of the Christian Faith.
DOCTRINE

whether they regard the knowledge of God, or the creation and government of the world, or the redemption of the human race, or the rewards of the good and the punishments of the wicked. The doctrine of the Seven Sacraments comprehends the signs and as it were the instruments for obtaining divine grace. In the Deuteronomey the Law always has reference to the Law, "the end" whereof is "happiness." Finally, in the Lord's Prayer is contained whatever can be desired, hoped, or salutarily prayed for by men. It follows that these four commonplaces, as it were, of Sacred Scripture being explained, there can scarcely be a doubt that the best is to be made by a Christian man" (ib., xii). It must be borne in mind that catechetical instruction should be elementary; but this of course is a relative term, according as the pupil is an adult or a child. This difference has been dealt with above in speaking of the persons concerned in catechizing. It may be pointed out here, however, that elementary knowledge is not the same as partial knowledge. Even young children should be taught something of each of the four divisions mentioned above, viz., that they have to believe in God and to do as the children are taught by means of prayer and the sacraments. Further instruction will consist in developing each of these heads. Besides what is ordinarily understood by Christian doctrine, catechizing should treat of Christian history and Christian worship. Christian history will include the Old Testament, and the Church. Christian worship will include the Church's calendar (the feasts and fasts) and her services and devotions. These three—doctrine, history, and worship—are not altogether distinct, and may often be best taught together. For example, the second article of the Creed should be taught in such a way as to bring out the doctrine of the Incarnation, the beautiful story of Christ's birth and childhood, and the meaning and the services of Advent and Christmas. The Bible history and the history of the Church will afford countless instances bearing on the various doctrines and heroes of the doctrinal part of the catechism, and the virtues and contrary vices of the practical part.

The question of catechetical methods is difficult and has given rise to much controversy. Father Furniss, long ago, in his "Sunday School or Catechism?" and Bishop Bellord later on, in his "Religious Education and its Failures," passed a wholesale condemnation on our present method, and attributed to it the falling away of so many Catholics from the Faith. The chief reason of the "leakage" is the development of "new systems of religious instruction. Those methods seem to be antiquated, injudicious, wasteful, sometimes positively injurious to the cause" (Bp. Bellord, op. cit., p. 7). Part of the blame is laid upon catechizing, and a part upon the catechisms. Of the latter we shall speak presently. Again, the blame is twofold and is not altogether consistent. The children are declared not to know their religion, or, knowing it quite well, not to put it into practice. In either case they are of course lost to the Church when they grow up. Both the bishop and the Redemptorists complain that religious instruction is made a task, and so fails either to be learnt at all, or, if it is learnt, it is learnt in such a way as to become hateful to the child and to have no bearing on his conduct in after-life. Both are especially severe on the attempt to make the children learn by heart. The bishop quotes a number of experienced missionary priests who share his views. It seems to us that, in considering the methods of catechizing, we have to bear in mind two very different sets of conditions. In some countries religious instruction forms part of the daily curriculum of the schools. Catholic schools are given on weekdays by trained teachers. Where this is the case it is not difficult to secure that the children shall learn by heart some official textbook. With this as a foundation the priest (who will by no means restrict his labours to Sunday work) will be able to explain and illustrate and enforce what they have learnt by heart. The teachers' business will be chiefly to put the catechism into the child's head; the priest must get it into his heart. Very different are the conditions which Father Furniss and Bishop Bellord are dealing with. Where the priest has to get together on a Sunday, one day in the week, a number of children of all ages, who are not obliged to be present; and when he has to depend upon the assistance of lay persons who have no training in teaching; it is obvious that he should do his best to make the instruction as simple, as interesting, and as devotional as possible. As in other branches of instruction we may follow either the analytical or the synthetical method. In the former we take a textbook, a catechism, and explain it word for word to the scholar and make him commit it to memory. The book is of prime importance; the teacher occupies quite a secondary place. Though it might convey a wrong impression to call this the Protestant method, yet it is exactly in accordance with the Protestant system of religious teaching generally. The written, printed Bible is handed to the child by means of prayer and the sacraments, on the other hand, puts the teacher in the forefront. The scholars are bidden to look up to him and listen to his voice, and receive his words on his authority. "Faith cometh by hearing." After they have thoroughly learnt their lesson in this way, a book may be the Bible; or the teacher may explain it to them and committed to memory, as containing in a fixed form the substance of what they have received by word of mouth. Whatever may be said of the relative advantages of the two methods in the teaching of secular subjects, there can be no doubt that the synthetical method is the proper one for catechetical instruction. The office of catechizing belongs to the Church's magisterium (teaching authority), and so is best exercised by the living voice. "The lips of the priest shall keep knowledge, and they shall seek the law at his mouth" (Mal. ii. 7).

(a) The Sulpician Method of catechizing is celebrated throughout the world, and has produced wonderful fruits wherever it has been employed. We cannot, therefore, do better than give a short account of it here.

The whole catechism consists of three principal exercises and three secondary ones. The principal are: (1) the recitation of the letter of the catechism, with an easy explanation of it by way of question and answer; (2) the instruction; (3) the reading of the Bible. The exercises enumerated are: (1) the admonitions from the head catechist; (2) the hymns; (3) prayers. These should be interspersed with the former. The duration fixed by St. Francis de Sales for a complete catechism is two hours. The place should be the church, but in a separate chapel rather than in the body of the church. Great importance is attached to the "game of the good mark" (le jeu du bon point) and the analyses. The former consists in selecting the child who has answered best in the first part (the questioning on the catechism), and putting to him a series of short, fair, and definite questions upon the matter in hand, and doing this as a sort of challenge to the child. The other children are roused to interest at the notion of a contest between the catechist and one of themselves, and this gives occasion for a better understanding of the subject under treatment. If the child is considered to have won, he receives a small card of reward (le bon point). "For the success of the game of the bon point it is important to prepare beforehand and to write down the questions which are to be put to the children, even the examining ones." "The analyses is only given to children who make a short account of the instruction given after the questioning. These analyses should be corrected by the teacher, and a mark ("fair," "good," "very good")
should be attached to each. In order to secure regular attendance, registers should be carefully kept, and rewards (pictures, medals, etc.) should be given to those who attend regularly, or only a part of the pupils. Feasts should also be given. The spirit of emulation should be encouraged both for attendance and good answering and analyses. Various minor offens should be conferred upon the best children. Punishment should very seldom be resorted to.

Though the Sulpician method insists upon a thorough knowledge of the letter of the catechism, it is clear that the teacher is of prime importance rather than the book. Indeed, the success or failure of the catechism may be said to depend entirely upon him. It is he who has to do the questioning and give the instruction and the homily on the Gospel. Unless he can keep the attention of the children fixed upon him, he is bound to fail. Hence, the greatest care should be taken in selecting and training the catechists. These are sometimes seminarians or nuns, but lay persons must often be taken. By far the larger portion of "The Method of Saint Sulpice" is devoted to the instruction of the catechists (cap. iv, "Of the instruction of the children"); cap. v, "Of the sanctification of the children"; cap. vi, "Of the necessity of making the catechist an excellent dispenser of the mysteries of the faith for attaining this object"); cap. vii, "How to turn the catechism into exercises of emulation"; cap. viii, "How to maintain good order and ensure the success of the catechisms").

So the "Method" has dealt with the catechisms generally. Next comes the division of the catechisms. These are four in number: the Little Catechism, the First-Communion Catechism, the Weekday Catechism, and the Catechism of Perseverance. The Weekday Catechism is the only one which requires any explanation here. A certain time before the period of first Communion a list is made out of such children as are to be admitted to the Holy Table, and these are prepared by more frequent exercises, held on weekdays as well as on Sundays. As a rule, only children who have attended for twelve months are admitted to the weekday catechisms, and the usual age is twelve years. The weekday catechism is held on two days of the week and for about three months. The order is much the same as that of the Sunday catechism, except that the Gospel and the homily are omitted. The children are put through the catechisms with great care, from the first time about the middle of the course; the second, a week before the retreat. Those who have been often absent without cause or who have answered badly, or whose conduct has been unsatisfactory, are not admitted.

A complete account of the method will be found in "The Method of Saint Sulpice" (Tr.), and also in "The Ministry of Catechising" (Tr.) by Mgr. Duppeloup.

The Munich Method.—In 1898 Dr. A. Weber, editor of the "Katholisch Blätter" of Munich, urged the adaptation of the Herbert-Ziller system in teaching Christian doctrine. This system requires, first, a division of the catechetical matter into strict methodical units, so that those questions are co-ordinated which are essentially one. Secondly, it insists on a methodical following of the three essential steps, viz., Presentation, Explanation, and Application—with a short preparation before Presentation, then Combination after Explanation, as more or less non-essential points. It thereby never begins with the catechetical themes; it aims always at Explanation—"in the form of a story from life or the Bible, a catechetical, Biblical or historical picture, a point of liturgy, church history, or the lives of the saints, or some such objective lesson. Out of this objective lesson only will the catechetical concepts be evolved and abstracted, then combined into the catechism answer and formally applied to life. These catechists aim at capturing the child's interest from the start and preserving his good-will and attention throughout" (Amer. Eccl. Rev., March, 1908, p. 423). "Preparation gives an object-lesson. If at all possible, use one such object only. There are sound psychological reasons for this, although it becomes occasionally useful to employ several. Explanation might also be called concept-formation. Out of the objective lesson are here constructed, or evolved, the catechetical concepts. From the concrete objective presentation we here pass to the general concept. Combination gathers all the ideas derived from the lesson into the text of the catechism. Application finally strengthens and deepens the truths we have gathered and variously widens them for purposes of life. We can here insert further examples, give additional motives, apply the lessons to the actual life of the child, train the child in judging his own moral conduct, and end with some particular resolution, or an appropriate prayer, song, hymn, or quotation" (Amer. Eccl. Rev., Apr., 1908, p. 465). In the same number of the Review (p. 480) will be found an account of the catechetical methods in use in the Munich Method. Further information will be found in Weber's "Die Münchener katechetische Methode" and Göttler's "Der Münchener katechetische Kurs, 1903'.

Instruction of Converts.—The careful instruction of those who apply for admission into the Church, or who wish information about her doctrines and practices, is a sacred duty incumbent at times on almost every priest. No one may prudently embrace the Christian religion unless he sees clearly that it is credible. Hence the motives of credibility, the sure arguments that convince the understanding and move the will to command the assent of faith, must be clearly set forth. The higher the social or intellectual position of inquirers, the more thorough and diligent should be the instruction. Each one is to be guided not merely to understand the Church's dogmas, as far as he can, but to practise the exercises of Christian perfection. Before the usual profession of faith, converts ought to be examined on their knowledge of all matters that must be known in order to be saved. This is the particular task of those who are charged with the instruction of the converts. After their admission to the sacraments some may easily fancy themselves fully instructed, and for want of further study remain ignorant until death, unable to train properly their children or dependents. In the case of uneducated persons, who are accepted into the Church, the prudent director will avoid such controversy as might lead his pupil to defend errors hitherto unknown. Better educated inquirers are to be fully satisfied on all points that they have held against Catholic doctrine and must be provided with the means of resisting both internal and external temptations. The length of time and the character of the instruction will vary with each individual.

It follows from what has been said that the times and places will vary according to the different sorts of persons to be instructed and the habits of the different countries. Speaking generally, however, at least some instruction should be given on Sundays and in the church, so as to bring out the religious character of catechizing.

III. MODERN CATECHISMS.—When speaking of the history of catechisms we saw that, though the method was originally and properly oral, the custom soon arose of composing catechisms—i.e. short manuals of elementary religious instruction, usually by means of questions and answers. A catechism is of the greatest use both to the teacher and the scholar. To the teacher it is a guide as to the subjects to be taught, the order of dealing with them,
and the choice of words in which the instruction should be conveyed; above all, it is the best means of securing uniformity and generalization, and of teaching. The use which the teacher should make of it must be understood in connexion with what has been said above about the methods of catechizing. To the scholar a catechism gives in a brief form a summary of what the teacher has been imparting to him; and by committing it to memory he can be sure that he has grasped the substance of his lesson. As already observed, this is not a difficult matter where there are Catholic schools under trained expert teachers accustomed to making the children learn by heart; but where the task lies to be done by day schools by inexperienced persons, and the scholars are not under the same control as in the day schools, the portions to be committed to memory must be reduced to a minimum.

A good catechism should conform strictly to the definition given above. That is to say, it should be elementary, not a learned treatise of dogmatic, moral, and ascetical theology; and it should be simple in language, avoiding technical expressions as far as consistent with accuracy. Should the form of question and answer fail? No. A helping form for grown-up persons; but children prefer it because it lets them know exactly what they are likely to be asked. Moreover, this form keeps up the idea of a teacher and a disciple, and so is most in conformity with the fundamental notion of catechizing. What form the answers should take--Yes or No, or a categorical statement—is a matter of disagreement among the best teachers. It would seem that the decision depends on the character of the different languages and nations; some of them making extensive use of the affirmative and negative particles, while others reply by making statements. Archbishop Walsh of Dublin, in his instructions for the revision of the catechism, recommended the introduction of short reading lessons, one to be appended to each chapter of the catechism. These reading lessons should deal, in somewhat fuller form, with the matter dealt with in the questions and answers of the catechism. The insertion of such lessons would make it possible to omit without losing many questions the answers to which now impose a heavy burden on the memory of the children... If there is less danger with this care and skill, and in a style attractive as well as simple, the children will soon have them learned by heart, from the mere fact of repeatedly reading them, and without any formal effort at committing them to memory" (Irish Ecc. Record, Jan., 1892). An excellent means of assisting this is to be found in the use of a suitable form of the catechism, selected with the greatest care; they should be accurate as well as artistic. The catechism used in Venice when Pius X was patriarch was illustrated.

As there are three stages of catechetical instruction, so there should be three catechisms, corresponding with these. The first should be very short and simple, but should give the little child some information about all four parts of religious knowledge. The second catechism, for those preparing for first Communion, should embody, word for word, without the slightest change, all the questions and answers of the first catechism. Further questions and answers, dealing with a more extensive knowledge, should be added in their proper places, after the earlier matter; and these will have special reference to the sacraments, more particularly to Extreme Unction. The third stage, for those who have made their first Communion, should in like manner embody the contents of the first and second catechisms, and add instruction belonging to the third stage mentioned above. For scholars beyond the elementary stages this third catechism may be used, who are not sufficiently familiar with the answers and not necessarily to be learnt by heart. The great idea running through all the catechisms should be that the later ones should grow out of the earlier ones, and that the children should not be confused by differently worded answers. These things are the answer to the questions: What is charity? What is a sacrament? should be exactly the same in all the catechisms. Further information can be introduced by fresh questions. In some rare cases additions may be made at the end of the earlier answers, but never in the middle.

It was mentioned in the historical portion of this article that at the time of the Vatican Council a proposal was made for the introduction of a uniform catechism for use throughout the Church. As the proposal was not one of a uniform catechism itself, it would have been difficult to adopt. There can be no doubt that the present system of allowing each bishop to draw up a catechism for use in his diocese is open to strong objection. Happily, in these days there is no difficulty on the head of diversity of doctrine. The difficulty arises rather from the importance attached to learning the catechism by heart. People do not nowadays remain stationary in the neighbourhood in which they were born. Their children, in passing from one diocese to another, are obliged to use a new and an inferior catechism (the most difficult process) and learn the different wording of another. Even where all the dioceses of a province or country have the same catechism the difficulty arises in passing into a new province or country. A single catechism for universal use would prevent all this waste of time and confusion, besides being a strong bond of union between the nations. At the same time it must be recognised that the conditions of the Church vary considerably in the different countries. In a Catholic country, for instance, it is not necessary to touch upon certain questions, whereas in non-Catholic countries these must be thoroughly gone into. This will notably be the case with regard to the introduction of texts in the actual words of the Holy Scriptures. Thus, in the Valladolid Catechism there is not a single quotation from the Old or New Testament except the Our Father and the first part of the Hail Mary—and even of these the source is not mentioned. The Commandments are not given in the words of Scripture. There is no attempt to prove any doctrine; everything is stated dogmatically on the authority of the Church. The Catechism of Pius V and that of Bellarmine's Catechism and other catechisms of approved value, was to be drawn up in Latin, and was to be translated into the different vernaculars with the authority of the bishops, who were empowered to make such additions as they might think fit; but these additions were to be kept quite distinct from the text. The unhappy events of the latter part of the year 1870 prevented this proposal from being carried out.

(a) The present pontiff, Pius X, has prescribed a catechism for use in the Diocese of Rome and in its ecclesiastical province, and has expressed a desire that it should be adopted throughout Italy. It has been translated into English, French, Spanish, and German, and a movement has begun with a view to extending its use to other countries besides Italy, especially to English-speaking countries. (See "American Ecc. Record", March, 1906, p. 221; "Amer. Eccl. Rev." Nov., 1906.) This catechism consists of two parts, or rather two distinct books: one for "lower classes" and one for "higher classes." The first, or "Shorter Catechism," is meant for those who have not made their first Communion; the second, or "Catechism," for those who have already been through the other. Both are constructed on the same lines: an introduc-
tory portion, and then five sections treating in turn of the Creed, Prayer, the Commandments, the Sacraments, the Virtues, etc. The “Longer Catechism” contains, in addition, in catechetical form, an instruction on the feasts of Our Lord, the Blessed Virgin, and the Saints and a short History of the Bible (the Old Testament, the New Testament, and the Church) in the form of a narrative. But though the two catechisms are on the same main lines, they have very little connexion with each other. Hardly any of the questions and answers are so that a knowledge of the wording of the first is of little use, but rather an obstacle, in learning the second. It is worthy of note that, though texts of Scripture are not quoted, the second catechism contains a large number of questions and answers relating to the Holy Scriptures, among others the following: “Is the reading of the Bible necessary to all Christians?—The reading of the Bible is not necessary to all Christians, because they are taught by the Church; still, the reading of it is very useful and recommended to all.” Many of the answers in the second is in the higher degree, vague and those in other catechisms. The catechism itself, without counting the lengthy instruction on the feasts and the “History of Religion”, fills more than 200 pages. Bishop Byrne’s translation.

(b) Throughout Great Britain only one catechism is officially recognized, that of the Church of England, drawn up by a committee appointed by the Second Provincial Council of Westminster (1855), and is based upon the Douai Catechism. It has undergone several revisions, the last of these being for the purpose of eliminating the particles Yes and No, and making all the answers distinct categorical statements. It is remarkable for its frequent appeal to the Holy Scripture. Though it has been subject to many attacks, it is justly considered to be a clear and logical statement of Catholic belief and practice, fitted to the needs of both children and grown-up persons seeking instruction. Perhaps it has this latter class too much in view, and hence it is sometimes wanting in simplicity. The omission of Yes and No and the avoidance of pronouns in the answers have been carried to a pedantic excess. Besides this ordinary catechism there is a smaller catechism, for younger children, which goes over the whole ground in a more elementary form; it is to some extent free from the objection just mentioned; but this advantage involves some verbal differences between the answer of this catechism and that of the one for advanced catechism. For the more advanced classes a number of excellent “Manuals” are in use, e.g. “Instructions in Christian Doctrine”; Wenham’s “Catechumen”; Carr’s “Lamp of the Word”; Caffetiére’s “The Catechism, Simply Explained”; Fander’s (Dabhab’s) “Catechism”. How the “Catechist” and Spirago’s “Method of Christian Doctrine” (ed. Messmer) are used by those who are being trained to be teachers. Short Bible Histories, none of them official, are used in the more elementary classes, especially for the elementary classes of the National schools and of the secondaries, and are examined in religious knowledge by inspectors appointed by the bishop.

(c) In Ireland the catechism most commonly used at the present time is the “Catechism ordered by the Nation” (1838), which has been translated into English, “out the Irish Church”. After a short Introduction on God and the creation of the world and on man and the end of his creation, it treats in turn of the Creed, the Commandments, Prayer, and the Sacraments. The answers are short and clear, and, though Yes and No are excluded, the form of the answers is not always a rigid repetition of the words of the question. Various important improvements have been suggested by Archbishop Walsh (see “Irish Eccl. Record”, Jan., 1892, and following numbers). There is also a smaller edition of the Mayo Oo Catechism. The manuals used are the advanced (“New Catechism” used in Great Britain, together with the “Companion to the Catechism” (Gill). Religious instruction is general.

(For the United States, see above under History or Catechisms.)

(d) The First Provincial Council of Quebec (1852) ordered two catechisms for use in Canada: Butler’s Catechism for those speaking English, and a new French catechism for those speaking French. The latter is called “The Quebec Catechism”, and is also issued in an abridged form.

(e) In Australia the Maynooth Catechism is generally used. But the bishops in the Plenary Council of 1886 decreed that a new catechism should be drawn up for use throughout Australia.

From this underdeveloped instruction it will be seen how far we are from having any uniform catechism for the English-speaking peoples. If we consider the Continent of Europe, we find that in France, Germany, and Spain different catechisms are in use in the different dioceses. In the German-speaking provinces of Austria there is the Habsburg Catechism for all the children and even for the whole episcopate in 1894. It is issued in three forms: small, middle, and large. All of these are arranged exactly on the same lines: a short introduction, Faith and the Apostles’ Creed, Hope and Prayer, Charity and the Commandments, Grace and the Sacraments, Justification and the Last Things. The middle catechism contains all the questions and answers of the small, in exactly the same words, and adds a considerable number of fresh ones. In like manner, the large catechism makes further additions. The small catechism has no texts from Scripture; the other two contain many texts, usually placed in notes at the foot of the page. The chief difference between the middle and large catechisms is that the latter deals more with reasons and proofs, and consequently gives a greater number of Scripture texts. Austria is, therefore, better off than most countries in the matter of the catechism. She has none of the difficulties arising from a multiplicity of manuals, and her single textbook is in the three forms described above as the ideal form. This catechism is also in universal use, and is arranged by means of different types and signs so as to be accommodated to the three stages of the catechism. Religious training in Austria has, however, been severely criticized by Dr. Pichler, a high authority in that country. He considers the catechism as cumbersome, the work of a good theologian but a poor catechist; he advocates the compilation of a new Bible History on the lines of Knecht’s manual; and he advocates the adoption of inductive methods. See Unser Religionsunterricht, der Mangel Unserer Unterrichts.”

One of the best of the German catechisms is that of the Diocese of Augsburg, mainly the work of Kinsel and Hauser, and published in 1904. It is on the lines of Deharbe, but much simplified, and copiously illustrated. So, too, is the new Hungarian catechism (1907), which is issued in three editions: one for the first and second grade of elementary schools, one for the remaining four grades, and one for the higher schools. Bishop Mallath of Transylvania has had the direction of the work. Poland has not been behindhand in reforming its catechetical teaching. A catechism has just been drawn up for the fourth, fifth, and sixth grades by Bishop Liszko and Valentine Gadowski. The answers to be learnt by heart are limited to forty in each year, and are short and simple. Each is followed by a fairly long explanation. This catechism contains 215 illustrations.
It should be noted that all Continental reformers have dropped the idea of making the answers theologically complete. The subsequent explanations supply what was lost, and the people were convinced. Yet and No being seldom used by themselves, and the order of the words in the answers follows that in the questions.

On Catachizing, Methods, etc.: DEPANNON, Method of Catachism (etc.); THE METHOD OF S. SCHEUE (etc.); SPIRAGO, Instruction and Education and its Failures (Notre Dame, 1901); BARELLE, MANNER, and KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.; KRENZEL, ibid.

Catechisms, Manuals, etc.—It would not be possible to give a complete list of the many which are in use. We content ourselves with mentioning a few of the best-known in use in England and the United States. Some have already been mentioned in the article.—A Catechism of Christian Doctrine, prepared and enjoined by order of the Three Councils of Baltimore (1853); The Catechism ordered by the National Synod of the Church of England and approved by the Archbishop of Canterbury and the Bishops of the Diocese of London (Dublin, 1821); A Short Catechism from the Catechism ordered by the Council of Trent (Dublin, 1821); A Catechism of Christian Doctrine approved by the Council of Trent (New York, 1850); The Explanatory Catechism of Christian Doctrine (the same with that of the Little Catechism; an Abridgment of the Catechism of the Council of Trent) (New York, 1843); The Catechism of the Christian Religion (also known as the New York Catechism) (New York, 1837); Conference Catechism (Dublin); SPIRAGO, The Catechism Explained, ed. CLARKE; GERARD, Course of Religious Instruction for Catholic Youth (London, 1901); DEUTSCH, Letters on Christian Doctrine; CARTER, The Catechism Simplified Explained (London, 1897); A Manual of Instruction in Christian Doctrine—approved by Card. Wiseman and Card. Manning, much used in the higher schools and training colleges in the British Isles (London, 1871); TAYLOR, The Catholic Catechism; ANGLOIS, A Catechism for the Aid to the Intellectual Knowledge of the Catechism (London, 1881); FOWER, Catechism: Doctrinal, Moral, Historical, and Logical (London, 1889). See also:

Anglois: MACBAIN, A Catechism of the Church of England (London, 1886). There are many Bible Histories in use, but none of them officially recommended, though published with episcopal approbation. The Catholic Bible (Catholic Press, New York: For Home and School Use (a small elementary work of which the Church has not disapproved); it is capable of improvement) (London, 1872); FORMERLY, Pictorial Bible and Church History Stories, including Old Testament History, the Life of Christ, and Church History (London, 1877); KRENZEL, Biblical Commentary for Schools, ed. GLANTZ (Freiburg im Breisgau, 1884); WEINHANN, Readings from the Old Testament, New Testament Narrative (London, 1887); RICHARDS, Manual of Scriptural History (London, 1895); COSTELLO, The Gospel Story (London, 1897); BAYNE, A Catechism for Catholic Schools, ed. SMITH (London, 1899); St. Edmund's College Series of Scripture Manuals, Ward ed. (London, 1899). See also:

Doctrine, Development of. See Revelation.

Doctrine of Addai (Lat. Doctrina Addari), a Syriac document which relates the legend of the conversion of Edessa. It begins with the story of the letter of King Abgar to Christ (see Abgar), and the reply of the latter, with some variations from the account drawn by Eusebius (Hist. Eccl., I, xiii) from the Edessene archieves. The legend is not a historical tradition, but a verbal message, together with a portrait of Christ (not in Eusebius). After the Ascension Judas Thomas sent Addai, one of the seventy-two Disciples, to Abgar. Addai (Thaddeus in Eusebius) healed the king of his sickness, and pressed him to become a convert. A King's castle was at Edessa, and it is said to have been the imperial seat of the Emperor Claudius; this, with all that follows, is later than Eusebius, being founded on the story of St. Helena. Addai then preaches to the people, who are converted. The heathen altars are thrown down, and the people are baptized. King Abgar induces the Emperor Tiberius to chastise the Jews for having crucified the Saviour. Churches are built by Addai, and he makes deacons and priests. On his death-bed he app-in-e Aggai his successor, ordains the deacon Abal, priest, and gives his last admonitions. He was buried in the sepulchral. King died, his ancestors. Many years after his death, Aggai, who ordained holy priests for the country, was martyred as he taught in the church by a rebellious son of Abgar. His successor, Taliit, was obliged to go to Antioch in order to get episcopal consecration, which he received from Sention, Bishop of Antioch, who him also received the hand from Zephyrinus, Bishop of the city of Rome, from the succession of the hand of the priesthood of Simon Cephas, which he received from Our Lord, who was there Bishop of Rome twenty-five years, every day they meditated on these, "a large number of people assembled day by day and came to the prayer of the service, and to [the reading] of the Old and New Testament, of the Diatessaron"; "But the Law and the Prophets and the Gospel, which ye read every day before the people, and the Epistles of Paul, which Simon Peter sent us from the city of Rome, and the Acts of the twelve Apostles, which John, the son of Zebedee, sent us from Ephesus, these books read ye in the Churches of Christ, and with these read not any others, as there is not any other in which the truth that ye hold is written, except these books, which retain you in the faith to which ye have been called." The canon therefore excludes the Apocrypha and all the Catholic Epistles; in this it agrees with Aphraates, Theodore of Mopsuestia, the Syriac stichometric list of Eusebius, the Apocrypha of the Hebrew Bible, and the MSS.), and probably with Ephrem. The Syriac Church, indeed, never accepted the Apocrypha and the four shorter Catholic Epistles; the three longer were admitted at all events later than 400, at an uncertain date. The Diatessaron was employed by the Syrian Church from its composition by Tatian c. 190 until it was proscribed by the famous Bishop of Edessa, Rabbula (d. 455).

We seem to find firm historical ground in the statement that Palut was consecrated bishop by Sersapion, who was Biau of Antioch, who ascendend to the pontificate, and was the contemporaneous of Pope Zephyrinus. But this shows that Addai, who made Palut a priest, was not one of the seventy-two Disciples of Christ. The first Christian King of Edessa was in reality Abgar IX (179-214) who was conversed soon after 201, and this date tallies with that of Palut. It is possible that Palut was the first Bishop of Edessa; but it is surely more likely that there was already a Church and a bishop under the pagan kings in so important a city. An early date for the Abgar legend is sometimes based upon the promise in the message of Christ: "Thy city shall be blessed..." etc. No enemy and no enemy shall again become master of it for ever." It is argued that this could not have been invented after the sacking of the city under Trajan in 118; but the writer might have passed over this event, a centre for the conversion of the nation, and so can hardly have arisen before the latter half of the third century, and the Edessene Acts used by Euse-
bious were probably not very old when he wrote. The “Doctrine of Addai” is yet later. The Finding of the Cross must be dated some time later than St. Helena; the miraculous picture of Christ was not seen by the Apostle Matthew until about 15 years later. The Addai c. 355. Hence the date of the work may be c. 400.

The “Doctrine of Addai” was first published in Syriac in a fragmentary form by Cureton, “Ancient Syriac Documents” (London, 1894, a posthumous work), with a translation; another translation in “Anto-Nicene Chr. Libr.,” XX. The full Syriac text was published by Phillips, with a translation (London, 1876). An Armenian version and (separately) a French translation, by the Mechtariat Father Leo Alishan, “Labouinian, Lettre d’Abgar” (Venice, 1866).

The literature is very scanty (including the Abgar legend, the Finding of the Cross, the Greek legend in the Acta Thaddæi, and the origins of the Church of Edessa) very large. The following works may be specially mentioned: LIPKA, Die syrischen Abgaragenen brasilisch untersucht (Brasilia, 1880); TETEN, Les origines de l’Eglise d’Edesse et la légende d’Abgar (Paris, 1888); MARTIN, Les origines de l’Eglise d’Edesse et des églises syriennes (extr. from Revue des sec. cent., Paris, 1898); BURKITT, Early Eastern Christianity (London, 1904); NEHUS, De sancto cruce (Berlin, 1889); on the picture of Christ, Von Donner, Christusbilder (Leipzig, 1886). Further research will be found in Bardenhewer, Gesch. der altchristl. Litt., I, 458; CREVALIERE, Répertoire, s. v. Abgar.

Dogma. — I. Definition. — The word dogma (Gr. δόγμα, from διδάσκω) signifies, in the writings of the ancient classical authors, sometimes, an opinion or that which seems true to a person; sometimes, the philosophical doctrines or tenets, and especially the distinctive philosophical doctrines, of a particular school of philosophers (cf. Cic. Acad., ii, 9); and sometimes, a public decree or ordinance, as δόγμα ταυτόσεως. In Sacred Scripture it is used, at one time, in the sense of a decree or edict of the civil authority, as in Luke, ii, 1; “And it came to pass, that in those days there went out a decree [edictum, δόγμα] from Caesar Augustus” (cf. Acts, xvii, 7; Esther, iii, 3); at another time, in the sense of an ordinance of the Mosaic Law, as in Eph., ii, 15: “Making void the law of commandments contained in decrees [Διαθήκης]; and again, it is applied to the ordinances or decrees of the first Apostolic Council in Jerusalem: “As and as they passed through the cities, they delivered unto them the decrees [dogmata] for to keep, that were decreed by the apostles and ancients, who were at Jerusalem” (Acts, xviii, 18). This latter usage shows, as has been said, the usage was prevalent of designating as dogmas the doctrines and moral precepts taught or promulgated by the Saviour or by the Apostles; and a distinction was sometimes made between Divine, Apostolical, and ecclesiastical dogmas, according to the degree or character of their reception, as having been taught by Christ, by the Apostles, or as having been delivered to the faithful by the Church. But according to a long-standing usage a dogma is now understood to be a truth appertaining to faith or morals, revealed by God, transmitted from the Apostles in the Scriptures or by tradition, and proposed by the Church for the acceptance of the faithful. It might be described briefly as a revealed truth defined by the Church; but private revelations do not constitute dogmas, and some theologians confine the word definition of dogma to those truths proposed by a general council, while a revealed truth becomes a dogma even when proposed by the Church through an ordinary magisterium or teaching office. A dogma therefore implies a twofold relation: to Divine revelation, and to the collaborative teaching of the Church. Distinctly a dogma is an explicit dogma, i.e., explicitly revealed; truths revealed formally, but only implicitly; and truths only virtually revealed. A truth is said to be formally revealed, when the speaker or revealer really means to convey that truth by his language, to guarantee it by the authority of his words. The term was c. 355. Hence the date of the work may be c. 400.

Now, truths formally and explicitly revealed by God are certainly dogmas in the strict sense when they are proposed or defined by the Church. Such are the articles of the Apostles’ Creed. Similarly, truths revealed by God formally, but only implicitly, are dogmas in the strict sense when proposed or defined by the Church. Such, for example, are the doctrines of Transubstantiation (q. v.), papal infallibility (q. v.), the Immaculate Conception (q. v.), some of the Church’s teaching about the Saviour, the sacraments, etc. All doctrines defined by the Church as being contained in revelation are understood to be formally revealed, explicitly or implicitly. It is a dogma of faith that the Church is infallible in defining the two classes of revealed truths; and the negation or denial of one of these dogmas certainly involves the sin of heresy. There is a diversity of opinion about virtually revealed truths, which has its roots in a diversity of opinion about the material object of faith (see Faith). It is enough to say here that, according to some theologians, virtually revealed truths belong to the material object of faith and become dogmas in the strict sense when defined or proposed by the Church; and according to others, they do not belong to the material object of faith prior to their definition, but become strict dogmas only when defined and, according to others, they do not belong to the material object of Divine faith at all, nor become dogmas in the strict sense when defined, but may be called mediate-Divine or ecclesiastical dogmas. In the hypothesis that virtually revealed conclusions do not belong to the material object of faith, it has not been defined that the Church is infallible in defining these truths; the infallibility of the Church, however, in relation to these truths is a doctrine of the Church theologically certain, which cannot lawfully be denied; and though the doctrine of ecclesiastical infallibility not being necessary in the strict sense, it could entail the surrendering of the bond of faith and expulsion from the Church by the Church’s anathema or excommunication.

II. Divisions. — The divisions of dogma follow the lines of the division of dogmas into (1) general or special; (2) material or formal; (3) pure or mixed; (4) symbolic or non-symbolic; (5) and they can differ according to their various degrees of necessity.

(1) General dogmas are a part of the revelation meant for mankind and transmitted from the Apostles; while special dogmas are the truths revealed in private revelations. Special dogmas, therefore, are not, strictly speaking, dogmas at all; they are not revealed truths transmitted from the Apostles; nor are they defined or proposed by the Church for the acceptance of the faithful generally. — (2) Dogmas are called material (or Divine, or dogmas in themselves), in so when abstraction is made from their definition by the Church, when they are considered only as revealed; and they are called formal (or Catholic, or in relation to us’; quod nos) when they are considered both as revealed and defined. Again, it is evident that material dogmas are not dogmas in the strict sense of the term. — (3) Pure dogmas are those which can be known only from revelation, as the Trinity (q. v.), Incarnation (q. v.), etc.; while mixed dogmas are truths which can be known from revelation by human reasoning, as the existence and attributes of God.
Both classes are dogmas in the strict sense, when considered as revealed and defined.—(4) Dogmas contained in the symbols or creeds of the Church are called symbolic; the remainder are non-symbolic. Hence all the articles of the Apostles' Creed are dogmas; but not all dogmas are called technically articles of faith. Each dogma, in some sense, is sometimes spoken of as an article of faith.—(5) Finally, there are dogmas belief in which is absolutely necessary as a means to salvation, while faith in others is rendered necessary only by Divine precept; and some dogmas must be explicitly known and believed, while with respect to others the words of the belief apply.

III. OBJECTIVE CHARACTER OF DOGMATIC TRUTH; INTELLECTUAL BELIEF IN DOGMA.—As a dogma is a revealed truth, the intellectual character and objective reality of dogma depend on the intellectual character and objective truth of Divine revelation. We will here apply to dogma the conclusions developed at greater length under the heading of revelation (q.v.).

Are dogmas, considered merely as truths revealed by God, real objective truths addressed to the human mind? Are we bound to believe them with the mind? Should we admit that there is a distinction between fundamental and non-fundamental dogmas?

1. Rationalists deny the existence of Divine supernatural revelation, and consequently of religious dogmas. A certain school of mystics has taught that the essence of religious belief is a "life in the present". The "Modernist" theory by reason of its recent condemnation calls for fuller treatment. There are different shades of opinion among Modernists. Some of them do not, apparently, deny all intellectual value to dogma (cf. Le Roy, "Dogme et Critique"). Dogmas, like revelations may say, is expressed in terms of action. Thus when the Son of God is said "to have come down from heaven", according to all theologians He did not come down, as bodies descend or as angels are conceived to pass from place to place, but the hypostatic union is described in terms of action. So when we profess our faith in God the Father, we mean, according to M. Le Roy, that we have to act towards God as sons; but neither the fatherhood of God, nor the other dogmas of faith, considered as dogmas, have no meaning for the mind; we need not believe them mentally; we may reject them; it is enough if we employ them as guides for our actions. (See Modernism.)

Over against this doctrine the Church teaches that God has made a revelation to the human mind. Revelation, they say, began as aContainers of truth and wisdom, and the evolution or development of revelation was but the progressive development of the religious sense until it reached its highest level, thus far, in the modern liberal and democratic State. Then, according to these writers, the dogmas of faith, considered as dogmas, have no meaning for the mind; we need not believe them mentally; we may reject them; it is enough if we employ them as guides for our actions. (See Modernism.)

2. The dogmas of the Church are immutable. Modernists hold that religious dogmas, as such, have no intellectual meaning, that we are not bound to believe them mentally, that they may be all false, that it is sufficient if we use them as guides to action; and accordingly they teach that dogmas are not immutable, that they should be changed when the spirit of the age is opposed to them, when they lose their value as rules for a liberal religious life. But in the Catholic doctrine that Divine revelation is addressed to the human mind in a strict objective truth, dogmas are immutable Divine truths. It is an immutable truth for all time that Augustus was Emperor of Rome and George Washington first President of the United States. So according to Catholic belief, these are and will be for all time immutable truths; that there are three Persons in God, that Christ died for us, that He arose from the dead, that He founded the Church, that He instituted the sacraments. We may distinguish between the truths themselves and the language in which they are expressed. The full meaning of certain revealed truths has been only gradually brought out; the truths will always remain. Language may change or may receive a new meaning; but we can always learn what meaning was attached to particular words in the past.
(3) We are bound to believe revealed truths irrespective of their definition by the Church, if we are satisfied that God has revealed them. When they are proposed as dogma, that is, as something certain and infallible, and thus become dogmas, we are bound to believe them in order to maintain the bond of faith (see Heresy).

(4) Finally, Catholics do not admit that, as is sometimes alleged, dogmas are the arbitrary creations of ecclesiastical authority, that they are multiplied at will, that they derive solely from the ignorance of the subject, that they are obstacles to conversions. Some of these are points of controversy which cannot be settled without reference to more fundamental questions. Dogmatic definitions would be arbitrary if there were no fixed preparatory sciences and no need for them. Logic and other sciences are devices for keeping the ignorant in subjection, or reasonable obstacles to conversions; on the contrary, the authoritative definition of truth and condemnation of error, are powerful arguments leading to conversion.

V. DOGMA AND RELIGION.—It is sometimes charged that in the Catholic Church, in consequence of its dogmas, religious life consists merely in speculative beliefs and external sacramental formalities. It is a strange charge, arising from prejudices or from lack of acquaintance with Catholic life. Religious life in conventional and monastic establishments is surely not a merely external formality. The external religious exercises of the ordinary Catholic layman, such as public prayer, confession, Holy Communion, etc., suppose careful and serious internal self-examination and self-regulation, and various other acts of internal religion. We need only observe the public civic life of Catholics, their philanthropic works, their schools, hospitals, orphanages, charitable organizations, to be convinced that dogmatic religion does not degenerate into mere "science". It is contrary, in non-Catholic bodies a general decay of supernatural Christian life follows the dissolution of dogmatic religion. Were the dogmatic system of the Catholic Church, with its authoritative infallibility, with safeguarding system of a priori private judgment would not save the world from lapsing into and following pagan ideals. Dogmatic belief is not the be-all and end-all of Catholic life; but the Catholic serves God, honours the Trinity, loves Christ, obeys the Church, frequents the sacraments, assists at Mass, observes the Commandments, because he believes mentally in God, in the Trinity, in the Divinity of Christ, in the Church, in the sacraments and the Sacrifice of the Mass, in the duty of keeping the Commandments; and he believes in them as objective immutable truths.

VI. DOGMA AND SCIENCE.—But, it is objected, dogma checks investigation, antagonizes independence of thought, and makes scientific theology impossible. This difficulty may be supposed to be put by Protestants or by unbelievers. We will consider it from both points of view.

(1) Beyond scientific investigation and freedom of thought, Catholics recognize the guiding influence of dogmatic beliefs. But Protestants also profess to adhere to certain great dogmatic truths which are supposed to inspire individual faith and obedience, and to cooperate with the findings of modern science. Old difficulties against the existence of God or its demonstrability, against the dogma of Creation, miracles, the human soul, and supernatural religion, have been dressed in a new garb and urged by a modern school of scientists principally from the discoveries in geology, paleontology, biology, astronomy, comparative anatomy, and physiology. But Protestants, no less than Catholics, profess to believe in God, in the Creation, in the soul, in the Incarnation, in the possibility of miracles; they too, maintain that there can be no discord between the true conclusions of science and the dogmas of the Christian religion rightly understood. Protestants, therefore, cannot consistently complain that Catholic dogmas impede scientific investigation. But it is urged that in the Catholic system beliefs are not determined by private judgment; that the dogmas of the Church there is the living bulwark of her episcopate. True, behind dogmatic beliefs Catholics recognize ecclesiastical authority; but this puts no further restraint on intellectual freedom; it only raises the question as to the constitution of the Church. Catholics do not believe that God revealed a body of truths to mankind and appointed no living authority to unfold, to teach, to safeguard that body of Divine truths, to decide controversies; but the authority of the episcopate under the supreme pontiff to control intellectual activity is a matter of simple obedience from their authority to teach supernatural truth.

The existence of judges and magistrates does not extend the range of our civil laws; they are rather a living authority to interpret and apply the laws. Similarly, episcopal authority has its range the truth of revelation, and it prohibits only what is inconsistent with the full scope of that truth.

(2) In discussing the question with unbelievers we note that science is the observation and classification, or co-ordination, of the individual facts or phenomena of nature. Now a Catholic is absolutely free in the prosecution of scientific research according to the terms of this definition. There is no prohibition or restriction on Catholics in regard to the observation and co-ordination of the phenomena of nature. But some scientists do not confine themselves as science defined by themselves. They propound theories often unwarranted by experimental observation. One will maintain as a "scientific" truth that there is no God, or that His existence is unknowable; another that the world has not been created; another will deny the possibility of the supernatural revelation, stifling the possibility of supernatural revelation. Surely these denials are not warranted by scientific methods. Catholic dogma and ecclesiastical authority limit intellectual activity only so far as may be necessary to safeguard the supernatural revelation, the possibility of supernatural revelation. The service rendered by Catholics in every department of learning and of social endeavour, is a fact which no amount of theorizing against dogma can set aside. (See Faith, Infallibility, Revelation, Science, Truth.)

DANIEL COGGILAN.
Dogmatic Facts.—(1) Definition.—By a dogmatic fact, in wider sense, is meant any fact connected with a dogma and on which the application of the dogma to a particular case depends. The following questions involve the dogmatic fact: is this a case in which, for instance, really and truly a Roman pontiff, duly elected and recognized by the Universal Church? Is the dogma of faith that every pontiff duly elected and recognized by the Universal Church is a successor of Peter? Again, was this or that council ecumenical? This, too, is connected with dogma, for every ecumenical council is endowed with infallibility and jurisdiction over the Universal Church. The question also whether canonized saints really died in the odour of sanctity is connected with dogma, and the odour of sanctity is saved. In the strictest sense the term dogmatic fact is confined to books and spoken discourses, and its meaning will be explained by a reference to the condemnation by Innocent X of five propositions taken from the posthumous book of Jansenius, entitled “Augustinus.” It might be asked, for example, whether the pope could define that Jansenius was really the author of the book entitled “Augustinus.” It is conceded that he could not. He may speak of it as the work of Jansenius, because, in general, it was true; but it was not as the work of Jansenius. The precise authorship of a book is called a personal fact. The question turned on the doctrine of the book. The Jansenists admitted that the doctrine enunciated in the condemned propositions was heretical; but they maintained that the condemned doctrine was not taught in the “Augustinus.” This brings us to what are called “particular facts of doctrine.” Thus it is a fact that God exists, and that there are three Persons in God; here the same thing is fact and dogma. The Jansenists admitted that the pope could deal with the particular facts of the doctrine, but not to determine the meaning of a book. The controversy was then carried to the meaning of the book. Now it is conceded that the pope cannot define the purely internal, subjective, perhaps singular fact of doctrine, which an author might attach to his words. But the pope, in certain cases, can determine the meaning of a book judged by the general laws of interpretation. And when a book or propositions from a book are condemned, “in the sense of the author,” they are condemned in the sense in which the book was written, whether it was written according to the ordinary laws of language. The same formula may be condemned in one author and not in another, because, interpreted by the context and general argument of the author, it may be understood in one case and not in another. Thus, in a very strict sense, therefore, a dogmatic fact may be defined as “the orthodox or heterodox meaning of a book or proposition;” or as a “fact that is so connected with dogma that a knowledge of the fact is necessary for teaching and conserving sound doctrine.” When we say that a book contains orthodox doctrine, we convey that a certain doctrine is contained in the book and that the doctrine is orthodox; here we have close connexion between fact and dogma.

(2) The Church and Dogmatic Facts.—Jansenists distinguished between “fact” and “dogma.” They held that the Church is infallible in defining revealed truth and in condemning errors opposed to revealed truth; but that the Church is not infallible in defining facts which are not contained in Divine revelation, and consequently that the Church was not infallible in the proposition: “A dogma which is not orthodoxy, was found in the “Augustinus” of Jansenius. This would confine the infallible teaching of the Church to mere abstract doctrines, a view that cannot be accepted. Theologians are unanimous in teaching that the Church, or the pope, is infallible in defining what is actually contained in Divine revelation, but also in defining virtually revealed truths, or generally in all definitions and condemnations which are necessary for safe-guarding the body of revealed truth. Whether it is to be regarded as a defined doctrine, as a dogma, is left for the Church, and the doctrine of the Church, in definitions about dogmatic facts, is disputed among theologians. The reason of this difference of opinion will appear below (3). The Church, in all ages, has exercised the right of pronouncing with authority on dogmatic facts; and this right is essential to her teaching office. She has always claimed the right of defining that the doctrine of heretics, in the sense in which it is contained in their books, or in their discourses, is heretical; that the doctrine of an orthodox writer, in the sense in which it is contained in his writings, is orthodox. We can scarcely imagine a theory like that of the Jansenists advanced within the sphere of the civil authority. We can scarcely conceive it to be held that a judge and a jury may pronounce on an abstract proposition of libel, but cannot find that a particular paragraph in a book or newspaper is libelous in the sense in which it is written. If the Church could not define the orthodox or unorthodox sense of books, sermons, conferences, and discourses generally, she might still be infallible in regard to abstract doctrine, but she could not fulfil her task as practical teacher of the things of God, as a protection against actual concrete dangers to their faith and morals.

(3) Faith and Dogmatic Facts.—The more extreme Jansenists, distinguishing between dogma and fact, taught that the dogma is the proper object of faith but that to the definition of fact only respect is due. They refused to subscribe the formula of the condemnation of Jansenism, or would subscribe only with a qualification, on the ground that subscription implied internal assent and acquiescence. The less extreme party, though limiting the Church’s infallibility to the dogmatic fact of doctrine, held that the definition of fact might be signed absolutely and without qualification, on the ground that, by general usage, subscription to such a formula implied assent to the dogma, but, in relation to the fact, only external reverence. But the definitions of dogmatic facts demand real internal assent; though about the nature of the assent and its relation to faith theologians are not unanimous. Some theologians hold that definitions of dogmatic facts, and especially of dogmatic facts in the wider acceptance of the term, are believed by Divine faith. For instance, when the pope, in his capacity as the duly elected is the successor of Peter,” is formally revealed. Then, say these theologians, the proposition, “Pius X has been duly elected pope,” only shows that Pius X is included in the general revealed proposition, “either the pope was not infallible in defining such doctrines.” Other theologians hold that the definitions of dogmatic facts, in the wider and stricter acceptance, are received, not by Divine faith, but by ecclesiastical faith, which some call mediate Divine faith. They hold that in such syllogism as this: “Every duly elected pontiff is Peter’s successor; but Pius X, for example, is a duly elected pontiff; therefore he is a successor of Peter,” the conclusion is not formally revealed by God, but is inferred from a revealed and an unrevealed proposition, and that consequently it is believed, not by Divine, but by ecclesiastical faith. It would then also be doctrine that he has been normally defined de fide that the Church is infallible in the definition of dogmatic facts. It would be said technically to be theologically certain that the Church is infallible in these definitions; and this infallibility is based on the definition of the terms. Therefore the Church is bound to give internal assent to Church definitions of dogmatic
facts is evident from the correlative duties of teacher and persons taught. As it belongs to the duty of
supreme pastor to define the meaning of a book or
proposition, correlatively it is the duty of the subjects
who are taught to accept this meaning. (See DOGMA,
FAITH, INFALLIBILITY, JANSENISM.)

Dol and Saint-Malo, Diocese of. See RENNES, Diocese of.

Dolbeau, Jean, Recollect friar, b. in the Province of
Anjou, France, 12 March, 1558; d. at Orleans, 9
June, 1652. He entered the order at the age of nine-
ten at Balmette, near Angers, and was one of the four
Recollects who were the first missionaries of Canada.

He landed at Quebec in May, 1615, and celebrated the
first Mass ever said there. He became commissionary
provincial of the mission in 1618 and preached the
first jubilee accorded to Canada. This zealous mis-
sionary built the first monastery of the Recollects at
Quebec in 1620. He returned to France in 1625, taking
with him a young Indian boy who was later baptized
at Angers. Endowed with many striking qualities, his
father Dolbeau was remarkable for extraordinary
spiritual insight and profound humility. He was suc-
cessively master of novices, guardian, definitor, and
provincial delegate at the general chapter of the order
held in Spain in 1633. He died in the forty-seventh
year of his religious life.

Biographical notices, seventeenth Century MSS. (Public
Library, Paris); Bagard, Hist. du Canada (Paris, 1668); ed.
Trom (1666); Leglencro, Premier établissement de la feco
dees in Nouvelle France (Paris, 1691); Sera tr. (New York, 1881).

ODORIC M. JOUVE.

Dolci, Carlo, painter, b. in Florence, Italy, 25
May, 1616; d. 17 January, 1686. The grandson of a
painter, he seems to have inherited a talent for art.
He studied under J. Vignali, and when only eleven
years old he attracted attention by the excellence of
his work, notably a figure of Saint John and a head of
the Infant Jesus. The precocious youth made a care-
fully-finised picture of his mother, and thereafter
was kept busy filling the numerous commissions he
received in Florence, a city he seldom left during his
long life, which he devoted to art. Dolci was one of
the few masters whose pictures were eagerly sought
for by his countrymen during his lifetime. He was
very pious and painted religious works exclusively. It
always was well drawn and standing out in beautiful
relief, are life-size. Next in excellence to this is the "St.
John writing his Gospel" (Berlin). His "Master Do-
lorosa" called "Madonna del Dito" (of the thumb) is
known throughout the civilized world because of its
many reproductions. In 1662 Dolci saw with chagrin
Giordano accomplish in a few hours what would have
taken him weeks, and it is said he was thereupon
seized with melancholy which ultimately led to his
death. Loma, Mancini, Mariani, and Agnese Dolci
(his daughter) were a few of his pupils and imitators.
Contemporary copyists have filled European collec-
tions with spurious Dolcis. Agnese Dolci, who died
the same year as her father, not only made marvellous
copies of the master's pictures, but was herself an ex-
cellent painter. Her "Consecration of the Bread and
Wine" is in the Louvre. Other works by him are:
"Virgin and Child", National Gallery, London; "The
Saviour seated with Saints", Florence; "Madonna

CAYLAUX, Hist. of Painting in Italy (London, 1871).

LEIGH HUNT.

Doliche, a titular see of Commagene (Augusto-
Euphrates). It was a small city on the road from
Germania to Zeugma (Ptolemy, V, 16, 10; Itiner.
Anton., 184, 199, 191, 194; Tab. Peutinger.), famous for
its temple of Zeus Dolichenus; it struck its own coins
from Marcus Aurelius to Caracalla. The ruins stand
at Tell Dultuk, three miles northwest of Anitab, in the
village of Aleppo. Doliche was at an early date an
episcopal see suffragan of Hierapolis (Mabbouz, Mém.); Lequien (Or. Chr., II, 937) mentions eight Greek bishops: Archelaus, present at Nicaea in 325, and at Antioch in 328; Olympius, present at Nicaea in 325; Cyril at Seleucia in 359; Maris at Constantinople in 381; Abibus, a Nestorian, in 431, deposed in 454; Athanasius, his successor; Timothy, a correspondent of Theodoret, present at Antioch in 444 and at Chalcedon in 451; Philoxenus, a nephew of the celebrated Philoxenus of Hierapolis, deposed as a Syrianian in 518, reinstated in 533 (Brooks, The Sixth Book of the Select Letters of Severus, London, 1904, II, 89, 90, 345–350, 352). The see figures in the first "Notitia Episcopatum" ed. Parthey, about 840. At a later time he toiled the role of Antiochus as modified. 

Döllinger, Johann Joseph Ignaz von, historian and theologian, b. at Bamberg, Bavaria, 28 February, 1799; d. at Munich, 10 January, 1890. Family and Education.—Döllinger's father was a professor of medicine in the University of Bamberg, and his son was influenced, in a unusual degree, by the ideas and environment of his parents. The medical faculty of the University of Bamberg owed its foundation to his grandfather, whose son, the father of Ignaz (as Döllinger was usually called), became regular professor of medicine in the same university in 1794, but in 1803 was called to Würzburg. It was only natural that amid surroundings predominantly academic the youthful Ignaz should acquire a strong love of books, the best of which were then written in French, which language the future historian of the Church learned from his father. In the gymnasium he acquired a knowledge of Italian. A Benedictine monk taught him English privately, and he learned Spanish at the university. An orderly acquisition of learning and the full development of all his rich gifts would have led to extraordinary achievements. He had also sufficient means to satisfy any reasonable wishes for foreign travel and the purchase of books. All these circumstances, doubtless, combined to render his mind particularly receptive; at the same time the multitude of impressions daily made on the youth, the desire to outline a plan of studies by far too comprehensive. 

On entering the University of Würzburg at the age of sixteen, he took up at once history, philosophy, philology, and the natural sciences. In this choice there is already evident a certain mental irregularity, the more remarkable if we call what he said, two years later, apropos of his choice of a vocation, viz., that, "no professor in the faculty of philosophy had been able to attract him to his particular science". The conversion of such men as Eckhart, Werner, Schlegel, Stolberg, and Winkelmann turned his thoughts to theology, which he took up in 1818, but without abandoning botany, mineralogy, and entomology, to which studies he continued for many years to devote considerable time. We quote from Friedrich the following noteworthy utterance of Döllinger: "To most other students theology was only a means to the end. To me, on the contrary, theology, or science in general based on theology, was the end, the choice of a vocation only the means." During his student days he seldom attended the regular lectures on theology, but devoted himself to the study of philosophy and law; privately, however, he read many works on theology. His studies were better regulated when in 1820 he entered the ecclesiastical seminary at Bamberg and followed the theological courses given at the lyceum. The year and a half spent there were marked by a slight, but sufficiently, for the previous lack of a systematic training in theology. He was ordained priest 22 April, 1822, spent the summer at his home, and in November, was appointed chaplain at Marktsheinfeld in Middle Franconia. He studied the subject of the development of historical theology that his works at times exhibit, his career gives evidence enough that he never took the pains to round out satisfactorily the insufficiency of his early training in theology. The elder Döllinger had hoped to see his son follow an academic career and opposed his choice of the priesthood; among the reasons for his opposition was the conviction, openly expressed (and then prevalent enough among the German clergy), that for physiological reasons a celibate life was impossible. 

Career.—Döllinger's father soon obtained (November, 1823) for him a place as professor of canon law and church history at the lyceum of Aschaffenburg. It was here that in 1826 he published his first work, "Die Eucharistie in den drei ersten Jahrhunderten", an eloquent and solid treatise, still much appreciated. It obtained for him from the theological faculty of the Bavarian University of Landsbut the title of Doctor of Theology in absentia. In the same year he was called to Munich as professor extraordinary of canon law and church history, and in 1827 was made professor in ordinary. In 1830 the king gave him a canonry at the royal capel (Hofkapelle zu München) at Munich, and on 1 Jan., 1847, he was made mitred provost or head of that body of canons. In the same year he was dismissed from his chair, in punishment of his protest as representative of the university in the Bavarian Landtag, to which he had been appointed in 1844, against the dismissal of several university professors. But in 1848 he was chosen representative to the Frankfort Parliament and remained in attendance until the middle of 1849. Then followed (24 Dec., 1849; according to some authorities 1 Jan., 1850) his reappointment as professor, which office he held until 18 April, 1871, when Archbishop von Scherr publicly excommunicated him. Thereupon he laid down his ecclesiastical charges, recognized the binding force of his excommunication and, though he held his professorate another year, taught only a course of modern history. In 1865 King Louis II. of Bavaria had appointed him royal councillor, and maintained him in his office as provost of St. Cajetan, even after his excommunication; practically, this meant only the continuance to him of the revenue of the position. Döllinger retired in 1868 under the influence of royal favour; when, on the death of the famous chemist Liebig, he was named by the king to the presidency of the Royal Bavarian Academy of Sciences and general conservator of the scientific collections of the State. As early as 1857 he had become a member extraordinary of the Academy, in 1843 a regular member, and from 1860 was secretary of its historical section. Many attempts were made, by ecclesiastics and laymen, to induce Döllinger to return to the Church. The personal conviction of the latter may be read in his correspondence (edited by Friedrich, Munich, 1899–1901) with Archbishop Steichele and the nuncio, Monsignor Ruffo-Scilla. In 1886 and 1887 both of these prelates together with Bishop von Heeke of Rottenburg besought Döllinger to abandon his Old-Catholic attitude and be reconciled with the Church. His response to the archbishop contained these words: "Ought I (in obedience to your suggestion) to appear before the Eternal Judge, my conscience burdened with a double perjury?" At the end of his letter to the nuncio he begged "the people of the clergy" to be so far sufficient to make clear to you that with such convictions one may stand even on the threshold of eternity in a condition of inner peace and spiritual calm". He died aged ninety-one, still outside the communion of the Church.

Life and Writings.—It was at Munich that Döllinger began his life-work. Formally, he was pro-
fessor of canon law and ecclesiastical history, but was soon burdened with the teaching of dogma and New Testament exegesis, a task to which he preferred lesser ones which have proved equal. He declined, in 1829, a call to Breslau, although King Louis I heartily wished him out of Bavaria; he also refused a later call to Freiburg in the Breisgau. He was offered, in 1839, a professorship at an English college, but preferred to remain in Munich. To facilitate the coming of Johann Adam Möhler from Tübingen to Munich (1833), he gave over to him the courses of ecclesiastical history and New Testament exegesis, and when Möhler died (12 April, 1838) he collected a number of essays of great theo-logians of Europe by the most prominent men already in the field, but were widely scattered, and published them in two volumes (1839) under the title of "Gesammelte Schriften und Aufsätze." While Möhler taught at Munich, Döllinger lectured on the history of dogma (Historische Dogmatik). At the request of Abel, Minister of the Interior, Döllinger began, in 1838, a course of lectures in the Faculty of Philosophy on the philosophy of religion in opposition to the teaching of the honorary professor Von Baader, the theologian, and of Schelling. He continued, however, to lecture on dogma and ecclesiastical history. From November, 1846, to February, 1848, Bavarian public affairs were disturbed by the royal attachment to Lola Montez, a Spanish ballerina; the Abel ministry was dismissed, and professors Lasaulx, Moy, Phillips, Höfler, and Deutinger either dismissed or reprimanded; Döllinger, finally, as stated above, was removed from his office. After his restoration in 1850 he continued to the end as professor of church history. In 1862 he was made Knight of the Order of Maximilian for science and art.

Apart from his aforesaid offices of canon and professor, Döllinger held but one other ecclesiastical office in Munich. After the conflict concerning mixed marriages (1832), he was made defense matrimonii in the matrimonial court of first instance, later in that of second instance, which office he held until 1862. His circle of friends was from the beginning quite extensive; the physicians and professors of the natural sciences who frequented his father's house were themselves men of distinction. As a student he formed the acquaintance of the poet, Graf von Platen, and of Victor Amédé Huber. Later, Pfaff wished to study Sanskrit with Döllinger, and visited him twice at Martinschenfeld. In the ecclesiastical seminary of Bamberg he met Prince Alexander von Hohenlohe (q. v.), of whose miraculous cures he said later: "Cures there were, but such as often happened still in the history of the Middle Ages; the stirring of the emotions suffices easily enough to explain them." A remark that fails to account for the presence of de-emotions in the absent sick. On a visit to Platen at Erlangen, in 1822, he met Pfaff, Schubert, and Schelling, the last a friend of his father. In his early days at Munich he was much in the company of the above-mentioned philosopher, Franz von Baader. When in 1827, the famous Joseph Görres came to Munich as professor of history, there formed about him at once a sympathetic circle of scholars, among them the youthful Döllinger. Döll-inger's relations with Lanenmair, more particularly with Count Montalembert, gave occasion in 1832 to a violent attack in the Bavarian Parliament on Görres and his friends, Lanenmair at that time contem-plated the establishment at Munich of a house of study (Gesellschafts-œuvre des clergé allemandes), who might thus come under the influence of Görres, Baader, and others, and on their return to France stand manfully for the defence of the Church. In the meantime Döllinger had met Andreas Rass, the founder (1821) of the so-called Katholische Monatsschrift. In 1828 was rector of the ecclesiastical seminary at Strasbourg as well as professor of dogma and homiletics; with Döllinger he projected various literary enterprises which, through pressure of other work, were never realized.

At this time Monsignor Wiseman, later Cardinal, and Archbishop of Westminster, then professor at the Roman University (Sapienza) and rector of the English College, saw the necessity of strengthening Catholicism in the development of its new opportunities in England, and for this reason was minded to effect closer relations with the learned clergy of Germany. Döllinger seemed to him the proper mediator; he therefore visited Munich in 1835, made the acquaintance of the distinguished professor, and spoke with him of his hopes and plans. Wiseman, already well known in Munich as "the Horse Syriac," aroused in Döllinger so deep an interest, that the next year the latter visited England. His biographer, Friedrich, describes the result of this visit as follows: "Döllinger had a life-long hatred of bureaucracy both in Church and State; the large independence, therefore, of English public life delighted him and filled him with an admiration that was often excessive. Thenceforward, wherever he remained always in close touch with England, kept constantly in his home, and at considerable sacrifice, a number of young English students, and directed the studies of others whom he could not keep under his own roof." In 1850 the youthful Sir John Emerich Edward Astor (q. v.) entered his house as a student, to become later his intimate friend. Later, as John Lord Acton and Regius Professor of modern history at Cambridge, he remained in close touch with the Old Catholics, though he never formally severed his connexion with the Church. We do not as yet possess accurate knowledge concerning Acton's share in the work known as "Letters from Rome" concerning the Vatican Council (Römische Briefe vom Konzil), published by Döllinger in the Augsburg "Allgemeine Zeitung." As a rule Döllinger observed with his pupils a strict academic dignity and reserve; among the few whom he treated as intimate friends Acton was easily the foremost. Among those who in this early period exerted the greatest influence over Döllinger was Karl Ernest Jarecke, founder and editor (since 1832) of the Berlin "Politische Wochenblatter," confidant of Metternich, and a frequent visitor to the Bavarian capital. In 1838 came the foundation of the "Historisch-politi- sche Blätter" by Guido Görres, Phillips, and Jarecke; the new organ soon greatly augmented the influence of Görres and his circle of friends, the most loyal and earnest of whom at this time was Döllinger.

The dispute over the question of mixed marriages in Prussia, known as the Kölner Streit (1831), followed closely upon the in Bavaria (1831); both were fought out dramatically, and brought Döllinger and his Munich friends to the front as vigorous defenders of Catholic rights. The first estrangement of Döllinger from Görres and his friends came about through the publication of an important manual of canon law by Phillips (from 1834 to 1847). To Döllinger it seemed that the latter emphasized excessively the extent of the papal pre-
DÖLLINGER

rogative. Nevertheless, he continued for a decade to collaborate on the “Historisch-politische Blätter”; it was only slowly and almost imperceptibly that the change in his opinions came about. Gradually, owing to contacts with the Jesuits who came to the Roman Curia, he sought and found new friends in Liberal circles. As a member of the Frankfurt Parliament (1848) he sat with the Right, among men like Radovits, Lichnowsky, Schwennin, Vincze, and others; he also belonged to the Club “Zum steinernen Hause”.

The change that had come about in Döllinger’s views during the preceding years may best be measured by the fact that his colleagues in Frankfurt obtained his consent to the following plan. General von Radovits, in the name of the Catholic deputies, was to make this declaration in Parliament: “The orders, including the Jesuit Order, are not a part of the living organism of the Catholic Church; the Jesuit Order is no wise necessary in Germany; the German episcopate and the German clergy do not need its help to fulfill their obligations; German learning (die deutsche Wissenschaft) needs no aid of this nature. The possible advantages for the Catholic Church accruing from the co-operation of the Jesuit Order would be greatly outweighed by the disturbances and perils that it itself would create. If it were proposed to introduce the Jesuits into any German State, moved by the higher interests of the Catholic Church, we would protest most decidedly against the execution of any such plan.”

The relations of Döllinger with the German episcopate were frequent, particularly after the meeting of the German and Austrian prelates at Würzburg (22 Oct. to 16 Nov., 1848). His report concerning the national Church and national synods, as submitted to this important assembly, aroused deep interest, was received with approval in many episcopal circles, and assured him the leadership in the acute ecclesiastico-political discussions then impending. Between 1852 and 1854 he visited Northern and Central Italy, and in 1857 Rome. Apart from his learned researches on these occasions, he profited by these journeys to strengthen his existing relations with numerous Italians, ecclesiastics and laymen, also to make new acquaintances and friendships. While Döllinger sought in every way to retain the favour of King Maximilian II, the cleft between him and his former friends as well as between him and the papal Church himself seemed to stand almost alone, particularly after the stormy scenes of the Munich Congress of Catholic savants (28 Sept. to 1 Oct., 1863). Daniel Bonfaius von Haneberg, Abbot of St. Boniface in Munich, opened this Congress of eighty-four members, mostly German theologians, on which occasion Döllinger delivered his famous discourse, “Die Vergangenheit und Gegenwart der katholischen Theologie” (The Past and Present of Catholic Theology). Many of those present, among them Haneberg, saw with some alarm that they could not follow Döllinger along the new path he was taking. He held no longer to the universal idea of Catholicism as a world-religion; in its place, nourished by the court atmosphere he loved so well, arose a strictly nationalistic concept of the Catholic Church. All ecclesiastical measures he henceforth criticized from the narrow angle of Gallicanism, and ridiculed in anonymous articles and other writings. He was daily in closer communion with the principal Bavarian state men, and amid these relations conceived an idea of the Church’s office which in the end came to dominate him. Noticing here, that his intimacy with the philosopher Johann Huber, a disciple of Schelling, had attracted attention long before this. Nevertheless (and it was a sign of the strong tension of those days and the mental tempers) the number of German Catholics Döllinger, although they had long since parted company with Joseph Hubert Reinkens, professor of church history at Breslau and later first bishop of the Old Catholics. It was not until 18 July, 1870, when the dogma of Papal Infallibility was proclaimed at Rome, that there was a sharp division in the ranks of German Catholics, and it was particularly the Jesuits who sought to find friends and allies exclusively among the leaders of the Kulturkampf and the Old Catholics, as also among anti-Catholic statesmen and princes.

Döllinger, as is well known, wrote much and admirably, and his writings exhibit, with a rare fidelity, every phase of his mental conflict. He was still a young man when his profound learning and brilliant diction, coupled with an unusual ease and rapidity in the critical treatment of whatever historical thesis lay before him, earned for him an international reputation. He lacked, however, the methodical training necessary for the scientific editing of original texts and documents, in which respect his deficiencies were occasionally only too evident. He was not content with bare investigation of the facts and problems of Christian antiquity, of medieval and modern history, but sought always a satisfactory solution for the difficulties that confronted the student. His diction was always charming, whether the subject were one demanding a strictly scientific and well-ordered narrative or the light and ready style called for by the preening, but ephemeral, needs of the hour. He was quite as skilful as a public speaker, not only when delivering a carefully prepared discourse, but also when called on for an extemporaneous address. A typical example of his ability in this respect was the extemporaneous discourse in St. Paul’s Church, Frankfort, on Church and State, apropos of Article III of the fundamental articles (Grundrechte) of the Constitution: several of the best speakers had preceded him, and, in order to closely follow their line of thought, his whole address had to be extemporized; nevertheless it was admitted by all that, both in form and logic, his address was by far the best delivered on that occasion. The admiration of his students, no doubt, was due in great measure to the beautiful diction in which he was wont to dress the facts of history.

The writings of Döllinger may be divided into purely scientific and political or ecclesiastico-political. They exhibit for the most part, however, a mutual interdependence and often complete one another. To avoid repetition, it seems better to follow the chronological order. It is worthy of note that when writing anonymously he was as good as when fully revealed. For a while he was not only a man of the world, but even violent; writing over his own name he usually avoided such extremes. His first work (1826), “Die Eucharistie in der, drei ersten Jahrhunderten”, has already been mentioned. In 1828 he published the first volumes of Hirtig’s “Kirchengeschichte”, from the Reformation to the end of the eighteenth century. He also wrote frequently at this time for “Eos”, a new review founded by his friends, Basder and Görres; most of the articles dealt with contemporary subjects. According to Friedrich he also prepared “Umriss zu Dante’s Paradies von P. P. Contini”, i.e., the introduction to that writer’s edition of Dante’s “Paradiso”. His journalistic activity, however, was far from pleasing to the ministerial censors, Joseph Freiherr von Homburg a somewhat erratic, but influential, person, who so influenced the king that he wished Döllinger well out of Bavaria, as has been seen in the case of his call to Breslau.

In these years, also, he defended with vigour the matrimonial legislation of the Church, in connexion with the “Mixed Marriages” conflict (1831) in the Upper House of the Bavarian Diet. He also was an author of an anonymous work “Über die gemischten Ehen”; at the same time he suggested as a means of avoiding all conflict, that the civil marriage be separated from the religious ceremony. Meanwhile he continued, however, to hope still for conciliatory measures. In 1833 and 1835 respectively he published the first and second parts of his “Handbuch der Kirch-
DÖLLINGER

angeschichte" (to the end of the seventh century). The next year (1836) he brought out the first volume, and in 1838 the first half of the second volume of his "Lahrzehn der Kirchengeschichte" (to the end of the fifth century). The section "Münchener Religions, eine historische Betrachtung" was read before the Munich Academy about the time he published the above-quoted work on mixed marriages; early in 1838 he published his "Betreffung der Darlegung des geheimen Rathen Bunsens: eine Stimme zum Frieden". A long controversy with Professor Thiersch followed this entrance of Döllinger into the Prussian conflict over mixed marriages (Köln Stritt); his articles were printed in the Augsburg "Allgemeine Zeitung", and are apparently his earliest contributions to the journal, in which they appeared two years later. He was to consummate his apostasy. Karl von Abel, Minister of the Interior, now asked him to publish a popular "Weltgeschichte", or universal history, from the Catholic point of view, also a manual of religion (Religionslehrebuch) for the gymnasia or high-schools; he began these works, but, feeling himself unsuited to their composition, persuaded the minister to relieve him from the undertaking. Later on, he undertook to explain his failure in the Parliament; his explanation, however, seems quite improbable, and may be looked at as either a meaningless statement or a confession. A royal order (1838) that compelled all soldiers to genuflect before the Blessed Sacrament was soon the cause of much friction; in 1843 the matter came before the Upper House, where representatives of the non-Catholic soldiers protested against the measure as contrary to liberty of conscience. Döllinger defended the king and the Government in an anonymous work entitled: "Die Frage der Kneunung der Protestanten von der religiönen und staatsrechtlichen Seite erwogen", wherein he treated the question from both the religious and political point of view; this was followed by a long controversy with the Protestant deputy, Harless. In the meantime he was chosen by the University of Munich as its representative in the Bavarian Parliament, where he protested against the admission of the Jews and defended the emancipation of the Jews, both of which acts drew upon him the enmity of many.

During this political agitation, and while Lola Montez still held the king infatuated, opposed the formal Catholic Church, and in the imperial constitution, "Entwicklung und ihre Wirkungen im Umfange des lutherischen Bekenntnisses", i.e. on the origin, development, and consequences of the Reformation in Lutheran circles; the second volume appeared in 1847, the third in 1848. A second edition of the first volume was printed in 1849. This work unfortunately remained incomplete; Friedrich says that Döllinger's friends prevented him from publishing the corresponding three volumes, i.e. an account of the conditions within the Catholic Church in the same period. This work, long expected by those who still retain its value, Johannes Janse was inspired by it to undertake the exhaustive studies which have done so much to destroy the traditional legends that so long did duty as a history of the Reformation.

The foolish attempt of some zealots to have the temporal power of the pope proclaimed a dogma (Dogmatization der Kirchenstaaten) excited Döllinger to an extraordinary degree. He became firmly persuaded that theological science could be saved only by the German Catholic Church, not by the Catholic Church in general, and still more by the chief historical theology. All other ecclesiastical interests seemed to this great scholar quite subordinate. His aversion to the education of the clergy in seminaries, later quite pronounced, was another result of this mental attitude, the trend of which he revealed in the above-mentioned report (1848) of the Würzburg meeting of the German and Austrian bishops. Gradually he came to be looked upon as a Gallican, nor was this because of his frequently expressed and strong disapproval of the Jesuits. Many persons among the best and most liberal supporters of the Church, looked henceforth with a certain anxiety on the course of Döllinger. It could not be said that the nuncios at Munich admired him unrestrainedly. On the other hand, throughout the ranks of the German and Austrian clergy there was still only a mediocre theological knowledge, the legacy of an earlier period of infidelity and rationalism, and the concept of Catholic doctrine and discipline differed widely from the true ecclesiastical ideal of both.

To understand fully the profound changes working in the mind of Döllinger during the critical years from 1847 to 1852, it is well to recall his discourses at the general meetings of the "Katholischer Verein" at Ratibor (1849) and Linz (1850), also those in the Upper House of the Bavarian Parliament, in St. Paul's at Frankfort, and at the meetings of the German hierarchy at Würzburg (1849) and Freising (1850). To some extent, also, disappointment was responsible for his new mental attitude; his friends and admirers had tried in vain to obtain for him an important German see. It is worthy of notice that about 1850 the author of the writings of the Reformers began gradually to modify his views to such an extent that eventually (in 1889) he wrote a panegyric on Protestantism.

The Greek patriotic text entitled "Philosophoumena, or Refutation of all Heresies", discovered in 1842 and edited by Miller (Oxford, 1851), at once fascinated Döllinger, and he devoted to its study all the rich powers of his erudition, critical skill, and insight. In 1853 he published the result of his labors in "Hippolytus und Kallistus, oder die römische Kirche in der ersten Hälfe des dritten Jahrhunderts", i.e., a study of the Roman Church from 200 to 250, in reply to the interpretations of the "Philosophoumena" published by Bunsen, Wordsworth, Baur, and Gieseler. Despite the contrary arguments of De Rossi, Döllinger's opinion has prevailed, and it is now generally acknowledged that Hippolytus is the author of the work in question. Döllinger's essay in the "Historisch-Politische Blätter" (1853) entitled "Betrachtungen über die Frage der Kaiserkrönung", considerations on the imperial coronation, contributed not a little to deter Pius IX from crowning Napoleon III. Concerning the definition of the dogma of the Immaculate Conception Döllinger exhibited a prejudiced mind and a rather superficial historical grasp of the question; the defects in his theological equipment were here most noticeable. Indeed, he was much less concerned with the doctrine itself than with the person who wished to proclaim it as a dogma of faith. It was also his first open protest against a pope who was soon to proclaim that Papal Infallibility which seemed to Döllinger an utterly intolerable doctrine, from his viewpoint of exaggerated esteem for historical theology.

The year 1857 was marked by the appearance of his "Heidenthum und Judenthum, Vorhalte des Christentums" (Heathenism and Judaism, the Vestibule of Christianity), the first part of his long contemplated history of the Church; the second part followed in 1860 (2nd ed., 1868) as "Christentum und Kirche in der Zeit der Gründlegung", dealing with the Apostolic period. The work, as he had planned, was never completed. Most of the abundant material he had collected for an exhaustive history of the papacy was afterwards utilised in an ephemeral journalistic way. The work itself he never undertook, and had he done so, it is possible that he would have come into conflict with the Holy See much sooner than he did.

In 1861 some of the principal ladies of Munich requested him to deliver a series of public discourses on
DÖLLINGER

the Temporal Power; to this he acceded with pleasure, and the discourses given in the royal Oedeum were followed with deep attention by crowned audiences. His lay activities were purely political, and he was clearly inspired by Liberalism that in the midst of one of them the papal nuncio, Monsignor Chigi, srove with indignation and left the hall. The impression made by these discourses on the Catholic world was painful in the extreme. Döllinger was himself deeply troubled by the apologist aroused; to justify himself in some measure, also to strengthen his position, now seriously compromised, he composed in great haste and issued during the same year his "Kirche und Kirchen, Papststhum und Kirchenstaat". It seems inexact that a public opinion and judgments one reads in this work are really Döllinger's own; the reader is haunted by the suspicion that he has before him a remarkable mixture of Byzantiumism and hypocrisy.

The Catholic academic circles of Germany were in the meantime deeply agitated by the discussions incident to the renaissance of Scholasticism (see Neo-Scholasticism) in theology and philosophy, and those over the merits of the episcopal seminaries as against the theological faculties of the universities for the education of candidates for the priesthood. There was no lack of bitter and vehement denunciation, and in the council, whereupon it seemed to many that an academical congress would be a helpful measure. An assembly of Catholic scholars met in 1836 at Munich, before which, as already stated, Döllinger delivered (28 September) the discourse "Die Verpflichtung und Gegenswart dekatholischen Theologien" (The Past and Present of Catholic Theology). His views, as expressed on this occasion, were calculated to irritate and embitter his opponents, and a reconciliation seemed farther away than before. Shortly afterwards, in the thirteenth thesis of the papal Syllabus of 8 Dec. 1864 (see QUANTA CURA), certain opinions of Döllinger were condemned.

It was unfortunate, but not surprising, therefore, that the "Papstebeln des Mittelalters" medieval fables about the popes (Munich, 1863; 2nd ed., 1890), received no impartial appreciation from his opponents; the pages (131-55) on the Monothelitism of Pope Honorius were considered particularly offensive. From this period to the publication of the "Janus" letters, the pen of Döllinger produced mostly anonymous pamphlets which his friends passed round, and of which the public only gained a daily more clearly foretold. He gave also much thought to the plan of a universal German biography, the present "Allgemeine deutsche Biographie". Though it was finally von Ranke who induced the Munich Academy to undertake the practically finished work which, unfortunately, still shows frequent traces of partisanship, it was Döllinger's ardour and insistence that first moved the Academy to consider the proposition. There is even yet a very widespread conviction, and it was believed by the great Christian and neo-Germanist Deleome, that he was quite accurately informed on all the details of the Vatican Council, that Döllinger would scarcely have left the Church if he had been invited to take an honourable share in the preliminary work for the council. Nor does his career at all improbable to those who understand his character. It is, in any case, very regrettable that on this point the influence of Cardinal Reissach should have outweighed that of Cardinal Schwarzenberg, and availed to exclude the Munich historian.

Severe had the first detailed accounts of the opposition of Munich to Döllinger published in the Augsburg "Allgemeine Zeitung" his famous "March articles", reprinted anonymously in August of that year under the title: "Janus, der Papst, und das Koncil." The accurate knowledge of papal history here displayed excited especially the readers that it was Döllinger who could have written the work. At this time he provoked the "Hohenlohe theses" and followed them up with an anonymous work, "Erwagungen für die Bischöfe des Konzils über die Frage der Unfehlbarkeit", considerations concerning papal infallibility that had been published by the council. This work was translated into French, and a copy sent to every bishop. In the meantime Cardinal Schwartzenberg, in union with French sympathisers, urged him to be present at Rome in his private capacity during the council; he preferred, however, to remain at Munich, where he prepared for the famous "Allgemeine Zeitung", with materials sent him regularly from Rome (even by bishops), the well-known Roman correspondence (Brieve vom Konzil), each letter of which fell in Rome like a bomb, but whose real author no one knew. When Döllinger wrote for the same journal, over his own name, the articles "Einige Worte über die Unfehlbarkeitsadresse der Konzilsmajorität" (a few words on the address of the majority of the bishops concerning papal infallibility) and "Die neue Geschäftsführung im Koncil" (the council's new order of business), he denounced in Rome as a heretic. Bishop Ketteler addressed to him an open letter quite brusque in tone, while other bishops urged him to keep silent. Döllinger yielded, and on 18 July, 1870, the personal infallibility of the pope and his definition of the doctrine of the Church's faith. The foregoing presentation of the actual situation in that critical time is taken from the life of Döllinger by Johann Friedrich, the theologian of Cardinal Hohenlohe during the council, and to whom, despite his oath of silence, Döllinger wrote for the same journal, over his own name, the articles "Einige Worte über die Unfehlbarkeitsadresse der Konzilsmajorität" (a few words on the address of the majority of the bishops concerning papal infallibility) and "Die neue Geschäftsführung im Koncil" (the council's new order of business), he denounced in Rome as a heretic. 家庭他的父亲已经结婚，去到伦敦。当Joseph Booker死于1837年时，他被引诱去工作，他的兄弟Mary Booker，和他的兄弟Thomas Booker。1840年他改名为Booker & Dolman, and the business was continued in his own name. His career as a publisher of periodical literature began when in 1838 he brought out a new series of "The Catholic Magazine", which up to that time had been known as "The Edinburgh Catholic Magazine", in contradistinction to "The Catholic Magazine", a much older publication which had gone out of existence in 1835. Dolman's publication was discontinued in June, 1844, but his name had become so widely known that in March, 1845, he brought out a new periodical called "Dolman's Magazine and Monthly Miscellany of Criticism". This was at first under the sole management of its publisher, but later the Rev. Edward Price succeeded him. Like the others it was short-lived and in 1849 it was merged with "The Catholic Weekly and Monthly Orthodox" under the title of "The Weekly Register". It first appeared in a new form on 4 August, 1849, published by Thomas Booker. From this time on Dolman abandoned the publication of periodicals and devoted himself solely to works that had never before been brought out by the Catholic press. His main efforts were directed to a renaissance of the Catholic press in England. He was an able administrator, but the small income of the society was insufficient to support him. In 1850 he went to Paris, where he died. He was survived by his wife and an only son, the Rev. Charles Vincent Dolman, of Hereford, canon of Newport.

THOMAS GAFNERY TAAFFE.

Dolores Mission (or Mission San Francisco de Asis de los Dolores), in point of time the sixth in the chain of twenty-one California Indian Missions; it was formally opened in 1817. The Mission was founded on 26 August, 1817, at the request of the Franciscans, and the celebration was 4 Oct., the feast of St. Francis of Assisi, but owing to the absence of the military commander of the neighboring presidio, which had been established on 17 Sept., the feast of the Stigmata of St. Francis, the formal founding was delayed. The first Mass on or near the site was celebrated in a tent by Father Francisco Palou, on the feast of the Apostles Peter and Paul, 29 June, and on 28 July the first Mass was offered up in the temporary chapel. Father Palou on the title pages of the mission records gives 1 August as the date of the foundation of the mission, and always celebrated the 12th of October as the patronal feast of the mission. The animation "Dolores" was added because the mission was established on a streamlet which Father Pedro Font, O.F.M., and Captain Juan Bautista de Anza had discovered on 28 March, 1776, and in honour of the Blessed Virgin had called Arroyo de Nuestra Señora de los Dolores. In all official documents, reports, and in the records, the mission bears no other name than San Francisco de Asis; but after 1824, when the Mission San Francisco Solano was established at Sonoma, to avoid confusion it was popularly called Dolores, that is to say, the mission on the Dolores. The founders of the mission were Father Francisco Palou, the historian, and Father Pedro Benito Cambon. The other missionaries stationed here in the course of time were the Franciscans Fathers Tomás de la Peña, Miguel Giribet, Vicente de Santa María, Matías Noriega, Norberto de Santiago, Diego García, Faustino de Solís, Antonio Danti, Martín de Landeta, Diego de Noboa, Manuel Fernández, José de Espl, Ramón Abell, Luis Gil, Juan Sainz, Vicente Olivera, Juan Cabot, Blas Ordaz, José Altimira, Tomás Estévez, Lorenzo Quijias, José Gutierrez, José Mercado, José Real, Miguel Muro. The Rev. Prudencio Santillan, the first secular priest, took charge in 1846.

The cornerstone of the present church, the oldest

DOLMAN, CHARLES, publisher and bookseller, b. at Mommouth, England, 20 Sept., 1807; d. in Paris, 31 December, 1863. He was the only son of Charles Dolman, a surgeon of Mommouth, and Mary Frances his wife, daughter of Thomas Booker, a Catholic publisher in England. Educated at St. Gregory's School and St. Peter's College at Downside, near Bath, he later, while residing at Preston, Lancashire, studied architecture under Joseph A. Hansom, intending to follow that profession, but abandoned the idea on being invited by the Bookers, publishers and booksellers, into which
building in San Francisco, and which survived the earthquake of 1906 practically without damage, was laid in 1782 and finished with a thatched roof. In 1796 tiles replaced the thatch. The mission buildings are now erected in the form of a square. The church stood in the south-east corner fronting the east. The wings of the square contained the rooms of the missionaries, two of whom were always there until about June, 1828, the shops of the carpenters, smiths, saddlers, rooms for melting tallow and making soap, for agricultural implements, for spinning wool and weaving coarse fabrics. There were twenty looms in constant operation, and two mills moved by mule-power ground the grain. Most of the neophytes were engaged in agriculture and stock-raising. Owing to the barren nature of the soil and the high winds in the neighbourhood, sowing and planting was done ten or twelve miles down the peninsula. The stock also grazed far away from the mission. About one hundred yards from the church stood the neophyte village, composed of eight rows of one-story dwellings. The girls lived at the mission proper under the care of a matron (see California Missions). A school was in operation in 1818. The highest number of Indians living at the mission was reached in 1820, when 1242 neophytes made their home with the missionaries and received their clothing and instruction. The first baptism of an Indian occurred on 24 June, 1777. From that date till October, 1845, when the last Franciscan departed, 7200 names entered into the baptismal record, about 500 of which represented white people. During the same period 5903 deaths occurred, and 2156 marriages were blessed; about eighty of the latter were those of white couples. From 1785 to the end of 1832, for which period we have the reports, the mission raised 120,000 bushels of wheat, 70,226 bushels of barley, 18,360 bushels of corn, 14,380 bushels of beans, 72,960 bushels of potatoes, and 905 bushels of lentils and garbanzos or horse beans. The largest number of animals owned by the mission was as follows: cattle, 11,340 head in 1809; sheep, 11,324 in 1814; goats, 65 in 1786; horses, 1239 in 1831; mules, 45 in 1813.

Dolores of the Blessed Virgin Mary. See SORROWS OF THE BLESSED VIRGIN MARY.

Dolphin (Lat. delphinus).—The use of the dolphin as a Christian symbol is connected with the general ideas underlying the more general use of the fish (q. v.). The particular idea is that of swiftness and celerity symbolizing the desire with which Christians, who are thus represented as being sharers in the nature of Christ the true Fish, should seek after the knowledge of Christ. Hence the representation is generally of two dolphins tending towards the sacred monogram or some other emblem of Christ. In other cases the particular idea is that of love and tenderness. Aringhi (Roma Subterr., II, 327) gives an example of a dolphin with a heart, and other instances have some such motto as FIGURAS AMORIS HABEMUS (i. e. thou hast a pledge of love). It is sometimes used as an emblem of merely conjugal love on funeral monuments. With an anchor the dolphin occurs frequently on early Christian rings, representing the attachment of the Christian to Christ crucified. Speaking generally, the dolphin is the symbol of the individual Christian, rather than of Christ Himself, though in some instances the dolphin with the anchor seems to be intended as a representation of Christ upon the Cross. ARTHUR S. BARNES.

Dom. See Benedictine Order.

Dome (Lat. domus, a house), an architectural term often used synonymously with cupola. Strictly speaking it signifies the external part of a spherical or polygonal covering of a building, of which the cupola (q. v.) is the inner structure, but in general usage dome means the entire covering. It is also loosely used, as in the German Dom and Italian Duomo, to designate a cathedral, or, at times, to signify some other building of importance. A dome may be of any material, wood, stone, metal, earthenware, or it may be built of a single mass or of a double or even triple series of concentric coverings. The dome is a roof, the base of which is a circle, an ellipse, or a polygon, and its vertical section a curve, a line, concave towards the interior. Hence domes are called circular, elliptical or polygonal, according to the figure of the base. The most usual form is the spherical, in which case its plan is a circle, the section a segment of a circle. Domes are sometimes semi-elliptical, that is, a circle of contrary flexure, bell-shaped, etc. Except in the earlier period of the development of the dome, the interior and exterior forms were not often alike, and, in the space between, a staircase to the lantern was generally made.

Domes are of two kinds, simple and compound. In the simple dome, the dome and the pendentes are in one, and the height is only a little greater than that of an intersecting vault formed by semicircular arches. The dome over the central part of the tomb of Galla Placidia, at Ravenna, and those over some of the aisles of Saint Sophia, Constantinople, are of this description. In the compound dome two methods were followed. In both methods greater height is obtained, and the compound dome was consequently the one used on all important buildings of the later period. In one, the dome starts directly from the top of the circle formed by the pendentes or drum, a cylindrical wall or "drum" intervenes between the pendentes and the dome, thus raising the latter considerably. In churches with domes without drums, the windows are in the dome itself immediately above the springing; otherwise, they are in the drum, and the surface of the dome is generally unbroken. As
the monastery of St. Luke, Phoeis, Greece, are two churches of the eleventh century, side by side, the smaller of which has a drum with windows in it, whereas the larger church has no drum, and the windows are in the dome. The drum is universal in all domed churches of these ages, because it receives special treatment and became a most important feature. Many of these drums are not circular in plan externally, but are many-sided, and the angles are often enriched with marble shafts, etc. The carrying-up of the walls vertically is a good expedient connected with them, and the so-called "flutes" are really the junctures of the drums and helps to neutralize its thrusts. In the churches of the second period, at Constantinople, Salonica, Athens, and other parts of Greece, in which the true drum occurs, it is of considerable height and is generally eight-sided. Windows come at each side, and over the windows are arches which cut into the dome itself.

A primitive form of the dome and the barrel vault is of great antiquity. In some districts men were compelled to build in stone or brick or mud, because there was no wood, as in Assyria; in other districts, because they had not the tools to work wood. In all such cases some form of dome or tunnel vault had to be devised for shelter. In tracing the growth of the dome in historical times, it has been regarded as an outgrowth of the architecture of the Eastern Empire, because it was at Constantinople and in the Byzantine provinces that it was first employed in ecclesiastical structures. But it was the Romans who in reality developed the use of the dome, as of all other applications of the semicircular arch. From Rome it was carried to Constantinople and from there to all parts of the Western Empire. In Eastern Christendom the dome became the dominant factor in church design; whether a single dome, as at Saint Sophia, Constantinople (built, 532–537), or a central dome surmounted by other domes, as at St. Mark's, Venice, or a row of domes, as at Angoulême. The plan and domes of Angoulême are reproduced in the new Catholic cathedral at Westminster. The Roman dome was a hemisphere supported by a circular wall. Its finest example was the Pantheon, Rome, with the architectural characteristic, though smaller, examples abroad, e.g. at Rome, the temple of Minerva Medica, the tomb of Constantia, now the church of Santa Costanza, etc. Violet-le-Duc in writing of the dome of the Pantheon says, "This majestic cupola is the most beautiful, the most strategic, and most stable of all the great domes of the world."

The inside diameter of the dome is 142 feet. Previous to the building of the Pantheon in its present domical form, during the reign of Hadrian about A.D. 123, the history of the dome is for the most part a blank.

The primitive Eastern dome seems to have been on a very small scale, and to have been used for subordinate purposes only. It was a common architectural feature in ancient Egypt and Mesopotamia. In later times the dome was largely employed in architecture by the Persian Sassanids, as well as the Byzantines. From the first domed churches built for Christian worship spring Byzantine architecture and its offshoots. The builder of the earliest domed church of any magnitude was Constantine; its locality the famous city of Antioch in Syria. The problem of the Christian domed church was solved at least as its interior is concerned, received in Saint Sophia its full solution. The dome is the prevailing conception of Byzantine architecture, and M. Choisy, in his "Art de bâtir chez les Byzantins" traces the influence of this domical construction on Greek architecture to "show how from their fusion the architecture of the Eastern Empire became possible. Domes were now, from the time of the construction of Saint Sophia, placed over square apartments, their bases being brought to a circle by means of pendentives, whereas, in Roman architecture, domes as a rule were placed over a circular apartment. The grouping of small domes round a large central one was very effective, and one of the peculiarities of Byzantine churches was that the dome had no additional outer covering. The dome was rarely used by medieval builders except when under oriental influence, hence it was practically confined to Spain and Italy. The dome of the cathedral at Pisa, the first model of the Tuscan style of architecture, was begun in the eleventh century, and in the thirteenth was founded the cathedral at Florence. Its dome equals in size that of St. Peter's at Rome, and was its model. During the Italian Renaissance, domed construction became again of the first importance, possibly on account of its classical precedent, and it is interesting to note that the Pantheon became once more the starting-point of a new development which culminated in the domes of St. Peter's, Rome, and St. Paul's, London.

The substructure of the dome of St. Peter's is a round drum, which serves as a stylobate and lifts it above the surrounding roofs. On this stands the ringwall of the drum, decorated with a Corinthian order and carrying an attic; on this sits the oval mass of the noblest dome in the world. The drum, fifty feet high, is pierced by sixteen square-headed windows. The enormous thickness of the stylobate allows an outside offset to receive the buttresses which are set between the windows, in the shape of spurwalls with engaged columns at the corners, over which the entablature is broken. The curve of the dome is of extraordinary beauty. Between its ribs, corresponding to the buttresses below, are three diminishing tiers of small oeil windows. The lantern above, with an Ionic order, repeats the arrangement of windows and buttresses in the drum below, and is surrounded by a Latin cross rising 448 feet above the pavement. The foremost Renaissance church in Venice belongs the picturesque domed church of Santa Maria della Salute. The two finest domes in France are those of the Hôtel des Invalides and the Panthéon (formerly the church of Sainte-Geneviève) at Paris. Domes built in the early part of the twelfth century are to be found at Valencia, Zamora, Salamanca, Clermont, Le Puy, Cahors. They are also found in Poitou, Périgord, and Auvergne; at Aachen, Cologne, Antwerp, and along the banks of the Rhine; at Avola, Pavia, Como, Parma, Piacenza, Verona, Milan, etc. There are, besides, the bulbous domes of Russia and the flattened cupolas of the Saracens. The dome became the lantern in English Gothic, and the octagon of Ely cathedral is said to be
the only true Gothic dome in existence. The central octagon of the Houses of Parliament, London, is the best specimen of a modern Gothic dome. Arab domes are mostly of the pointed form such as are derived from the rotation of the Gothic arch or bulbous, the section being a horse-shoe arch. Very beautiful examples are seen in the buildings known as the tombs of the caliphs at Cairo. Among the finest examples of domed buildings in the Eastern world are the Tombs of Mohammedan sultans in the south of India and at Agra. The largest dome in America is that of the Capitol at Washington. It is built of iron.

Domenichino, Emmanuél-Henri-Dieudonné, Abbé, missionary and author, b. at Lyons, France, 4 November, 1826; d. in France, June, 1896. In the spring of 1846, before completing his seminary studies and when not yet twenty years of age, he left France in response to an urgent appeal for missionaries to help develop the Church in the wilds of Texas, then rapidly filling up with American and European immigration. He went first to St. Louis, where he spent two years completing his theological course, studying English and German, and gathering knowledge of missionary requirements. In May, 1848, he was assigned to duty at the new German settlement of Casteville in Texas, from which he was transferred later to Brownsville. The war with Mexico was just concluded; raiding bands of Mexicans and rangers were ravaging on both sides of the Rio Grande, while outlaws from the border States and almost equally lawless discharged soldiers filled the new towns, and hostile Indians hovered constantly in the background. A cholera epidemic added its horrors. Nevertheless, the young priest went bravely to work with such energy that he soon became an efficient power for good throughout all Southern Texas. In 1850 he visited Europe and was received by the pope. Returning to Texas, he continued in the mission field two years longer, when he returned to France with health broken and was appointed titular canon of Montpellier. When the French troops were dispatched to Mexico in 1851 he was selected to accompany the expedition as almoner to the army and chaplain to the Emperor Maximilian. After the return to France he devoted his time to European travel, study, and writing, and the exercise of his ecclesiastical functions. In 1882-3 he again visited America.

Among his numerous works dealing with travel, history, and theology, may be noted: "Journal d'un missionnaire au Texas et au Mexique" (Paris, 1857); "Voyage dans les solitudes américaines" (Paris, 1858); "Histoire du jansénisme"; "Histoire du Mexique" (Paris, 1868); "Souvenirs d'outre-mer" (Paris, 1884). His principal works have appeared also in English translation. In regard to his much-controverted "Manuscrit pictographique américain" (Paris, 1860), an examination of the supposed Indian pictographs leaves no doubt that in this case the unsuspecting missionary was grossly deceived.

Consult his own works, with introductions; also Pettersolot, Le livre des sauvages (Brussels, 1881).

James Mooney.

Domenichino, properly Domenico Zampieri, an Italian painter, b. in Bologna, 21 Oct., 1581; d. in Naples, 16 April, 1641. He began his art studies in the school of Allessi, but being ill-treated there, his father, a poor shoemaker, placed him in the Carracci Academy, where Guido Reni and Albani were also students. Domenichino was a slow, thoughtful, plodding youth whom his contemporaries called the "Ox," a nickname also borne by his master Ludovico. He took the prize for drawing in the Carracci Academy, gaining thereby both fame and hatred. Stimulated by success, he studied unerringly, particularly the expression of the human face, so that Bellori says "he could delineate the soul." His student days over, he first visited Parma and Modena to study Correggio, and then went to Rome, where his earliest friend and patron, Cardinal Aguechi, commissioned him to decorate a palace. In Rome he assisted the Carracci with their frescoes in the palace of Cardinal Farnese, who became such an admirer of Domenichino that he had him execute many of the pictures in the Basilian Abbey of Grottaferrata. Domenichino's best frescoes are in this church. With Guido he painted, for Cardinal Borghese, in S. Gregorio; for Cardinal Aldobrandini he executed ten frescoes at Villa Frascati; for Cardinal Montalto he decorated S. Andrea della Valle; and for Cardinal Bandini he painted four pictures for S. Silvestro which rank among his best productions. He immortalized his name by painting (1614) for the altar of S. Girolamo della Carità, the "Crescent of St. Jerome," a copy of which, in mosaics, is in St. Peter's. This is one of the great pictures of the world and was considered second only to Raphael's "Transfiguration." He received about fifty dollars for it. Napoleon took it to Paris but the Allies returned it. Desirous of Domenichino's living, Louis the Ninth burst forth, and he was accused of copying his masterpiece from Agostino Carracci. Weary of attacks, the
artist went to Bologna but later returned to Rome, where Pope Gregory XV made him painter and architect of the Apostolic Camera (pontifical treasury). In 1630 he settled in Naples and there opened a school, but was harassed, as in Rome, by envious artists (cabbals). He also disguised his paintings. Domenichino, although not a master of great originality and inspiration, was a prominent figure in the Bolognese School. Potent in fresco he also excelled in decorative landscapes; his colour was warm and harmonious, his style simple, his chiaroscuro superbly managed, and his subordinate groups and accessories well adjusted and of great interest. The most famous masters of the burin engraved his works, which are: "Portrait of Cardinal Agucchi", Uffizi, Florence; "Life of St. Nilus" (fresco) in Grotta Ferrata near Rome; "Condemnation of Adam and Eve", Louvre, Paris; "St. George and the Dragon", National Gallery, London; "St. John", Hermitage, St. Petersburg.

Leigh Hunt.

Domesday Book is the name given to the record of the great survey of England made by order of William the Conqueror in 1085-86. The name first occurs in the famous "Domesday Seaxe", a treatise compiled about 1176 by Richard Fitznigel, which states that the English called the book of the survey "Domesday", or "Day of Judgment", because the inquiry was one which none could escape, and because the verdict of this register as to the holding of the land was final and unalterable. Certain it is that the English revered William's inquisition. "It is shame to tell," wrote the chronicler, "what he thought it no shame for him to do. Ox, nor cow, nor swine was left that was not set down upon his writ." The returns give full information about the land of England, its ownership both in 1085 and in the time of King Edward, its extent, nature, value, cultivators, and villains. The survey embraced all England except the northernmost counties. The results are set down in concise and orderly fashion in two books called the "Eschequer Domesday". Another volume, containing a more detailed account of Wilts, Dorset, Somerset, Devon, and Cornwall, is called the "Exon Domesday", as it is in the keeping of the cathedral chapter of Exeter.

The chief interest of the Domesday Book for us here lies in the light which it throws upon church matters. As Professor Maitland has pointed out, a comparison of Domesday with our earliest charters shows not only that the Church held lands of considerable, sometimes of vast, extent, but that she had obtained these lands by free grant from Kings or underlings during the Saxon period. We find, for example, that four ministers, Worcester, Evesham, Pershore, and Westminster, were lords of seven-twelfths of the soil of Worcestershire, and that the Church of Worcester alone was lord of one-quarter of that share besides other holdings elsewhere. It is probable, however, that this did not imply absolute ownership, but only superiority and a right to certain services (Maitland, "Domesday Book and Beyond", pp. 236-42). This must be borne in mind when we see it stated, and so far correctly, on the earliest point noted, that the Church represented twenty-five per cent of the assessment of the country in 1066 and twenty-six and one-half per cent of its cultivated area in 1086. These lands were in any case very unequally distributed, the proportion of church land being much greater in the South of England. The record is not enabling to tell clearly how far the parochial system had developed, and though in Norfolk and Suffolk all the churches seem to have been entered, amounting to 243 in the former, and 364 in the latter, county, the same is obviously not exercised in the West of England.

Much church property seems to have been of the nature of a tenancy held from the king upon condition of some service to be rendered, often of a spiritual kind. Thus we read: "Alwin the priest holds the sixth part of a hide" and another says, "Hugh held it temporarily and held it tempore regis Edwardi, and could do what he liked with it." King William afterwards gave it to him in chief manors, on condition that he should celebrate two ferial masses (fieras missas) for the souls of the King and Count, and twice at Christmas." Valuable is the information which the Domesday Book supplies, many questions suggested by it remain obscure and are still keenly debated. A facsimile of the whole recovers years ago by photocinematography an eighteenth century an ord was brought out some years ago by photocinematography, and at the end of the book the title was printed in type specially cut to represent the contractions of the original manuscript.

The most convenient introduction to the subject is Ballard, The Domesday Book (1860). The more advanced student may be referred to Maitland, Domesday Book and Beyond (new ed., London, 1907); (London, 1893); and to Eyre, Domestic Prelate. There are many minor essays dealing with questions of local interest. Herbert Thurston.

Domestic Prelate. See Prelate.

Domicile (Lat. jas domicilia, right of habitation or residence).—The canon law has no independent and original theory of domicile; both the canon law and all modern civil codes borrowed this theory from the Roman law; the canon law, however, extended and perfected the Roman theory by adding thereto that of quasi-domicile. For centuries ecclesiastical legislation contained no special provision in regard to domicile, adapting itself quite unsatisfactorily to the peculiarities of each country. It was only in the sixteenth century, after the fall of the study of Roman law, that the canonists, returned to the Roman theory of domicile, introducing it first into the schools and then into practice. Not that the Church had "canonized" it, so to speak, this particular point of others, but civil law, being more ancient, formed a basis for canon law, which accepted it, at least in so far...
as it was not at variance with later degrees of pontifical law. So true is this that there exists no document in which the theory of domicile has been completely and officially expounded by an ecclesiastical legisla-
tor.
I. ROMAN LAW.—We must therefore revert to Roman law, which estab-
lished domicile as the extension or communication of a pre-existent legal status of indi-
viduals—origin (origo, jus originiis). In the theory of the Roman lawyers each man belongs to his munici-
pality, to his city, where, as he contributes his share to the expenses and taxes, so he has a right to the common advantages. Children naturally follow their father's condition and belong likewise to the city, even though born at a distance. Such is the Roman origo, quite akin to what we call nationality, except that the origo relates to the restricted locality of one's birth, and nationality to one's native land. Hence it is, the legal birthplace, that determines one's origo, i. e. not the actual site of birth but the place where each one should have been born, the municipality to which the father belonged (L. 1. ff. ad municip.). Let us now suppose a man settled for a long time in a city of which he is not a native. Partly in return for the taxes he pays, and partly to permit him to exercise local civic duties, he is granted the status of a real citi-
zen, without loss, however, of his own origo or municipality, so that in the concept of domicil in Roman law: the communication to a man, born in one municipality but residing permanently in another, of the civil rights normally reserved to citizens who are natives of the locality. To become as one of the latter, the stranger must create for himself a domi-
cile, and it was this that necessarily led jurists to define domicile and the conditions upon which it could be ac-
quired. Hence the celebrated definition of domicile given by the Emperors Diocletian and Maximinus (L. 7, C. de inclo.): “It is certain that each one has his domicile where he has his home and business and has his possessions; a resi-
dence which he does not intend to abandon, unless called elsewhere, from which he departs only as a traveller and by returning to which he does not cease to be a traveller.” The juridical element constitutive of domicile is the intention, the will definitively to settle oneself in a place, this being deduced from the circumstances and especially the conditions of instal-
lation. It implies indefeasible stability, not perpetuity in the restricted sense of the word, as though one re-
mained in one place, butchange of place. Another domi-
cile may at any time be acquired on the same condi-
tions as the first; it is lost when the intention of aban-
donning it is coupled with the fact of desertion. Since, therefore, domicile conferred the same rights as origo, its importance became gradually more and more marked.

We can now better understand the words that so often recur in Roman law and have been adopted by canonists: those who belong to a municipality by right of birth are citizens (cives); those who come from a foreign place, but have become by domicile inhabitants (incule), though these terms are used almost synonymously by jurists and canon-
ists; those who have spent a sufficient time there without, however, acquiring a domicile, are strangers (adules), though to them canonists concede a quasi-
domicile. Finally, those who make but a passing sojourn there are transients (peregrini; cf. L. 239, de Verb. sign.). To these categories canonists have added one which the Roman origo, being permanent, could not recognize, namely the wanderers (exus), who have the right to change domicile. Another domicile was abandoned, having not as yet acquired another.

II. DEVELOPMENT OF "DOMICILE" IN CANON LAW.
—In the troublous times that prevailed after the Bar-
barian invasions, the domicile of Roman law was lost sight of, and even the word itself disappeared from the juridical language of the time. However, this does not mean that persons inhabiting certain limited districts had wholly ceased to be connected with local authority, whether civil or religious, nor that all acts were regularly and exclusively performed in a place de
ccept, by a personal code. The material fact of habi-
tation could not, it is true, be ignored, but it no longer served for a theory of domicile. The medieval eclec-
tistical canons say that each Catholic (fidelis) should pay his tithes in the church where he was baptised and that his obsequies should be held wherever he makes his tithes, etc., but there is no mention of domicile.

The Roman theory was again restored to honour by the glossaries of the Bolognese School, especially by Accursius in the beginning of the thirteenth century. Whether it was because they mistook the real mean-
ing of origo or desired to explain it in a way that suited the customs of their time, they interpreted it as a sort of domicile resulting from one's birthplace, and if one were born there per accidents, from the place of one's father's birth. Except for this inaccuracy, the Ro-
man theory was well expounded. Moreover, accord-
ing to the favourite principles of their time, the gloss-
aries brought into prominence the double constitutive element of domicile (or, properly speaking, of ac-
quired domicile): the material element (corpus), i. e. the place of habitation, and the mental element (motus), i. e. the intention to remain in this habitation indefinitely. Although they did not contribute di-
rectly to this revival of domicile, canonists neverth-
less adopted it and it was definitively admitted in the gloss of “Liber Sextus” (cc. 2 and 3, de sepul.). They applied these rules to the acts of Christian life: baptism, paschal Communion and Viaticum, confession, extreme unction, funerals, interments, then also to or-
dination and judicial competency. The actual canon-
ical rules on domicile are about the same as now.

In the thirteenth century the development of canon law in this matter has been the creation of the quasi-
domicile theory, foreign alike to Roman and modern civil law. As its name implies, quasi-domi-
cile is closely patterned on domicile and consists in a sojourn in some one place during a sufficient length of time. Not only does it not call for abandonment of the real domicile, but can co-exist with the latter and even supposes the intention of returning thither. It was evident that the ordinary acts of the Christian life, the rights and obligations of a parishioner, could not be confined to a particular territory. Moreover, the necessity of assimilating to such residents those who sojourn in the place for a certain length of time. The canonists soon concluded that whoever has a quasi-
domicile in a place may receive there the sacraments and perform there legitimately all the acts of the Chris-
tian life without forfeiting any of his rights in the place of his real domicile; he may even thus become subject to the jurisdictional authority of his place of quasi-domicile. The only restrictions are, as we shall see, for ordina-
tions and, to a certain extent, for funerals.

The theory remained vague and un
determined. Authors could scarcely agree as to pre-
cisely what was meant by the “sufficient length” of time (non breve tempus) required for quasi-domicile, and they hesitated to pronounce on the various pos-
sible reasons for a sojourn and the degree in which they could create presumption of an intention to ac-
quire quasi-domicile. Strictly speaking, the question was really important only in regard to those mar-
rriages whose validity depended on the existence of a quasi-domicile in countries where the law of “Tutela” had been published; in this way, as we shall see below, new legislation became necessary. The quasi-domicile theory was not definitively settled until the appearance of the Instruction of the Holy Office addressed to the Bishops of England and the United States, 7 June, 1807, in which quasi-domicile is
DOMICILE

In domiciling and the maternal domicile for illegitimate children. Again, in reference to the spiritual life, domicile of nativity is the place where adults and aban-

doned children are born, while domicile is also stated as a period covering more than six months—per

siuarem annui partem. As soon as these two conditions coexist, quasi-domicile is acquired and imme-
diately involves the legal use of rights and compet-
tions ensuing therefrom. See below for a recent restriction in regard to minors. Finally, domicile is lost by the simultaneous cessation of both its constitutive elements, i.e., by the abandonment of residence without any intention of returning to it. Suffice it to add that in this matter the canon law, yea quasi-domicile is, at least for the latter, to be subordinated to provisions of civil law, e.g., as regards the legal domicile of minors, wards, and other analogous provisions.

III. PRESENT LAW.—From the preceding explanations there results a very important conclusion which throws a strong light on canonical legislation concern-
ing domicile and which we must now set forth. It is this: the law does not deal with domicile for its own sake, but rather on account of its consequences; in other words, on account of the personal rights and obligations attached thereto. This explains why domicile is the most direct, not the least severe according to the case in point, e.g., of an immediate transfer of personal rights and obligations, e.g., by a declaration through a public act. Keeping therefore in view the legal consequences of domicile and its various forms it may be defined as a stable residence which entails submission to local authority and permits the exercise of acts for which this authority is competent. To this definition the laws and their commentators confine themselves, without touching on the legal ef-

fects of domicile. As we have already seen, domicile, properly so-called, is the place one inhabits indefi-
nitely (longevity). In such domiciles permanence being quite compatible with more or less temporary residence elsewhere. It matters not whether one be the owner or simply the occupant of the house in which one dwells or whether one owns more or less property in the locality. The place of one's domicile is not the house wherein one resides but the territorial district in which the house or home stands. This district is usually the smallest territory possessing a distinct, self-governing organization. All authors agree that from a civil viewpoint, the municipality is the place of domicile and, canonically considered, the place where all personal rights and obligations are exercised. Thus, in the case of a person residing in a diocese or station. It is in the municipality that the acts and rights of civil life are exercised, and in the parish those of the Christian life. Strictly speaking, one cannot acquire domicile in a ward or hamlet or in any territorial division which does not form a self-gov-

erning group. Of course there are certain acts that do not depend, or that no longer depend, on local authority; in this sense, it is possible to speak of domicile in a diocese when it is question e.g., of ordination, or of domicile in a province apropos of the competency of diocesan tribunal. But these exceptions are merely apparent; they imply that one has a domicile in some parish within a given diocese. The canon law has never rec-

ognized as domicile an unstable residence in different parts of a diocese, without intent to establish oneself in a particular parish. Canon law (c. 2, de sepuli-
in VI), like Roman law (L. 5, 7, 27, Admunicipi.), allows a double domicile, provided there be in both places a morally equal installation; the most ordinary example of this being a winter domicile in the city and a summer one at the seaside. It will respect the various kinds of domicile: domicile of origin, domicile of residence or acquired domicile, and necessary or legal domicile. The domicile of origin, a somewhat inexact imitation of the Roman orto, is that assigned to each individual by his place of nativity unless he be accidentally born outside of that place when his father
dwells; practically it is the paternal domicile for legit-

omestic and the maternal domicile for illegitimate chil-

dren.
DOMINIC

As to the domicile requisite for ordination there are special rules formulated by Innocent XII, in his Constitution “Speculatorum”, 4 November, 1694. The candidate for orders depends upon a bishop, first by reason of his origin, that is to say, of the place where his father had a domicile at the time of his son’s birth; second by reason of his own acquired domicile. But the conditions which this domicile must satisfy are rather severe: the candidate must have already resided in the diocese for ten years or else have transported most of his movable goods to a house in which he has resided for three years. Moreover, he must be firm under oath his intention of definitely establishing himself in the diocese. This is a qualified domicile, the conditions of which must not be extended to other cases.

A. BOUDHENON.

DOMINIC, SAINT, founder of the Order of Preachers, commonly known as the Dominican Order; b. at Calaroga, in Old Castile, c. 1170; d. 6 August, 1221. His parents, Felix Guzman and Joanna of Azá, undoubtedly belonged to the nobility of Spain, though probably neither was connected with the reigning house of Castile, as some of the saint’s biographers assert. Of Felix Guzman, personally, little is known, except that he was in every sense the worthy head of a family of saints. To nobility of blood Joanna of Azá added a nobility of soul which so enshrined her in the popular veneration that in 1828 she was solemnly beatified by Leo XII. The example of such parents was not without its effect upon their children. Not only Saint Dominic, but also his brothers Manes and Martin, were distinguished for their extraordinary sanctity. Antonio, the eldest, became a secular priest and, having distributed his patrimony to the poor, entered a hospital where he spent his life ministering to the sick. Manes, following in the footsteps of Dominic, became a Friar Preacher, and was beatified by Gregory XVI.

The birth and infancy of the saint were attended by many marvels forecasting his heroic sanctity and great achievements in the cause of religion. For instance, when he was but four years old he put to flight the devils, and, in his fourth year, he attended his elementary studies under the tutelage of his maternal uncle, the archbishop of Gumié d’Izan, not far distant from Calaroga. In 1184 Saint Dominic entered the University of Palencia. Here he remained for ten years prosecuting his studies with such ardor and success that throughout the ephemeral existence of that institution he was held up to the admiration of its scholars as all that a student should be. Amid the frivolities and dissipation of a university city, the life of the future saint was characterized by a seriousness of purpose and an asceticism of manner which singled him out as one from whom great things might be expected in the future. But more than once he proved that under this austere exterior he carried a heart as tender as a woman’s. On one occasion he sold his books, annotated with his own hand, to relieve the starving poor of Palencia. His biography and contemporary, Bartholomew of Trent, states that twice he tried to sell himself into slavery to obtain money for the liberation of those who were held in captivity by the Moors. These facts are worthy of mention in view of the cruel and satirizing character which some non-Catholic writers are endeavoring to foist upon one of the most charitable of men. Concerning the date of his ordination his biographers are silent; nor is there anything from which that date can be inferred with any degree of certainty. According to the declaration of Brothers, the Brothers of Preachers of Lombardy, given in the process of canonization, Dominic was still a student at Palencia when Don Martin de Basán, the Bishop of Ossa, called him to membership in the cathedral chapter for the purpose of assisting in its reform. The bishop realized the importance to his plan of reform of having constantly before his canons the example of one of Dominic’s eminent holiness. Nor was he disappointed in the result. In recognition of the part he had taken in converting its members into canons regular, Dominic was appointed sub-chor of the chapter. On the accession of Don Diego d’Azevedo to the Bishopric of Ossa in 1201, Dominic became superior of the chapter with the title of prior. As a canon of Ossa, he spent nine years of his life hidden in God and rapt in contemplation, scarcely passing beyond the confines of the cell or at home. In 1203 Alfonso IX, King of Castile, deputed the Bishop of Ossa to demand from the Lord of the Marches, presumably a Danish prince, the hand of his daughter on behalf of the king’s son, Prince Ferdinand. For his companion on this embassy Don Diego chose Saint Dominic. Passing through Toulouse in the pursuit of their mission, they beheld with amasement and sorrow the work of spiritual ruin wrought by the Albigenian heresy. It was in the contemplation of this scene that Dominic first conceived the idea of founding an order for the purpose of combating heresy and spreading the light of the Gospel by preaching at the ends of the then known world. Their mission having ended successfully, Diego and Dominic were dispatched on a second embassy, accompanied by a friary and a bishop, to visit the northern provinces of Castile. This mission, however, was brought to a sudden close by the death of the young woman in question. The two ecclesiastics were now free to go wherever they pleased, and they set out for Rome, arriving there towards the end of 1204. The purpose of this journey was, of course, to enable Diego to gain a bishop, to which end he most ardently desired, and that he might devote himself to the conversion of unbelievers in distant lands. Innocent III, however, refused to approve this project, and instead sent the bishop and his companion to Languedoc to join forces with the Cistercians, to whom he had entrusted the crusade against the Albigeens. The scene that confronted them on their arrival in Languedoc was by no means an encouraging one. The Cistercians, on account of their worldly manner of living, had made for themselves a bad name in the region. They had entered upon their work with considerable pomp, attended by a brilliant retinue, and well provided with the comforts of life. To this display of worldliness the leaders of the heretics opposed a rigid asceticism which commanded the respect and admiration of their followers. Diego and Dominic quickly saw that the failure of the Cistercian apostolate was due to the monks’ indulgent habits, and finally prevailed upon them to adopt a more austere manner of life. The result was at once apparent in a greatly increased number of converts. At the instigation of the heretics, they played a prominent part in the propaganda of the heretics. Dominic and his companion, therefore, lost no time in engaging their opponents in this kind of theological exposition. Whenever the opportunity
offend, they accepted the gage of battle. The thor- 
uous training that the saint had received at Palencia now proved of inestimable value to him in his en-
counters with the heretics. Unable to refute his arg-
ments or counteract the influence of his preaching, they visited their hatred upon him by means of re-
paired insults and threats of physical violence. With
Prouille for his head-quarters, he hurried on by turns in
Fanjuez, Montpellier, Servian, Béziers, and Carca-
sonne. Early in his apostolate around Prouille the
saint realized the necessity of an institution that
would protect the women of that country from the
advances of the heretics. Many of them had already
embraced Albigenianism and were its active and
propagandists. These women erected convents, to
which the children of the Catholic nobility were often
sent—for want of something better—to receive an
education, and, in effect, if not on purpose, to be
trained with the spirit of heresy. It was needful, too,
that women converted from heresy should be safe-
guarded against the evil influence of their own homes.
To supply these deficiencies, Saint Dominic, with the
permission of Fouquets, Bishop of Toulouse, estab-
lished a convent at Prouille in 1206. To this commu-
nity, often called Domini de Prouille, Saint Dominic
himself gave the rule and constitutions which have ever
since guided the nuns of the Second Order of Saint
Dominic.

This year 1208 opens a new epoch in the eventful
life of the founder. On 15 January of that year Pierre
de Castelnau, one of the Cistercian legates, was as-
signed that abominable crime precipitated the
crusade under Simon de Montfort, which led to the
temporary subjugation of the heretics. Saint Dom-
ic participated in the stirring scenes that fol-
lowed, but always stood on the side of mercy, wielding
the arm of the spirit while others wrought death and
desolation with the sword. Some historians assert
that during the sack of Béziers, Dominic appeared in
the streets of that city, cross in hand, interceding for
the lives of the women and children, the aged and the
innocent. This testimony, however, is based upon doc-
uments which Tournier regards as certainly apocryphal.
The testimony of the most reliable historians tends
from the fact that the saint was neither in the city nor in
its vicinity when Béziers was sacked by the crusaders.
We find him that year during the crusade following the
Catholic army, reviving religion and reconciling her-
tics in the cities that had capitulated to, or had been
taken by, the victorious de Montfort. It was proba-
ably 1 September, 1209, that Saint Dominic first came
in contact with this convert of the heresy. A letter of
him that intimate friendship which was to last till the
death of the brave crusader under the walls of Tou-
oulouse (25 June, 1218). We find him by the side of de
Montfort at the siege of Lavaur in 1211, and again in
1212, at the capture of La Peine d'Ajen. In the lat-
ter part of 1212 he was at Pamiers labouring, at the
invitation of de Montfort, for the restoration of reli-
gion and morality. Lastly, just before the battle of
Muret, 12 September, 1213, the saint is again found
in the council that preceded the battle. During the
progress of the conflict, he knelt before the altar in the
church of Saint-Jacques, praying for the triumph of
the Catholic arms. So remarkable was the victory of
the crusaders at Muret that Simon de Montfort re-
garded it as altogether miraculous, and piously attrib-
uted it to the prayers of Saint Dominic. In grati-
tude to God for the deliverance, the crusaders erected
a chapel in the church of Saint-Jacques, which
he dedicated, it is said, to Our Lady of the Rosary.
It would appear, therefore, that the devotion of the
Rosary (q. v.), which tradition says was revealed to
Saint Dominic in a vision in 1215, was of general use about this
time. To this period, too, has been ascribed the
foundation of the Inquisition by Saint Dominic, and
his appointment as the first Inquisitor. As both these
much controverted questions will receive special treat-
ment elsewhere in this work it will suffice to note that the Inquisition was in
full operation in 1198, or seven years before the saint
took part in the apostolate in Languedoc, and while he was still an obscure canon regular at Oma.
If he was for a certain time identified with the operations of the
Inquisition, it was only in the capacity of a
theologian passing upon the orthodoxy of the accused
(see Inquisition, Spanish). Whatever influence he may
have had with the judges of that much maligned
institution was always employed on the side of mercy and
forbearance, as witness the classic case of Ponce
Begezard.

In the meantime, the saint's increasing reputation
for heroic sanctity, apostolic zeal, and profound learn-
ing caused him to be much sought after as a candidate
for various bishoprics. Three distinct efforts were
made to raise him to the episcopate. In July, 1212,
the chapter of Béziers chose him for their bishop.
Again, the canons of Saint-Lizier wished him to suc-
cede Garcias de l'Orte as Bishop of Comminges.
Lastly, in 1215 an effort was made by Garcias de
l'Orte himself, who had been transferred from Com-
minges to Auch, to place him at this see. But Saint
Dominic absolutely refused all episcopal honours, saying that he would rather take flight in the
night, with nothing but his staff, than accept the epi-
copate. From Muret Dominic returned to Carca-
sonne, where he eked out his cherished plan
for his succes. It was not till 1214 that he returned to
Toulouse. In the meantime the influence of his
preaching and the eminent holiness of his life had
drawn around him a little band of devoted disciples
eager to follow wherever he might lead. Saint
Dominic had never for a moment forgotten his purpose,
formed eleven years before, of founding a religious
order to combat heresy and propagate religious truth.
The time now seemed opportune for the realization of
his plan. With the approval of Bishop Fouquets of
Toulouse, he began the organization of his little band
of followers. That Dominic and his companions
might possess a fixed source of revenue Fouquets made
him chaplain of Fanjeaux and in July, 1215, cano-
ically established the community as a religious congre-
gation of his diocese, whose object was the propagation
full purpose of its founder. It was at best but a dio-
cesan congregation, and Saint Dominic had dreamed of
a world-order that would carry its apostolate to
the ends of the earth. But, unknown to the saint,
events were shaping themselves for the realization of
his hopes. In November, 1215, an ecumenical coun-
cil was to meet at Rome "to deliberate on the improve-
ment of morals, the extinction of heresy, and the
strengthening of the faith". This was identically the
mission Saint Dominic had determined on for his
order. With the Bishop of Toulouse, he was present
at the deliberations of this council. From the very
first session it seemed that events conspired to bring
his plans to a successful issue. The council bitterly
arraigned the bishops for their neglect of preaching.
In canon x they were directed to delegate capable men
to preach the word of God to the people. Under these
circumstances it would reasonably appear that
Dominic's request for the confirmation of an order designed
to carry out the mandates of the council would be joy-
fully granted. But while the council was anxious that these reforms should be put into effect as speedily as possible, it was at the same time opposed to the institution of any new religious orders, and had legislated to that effect. No unordainedbody of simple priests seemed too original and too bold in its conception to appeal to the conservatives, lest it should influence the deliberations of the council. When, therefore, his petition for the approbation of his infant institute was refused, it could not have been wholly unexpected by Saint Dominic.

Returning to Languedoc at the close of the council in December, 1215, the founder gathered about him his little band of followers and informed them of the wish of the council that there should be no new rules for religious orders. Thereupon they adopted the ancient rule of Saint Augustine, which, on account of its generality, would easily lend itself to any form they might wish to give it. This done, Saint Dominic again appeared before the pope in the month of August, 1216, and again solicited the confirmation of his order. This time he was received more favourably, and on 22 December, 1216, the Bull of confirmation was issued. Saint Dominic at once sent the following epistle to the Bishops in various churches in Rome, before the pope and the papal court. It was at this time that he received the office and title of Master of the Sacred Palace, or Pope's Theologian, as it is more commonly called. This office he had been held uninterruptedly by members of the order from the founder's time to the present day. On 15 August, 1217, he gathered the brethren about him at Prouille to deliberate on the affairs of the order. He had determined upon the heroic plan of dispersing his little band of seventeen unformed followers throughout the seven continents. He then set the example of an act which, to the eye of human prudence at least, seemed little short of suicidal. To facilitate the spread of the order, Honorius III, on 11 Feb., 1218, addressed a Bull to all archbishops, bishops, abbots, and priors, requesting their favour on behalf of the Order of Preachers. By another Bull, dated 3 Dec., 1218, Honorius III bestowed upon the order the church of Saint Sixtus in Rome. Here, amid the tombs of the Appian Way, was founded the first monastery of the order in Rome. Shortly after taking possession of Saint Sixtus, the founder, at the invitation of Saint Dominic, began the somewhat difficult task of restoring the pristine observance of religious discipline among the various Roman communities of women. In a comparatively short time he worked with great success at establishing the religious life in the west in the University of Palencia, and the practical use to which he had put it in his encounters with the Albigenses, as well as his keen appreciation of the needs of the time, convinced the saint that to ensure the highest efficiency in the work of the apostolate, his followers should be afforded the best educational advantages obtainable. It was for this reason that on the occasion of the dispersion of the brethren at Prouille he dispatched Matthew of France and two companions to Paris. A foundation was made in the vicinity of the university, and the friars took possession in October, 1217. Matthew of France was appointed superior and Michael de Fabra was placed in charge of the studies with the title of Lecturer. On 6 August of the following year, Jean de Barastre, dean of Saint-Quentin and professor of canon law, beseeched the said beneficerice of Saint-Jacques, which he had built for his own use. Having effected a foundation at the University of Paris, Saint Dominic next determined upon a settlement at the University of Bologna, Bertrand de Garriga, who had been summoned from Paris, and John of Navarre, set out from Rome, with letters from Pope Honorius, to make the desired foundation. On their arrival at Bologna, the church of Santa Maria della Mascarella was placed at their disposal. So rapidly did the Roman community of Saint Sixtus grow that the need of more commodious quarters was urgent. Honorius, who seemed to delight in supplying every need of the order and furthering its interests to the utmost of his power, met the emergency by bestowing on Saint Dominic the basilica of Santa Sabina.

Towards the end of 1218, having appointed Reginald of Orleans as his vicar in Italy, the saint, accompanied by several of his brethren, set out for Spain Bologna, Prouille, Toulouse, and Fanjeaux were visited on the way. From Prouille two of the brethren were sent to establish a convent at Lyons. Segovia was reached just before Christmas. In February of the following year he founded the first monastery of the order in Spain. Turning southward, he established a convent for women at Madrid, similar to the one at Prouille. It is quite probable that on this journey he personally presided over the erection of a convent in connexion with his alma mater, the University of Palencia. At the invitation of the Bishop of Barcelona, a house of the order was established in that city. Again bending his steps towards Rome he recrossed the Pyrenees and visited the foundations at Toulouse and Carcassonne, where the Pontiff's licence had caused houses to be erected at Limoges, Metz, Reims, Poitiers, and Orleans, which in a short time became centres of Dominican activity. From Paris he directed his course towards Italy, arriving in Bologna in July, 1219. Here he devoted several months to the religious formation of the brethren he had awaited, and then, as at Prouille, dispersed them over Italy. Among the foundations made at this time were those at Bergamo, Asti, Verona, Florence, Brescia, and Faenza. From Bologna he went to Viterbo. Here, on the death of the prior, he devoted several months to the formation of the brethren and to the showering of new favours on the order. Notable among these marks of esteem were many complimentary letters addressed by Honorius to all those who had assisted the Fathers in their various foundations. In March of this same year Honorius, through his representatives, bestowed upon the order the church of San Eustorgio in Milan. At the same time a foundation at Viterbo was authorized. On his return to Rome, towards the end of 1219, Dominic sent out letters to all the convents announcing the first general chapter of the order to be held at Rome. Early in the following Pentecost. Shortly before, Honorius III, by a special Brief, had conferred upon the founder the title of Master General, which till then he had held only by tacit consent. At the very first session of the chapter, Father John of Poitiers, at the request of the brethren by offering his resignation as master general. It is needless to say the resignation was not accepted and the founder remained at the head of the institute till the end of his life. Soon after the close of the chapter of Bologna, Honorius III addressed letters to the abbots and priories of San Vittorio, Sillia, Mansu, Floria, Vallombrosa, and Aquila, ordering that several of their religious be deputed to begin, under the leadership of Saint Dominic, a preaching crusade in Lombardy; whereas had developed alarming proportions. For some reason or other the plans of the pope were never realized. The promised support failing, Dominic, with a little band of his own brethren, threw himself into the field, and, as the event proved, spent himself in an effort to bring back to the missions of the Church.
ST. DOMINIC—TITIAN

BORGHESI GALLERY, ROME
DOMINICAL

Church. Towards the end of 1221 Saint Dominic returned to Rome for the sixth and last time. Here he received many new and valuable concessions for the order. In January, February, and March of 1221 the Church confirmed the constitutions of the order to all the prelates of the Church. The thirtieth of May, 1221, found him again at Bologna presiding over the second general chapter of the order. At the close of the chapter he set out for Venice to visit Carpinteri Ugolino, to whom he was especially indebted for many substantial acts of kindness. He had scarcely returned to Bologna when a fatal illness attacked him. He died after three weeks of sickness, the many trials of which he bore with heroic patience. In a Bull dated at Spoleto, 13 July, 1234, Gregory IX made his cult obligatory throughout the Church.

The life of St. Dominic was one of tireless effort in the service of God. While he journeyed from place to place he prayed and preached almost uninterruptedly. His penances were of such a nature as to cause the brethren, who accidentally discovered them, to fear the effect upon his life. While his charity was boundless he never permitted it to interfere with the stern sense of duty that guided every action of his life. If he abominated heresy and laboured untiringly for its extirpation it was because he loved truth and loved the souls of those for whom the work was done. He never failed to distinguish between sin and the sinner. It is not to be wondered at, therefore, if this athlete of Christ, who had conquered himself before attempting the reformation of others, was more than once chosen to show forth the power of God. The failure of the fire at Fanjeaux to consume the dissertation he had employed against the heretics, and which was thrice thrown into the flames; the raising to life of Napoleon Orsoni; the appearance of the angels in the refectory of Saint Sixtus in response to his prayers, are but a few of the extraordinary events by which the order was vouchsafed. God was pleased to attest the eminent holiness of His servant.

We are not surprised, therefore, that, after signing the Bull of canonisation on 13 July, 1234, Gregory IX declared that he no more doubted the sainthood of Saint Dominic than he did that of Saint Peter and Saint Paul.

DOMINICAL

The Romans were accustomed to divide the year into sundays, periods of eight days; and in their marble fasti, or calendars, of which numerous specimens remain, they used the first eight letters of the alphabet to mark the days of which each period was composed. When the Oriental seven-day period, or week, was introduced, in the time of Augustus, the first seven letters of the alphabet were employed in the same way to indicate the days of this new division of time. In fact, fragmentary calendars on marble still survive in which both a cycle of eight letters—A to H—indicating sundays, and a cycle of seven letters—A to G—indicates weeks, are used side by side (see "Corpus Inscriptionum Latinarum", 2nd ed., I, 220).

The same peculiarity occurs in the Philocalian Calendar of A.D. 356, ibid., p. 256). This device was imitated by the Christians, and in their calendars the days of the week from Jan. 1 to Dec. 31 were marked with a continuous recurring cycle of seven letters: A, B, C, D, E, F, G. A was always set against 1 January, B against 2 January, C against 3 January, and so on. Thus F fell to 6 January, G to 7 January; A again recurred on 8 January, and also, consequently, on 15 January, 22 January, and 29 January. Continuing in this way, 30 January was marked with a B, 31 January with a C, and 1 February with a D. Supposing this to be carried on through all the days of an ordinary year (i.e., not a leap year), it will be found that a D corresponds to 1 March, G to 1 April, and thus, the Custom of the Leaping Year, 1 May, E to 1 June, G to 1 July, C to 1 August, F to 1 September, A to 1 October, D to 1 November, and F to 1 December—a result which Durandus recalled by the following distich:

Alta Domat Dominus, Gratia Beat Equites Gerentes Contemnent Fictos, Augebit Dona Fidelis.

Now, as a moment's reflection shows, if 1 January is a Sunday, all the days marked by A will also be Sundays; if 1 January is a Saturday, Sunday will fall on 2 January, and all the other days marked by B will be Sundays; if 1 January is a Monday, Sunday will not come until 7 January, a G, and all the days marked by a G will be Sundays. This being explained, the Dominical Letter of any year is defined to be that letter of the cycle, A, B, C, D, E, F, G, which corresponds to the first Sunday (and every subsequent Sunday) falls.

It is plain, however, that when leap year occurs, a complication is introduced. February has then twenty-nine days. According to the Anglican and civil calendars this extra day is added at the end of the month; according to the Catholic ecclesiastical calendar 24 February is counted twice. But in either case 1 March is then one day later in the week than 1 February, or, in other words, for the rest of the year the Sundays come a day earlier than they would in a common year. This is expressed by saying that a leap year has two Dominical Letters, the second being the letter which precedes that with which the year started. For example, 1 January, 1907, was a Tuesday, the first Sunday fell on 6 January, or an F. The Roman Calendar for the first of January 1908, was a Wednesday, the first Sunday fell on 5 January, and E was the Dominical Letter, but as 1908 was leap year, its Sundays after February came a day sooner than in the normal year and were D's. The year 1908, therefore, had a double Dominical Letter, D and E. In 1910 and 1911, the first Sunday of the year and the Dominical Letter is C. In 1910 and 1911.
DOMINICAN

1 January falls respectively on Saturday and Sunday and the Dominical Letters are B and A.

This, of course, is all very simple, but the advantage of the device lies, like that of an algebraical expression, in its being a mere symbol adaptable to any year. By constructing a table of letters and days of the year, A always being set against 1 January, we can at once find the relation between the days of the week and the letters of the Dominical Letter. This may always be found by the following rule of De Morgan's, which gives the Dominical Letter for any year, or the second Dominical Letter if it be leap year:

1. Add 1 to the given year.
2. Take the quotient found by dividing the given year by 4 (neglecting the remainder).
3. Take 16 from the centesimal figures of the given year if that can be done.
4. Take the quotient of III divided by 4 (neglecting the remainder).
5. From the sum of I, II, and IV, subtract III.
6. Find the remainder of V divided by 7: this is the number of the Dominical Letter, supposing A, B, C, D, E, F, G to be equivalent respectively to 0, 1, 2, 3, 4, 5, 6.

For example, to find the Dominical Letter of the year 1913:

(I) 1913 + 1 = 1914
(II) 1914 ÷ 4 = 478.5
(III) 478 - 16 = 462
(IV) 462 ÷ 3 = 154
(V) 154 ÷ 7 = 22

Therefore the Dominical Letter is E.

But the Dominical Letter had another very practical use in the days before the "Ordo divini officii recitandi" was printed annually and when, consequently, a priest had often to determine the "Ordo" for himself (see Directory, Catholic). As will be shown in the articles Epact and Easter Controversy, Easter Sunday may be as early as 22 March or as late as 25 April, and there are consequently thirty-five possible days on which it may fall. It is also evident that each Dominical Letter allows five possible dates for Easter Sunday. Thus, in a year whose Dominical Letter is A (i. e. when 1 January is a Sunday), Easter must be either on 26 March, 2 April, 9 April, 16 April, or 23 April, for these are all the Sundays within the defined limits. But according as Easter falls on one or another of these Sundays we shall get a different calendar, and hence there are five, and only five, possible calendars for years whose Dominical Letter is A. Similarly, there are five possible calendars for years whose Dominical Letter is B, for C, and so on, thirty-five possible combinations in all. Now, advantage was taken of this principle in the arrangement of the old Pyx or directorium which preceded our present "Ordo". The thirty-five possible calendars were all included therein and numbered, respectively, primum A, secundum A, tertium A, etc.; primum B, secundum B, etc. Hence for anyone wishing to use the Pyx the first thing to determine was the Dominical Letter of the year, and then by means of the Golden Number or the Epact, and by the aid of a simple table, to find which of the five possible calendars assigned to that Dominical Letter belonged to the year in question. Such a table as that just referred to, but adapted to the reformed calendar and in more convenient shape, will be found at the beginning of every Breviary and Missel under the heading, "Tabula Paschalis," etc.

The Dominical Letter does not seem to have been familiar to Bode in his "De Temporum Rationibus", but in its place he adopts a similar device of seven numbers which he calls concurrentes (De Temp. Rat., cap. III). This is a Greek origin, the numbers denoting the day of the week on which 24 March falls in the successive years of the solar cycle, 1 standing for Sunday, 2 (feria secunda) for Monday, 3 for Tuesday, and so on. It is sufficient here to state that the relation between the Concurrentes and the Dominical Letter is the following:

Concurrentes 1 2 3 4 5 6 7
Dominical Letter E F D C B A G

HERBERT THURSTON.

DOMINICAN REPUBLIC, THE (SAN DOMINGO, SANTO DOMINGO), is the eastern, and much the larger, political division of the island now comprehensively known as Haiti, which is the second in size of the Greater Antilles. The territory of this republic, estimated at 18,045 square miles, is divided from that of the Republic of Haiti, on the west, by a serpentine line running from the mouth of the Yaque River, on the north, to Cap Haitien, on the south; its northern shores are washed by the Atlantic Ocean, its southern by the Caribbean Sea, while on the east, the Mona Passage separates it from the island of Porto Rico. In proportion to its size San Domingo is much more densely settled than Haiti. Geologically, the Dominicans contrast with the Haitians in being a Spanish-speaking people, mostly of mixed negro and European descent, the Haitians being pure negro and speaking French. The climate of San Domingo is in some parts bad, in others remarkably good, notably in and around the city of San Domingo where, in spite of poor sanitation, it is said that "nobody need die of anything but old age". During the dry season (November to March) the mean diurnal variation of temperature on the south coast is from 70 to 90 degrees Fahrenheit: during the rainy seasons (summer and autumn) it is from 80 to 92. These figures, like most statistics of contemporary San Domingo, are necessarily conjectural.

GENERAL HISTORY.—From the date of its discovery until the era of the French Revolution the civil and ecclesiastical history of the territory now occupied by the Dominican Republic are inseparably conjoined. In December, 1492, Christopher Columbus, having failed in his expectation of identifying the island of Cuba with Japan (Cipango), had shaped his course homeward, when the second accident of thepeculiar wind brought him in sight of the island which he named Hispaniola (Little Spain). On 6 December, 1492, he landed at Môle St. Nicholas (now Haitian territory), then, passing along the north coast of the island to the Gulf of Samana, landed again and penetrated inland as far as the summit of Santo Cerro (Holy Hill), looking down upon the magnificent upland plain which he named La Vega Real, he planted a wooden cross to commemorate his discovery. His first landing had been unopposed, but at the eastern end of Hispaniola the Caribs met him, who, by a volley of arrows, from which adventure the gulf now called Samana was named by Columbus Golfo de las Flechas (Gulf of Arrows). The island had been known to its aboriginal inhabitants as Haiti; they were of the Arawak stock and stoutly fought against the Spaniards. The Caribs, though themselves a very pacific character. That which worshipped idols appears from the fact that the first Bishop of San Domingo sent an idol of aboriginal workmanship as a present to Leo X (Moroni, Dictionaire, XX, s. v. Domo-

The first Spanish settlement, Isabella, was on the north coast. But in 1496, when Miguel Diaz reported to the admiral the existence of much gold in
and about the Hayna River, as well as the remarkable salubrity of the country of the Osamas, on the south coast, Isabellas, which had been found unhealthy, was abandoned. At the mouth of the Ozama River and on its left bank, Bartolomé Colón began the settlement of Nueva Isabella, which was not long afterwards replaced by San Domingo, on the opposite bank. Thus, the present capital of the Dominican Republic,

**Façade of the Cathedral, San Domingo**

the oldest Christian city in the New World, was already established as the capital of the “New Spains” in the last year of the fifteenth century. In 1506, under Alejandro Giraldino, its first bishop, the present cathedral church of San Domingo was begun; it was completed in 1540. In this cathedral, about 200 feet in length by 90 in width, the remains of several members of the Columbus family—possibly even of the great admiral himself—still reposè; here, too, is still reverently preserved a fragment of the cross which Columbus set up on Santo Cerro, and about which miraculous legends have grown up in the course of four centuries. The catalogue of **adelantados** of the island includes the names of Diego Colon (immediate successor to his uncle Bartolome), of Bobadilla, and Ovando. There Columbus himself lived for many years, there he was imprisoned by his enemies, and thence he set out upon his last voyage to Spain. To San Domingo Ojeda returned from his last expedition of discovery and conquest in 1509. His grave is still shown in the main doorway of the ruined Franciscan church. In 1547 Paul III made San Domingo the metropolis see of the New World. Meanwhile houses of the Friars Preachers, the Franciscans, and the Mercedarians sprung up rapidly, and in this West Indian port, the population of which could never have exceeded 20,000, the ruins of not fewer than half a dozen ancient convents are still to be seen. The Jesuit college, now used as a theatre, was not founded until a later period.

While all this activity lasted, the seeds of social and political decay were being sown in Hispaniola. The aborigines were either killed or driven into hiding among the Cibao mountains; the importation of negro slaves became a regular institution. The Spanish settlers were men of the losing, not the conquering, type; their blood mingled with that of the negro and, in some degree, the aboriginal, to produce the San Domingan of modern times. In 1585 Francis Drake drove the Spanish garrison out of San Domingo and burned section after section of the city until a ransom of 30,000 crowns was paid to him. In the next century French adventurers—the original **boucaniers**—began to use the little island of Tortuga, near the north-west coast of Hispaniola, as a piratical rendezvous; from Tortuga they gradually spread over the eastern end of Hispaniola, creating a claim of occupation which Spain recognized in the Treaty of Ryswick (1697). It was in April, 1655, that an English force, conveyed thither on the fleet commanded by Admiral Penn, was driven away, after effecting a landing about thirty miles west of the capital. The natural resources of Hispaniola still enriched Spain, and the mint at Conception de la Vega continued to coin gold from the Hayna. After the Peace of Ryswick Hispaniola was almost forgotten if an English cabinet-maker had not (about the year 1766) discovered the value of mahogany. The demand, at first created by a shipment from Jamaica, was largely supplied by the Spanish island. The French Revolution reacted upon Hispaniola. The whites and mulattoes of San Domingo, under Spanish leaders, attempted to restore the old regime in the French colony, but in 1795 all Hispaniola was ceded to France. The Spanish authorities transferred San Domingo to the representative of the French Republic, who was the mulatto General Toussaint L’Ouverture. Until the Treaty of Paris (1814) the French whites, the white and coloured partisans of Spain, the blacks of Haiti, and, now and then, a British expeditionary force fought for supremacy in San Domingo. The treacherous capture of L’Ouverture and his mysterious death in prison at Beausancy, in 1803, were followed by a general massacre of the whites in Haiti in March, 1804. The Haitian blacks now compelled the submission of San Domingo to the authority of their first president, Dessalines. At last, in 1814, the Treaty of Paris restored to Spain her oldest possession in the New World. Actual Conditions—Out of the political chaos, which had lasted for more than half a century, arose the present Dominican Republic. Its constitution was proclaimed 18 November, 1844, and its first president was Pedro Santana; it was recognized by France in 1845, and by Great Britain in 1850. An attempt to restore Spanish rule, in 1861, in defiance of the Monroe Doctrine, ended with a final Spanish evacuation in 1865. In 1897 the foreign debt of the republic had reached the amount of more than $21,000,000, the interest on which was supposed to be secured by customs receipts; following a default of interest (1 April, 1899), the Government of the United States intervened to obtain an equitable settlement, and its efforts led to the convention of 1905 (ratified 1907), by which an agent, always a citizen of the United States, is to be permanently empowered to act as general receiver of the Dominican Government. Since 9 June, 1905, all lands owned by the Dominican Government have been open for settlement, free for ten years, and after that at a rent of 5 cents per acre. Although there can be little doubt that the national resources of the republic still include large quantities of gold, silver, and copper ore,
and even iron, the actual products are only vegetable: sugar (183,754 acres under cultivation in 1906); tobacco (nearly 15,000,000 lbs. of leaf exported annually); coffee. The actual timber output is insignificant. In 1907 the total length of railroad was 112 miles.

The Constitution of the Dominican Republic is said to be modeled on that of Venezuela; the president, elected for four years, is assisted by a council of ministers; the legislature is a single chamber elected by popular vote in twenty-four departments. The supreme court of the republic (a president and four judges) is appointed by the national congress, its "minister fiscal," however, being appointed by the chief executive; for courts of first instance the republic is divided into eleven judicial districts, each presided over by an alcalde. By the terms of the Constitution education is gratuitous and compulsory.

The ancient city of San Domingo (population, 16,000) is still the seat of the civil government, as well as the see of the archbishop, who, however, no longer has any suffragans. The relations between Church and State are (1906) very cordial. The Constitution of the Republic, in which religious liberty is an article, guarantees to the Church freedom of action, which, nevertheless, is curtailed by the law providing that the civil solemnization of marriages must precede the canonical. The municipal cemeteries are consecrated in accordance with the Church's requirements, though in some important centers of population there are non-Catholic cemeteries besides. In the Dominican Republic (with which the Archdiocese of San Domingo is coextensive) there are 660,000 Catholics, upwards of 1000 Protestants, and very few Jews, while the Masonic lodges number about thirteen. The total number of parishes is 56, each with its own church, in addition to which there are 133 chapels and 82 mission stations. The (ecclesiastical) Conciliar seminary, at the capital, is under the care of the Eucharist Fathers (Congregation of Jesus and Mary), who also administer the cathedral parish. Another college under ecclesiastical control is that of San Sebastian in La Vega. A diocesan congregation of religious women numbers 80 members, distributed among four houses; these sisters, who have charge of a hospital, care for orphan children and the infirm aged.

Dominicans. See Preachers, Order of.

Dominici, Giovanni, Blessed (Banchini or Baochini was his family name), Cardinal, statesman, and writer, b. at Florence, 1556; d. at Buda, 10 July, 1420. He entered the Dominican Order at Santa Maria Novella in 1372 after having been cured, through the intercession of St. Catherine of Sienna, of an impediment of speech for which he had been refused admission to the order two years before. On his return from Paris, where he completed his theological studies, he laboured as professor and preacher for twelve years at Venice. With the sanction of the master general, Blessed Raymond of Capua, he established convents and founded the convent of Corpus Christi at Venice for the Dominican Nuns of the Strict Observance. He was sent as envoy of Venice to the concilae of 1406 in which Gregory XII was elected; the following year the pope, whose market he had so long coveted, on his advice, as anxious means of ending the schism Martin V appointed him legate to Bohemia on 19 July, 1418, but he accomplished little with the followers of Hus, owing to the supineness of King Wenceslaus. He was declared blessed by Gregory XVI in 1832 and his feast is kept annually. He is a prolific writer on spiritual subjects but also a graceful poet, as his many vernacular hymns, or Laudi, show. His "Regola del governo di cura familiare", written between 1400 and 1405, is a valuable pedagogical work edited by Savelli, Florence, 1890 which treat in four books, of the faculties of the soul, the powers and senses of the body, the uses of earthly goods, and the education of children. This last book has been translated into German by Rössler (Herder's Bibliothek der katholischen Pädagogik, VII, Freiburg, 1894). His "Lucida Noctis" (St. Couto, O. P., Lisbon, 1550) is one of the fifteenth century with an introduction, Paris, 1906) in reply to a letter of Nicola di Piero Salutati, is the most important treatise of that day on the study of the pagan authors. Dominici does not flatter condemn classical studies, but strenuously opposes the paganizing humanism of the day.

Dominic of Prussia, a Carthusian monk and ascetical writer, b. in Poland, 1382; d. at the monastery of St. Alban near Trier, 1461. According to the account he wrote of himself his first teacher was the parish priest, a pious Dominican; later he was a student at the University of Cracow where he was noted for his intelligence. Falling into bad habits he left a prison bond life until twenty-five years of age, when he reformed through the influence of Adolf of Essen, prior of the Carthusian monastery of St. Alban, near Trier. Dominic now became a Carthusian, entering the order in 1409. His monastic life was one of severe penance and abnegation of all indulgences of spirit. Objects of prayer he attained were numerous, and many visions are ascribed to him. Among the positions he filled were those of master of novices at Mainz and vicar of the monastery of St. Alban, where he died. As an author Dominic composed seventeen treatises which have been preserved in various libraries. In the "Libro duomo eclettico," he relates the events of his own life; the "Tractatus de Contemptu mundi," "Remedium tentationum," "De vera obedientia," and "Sonus euphanetis" he prepared during his solitary repasts. A further work is his "Libri duos extativers," which he wrote for his own use.

Dominic of Prussia is frequently mentioned in the
DOMINIC

113

DOMINIS

Addressed a Latin letter to the professors of Oxford in which he answered the objections and explained the difficulties of Anglicans. An English translation of the letter is given, in the appendix to the life of Father Dominic by Father Pius Devine.

Lives of Father Dominic: Italian, by Padre Filippo (1860); Locchi di San Giuseppe (Genoa, 1877); English, by Father Devine (London, 1889). Father Dominic’s Letters and correspondence to England are published as a supplement to the 5th vol. of the Oratory life of St. Paul of the Cross (London, 1883).

ARTHUR DEVINE.

Dominus, MARCO ANTONIO DE', a Dalmatian ecclesiastic, apostate, and man of science, b. on the island of Arbe, off the coast of Dalmatia, in 1566; d. in the Castle of Saint Angelo, Rome, September, 1624. Educated at the Ilirian College at Loretto and at the University of Padua, he entered the Society of Jesus and taught mathematics, logic, and rhetoric at Padua and Brescia. On leaving the Jesuits (1586), he was, through imperial influence, appointed Bishop of Zeneg (Segna, Seng) and Modrus in Dalmatia (Aug., 1600), and transferred (Nov., 1602) to the archiepiscopal See of Spalato. He sided with Venice, in whose territory his see was situated, during the quarrel between Paul V and the Republic (1606–7). He was, in fact, combated by the Council of Trent, and finally excommunicated. He had grown old and his health was failing. He was deeply religious from childhood, felt himself distinctly called to the institute he entered, and believed that God, by a special manifestation, had told him that he was destined to announce the Gospel truth and to bring back stray sheep to the way of salvation.

He was received into the Congregation of the Passion in 1814, and ordained priest, 1 March, 1818. After completing the regular course of studies, he taught philosophy and theology to the students of the congregation, with special skill in the science of economics, which he had studied in Italy at the offices of rector, provincial consultant, and provincial, and fulfilled the duties of these positions with ability. At the same time he constantly gave missions and retreats. He founded the first Passionist Retreat in Belgium at Ere near Tournai in 1840; in 1842, after twenty-eight years of effort, he established the Passionists in England, at Aston Hall, Staffordshire. During the seven years of his missionary life in England he established three houses of the congregation. He died at a small railway station near Reading and was buried under the high altar of St. Anne’s Retreat, Sutton, St. Helen’s. Among the remarkable converts whom he received into the Church may be mentioned John Dobree Dalzars, John Henry Newman, and Newman’s two companions, E. S. Bowles and Richard Stanton, all of whom he afterwards corresponded with. The reception in 1845 of Newman and his friends must have been the greatest happiness of his life. In 1849 Father Dominic received the Hon. George Spencer, in religion Father Ignatius of St. Paul, into the Congregation of the Passion.

Father Dominic’s works are: courses of philosophy and moral theology; a volume on the Passion of Our Lord; a work for nuns on the Sorrows of the Blessed Virgin, “Divina Parainfita”; a refutation of de Lamennais; three series of sermons; various controversial and ascetical works. In 1841 he

AMBROSE MOUGEL.

Dominic of the Mother of God (called in secular life DOMENICO BARRI), a member of the Passionist Congregation, b. at Terracina, 22 June, 1792; d. near Reading, England, 27 August, 1849. His parents were peasants and died while Dominic was still a small boy. There were six children, and Dominic, the youngest child, was adopted by his maternal uncle, Bartolomeo Facelli. As a boy he was employed to take care of sheep, and when he grew older he did farm work. He was taught his letters by a kind Capuchin priest, and learned to read from a country lad of his own age; although he read all the books he could obtain, he had no regular education. He was a zealous and patriotic Christian, and distinguished himself in the struggle for independence. He was deeply religious from childhood, felt himself distinctly called to the institute he entered, and believed that God, by a special manifestation, had told him that he was destined to announce the Gospel truth and to bring back stray sheep to the way of salvation.

He was received into the Congregation of the Passion in 1814, and ordained priest, 1 March, 1818. After completing the regular course of studies, he taught philosophy and theology to the students of the congregation, with special skill in the science of economics, which he had studied in Italy at the offices of rector, provincial consultant, and provincial, and fulfilled the duties of these positions with ability. At the same time he constantly gave missions and retreats. He founded the first Passionist Retreat in Belgium at Ere near Tournai in 1840; in 1842, after twenty-eight years of effort, he established the Passionists in England, at Aston Hall, Staffordshire. During the seven years of his missionary life in England he established three houses of the congregation. He died at a small railway station near Reading and was buried under the high altar of St. Anne’s Retreat, Sutton, St. Helen’s. Among the remarkable converts whom he received into the Church may be mentioned John Dobree Dalzars, John Henry Newman, and Newman’s two companions, E. S. Bowles and Richard Stanton, all of whom he afterwards corresponded with. The reception in 1845 of Newman and his friends must have been the greatest happiness of his life. In 1849 Father Dominic received the Hon. George Spencer, in religion Father Ignatius of St. Paul, into the Congregation of the Passion.

Father Dominic’s works are: courses of philosophy and moral theology; a volume on the Passion of Our Lord; a work for nuns on the Sorrows of the Blessed Virgin, “Divina Parainfita”; a refutation of de Lamennais; three series of sermons; various controversial and ascetical works. In 1841 he
pope. On the death of Gregory XV (8 July, 1623) the pension ceased, and irritation loosened his tongue. Combing into conflict with the Inquisition he was declared a relapsed heretic, was confined to the Castle of Sant' Angelo, and there died a natural death. His case was continued after his death, his heresy declared manifest, and his body burned together with his works on Dec. 24, 1624.

In 1611 he published, at Venice, a scientific work entitled: "Tractatus de radiis visus et lucis in vitris, perspectivia et iride", in which, according to Newton, he was the first to develop the theory of the rainbow, by drawing attention to the fact that in each raindrop the light undergoes two refractions and an intermediate reflection. His claim to that distinction is, however, disputed in favour of Descartes.

Edward Myers.

Dominus ac Redemptor. See Society of Jesus.

Dominus Vobiscum, an ancient form of devout salutation, incorporated in the liturgy of the Church, where it is employed as a prelude to certain formal prayers. Its origin is evidently Scriptural, being clearly borrowed from Ruth, ii, 4, and II Par., xv, 2. The same idea is also suggested in the New Testament, e. g. in Matt., xxviii, 20; "Ecce ego vobiscum sum", etc. The ecclesiastical usage dates probably from Apostolic times. Mention of it is made (ch. iii) by the Council of Braga (563). It also appears in the sixth or seventh century, "Sacramentarium Gelasianum". The phrase is pregnant with a deep religious significance, and therefore intensely expressive of the highest and holiest wishes. For it is not the possession of the Lord—the Source of every good and the Author of every best gift—a certain pledge of Divine protection and a sure earnest of the possession of all spiritual peace and consolation? In the mouth, therefore, of the priest, no acts as the representative and delegate of the Church, in whose name and with whose authority he prays, this deprecatory formula is pre-eminently appropriate. Its frequent use in the public prayers of the Church's liturgy. During the Mass it occurs eight times, namely, before the priest ascends the altar, before the two Gospels, the collects, the Offertory, the Preface, the Post-Communion oratio, and the Credo. On four other occasions the celebrant, whilst saying it, turns to the people, extending and joining his hands; on the other four he remains facing the altar. In the Divine Office this formula is said before the principal oratio of each Hour by priests, even in private recitation, because they are supposed to pray in union with, and in behalf of, the Church. Deacons say it only in the absence of a priest or with his permission if present (Van der Stappen, De officio divino, 43), but subdeacons use instead the "Domine exaudi orationem meam". Contrary to general usage, the "Dominus Vobiscum" does not precede the prayer of the Blessed Sacrament before Benedict of Nursia (Gregorian Canticle, cxvii, 20). The response to the "Dominus Vobiscum" is "Et cum spiritu tuo" (cf. II Tim., iv, 22; Gal., vi, 18; Phil., iv, 23). Formerly this answer was rendered back with one voice by the entire congregation. Among the Greeks there is a corresponding form "Fiat omnibus" (Liturgy of St. Basil), already mentioned, ordained (Mansi, IX, 777) that priests, as well as bishops, to whom alone the Friscallians sought to restrict it, should adopt this formula.

Patrick Morrisey.

Domitian (Titus Flavius Domitianus), Roman emperor, younger brother and successor of the Emperor Titus; b. 24 Oct., A.D. 51, and reigned from 81 to 96. In spite of his private vices he set himself up as a reformer of morals and religion. He was the first of the emperors to defray himself during his lifetime by assuming the title of "Lord and God". After the revolt of Saturninus (95) he organized a series of bloodthirsty proscriptions against all the wealthy and noble families. A conspiracy, in which his wife joined, was formed against him, and he was murdered, 18 Sept., 96.

When the Acts of Nero's reign were reversed after his death, an exception was made as to the persecution of the Christians (Tertullian, Adv. Maj. 7). The Jewish revolt brought upon them fresh unpopularity, and the subsequent destruction of the Holy City deprived them of the last shreds of protection afforded them by being confounded with the Jews. Hence Domitian in his attack upon the aristocratic party found little difficulty in condemning such persons as "false Jews". To observe Jewish practices was no longer lawful; to reject the national religion, without being able to plead the excuse of being a Jew, was atheism. On one count or the other, as Jews or as atheists, the Christians were liable to punishment. Among the most famous martyrs in this Second Persecution were Domitian's cousin, Flavius Clemens, the consul, and Maccius Galbius who had also been consul. Flavia Domitilla, the wife of Flavius, was banished to Pandataria. But the persecution was not confined to such noble victims. We read of many of the common death or the loss of their goods ( Dio Cassius, LXVII, 4). The book of the Apocalypse was written in the midst of this storm, when many of the Christians had already perished and more were to follow them (St. Irenæus...
DOMITILLA 115 DONATELLO

Adv. Heres, V, xxx). Rome, "the great Babylon," was drunk with the blood of the saints and with the blood of the martyrs of Jesus" (Apoc., xvii, 5, 6; ii, 10, 13; vi, 11; xii, 13; xx, 4). It would seem that participation in the feasts held in honour of the divinity of the tyrants who made drunk the earth with the wine of her whoredom", and steeped her robe in their blood. St. Clement's Epistle to the Corinthians was also written about this time; here, while the terrible trials of the Christians are spoken of, we do not find the same denunciations of the persecutors. The Roman Church continued loyal to the empire, and sent up its prayers to God that He would direct the rulers and magistrates in the exercise of the power committed to their hands (Clem., Ep. ad Cor., c. Ixii; cf. St. Paul, Rom., xiii, 1; I Pet., ii, 13). Before the end of his reign Domitian ceased to persecute. See PERSÉCUTION.

T. B. SCANNELL.

DOMITILLA, CATACOMBS OF SAINT. See CEMETERY.

Domitopolis, a titular see of Isauria in Asia Minor. The form of the city is unknown; it was called Domitopolis or Domietopolis after L. Domitius Ahenobarbus (Ramsay, in Reville numismatique, 1894, 168 sqq.). Ptolomy (vii, 5) places it in Cilia; according to Constantine Porphyrogenitus (De castris, I, 15) it was one of the ten cities of the province of Georgius Cyprius, in Cilicia (G. u. H. C., 832). It figures in Parthey's "Notitiae episcopatum", Iand III, and in Gelzer's "Nova Tactica", 1618, as a suffragan of Seleucia. Lequien (Oriens christ., II, 1823) mentions five bishops, from 451 to 879. Domitopolis is to-day Dindobol, a village on the Erdemek Șa, in the villeyet of Adana (cf. Sterrett, in Papers of the American School, Athens, III, 80).

S. PÉTRIDÈS.

DOMNIUS, POPE. See DONSUS.

Domnus Apostolicus (Dominus Apostolicus), a title applied to the pope, which was in most frequent use between the sixth and the eleventh centuries. The pope was styled Apostolic because he occupies an Apostolic see, that is, one founded by an Apostle, as were those of, Corinth, etc. (cf. Gallus, De praep., xxxvi). Rome being the only Apostolic Church of the West, Sedes apostolica meant simply the Roman see, and Domnus Apostolus the Bishop of Rome. In Gaul, however, as early as the fifth century the expression sedes apostolica was applied to any episcopal see, bishops being successors of the Apostles (cf. Sidonius Apollinaris, Ep., lib. VI, i, etc.). By the sixth century the term was in general use, and many letters from the Merovingian kings are addressed Domnus sancta et apostolica sede diuinissimae. Thus the bishops of Gaul were given the title of Domnus Apostolus (cf. Venantius Fortunatus, "Vita S. Mart.", IV; "Formula Marculi", II, xxxix, xl, xlix). Many examples are also found in wills and deeds (e.g. P. L., LXX, 1281, 1314, etc.), and one occurs in a letter of baptism given by Charlemagne to St. Boniface (Epp. carbon., II, 23). Later they disappeared, and of the councils held during his time, even outside the Frankish Empire, as in England, the term pope. Perhaps the only example of its use in these authors is in the second letter of Theodore the Studite to Leo III, circa 820 et seq. Long before this, however, the word Apostolicus alone had been employed to designate the pope. Probably the earliest example is in the list of popes compiled at the time of Pope Vigilius (d. 555), which begins "Incipienti nominis Apostoliorum" (F. P., LXXXVII, 1406). The expression recurs frequently in the inscriptions of the Carolingian kings, as well as in Anglo-Saxon writings. Claude of Turin gives a curious explanation—Apostolus custos. At the Council of Reims held in 1049 the Bishop of Compiegne was excommunicated "quia contra fas sibi vendicaret eulumen apostolici nominis"—because he wronged his clergy (he was called by an Apostolic name), thinking himself the successor of St. James the Greater, and it was thereupon laid down "quod solus Romanus Pontifex universalis Ecclesie Primas esset et Apostolico" (that only the pontiff of the Roman See was primate of the universal Church and Apostolicus). To-day the title is found only in the Litany of the Saints. There are also the expressions apostolotorum (pontifical) and the ablative absolute apostolican (during the pontificate). It is to be noted that in ecclesiastical usage the abbreviated form dominus signifies a human aper as against Dominus, the Divine Lord. Thus at meals monastic grace was asked from the superior in the phrase Jube Domne benedicere, i.e. : "Be pleased sir to give the blessing."

U. BENIGNI.

Donahoe, Patrick, publisher, b. at Munney, County Cavan, Ireland, 17 March, 1811; d. at Boston, U. S. A., 18 March, 1901. He emigrated to Boston when ten years of age with his parents, and at fourteen was apprenticed to a printer. He worked on the "Jessuit" when that paper was started by Bishop Fenwick in 1832, and after the bishop relinquished its ownership, he carried it on for some time with H. L. Devereaux under the new title of "The Literary and Catholic Sentinel." In 1836 he began the publication of "The Pilot," a weekly paper devoted to Irish American and Catholic interests, which in succeeding years became the organ of Catholic opinion in New England, and had a wide circulation all over the United States. He established in connexion with it a publishing and book-selling house from which were issued a large number of Catholic books. Later he opened a bank. All his ventures proved successful and the wealth he acquired was generously given to advance Catholic interests. The great Boston fire of 1872 destroyed his publishing plant. Another fire in the following year and insidious losses to the bank caused him to lose so much money that his bank failed in 1876. Archbishop Williams purchased "The Pilot" to help to pay the depositors of the bank, and Mr. Donahoe then started a monthly "Donahoe's Magazine" and an exchange and passenger agency. In 1881 he was able to buy back "The Pilot" and devoted his remaining years to its management. During the Civil War he actively interested himself in the organization of the Irish regiments that volunteered from New England. In 1893 the University of Notre Dame gave him the Loretto Medal for signal services to American Catholic progress.

Pilot (Boston), 23 March, 1901 and files; L. A. RY, Hist. Cath. Ch. in New England States (Boston, 1899), I.

THOMAS F. MEHAN.

Donahoe, Patrick James. See WHEELING.

Donatello (Donato di Nicco1ò di Beato Bardi), one of the great Tuscan sculptors of the Renaissance, b. at Florence, c. 1386. His father was the son of Nicco1ò di Beato Bardi, and was early apprenticed to a goldsmith to learn design. At the age of seventeen he accompanied his friend Brunellesco to Rome, and the two youths devoted themselves to drawing and to making excavations in their pursuit of the antique. Half the week they spent chiselling
for a livelihood. Brunellesco's occupation was archi-
tecture; Donatello, though understanding the inter-
relation of art and architecture, was more con-
tented with Brunellesco or, as later, with Michelozzo,
who made sculpture paramount. It is hard to place his
work chronologically. While still a mere boy, he
carved the wooden crucifix in Santa Croce, Florence.
On his return from Rome to Florence he was engaged
for years on the statues for Giotto's belfry and the
buildings then in progress. For the Campanile he did
"The Baptist", "Jeremia", "Habakkuk", a group
representing Abraham and Isaac, and the famous
"David" called the "Zucone" (Bald-head), so lifelike
that Donatello is said to have cried to his master
"Why don't you speak?" For the Duomo, "St. John
the Evangelist" and "The Singing-galleria"; for OrSan
Michele, "St. Peter" and "St. Mark", and the "St.
George", which he executed at the order of the Guild
of Armours—Donatello's most ideal and perfect
work. The socle-relief of "St. George and the Dra-
gon and the King of Capadocia's Daughter" is
absolutely Greek in simplicity and plastic beauty.
Other fine reliefs are the bronze doors for the sacristy
of San Lorenzo; the medallions for the ceiling; and the
"Assumption of the Virgin" in the Camposanto with a group
of the figures of the Blessed Virgin and the archangel.
In the Loggia de' Lanzi is the somewhat ill-proportioned
group of "Judith and Holophernes". The marble
"David" in the Bargello, uniting the delicacy of the
small bronze of Castiglione with a classic grace, and
fashion of wreath-bound hair, seems a link between
two of the phases in Donatello's development. Purely
Renaissance and yet conceived in the antique spirit
are the "Amorino" (Cupid) and the bronze "David"
of the National Museum, Florence. Both are in-
trinsic with life and the potentiality of youth, jubil-
ant or contained. Pope John XXIII, a personal
friend of the sculptor, died in Florence, 1419. Dona-
tello made his tomb, a recumbent portrait-statue in
the baptistery. In the Duomo of Siena he performed
the same office for Bishop Pecchi. In Siena also he
made several rare statuettes and reliefs for the chris-
tening-font of San Giovanni. At Prato, for the open-
apir pulpit of the Duomo, he carved the casement with
groups of playing children (putti). He is believed to
have been in Padua again in 1433. A tabernacle of
the Blessed Virgin in St. Peter's is said to be by Dona-
tello, and also the tombstone of Giovanni Crivelli in
Santa Maria in Ara Coeli. In 1443 he went to Padua
to build the choir-galleria, and remained there some
ten years. First he carved his "Christ on the Cross",
then a number of works; followed by the now
statuettes of the Blessed Virgin, St. Francis of
Assisi, St. Anthony, and other saints; also a long
series of reliefs for the high altar. While in Padua
Donatello was commissioned to make a monument to
theGenoese Condottiere (General) Gattamelata
(Enamco de' Narni), and he blocked out the first great
equestrian statue since classical times. The last known
statue of Donatello is "St. Louis of Toulouse" in the
interior of Santa Croce.

Donatello became bedridden in his latter years, and
some of his works were completed by his pupils. Piero
de' Medici provided for him. Donatello had
always been lavish with his fellow-workers and assis-
tants, and took no forethought for himself. His char-
ter was one of great openness and simplicity, and he
had an ingenuous appreciation of his own value as an
artist. Unassuming as he was, his pride of craft and
independence of spirit would lead him to destroy a
masterpiece at one blow if his modest price were hag-
gled over. He was buried beside his patron Cosimo de'
Medici in the church of San Lorenzo in Florence.
Donatello was a thorough realist and one of the first
modellers with whom character and personality in the
subject meant more than loveliness. His Apostles
and saints were generally close likenesses of living
persons. He had a vivid faculty for individual traits and
expression and a method of powerful handling that
made them harmonious in his creations. In such figures
as the "Baptist" and the "Magdalene" of the
baptistery of Florence he apparently studied emaciation
for its anatomic value. His busts of contem-
poraries (such as that of Nicolò da Uzzano,
"Youth with Drapery", etc.) look like everday	life. One of the most graceful pieces is the "San Gio-
vannino", a relief of a child, in sandstone, in the Bar-
gello, Florence. Minor works are the "Marzocco"
(originai in the National Museum, Florence)—the
lion, the emblem of Florence, with the fleur-de-lys of
Florence—bejeweled—and the Martelli escutcheon on the staircase of their

Donation (in Canon Law), the gratuitous trans-
fer to another of some right or thing. When it consists
in placing in the hands of the donee some movable
object it is called a benefaction (beneficium); when
an offering or oblatio, an alms). Properly speak-
ing, however, it is a voluntary contract, verbal or
written, by which the donor expressly agrees to give
without consideration, something to the donee, and
the latter is entitled to receive it (dona). The donor
may also make a donation of a right or thing (sua
propria causa). The main cases of such donation are
donee. Donations are also described as inter vivos
when made while the donor yet lives, and causa mortis,
when made in view or contemplation of death; the
latter are valid only after the death of the donor and
die until then are at all times revocable. They much
resemble testaments and codicils. They are, however,
the same footing as donations inter vivos once
the donor has renounced his right to revoke. In the pur-
suit of its end the Church needs material aid; it has
always reserved the right to demand and express it
less no less than by other means. In its quality of a
perfect and independent society the Church may also
decide under what forms and on what conditions it
will accept donations made to works of religion (dona-
tiones ad piae causae); it pertains to the State to legis-
late for all other donations.

History of Ecclesiastical Donations.—Even before the Edict of Milan (313) the Church was free to acquire property by donation either as a juridically
recognized association (collegium) or as a society de
fide toleranda (the note that they had been granted
by last will and testament dates only from 321 in the
reign of Constantine). Nevertheless, the Church was
held to observe the pertinent civil legislation, though
on this head it enjoyed certain privileges; thus, even
before the traditio, or handing over, of the donation to
a church or a religious institution, the latter acquired
real rights to the same (L. 23, C. De sacrosanctis eccl.
esis, 1, 2). Moreover, the insinuation or declaration of
the gift before the public authority was required only
for donations equivalent in value to 500 solidi (nearly
twenty-six hundred dollars) or more, or for those
later on extended to all donations (L. 34, 36, C. De dona-
tionsibus, VIII, 33). Finally, bishops, priests, and
decans yet under parental power were allowed to dis-

poise freely, even in favour of the Church, of property acquired by them after ordination [L. 33 (34) C. De episcopis et clericis, I, 3]. The Franks, long quite unaccustomed to dispose of their property by will, were at first quite willing to provide for this, especially after popular reorisons post obitum, similar to the Roman law donations in view of death but carrying with them the renunciation on the donor's part of his right of revocation; other Frankish donations to the Church reserved the usufruct. The institution known as precaria ecclesiastica was quite favourable to the growth of donations. At the request of the donor the Church granted him the use of the donated object for five years, for his life, or even a use transferable to the heirs of the first occupant. Synods of this epoch confirmed the acquisition of such indubitable donations even when the legal requisites had not been observed, though as a rule they were not omitted. Generally speaking, the consent of the civil authority (percepta) was not indispensable for the acquisition of property by religious corporations. The restrictions known as the "right of amortization" (see Mortmain) are of later date, and are the outcome of theories elaborated in the Middle Ages but carried to their logical issue in the modern civil legislation (of Continental countries) concerning domus de ministri mori, or property belonging to an ecclesiastical entity for the benefit of the religious corporations, they being perpetual. The Church does not accept such legislation; nevertheless the faithful may act accordingly in order to secure to their donations the protection of the law.

CANNONICAL LEGISLATION.—Donations are valid and obligatory when made by persons capable of disposing of their property and accepted by the administrators of ecclesiastical institutions. No other formality is required, neither notarial act nor authorization of the civil power. The declaration before the public authority required by civil law is not part of canon law. Nor are the faithful obliged to heed the restrictions which are placed by some modern civil codes in the way of a free disposition of their property. On the other hand the donation must be accepted by the donee; it is not true, as some have maintained, that every donation for works of religion (ad pias causas) implies a vow, i.e., an act in itself obligatory independently of the acceptance of the donee. If the administrators of an ecclesiastical institution refuse to accept a donation, that institution can always obtain in canon law a praemunire, which, if again put in a condition to accept the refused donation. The canonical motives for the revocation or diminution of a donation are the birth of children to the donor and the donatio inopiniosi, or excessive generosity, while, whereby the donee may lose his share of inheritance that legitimately belongs to his children. In both cases, however, the donation is valid in canon law to the degree in which it respects the legitimate share of the donor's children. It is worthy of note that while ecclesiastical and religious establishments may give alms, they are bound in the matter of genuine donations by the provisions of the canon law concerning the alienation of ecclesiastical property.

CIVIL LEGISLATION.—In most European countries the civil authority restricts in three ways the right of the Church to accept donations: (1) by imposing the forms and conditions that the civil codes prescribe for donations; (2) by reserving to itself the right of saying what institutions shall have civil personality and be thereby authorized to acquire property; (3) by exacting from the Church a certain formality, usually at least a declaration, for important donations. Austria recognizes a juridical personality not only in those religious institutions which are charged with the maintenance of public worship, but also, through easily granted approval, in religious associations of any kind. The so-called amortization laws (against the traditional inalienability of tenure on the part of religious corporations) have so far remained only a threat, though the Government reserves the right to establish such legislation. Religious communities, however, are required to make known to the civil authorities all their acquisitions of property. In Germany, even since the promulgation of the Civil Code of the Empire (1896), the legislation varies from State to State. In all, however, property rights are recognized by the law in only those ecclesiastical institutions that are recognized by the State. As a rule, donations must be authorized by the civil power if they exceed the value of five thousand marks (1250 dollars, or 250 pounds sterling) though in some states this figure is doubled. In Frisia civil authorization is requisite for the donation of property by a clerical estate or by any ecclesiastical institution. In Italy every donation must be approved by the civil authority, and only the institutions recognized by the State are allowed to acquire property; note, however, that similar benefits (see Benevento) are enjoyed in religious orders cannot acquire this latter privilege. With few exceptions, ecclesiastical institutions in Italy are not allowed to invest in any other form of property than Government bonds. In France the associations cultuelles, or worship-associations, are recognized by the State to have the right to accept donations, all being well known, however, that Pius X forbade the Catholics of France to form such associations. That country, it is true, recognizes the civil personality of illicit associations organized for a non-lucrative purpose, but declares illicit every religious congregation not approved by a special law. At the same time, it refuses to approve the religious congregations which have sought this approval, and is gradually suppressing all those which were formerly approved. (See Property, Ecclesiastical.)

A. V. Hove.

Donation (in Civil Jurisprudence), the gratuitous transfer, or gift (Latin, donatio), of ownership of property. The Latin word munus also signifies a gift, but "a gift on some special occasion such as births or marriages" (Roby, Roman Private Law, Cambridge, 1902, I, 86). The person transferring ownership by donation is termed the donor, the person to whom the transfer is made, the donee. In contemplation of law donatio is a real, on the theory that "one has of disposing of his property as he wills" (125 New York Court of Appeals Reports, p. 579), a right, however, deemed from ancient times an appropriate subject for legal regulation and restraint (see Johns, Babylonian and Assyrian Laws, etc., New York, 1904, 141). Donation can be made in two ways, (1) a donor to transfer the ownership, but also that of the donee to accept and assume it, "as I cannot": remarks Pothier (Treatise on Obligations, 4), "by the mere act of my own mind transfer to another a right in my goods, without a concurrent intention on his part to accept it." Donations are usually classified as (1).
inter vivos (among the living) and (2) mortis causa (in view of death).

(1) Inter Vivos.—Sir William Blackstone explains (in his Commentaries, II, 441) that in English law mutual consent to give and to accept is not a gift, but is an act of contract void for want of consideration. Yet delivery and acceptance being added to the ineffectual consent, the transaction becomes an irrevocable transfer by donation inter vivos, regarded in law as an executed contract, just as if the preliminary consent had constituted an effectual "act in the law" (see Pollock, Principles of Contract, New York, 1906, 2). "Every gift," remarks Chancellor Kent, "which is made perfect by delivery, and every grant, are executed contracts, for they are founded on the mutual consent of the parties to reference to a right or interest passing between them" (Commentaries on American Law, II, 437); and Milton (Paradise Lost, XII, 67) says:—

He gave us only over beast, fish, fowl, Dominion absolute; that right we hold by his donation.

According to English law, writing under seal, known as a deed, so far transfers personal property without actual delivery that ownership vests upon execution of the deed, and the donation is irrevocable until disclaimed by the donee (J. W. Smith, The Law of Contracts, 1898, ch. II). This gift, called a "gift not contingent," is not considered a mere "gift in trust," and 125 years ago it was declared "a present thing, incapable of being qualified" (Leape, Roman Private Law, London, 1906, 145). The English law "controls," to quote Chancellor Kent, "gifts when made to the prejudice of existing creditors" (Commentaries, II, 440); and a donation may be revoked if the donee were under any legal incapacity... or if he were drawn in, circumvented or imposed upon by false pretences, ebriety or surprise" (Blackstone, Commentaries, II, 441). But English law does not annul donations for ingratitude nor for various other causes mentioned in the Roman law. English law "does not demand an approbation from the donee," according to Chancellor Kent, "in the same terms as these refinements" (op. cit.). Donations between husband and wife were contrary to the policy of the Roman law which permitted donatio properiuptias before marriage only (Leape, op. cit., 95). By English common law the husband acceded to a husband full ownership of his wife's personal property, and possession for their joint lives of her real property. Because English law deemed husband and wife one person (Bishop, Commentaries on the Law of Married Women, Boston, 1873, I, 201), a gift of personal property from the husband to wife was "impossible according to the old and technical common law" (ibid., 738). But the commentator adds that "it is otherwise in equity" (ibid., 731). By the French Code Civil, donations inter vivos, designated entre vifs, are recognized; but they are subject to many restrictions.

(2) Mortis Causa.—A donation of this kind is made when a person "in his last sickness," as Pope Blackstone (Commentaries, II, 514), "apprehending his dissolution near, delivers or causes to be delivered to his heir the property of any goods he has to keep in case of his decease." The same donation may also be made in presence of any other impending peril of death. The "Institutes" of Justinian cite a classic example: sic et apud Homerus Telemaehus donat Firo (II, VII). This donation differs strikingly from donation inter vivos in not being absolute, but conditional on the donor failing to recover from the sickness or to escape the peril; also in being dependent on his not having exercised the right which remains to him, of revoking the donation. The transfer is thus perfected by death only. Roman law permitted such donations between husband and wife because these were donations quae conferuntur in tempus soluti matrimoni (Pothier, Pandectæ Justinianæ, XXIV, t. I, x). Nor were donations of this kind from husband to wife forbidden by the English common law (24 Vermont Reports, 596). As the danger in view of which the donation is made must be actually present, therefore a transfer from an owner "not terrified by fear of any present peril, but moved by the general consideration of man's mortality," cannot be sustained as a donation mortis causa. A transfer of this type of real estate cannot be effected by this form of donation. And any donation mortis causa expressly embracing the whole of the donor's property has been said to be illegal, being deemed to be an attempt to escape disposition by last will (American Law Register, I, 25). The grounds already referred to on which a donation inter vivos may be avoided seem also grounds for avoiding a donation mortis causa. In every instance the evidence establishing such a donation against a donor's representatives must be "clear and convincing, strong proof of a fraud" (125 Massachusetts Reports, 757). For this "death-bed disposition of property," as it is termed by Blackstone (op. cit.), is not a favourite of the law. Many years ago a lord chancellor of England, profoundly learned in the law and noted for his conservatism suggested that if "this donatio mortis causa was struck out of our law altogether it would be quite as well" (American Law Register, I, II). And by the Code Civil it has been "struck out" of the law of France.

Donation of Constantin (Lat. Donatio Constantini).—By this name is understood, since the end of the Middle Ages, a forged document of Emperor Constantine the Great, by which large privileges and rich possessions were conferred on the pope and the Roman Church. In the oldest known (ninth century) manuscript (Bibliothèque Nationale, Paris, 2777) and in many other manuscripts the document bears the title: "Constitutum domini Constantinii imperatoris". It is addressed by Constantine to Pope Sylvester I (314-35) and consists of two parts. In the first (entitled "Confessio") the emperor represents himself as having been instructed in the Christian Faith by Sylvester, makes a full profession of faith, and tells of his baptism in Rome by that pope, and how he was thereby cured of leprosy. In the second part (the "Donatio") Constantine is made to confer on Sylvester and his successors, the pope and his successors, among others, the senate and all private powers from the sea to the land. Then the papa, as successor of St. Peter, has the primacy over the four Patriarchs of Antioch, Alexandria, Constantinople, and Jerusalem, also over all the bishops in the world. The Lateran basilica at Rome, built by Constantine, shall possess all churches as their head, similarly the churches of St. Peter and St. Paul shall be endowed with rich possessions. The chief Roman ecclesiastics (clerici cardinales), among whom senators may also be received, shall obtain the same honours and distinctions as the senators. Like the emperor the Roman Church shall have advancement of dignitaries, insignia of consistorii, ostiarii, and excurtivores. The pope shall enjoy the same honorary rights as the emperor, among them the right to wear an imperial crown, a purple cloak and tunic, and in general all imperial insignia or signs of distinction; but as Sylvester refused to put on
his head a golden crown, the emperor invested him with the high white cap (phrygium). Constantine, the document continues, rendered to the pope the service of a position at Rome and the papal crown. Moreover, the emperor makes a present to the pope and his successors of the Lateran palace, of Rome and the provinces, districts, and towns of Italy and all the Western regions (Jam palatium nostrum, ut patriam esse Romanum et omnem Italiae secundum antiquissimam fontes proponatur inique et caducis).

The document goes on to say that for himself the emperor has established in the East a new capital which bears his name, and thither he removes his government, since it is inconvenient that a secular emperor have to sit at the head of the Christian religion. The document concludes with maledictions against all who dare to violate these donations and with the assurance that the emperor has signed them with his own hand and placed them on the tomb of St. Peter. This document is without doubt a forgery, fabricated somewhere between the years 750 and 850. As early as the fifteenth century its falsity was known and demonstrated. Cardinal Nicholas of Cusa (De Concordantia Cathlicum, III, ii, in the Basilie ed. of his Opera, 1565, i) speaks of it as a document inadmissible in evidence. Similarly (1440) Lorenzo Valla (De falso credita et ementinata Constantinone donatione declaratio, Mainz, 1518) proved the forgery with certainty. Independently of both his predecessors, Reginald Pecocke, Bishop of Chichester (1436-97), reached a similar conclusion in his work, "The Repræsentor of over much Blaming of the Clergy", Rolls Series, II, 351-356. Its genuineness was yet occasionally defended, and the document still further used as authentic, until Baronius in his "Annales Ecclesiastici" (ad an. 324) admitted that it was a forgery, which admission was soon universally admitted to be just. It is so clearly a fabrication that there is no reason to wonder that, with the revival of historical criticism in the fifteenth century, the true character of the document was once recognized. The forger made use of various authorities, which Grauert and others (see below) have thoroughly investigated. The introduction and the conclusion of the document are imitated from authentic writings of the imperial period, but formulae of other periods are also utilized. In the "Confessio" and the "Collectio" the first part is explained at length, afterwards the fall of man and the Incarnation of Christ. There are also reminiscences of the decrees of the Iconoclastic Synod of Constantineople (754) against the veneration of images. The narrative of the conversion and healing of the emperor is based on the apocryphal Acts of Sylvester (Acta or Gestae Sylvasti). Yet all the particulars of the "Donatio" narrative do not appear in the hitherto known texts of that legend. The distinctions conferred on the pope and the cardinals of the Roman Church the forger probably invented and described according to certain contemporary rites and the court ceremonial of the Roman and the Byzantine emperors. The author also used the biographies of the popes in the Liber Pontificalis (q. v.), likewise eighth-century letters of the popes, especially in his account of the imperial donations.

The authorship of the document is still wrapped in obscurity. Occasionally, but without sufficient reason, critics have attributed it to the author of the False Decretals (q. v.) or to some Roman ecclesiastic of the eighth century. On the other hand, the time and manner of its composition have lately been thoroughly studied by numerous investigators (especially Germans), though no sure and universally accepted conclusion has yet been reached. As to the place of the forgery Baronius (Annales, ad. an. 1081) maintained that it was done in the East by a schismatic Greek; it is, indeed, found in Greek canonical collections. Natalis Alexander opposed this view, and it is no longer held by any recent historian. Many of the recent critical students of the document locate its composition in the forgery itself, as an intrinsic one: this false document was composed in favour of the popes and of the Roman Church, therefore Rome itself must have had the chief interest in a forgery executed for a purpose so clearly expressed. Moreover, the sources of the document are chiefly Roman. Nevertheless, the earlier view of Zacaria and others that the forgery originated in the Frankish Empire has quite recently been ably defended by Hergerntröther and Grauert (see below). They call attention to the fact that the "Donatio" appears first in Frankish collections, i.e. in the False Decretals and in the above-mentioned St-Denis manuscript; moreover the earliest certain quotation of it is by Frankish authors in the second half of the ninth century. Finally, this document was never used in the papal chancery until the middle of the eleventh century, nor in general is it referred to in Roman sources until the time of Otto III (983-1002, i.e. in case the famous "Diploma" of this emperor be authentic). The first certain use of it at Rome was by Leo IX in 1054, and it is to be noted that this pope was by birth and training a German, and not an Italian. The same argument is written under the title, that the chief aim of the forgery was to prove the justice of the translatio imperii to the Franks, i.e. the transfer of the imperial title at the coronation of Charlemagne in 800; the forgery was, therefore, important mainly for the Frankish Empire. This view is rightly tenable against the opinion of the majority that the forgery originated at Rome.

Still greater divergency of opinion reigns as to the time of its composition. Some have asserted (more recently Martens, Friedrich, and Bayot) that each of the two parts was written at a different time. Martens holds that the author executed his forgery at brief intervals; that the "Constitutum" originated after 800 in connexion with a letter of Adrian I (778) to Charlemagne wherein the pope acknowledged the imperial position to which the Frankish king by his own efforts and fortune had attained. Friedrich (see below), on the contrary, attempts to prove that the "Constitutum" was composed of two really distinct parts. The gist of the first part, the so-called "Constitution" appears also in the first part of the "Donatio", while the second, or "Donatio" proper, was written in the reign of Stephen II, between 752 and 757, by Paul, brother and successor of Pope Stephen. According to Bayot the first part of the document was composed in the time of Paul I (757-777), the latter part appeared in or about the year 774. In opposition to these opinions most historians maintain that the document was written at the same time and wholly by one author. But when was it written? Colombier decides for the reign of Pope Conon (886-887), Genelin for the beginning of the eighth century (828). But neither of these views is supported by sufficient reasons, and both are certainly untenable. Most investigators accept as the earliest possible date the pontificate of Stephen II (752-757), thus establishing a connexion between the forgery and the historical events that led to the origin of the States of the Church and the Western Empire of the Frankish kings. But inwhat year or period from the above-mentioned pontificate of Stephen II until the reception of the "Constitutum" in the collection of the False Decretals (c. 840-860) was the forgery executed? Nay, one and the same student of the intricate question maintains his own distinct view. It is necessary first to answer a preliminary question: Did Pope Adrian I in his letter to Charlemagne of the year 778 (Codex Carolinus, ed. Jaffé, Ep. ii) exhibit a knowledge of the "Constitutum"? From a passage in this letter it is clear that the pope, or at least the phrase "Si beati Silvestri Romani pontificis" shows a sancitate recorda-
tionem piissimo Constantino magno imperatore per eius largitatem sancta Dei Catholice et Apostolica Romana ecclesia elevata et exaltata et exinstitutum a diuisione papal et sui totius auctoritatis et praestituta et prefata
hersperie partibus hargin dignatus, ita et in eis ventris felicissima temporibus a fque nostris sancta Dei ecclesi
ida est beati Petri apostoli, germinzet aque exueltet. ... several writers, e.g. Döllinger, Langen, Meyer, and
others have concluded that Adrian I was then aware of this forgery, so that it must have appeared before 778. Friedrich
assumes in Adrian I a knowledge of the "Constitutum" from his letter to Emperor Constant
Constantine VI written in 785 (Mansi, Concil. Coll., XII, 1060). Most historians, however, rightly refrain from
from giving more than I made use of this document; from his letters, therefore, the time of its origin
cannot be deduced.

Most of the recent writers on the subject assume the origin of the "Donatio" between 762 and 795. Among
them, some decide for the pontificate of Stephen II (752-757), on the hypothesis that the author of the
forgery wished to substantiate thereby the claims of this pope in his negotiations with Pepin (Döllinger, Hauck, Friedrich, Böhmer). Others lower the date of the forgery to the time of Paul I (757-767), and base their theory on the fact that some of the documents in the new Western Empire from the attacks of the
Byzantines. Therefore it was highly important for him to establish the legitimacy of the newly founded empire, and this purpose was especially aided by all that the document alleges concerning the elevation of the pope. From the foregoing it will be evident that the last word of historical research in this matter still remains to be said. Important questions concerning the sources of the forgery, the place and time of its origin, the tendency of the forgery, yet await their solution. New researches will probably call for still greater attention to textual criticism, especially that of the first part or "Confession" of faith.

As far as the evidence at hand permits us to judge, the forged "Constitutum" was first made known in the
Frankish Empire. The oldest extant manuscript of it, certainly from the ninth century, was written in the
Frankish Empire. In the second half of that century the document is expressly mentioned by three
Frankish writers. Ado, Bishop of Vienne, speaks of it in his Chronicle (De secatibus mundi, ad an. 306, in P., CXIII, 92); Anes, Bishop of Paris, refers to it in defence of the Roman primacy (Adversus Grecos, c. ceix, op. cit., CXII, 785); Hinmar, Archbishop of Reims, mentions the donation of Rome to the pope by Constantine the Great according to the "Constitutum" (De ordin. et claus. CXV, 998). The document obtained wider circulation by its incorporation with the False Decretals (840-850, or more specifically between 847 and 852; Hinschius, Decretales Pseudo-Isidorianae, Leipsig, 1863, p. 249). At Rome no use was made of the document during the ninth and the tenth centuries, not even amid the conflicts and difficulties of Nicholas I with Constantinople, when it might have served as a welcome argument for the claims of the pope. The first pope who used it in an official act and relied upon it, was Leo IX; in a letter of 1054 to Michael Cerualarius, Patriarch of Constantinople, he cites the "Donatio" to show that the Holy See possessed both an earthly and a heavenly imperium, the royal priesthood. Thenceforth the "Donatio" acquires more importance and is more frequently used as evidence in ecclesiastical disputes, and obtains a definite place among the constitutions of the first part of the twelfth century quoted it as authoritative (Hugo of Fleury, De regia potestate et ecclesiastica dignitate, II; Placidus of
DONATISTS

Neostatula, De honore ecclesiae, oe. iii, xxi, el; Dis- putatio vel defensa Paschalia pape; Honourus Augustus- idemenes, De summis gloriae, c. xvii; cf. Mon. Germ. hist. Libelli de lite, i, and 2, Breslau, 1834, 88; St. Peter Damian also relied on it in his writings against the antipope Cadalus of Parma (Disceptatio quodalis, in Libelli de lite, i, 88). Gregory VII himself never quoted this document in his long warfare for ecclesiastical prestige. But Urban II made use of it in 1091 to support his claims on the island of Corsica. Later popes (Innocent III, Gregory IX, Innocent IV) took its authenticity for granted (Innocent III, Sermon de sancto Silvestro, in F., l.xxxvii, 481 sqq.; Rainaldus, Annales, ad an. 1259, 24; Potthast, Regesta, no. 11, 842), and ecclesiastical writers often added its evidence in favour of the papacy. The medieval adversaries of the popes, on the other hand, never denied the validity of this appeal to the pretended donation of Constantine, but endeavoured to show that the legal deductions drawn from it were founded on false interpretations. The authenticity of the document, as already stated, was doubted by no one before the fifteenth century. It was known to the Greeks in the second half of the twelfth century, when it appears in the collection of Theodorus of Ascalon, but not to the great Eastern Greek canonist, Matthaeus Blasaires (about 1336), admitted it into his collection. It appears also in other Greek works. Moreover, it was highly esteemed in the Greek East. The Greeks claimed, it is well known, for the Bishop of New Rome (Constantinople), the same honor dating back to the Bishop of Old Rome. But now, by virtue of this document, they claimed for the Byzantine clergy also the privileges and prerogatives granted to the pope and the Roman emperors. In the West, long after its authenticity was disputed no more, or was at least undermined, the document was still upheld by the majority of canonists and jurists who, throughout the sixteenth century, quoted it as authentic. And though Baronius and later historians acknowledged it to be a forgery, they endorsed, as it were, the power assumed by the Bishop of Rome. The text of the Donatio has often been printed. e.g. in LAMBER, Cons., t. 1, 1830; MANUT, Consil. col., ii, 606; finally by GRAFERT, Die Donativ- Deo des Papstes von Römische Grundlagen, 3d ed., Grase (Berlin, 1888), 29 sqq. See HALLER, Die Quellen zur Geschichts- der Christenheit (Leipzig and Berlin, 1807), 241- 252, 339; additional evidence is provided by St. John Chrysostom's letter to Theodore of Heraclea. His objections were not answered by the Bishop of Rome. As an example of the kind of documents underlying the Donatio, he quoted the following: 

**Causes of the Schism.**——In order to trace the origin of the division we have to go back to the persecution under Diocletian. The first edict of that emperor against Christians (24 Feb., 303) commanded their churches to be destroyed, their Sacred Books to be delivered up and burnt, while they themselves were outlawed. Severor measures followed in 304, when the fourth edict ordered all to offer incense to the idols under pain of death. After the abdication of Maxim- inian in 305, the persecution seems to have abated in Africa. Until then it was terrible. In Numidia the governor, Florus, was infamous for his cruelty, and, though many officials may have been, like the procon- sul Anulinus, unwilling to go further than they were obliged, yet St. Optatus is able to say of the Christians of the whole country that some were confessors, some were martyrs, some fell, only those who were hidden escaped. The exactions of the local pagan African character showed themselves. A hundred years earlier Tertullian had taught that flight from persecution was not permissible. Some now went beyond this, and voluntarily gave themselves up to martyrdom as Christians. Their motives were, however, not always above suspicion. Memmius, the Bishop of Carthage, in a letter to Secundus, Bishop of Tigisi, then the senior bishop (primate) of Numidia, declares that he had forbidden any to be honoured as martyrs who had given themselves up of their own accord, or who had boasted that they possessed copies of the Scriptures which they would not relinquish; some of these, he says, were criminals and debtors to the State, who thought they might by this means rid themselves of a burdensome life, or else wipe away the remembrance of their misdeeds, or at least gain money and enjoy in prison the luxuries supplied by the kindness of Christians. The later excesses of the Circum- cellionis show that Memmius had some ground for the severe line he took. He explains that he had himself taken the Sacred Books of the Church to his own house, and had entrusted the unadorned Germanic writings, which the persecutors had seized without asking for more; the proconsul, when informed of the deception, refused to search the bishop's private house. Secundus, in his reply, without blaming Mem- mius, somewhat plantly, says, 'I am a Christian and in my own province had been tortured and put to death for refusing to deliver up the Scriptures; he himself had replied to the officials who came to search: 'I am a Christian and a bishop, not a traditor.' This word traditor became a technical expression to designate those who had given up the Sacred Books, and also those who had committed the worse crimes of delivering up the sacred vessels and even their own brethren.

It is certain that relations were strained between the confessors in prison at Carthage and their bishop. If we may credit the Donatist Acts of the forty-nine martyrs of Abitene, they broke off communion with Memmius. We are informed in these Acts that Mem- mius was a traditor by his own confession, and that his deacon, Cecilian, raged more furiously against the martyrs than did the Bishop. The armed soldiers went armed men with whips before the door of the prison to prevent their receiving any succour; the food brought by the piety of Christians was thrown to the dogs by these ruffians, and the drink provided was spiked in the street, so that the miserable prisoners, who were all too often not even allowed the mild proconsul had deferred, died in prison of hunger and thirst. This story is recognized by Du-
chame and others as exaggerated. It would be better to say that the main point is incredible; the prisoners would not have been allowed by the Roman officials to state; that Memmius—his predecessor in the tribune, that he prevented the sowing of the imprisoned confessors—are simply founded on the letter of Memmius to Secundus. Thus we may safely reject all the latter part of the Acts as fictitious. The earlier part is authentic: it relates how certain of the faithful of Abitene met and celebrated their usual Sunday service, in defiance of the emperor's edict, under the leadership of the priest Saturninus, for their bishop was a traitor and they disowned him; they were sent to Carthage, made bold replies when interrogated, and were imprisoned by Annius, who might have condemned them to death forthwith. The whole account is characteristic of the fervid African temperament. We can well imagine how the prudent Memmius and his lieutenant, the deacon Cecilian, were disliked by some of the more excitable among their flock.

We know in detail how the inquests for sacred books were carried out, for the official minutes of an investigation at Cirta (afterwards Constantine) in Numidia are preserved. The bishop and his clergy showed themselves ready to give up all they had, but did not betray their brethren; even their generosity was not remarkable, for they added that the names and addresses were well known to the officials. The examination was conducted by Minatius Felix, perpetual flamen, curator of the colony of Cirta, and Annius, his satellites at the bishop's house—In Numidia the searching was more savage than in Proconsular Africa—the bishop was found with four priests, three deacons, four subdeacons and several iussores (diggers). These declared that the Scriptures were not there, but in the hands of the lector; and in fact the bookcase was found to be empty. The clergy present refused to give the names of the lectors, saying they were known to the notaries; but, with the exception of the books, they gave an inventory of all possessions of the church: two golden chalices, six of silver, six silver cruets, a silver bowl, seven silver lamps, two candlesticks, seven short bronze lamp-stands with lamps, eleven bronze lamps with chains, eighty-two women's tunics, twenty-eight veils, sixteen men's tunics, thirteen pairs of men's boots, forty-seven pairs of women's boots, nineteen caskets, silver (not bronze). Presently Minatius Felix brought forth a silver box and another silver lamp, which he had found behind a jug. In the dining-room were four casks and seven jugs. A subdeacon produced a thick book. Then the houses of the lector and deacon were searched: Eussiaeus brought up four volumes, and Felix, the mosaic-worker, gave up five, Victorinus eight, Projectus five large volumes and two small ones, the grammarian Victor two codices and five quinions, or gatherings of five leaves; Euticius of Cassares declared that he had no books; the wife of Coddeo produced six vases, and said she had no more, and a search was without further result. It is interesting to notice that the books were all codices (in book form), not rolls, which had gone out of fashion in the course of the preceding century.

It is to be hoped that such disgraceful scenes were infrequent. A contrasting instance of heroism is found in the story of Felix, Bishop of Tibiaca, who was haled before the magistrate on the very day, 5 June, 303, when the decree was posted in that city. He refused to give up any books, and was sent to Carthage. There Diocletian, then still Anarchus, determined to weaken his determination, sent him on to Rome to Maximian Hercules.

In 305 the persecution had relaxed, and it was possible to unite fourteen or more bishops at Cirta in order to confess his faith. Eussiaeus in particular was desired as primate, and in his zeal he attempted to examine the conduct of his colleagues. They met in a private house, for the church had not yet been restored to the Christians. "We must first try ourselves," said the primates, "before we can venture to ordain a bishop." Eussiaeus then read to Donatus, "You men consecrated to the faith have also been traitors." "You know," replied the bishop, "how Florus searched for me that I might offer incense, but God did not deliver me into his hands, brother. As God forgave me, do you reserve me to your judgment? But what then, said Secundus, do we say of the martyrs? It is because they did not give up anything that they were crowned." "Send me to God," said Donatus, "to Him will I give an account." (In fact, a bishop was not amenable to penance and was properly reserved to God" in this sense). "Send me to the martyrdom," said Secundus, and Marcellinus, and left to Marcinus of Aquitania. He said: "You also are said to be a traitor." Marcinus said: "I gave papers to Polux; my books are safe." This was not satisfactory, and Secundus said: "Go over to that side"; then to Donatus of Caesarea: "You are said to be a traitor." "I gave up books on medicine." Secundus seems to have been ineruditious, or at least he thought a trial was needed, for again he said: "Stand on one side." After a gap in the Acts, we read that Secundus turned to Victor, Bishop of Rusticae: "Bishop, do you also betray your brethren? even though their generosity was not remarkable, for they added that the names and addresses were well known to the officials. The examination was conducted by Minatius Felix, perpetual flamen, curator of the colony of Cirta, and Annius, his satellites at the bishop's house—In Numidia the searching was more savage than in Proconsular Africa—the bishop was found with four priests, three deacons, four subdeacons and several iussores (diggers). These declared that the Scriptures were not there, but in the hands of the lector; and in fact the bookcase was found to be empty. The clergy present refused to give the names of the lectors, saying they were known to the notaries; but, with the exception of the books, they gave an inventory of all possessions of the church: two golden chalices, six of silver, six silver cruets, a silver bowl, seven silver lamps, two candlesticks, seven short bronze lamp-stands with lamps, eleven bronze lamps with chains, eighty-two women's tunics, twenty-eight veils, sixteen men's tunics, thirteen pairs of men's boots, forty-seven pairs of women's boots, nineteen caskets, silver (not bronze). Presently Minatius Felix brought forth a silver box and another silver lamp, which he had found behind a jug. In the dining-room were four casks and seven jugs. A subdeacon produced a thick book. Then the houses of the lector and deacon were searched: Eussiaeus brought up four volumes, and Felix, the mosaic-worker, gave up five, Victorinus eight, Projectus five large volumes and two small ones, the grammarian Victor two codices and five quinions, or gatherings of five leaves; Euticius of Cassares declared that he had no books; the wife of Coddeo produced six vases, and said she had no more, and a search was without further result. It is interesting to notice that the books were all codices (in book form), not rolls, which had gone out of fashion in the course of the preceding century.

It is to be hoped that such disgraceful scenes were infrequent. In 305 the persecution had relaxed, and it was possible to unite fourteen or more bishops at Cirta in order to confess his faith. Eussiaeus in particular was desired as primate, and in his zeal he attempted to examine the conduct of his colleagues. They met in a private
Case Nigre is said to have caused a schism in Carthage during the lifetime of Mersurius. In 311 Maxentius, a Roman senator, and an enemy of Carthage, Felix, was accused of writing a defamatory letter against the tyrant. Mersurius is said to have concealed his deacon in his house and was summoned to Rome. He was acquitted, but died on his return journey. Before his departure from Africa, he had given the gold and silver ornaments of the church to the care of certain old men, and had also consigned an inventory of these effects to an aged woman, who was to deliver it to the next bishop. Maxentius gave liberty to the Christians, so that it was possible for an election to be held for the bishop of Carthage, like the pope, was commonly consecrated by a neighbouring bishop, assisted by a certain number of others from the vicinity. He was primate not only of the proconsular province, but of the other provinces of North Africa, including Numidia, Byzacena, Tripolitana, and the two Mauretaniae, which were all governed by the vicar of prefects. In each of these provinces the local primacy was attached to no town, but was held by the senior bishop, until St. Gregory the Great made the office elective. St. Optatus implies that the bishops of Numidia, many of whom were at that time resident in Africa, would have a voice in the election; but two priests, Botrus and Celestial, who each expected to be elected, had managed that only a small number of bishops should be present. Celestian, the deacon who had been so obnoxious to the martyrs, was duly chosen by the whole people, placed in the chair of Mersurius, and consecrated by Felix, Bishop of Aptonga or Abitugh. The old men who had charge of the treasure of the church were obliged to give it up; they joined with Botrus and Celestian in refusing to acknowledge the new bishop. They were assisted by a rich lady named Lulcius, who had a grudge against Celestian because he had rebuked her habit of kissing the bone of an uncanonized martyr immediately before receiving Holy Communion. Probably we have here again a martyr whose death was due to his own ill-regulated fervour.

Secundus, as the nearest primate, came with his episcopi to Carthage to judge the affair, and in a great council of seventy bishops declared the ordinaries of Carthage as well as those of Libya and Cyrene were in agreement in deposing the bishop. A new bishop was consecrated, Majorinus, who belonged to the household of Lucilla and had been a lector in the deaconery of Celestian. That lady provided the sum of four folles (more than 11,000 dollars), nominally for the poor; but all of it went to the bishop. The charges of the bishop were considered as a debt in the sum being seized by Purpurius of Limate. Celsian had possession of the basilica and the cathedra of Opyren, and the people were with him, so that he refused to appear before the council. "If I am not properly consecrated," he said ironically, "let them treat me as a deacon, and lay hands on me afresh, and not on another." On this reply being brought, Purpurius cried: "Let him come here, and instead of laying hands on him, we will break his head in penance." No wonder that the action of this council, which sent letters throughout Africa, had a great influence. But at Carthage it was well known that Celsian was the choice of the people, and it was not believed that Felix of Aptonga had given up the Sacred Books. Rome and Italy had given Celsian their communion. The Church of the martyr made the Church of Carthage call themselves the Church of the martyrs, and declared that all who were in communion with public sinners like Celsian and Felix were necessarily excommunicated.

The Condemnation by Pope Melchiades.—Very soon there were many cities having two bishops, the one in communion with Celsian, the other with Majorinus. Constantine, after defeating Maxentius (28 October, 312) and becoming master of Rome, showed himself a Christian in his acts. He wrote to Anulinus, proconsul of Africa (was he the same as the mild proconsul of 3037), restoring the churches to Catholics, and exempting clerics of "the Catholic Church of which Celsian is president" from civil functions (Eusebius, Hist. Eccl., X, v, 15, and vi, 2). He also addressed a letter to Celestianus (Civi, 1) to this effect: in order for 3000 folles to be distributed in Africa, Numidia, and Mauretania; if more was needed, the bishop must apply for more. He added that he had heard of turbulent persons who sought to corrupt the Church; he had ordered the proconsul Anulinus and the vicar of prefects to restrain them, and Celsian was to appeal to these officials if necessary. The opposing party lost no time. A few days after the publication of these letters, their delegates, accompanied by a mob, brought to Anulinus two bundles of documents, containing the complaints of their party against Celsian, to be forwarded to Rome. Optatus preserved a few words from their petition, in which Constantine is begged to grant judges from Gaul, where under his father's rule there had been no persecution, and therefore no tradiotors. Constantine knew the Church's constitution too well to comply and thereby make Gallic bishops judges of the primate of Africa. He at once referred the matter to the pope, expressing his intention, laudable, if too sanguine, of allowing no schisms in the Catholic Church. That the African schismatics might have no ground of complaint, he ordered three of the chief bishops of Gaul, Reticius of Autun, Maternus of Cologne, and Marinus of Arles, to repair to Rome, to assist at the trial. He ordered Celsian to come thither with ten bishops of his accusers and ten of his own communion. The memorials against Celsian he sent to the pope, who would know, he says, what procedure to employ in order to conclude the whole matter in accordance with justice (Eusebius, Hist. Eccl., X, v, 18). Pope Melchiades summoned fifteen Italian bishops to sit with him... From this time forward we find that in all important matters the popes issue their decretal letters from a small council of bishops, and there are traces of the custom even before this. The ten Donatist bishops (for we may now give the party its eventual name) were headed by a Bishop Donatus of Case Nigre. It is known that Eusebius and the Catholic apologists that this was "Donatus the Great," the successor of Majorinus as schismatic Bishop of Carthage. But the Donatists of St. Augustin's time were anxious to deny this, as they did not wish to admit that their protagonist, had been condemned, and the Catholics at the conference of 411 granted them the existence of a Donatus, Bishop of Case Nigre, who had distinguished himself by active hostility to Celsian. Modern authorities agree in accepting this view. But it seems inconceivable that, if Majorinus was still alive, he should not have been obliged to go to Rome. It would be very strange, further, that a Donatus of Case Nigre should appear as the leader of the party, without any explanation, unless Case Nigre was simply the birthplace of Donatus the Great. If we suppose that the latter was the descendant and had been succeeded by Donatus the Great just before the trial at Rome, we shall understand why Majorinus is never again mentioned.

The accusations against Celsian in the memorial were disregarded, as being anonymous and malicious. The witnesses brought from Africa acknowledged that they had nothing against him. Donatus, on the other hand, was convicted by his own confession of having
rebaptized and of having laid his hands in penance on rebaptized persons—this was forbidden by ecclesiastical law. On the third day the unanimous sentence was pronounced by Melchiades: Cecilian was to be maintained in ecclesiastical communion. If Donatist bishops returned to the Church, in a place where there were two rival bishops, a new bishop must be provided to be sent to them. The Donatists were furious. A hundred years later their successors declared that Pope Melchiades was himself a traitor, and that on this account they had not accepted his decision; though there is no trace of this having been alleged at the time. But the theme of the Donatist bishops was that the crime of simpatico communion would be contradicted with the seventy bishops of the Carthaginian Council, and a fresh judgment was demanded.

The Council of Arles.—Constantine was angry, but he saw that the party was powerful in Africa, and he summoned a council of the whole West (that is, of the whole of his actual dominions) to meet at Arles on 1 August, 314. Melchiades was dead, and his successor, St. Sylvester, thought it unbecoming to leave Rome, thus setting an example which he repeated in the case of Nicaea, and which his successors followed in the cases of Nicea, Rimini, and many other synodal councils. Between forty and fifty see were represented at the council by bishops or proxies; the Bishops of London, York, and Lincoln were there. St. Sylvester sent legates. The council condemned the Donatists for having raised up a number of canons: it annulled its proceedings in a letter to the pope, which is extant; but, as in the case of Nicaea, no detailed Acts remain, nor are any such mentioned by the ancients. The Fathers in their letter salute Sylvester, saying that he had rightly decided not to quit the spot "where the Apostles daily sit in judgment"; but when he was with them, they might perhaps have dealt more severely with the heretics. Among the canons, one forbids rebaptism (which was still practised in Africa), another declares that those who falsely accuse their brethren shall have communion only at the hour of death. On the other hand, traitors are to be refused communion, but only when their fault has been proved by public official acts; those whom they have ordained are to retain their positions. The council produced some effect in Africa, but the main body of the Donatists was insubmissive. They appealed from the council to the emperor. Constantine was horrified: "O insolent madness!" he wrote, "they appeal from heaven to earth, from Jesus Christ to a man."

The Policy of Constantine.—The emperor retained his general Colleges, which he had formed before at first dismissing them. He seems to have thought of sending for Cecilian, then preparing for a general union in Africa. The case of Felix of Aptona was in fact examined by his order at Carthage in February, 315 (St. Augustine says he was giving 316). The minutes of the proceedings have come down to us in a mutilated state; they are referred to by St. Optatus, who appended them to his book with other documents, and they are frequently cited by St. Augustine. It was shown that the letter which the Donatists put forward was written in the time of Felix, and was papyrus by a certain Ignatius; this was established by the confession of Ingentius, as well as by the witness of Allius, the writer of the letter. It was proved that Felix was actually absent at the time the search for Sacred Books was made at Aptona. Constantine eventually summoned Cecilian and his opponents to Rome; but Cecilian, for some unknown reason, did not appear. Cecilian and Donatus the Great (who was now, at all events, bishop) were called to Milan, where Constantine heard both sides with great care. He declared that Cecilian was innocent and an excellent bishop (Augustine, Contra Cresconium, III., lxxi). He retained both in Italy, however, while he sent two bishops, Eunomius and Olympius, to Africa, with an idea of putting Donatus and Cecilian aside, and substituting a new bishop, to be agreed upon by all parties. It is to be presumed that Cecilian and Donatus had assented to this course; but the violence of the sectaries made it impossible to carry it out. Eunomius and Olympius declared at Carthage that the Catholic Church was that which was first established. The donatist bishops proclaimed against the Donatists could not be anathetized. They were conciliated with the clergy of Cecilian and returned to Italy. Donatus went back to Carthage, and Cecilian, seeing this, felt himself free to do the same. Finally Constantine ordered that the churches which the Donatists held in Rome should be restored to the Catholics. Their other meeting-places were confiscated. Those who were convicted (of calumny?) lost their goods. Evictions were carried out by the military. An ancient sermon on the passion of the Donatist martyrs, Donatus and Advocatus, describes such scenes. In one of them a regular massacre occurred, and a bishop was among the slain, if we may trust this curious document. The Donatists were proud of this persecution of Cecilian, which "the Pure" suffered at the hands of the "Church of the Traditors." The Comes Constanci and the Emperor Aureus were the special objects of their indignation.

In 320 came revelations unpleasant to the "Pure." Nundinarius, a deacon of Cirta, had a quarrel with his bishop, Silvanus, who caused him to be stoned—so he advanced. The "Cristi" in Africa possessed a number of bishops, of which he threatened that if they did not use their influence in his behalf with Silvanus, he would tell what he knew of them. As he got no satisfaction he brought the matter before Zephynophilus, the Consul of Numidia. The minutes have come down to us in a fragmentary form in the appendix of Optatus, under the title of "Gesta apud Zephynophilum." Nundinarius produced letters from Purpurius and other bishops to Silvanus and to the people of Cirta, trying to have peace made with the inconvenient deacon. The minutes of the see of Cirta, which we have already cited, were read, and witnesses were called to establish their accuracy, including two of the Josores then present and a lector, Victor, the grammarian. It was shown not only that Silvanus was a traitor, but that he had assaulted Purpurius, together with two priests and a deacon, in the theft of certain caskets of vessels belonging to the treasury, which were in the temple of Serapius. Silvanus had ordained a priest for the sum of 20 zolles (500 to 600 dollars). It was established that none of the money given by Lucilla had reached the poor, of whom it was esteemed Silvanus, one of the mainstays of the "Pure" Church, which declared that to communicate with any traitor was to be outside the Church, was himself proved to be a traitor. He was exiled by the consular for robbing the treasury, for obtaining money by false pretences, and for getting himself made bishop by violence. The Donatists later preferred to say that he was banished for refusing to communicate with the "Cecilianists," and Cresconius even spoke of "the persecution of Zephynophilus." But it should have been clear to all that the conspirators of Majorinus had called their opponents traitors in order to cover their own delinquencies.

The Donatist party owed its success in great part to the ability of its leader Donatus, the successor of Majorinus. He appears to have really merited the title of "the Great" by his eloquence and force of character. His writings are lost. His influence with his party was extraordinary. St. Augustine frequently declares against his arrogance and the impurity with which he was almost worshipped by his followers. In his lifetime he is said to have greatly enjoyed the adulation he received, and after death he was counted as a martyr and miracles were ascribed to him.

In 321 Constantine relaxed his vigorous measures, having found that they did not produce the peace he
DONATISTS

had hoped for, and he weakly begged the Catholic to suffer the Donatists with patience. This was not easy, for the schismatics broke out into violence. At Carthage, St. Augustine was stoning a man. They, incited by the base desires which the emperor had built for the Catholics. They would not give it up, and Constantine found no better expedient than to build another. Throughout Africa, but above all in Numidia, they were numerous. They taunted that in all the rest of the world the Catholic Church had perished, through having communized with the traitor Cæcilian; their secret alone was the true Church. If a Catholic came into their churches, they drove him out, and washed with salt the pavement where he had stood. Any Catholic who joined them was forced to be rechristened. They asserted that their own bishops and ministers were without fault, else their ministrations would be invalid. But in fact they were convulsed with drunkenness and other sins. St. Augustine tells us on the authority of Tertullian that the Donatists held a council of two hundred and seventy bishops in which they discussed for seventy-five days the question of rebaptism; they finally decided that in cases where traditors refused to be rebaptized they should be communicated with in spite of this; and the Donatist bishops of Numætaria dealt with the same matter as they met at Mantle. Outside Africa the Donatists had a bishop residing on the property of an adherent in Spain, and at an early period of the schism they made a bishop for their small congregation in Rome, which met, it seems, on a hill outside the city called Monti Terni. This antipapal "succession without a beginning" was frequently ridiculed by Catholic writers. The series included Felix, Boniface, Encolpius, Macrobius (c. 330), Lucian, Claudian (c. 378), and again Felix in 418.

THE CIRCUMCELLIONS.—The date of the first appearance of the Circumcellions is uncertain, but probably they began before the death of Constantine. They were mostly rustic enthusiasts, who knew no Latin, but spoke Latin; it has been suggested that they may have been of Berber blood. They joined the ranks of the Donatists, and were called by them aportatici and "soldiers of Christ," but in fact were brigands. Troops of them were to be met in all parts of Africa. They had no regular occupation, but ran about armed, like madmen. They used no swords, on the ground that they were not armed, but were armed off from the Cross; yet they were armed off from death; but they did continual acts of violence with thins, which they called "Israelsites." They bruised their victims without killing them, and left them to die. St. Augustine's time, however, they took to the sword. This must have been in this an attempt to be accompanied by unmarried women, played, and drank. Their battle-cry was Deso laudes, and no bandits were more terrible to meet. They frequently fought death, counting suicides as martyrdom. They were especially fond of slingling themselves from precipes; more rarely they hurled into the water or fire. Even women caught the infection, and those who had sinned would cast themselves from the cliffs, to atone for their fault. Sometimes the Circumcellions sought death at the hands of others, either by paying men to kill them, by threatening to kill a passer-by if he would not kill them, or by their violence inducing magistrates to have them executed. While paganism still flourished, they would come in vast crowds to any great sacrifice, not to destroy the idols, but to be martyred. Theodosius says a Circumcellion was accustomed to anoint his intention of becoming a martyr long before the time, in order to be well treated and fed like a beast for slaughter. He relates an amusing story (Hist. Fili, IV, vi) to which St. Augustine also refers. A number of these fanatics, fattened like pheasants, met in the shape of a man, and he stood on a rock to strike them with threatening to murder him if he refused. He pretended to fear that when he had killed a few, the rest might change their minds and avenge the death of their fellows; and he insisted that they must all be bound. They agreed to this; when they were defenseless, the young man gave each of them a beating and went his way.

When in controversy with Catholics, the Donatist bishops were not proud of their supporters. They declared that self-preservation from a cliff had been forbidden them in their councils. Yet the bodies of those who decided were sacriliegiously honoured, and crowds celebrated their anniversaries. Their bishops could not but conform, and they were often glad enough of the strong arms of the Circumcellions. Theodoret, soon after St. Augustine's death, knew of no other Donatists than the Circumcellions; and these were the typical Donatists in the eyes of all outside Africa. They were especially dangerous to the Catholic clergy, whose houses they attacked and pillaged. They beat and wounded them, put lime and vinegar on their eyes, and even forced them to be rechristened. Under Axi- dus and Fasir, "the leaders of the Saints" in Numidia, property and roads were unsafe, debtors were protected, slaves were set in their masters' carriages, and the masters made to run before them. At length the Donatist bishops invited a general named Taurinus to suppress these extravagances. He met these men in a place named Octava, and the altars and tablets to be seen there in St. Optatus' time testified to the veneration given to the Circumcellions who were slain; but their bishops denied them the honour due to martyrs. It seems that in 336-7 the late author of the History of Italy, Gregory, took some measures against the Donatists, for St. Optatus tells us that Donatistus sent him a letter beginning: "Gregory, stain on the Senate and disgrace to prefers."
seems that after violence had begun, the envoys ordered the Donatists to unite with the Church whether they willed or no. Many of the bishops took to flight with their partisans; a few joined the Catholics; the rest, according to their strength, held their ground. In Africa not one bishop was left. A Donatist named Vitellius composed a book to show that the servants of God are hated by the world.

A solemn Mass was celebrated in each place where the union was completed, and the Donatists sat about a rumour that images (obviously of the emperor) were to be placed on the altar and were not to be removed. As a result of this rumour, the Donatists were not allowed to perform Mass, and as the envoys merely made a speech in favour of unity, it seems that the reunion was effected with less violence than might have been expected. The Catholics and their bishops praised God for the peace that was restored, though they declared that they had no responsibility for the action of Paulus and Macarius. In the following year Gratian, the Catholic Bishop of Carthage, held a council, in which the reiteration of baptism was forbidden, while, to please the rivalled Donatists, traditors were condemned anew. It was forbidden to honour suicides as martyrs.

The Restoration of Donatism by Julian.—The peace was happy for Africa, and the forcible means by which it was obtained were justified by the violence of the ERATISM. But the accession of Julian the Apostate in 361 changed the face of affairs. Delighted to throw Christianity into confusion, Julian allowed the Catholic bishops who had been exiled by Constantius to return to the sees which the Arians were occupying. The Donatists, who had been banished by Constans, were similarly allowed to return at their own petition, and received back their basilicas. Scenes of violence were the result of this policy both in the East and the West.

"Your fury," wrote St. Optatus, "returned to Africa at the same moment that the devil was set free. The same emperor ordered sacerdotes, paganism and the Donatists to Africa. The decree of Julian was considered so discreditable to them, that the Emperor Honorius in 405 had it posted up throughout Africa for their shame. St. Optatus gives a vehement catalogue of the excesses committed by the Donatists on their return. They invaded the basilicas with arms; they committed so many murders that a report of them was sent to the emperor. Under the orders of two bishops, a party attacked the basilica of Lemellet; they stripped off the roof, peetit with tiles; they murdered seven, and wounded ten of them. In Mauretanias riots signalised the return of the Donatists. In Numidia two bishops availed themselves of the complaisance of the magistrates to throw a peaceful population into confusion, expelling the faithful, wounding the men, and not sparing the women and children. Since they did not admit the validity of the sacraments administered by traditors, when they seized the churches they cast the Holy Eucharist to the dogs; but the dogs, inflamed with madness, attacked their own masters. An amnibus of chiasm thrown out of a window was found unbroken on the rocks. Two bishops were guilty of rape; one of these seised the aged Catholic bishop, and condemned him to public penance. All Catholics whom they could force to join their party were made penitents, even clergies of every rank, and children, contrary to the law of the Church, some for a year, some for a month, some but for a day. In taking possession of a basilica, they destroyed the altar, or removed it, or at least scraped the surface. They sometimes broke up the chalices, and sold the materials. They washed pavements, walls, and cloisters. Not content with the churches, they employed pagan functionaries to obtain for them possession of the sacred vessels, furniture, altar-linen, and especially the books (how did they purify the books? asks St. Optatus), sometimes leaving the Catholic congregation with no books at all. The cemeteries were closed to the Catholic dead.

The revolt of Firmus, a Mauretanian chieftain who defied the Roman power and eventually assumed the style of emperor (386–72), was undoubtedly supported by many Donatists. The imperial laws against them were strengthened by Valentinian in 373 and by Gratian, who wrote in 377 to the bishop of Carthage (himself a Donatist), ordering all the basilicas of the schismatics to be given up to the Catholics. St. Augustine shows that even the churches which the Donatists themselves had built were included. The same emperor required Firmus, the Donatist bishop at Rome, to return to Africa; as he refused to obey, a Roman council had him driven a hundred miles from the city. It is probable that the Catholic Bishop of Carthage, Genatellus, caused the laws to be mildly administered in Africa.

St. Optatus.—The Catholic champion, St. Optatus, Bishop of Milevis, published his great work "De schiisate Donatistariam" in answer to that of the Donatist Bishop of Carthage, Parmenianus, under Valentinian and Valens, 364–75 (so St. Jerome). Optatus himself tells us that he was writing after the death of Julian (363) and more than sixty years after the beginning of the schism (he means the persecution of 303). The form which we possess is a second edition, brought up to date by the author after the accession of theodosius. The book consists of six books added to the original six. In the first book he describes the origin and growth of the schism; in the second he shows the notes of the true Church; in the third he defends the Catholics from the charge of persecuting, with especial references to the days of Macarius. In the fourth book he refutes Parmenianus's proofs from Scripture that the sacrifice of a sinner is polluted. In the fifth book he shows the validity of baptism even when conferred by sinners, for it is conferred by Christ, the minister being the instrument only. In the sixth book he describes the violation of the Donatists and the sacrosanct way in which they had treated Catholic altars. In the seventh book he treats chiefly of unity and of reunion, and returns to the subject of Macarius.

He calls Parmenianus "brother", and wishes to treat the Donatists as brethren, since they were not heretics. Like some other Fathers, he holds that only those who have accepted the faith, he, and killed them. In Mauretanias riots signalised the return of the Donatists. In Numidia two bishops availed themselves of the complaisance of the magistrates to throw a peaceful population into confusion, expelling the faithful, wounding the men, and not sparing the women and children. Since they did not admit the validity of the sacraments administered by traditors, when they seized the churches they cast the Holy Eucharist to the dogs; but the dogs, inflamed with madness, attacked their own masters. An amnibus of chiasm thrown out of a window was found unbroken on the rocks. Two bishops were guilty of rape; one of these seised the aged Catholic bishop, and condemned him to public penance. All Catholics whom they could force to join their party were made penitents, even clergies of every rank, and children, contrary to the law of the Church, some for a year, some for a month, some but for a day. In taking possession of a basilica, they destroyed the altar, or removed it, or at least scraped the surface. They sometimes broke up the chalices, and sold the materials. They washed pavements, walls, and cloisters. Not content with the churches, they employed pagan functionaries to obtain for them possession of the sacred vessels, furniture, altar-linen, and especially the books (how did they purify the books? asks St. Optatus), sometimes leaving the Catholic congregation with no books at all. The cemeteries were closed to the Catholic dead.

The Maximinists.—Before Augustine took up the mantle of Optatus together with a double portion of his spirit, the Catholics had gained new and victorious arguments from the divisions among the Donatists.
DONATISTS

127

DONATISTS

themselves. Like so many other schisms, this schism brought within itself. In Maximian's time, the schism of Max-

imian was scorned, not without reason, since the number of the Donatists themselves could not name them all. We

cher of Urbanists; of Claudianists, who were recon-

ceived to the main body by Primusian of Carthage; of

Rogatians, a Mauretanian sect, of mild character, be-

cause so Circumcellions belonged to it; the Rogatians

were severely punished whenever the Donatists could

induce the magistrates to do so, and were also perse-

cuted by Optatus of Timгад. But the most famous

sects were the Maximianists, for the story of their

separation from the Donatists reproduces with strange

strangenesses the cruelty and cruelties which were

practised against them from the communion of the

Church; and the conduct of the Donatists towards them

was so inconsistent with their avowed principles, that it

became in the skilled hands of Augustine the most effec-

tive weapon of all his controversial armoury.

Primusian, Donatist Bishop of Carthage, excom-

municated the deacon Maximianus. The latter (who

was, like Majorinus, supported by a lady) got together

a council of forty-three bishops, who summoned Pri-

musian to appear before them. The primate refused,

imposing on them the sentences pronounced

from celebrating the Sacred Mysteries, and had stones

thrown at them in the street. The council summoned

him before a greater council, which met to the number

of a hundred bishops at Cæcarnussum in June, 393.

Primusian had been expelled and excom- munication was

within eight days; if they should delay

the Christmas, they would not be permitted to

return to the Church even after penance; the laity

were allowed until the following Easter, under the

same penalty. A new bishop of Carthage was ap-

pointed in the person of Marcellus; himself and Donutius

were consecrated by twelve bishops. The partisans

of Primusian were rebaptised, if they had been baptised

after the permitted delay. Primusian stood out, and

demanded to be judged by a Numidian council; three

hundred and ten bishops met at Bagad in April, 394;

the primate did not take the place of an accused per-

son, but himself presided. He was of course ac-

quitted, and the Maximianists were condemned with-

out a hearing. All but the twelve consecrators and

their adherents among the clergy of Carthage were

given the benediction to the Church, and they

would be obliged to do penance. This decree, com-

posed in eloquent style by Emeritus of Cesararea, and

accepted by acclamation, made the Donatists helpless

and ridiculous through their having readmitted

schismatics into the Church. Donutius was raised to

the ground, and after the term of grace had elapsed, the

Donatists persecuted the unfortunate

Maximianists, representing themselves as Catholics,

and demanding that the magistrates should enforce

against the new sectaries the very laws which Catho-

lic emperors had drawn up against Donatism. Their

influence enabled them to do this, for they were still

far more numerous than the Catholics, and the magis-

trates must often have been of their party. In

the reception of those who returned from the party of

Maximian they were yet more fatally inconsistent.

The rule was theoretically adhered to that all who had

been baptised in the schism must be rebaptised; but if

a bishop returned, he and his whole flock were

admitted without rebaptism. This was allowed even

in the case of two of the consecrators of Maximian, Pre-

testus and Felicianus of Musti, after the

process had vainly tried to expel them from their

sees, and although a Donatist bishop, Rogatus, had

already been appointed at Assur. In another case the

liberty of Primusian was more consistent. Salvisius, the

Maximianist Bishop of Mentasta, was another of the

consecrators. He was twice summoned by the pro-

cess to retire in favour of the Primusian Restitutus.

as he was much respected by the people of Memebra, a

mob was brought over from the neighbouring town of

Abitene to expel him; the aged bishop was beaten,

and made to dance on the docked neck. But his people

built him a new church, and three bishops coexisted in

this small town, a Maximianist, a Primusian, and a

Catholic.

The leader of the Donatists at this time was Op-

tatus, Bishop of Thamugedi (Timгад), called Gildianus,

from his friendship with Gildo, the Count of

Africa (386-397). For ten years Optatus, supported

by Gildo, was the tyrant of Africa. He persecuted the

Rogatians and Maximianists, and he used troops

against the Catholics. St. Augustine tells us that his

cruelties and cruelties were so impossible, that it had

at least the effect of disgracing the cause of the

Donatists, for though he was hated throughout Africa

for his wickedness and his evil deeds, yet the Puritan

faction remained always in full communion with this

bishop, who was a robber, a raider, an oppressor, a

traitor, and a monster of cruelty. When Gildo fell in

397, after having made himself master of Africa for

a few months, Optatus was thrown into a prison, in

which he died.

SAINT AUGUSTINE.—St. Augustine began his vic-

torious campaign against Donatism soon after he was

ordained priest in 391. His popular psalm or "Abo-

cedarium" against the Donatists was intended to

make known to the people the arguments set forth by

St. Optatus, with the same conciliatory end in view.

It shows that the seditious sect was founded by sedi-

dens by pope and council, separated from the

whole world, a cause of division, violence, and bloody-

shed; the true Church is the one Vine, whose branches

are over all the earth. After St. Augustine had be-

come bishop in 395, he obtained conferences with

some of the Donatists, and through not with his

arrival at Hippo. In 400 he wrote three books against

the letter of Parmenianus, refuting his calumnies and

his arguments from Scripture. More important were

his seven books on baptism, in which, after developing

the principle already laid down by St. Optatus, that

the effect of the sacrament is independent of the holii-

ness of the minister, he shows in great detail that the

authority of St. Cyprian is more awkward than con-

venient for the Donatists. The principal Donatist

controversialist of the day was Petilianus, Bishop of

Constantine, a successor of the traditional Heretics.

St. Augustine wrote two books in reply to a letter of his

against the Church, adding a third book to answer an-

other letter in which he was himself attacked by Pe-

tilianus. Before this last book he published his "De

Lit. et Epist.," in which he showed his belief in the

unwritten traditions. From St. Augustine's Epistles

(Ep. II), and in his psalm crystallises the argument

into the famous phrase: "That is the rock against

which the proud gates of hell do not prevail." A fur-

ther appeal is to the Eastern Church, and especially to

the Apostolic Church in which St. Peter, St. Paul,

and St. John addressed epistles—they are not in com-

munion with the Donatists. The validity of baptism

confessed by heretics, the impurity of rebaptising, are
important points. All these arguments were found in St. Optatus. Peculiar to St. Augustine is the necessity of defending St. Cyprian, and the third category is wholly his own. This third division comprises the argument ad hominem drawn from the inconsistency of the Donatists themselves: Secundus had pardoned the traitors, full fellowship with traitors like Optatus Gildonius and the Circumcellions; Tichonius turned against his own party; Maximian had divided from Primus just as Majorinus from Cecilian; the Maximianists had been readmitted without refunding.

This last method of argument was found to be of great practical value, and many conversions were now taking place, largely on account of the false position in which the Donatists had placed themselves. This point had been especially emphasised by the Council of Carthage of Sept., 401, which had ordered information as to the treatment of the Maximianists to be gathered from magistrates. The same synod restored the earlier rule, long since abolished, that Donatist bishops and clergy should retain their rank if they recanted. In the Church of Rome, Pope Sixtus I wrote to the Synod urging the importance of the Donatist question. Another council in 403 organised public disputation with the Donatists. This energetic action roused the Circumcellions to new violence. The life of St. Augustine was endangered. His future biographer, St. Possidius of Calaisium, was insulted and ill-treated by a party led by a Donatist priest, Crispinus. The latter's bishop, also named Crispinus, was tried at Carthage and fined ten pounds of gold as a heretic, the fine was remitted by Possidius. This is the first case known to us in which a Donatist is declared a heretic, but henceforward it is the common style for them. The cruel and disgusting treatment of Maximianus, Bishop of Bagai, is also related by St. Augustine in detail. The Emperor Honorius was induced to help the Catholics to renew the old laws against the Donatists at the beginning of 406. Some good resulted, but the Circumcellions of Hippo were excited to new violence. The letter of Petilianus was defended by a grammarian named Csesocionius, against whom St. Augustine published a reply in four books. The third and fourth books are especially important, as in these he argues from the Donatists' treatment of the Maximianists, quotes the Acts of the Council of Cirta held by Secundus, and cites other important documents. The saint also replied to a pamphlet by Petilianus, also under Bishop Bagai.

The "Collatio" of 411.—St. Augustine had once hoped to conciliate the Donatists by reason only. The violence of the Circumcellions, the cruelties of Optatus of Thamugadi, the more recent attacks on Catholic bishops had given proof that repression by the secular arm was absolutely unavoidable. It was not necessarily a case of persecution for religious opinions, but simply of the protection of life and property and the ensuring of freedom and safety for Catholics. Nevertheless the laws went much further than this. Those of Honorius were promulgated anew in 406 and 411. In 411 the method of disputation was organized on a grand scale by order of the emperor himself at the request of the Catholic bishops. Their case was now complete and unanswerable. But this was to be brought home to the people of Africa, and public opinion was to be forced to recognize the facts, by a public exposure of the weakness of the separatist position. The emperor sent an official named Marcellinus, an excellent Christian, to preside asuctor at the conference. He issued a proclamation declaring that he would have absolute power over the proceedings and in his final judgment. The Donatist bishops who should come to the conference were to receive back for the present the basilicas which had been taken from them. The number of those who arrived at Carthage was very large, though somewhat less than the two hundred and seventy-nine whose signatures were appended to a letter to the president. The Catholic bishops numbered two hundred and eighty-six. Marcellinus decided that each party should elect seven disputants, who alone should speak, seven advisers whom they might consult, and four secretaries to keep the minutes. The Donatist bishops would be present in all. The Donatists pretended that this was a device to prevent their great numbers being known; but the Catholics did not object to all of them being present, provided no disturbance was caused.

The chief Catholic speaker, besides the amiable and venerable Bishop of Carthage, Aurelius, was of course Augustine, whose fame had already spread through the whole Church. His friend, Alypius of Tagaste, and his disciple and biographer, Possidius, were also among the seven. The principal Donatist speakers were Emerentius of Cesarea in Mauretania (Cherchel) and Petilianus of Constantinople (Cirta); the latter spoke or interrupted about a hundred and fifty times, until on the third day he was so hoarse that he had to desist. On May 14, Bishop Cæsarius I wrote to the council urging the importance of the Donatist question. Another council in 403 organised public disputation with the Donatists. This energetic action roused the Circumcellions to new violence. The life of St. Augustine was endangered. His future biographer, St. Possidius of Calaisium, was insulted and ill-treated by a party led by a Donatist priest, Crispinus. Donatus of Bagail. See Donatists.

Donatus of Cassigsa Negra. See Donatists.

Donatus of Fiesole. Irish teacher and poet. Bishop of Fiesole about 829-876. In an ancient collection of the "Vite Patrum", of which an eleventh-century copy exists in the Laurentian library of Florence, there is an account of the life of Donatus, from which we glean the following facts. Donatus was born in Ireland, of a noble family. About 816 he visited the tombs of the Apostles in Rome. On his journey northwards he was led by Divine Providence to the city of Fiesole, which he entered at the moment when the people were grouped around their altars praying for a bishop to deliver them from the evils, temporal and spiritual, which afflicted them. Raised by popular acclaim to the See of Fiesole, Donatus instituted a revival of piety and learning in the Church over which he was placed. He himself did not disdain to teach "the art of metrical composition". The "Life" is interspersed with short poems written by the saintly bishop. The best known of these is the twelve-line poem in which he describes the beauty and fertility of his native land, and the prowess and piety of its inhabitants. Donatus also composed an epitaph in which he alludes to his birth in Ireland, his years in the service of the Pope at Rome, his return to Italy (Lanuvium), his episcopate at Fiesole, and his activity as a teacher of grammar and poetry.

Donatus the Great. See Donatists.

Doniders, Peter, missionary among the lepers, c. at Tilburg in Holland, 27 Oct., 1807; d. 14 Jan., 1857.

He was educated at an academy in his native place, but he had to begin his life as a worker in a factory. He afterwards became a servant in a college where he learned a little and made great progress in virtue. Later a benefactor enabled him to pursue his theological studies in the University of Utrecht. The writing of the "Annals of the Propagation of the Faith" determined his vocation for foreign missions. He was accepted in 1839 for Dutch Guiana as a missionary, ordained priest the following year, and in 1842 arrived at Paramaribo to begin his long apostolic labours. He laboured with the greatest success in the plantations, and by 1850 had instructed and baptized 1200. In the epidemic of 1851 his labours were superhuman, till, like his fellow-priests, he too became a victim. Before he was converted he was not ready to write in Latin or German, and his text is very simple and direct. A new edition has been prepared for the future by the Society of Jesus, which is to be published in the "Annales de la Société de Jésus". The work was published posthumously, and was at first met with a small circulation, but is now in great demand. The text is based on the original manuscript in the Archivio della Compagnia di Gesù at Rome, and is supplemented by the author's letters and notes.
only resumed his work among the blacks, but extended it to the Indians of Saracomic. In 1855 he took up his residence in Batavia where for nearly thirty-two years he ministered to 600 lepers. He left them only to visit the blacks and Indians. In 1855 the whole colony was confided to the Redemptorist Fathers by the Holy See and the King of Holland. Father Donders at once asked to be of their number and was received in Paramaribo, in 1867, by Monsignor Swinkels, the first Redemptorist vicar Apostolic. After this he went back to his charge. He studied music to cheer his afflicted children, and though given an assistant he laboured to the end. The process for his beatification has been placed before the Congregation of Sacred Rites.

DONGAN, Thomas, second Earl of Limerick, b. 1634, at Castletown Kildrought, now Celbridge, County Kil- dare, Ireland; d. at London, 1715. He was the youngest son of Sir John Dongan, Baronet, Member of the Irish Parliament; an uncle of Bar- on Talbot, was afterwards created Earl of Tyrconnell, Lieu- tenant-Governor of Ireland, and another, Sir Rob- ert, married Grace, daughter of Lord Calvert, Baron of Balti- more. At the death of Charles I, the family, devoted to the Stuart, removed to France. Thomas served in an Irish regiment, partici- pated in all Turenne's campaigns under the name of D'Unguent and rose to the rank of colonel in 1674. After the Treaty of Nimeguen (1678) he returned to England in obedience to the assertions of the English Government recalling all British sub- jects in French service. Through the Duke of York, a fellow-officer under Turenne, he was ap- pointed to high rank in the army designated for service in Flanders, and was granted an annual pension of £400. The same year (1678), he was appointed Lieutenant-Governor of Tangiers. In 1682 the Duke of York, the Lord Proprietor, selected Dongan to govern the Province of New York, then bankrupt and in a state of rebellion. In this office Dongan proved himself an able lawgiver, and left an indelible mark on political and constitutional history. He convened the first representative assembly of New York Prov-ince on 14 Oct., 1683, at Fort James within the present boundaries of the city of New York. This assembly, under the wise supervision of Dongan, passed an act entitled "A Charter of Power"; decreed that the supreme legislative power under the Duke of Yorke shall reside in a governor, council, and the people con- vened in general assembly; conferred upon the mem- bers of the assembly rights and privileges making them a body coequal to and independent of the Brit- ish Parliament; established town, county, and general courts of justice; solemnly proclaimed the right of religious liberty; and passed acts enunciating certain constitutional liberties, e.g. no taxation without rep- resentation; taxes could be levied only by the people met in general assembly; right of suffrage; national law or quartering of the soldiers without the consent of the inhabitltes; election by majorlty of votes; and the English law of real property.

Thus to Dongan's term as governor can be dated the Magna Charta of American constitutional lib- erties, for his system of government became the pro- gramme of continuous political agitation by the col- onists of New York Province during the eighteenth century. It developed naturally into the present state government, and many of its principles were absorbed into the framework of the Federal Government. Moreover, a rare tribute to his genius, the government imposed by him on New York Province, 1683, was adopted by England after the American War of Inde- pendence as the framework of her colonial policy, and was constituted in colonies in the United States of America, and the Transvaal. Dongan signed the Charter of Liberties 30 Oct., 1683, and on the following day solemnly proclaimed it at the City Hall of New York City. The Duke of York signed and sealed the Charter 4 Oct., 1684; but never returned it, probably for reasons of prudence, for at the time Charles II had, by a quo warranto proceeding, abolished the Charters of New England, and the Charter of Pennsylvania granted in 1684 distinctly admits the right of Parlia- ment to tax the colonies. Dongan established the boundaries of the province of New York, with Connecticut on the East, with the French Gov- ernor of Canada on the North, with Pennsylvania on the South, thus marking out the present limits of New York State. By treaty with the Indians made at Albany, New York, 1684, in presence of Governor Dongan of Virginia, Dongan obtained the written submission of the Iroquois to the Great Sachem Charles, on two white deer-skins, and outlined the masterly Indian policy which kept the Five Nations friends of England and a barrier between the English and French possessions in North America, a policy afterwards maintained with success by Sir William Johnson. At the death of Charles II, 1685, James Duke of York was proclaimed king, and New York became a royal province.

The Board of Trade and Plantations, under whose superintendence the province passed, vetoed the Charter of Liberties and James approved the veto. The colo- nists were disappointed, but such was the moral strength of Governor Dongan that we find no trace of popular resentment. In 1685 Dongan established a new government office in New York, and became the focus of the colonies in America. In 1680 he granted charters to the cities of New York and Albany; the former remained unchanged for 135 years and forms the basis of the existing city government; the latter was superseded only in 1776, not abolished by the extra- ordinary of civil war and politics in the revolu- tions. Dongan established a college under the direc- tion of the Jesuit Fathers Harvey (his own private chaplain), Harrison, and Gage in New York City, and advised that the King's Farm, a tract beyond the walls of the then existing city, be set aside for its mainte- nance. The king vetoed the grant, and in 1705 this land became the property of Trinity Church. He planned that a mission of English Jesuits be perma- nently established at Saratoga, New York, on land purchased by him for this purpose; that a settlement of Irish Catholics be founded in the centre of the Province; and that an expedition be made to explore the Mississippi River and take possession of the great valley then made known by the explorations of La- Salle. These plans were set aside by the king.

In 1687, the Assembly of New York was dissolved by the king, and in 1688 Andros was appointed Gov- ernor of the consolidated Provinces of New York and New England. Dongan refused command of a regi- ment with the rank of major-general, retired to his estate on Staten Island, New York, but was obliged to flee for safety in the religious persecution aroused by Leser in 1689. In 1691 he returned to England. By the death of his brother William (1698), late Governor of the Province of Munster, Ireland, whose only son
Donlevy, Andrew, educator, b. in 1694, probably in Sligo, Ireland; date and place of death uncertain. Little is known about his early life. With the penal laws then rigorously enforced it was difficult to obtain an education at home; and when he went abroad to study for the priesthood he must have gone in disguise, going abroad for any such purpose being a crime. However, he entered Paris in 1701 and became a student at the Irish College. His clerical course finished, he was ordained priest, and in 1728 was appointed prefect in the college, an office he held till 1746. He had also attended lectures at the university, graduating both in theology and law. While holding the office of prefect, he drew up a set of rules for the government of the college, placing it under the control of the Archibishop of Paris and subject to the university. He also published in 1742 an Irish-English catechism of the Christian Doctrine, an edition of which appeared in Dublin in 1848.

E. A. D'Alton.

Donn, Saint.—There were apparently three or four saints of this name who flourished about the seventh century.

(1) St. Donn, Abbot of Eigg, and St. Donn of Achterless are regarded by both the Bollandists and Dempster as different personages, but there is so much confusion in their chronology and repetition in what is known of them that it seems most probable that they were identical. Reeves (Adamman's Life of St. Columba), moreover, accepts them as the same without discussion. According to Irish annals St. Donn was a friend and disciple of St. Columba, who followed him from Ireland to Scotland towards the end of the sixth century. Seeking a solitary retreat, he and his companions settled on the island of Eigg, off the west coast of Scotland, then used only to pasture sheep belonging to the queen of the country. Informed of this invasion, the queen ordered that all should forthwith be driven off. The following day a harrying band of Fidrians or pirates according to one account, arrived during the celebration of Mass on Easter eve. Being requested to wait until the Sacrifice was concluded, they did so, and then St. Donn and his fifty-one companions gave themselves up to the sword. This was in 617. Reeves mentions twenty churches dedicated to St. Donn; in that at Auchterless his pastoral staff was preserved up to the Reformation and is said to have worked miracles. The island of Eigg was still Catholic in 1703 and St. Donn's memory venerated there (Martin, Journey to the Western Islands, London, 1710).

(2) Son of Liath, and nephew and disciple of St. Senan, in whose life it is related that by his uncle's direction he restored to life two boys who had been drowned. This St. Donn succeeded St. Cliaran of Muimnoise, as Abbot of Dunvegan, probably in 681, and in 699 passed to that of Inwarday, now Donagh, on the Shannon (now Hare Island). He flourished about the middle of the sixth century.

(3) St. Donn, the Deacon, son of Beocth and brother of St. Cliaran. He was a monk in his brother's monastery at Cluan, or Clonmonaicoe, in Ireland, in the sixth century.

G. O'FRIAR DE AULTON.

Donner, Georg Raphael, Austrian sculptor, b. at Essling, Austria, 25 May, 1692; d. at Vienna, 16 February, 1741. It is said his fancy was first kindled by the works of art at Heiligenkreuz. He received his technical training in the Academy at Vienna; in 1724 he entered the imperial service, and in 1729 passed to that of Prince Esterhazy. Donner's work stands out with prominence in a period given over to mannerism, but he is sometimes more mindful of elegance than of character in his subject. He had a true sense of the beautiful, was life-like and noble in his conceptions, and represented all God's creatures and Austria in a classic reaction against roccoco methods. Among his productions are the marble statue of Charles VI and two bronze reliefs in the Belvedere at Vienna, the fountain for the old Town Hall, Vienna, representing,"Andromeda and Perseus," "Hagar and the "Samaritan Woman," and many busts and statues in different palaces and gardens. In Pressburg he made the equestrian statue of St. Martin, and the decorations for the burial chapel of the Primate Emmerich Esterhazy. Youthful productions (1726) are the marble figures at Mirabell Castle, Salzburg. Donner is best known to-day by his famous fountain (1738-1739) of the Neuen Markt, Vienna; "Providence" or "Foreight," a classic female figure, forms the apex, while lower down four sporting children, each holding a water-scoop, an island and four the four rivers of Armenia proper that flow into the Danube. Donner's two brothers, Sebastian and Matthias, are generally numbered among his scholars. Sebastian was a talented sculptor, and produced various works, mostly in lead.

Donner, Matthias, brother of the above, also a sculptor, b. 1704; d. 1756. He is known chiefly for his relief carvings and medals. He was appointed court-medallist, professor, and later rector of the Academy, and was employed by various princes. Among his medals may be mentioned one of Charles Albert of Bavaria, 1727, and various ones represent-
he was elected deputy to the Cortes from Cadiz. In 1840, following upon the revolution headed by Espartero, Duke of Victoria, he followed the exiled queen Isabella of Spain to Paris to work for the restoration of the Bourbon dynasty. He accompanied her on her return after the overthrow of Espartero, 1843, and was appointed to the office of secretary and director of the studies of the young queen, Isabella, who was created Marquess of Valdegamas, and entered the Senate. For his eloquent advocacy of the “Spanish marriages” (the simultaneous alliance of Isabella with Francesco of Assisi and of her sister with the Duke of Montpensier) he was made an officer of the Legion of Honour by Louis Philippe.

The death of a dearly beloved brother at this time made a profound impression upon Donoso Cortés. The mystery of human destiny assumed for him a new aspect, and from this time he became an ardent champion of the Catholic Church. On the 4th of January, 1849, he pronounced a remarkable discourse in the Cortes in which he publically repudiated his Liberalist principles, branding them as “sterile and disastrous ideas in which are comprehended all the errors of the past three centuries, intended to disturb and disrupt human society.” In 1849 he represented Spain as minister plenipotentiary at the court of Berlin, and afterwards at Paris (1850–53), where he died.

The complete works of Donoso Cortés, with a biographical sketch by Gabino Tejado, were published in 1854–55 (Madrid). A translation into French of his principal works, with an introduction by Louis Veullot, was published at Paris (1860–65). His most notable work is his “Ensayo sobre El Catolicismo, El Liberalismo y El Socialismo” (English translation, Philadelphia, 1862; Dublin, —). This work was written at the instance of Louis Veullot, who was an intimate friend of the author, and places Donoso Cortés in the highest rank of Catholic publicists. It is an exposition of the impotence of all human systems of philosophy to solve the problem of human destiny and of the absolute dependence of humanity upon the Catholic Church for its social and political salvation. Upon its publication the work was acrimoniously attacked by the Abbé Gauden, Vicar-General of Orleans, in a series of articles in the “Ami de la Religion”, and as vigorously defended by Louis Veullot in “L’Univers”. Donoso Cortés at once submitted his work to the Holy See, which refused to interdict it or any of the propositions declared heretical by the Abbé Gauden. It remains to-day one of the most brilliant and profound expositions of the influence of Catholic truth upon human society from the pen of a publicist. In a notable series of letters, from 1849–53, to Count Raetzky, at that time Prussian ambassador at Madrid, Donoso Cortés gives a penetrating analysis of the social, political, and religious conditions of Europe, and with almost prophetic insight predicts the unification of Germany in a great empire under the Prussian monarchy as well as the political decadence of France and the latter’s loss of influence.

Tejado in Preface of complete works (Madrid, 1913); Legoux in Les Contemporains, Année II, Vol. IV (Paris), p. 83; Conde B. Paillen.
DORCHESTER

Dorchester, Abbey of, founded in 1140 by Alexander, Bishop of Lincoln, for Canons of the Order of St. Augustine (or Black Canons). Dorchester, an important Roman city of Mercia, about nine miles south of Oxford, had been the seat of a bishop from A.D. 634; when St. Birinus, the first bishop, was sent to that district by Pope Honorius, until 1085, when the See of Mercia was transferred to Lincoln. The abbey, founded fifty-five years later, was dedicated in honour of St. Peter, Paul, and Birinus, was richly endowed out of the lands and tithes of the former bishopric, and had twelve parishes subject to it, being included in the Peculiar of Dorchester, until the suppression of the monasteries. The first abbot appears to have been Alured, whose name occurs in 1140 and again in 1163; the last was John Morse, who was elected in 1533, and in the following year subscribed to the king’s supremacy, with five of his canons, and was given a pension of £22 a year. The revenues of the abbey were valued at the time of its suppression at £320. Henry VIII erected the greater part of the property of the house for a college, erected by him in honour of the Holy Trinity, for a dean and prebendaries; but this was dissolved in the first year of his successor. No register or cartulary of Dorchester Abbey is now known to exist, and only a single charter, confirming the donation of a church by King John, is given by Dugdale. Edmund Ashefield was the first impropriator of the abbey site and precincts, which afterwards passed through various hands. The skilful church of Dorchester Abbey, as it stands today, was built entirely by the Augustinian Canons, although there are traces on the north side of Saxo

Dorchester, Augustin. See New Westminster.

DORIA

Dorè (AURATUS), PIERRE, controversialist, b. at Orléans about 1500; d. at Paris, 19 May, 1559. He entered the Dominican Order in 1514 and won his degree at Paris, in 1532, after a brilliant examination. Though elected to the office of prior at Blois in 1545, Dorè continued to preach throughout the provinces. At Châlons the bishop, who had been captivated by his zeal and eloquence, entrusted him with the reform of the Carthusian monastery of Val des Choux (Vallis Caulium). For the same reasons, Claude de Lorraine, Duke of Guise, and his consort, Antoinette de Bourbon, chose him as confessor. He wrote thirty-five ascetical-theological works, some of which are only reductions of his sermons. Chief among these is "Les voix du Paradis enseignées par notre Sauveur Jésus-Christ en son évangile", which appeared twice at Lyons in 1538 (Paris, 1540; Lyons, 1588; Rome, 1610). In his "Paradoxa ad profligandas harreses ex divi Pauli epistolae selecta", he refuted the Huguenots, but soon turned to writing ascetical commentaries on the Psalms. When Henry II entered Paris in 1548, Dorè wrote a Latin ode which won for him the post of court preacher and royal confessor. His famous sermon in the Escurial appeared in 1549. Two years later he published two other apologies on the same subject and another on the Mass. At the same time he prepared his defence of the Faith in three volumes, as also another refutation of the Calvinists. He closed his literary career with two works on Justification.

Though Dorè used the vernacular very loosely, and indulged in far-fetched descriptions, which Rabelais (Pantagruel, ch. xxii) ridicules, his works have always been held in high esteem for originality and unspeakable orthodoxy. His literal translation of the Eucharistic hymns of St. Thomas Aquinas, his Latin poems, and the Office for a Feast of St. Joseph, which he composed at the command of Paul III, have always been greatly admired.

THOS. M. SCHWERTNER.

DORIA, ANDREA, Genoese admiral and statesman, b. at Oneglia, Italy, 1468; d. at Genoa, 1560. His family belonged to the magnae quatuor prospiscia who disputed among themselves for the supremacy in Genoa, but the Adorni and Fregoli of the opposing faction included the Doria. At first Andrea Doria sought union with France; then, in 1464, Louis XI ceded it to the Duke of Milan. Doria's early years were trying ones; his father died young, and his mother placed him under the guardianship of a relation who was captain of the guard to Pope Innocent VIII. Thus began the active, adventurous career that was destined to make Andrea Doria one of the most important personages of Europe in the sixteenth century.

Like many Italians of his day, Doria was at first a condottiere. He commenced by serving (1487-1492) in the guards of Innocent VIII, then in the Neapolitan army of Alfonso of Aragon, to whom he alone remained faithful after the conquest of Naples by Charles VIII (1495). He next joined the Order of the Knights of St. John of Jerusalem and took part in the invasion of France; after this he entered the service of Jean de la Rovère, leader of the French troops of the Kingdom of Naples, and had as his opponent Gonsalvo de Cordova, the most renowned general of the time. In 1503 Doria was able to restore his former order had been restored under Louis XII, and set out to subdue the Corsicans, then in revolt. On his return the Genoese entrusted him with the reorganization of their fleet. Doria now abandoned land service for that of the sea and, among eight galleys at his own expense, constituted himself a real independent naval power. During the years 1507 to 1519 he traversed the Western Mediterranean with his fleet, and, having overpowered the Barbary Corsairs and captured several of their chief, among them the famous Cadolin, returned to Genoa laden with booty.

On account of the civil discords in Genoa, Doria withdrew with twelve corsair galleys that he had seized, the crews of which would now acknowledge no other chief, and entered the service of Francis I, who appointed him "gouverneur général of the galleys of France". In 1524 he raised the blockade of Marseilles, then besieged by Charles V, and, after the battle of Pavia, gathered together the remnants of the French army (1525). He then became commander of the galleys of Clement VII; in 1527 he re-entered the service of France and compelled Genoa to acknowledge the authority of Francis I. But in 1528 he quarreled with the King of France, who did not pay him faithfully. Recalling Filippo Doria, his nephew, who was besieging Naples with his uncle's fleet, Andrea agreed to enter the service of Charles V, and began to re-establish order in Genoa, where he was received with enthusiasm (12 September, 1528). After breaking up the ancient noble clans, he set up a new social division and an aristocratic constitution which continued in force, with but few modifications, until 1707. As absolute head of the naval forces of the house of Austria, he directed the maritime struggle against the Turks and the Barbary pirates; in 1532, when Solyman threatened Hungary, Doria landed on the coast of Greece, took Coron and Patras, and even meditated an attack on Constantinople. In 1535 he re-opened the siege of Tunis; in 1536 he had united the squadron, made up of the ships of the pope, Venice, and the Knights of Malta, he surprised the famous Barbarossa in the Gulf of Arta and then allowed him to escape. Loaded with honours by Charles V, Doria retired to the territory of Genoa and lived in the beautiful palace he had built at Foscolo, where he dispensed royal hospitality to Charles V and Philip II. He was greatly revered by his fellow-citizens, yet, in 1547, he suppressed with much cruelty the conspiracy formed by some discontented nobles, the Fieschi and the Ciba. Doria's tomb, decorated by Montorsoli, is in the church of San Matteo, but his colossal statue, which was erected in 1540, was overthrown and broken in 1577.

ANTONIO DORIA
Sebastiano di Flomabo, Doria Palace, Rome

Andrea Doria

FOHLER, Bibliotheca historiae militaris (Leipzig, 1899), IV, 295; CAPPELLONI, Vita e gesti del principe Doria (Venice, 1860); THE authors between 1510 and 1560 and was one of Doria's protectors: SIGONIO, Di Vita et gesta Andreae Doriae ... (Genoa, 1588); BRANCIONE, Le vie dei grandi conquistatori espansionisti (ed. of the Ist. di Storia della Francia), II, 20-43; GUERRINI, Historiae ... ib. LOUIS BREZIER.
Döring, Matthias, historian and theologian, b. between 1390 and 1400, at Kyritz, in Brandenburg; d. there 24 July, 1469. He joined the Friars Minor in his native place, studied at Oxford, was graduated (1424) at Erfurt as doctor of theology, and for some years was preacher and professor of theology. In 1432 he was elected provincial of his order for Saxony. In the disputes between the Conventionals and those of the Observance he took an active part. In 1443 at Berne the Conventionals elected him minister general. This position he held for six years, receiving approbation from the assembly of cardinals still holding as the General Council of Basle. In this council he had been prominent since 1432 as an over-seas reformat and an adherent of the supremacy of a general council over the pope. He was sent by it to Denmark, to win over the king and the people, and assisted in the debates (1439) of Eugene IV and the election of the Felix V. Excommunicated by the Archbishop of Hamburg he appealed to Rome. In 1461 he resigned his office and spent the last years of his life in literary work at the convent of Kyritz.

He is said to be the author of the "Confutatio primatus Pape", written (1443) anonymously and without title. Name and title were added when the article was edited in 1550 by Matthias Flacius Illyricus. It is in part an extract from the "Defensor pacis" of Mascardus (printed at Nördlingen, 1510; 2nd ed. Monarchia, 1557, 4to). Other works attributed to Döring are "Defensorum posticre Nicolai Lyreni" against the Spanish bishop, Paul of Burgos, since 1481 frequently printed with the "Postille"; "Liber perpeciae Brevissimus" (lost); continuation (1420 to 1464) of the Chronicle of Peter Engelhus. He also wrote on the so-called "Donation of Constantine" and (1444) on the relics of the Precious Blood of Wismarck.

Francis Mershman.

Dornan, Thomas, theologian, b. at Berkhamstead, Hertfordshire, England, date uncertain; d. at Torun, 1572 or 1577. He received his early education through his uncle, Thomas Dorman of Agmonchase, now Amersham, Buckinghamshire. His master at Berkhamstead was Richard Reeve, a noted Protestant schoolmaster. He was also known to Thomas Harding, then professor of divinity at Oxford, who took great interest in the boy and sent him to Winchester school in 1547. From Winchester Dorman went to New College at Oxford, of which Harding was a fellow, and here he was elected a probationer fellow. During the Catholic revival under Mary he was appointed fellow of All Souls College (1554) and on 9 July, 1558, took the degree B.C.L. A year or two after Elizabeth's accession, finding that he could not live in England without conforming to the new religion, he sacrificed his fellowship and his patrimony and went to Antwerp, where he met Harding who was also an exile for the Faith. Harding persuaded him to resume his studies, and Dorman accordingly went to Louvain and devoted himself to the study of theology. In 1565 he became B.D. in the University of Douai and finally received the doctorate there. During this period he engaged in controversy with the Anglican divines, Jewel, Bishop of Salisbury, and Nowell, dean of St. Paul's. In 1569, at the invitation of Dr. Allen, he joined the band of scholars at the newly founded English College at Douai which he assisted both by his services and his private means. He died at Torun where he had been given an important benefice. His works are: "A Proofs of the Essence of Religion denied by M. Juel" (Antwerp, 1564); "A Disproof of M. Nowelle's Reprudence" (Antwerp, 1565); 4A Request to Mr. Jewel that he keep his promise made by solemn Protestation in his late Sermon at Paul's Cross" (London, 1567; Louvain, 1567).

Dorns, Bernhard, first publisher in the United States of distinctively Catholic books, b. in Ireland, 1761; d. in Ohio, 1836. He was forced to leave his native land, in 1803, because of political troubles and, arriving in New York, set up a printing and publishing concern. He got out a New Testament, printed for him in Brooklyn, in 1805, and an edition of Pastorius's "History of the Church", in 1807. He moved to Baltimore, in 1809, and from there to Philadelphia in 1817. During many years he was the leading Catholic publisher of the country, and as such enjoyed the friendship of Archbishop Carroll and of other members of the hierarchy, who esteemed him as a vigorous and gifted writer and editor. In the early thirties he disposed of his business in Philadelphia, where he published a number of tracts and books, and went to Ohio to reside near his daughter.

Thomas Aloysius Dornin, son of Bernard, b. in Ireland, 1800; d. at Savannah, Georgia, U.S.A., 22 April, 1874. He entered the United States Navy, 2 May, 1813, as a midshipman. When commissioned a lieutenant in 1825, he made a five-years' cruise around the world. In 1841 he was promoted commander and helped to successfully carry out an expedition to prevent the invasion of Mexican territory by the filibuster William Walker. After being commissioned captain, in 1855, he engaged in destroying the slave-trade. During the Civil War he attained the rank of commodore on the retired list, 16 July, 1862, and at its close was put in charge of the fifth light-house district.

Fowrth, Bibliotheca Catholica Americana (New York, 1872); Batley, A Brief Sketch of the Early History of the Catholic Church on the Island of Newfoundland (New York, 1870); Register of the Navy of the U.S., v.

Dorothea, Saint: (1) virgin and martyr, suffered during the persecution of Diocletian, 6 Feb., 311, at Cesaréea in Cappadocia. She was brought before the prefect Sarcippus, tried, tortured, and sentenced to death. On her way to the place of execution a pagan lawyer Theophilus said to her in mockery: "Bride of Christ, send me some fruits from your bridegroom's garden." Before she was executed, she sent him, by a six-year-old boy, her headress which was found to be filled with a heavenly fragrance of roses and fruits. Theophilus at once confessed himself a Christian, was put on the rack, and suffered death. This is the oldest version of the legend, which was later variously enlarged. Dorothea is represented with an angel and a wreath of flowers. She is regarded as the patroness of gardeners. On her feast trees are blessed in some places. In the West she has been venerated since the seventh century.

(2) Dorothea of Montau, Saint, recluse, b. at Montau, 6 Feb., 1547, d. at Marienwerder, 23 June, 1594. At the age of seventeen she married the sword-cutter Albrect of Danzig, a hot-tempered man, whose nature underwent a change through his humility and gentleness. Both made frequent pilgrimages to Cologne, Aachen, and Einsiedeln, and they visited Rome also. Just before their return, Dorothea was prevented by illness and remained at home where he died, while Dorothea journeyed to Rome alone. Of their nine children all died, except one daughter who joined the Benedictines. In the summer of 1591 Dorothea moved to Marienwerder, and on
2 May, 1933, with the permission of the chapter and of the Teutonic Order, established a hermitage near the cathedral. She led a very austere life. Numerous visitors sought her advice and consolation, and she had wonderful visions and revelations. Her confessor, the descom John of Marienwerder, a learned theologian, wrote down her communications and composed a Latin biography in seven books, "Septilium", besides a German life in four books. She was never canonized, but the people honored her as the guardian of the country of the Teutonic Knights and "patroness of Prussia." Her crypt is celebrated on 25 June, in some places on 30 Oct. The church at Marienwerder is now in the hands of the Lutherans; her relics cannot be found.

GABRIEL MEIER.

Dorsal, Altar. See Altar (in Liturgy), sub-title Altar-curtain.

Dorsey, Anne Hanson, novelist, b. at Georgetown, District of Columbia, U. S. A., 1815; d. at Washington, 26 December, 1896. She was the daughter of the Rev. William McKenney, a chaplain in the United States Navy during the Revolution; and Chloe Ann Lanigan McKenney. In 1837 she was married to Lorenzo Dorsey, and in 1840 became a convert to the Catholic Faith. From this period, for more than half a century, she devoted her exceptional talent to Catholic fiction. She was a pioneer of light Catholic literature in the United States and a leading writer for the young. While deeply religious in tone, her stories are full of living interest and a knowledge of the world gained by clear insight and wide experience. Mrs. Dorsey's only son was killed while serving in the Union Army during the Civil War. She left three daughters. Pope Leo XIII twice sent her his benediction, and the University of Notre Dame conferred upon her the Lector medal. Her chief works are: "The Student of Blenheim Forest"; "Flowers of Love and Memory"; "Guy, the Leper"; "Tears of the Diadem"; "Tale of the White and Red Roses"; "Wood-reve Monarch"; "Conscience, or the Trial of May Brooke"; "Oriental Pearl"; "Cocaine, the Rose of the Algonquins"; "The Flamingo"; "Nora Brady's Yarn"; "Mona, the Vestal"; "The Old Gray Rosary"; "Tangled Paths"; "The Old House at Glenara"; "Adrift"; "Ada's Trust"; "Beth's Promise"; "The Heiress of Carrigmona"; "Warp and Wool"; "The Palma." .

MARY T. WAGGAMAN.

DORT, Synod of. See Arminianism.

Dorylism, a titular see of Phrygia Salutaris, in Asia Minor. This city already existed under the kings of Phrygia and is mentioned by most of the ancient geographers. It was situated at Karadja Hisar, six miles south-west of the modern Eski Shehir. About the end of the fourth century it was removed to Shebir Euyuk, at the ruins north of the same Eski Shehir; there it remained during the Byzantine period. Seven bishops are known from the fourth to the ninth century, the most famous being Eusebius, who denounced successively the heresies of Nestorius and Eutyches (Lequien, Orient chr., I, 837). The see is mentioned as late as the twelfth century among the suffragans of Synnada, but must have been suppressed soon after. Dorylus was taken as a frontier town by the Turks probably in 1070. It was there (1 July, 1097) that the crusaders won their great victory over the Turks. The city was rebuilt in 1175 by Manuel Comnenus and fortified as well as possible. At this time John Cinnamus ("Hist.", VII, 2-3) and Niceas Choniates ("De gestis Man. Com.", VI, 1) were enthusiastic about it as one of the most beautiful cities of Asia Minor. The next year it fell again into the hands of the Turks; in 1240 it passed to Erthogourl, father of Othman, the founder of the Osmanli dynasty (his tomb is at Sejudh near Eski Shehir). Meanwhile the city stretched away from the hill of Shebir Euyuk and developed along the Poursak (ancient Tembris or Thymbria), under the name of Eski Shehir. The modern town is situated at an altitude of 783 metres, on a vast and fertile plateau, about 40 kilometres from Constantinople. Eski Shehir is the chief town of a cada in the vilayet of Brusa. The population is about 40,000: 2000 Greeks, 2000 Armenians, 200 Latins, a few Catholic Armenians, Protestants, and Jews, the rest being Musulmans. Since 1851 the Assumptionists have conducted a school for boys, and the Oblate Sisters of the Assumption two schools for girls. There is also a Catholic Armenian parish. Eski Shehir has hot springs that are used for baths. Fish, especially gigantic silures, swarm in the river, and the industry flourishes there; the chief known mine of this mineral is at Mikhahil in the district of Eski Shehir.

Athen. 1894, XIX, 201-205; RÖNNING, Eski Shehir, 1895; Échos d'Orient (1897), 52-55; (1900), 356-360; (1907), 77-82.

S. VAILLÉ.

Dosithaeans, followers of Dositheus, a Samaritan who formed a Gnostic-Judaistic sect, previous to Simon Magus. Although the name of Dositheus is often coupled with that of Simon Magus as the first of all heretics, we possess but scant information concerning him. He is not mentioned in Justin or Irenæus, but first occurs in Pseudo-Tertullian's "Adversus Haereses" as the author of the lost "Syntagma" of Hippolytus (about A.D. 220). "I pass over in silence," says the author, "the heresies of Judaism, I mean Dositheus the Samaritan, who first dared to reject the Prophets, as not having spoken in the Holy Ghost. I pass over the Sadducææ, who, springing from this root of error, dared in addition to this heresy to deny even the resurrection of the flesh." (cii. i.) If, however, the Sadducææ sprang from Dositheus, he must have begun to teach something previous to the Christian Era, and cannot properly be counted amongst heretics of Christianity. St. Jerome, who copied Pseudo-Tertullian, distinctly speaks of "those who before the coming of Christ undid the Law." An independent witness to the same fact is found in the Pseudo-Clementine "Recognitions," I, 64: "the author of this [Sadducean] opinion was first Dositheus and then Simon." On the other hand in "Recognitions," II, 8, we read that Dositheus founded a sect after the death of John the Baptist. Origen states that "Dosithius the Samaritan, after the time of Jesus, wished to persuade the Samaritans that he himself was the Messiah prophesied by Moses" (Contra Celsum, VI, ii); and he classed him with John the Baptist, Theodas, and Judas of Galilee as people whom the Jews mistakenly held to be the Christ (Hom. xxv in Lucam; Contra Celsum, I, vii). He informs us that the Dosithaeans gave out
that they possessed some books of Dositheus and told some tales about him as being still alive in this world, and he further accuses Dositheus of having mutilated the Scriptures. It is not certain, however, whether Orig to be considered Dositheus the Pseudo-Messian with an Encratite sectary who lived somewhat later. This is suggested especially by a passage in Orig's "De Principiis," IV, vii, where he alludes to Dositheus the Samaritan and others some absurdly strict observance of the Sabbath. This is also, probably, the reason why Dositheus is placed by Hegesippos after Simon Magus instead of before. In Talmudic literature (Pirke d. R. Eieser, xxxviii, and Tannahuma Vayyasaheb, ii) there occurs a Samaritan of the Syro-Macedonian period named יִשְׁנָט, and it has been plausibly argued that the patristic references which connect Dositheus with the Sadducees arise from a confusion of Dositheus the Samaritan Pseudo-Messian with this early Jewish heretic. If this be true, there would have been three persons of this name, one at the time of Alexander the Great, another at the time of Christ, and a third, a generation later. But the mention of a fourth at the time of Salmanassar (about 700 B.C.) makes one cautious of Talmudic information. It is certain, however, that a Jewish sect, mentioned by several Arabic and other historians under the name of Dusiamyra or Dostan, continued to exist till the tenth century, and that they were considered similar to the Kuttim, or Samaritans. But they seem never to have possessed any importance in the Christian world, in which from the earliest times there existed but a vague reminiscence of their name, though they continue to be mentioned in descriptions and lists of heresies, such as the "Heresiarch" of Epiphanius and similar collections.

GIOVANNI DOSSEI
By himself, Uffizi Gallery, Florence

years in Canada (1721–23) he was appointed superior of the Seminary of Liseaux in France, and helped to preserve that institution from Jansenism. While acting in Rome as procurator-general for the Oriental Missions of the Congregation of the Holy Ghost, he was made vicar Apostolic of a portion of India and consecrated titular Bishop of Samos by Benedict XIII (1725). He remained in Rome until appointed coadjutor to Bishop Morny of Quebec (1729). Bishop Dosquet had to solve many difficulties that had arisen towards the close of the life of Bishop St-Vallier. He legislated wisely in behalf of the religious communities of women and was zealous for the suppression of the liquor traffic. In 1733, after Bishop Morny's resignation, he succeeded to the See of Quebec, where he promoted education, primary and classical. A patron and benefactor of the Congregation of the Holy Ghost, he continued almost exclusively to its missionaries Acadia, the islands of the Gulf of St. Lawrence, Cape Breton, Newfoundland, and probably Labrador. He rewarded that congregation by generous endowments, including Saree, a property near Quebec, which until the Revolution yielded an annual revenue of 3000 livres. In 1735 ill health forced him to leave Quebec, but his resignation was accepted only in 1739. Thenceforth he resided chiefly in Rome, attending to the interests of his former diocese, especially after the English conquest.

LIONEL LINDSEY.

Dossel, Altar. See Altar (in Liturgy), sub-title Altar-curtain.

Dossi, Giovanni, actually named Giovanni di Nicolò di Lutero, but also called Dosso Dossi, an Italian painter, b. about 1479; d. at Ferrara in 1542. Dossi belonged to the School of Ferrara and was a pupil of Lorenzo Costa in Mantua. He is believed to have derived his name from the village of Doso, in which it has been stated he was born. In conjunction with his brother Battista (1480–1548) Dossi visited Rome and Venice and passed eleven years in these places studying especially the works of Giorgione and Titian, but forming his own style, which was distinguished by

Dosquet, PIERRE-HERMAN, fourth Bishop of Quebec, b. at Liège, Flanders, 1691; d. at Paris, 1777. He studied at the Seminary of Saint-Sulpice, Paris, and entered that congregation. After two
The town of Douai, in the department of Nord, France, is on the River Scarbe, 10 miles south of Lille. It contains about 30,000 inhabitants and was formerly a seat of a university. It was strongly fortified, and the old ramparts have only been removed in recent years. The town flourished in the Middle Ages, and the church of Notre-Dame dates from the twelfth century.

To English Catholics, the name Douai will always be bound up with the college founded by Cardinal Allen (q.v.) during the reign of Queen Elizabeth, where the majority of the clergy were educated in penal times, and to which the preservation of the Catholic religion in England was largely due. Several other British establishments were founded there—colleges for the Scots and the Irish, and Benedictine and Franciscan monasteries—and Douai became the chief centre for those who were loyal for the Faith. The University of Douai may be said to date from 31 July, 1559, when Philip II of Spain (in whose dominions it was then situated) obtained a Bull from Pope Paul IV, authorizing its establishment, the avowed object being the preservation of the purity of the Catholic Faith from the Reformers of the Reformation. There is a tradition that before he had promulgated the Bull, which was, however, confirmed by his successor, Pius IV, 6 January, 1600, the letters patent of Philip II, dated 19 January, 1561, authorized the establishment of a university with these faculties: theology, canon law, and civil law, medicine, and arts. The formal inauguration took place 5 October, 1562, when there was a public procession of the Blessed Sacrament, and a sermon was preached in the market-place by the Bishop of Arras.

There were already a considerable number of English Catholics living at Douai, and their influence made itself felt in the new university. In its early years several of the chief posts were held by Englishmen, mostly from Oxford. The first chancellor of the university was Dr. Richard Smith, formerly Fellow of Merton and regius professor of divinity at Oxford; the regius professor of canon law at Douai for many years was Dr. Owen Lewis, Fellow of New College, who had held the corresponding post at Oxford; the principal of Marchiennes College was Richard White, formerly Fellow of New College; while Allen himself, after taking his licentiate at Douai in 1570, became regius professor of divinity. It is reasonable to suppose that many of the traditions of Catholic Oxford were perpetuated at Douai. The university was, however, far from being even predominantly English; it was founded on the model of that of Louvain, from which several learned professors were drawn. The two features already mentioned—that the university was founded during the progress of the Reformation, to combat the errors of Protestantism, and that it was to a considerable extent an English influence, explain the fact that when William Allen, when seeking a home for his projected English college abroad, turned his eyes towards Douai. The project arose from a conversation which he had with Dr. Vendeville, then regius professor of canon law in the University of Douai, and afterward rector of the University of Louvain. He had been on a pilgrimage to Rome in the autumn of 1567; and the foundation took definite shape when Allen made a beginning in a hired house on Michaelmas Day, 1568.

His object was to gather some of the numerous body of English Catholics who, having been forced to leave England, were scattered in different countries on the Continent, and to give them facilities for continuing their studies, so that when the time came for the establishment of Catholicism, which Allen was always confident could not be far distant, there might be a body of learned men ready to support it. This was of course a very different thing from sending missionaries over in defiance of the law while England still remained in the hands of the Protestants. This latter plan was an afterthought and a gradual growth from the time twenty years passed before the college was founded, though eventually it became its chief work.

Allen's personality and influence soon attracted a numerous band of scholars, and a few years after the foundation of the college the students numbered more than one hundred and fifty. A steady stream of controversial works issued from Douai, some by Allen himself, others by such men as Thomas Stapleton, Richard Bristowe, and others almost equally well known. The preparation of the Doisy Bible (q.v.) was among their chief undertakings. It is estimated that before the end of the sixteenth century more than three hundred priests had been sent on the English mission, nearly a third of whom suffered martyrdom; and almost as many had been banished. By the end of the persecution the college counted more than one hundred and sixty martyrs. Allen had at first no regular source of income, but was supported by the generosity of a few friends, and especially upon the neighbouring monasteries of Saint-Vaast at Arras, Anchin, and Marchiennes, which, at the suggestion of Dr. Vendeville, had from time to time subscribed towards the work. Many penitents of the city of Douai contributed to the cause. After a few years, seeing the extreme need of the college and the importance of the work it was doing, Allen applied to Pope Gregory XIII, who in 1575 granted a regular pension of one hundred gold crowns a month, which continued to be paid down to the time of the French Revolution. Allen himself gave his whole salary as regius professor of divinity. The work of the college was not allowed to proceed without opposition, which at one time became so strong that Allen's life was in danger, and in 1576 the English were all expelled from Douai. The college was established temporarily at Reims; but possession was retained of the house at Douai, and in 1593 it was found possible to return there. By this time Allen had been called to reside in Rome, where he died 10 Oct., 1594. Under his successor, Dr. Richard Barrett, the work was extended to include a preparatory course in humanities, so that it became a school as well as a college. In 1603 under Dr. Worthington, the third president, a regular college was built, opposite the old parish church of St. Jacques, in the Rue des Morts, so called on account of the adjoining cemetery. The town at this time formed a single parish. In the eighteenth century it was divided into four parishes, and the present church of St. Jacques dates from that time.
The English College was the first to be opened in connexion with the university. The Collège d’Anchin was opened a few months later, endowed by the Abbot of the neighbouring monastery of Anchin, and entrusted to the Jesuits. In 1570, the Abbot of Marchiennes founded a college for the study of law. The Duc de Saint-Vaast founded a college of that name. Later on, we find the College of St. Thomas Aquinas, belonging to the Dominicans, the Collège du Roi, and others. The remaining British establishments were all exclusively for ecclesiastics. The Irish College was originally a Spanish foundation, but in the middle of the sixteenth century, and endowed with 5,000 florins a year by the King of Spain. The course of studies lasted six years and the students attended lectures at the university. The Scots’ College has an unfortunate notoriety in consequence of the long dispute between the Jesuits and the secular clergy which centred round it in later times. It was established in 1594, not as a new foundation, but as the continuation of a secular college at Pont-a-Mousson in Lorraine, which, owing to the uneasiness of the site, had to seek a new home, and in 1596, it was transferred to Douai. This college was not till after several further migrations that it settled finally at Douai in 1612. The college was devoid of resources, and it was due to the zealous efforts of Father Parsons in Rome and Madrid, and of Father Cunningham in France, that the college was restored. The following benefactions were given, and it was placed on a permanent footing. For this reason, the Jesuits afterwards claimed the property as their own, although it was admitted that in its early years secular clergy had been educated there. Appeals and counter-appeals were made, but the question was still unsettled when the Jesuits were expelled from France in 1764. The French Government, however, recognized the claims of the Scotch secular clergy and allowed them to continue the work of the college under a rector chosen from among them. The college flourished, and English houses at Douai were near together and were both bound up in their history with the restoration of the respective orders in England. The Franciscan monastery was founded mainly through the instrumentality of Father John Cunningham, the brother of the martyr. It was established in temporary quarters in 1618, the students for the time attending the Jesuit schools; but by 1621 they had built a monastery and provided for all necessary tuition within their own walls. The Benedictines began in 1605, in hired apartments belonging to the house of the de la Monna family, and in 1611, they obtained land and built a monastery, which was opened in 1611. The house acquired a high reputation for learning, and many of the professors of the university were at different times chosen from among its members.

Returning now to the English College, we come upon the unfortunate disputes between the secular and regular in the seventeenth century. Dr. Worthington, though himself a secular priest, was made the head of Father Parsons, and for a long time the students attended the Jesuit schools and the spiritual direction was in the hands of the direction of the college, however, laid shortcomings in its administration and in its organization. Worthington was deposed. His successor, (1631–1841), succeeded in restoring the college, while he gradually arranged tuition to be given within its walls.

Half of the seventeenth and the early eighteenth century, the English College was troubled by internal dissensions. During the presidency (1650–1661), the University of Douai claimed controlling rights over the college, which claim, however, he successfully withstood. His successor, Dr. George Leyburn (1652–1670), fell out with the “Old Chapter”, in the absence of a bishop, governing the Church in England. He attacked one Mr. White (alias Blacklo), a prominent member of their body, and procured a condemnation of his writings by the University of Douai. In the end, however, he himself found it necessary to retire in favour of his new rival, Dr. John Leyburn, who was afterwards vicar Apostolic. Hardly was the dispute with the “Blackloists” (as they were called) finished, when a further storm of an even more serious nature arose, the centre being Dr. Hawarden who was professor of philosophy and then of theology at the English College for seventeen years. His reputation became so great that when a vacancy occurred in 1702 he was solicited by the bishop, the chief members of the university, and the magistrates of the town to accept the post of regius professor of divinity. His candidature, however, was opposed by a party headed by the vicar-chancellor. The Jesuits also declared against him, accusing him, and through him the English College, of Jansenism. In the end, Dr. Hawarden retired from Douai and went on the mission in England; and a visitation of the college, made by order of the Holy See, resulted in his being ejected from his post. In 1707, however, the following benefactions were given, and it was placed on a permanent footing. For this reason, the Jesuits afterwards claimed the property as their own, although it was admitted that in its early years secular clergy had been educated there. Appeals and counter-appeals were made, but the question was still unsettled when the Jesuits were expelled from France in 1764. The French Government, however, recognized the claims of the Scotch secular clergy and allowed them to continue the work of the college under a rector chosen from among them. The college flourished, and English houses at Douai were near together and were both bound up in their history with the restoration of the respective orders in England. The Franciscan monastery was founded mainly through the instrumentality of Father John Cunningham, the brother of the martyr. It was established in temporary quarters in 1618, the students for the time attending the Jesuit schools; but by 1621 they had built a monastery and provided for all necessary tuition within their own walls. The Benedictines began in 1605, in hired apartments belonging to the house of the de la Monna family, and in 1611, they obtained land and built a monastery, which was opened in 1611. The house acquired a high reputation for learning, and many of the professors of the university were at different times chosen from among its members.

As a town, Douai suffered less than many others at the beginning of the Revolution. The university kept up its Catholic character to the end, and it was one of the five typical Catholic universities to which Pitt appealed for an authority to declare a manuscript of the pope’s deposing power of the pope. During the Reign of Terror, however, it suffered the same fate as many similar establishments. When all the clergy of the town were called upon in 1791 to take the “Civic Oath”, the members of the British establishments claimed exemption in virtue of their nationality. The plea was allowed for a time; but after the execution of Louis XVI, when war was declared between England and France, it was not to be expected that this immunity would continue. The superiors of the members of the British establishments took flight and succeeded in reaching England. The members of the English College, with their president, Rev. John Daniel, remained in the hope of saving the college; but in October, 1793, they were taken to prison at Doullens in Picardy, together with six Anglo-Benedictine monks who had remained for a similar purpose. After undergoing many dangers and hardships, they were allowed to return to Douai in November, 1794, and a few months later, by the exertions of Dr. Stapleton, President of St. Omer (who also with his students alike been imprisoned at Doullens), they were set at liberty and allowed to return to England. The English collegians never returned to Douai. The Penal Laws had recently been repealed, and they founded two colleges to continue the work of Douai.—Crock Hall (afterwards removed to Ushaw).
in the North, and St. Edmund's, Old Hall, in the South. The Roman pension was divided equally between these two until the French occupied Rome in 1799, when it ceased to be paid. Both these colleges exist at the present day. After the Revolution, Bonaparte united all the British establishments in France, and the deposed Pope Francis Walsh, an Irishman. On the restoration of the Bourbons, a large sum of money was paid to the English Government to indemnify those who had suffered by the Revolution; but none of this ever reached Catholic hands, for it was ruled that as the Catholic colleges were founded on some previous foundation, and that tithes were illegal in England, they must be considered French, not English, establishments. The buildings, however, were restored to their rightful owners, and most of them were sold. The Anglo-Benedictines alone retained their ancient monastery; and as the community of St. Gregory was then permanently established at Downside, they handed over their house at Douai to the community of St. Edmund, which had formerly been located in Paris. These Benedictines carried on a school at Douai until 1903, when in consequence of the separation of Church and State they were forced to leave. They returned to England, and settled at Woolhampton, near Reading.

Douay Bible.—The original Douay Version, which is the foundation on which nearly all English Catholic versions are still based, owed its existence to the religious controversies of the sixteenth century. Many Protestant versions of the Scriptures had been issued and were used largely by the Reformers for polemical purposes. The Douay Version was the result of a controversy of bias, and it became of the first importance for the English Catholics of the day to be furnished with a translation of their own, on the accuracy of which they could depend and to which they could appeal in the heat of argument. The work of preparing such a version was undertaken by the students of the English College at Douai, in Flanders, founded by William Allen (afterwards cardinal) in 1568. The chief share of the translating was borne by Dr. Gregory Martin, formerly of St. John's College, Oxford. His text was revised by Thomas Worthington, the English Bibliographer; John Reynolds, and Allen himself—all of them Oxford men. A series of notes was added, designed to answer the theological arguments of the Reformers; these were prepared by Allen, assisted by Bristowe and Worthington.

The object of the work was, of course, not limited to controversial purposes; in the case of the New Testament, especially, it was meant for pious use among Catholics. The fact, however, that the primary end was controversial explains the course adopted by the translators. In the first place they translated directly, not from the original Hebrew or Greek, but from the Latin Vulgate of St. Jerome. This had been declared authoritative for Catholics by the Council of Trent; but it was also commonly admitted that the text was not uncorrected, containing many errors as compared with the original languages. Then, also, in the translation, many technical words were retained bodily, such as of case, or, in some instances, also, where it was found difficult or impossible to find a suitable English equivalent for a Latin word, the latter was retained in an anglicised form. Thus in Phil., ii, 8, we get "He exanimad himself", and in Heb., ii, 26, "Christ was offered once to exhaust the sins of many". It was considered that an ordinary reader, finding the word unintelligible, would pause and inquire its meaning, and, with this in his mind, Francis Walsh, the Irishman, satisfied him with an inadequate rendering. In other cases Latinisms were allowed to have crept in unawares, as in Luke, x, 1, "Our Lord designed also other seventy-two"; or in Phil., ii, 10, "In the name of Jesus, every knee bow of the celestial, terrestrial and infernals". The proper names are usually translations; thus in Rom., iv, 4, the word Dominus is rendered throughout Our Lord. The general result was a version in cumbersome English, so full of latinisms as to be in places hardly readable, but withal scholarly and accurate.

In the year 1578, owing to political troubles, the college was temporarily transferred from Douai (which was then in the dominions of the King of Spain) to Reims, and during its sojourn there, in 1582, the New Testament was published, and became consequently known as the Rheims Testament. It was the principal English translation used by the English Catholics, and in consequence the recommendation was appended signed by four divines of the University of Reims. The Old Testament was delayed by want of means, until the whole Bible was eventually published in two quarto volumes, in 1609 (of which the first part appeared in 1610); the Douai version is the first English Bible printed in the English language. The Douai, and the recommendation was signed by three doctors of that university. Thus the New Testament appeared nearly thirty years before the Anglican "Authorised Version", and although not officially mentioned as one of the versions to be consulted, it is now commonly recognized to have had a large influence on the King James Version (see Preface to R. V., 1; 2, also, Carleton, "Reims and the English Bible"). The Reims Testament was reprinted twice at Antwerp—in 1600 and 1621—and a fourth edition was issued at Rouen in 1633. Then it was allowed to rest for over a century, before a fifth edition appeared, with some slight changes, dated 1728, but without any place of publication stated. It is believed to have been printed in London and was edited by Dr. Chaloner (afterwards bishop), and Father Blyth, a Carthusian. The Douay Version was reprinted at Douai, in 1612, and was the first English Bible published in 1589, with the Reims text and that of the Bishops' Bible in parallel columns. A Protestant edition of the Reims Testament was also brought out by Leavitt of New York, in 1834.

Although the Bibles in use at the present day by the Catholics of England and Ireland are popularly styled the Douay Version, they are most improperly so called; they are founded, with more or less alteration, on a series of revisions undertaken by Bishop Chaloner in 1749–52. His object was to meet the practice, so widely spread, by the Catholics of altering, moderate in size and price, in readable English, and with notes more suitable to the time. He brought out three editions of the New Testament, in 1749, 1750, and 1752 respectively, and one of the Old Testament in 1750. The changes introduced by him were so considerable that, according to Cardinal Newman, they "almost amounted to a new translation". So also, Cardinal Wiseman wrote, "To call it any longer the Douay or Rheimish Version is an abuse of terms. It has been altered and modified until scarcely any verse remains as it was published. In nearly every case Chaloner's changes took the form of approximating to the Authorized Version, though his three editions of the New Testament differ from one another in numerous passages. The best known

* * *
resolution of doubt of this kind is the province of moral theology, in regard to questions of right and wrong, and in regard to those of mere practical expediency, recourse must be had to the scientific or other principles which properly belong to the subject of the doubt. Thus, for example, doubt as to the actual occurrence of an historical event can only be resolved by consideration of the evidence; doubt as to the doctrine of the sacraments, by ascertaining what is of faith on the subject; doubt as to the morality of a commercial transaction, by the exercise of the authoritative decisions of moral theology; while the question of the wisdom or the reverse of the transaction in regard to profit and loss must be determined by commercial knowledge and experience.

The legitimacy, or the reverse, of doubt in regard to matters of fact is made evident by the forms of logic (induction and deduction), which, whatever may be the extent of their function as a means of acquiring knowledge, are indispensably necessary as a test of the correctness of conclusions or hypothesis 'already formed.

**DOUBT IN PHILOSOPHY.**—The validity of human perception and reasoning in general as guides to objective truth has been frequently called in question. The doubt thus raised has been sometimes of the character called methodic, or probable, incapable of assent to either of them. Any number of alternative propositions on the same subject may be in doubt at the same time; but, strictly speaking, the doubt is attached separately to each one, as between the proposition and its contradictory, i. e. each proposition may or may not be true. Doubt is opposed to certitude, or the adhesion of the mind to a proposition without misgiving as to its truth; and again to opinion, or a mental adhesion to a proposition together with such a misgiving. Doubt is either positive or negative. In the former case it is so equally balanced as to render decision impossible; in the latter, the doubt arises from the absence of sufficient evidence on either side. It is thus possible that a doubt may be positive on the one side and negative on the other (positive-negative or negative-positive), i. e. in cases where evidence on one side only is attainable and does not, of itself, amount to absolute demonstration, as, for instance, in circumstantial evidence. Again, doubt may be either theoretical or practical. The former is concerned with shewing that the evidence is such as to make the conclusion of duty, or of the licitness of actions, or of mere expediency. A further distinction is made between doubt concerning the existence of a particular fact (dubium facti) and doubt in regard to a precept of law (dubium juris). Prudent doubts are distinguished from imprudent, according to the reasonableness or unreasonable-ness of the considerations on which the doubt is based. It should be observed that doubt is a purely subjective condition; i. e. it belongs only to the mind which has to judge of facts, and has no application to the facts themselves. A proposition or theory which is commonly called doubtful is, therefore, one as to which sufficient evidence to determine assent is not forthcoming; in itself it must be either true or false. Theories which have at one time been regarded as certain are afterwards deserted, and sufficient evidence, frequently become certainly true or false by reason of the discovery of fresh evidence.

Ascertainment may be produced either by reason (which deals with evidence) or by faith (which rests on authority), it follows that theoretical doubt may be in like manner concerned with the subject-matter of either reason or faith, that is to say, with philosophy or with religion. Practical doubt is concerned with conduct; and since conduct must be guided by principles afforded by reason or by faith, or by both conjointly, doubt concerning the application of principles already accepted under one or other of the foregoing heads. The
precise reason in the interests of faith; the latter take reason as the only possible guide, but find no ground for confidence in it. To the former class belongs Nicholas of Cusa (1440), who was the author of two sceptical tracts, in which he held that the truth of any proposition cannot be found, according to his view, only through the mystical knowledge of God. The scepticism of Montaigne made a reservation (whether sincerely or not is uncertain) in favour of revealed truth; and the same principle was advocated by Charron, Stancov, and Le Vayer. Hume, in his sceptical essays on miracles and immortality, also attributed a final authority to revelation; but with obvious insincerity. The sceptical views of Hobbes, combined with his peculiar theory of government, made all conviction, including that of religious truth, dependent on the civil authority. Glanvill’s “The Vanity of Dogmatizing”, or “Sceptics Scientifica”, grounded a serious defence of revealed religion on the uncertainty of natural knowledge. Balfour’s “Defence of Philosophic Doubt”, based on the demonstrability of ultimate truths, is an attempt in the same direction. (See FIDEISM.)

In the second class are to be reckoned the various systems of genuine scepticism. This appeared in Greek philosophy at a very early date. Heraclitus held the senses to be untrustworthy (αυταίρετα) and that knowledge could only be arrived at through a sui- curous knowledge of the universal reason, immanent in the cosmos, to be attainable. Zeno of Elea defended the doctrine of the unity and permanence of being by propounding a series of “hypotheseis”, each of which resulted in a contradiction, and by means of them sought to demonstrate the unreality of the manifold and changing. The subjective principle of the Sophists (Protagoras, Gorgias, and others of less note) that “man is the measure of all things” implies doubt, or scepticism, as to all objective reality. Knowledge is resolved by Protagoras into mere variable opinion; and Gorgias asserts that nothing really exists, that if anything existed, it could not be known, and that if such knowledge were possible it would be incommuni- cable. The Pyrrhonists, or Sceptics, held everything in doubt, even the fact of doubting. The Middle Academics, whose chief representatives were Arcesilaus and Carneades, while doubting all knowledge, held, nevertheless, that probability could be recog- nised in varying degrees. The “Encyclopedia” of Diodorus of Byzantium contains some admirable discourses, and a contradiction of Montaigne, who claimed a higher de- gree of probability for the Pyrrhonist than for the Academic opinion. Sextus Empiricus advanced the theory, often since maintained, that the synklogism is really a petio principi, and that demonstration is therefore impossible. Bayle, in his celebrated “Diction- ary”, subjected the philosophy of his time to severe destructive criticism, but was confessedly un- able to supply its deficiencies. Hume’s position was purely negative; for him, neither the existence of the external world nor the mind by which it is known was capable of demonstration; and the conclu- sion of Kant’s “Critique of Pure Reason”, that the “thing in itself” (“Ding an sich”) is unknowable though certainly existing, is evidently sceptical (though the author himself rejected the title), since it embodies a purely negative doubt as to the nature of “tran- scendent” reality. Kant’s argument for the existence of God, as rationally indemonstrable, but postulated by the practical reason, necessarily results in a very limited conception of the Divine nature. Lamennais might say, or the human sense of the usefulness of the only ground of certitude; the individual rea- son he held to be incapable of attaining it. “Nothing is so evident to us to-day that we can be sure we shall not find it either doubtful or erroneous to-morrow.” (Essai sur l’Indifférence, II, xii.)

Thus doubts and doctrines which deny the validity of simple experience as a guide to truth are really instances of doubt, because, though they assert dogmatically the inadequacy of widely accepted evidence, they are nevertheless in that state of suspense by which doubt is properly characterized in regard to the reality of any assumed notion of the world as by any experience. Thus the mental attitude which received from Professor Huxley the name of Agnosticism is a strictly doubtful one towards all that lies beyond sense-experience. The doubt is purely negative in this view: whatever is not cogitable by the aid of the senses is held to be unknowable; God may exist, or He may not, but we can neither affirm His existence nor deny it. Again, the system or method known as Pragmatism regards all reality as doubtful; truth is the correspondence of ideas with one another, and cannot be regarded as anything final, but must per- mit change with the progress of human thought; knowl- edge must be taken at its “face value” from moment to moment, as a practical guide to well-being, and must not be regarded as having any necessary corre- spondence with definite and permanent reality.

DOUBT IN REGARD TO RELIGION has at different times assumed a variety of forms. It is perhaps uncertain how far the ancient mythologies received or even de- manded exact belief; it is at any rate certain that they were, as a rule, not considered worthy of serious attention by the common people. In the ancient superstition of which formed part of the charge on which Socrates was condemned was an offence against the State rather than against religion in itself (see Lecky, Hist. of European Morals, ii). The faith demanded by the Christian Revelation stands on a different footing from the belief claimed by any other religion. Since it rests on Divine authority, it implies an obligation to believe on the part of all to whom it is proposed; and faith being an act of the will as well as of the intellect, its refusal involves not merely intellectual error, but also some degree of moral perversion. It is evident that doubt in regard to the Christian religion is equiv- alent to its total rejection, the ground of its acceptance being necessarily in every case the authority on which it is proposed, and not, as with philosophical or scientific doctrines, its intrinsic demonstrability in detail. Thus, whereas a philosophical or scientific opinion may be held provisionally and subject to an unresolved doubt, no such position can be held towards the doctrines of Christianity; their authority must be either accepted or rejected. The unconditional, in- terior assent which the Church demands to the authority of revelation is incompatible with any doubt as to its validity. Gregory XVI, by the Brief “Dum aeerissimis”, 26 Sept., 1833, condemned the teaching of Hermes that all theological inquiry should be based on positive doubt (Denzinger, 10th ed. 1619); and the Vatican Council declared (Sess. II, ch. xxxi): “revelata vera esse credimus, non propcer intrinsecum rerum veritatem naturali rationis lumine perspectam, sed propcr autoriitatem ipsius Dei reve- lationis, qui nec fallit nec transient”, i.e., we believe the things that are revealed to be true, not because of an intrinsic truth which reason perceives, but because of the authority of God Who is the Author of Revela- tion, and Who can neither deceive nor be deceived. Hereinafter have, however, generally had the character of dogmatic asser tion than of mere doubt, though they arose from a more or less prevalent state of doubt as to doctrines imperfectly understood or not yet authoritatively defined. The devotion to classical studies which followed upon the fall of Constantinople in 1453 and the memory of the necessity of the rise to the humanism, or literary revival, of the Chris- tianity, and in many cases resulted in a sceptical attitude towards religion. This scepticism, however, was by no means universal among the Humanists, and was due rather to lack of interest in theological questions than to any reasoned criticism of religious doctrine. (See
Douglas, History of the Popes, chapters on the Renaissance.) It helped to prepare the way, however, for the Sermity held by some concerning the doubt of either persons, and by others again, rejected as false. Anglicanism, especially, leaves open many of the questions the Church of England holds as of faith, and thus ever to comprehend within its boundaries persons who differ without question on important subjects. The Catholic Church, on the other hand, pronounces authoritatively as to the truth or falsehood of opinions, by means of general councils, professions of faith, infallible decisions of the supreme pontiff, and the ordinary teaching of her pastors. In St. Ambrose, in the sixth century, is said: "It is the law of the councils that if any doubt have arisen in matters which regard the state of the Church, we are to have recourse to the chief priest of the Roman Church" (Ep., xxxvi in P. L., LIX, 253). Doubt as to the law is now generally recognized by the Church without infringing the principle of authority on which the Church itself depends. The field, however, which is open to a variety of opinions on questions not directly involving the essential doctrines of the Faith is very extensive, and though its extent may be further limited by future dogmatical decisions, it is probable on the other hand that it will be increased in the future, as in the past, by the emergence of dogmatic questions as to the exact bearing of dogmatic truth upon fresh discoveries or theories of all kinds.

It will be evident from what has been said that doubt cannot coexist either with faith or knowledge in regard to any given subject; faith and doubt are mutually exclusive, and knowledge which is limited by doubt, becomes, in regard to the subject or part of a subject to which the doubt applies, no longer knowledge but opinion. A moral certainty—that is, one which is founded upon the normal course of human action—does not strictly exclude doubt, but, as excluding prudential doubt, must be considered a sufficient practical guide (cf. Analysis of "Discourse of Religion", introduction, and pt. II, ch. vi). Thus doubt is sometimes said to imply belief; though such belief or practical certainty cannot properly be held to rise above the least probable kind of opinion. The rhetorical conceit of uncertainty in the present work (Tennyson, In Memoriam) must be taken to signify that truthful and serious habit of mind which refuses to submit to deception on motives furnished by intellectual sloth or the desire of worldly advantage. Catholic philosophy is entirely opposed both to the Pyrrhonism of sceptical realists and to that form of Idealism which is closely connected with the Kantian method on its sceptical side, and which seeks to reduce all dogmas to the mere expression of subjective religious conceptions, relegating the objective facts with which dogmas are concerned to the domain of symbol and parable. In the view of the Scholastic system, human experience is a true perception of external reality through the senses and the intellect; phenomena being the object both of the senses, which they directly affect, and, after a different manner, of the intellect, which apprehends through sensible impressions the true nature and principles of the reality which causes those impressions. The facts of revelation to which the Church bears witness are in this sense real and objective, and may neither be explained away nor subjected to the criticism of scientific criticism. Such is the purport of the Enchiridion "Passerendi Dominici Gregis" (1970), which both COSTOVER and condemns the attempt to evacuate dogma of its true significance made by the method of religious speculation known as Modernism.

Practical Doubt, or, as to the lawfulness of an action in accordance with the teaching of moral theology, incompatible with right action; since to act with a doubtful conscience is, therefore, sinful; and the doubt must be removed before any act of justice is justified. Doubt, however, that the solution of a practical doubt is not attainable, while some decision is necessary. In such cases the conscience may obtain a "relative" certainty by adopting an approved opinion as to the lawfulness of the acts of the person, even though they be not held as finally determined, without the intrinsic merits of the question. The question has been much discussed among different schools of theologians whether the opinion so followed must be of greatly preponderating authority in favour of liberty in order to justify an act the lawfulness of which appears intrinsically doubtful, whether it must be merely more probable than the contrary one, or equally probable, or merely probable in itself, even though less so than its contrary. (See Moralty; FROBABILITY.) The last, however, is the theoretical course followed for all subsequent theologians, and the principle that "quia dubia non obligat", i.e., that a law which is doubtful in its application to the case in hand does not bind— is universally admitted. It must be observed, however, that where the question is one not merely of positive law but of certain moral actions, in practical result, only the "safer" course may be followed. No opinion, however probable, is allowed to take precedence of the most certain means of securing such ends; e.g., in providing for the validity of the sacraments, in discharging obligations of justice, or in avoiding injury to others. All opinions and ordinations must be repeated conditionally. (See AGONOSTICISM; CERTITUDE; EPISTEMOLOGY; FAITH; HERESY; INFALLIBILITY; SCETICISM.)

A. B. Sharpe.

Douglas, Gavin, Scottish poet and preacher, b. about 1474; d. 1522; he was the third son of Archibald, Fifth Earl of Angus, known as "Bell-the-Cat." Educated for the Church at the universities of St. Andrews and Paris, he held for some years a benefice in the diocese of Lindisfarne, and during this period he wrote a number of poems and an undated "Bell-the-Cat." In 1501 he became provost of the collegiate church of St. Giles, Edinburgh, and subsequently, through the influence of Queen Margaret, who had married his nephew, the young Earl of Angus, he obtained the abbotship of Dunkeld, which the queen's efforts to have him promoted to the primacy were unsuccessful; and when the popular indignation at his marriage with
DOUZHOBORS

Angus resulted in her being deprived of the regency, Douglas was brought to trial by the new regent, the Duke of Albany, for intriguing with the queen to obtain ecclesiastical promotion without the consent of Parliament. He was imprisoned for a year in Edinburgh Castle, and after his new continued for a time in the midst of his disciples. When, however, Margaret separated from her husband and sided with Albany against the Douglases, Gavin was deprived of his see. He fled to England in 1521 and was kindly received by Henry VIII, but he died of plague in the following year. He was buried in the Savoy Church in London.

It was unfortunate for Douglas's future reputation that his high birth and family connexions plunged him into the political turmoil of his time, and thus prematurely closed his career as a poet and scholar of the first order. His participation in the internal divisions by which Scotland was torn during most of his life ended, as far as he was concerned, in failure, exile, and death; and it is as a literary genius, rather than a churchman or a statesman, that he lives in Scottish history. His was an austere and student life, in contrast to his high lineage. He was the author of two poems, "Kings Hart" and "Conscience", and translated also Ovid's "De Remedia Amoris". His complete works were first collected and published in Edinburgh (ed. Smail), in 1874.

Douve. See Russia.

Doutrelieu, Stephen, missionary, b. in France, 11 Oct., 1595; date of death uncertain. He became a Jesuit novice at the age of twenty-two and migrated to Louisiana, U.S.A., with the Ursuline nuns in 1727. Soon after his arrival he was sent to the Illinois mission, for in 1728 he seems to have been at Post Vincennes, "the fort on the Wabash", which was established about that time. On 1 January, 1730, he set out for New Orleans on business connected with the mission. The Natchez Indians, only a few weeks before, had massacred all the inhabitants of the little French village of Natches, and the Yazoo, a neighboring Indian tribe, had followed their example. Two Jesuit missionaries perished in these uprisings. Ignorant of the state of the country and accompanied by four or five French soldiers, Father Doutrelieu landed at the mouth of the Yazoo River to offer up the Holy Sacrifice. The Indians attacked the little party, killing one of the Frenchmen and wounding the missionary in the arm. Doutrelieu escaped to his canoe with two of his companions and began their flight down the Mississippi. After many dangers they reached the French camp at Tonica Bay, where they were received with great kindness; their wounds were dressed and after a night's rest they proceeded unmolested to New Orleans. A journey of four hundred leagues through a hostile country was accomplished. Following this, Father Doutrelieu became chaplain of the French troops in Louisiana, and in this capacity accompanied them on one expedition. At his own request he was sent back to the Illinois Indians, but how long he remained is uncertain. He was at one time chaplain of the hospital at New Orleans.

Clay Lamp from Cologne

DOVE (Lat. columba).—In Christian antiquity the dove appears as a symbol and as a Eucharistic vessel. As a Christian symbol it is of very frequent occurrence in ancient ecclesiastical art. (1) As a symbol of the Holy Spirit it appears especially in representations of the baptism of Our Lord (Matt., iii, 16) and of Pentecost. St. Gregory the Great (590-604) is generally shown with a dove on his shoulder, symbolizing his office as a preacher of salvation or rather Divine guidance. A dove of gold was hung up in the baptistery at Rome after the baptism of Clovis; in general the symbol occurs frequently in connexion with early representations of baptism. In ancient times a dove-like vessel was frequently suspended over the baptismal font and in that case was sometimes surmounted by a figure of Clovis, and contained the holy oils (Aringhi, Roma Subterr., II, 326). (2) As a symbol of martyrdom it indicated the action of the Holy Spirit in bestowal of the fortitude necessary for the endurance of suffering. (3) As a symbol of the Church, the agent through which the Holy Spirit works on earth. When two doves appear the symbolism may represent according to Macarius (Hagioglypta, 222), the Church of the circumcision and that of the Gentiles. On a sarcophagus or on other funeral monuments the dove signifies (a) the peace of the departed soul, especially if, as is often the case in ancient examples, it bears an olive branch in its beak; (b) the hope of the Resurrection. In each case the symbolism is derived from the story of Noah and the Flood. Such is the meaning of the dove (columba, columba sine fede) in numerous epitaphs of the Roman catacombs. Occasional funeral lamps were made in the shape of a dove. Two doves on a funeral monument sometimes signify the conjugal love and affection of the parties buried there. The dove in flight is the symbol of the Ascension of Christ or of the entry into glory of the martyrs and saints (cf. Ps. cxviii, 7: "Our soul is escaped as a bird from the snare of the hunters, the snare is broken and we are delivered.") In like manner the caged dove signifies the human soul yet imprisoned in the flesh and held captive during the period of mortality. In general, however, the dove as a Christian emblem signifies the Holy Spirit either personally or in His works. It signifies also the Christian soul, not the human soul as such, but as indwelt by the Holy Spirit; especially, therefore, as freed from the toils of the flesh and entered into rest and glory.

DOVER, R. CLAYTON—The reservation of the
DOWDALL

Holy Eucharist for the use of the sick was, certainly since early medieval times, effected in many parts of Europe by means of a vessel in the form of a dove, suffered to rise from beneath the altar. The idea of the dove being above the altar. Mention may be made here of the (two) doves occasionally represented in the Roman catacomb as drinking from a Eucharistic chalice (Schnyder, "Die Darstellungen des euchariast. Kelches auf altchr. Grabinschriften"). In "Stromation Archdeaconem", Rome, 1900, 97-118, the idea of the Eucharistic vessel was probably taken from the dove-like receptacle used at an early period in the baptisteries and often suspended above the fonts. These vessels were usually made of gold or silver. This was the usual case when the vessel was designed to be the immediate holder of the Blessed Sacrament, since the principle that no base material ought to be used for this purpose is early and general. But when, as seems generally to have been the case in later times, the dove was the outer vessel enclosing the pyx which itself contained the Blessed Sacrament, it came about that any material might be used which was itself suitable and dignified. Mabilion (Ier Itat, 217) tells us that he saw one at the monastery of Bobbio made of gilded leather, and one is referred to in 1204 at the church of San Martino in Milan which is enamelled on the outside and silver gilt within. The exact time at which such vessels first came into use is disputed, but it was certainly at some early date. Tertullian (C. Valentinian, cap. iii) speaks of the Church as columba domus, the house of the dove, and his words are sometimes quoted as exhibiting the use of such vessels in the third century. The reference, however, is clearly to the Holy Spirit. In the life of St. Basil, attributed to St. Amphichius, is perhaps the earliest clear mention of the Eucharistic dove. "Cum panem divinissimae in tres partes... tertiam positam super columbam aurem... desuper sacrum altae suspendit": (When he had divided the bread into three pieces... the third part placed in a golden dove, he suspended it.) Vita Basil. P. G. XXIII). St. Chrysostom's expression concerning the Holy Eucharist, convexitatem Spiritus Sancti, clothed with the Holy Spirit (Hom. xii. ad pop. Antioch), is generally taken to allude to this practice of reserving the Holy Eucharist in a dove, the emblem of the Holy Spirit. The same idea is expressed in another fragment of the same writer: "cum tunc columbam Spiritus in specie Christum vestivit honoris"—"And the Holy Spirit in the form of a dove has robed Christ in honour".

The general, and certainly the earliest custom, both Eastern and Western, was to suspend the dove from the baldachino or baldachinio. At a later period in some parts of the West, especially in Rome, a custom grew up of placing a tower of precious material upon the altar, and enclosing the dove with the Blessed Sacrament within this tower. Thus, in the "Liber Pontificum," the simple records of the principal gifts made to the basilicas in the fourth and succeeding centuries, we never find that the dove was presented without its tower as its complement. Thus in the life of Pope Hilary it is said that he presented to the baptistery at the Lateran turrem argenteam... et columbam auream. In the life of St. Sylvester (ibid.) Constantine is said to have given to the Vatican Basilica palatam... cum turre et columbam. Innocent I (ibid.) gave to another church turrem argenteam et columbanam.

ARTHUR S. BARNES

DOWELL, GEORGE, Archbishop of Armagh, b. at Drogheda, County Louth, Ireland, in 1457; d. at London, 15 August, 1558. He entered the Order of Crutched Friars, and was the last prior of their monastery at Ardee. On the suppression of the monastery by Henry VIII, in 1536, he received a pension of £20 a year. After the death of Primate Cranmer, four years later, he was appointed to the See of Armagh by the king, but his appointment was not recognized by the pope. Dowdell acknowledged Henry VIII as supreme head of the Church on earth, and denounced the real primate, Robert Wauchope, to the Government. Though a schismatic, he nevertheless vigorously opposed the introduction of Protestantism into Ireland in the following reign and became the leader of the Catholic party. His opposition proving fruitless, he withdrew from public life in disgust and shortly afterwards retired to the Continent. On the death of the real primate Wauchope, Dowdell, having renounced the schism, was appointed in 1553 by the pope to the very see of which he had been the schismatic archbishop. Ruling during nearly all the reign of Queen Mary, he exerted himself to repair the ravages to religion wrought in the preceding reigns. He held an important synod in Drogheda in 1554 in which decrees were passed against priests who had presumed to marry.

AMBROSE COLEMAN

Dowdall, James, martyr, date of birth unknown; executed for his faith at Exeter, England, 20 September, 1600. He was a merchant of Drogheda, Ireland, though several authorities, including Challoner, describe him as a native of Wexford. Further confusion is added by reason of the fact that another contemporary, James Dowdall, died a confessor. According to Roth, however, the martyr belonged to Drogheda, and traded with England and the Continent. In the summer of 1598, when returning from France, his ship was driven by stress of weather onto the coast of Devonshire, and he was arrested by William Bourchier, Earl of Bath, who had him under examination. Dowdall publicly avowed that he rejected the queen's supremacy, and only recognized that of the Roman pontiff. The earl forwarded the examination to Sir Robert Cecil, and had Dowdall committed to Exeter jail. Whilst in prison he was tortured and put to the rack, but continued unchanged in his fidelity to the queen. On 3 June, 1598, the Earl of Bath wrote to Sir Robert Cecil for instructions in regard to James Dowdall, who had been detained in prison almost a year. Accordingly he was tried at the Exeter assizes, and was ordered to be hanged, drawn, and quartered. His name is included in the Apostolate Roman of the Irish Martyrs, whose cause is at present (1908) before the Congregation of Sacred Rites.

W. H. GRATTAN-FLOOD

Dower (Lat. doceatur; Fr. douaire), a provision for support during life accorded by law to a wife surviving her husband. Being for the widow and being, accorded by law, dower differs essentially from a conventional marriage portion such as the dote of the old Roman law, the French dot, or the English dowry. Dower is thought to have been suggested by the marriage gift which Tacitus found to be usual among the Germans. This gift, he tells us, bore the same relation to the dowry of the Roman law, which was a gift on the part of the wife to the husband, while in Germany the gift was made by the husband to the wife (Lassus, Grand dictionary universel, Paris, 1870, s. v. Douaire). Indeed, it is generally supposed that the law what was termed donatio proper nuptiis, a gift from the family of the husband, but this was only re
quired if the dos were brought on the part of the wife. So too in the special instance of a widow (herself poor and undotated) of a husband rich at the time of his death, a widow secured her the right to a part of her husband's property, of which no disposition of his could deprive her.

But the general establishment of the principle of dower in the customary law of Western Europe, according to Maine (Ancient Law, 3rd Amer. ed., New York, 1887, 218), is to be traced to the influence of the Church, and to be included perhaps among its most arduous triumphs. Dower is an outcome of the ecclesiastical practice of exacting from the husband at marriage a promise to endow his wife, a promise retained in form even now in the marriage ritual of the Established Church in England. (See Blackstone, "Commentaries on the Laws of England" II, 134, note p.) In an ordinance of King Philip Augustus of France (1214), and in the almost contemporaneous Masonic Charters (1215), dower is referred to. But it seems to have already become customary law in Normandy, Sicily, and Naples, as well as in England. The object of both ordinances and charter was to regulate the amount of the dower where this was not paid voluntarily by the husband, dower being regarded as English law consisting of a wife's life estate in one-third of the lands of the husband "of which any issue which she might have had might by possibility have been heir" (Blackstone, op. cit., 131).

During the pre-Reformation period, a man who became a monk and made his religious profession in England was deemed civilly dead, "dead in law" (Blackstone, op. cit., Bk. II, 121); consequently his heirs inherited his land forthwith as though he had died a natural, instead of a legal, death. Assignment of dower in his land would nevertheless be postponed until the natural death of such a religious. For only by his wife's consent could a married man be legally professed in religion. And she was not allowed by her consent to exchange her husband for dower. After the Reformation and the enactment of the English statute of 11 and 12 William III, prohibiting "papists" from inheriting or purchasing lands, a Roman Catholic widow was not held to be debarréd of dower, for dower accruing by operation of law was deemed to be not within the prohibitions of the statute. And it was held that Englishmen of the same faith and becoming converted after marriage, should purchase, if she herself remained unconverted.

There is judicial authority of the year 1310 for the proposition that dower was favoured by law (Year Books of Edward II, London, 1905, Vol. III, 189), and at a less remote period it was said to be with life and liberty one of three things which "the law favoureth." But an English statute of the year 1533 has impaired the inviolability of dower by empowering husbands to cut off by deed or will their wives from dower. It was the law of dower unimpaired by statute, which according to the American commentator, Chancellor Kent, has been "with some modifications everywhere adopted as part of the municipal jurisprudence of the United States" (Commentaries on American Law, IV, 36). But while the marriage portion, dot, is, yet dower is not, known to the law of Louisiana, and it has now been expressly abolished in some other states. The attempts of legislative modifications are numerous and important.

Of dower (dowaire) as it existed in the old French law no trace is found in the existing law of France. But in other countries in pre-Revolutionary times, customary dower accruing by operation of law is yet recognised in the law of the former French Province of Quebec. The civil death which by English law seems to have applied to men only, might be by the French law in doctrine and by the practice secured by the widows. A widow, therefore, thus entering into religion, would lose her dower, although in some regions she was allowed to retain a moderate income. (See Larouze, op. cit.) And now by the law of Quebec a widow joining certain religious orders of the province is deemed dead, and undoubtedly would suffer loss of dower.

Charles W. Sloane.

Dower, Religious (Lat. dos religiosa).—Because of its analogy with the dower with the woman who brings to the marriage her husband, the "dower" has been given to the sum of money or the property that a religious woman, or nun (religiosa), brings, for her maintenance, into the convent where she desires to make her profession. It is not a question of the more or less generous donations made by the young woman or her parents or a relative, or to some of the good works that it carries on, nor of the amount paid in for the support of the postulant or novice until the time of her profession, but of a sum (usually a fixed one) set apart for the support of a religious who, by her profession, has become a member of the community.

The custom of religious dower was not in vogue in the ancient Church. Introduced occasionally for nuns under solemn vows (the only vows that existed in ancient times), it became gradually the rule in all communities, particularly in congregations under simple vows, these being now the most numerous. According to common ecclesiastical law, every convent had formerly to be provided, at the time of its foundation, with the resources necessary for the maintenance of a fixed number of nuns. It did not suffice to receive gratuitously and without dower and, although in no wise prohibited from presenting the monastery with a portion of their property, were supported out of the revenue assigned to the monastery for this purpose. This is why the Council of Trent does not speak of religious dower. However, from the end of the sixteenth century on, the number of religious has fallen into desuetude, and the dower came into use; and this for two reasons. The first was the acceptance of "super-numerary" religious, that is of a larger number than the resources of the convent warranted; hence it was but just that the amount required for their maintenance should be demanded of them. The second reason lay in the decrease of the resources of the ancient convents and in the absence of property for the maintenance of the new houses founded towards the end of the sixteenth century. From the outset the existence of these two causes is found in the general decree of the Sacred Congregation of Bishops and Regulars, 6
County Antrim and a small portion of Derry, is the Diocese of Connor. South of the line, the remainder of Antrim, except the parish of Aghalee, belonging to Dromore, belongs to the Diocese of Down, as also the whole of the County Down, except the baronies of Ivecagh and part of Kincluhy. The extent of the united diocese is 597,450 Irish acres (about 576 sq. miles).

Each diocese was a collection of ancient sees. Within the limits of Down, and founded in St. Patrick's time, there were: Raholp, founded by St. Tassach, Goregrib by Vincob, Bright by Loara, Mahee Island by St. Mochay, Maghera by St. Donard. There were also: Moville, founded by St. Finnian, and Bangor by St. Comgall, the latter an abbey, but often ruled in aftertimes by a bishop. St.ergus is named as first Bishop of Down. In ancient times the place was called Dun Celtair, Celtair being one of the Red Branch knights. Afterwards it was called Dun-da-Leth-Glaissie, "the fort of the two half-chains." According to tradition two young chiefs had long pined in King Laoghaire's prison. St. Patrick miraculously struck off the chain which bound them, and the prisoners, thus released, hastened to their father's residence at Dun Celtair, flinging from them the pieces of the severed chain; hence the new name. A further change occurred after St. Patrick's death. Dying at Saul (493), he was buried at Down, which then contained no church. Subsequently the remains of St. Brigid were brought there from Killduf, as were relics of St. Columba from Iona. Meanwhile the ancient Dun Celtair had become Downpatrick, a town overshadowing all the neighbouring towns, the capital also of the Diocese of Down, which in process of time absorbed all the surrounding sees.

Like Down, Connor, founded in 480 by St. Macnisse, was a collection of smaller sees. These were Kilroot, Drumtullagh, Culleightrin, Connor, Inispolin, Armon, and Rashee. The date of the founding of each of these sees is uncertain, as also the dates of their absorption; nor can a regular succession of bishops be discovered. By the twelfth century all the sees had ceased to exist except Connor. Its western boundary then was the Roe; but by the Synod of Rath-Bressaili (1118), when the number and limits of the Irish dioceses were fixed, the Bann was made the western boundary of Connor, and Down was joined to it, but only for a brief period. In 1124 St. Malachy became Bishop of Connor, which was separated from Down. The two dioceses were again united in 1134, when Malachy became Archbishop of Armagh; but when he resigned the primacy, in 1137, he became Bishop of Down, again dividing the two sees. This separation was recognized by the Synod of Kells (1132), and continued until 1441, when John Cely, Bishop of Down, was deprived for having violated his vow of chastity. Meanwhile the annals record the death of many distinguished men, bishops and others, connected with

DOWLING

DOWLING, JOSEPH THOMAS. See Hamilton, Diocese of.

Down and Connor, Diocese of (Dunmense et Con- forensis), in Ireland. A line drawn from Whitehouse on Belfast Lough due west to the Clady River, thence by the river itself to Muckamore and Lough Neagh, marks the boundary between the Diocese of Down and the Diocese of Connor. North of this line to the sea and the Bann, including the greater part of the
both dioceses. It is further recorded that in 831
Connor was plundered by the Danes, and Down in
942; that in 1177 Downpatrick was captured by John
de Courcy, who imprisoned the bishop; that in 1183
de Courcy turned the secular canons out of the cathed-
ral, making them by Benedictine monks from
Chester; that in 1186 the relics of St. Patrick, St.
Brigid, and St. Columba were discovered there and
reinterred in the church with great solemnity; that
in 1315 a great battle was fought at Connor; and that
the whole extent of the two dioceses suffered griev-
ously during the invasion of Edward Bruce.

The primate John Prene resisted the union of Down
with Connor in 1441, and it did not finally take effect
till 1451. Since that date both dioceses, recognized as
one, have remained under the rule of one bishop. During
the troubled times of the Reforma-
tion and the wars of the O’Neills, the Ul-
ster counties suffered much, though the old Faith was still
maintained. But the plantation of Ulster re-
placed the great bulk of the Catholics by
English Protess-
ants and Scotch Presbyterians. Later on, in the
seventeenth century, the tide of
war frequently rolled over Antrim and Down,
with consequent destruction of Catholic property.
The penal laws followed; and such was the com-
bined effect of plantation and proscription that
in 1670 in the whole of Down and Connor there
were but 2500 Catholic families. For nearly sixty
years subsequently the diocese was ruled by
vicars. When at length the pressure of penal
legislation was removed Catholicism revived
rapidly. In the period from 1810 to 1840 no less
than forty new Catholic churches were built. The
progrese thus made under Dr. Crolly (1825–1835)
and Dr. Dorrans (1836–45) was continued under
Dr. Dorrans (1836–45) and Dr. MacAlister (1836–
95); nor did any of his predecessors show greater
energy and zeal than Dr. Henry, whose death
occurred with such tragic suddenness early in
1905. During the nineteenth century splendid
churches were built at Newtownards, Hollywood,
Ballymoney, and Belfast, and on every side visible
signs of Catholic progress appeared.

This prosperity is largely due to the rapid growth
of Belfast. Situated on the shores of Belfast Lough,
its site was occupied in the sixteenth century only by
a strong castle, then in the hands of the O’Neills of
Clannaboy. From them it passed at the close of the
century to the British Government, and in 1603 the
castle and land adjoining were granted by King James
to Sir Arthur Chichester. He laid out and planted a
small town, which, in 1613, was made a corporation
by royal charter. Its growth was slow, and during the
seventeenth century it was entirely overshadowed by
the neighbouring town of Carrickfergus. About 1700
Belfast had a population of 2000, and a good deal of
trade; in 1757 a population of 8000. Henceforth its
rise was rapid and continuous. Its population in 1871
was 174,000; in 1881, 208,122; in 1891, 255,950; in
1901, with an enlarged city area, 348,876. It sends
four members to Parliament, and is ruled by a lord
mayor, fifteen aldermen, and forty-five councillors. In
commerce and shipping, in trade and manufactures, it is the first city in Ireland. Catholicism has more than
kept pace with the general advance of the city. In 1708
there were but seven Catholics in Belfast, and not till
1783 was there a Catholic church. Belfast is now the
episcopal see, with ten city parish churches, two diocesan
seminaries, and many educational and charita-
table institutions. Among the remarkable men of the
diocese the following may be mentioned: St. Macnisse,
the patron saint of Connor, and St. Malscy, the pa-
tron saint of Down; St. Tassach, who attended St.
Patrick in his last illness; St. Conall, who founded
the monastery of Bangor; St. Finnian, founder of Mo-
ville; St. Colman Ela, founder of Muckamore in An-
trim; St. Mochay, Bishop of Nendrum; St. Donard,
Bishop of Maghery; St. Dochona, Bishop of Connor.
In the sixteenth century the notorious Miler Magrath was Bishop of Down and Connor; and in the next cen-
tury the martyred Cornelius O’Devanny, and the fighting bishop, Heber MacMa-
non, who also met a martyr’s fate.

Statistics (1868): Parishes, 60; secular clergy, 107; regular clergy, 21; churches, 114; colleges, 2; monasteries, 5; convents, 16; total Catholic population (1901), 1,566,703; total population of all creeds, 671,206.

O’LAVERTY, A Historical Account of the Diocese of Down & Connaught

St. Patrick’s Church, Downpatrick

Downes (alias Bedingfield) son of Charles
Mumford (1626–1707)

Thomson, son of Thomas Downes of
Bodney in Norfolk, by Margaret
daughter of John Bedingfield of Redlingfield in
Suffolk. He was educated at St. Omer, but com-
pleted his studies at the English College at Vala-
dolid, and entered the Society of Jesus, 8 January,
1639. From the novitiate he passed to the college
of the English Province at Liège, but went for his
theology to Pont-à-Mousson and was professed of the
four vows 16 January, 1656. In 1671 he was chap-
lain to the Duke of York, afterwards James II. When
the duke as admiral of the fleet put to sea against
the Dutch he asked for “Father Mumford” as con-
ductor on board his flagship. During an encounter
between the two fleets Father Downes won for himself
a great reputation by exposing himself for many hours
to a heavy fire while ministering to the wounded and
dying. In 1678 he fell a victim to the Dutch
conspiracy by means of forged letters delivered to him
at Windsor but intended to be intercepted, and pur-
porting to have been written by the provincial and
Fathers of the Society. He handed the letters to the
Duke of York who showed them to the king. The
latter was convinced of the fraud, and testified openly to Father Downes’s innocence, but was unable to protect him from the malice of the plotters who succeeded in getting him arrested and sent to the Gatehouse prison where he died.

Downside Abbey, near Bath, Somersetshire, England, was founded at Douai, Flanders, under the patronage of St. Gregory the Great, in 1605 by the Venerable John Roberts, first prior, and some other English monks who had received the habit and taken vows in the Spanish Benedictine Congregation. In 1611 Dom Philip de Cavre, Abbot of Saint Vaast’s at Arras, built a monastery for the community in Douai, and consequently is revered as its founder. For some years the foundation was embroiled in attacks from without, and also in disputes as to a union with other English Benedictines, all of which were settled in 1633 by the Bull “Piantata” of Urban VIII.

From the first a school or college for lay pupils, sons of English Catholic gentry, has been an integral part of the institution. This undertaking, conducted on traditional English public school lines, has always absorbed much of the energies of the community, whose other chief external work has consisted in supplying various missions or parishes in England. When Charles II established for his queen a Catholic chapel royal at St. James’s palace, the community to serve it was supplied from St. Gregory’s at Douai, and certain relics and church-plate then presented are still in existence at Downside. On the outbreak of the French Revolution the school was disbanded and the monks put in prison, where they remained nearly two years. At length, in March, 1795, they were allowed to proceed to England where an asylum was supplied by Sir Edward Smythe, fifth Baronet, a former pupil, who lent his Shropshire seat of Aston Burnell to his old masters for use as a monastery and school. In 1814 the establishment was moved to Mount Pleasant, Downside, and in 1816 occupied a site of sixty acres of land, bought for £7000, largely the savings of the economy of the previous nineteen years. In 1823 Dr. Baines, Vicar Apostolic of the Western District, proposed to the community that they should abandon the monastic state and become a kind of diocesan diocese in itself. This extraordinary suggestion being rejected, the bishop applied to the Holy See for the suppression of the monastery on the ground of some alleged flaw in its canonical erection; after much litigation the pope decided in favour of the monks on every point. Since then the establishment has increased steadily in size and importance, new buildings being added in 1823, 1833, and almost continually since 1870. In 1899 Pope Leo XIII raised the priory to abbatial rank, the forty-fifth prior, Dom Edmund Ford, being elected first abbot, on whose resignation in 1906, Dom Cuthbert Butler was chosen to succeed him.

Six monks of St. Gregory’s have died martyrs for the Catholic Faith and are already pronounced Venerable, viz., Dom George Gervaise, martyred 1608; Dom John Roberts, the first prior, 1610; Dom Maurus Scot, 1612; Dom Ambrose Barlow, 1641; Dom Philip Powell, 1646; and Brother Thomas Pickering, 1679. Besides these the community has given to the Church three archbishops, Dom Bede Polding and Dom Bede Vaughan, the first two archbishops of Sydney, New South Wales; and Dom Bernard Ullathorne, first Bishop of Birmingham and titular Archbishop of Cabassa, well known as an ascetical writer. Also six bishops, Dom Philip Ellis, Dom Laurence York, and Dom Gregory Sharrock, all three successively Vicars Apostolic of the Western District; more recently, Dom Placid Morris, Vicar Apostolic of Mauritius and for many years assistant to Cardinal Wiseman; Dom Joseph Brown, first Bishop of Newport and Menevia; and Dom Henry Davis, Bishop of Maitland, New South Wales. From many other notable names may be mentioned Dom Serenus Cressy, author of the “Church History of Brittany”; Dom John Huddleston, who was instrumental in saving Charles II after Worcester and reconciled him to the Church on his death-bed; the Abbot Sweeney, the well-known preacher; Dom Jerome Vaughan, founder of the Abbey of Fort Augustus, N. B.; Dom Aidan Gasquet, the historian, Abbot President of the English Benedictines and also head of the Pontifical Commission for the revision of the Vulgate. Among the alumni of St. Gregory’s School, though not monks in the community, were Bishop Charles Walmesley, who consecrated Dr. Carroll the first Bishop of Baltimore, U. S. A.; John Steevens, editor of Daly’s “Monarchia sacra.”

CHAPEL OF ST. ISIDORE, DOWNSIDE ABBEY

(From the south-east)
DOXOLOGY

Catholic Encyclopedia, I, 14. The last-named building consists at present of transapsis, choir, and fifteen side chapels only; it is 230 feet long, and 70 feet high in its nave. In its present state it is the largest and one of the finest modern Gothic buildings in England, and contains the tomb of the Irish martyr, Ven. Oliver Plunket, Archbishop of Armagh. The community numbers eighty-four choir monks; there are no lay brothers. About half the monks work on the library or in the archives of the college. There are various parishes of England which are dependent on the abbey. Beside the school attached to the monastery, Downside has two other schools, at Ealing, London, W., and at Gorey, Co. Wexford, Ireland; a house of studies for its monks at Cambridge University and another for students in London, near the British Museum. The "Downside Review", a periodical now in its twenty-eighth year, devoted chiefly to local, monastic, and liturgical interests, and in which are many articles of value, is published every four months. The "Downside Masses" and "Downside Motets" indicate the abbey's interest in the revival of polyphonic music; a similar interest in Christian art being shown in the "Downside Prints", a series of small devotional pictures reproduced from ancient masters. Attached to the abbey is the Abuchoo Abbey of Althorp, and the abbeys of St. Alban's, and the cathedral priories of Canterbury, Bath, Coventry, and Norwich. The arms of Downside are: Or a cross moline gules; the abbot's seal bears an effigy of Bl. Richard Whiting, martyr, the last abbot of the neighbouring Abbey of Glastonbury.

G. ROGER HUDLESTON.

DOXOLOGY.—In general this word means a short verse praising God and beginning, as a rule, with the Greek word Δέος. The custom of ending a rite or a hymn with such a formula comes from the Synagogue (cf. the Prayer of Manasseh: ἰη ἦ εἰς δόξαν ἐν σειρα σαφρομ. Amen). St. Paul uses doxologies constantly (Rom., xi, 36; Gal., i, 5; Eph., iii, 21; etc.). The Nicene Creed and the Apostles' Creed are either alone, or to Him through (έδεος) the Son (Rom., xvi, 27; Jude, 25; I Clem., xli; Mart. Polyc., xx; etc.) and in (έδεος) with (έδεος) the Holy Ghost (Mart. Polyc., xiv, xxii, etc.). The form of baptism (Matt., xlv, 19), the exchange of the first words, is the Persicus in parallel order. Especially in the fourth century, as a protest against Arian subordination (since heretics appealed to these prepositions; cf. St. Basil, "De Spir. Sancto", ii-v), the custom of using the form: "Glory to the Father, and to the Son, and to the Holy Ghost", became universal among the Catholics. From this time we must distinguish two doxologies, a greater (doxologia maior) and a shorter (minor). The greater doxology is the Gloria in Excelsis Deo (q.v.) in the Mass. The shorter form, which is the one generally referred to under the name "doxologia", is the Gloria Patri. It is continued by an answer to the effect that this glory shall last forever. The form, εἰς τοὺς αἰῶνας τῶν αἰῶνων, is very common in the first centuries (Rom., xvi, 27; Gal., i, 5; Tum, i, 17; Heb., xii, 21; 1 Peter, iv, 11; 1 Clem., xx, xxxi, xxviii, xiii, xiv, etc.; Matt., xiv, etc.). It is a common Hebraism (Toth., xii, 23; Ps., lxxxiii, 5; repeated in the Apocalypse: i, 6, 18; xiv, 11; xiv, 3; etc.) meaning simply "for ever." The simple form, εἰς τοὺς αἰῶνας, is also common (Rom., xi, 36; Doctr. XII Apost., ix; in the Liturgy of St. James, (Brightman, Eastern Liturgies, pp. 31, 32, 33, 34, 41, etc.), in all the Eastern rites. The Greek form then becomes: Δέος τὸν αἰῶνα καὶ τὸν αἰῶνα καὶ τοῦ αἰῶνος τῶν αἰῶνων. In this shape it is used in the Eastern Churches at various points of the Liturgy (e.g. in St. Chrysostom's Rite; see Brightman, pp. 384. 394, etc.) and as the last two verses of psalms, though not so invariably as with us. The second part is occasionally slightly modified and other verses are sometimes introduced between the two halves. In the Latin Rite it seems originally to have had exactly the same form as in the East. In 529 the Second Synod of Vasto (Vaison in the province of Avignon) says that the additional words, Sicet erat in principio, are used in Rome, the East, and Africa as a protest against Arianism, and orders them to be said likewise in Gaul (can.v.). As far as the East is concerned the synod is mistaken. These words have never been used in any Eastern rite and the Greeks complained of their use in the West (Walfred Strabo (ninth century)). De Ricco, De Sicet erat in principio was meant as a denial of Arianism leads to a question whose answer is less obvious than it seems. To what do the words refer? Everyone now understands gloria as the subject of erat: "As it [the glory] was in the beginning", etc. It seems, however, that originally they were meant to refer to Filius, and that the meaning of the second part, in the West at any rate, was: "As He [the Son] was in the beginning, so is He now and shall so be forever." The is principii, then, is a clear allusion to the first words of the Fourth Gospel, and the sentence is obviously directed against Arianism. There are medieval German versions in the form: *Als er war im Anfang*. The doxology in the form in which we know it has been used since about the seventh century all over Western Christendom, except in one corner. In the Mozarabic Rite the formula is: "Gloria et honor Patri et Filio et Spiritui sancto in secula seculorum" (so in the Missal of this rite; see P. L., LXXXV, 109, 119, etc.). The Fourth Synod of Toledo in 633 ordered this form, but 650 God the Father was set down first, and the order was found on a spurious letter of St. Jerome (in Beneditine edition, Paris, 1706, V, 415) says that Pope Damasus (366-384) introduced the Gloria Patri at the end of psalms. Cassian (died c. 435) speaks of the Gloria Patri as a conclusion of the morning or evening Church (De Institut, con., II, viii). The use of the shorter form in the Latin Church is this: the two parts are always said or sung as a verse with response. They occur always at the end of psalms (when several psalms are joined together as one, as the sixty-second and sixtieth) and again at the end of the forty-fourth, one hundred and forty-ninth and one hundred and fiftieth at Lauds, the Gloria Patri occurs once only at the end of the group; on the other hand each group of sixteen verses of the one hundred and eighteenth psalm in the day Hours has the Gloria except on occasions of mourning. For this reason (since the shorter doxology, like the greater one, Gloria in Excelsis Deo, is naturally a joyful chant) it is left out on the last three days of Holy Week; in the Office for the Dead its place is taken by the verses: *Requiem aeternam*, etc. and *Ecce tunc* (q.v.) of the Mass. It alio modo, it seems, that the Benedicite has its own doxology (Benedicite, qui...*Benedictus et Domine*, etc.—the only alternative one left in the Roman Rite). In the Mass it occurs after three psalms, the "Judica me" at the beginning of the Introit-Psalm, and the "Iesu" (omitted in Passion-tide). In the Mass on feasts, and at requiem Masses. The first part only
occurs in the responsoria throughout the Office, with a variable answer (the second part of the first verse) instead of "Sicut erat," the whole doxology after the "Deus in adiutorium," and in the preces at Prime; and again, this time as one verse, at the end of the innsunorium. These places it will be seen to occur in the Office for the Dead and at the end of Holy Week.

The Gloria Patri is also constantly used in extraliturigial services, such as the Rosary. It was a common custom in the Middle Ages for preachers to end sermons with it. In some countries, Germany especially, people make the sign of the cross at the first part of the doxology, considering it as chiefly a profession of faith.

Liturgik, 1, 490 sq.; HEBER, Briefe aus Aachen, 3, 133 sq.; RITSCHL, Lehrbuch der Liturgik, 1, 355 sq.; KRAUS, Real-Encyk., I, 377 sq.

ADRIAN FORTESCUE.

DOYLE, JAMES WARREN, Irish bishop; b. near New Ross, County Wexford, Ireland, 1786; d. at Carlow, 1834. He belonged to a family, respectable but poor, and received his early education at Conleich, at Rathcomogue, and later at the Augustinian College. Shortly after 1800, he joined the Augustinian Order and was sent to Coimbra in Portugal, and there, at the university, first manifested his great intellectual powers. In the university library he read everything, Voltaire and Rousseau among the rest. As a consequence his faith became unsettled; but his vigorous intellect soon asserted itself, and subsequently he became the fearless champion of the Church in which he was born. During the French invasion he did sentry work at Coimbra, and accompanied the English to Lisbon as interpreter, and much service he rendered on his return to Portugal Court that he was offered high employment there. He declined the offer, however, and, returning to Ireland in 1808, was ordained priest the following year. Then for eight years he taught logic at the Augustinian College, New Ross. In 1817 he became professor at Carlow College, and two years later the priests of Kildare and Leighlin placed him dignissimus for the vacant see. Their choice was approved at Rome, and thus, in 1819, Doyle became bishop. At that time the effects of the Penal Laws were still visible in the College. Education was despised, and the difficulty of securing the means to make good even the most humble of the persons in question which exist.

DOYLE, RICHARD, English artist and caricaturist; b. in London, September, 1824; d. there 11 December, 1883. The second son of John Doyle (q. v.), he inherited much of his father's talent and excelled the elder Doyle in skill and in power as a draughtsman. From a very early age he amused himself with making drawings. He prepared an account of the Eglington Tournament when he was but fifteen, and at the age of sixteen commenced his famous journal, now preserved in the British Museum. The journal is a manuscript book containing many small sketches in pen and ink, executed with skill and brilliance, and marked by powers of observation and by a sense of humour hardly equalled and certainly not excelled in later years. This extraordinary work was reproduced in facsimile in 1885 with an introduction by J. H. Pollen, and is a remarkable proof of Richard Doyle's precocity as an artist. In 1843 he became a contributor to "Punch" and continued on the same staff of that periodical. He produced many cartoons, but his name will be especially remembered from the fact that he designed the cover for "Punch" which has continued in use down to the present time. He also wrote for "Punch" a series of articles entitled "Manners and Customs of ye Englyshe".

A
very devout Catholic, he resigned his position on the staff of the paper in 1850 in consequence of its hostility to what was termed "papal aggression", and devoted the remainder of his career to preparing drawings for book illustration and to painting in water-colour. His chief series of illustrations were those for "The Life of St. Thekla" (1855); "Golden River" (1856); "In Fairyland", and "The Foreign Tour of Brown, Jones and Robinson". His water-colour drawings were marked by much poetic feeling, and were executed in harmonious low-toned schemes of colour. His genius has been well described as "kindly, frolicsome and slightly grotesque", and was full of imagination and delighted in imaginative fancy, while his caricatures are exhaustively drawn, amusing and graceful, lacking perhaps the strength of his father's work but far exceeding them in charm and in quality of amusement. There are many of his drawings in the British Museum, and some of his sketch-books are in the Fitzwilliam Museum at Cambridge.

The Month (London, March, 1854); Everett, English Caricaturists (London, 1860); Benton, Drawings in the British Museum (London, 1900); Dombey, in Dict. Nat. Biog., s. v. George Charles Williamson.

Drach, David Paul, convert from Judaism, b. at Strasbourg, 6 March, 1791; d. end of January, 1868, at Rome. Rosenthall's "Convertisseinsbiler" (III, 48) prefaces the autobiography of Drach with the following: "All the disciples of the "gospel" in Belgium, who learned Judaism, are undoubtedly one of the most important conversions effected by the grace of God during this century in France and became the source of salvation to many of his coreligionists." This conversion, affecting one who enjoyed the highest esteem as an author and a learned rabbi, produced a most profound impression on all active and earnest minds of the rising generation, and invited them to the study of the more serious problems of life. His endeavours to lead his coreligionists to the living fountain of truth, to the acknowledgment of Jesus as the real and true Messiah, crystallized in numerous writings and were blessed by God. Herein lies the net result of this scholar's conversion.

Drach received his first instruction at the hands of his father, a renowned Hebraist and Talmudic scholar, whose linguistic knowledge he so intense. At the age of twelve Drach entered the first division of the Talmudic school in Endendorf near Strasbourg. This course of study, lasting ordinarily for three years, he completed in one year, and entered the second division of the school in Biischheim in the following year. He graduated in eighteen months and then matriculated in Westhofen to qualify as a teacher of the Talmud. When only sixteen years of age he accepted the position of instructor at Rappoltswiller, remaining there three years; afterwards he followed the same profession in Colmar. Here the ambitious youth devoted himself zealously to the study of secular sciences to which he had already seriously applied himself while prosecuting his Talmudic studies. Having obtained the rather unwilling permission of his father, he left Paris where he received a call to a prominent position in the Central Jewish Consistory and at the same time fulfilled the duties of tutor in the household of a distinguished Jew. The marked results of his method of teaching induced even Christian families to entrust their children to his care. It was under his tuition that the first impulse towards a change of his religious views which ultimately resulted in his conversion. He writes: "Stirred by the edifying examples of Catholic piety continually set before me to the furtherance of my own salvation, the tendency towards Christianity, born in earlier life, acquired such strength that I resisted no longer. He now applied himself studiously to pietistic theology and specialised in the study of the Septuagint with a view towards ascertaining the truth of the unimpeachable prophecies of the Fathers, viz. that the Jews had falsified the Hebrew text. These studies resulted in his unquestioned belief in the Divinity and Messiahship of Jesus Christ. On Maundy Thursday, 1823, he renounced Judaism in the presence of Archbishop Quelen, in Paris, was baptised the following (Holy) Saturday, and on Easter morning received his first Holy Communion and the Sacrament of Confirmation. Two daughters and an infant son were also baptised. His wife, the only member of the family who adhered staunchly to the old faith, abdusted the children. They were returned, however, after two years.

After a few years Drach went to Rome, where he was appointed librarian of the Propaganda (1827), which office he held at his death. Among the many converts who trace their conversion to the influence of Drach's example are the Libermann brothers; Franz Maria Paul Libermann was especially indebted to Drach for his sound advice and active assistance in the establishment of the "Congregation of the Immaculate Heart of Mary". Of Drach's numerous writings the following deserves particular mention: "Lettres sur les rabbins" (5 vols., Paris, 1823-1825). He also published the "Bible de Vence", with annotations (Paris, 1827-1833) in 27 volumes octavo. He remodelled the Hebrew-Latin Dictionary of Gesenius, and published a Catholic Hebrew-Latin Dictionary (Paris, 1848). He wrote, moreover, "Du divorce dans la synagogue" (Rome, 1840); "Harmonie entre l'église et la synagogue" (Paris, 1844); and "La Cabale des Hébreux" (Rome, 1864). Paul Augustin, son of the preceding, b. 12 Aug., 1817; d. 29 Oct., 1865; appointed to Notre-Dame and exequy of importance. He studied at the Propaganda College in Rome and was ordained priest there in 1846. We owe to him a large French Bible commentary (La Sainte Bible, Paris, 1869) in which he himself wrote on the Pauline Epistles (1871), the Catholic Epistles (1870), and the Apocalypse (1879). Rosenthall, Convertisseinsbiler, III, 48; Grube in Kirchenlehr., III, 201; Hunter, Nomenclator, Pitra, Life of the Venerable Father Gregorius; Nervi, Vita di Gregorio e Father Gregorius (Paris, 1848). His son, Annibale Libermann, was a convert to Catholicism and wrote a "History of the Jews in France", which was published in 1871.

Drachma (Gr. δραχμή), a Greek silver coin. The Greeks derived the word from δραχμα, "to grip", "to take a handful"; cf. δραχμος, mantricus, a handshake". Thus the word has the originally signified a sum of gold (Liddell and Scott; Riehm, "Handwörterbuch", Smith, "Dict. of Antiq."). But in Vigouroux, "Dict. de la Bible", the term is derived from darrag-mana, the name of a Persian coin equivalent to the Hebrew פודס, darragmim. The Persian word darag, Aryan drach, means "degree", "qualification". Thus the words darrag-mana and drachma would signify a part of a mina. The darrag-mana was also called a Daric because it was first struck by the emperor Darius Hystaspis. The drachma contained six oboli. It was the fourth part of a stater, the hundredth part of a mina, and was the weight that the Old Testament must of Maman, and its size was about that of a quarter. On the one side it had the head of Minerva, and on the reverse her legend, the owl, surrounded by a crown of laurels. The Eginetian drachma weighed about 93 grains and was the third of a talent. The Old Testament mentions (Mamre, 1932) this third drachma. It was current in the Peloponnesus (Corinth excepted, Riehm, "Handwörterb." and in Macedonia until Alexander the Great. The drachma is mentioned in the Old Testament (II Machabees).
C. VAN DEN BEREN.

**Draco**.

**Draco**, Blosius Zmelius, a Christian poet of the fifth century. Draco's was a distinguished family of Carthage, and the poet was the pupil of a successful and learned Felicianus. His early career as a Christian (most illustrious) won the favor of theacon's Proculus, and he lived a prosperous life by means of inherited riches and the income of his law practice until he incurred the ill will of the Vandal king, Gunthamund. The cause of this misfortune seems to have been the expression of sentiments of Roman-Byzantine patriotism; for these utterances Draco lost a great imprisonment. Nothing more is known of his history except that he was still alive when Thrasamund ascended the throne in 496, and that he composed "De laudibus Dei," three books on God (De laudibus Dei), and a poem entitled "Satisfacit". The latter two were written in prison; the first mentioned is a collection of pieces composed at various times and written in the style of rhetorical school exercises. Thus, in the first poem, he states that man is an amphictyon and a poor man as enemies; as a reward for the rights of the rich man his statue is erected in the public square and accorded the right of sanctuary. Later, in recompense for additional service, the rich man asks a favor for the poor one, whereupon the latter feasts to the chagrin of his former benefactor. In a part, the author also reflects on his former teacher, and on the three "Epithalamia" for two couples who were friends, his style is occasionally less conventional. The writing forms the "Romulea" contain but little suggestion of a Christian poet; on the other hand, the "Satisfacit" and the "De laudibus Dei" manifest an ardent and sometimes eloquent faith. The "Satisfacit", written about 496, was intended to be instrumental in obtaining the royal pardon; the "De laudibus Dei", produced between 496 and 496, is a recital of God's benefits. The first book of the "De laudibus Dei" has for its main content a description of the creation; the chief theme of the second book is the glorification of God; in the third volume, it also contains vehement attacks on Arianism; the third, as is the case unmistakable, the hope of the Christian who denies himself in order to love God. The Christian who denies himself in order to love God. The Christian who denies himself in order to love God.}

**Draco**, in religion MOTHER FRANCIS RAMFELL, Q.C.D., d.d., born at Ben- don, in 1823; d. at Stone, Staffordshire, 29 April, 1894. Her parents were both Protestants, her father being managing partner in an East India mercantile house. Her remarkable natural gifts were developed by wide reading at a very early age. In 1847 she married her (family to Babbacombe, Devonshire, where she read much of the early literature of the Oxford Movement. Burnet's "History of the Reformation", she declared, was the real cause of her conversion. It was not, however, till 1847 that she grew uneasy as to her religious beliefs, when she consulted Keble and Pusey, but without satisfaction. The influence of Maskell, then Vicar of St. Mary Church, helped her more and she confided to him a scheme called "Ideals of a Religious Order". He held her that such and order existed in the Catholic church, naming the Third Order of Dominicans. This made a profound impression on her mind and gradually she was drawn to the Church. She was received at Tiverton, 3 July, 1850, and in 1852 entered the Third Order of St. Dominic at Clifton. On 8 December, 1853, she was professed as a nun, and was thereafter called Sister of the Immaculate Conception, and was there employed in teaching and in writing various books, meanwhile making great spiritual progress. In 1860 she was appointed mistress of novices, but in 1863 became mistress of studies instead, thus obtaining more leisure for writing. In 1872 she became prior under her friend, Mother Imelda Poole, and on the death of the latter in 1881 succeeded her as provincial (25 Nov., 1881), thus taking charge of the whole congregation and the convents of Stoke-on-Trent, Bow, and St. Mary Church. Her character was well summed up by Bishop Ullathorne when he described her as "one of those many-sided characters who can write a book, draw a picture, rule an Order, guide other souls, superintend a building, lay out grounds, or perform practical advice with equal facility and success. She continued to glow in remarkable sanctity till her death, which took place a fortnight after she had ceased to be provincial.

Her works include: "The Morality of Tractarianism" (1850), published anonymously; "Catholic Legends and Stories" (1856); "Life of St. Dominic" (1857); "Knights of the Catholic Church" (1858); "Three Chancellors, Wykeham, Waynflete and More" (1859); "Historical Tales" (1862); "Tales and Traditions" (1862); "History of England for Family Use" (1864);
“Christian Schools and Scholars” (1867); “Biographical Sketch of Hon. H. Dormer” (1868); “Songs in the Night” (1875); “New Utopia” (1876); “History of St. Catherine of Sienna” (1880); “History of St. Dominick” (1891); “The Spirit of the Dominican Order” (1896), and seventeen shorter pieces. She translated the “Inner Life of Père Lacordaire” (1886), edited a “Life of Mother Margaret Mary Hallehan” (1889), “Archbishop Ullathorne’s Autobiography” (1891), and “Letters of Archbishop Ullathorne” (1892), and edited体积的“Letters of the Mediator” (London, 1885); “Coopees in Dict. Nat. Bioq. (London, 1881), Supp., Vol. II; Anno dominicano, July, 1887.”

EDWIN BURTON.

DREAMS, INTERPRETATION OF.—There is in sleep something mysterious which seems, from the earliest times, to have impressed man and aroused his curiosity. What philosophy of sleep sprang from the observation of the phenomenon, we do not know; but, like all phenomena the causes of which are not obvious, sleep came, in the course of time, to be considered as an effect of the Divine agency and as something sacred. We have already referred to the simple ex-primitive philosophy in the reverence shown at all times by the Arabs to a man sleeping. But the mystery of sleep is enhanced by the phenomenon of dream which accompanies it. Primitive people, unable to explain the mysterious effect due to discovering the causes of sleep, observed that, whereas man, when awake, control his thoughts and fancies, yet he is utterly incapable, when in sleep, either of bringing about such dreams as he might wish, or of directing and ruling those that offer themselves to his faculties; hence they were led to ascribe dreams to outside and supernatural agencies. The gods, whose power was believed to manifest itself in natural effects, such as thunderstorms and earthquakes, whose messages were supposed to be written by signs in the heavens, could as well be the originators of dreams as of any other communications. Hence the persuasion arose that persons favoured by frequent dreams were sacred and chosen intermediaries between the deity and man. Far from being cast aside by advancing civilization, these ideas developed with it, and were to a certain extent even systematised, as appears in particular from the records of the ancient peoples of the East. All these took it for granted that every dream expressed a Divine message. Most dreams came unsought; but occasionally supernatural communications were solicited by “insubstantial” dreams when the dreamer was addressing a proper address to the deity, the temple of Serapis, and that of Hathor, near the turquoise mines of the Sinai Peninsula, are the best known. As a last means to wrest the dream from a reluctant deity, magic was also resorted to. An interesting example of magical formulae used for this purpose is contained in a Gnostic papyrus of relatively late date preserved in the Leyden Museum; it is entitled “Aphorisms’ Recipe for sending a dream”, and may be read in Wiedemann’s “Religion der alten Ägypter” (p. 14). The meaning of the Divine message conveyed in dreams was sometimes obvious and unmistakable, as when the facts to be known were plainly revealed either by the deity himself or through the ministry of some messenger. Thus Thotmes IV was instructed by Ra Hormakhhu in a dream to dig out of the sand the statue of the Great Sphinx, near the place where he was sleeping. In like manner the early Babylonian king, Gudes, received the command to erect the temple Erimnu to Nimib. Of this description also were the dreams recorded in the annals of King Ashurbanipal. From these documents we learn that Ashur appeared in a dream to Gyeys, King of Lydia, and said to him: “Embrace the feet of Ashur and pay him homage, and henceforth succeed in conquering the Kimmerians. Another passage relates that, in the course of an expedition against Elam, as the Assyrian troops were afraid to cross the Tigris River, Ishtar of Arsinon appeared to them in their sleep and said: “I go before Ashurbanipal, the king whom my hands have made.”

Encouraged by this vision, the army crossed the river (“West, As. Inscri.”, vol. III; G. Smith, “Hist. of Ashurbanipal”). The Divinely sent dream might also at times forebode some coming event. Moreover, its meaning was not always clear and might be shrouded in symbols, or, if conveyed through oral communication, wrapped up in figures of speech. In either case, the knowledge of the significance of the dream would depend on the interpretation. And as most dreams portend no clear message, the task of unfolding dream symbols and figures gradually grew into an art, more or less associated with soothsaying. Elaborate rules were laid down and handbooks compiled for the guidance of the priests in explaining the portent of the vicious and symbols perceived by the inquirer in his sleep.

Many such manuals have been found in Assyria and Babylonia, the contents of which enable us to understand the principles followed in dream-interpretation. From Dan, ii, 2 sqq., it would seem that the potters, or dream-interpreters, might be called upon even to discharge the perplexing task of recalling dreams forgotten by the dreamer. The instance here recorded cannot, however, be much insulin upon, as the context distinctly intimates that this was “except to the men”, yet incident upon the Babylonian diviners by a whim of the king, was beyond their acknowledged attributions. Most of the Egyptian magic books likewise contain incantations either to procure or to explain dreams. These incantations had to be recited according to fixed cantillations, and the soothsayer’s art consisted in knowing them thoroughly, copying them faithfully, and applying them properly. Side by side with this religious view of dreams, which regarded them as the expression of the will of the god, there existed another superstitious view, according to which all dreams were considered omens. Assuming “that things causally connected in thought are causally connected in fact” (Jeovas), people blindly believed that their dreams had a bearing on their own fate, and eagerly strove to discover their significance.

Like the Eastern peoples, the Greeks and the Romans attached a religious significance to dreams. Of this belief many traces may be found in classical literature. Homer and Herodotus thought it natural that the gods should send dreams to men, even to deceive them, if needs be, for the accomplishment of their higher ends (Agamemnon’s dream). The same indications may be found also in the works of the dramatists (e.g. Clytemnestra’s dream in the “Agamemnon” of Aeschylus). Plato, whilst regarding it as inconceivable that a god should deceive men, admitted nevertheless that dreams may come from the gods (Tim., cc. xvi, xlv). Aristotle was similarly of the opinion that there is a divinatory value in dreams (De Divin. per somn., ii). The teaching of the Stoics was along the same lines, if the gods, that are omnipresent as well as all-powerful, they certainly may disclose their purposes to man in sleep. Finally, in Greece and Rome, as well as in the East, the popular views of dreams went a great deal farther and developed into superstition. It was in accordance with these views, and to gratify the cravings which they
created, that Daldianus Artemidorus compiled his "Onomacritica", in which rules were laid down whereby one could "God speaketh once. By a dream in a vision by night, when deep sleep falleth upon men, and they are sleeping in their beds: then he openeth the ears of men, and teaching instructeth them in what they are to learn. As a matter of fact, Divine revelation through dreams occurs frequently in the Old and New Testament; the religious part of the dream is expressly said to come from God; of this description are, e.g., the dreams of Abimelech (Gen., xx, 3); of Jacob (Gen., xxi, 12, 13); of Solomon (I Ki., iii, 5, 15); of Nebuchadnezzar (Dan., ii, 19); of Daniel (Dan., vii, 1); of Joseph (Matth., i, 20; ii, 13); of St. Paul (Acts, xxiii, 11; xxvii, 23), unless we should interpret these passages as referring to visions granted to the Apostle while awake. God is said to appear Himself only in a few instances, as to Abimelech, to Jacob, to Solomon, and to Daniel, ii, 18, etc. Above all the events spoken of in this connexion, should be understood to be God; in other instances He is said to speak through an angel, as in the dreams narrated by St. Matthew and St. Paul. The Bible records other dreams, which, though prophetic, are not distinctly said to come from God (Gen., xxxvii, 6; xl, 5; xli, 1; Judges, vii, 12; II Mach., xv, 11). It appears, however, from the circumstances and from their prophetic import, that their Divine origin cannot be doubted; at least their interpretation is declared (Gen., xl, 8) to "belong to God." Accepting the historical truth of these facts, there is no reason indeed why God should not use dreams as a means of manifesting His will to man. God is omniscient and all-powerful, and He loves man; He may, therefore, in order to disclose his purposes, choose natural as well as supernatural means. Now dreaming, as a natural psycho-physiological phenomenon, has undoubtedly its laws, which, however obscure they may be to man, are established by God, and obey His bidding. But since man may be easily deceived, it is needful that God in using natural causes should select them as to natural skill or art; their interpretations were suggested to them by the Divine intellect enlightening their minds; "interpretation belongs to God," as Joseph declared to his fellow-prisoners. Undoubtedly there were among the people some soothsayers ever ready to speak the word of God; but as they possessed no authority and as they were condemned both by God and by the higher religious consciousness of the community, they practised their art in secret.

That certain dreams may be caused by God seemed to be acknowledged without controversy by the early Fathers of the Church and the ecclesiastical writers. This opinion they based mainly on Biblical authority; occasionally they appealed to the authority of classical writers. Agreeably to this doctrine, it was admitted likewise that the interpretation of supernatural dreams belongs to God who sends them, and who must manifest it either to the dreamer or to an authorized interpreter. The divine intervention in man's dreams is an exceptional occurrence; dreaming, on the contrary, is a most common fact. Not all the official guardians of the Faith viewed ordinary and natural dreams. In general they repeated to the Christians the prohibitions and warnings of the Old Testament, and denounced in particular the superstitious tendency to consider dreams as omens. It may suffice in this connexion to recall the names of St. Cyril of Jerusalem, St. Gregory of Nyssa, and St. Gregory the Great, whose teaching on the
DREchsel 156

question at issue is clear and emphatic. A few, however, held opinions somewhat at variance with the traditional view. Among them the most noteworthy is Synesius of Cyrene (about 370-413), who is the author of a very strange treatise on dreams. Starting from the Platonic anthropological trichotomy, and from certain psychological hypotheses of Plato and Plotinus, he attributed to the imagination a manifestly exaggerated role. Above all the arts of divination, the lawful use of which he did not seem to doubt, he extolled dreaming as the simplest and surest mode of prophecy. We know that he had accepted the episcopal dignity, and that he might continue to hold certain favourite philosophic ideas; and it is reasonable to suppose that his theories on dreams were included in the compact.

Medieval theologians added to the reasonings of their predecessors a more careful, and to some extent more scientific, study of the phenomena of sleep; but they found no reason to depart from the moral principles contained in the writings of the Fathers. Suffice it here to quote St. Thomas Aquinas, who summarised the best teaching of the Schoolmen. To the query: Is dreaming through dreams possible? in 1271—"he replies: The whole doctrine consists in determining the cause of dreams, and examining whether the same may be the cause of future events, or at least come to the actual knowledge of them. Dreams come sometimes from internal, and sometimes from external, causes. The latter are external causes of our dreams, whether animal, inasmuch as such images remain in a sleeping man's fantasy as were dwelling on his mind, and the other found in the body: it is indeed a well-known fact that the actual disposition of the body causes a reaction on the fantasy. Now it is self-evident that neither of these causes has any influence on individual future events. Our dreams may likewise be the effects of a twofold external cause. This is corporeal when exterior agencies, such as the atmospheric conditions or others, act on the imagination of the sleeper. Finally dreams may be caused by spiritual agents, such as God, directly, or indirectly through his angels, and the devil. It is easy to conclude thence what chances there are to know the future from dreams, and when divination will be lawful or unlawful. [Lib., 1271, a. 107]. Modern theologians, while professing by the progress of psychological research, continue to admit the possibility of dreams supernatural in their origin, and consequently the possibility of dream-interpretation depending upon supernatural communications. As to ordinary dreams, the reason, because only the imaginative faculties of man acquire sometimes a keenness which they do not possess otherwise, it is possible in such cases to conjecture with a certain degree of probability some future events; but in all other cases, by far the most common, it is useless and illogical to attempt any interpretation. As a matter of fact dreams are now—

we speak of civilized peoples—seldom heeded; only very ignorant and superstitious persons ponder over the "dictionaries of dreams" and the "keys to the interpretation of dreams" once so much in favour. "A

idle as a dream" has become a proverb expressive of the popular mind on the subject, and indicating sufficiently that there is little need nowadays to revive the laws and canons enacted in past ages against divination through dreams.

burg, 1892); DEMETRIUS, La Doctrina de Sacred Scripture (New York, 1883); RIDDLE, History of Divination (1892).

CHARLES L. SOUVAY.

DREchsel (also DREXILLIUS of DREXEL), JEREMIAS, Jesuit writer, b. at Augsburg, 15 August, 1881; entered the Society of Jesus 27 July, 1958; d. at Munich, 19 April, 1838. He was professor of humanities and rhetoric at Augsburg and Dillingen, and for twenty-three years court preacher to the Elector of Bavaria. His writings enjoyed an immense popularity. Chief among them are his "Considerations de t'Antestrate" (Munich, 1820), of which there were nine editions; in addition to these Leyer printed 330 copies in Latin and 400 in German. It was also translated into English (Cambridge, 1832; Oxford, 1861; London, 1710 and 1844) and into Polish, French, and Italian. His "Zodiacus Christianus" or "The Twelve Signs of Predestination" (Munich, 1822), is another famous book, with three editions, of which the fourteenth was published in 1842. Eight editions had already been issued and it was translated into several European languages. "The Guardian Angel's Clock" was first issued at Munich, 1822, and went through seven editions in twenty years; it was also translated extensively. "Necetas seu Triumpha conscientia" (Munich, 1824) was dedicated to the sodalists of a dozen or more cities which he names on the title page; "Trismegistus" was printed in the same year and place; "Heliotropium" or "Conformity of the Human with the Divine Will" came out in 1827; "Death the Messenger of Eternity" also bears the date of 1827. His fancy for odd titles shows itself in other books also. Thus there are the "Gymnasium of Patiens"; "Orbis Phaeton, hoc est de universis vitis Linguis"; "Theology in a Nutshell"; "The only Friend of a German soul in the life of the human being"; "Venus" (Munich, 1836). He has also a "Certamen Poeticum"; "Rosae selectissimarum virtutum"; "Rhetorica Celestia"; "Gasophilacium Christi". There are in all thirty-four such books. Other works are: "Res bellecipe expediens Maximilianus" (1820), and some odes and sermons.

T. J. CAMPBELL.

Dresden, the capital of the Kingdom of Saxony and the residence of the royal family, is situated on both sides of the Elbe, which is here crossed by five bridges, and is surrounded by pleasing heights. Including the suburbs which now form a part of it, the city contained (1 December, 1905) 516,996 inhabitants, of whom 462,108 were Evangelical Lutherans, 2885 Evangelical Reformed, 44,079 Catholics, 3514 Jews, etc. Dresden is the residence of the vicar Apostolic for Saxony, and is the seat of the Catholic ecclesiastical district of the vicariate apostolic. There were in Dresden 42 ecclesiastics, including the vicar Apostolic, who is a titular bishop, 7 rectors, 4 court preachers, and 1 military chaplain. Dresden has 6 Catholic parish churches, of which 2 are only chapels, 1 garrison church, which is also used for Protestant worship, the church attached to St. Joseph's Institute, built in 1746, and 6 chapels. The most important of these edifices is the court church, one of the finest Rococo structures of Germany. It was built by the Italian master-builder, Gasparo Chiaveri, in the years 1739-51, for Frederick Augustus II (1733-63). The church has a finely painted ceiling, a high altar with altar-painting by Raphael Mengs, and valuable silver ornamentation; since 1823 the members of the royal family have been buried in the crypt. Among the other churches should be mentioned the parish church of Dresden-Neustadt, built, 1852-53, in Romanesque style and containing finely painted windows, and the chapel in the royal palace.

The Catholic schools of Dresden consist of a primary gymnasia with 4 ecclesiastical teacher schools and about 700 secondary and middle-class schools with nearly 3000 scholars, and 5 district schools with 3300 pupils. For girls there are also St. Joseph's Institute, founded in 1746 by Maria Josepha, wife of King Augustus III, to give poor Catholic girls food, clothing, and instruction,
DRESDEN

and the institution for noble young ladies, founded in 1761 by Freiherr von Burkersroda, in which Catholic young women of noble birth receive a home and an education. As houses of male orders are forbidden Saxony, Dresden has only convents of female congregations; these are: 2 houses of Grey Sisters who have charge of a hospital, St. Joseph's Institute, a home for servants, 2 kitchens for the poor, etc.; 1 convent of the Sisters of St. Charles Borromeo who conduct the Amalia home and a boarding home for working women. Among the Catholic societies of Dresden should be mentioned: the Catholic Press Association, the Teachers' Association, 2 working men's societies, the People's Association (Volkverein) of Catholic Germany, the journeymen's society (Gesell Verein) which carries on a boarding home, the Merchants' Association, 3 associations for youths, 2 societies of St. Charles Borromeo, the Catholic Casino, and 20 religious societies and brotherhoods. The only Catholic daily newspaper for Dresden and Saxony is the "Sächsische Volkszeitung".

Dresden was originally a village of the Sorbs, who in the sixth century settled on both sides of the Elbe. In the tenth century the territory was conquered by the Germans, and the Diocese of Meißen (see Munich) was erected in 968 for the conversion of the pagan Sorbs. The first church of Dresden, the church of Our Lady, was built about 1080. Towards the end of the eleventh century the Germans made a settlement, not far from the Sorbs, which is first mentioned in a deed of 1206 and is spoken of as a city as early as 1216. This new settlement, which gradually absorbed the other, received many privileges and rights from Margrave Heinrich the Illustrious (1230-55). The edifices then existing, which were founded in the time of this ruler are: the St. Maternus infirmary, the St. Bartholomäus infirmary, the Franciscan monastery, the church of which forms part of the present Protestant church of St. Sophia, and the church of the Holy Cross, which in 1234 received a piece of the True Cross and consequently became a great resort for pilgrims. After the death of Heinrich, besides the Margrave of Meissen, both the Bishop of Meissen and the monastery of in 1485 between the two brothers, Albrecht and Ernst, Dresden was included in the possessions of Albrecht, to whose successors it has ever since belonged. Soon after this, in 1491, a great fire laid waste the city, burning to the ground the church of the Holy Cross and 270 houses, but the town recovered quickly. The city developed rapidly under Duke George the Bearded (1500-39), who was a strong opponent of the religious innovations of Luther. Soon after his death, however, his brother Heinrich introduced the Reformation into Dresden (1539). The monasteries of the Franciscans and Augustinians were suppressed; twenty-seven altars of the church of the Holy Cross were destroyed and the paintings were removed; the vessels of gold and silver were taken from the churches by the council, and the holding of Catholic church services was soon after this entirely forbidden.

During the reign of Duke Maurice, who attained the electoral dignity, the two towns were consolidated in 1550; in the time of Maurice and his successors Dresden became one of the most beautiful cities of Germany. After the sufferings of the Thirty Years War Dresden was adorned by its rulers, Johann Georg, Augustus the Strong, and Frederick Augustus II, with fine edifices and numerous treasures of art, so that it competed with Paris in its attractions. The Seven Years War brought intense misery to the city, the population of which fell from 63,000 to the fourth part of
Drévès, Lébrecht Blücher, poet, b. at Hamburg, Germany, 12 September, 1816; d. at Feldkirch, 19 Dec., 1870. The famous Prussian General Blücher was his baptismal sponsor, whence his name. At fifteen he wrote the German and Latin poems faultless in rhyme and metre. Four years later he submitted a good-sized volume of poems to the critical judgment of A. von Chamisso and Gustav Schwab, and both expressed favourable opinions. This was followed shortly by a smaller volume entitled "Lyrische Anklänge." (Lyrical Melodies), and although these "melodies" were drafted on the music of his favourites, Chamisso, Uhland, Heine, Rückert, Schwab, and others, they were not devoid of a sweetness all their own. His studies in jurisprudence, prosecuted during these preceding years, were rewarded by the degree of doctor of laws summa cum laude, failed to extinguish the love of his favourite study of poetry. Another volume, entitled "Vigilien" (Vigils), fulfilled the earlier promises of this child-phenomenon. About this time, however, the pecuniary distress which he experienced, troubling space with financial difficulties in the young lawyer's family. Hitherto, although a strict Protestant, his entire religion had been summed up in the word poetry. Impending poverty destroyed this rather roseate view. His mental and bodily troubles, however, were more or less dissipated by his reception into the Catholic church on Candlemas Day, 1846. A subsequent appointment as notary raised him above immediate want. It was during these darker periods that he was most prolific as an author. In 1848 he had already published anonymously a third volume of poems "Schlichte Lieder" (Unpretentious Songs) embodying his battle-songs, "Lieder eines Hanseaten." Previous to this, when unhampereed by the dread of poverty, he had written (1868) the two-act comedy "Der Lebensrettet" (The Life-Saver) inscribing it: "A manuscript printed for (improved) private theatres."

The change of view involved in his conversion brought him two advantages, a loftier conception of his literary work and an enlarged circle of friends. His "Lieder der Kirche" (Church Hymns) paved his way to becoming a model translator of hymns (2d ed., 1868). He also dedicated his virile pen to the cause of religion in his native town by writing a "History of the Catholic Congregations in Hamburg and Altona". He likewise translated the "Nachtigallenlied" by the Pseudo-Bonaventura and St. Rembert's life of St. Ansgar, Apostle of the North. He undertook the thankless task of editing (1867) the important sources of the history of his native city in the "Annale Missionis der Katholiken in Hamburg". About this time he revised and republished his own works. This work was made easy for him by the advice and aid of the poet von Eichendorff who had become his warm friend. Meantime he had become the father of a happy family, and to secure for his promising son a good education he determined to remove to Feldkirch in the Vorarlberg. To compensate for the loss of his friend von Eichendorff he gained a new one, the poet Father Gall Morell. The most distinguished of his children is his son, Dr. G. Drévets, editor of the "Amerikanische medizinische"., a vast collection of medieval hymnology, which has already reached its fiftieth volume.

Rosenthal, Conversationsbildare (autobiography), I. 626-636; Kréstk, Lébrecht Drévets, ein Lebensbild (Freiburg im Br., 1897); Schmid, Dichterstimmen der Gegenwart (1905).

N. Schrid.

Drévets Family, the were the leading portrait engravers of France for over a hundred years. Their fame began with Pierre, and was sustained by his son, Pierre-Imbert, and by his nephew, Claude. Pierre Dréxel, born at Reims, 6th of April, 1663; d. in Paris, 1738, was the son of Etiennette Drevet, a man of excellent family, and began his studies with German Audran at Lyons, continuing them with Gérard Audran in Paris. So rapid was his progress, so quickly did he imbibe and assimilate knowledge, and with such precision and delicacy did he imitate the graver, that in 1696 he was made court engraver. In 1707 he was admitted to membership in the Académie des Beaux-Arts, his reception picture being an engraving of Robert de Cotte.

Rigaud's portraits were in high favour at the end of the seventeenth century and Drevet was the first to encounter and surmount the difficulties of translating into black and white the natural appearance of texture and materials which the brilliant oils readily presented. He was an excellent draughtsman, and he treated flesh and fabrics, the flash of jewels and the shimmer of steel, with painter-like realism, surpassing all his predecessors in these effects. With all his elegance of detail he produced a harmonious ensemble, combining artistic feeling with skilful technic. Although the few years of life preceding the death of great Nanteuill, he attained a style of his own. Previous engravers sacrificed much to make the head prominent, but Drevet made everything salient, though never violently so. Always engraving after oil-paintings, Drevet was at times uneven, but this was because the originals were uneven. Orders
Imbert died, his rooms in the Louvre were given to Claude, who proceeded to squander nearly all the money left him by his uncle and his cousin.

He engraved portraits of Henri Oswald, Cardinal d’Auvergne, after Rigaud, and of De Vintimille, Archbishop of Paris, also after Rigaud.

DREXEL, FRANCIS ANTHONY, banker, b. at Philadelphia, U.S.A., 20 June, 1824; d. there 15 Feb., 1885. He was the oldest son of Francis Martin Drexel, a Turroldrose by birth, and by profession a portrait-painter and musician, who in 1837 turned his attention to finance, and founded the house of Drexel & Co. in Philadelphia with connections with the firms of J. S. Morgan & Co. of New York, and Drexel, Harjes & Co. of Paris. Associated with him were his sons Francis Anthony, Anthony Joseph, and Joseph William. Francis Anthony began his financial career at the age of thirteen, and at his father’s death in 1853 became the senior member of the firm, and was recognised as one of America’s foremost financiers. The house of Drexel & Co. was in the public estimation unalterably associated with the strictest integrity and the most broadminded liberality. At critical periods it came generously to the support of the public credit. Francis A. Drexel’s growing fortune did not alienate him from religion or harden his heart against the appeals of charity. He remained to the end poor in spirit, and regarded his vast wealth merely as a Divinely lent instrument for doing good. In his exercises of piety and his copious distribution of charities, he was ably seconded by his second wife, Grace Bouvier Drexel, who died before him, and by his children by his first wife, who was Hannah J. Langstroth, who died 26 September, 1890, and was the wife of Walter George Smith, of Philadelphia, and Katharine, who entered religion and founded the congregation of the Sisters of the Blessed CATHOLIC ENCYCLOPEDIA, II, p. 599).

Another daughter, Louise, wife of Edward Morrell, was the only child of his second marriage.

In his will Mr. Drexel followed the Biblical injunction of bequeathing a tithe ($1,500,000) of his great estate to religious and charitable purposes, with the further proviso that in case his daughters should leave no issue, the entire estate should be distributed among the institutions specified in the will. His daughters continued to walk in the footsteps of their father. Among their own benefactions, Mrs. Smith and Mrs. Morrell founded the St. Francis Industrial School at Edington, Pennsylvania. The Francis A. Drexel Chair of Moral Theology in the Catholic University of America was founded by his daughters in honour of Mr. Drexel.

James F. Loughlin.

DREY, JOHANN SEBASTIAN VON, professor of theology at the University of Tübingen, b. 16 Oct., 1777, at
Killingen, in the parish of Röhlingen, in the then ecclesiastical principality of Ellwangen; d. 19 Feb., 1833. The parish of Röhlingen, an ex-Jesuit, noting the boy's talents, instructed him in the elements of Latin, and persuaded his parents to send him, in 1757, in spite of their extreme poverty, to the gymnasium of Ellwangen. There he lived partly on the charity of the townspeople and partly by tutoring, especially in Latin, mathematics, and physics. He studied theology, 1797–1799, at Augsburg; after 1799 he lived in the diocesan seminary at Pfaffhausen and was ordained in the summer of 1801. During his five years' stay of Ellwangen, Drey studied the then paramount philosophy of Kant, Fichte, and Schelling, and the philosophical erudition which he acquired in this study appears clearly in his scientific works. His position, from 1806, as professor of philosophy of religion, mathematics, and physics in the Catholic academy of Rottweil, formed a good preparation for his subsequent academical career.

When in 1812 King Frederick I of Württemberg founded the University of Ellwangen as a Catholic national university for his recently acquired Catholic territory, Drey was called to lecture there on dogmatics, history of dogma, apologetics, and introduction to theology. There he published two Latin dissertations: "Observata quaedam ad illustrandam Justini M. de regno millenario sentimentium" (1814), and "Dissertatio historico-theologicae originem et vieciudinem exomologoseos in ecclesias, catholicae ex documentis eclesiasticis illustrans" (1815), the latter of which was denounced to Rome, but without serious consequences for its author, at least for the time being.

When King William I (1817) incorporated the University of Ellwangen with the old national University of Tübingen as its Catholic faculty of theology, Drey with his colleagues, Gratz and Herbst, joined the staff of the new school and founded (1819), together with them and his new colleagues, Hirscher, the "Theologische Quartalschrift" of Tübingen, still flourishing; he took a prominent part in its publication and wrote for it a number of essays and reviews. In the same year he published: "Kurse Einleitung in das Studium der Theologie mit Rücksicht auf die wissenschaftlichen Standpunkt und das katholische System". An effort to make Drey first bishop of the newly founded Diocese of Rottenburg failed, among other reasons because of the distrust with which he was regarded in Rome owing to his above-named work on confession. Some years later Drey recompense the first position at the cathedral was reserved for him, which, however, he never filled. In 1832 appeared his "Neue Untersuchungen über die Konstitutionen und Kanonen der Apostel", a work of such thoroughness that only recent investigations, especially those of von Funk, have gone beyond it. After convalescing from a severe illness, he was relieved from his office as teacher of dogmatic theology (1838). Just then his principal work, in three volumes, appeared: "Die Apologetik als wissenschaftliche Nachweisung der Göttlichkeit des Christentums", in the second edition (1838–1847). Still comparatively robust, though well advanced in years, Drey was pensioned in 1846, almost against his will; he continued, however, to write for Wetzer and Welte's "Kirchenlexikon" and for the "Theologische Quartalschrift" of Tübingen. With Möhler, Drey was the founder of the so-called Catholic School of Tübingen. Like Möhler, Hefele, and von Funk, he was a true and critical historian. But Drey also gave to the systematic theology of this school its peculiar stamp, equi-distinct from Traditionalism and Rationalism, recognizing on the one hand the objective facts in the history of Revelation and the tradition from generation to generation, maintaining on the other the right of our natural reason and of philosophical speculation, with all due loyalty to dogma. Kuhn and Schans faithfully followed in the path marked out by Drey.

JOHANN BAPTIST SÄGMÜLLER.

Dromore, Diocese of (Dromorensis), and in ancient documents Dr. Morensis, one of the eight suffragans of Armagh, Ireland. It includes portions of the counties of Down, Armagh, and Antrim, and contains eighteen parishes, of which two, Newry and Conallion, are menial parishes. It takes its name from Dromore (Drom Mór, great hill), a settlement in the north-west of County Down, sixty-three miles north of Dungarvan, twenty-five miles east of Armagh, and fourteen miles west-south west of Belfast, which is built on the same river, the Lagan. The See of Dromore was founded in the sixth century by St. Colman (called also Molochomoe), one of the many holy men (more than a hundred) bearing that name in the calendar of Irish saints. From a prophecy said to have been uttered by St. Patrick, sixty years before, Archbishop Healy ("Life and Writings of St. Patrick", p. 191) infers that St. Patrick claimed no immediate spiritual jurisdiction over the territory of Iveagh which forms mainly the Diocese of Dromore, but willed that territory to be reserved for a bishop of the native race of Dal-Arade—namely, St. Colman, who founded his see there about the year 514, some sixty years after St. Patrick founded the See of Armagh. Dromore has had its own independent jurisdiction ever since. The old cathedral of Dromore, which had been taken by the Protestants, was burnt down by the Irish insurgents in 1641, and rebuilt by Bishop Taylor twenty years later; but it has been far surpassed by the Catholic church recently erected. The seat of the cathedral, however, was transferred some two hundred years ago to Newry, the largest town of County Down, and a place of great historical interest, situated at the head of Carlingford Lough. In this town, when the severity of the Penal Laws began to relax, in the latter half of the eighteenth century, the Catholics built in a retired suburb a very plain chapel, which is still in use; but just before Catholic Emancipation an edifice worthy of the name of cathedral was begun in 1825 and completed by Dr. Michael Blake (1833–1860).
who had been Vicar-General of Dublin and the restorer of the Irish College at Rome. This cathedral was greatly enlarged and beautified by Bishop Henry J'Neil, who succeeded Bishop McGerven in 1801. Under McGerven's predecessor, Dr. John Pius Leamy, O. P. (1860-1890), a Dominican priory was founded on the Armagh side of Newry, and a very handsome church erected. The Poor Clares, who went to Newry from Harold's Cross, Dublin, in 1830, were for many years the only nuns north of the Boyne. The Sisters of Mercy founded a convent at Newry in 1855, and have now flourishing establishments in Lurgan, Rostrevor, and Warrenpoint. There is a large diocesan college at Violet Hill near Newry which is under the patronage of St. Colman. To this patron saint of the diocese, the Bishop, besides the church at Dromore already referred to, are also dedicated the parish churches at Tullylisk, Kilvarlin, in the parish of Magheralin, and Barmeen near Rathfriland in the parish of Drumgath. Few ecclesiastical antiquities have survived the ravages of time, war, and heresy. Abbey Yard in Newry marks the site of the Cistercian abbey founded in the year 1144 by St. Bernard's friend, St. Malachy O'Morgair, and endowed in 1157 by Maurice O'Loughlin, King of all Ireland. It is called in the annals *Monasterium de Viridi Ligno* in Newry from a review said to have been planted there by St. Patrick, the Irish name being Nubara (and sometimes Newkinbragh, "the yew at the head of the strand") which is latinised *Pterium or Nerocrum*, but more commonly as above *Viride Lignum*. There are the ruins of an old church half a mile east of Hilltown. In the adjoining parish of Kilbroney (church of St. Bronach), a virgin saint of the district) half a mile north-east of Rostrevor is a graveyard with the venerable ruins of a church, at an ancient stone cross, and a little to the west of the ruined Princess Amelia von Gallia, where he imbibed the thoroughly Catholic principles which characterised him while Archbishop of Cologne. After completing his studies he began, in June, 1796, an extensive educational journey under the direction of Katerkamp, through Germany, Switzerland, and Italy, returning to Münster in Aug., 1797. The following year, on 14 May, he was ordained priest by his brother Caspar Maximilian, then Auxiliary Bishop of Münster. In accordance with the wish of the aged Baron von Fürstenberg, he was consecrated Bishop of Diocesan church at Münster, the cathedral chapter elected Clemens August as his coadjutor on 18 Jan., 1807, and when Fürstenberg resigned six months later, Clemens August became his successor. As administrator he founded in 1808 an independent Diocesan Church of St. Edmund, in the borough of Neuen-Schwenker, who, though practically confined to the Diocese of Münster, numbered 81 houses and 1126 members in 1904. When in 1813 Münster became part of Napoleon's monarchy, the emperor appointed Baron von Spiegel as Bishop of Münster without the knowledge of the pope, but after Napoleon's fall the pope restored Clemens August to his former office in March, 1815. Under Prussian rule the administrator repeatedly came into conflict with the Government on account of his attitude towards mixed marriages and the supervision of theological studies. When by an agreement between the Holy See and the Prussian Government the diocesan clergy of Prussia were again supplied with bishops, Clemens August, who was not *persona grata* to the Prussian Government, withdrew from public life and devoted himself to works of charity. He remained in seclusion even after being consecrated Auxiliary Bishop of Münster with the titular See of Calama in 1827. After the death of Baron von Spiegel, the incumbent of the metropolitan See of Cologne, the Prussian Government, to the great indignation of the Catholics alike, desired Clemens August as his successor.
This unexpected move on the part of the Government was intended to conciliate the Catholic nobility of Westphalia and Rhenish Prussia as well as the Catholic clergy and laity, who began to lose confidence in the policy of the Government. They had been harshly treated against the open favouritism shown to Protestants in civil and ecclesiastical affairs. The cathedral chapter of Cologne, which had become accustomed to act as a passive instrument in the hands of the Government, elected Clemens August as Archbishop of Cologne on 1 Dec., 1835. He received the papal confirmation on 1 Feb., 1836, and was solemnly enthroned by his brother, Maximilian, Bishop of Münster, on 29 May. Soon after this he came into conflict with the adherents of Hermes (d. 1831), whose doctrine (see HERRMANNISM AND HERMAISM) had been condemned by Pope Gregory XVI on 26 Sept., 1835. When many professors at the University of Bonn refused to submit to the papal Bull, Clemens August refused the imprimatur to their theological magazine, forbade the students of theology to attend their lectures, and drew up a list of anti-Hermetic theses to which all candidates for sacerdotal ordination and all pastors who wished to be transferred to new parishes were obliged to swear adherence. The Government was angered because the archbishop had enjoined the Bull within the royal province, but gave him to understand that it would allow him free scope in this affair, provided he would accede to its demands concerning mixed marriages. Before Clemens August became archbishop he was asked by an agent of the Government whether, if he should be set over a diocese, he would keep in force the agreement regarding mixed marriages, which was made "in accordance with the papal Bull of 25 March, 1830", between Archbishop von Spiegel and Minister Bunsen on 19 June, 1854. Clemens August did not then know in what this agreement consisted, and expressed the words "in accordance with the papal Bull," answered in the affirmative. After becoming archbishop he discovered that the agreement in question, far from being in accordance with the papal Bull, was in some essential points in direct opposition to it. The papal Bull forbade Catholic priests to celebrate mixed marriages unless the Catholic training of the children was guaranteed, while in the agreement between von Spiegel and Bunsen no such guarantee was included. Under these circumstances, if it be the plain duty of the archbishop to be guided by the papal Bull, and all attempts of the Government to the contrary were futile. His conscientious devotion to duty finally caused the Government to have recourse to the most drastic measures. The young minister, Graf von Paderborn, to whom William III ordered the arrest of the archbishop. The order was carried out in all haste and secrecy on the evening of 20 Nov., 1837, and Clemens August was transported as a criminal to the fortress of Minden. If the Government thought it could subdue the Catholicism of Prussia by thus trampling under foot the religious liberty of its subjects, it speedily discovered its mistake. The Bishops of Münster and Paderborn, fired by the example of Clemens August, recalled the assent they had formerly given to the agreement; while Martin von Dunin, the Archbishop of Gnesen and Posen, was imprisoned at Kolberg for the same offence that had sent Clemens August to Minden. In an Allocution of 10 Dec., 1837, Pope Gregory XVI praised the course of the Archbishop of Cologne and solemnly absolved him against the censure of the Government. The slanderous "Darlegung", or exposé, in which the Government attempted to defend its course by accusing the archbishop of treason, was refuted by Joseph Görres in his great apologetic work "Atheismus", and a declaration of the true state of affairs was published by the worst, and only the best, of the Government saw its mistake and the archbishop was set free on 22 April, 1839. He was permitted to retain the title of Archbishop of Cologne, but, in order to uphold the authority of the State in the public eye, was prevailed upon to select a coadjutor in the person of Joseph von Rohan. This archbishop, from henceforth directed the affairs of the archdiocese. The slanderous accusations of the above-mentioned "Darlegung" were publicly retracted by Frederick William IV, who had meanwhile succeeded to the throne. In 1841 the archbishop went to Rome, where he was most kindly received by the pope, and the Curia. The cardinalate, which was offered him by the pope, he refused with thanks and returned to Münster in October. Clemens August is the author of a few ascetical and ecclesiastico-political works. The most important is an exposition of the rights of Church and State entitled "Ueber den Frieden unter der Kirche und den Staaten", published at Münster in 1843.

**MICHAEL OTT.**

**DRUIDISM.**—The etymology of this word from the Greek δρυς, "oak", has been a favourite one since the time of Pliny the Elder; according to this the druids would be the priests of the god or gods identified with the oak. It is true that the oak plays an important part as the sacred tree in the ancient cult of the Aryans of Europe, and this etymology is helped out by the Welsh word for druid, vi. derydd. But there is a difficulty in equating the synonymous Irish druí and Welsh derwydd. Probably the best-substantiated derivation of the word is from the root vid, "to know", and the intensive prexid dru. According to this etymology, the druids would be the "very wise and learned ones". But this, like the others, is merely a conjecture, and it has been surmised that the word which as the institution was not of Celtic origin. Although the druids are mentioned with more or less fullness of account by a score of ancient writers, the information to be derived from their statements is very meagre, and very little of it is at first hand. Even Caesar, who probably came more in contact with the druids than any other writer, does not seem to speak of the druids in general. With the ancient writers the word druid had two meanings: in the stricter sense it meant the teachers of moral philosophy and science; in the wider sense it included the priests, diviners, judges, teachers, physicians, astronomers, and philosophers. In the reign of Emperor Claudius, the Druids of Britain were forbidden to instruct the people, who were far inferior to them in culture, in subjection. They were regarded as the most just of men, and disputes both public and private were referred to them for settlement. Thus their influence was much more a social than a religious one, in spite of the common opinion that they were exclusively a priestly class or Gaulish clergy. They enjoyed certain privileges, such as exemption from military service and the payment of taxes; and the ancient authors are unanimous in speaking of the great honour which were shown them.

Above all, the druids were the educators of the nobility. Their instruction was very varied and extensive. It consisted of a large number of verses learned by heart, and we are told that sometimes twenty years were required to complete their course of study. They held that their learning should not be consigned to writing. They must have had a considerable oral literature of sacred songs, formulae of prayers, rules of divination and magic, but of all this lore not a verse has come down to us, either in the course of study or in the form of the liturgy. There is there even a legend that we can call with certitude druidic. Pomponius
Although the only positive information we possess on the druids is to the effect that their institution existed in Gaul and Britain between the years 53 B.C. and A.D. 77, there is evidence to show that it must have existed from a much earlier time and lasted longer than the limits fixed by these dates. It seems reasonable to suppose that the influence of the druids was already at its decline when Caesar made his campaigns in Gaul, and that to them was due the civilization of Gaul in the fifth and fourth centuries B.C. We may affirm that references to the druids and signs of the existence of their institution, in the germ at least, are found which would date them as early as the third century B.C. With the Roman conquest of Gaul the druids lost all their jurisdiction, druidism suffered a great decay, and there is no reason to believe that it survived long after A.D. 77, the date of the last mention of the druids as still in existence. The opening of the schools of Marseilles, Bordeaux, and Lyons put an end to their usefulness as teachers of moral philosophy; and if some of them remained scattered here and there in Gaul, most of them were obliged to emigrate to Britain. The Emperors Tiberius and Claudius abolished certain practices in the cult of the druids, their organization, and their assemblies, but their disappearance was gradual and due as much to the romanization of the land as to any political measure or act of violence or persecution on the part of Rome. Yet there can be no doubt that Rome feared the druids as teachers of the Gallo-Roman youth and judges of trials. In Gaul in the third century of the Christian Era there is mention of women who predicted the future and were known as druidesses, but they were merely sorcerers, and we are uncertain whether they bore that name because druidism was still in existence at that late date. According to Caesar, it was a tradition in Gaul in his time that the druids were of British ori-
made a Jewess, who had shown attachment to her religion, to be divorced from her husband and marry a pagan, the unscrupulous governor had recourse to the arts of Jews, Magicians from Cyprus who were named, according to some MSS., of Josephus, was Atanasos, according to others, Simon. The ill-advised Drussila was persuaded to accede to the solicitations of Felix. She was about twenty-two years of age when she appeared at the side of the latter, during St. Paul’s captivity (Acts, xvii, 12-22). Like her husband, she must have listened with terror as the Apostle “treated of justice, and chastity and of the judgment to come”. It is said that during the reign of Titus a son of Felix and Drussila perished together with his wife in the eruption of Vesuvius. But there is no information about the life of Drussila herself after the scene described in Acts.

W. S. Reilly.

Drusiana, a titular see in Thracia Prima. Nothing is known of the ancient history of this town, which, according to Ptolemy, III, 11, 7, and Justin, Anton., was situated on the route from Anapole to Byzantium. Under St. Alexander a martyrdom there (Acts Sancta, May, III, 15). In the time of Emperor Mauritius the city was captured by the Khakan of the Avars, who burned the church and destroyed the relics of the martyr (Theophyl. Simocatta, VII, 14, 15). Drusiana was at first an episcopal see, suffragain of Heraclea (Loquien, Or. Christ., I, 1131, etc.); in the eighth and ninth centuries it became an independent archbishopric, which must have been suppressed during the Bulgarian invasions. In two "Notitia Episcopatum" Mesene appears as a later name for Drusiana; at Messina in 1453 died the wife of the famous Grand Duke Notaras (Ducas, Hist. Byz., 42). Mesene is to-day a little village, with 500 inhabitants, east of Karisthiran in the vilayet of Adrianople.

S. Pétridès.

Drues, a small Mohammedan sect in Syria, notorious for their opposition to the Maronites, a Catholic people dwelling on the slopes of the Lebanon. Their name is derived as a plural from Drueb, or Dawr, on account of which they lay on the unity of God. Their history begins with the arrival of Drueb in the Wady el-Teim after his flight from Egypt. This Persian had had the audacity to read to a large multitude gathered in a mosque a book tending to prove that El Hakim, the mad Fatimite caliph, was an incarnation of God. Escaping from the crowd, who were enraged at this blasphemy, he fled to the valley between Hermion and the Southern Lebanon, and, with the support of his master preached his doctrine to these mountaineers, already given to Batenite doctrines and the heretical belief of the incarnation of the Deity. He was soon superseded by another Persian, Hamsh ibn Ahmed El Hady, who became the real founder of the sect and the author of its sacred books. After the assassination of El Hakim, Hamsh wrote a treatise to prove that El Hakim had not really died but only disappeared, to test the faith of his followers. This disappearance and ulti-

DRYDEN

mate return of El Hakim are cardinal points of the Druze faith to-day. The sacred books of the Druses, successfully hidden from the world for eight centuries, have since the middle of the last century found their way into European libraries. They are written in Arabic and affect the style of the Koran. They consist of six volumes containing 111 treatises of a controversial character or explanatory epistles to individual persons. Each book takes its name from one of its first treatises. Their speculations strongly reflect their Persian origin.

The Druze doctrine concerning God is characterized by its abstraction from all Divine attributes; these, it declares, would imply limitation in the Supreme Being. God, however, manifested Himself first in the Universal Mind, then in the Universal Soul, and again in the Word. These three form the first great manifestation. The second great manifestation began with the residence of the Universal Mind in Adam for a thousand years; after which Enoch took his place, and in turn was followed by the Seven Ministers, Noe, Abraham, Moses, Jesus, Mohammed, Ibn Ismail; the seventh is unknown. God appeared ten times in human form, for the last time in El Hakim. The Druses teach a distinction between Jesus, the son of Joseph, and the Christ. Christ instructed Jesus but was unknown. God appeared ten times in human form, for the last time in El Hakim. The Druses teach a distinction between Jesus, the son of Joseph, and the Christ. Christ instructed Jesus but was unknown.

for worship, which consists almost exclusively in reading their sacred books. They often comply with the outward observances of Islam and even make pretence of being Mohammedans, but they are officially designated as unconverted Christians.

Lebanon, but are also found in the Hauran and in the districts near Damascus; their total number is estimated at 100,000 or a few thousand more. Encouraged by Turkish authorities, the Druses in 1860 attacked the Catholic Maronites, and are said to have massacred some thousands of them. The massacres were stayed mainly through English and French intervention.

Monteschi, Researches into the Religions of Syria (London, 1860); CHURCHILL, Druze, its History and Customs (London, 1860); SOBIN, der Druze (Leipzig, 1898); ANDREWS, Druse; NEUMANN, Das Volk der Drusen (Vienna, 1878).

J. F. ARENDZEN.

Dryburgh Abbey, a monastery belonging to the canons of the Premonstratensian Order (Norbertine or White Canons), situated four miles south-east of Melrose, Scotland. It was founded about 1150 by Hugh de Morville, Constable of Scotland, who built it with a community from Alnwick in Northumberland. The situation is beautiful, a wooded promontory, among three sides of which sweeps the River Tweed. The church was dedicated to the Blessed Virgin. The monastery was burnt to the ground by the English under Henry II, who encamped in the grounds when retreating from Scotland in 1322; but it was restored under Robert I, who himself contributed largely. At the Dissolution it was created a temporal lordship, and conferred by James VI on the Earl of Mar, who made it over to his third son, ancestor of the Earl of Buchan. It has again come into the hands of the last-named family in recent times by purchase.

The general style of the existing remains of Dryburgh is Early English, with some older (Norman) work. Of the church only the western gate, the choir of the transept, and part of the choir remain; but considerable portions of the conventual buildings have been preserved, including the refectory, with a beautiful rose window. James Stuart, of the Darnley family, is buried under the high altar; and various members of the Buchan family lie in one of the chapels. The principal object of interest to visitors is the tomb of Sir Walter Scott, in St. Mary's Aisle (part of the north transept). Sir Walter's maternal ancestors, the Hailburtons, at one time owned Dryburgh. His wife and eldest son are also interred.

D. O. HUNTER-BLAIR.

Dryden, John, poet, dramatist, critic, and translator; b. 9 August, 1631, at Oldwinkle All Saints, Northamptonshire, England; d. at London, 30 April, 1700. He was the son of Erasmus Dryden (or Dri- den) and Mary Pickering, daughter of the Rev. Henry Pickering. Erasmus Dryden was the son of Sir Erasmus Dryden, and was a justice of the peace under Cromwell. On both sides Dryden's family were of the Parliamentary party. He received his early education as a king's scholar at Westminster and while there his first published work appeared. This was an elegy contributed in 1649 to the "Lachryme Musarum", a collection of lyrics in memory of Henry, Lord Hastings. He entered Trinity College, Cambridge, and in 1650, being 17 years old, went to Westminster School. He graduated as Bachelor of Arts, January, 1653-4, and after inheriting from his father a small estate worth £600 annually, he returned to Cambridge, living there until 1655. The "Heroic Stanzae" on the death of Oliver Cromwell, his first important work (1655), are smooth and vigorous, and while laudatory,
free wills, and is tolerated by God. Both physical and moral evil are to be conceived as some form of privation or defect of being, not as a positive entity. Their existence is thus not irreconcilable with the doctrine of theistic monism.—Second, the term dualism is employed in opposition to monism, to signify the ordinary view that the existing universe contains two radically distinct kinds of being or substances—matter and spirit, body and mind. This is the most frequent use of the name in modern philosophy, where it is commonly contrasted with monism. But it should not be forgotten that dualism in this sense is quite reconcilable with a materialistic origin of all things. The theistic doctrine of creation gives a cosmic account of the universe in this sense. Dualism is thus opposed to both materialism and idealism. Idealism, however, of the Berkeleyan type, which maintains the existence of a multitude of distinct substantial minds, may, along with dualism, be described as pluralism.

Historically, in Greek philosophy as early as 500 B.C. we find the Eleatic School with Parmenides as their chief, teaching a universal unity of being, thus exhibiting a certain affinity with modern German monism. Being alone exists. It is absolute, eternal, and unchangeable. There is no real becoming or becoming of being. Seeming changes and plurality of beings are mere appearances. To this unity of being Plato opposed an original duality—God and unproduced matter, existing side by side from all eternity. The duality of matter was conveyed in prose in the chaotic, fluctuating, and governed by a blind necessity, in contrast with mind which acts according to plan. The order and arrangement are due to God. Evil and disorder in the world have their source in the resistance of matter which God has not altogether vanquished. Here we seem to have a trace of the Oriental speculation. Again there is another dualism in man. The rational soul is a spiritual substance distinct from the body within which it dwells, somewhat as the charioter in the chariot. Aristotle is dualistic on sundry important topics. The contrast between the fundamental conceptions of matter and form—of a potential and an actualizing principle—runs through all branches of his system. Necessarily coeternal with God, Who is pure actuality, there has existed the principle of matter, which in the sense, however, is mere potentiality. But further, along with God Who is the Prime Mover, there must also have existed from all eternity the World moved by God. In his treatment of cognition Aristotle adopts the ordinary common-sense view of the existence of the objects of our perception and ideas of them. Man is an individual substantial being resulting from the coalescence of the two principles—form (the soul) and matter.

Christianity rejected all forms of a dual origin of the world which erected matter, or evil, or any other principle into a second eternal being coexistent with God; and it taught the monistic origin of the universe from one, infinite, self-existing spiritual Being who freely created all things. The unsatisfactory conception of free creation, however, met with considerable opposition in the schools of philosophy and was abandoned by several of the earlier heresies. The neo-Platonists sought to lessen the difficulty by emanastic forms of pantheism, and also by inserting intermediate beings between God and the world. But the former method implied a materialistic conception of God, while the latter only postponed the difficulty. From the thirteenth century, through the influence of Albertus Magnus and still more of St. Thomas Aquinas, the philosophy of Aristotle, though subjected to some important modifications, became the accredited philosophy of the Church. The dualistic hypothesis of an eternal world existing side by side with God was of course rejected. But the conception of spiritual being as opposed to matter received fuller definition and development. The distinction between the human and the body which it inhabits may be emphasized, and their separability emphasized; but the ultra-dualism of Plato was avoided by insisting on the intimate union of soul and body to constitute one substantial being under the conception of form and matter.

The problem of dualism, however, was lifted into quite a new position in modern philosophy, as Regius and other metaphysicians on the Continent fell into an extreme antithesis between two kinds of substance, one corporeal, the other intellectual. The mind stands in a cognitive relation to the external objects and in an intimate relation to the changes within the body. What is the precise nature of these relations? According to Descartes the soul is res cogitans. Its essence is thought. It is simple and unextended. It has nothing in common with the body, but is connected with it in a single point, the pineal gland in the centre of the brain. In contrast with this, the essence of matter lies in extension. So the two forms of being are utterly disparate. Consequently the union between them is of an accidental or extraneous character. Descartes approximates to the Platonic conception of chaitote and chariot. Soul and body are really two merely allied beings. How then do they interact? Real reciprocal influence or causal interaction seems impossible between such disparate things. Geulinck and other disciples of the new philosophy hypothesized a hypothesis of occasionalism and Divine assistance, according to which it is God Himself who effects the appropriate change in either body or mind on the occasion of the corresponding change in the other. For this system of miraculous interferences Leibniz substituted the theory of pre-established harmony according to which God has coupled pairs of bodies and souls which are destined to run in parallel series of changes like two clocks started together. The same insoluble difficulty of psycho-physical parallelism remains on the hands of those psychologists and philosophers at the present day who reject the doctrine of the soul as a real being capable of acting on the body which it informs. The ultra-dualism of Descartes was immediately followed on the Continent by the pantheistic monism of Spinoza, which identified propr and matter in one infinite substance of which they are merely "modes".

The cognitional question Descartes solves by a theory of knowledge according to which the mind immediately perceives only its own ideas or modifications. The belief in the existence of objects independent of ideas is of the nature of an inference, and the guaranteeing of this inference or the construction of a reliable bridge from the subjective world of thought to the objective world of material being, was the concern of this main problem of modern philosophy. Locke similarly taught that the mind immediately apprehends only its own ideas, but he assumed a real external world which corresponds to these ideas, at least as regards the primary qualities of matter. Berkeley, accepting Locke's assumption that the mind immediately cognizes only its own ideas, raised the question: What grounds have we for believing in the existence of a material world corresponding to those ideas? He concludes there are none. The external cause of these ideas is God Who awakens them in our minds by regular laws. The dualistic opposition between mind and matter is thus got rid of by denying an independent material world. But Berkeley still postulates a multitude of real substantial minds distinct from each other and apparently from God. We have thus idealistic pluralism. Hume denied Berkeley's scepticism a step further by a hypothesis of the existence of personal spiritual substances, or minds, for grounds similar to those on which Berkeley rejected material substances. All we know to exist are ideas of greater or
less vividness. Kant repudiates this more extreme scepticism and adopts, at least in the second edition of his dualism based on the distinction of phenomena and noumena. The mind intuitively perceives only its own representations. These are modified by innate mental forms. They present to us only phenomena. But the noumena, the things-themselves, the external causes of these phenomenal representations, are beyond our power of cognition. Fichte rejected things-in-themselves outside the mind, and reduced the Kantian dualism to idealistic monism. The strongest and most consistent defenders of dualism in modern philosophy have been the Scholastic School, including Reid, Stuart, and Hamilton. Among the English idealists in more recent times are Martineau, MacCosh, Mivart, and Case who have carried on the same tradition on similar lines.

The problem of dualism, as its history suggests, involves two main questions: (1) Does there exist a material world outside of our minds and independent of our thought? (2) Supposing such a world to exist, how does the mind attain to the cognition of it?—The former question belongs to epistemology, material logic, or general philosophy; the latter to psychology. It is true that dualism is ultimately rejected by the materialists, but it is left by the materialists as a possibility to be considered in any more recent view. The objections from this standpoint will be more suitably dealt with under materialism and monism. The idealist theory since Berkeley, in all its forms, maintains that the mind can only know its own acts or representations, and that what we suppose to be an independent material world is, in the last analysis, only a series of ideas and sensations plus belief in the possibility of other sensations. Our conviction of the objective reality of a vivid consistent dream is analogous to our conviction of the validity of our waking experience. Dualism affirms, in opposition to all forms of idealism, the independent extra-mental reality of the material world. Among its chief arguments are the following: (1) Our belief in the existence of other minds is an inference from our bodies. Consequently the denial of an external material world involves the rejection of all evidence for the existence of other minds, and leaves the idealist in the position of "Solipsism." (2) Physical science assumes the existence of a material world, existing when imperceptible, possessing various properties and exercising various powers according to definite constant laws. Thus astronomy describes the movements of heavenly bodies moving in space of three dimensions, attracting each other with forces inversely proportioned to the square of the distance. It postulates the movements of the planets, and when they are not visible as well as when they are visible through long periods of time and over vast areas of space. From these assumptions it deduces future positions and foretells eclipses and transits many years ahead. Observations carried out by subsequent verify the predictions. Were there not an extra-mental world whose parts exist and act in a space and time truly mirrored by our cognitions and ideas, such a result would be impossible. The branches of science dealing with sound, light, heat, and electricity are equally irreconcilable with idealism. (3) The teachings of physiology and psycho-physics become peculiarly absurd in the idealist theory. What, for instance, is meant by saying that memory is dependent on modifications in the nervous substance of the brain, if all the material world, including the brain, is but a product of mental states? (4) Psychology similarly assumes the extra-mental reality of the human body in its account of the growth of the senses and the development of perception. Were the idealist hypothesis true its language would be meaningless. All branches of science thus presuppose and confirm the dualistic view of common sense.

Granted, then, the truth of dualism, the psychologi-
or Pole, clearly a survival of the earlier Black-Pool. The natives distinguished the locality as Ath-Chlith, i. e. “The Ford of Hurldes”, from the wicker bridge or ford by which the great road from Tara was conducted across the Danes. They entered Cúlann (South County Dublin and Wicklow).

In 852, when Aulaf (Olafr) the Dane invaded Ireland and subjected all the contending tribes of Danes, he erected a fortress on the triangle of elevated land formed by the confluence of the Dubhblinn with the Liffey. This stronghold occupied by Olafr, or Olaf, Castle. Later, the fortress, taking its name from the river over which it stood, was called in Scandinavian Dyffin. In Anglo-Norman charters of the time of Henry II it became Duellin: the legal scribes of King John brought it nearer to the name Dublin, which it has ever since retained. The fortress once established, there is no difficulty in imagining a town or city growing up and clustering around it, which after some time was furnished with a defensive wall, some remnants of which are yet visible.

Early Christian History.—The Christian Faith was preached in this territory, first by Palladius and then by St. Patrick. The stay of Palladius in Ireland was very short, scarcely a year, yet during that brief space he established three Christian communities, Tailteann, Conahai, and Dubhlinn, with Cett-Finn in County Kildare. When the death of Palladius was known at Rome in 431, Patrick was immediately selected and consecrated bishop for this Irish mission. To him, therefore, thenceforth regarded as the Apostle of Ireland, the See of Dublin looks as to its founder. His first visit after brief landings at Wicklow, Malahide, and Holmpatrick, was to his old slave-master in the northern parts of the country. But so soon as he was able to gain the sanction of Leoghaire, King of Ireland, to preach the Gospel there, to the land, he visited the island, and made innumerable converts. At Kilcullen, in the Dublin Diocese, he established a bishop, and another at Lusk; while there are few parishes in the diocese that do not lay claim to a visit from him. Soon after his death in 492, the monastic system, which Patrick had himself partly initiated, became the settled form of ecclesiastical organization in Ireland. The number of tribes into which the country was divided, and the fierce inter-tribal jealousy that prevailed at all times, rendered this system the more desirable. Each tribe had its own monastic establishment, and the land set apart for its endowment, and in most of these centres a bishop was to be found, frequently (but not necessarily) the ruler of the community. It was in such establishments that the ecclesiastics of the island were trained, and this way we find mention from time to time of bishops at Kilcullen, Lusk, Swords, Finglas, Glendaleough, Taney, Clondalgin, Castledermot, and Bray. We have no existing records and but scant traditions of any monastic establishment known as Dubhblinn; but a tribe did lie scattered along the valley of the Coombe, which may have taken its name, as did the Danish fortress later on, from the Dubhblinn which meandered through its midst. The old church-dedications, which were certainly Celtic, of Patrick, Bridget, Kevin, and Mac-Tail, in this very neighbourhood, would point to such a conclusion. Such a tribe would undoubtedly have had its monastery with its resident bishop. If this surmise be correct, it would help to explain a list of bishops given in Harris’s edition of Ware’s “Antiquities of Ireland”, and described as Bishops of Dublin; with the confluence of the “Dubhblinn” they all seem to have adopted, of embarking in some foreign missionary enterprise, they can scarcely be regarded as diocesan bishops in the accepted sense of the term, i. e. as prelates wedded to their see.

bishops that we meet with is St. Livinus. He travelled into Belgium, where he con-}

verted many, and was at length crowned with martyrdom, 12 November, 663, in which month his feast is celebrated. To him succeeded Diadob, who being driven out by violence went to Germany, and after forty years’ labour, died in the neighbourhood of Mainz, and was named after him, died a very holy death. He flourished about 675. St. Wiro is next. He emulated the example of Livinus and passed over into Gaul. There, at the request of Pepin of Heristal, he established himself about 700 at Roemond in Holland, where a portion of his church still exists, and the cathedral dedicated to him. St. Guislafer is mentioned as bishop in the eighth century, but of him nothing is known except that he baptized and instructed his successor, who figures more conspicuously. St. Runald was certainly Irish-born, and is reputed to have been some time Bishop of Dublin. He cherished an ardent desire for martyrdom, and setting out for Rome there received the pope’s blessing. On his return journey he preached at Mechin with great zeal and success. Having had occasion to refute certain public sinners, he met at their hands the longed-for martyrdom. He is the patron of Mechin, whose splendid cathedral is dedicated to him, and his relics are preserved there in a sumptuous silver shrine. St. Sedulius, who died in 785, is given by some writers as Bishop of Dublin in County Kildare, and in Cen- lin. In all probability he filled both offices. In or about 890 there is mention of Cormac as bishop. We could learn nothing about him. D’Alton says he was bishop when Gregory, King of Scotland, besieged and captured Dublin.

Danish Period.—The year 815 is commonly assigned as the date when Scandinavian invaders began to make permanent settlements in Ireland. Hitherto their repeated visits had been more piratical expeditions. They landed, plundered, and departed. But this year, perhaps, marks the beginning of the Danes as permanent colonists. The “Annals of the Four Masters” tell us that in 849 the Dubhghail or “black foreigners” arrived at Ath Cliath and made a great slaughter of the Finngoll or “white foreigners”. In 850 the former gained a still more decisive victory. Finally in 852 Aulaf (Olafr) invaded Ireland, “and all the foreign tribes submitted to him”. Thus was founded the Danish city and kingdom of Dublin. Aulaf was succeeded by Ivar in 870, and as the latter was at the same time King of Northumbria, this dual sovereignty of the Danish kings of Dublin and the kings of Northumbria continued throughout a period of nearly a century and a half. Paganism was of course the cult of these rude Norsemen. They sedulously practised the worship of Thor and Woden, and thus during a great portion of the period under notice, this way we find the history becomes a blank, varied at intervals by doleful recitals of the burning and plundering of celebrated monasteries, such as Glendaleough, Lusk, Swords, Clondalkin, etc. The first of the Danish kings to embrace Christianity was Sinric, who was baptized in England, and married King Athelstan’s daughter in 925. But he very soon abandoned the faith, and died a pagan. His son, however, Aulaf Cuaran, who visited England, was there converted in 943, and received at baptism by King Edmund. He remained firm in the Faith, and going to Iona on a pilgrimage in 950, died there “after penance and a good life”. It was the conversion of this Aulaf and his family, aided by the efforts of Northumbrian monks whom he had brought over with him, that led to the conversion of the Danes of Dublin which chroniclers assign to 948.

The great victory won by King Brian Ború on the plain of Clontarf in 1014 broke for ever the power of the Danes in Ireland, but it did not dispossess them of Dublin. Their kings continued to rule there for a short time and a half; nevertheless, the victory, together with the civilising effects of
Christianity, disposed the contending races to more friendly intercourse, and enabled Celt and Dane beneficially to live together in comparative peace. In 1038, little more than twenty years after the battle of Clontarf, we find another King Sitric (II) at Dublin, who, seeing that his subjects had all become Christians, was moved to organize the Church on a proper hierarchical basis. Wherefore in that year he founded and endowed a cathedral dedicated to the Holy Trinity (since Queen Elizabeth's time appropriated to Protestant worship and known as Christ Church). To minister in his cathedral he had a bishop appointed and consecrated, who was this first bishop of the Danish Christians in Dublin, the See of Dublin may be said to have been formally founded. Having received their Christianity from Northumbria, the Danes looked to Canterbury for their spiritual government; and had their first bishop, Donatus, consecrated by the Archbishop of Canterbury. Except in faith and general discipline they were in no way identified with the rest of Christian Ireland.

Donatus died in 1074 and was succeeded by Patrick, who bore commendatory letters to Lanfranc and was consecrated by him in St. Paul's, London. After ruling the diocese for about ten years he perished at sea in 1084. Donat O'Haingly, evidently an Irishman, came next. He was a Benedictine monk in Lanfranc's monastery at Canterbury. By consent of the king and of the clergy of Dublin, he was consecrated by Lanfranc in 1095, he died of the plague in 1098. To him succeeded his nephew Samuel O'Haingly, a Benedictine monk of St. Alban's. He was consecrated at Winchester by Saint Anselm the Sunday after Easter, 1098, and died in 1121. It was to this prelate that St. Anselm administered the sharp rebuke for having received the news from his church, from which we infer that it was at this period that a chapter of regular canons was established in the cathedral, its view having been previously monastic. Gregory was elected as successor. He is described as a wise man in languages. He was consecrated at Canterbury by Ralph, Archbishop of Canterbury.

Fourteenth-Century Reforms.—During Gregory's time great and far-reaching changes were in the ecclesiastical organisation of Ireland. There was set up in the Danish towns of Dublin, Cork, and Limerick, the old system of centring the monastery of the clan with a bishop. The title universally prevailed, but Gillebert, Bishop of Limerick, who had travelled and made the acquaintance of St. Anselm, contrived, after the latter exhorting him to union with the Irish bishops, to make and bring the system of ecclesiastics more into conformity with the severity of the See. Whereupon Gillebert's powers from Paschal II came met at Rath-Brasail in the number of sees was fixed at eight. Glendalough, the centre in the sixth century, was definitely erected into a diocese, but the Danish See of Dublin was ignored, or if referred to, it is described as being in the Diocese of Glendalough. Glendalough came up to the very walls of Dublin and surrounded them on all sides. St. Malachy, consecrated Bishop of Connor about 1127, followed up the work of Gillebert, and on the occasion of a journey to Rome, besought Innocent II to constitute the Bishops of Armagh and Cashel metropolitans and transmit the pallium to them. Before his request could be fully considered, Malachy on a second journey fell sick on the way, and died at Clairvaux in the arms of St. Bernard (1148). The object of his journey, however, was not lost sight of, and in 1151, Eugene III consecrated Cardinal Paparo to proceed to Ireland and establish there four metropolitans, giving him the pallium with which each was to be invested. The cardinal on his arrival convoked a general synod at Kells in 1152. At this synod Armagh, Dublin, Cashel, and Tuam, were created archiepiscopal sees, with canonical jurisdiction over their suffragans, and each of the new archbishops received the pallium. In this way Gregory became the first Archbishop of Dublin, and had assigned to him as suffragans the Sees of Kildare, Os, Leix, and Ferns, and Glendalough. In a document drawn up by the then Archbishop of Tuam, in 1214, the cardinal is described as finding on his arrival in Ireland, a bishop dwelling in Dublin, who at the time exercised his episcopal office without the town. Archbishop Gregory died in 1161 and was buried in the Holy Trinity Cathedral. To him succeeded Lorcan (latinized Laurentius) O'Toole, son of Muriartach, Prince of Imlaire. His mother was an O'Byrne, so that he was Irish of the Irish. Entrusted at an early age to the care of the Bishop of Glendalough he grew up a pious and exemplary youth and eventually became a monk there. When but twenty-five years old he was elected abbot and a few years later bishop of the see. This choice, however, he successfully withstood. But his resistance did not long avail. As soon as the See of Dublin was vacated both clergy and people turned their eyes on the Abbot of Glendalough and would not be refused. He was consecrated in Dublin cathedral by Gelasius of Armagh in 1182. His first act was to induce the canons of his chapter to become canons regular according to the rule of the priory of Arosia. He himself assumed the religious habit with them and scrupulously conformed to the rule. He was indefatigable in his work and boundless

PRO-CATHEDRAL, MARLBOROUGH STREET, DUBLIN
in his charity. In 1187 he attended a great convention held at Athboy at the request of King Roderic O’Connor, and helped there to enact several decrees affecting ecclesiastical discipline. In the following year the ill-starred Dermot MacMurrough set out for England to negotiate the betrayal of his country. In 1169 the first expedition of the Anglo-Normans landed in Ireland, and Wexford and Waterford soon fell before them. They then marched on Dublin, and in this expedition Strongbow was joined by the army of Dermot Hascuff, the Danish king, made a sturdy defence, but eventually the city was captured and Hascuff and his followers escaped to their ships. In 1174 they returned with a number of Norwegians collected at Orkney and the Isles, and attacked the eastern gate of the city. St. Laurence implored King Roderic to come to their aid; the latter did assemble an army, but their operations were ineffective, and the grip of the Norman fastened on Dublin, never again to be relaxed. King Henry II of England

NORMAN-ENGLISH ARCHBISHOPS.—With the passing of St. Laurence, the Irish character of the newly constructed archbishoprics was brought to a premature close. The conquerors brought with them a colony of Bristol men and settled them in Dublin, and also brought all their feudal privileges and customs, prominent among which was the right of the English monarch to nominate to vacant sees within his dominions, this with the concurrence of the Holy See. In the exercise of this prerogative, Henry II named John Comyn, an Englishman, as successor to Laurence O’Toole. Henceforward, for full four centuries, the see was occupied by an unbroken line of twenty-three archbishops, born, bred, and benefited in England. Comyn proceeded to Rome where he was first ordained priest, and then consecrated bishop, by Lucius III at Velletri. He did not take up his residence in Dublin until 1184. The king conferred additional lands upon him, to be held in barony tenure, by virtue of which he became a Lord of Parliament. In 1185 he received Prince John on his landing in Ireland, and in the same year the Diocese of Glendalough was united to Dublin; this union, however, was not to take effect until after the death of the guiding bishop, William Prio. In 1188 he assembled a provincial synod in Christ Church cathedral at which several important canons were enacted. In 1190 he undertook the work of building a new church just outside the city wall. He erected it on the site of an old Celtic church dedicated to St. Patrick, but preserved the original dedication and opened it with great solemnity on Patrick’s Day, 1191. In connexion with this church he founded and endowed a collegiate chapter of thirteen canons and erected an episcopal residence close by, which became known as St. Sepulchre’s.

Archbishop Comyn died in 1212 and was succeeded by Henry de Loundres, Archdeacon of Stafford. Two years later William Prio, Bishop of Glendalough, died whereupon the union of the sees promised by King John took place. De Loundres’s principal work was the conversion of the collegiate chapter established by his predecessor in connexion with St. Patrick’s, into a cathedral chapter, with four dignitaries and an increased number of prebendaries. This change presented the singular spectacle of a city having two cathedrals, with two chapters, one monastic, the other secular, an arrangement which led to a good deal of friction and gave much trouble to succeeding archbishops. In 1228 de Loundres was succeeded by Archbishop Luke, brought over from London. Flourishing times made the people happy; we need not be surprised to learn that he caught the infection, and practically re-erected St. Patrick’s as we have it to-day, and put the nave to Christ Church as we see it in its restored condition. It is scarcely necessary to go through nominally the series of English bishops who filled the see during the medieval period. Suffice it to mention, that as most of them held some government post, such as lord chancellor, or lord treasurer, in conjunction with the episcopate, their spiritual influence was thereby rendered obnoxious to the native clans of the O’Byrnes and O’Tooles, when they shook off the English yoke during the fourteenth and fifteenth centuries. The Holy See, not to leave the natives without episcopal care, was compelled to provide a bishop for them, titularly of Glendalough, and the rubricule in the deanery of the diocese furnished a list of several bishops who presided over the mountainous region of the diocese well into the reign of Henry VIII.

THE ANGLICAN SCHISM.—This monarch, unhappily as it is now well known, dislocated everything in Church and State. Amongst the来看看 the murder of Archbishop Alan de Redcliffe, the Lord of the valuable ‘Liber Niger’ and ‘Repertorium Viride’, by the followers of Silken Thomas in 1534, afforded the king the much desired opportunity of introducing

ST. PATRICK’S CATHEDRAL, DUBLIN

landed this same year, and received at Dublin the fealty of most of the native princes. Thenceforward Ireland became an appanage of the English Crown. Early in the following year a synod was held in Cashel by order of Henry, at which Laurence assisted and where among other disciplinary regulations, the system of tithes was introduced, as is commonly believed. With the aid of Strongbow and other Norman chiefs he was enabled to enlarge and beautify Christ Church, i.e. Holy Trinity Cathedral, and the transepts and one bay of the choir remain to this day evidences of his work. In 1177 Cardinal Vivian arrived in Ireland as papal legate, summoned a meeting of bishops and abbots, and inculcated obedience to the conquerors. In 1179 Archbishop Laurence went to Rome to attend the Third General Council of the Lateran under Alexander III. The pope received him with marked kindness, took his see under his protection, confirmed its possessions, and extended its boundaries on the south as far as Bray. He also appointed him his legate in Ireland. Some time in 1180 the archbishop again crossed to England for the purpose of interviewing King Henry in the interests of his people, but Henry had no wish to see him and fled into Normandy. Laurence, nothing daunted, quickly pursued him, but had scarcely landed on the Norman coast when he fell seriously ill. He asked to be buried in the community of Canons Regular established at Eu, and there died peacefully 14 November, 1180. He was canonized by Honorius III in 1226, and his relics, being transferred, were placed over the high altar in a costly shrine where they are still devoutly venerated. His feast is celebrated in Dublin each recurring 14 November with great pomp and solemnity, and a parish church in that city is specially dedicated to him.
his religious vagaries into Ireland. He kept the see vacant for nearly a year, and then filled it without any reference to the pope, by the appointment of George Browne. Browne had been provincial of the suppressed Augustinian Hermits in England, and was the tool of Henry, ready to do his master's bidding. He was consecrated by Cranmer, 19 March, 1533-4, and took up his residence in Dublin in August, 1536. The antecedents of Browne and the schismatical char-

kenny wherein, amongst other enactments, the parochial system was reorganized and order evolved out of chaos. He narrowly escaped imprisonment more than once, and eventually betook himself to Rome where he died in 1623. Early in 1625 his successor and successor, Thomas Fleming, a Franciscan, was appointed. After the outbreak of 1641 and when the Confederation of Kilkenny was initiated, he was appointed a member of the supreme council and took part in its deliberations. But the arrival and victory of the Cromwellians in Dublin in 1649 closed the gates of his cathedral city against him: he took refuge in Galway and died there in 1651 or 1652. Dr. Edmund O'Reilly, his vicar-general, was proposed as vicar Apostolic, but his imprisonment and subsequent exile rendered this proposal abortive, and in 1656 Dr. James Dempsey, vicar capitular of Leighlin, was appointed to this office. In his first report to the Holy See, after the horrors of war, pestilence, and banishment, he states "that in the diocese of Dublin there were not enough Catholics to form three parishes".

The restoration of Charles II to the throne occurred during Dr. Dempsey's administration and would probably have resulted in some benevolent policy of toleration had not the intrigues of the Franciscan friar, Peter Walsh, brought new troubles upon the suffering members of the Faith. The assembly of clergy held in Dublin in 1666 at the instance of Walsh and outmanoeuvred by him, did not bring peace. Dr. Dempsey died in 1667, and the see was again vacant until 1669 when the Holy See appointed Dr. Peter Talbot of the Malahide family. He was consecrated at Ghent, 3 May, 1670. In 1670 he held a diocesan synod, and the meeting of bishops was held in Dublin in the same year which furnished the occasion, by a claim for precedence, for the first contention between Armagh and Dublin concerning the primacy. In 1673 he was banished the kingdom; it was not until 1677 when broken in health, that he was allowed to return; he was, however, immediately committed a close prisoner to Dublin Castle where after lingering for two years he died. He was a learned man and a prolific writer. In 1683 Dr. Patrick Russell, a native of the County Dublin, succeeded him. The advent of a Catholic king raised the hopes of the afflicted Catholics of Ireland, and with liberty restored to the Church they took heart to make a strong march forward. A provincial synod was assembled in 1685, another in 1688; in 1686 and 1689 diocesan synods were held. The metropolitan chapter, which had never died, was reorganized and the precedences of its members settled. Many other works were projected by Dr. Russell, but the disastrous defeat at the Boyne, in 1690, and the flight of King James put an end to all hope and reduced the Catholics to a worse condition than ever. Dr. Russell was apprehended and cast into prison, where he died in 1692. King James, still recognized by the Holy See, claimed the exercise of the royal pre-

Convent of the Sisters of Loreto, Dalkey

acter of his appointment did not recommend him to the Dublin clergy. He complained of their resistance to his injunctions and was compelled to send round his own servants in order to cancel the pope's name in the service-books. A sharp warning from the king stirred him up to more demonstrative action, and forthwith he had all holy relics preserved in Christ Church cathedral, including St. Patrick's crosier known as the "Staff of Jesus", gathered into a heap and burned. He co-operated too gladly in the suppression of all the religious houses, in changing the Prior and Convent of Christ Church into a secular dean and chapter, and in the total suppression of St. Patrick's chapter. Under Edward VI he introduced that monach's new liturgy, as found in his first "Book of Common Prayer", into the cathedral, and finished by taking a wife.

With the accession of Queen Mary all things Catholic were restored, and Browne, being convicted of being a married bishop, was deposed. The queen filled the vacant see by nominating Hugh Curwen, Dean of Berwick, yet another Englishman, and the royal nomination was confirmed at Rome. She also re-established the dean and chapter of St. Patrick's. While the queen survived, unhappily not long, Curwen behaved as a Catholic, but on the accession of Elizabeth, he was ready to worship the rising sun, to accept her royal supremacy and Act of Uniformity, and eventually a transfer to the See of Oxford as its Protestant bishop. This apostasy, coupled with the severe persecution of Catholics which continued through the whole of Elizabeth's reign, left the See of Dublin without a Catholic bishop for full forty years. The compensations were, however, a firm and faithful clergy and people, and a long roll of martyrs and confessors.

Era of Persecution.—Some attempt was made by the Holy See to provide a bishop in 1585 by appointing a certain Donald or Donatus, but he did not live to take possession, and not until 1600 was his successor appointed in the person of Matthew d'Oviedo, a Spanish Franciscan. Though he came to Ireland, he dared not set foot in his diocese, but governed it through vicars-general, three of whom successively ended their days in prison. Finally about 1611 d'Oviedo returned to Spain and resigned the see, being succeeded by Dr. Eugene Matthews, transferred from Clogher. Dr. Matthews laboured hard and in most difficult times. In 1618 he called a provincial synod in Kil-
rrogative of nominating to vacant sees; the claim being admitted, he named Peter Creagh, Bishop of Cork, as Archbishop of Dublin. Dr. Creagh was an exile in France, and was obliged to govern through a vicar-general. He went himself as auxiliary to the Bishop of Strasburg where he died in 1705. Of the six archbishops who filled the see in the seventeenth century, two could never set foot in the diocese, two died in exile, and two in prison. When the penal laws commenced their ferocious career (1705) Ireland was reduced to a single bishop, the Bishop of Dromore, and he was confined in Newgate Prison, Dublin. The new hierarchy sprang from his prison cell. Therein was consecrated (1707) Dr. O'Rorke, Bishop of Killala, and once established in the Apostolic office, he imposed hands on the newly chosen Archbishop of Dublin, Dr. Edmund Byrne, parish priest of St. Nicholas.

The population and extent of Dublin had been steadily increasing ever since the Restoration, and new quarters had grown up. Dr. Byrne's first care was to erect these into parishes. To him owe their origin St. Mary's, St. Paul's, and St. Andrew's. In 1710 the oath of abjuration, aimed against the Stuarts, but full of other objectionable matter, raised a new storm of persecution, and Dr. Byrne for a time was forced to hide with his relatives in Kildare.

With varying vicissitudes he continued to rule the diocese until his death in January, 1723-4. He was succeeded by Dr. Edward Murphy, transferred from Kildare. This archbishop continued to date his letters, according to the well-known formula of hunted bishops: e loco refugi nostri, i.e. from our place of refuge. He died in 1729 and was followed by Dr. Luke Fagan, translated from Meath, who died in 1734, and had for his successor Dr. John Linegar, a native of Dublin, who lived until 1757, when his coadjutor Dr. Richard Lincoln, also a native of the city, succeeded him. In 1765 he died, and was followed by Dr. Patrick Fitzsimon who governed the see until 1770, when Dr. John Carpenter succeeded. With him may be said to commence the modern history of the diocese, for he was the first of the archbishops, since Archbishop Allen's time, who left behind him, carefully compiled, detailed records of the diocese. He died on 29 October, 1788.

RESTORATION OF CATHOLIC LIFE.—With a rapidity extraordinary for that time, Dr. John Thomas Troy, a Dominican, was transferred 9 December, 1788, from Ossory to the Archdiocese of Dublin. For thirty-seven years he governed the Church of Dublin well and wisely. He witnessed the first assertion of Catholic rights, took part in the foundation of Maynooth College, and laid the foundation stone of the metropolis church in Marlborough Street, which still does duty as pro-cathedral. Archbishop Troy saw the beginnings of the Christian Brothers and the restoration of the Jesuits, while churches and schools multiplied under his eyes. He died in 1823 and was buried in the vaults of the new metropolitan church not yet quite ready for use.

His coadjutor, Dr. Daniel Murray, a native of Wicklow, succeeded him. Educated in Salamanca, he was an eloquent, cultured, and pious ecclesiastic, described by his panegyrist as "the Francia de Sales of Ireland". To him belong the completion of the pro-cathedral, the founding of the Irish Sisters of Charity, and the communities of Loreto. He witnessed the achievement of Catholic Emancipation in 1829, the wonderful career of the Liberator, Daniel O'Connell, of the great temperance movement under Father Mathew, and the establishment of a system of national (primary) education of which he himself was appointed commissioner. The awakening of a nation, and of a church to a new life and increased responsibilities was accomplished in his time. He died in 1852 regretted by all, and was buried in the Marlborough Street vaults, where in the church above them, a beautiful kneeling statue by Sir Thomas Farrell, adorns the northern transept. Archbishop Murray was followed by Dr. Paul Cullen (q. v.), then Archbishop of Armagh, who in June, 1852, was solemnly enthroned in Dublin. He founded the diocesan seminary and the Mater Misericordiae Hospital. He inaugurated a numerous network of schools, and became the recognized champion of Catholic education all the world over. In 1866 he was made cardinal—Ireland's first cardinal. In 1870 he took a distinguished part in the Vatican Council, and in 1875 presided over the National Synod of Ireland. In 1878 he went to Rome to assist at the conclave which elected Leo XIII, but arrived late, and in October of that year passed to his reward. He is interred in the crypt of the college chapel at Clonliffe; a fine marble statue perpetuates his memory in the pro-cathedral.

In October, 1878, Dr. Edward McCabe, consecrated assistant bishop in 1877, was raised to the archiepiscopal office. His administration was short. In 1882 Pope Leo conferred on him the dignity of cardinal. Never in very robust health, he died in February, 1885. He was interred at Glasnevin where a handsome mausoleum is erected to his memory. In July, 1885, the Most Rev. William J. Walsh was appointed to succeed him.

STATISTICS.—The status of the diocese (1908) is as follows: Archbishop 1; bishop of (Canons) 1; parishes, 74; parish priests, 70; administrators, 4; curates etc., 190; in diocesan seminary, 9; chaplains, 21; secular clergy, 293; regular clergy, 247; public churches, chapels, and oratories, 105; convents, 83. Catholic population (Census 1901); non-Catholic population, 112,498; total, 520,012.

The religious orders are very well represented in Dublin by houses of Augustinians, Capuchins, Carmelites, Dominicans, Franciscans, Holy Ghost Fathers, Jesuits, Lazarists, Marists, Oblates, and Passionists. Dublin is the residence of the Superior General of the Irish Christian Brothers and the seat of their novitiate. Numerous sisterhoods, both within and without the city (Sisters of Charity, Mercy, Loreto, Dominican, Presentation, Carmelite, Holy Faith, Sacred Heart, Poor Clares, Assumption, Bon Secours, Poor Servants, Heart of Mary, etc.) devote themselves to the usual works of education and charity (hospitals, orphanages, asylums for the aged poor, for the blind, and for deal-mutes of both sexes, industrial schools, homes, refuges, orphan asylums, etc.).

The Catholic University of Ireland, founded in 1854, consists (since 1852) of the following (6) colleges located for the most part near Dublin: St. Patrick's College, Maynooth; University College, St. Stephen's Green (Jesuits); University College, Blackrock; Holy Cross College, Rathdown; Patrick's College, Carlow; Holy Cross College, Clonliffe; and the School of Medicine, Dublin. Each of these colleges retains its
own independent organization. (For the history of this university see Cullen; MacHale; Newman; Ireland. ) Other colleges are conducted by the Jesuits (Belvedere College), the Holy Ghost Fathers (Rathmines), the Carmelites (Terenure), and the Lazarists (Castlknock). The Holy Cross College (Cionlige) is the diocesan college or seminary for aspirants to the priesthood. For the ecclesiastical seminary of St. Patrick's Maynooth, see the University of Ireland, both strictly undenominational. One had its seat in Belfast, and absorbed the Queen's College already existing there; the other had its seat in Dublin, with a new college founded there, and absorbing the Queen's Colleges in Cork and Galway. The new Colleges of Dublin, Cork, and Galway, although undenominational under the Act, principally subservient Catholic interests, Dublin University (Trinity College) being left undisturbed and mostly frequented as well as governed by members of the Protestant Church. The Archbishop of Dublin is nominated, though not ex officio, a member of the Senate of the new university having a seat in Dublin, and also a member of the Statutory Commission charged by the Crown with the duty of revising and approving of the statutes of the several colleges comprised in the university.

Nicholas Donnelly.

Dubois. See Mostar.

Dubois, Guillaume, French cardinal and statesman, b. at Brive, in Limousin, 1566; d. at Versailles, 1723. He was the son of an honourable physician and received his first education from the Fathers of the Christian Doctrine in his native place, whence he went in 1672, as beneficiary, to the Colleges Saint-Michel in Paris. He had been engaged some nine years in private teaching when he was appointed (1683) sub-preceptor to the Duke of Chartres, nephew of Louis XIV, the full tutorship following four years later. When the Duke of Chartres became Duke of Orléans (1700), Dubois was made his secretary. During the regency of Philippe d'Orléans he rose in rapid succession to the high positions of state councillor (1718), secretary of foreign affairs (1717), Archbishop of Cambrai (1720), cardinal and superintendent des postes (1721), member of the Conseil de régence, and soon after, ministre principal (1722). The French Academy admitted him the same year and the Assembly of the French Clergy elected him president in 1723, the year of his death.

Owing to his humble birth, his stanch opposition to Jansenism, and his bold reversal of the aristocratic regime prevalent under Louis XIV, Dubois was disliked by the noblemen of his day. On the authority of contemporary libels and Saint-Simon’s memoirs, historians of France have long repeated against him such charges as corrupting the morals of his pupils, accepting money from England, seeking, though unworthy, ecclesiastical dignities, etc. The publication by Sèvellinges of Dubois’s memoirs and correspondence together with the careful study of contemporary documents by Seilhac, Willems, and more recently the diplomatic papers preserved in the archives of the French, English, and Spanish foreign offices—have thrown a new light on the subject and partly verified the words of Fontenelle at the time of the reception of Cardinal Dubois into the French Academy: “Les siècles suivants en sauront davantage; fire-vous de A eux.” Far from catering to his pupil’s wantonness, Dubois did what he could to check it, and his Plan d'éducation pour le duc de Chartres was a conscientious tutor. The expediency of his foreign policy, resulting in the Triple Alliance of France, England, and Holland against Spain, like the contrary policy of Cardinal de Bernis, must be largely a matter of opinion. In so far as Dubois was concerned, it was the best way of serving the interests of France and counteracting the intrigues of Alberoni. Stair and Stanhope had a high regard almost amounting to friendship, for the minister of France, but on both sides the charge that bribery was resorted to is untrue. That Dubois was not set against the natural affinity between France and Spain was shown later, when, after Albemarle’s death, the restoration of peace, he successfully negotiated the treaty of 1721 and the marriage of Louis XV with the Infanta and that of the Prince of Asturias with Mlle de Montespensier. Dubois’s career as a churchman is not above reproach. While there is no foundation for the oft-repeated assertion of his secret marriage, his gross licentiousness, and notorious impiety even at the hour of his death, still it cannot be denied that he sought and used ecclesiastical dignities principally as props to his political prestige. Tourned at the age of thirteen he betook himself of sacred Orders only in his old age, when, the better to secure the long coveted and long denied red hat, he asked for the Archbishopric of Cambrai merely as a stepping stone to the cardinalate.

The "Mémoires du cardinal Dubois" published by P. Lartéri (Paris, 1856) is apocryphal. His genuine writings were edited by Sèvellinges: "Mémoires secrets et correspondances intimes du cardinal Dubois" (Paris, 1815).
Dubois, Jean-Antoine, French missionary in India, b. in 1765 at St. Remèze (Ardeche); d. in Paris, 17 Feb., 1848. The Abbé Dubois was a director of the Seminary of the Foreign Missions, a member of the Royal Society of Great Britain, and President of the Literary Society of Madras. At the outbreak of the French Revolution he went to India to preach Christianity to the natives, whose favour he soon won by his affability and patience. For their instruction he composed elementary treatises on Christian doctrine which won general commendation. Though he remained thirty-two years in that arduous field, his labours were all fruitless and he returned convinced that the conversion of the Hindus with the deep-rooted prejudices of centuries was impossible under the existing conditions. This opinion which he broached in "Letters on the State of Christianity in India" etc. (London, 1823), was vigorously attacked in England. Two Anglican ministers, James Hough and F. Townley, published, respectively, A Reply to the Letters of the Abbé Dubois etc. (London, 1824) and An Answer to the Abbé Dubois (London, 1824). "The Friend of India", a journal of Calcutta (1825), contained a refutation of his letters, to which the abbé rejoined in a letter of much gravity and moderation. It found its way into the Bulletin des Sciences, May, 1825, and the first volume of the "Asiatic Journal" (1841). Besides these letters he wrote: "Description of the Character, Manners and Customs of the People of India, and of their Institutions, religious and civil" (London, 1816). This work was bought by the East India Company for twenty thousand francs and published at its expense in 1826. The same publisher published an enlarged edition in French under the title "Mœurs, institutions, et cérémonies des peuples de l’Inde" (Paris, 1825, 2 vols.), which is considered the best and most complete work on the subject. "Exposé de quelques-uns des principaux articles de la théologie des Brahmes" (Paris, 1825): "Le Pantche-tantra ou les cinq rues, fables du Brahme Vichour-Sarma" (Paris, 1826). Abbé Dubois was one of the collaborators of the "Bulletin Universel des Sciences" of the Baron de Féré."Dubois, John, third Bishop of New York, educator and missionary, b. in Paris, 24 August, 1764; d. in New York, 20 December, 1842. His early education was received at home until he was prepared to enter the Collège Louis-le-Grand, where he had for fellow-students Robespierre and Desmoulins. Ordained priest at the Oratorian Seminary of St-Magloire, 22 Sept., 1787, by Arnaud, bishop of Paris, he was appointed assistant to the curé of St-Sulpice, and chaplain to the Sisters of Charity (Hospice des Petites Maisons). Forced in May, 1791, by the French Revolution to leave France, he escaped in disguise to America, and landed at Norfolk, Virginia, Aug., 1791, bearing consolatory letters from the Marquis de Lafayette to James Monroe, the Randolphs, Lees, Beverley, and Patrick Henry. He was cordially received, resided for some time in the house of Mr. Monroe, received instruction in English from Patrick Henry, and even corresponded with the great Richmond. In 1793 Bishop Carroll assigned the young priest to missionary work, first at Norfolk, and later at Richmond. In 1794 he became pastor of Frederick where he built the first church and ministered to Western Maryland and Virginia. His career as an educator began when, joining the Society of St-Sulpice, he withdrew from the Frederick mission and opened a school on the mountain, at Emmitsburg, as a petit séminaire. This he soon discovered impracticable, and, in its place, founded there the present Mt. St. Mary’s College. Father Dubois was at once a man of noble presence, material and spiritual, to Mother Seton, foundress of the American Sisters of Charity, when she established (1809) a convent of her community a short distance from the college. On the death of the Rt. Rev. John Connolly, second Bishop of New York, 6 Feb., 1825, Father Dubois was chosen his successor and consecrated the third Bishop of New York by Archbishop Maréchal in Baltimore, 29 Oct., 1826. Three days later he took possession of his diocese, which covered the whole State of New York, and half the State of New Jersey, with a Catholic population of about 150,000, eighteen priests, and some twelve churches. A visitation of his diocese revealing the pressing need of priests and of a seminary, he went to France and Rome for aid in 1829, and obtained some essential help from the Congregation of the Faith and the Congregation of Propaganda. He made three unsuccessful attempts to establish a seminary. Fire destroyed one when just completed at Nysack; another projected on a site chosen in Brooklyn was never begun; and a third at Hastings-on-Hudson in the northern part of the state was closed because too remote and inaccessible. Another serious problem confronted the bishop in the lay trustee system controlling the churches. On one occasion, when the trustees of the cathedral threatened to withhold his salary, he made this memorable reply—"I am an old man, and do not need much. I can live in a basement or in a garret. But whether I come up from the basement or down from the garret, I shall still be your bishop." (see Trusteeism, New York, Archdioces of). Enfeebled by age and hard work, he asked for a coadjutor, the diocese having grown to include 38 churches, 12 stations, and 40 priests, and the Rev. John Hughes of Philadelphia was appointed titular Bishop of Basiliolopolis and coadjutor of New York in 1837. Bishop Dubois’s infirmities increasing, Bishop Hughes was made administrator in 1839, and the old bishop passed the last days of a life of apostolic zeal in retirement. His body rests in the crypt of St. Patrick’s old Cathedral, New York. "Simpson, History of Catholic Church in New York" (New York, 1860); II; "Hersmann in U. S. Cath. Hist. Soc., Historical Records and Studies (New York, 1890), I, p. 124; III, p. 124; Féré, "Lettres de Monseigneur Féré au P. Dubois," Paris, 1789, XXVIII, 211; "Asiatic Journal and Monthly Register" (1818), I, 195-147; (1820), I, 149, II, 170; (1822), II, 366; (1823), I, 764; "Biog. Univ. Paris (1825), VII, 83; P. Spillane, "Edward P. Spillane." Dubourg, Louis-Guillaume-Valentin, second Bishop of Louisiana and the Floridas, Bishop of Mon Tauban. Archbishop of Besançon, b. at CapFrançois, Santo Domingo, 16 February, 1766; d. at Besançon, France, 12 December, 1833. His theological studies were made at Paris, where he was ordained in 1788 and entered the Company of St-Sulpice. He was superior of the seminary of Isay when the French Revolution broke out, and retired at first to Bordeaux. In 1794 he emigrated to the United States where he was welcomed by Bishop Carroll. He was president of Georgetown College from 1796 to 1799. As an envoy for an American mission, he attempted to open a school, he returned to Baltimore and became the first superior of Saint Mary’s College. On 18 August, 1812, he was appointed Apostolic Administrator of the Diocese of Louisiana and the Floridas and succeeded Bishop Carroll as bishop on the latter’s resignation (1801) to the archiepiscopal See of Guatemala. The position was by no means an easy one and Father Dubourg was forced, at the beginning of his administration,
tion to take up his residence outside New Orleans. However, he gradually overcame his opponents. On 23 January, 1816, on the threshold of the New Orleans cathedral, he was presented on General Jackson the laurels of victory.

After settling in a satisfactory way the affairs of the dioece Father Dubric proceeded to Rome where he was consecrated Bishop of Louisiana and the Floridas, 24 September, 1815. In the same year, King Arthur's Abbeys was consecrated, St. Charles's Academy (1818), and soon after a second one at Florissant. These institutions gave a great impulsion to religion in what was then known as Upper Louisiana. The bishop visited yearly the southern part of his diocese, and when Bishop Rosati was appointed his coadjutor, New Orleans became again his residence. In 1826 Bishop Dubric went again to Europe. He was a brilliant and learned man, but was reluctant to enforce his authority against the cathedral trustees who continually opposed him; therefore, for a short period, New Orleans (November, 1826), thinking that another incumbent would be more successful.

He was not, however, allowed to live in retirement, but was transferred, 2 October, 1826, to the Diocese of Montreal; then, on 15 February, 1828, he was appointed to the archiepiscopal See of Besançon.

Bishop Dubric was one of the first patrons and benefactors of the Society for the Propagation of the Faith, but was not, as has been said, its founder. This society was organized at Lyons by the Abbé Inghels, Bishop Dubric's vicar-general, but the chief role in its creation is due to a pious woman of Lyons, Pauline-Marie Jaricot (q. v.).

Emery (Paris).

Célestin M. CHAMBON.

Dubric (DYFWEH, DURICKUS), Saint, bishop and confessor, one of the greatest of Welsh saints; d. 612. He is usually represented holding two crosiers, which signify his jurisdiction over the sees of Caerleon and Llandaff. St. Dubric is first mentioned in a tenth-century Welsh annal in 606 as being elected as a hermit for many years till his death is assigned to the year 612. This date appears also in the earliest life of the saint that has come down to us. It was written about 1133, to record the translation of his relics, and is to be found (in the form of "lectiones") in the "Liber Lavinensis." It may contain some genuine traditions, but as it appeared at least five hundred years after St. Dubric's death, it cannot claim to be historical. According to this account he was the son (by an unnamed father) of Eudall, a daughter of Penda Clafwrw, prince of the region of Ewyng (Evesham, in Worcestershire), and was born at Malady on the River Wye. As a child he was betrothed for his precocious intellect, and by the time he attained manhood was already known as a scholar throughout Britain. He founded a college at Henllan (Hemland in Herefordshire), where he maintained two thousand clerks for seven years. Thence he moved to Mochros (perhaps Moerca), on an island farther up the Wye, where he founded an abbey. Later on he became Bishop of Llandaff, but resigned his see and retired to the Isle of Bardsey, off the coast of Carnarvonshire. He returned to the Mochros, where he remained for two thousand years, and here he was buried. His body was translated by Urban, Bishop of Llandaff, to a tomb before the Lady-altar in "the old monastery" of the cathedral city, which afterwards became the cathedral church of St. Peter.

A few years after the "Liber Landavensis" was written, there appeared the "Historia Regum Britanniae" of Geoffrey of Monmouth, and this romantic chronicle is the source of the later and more elaborate legend of St. Dubric, which describes him as "Archbishop of Caerleon" and one of the great figures of King Arthur's Court. King John de Tinnmouth (as adapted by Capgrave) developed the figments of Geoffrey, but their accounts are of no historical value. There is no record of St. Dubric's canonization. The "Liber Landavensis" assigns his death to November, but he was also commemorated on 4 November. The translation of his body, which the same authority assigns to 23 May, is more usually kept on 29 May.

Dubrovnik. See Ragusa.

Dubuque, Archdiocese of (Dubuqueensis), established, 28 July, 1837, created an archbishopric, 1893, comprises that part of Iowa, U. S. A., north of Polk, Jasper, Poweshiek, Iowa, Johnson, Cedar, and Scott, and east of Kosseit, Humboldt, Webster, and Boone Counties; an area of 18,084 sq. miles. The city is situated picturesquely situated on the Mississippi, at the base of noble bluffs that rise 300 feet above the river; many of these eminences are crowned with Catholic institutions and fine residences. The city is named after Julian Dubuque, a Canadian, who lived there from 1798 to 1811, mining lead and trading with the Indians. His grave was marked by a cross and recently has been adorned with a rugged round tower of native limestone.

The first white men to visit Iowa were the Jesuit Marquette and Becassin, who were accompanied by missionaries sent from Quebec laboring among the Indians of Wisconsin and Iowa, and kept alive the Faith among the scattered pioneers. Iowa became United States territory by the Louisiana Purchase, and in 1833, after treaty with the Indians, was opened to settlement. The land is fertile and well watered, a zealous Dominican, the fertile prairies many more, and the population increased rapidly. The earliest Catholic settlers were French, German, and Irish, coming directly from their native lands or from the Eastern States; soon the whole state was dotted with thriving villages and prosperous farms. The attitude of non-Catholics has been uniformly friendly; the coming of a priest and the founding of a church were generally met with favour and even with generous contributions. At present the Catholic people of the Archdiocese of Dubuque are about equally divided between agricultural and urban pursuits, and hold a prominent position in social, business, and professional life. The principal parishes outside of the city of Dubuque presided over by irremovable rectors are Clinton, Cedar Rapids, Independence, Marshalltown, Waterloo, Dyersville, Mason City, Lansing, Ackley, Cascade, New Vienna, and Waukon.

The Diocese of Dubuque was created in 1837 by division of that of St. Louis, and embraced the area north of Missouri to Canada, and east of the Mississippi River. The Diocese was transferred to the Missouri in 1853, and to the Illinois and Iowa in 1883 years ago, and here he was buried. His body was translated by Urban, Bishop of Llandaff, to a tomb before the Lady-altar in "the old monastery" of the catholic church, which afterwards became the cathedral church of St. Peter.
and one at Sugar Creek, Lee County. To-day in that same territory the Church numbers nearly 1,000,000 souls, with 905 parishes, 980 mission stations, and thousands of priests and religious workers.

BISHOPS.—(1) Pierre-Jean-Mathias Loras, the first bishop, was born at Lyons, France, 30 August, 1792; his father and uncle were gillotined during the Revolution. Mathias, who had had a schoolmate the Bishop Curé d'Ars, was ordained priest 12 November, 1815, and for years was superior of the seminary of Largentière. His zeal led him in 1829 to Mobile, Alabama, U. S. A., where he laboured as pastor of Sand Spring Hill until 1837. Consecrated Bishop of Dubuque in Mobile, 1837 December 25, by Archbishop Pierre Lafitaux, Mobile, he familiarized himself by letters with the needs of his diocese, and went to France for priests; he returned 21 April, 1838, with six men of heroic mould, whose names are inseparably linked with the Catholic North-West: Joseph Crétin, who in 1832 was consecrated a prelate of the See of St. Paul, A. Ravoux, a noted Indian missionary, J. A. M. Peloumouquet, the patriarch-prelate of Davenport, L. Galtier, E. Petiot, and J. Causse, pioneer priests of Mississippi. At Dubuque the bishop was received, 19 April, 1839, with great joy by the local population, and the administration was immediately entered upon. It was characterized by piety, zeal, and providential prudence. He multiplied his priests, encouraged immigration from the crowded cities of the East, welcomed the Trappists and various orders of sisters, chose and purchased tracts of land, the diocese was rapidly increased, and the clergy were now found in number in the parishes. He was constantly engaged in visitations and preaching missions. By personal example and formation of societies, he advanced the cause of temperance. In his work the generosity of the people was supplemented by contributions from France. In a letter of 1839 to the Society for the Propagation of the Faith of Lyons, he acknowledged a gift of $10,000 for his diocese. In 1850 St. Bernard's diocesan seminary was opened, which flourished for five years; among its students was Henry Cosgrove, who became Bishop of Davenport. In 1854 Bishop Loras visited Ireland and France in quest of priests. In 1855 he requested and obtained as coadjutor the Rev. Clement Smyth, superior of the Trappist community at New Mellary. Bishop Loras died at Dubuque, 20 February, 1858. Where he found one priest and a scattered flock, he left 48 priests with 60 churches and 84,000 Catholics.

(2) Clement Smyth was b. 24 February, 1810, at Finlas, County Clare, Ireland; educated at Trinity College, Dublin, he entered the Cistercian Order and was ordained, 29 May, 1841. He was sent to the United States, founded New Mellary, and was consecrated bishop. In the western portion of the diocese there are twenty miles from Dubuque, on land donated by Bishop Loras. He was consecrated, 3 May, 1857, by Archbishop Kenrick of St. Louis. Bishop Smyth was a man whose deep piety and boundless charity won the devotion of priests and people. He held a synod whose canons remained unaltered till 1902. Under his immigration continued, but owing to hard times and the Civil War, not much progress was made in church-building, but the spiritual edifice was strengthened. At his death, 22 September, 1866, there were 90,000 Catholics in Iowa.

(3) Bishop Smyth was succeeded in 1866 by the Rt. Rev. John Hennessy, b. 20 August, 1825, in the County Limerick, Ireland. He entered Carondelet seminary near St. Louis, and was ordained in 1850. He became president of the seminary, and in 1858 was sent to Rome as representative of Archbishop Kenrick. From 1860 to 1866 he was pastor of St. Joseph, Missouri. As a priest he manifested extraordinary prudence, learning, and eloquence. He was consecrated by Archbishop Kenrick, at Dubuque, 30 Sept. 1866. Bishop Hennessy received many priests from Germany and Ireland, and in 1873 founded St. Joseph's College and Theological Seminary in Dubuque. Existing parishes were systematically divided, and he directed his energies especially to Christian education. Wherever possible schools were built by the Sisters of Notre Dame, and it was made that every Catholic child should be educated by Catholic teachers. Considerable and continued opposition was offered by some Catholics, not only for economic reasons, but also because they considered the programme an attack on the public schools. The bishop was drawn by the pressing condition of the parochial schools, which at the time of his silver jubilee showed 12,257 pupils enrolled. Bishop Hennessy assisted at the Vatican Council, and was prominent in the Third Plenary Council of Baltimore. In 1883 he was made a cardinal, and in the fall with Davenport, Omaha, Wichita, and Sioux Falls as suffragan sees. His death occurred 4 March, 1900.

(4) The Most Rev. John J. Keane, titular Archbishop of Damascus and formerly Bishop of Richmond, Virginia, and Rector of the Catholic University of America, was named to succeed Archbishop Hennessy, 24 July, 1900. Archbishop Keane was b. 12 Sept., 1839, at Ballislahannon, Co. Donegal, Ireland; ordained 2 July, 1866, at Baltimore; consecrated bishop at Baltimore 25 Aug. 1878. Synods in 1881, 1891, 1901, and 1906, were held in Dubuque, subject to local conditions. Conferences of the clergy were held semi-annually in every deanery. Complete annual reports from every parish were made through the chancery. His zeal for total abstinence founded the Archdiocesan Council of Catholic Women, and the Ladies of Charity. In the field of education he encouraged postgraduate courses for priests, doubled the faculty and buildings of St. Joseph's College, the preparatory seminary of the archdiocese, which now enrolls 260 classical students, established a missionary band of diocesan priests to visit the Sisters of the Good Shepherd and the Sisters of the Order of St. Dominic, and the Brothers of Mary. Thus with indefatigable zeal he continued the work of his predecessors. In 1902 the western portion of the archdiocese was erected into the new Diocese of Sioux City.

The Sisters of Charity of the B. V. M. went to Dubuque in 1844 from Philadelphia. The mother-house is now located there and they conduct two academies and eleven schools in various centres, besides having sent communities to four other states. The Sisters of Mercy located in 1858 in Davenport, and now have independent houses at Dubuque, Cedar Rapids, and Independence. The Presentation Nuns arrived from Ireland in 1875, and have 65 members. The Visitation Nuns conduct an academy in Dubuque; they number 31 members. The Sisters of St. Francis came from Westphalia, Germany, and 320 of them are employed in schools throughout Iowa. Other sisterhoods represented in the archdiocese are Third Order of St. Dominice, Franciscan Sisters of Perpetual Adoration, Sisters of St. Francis of Assisi, C. C., Sisters of St. Francis, Sisters of the Holy Ghost, Sisters of the Holy Humility of Mary, and the School Sisters of Notre Dame.
DUCO

STATISTICS.—Official reports for 1908 give these figures: 222 diocesan and 9 regular priests; 105 parishes with 68 mission churches; 50 mission stations (of 34 religious institutions); 1 college for men with 380 students; 25 academies for the higher education of young women, attended by 4000; 96 parochial schools, with 25,000 pupils; 1 orphanage with 225 inmates; 7 hospitals, with 500 patients; 1 industrial home with 550 inmates; 1 home of the Good Shepherd. Catholic population, 111,112 in a total of 693,400. About 650 sisters of religious communities are engaged in teaching, and about 130 are in hospitals and other charitable work.

S. (Milwaukee, 1898).

J. C. STUART.

DUCO, FRONTON DU (called in Latin DUCASUS), a French theologian and Jesuit, b. at Bordeaux in 1558; d. at Paris, 25 September, 1624. At first he taught in various colleges of the Society and wrote for the dramatic representations encouraged by the Jesuits the "Histoire de Saint Jean-Baptiste de Constantinople," under the title of "Histoire de l'Origine et du Retour d'Oriens" (Nancy, 1551), which was acted at Pont-à-Mousson before Charles III, Duke of Lorraine. At a later date he took part in the theological discussions of the age and is the author of "L'invention des fausses, ou contradictoires, fausses allegations du Sieur du Plessis, remarquees en son livre de la Sainte Eucharistie, par les theologiens de Bordeaux" (Bordeaux, 1599–1601). This is one of the many refutations of the treatise on the Eucharist issued in 1560 by the Huguenot theologian Du Plessis-Mornay. The Protestant publicist made a reply to which Fronton du Duc rejoined in 1602.

At the suggestion of Cassaouen, Henry IV contemplated the publication of manuscripts of the royal library. The clergy of France decided to confide the revision of the Greek Fathers to the Jesuits, and Fronton du Duc was chosen by the Society to labour on this project. Accordingly he published the works of St. John Chrysostom (Paris, 1609–24) and a "Bibliotheque veterum Patrum" (Paris, 1624, 2 vols. in folio). The "Bibliothèque" of the Greek Fathers with Latin translations (see the list in Sommervogel, III, 245), and serves as a supplement to the great collection of Margarin de la Bigne known as "Sacra Bibliotheca Sanctorum Patrum." After the death of Fronton du Duc there was issued an edition of Photius (Paris, 1629, 2 vols. in folio) which he had undertaken. This edition follows a Vienna manuscript that had belonged to the library of Matthias Corvinus; its publication had been delayed by a series of curious complications in which the political schemes of Richelieu were involved. Fronton du Duc had also occupied himself with the Greek texts of the Bible and had begun a revision of the text, but this was not completed. Librarian from 1604 of the Collège de Clermont at Paris, he reorganized the library, which had been scattered during the period in which the Jesuits had been obliged to abandon the school. While holding this position he also taught (1618–23) positive theology.

DUCO, or in NICOLAS, Mémoire pour servir à l'histoire des hommes illustres de la république des lettres (Paris, 1727). XXXVIII, 103. SOMMERVOGEL, Bibliothèque de la c. de J. (Paris, 1897), III, 235–49.

PAUL LEJAY.

Ducco di Buoninsegna, painter, and founder of the Sienese School, b. about 1255 or 1260, place not known; d. 3 August, 1319. About this time Siena was at the zenith of her political power. She had just defeated Florence on the field of Montaperti (4 September, 1269), and an era of marvellous development followed this conquest. Then was begun the huge task of building the cathedral, where, in 1266, was commenced the incomparable pulpit sculptured by Nicholas of Pisano, and it was under these flourishing conditions that Ducco received his artistic education. Everywhere, he owed his number to the naturalistic renaissance of Nicholas of Pisano; he allied himself exclusively with Byzantine tradition. Ducco has been called the "Last of the Greeks," and his genius consisted in giving exquisite expression to the refined sentiment of the masters of Byzantium, discovering its ornamental meaning and abolishing all the enormous, hideous imitations made by a degenerate school.

Duccio is first mentioned in 1278, when he was engaged upon minor work, such as painting the covers of the archives and the tabellini (memorandum-books) of the Bichierna, one of the forefathers of the city, now in the Industrial Museum of Berlin. But his great work at this time was the famous "Madonna de' Ruesselaggi"—one of the most illustrious specimens of Italian painting—preserved at Florence in a side-
chapel of Santa Maria Novella and, on the authority of Vasari, so long considered one of Cimabue's masterpieces. But that the painting was Duccio's is now beyond contradiction, and in the Museo dell' Opera del Duomo, between the artist and the restorers of the Confraternity of the Virgin. Although still hieratical and archaic, Duccio's "Madonna", when compared, for instance, with that of Guido di Siena, painted in 1221 and shown to-day in the Palazzo Pubblico of Siena, seems fully to deserve its celebrity.

But it was in 1311 that Duccio achieved his principal work, the glory of which is destined to remain traditional, the great reredos for the high altar of the Siena cathedral. This panel, removed in the fifteenth century, may now be seen in the museum of the Opera del Duomo. The day of its installation was observed as a public feast; shops were closed and bells were rung and the people of the city, carrying lighted candles, solemnly escorted the picture from the artist's residence at the Porta Stallorroggi to the cathedral. This painting was indeed a national masterpiece and in this regard is comparable only to the reredos by Van Eyck in Flemish painting. The two sides represent the two Testaments of the school. The back comprises two pictures, the life of Christ between entry into Jerusalem and the Ascension. The steps, now taken apart, were decorated with twenty other scenes representing Christ's childhood, and His miracles, and the life of the Virgin. In fact, the theme was that of the life of Christ studied by Giotto in 1305 in the Arena of Padua. But Duccio consulted Byzantine formularies only, and his compositions resemble the famous miniatures of the "Evangelistarium" of Rossano, or those of the great Benedictine school of Mont' Amiata. However, apart from his perfect taste in colour and in style, Duccio excelled in the essentially decorative elegance of his portrayal of ordinary life. He abounds in genre pictures as pure as some of the selections in the Anthology. The scene of "Peter before the High Priest", the dialogue of the holy women with the angel at the Sepulchre, and the "Pilgrims of Emmaus" are models of poetic conception expressed in a familiar, true-to-life, lyric fashion. On the front of the great panel is the "Madonna Maestà" ("Majesty"), which is in reality the "Madonna de' Ruccellai" more amply, richly, and majestically developed. Never has the Byzantine painting attain greater plasticity of expression. But here the form is animated by a new sentiment, a tenderness that manifests itself in the distich engraved on the step of the Virgin's throne:

MATR SANTA DEL SIS CAUSA SENS REQUIEI SIS DUX VITA, TEB QUA PINT ITA.

(Holy Mother of God, give peace unto Siena; obtain for me that, as I have painted Thee so fair, I may live eternally.)

The painting only frame (and panel) pictures and, without doubt, miniatures, and hence the oblivion into which he fell in a country where monumental painting alone is glorified. Nevertheless his is the first of the great names in Italian painting. He preceded Giotto by a score of years and had the honour of founding an original Sienese school at a time when there were as yet no painters in Florence: since, in 1285, it was to him that the Florentines had to have recourse. And the most magnificent work of the Sienese School, the "Maestà" by Simone di Martino, in the Palazzo Pubblico (1315) is but an enlargement of Duccio's. His type of beauty and his poetic ideal were indelibly impressed upon this charming school. Duccio seems to have been gay and light-hearted. In 1313 he was imprisoned for debt and a second time fined for refusing to mount guard. Some of his lesser works are preserved in various collections in the Siena Museum, the National Gallery, London, and at Windsor.

Duchesne, PHILIPPE-ROSE, founder in America of the first houses of the Society of the Sacred Heart, b. at Grenoble, France, 29 August, 1769; d. at St. Charles, Missouri, 18 October, 1859. She was the daughter of Pierre-François Duchesne, an eminent lawyer. Her mother was a Périgour, ancestor of Casimir Périgour, President of France in 1894. She was educated by the Visitations Nuns, entered that order, saw its dispersion during the Reign of Terror, vainly attempted the re-establishment of the convent of St.-Marie-d'en-Haut, near Grenoble, and finally, in 1804, accepted the offer of Mother Barat to receive her community into the Society of the Sacred Heart. From early childhood the dream of Philippine had been the apostolate of education in distant and poor at home. Nature and grace combined to fit her for this high vocation; education, suffering, above all, the guidance of Father Barat trained her to become the pioneer of her order in the New World. In 1818 she came to America set out for the missions of America. Bishop Dubourg welcomed her to New Orleans, whence she sailed up the Mississipi to St. Louis, finally settling her little contry at St. Charles. "Poverty and Christian heroism are here", she wrote, "and trials are the riches of priest in this land." Cold, hunger, and illness; opposition, ingratitude, and calumny, all that came to try the courage of this missionary, served only to fire her lofty and indomitable spirit with new zeal for the spread of truth. Other foundations followed, at Florissant, Grand Côteau, New Orleans, St. Louis, St. Michael; and the approbation of the society in 1826 by Leo XII recognized the good being done in these parts. She yearned to teach the poor Indians, and old and broken as she was, she went to labour among the Pottawatomies at Sugar Creek, thus realizing the desire of her life. Stained by the recitals of Father De Smet, S.J., she turned her eyes towards the Rocky Mountain missions; but Providence led her back to St. Charles, where she died. Thirty-four years of mission toil, disappointment, endurance, self-sacrifice sufficed, indeed, to pave the way of this valiant daughter of Mother Barat. She had opened the road, others might walk in it; and the success hidden from her eyes was well seen later by the many who rejoiced in the rapid spread of her order over North and South America. Sincere, intense, generous, austere yet affectionate, endowed with large capacity for suffering and work, Mother Duchesne's was a stern character that needed and took the moulding of Mother Barat. Preliminary steps for her beatification have already been taken.

Bourd, Histoire de la Mère Duchesne (Paris, 1878); ST. FILLERSTON (Rocheston, 1876); WARD, Life of Venerable Madeleine Sophie Barat (Rocheston, 1900); CONNELLY, Rev. Mother Duchesne in The Monthly Review, 1878; Mother Philippine Duchesne in The Messenger (New York, 1892).

CATHERINE M. LOUTHY.

Duckett, JAMES, VENERABLE, Martyr, 6. b. at Fortisford in the parish of Skelmerngh in Wilesmorseth, England, date uncertain, of an ancient and accomplished family; d. 9 April, 1601. He was a bookseller and publisher in London. His godfather was the well-known martyr James Leybourne of Skelmerngh. He seems, however, to have been brought up a Protestant, for he was converted while an apprentice in London reading books. He had been careful before he could be received into the Church he was twice imprisoned for not attending the Protestant service,
and was obliged to compound for his apprenticeship and leave his master. He was finally reconciled by a venerable priest named Weekes who was imprisoned in the Gatehouse at Westminster. After two or three years he married a Catholic widow, but out of his twelfth year of marriage no less than nine were spent in prison, owing to his zeal in defending Catholic literature and his wonderful constancy in his newly found faith. His last apprehension was brought about by Peter Bullock, a bookbinder, who betrayed him in order to obtain his own release from prison. His house was searched on 4 March, 1601, Catholic books were found there, and Ducked was at once thrown into Newgate. At his trial, Bullock testified that he had bound various Catholic books for Duckett, which the martyr acknowledged to be true. The jury found him not guilty, but Judge Popple at once stood up and bade them consider well what they did, for Duckett had had bound for him Bristowe's "Motive", a controversial work peculiarly odious to Anglians on account of its learning and cogency. The jury thereupon reversed their verdict and brought in the indictment. At the same trial, the priest, Page, Tichborne, and Watkinson, were condemned to death. Bullock did not save himself by his treachery, for he was conveyed in the same cart with Duckett to Tyburn, where both were executed, 19 April, 1601. He was buried at St. Mary's church, and afterwards went to Paris where he studied three years in the College of Arras. He had an extraordinary gift of prayer, and while yet a student would spend whole nights in contemplation. On his way to the English mission, he spent two months in spiritual exercises under the direction of his uncle, the Carthusian prior at Nieuport. He laboured for about a year in Durham, and was taken near Wolsingham on his way to baptise two children, 2 July, 1644. The place which tradition declares to be that of his arrest is now marked with a tall stone, and he was examined by a Parliamentary Committee of sequestrators, and placed in chains. He confessed his priesthood and was thereupon sent up to London with Father Ralph Corbie, S. J. (q. v.), whom he had ardently desired to see. They were committed to Newgate, and edified the crowds of Catholics who flocked to see them by their joyfulness, their sanctity, and their longing to suffer for Christ. A reproof for one of them having been obtained, each refused to take it for himself. On his way to Tyburn, Duckett was astonished all day by a supernatural joy; comforting those who wept for him, he said smiling: "Why weep you for me who am glad at heart of this happy day?" His jailers even were so struck by his gladness that they exclaimed "assuredly this man dies for a good cause". He suffered with Father Corbie, at Tyburn. In a farewell letter to the Bishop of Chalcedon, he wrote on the eve of his martyrdom: "I fear not death, nor I contempt not life. If life were my lot, I would endure it patiently; but if death, I shall receive it joyfully, for that Christ is my life. Never since my ordination serving of Holy Orders did I so much fear death as I did life, and now, when it approacheth can I faint?" (Pallin, Acts of English Martyrs (London, 1891); CAMM, A Short and Certain Account of Ven. John Duke, D.D. (London, 1741); CHALLOVER, Memoirs (London, 1741); GILLOW, Hist. Dut. Eng. Cath., ii., pp. 179, 180). 

EDWARD P. SPILLANE.
DUDIK, BEDA FRANCISCUS, Moravian historian, b. at Kojetín near Kremsier, Moravia, 29 January, 1815; d. as abbé and titular bishop at the monastery of Schöntal in Hungary, 1860. While studying at the philosophical school at Brünn he attended the University of Olmütz. In 1836 he entered the Benedictine Order and in 1840 was ordained priest at Raigern. From this latter date until 1854 he taught first the classics, languages, and then history at the gymnasium of Brünn. In 1855 he became Privatdozent for historical research at the University of Vienna; in 1859 he was appointed historiographer of Moravia, and in 1865 was made a member of the Academy of Sciences of Vienna. For purposes of historical research which he went in 1861 to Sweden, in 1862 to Rome, in 1870 to France, Belgium, and Holland, in 1874 to Russia, a country which he later repeatedly visited. Between the years 1853 and 1859 he established at Vienna the main historical library of the Teutonic Order. Dudík was a prolific writer and diligent investigator; his works have a lasting value on account of the sources from which he drew. His chief works in chronological order are: "Geschichte des Bekenntnisterstes Raigern" (2 vols., Brünn, 1839-40); "Historie der Queellen" (Brünn, 1850); "Forschungen in Schwerden fuhr Mähren Geschichte" (Brünn, 1852); "Iter Romanum" (2 vols., Vienna, 1855); "Des Herzogtums Troppau ehemalige Stellung zur Markgrafschaft Mähren (Vienna, 1857); "Waldeins Korrespondens" (Vienna, 1856-66); "Waldeins von seiner Entbehrung bis zur abermaligen Ubernahme des Armeekommandos" (Vienna, 1858); "Des hohen Deutschen Ritterordens Münzsammlung in Wien" (Vienna, 1858, a special edition with 32 copper plates); "Korrespondens des Deutschen Ritterordens" (Vienna, 1866); "Archive im Königreich Galizien und Lodomerien" (Vienna, 1867); "Erinnerungen aus dem Feldzug in Italien 1866" (Vienna, 1867); "Preussen in Mähren im Jahre 1742" (Vienna, 1869); "Schweiden in Böhmen und Mähren 1460-1960" (Vienna, 1879); "Geschichtliche Entwicklung der Buchdruckerkunst in Mähren von 1486 bis 1621" (Brünn, 1879).

Dudík’s most important publication is: "Mährns allgemeine Geschichte" (12 vols., Brünn, 1860-89); it treats the history of Moravia up to 1350. Volumes VII-X, which give an account of Moravia during the period of the Przemysian dynasty, have been translated into Czech. He also published several papers in the transactions of the Academy of Sciences; in vol. LIV appeared: "Korrespondens Ferdinands II. mit seinen Reichsvätern Becanus und Lamormain". 

REMA BIBLIOGRAPHIA, VII, 179.

PATRICIUS SCHLAGER.

Duel (duellum, old form of bellum).—This word, as used both in the ecclesiastical and civil criminal codes to-day, generally signifies every contest with deadly weapons which takes place by agreement between two persons on account of some private quarrel. Thus a contest with weapons is essential to the conception of a duel. Further, the contest must take place by agreement, and the weapons used must be capable of inflicting deadly wounds. Although generally demanded by custom, similarity of weapons is not essential, neither are witnesses, seconds, etc. Finally, it is essential to a duel that it take place on account of some private matter, such as wounded honour. Consequently the customary duel of to-day differs from those proceeding from particular reason by the arrangement of the authorities, as the conflict between David and Goliath. Between contending nations there is no higher court than the appeal to arms; therefore war must decide, and there may be instances in which the participants engage in a battle between two armies a contest between two persons selected for the purpose.

DUEL.

History.—Duelling was unknown to the civilized nations of antiquity. The contests of the Roman gladiators were not, like the duels of to-day, a means of showing off self-delight, but were studied at the philosophical school at Brünn he attended the University of Olmütz. In 1836 he entered the Benedictine Order and in 1840 was ordained priest at Raigern. From this latter date until 1854 he taught first the classics, languages, and then history at the gymnasium of Brünn. In 1855 he became Privatdozent for historical research at the University of Vienna; in 1859 he was appointed historiographer of Moravia, and in 1865 was made a member of the Academy of Sciences of Vienna. For purposes of historical research which he went in 1861 to Sweden, in 1862 to Rome, in 1870 to France, Belgium, and Holland, in 1874 to Russia, a country which he later repeatedly visited. Between the years 1853 and 1859 he established at Vienna the main historical library of the Teutonic Order. Dudík was a prolific writer and diligent investigator; his works have a lasting value on account of the sources from which he drew. His chief works in chronological order are: "Geschichte des Bekenntnisterstes Raigern" (2 vols., Brünn, 1839-40); "Historie der Queellen" (Brünn, 1850); "Forschungen in Schwerden fur Mähren Geschichte" (Brünn, 1852); "Iter Romanum" (2 vols., Vienna, 1855); "Des Herzogtums Troppau ehemalige Stellung zur Markgrafschaft Mähren (Vienna, 1857); "Waldeins Korrespondens" (Vienna, 1856-66); "Waldeins von seiner Entbehrung bis zur abermaligen Ubernahme des Armeekommandos" (Vienna, 1858); "Des hohen Deutschen Ritterordens Münzsammlung in Wien" (Vienna, 1858, a special edition with 32 copper plates); "Korrespondens des Deutschen Ritterordens" (Vienna, 1866); "Archive im Königreich Galizien und Lodomerien" (Vienna, 1867); "Erinnerungen aus dem Feldzug in Italien 1866" (Vienna, 1867); "Preussen in Mähren im Jahre 1742" (Vienna, 1869); "Schweiden in Böhmen und Mähren 1460-1960" (Vienna, 1879); "Geschichtliche Entwicklung der Buchdruckerkunst in Mähren von 1486 bis 1621" (Brünn, 1879).

PATRICIUS SCHLAGER.

Duel (duellum, old form of bellum).—This word, as used both in the ecclesiastical and civil criminal codes to-day, generally signifies every contest with deadly weapons which takes place by agreement between two persons on account of some private quarrel. Thus a contest with weapons is essential to the conception of a duel. Further, the contest must take place by agreement, and the weapons used must be capable of inflicting deadly wounds. Although generally demanded by custom, similarity of weapons is not essential, neither are witnesses, seconds, etc. Finally, it is essential to a duel that it take place on account of some private matter, such as wounded honour. Consequently the customary duel of to-day differs from those proceeding from particular reason by the arrangement of the authorities, as the conflict between David and Goliath. Between contending nations there is no higher court than the appeal to arms; therefore war must decide, and there may be instances in which the participants engage in a battle between two armies a contest between two persons selected for the purpose.

The Church soon raised her voice against duelling. St. Avitus (d. 518) made an earnest protest against the law of the above-mentioned Gundobald, as is related by Agobard (d. 840), who in a special work on the subject points out the opposition between the law of Gundobald and the clemency of the Gospel; God could not easily permit the defeat of the innocent. The popes also at an early date took a stand against duelling. In a letter to Charles the Bald, Nicolas I (858-67) condemned the duel (monomachia) as a tempting of God. In the same century his Example was followed by Stephen VI, later by Alexander II and Alexander III, Celestine III, Innocent III and Innocent IV, Julius II, and many others. In addition to the judicial, non-judicial combats also occurred, in which men arbitrarily settled private grudges or sought to revenge themselves. The tournaments, especially, were often used to satisfy revenge; on account of this misuse the Church early issued ordinances against the excesses committed at tournaments, although these were not always obeyed. The more the judicial combat fell into disuse, the more the old instinct of the Germanic and Gallic peoples, by which each man sought to gain his rights with weapon in hand, showed itself in personal contests and at tournaments. From the middle of the fifteenth century duelling over questions of honour increased so greatly, especially in the tournaments, that the Council of Trent was obliged to enact the severest penalties against it. It decreed that "the detestable custom of duelling which the Devil had originated, in order to bring about at the same time the ruin of the soul and the violent death of the body, shall be entirely uprooted from Christian soil" (Sess. XXIV, De reform., c. xix). It pronounced the severest ecclesiastical penalties against those princes who should permit duelling between Christians in their territories. According to the council those who take part in a duel are ipso facto excommunicated, and if they are killed in the duel they are to be deprived of Christian burial. The seconds and all those who advised the duel or were present at it are also excommunicated. These ecclesiastical penalties were at a later date repeatedly renewed and even in part modified. From those penalties that duellists should also be denied burial by the Church, even if they did not die on the duelling ground and had received absolution before death. All these penalties are substantially in force to-day. Pius IX in the "Censurum Apostolicum" of 12 November 1869, declared the penalty of excommunication against "all who fight duels, or challenge to a duel or accept such challenge; as well as against all who are accessory
to the duel or who in any way abet or encourage the same; and finally against those who are present at a duel as spectators [de industriis spectantur], or those who permit the same, or do not prevent it, whatever their rank, even if they are kings or emperors*.

Like the Church, the State also took steps against this undesirable custom. But consistent with the practice issued by Henry IV of France, whoever killed his opponent in a duel was to be punished with death; severe penalties were also enacted against the sending of a challenge and the acceptance of the same. Unfortunately, however, against this law there was often general pardoning. In 1626, during the reign of Henry's successor, Louis XIII, the laws against duelling were made more stringent and were strictly carried out. Notwithstanding these measures the custom of duelling increased alarmingly in France. The great number of French noblemen who fell in duels about the middle of the seventeenth century, is shown by the statement of the contemporary writer Théophile Raynaud that within thirty years more men of rank had been killed in duels than would have been needed to make up the entire issue of a great French regiment by draws. The Congregation of Saint-Sulpice, with the aid of St. Vincent de Paul, formed an association of distinguished noblemen, the members of which signed the following obligation: "The undersigned publicly and solemnly make known by this declaration that they will refuse every occasion of engaging in duelling as a man of honour will not enter upon a duel, and will in every way be willing to give proof that they despise duelling as contrary to reason, the public good, and the laws of the State, and as incompatible with salvation and the Christian religion, without, however, relinquishing the right to avenge in every legal way any insult offered them as far as position and birth make such action obligatory." Louis XIV aided these efforts at reform by the severe enactment against duelling which he issued early in his reign. For a long time after this duelling was infrequent in France.

In other countries too severe measures were taken against the constantly spreading evil. In 1681 the Emperor Leopold I forbade the fighting of duels under the severest penalties; Maria Theresa ordered not only the challenge and the challenged but also all who had any share in a duel to be beheaded, and in the reign of the Emperor Joseph II duellists received the punishment of murderers. Frederick the Great of Prussia tolerated no duellists in his army. The present penal code of Russia is strict for military duellists: the penal code of the German Empire commands confinement in a fortress. The penalty is, without doubt, entirely insufficient and constitutes a form of privilege for the person who kills his adversary in a duel. Theoretically these penal laws are also applicable to the respective armies, but unfortunately in the case of officers they are not carried out; indeed, up to the present time, an officer who refuses to fight a duel in Germany and Austria is in danger of being dismissed from the army. In 1896 when, in consequence of a duel the government under the advice of the majority called upon the Government to proceed by all the means in its power against the practice of duelling, as opposed to the criminal code, the emperor issued a cabinet order on 1 January, 1897, which established courts of honour to deal with disputes in the army concerning questions of honour. Unfortunately the decree leaves it open to the court of honour to permit or even to command a duel to take place. Furthermore, on 15 January, 1906, General von Einem, Prussian Minister of War, stated that the principle of duelling was not against the Church. Boland added to this: "...the corps of army officers can tolerate no member in its ranks who is not ready should necessity arise, to defend his honour by force of arms". In the army, as a result of this principle, a conscientious opponent of duelling is constantly exposed to the danger of being expelled for refusing to fight. In England duelling is almost unknown, and no duel has occurred, it is said, in the British army for the last eighty years. English jurisprudence contains no special ordinances against duelling; the wounding or killing of another in a duel is considered common law. On the Continent also public opinion on the subject of duelling seems to be gradually changing. The demand for the abolition, even in the army, of this abuse is growing louder and louder. Some years ago, at the instance of the Infante Alfonso of Bourbon and Austria-Este, an anti-duelling league was formed in order to carry on systematically the opposition to duelling. A preliminary convention, held at Frankfort-on-the-Main in the spring of 1901, issued an appeal for support in its struggle against this evil. In a few weeks a thousand signatures were received, mostly those of men of influence from the most varied ranks of society. A convention to draw up a constitution met at Cassel 11 January, 1902, and Prince Carl of Löwenstein was elected president. A committee was also appointed to conduct the business of the league. The league has made most satisfactory progress; in 1906 it established a permanent bureau at Leipzig. Concerning the aims of the league the declaration subscribed by the members states the following: "The undersigned hereby declare their rejection, on principle, of every form of challenge or counter-challenge, and the demands of civilization, existing laws, and the common good of society and the State."

WRONGFULNESS OF DUELLING.—After what has been said above there can be no doubt that duelling is contrary to the ordinances of the Catholic Church and of most civilised countries. By the wording of its ordinances against duelling, the Council of Trent plainly indicated that duelling was essentially wrong and since then theologians have almost universally characterized it as a sinful and reprehensible course of action. However there were always a few scholars who held the opinion that cases might arise in which the unlawfulness of duelling could not be proved with certainty by mere reason. But this opinion has not been tenable since Pope Benedict XIV in the Bull "Detestabilium" of the year 1752 condemned the following propositions: (1) "A soldier would be blameless and not liable to punishment for sending or accepting a challenge if he would be considered timid and cowardly, worthy of contempt, and a disgrace to his country." (2) "If a soldier has not made a challenge or accept such, and who would for this reason lose the position which supported him and his family, or who would be obliged to give up forever the hope of being fitted and well-armed advancement." (3) "Those persons are excusable who to defend their honour or to escape the contempt of men accept or send a challenge when they know positively that the duel will not take place but will be prevented by others." (4) "A general or officer who accepts a challenge through fear of the loss of his reputation and his position does not commit a criminal punishment decreed by the Church for duellists." (5) "It is permissible under the natural conditions of man to accept or send a challenge in order to save one's fortune, when the loss of it can not be prevented by any other means." (5) "This permission claimed for natural conditions can also be applied to a badly guided state in which especially, justice is openly denied by the remissness or malevolence of the authorities." Like his predecessors, Leo XIII in his letter "Pastoralis officii", of 12 September, 1891, to the German and Austro-Hungarian bishops, he added: "From two points of view the Divine law forbids a man as a private person to wound or kill another, excepting when he is forced to it by self-defence. Both natural reason and the inspired Holy Scriptures proclaim this Divine law."
The intrinsic reason why duelling is in itself sinful and reprehensible is that it is an arbitrary attack on God's right of ownership as regards human life. Only the owner and master of a thing has the right at pleasure to dispose of it or exert control over it. But man is not the owner and master of his life; it belongs, instead, entirely to his Creator. Now man can only call that his property and treat it as such which is intended in the first instance for his benefit, so that he has the right to exclude others from the use of the same. Man, however, is not created primarily for himself but for the glory and service of God. Here below he is to serve his Creator and Lord as long as the Lord wills and thus attain his own salvation. For this end God has given man life, maintains it for him, and bestowed on him the instinct of self-preservation. But if man is not the master of his life, he has not the right to expose it at pleasure to destruction or even deliberately to seek such danger. In order rightfully to expose the life to danger there must be a justifiable reason, and even then the risk of life is only permissible, not the end to be sought in itself. What is said of one's own life applies also to the life of one's fellow-man. Every man has the right in case of necessity forcibly to defend himself against an unlawful attack on his life, even if it cost the life of the attacker. Self-defense is a required means of public safety, but apart from such defense no man has the right as a private individual to injure the life of his fellow-man or at pleasure to expose his own to similar danger. Hence it is easy to perceive that a duellist unjustifiably exposes both his own life and that of his fellow-man, consequently is guilty of a wrongful assumption of the right of God, the Lord of life and death. To make this clear it is only necessary to examine the pretext used to palliate duelling, or, what is the same, to look into the aims sought to be attained by this custom. One of the principal reasons given in justification of duelling is the obtaining of satisfaction. A man is insulted or injured in reputation, and in order to obtain satisfaction challenges the defamer. But besides the offense against civil law in seeking to establish one's rights with weapons, thus evading the authority of the State, a duel is totally unsuited to the attainment of satisfaction and in addition is wrongful. Satisfaction consists in the offender withdrawing his insult and treating the offended person with respect and honor. This end cannot, however, be attained by duelling. When the challenge is made, the one who makes the challenge he does not thereby withdraw the insult; he intends, rather, to maintain it by weapons and shows himself, moreover, ready to add other and greater wrongdoing to the first, inasmuch as he may moreover seek to kill both his own life and that of his fellow-man, who would allow to the man whom he wishes to compel to make good a wrong the same chance of victory as to himself, i. e. who would give the offender the opportunity to add to the wrong he has already done an even more heinous injury, and that is what the challenger does in granting his adversary the same weapons and the same chance for success as he claims for himself. Another reason offered in justification of duelling is self-defense. The duellist desires to avoid the loss of the respect of his peers and thus to retain his office and his income, or, as is said, to defend his honour and his social position. It is unfortunately only too true that to-day the conscientious opponent of duelling, especially in the army, must often suffer great losses. He who is not able to kill can be justifiably used as a target. Honour and the respect of others cannot be preserved by the use of arms, nor in a duel is there any actual vindication of these. The duel implies that the honour of the challenger has already been injured, and consequently that this injury is an accomplished fact; besides it takes place according to agreement, so that it is not a case of self-defense against such an attack. But the word self-defense is used in a broader sense. According to the prejudices existing in certain circles, the person who does not answer an insult by a challenge or who declines a challenge is held to contribute to the danger of the society. In this case that a man's entire social position is at stake. Yet, from its very nature, a duel is an unsuitable and illicit method of preserving or rehabilitating honor. Look at a duel first from the point of view of the person injured. He must, if it is to be a duel at all, because he has been insulted. Two cases, however, are here possible. Either his moral character and good name have been attacked, or the specific charge of cowardice has been made against him. If the former be the case, the duel is manifestly unsuited to defend the injured man's honour. A duel can never prove that the person attacked is a man of honour, is not a simpleton, has not committed adultery, or the like. A man without character or morals can be just as skilful in handling weapons as his honourable opponent. If the quarrel hinges on the charge of cowardice, a duel is apparently a proper means of disproving the same. But in this instance the challenger directly endangers his life in order to prove that he is no coward. Consequently he cannot say that he only suffers his life to be endangered, he deliberately seeks this danger in order to prove the truth of public opinion, but apart from such former statements, this is to dispose of one's life unlawfully. It cannot be said in reply that the injured person merely intends the rehabilitation of his honour. That is certainly the final aim of the duel, but the first and direct aim is to prove one's courage by fighting the duel. Is it permissible, however, to risk one's own life and that of one's fellow-man merely as a means of proving one's courage? If this be correct, it would be equally allowable to enter a lion's cage, sword in hand, if public opinion demanded such proof of personal bravery. Hence it follows that the duel is not in reality a proper means to demonstrate one's courage, for true courage is a moral virtue which is not blind and foolhardy, but exposes itself to danger only if reason demand it. What has been said of the injured party is applicable also to the party giving the provocation, the one who is challenged. If he has acted unjustly he should as a man of honour offer reparation; that is his duty, and the refusal to perform this duty plainly gives him no right to fight a duel with his opponent. If he is not in the wrong he ought to use less severe means than weapons to root out the insult. The challenge might be accepted would be fear of the accusation of cowardice; that this reason is, however, untenable has already been shown. It surely is the basest cowardice to do, through fear of being accused of cowardice, to accept the challenge of a man of any man of sense to condemn as immoral and wrong. The conclusion necessarily to be drawn from the above is: whoever is killed in a duel is indirectly guilty of self-murder, because he has for no justifiable reason risked his life, and whoever slays his adversary in a duel is guilty of unjustifiable homicide, because he has taken the risk of causing death without any right to do so; this holds true even though he did not directly intend his opponent's death. The above applies not only to duels undertaken by private individuals of their own free will, but also to duels fought on account of personal grievances by order of State authorities. Those in authority have not the right to dispose at their pleasure of the life of the subject. Should a dispute be laid before them, they should examine the case judicially and punish the guilty party. If the guilt cannot be proved the accused should be acquitted; in such a case the authorities have no right to command a duel and thus expose the innocent to the same peril as the guilty. This has all the more force, as duels often take place on account of grievances which are not to-day punished with death by civil law.
DUFFY

Das Duell in seinem Ursprung und Wesen (Fellbach, 1864); Die Duell. Rechtfertigung durch Todesironie (1863); Toussaints de Campionsmischer, Histoire des ducs anciens et modernes (Paris, 1869); NARLOWSKY, Das Duell (Leipzig, 1873); Mohr, Die Freiheit des Dichters gegen den Mord und die Mord-Justiz (Osnitz, 1855); HUBSCHNER, Das Duell (Elberfeld, 1886); and many more works on dueling, morality, and the law.

DUHAMEL

Duhamel, Jean-Baptiste, a French scientist, philosopher, and theologian, b. at Vire, Normandy (now in the department of Calvados). June 16, 1624; d. at Paris, 8 August, 1706. He began his studies at Caen and completed them at Paris. In 1642, being only eighteen years of age, Duhamel published an explanation of the work of Theodorus called "Sphericus," to which he added a treatise on trigonometry. The following year he entered the Congregation of the Oratory, which he left ten years later to take charge of the parish of Neully-sur-Marne. Resigning this position in 1663, he became chancellor of the church of Bayeux. When Colbert founded the Académie des Sciences (1666), he appointed Duhamel a member. In 1674, Duhamel held this office until 1697, when he resigned and, upon his own recommendation, was succeeded by Fontenelle. With Colbert's brother, the Marquis de Croissy, he went, in 1685, first to Aix-la-Chapelle for the peace negotiations, and later to England, where he came in touch with the foremost scientists, especially with the physicist Boyle.

Duhamel's works are "Philosophia moralis christiana" (Angers, 1652); "Astronomia physica" (Paris, 1659); "De meteoris et fossilibus" (Paris, 1669); "De consensu veteris et novae philosophiae" (Paris, 1653), a treatise on natural philosophy in which the Greek and scholastic theories are compared with those of Descartes; "De corporum affectionibus" (Paris, 1670); "De mente humana" (Paris, 1672); "De corpo animato" (Paris, 1673); "Philosophia vetus et nova ad usum scholae accommodata" (Paris, 1678). This last work, composed by order of Colbert as a textbook for colleges, ran through many editions. He also published: "Theologia speculatrix et practica" (7 vols., Paris, 1660), abridged in five volumes for use as a textbook in seminaries. (Paris, 1841); "Regim nominum Academie historia" (Paris, 1698; enlarged edition, 1701); "Institutiones biblice" (Paris, 1698), in which are examined the questions of the authority, integrity, and inspiration of the Bible, the value of the Hebrew text and of its treatments, the theory of interpretation, Biblical geography, and chronology; "Biblia sacra Vulgate editionis" (Paris, 1705), with introductions, notes, chronological, historical, and geographical tables. In his choice of opinions, Duhamel shows great impartiality and unbiased judgment. His admiration for empirical science does not make him despise the speculations of his predecessors, but he examines and criticizes both sides carefully, tries to reconcile them, and, if this be impossible, gives his own opinion. Brucker, in his history of philosophy, calls him "a cautious, clarissimus et doctrinae copia celéberrimus". Fontenelle praises his noble character and his disinterestedness; his charity, which "was exercised too frequently not to be known, notwithstanding his care to conceal it"; his humility, which was not only in his lip, but was "a feeling based on science itself."

Du Lhut (Duluth). Daniel Gretzolom, Sieur, d. at Saint-Casimir, September 20, 1640; d. at Montreal, 29 Feb., 1710. He first served in the French army, becoming a lieutenant in 1657 and a gendarme of the King's Guard in 1664. He also took part in the campaign in Flanders and was present at the battle of Senef in 1674. During that year he went to Canada, where he was appointed provost of several members of his family, amongst them his cousins, the Tontys. At first he settled in Montreal, but in 1678 left for the West accompanied by his brother, La Tourette, and six soldiers. In 1679 he took possession of the Sioux country in the name of the King of France. He also explored Lake Superior and the high inland plateau where the Mississippi, the Red River, and the St. Lawrence rise, erected the fortified post of Kaministiquia (now Fort William) and afterwards built Fort La Tourette on Lake Neipigon. Du Lhut was the first Canadian to explore the lake and it was his privilege to save Father Hennepin from captivity when this famous Recollet missionary, having become separated from La Salle's expedition, was wandering about in the wilderness near Saint-Antoine. On account of his intrepidity, Du Lhut had at first some influence over the chiefs, who admired and feared him; he kept them loyal to France and obliged them to join the expeditions which La Barre and Denonville organized against the Iroquois in 1684 and 1687. In 1686 he led the foundation of the post of Detroit and in 1686, having been made captain after twenty years of service, was in command of Fort Frontenac. Here, in 1707, he was succeeded by Tonty, his cousin. He died three years later and was buried in the church of the Recollets at Montreal.

Du Lhut was one of the most dauntless pioneer rangers (coureurs de bois) in Canada during the French regime. For thirty years he succeeded in keeping the country to the west of the Great Lakes under French control. Notwithstanding that he had every chance of becoming wealthy, he died poor and Governor Vaudreuil testified to his having been a very upright man. The city of Duluth, Minnesota, takes its name from him. Du Lhut wrote accounts of his journeys (1676–1678), but unfortunately they have been lost; however, we have a plan that he designed for a chain of forts, which the French government accepted for keeping the lake-route clear of savages and thus facilitating communication between Canada and the western and southern parts of the continent (1683–95). This plan was published by Margry (Découvertes et Établiss. V, 3–72). In the Library of Congress at Washington may also be found extracts from his account of Detroit.

Duluth, Diocese of (Duluthensis), established 3 Oct., 1889, suffragan of the Archdiocese of St. Paul, U. S. A., comprising the counties of Aitkin, Becker, Beltrami, Brown, Cass, Clay, Cook, Crow Wing, Hubbard, Itasca, Kittson, Lake, Marshall, Norman, Pine, Polk, Roseau, Red Lake, Mahnomen, Koochiching, and St. Louis, in the State of Minnesota, an area of 38,439 square miles. The first bishop was the Most Rev. the Right Rev. the Most Rev. Bishop of Duluth, who were the French fur-traders who, under Groseilliers, are recorded as having shipped furs from there in 1660. Daniel Greysolon Du Lhut, the French officer, adventurer, and fur-trader after whom the see is named, was there in 1679. After a varying existence as trading post and frontier settlement, Duluth was incorporated as a town in May, 1857. The first priest in Minnesota was the famous Father Hennepin, who in 1680 was a prisoner among the Sioux. He explored the Mississippi and at St. Paul named the falls in honour of St. Anthony, writing a glowing description of them in 1683. Wandering missionaries made frequent visits to the Indian tribes and scattered Catholics of the region down to 1839, when the Rev. Joseph Crétin (q. v.), a zealous French priest, began an active and successful missionary work.

The Seventh Provincial Council of Baltimore (1849) recommended to Rome the erection of a new see at St. Paul for the Territory of Minnesota and the appointment of Father Crétin as its first bishop, which plan was carried out. Father Crétin had been in the territory for some time, trying to win the Indians over and establish missions and evangelize the Canadian voyageurs who went there for the fur trade. The numerous Indians roaming in the wilderness had nearly forgotten the doctrines of Christianity preached to their ancestors by the Recollets and Jesuits more than a century before, but they were still anxious to have the "black-robins" come among them once more. In 1875 the Vicariate Apostolic of Northern Minnesota was established, and these two divisions of the whole State continued until 4 May, 1886, when St. Paul was raised to the rank of an archdiocese with the four suffragen sees of Duluth, Winona, Jamestown (now Fargo), and St. Cloud, the last-named being the new title for the Vicariate of Northern Minnesota. Duluth, the see city, was within these old limits of the vicariate. In 1866 the few Catholics there were brought together by a visiting missionary. They numbered only about two dozen families in 1870, and Father John Chebul, an Austrian by birth, attended them as a mission from Superior and built the first frame chapel for their use. Other priests of the formative period were Fathers Kaler, German, J. B. M. Gélin, a French Oblate, Joseph Buh, Charles Verwyst, Joseph Staub, Christopher Murphy, and G. J. Goebel.

The Rev. James McGolrick, a member of the
council of Bishop Ireland of St. Paul and rector of the church of the Immaculate Conception, Minneapolis, was nominated as the first bishop of the new see and consecrated at St. Paul, 27 Dec., 1889. He was born 1 May, 1841, at Borrisokane, County Tipperary, Ireland, and educated in organic chemistry. With Boussingault he studied the composition of water and of the atmosphere. With Stas he investigated the composition of carbon dioxide, and later his memoirs on hydrogen and the amide compounds brought him at once into the first rank among the chemists of the nineteenth century of the Immaculate Conception. He found, on taking charge of his new diocese, a Catholic population of about 19,000, of which 3000 were Indians. There were 20 priests, 15 secular and 5 regular; 34 churches, 10 stations, and 8 Chippewa Indian missions attended by Benedictine, Franciscan, and Jesuit missionaries. The first railroad from Duluth to St. Paul ran only in 1870, and in 1882 the iron-rail road, on which industry the chief reliance for material prosperity rested. The commercial panics of 1857 and 1861 were great blows to this section, but in ten years the priests had increased to 38 and the missions and stations to 74 with 30 Indian missions and stations. The Sisters of St. Benedict had been introduced and were in charge of 9 parish and 2 Indian schools, with 1400 children. They also managed 2 hospitals and a home for the aged. The Catholic population had increased to 23,000. Since then conditions have bettered, and the statistics of the diocese for 1908 give these figures: priests 65, 44 secular, 21 regular; churches with resident priests 50; missions with churches 36; stations 45; chapels 15; academies for girls 3, with 395 pupils; parish schools 10, with 1586 pupils; Indian industrial schools 2, with 192 pupils; orphan asylums 1; hospitals 6; Catholic population 54,500, White 50,000, Indian 4500. The religious communities represented in the diocese are the Benedictines and the Oblate Fathers, the Christian Brothers, the Benedictine Sisters, and the Sisters of St. Joseph. The Benedictine Fathers have charge of the Indian missions, and the Benedictine Sisters attend to the needs of the schools established for the benefit of the Indian children, their industrial schools on the Red Lake and White Earth reservations being especially successful in spite of scant means and other disadvantages. The constant good done by these institutions, for the girls of the tribes especially, has been marked every test year. The Christian Brothers have a high school attached to the cathedral in Duluth.

Dumas, Jean-Baptiste, distinguished French chemist and senator, b. at Alais, department of Gard, 14 July, 1800; d. at Cannes, 10 April, 1884. Like many other distinguished chemists, Dumas began his career as a pharmacist, and at Geneva, where he went when a very young man, he obtained a position in the Le Royer pharmacy. Here in connexion with Prérand he published an important treatise on the chemistry of the nervous system which attracted attention and is still well known. This led to an invitation to go to Paris, where he became tutor of Thénard’s course of lectures on chemistry at the Ecole Polytechnique and was appointed professor at the Athénae. While engaged in these positions his published researches concerning the vapour density of the elements, those on the formulae of alcohols and ethers, his memoirs on the law of substitution in organic compounds, and his work on chemical types gave him an illustrious position in chemical investigation. The first researches on the replacing of hydrogen by chlorine in organic bodies is due to him; this was supplemented by researches as to the atomic weight of carbon, his labours doing much to establish the relations of the hydro-carbon compounds to one another. With Boussingault he studied the composition of water and of the atmosphere. With Stas he investigated the composition of carbon dioxide, and later his memoirs on hydrogen and the amide compounds brought him at once into the first rank among the chemists of the nineteenth century of the Immaculate Conception.

In 1829 he founded the Ecole Centrale des Arts et Manufactures with Pécle, Lavallé, and Olivier. Brilliant lecture courses in the Sorbonne won him further renown. He replaced Thénard as professor at the Ecole Polytechnique, was professor at the Sorbonne and dean of the faculty of sciences. Originally a very poor speaker, by practice and study he acquired eloquentatory powers that brought him great celebrity. Dumas also became professor at the Ecole de Médecine, a position he resigned in favour of Wurtz, one of his most distinguished pupils. His school included such illustrious men as H. Sante-Claire Deville, Wurtz, Debray, Pasteur, and others. Turning his attention to politics, Dumas was elected a deputy from the department of Nord in 1849; among the proposed laws in which he was interested were various ones treating the recouping of money, stamped paper, forgery of public acts, taxes on salt, sugar, etc. In 1851 he was appointed minister of agriculture and commerce by Louis Napoleon, and after the coup d’état was made senator. From 1832 he was a member of the Institute, being elected to the Academy of Sciences, and in 1858 he was made a perpetual secretary; in 1878 he became a member of the French Academy. In 1858–59 he carried on an animated controversy as to the nature of the elements with Despretz; in the course of the discussion Dumas’ energetic methods in attacking his opponent’s views excited some criticism. His abandonment of chemical research for politics was considered a misfortune by the scientific world, as he ceased his brilliant investigations when in the very prime of his powers.

Dumas was a consistent Catholic, and remained true to his faith all his life. When it was necessary, he never hesitated to defend Christianity against the attacks of materialism. Examples of his views in this regard may be found in his various addresses, as: his address on Bérand; his commemorative address on Parvay, and the speech in which he extended the greetings of the Academy to the historian Taine. The Count d’Haussonville, at the funeral of Dumas, gave eloquent testimony to the latter’s religious belief. Dumas was a prolific writer. Among his works may be mentioned: “Traité de chimie appliquée aux arts” (3 vols., 1825-46); “Précis de chimie physique et médicale”; “Leçons sur la philosophie chimique” (1837); “Essai de statique chimique des âtres organisés” (1841), the last work written in collaboration with Boussingault. Besides the publications just mentioned there were numerous papers in scientific
journals and in the transactions of the Academy of Sciences. A list of his papers was published in the "Catalogue of Scientific Papers of Royal Society, 1889-1890."

MADISON, L'Œuvre de Jean-Baptiste Dumetz (1899); Dictionnaire Larousse, s. v.

T. O'CONOR SLOANE.

Dumetz, FRANCISCO, date of b. unknown; d. 14 Jan., 1811. He was a native of Mallorca (Majorca), Spain, where he entered the Franciscan Order. In May, 1770, he went to Mexico with forty-eight other Franciscans to join the famous Franciscan missionary college of San Fernando in the City of Mexico. On volunteering for the Indian missions, he was sent to California in October, 1770. Sailing from San Blas, Jalisco, with ten friars in January, 1771, he reached Monterey in May and was assigned to Mission San Diego. In May, 1772, he was transferred to Mission San Carlos, and in May, 1782, was appointed for Mission San Buenaventura, where he continued his untiring labours for the Indians until August, 1797, when he was directed to found Mission San Fernando. Father Dumetz remained there from its founding on 8 Sept. to the end of 1805, except during 1803 and 1804 when apparently he resided at San Gabriel. From January, 1806, to the time of his death, Father Dumetz was stationed at San Gabriel. His remains were buried in the mission church on 15 January, 1811. Dumetz was the last of the twelve friars who did so much for California, where he toiled without interruption for forty years.

Dumfries, Dioceze of. See Galloway.

Dumont, Hubert-André, Belgian geologist, b. at Liège, 15 Feb., 1899; d. in the same city, 28 Feb., 1897. When only twenty years old he received the gold medal of the Academy of Brussels for his "Description géologique de la province de Liège". This memoir marked an important advance in stratigraphical geology. In 1935 he won a doctorate in mathematical and physical science and in the same year was appointed professor of geology and mineralogy at the University of Liège. He held this position until his death, serving also for a time as rector of the university. His native city has erected a statue in his honour. DUMONT was a Catholic and entered the Society of Jesus. His principal achievement was his geological map of Belgium, the preparation of which engaged his attention for a number of years. The first edition was issued in 1849. Later and more complete editions followed, the last being "La carte géologique de la Belgique et des contrées voisines représentant les terrains qui se trouvent en dessous du limon hésbayen et du sable campanien au 800,000".

Dumont's work, together with that of Gosset on the palaeozoic rocks of Belgium, served as a foundation for a subsequent research in that region. The former in 1848 had divided the Terrain Ardenais into the Devilvillien, Revinien, and Salmien groups, the Terrain Rhénan into the Gedinien, Coblenzien, and Alzien groups, and the Terrain Anthracithère into the Eifélien, Condriatan, and Houiller groups. This classification, though based on purely local characteristics, was an excellent one both from a lithological and a stratigraphical point of view. He did not, however, deem it necessary to make any extended comparison between the subdivisions which he had distinguished in Belgium and similar groups in other countries. It was his opinion that the same fauna never extended over the whole earth, so that extreme caution was necessary in establishing a parallel between widely separated rocks on the basis of fossils contained in them. Besides the works already mentioned, Dumont was the author of a number of papers (rarely asterized by careful observation and great clearness. Among them are: "Notice sur une nouvelle espèce de phosphates ferrique" (Bull. de l'Acad. de Belgique, V); "Observations sur la constitution géologique des terrains ardennais de l'Anthoniense de la Belgique" (Ibid., XIX); "Mémoire sur les terrains triangulaire et jurassique de la province de Luxembourg" (Mem. de l'Acad., XV), "Etude sur les terrains ardennais et rhénan de l'Ardennaise, du Rhin, du Brabant, et du Condros" (Ibid., XX–XXII), "Patriarcha DUMONT, sa vie et ses travaux" (Leuven, 1858); D'OMALLY D'HALLOT, Notice sur André Dumont (Brussels, 1903); BARRIN, Histoire de Geologie de la Belgique (Liège, 1901); KNELLER, Das Christentum u. die Vertreter der neueren Naturvorsenschaft (Freiburg, 1864).

HENRY M. BROCK.

Dumolin (or DUMOULIN; lateinized MOLINUS), Charles, French jurist, b. at Paris in 1600; d. there 27 December, 1656. He was a descendant of a noble family from Burgundy, the mother of Elizabeth of England. The life of Dumolin was full of vicissitudes. After taking the degree of Doctor of Law, he first lectured on that subject at Orléans in 1621, and afterwards became an advocate of the Parliament of Paris. He was soon abandoned this position, devoted himself exclusively to the study of law, and gained a great reputation by his works on jurisprudence. He liked to call himself the jurisconsult of France and Germany. It is related that he said: "Ego quod semini cedo, nescire doceri possum" (I yield to no one nor in anyone, one able to teach me). His hatred for the papacy led him into apostasy. In 1542 he embraced Calvinism, but soon passed over to Lutheranism. His violent attacks on the papacy compelled him to seek refuge in France. In 1563 he lectured on law at Tübingen, and afterwards at Strasburg, Dôle, and Besançon; returning to Paris in 1557, he was soon obliged to quit that city and went successively to Orléans and Lyons. From 1654, he resided again in Paris; on his death-bed he absconded his heresy and was reconciled to the Church. The following are his principal works upon civil law: "Commentarii in consuetudines Parisienne"; "Extricatio labyrinthini dividui et individui"; "Tractatus de eo quod interest". His chief work on canon law is a critical edition of the "Fracce de Gratiani" with the glosses, accompanied by notes or notae) hostile to the pope. Amongst his polemical works may be mentioned: "Commentarius ad dictum Henrici II, contra parvas datas et abusus curiae Romane" (1552); "Conseil sur le fait du Concile de Trente, reéption ou rejet d'Isle" (1564), which work caused him to be cast into prison; "Consilium super commodis et incommunos novae secte Jesuitarum" (edited 1604). His "Opera omnia" were published in three volumes at Paris, in 1612; the best edition, however, is that of Paris, 1831, in five volumes.

BODARD, Vie de Charles Dumolin (Paris, 1864); PRAT, Mal- donnat et l'université de Paris au XVIIe siècle (Paris, 1868); ABÉRIEZ, L'Encyclopédie de Dumoulin sous la Revue critique de législation et de jurisprudence, IV, 261 sqq., 32 sqq.; DUPTIT, Charles Dumolin et le concile de Trente, Belgiques l'actualité, II, 711 sqq.

A. VAN Hove.

Dunbar, William, Scottish poet, sometimes styled the "Chaufer of Scotland", born c. 1460; died c. 1520 (?). He graduated B. A. at St. Andrews University in 1479. Educated for the Church, according to his own statement he became a Franciscan novice, and as such traversed the whole of England, preached in various towns, and crossed over for a time to Picardy in France. About 1490 he returned to Scotland and entered the service of James IV, who employed him on various embassies to Paris and elsewhere, and settled
a small pension on him. He celebrated James's mar-
riage to Mary of England by his well-known poem
"The Thistle and the Rois" (The Thistle and the
Roe, 1503), symbolizing the unity between the two
kings. The poet received gifts in money from the
king on this and on other occasions, such as the cele-
bration of his first Mass in 1504, though he often
petitioned both the king and queen for a benefice (lim-
iting his wishes, as he said, to a small country kirk
covered with heather) he never obtained one, and
seems always to have lived in poverty. The best
known of his other poems were the "Goldyn Tarpe", as
well as his "Laithyrogus", or "The Dance" (of the seven
deadly sins), a work of much gloomy power; and many other pieces, some humor-
ous and disfigured by the coarseness of the time, others
of a religious and ascetic type. A few were printed
during his lifetime; and in 1854 an admirable edition
of his complete works was published, edited by Dr.
David Laing. In 1511 Dunbar is mentioned among
Queen Margaret's train on one of her journeys; but
nothing is heard of him after 1513, the year of the bat-
tle of the Flodden. Laing conjectures that he may
have been, as the writers suppose him to have
himself survived until about 1520.
Laing, Works of Dunbar, with biography and notes
(Edin-
burgh, 1834); supplement (1876).

DUNBYNE

DUNBYNE Establishment. See St. Patrick's
College (Maynooth).

Dunchad (Dunchad, Duncaid, Donnacu), Saint,
Abbot of Iona; date of b., unknown, d. in 717.
He was the son of Cinnfessachel and grandson of
Maedcobha of the house of Conall Gulban. He is
first heard of as Abbot of Killchochuir on the coast
of S. E. Ulster (perhaps Killough, County Down).
There is considerable doubt as to the place in which
he was born, whether at Antrim or Iona.
The "Annales of Ulster" first mention him in that capacity under the
year 706 (really 707); but Conamhail was abbot from
704 to 710. It may be that St. Dunchad was caud-
ator to Conamhail (the phrase is princiopum tenen). Or perhaps there was some schism in the monastery
over the paschal question, for though St. Dunchad is
said to have ruled from 710 till 717, in 713 the death
of St. Dorbain Foda, Abbot of Iona, is recorded by
the "Annales of the Four Masters", and the same au-
thor states that the episcopate of "Faelicht of
Dorbain" was annexed to the abbacy in 714. It was this Faelurch
who was certainly abbot from 717 to 724. Both of
these, however, may have been really cauditors to
St. Dunchad, or priors, or even bishops, for there
were certainly bishops in Iona at that period, and the
phrase employed is cathedra in obtinit. However
this may be, the paschal controversy was settled at
Iona by the adoption of the Roman usage, while St.
Dunchad was abbot. This took place at the instance
of St. Egbert, a Northumbrian priest, who had been
educated in Ireland. He came to Iona in 718, and was
soon successful in persuading the community to aban-
don the Celtic Easter and tonsure.

Dundrennan, Abbey of, in Kirkcudbrightshire,
Scotland, a Cistercian house founded in 1142 by King
David I and Fergus Lord of Galloway for monks
brought from Roche Abbey, was appointed resident priory
(Dundrennan to Lyon) means "fort of the thorn-
bushes", and the monastery commands a fine view of
the Solway Firth. Queen Mary fled to Dundrennan
after the battle of Langside and spent her last night in
Scotland there before embarking for England from the
neighbouring Port of Whithorn. In 1587 the abbey
and lands passed to the Crown, and in 1621 it was
annexed to the royal chapel at Stirling. For many years
the buildings were used as a quarry for the erection of
houses in the vicinage, but in 1842 steps were taken to
repair and preserve what was left of them. The cruci-
form church had a nave 130 feet long, and a choir
45 feet long, 175 feet in all; and there was a
central tower 200 feet high. The style is transition
between Norman and First Pointed. Among the tombs
which remain is that of Alan Lord of Galloway (c. 1283); a much mutilated mausoleum, transept, as well as those of several of the abbots and
priests. The finest remains architecturally are those
of the chapter-house, with its beautiful cinquefoil
arched doorway between two windows, and its roof
supported by octagonal columns, of which only frag-
ments are left. Of the domestic buildings of the ab-
bay nothing but a remnant has been preserved. The
abbey estate now belongs to the family of Maitland
of Dundrennan.

D. O. HUNTER-BLAIR.

Dunedin, Diocese of (Dunedinenos), comprises
the provincial district of Otago (including the Otago
part, Southland, and Stewart Island, as well as other
adjacent islands). The diocese contains the most
picturesque lake and fiord scenery in New Zealand.
Its area is about 24,000 sq. miles, of which some 4000
sq. miles are gold-fields, and 2340 forest. This part
of New Zealand was visited (perhaps discovered) by
Captain Cook in 1770. Beyond a few traders, there was,
however, no white population in the Otago provincial
district till 1840, when some families settled on land at
Waikouaiti. In 1848 the district was first colonized
systematically and in a Catholic church by the
Otago Association, under the auspices of the Free
Church of Scotland. It was desired to retain the
province as a Free Kirk reserve, and the immigration of
Catholics was at first resisted. The last barriers
of religious exclusiveness were, however, swept away
by the rush of population that flowed into the province
from all parts of Australasia when, in 1861, rich gold
was discovered at Gabriel's Gully and elsewhere.
The new conditions thus brought about led to a rapid
development of the mineral, pastoral, agricultural, and
forest resources of the district. All New Zealand is
part of the Vicariate Apostolic of Western Oceania,
which was erected in 1835. The first vicar, Dr. Pomp-
allier, arrived in the country, with the pioneer (Marist)
mиссarions, in 1838. All New Zealand re-
mained within his spiritual charge till 1843.
From 1848 till 1869 the territory now comprised
in the Diocese of Dunedin was included in the episcopal
See of Wellington. In the latter year the Diocese of
Dunedin was established. Its first bishop was the Right Rev. Patrick Moran, translated thither from the Cape of Good Hope, 3 December, 1868; d. 22 May, 1895. He was succeeded by the Right Rev. Michael
Verdon, consecrated 3 May, 1896. In 1840 Dr. Pomp-
allier, with Fathers Comte and Pezant, visited and
instructed the native villagers and a few white Catho-
lic whalers at Otakou and Moeraki. Up to 1866, how-
ever, there was no formally established Catho-
ident priest in the whole southern province, and only
about ninety scattered Catholics, who were periodic-
ally visited, on foot, by the saintly Marist, Father
Petitjean. Early in the gold-rush of the sixties,
another devoted Marist missionary, Father MacAulay,
was appointed resident priest in Dunedin, with charge
of the whole province. He built, at Dunedin, the first
Catholic church and presbytery in that part of New
Zealand. Soon after the arrival of Bishop Moran, in
1871, Father Moreau and a few of his fellow-religious
who had been for some time labouring in Otago, were recalled to the Diocese of Wellington.

The Dominican nuns and the secular clergy were introduced by the new bishop in 1871, the Christian Brothers in 1874. The “New Zealand Tablet” was established in 1873, and strenuous efforts were made in extending the facilities for religion and education, a sum of over £80,000 (about $388,000) having been expended for these causes during the first fifteen years of the episcopate of Bishop Moran. When the secular system of education was established by Bishop Moran in 1876, he became, and remained to the close of his life, an eloquent champion of the rights of the Catholic schools to a share in the moneys devoted by the State to the education of youth. The extension of the external organization of religion has more than kept pace with the increase of the Catholic population, and Dunedin is one of the best equipped of the smaller dioceses of Australasia. The first Sisters of Mercy were introduced in 1890, the second and larger division in 1897, the Marist Brothers in 1897, the Sisters of St. Joseph in 1897–8, and the Little Sisters of the Poor in 1904. A provincial seminary for all New Zealand was opened at Mosgiel (near Dunedin) in 1900, and has been greatly enlarged in later years.

At the beginning of 1906 there were in the diocese 20 parochial districts, 65 churches, 32 secular priests, 85 Catholic nuns, 1 ecclesiastical seminary, 5 boarding schools for girls, 6 superior day schools, 2 primary schools, 1 orphanage, 1 home for aged poor, and at the census of 1906 there were 22,685 Catholics in a total white population of 180,974.

HENRY W. CLEARY.

Dunfermline Abbey, of the south-west of Fife, Scotland. Founded by King Malcolm Canmore and his queen, Margaret, about 1070, it was richly endowed by him and his sons, and remodelled as a Benedictine abbey by his successor, David I, who brought an abbot and twelve monks from Canterbury. The magnificent works of such extent and splendour that three sovereigns and their retinues might (says Matthew Paris) have been lodged there together, were burned down by Edward I of England in 1304, but were afterwards restored. The tombs of Malcolm and Margaret are still visible within the ruined walls of the Lady chapel, and were repaired and enclosed by order of Queen Victoria. Dunfermline Abbey was one of the richest Scottish houses, owning almost all Western Fife, as well as property in other counties. It possessed, within its own domains, civil and criminal jurisdiction equal to that of the Crown. The church succeeded Iona as the burial-place of kings, and was thus the Westminster Abbey of Scotland. Besides Malcolm and Margaret, David I and Robert Bruce, with his queen and daughter, were interred there. After the Dissolution, the property passed through the hands of the Piteairn family, Lord Gray, and Seton Earl of Dunfermline, to the Marquesses of Tweeddale. The splendid church was destroyed in 1569 by the Reformers, all but the nave, which they refitted for Presbyterian worship. It is a fine example of Gothic architecture, with a beautiful westward entrance. The remains of the church and palace are now Crown property.

DUNCAN, Irish monk, teacher, astronomer, and poet who flourished about 820. He is mentioned in 811 as an Irish priest and scholar at the monastery of St-Denis near Paris. In that year he wrote a letter to Charlemagne explaining the eclipse of the sun which was supposed to have been caused by Alcuin’s letters (M. G., Epp., IV, 437) he is alluded to as a bishop. In 823 he is mentioned in a “capitulary” of Lothair, and in 825 in an imperial decree by which he was appointed “master of the school at Pavia. His action was lauded by Dungal in the public records of the empire. In 827 or 828 he appeared against Claudius, Bishop of Turin, in a work defending the veneration of images. From the fact that he bequeathed his books to the library of St. Columbanus at Bobbio it is inferred that he spent his last days in the Irish monastery on the Trebbia. The date of his death is unknown. His books, many of them at least, were transferred by Cardinal Federigo Borromeo to the Ambrosian Library in Milan, where they now are. Some historians doubt whether the Dungal of St-Denis and the adversary of Claudius are one person. The prevalent opinion, however, is that they are one and the same. In his letter to Charlemagne Dungal brings to bear on the question of eclipse a knowledge of astronomy far beyond the current ideas of the time. His “De motu” to Claudius is a collection of discussions from the Greek and Latin Fathers and from the liturgical hymns of the Church. The poems ascribed in most manuscripts to Exul Hibernicus are believed by Dümmler, editor of the “Poete Èvi Carolini”, to have been written by Dungal, who like many of his fellow-exiles from Ireland styles himself peregrinus, exul, pouer et peregrinus. Only three of them bear the name Dungal. They are interesting from many points of view, especially from that of the historian who searches the records of Charlemagne’s reign for the last ecclesiastical references to the Irish hermits, and the attitude of mind of the Irish scholars who flocked to the Continent of Europe in the ninth century. Yet they do not enable us to determine when and where Dungal was born, though from the fact that among the books which he presented to the Library of Bobbio is the “Antiphonary of Bangor”, it is inferred that he spent the years of his student life in Ireland at the famous Bangor school. Mabillon published a ninth-century poem from which it appears that Dungal enjoyed among his contemporaries a reputation for moral and other qualities.

WILLIAM TURNER.

Dunin, Martin von, Archbishop of Gnesen and Pozen, b. 11 Nov., 1774, in the village of Wat near the city of Raw, Poland; d. 26 Dec., 1842, in the city of Pozen. He studied theology in the Collegium Germanicum at Rome (1793–97), and was ordained priest in Sept., 1797. After some service in the Diocese of Cracow, he was made a canon of Wloclawek by the Bishop of Cujavia, in 1808 canon of Gnesen, in 1815 chancellor of its cathedral chapter, in 1824 canon of Pozen and counsellor to the Government in his diocese. On the death of Archbishop Theophilus von Wolicki (1829) Von Dunin became administrator of the Archdiocese of Gnesen and Pozen, was appointed archbishop in 1831, and consecrated 10 July of the same year. He endeavoured at once to reorganize his vast diocese, a work made easier in the vicissitudes of Poland in the eighteenth century, the consequent reunion of the Dioceses of Gnesen and Pozen, and the secularization or suppression of the monasteries. He reconstructed on a new plan the religious and secular seminaries of Gnesen and Pozen, travelled throughout the two dioceses according to the Sacrament of Confirmation and dedicating new

D. O. Hunter-Blair.
churches, and discharged faithfully the other duties of his pastoral ministry. In the exercise of these duties he came into conflict with the Prussian Government on the question of jurisdiction laid down by Benedict XIV (1740-58) in the Constitution "Magnae nobis" (29 June, 1748), by which marriages between Catholics and members of other Christian denominations became lawful, had been well observed in Catholic Poland. But in a treaty concluded in 1765 with various European powers the Prussian Government undertook to enforce another order of things. Mixed marriages were no longer forbidden; male children born of such marriages were to be brought up in the religion of their father, the female offspring in that of the mother. The marriage was to be blessed by the ecclesiastical minister, under whose jurisdiction the bride was; if a Catholic priest should refuse to solemnize the marriage, the minister of the other party was to officiate. Similar provisions were contained in the code of Prussian law extended to Saxony in 1765, and in 1774. The royal decree of King Frederick William III (1797-1840), 21 Nov., 1803, they were further modified in an anti-Catholic sense: all the children of mixed marriages were to be raised in the religion of the father. Such legislation was unquestionably hostile to Catholic interests. It often happened, therefore, that Catholic priests blessed mixed marriages without first requiring the usual promise concerning the free exercise of religion for the Catholic party and the education of all children in the Catholic faith. The bishops were silent; both priests and bishops seemed to believe that they must endure what they could not prevent. Penalties were inflicted by the Government on all priests who refused to bless mixed marriages contracted without any of the above conditions. The Catholic Petition of their children was considered in the words of the "Litteris altero abhinc" of Pius VIII (1829-30), 25 March, 1830, forbidding priests to bless a mixed marriage if no promise were given relating to the education of the children in the Catholic Faith. In case of such refusal Pius VIII agreed to tolerate a passive assistance (considerato passim) on the part of the priest. Realizing the harm done to the Catholic religion by the lax practice observed so far, Archbishop Von Dunin resolved to break with it. In January, 1837, he requested from the Ministry of Ecclesiastical Affairs permission to publish a Brief of Pius VIII, or at least to direct his clergy to obey its provisions. His request was refused. A petition sent directly to Frederick William III, 28 Oct., 1837, was similarly treated. Determined not to betray his high office he sent an instruction to his priests, 30 Jan., 1838, in which he inculcated the principles of the Church relating to mixed marriages; soon after (27 Feb.) he suspended ipso facto any priest of his diocese who should henceforth bless a mixed marriage without previous assurance as to the Catholic education of the offspring. The king was notified of these acts, 10 March, 1838. While the instructions of the archbishop were well received throughout his diocese, the Government was highly indignant and sought by all means to render them ineffectual. They were declared null and void; the archbishop was asked to recall them, and finally in July, 1838, a regular trial was commenced against him in the Court of Posen, to which, however, he always objected as conducted by a non-competent authority. In the midst of this struggle he received much consolation from the unanimous support of his clergy, and from an Allocution in his favour the question of Tois, 23 Jan., 1838. At the conclusion of his trial in 1839 he was summoned to Berlin, where he arrived 5 April. A last ineffectual attempt was made to have him recant; finally the sentence of the court proclaiming his deposition from office, inability ever to hold one, and a confinement of six months in a fortress, was read to him. He appealed directly to the king for clemency, but nothing was changed except that he was detained in Berlin instead of being sent to a fortress.

Meanwhile the archbishop began to think of the needs of his diocese, and being unable to obtain permission to return, he departed secretly from Berlin and arrived in Posen, 4 October. In less than two weeks, during the night of 6th, he was taken to the fortress of Colberg, where he remained until the death of Frederick William III (7 June, 1840). After his departure the diocese put on public mourning; the bells and the organs remained silent during the celebration of the Holy Mysteries; on all Sundays and feast days public prayers were said for the speedy return of the archbishop; and both the clergy and the nobility of Posen made several fruitless attempts to obtain his release. With the accession of the peaceful king, Frederick William IV (1840-61), matters changed. On 3 Aug., 1840, Von Dunin was set free, and on the 5th of the same month he arrived in Posen amid the rejoicing of his faithful flock. According to an agreement reached with the Government he issued a pastoral letter, 25 Aug., in which his previous instructions were somewhat modified, without detriment, however, to Catholic principles. The prince-bishop did not insist absolutely on the fulfilment of the usual conditions required for mixed marriages, but at the same time to abstain from all active participation in such marriages, if the usual promises were not given. No mention was made of any punishment in the case of contravention. Later on (21 Feb., and 26 Sept., 1842) he issued new instructions relating to the manner of dealing in confession with the husband or wife of a mixed marriage. The priests were directed to be indulgent towards those who tried their best to influence the couple in the Catholic faith, and to distinguish them from those who were altogether careless in the discharge of this sacred duty. With this the whole controversy ceased. Archbishop Von Dunin did not long survive these conflicts. His memory is held in respect for his unwavering loyalty to Catholic principles, and for his courage, frankness, and prudent moderation displayed in their defence.

FRANCIS J. SCHAEPER.

Dunkeld, Diocese of (Dunkeldensis), in Scotland, constituted, as far back as the middle of the ninth century, the primatial see of the Columban Church by King Kenneth Mac Alpine, who rebuilt there the church and monastery founded by King Constantine (afterwards destroyed by the Danes), and translated thither St. Columba's relics. The first occupant of the see is styled in the Annals of Ulster (A.D. 865) Bishop of Fortrenn, the name by which the kingdom of the Southern Picts was then known. He was also Abbot of Dunkeld, with jurisdiction, formerly enjoyed by Iona, over the other Columban monasteries in Scotland. The seat of the primacy was, however, subsequently transferred to Abernethy, and then to St. Andrews, and Dunkeld became subject to lay abbots, from one of whom, Cnian, sprung Malcolm III and his successors. In 1127 King Alexander, who had already founded the Diocese of Moray farther north, erected Dunkeld into a cathedral church and replaced the Columban monks by a chapter of secular canons. The new bishopric included a great part of what afterwards became the Dioceses of Argyll and Dunblane, and retained its jurisdiction over various churches representing old Columban foundations. The Abbots of Iona remained, as heretofore, subject to the ancient primacy.
DUNDEE 194

DUNN

tal See of Dunkeld, until Iona became the seat of the Bishop of the Isles at the end of the fifteenth century. At Dunkeld, the Bishopric of St. Andrews (513–1322) was restored to the metropolitan province of Dunkeld. Thirty-five bishops occupied the See of Dunkeld from its foundation in 1107 until the extinction of the ancient hierarchy in the sixteenth century. Of this line of prelates the most distinguished was James Kennedy (1438–1440), illustrious for his birth, learning, and piety, who was translated, after two years at Dunkeld, to the Archbishopric of Glasgow; but during the primacy of Archbishop Foreman of St. Andrews (1513–1522) it was restored to the metropolitan province. Thirty-five bishops occupied the See of Dunkeld, including the famous prelate Gavin Douglas (1516–1521), who died in exile in England; and John Hamilton (1545–1547), who succeeded the murdered Cardinal Beaton at St. Andrews, and closed his troubled career on the scaffold at Stirling in 1571. The last pre-Reformation Bishop of Dunkeld was Robert Crichton (nephew of a former occupant of the see), who survived until 1586.

For close on three centuries, the Diocese of Dunkeld, like the otherScottish bishoprics, remained vacant, except for the short interval of 1615–1623, when the see was restored by Queen Anne. The last bishop of Dunkeld was P. Ouchy, successor to Bull, "Ex suprema apostolatus aetate". The diocese, as then reconstituted, is one of the suffragan sees of the archiepiscopal province of St. Andrews, and includes the counties of Perth, Forfar, Clackmannan, Kinross, and the northern part of Fife. Since the removal of the see, it has been held by three bishops: George Rigg (d. 1887); James G. Smith (transferred to St. Andrews in 1900); and the Right Rev. Angus Macfarlane, consecrated 1901. The bishop's pro-cathedral is in Dundee, the residence of the great majority of the Catholics of the diocese, and the cathedral chapter, erected in 1895, consists of a provost and eight canons. The number of secular priests in the diocese (1908) is 35; regulars (Redemptorists), 12. The missions and chaplaincies number 17, the churches, chapels, and stations 31, and the parochial schools 13. There are two monasteries of men (Redemptorists and Marists), four convents of women (Sisters of Mercy, Little Sisters of the Poor, Ursulines, and Sisters of Charity), and the Catholic institutions comprise a home for aged poor, a house of mercy for servants, and a working girls' home. The Catholic population of the diocese is estimated to be rather more than 30,000. The old cathedral of Dunkeld, beautifully situated on the Tay amid wooded hills, was erected between 1220 and 1500. The building was destroyed in 1651 by the Puritans, and suffered later at the hands of the Earl of Buchan, styled the "Wolf of Badenoch". It fell partly into ruins in the sixteenth century, since when the choir has been used for Presbyterian worship. The Duke of Atholl, long the owners of the building, have spent a good deal on its preservation and repair, and an extensive restoration of the choir was carried out in 1908, chiefly at the cost of Sir Donald Currie. There is now no Catholic church or resident priest in the village of Dunkeld.

DUNNE, EDWARD J. See DALLAS, DIOCESE OF.

DUNNE, JOHN. See BATHURST, DIOCESE OF.

DUNNE, JOHN. See WILCANNIA, DIOCESE OF.

DUNNE, ROBERT. See BRISBANE, DIOCESE OF.

DUNNE SCOTUS, JOHN, surnamed Doctor Subtilis, d. 8 Nov., 1308; he was the founder and leader of the famous Scotch School, which had its chief representatives among the Franciscans. Of his antecedents and life very little is known; the resources are silent about him. It is certain that he died rather young, according to earlier traditions at the age of thirty-four years (cf. Wadding, Vita Scoti, in vol. I of his works); but it would seem that he was somewhat older than this and that he was born in 1270. The birthplace of Scotus has been the subject of much discussion, and so far no conclusive evidence in favour of any locality has been advanced. The surname Scotus by no means decides the question, for it was given to Scotchmen, Irishmen, and even to native Irish of the name, Duns, to which the Irish attach so much importance, settles nothing; there was a Duns also in Scotland (Berwick). Moreover, it is impossible to determine whether Duns was a family name or the name of a place. Appeal to supposedly ancient local traditions in behalf of Ireland's claim is of no avail, since we cannot ascertain just how old they are; and their age is the pivotal point.

This discussion has been strongly tinged with national sentiment, especially since the beginning of the sixteenth century, when the name, like Mauritian de Portu (O'Fihely), Hugh MacCaghwell, and Luke Wadding rendered great service by editing Scotus's works. On the other hand, the English have some right to claim Scotus; as a professor for several years at Oxford, he belonged to the English school of thought and was thus another during his lifetime nor for some time after his death was any other view as to his nationality proposed. It should not, however, be forgotten that in those days the Franciscan cloisters in Scotland were affiliated to the English province, i.e. in the custodia of Newcastle. It would not therefore be amiss to regard Scotus as a native of Scotland or as a member of a Scottish cloister. In any case it is high time to eliminate from this discussion the famous entry in the Morton College MS. (no. 39) which would make it appear that Scotus was a member of that college and therefore a native of Northern England. The statutes of the college excluded monks; and as Scotus became a Franciscan when he was quite young, he could not have belonged to the college previous to joining the order. Besides, the entry in the college register is under the date of 1416, and consequently too late to serve as an argument.

The case is somewhat better with the entry in the catalogue of the library of St. Francis at Assisi, under date of 1381, which designates Dune Scotos's commencement date as on the 29th of December in the year 1381. This is the entry in the Custodia of Novitiate of the Franciscan Order, known as the "Liber Terza". It is followed in the manuscript by "est mihi ratio fraternitatis Johannis Scoti de Ordine Minorum, qui et Dructor Subtilius nuncupatur, de provincia Hiberniae" (the work of master John Scotus of the Franciscan Order, known as the subtil doctor, from the province of Ireland). This, though it furnishes the strongest evidence in Ireland's favour, cannot be regarded as decisive. Since Scotus laboured during several years in England, he cannot, simply on the strength of this evidence, be assigned to the Irish province. The library entry, moreover, cannot possibly be accepted as contemporary with Scotus. Add to this the geographical distance and it becomes plain that the discussion cannot be settled by an entry made in far-off Italy seven-three years after Scotus's death, at a time too when geographical knowledge was by no means perfect. Finally, no decisive evidence is offered by the epitaphs of Scotus; they are too late and too poetical. The question, then, of Scotus's native land must still be considered an open one. When he took the habit of St. Francis is unknown; probably about 1290. It is a fact that he lived and taught at Oxford as early as 1290. On 26 July, 1308, the English province of Franciscans asked the Bishop of Lincoln to confer upon twenty-two of his subjects jurisdiction to hear confessions. The bishop gave the
permission only to eight; among those who were refused was "Ioannes Douuus". It is quite certain, too, that he went to Paris about 1304 and that there he was at first merely a Bachelor of Arts, for the general of the Franciscans, Gonsalvus de Vallesiis, wrote (1297 or 1298) to the prior of the college of the Franciscans at Paris to present John Scotus at the university for the doctor's degree. The general's letter mentions that John Scotus had distinguished himself for some time past by his learning ingenium sublimissimum. He did not teach very long in Paris; in 1307 or 1308 he went to Cologne, probably as a professor at the university. There he died, and was buried in the monastery of the Minorites. At the present time (1908) the process of his beatification is being agitated in Rome on the ground of a cultus immemorialis.

Duns Scotus's writings are very numerous and they have often been printed; some, in fact, at a very early date. But a complete edition, in 12 folio volumes, was published only in 1839 by Wadding at Lyons; this, however, included the commentaries of the Scotists, Lycketus, Poncius, Cavellus, and Hiqueus. A reprint of Wadding's edition, with the treatise "De perfectione statum" added to it, appeared 1891-95 at Paris (Vives) in 26 vols. 4to. Whether all the writings contained in these editions are by Duns Scotus himself is doubtful; it is certain, however, that many changes and additions were made by later Scotists. A critical edition is still wanting. Besides these printed works, some others are attributed to Scotus, especially commentaries on several books of Scripture. The printed writings deal with theological and scientific, but chiefly with philosophical and theological, subjects.

Of a purely philosophical nature are his commentaries and questiones on various works of Aristotle. These, with some other treatises, are contained in the first seven volumes of the Paris edition. The principal work of Scotus, however, is the so-called "Opus Oxoniense" i.e. the great commentary on the "Sentences" of Peter Lombard, written in Oxford (c. VIII-XXI). It is primarily a theological work, but it contains many treatises, or at least dissections, on logical, metaphysical, grammatical, and scientific topics, so that nearly his whole system of philosophy can be derived from this work. Volumes XXII-XXIV contain the "Reportata Parisiensiis", i.e. a smaller commentary, for the most part theological, on the "Sentences". The "Questiones Quodlibetales", chiefly on theological subjects, one of his most important works, and the above-mentioned essay, "De perfectione statum", fill the last two volumes. As to the time when these works were composed, we know nothing for certain. The commentaries on Aristotle were probably his first work, then followed the "Opus Oxoniense" and some minor essays, i.e. the "Questiones Quodlibetales", his dissertation for the doctor's degree. The "Reportata" may be notes written out after his lectures, but this is merely a surmise.

Scotus seems to have changed his doctrine in the course of time, or at least not to have been uniformly precise in expressing his thought; now he follows rather the sententiae communes or posticum (Quodlibetales); then again he goes his own way. Many of his essays are unfinished. He did not write a summa philosophica or theologica, as did Alexander of Hales and St. Thomas Aquinas, or even a compendium of his doctrine. He wrote only commentaries or treatises on disputata questions; but even these commentaries are not continuous explanations of Aristotle or Peter Lombard. Usually he cites first the text or presupposes it as already known, then he takes up various points which in that day were live issues and discusses them from all sides, at the same time presenting the opinions of others. He is sharp in his criticism, and with relentless logic he refutes the opinions, or at least the arguments, of his opponents. In his fervour he sometimes forgets to set down his own view, or he simply states the reasons for various tenable opinions, and puts them forward as more or less probable; this he does especially in the "Collationes": Hence it is said that he is no systematizer, that he is better at tearing down than at building up. It is true that none of his writings plainly reveals a system; while several of them, owing no doubt to his early death, betray lack of finish. His real teaching is not always fully stated where one would naturally look for it; often enough one finds instead the discussion of some special point, or a long excursion in which the author shows his critical bent. His own opinion is to be sought elsewhere, in various incidental remarks, or in the presuppositions which serve as a basis for his treatment of other problems; and it can be discovered only after a lengthy search. Besides, in the heat of controversy he often uses expressions which seem to go to extremes and even to contain heresy. His language is frequently obscure; a maze of terms, definitions, distinctions, and objections through which it is by no means easy to thread one's way. For these reasons the study of Scotus's works was difficult; when undertaken at all, it was not carried on with the requisite thoroughness. It was hard to find a unified system in them. Not a few unsatisfactory, one-sided, or even wrong opinions about him were circulated and passed on unchallenged from mouth to mouth and from book to book, growing more erroneous as they went. Nevertheless, there is in Scotus's teaching a rounded-out system, to be found especially in his principal work, a system worked out in minutest details. For the present purpose, only his leading ideas and his departures from St. Thomas and the sententiae communes need be indicated.

**System of Philosophy.**—The fundamental principles of his philosophical and theological teaching are his distinctio formalis, and his idea of being. The dis
tinctio formalis is intermediate between the distinctio rationis tantum, or the distinction made by the intellect alone, and the distinctio realis, or that which exists in reality. The former occurs, e.g., between the concepts 'man' and 'animal.' The latter, within the realm of created reality, between things that can exist separately or at least can be made to exist separately by Divine omnipotence, as, e.g., between the different parts of a body or between substance and accident. A thing is "formally distinct" when it is such in essence and in concept that it can be thought of by itself, when it is not another thing, though with that other it may be so closely united that not even omnipotence can separate it, e.g. the soul and its faculties and these faculties among themselves. The soul exists with its faculties only on being (res), but conceptually it is not identical with the intellect or the will, nor are intellect and will the same. Thus we have various realities, entities, or formalities of one and the same thing. So far as the thing itself exists, these entities have their own being; for each entity has its own being or its own existence. But existence is not identical with subsistence. The accident, e.g., has its own being, its own existence, which is different from the existence of the substance in which it inheres, just because the accident is not identical with the substance as such, and vice versa, since it is not a thing existing by itself, but inheres in the substance as its subject and support; it is not an independent being. Moreover, only actually existing things have real being; in other words, being is identical with existence. In the state of mere ideality or possibility, before their realization, things have an essence, an ideal conceivable being, but not an actual one; else they could not be created or annihilated, since they would have had an existence before their creation. And since being is ipso also true and good, nothing else is really good and true except what actually exists. If God, therefore, by an act of His free will gives existence to the substances, He makes them by this very act also true and good. In this sense, it is quite correct to say that according to Scotus things are true and good because God so wills. By this assertion, however, he does not deny that things are good and true in themselves. They have an objective being, and thence also objective truth and goodness, because they are in the likeness of God, Whose being, goodness, and truth they imitate. At the same time their ideal being is that of the ideas of them are not produced by the Divine free will, but by the Divine intellect, which, without the co-operation of God's will, recognizes His own infinite essence as imitable by finite things, and thus of necessity conceives the ideas. In this ideal state God necessarily will the things, since they cannot but be pleasing to Him as images of His own essence. But from this it does not follow that He must will them with an effective will, i.e. that He must realize them. God is entirely free in determining what things shall come into existence.

God alone is absolutely immaterial, since He alone is absolute and perfect actuality, without any potentiality for becoming other than what He is. All creatures, angels and human souls included, are material, because they are changeable and may become the subject of accidents. But from this it does not follow that souls and angels are corporeal; on the contrary, they are spiritual, physically simple, though material in the sense just explained. Since all created things, corporeal and spiritual, are composed of potentiality and actuality, they have the same material constitution of all, and therefore all things have a common substratum, a common material basis. This materia, in itself quite indeterminate, may be determined to any sort of thing by a form—a spiritual form determines it to a spirit, a corporeal form to a material body. Scotus, however, does not teach an extreme Realism; he does not attribute to the universals or abstract essences, e.g. genus and species, an existence of their own, independent of the individual beings in which they are realized. It is true, he holds that the universal idea of a principle, or a determinate principle, at least by Divine omnipotence, and that it can then exist by itself. Conceptually, the materia is altogether different from the forma; moreover, the same materia can be determined by entirely different forms, and the same form can be united with different materia, as is evident from the processes of generation and corruption. For this reason God at least can separate the one from the other, just as in the Holy Eucharist He keeps the accidents of bread and wine in existence, without a substance in which they inher. It is no less certain that Scotus teaches a plurality of forms in the same thing. The human body, e.g., taken by itself, without the soul, has its own form, the forma corporealis. It is transmitted to the child by its parents and is different from the rational soul, which is infused by God himself. The forma corporaealis gives the body a sort of human form, though quite imperfect, and remains after the rational soul has departed from the body in death until decomposition takes place. Nevertheless, it is the rational soul which is the essence of the form of the body or of man; this is the actual similarity with the other beings, whether one person, one man. With all its faculties, vegetative, sensitive, and intellectual, it is the immediate work of God, Who infuses it into the child. There is only one soul in man, but we can distinguish in it several forms; for conceptually the intellectual is not the same as the sensitive, nor is this identical with the vegetative, nor the vegetative with that which gives the body, such as its form; yet all these belong formally, by their concept and essence, to the one individual. There is a real distinction between the universal nature of each thing and its individuality, e.g. in Plato between his human nature and that which makes him just Plato—his Platonicity. For the one is not the other; the individuality is added to the human nature and with it constitutes the human individual. In this sense the property or difference, or the haccias, is the prinscipium individuationis. Hence it is clear that there are many points of resemblance between matter and form on the one hand and universal natures and their individualization on the other, but they are necessarily different. Scotus teaches Realism. According to his view, matter can exist without form, but not the universal essence without individualization; nor can the different forms of the same thing exist by themselves. He does not maintain that the uniform matter underlying all created things is the absolute being which exists by itself, independent of the individuals, and is then determined by added forms, first to genera, then to species, and lastly to individuals. On the contrary, materia prima, which according to him can exist without a form, is already something individual and numerically determined. In reality there is no materia without form, and vice versa. The materia which God created had already a certain form, the imperfect form of chaos. God could create matter by itself and form by itself, but both would then be something individual, numerically, though not specifically, different from other matter and other forms of the same kind. This matter, numerically different from other matter, could then be united with a form, also numerically different from other forms of the same kind; and the result would be the same materia is the form different from other individuals of the same kind. From such individualized matter, form, and compound we get by abstraction the idea of a universal matter, a universal form, a universal compound, e.g. of a universal man. But by themselves universal matter and universal form cannot exist. The universal as such is
their distinction is not annulled by His infinity; on the other hand it remains true that God is only one will. The process continues, in the Blessed Trinity, takes place without regard to the external world. Only after its completion the three Divine Persons, as one principle, produce by their act of cognition the ideas of things. But quite apart from this process, God is independent of the world in His knowledge and will, for the obvious reason that dependence of any sort would imply imperfection.

The cognition, volition, and activity of the angels is more akin to ours. The angels can of themselves know things; they do not need an infused species. They do not necessarily act, as a result of his being, always to will what is evil; with his splendid natural endowments he can do what in itself is good; he can even love God above all things, though in fact he does not do so. Sin is only in so far an infinite offence of God as it leads away from Him; in itself its malice is no greater than is the goodness of the opposite virtue.

In his Christology, Scotus insists strongly on the reality of Christ's Humanity. Though it has no personality and no subsistence of its own, it has its own existence. The unita hypostatica and the commensurability of the idiomata are recognized in accordance with the doctrine of the Church, with no leaning to either Nestorianism or Adoptionism. It is true that Scotus explains the influence of the hypostatic union upon the human nature of Christ and upon His work differently from St. Thomas. Since this union, as the new way changes the human nature of Christ, it does not of itself impart to the Humanity the beatific vision or impenetrability. These prerogatives were given to Christ with the fullness of grace which He received in consequence of that union. God would have become man even if Adam had not sinned, since He willed that in Christ humanity and the world should be united with Himself by the closest possible bond. Scotus also defends energetically the Immaculate Conception of the Blessed Virgin. All objections founded on original sin and the universal need of redemption are solved. The merits of Christ are infinite only in a broader sense, but of themselves they are entirely sufficient to give adequate satisfaction to the Divine justice; there is no deficiency to be supplied by God's mercy. But there is needed a meritorious act on the part of Christ, since in the sight of God there is no real merit in the strictest sense of the word.

Grace is something entirely supernatural and can be given only by God, and, what is more, only by a creative act; hence the sacraments are not, properly speaking, the physical means of grace, but, for the same reason, are at once free and necessary. Also with regard to created things Scotus emphasizes the freedom of God, without, however, falling into the error of merely arbitrary, unmotivated indeterminism. It has been asserted, too, that God in accordance to Scotus, being can be attributed univocally to God and creatures; but this again is false. Scotus maintains that God is the ens per essentiam, creatures are entia per participacionem— they have being only in an analogical sense. But from the being of God, and the being of creatures, a universal idea of being can be abstracted and predicated univocally of both the finite and the infinite; otherwise we could not infer from the existence of finite things the existence of God, we should have no proof of God's existence, as every syllogism would contain a contradictio in adiecto. To make the dictate of right reason prevail, between the attributes themselves and then between God's essence and the Divine Person, there is a formal distinction along with real identity. For conceptually Divinity is not the same as wisdom, intellect not the same as will; Divinity is as it were identical with eternity, since Divinity neither begotten, as does the Father, nor is begotten, as is the Son. But these realities are formally in God and
manded Abraham to sacrifice his son. But the pre-
cepts of the second table also are far more binding
than the other positive laws of God. In the present
order of things God cannot permit manslaughter
universally, taking the property of others, and the like.
There are also indifferent actions in individual.
Absolutely speaking, man should direct all his actions
towards God; but God does not require this of him.
He does not wish to burden man with so heavy a yoke.
He obliges man only to observe the Decalogue; the rest
is free. Social and legal questions are not treated
by Scotus ex presso; his works, however, contain
several ideas on these subjects.

RELATION BETWEEN PHILOSOPHY AND THEOLOGY.

—Scotus does not, as is often asserted, maintain that
science and faith can contradict each other, or that
a proposition may be true in philosophy and false in
theology and vice versa. Incorrect, also, is the state-
ment that he attaches little importance to showing
the harmony between scientific knowledge and faith
and that he has no regard for speculative theology.
Quite the contrary, he proves the dogmas of faith not
only from authority but, as far as possible, from rea-
son and philosophy. He preserves in philosophy indi-
nate truth. Facts which have God for their author
and yet can be known by our natural powers, especially
miracles and prophecies, are criteria of the truth
of Revelation, religion, and the Church. Scotus strives
to gain as thorough an insight as possible into
the meaning of such discourses to the human mind,
to establish truth upon truth, and from dogma to
prove or reject many a philosophical proposition.
There is just as little warrant for the statement that
his chief concern is humble subjection to the author-
ty of God and of the Church, or that his tendency is
not to depreciate scientific knowledge and to resolve
speculative theology into doubts. Scotus simply be-
lieves that many philosophical and theological proofs
of other scholars are not conclusive; in their stead
he adduces other arguments. He also thinks that
many philosophical and theological propositions can
be proved which other Scholastics consider incapable
of demonstration. He indeed lays great stress on the
authority of Scripture, the Fathers, the Church;
but he also attaches much importance to natural
knowledge and to the inductive capacity of the mind
of angels and of men, both in this world and in the
other. He is inclined to widen rather than narrow
the range of attainable knowledge. He sets great
value upon mathematics and the natural sciences and
especially upon metaphysics. He does not reject even
miracles as witnesses to Divine or angelic intervention
or to miracles, and demands that the supernatural
and miraculous be limited as far as possible even in
matters of faith. Dogmas he holds are to be explained in
a somewhat softened and more easily intelligible
sense, so far as this may be done without diminution
of their substantial meaning, dignity, and depth. In
Scripture the literal sense is to be taken, and freedom
of opinion is to be granted so far as it is not opposed to
Christian Faith or the authority of the Church. Sco-
tus is much given to the study of metaphysics for
this reason he insists on demonstrative proofs in
philosophy and theology; but he is no real sceptic.
He grants that our senses, our internal and external
experience, and authority together with reason, can
furnish us with absolute certainty and evidence. The
difficulty which many truths present lies not with
minds in ourselves as in the objects. In itself everything
knowable is the object of our knowledge. Reason
can of its own powers recognize the existence of God
and many of His attributes, the creation of the world,
out of nothing, the conservation of the world by God;
the essences of God, individuality, substantiality, and
unity of the soul, as well as its free will. In many
of his writings he asserts that mere reason can come to
know the immortality and the creation of the soul; in
others he asserts the direct opposite; but he never
denies the so-called moral evidence for these truths.

Theology with him is not a scientific study in the
strictest sense of the word, as are mathematics and
metaphysics, because it is not based upon the evidence
of its objects, but upon revelation and authority. It
is a practical science because it pursues a practical
end: the possession of God. But it gives the perfect
certainty and unchangeable truths; it does not consist
in mere practical, moral, and religious activity.
Thus Scotus is removed from Kant and the modern
Geistabfolger, not by a single line of thought but by
the whole range of his philosophical speculation. Sco-
tus is no precursor of Luther; he emphasizes ecclesias-
tical tradition and authority, the freedom of the will,
the power of our reason, and the cooperation with
grace. Nor is he a precursor of Kant. The doctrine
regarding primacy of the will and the practical char-
acter of theology has quite a different meaning in his
mind from what it has in Kant's. He values metaph-
ysics highly and calls it the queen of sciences. Only
as a very subtle critic may he be called the Kant of the
thirteenth century. Nor is he a precursor of the Mod-
er academy. He is not developing his ideas from
philosophical ideas, e.g., the stress he lays on freedom
in scientific and also in religious matters, upon the separ-
ateness of the objective world and of thought, the self-
activity of the thinking subject, the dignity and value
of the individual personality; yet in all this he remains within proper limits. He has the opposition of
Machiavelli. He very forcibly the necessity of an absolute authority in the
Church, the necessity of faith, the freedom of the
will; and he rejects absolutely any and every monistic
identification of the world and God. That he has so
tenously been misunderstood is due solely to the fact
that his teaching has been viewed from the standpoint
of modern thought.

Scotus is a genuine Scholastic philosopher who
works out ideas taken from Aristotle, St. Augustine,
and the preceding Scholastics. He is universally rec-
ognized as a deep thinker, an original mind, and a
sharp critic; a thoroughly scientific man, who without
personal bias proceeds objectively, stating his own
doctrines with modesty and with a certain reserve.
It has been asserted that he did more harm than good
in the Church, and that his destructive criticism
and his subtleties, and his barbarous terminology he
prepared the ruin of Scholasticism, indeed that its down-
fall begins with him. These accusations originated
to a great extent in the insufficient understanding or the
misunderstanding of Scotus's ideas. It is not Scotus
who destroys, but he attacks, and his criticism
lacks elegance; it is often obscure and unintell-
igible; but the same must be said of many earlier
Scholastics. Then too, subtle discussions and dis-
sections which to this age are meaningless, abound in
his works; yet his researches were occasioned for the
most part, by the remarks of other Scholastic philoso-
phers, especially by Henry of Ghent, whom he attacks
perhaps even more than he does St. Thomas. But
the real spirit of scholasticism is perhaps in no other
Scholastic so pronounced as in Scotus. In depth of
thought and in the heart of the doctrine, Scotus
is not surpassed by any of his contemporaries.
He was a child of his time; a thorough Aristotelian,
even more so than St. Thomas; but he criticizes sharply
even the Stagirite and his commentators. He tries
always to explain them favourably, but does not hesi-
tate to differ from them. Dun Scotus teaching is
orthodox. Catholics and Protestants have charged
him with sundry errors and heresies, but the Church
has not condemned a single proposition of his; on
the contrary, the doctrine of the Immaculate Conception
of the Virgin Mary, so strongly advocated, has been declared
a dogma.

MOLLER, Biographisches über D. Scotus (Cologne, 1881).
219 sqq.; Renan, Hist. liit. de la France (1890), XXV, 404.
and committed to the care of the Irish scholars, who then frequented the desolate sanctuary of Glastonbury. We are told of his childish fervour, of his vision of the great abbey restored to splendour, of his nearly fatal illness and miraculous recovery, of the enthusiasm with which he absorbed every kind of human knowledge, and of his manual skill. Indeed, throughout his life he was noted for his devotion to learning and for his mastery of many kinds of artistic craftsmanship. With his parents' consent he was tonsured, received minor orders, and served in the ancient church of St. Mary. So well known did he become for devotion and learning that he is said to have been summoned by his uncle Athelm, Archbishop of Canterbury, to enter his service. By one of St. Dunstan's earliest biographers we are informed that the young scholar was introduced by his uncle to King Aethelstan, but there must be some mistake here, for Athelm probably died about 923, and Aethelstan did not come to the throne until the following year. Perhaps there is confusion between Athelm and his successor Wulfhelm. At any rate the young man soon became so great a favourite with the king as to excite the envy of his kinsfolk at court. They accused him of studying heathen literature and magic, and so won the king that St. Dunstan was ordered to leave the court. As he quitted the palace his enemies attacked him, beat him severely, bound him, and cast him into a filthy pit (probably a cesspool), treating him down in the mire. He managed to crawl out and make his way to the house of a friend, whence he journeyed to Winchester and entered the service of Bishop Aelfheah the Bald, who was his relative. The bishop endeavoured to persuade him to become a monk, but St. Dunstan was at first doubtful whether he had a vocation to a celibate life. But an attack of swelling tumours all over his body, so severe that he thought it was leprosy, which was perhaps some form of blood-poisoning caused by the treatment to which he had been subjected, changed his mind. He made his profession at the hands of St. Aelfheah, and returned to live the life of a hermit at Glastonbury. Against the old church of St. Mary he built a little cell only five feet long and two and a half feet deep, where he studied and worked at his handicrafts and played on his harp. Here the death of the saint (a late eleventh-century legend) to have tempted him and to have been seized by the face with the saint's tongue.

While Dunstan was living thus at Glastonbury he became the trusted adviser of the Lady Aethelflaed, King Aethelred's niece, and she put herself in control of all her great wealth, which he used in
DUNSTAN

Against all this ardour of reform was the West-Saxon party, which included most of the leading relations and the leading men, which was not entirely disinterested in its preference for established customs. For nine years St. Dunstan's influence was dominant, during which period he twice refused a bishopric (that of Winchester in 961 and Crediton in 963), affirming that he would not leave the king's side so long as he lived and needed him.

In 955 Eadred died, and the situation was at once changed. Eadwig, the elder son of Eadmund, who then came to the throne, was a dissolute and headstrong youth, wholly devoted to his party and entirely under the influence of two uncontrolled women. These were Aethelfluga, a lady of high rank, who was perhaps the king's foster-mother, and her daughter Aelfgifu, whom she desired to marry to Eadwig. On the day of his coronation, in 956, the king abruptly quitted the royal feast, in order to enjoy the company of these two women. The indignation of the assembled notables was voiced by Archbishop Oda, who suggested that he should be brought back. None, however, were found bold enough to make the attempt, and St. Dunstan resorted to Bishop of Lichfield. Entering the royal chamber they found Eadwig with the two harlots, the royal crown thrown carelessly on the ground. They delivered their message, and as the king took no notice, St. Dunstan compelled him to rise and replace his crown on his head. But when he was in prayer before the altar, then, taking St. Dunstan by the hand, he gave him the kiss of peace, led him to the abbey's throne and, seating him thereon, promised him all assistance in restoring Divine worship and regular observance.

St. Dunstan at once set vigorously to work at these tasks. He had to re-create monastic life and to rebuild the abbey. That it was Benedictine monasticism which he established at Glastonbury seems certain. It is true that he had not yet had personal experience of the stricter Benedictinism which had been revived on the Continent at great centres like Cluny and Fleury. Probably, also, much of the Benedictine tradition introduced by St. Augustine had been lost in the pagan devastations of the ninth century. But that the Rule of St. Benedict was the basis of his restoration is not only definitely stated by his biographer, who knew the saint well, but is also in accordance with the nature of his first measures as abbot, with the significance of his first buildings, and with the Benedictine prepossessions and enthusiasm of his monks and pupils. Any plausible or actual clerks as well as of monks at Glastonbury seems to be no solid argument against the monastic character of the revival. St. Dunstan's first care was to re-erect the church of St. Peter, rebuild the cloister, and re-establish the monastic enclosure. The secular affairs of the house were committed to his brother Wulfhere, "so that neither himself nor any of the professed monks might break enclosure". A school for the local youth was founded and soon became the most famous of its time in England. But St. Dunstan was not long left in peace. Within two years after the appointment King Eadmund was assassinated (946). His successor, Eadred, appointed the Abbot of Glastonbury guardian of the royal treasure and records, and entrusted much of the government of the realm to his hands. The policy of Dunstan was supported by the queen-mother, Eadgifu, by the pri- mate, Oda, and by the East Anglian party, at whose head was the great ealdorman, Aethelstan, the "Half- king". It was a policy of unification, of conciliation of the Danish half of the nation, of firm establishment of the royal authority. In ecclesiastical matters it favoured the spread of regular observance, the rebuilding of churches, the moral reform of the secular clergy and laity, the extirpation of heathendom.
That same evening he was offered the hospitality of a neighbouring abbot. On his return from Rome Dunstan at once regained his position as virtual ruler of the kingdom. By his son-in-law, the newly appointed to the Bishopric of London, and St. Oswald to that of Worcester. In 963 St. Aethelwold, the Abbot of Abingdon, was appointed to the See of Winchester. With their aid and with the ready support of King Eadgar, St. Dunstan pushed forward his reforms in Church and State. Through the influence of all these, St. Dunstan continued to be regarded with love and respect for law. Trained bands policed the north, a navy guarded the shores from Danish pirates. There was peace in the kingdom such as had not been known within memory of living man. Monasteries were built; in some of the great abbeys monks took the place of the secular canons; in the rest the canons were obliged to live according to rule. The parish priests were compelled to live chastely and to fit themselves for their office; they were urged to teach their parishioners not only the truths of the Catholic Faith, but also such handicrafts as would improve their position. So for sixteen years the people prospered. In 973 the seal was put on St. Dunstan's statesmanship by the solemn coronation of King Eadgar at Bath by the two Archbishops of Canterbury and York. That year King Offa died; the king who had forbidden to wear his crown, in penance for violating a virgin living in the care of the nunneries of Wilton. That some severe penance had been laid on him for this act by St. Dunstan is undoubted, but it took place in 961 and Eadgar wore no crown till the great day at Bath in 973. Two years after his crowning Eadgar died, and was succeeded by his eldest son Edward. His accession was disputed by his stepmother, Aelfthryth, who wished her own son Aethelred to reign. But, by the influence of St. Dunstan, Edward was crowned and not Bythhryth. But the death of Eadgar had given courage to the reactionaries. At one time there arose a determined attack upon the monks, the protagonists of reform. Throughout Mercia they were persecuted and deprived of their possessions by Aelfthryth, the exarchman. Their cause, however, was supported by Athelwine, the ealdorman of East Anglia, and the realm was in serious danger of civil war. Three meetings of the Witan were held to settle these disputes, at Kyrklington, at Calne, and at Amesbury. At the second place the ball fell (the ball or reel) where the Witan sat, but in vain, and all except St. Dunstan, who clung to a beam, fell into the room below, not a few being killed. In March, 978, King Edward was assassinated at Corfe Castle, possibly at the instigation of his stepmother, and Aelthryth the Redcross became king. His coronation on Low Sunday, 978, was the last act of state in which St. Dunstan took part. When the young king took the usual oath to govern well, the priate addressed him in solemn warning, rebuking the bloody act whereby he became king, and explaining the misfortunes that were shortly to fall on the realm. But Dunstan's influence at the court was ended. He retired to Canterbury, where he spent the remainder of his life. Thrice only did he emerge from this retreat: once in 980 when he joined Aelfthryth of Mercia in the solemn translation of the relics of King Eadward from their mean grave at Wareham to a splendid tomb at Shaftesbury Abbey; again in 984 when, in obedience to a vision of St. Andrew, he persuaded Aelthryth to appoint St. Aelfheah to Winchester in succession to Aethelwold; once more in 988, when he induced the king to accept a donation of 100 pounds of silver, to desist from his persecution of the See of Rochester.

St. Dunstan's life at Canterbury is characteristic; long hours, both day and night, were spent in private prayer, besides his regular attendance at Mass and the Office. Often he would visit the shrine of St. Augustine and St. Ethelbert, and we are told of a vision of angels who sang to him heavenly canticles. He worked ever for the spiritual and temporal improvement of the clergy, especially those of the great archbishops, establishing schools, judging suits, defending the widow and the orphan, promoting peace, enforcing respect for purity. He practised, also, his handicrafts, making bells and organs and correcting the books in the cathedral library. He encouraged and protected scholars of all nations, as a staid old bachelor, unwearied as a teacher of the boys in the cathedral school. There is a sentence in the earliest biography, written by his friend, that shows us the old man sitting among the lads, whom he treated so gently, and telling the stories of the happy days and of his travels. And long after his death we are told of children who prayed him for protection against harsher teachers, and whose prayers were answered. On the vigil of Assumption Day, 988, he was warned by a vision of angels that he had but three days to live. On the feast itself he pontificated at Mass and preached three times to the people: once at the Gospel, a second time at the benediction (then given after the Pater Noster), and a third time after the Agnus Dei. In this last address he announced his impending death and bade them farewell. That night he died, was placed in the tomb, then took to his bed. His strength failed rapidly, and on Saturday morning (19 May), after the hymn at Matins, he caused the clergy to assemble. Mass was celebrated in his presence, then he received Extreme Unction and the Holy Viaticum, and expired as he uttered the words of thanksgiving: 'He hath made a remembrance of his wonderful works, being a merciful and gracious Lord: He hath given food to them that fear Him.' They buried him in his cathedral; and when that was burnt down in 1074, his relics were translated and given a new tomb on the south side of the high altar in the new church. The monks of Glastonbury used to claim that during the sack of Canterbury by the Danes in 1012, the saint's body had been carried for safety to their abbey; but this claim was disproved by Archbishop Warham, by whom the tomb at Canterbury was opened in 1568 and the holy relics found. At the Synod of Winchester in 1029, St. Dunstan's feast was ordered to be kept solemnly throughout England on 19 May. Until his name was overshadowed by that of Thomas Becket, he was, like John of Worcest, the favourite saint of the English people. His shrine was destroyed at the Reformation. Throughout the Middle Ages he was the patron of the goldsmiths' guild. He is most often represented holding a pair of smith's tongs; sometimes, in reference to his visions, he is shown with a dove hovering near him, or with a troop of angels before him. [Ad. DUPANLOUP

Leslie, A. St. L. Toke.

Dupanloup, Félix-Antoine-Philibert, Bishop of Orléans, France, b. at Saint-Félix, Savoie, 2 June, 1802; d. at Lacombe, Isère, 11 October, 1878. His mother, Anne Dechaosal, to whom he ever remained tenderly devoted, gave him his early education. The better to screen his future from the disgrace of his illegitimate birth, she took him when only seven years old to Paris where, by dint of work and privations, she succeeded in keeping him for some time at the Collèg Sainte-Barbé. After various attempts in other directions, Félix chose the ecclesiastical career, studying grammar at the Petite Communauté, humanities at the preparatory seminary of Saint-Nicolas du Chardonnay, philosophy at Issy, and theology at Saint-Sulpice. Or-ained priest 18 Dec., 1825, he went as curate to the Madeleine where he founded the famous Catécismes de l’Assomption and the Académie de St-Myseinte, being received meanwhile with the religious education of the Duc de Bordeaux and of the Princes of Orléans. The novelty and success of his catechizing methods drew upon him the ill will of his pastor. Transferred to Saint-Roch (1834), he soon won a reputation as a pastor and director. As superior of the preparatory seminary of Saint-Nicolas (1837-45), he so completely transformed the institution that admission into it was eagerly sought by members of the best families of France. “During those few years”, says Renan, himself a pupil of Saint-Nicolas (Souvenirs de l’Oiservie); “the old house of the St-Victor became the school in France which sheltered the greatest number of historical or well-known names.” At Saint-Nicolas Dupanloup was truly the ideal educator later described in his famous book: “La haute éducation intellectuelle.” Absorbed as he was in his professional work, he did not completely give up the direction of souls. Through one of his penitents, Pauline de Périgord, he brought about the conversion of Talleyrand (1835). A course in eloquent sermons which he had brilliantly inaugurated at the Sorbonne was followed, after the death of the old bishop, by the excitement occasioned by the lecturer’s severe criticism of Voltaire and Villemain’s unwillingness to enforce order. In 1841, in connexion with the Villemain educational bill, which was scarcely more satisfactory to the Catholics than not, Dupanloup was associated with Montalembert and Ravigan that long struggle for liberty of education which resulted in the loi Falloux. It was at his suggestion that Ravigan wrote “De l’existence et de l’institut des Jésuites”, in order to put down the still active bugbear of the “hommes noirs” called up by Bérenger. He also actively supported Montalembert in the formation of the Committee for the Defence of Religious Liberty, and when later Thiers spoke in favour of another unacceptable educational bill, Dupanloup wrote in reply “Des associations religieuses”, a pamphlet which became later the book “De la pacification religieuse”. A difference of views with Archbishop Affre, in connexion with the above-mentioned polemics and the direction of Saint-Nicolas, ended in Dupanloup’s transfer from the seminary to a canonicate at Orléans in 1845.

The four years of his canonicate were by no means years of leisure. In spite of his increasing activity in confessional and pulpits, he found time for public interests. The elections of 1846 sent to the French Parlia-ment some 150 deputies friendly to liberty of education, and from these Dupanloup wrote “L’état de la question”, a moderate but clear assertion of Catholic claims. As the Salvandy project of 1847 fell short of these claims, he again published a series of pamphlets, “Du noyau du problème”, “Les petits-siménaires”, among others; and the better to control public opinion, he undertook the work of a Catholic daily paper, finally purchasing “L’ami de la religion”. In 1848 when Falloux, yielding to Dupanloup’s persuasion, accepted a portfolio under President Louis Napoleon, he appointed a commission to draft an educational bill, and made Dupanloup a member. Dupanloup’s courtesy and undeniable competence won over to the Catholic view such men as Thiers and Cousin, thus insuring the enactment of 1850. He made me minister of the “Grand’s will”, said Falloux speaking of Dupanloup: “I have made him bishop against his will.” Appointed to the See of Orléans, he took possession of it 11 Dec., 1849, and during the twenty-eight years of his episcopate showed incredible activity. His administration, minutely described by Cochard, touched on every vital interest of the diocese: the holding of synods, parish visitations, the reorganization of catécismes and petits-siménaires along the lines adopted in Paris, development of the diocesan Institute of Ste-Croix, introduction of the Roman Liturgy, etc. Still his energy was not exhausted. Wherever the interests of religion were at stake, he gave them vigorous support. In the question of the classics he stood for the broader view and entered upon a lively discussion with Louis Veuillot. Profiting by his membership in the French Academy, to which he was elected 2 May, 1854, Dupanloup prevented the award of the prix Bodin to Taine’s “History of English Literature” and opposed the admission of Littre into that body. The reorganization of “Le Correspondant”, with Falloux, Foisset, Cochin, and de Pargue, was also largely his work. The Pucelle d’Orléans (Jeanne d’Arc) found in him an ardent champion; twice he pronounced her panegyric at Orléans, and it was he who introduced in Rome the cause of her beatification and raised the first funds towards a new monument in her honour.

Dupanloup was always held in high esteem by the Irish people. In 1862, on the occasion of one of the periodical Irish famines, he preached a charity sermon in the Church of St-Roch at Paris, which netted the sum of thirty thousand francs. The grateful Irish returned this with interest during the Franco-Prussian war when they remitted to the eloquent Bishop of Orléans the sum of two hundred thousand francs in response to his appeal for the needs of France. On the occasion of the centenary (1875) of Daniel O’Connell, whom he had always admired and often praised publicly, Dupanloup was formally invited by the centenary authorities to take part in the celebration. Though too ill at the time to accept the honourable invitation, he wrote in reply two letters, memorable for their eloquence, to the Lord-Mayor of Dublin and to Cardinal Macdonell, and these were printed in “Le Monde” 9 and 10 Aug., 1875 (Laghugre, Via de Du-
panlop, Paris, 1894, II, 347-48; III, 317). His "Lettre sur la Slavery", written on the occasion of the Civil War in the United States, is another evidence of Dupanloup's broad sympathy, and helps to account for his popularity in English-speaking countries.

Dupanloup's main efforts, however, were directed towards organizing the Congregation of Pious Sisters of his own estimate and defending its independence against the ambition of the House of Savoy and the ill-disguised connivance of Napoleon III. Salomon says (Mgr Dupanloup, p. 58): "For eight years, he did not lay down his arms. From Villarfrac to Mentana, he never took off his red sash." During this phase of his life, besides endeavoring to enlist pontifical suavities and to increase the Peter's penance, he wrote the "Protestation" against the impending spoliation of the pope; the "Lettre à un catholique sur la brochure Le pape et le congrès", "La souveraineté pontificale", in which he cited a declaration made by Cousin in favour of the temporal power of the pope; two other pamphlets, one against the Convention of 15 Sept., 1864, and the other in defence of the Encyclical of 5 Dec. and of the Syllabus; several letters to Rattigan, Mgr Vincent, etc. And in 1870 the Franco-Prussian War exhibited Dupanloup in two very different lights. At the council he was the leader of that minority which for political reasons stood, if not against the papal infallibility itself, at least against the opportuneness of its definition. The papal Bull of induction was received with joy and transmitted to his flock in a dignified pastoral letter; but when the Catholic sentiment, voiced by such organs as the "Civiltà Cattolica" and the "Univers", began to petition for the definition, he appealed to his pastoral letter certain observations which, by making known in advance the position he intended to take, involved him in a petty controversy with Louis Veuillot. Once in Rome he never swerved from his position but used all the resources of his fiery nature to win others over to his views. It was he who, on the eve of the final vote, advised the minority to vote neither place nor non-place, but to abstain and withdraw. That he appealed to the secular arm and threatened the council with diplomatic intervention has been both asserted and denied. This much is vouched for by Ollivier, then minister of Napoleon III: "No bishop of the minority, Dupanloup or other, ever demanded the evacuation of the pontifical territory" (Le Correspondant, 10 Dec., 1892).

In justice to him it should be added that, once the dogma was defined, he was neither slow to acquiesce in what he had so long and so earnestly advocated in denouncing his adherence. During the Franco-Prussian War Dupanloup showed himself a worthy successor of Saint-Aignan and like him won the title of "defensor civitatis". His prestige enabled him to have the severe conditions imposed by the victors on the city of Orleans either withdrawn or mitigated. In gratitude his people sent him to the National Assembly. As a member he took an active part in securing the passage of the law which restored the military chaplains (1874) and of that which authorized the Catholic Emancipation law of 1875. He was a member of the central executive of the League of 1875, and one of his last public acts was to deter the French Government from officially taking notice of the centenary of Voltaire (1878). A malady which had long undermined his health resulted in his death while at the chateau de Lacombe. His remains were laid to rest in the cathedral of Orleans and his heart conveyed to Saint-Félix, his native place. As a clause of his last will forbade any funeral oration, Bishop Bougaud pronounced only a few words of eulogy, the oration being delivered in 1898 by Bishop Besson at the unveiling of Dupanloup's monument.

Dupanloup was without question one of the ablest French bishops of his day. He repeatedly refused higher positions. In many things a conservative and even a legitimist, he was one of the first who thought of appealing, in behalf of the Catholic cause, to common law and public liberties before a generation no longer able or willing to recognize the Divine right of the Church. The criticisms passed on him by Catholics of a different school were more than offset by numerous papal Briefs of encouragement and episcopal letters of approval from all parts of the world. As a man of action, he was also a prolific writer. A complete list of his writings is given by Lagrange, his biographer. Some of his polemical pamphlets have already been noticed. In his educational writings Dupanloup emphasizes some of the most important principles which are now generally accepted. Among these are his conception of education as a process of developing mental activity instead of injecting knowledge into the mind, and his insistence on the duty of the teacher to respect the freedom of the pupils and to cultivate in them a love of study, a respect for the means of games, and warns against the danger of forcing precocious children. Education, he holds, is intellectual, moral, religious, and physical; but it is essentially one, and to neglect any of its purposes would be fatal.

His more important works are:—catechetical: "L'œuvre par excellence" (1869); educational: "L'éducation en général!" (1870); "La haute éducation intellectuelle" (1870); "La femme studieuse" (1869); and Lettres sur l'éducation des filles" (1878); historical: "La vie de Mgr Bousquet" (1865); panegyrics of Jeanne d'Arc (1855 and 1869); St. Martin (1862), and St. Vincent de Paul (1863); funeral orations of Père de Raviginan (1858), the volunteers (1860), Mgr Menjaud (1861), and Lamoricière (1885); pastoral: "Lettres pastorales et mandements" (in the archives of the episcopal palace of Orleans).

J. F. SOLJIER.

Duperron, Jacques-Davy, theologian and diplomat, b. 25 Nov., 1556, at St.-Lô (Normandy), France; d. 5 Sept., 1618, at Batignolles, a suburb of Paris. His parents were Calvinists and had sought refuge in Switzerland soon after his birth. Having received a thorough literary, scientific, and philosophical education, he applied himself to the study of the Fathers and ecclesiastical writers, especially St. Augustine and St. Thomas Aquinas, and in 1577 or 1578 was converted to the Catholic Faith. He enjoyed the favour and confidence of King Henry III, to whom he had been presented in 1576, and later that of Henry IV. The latter's conversion was in great part due to Duperron's instructions and influence, as his absolution was granted in the hope by Duperron and Cardinal d'Ossat (1595). While in Rome for that purpose, Duperron was consecrated Bishop of Eyves, a see to which King Henry IV had already appointed him in 1591, though he was not yet in Holy orders. Immediately after his conversion Duperron began to work with untingling zeal for the conversion of Protestants. By his science, eloquence, and power of argument he won many victories in controversies and conferences with ministers of the reformed sects. In 1600 the famous Pontifical that he had promoted was received with the greatest enthusiasm in the French Calvinism, Duplessis-Mornay, who had been accused by Duperron of mutilating, falsifying, and misinterpreting texts from the Fathers in his work on the Eucharist. Of the judges three were Catholics, and three Calvin-
In 1688 there appeared the first volume of the "Nouvelle bibliothèque des auteurs ecclésiastiques", covering the first three centuries. In it Dupin had treated of "vulgar biography, literary criticism, and the history of dogmas; in this he was a pioneer leaving far behind him all previous efforts, Catholic or Protestant, which were still under the influence of the Scholastic method. He was also the first to publish such a collection in a modern language. Unfortunately he was young and worked rapidly. In this way errors crept into his writings and his productions were violently attacked.

Mathieu Petit-Didier, a Benedictine, published an anonymous volume of "Remarques sur la bibliothèque des auteurs ecclésiastiques de M. le P. Dupin" (Paris, 1691). This was followed by two further volumes to which the author's name was appended (Paris, 1692 and 1696). Dupin answered him in his fifth volume and Petit-Didier replied in the fore part of his second volume of "Remarques". Petit-Didier's observations were often inspired by contemporaneous prejudice. Thus Dupin had placed in the fourth century, to which indeed he rightly belongs, St. Macarius the Egyptian. Petit-Didier discovered Semipelagianism in this author's works, in reality ideas professed by many before St. Augustine, but from which the adoration of Pelagius and St. Augustine (II, 198).

A more formidable enemy appeared in Bossuet, who, during a public thesis at the College of Navarre in 1692, condemned the audacity of the critic. Dupin answered him and Bossuet appealed to the authority, denouncing Dupin to Chancellor Boucheret and to Archbishop de Harlay. Bossuet simply enumerated the points that he disapproved in the "Bibliothèque" concerning original sin, purgatory, the canonicity of the Sacred Scriptures, the eternity of hell's torments, the veneration of saints and of their relics, the adoration of the Cross, grace, the pope and the bishops, Lent, divorce, the celibacy of the clergy, tradition, the Eucharist, the theology of the Trinity, and the Council of Nicaea. He demanded a censure and a retraction.

Like Petit-Didier Bossuet would not admit that any of the Greek or Latin Fathers differed from St. Augustine on the subject of grace, nor that this matter could be called subtle, delicate, and abstract. Between Dupin and Bossuet there was a still wider difference. The latter believed thatDupin took account of the greatest men of the Church should, in general, not be tolerated" (Bossuet, Œuvres, XXX, 513). On the other hand Bossuet strongly contended that heretics could not be too severely dealt with: "It is monstrous to treat without censure and censure, with the firmness of these people without also indicating wherein this firmness has been overrated: otherwise they are credited with a moral steadfastness which elicits sympathy and leads to their being excused" (op. cit., XXX, 563).

Dupin submitted but was nevertheless condemned by the Archbishop of Paris (14 April, 1696). He continued his "Bibliothèque", which was put on the Index long after his death (10 May, 1767), though other works of his were condemned at an earlier date. He had also to suffer the criticism of Richard Simon (Paris, 1730-40). Simon and Dupin had similar views and methods so that when Bossuet was writing the "Défense de la Tradition et des Saints Pères" (which did not appear, however, until 1743), he included both in his invectives against the "haughty critics" who insisted on their liberties, Dupin siding with Bossuet. Though Dupin spoke favourably of Arnauld and signed the "Cas de conscience", he was not a Jansenist.

On these matters he rather shared the opinion of Launoy who "had found a way to be at once both semi-Pelagian and Jansenist" (Bossuet, Œuvres, XXX, 563). Dupin was pre-emminently a Calvinist. It was probably on this account that Louis XIV had him

DUPRAT

en el to Châtellerault, on the occasion of the "Cas de conscience". Dupin retracted and returned, but his chair in the College of France was irretrievably lost. Later Dubois, who aspired to the cardinalate and sought therefore the favour of Rome, made similar accusations against Dupin. Dupin was on friendly terms with Wake, the Anglican Archbishop of Canterbury, who hoped on occasion of the two Churches. The correspondence was looked on with suspicion, and in 1718 the regent had Dupin's papers seized. This act led to calumnies against the writer, who really had no other aim than the reconciliation of the separated Allies. A similar correspondence with "le Roi" he presented to Peter the Great during the latter's residence in France. Dupin died shortly after.

Besides the "Nouvelle bibliothèque ecclésiastique" (58 vols. 8vo with tables), the "Remarques" by Petit-Dély, and the "Critique" by R. Simon reprinted in Holland (19 vols. 4to), Dupin edited the works of Gerson (Paris, 1703), Optatian of Mileve (Paris, 1700), the Psalms with annotations (1691), and published "Notes sur le Pentateuque" (1701), an abridgment of "L'histoire de l'Eglise" (1712), "L'histoire profane" (1718), "L'histoire d'Apollodore de Tyane" (1705), under the name of M. de Clairvius, "Traité de la puissance ecclésiastique et temporelle", a commentary on the Fourth Articles of the clergy of France (1707), the "Bibliothèque universelle des historiens" (1716), numerous works and articles on theology, reprint of foundations, was no pedant, and was the most remarkable of his generation. He was a contemporary who saw him, said: "In the morning he would walk over books and in the afternoon over cards in the pleasant company of ladies. His library and adjoining apartment were marvellous well kept."

PAUL LEJAY.

DUPIN, PIERRE-CHARLES-ARNOUS, known as BARON CHARLES DUPIN, a French mathematician and economist, b. at Varzy, Nièvre, 6 October, 1746; d. at Paris, 18 January, 1783. At the age of twenty-three he entered the Ecole polytechnique, and after three years of successful studies under the famous Monge, became in 1768 an ensign of naval infantry. He later served in that capacity in the navy and showed so much ability that he was later appointed inspector-general of the navy. In 1813 he published a pamphlet, "Développement de géométrie pour faire suite à la géométrie pratique de Monge" (Paris, 1813), containing many new and brilliant theories, the most important of which were one relating to the indicatrix of curved surfaces and another on orthogonal surfaces. He was elected to the Academy of Sciences in 1818. The next year Dupin received a professorship in the École Polytechnique; then as Archbishop of Sens, 1825; cardinal, 1827, and legate a latere, 1830. Dupin's influence extended much beyond the departments of justice and finance placed under his direct control. Napoleon, in the introduction to his "Recueil des instructions", calls Dupin "one of the most notable men of ancient France, second only to Richelieu in the decisive influence he exercised on the destinies of his country". This influence was constantly exerted to strengthen royal absolutism; it was felt in the stern measures he took against the grands Seigneurs, and in his elaborate fiscal system. Dupin's influence was manifested, together with his perfect orthodoxy, in those measures which affected the relations of France with the Church, namely, the signing of the Concordat of 1816, and the checking of nascent Prot.
estanism. The Concordat, which Dupuytren himself negotiated with Leo X at Bologna, did away with the scholastic principles of the "Pragmatic Sanction" on the other hand, by causing the appointment of the French hierarchy to rest on royal nomination instead of the old canonical elections, it vested in the civil power an easily abused authority over Church affairs. Dupuytren’s uncompromising attitude towards Protestantism was dictated both by his political sense and his orthodoxy. The wiles of Luther, Melancthon, and Calvin did not deceive him; even so the well-known Protestant sympathies of Marguerite d’Angouleme, the Duchesse d’Étampes and the Minister du Bellay failed to move him. The parlement and Parliament were instructed to exclude the writings of the innovators; in 1534 the posting of subversive pamphlets at the door of the royal apartments cost the perpetrators their lives. Dupuytren left no writings, but took a leading part in the compilation of the "Coutumes d’Auvergne"; he also did much to encourage the renaissance of letters.

(2) GUILLAUME, son of the foregoing, b. at Issoire, 1507; d. at Beauregard, 1560. Appointed Bishop of Clermont in 1529, he led a zealous and saintly life, and is chiefly remembered by the part he took in the last sessions of the Council of Trent as well as by his patronage of the Jesuits. Not only did he receive them in his diocese, where they were put in charge of the colleges of Bilom and Mauriac, but, in face of much opposition, he helped them financially and in other ways to found in Paris the Collège de Clermont, so called after Dupuytren’s episcopal city.

DUPUYTREN, GUILLAUME, BARON, French anatomist and surgeon, b. 6 October, 1777, at Pierre-Buffière, a small town in the Limousin, France; d. in Paris, 8 February, 1835. His parents were so poor that he received his education at the Collège de la Marche through charity. By competitive examination he gained the position of prosector in anatomy at the newly established École de Médecine, Paris, when he was but eighteen. In 1803 he was appointed assistant surgeon in the Hôpital dieu Hospital. In 1811 he became professor of clinical surgery at the Ecole de Médecine and head surgeon to the Hôtel-Dieu. He was indefatigable in his devotion to his profession and had one of the largest surgical practices of all time. He amassed a fortune estimated at $1,500,000. He succeeded in accomplishing all this in spite of a consumptive tendency against which he had to battle all his life and which finally carried him off. In his will he endowed the chair of anatomy at the Ecole de Médecine and established a house for physicians in distress. A curious contraction of the fascia of the palm of the hand, which cripples the fingers, is called after him, and the anatomical museum of the Ecole de Médecine bears his name. The most important of his writings is his treatise on artificial anus. He published also a treatise on the art of life imitating the natural laws of surgery. Dupuytren was not an original investigator in surgical subjects, but he was an excellent observer and a great worker, who knew how to adopt and adapt others’ ideas very practically.

DUSENOY, FRANÇOIS (called also François Flamme, and in Italy Il Flammingo), b. at Brussels, Belgium, 1594; d. at Leghorn, Italy, 12 July, 1646. Duquesnoy was the son of an excellent Dutch sculptor from whom he received his first lessons. At an early age he carved the figure of justice on the portal of the chancellery at Brussels, and two angels for the entrance of the Jesuit church of that city. In 1619, at the age of twenty-five, he was sent by the Archduke Albert to study in Rome, and there he resided many years, executing various works of importance. To Dupuytren he owed the last of his works as a sculptor, the large side altar in St. Peter’s, the colossal statue of St. Andrew with his cross, also in St. Peter’s, and the Santa Susanna in the church of S. Maria di Loreto. In the cathedral of Ghent is his roccoco tomb for Bishop Triest, a good work in its own style. Duquesnoy was a contemporary of Bernini and a friend of Le Pousain, who recommended him to Cardinal Richelieu. The sculptor was about to start for Paris when death overtook him at Leghorn. It is reported that he was poisoned by his own brother, Jérôme, who was also a clever sculptor (b. 1612; buried for unnatural crime, 24 Oct., 1654). Duquesnoy is famous for his beautiful sporting children in marble and bronze, his ivory carvings for drinking-cups, etc. The figure known to the populace of Brussels as the "Manneken" is commonly attributed to him.

M. L. HANLEY.

Duran, Narcisco, b. 16 Dec., 1776, at Castellon de Ampurias, Catalonia, Spain; d. 1 June, 1846. He entered the Franciscan Order at Gerona, 3 May, 1792, volunteered for the Indian missions, was incorporated into the Franciscan Missionary College of San Fernando in the City of Mexico, and in 1806 came to California. He was assigned to Mission San José and toiled there among the Indians until April, 1833, when he retired to Mission Santa Barbara. As early as 1817 Father Serra proposed the promotion of Duran for higher offices. Father Payeras, the comisario prefecto in 1820, likewise held him worthy and capable of any office. Towards the end of 1824 the College of San Fernando elected him presidente de the missions, which post he held with the exception of one term (1829-1831) until 1833. From 1844 till his death in 1846 he again held this office, and from 1837 to 1843 he was also comisario prefecto of the Fernandinos, i. e. Franciscans subject to the college in Mexico, who were in charge of the missions in Southern California. He died in 1846. As a painter he was very successful. In 1820 he became the owner of the considerable buildings and sale of the missions it was Father Duran who fought the pillagers step by step, though in vain, and fearlessly unmasked the real aims of the desperadoes. His numerous letters to the Government on the subject are masterpieces of close reasoning, pungent sarcasm, and unanswerable argument. Governor Figueroa recommended the exile of Father Duran, but the Mexican Government allowed him to remain unmolested at Mission Santa Barbara until his death. Six weeks previous to this the dying Bishop of California had appointed Father Duran vicar-general, and for a month he held the office of administrator of the diocese. His body was placed in the vault beneath the sanctuary of the mission church. He was the last survivor of the Fernandinos, and for virtue, learning, and missionary zeal ranks with the most brilliant of his predecesors.

Durand Ursin, a Benedicite of the Maurist Congregation, b. 20 May, 1682, at Tours; d. 31 Aug., 1771, at Paris. He took vows in the monastery of
DURANDUS

Marmoutier at the age of nineteen and devoted himself especially to the study of diplomacy. In April, 1709, he joined his confrère Édouard Martène, who was making a literary tour through France with the purpose of collecting material for a new edition of "Gallia Christiana" (q. v.). After searching the archives of more than eight hundred abbeys and churches in Paris and the surrounding region, they returned to Paris in 1713 to the monastery of St.-Germain-des-Prés, laden with all kinds of valuable historical documents, many of which were included in "Gallia Christiana", while the others were published in a Supplement to this work, namely, "Monumenta sacra nova Anecdota" (5 vols. folio, Paris, 1717). In 1718 the two Maurists started on a new literary tour through Germany and the Netherlands to collect material for Bouquet's "Rerum Gallicarum et Francicarum Scriptores". Besides collecting valuable material for Bouquet's work they gathered an immense mass of other historical documents which they published in a large work entitled "Veterum scriptorum et monumentorum historicorum, dogmaticorum et moralium amississima collectio" (9 vols. folio, Paris, 1724-33). They also published in Bucquoy's learned account of their journeys: "Voyage littéraire de deux Religieux Bénédictins de la Congrégation de St. Maur" (2 vols., Paris, 1717 and 1724). In addition to the works which Durand published jointly with Martène, he also published with Clémence in a French work on diplomats, entitled "L'Art de vérifier les dates", continued Constant's "Collection of Papal Letters", assisted Sabatier with the edition of the "Itala", and contributed to many other Maurist publications. In 1789 he was banished from the monastery of St.-Maur, and in 1791 was a Jacobin "Appellant" at the instance of Cardinal de Bissy. He was sent to the monastery of St-Eloi in Noyon. After two years he was permitted to repair to the monastery of Blenc-Brancourt. He was then sent to the Monastery of Philip and Emy in Paris in 1802, 1804 and 1806.

DURANDUS (Duranti, Durantis), William, canonist and one of the most important medieval liturgical writers; b. about 1237 at Pumiinsion in the Diocese of Béziers, Provence, d. at Rome, 1 Nov., 1296. He was educated in the title of this name, where he wrote his important work, "Speculum Judiciale". He studied law at Bologna under Bernard of Parma and then taught at Modena. Clement IV (Guy Foulques, 1265-1268, also a Provençal) summoned Durandus to Rome, ordained him subdeacon, and gave him titular canonries at Beauvais and Chartres. He was then attached to the papal curia as "Auditor generalis causarum sacri palatii". He accompanied Gregory X (1271-1276) to the Second Council of Lyons (1274) and, as the pope's secretary, drew up its decrees. In 1279 he was made dean of St. Peter, but not residing there. At the same time he went to Romagna as papal governor and succeeded in subduing a rebellion under Guy of Montefeltro. He destroyed Guy's fortress of Riga and founded in its place the town of Urbiana. In 1286 he was elected bishop by the chapter of Mende (Maymet) in the prov. of Narbonne, but did not go into residence till 1291. Meanwhile his diocese was administered by his nephew, William Durandus the younger. In 1295 he was again in Italy (under Boniface VIII, 1294-1303) as governor of Romagna and Ancona, and then in 1299 as dean of Rome. He refused the pope's offer to make him Archbishop of Ravenna, came to Rome, and died there. There is no reason to suppose that Durandus belonged to any religious order, though he has been claimed by the Dominicans and the Austin Canons. He is buried at Rome in Santa Maria sopra Minerva, where a long epitaph tells the story of his life and gives a list of his works.

Of these works the most famous is the "Rationale divinorum officiorum" (first ed. by Pust and Schoefler at Mainz, 1474, and published and reprinted many times, the most recent being the edition of John Zainer, 1743; latest ed. at Naples, 1859). It was written in 1286. Its eight books contain a detailed account of the laws, ceremonies, customs, and mystical interpretation of the Roman Rite. Book I treats of the church, chasubles, vestments, etc.; II of the ministers; III of vestments; IV of the Mass; V of the canonical hours; VI of the Proprium Temporis; VII of the Proprium Sanctorum; and VIII of the astronomical calendar, manner of finding Easter, Epiphany, etc. Durandus's "Rationale" is the most complete medieval treatise of its kind; it is still the standard authority for the ritual of the thirteenth century and for the symbolism of rites and vestments. The standard explanation of vestments, for instance, as signifying virtues or the garments worn by Christ in His Passion, is taken from this third book. Other works are "Speculum Legatorum", afterwards enlarged into "Speculum Judiciale" (four books), a treatise on the canonical rights of legates and the forms of canonical processes (first ed. at Strasburg in 1473; "De Breviarivm, et Repertorivm juris canonici" (Rome, 1474). "Breviarivm glossarium et textum juris canonici" (Paris, 1519), both commentaries on the decretals, arranged in the same order; and "Commentarius in canones Concilii Lugdunensis II" (Fano, 1509, etc.), life of the author by Simon Major (ca. 1509), a semi-official exposition of the canons of the Second Council of Lyons. Durandus's epitaph also mentions a "Pontificale", which is now lost. For works wrongly attributed to him see Schulte (op. cit., infra.), II, 155-156.

SASTRI, De claria archigraphi et specialis professo r a sec. XI. sqq. sec. XIV. (Bologna, 1769), 386, 399; HUNTER, Elucidator (London, 1839); "IV. Cont. die secretum, dux dei in adventu regis perfactum est," in J. der Quel. u. Lit. des on. Rerichts (Stuttgart, 1875), II, 535, pp. 144-146; RATIONALIS (Rationalis, or Manuel des divers offices, de Guillaume Durand, tr. by Berchelbeny (with an historical notice of the author), 5 volumes (Paris, 1854); NAELE AND WERR, The Symbols of Churches and Church Ornaments, a tr. by Green of the first book of the Rationale divinorum officiorum (Leeds, 1843).

ADRIAN FORTESCUE.
Durandus of Saint-Pourçain, philosopher and theologian, b. at Saint-Pourçain, Auvergne, France; d. 13 September, 1332, at Meaux. He entered the Dominican Order at Clermont and obtained the doctor's degree at Paris in 1313. John XXII called him to Avignon as Master of the Sacred Palace, where he expounded the Scriptures. In 1318 he consecrated Bishop of Le Puy-en-Velay and was transferred to Meaux in 1320. He is known as Doctor Resolutissimi, on account of the clarity and profundity of his expositions on the Schoolmen of his day. His writings include commentaries on the "Sentences" (Paris, 1508); "De origine jurisdictionum" (Paris, 1506); and a treatise on the condition of holy souls after their separation from the body. Durandus was much opposed to the contemporary philosophic realism that the third period of Scholasticism is made to begin with him. He rejects both the sensible and the intelligible species, introduced, he says, to explain sense-perception, as also the active intellect. He denies the principle of individuation as distinct from the specific nature of the individual. In theology he argues for a separation of natural knowledge from that obtained through faith and revelation. Certain dogmas, as that of the Trinity, cannot be shown not to conflict with them but, on the contrary, increases the merit of faith. Because the miracles of Christ do not prove His Divinity, His acceptance by the faithful enhances the merit of believing. After all, he says, theology is not strictly a science, since it rests on faith, and the principles of philosophy in theology it is sufficient to know the idea of him who is being inspired, cannot err. He teaches, besides, that all actions proceed from God Who gives the power to act, but this is immediate influx of the Creator upon the actions of the creature. The sacraments are only channelled grace, and not isolated vehicles of grace. Baptism is not strictly a sacrament. He also insists that Christ could be present in the Eucharist with the substances of bread and wine remaining. Throughout, Durandus shows admirable submission to the corrective prerogative of the Church, the exercise of which was not unnecessary. By order of John XXII, the treatise "De statu animarum" was examined and was found to contain errors.

Durandus of Tournai, French Benedictine and ecclesiastical writer, b. about 1012, at Le Neubourg near Evreux; d. 1086, at Tournai near Caen. Affiliated from early childhood to the Benedictine community of Mont-Saint-Catherine and of Saint-Vandrille, he was made abbot of the newly founded Saint-Martin of Tournai by William, Duke of Normandy, in whose esteem he stood on a par with Lanfranc, Anselm, and Gerbert. Ordericus Vitalis calls him ecclesiasticus cantus et dogmatum doctor peritissimus. Of his achievements in sacred music we know nothing beyond that mention, but we have his "Libre de Corpore et Sanguine Domini" (P. L., CXLIX, 1375) against Berengarius. In his Order he made a part of it of the form and words of the sacraments scrutator diligentissimus discussorque catholicos, and from whom he borrows both his patriarchal apparatus and his theological views. Turmel, however, notes that Durandus quotes new texts of Bede, Amalarius, Fulbert de Chartres, and St. John Chrysostom. His presentation of the Eucharistic dogma is frankly Ambrosian, i.e. he maintains with Paschaisius and Gerbert the conversion of the bread and wine into the identical body and blood of Christ, thus excluding the Augustinian theory. His views are still held by some of his contemporaries and contributing to prepare the definition of the Fourth Lateran Council (1215). Durandus explains with skill the Augustinian texts, chiefly in the "De doctrina christiana" and the "Letter to Boniface", misused by Berengarius; but in the last analysis he appears to the argument of authority already used by Guittmond (P. L., CXLIX, 1415): "The saintly Doctor of Hippo, wearied by the labours of composition, falls at times to clearly bring out his thought. Hence he may appear obscure to the unlearned and even become a source of error. If perchance he should have erred in so great a mystery, we should then bethink ourselves of the Apostolic saying: "But though an angel from heaven preach a gospel to you besides that which you have received, let him be anathema"" (loc. cit., 1415). Durandus wrote also against Berengarius a poem of 900 verses, of which twenty-five preface the above treatise and thirteen are quoted in Maubillon's "Annales" (LXXIV, 119), the rest being unpublished. Migne (loc. cit.) appends to the manuscript "Abut" twenty-ninth sonnet for Abbot Ainard and the other for the Countess Mabile. (See BERENGARIUS OF TOURS.)

J. F. SOLLEER.

Durango (Durangum), Archdiocese of, located in north-western Mexico. The see was created 28 Sept., 1620, seventy-two years after the Friars Diego de la Cadena and Gerónimo de Mendoza had established the San Juan Bautista of Analco mission in the valley of the Sierra Madre. The city of Durango was founded in 1554 by the Spanish captain Ibarra, and served at once as a centre for numerous missionaries, whose efforts to convert the natives were so successful that under Philip III the Diocese of Guadalajara was divided by Paul V, and Durango was raised to episcopal rank. The first bishop, Gonzalo Hernandez y Hermosillo, devoted much time to the evangelization and spiritual welfare of the Indians, and in 1661 the Diocese of Durango included New Mexico (Santa Fe), Chihuahua, and Sonora; eventually these were made independent sees. Durango was made an archdiocese by Leo XIII (23 June, 1891), and now includes the States of Durango, Chihuahua, and Sonora, Chihuahua, and Sinaloa for suffragans. The first archbishop was Vicente Salinas. Among the remarkable bishops of the see were the scholar Gorespe, to whom the city owes its canal; the famous writer Lipsi, who began the cathedral that was finished and consecrated by Antonio Zurbíra y Azcarráez, and lastly decorated anew by Archbishop Santiago Zurbíra y Manzanera. The Catholic press is represented by "El Domingo", and the "Boletín Eclesiástico". Besides the Escuelas Guadalupanas there are two colleges, the Colegio Guadalupano and a College of the Brothers of Mary. The territory of the diocese is quite mountainous and is watered only by a few streams, but is well adapted for grazing. There are many rich mines of gold, silver, and iron. In 1900 the population of the State of Durango was 807,274, that of the city itself 31,092. The Colegio Guadalupano and a College of the Brothers of Mary, stands picturesquely at 6700 feet above sea-level, and has several important industries and a large trade in cattle and leather.

REGINALDO GóMEZ.
DURAZZO

ARCHDIOCESE OF (DYRRACHIENSIIS), in Albania, situated on the Adriatic, has a good port, and is the chief town of a sandjak in the vilayet of Scutari; the population is about 9000. According to Appian it was founded by a barbarian king, Epidamnus, after whom it was called Epidamnum; it then took the name of Dyrrachium, from Dyrrachus, nephew of a daughter of Epidamnus, to whom it was due by port. According to Thucydides and Strabo it was more probably a colony of Corcyra. It was one of the causes of the Peloponnesian War. Conquered by the kings of Illyria, when attacked by the Romans, it surrendered to the latter and received from Rome municipial privileges; it was important for communication with Greece. Cicero and Pompey in their disgrace took refuge at Dyrrachium. When towards the end of the fourth century the empire was divided into two parts, the city fell to the Eastern Empire. The Byzantine emperors made it a strong fortress, and Anastasius I was born there. After the seventh century it was the centre of a theme; in 1011 its governors received the title of dukes. Under Michael the Paphlogionian (1034-1041) it was occupied by the Bulgarians; in 1042 it was retaken by the Greeks. In 1082, with Robert Guiscard, who deposed Alexius Comnenus under its walls; at the death of Robert it fell again into the power of the Greeks, who held it till the capture of Constantinople by the Latins (1204). From 1206 to 1294 it belonged to the Despotate of Epirus. It was then conquered by the Aragon king, and after his death had a large portion of its family; the descendants of these rulers kept the title of "Duras" even when they no longer held the city. The effective lordship passed to the Thopias about the middle of the fourteenth century. In 1337 the town was occupied by the Balas of Zetza, in 1386 by the Venetians, and finally, in 1501, by the Turks.

The church of Durazzo is the most ancient in Albania. According to local tradition the first bishop of the country was St. Cassarius, one of the Seventy Disciples. St. Astius, his successor, is said to have suffered martyrdom under Trajan about A.D. 100. A list of the Greek bishops is in Lequien (Oriens Christianus, II, 240-247), but it is very incomplete. Durazzo is even yet a metropolis for the Greeks. Under Ushchauri, who attended the Council of Ephesus, 431, it was declared a metropolis of Epiphanius of Illyria Grecia. The see, long disputed between the Greeks, the Bulgarians, and Serbs, remained finally in the hands of the first named. Its bishops, who as early as 519 had sided with Acacius, Patriarch of Constantinople, against Honorius against the patriarchs of the pope, were deposed at Constantinople. The schism of Michael Cerullarius in the eleventh century. At the beginning of the thirteenth century, after the Latin conquest of Constantinople, a Latin see was established there (1209). The Latin succession was often interrupted, on account of political changes; the actual (1906) archbishop is the fifty-second of the list (Lequien, III, 950-954; Games, I, 407; II, 87; Eubel, I, 241; II, 164). The episcopal residence was likewise subject to several removals; after the Turkish conquest the archbishops transferred it to Corbina (1590), then to Canovia; to-day they reside at Delbeniz. Durazzo had originally but one suffragan, Ceremontium, or Tseriniciu, site unknown. Later it had Prisca, Croa, Alessio, and Canovia. To-day Alessio only is subject to the Archbishop of Durazzo, but his power over it has been so limited by Propaganda that it may be considered an archbishop without a suffragan.

There are in the archdiocese about 250,000 inhabitants, of whom about 140,000 are Musulmans (Turks and chiefly Albanese), 95,000 Greeks or Gracevized Albanese, 14,000 Catholics (Albanian, except a few Italians and Russians). There are also a few Albanian about 160 recently converted Greeks. The diocese has no seminary, but some students are sent to the seminary of Scutari. It has 20 priests, of whom 13 are secular priests, 5 clerics, archbishops, or chaplains, 39 stations, 5 schools for boys and 1 for girls (the latter conducted by Sisters of Charity of Agram). Franciscan friars have charge of several parishes.

L. Petit.

DURIB, ELIZABETH JOHN, the "patriarch-priest of Kentucky" b. 1 Feb. 1900, in Madison Co., Kentucky, State of John D. Durbin, son of Christopher Durbin, pioneer, and Patience Logsdon; d. in 1887 at Shelbyville, Kentucky. In 1816 he was sent to the preparatory seminary of St. Thomas, in Nelson Co., where he spent about four years of manual labour and study under such distinguished missionaries as David Flaget, Felix de Andreis, and Joseph Rosati; thence he went to the near-by Seminary of St. Joseph, at Bardstown, where, in 1821-1822, he had as instructor Francis Kenrick, later Bishop of Philadelphia and Archbishop of Baltimore. In 1826 he entered the Seminary of Bardstown, by Bishop David, 21 Sept., 1822. Early in 1824 Bishop Flaget entrusted to him the pastoral care of western and south-western Kentucky, about thirty counties, with an area of over 11,000 square miles, nearly one-third of the State. Then began a missionary career in Kentucky which was to last almost half a century. He laboured in the United States, and that subsequently won for him the names of "Apostle of Western Kentucky" and "Patriarch-Priest of Kentucky". Union County was the centre of his mission. From it he journeyed on horseback over his vast territory, erected churches, established stations, formed congregations, and visited isolated families. In the beginning duty called him beyond his mission proper into Indiana, and once a year to Nashville, Tennessee. He traversed his extensive and sparsely settled mission incessantly for over sixty years, his churches, stations, and the rude homes of his poor flock his only abiding places. Occasionally a communication from him would appear in the press, and then only in defence of truth or outraged justice. When he did write, he wrote cogently and elegantly. Elected by age, his sturdy constitution gave way in 1884, when his bishop, yielding to his entreaties, assigned him the small mission at Princeton, Kentucky. After a stroke of paralysis he was given, in 1886, the chaplaincy of an academy, at Shelbyville, Ky., which he died on

DURER, ALBRECHT, celebrated painter and engraver, b. at Nuremberg, Germany, 21 May, 1471; c. there, 6 April, 1528. Durer left his native city, then famous for its commerce, learning, and art, but three times in his life. His first journey was undertaken after he had completed his apprenticeships both to his father, a goldsmith, and to the painter and engraver Wohlgemut; on this occasion he travelled through Germany and Spain to Italy, and formed a family of the recently deceased Schongauer; in 1505-07 he spent some time in Venice; in 1520-1521 he went to the Netherlands, visiting especially Antwerp.

FIRST PERIOD: TO 1505.—After the earliest works of his youth (portraits, Madonnas, coats-of-arms, landscape-sketches) he set up in 1494 a studio of his own. In the same year he married Agnes Frey but they had no children. Among his Nuremberg friends the learned humanist Willibald Pirkheimer held the first place. Besides great advancement in learning, Duruer owed to Pirkheimer the happiness of a lifelong friendship.

V.—14
and the acquaintance with classical antiquity which he occasionally drew upon in his work. Dürer's art, however, with its sources in the German Middle Ages, remained essentially German; the influence of the art of Italy and the Netherlands was merely supplementary. In his own country there were few chances for mural paintings; but the demand for altar-pieces and portraits was all the greater. His woodcuts were eagerly sought after by the general public, his engravings on copper by connoisseurs. Among his fine compositions are: the Baumgartner altar-painting, the central panel of which represents the Adoration of the Christ Child, the wings, the donors as Sts. George and Eustachius; the "Lamentation of Christ", in which the pathos is noteworthy; and the remarkable picture of himself (1500). These are preserved in the Old Pinakothek in Munich. The portrait of himself just mentioned is greatly idealized as is also that of a lady of the Fürliger family. On the other hand, in the portraits of his father and mother realism predominates. But here, as in the "Prodigal Son" and in his drawings, Dürer seeks to elevate his naturalism by

sweet simplicity, depth of feeling, and grandeur of conception. The "Adoration of the Magi" in the Uffizi at Florence will bear comparison, at least for German taste, with the masterpieces of Italy and the Netherlands. Dürer's woodcuts have a quality entirely their own; though without colouring, they yet produced the effect of colour. The "Apocalypse" (15 cuts) is distinguished by its daring fancy and grandeur of conception. The most striking of the series are: the "Four Riders", the "Angels of the Euphrates", the "Battle of the Angels with the Dragon". To the same period belong, for the most part, the powerful "Larger Passion" (7, later 12, cuts) as well as the beautiful "Life of the Virgin" (16, later 20, cuts), in which the scenes from the life of the Holy Family in Egypt have all the sweetness of a charming idyll. Mention should be made of the so-called "Green Passion" in the Albertina Museum at Vienna, a series of twelve drawings with the pen on green paper, also of the "Smaller Passion" of a later date in 37 woodcuts, and of the 17 copperplate engravings on the same subject. For the fifth time the artist came back to the Passion of Christ eight years before his death; a few sketches are to be found in the Uffizi at Florence and in the Albertina at Vienna. Wood and copperplate engraving were brought to great perfection by Dürer; the latter, and etching as well, by his own work; the
duced in the same year, it would not suffer from the comparison. God the Father sits upon a throne and holds forth the Cross with the Crucified; above both of them, in the form of a dove, the Holy Ghost hovers. About them the saints of heaven in two companies with the Mother of God and John the Baptist at their head kneel in adoration. In the upper part of the picture, above the blessed hosts, choirs of angels surround the Holy Trinity; in the lower part, the Church Militant, led by the powerful figures of a pope and an emperor, takes part in the adoration. As an idealization of the world this multitude stands above the clouds. At the very bottom and to one side, as though left behind, is seen the humble figure of the painter. This work deserves no less praise for its perfection of finish than for its sublimity of conception. The frame, carved in renaissance style from drawings by Dürer, is still preserved at Nuremberg. In the same year, 1511, Dürer produced the "Virgin with the Pearl", one of the finest of his Madonnas. In the years 1513-14 he executed three great copperplate engravings; these may, perhaps, be looked upon as ideal representations of a fearless knight, an unsatisfied searcher for knowledge, and a saint happy in God and are called: "The Knight with Death and the Devil", "Melancholia", "St. Jerome in his Study". To these must be added various paintings, e.g. of Charle-
DURHAM

masse, Sigismund, and Albrecht of Brandenburg; further, the marginal drawings, displaying great fancy and humour, made for Maximilian’s “Prayer Book,” and the “Triumphal Arch of Maximilian” belong to the same time. Later, Dürer worked also on the “Triumph of Maximilian.” He died (1522) the day “Triumphal Car,” for the emperor.

Third Period: 1520 to 1528.—Admirable sketches for “St. Jerome with the Skull,” lately discovered by Anton Weber in Lisbon, give ample proof of the artist’s diligence during his stay in the Netherlands. The striking end of the stag in the “Head of an Old Man” in the Albertina. After his return to Nuremburg, Dürer painted a noteworthy “Head of Christ” and portraits of Pirkeheimer, Erasmus, and Holzschuher. His last work of importance (1528) was the “Four Apostles.” Peter with John, and Paul with Mark; these paintings, which are now in Munich, are much admired for the individuality of character expressed by the figures and the fine treatment of the drapery. From the inscription under these pictures, despite the fact that Peter is represented as holding the keys of heaven, and from other circumstances that were little, some have wished to infer that towards the end of his life Dürer became attached to the doctrines of Luther. But even the Protestants van Eye, A. W. Becker, C. Kinkel, and others, do not share in this opinion. Thausing, the great Dürer scholar, has now rejected it. No doubt many well-meaning persons of the time saw the necessity for a moral and religious reform, and hoped that it would be hastened by Luther’s stand. But they were deceived and disappointed, as Dürer felt for himself and his friends that in the beginning I believed in our Albert of blessed memory... but can see, the situation has become worse.”

Years 1525-27, Dürer wrote three books: on the proportions of the human figure, and on fortification.

DURHAM (DUNELM), ANCIENT CATHOLIC DIOCESE OF (DUNELMENSIS).—This diocese holds a unique position among English bishoprics. Owing to its geographical bordering the Scottish border, the bishops were led to assume constitutional and political functions in addition to their spiritual office. Concurrently their rights and privileges were peculiarly extensive; and even to this day the Anglican diocese of Durham has precedence over all other English dioceses except those of Canterbury, York, and Hereford.

The diocese is the lineal continuation of the See of Lindisfarne, founded by St. Aidan when he came from the monastery of Iona to the north of St. Oswald, King of Northumbria, to be succeeded by Bede. Later, it became the see of Lindisfarne, being transferred to the south of the river Wear. The see was united with the see of Durham in 1148 by the bishop of Durham. The see of Durham was divided into two sees: the archbishopric of Canterbury, and the see of Durham, under the patronage of the House of York. The see of Durham was subdivided into the Dioceses of Lin-

disfarne and Hexham, while finally a separate bishopric was created for the Southern Priests. So that when St. Cuthbert (q. v.) became Bishop of Lindisfarne the diocese was only a fragment of what it had been under St. Aidan. In the ninth century, when the Danes repeatedly harassed Northumbria, the Diocese of Hexham ceased to have a separate existence, and about 820 was merged in that of York. In 875, Eardulf, Bishop of Lindisfarne, was driven from his see, and taking the body of St. Cuthbert, he with his monks fled from the Danes. After wandering seven years they found a resting place at Chester-le-Street (882); and from here Eardulf and his eight immediate successors ruled the see. In 995 Bishop Aldhun again found himself defenseless before the Danes and fled with St. Cuthbert’s body to Ripon. When peace was restored, he was returning to Chester-le-Street when miraculous signs were given that the body of the saint was to remain at Dunholm, the place where the city of Durham now stands. A stone chapel was built to receive St. Cuthbert’s body and Aldhun began a great church where the cathedral now is, which was finished and consecrated in 995. In this way Aldhun became the first Bishop of Durham.

The following is the list of bishops with the dates of their accession. Those marked thus (†) held the office of Lord Chancellor:

**THE CATHEDRAL.** The first Norman bishop, Walcher, was murdered by the people in 1080, and was
succeeded by William de S. Carleie, who began the present cathedral, the foundation being laid 20 July, 1093. He also replaced the secular cathedral clergy by Benedictine monks from Jarrow and Wearmouth. The situation of the cathedral is very remarkable, as it stands high on the cliff overhanging the river, and the building itself is most imposing, with its noble proportions, and what Dr. Johnson called its appearance of "rocky solidity and of indeterminate duration". Bishop Carleie died shortly after beginning it; but the building was carried on with energy by the next bishop, the infamous Rannulf Flambard. He built the nave and aisles and the lower part of the west front, and in 1104 the shrine of St. Cuthbert was transferred to the new cathedral. In 1143 the see was usurped by William Cumin, chancellor of the King of Scotland, local survival of the old Northumbrian Kingdom. According to another view it was conferred by grant of some king, Alfred or, more plausibly, William the Conqueror. There is, however, no historical trace of any such grant, and recent research makes it more probable that it is a representation of communities granted to the Bishopric of Durham. Even before the Conquest the bishops held large endowments of land known as the patrimony of St. Cuthbert, Terra or patrimonium Sancti Cuthberti. Therefore the diocese possessed large franchise or immunity both as against the power of the King of England and the local rights of the Earl of Northumberland. Even the bishopric was not included in Domesday Book, and even at the time of the Conquest the county of Durham was governed by the bishop with almost complete local independence. These extensive rights were strengthened by the fact that the bishops frequently had to repel Scottish invasions, by their own forces and at their own expense, which fostered both the military and financial independence of the palatinate. The strong local feeling of Northumbrian independence also prevented the formation of any frankries with the English sovereigns, until the masterful policy of Henry II brought Durham into subordination to the central government. But this subordination was exceedingly limited even then, and the bishopric escaped the deprivation of its privileges which befell many other franchises at that time. This was due to Bishop Hugh de Pudsey, who was the king's cousin and personal friend, and who took care as time went on to obtain the charters necessary to safeguard the liberties of his see.

These were most considerable. First, the bishop had within the bishopric every right that the king had in the country: Quicquid rex habet extra episcopus habet intra. He was therefore the head of the civil government, with appointment of all civil officers. The bishop had the writ, not the king, in the bishopric, and the "Bishop's peace" was regarded as different from the "King's peace" until the time of Henry VIII. Offenders and law-breakers were tried in the bishop's court and if necessary punished by his officials. Forfeitures for treason and forfeitures of war were both his right, and he could create corporations, and erect fairs and markets. He did not, however, have the right of making treaties with foreign powers, though instances of attempted secret treaties with Scotland are not wanting. The bishops had their own mint, and their seal was on the reverse of each coin. From the feudal point of view the bishop was very strong, as he was the universal landlord, and all land was held mediatly or immediately of him and not of the king. From this followed his rights of wardship, rights to all mines and to treasure-trove, as well as his extensive forest rights. At law he could stay procedure against offenders, grant pardons and even suspend the application of a statute. He had courts of common law, equity, and admiralty, besides his spiritual courts; and he regulated the relations between the latter and the temporal courts of both in his diocese.

Thus, in theory, the bishop was as a king in his bishopric, but in practice his power was limited by the sovereign. In some instances the king actually infringed upon his rights, and in other cases there was conflict of jurisdiction. Up to the end of the thirteenth century the episcopal power developed in every way, then followed a period during which the kings somewhat unwillingly tolerated the position, for the sake of the convenience of having what amounted to a buffer state between England and Scotland, and also because it was difficult to solve a problem so beset with complications both ecclesiastical and feudal. Although it is sometimes stated that the bishops had a council in the nature of a parliament, it is becoming increasingly clear that we have

West Towers and Cloister Court, Durham Cathedral

who for sixteen months violently kept the rightful bishop out of possession. This interfered with the building, but the next bishop, Hugh de Pudsey, was a great builder, and among his additions is the "Gali-

CIVIL JURISDICTION OF THE BISHOPRIC OF DURHAM.—The twofold jurisdiction of the bishops of Dur-
ham was clearly recognized by law from early times. In the reign of Edward I the Rolls of Parliament state: "Episcopus Dunelmensis duos habet status, videlicet, statum episcopi quoad spiritualia et statum comitis palatii quoad tenementa sua temporalia." But the origin of this civil jurisdiction has never been ascertained. According to one theory it represents a
here a confused tradition of two separate bodies—the assembly and the council. The assembly (communitas) was practically the same gathering as the shire-meet in other counties. It raised money by taxation at the request of both the king and of the bishop, and sometimes for its own purposes. But it was not a legislative assembly, since all general legislation applied to the palatinate, although Durham was not represented in Parliament till the time of the Stuarts. When Acts were not intended to apply to Durham express exemption was stated. The council was in origin a feudal body, chosen from the bishop’s immediate followers and officials, the functions entrusted to it being the general administration of the palatinate, financial affairs, and the duty of advising the bishop. The judicial courts of the palatinate arose out of this body. Much of the civil and judicial independence of the palatinate was destroyed by the Act of Resumption passed in 1536, at the will of Henry VIII. By this act the bishop’s semi-regal power was abolished.

EDWIN BURTON.

Durham Rite.—The earliest document giving an account of liturgical services in the Diocese of Durham is the so-called “Rituale ecclesie Dunelmensis,” also known as the “Ritual of King Ecgfrith” [the King of Northumberland, who succeeded his brother Ecgfrith in 858, and who was a vir in scriptura doctissimus (Bede, Hist. Eccl., IV. 18)], the MS. (in the library of Durham cathedral, A, IV, 19) is of the early ninth century. It contains capitula, chants, and especially collects, from the Epiphany to Easter, then a proprium sanctorum, a commune sanctorum, and many forms for blessings. The greatest part has an linear Anglo-Saxon translation. At the end various aribes have used up the blank pages to write out a miscellaneous collection of hymns and exorcisms and a list of contractions used in books of canon law. Its connexion with Durham and Northumberland is shown by various allusions, such as that to St. Cuthbert in a collect (intercedente beato Cuthbertho Sacerdote; p. 185 of the Surtees Soc. edition). This fragment represents the fusion of the Roman and Gallican uses that had taken place all over North-Western Europe since the Emperor Charles the Great (768–814) or even earlier (Duchesne, Origines du culte chrétien, 2nd ed., 89–99). Many parts of it exactly correspond to the Gregorian Sacramentary sent by Pope Adrian I to the emperor (between 784 and 791; Duchesne, op. cit., 114–119).

The great Benedictine monastery of Durham was founded by William of St. Carileph in 1038; he brought monks from Wearmouth and Jarrow to fill it. These monks served the cathedral till the suppression in 1538. The foundation of the cathedral was laid in 1093 and St. Cuthbert’s body was translated there in 1104. A catalogue drawn up at Durham in 1395 gives a list of the books used by the monks for various services. Of such books not many remain. A Gradual of about the year 1500 with four leaves of a Tonusium is at Jesus College, Cambridge (MS. 22; Q. B. S.), and a Durham Missal written in the fourteenth century is in the British Museum (Harl. 5289). The parts of this Missal that correspond to Holy Week and Easter are printed in vol. CVII of the Surtees Society’s publication (pp. 172–191; see also the “Westminster Missal,” III, 1424, Henry Bradshaw Soc., 1897, where the Durham variants are given). But the most important document of this kind is the volume called “The Ancient Monuments, Rites and Customs of the Monastical Church of Durham before the Suppression.” This book, written in 1590, has been printed in several manuscript copies and has been printed and edited on various occasions, lastly by the Surtees Society (vol. CVII, 1903; see bibliography). It is a detailed description, not only of the fabric of the cathedral, but also of the various rites, ceremonies, and special customs carried out by the monks. It from it we see that the Durham Rite was prac-

GALILEE CHAPEL, DURHAM CATHEDRAL.
tically that of the North of England (corresponding in all its main points to that of York), with a few local modifications such as one would expect to find in a great and flourishing monastic church. The treatment begins with a description of the famous nine altars (ed. Surtees Soc., p. 7) and of the choir and high altar. The Blessed Sacrament was reserved in a silver pelican hung over the High Altar. It should be noted that a pelican in her piety was assumed as his arms by Richard Vokes (Bishop of Durham, 1494-1500) and was consequently introduced into monuments built by him (so at Winchester and at Corpus Christi College, Oxford).

The great paschal candlestick was a conspicuous and splendid feature of Easter ritual at Durham; it and the rite of the paschal candle are described in chapter iv (ed. cit., p. 10). The Office for Palm Sunday does not differ from that of Sarum and the other English uses (ed. cit., p. 179). On Maundy Thursday there was a procession with St. Cuthbert's relics. A special feature of the Good Friday service was the crucifix taken by two monks from inside a statue of Our Lady, for the Creeping to the Cross. On the same day the Blessed Sacrament was enclosed in a great statue of Christ on a side altar and candles were burned before it till Easter Day. The Holy Saturday service in the Durham Missal is given on pp. 155-157 of the Surtees Society Catalogue. The monks sang the "Missa de Paschae" while they went in procession to the new fire. When the paschal candle is lit they sing a hymn, "Inventor rutili", with a verse that is repeated each time. There are only five Propositions; and then follow the litanies. When "Omans Sancti" is sung those who are to serve the Mass go out. The word Ascendit is said and the candles are lighted. It is repeated three times; at the third repetition the bishop comes out to begin the Mass. All the bells (signa) are rung at the Kyrie eleison, the Gloria, and the Alleluia. Between three and four o'clock in the morning of Easter Day the Blessed Sacrament was brought in procession to the high altar, while they sang an antiphon, "Christus resurgens ex mortuis, iam non mortitur", etc. Another statue of Christ Risen remained on the high altar during Easter week. On Ascension Day, Whit-Sunday, and Trinity Sunday processions went round the church, on Corpus Christi round the palace green, and on St. Mark's Day to Bow Church in the city (chs. iv, liv). The rogation-days (three cross-dates) also had their processions to the relics of St. Bede. The bells were mounted and the monks appeared in silk and copes. The prior, especially, wore a cope of cloth of gold so heavy that he could only stand in it when it was supported by his gentlemen (ed. cit., p. 85). The prior had the right of wearing a mitre since Prior Benedictus (ch. viii, cit., p. 107).

Throughout the year the chapter Mass was sung at nine o'clock, Vespers at three p. m. On Thursdays, except in Advent, Septuagesima, and Lent, the Office of St. Cuthbert was sung in choir (ed. cit., p. 191). On Fridays there were "Jesus Nobis" (a votive mass of the Holy Name), and the "Jesus-Antiphon" was sung after Complin (ed. cit., p. 220). This was also the custom at York, Lincoln, Lichfield, and Salisbury. On St. Cuthbert's Day (20 March) there was, naturally, a great feast and his relics were exposed. Chapter x (ed. cit., p. 16) describes the great book containing names of benefactors (Liber Vite) that was kept on the high altar, chapter xxi the forms for giving sanctuary to accused persons. They had to use the knocker, still shown to visitors, and, when they were received, to wear a black cap and a "yellow cloth and St. Cuthbert" on the left shoulder (ed. cit., p. 41). No woman was allowed to approach the saint's tomb beyond a line of blue marble traced on the floor. To explain this, chapter xviii tells a legend about a king's daughter who falsely accused him and was eventually swallowed by the dragon. The chapel of Our Lady for women (chs. xxiii, ed. cit., p. 42). When a monk died his body was carried to St. Andrew's chapel, two monks watched before it all the time; after the dirge and the requiem Mass it was buried in the sanctuary garth with a chalice of wax on it, fixed on a cushion (ch. xxiii). The monks were buried in the abbey church (xxv) and bishops in the sanctuary (xxvii). (See Durham, Diocese of.)

The Anglo-Saxon Ritual ecclesiae Dunelmensis is published (from MS. E at Durham) by Swett in his Oldest English Texts (1853). The Ancient Monuments, Rites and Customs of the Monastical Church of Durham is a MS. of 1620 in the Cosin Library at Durham (MS. B. II, 11) and is found in a MS. of 1658 belonging to Bough Hall, Catterick (Pole, pp. 1-20). These two texts the edition of the Surtees Society has been printed (vol. CVII, 1894, p. 1-201). Other Missals were published and modernized by Davison (London, printed for W. Benham in 1872): Hunter, Durham Cathedral as it was before the destruction of the monasteries (Durham, by J. Ross for Mrs. Wagstaff, 1783; reprinted, Durham, 1758); Sanderstown, The Antiquities of the Old or Cathedral Church, Newcastle (Newcastle, 1767). The Durham Obituary Roll (c. 1468) was edited for the Society of the same society (vol. X, 1886). The Surtees Society Catalogue (pp. 28, 155) gives a Durham Canon Mun- seum, bound up with a penalter, hymnary, and journal, of 1391 and 1418. Part of the Missal of the fourteenth century in the British Museum (Harl. 3286) is printed in the Surtees Society (pp. 172-191). Occasional references to the Durham Ritual can be found in Ritjard and Fryer (vol. 4, London, 1804), and in Wordworth and Littledale, The Old Service-books of the English Church (London, 1884).

ADRIAN FORTESCUE.

Durrow (Irish Deiriceach, Plain of the Oaks). School of, is delightfully situated in the King's County, a few miles from the town of Tullamore. St. Columba, who loved to build in close proximity to oak-groves, because of their natural beauty, as well as perhaps to divest them of their Druidic associations, found here, as in Derry, a site just after his heart. Here he freely gave his gift, and the golden soil of the soil, in 553, and the saint lost no time in founding his monastery, which, with more or less constant personal supervision, he ruled till 583. When, in that year, either as a matter of penance, or as Adamnan says, "of choice for Christ's sake", he became an exile in the wilds of Scotland, he appointed a most estimable monk, Cormac Ua Liathain, to take his place. But owing to the jealousies that existed between the northern and the southern tribes, especially on the borderland, and relics of feuds it was impossible to reunite the office of prior, and so he fled from the monastery, leaving in charge a first cousin of Columba, Laisren by name, who, acceptable to both sides, governed the institution with conspicuous success. Durrow, during Columba's life and for centuries after his death, was a famous school, and an important centre of learning, not only throughout Ireland, but in the year 1373, or 1383, it witnessed the arrival of aReligious education and the spread of learning there. At this time the Venerable Bede styles it Monasterium nobile in Hiberniâ, and, at a later period, Armagh and itself were called the "Universities of the West". It will be ever noted for the useful and admirable practice of copying manuscripts, especially of the Sacred Scriptures, which had become quite a fine art amongst the masters and disciples there. Columba himself, who was an expert scribe, is generally credited with having written with his own hand the incomparable copy of the Four Gospels now known as the "Book of Durrow". It is the perfect example of the rarest workmanship, charming the mind as well as the eye with its intricate and highly ornamental details. An entry on the back of one of the folios of this remarkable book, which is now to be seen in Trinity College, Dublin, prays for the remembrance of the scribe, Columba, who wrote this evangel in the space of twelve years. Columba dearly loved Durrow. It held a place in his affections next to his own Derry, and while in Iona he manifested the tenderest interest in everything connected with it. On his return from "Cala" he wrote a letter to Cormac Ua Liathain to return to the monastery the two...

DUTY

He recounted for him the manifold beauties of that city, devout, with its hundred crosses, without blemish, and without transgression; and added, "I pledge that there are large abandoned virgins, but that death is better in reproachless Erin than life forever in Alba." Durrow, like Clonard, Derry, and the rest, was frequently ravaged by the Danish invaders, but its complete devastation was left for the fierce Norman invader, Hugh de Lacy. In 1186 he began the building of a castle for himself out of the stones of the dismantled monastery, but the axe of an Irish labouring man cut him short in his unholy work. The church and the school are long since gone; not a stone of the original building may now be found. There are, however, several remains of the church, probably marking the ancient site, a Celtic cross, and a holy well, which will serve to keep the name and the fame of St. Columba fresh in the minds of the people forever.

ADAMSON, Life of Columba, ed. REAVES (Dublin, 1857); also by Fowler (London, 1903); Life in The Book of Lismore; Hall's, Ireland's Ancient Schools and Scholars (Dublin, 1880); GLASER, Fancies of Irish National MSS.; WHITMORE'S in American promised (Oxford, 1890).

JOHN HEALY.

Dutch Guiana. See GUIANA.

Duty.—The definition of the term duty given by lexicographers is: "something that is due; "obligatory service"; "something that one is bound to perform or to avoid." In this sense we speak of a duty, duty on, in general, the statement of that duty is denoted by the abstract term in the singular. The word is also used to signify that unique factor of consciousness which is expressed in the foregoing definition by "obligatory" or "bound," "due," and "ought." Let us analyze an instance of consciousness. When, concerning a contemplated act, one forms the decision "I ought to do it," the words express an intellectual judgment. But unlike speculative judgments, this one is felt to be not merely declaratory. Nor is it merely preferential; it asserts itself as imperative and magisterial. It is accompanied by a feeling impelling one, sometimes effectually, sometimes ineffectively, to square his conduct with it. It presumes that there is a right way and a wrong way open, and that the right is better or more worthy than the wrong. All moral judgments of this kind are particular applications of a universal judgment which is postulated in each one of them: right is to be done; wrong is to be avoided. Another phenomenon of our moral consciousness is that we are aware from our consciousness that nature has constituted itself moral in principle and in its institutions, and desires. We instinctively feel, for example, that the emotion of reverence is higher and nobler than the sense of humour; that it is more worthy of us as rational beings to find satisfaction in a noble drama than in watching a dog-fight; that the sentiment of benevolence is superior to that of selfishness. Furthermore we are conscious that, unless it has been weakened or atrophied by neglect, the sentiment attending moral judgments asserts itself as the highest of all: awakens in us the feeling of reverence; and demands that all other sentiments and desires, as motives of action, shall be reduced to subordination to the moral judgment. When action is conformed to this demand, there arises a feeling of self-appropriation, while an opposite course is followed by a feeling of self-reproach. Starting from this analysis we may expose the theory of duty according to Catholic ethics.

DUTY IN CATHOLIC ETHICS.—The path of activity proper and congenial to every being is fixed and dictated by the nature which the being possesses. The cosmic order which pervades all the non-human universes is transformed by the variety of things which make up the universe. For man, too, the course of action proper to him is dictated by the constitution of his nature. A great part of his activity is, like the entire movements of the non-human world, under the iron grip of determinism, though there are large elements of free will in him, for he has no volitional control; and his body is subject to the physical laws of matter. But, unlike all the lower world, he is himself the master of his action over a wide range of life which we know as conduct. He is free to choose between two opposite courses: he can elect, in circumstances innumerable, to do or not to do; to do this action, or to do that which is incompatible with it. Does, then, his nature furnish no index for conduct? Is every form of conduct equally congenial and equally indifferent to human nature? By no means. His nature is conducive to this and to that; as his nature is proper, and the line which is abhorrent to it. This demand of nature is delivered partly in that hierarchic order which exists in our feelings and desires as motives of action; partly through the reflective reason which decides what form of action is consonant with the dignity of a rational being; comprehensively, and with immediate practical application to action, in those moral judgments involving the "ought." This function of reason, aided thus by good will and practical experience, we call conscience (q.v.). We have now reached the first limb of the bond which we know as moral obligation, or duty. Duty is a debt owed to the rational nature of which the spokesman and representative is conscience, which imperatively calls for the satisfaction of the claim. What makes this claim imperative? The idea of duty, of indebtedness, involves another self or person to whom the debt is due. Conscience is not another self, it is an element of one's own personality. How can one be said, except through a figure of speech, to be indebted to oneself? Here we must take into consideration another characteristic of conscience. It is that conscience is a dim, undefined, but very real way, seems to set itself over against the rest of our personality. Its intimations awake, as no other exercise of our reason does, feelings of awe, reverence, love, fear, shame, such as are called forth in us by other persons, and by persons only. The universality of this experience is testified to by the expressions men commonly employ when speaking of conscience; they call it a voice, a judge; they say that they must answer to conscience for their conduct. Their attitude towards it is as to something not completely identical with themselves; its whole genesis is not to be accounted for by describing it as one function of life. It is the effect of education and training, some say. Certainly education and training may do a great deal to develop this sense of conscience; but there is another self implicated beyond ourselves. But the quickness with which the child responds to its instructor or educator on this point proves that he feels within himself something which confirms his teacher's lesson. Ethical philosophers, and conspicuously among them Newman, have argued that to him who listens reverently and obediently to the dictates of conscience, they inevitably reveal themselves as emanating, originally, from "a Supreme Governor, a Judge, holy, just, powerful, all-seeing, retributive." If, however, we accept Newman's view as universally true, we cannot easily admit that, as is generally asserted and believed, many men obey conscience and love righteousness, who nevertheless, do not believe in a personal, moral ruler of the universe. Why may not the most uncompromising theologian admit that the moral guide which the Creator has implanted in our nature is powerful enough successfully to discharge its function, at least in occasional cases, without fully unfolding its implications? One of the leading Unitarian moralists has consequently expressed this view: "in the sense of the authority and even sacretude of the moral law is often conspicuous among men whose
thoughts apparently never turn to superhuman things, but who are penetrated by a secret worship of honour, truth and right. Were this noble state of man, independent of its impulsive state and made to unfold its implicit contents, it would indeed and must source higher than human nature for the august authority of righteousness. But it is undeniable that that authority may be felt where it is not seen—felt as if it were the mandate of a Perfect Will, while yet there is no overt recognition of such a Will: i.e., conscience may act as human, before it is discovered to be divine. To the agent himself its whole history may seem to lie in his own personality and his visible social relations; and it shall nevertheless serve as his oracle, though it be hid from him Who it is that utters it.” (Martineau, A System of Religious, Introduction, p. 23.) Nevertheless it must be admitted that such persons are comparatively few; and they, too, testify to the implication of another self in the intimations of consciousness; for they, as Ladd says, “personify the conception of the sum-total of ethical obligations, they are fast to spell the words with capitals and swear allegiance to this purely abstract conception. They hypostatize and deify an abstraction as though it were itself existent and divine.” (Ladd, Philosophy of Conduct, p. 385.)

The doctrine that conscience is autonomous, independent of authority, a law-given, a law-giver nothing, man himself is in no higher legislative moral than conscience, finds arising in his mind the inevitable question, Why am I bound to obey my conscience when my desires run in another direction? he is seriously tempted to adjust his moral code to his inclinations; and the device of spelling duty with a capital will prove very but a slender support to it against the attack of passion.

Reason solves the problem of duty, and vindicates the sanctity of the law of righteousness by tracing them to their source in God. God’s sovereign power, his procreation of the Divine Will, so, likewise, is the moral law which is expressed in the rational nature. God willed that we shape our free action or conduct to that norm. Reason recognizing our dependence on the Creator, and acknowledging His inalienable rights, gives us good reason to believe that God commands as His will and by His word, as His conscience, which conscience teaches us that we owe Him love, reverence, obedience, service, and, consequently, we owe it to Him to observe that law which He has implanted within us as the ideal of conduct. This is our first and all-comprehensive duty in which all other duties have their root. In the light of this truth conscience explains itself, and is transfigured. It is the accredited representative of the Eternal; He is the original Imponent of moral obligation; and disobedience to conscience is disobedience to Him. Infraction of the moral law is not merely a violence done to our rational nature; it is also an offense to God, and this aspect of its malice is designated by calling it sin. The sanctions of conscience, self-approbation, and self-reproach, are reinforced by the supreme sanction, which, if one may use the expression, acts automatically. It consists in this, that by obedience to the law we reach our perfection, and compass our supreme good; while, on the other hand, the transgressor condemns himself to miss that good in the attainment of which alone lies the happiness that is incorruptible. To obviate a possible misapprehension it may be said that right and wrong hangs not upon any arbitrary decree of the Divine Will. Right and wrong is wrong because the prototype of the created order, of which the moral law forms a part, is the Divine Nature itself, the ultimate ground of all truth and spiritual right.

Erroneous Ethics.—We have already touched upon the main weaknesses of the Kantian theory, which is to treat conscience as autonomous. Another mistake of Kant is that in his system duty and right are made coterminous. A moment’s reflection is sufficient to perceive that this is an error. There are many conceivable good actions which one can do, and which it would be highly praiseworthy to perform, yet which no reasonable person, however rigorous his ideal of conduct might be, would say one is bound to perform. Duty and right are two concentric circles. The inner one, duty, embracing all that is to be observed under penalty of failing to live rationally. The outer contains the inner, but, stretching far beyond, permits an indefinite extension to the paths of virtue that lead to consummate righteousness and sanctity. Every philosophic system which embraces as one of its tenets the doctrine of determinism thereby commits itself to the denial of the existence of moral obligation. Duty implies that the subject of it possesses the power to observe the law, or to disobey, and power to observe the law being an attribute of free agency. What reproach can a determinist mentor logically address to one who has committed a wrong action? “You ought not to have done so”? The culprit can reply: “But you have taught me that free will is a delusion; that no one can act otherwise than he does. So under the circumstances in which I found myself, it was impossible for me to refrain from the action which you condemn. What, then, can you mean by saying that I ought not to have acted as I did? You reproach me; as well reproach a tiger for having eaten his man or a volcano for having ruined a village.”

With regard to the existence of duty every form of pantheism, or monism, logically finds itself in the camp of determinism. When man is looked upon as one with the Infinite, his actions are not really his own, but belong properly to the Universal Being. The part assigned to him, in his activities, is similar to that played by a carbon burner in relation to the electric current generated by a dynamo. The Divine power passing through him clothes itself with only a seeming identity with the individual’s. That is, in the cosmic order of things, what direction it takes, and the results in which it culminates, belong to the Supreme Being. If this were true, then lying, debauchery, theft, murder were equally as worthy as truthfulness, chastity, honesty, benevolence; for all would be equally manifestations of the cosmic order, and sanctions will be imposed as conduct into two opposite categories might still be made from the standpoint of results; but the idea of moral worth, which is the very core of the moral life and the first postulate of duty, would have vanished.

Hedonism of every shade—utilitarian, egoistic, altruistic, evolutionary—which builds on one or another form of the “greatest happiness” principle and makes pleasure and pain the discriminating norm of right and wrong, is unable to vindicate any authority for duty, or even to acknowledge the existence of moral obligation. No combination of impulses, if they are estimated from the merely biological or purely empirical standpoint, can, by any juggling of words, be converted into a moral hierarchy. The hedonist is doomed to find all his endeavour to establish the basis of the order terminate in “is” and never in “ought,” in a fact, but never in an ideal. Lecky has neatly summed up the hedonist solution of the problem of duty: “All that is meant by saying we ought to do an action is that if we do not do it we shall suffer.” Pleasure, say the epicurean and the egoist, is the only motive of action; and actions are good or bad
DUTY

Accordingly as they produce a surplus of pleasure over pain, or contribute to or diminish welfare. Then, we ask, is it necessary to distinguish the most pleasurable or the most remunerative? If the answer is yes, we are again landed in determinism. If the reply is that I can choose, but that I ought to choose what produces the most happiness, then I ask, why ought I to choose the course which produces the most happiness, if I prefer to do otherwise? To this question the epicurean and the egoist have no answer. Besides, the most pleasurable conduct may be one that all reasonable men condemn as wrong, because it is injurious to some one else. Here the egoist is supposed that it fulfills the altruist's condition. The later endeavors to dispose of it by pointing out that the object of good conduct is not merely the agent's own happiness, but that of everybody concerned. But again, why am I bound to take into account the welfare of others? and the altruist is silent. The evolutionist of the Spencerian type intervenes with a ponderous theory that in gauging the measure in which actions produce welfare or diminish it, not merely the immediate, but also and more especially, the remote results must be considered. If this theory is taken, then the consequences of our ancestors' experience that remote results are more important than immediate, we have come to fancy that remote results have a certain authoritativeness. Also, from unpleasant experiences of our ancestors it is necessary to impose occasional injurious actions, to think too of the external penalties which were attached to such actions. These two elements, blending into one, give rise, we are told, to the feeling of moral obligation. So the common conviction that moral obligation has really any binding authority is a mere delusion. Spencer is honest enough to draw the inevitable corollary of this doctrine which is that our sense of duty and moral obligation is transitory and destined to disappear. Ethical writers of the "independent morality" schools have devised a beautifully simple way of escaping from the embarrassment of accounting for the validity of moral obligation. They ignore the subject altogether and refer the disappointed inquirer to the metaphysicist. Ethics, they blandly declare, is a descriptive, not a normative science; hence that imposing array of words professing to treat of moral, morality, the calmly ignoring the pivotal factor of the moral life.

HISTORIC DEVELOPMENT OF THE IDEA OF DUTY.—To trace the development of the concept of duty would be to review the history of the human race. Every reference not from the sacred moral code, however crude and erroneous. Another universal fact is that the race has, everywhere and always, placed morals under a religious, or quasi-religious, sanction. The savage, in a measure corresponding to his crude moral and intellectual development, witnesses to this universal impulse by observing innumerable customs because he believes them to have some sanction higher than that of his fellow tribesmen or their chief. The great nations of antiquity, Chinese, Chaldean, Babylonian, Egyptian, saw in their deities the source or sanction of their moral codes—at least until the religious and the moral ideal became simultaneously corrupted. In Greece and Rome, likewise, religion and morals were intimately associated, until religion proved false to its trust. The same phenomenon is found in the Aryan race of India and Persia, where the source of virtue was the deity, and the people continued to look to religion for the reason of their moral codes. When classic paganism had introduced among the gods the vices of men, the ancient tradition continued to be vindicated by the poets, and by some of the philosophers. The modern testaments of the Greek tragic poets, of Plato, Aristotle, and Cicero to the superhuman origin of the moral law and duty need not be quoted here. But when religious tradition lost its force and philosophy became the guardian of morality, a conflict of rival schools, none of which possessed sufficient authority to make its tenets prevail with the mass of the people, was the inevitable result; and as religious faith declined, the tendency to find a non-religious basis for duty became more pronounced. The consequence was that the idea of duty factured; and systems arose which, like our present day "independent morality", had no place for moral obligation.

The unity of the moral and religious ideal was restored and rendered perfect by Christianity. The Gospel vindicated the Divine origin of duty, and designated its atonement as the basis of religion. This idea has been the chief moral force to raise the Western world out of the moral chaos into which decaying paganism had dragged it. The doctrine that every man is an immortal being created by God to be united with Himself in an endless existence, provided that he observe the law of righteousness, in which God's will is expressed, sets forth the dignity of man and the sacredness of duty in their full nobility. The wickedness of moral delinquency reveals itself in this, that it is a sin against the Most High—an idea inexpressible outside the moral sphere. The Christian religion brought out more clearly and taught with the authority of God, the code of the natural law, much of which unaided reason developed only in hesitating accents and without the authority we attribute to it. The Christian was taught that the fulfillment of duty is the one supreme concern of life to which all other interests must be made to bow, and that its fulfillment is enforced by the most tremendous sanctions conceivable. The Gospel gave a satisfactory solution to the anomaly which had perplexed philosophers and misled them to erroneous doctrines concerning the meaning of the moral law. How can virtue be man's perfection, good, and end, when the fulfillment of duty means in many cases, the frustration of many natural desires and wants? The history of duty, replies the Christian, lies not all within the confines of earthly life; its ultimate goal is beyond the grave. The Christian doctrine of the Fatherhood of God and the sonship of man leads to a clearer perception of the chief duties and of their importance. Human life is seen to be a sacred, inviolable thing in ourselves and in others; woman is the equal, not the slave of man; the family is ordained of God, and its corner-stone is monogamous marriage. The State, too, is placed on a firmer basis, since Christian doctrine teaches that it draws the warrant of its laws not from the consent of the governed but from God. Finally, the Christian law of love correlates the outer circle of rightousness with the inner one of strict duty. Love of God becomes the adequate motive for striving after the highest personal sanctity; love of our neighbour for the widest exercise of benevolence far beyond the limits of strict duty. In the person of the Master, Christianity offers to us the flawless Exemplar of the moral ideal, the perfect conformity of will and action to the Divine Will. His example has proved potent enough to inspire with heroic loyalty to duty "the millions who, countless and nameless, the stern hard path have trod". The moral standards of our civilization have been developed and maintained by the efficiency of the Christian idea of duty. Contemporary conditions furnish unmistakable indications that these standards have become debased in a degree to which they are torn from the ground whence they sprang.

DUTIES.—The obligation of living according to our natural reason is the parent of all particular duties. These are generally divided into three groups—(1) Duties to God, (2) Duties to ourselves, (3) Duties to others.—(1) To God, the Supreme Master of the universe, our Creator, the All Holy. All Good, we owe honour, service, obedience, and love. These
DUTIES OF THE FAMILY

any duties; but we owe duties to God in their several forms (see Ethics; Law: Obligation).

JAMES J. FOX

Duvergier de Hauranne (or Du Verger), Jean (also called Saint-Cyrain from an abbey he held in commendam), one of the authors of Jansenism, b. at Bayonne, France, 1581; d. in Paris, 1643. After studying the humanities in his native place, and philosophy at the Sorbonne, he went to Louvain, not to the university but to the Jesuit college, where he graduated, 1604, with a brilliant thesis admired by Justus Lipsius. His acquaintance with the future theologian of the Jansenist sect, Cornelius Jansen (Jansenius), a young disciple of Buis, of Saint Jacques, Gerson, began at Louvain. In 1605 the two were in Paris, attending together the lessons of the Gallican, Edmond Richer, and studying Christian antiquity with a view to restoring it to its place of honour, usurped, as they claimed, by Scholasticism. These studies, which Jacob and others of the Gallic literature were pursued with incredible energy for wellnigh twelve years, at Paris, till 1611, and then at Cambray (Cambrai), the home of Hauranne, under the protection of Bertrand d'Escrache, Bishop of Bayonne, who made Duvergier canon of his cathedral, and Jansen principal of a newly-founded college. Owing, no doubt, to the translation of d'Escrache from Bayonne to Tours, the two friends left Bayonne in 1617, Jansen returning to Louvain and Duvergier going to Poitiers where Bishop de la Rocheposay, a disciple of Scaliger and an enthusiastic humanist, received him as a friend, appointed him to a canonry and the priory of Bonneville, and later, 1620, resigned in his behalf the Abbey of Saint-Cyrain-Brenne. The new commendatory prelate resided little in his abbey. In 1622 he returned definitively to Paris, met the metropolis after requiring many opportunities to further his plans. During the years 1617–1635 an assiduous correspondence was kept up between Duvergier and Jansen, of which there remain only "Lettres de Janesinius à Duverger de Hauranne", seized at the time of Saint-Cyrain's incarceration. These letters, wherein conventional epithets are frequently used, constantly mention the affaires principales, projet, cabale, that is, first and foremost, the composition of the "Augustinus" by Jansen, Saint-Cyrain employing himself to enlist patrons for the so-called Augustinian system (see Jansenism).

For greater security the two innovators occasionally met to discuss the progress of their joint work.

One of these meetings probably gave rise to the much-debated Projet de Bourg-Fontaine. In his "Relation juridique de ce qui s'est passé à Poitiers touchant la nouvelle doctrine des Jansénistes" (Poitiers, 1654), Fillette stated on the authority of one of the conspirators then repentant, that six persons had secretly met in 1621 at the chartreuse of Bourg-Fontaine, near Paris, for the purpose of overthrowing Christianity and establishing a new one; that of the conspirators, only initiated by Fillette, were given in full by Bayle (Dict. s. v. "Arnauld"); that of Saint-Cyrain heads the list. The Jansenists always protested against this story. Arnauld called it a "diabolical invention"; and Pascal ridiculed it in his Lettres épitaphiques (1688); and yet, as a new point in the Jansenite quarrel, the conjecture of Father Sauvage's argument in his "Réalité du projet de Bourg-Fontaine démontrée par l'executation."
DUGUEGIER

(Paris, 1768) was refuted by D. Clémenceau in "La vérité et l'innocence victorieuses de la calomnie ou bêtise et le bon de Bourg-Fontaine" (Paris, 1768). Although Clémenceau's book was burned by order of the Parliament of Paris, still it never was answered. Guizot's remark that "the adepts of Jansenism passed insensibly from the tenets of Saint-Cyr and M. Assemer to atheism and the worship of reason" (Civilisation en Europe, Livre XII) correctly apply to some of the later Jansenists, but the charge of rationalism is obviously untenable when brought against the Jansenists of the first generation. Stripped of unsupported details and deductions, Filée's narrative strongly suggests that after the death of the author (p. 356), there is no need to refer to the letters of Jansenius and other documents of the time, a covert yet definite purpose, as early as 1621, to deeply modify the dogmas, moral practices, and constitution of the Church, St. Augustine being made responsible for such changes.

As noticed above, Duguegier's share was to win high influence in favour of the revolutionary resolution. While at Poitiers he had met Richelieu, de Condren, and Arnauld d'Andilly. At Paris he sought out such men as Vincent de Paul, founder of the Congregation of the Mission, and the Jesuits of the provincialate of Bérulle, superior of the French Oratory; Tarisse, superior of the Benedictines of Saint-Maur; Bourdoise, superior of Saint-Nicolas, and many more. It cannot be denied that these men were at first attracted by Saint-Cyr's appeal. In subsequent years, he undoubtedly understood his true aim when recoiled from him. The terse expression applied in the Roman Breviary to St. Vincent de Paul, Sensit simul et exhorruit (he shuddered on hearing), could be said of them all, with the exception of Bérulle and Arnauld d'Andilly. Bérulle never shared the errors of Duguegier and Jansen, but, being indebted to these two for the establishment of the French Oratory in the Netherlands, he failed to detect their real purpose and gave them a hold on his order which they never released. Owing to his Gallicanism and strong prejudices against the Jesuits, Arnauld d'Andilly fell an easy prey to Saint-Cyr's wiles and declamations, and even brought with him the whole Arnauld family, along with the Bernardine name of Port-Royal (q. v.). Ardois and persistently Saint-Cyr pushed his way into this celebrated movement, and in 1689, he took its sole direction. Not only were his innovations and rigour eagerly accepted by the nuns, but Port-Royal became the centre of Jansenism, drawing a host of ecclesiastics, lawyers, writers, etc., all vying with one another to place themselves under the patronage of the Abbé de Saint-Cyr. His incredible success and nefarious works are well described by M. Sépet (in Rev. des quest. hist., xlv, 534): "Taking advantage of the moral enthusiasm aroused by the religious awakening, an ardent and sombre sectarian, Saint-Cyr undertook to win agolia over for the proud doctrine of absolute predestination to either salvation or damnation, also to an excessive rigour to which the initiated eagerly accommodated themselves, while simple-hearted folk like Pascal risked life and reason in its practice." Saint-Cyr was at the summit of his influence when an order of Richelieu sent him (1638) to the donjon of Vincennes. His incarceration has been variously explained both by friends and enemies. Richelieu gave the true reason when he said: "Saint-Cyr is most dangerous to us. If Luther and Calvin had been arrested when they began to dogmatize, much trouble would have been spared the nations." (See Marandé, "Inconvénients d'état procédant du Jansénisme", Paris, 1653.) Jansenist writers unduly idealize the time of the Jansenists' captivity. As a matter of fact, he was given liberty enough to receive his friends, to read the first printed copy of "Augus-

"Fréquente Communion", published in 1643, to write his "Théologie familière" and the voluminous "Lettres chrétiennes" and "Lettres choisies" to make new recruits. In 1643, after Richelieu's death, Saint-Cyr recovered his liberty and returned in triumph to Port-Royal. The triumph, however, was clouded by the announcement that the "Augustinian" had been condemned at Rome. When the author heard of the condemnation, he wrote that "Rome was going too far and ought to be taught a lesson"; a stroke of apoplexy, however, carried him off before he could execute his threat. Pierre de Fons, parish priest of Saint-Jacques du Haut-Pas, in a note quoted by Bérulle (Hist. des J., p. 355), telescoped out that Saint-Cyr died while being anointed, but had asked for neither absolution nor Viaticum, notwithstanding a certificate to the contrary, delivered by Mulsey, when importuned and bribed by the Jansenists.

Saint-Cyr was a prolific writer. His manuscripts, seized at the time of his arrest, formed no less than thirty-two thick folio volumes. Amid the numerous writings ascribed to him by the "Dictionnaire des livres Jansénistes" (Antwerp, 1755), it is difficult to distinguish his genuine works, for he generally wrote anonymously, or under a false name, and collaborated with others. Apart from two frivolous pamphlets written by Duguegier in his youth, "Question royale" (Paris, 1669), an apology for suicide under certain circumstances, and "Apologie pour . . . de la Rochepeau" (Paris, 1665), there is no show that bishops have a right to use arms, his principal works are: (1) "Sommes des fautes . . . du P. Garasse" (Paris, 1626), with several additional pamphlets in support of it; the book itself was a vile attack on the Jesuits on occasion of a somewhat incautious book written by one of them, the heroic Father Garasse; (2) "Petrus Aurelius de hierarchiá ecclesiástica" (Paris, 1631), written in collaboration with Duguegier's nephew, Barocs, and others. This book purports to be a defence of Richard Smith, vicar Apostolic in England, against the alleged machinations of the English Jesuits; in fact it aims at winning over to the Jansenist error the Catholic hierarchy whose prerogatives it exaggerates to the detriment of the Roman See. The scientific portion of it is taken from the "De republia christianarum" (1617) of the apostate Marc'Antonio Fontana; the rest consists mainly of abuse of the Jesuits. By a singular inconsistency, Saint-Cyr bases the papal power not so much on the Sacrament of Orders as on the interior spirit. Le Exvile intérieur, remarks Sainte-Beuve, is simply the Dictaminus, the secret missal, the book dictated by the king and secretly venerated by Saint-Cyr. The clergy of France, taken by surprise, paid the expenses of the book but later ordered Sainte-Marthe's eulogy of Duguegier expunged from the "Gallia Christiana". (3) "Chaplet secret du très Saint-Sacrement" (Paris, 1632) a series of Quetist remarks on the attributes of Christ. This booklet, having become a kind of storm-centre, was rudely repudiated by Saint-Cyr who nevertheless wrote several tracts in its defence. (4) "Théologie familière" (Paris, 1642), a series of theologicaldevotional tracts, the Jansenists' catechism, teeming with errors on nearly every subject, condemned by the Holy Office, 23 April, 1654. (5) "Lettres chrétiennes et spirituelles" (Paris, 1645); another series (Paris, 1744). Bossuet calls them dry and over- theo- (spirituel et ècolomique). With the "Théologie familière" they exhibit a fair specimen of Saint-Cyr's galimatias and obscure asceticism. Saint-Cyr's writings were collected in his "Œuvres" (Lyons, 1679).

J. F. SOLLEIN.

DUVERNY, LUDGER, a French-Canadian journalist and patriot, b. at Verchères, Quebec, 22 Jan., 1799; d. 28 Nov., 1852. A printer by trade, he founded in succession at Three Rivers, Quebec, "La Gazette des Trois-Rivières" (1817), "Le Constitutionnel" (1823), and "L'Argus" (1826). In 1827, with A. N. Morin, he founded in Montreal "La Minerve", one of the prominent papers of French Canada. He was imprisoned (1832) for publishing with Dr. Daniel Tracey, editor of the "Vindicatore", against the arbitrariness of the Legislative Council. A medal was presented him in acknowledgment of his devotedness to the public good. Duverny's chief title to fame is the foundation of the Society of St. John the Baptist (1834). The choice of the Precursor for the patron saint of the French-Canadians accords with a time-honoured tradition mentioned in the Jesuit "Relations" (1846) as contemporary with the beginning of New France and inherited from the mother country. The maple leaf, now accepted by Canadians of every origin, was chosen as the national emblem and the motto adopted by Duverny was "Notre langue, nos institutions et nos lois". Elected for Lachenais in 1837, he was forced to leave the country for participating in the Canadian Rebellion, and he took up his residence at Burlington, Vermont, where he founded "Le Patriote Canadien" (1840). The union of the two Canadas having been voted by the British Parliament and the principle of representative government adopted, peace was restored and political exiles were allowed to return. Duverny began again the publication of "La Minerve", in which he extolled the introduction of responsible government, and criticized the Act of Union destined, by its authors, to absorb Lower Canada. LIONEL LINDSAY.

DYCK, ANTOON (ANTONIUS) VAN, usually known as SIR ANTHONY VAN DYCK, Flemish portrait-painter, b. at Antwerp, 22 March, 1599; d. in London, 9 December, 1641. This great painter was the seventh child of a family of twelve, being the son of Frans Van Dyck, painter in silk, linen, and kindred materials, and of Maria, daughter of Dirk Cyppers and Catherina Coninx. While still a boy he was placed, on the advice of Jan Brueghel, as a pupil in the studio of Hendrick Van Balen, who had been a pupil of Rubens. The young artist's development was rapid, for it is recorded that at the age of fourteen he painted a portrait of an old man, and a lawsuit in 1660 revealed the fact that he had also produced when quite a youth a series of heads exceedingly well painted. A proof of his skill is the fact that in 1618, before he was twenty, he was admitted to the freedom of the guild of St. Luke in Antwerp, an unusual distinction for a youthful painter. The tradition that Van Dyck was apprenticed to Rubens or was ever his pupil must be dismissed. Investigations have proved that he was regarded as a master from the time he was introduced to the studio of Rubens. Here Van Dyck made one of the group of young men who assisted the master in his decorative works, which it would have been quite impossible for him to complete by himself.

In 1630, at the request of the Countess of Arundel, Van Dyck appears to have come to England and to have received commissions from James I, for which he was paid in February, 1621. After executing these orders he returned to Antwerp and then determined to visit Italy, leaving in October, 1621, and remaining abroad for five years. He spent some time at Genoa, moved on to Rome, and then visited Florence; from there he went to Bologna, and later by way of Mantua to Venice. After this he was at Milan and finally in 1623 in Rome. The records of this journey remain in the famous "Chatsworth Sketch Book". His life in Rome was unsatisfactory, for he made many enemies, and soon left the Eternal City and settled in Genoa, where he was exceedingly popular. His portraits of the great nobility of Genoa rank among the finest in the world and form a magnificent and unrivaled series. In 1624 he visited Palermo, painting the portrait of Emmanuel of Savoy, Viceroy of Sicily, and some church pictures, but returned to Genoa and in 1626 left for Antwerp, probably on account of some complications with regard to the division of his father's estate. He visited Aachen and is believed to have gone on to Paris while tradition states that he made a second visit to England. However, nothing definite is known of his movements until 1630 when he was at The Hague, and shortly afterwards back in his native town. Another tradition, which speaks of the rivalry between Rubens and Van Dyck to be discredited. Mr. Lionel Cust and others have shown that the two painters were not only on terms of equality with regard to their art, but that a generous and cordial friendship existed between them.

In 1632 Van Dyck went again to England and was graciously received by Charles I. He presently had passed into the king's service immediately, as a warrant was issued on 21 May, 1632, for the payment of

DYMPHA

Dying, Prayers for the. See Death.

Dymoke, Robert, Confessor of the Faith, date of birth uncertain; d. at Lincoln, England, 11 Sept., 1550. He was the son of Sir Edward Dymoke (d. 1560) ofScrivelsby, Lincolnshire, hereditary King's Champion. In 1579 Dymoke received the martyr-priest, Blessed Richard Kirkman, at Scrivelsby, and maintained him as schoolmaster to his sons. He was himself, at the time, an occasional conformist to the State-religion but was reconciled in 1580 either by Kirkman or Bishop Bonner. In 1580, Dymoke and his wife, the Lady Bridget, eldest daughter and coheires of Edward Clinton, Earl of Lincoln, werededicted for hearing Mass and for recusancy. Though he was quite helpless owing to paralysis, Dymoke was ordered by Bishop Cooper of Lincoln to be carried to the end. He was much tormented in his last hours by the Protestant ministers who endeavoured to pervert him, and who, even when the dying man was half unconscious, refused to leave him in peace. He left several children. Edward, being more than twenty-one years of age at the time of his father's death.

BEDE CAMM.

DYMPHA (DIMPNA), Saint, virgin and martyr. The earliest historical account of the veneration of St. Dympna dates from the middle of the thirteenth century. Under Bishop Guy I of Cambrai (1238-47), Pierre, a canon of the church of St-Aubert at Cambrai, wrote a "Vita" of the saint, from which we learn that she had been venerated for many years in a church at Gheel (province of Antwerp, Belgium), which was dedicated to her. The author expressly states that he has drawn his biography from oral tradition. According to the narrative Dympna, the daughter of a pagan king of Ireland, became a Christian and was secretly baptized. After the death of her mother, who was of extraordinary beauty, her father desired to marry his own daughter, who was just as beautiful, but she fled with the priest Gerebernus and landed at Antwerp. In order to avoid being rescued by her husband, she was hidden in a cave and there was a chapel of St. Martin, beside which they took up their abode. The messengers of her father, however, discovered their whereabouts; the father betook himself thither and renewed his offer. Seeing that all was in vain, he commanded his servants to slay the priest, while he himself struck off the head of his daughter. The corpses were put in sarcophagi and entombed in a cave, where they were found later. The body of St. Dympna was buried in the church of Gheel, and the bones of St. Gerebernus were transferred to Xanten. This narrative is false, and the idea of being merely a variation of the story of the king who wanted to marry his own daughter, a motif which appears frequently in popular legends. Hence we can conclude nothing from it as to the history of St. Dympna and the time in which she lived. That she is identical with St. Damnata of Ireland cannot be proved. There are at Gheel fragments of two simple ancient sarcophagi in which tradition says the bodies of Dympna and Gerebernus were found. There is also a quadrangular brick, said to have been found in the so-called crypt of the sarcophagi, being one of the two relics of the saint, known as DYMPIA. The discovery of this sarcophagus with the corpse and the brick was perhaps the origin of the veneration. In Christian art St. Dympna is depicted with a sword in her hand and a fettered devil at her feet. Her day is January 15, under which date she is also found in the Roman martyrology.

From time immemorial, the saint was invoked as patroness against insanity. The Bollandists have published numerous accounts of miraculous cures, especially between 1604 and 1668. As a result, there has long been a colony for lunatics at Gheel; even now there are sometimes as many as fifteen hundred, whose relatives invoke St. Dympna for their cure. The insane are treated in a peculiar manner; it is only in the beginning that they are placed in an institution for observation; later they are given shelter in the homes of the inhabitants, take part in their agricultural labours, and are treated very kindly. They are watched without being conscious of it. The treatment produces good results. The old church of St. Dympna in Gheel was destroyed by fire in 1489. The new church was consecrated in 1501. In 1580, Dymoke and his wife, the Lady Bridget, eldest daughter and coheires of Edward Clinton, Earl of Lincoln, were indicted for hearing Mass and for recusancy. Though he was quite helpless owing to paralysis, Dymoke was ordered by Bishop Cooper of Lincoln to be carried to the end. He was much tormented in his last hours by the Protestant ministers who endeavoured to pervert him, and who, even when the dying man was half unconscious, refused to leave him in peace. He left several children. Edward, being more than twenty-one years of age at the time of his father's death.

J. P. KIRSCH.

Dynamism, a general name for a group of philosophical views concerning the nature of matter. However different they may be in other respects, all these views agree in making matter consist essentially of simple and indivisible units, substances, or forces. Dynamism is sometimes used to denote systems that admit not only matter and extension, but also determinations, tendencies, and forces intrinsic and essential to matter. More properly, however, it means exclusive systems that do away with the dualism of matter and force by reducing the former to the latter. Here we shall limit ourselves to this strict form of dynamism, first, indicating its chief advocates and its characteristic presentations, secondly, comparing these in order to see the points of agreement and of difference.

I. We have but a vague and incomplete knowledge of the doctrines held by the Panhellenistic School, but it seems that they may rightly be considered as at least the forerunners of modern dynamism. From Aristotle’s “Metaphysics” we gather that the Pythagoreans, imbued with a mathematical spirit and accustomed to mathematics in the sense, came to look upon the principles (AE2) of numbers as the principles of things themselves, to assert that the elements (E2E2) of numbers were also the elements of reality, and that the whole heaven was a harmony and a number. Various geometrical figures are but different combinations of the elements of number, and points are formed lines, from lines, surfaces, and from surfaces, solids; and geometrical figures are the very substance of things. Hence, finally, “physical bodies are composed of numbers”. Among the Arabian philosophers, the Mutacallimun were atomists. The atom is the only substance, and all atoms are perfectly identical in nature. The identity, however, is not of a positive, but of a merely negative character, for these primary elements of matter are simple substances and nothing else. They have no determinations whatsoever, no shape, no magnitude, no motion; they are in a suspended state, at rest, at zero, at infinity, and even at rest.

Leibniz’s doctrine is a reaction against both the materialism of Descartes and the substancial monism of Spinoza. The essence of matter cannot be extension. The laws of mechanics cannot themselves be understood without using the notion of force. Moreover, “a substance is a being capable of action” and “what does not act does not deserve the name of substance”. Hence substance implies unity and individuality, and the real substance cannot be the “material” atom (atome de matière). Having extension, such an atom is composed of parts and divisible without limit; it has no real unity. The elements which compose material substances are “formal” or “substantial” atoms (atomes de substance), simple and without parts. They are called monads. Bodies are “multitudes” and “aggregates”, and the simple substances are units and elements. As they have no parts, monads have “neither extension, nor shape, nor possible division by the two extremities of a line, a word, the elements of things.” Since it is impossible for two beings to be perfectly alike, every monad is different from every other. Monads have no external, but only an internal, activity, which is twofold: perception and apperception. All monads are, in various degrees, representatives of the whole universe, but this representation or perception becomes clearly conscious (apperception), and is accompanied with attention, memory, and reflection, only in higher monads. Apperception is the activity of the internal principle by which the perceiver passes from one perception to another.

The relative perfection of the monads depends on the degree of clearness of their perceptions. Some unite to form an organism whose centre of unity is a higher monad or soul. This system is completed by the Supposition of a pre-established harmony. The order and harmony of the world are not due to any real action between monads, but of a pre-arranged plan of the Creator who has endowed them with their power of internal evolution. In the main, Christian Wolff reproduced and systematized Leibniz’s theory.

According to Boscovich (q. v.) “the first elements of matter are points absolutely indivisible and without any extension. They are spread throughout an immense vacuum in such a way as to be always at some distance from one another. The distance may increase or decrease indefinitely, but can never disappear completely without a compenetration of the points themselves, for contact between them is impossible” (Theoria Philosophica Naturalis, no. 7). Hence there can be no continuous extension. The elements are all homogeneous, and, by their numbers, distances, and the arrangement of the material, they produce diversities of material substances. They have no perception and no appetite. According to their distances, they have a determination to diminish or to increase the interval that separates them. This very determination Boscovich calls force, attractive in the former case, repulsive in the latter. The law of these forces is the following: if the distance between them is infinitesimal, they are repulsive, and the more so in proportion as the distance is smaller; if the distance, although remaining always very small, is increased a little, they continue to attract until they are null, and at a still larger distance is changed into an attractive force. This attraction again, with the increase of distance, goes on augmenting, then diminishing, till it becomes again null, and changes into a repulsion, which, in turn, by the same gradual process, becomes attraction. Such changes may be repeated several times, but only while the distance, though increasing, remains infinitesimal. At greater distances the force is exclusively attractive. To explain the interaction of the points, Boscovich had to admit an octo to compose the space co-ordinates of Reality, no existence of a pre-established harmony and even of occasionalism.

In his pre-critical period, Kant admitted physical monads, that is, simple and indivisible substances. His later views may be summed up as follows: matter is divisible with limit, but not divisible into separate atoms. Matter is what fills up a space, and to fill up a space is to defend it against any mobile which should try to penetrate it. Hence matter is essentially resistance and force. It is not impenetrable, in the absolute or mathematical sense of the Cartesians, but in a relative sense and in varying degrees; it may be compressed and condensed. There are two distinct forces, repulsion and attraction. The former is the primary constituent of matter, since by it other things are excluded from the space it occupies. It produces extension, and, without it, matter would be reduced to a geometrical point. However, attraction is also essential to the occupancy of an assignable space, for otherwise matter would be scattered without limit. Repulsion can act only by contact; attraction may also act at a distance. From these two forces Kant derives the properties of matter. It is remembered that this theory is an explanation of the phenomenon only, the noumenon being inaccessible to our mind. This idealistic feature was carried still further by the German Transcendentalists; among them Schelling proposed a view in the main of which he agrees with that of Kant. In recent times,
DYNAMISM

Herbart, Lotze, von Hartmann, Repninouer, to mention only a few names among many, also hold dynamic theories modified by their special points of view and philosophical systems. To these may be added some Catholic philosophers, e.g. the Sulpician Branchereau, and the Jesuits Carbonnelle and Palmieri. Among scientific philosophers, Faraday is also in favour of dynamism. Faraday's theory is substantially the same as that of Boscovich. That theory, namely, that "atoms . . . are mere centres of forces or powers, not particles of matter in which the powers themselves reside, but have a great advantage over the most admitted anything," has," A materialist on the subject may consider it difficult to think of the powers of matter independent of a separate something to be called the matter, but it is certainly far more difficult, and indeed impossible, to think of or imagine that matter independent of the powers. Now the powers we know and recognize in every phenomenon of the creation, the abstract matter in none; why, then, assume the existence of that of which we are ignorant, which we cannot conceive, and for which there is no philosophical necessity?" (A Speculation touching Electric Conduction and the Nature of Matter, pp. 290, 291).

To-day there is a tendency to substitute the concept of energy for that of force. Hence Professor Ostwald's "energetic theory". Matter is to be looked upon as a combination of energy, according to which the concept of matter resolves itself into that of energy, since the manifestations of energy are all we know of the external world. Energy is the common substance, for it is that which exists in space and time; it is also the differentiating principle of whatever exists in space and time. Recent scientific discoveries, especially those in the field of radio-activity, seem to strengthen philosophical reason and lead to a more specific dynamism. The atom (q. v.) can no longer be considered as being what its name implies, namely indivisible. Atoms of different chemical elements are spheres of positive electrification enclosing a number of corpuscles, all homogeneous, having identical properties, and negatively electrified. Some physicists still attribute to these corpuscles a real, though infinitesimal, extension; they admit a nucleus or carrier of the electric charge, and this nucleus alone is what we call matter. But this is denied by others for whom the corpuscle contains nothing material in the sense in which we commonly use the term. It is all electricity and nothing but electricity. Indeed the only reason for supposing electricity as a material entity is that we can explain the phenomena of electricity by supposing the existence of two different kinds of electricity, positive and negative, and the forces act by virtue of their interplay and their mutual repulsion or attraction. The force of electricity is a force dependent on the presence of two electric bodies. In the case of the electric charges on the corpuscles of matter we cannot say that there is one electric charge on each corpuscle. It is evident that the creative power of matter is infinite and that all the phenomena of electricity are of infinite variety. For this reason the hypothesis of the existence of two electric charges on the corpuscles of matter is quite unfounded. The negative force of electricity is a force dependent on the presence of two electric bodies. In the case of the electric charges on the corpuscles of matter we cannot say that there is one electric charge on each corpuscle. It is evident that the creative power of matter is infinite and that all the phenomena of electricity are of infinite variety. For this reason the hypothesis of the existence of two electric charges on the corpuscles of matter is quite unfounded.

The modern school of materialism, however, is not so sanguine that it can rest content with the hypothesis of the existence of two electric charges on the corpuscles of matter. It is evident that the creative power of matter is infinite and that all the phenomena of electricity are of infinite variety. For this reason the hypothesis of the existence of two electric charges on the corpuscles of matter is quite unfounded.

Dysibod. See Dysibod, Saint.
Eadfrid, Bishop of Lindisfarne. See Cuthbert, Saint; Lindisfarne Gospels.

Eadmer, precentor of Canterbury and historian, b. 1064 (?); d. 1124 (?). Brought up at Christ Church, ab infantibus, he became after St. Anselm's consecration, in 1079, his intimate companion. After Anselm's death his chief occupation was writing. He had made notes of the saint's doings and discourses and of the affairs in which he had been engaged, and from these he compiled his chief works, the "Historia Novorum" and the "Vita S. Anselmi" (ed. M. Rule, 1884, in Rolla Series). Eadmer's "Opuscula" comprise verses on Sts. Dunstan and Edward, the lives of Sts. Wulfred, Odo, Dunstan, Oswald, Bregwin (printed in Wharton, Anglia Sacra). Of his theological works the most noteworthy is the "De conceptione Sanctae Marie", a tract of much importance for the development of the doctrine of the Immaculate Conception (see Thurston's ed., Freiburg, 1904, and "The Month", July and August, 1904, for the discussion of the date of his death). In 1121 he was elected to the See of St. Andrews, but in refusing to be ordained except by the Archbishop of York, he put an insuperable bar to his own promotion.

Notices of this important writer are found in all treatises on English and on ecclesiastical writers. Besides the works cited above, see: Liebert, Ueberzogene anglo-normannische Geschichtsquellen (Strasbourg, 1879); Ficq, Eadmer (Paris, 1893).

J. H. Pollen.

Eanbald, the name of two Archbishops of York.—

EANBALD I, date of birth unknown; d. 10 August, 796. Most of his life was probably spent in the monastery of York. As one of the officials in the monastery, he, conjointly with Alcuin, superintended the rebuilding of the minster. Albert, in his declining years, chose Eanbald to be his coadjutor and successor. He succeeded to the archiepiscopate in 782 (some say 778). His first care was to obtain the pallium and Alcuin went to Rome to bring it; on his return Eanbald was solemnly confirmed in his office. He lived in troublous times. Nevertheless Eanbald carried on the School of York and treasured its great library. In August, 791, he consecrated Baldulf Bishop of Whitermore. His last public act was on 25 June, 796, when he crowned Eardulf King of Northumbria. He died at the monastery of Edite or Edete. His body was taken to York and buried in the minster.

EANBALD II, date of birth unknown; died 810 or 812. He received his education in the famous School of York where he was Alcuin's pupil. On the death of Eanbald I he was chosen his successor. On 8 Sept., 797, having received the pallium from Rome, he was solemnly confirmed in the archiepiscopate.

He assisted Ethelard, Archbishop of Canterbury, to recover the prerogatives of which he had been dispossessed by Offa. In 798 he assembled his clergy in synod at Pinchheale (Finchale, near Durham) and there enacted a number of wise regulations relating to the ecclesiastical courts and the observance of Easter. Some think he was the author of a volume of decrees and that he was the first to introduce the Roman Ritual in the church of York.

Earth, Age of. See MAN.

Easter.—The English term, according to the Ven. Bede (De temporum ratione, i, 7), relates to Easter, a Teutonic goddess of the rising light of day and spring, which deity, however, is otherwise unknown, even in the Edda (Gimsoek, Mythol., 302); Anglo-Saxon, easter, edatron; Old High German, ëstra, ëstrara, ëstrara; Old German, Ostern. April was called easter-monath. The plural eastron is used, because the feast lasts seven days. Like the French plural Pâques, it is a translation from the Latin Festa Paschalis, the entire octave for Paschæ. The Greek call Easter the Ἑορταῖα, Good Friday the Ἑορταῖα ἑορτασμός. The respective names used by the Latins are Pascha resurrectionis and Pascha crucifixionis. In the Roman and Monastic Breviaries the feast bears the title Dominica Resurrectionis; in the Moscow Breviary, In Lectiones Domini Pascha Resurrectionis; in the Ambrosian Breviary, In Die Santo Pascha. The Romance languages have adopted the Hebrew-Greek term: Latin, Pascha; Italian, Pasqua; Spanish, Pascua; French, Pâques. Also some Celtic and Teutonic nations use it: Scotch, Pask; Dutch, Pasken; Danish, Paske; Swedish, Påsk; even in the German provinces of the Lower Rhine the people call the feast Païken not Oster. The word is, principally in Spain and Italy, identified with the word "solemnity" and extended to other feasts, e. g. Sp., Pascua florida, Palm Sunday; Pasqua de Pecesantes, Pentecost; Pasqua de la Natividad, Christmas; Pasqua de Epifania, Epiphany. In some parts of France also First Communion is called Pâques, whatever time of the year administered.

The Feast.—Easter is the principal feast of the ecclesiastical year. The order of Sundays from Septuagesima to the last Sunday after Pentecost, the feast of the Ascension, Pentecost, Corpus Christi, and all other movable feasts, from that of the Prayer of Jesus in the Garden (Tuesday after Septuagesima) to the feast of the Sacred Heart (Friday after the octave of Corpus Christi), depend upon the Eucharistic test for the everlasting slaying of the true Lamb of God and the Resurrection of Christ, the corner-stone upon which faith is built, it is also the oldest feast of the Christian Church, as old as Christianity, the connecting link between the Old and New Testaments. That the Apostolic Fathers do not mention a test that we first hear of it principally through the controversy of the Quartodecimans are purely accidental. The connexion between the Jewish Passover and the Christian feast of Easter is real and ideal. Real, since Christ died on the first Jewish Easter Day; Ideal, the connexion between type and reality, because Christ's death and Resurrection had its figures and types in the Old
Easter 225

Easter

law, particularly in the paschal lamb, which was slain towards evening of the 14th of Nisan. In fact, the Jewish passover had become an Easter celebration; the liturgy (Euzedal) sings of the passing of Israel through the Red Sea, the paschal lamb, the column of fire, etc. Apart, however, from the Jewish feast, the Christians would have celebrated the anniversary of the death and the Resurrection of Christ. But for such a feast it was necessary to know the exact calendar date of Christ’s death. To know this day was very simple for the Jews; it was the day after the 14th of the first month, the 15th of Nisan or their calendar. But in other countries of the vast Roman Empire, especially in a Sunday, etc. chronology. The Romans from 45 B.C. had used the reformed Julian calendar; there were also the Egyptian and the Ero-Macedonian calendar (see Calendar). The foundation of the Jewish calendar was the lunar year of 354 days, whilst the other systems depended on the solar year. Every fourth year of the Jewish system had an intercalary month. Since this month was inserted, not according to some scientific method of reconciling of solar and lunar years, but by command of the Sanhedrin, a distant Jewish date can never with certainty be transposed into the corresponding Julian or Gregorian date (Ideler, Chronologie, I, 570 sq.). The connexion between the Jewish and the Christian Pasch explains the movable character of this feast. Easter has not fixed date, like Christmas, because the 15th of Nisan of the Semitic calendar was shifting from date to date on the Julian calendar. Since Christ, the true Paschal Lamb, had been slain on the very day when the Jews, in celebration of their Passover, immolated the figurative lamb, the Jewish Christians in the Orient followed the Jewish method, and commemorated the death of Christ on the 15th of Nisan and His Resurrection on the 17th of Nisan, no matter on what day of the week they fell. For this observance they claimed the authority of St. John and St. Philip. In the rest of the empire another consideration predominated. Every Sunday of the year was a commemoration of the Resurrection of Christ, which had occurred on a Sunday. Because the Sunday after 14 Nisan was the historical day of the Resurrection, at Rome this Sunday became the Christian feast of Easter. Easter was celebrated in Rome and Alexandria on the first Sunday after the first full moon after the spring equinox, and the Roman Church claimed for this observance the authority of Sts. Peter and Paul. The same observance was followed in the rest of the Empire. Rome and Alexandria on 21 March. At Antioch Easter was kept on the Sunday after the Jewish Passover. (See Easter Controversy.) In Gaul a number of bishops, wishing to escape the difficulties of the paschal computation, seem to have assigned Easter to a fixed date of the Roman calendar, celebrating the death of Christ on 25 March, His Resurrection on 27 March (Marinus Dummiensis in P. L., LXXII, 47-51), since already in the third century 25 March was considered the day of the Crucifixion (Computus Pseudoopyriamanus, ed. Lewerentz, Conciliorium, 71). This practice was of short duration. Many calendars in the Middle Ages contain these same dates (25 March, 27 March) for purely historical, not liturgical, reasons (Grottofond, Zeitchreibung, II, 46, 60, 72, 106, 110, etc.). The Roman Church did not touch the old Easter date until after 6 April (Schmid, Osterfestberechnung in der abendländischen Kirche). The first Council of Nicaea (325) decreed that the Roman practice should be observed throughout the Church. But even at Rome the Easter term was changed repeatedly. Those who still followed the Church in the East and called Quartodecimans (14 Nisan) and were excluded from the Church (see Quartodecimans). The

computus paschalis, the method of determining the date of Easter and the dependent feasts, was of old a subject of important interest for the Church. (Cf. diff., 8, c. i) declares a priest unworthy of the name who does not know the computus paschalis. The movable character of Easter (22 March to 25 April) gives rise to inconveniences, especially in modern times. For decades scientists and other people have worked in vain for a simplification of the computus, assigning Easter to the first Sunday in April or to the Sunday nearest to the 7th of April. Some even wish to put every Sunday to a certain date of the month, e.g., beginning with Newport’s always (1921) S. L. Günther (in S. Wettall” (1903) sandhage and P. Dueren in “Pastor bonus” (Trier, 1906); C. Tondini, “L’Italia e la questione del Calendario” (Florence, 1905).]

The Easter Office and Mass.—The first Vespers of Easter are connected now with the Mass of Holy Saturday, because that Mass was formerly celebrated in the evening (see Holy Saturday); they consist of only one psalm (crvi) and the Magnificat. The Matins have only one Nocturn; the Office is short, because the clergy were busy with catechumens, the Office and the distribution of the Holy Eucharist, which were given plentifully by the rich on Easter Day. This peculiarity of reciting only one Nocturn was extended by some churches from the octave of Easter to the entire paschal time, and soon to all the feasts of the Apostles and similar high feasts of the entire ecclesiastical year. This observance is found in the German Breviaries far up into the sixteenth century (“Brev. Monaster.”, 1830; Bäumer, “Brevier”, 312). The octave of Easter ceases with None of Saturday and on Sunday the three Nocturns with the eleven psalms of the ordinary Sunday Office are recited. Many churches, however, during the Middle Ages and later (Brev. Monaster., 1830), on Low Sunday (“Dominica in Alba”) repeated the short Nocturn of Easter Week. Before the usus Romanae Curiae (Bäumer, Brev., 319) was spread by the Franciscans over the entire Church the eighteen (or twenty-four) psalms of the regular Sunday Matins were, three by three, distributed over the Matins of Easter Week (Bäumer, 301). This observance is still one of the peculiarities of the Carmelites Breviary. The simplified Breviary of the Roman Curia (twentieth century) established the custom of repeating Psalms I, II, III, every day of the octave. From the ninth to the thirteenth century, in most dioceses, during the entire Easter Week the two precepts of hearing Mass and of abstaining from servile work were observed (Keller, “Histoire, 17, 225). The observance of the orthodox observance established by the Church was two days (Monday and Tuesday), and, since the end of the eighteenth century, to Monday only. In the United States even Monday is no holiday of obligation. The first three days of Easter Week are doubles of the first class, the other days semi-doubles. During this week, in the Roman Office, through immemorial custom the hymns are omitted, or rather were never inserted. The ancient ecclesiastical Office contained no hymns, and out of respect for the great solemnity of Easter and the ancient jubilus “Hic Dies”, the Roman Church did not touch the old Easter Office by introducing hymns. Therefore to the present day the Office of Easter consists only of psalms, antiphons, and the great lessons of Matins. Only the “Victimae Paschali” was adopted in most of the churches and the usage spread by the Franciscan and Dominican. In the Ambrosian Office use the Ambrosian hymn “Hic est dies versus Dei” in Lauds and Vespers, the Monastic Breviary, “Ad conam Agni providi” at Vespers, “Chorus novus Jerusalem” at Matins, and “Aurora lucis rutilat” at Lauds. The Monastic Office at Lauds also contains the four-hour Office of the Western Church. Besides the hymns the chapter is omitted and the Little Hours have no antiphons; the place of the hymns, V.—15
chapters, and little responses is taken by the jubilant "Hec Dies quam fecit Dominus, exultemus et laetemur in eis". The Masses of Easter Week have a sequence of dramatic character, "Victimae paschali", which was composed by Wipo, a Burgundian priest at the courts of Conrad II and Henry III. The present Preface is abridged from the longer Preface of the Gregorian Sacramentary. The "Communio" and "Hanc igitur" contain references to the solemn baptism of Easter eve. To the "Benedicamus Domino" of Lauds and Vespers and to the "Ite Missa est" of the Mass two alleluias are added during the entire octave. The night of the Easter has a special hole. The old MS. Spanish missal of 855 contains three Masses for Easter Sunday; the Gallican missals have two Masses for every day of the week, one of which was celebrated at four in the morning, preceded by a procession (Migne, La Liturgie Catholique, Paris, 1863, p. 926). In the Gelasian Sacramentary, every day of Easter Week has its own Preface (Probat, Sacramentarien, p. 226).

To have a correct idea of the Easter celebration and its Masses, we must remember that it was intimately connected with the solemnity of the day. In the preparatory liturgical acts commenced the eve and were continued during the night. When the number of persons to be baptized was great, the sacramental ceremonies and the Easter celebration were united. The celebration was finished at a time when, the discipline having changed, every time the old traditions was lost. The greater part of the ceremonies was transferred to the morning hours of Holy Saturday. This change, however, did not produce a new liturgical creation adapted to the new order of things. The old baptismal ceremonies were left untouched and have now, apparently, no other reason for preservation than their antiquity. The gap left in the liturgical services after the solemnities of the night had been transferred to the morning of Holy Saturday was filled in France, Germany, and some other countries by a twofold new ceremony, which, however, was never adopted in Rome. First, there was the commemoration of the Resurrection of Christ. At midday, before Matins, the clergy in silence entered the dark church and removed the cross from the sepulchre to the high altar. Then the candles were lit, the doors opened, and a solemn procession was held with the cross through the church, the cloister, or cemetery. Whilst the procession moved from the altar to the door, the beautiful old antiphon, "Cum Rex gloriae Christus invenit debellaturus intraret, et chorus angelicus ante faciem ejus portas principium toliit precipiter, sanctorum populus, qui tenebatur in morte captivatus, voce laetabilis clamabat deoecena: Advenisti desiderabilis, quoniam tibi expectabat in tenebris, ut Rueres in nocte vinulates de clausuri. Te nostra vocabant suspiria, te largia required lamenta, tu factus es specteris, magna consolatio in tormentis. Alleluia.

When the procession returned, in many churches the "Attollite portas" (Ps. xxiii) was sung at the door, in order to symbolize the victorious entry of Christ into limbo and hell. After the procession Matins were sung. In later centuries the Blessed Sacrament took the place of the cross in the procession. This ceremony is also approved in the Holy See, as can be held in Germany on the eve of Easter with simpler ceremonies, in the form of a popular devotion. Second, the visitation of the Sepulchre. After the third lesson of the Nocturn two clerics, representing the holy women, went to the empty sepulchre where another woman, kneeling, recited to them that the Lord was risen. The two then brought the message to the choir, whereupon two priests, impersonating Peter and John, ran to the tomb and, finding it empty, showed to the people the linen in which the body had been wrapped. Then the choir sang the "Te Deum" and the "Victimae paschali". In some churches the apparition of Christ to Mary Magdalene was also represented. Out of this solemn ceremony, which dates back to the tenth century, grew the numerous Easter plays. (Nord-Amerikanisches Pastoralblatt, Oct. 1900, p. 118). The Easter plays in the beginning used only the words of the Goepels and the "Victime paschali" in the course of development they became regular dramas, in Latin or vernacular verses, which contained the negotiation between the vendor of segnute and the three women, the dialogue between Pilate and the Jews asking for soldiers to guard the Sepulchre, the contest of Peter and John running to the tomb, the risen Saviour appearing to Magdalene and the descent of Christ into hell. Towards the middle of the sixteenth century, these plays spread more and more in the world, and they were filled with long burlesque speeches of salve-dealers, Jews, soldiers, and demons (Creizenach, Gesch. des neuen Dramas, Halle, 1893). The procession combined with the solemn Second Vespers of Easter Sunday, which was now greatly varied in the manner of solemnizing these Vespers. The service commenced with the nine Kyrie Eleison, sung as in the Easter Mass, even sometimes with the corresponding trope lux aeterna boni. After the third psalm the whole choir went in procession to the baptismal chapel, where the fourth psalm, the "Victimae paschali", and the Magnificat were sung; thence the procession moved to the great cross at the entrance to the sanctuary (choir), and from there, after the fifth psalm and the Magnificat were sung, to the empty sepulchre, where the service was concluded. The Carmelites and a number of French dioceses, e.g. Paris, Lyons, Besançon, Chartres, Laval, have, with the permission of the Holy See, retained these solemn Easter Vespers since the re-introduction of the Roman Breviary. But they are celebrated on the sixth day of the Easter octave, and not solemnized in some churches. At Lyons the Magnificat is sung three times. In Cologne and Trier the solemn Vespers of Easter were abolished in the nineteenth century (Nord-Amerikanisches Pastoralblatt, April 1900, p. 118), and the commemoration of saints in Lauds, Mass, and Vespers from Wednesday in Easter Week and commemorations on the first three days of the week the Greek and Russian Churches transfer the occurring Offices (canons) of the saints from Matins to Commune during the entire octave, even the Easter Sunday after the Anti-pascha (Low Sunday), the canons and other canictures of Easter are continued in the entire Office up to Ascension Day, and the canons of the saints take only the second place in Matins. Also the Greeks and Rumanians hold the Vigil on Easter midnight, before Matins, during which they sing at the door of the church Ps. lxvii, repeating after each verse the Easter antiphon. When the processio leaves, the church is dark; when it returns, hundred of candles and coloured lamps as if merely to remove the splendour of Christ’s Resurrection. After Lunch all those who are present give each other the Easter kiss, not excluding even the beggar. One says: "Christ is risen!"; the other answers: "He is truly risen!" and these words are the Russians’ greeting during Easter. In Constantinople, on the influence of the Byzantine court, been adopted at Rome for a time. The greeting was: Surrere Dominus vere; R. Et apparuit Simoni. (Maximilianus, Prisc. Sax., Prælect. de liturg. Orient., i, 114; Martène, D.
The Armenian Church during the entire time from Easter to Pentecost celebrates the Resurrection alone to the exclusion of all feasts of the saints. On Easter Monday they keep all Souls' Day, the Saturday of the same week the Decollation of St. John, the third Sunday after Easter their Feast of the Holy Cross, and the Sunday after the Ascension of the Church in general, the fifth Sunday the Appearance of the Holy Cross at Jerusalem, then on Thursday the Ascension of Christ, and the Sunday after the feast of the great Vision of St. Gregory. From Easter to Ascension the Armenians never fast nor do they abstain from meat. To oblige the Church in general, the Sunday after the feast of the Holy Cross, a casket was given on which, while the Gospel was read, all the candles were piled. All these customs disappeared for obvious reasons (Kirchenlex., 1414).

5. On Easter Monday the women had a right to strike their husbands, on Tuesday the men struck their wives, as in December the servants scolded their masters. Husband and wife did this "ut ostendant seco mutuo debere corrigere, ne illo tempore alter ab altero thoro debitur exigat" (Beleth, c. 32, v. 63; Durandus, De hominum iuribus, 16, v. 86). In the northern parts of England the men parade the streets on Easter Sunday and distribute to the poor every coin from the ground, receiving in payment a kiss or a silver sixpence. The same is done by the women to the men on the next day. In the Neumark (Germany) on Easter Day the men servants whip the maid servants with switches on Easter Monday. They secure their release with Easter eggs. These customs are probably of pre-Christian origin (Reinsberg-Düringsfeld, Das festliche Jahr, 118).

6. The Easter Fire is lit on the top of mountains (Easter mountain, Osterberg) and must be kindled from new fire, drawn from wood by friction (nudger); this is a custom of pagan origin in vogue all over Europe, symbolizing the victory of spring over winter. The bishops issued severe edicts against the sacreligious Easter fires (Cone. Germanicum, a. 742, c. v; Council of Lestines, a. 743, n. 15), but did not succeed in abolishing them everywhere. The Church adopted the observance into the Easter ceremonies, referring it to the fiery column in the desert and to the Resurrection of Christ; the new fire on Holy Saturday is drawn from flint, symbolizing the Resurrection of the Light of the World from the tomb (Missale Rom.). In some places a figure was thrown into the Easter fire, symbolizing winter, but to the Christians on the Rhine, in Tyrol and Bohemia, Judas the traitor (Reinsberg-Düringsfeld, Das festliche Jahr, 112 sq.).

At Puy in France, at the beginning of the tenth century, it was customary, when the first psalm of Matins a canon was absent from the choir, for some of the canons and vicars, taking with them the processional cross and the holy water, to go to the house of the absentee, since the "Ic Dei Dies" sprinkled him with water, if he was still in bed, and lead him to the church. In punishment he had to give a breakfast to his conductors. A similar custom is found in the fifteenth century at Nantes and Angers, where it was prohibited by the diocesan synods in 1431 and 1448. In some parts of Germany and Saxony it is customary to surprise each other in bed on Easter morning to apply the health-giving switches (Freyde, Ostern in deutscher Sage, Suisse und Dichtung, 1893).

7. In both the Oriental and Latin Churches, it is customary to have those victuals which were prohibited during Lent by the priests before eating them on Easter Day, especially meat, eggs, butter, and cheese (Ritualbücher, Paderborn, 1904; Maximilianus, Liturg. or., 117). Those who ate before the food was blessed, according to popular belief, were punished by God, sometimes instantaneously (Migne, Liturgie, s. v. Pâques).

9. On the eve of Easter the homes are blessed (Rit. Rom., tit. 8, c. iv) in memory of the pasning of the angel in Egypt and the signing of the door-posta
with the blood of the paschal lamb. The parish priest visits the house of his parish; the pelapalpe aparts and all is bathed on this day. The room, however, in which the pope is found by the visiting cardinal is blessed by the pontiff himself (Moroni, Dizionario, s. v. Pasqua).

10. The Greeks and Russians after their long, severe Lenten Eastern Easter days, too, observe sports. At Constantinople the cemetery of Peri is the noisy rendezvous of the Greeks; there are music, dances, and all the pleasures of an Oriental popular resort; the same custom prevails in the cities of Russia. In Russia anyone can enter the bellies on Easter and ring the bells, a privilege of which many persons avail themselves.

FREDERICK G. HOLWECHE.

EASTER CONTROVERSY.—Ecclesiastical history preserves the memory of three distinct phases of the dispute regarding the proper time of observing Easter. It will add to clearness if we in the first place state what is certain regarding the date and the nature of these three controversies.

FIRST PHASE.—The first was mainly concerned with the lawfulness of celebrating Easter on a weekday. We read in Eusebius (Hist. Eccl., V, xxiii): "A question of no small importance, and even of the first rank. Theodosius, the successor of Constantine, fasted on that day, whatever day of the week it might happen to be. However it was not the custom of the churches in the rest of the world to end at this point, as they observed the practice, what is more, the apostolic tradition has prevailed in our present time, of terminating the fast on no other day than that of the Resurrection of our Saviour. Synods and assemblies of bishops were held on this account, and all with one consent through mutual correspond- ence drew up an ecclesiastical decree that the mystery of the Resurrection of the Lord should be celebrated on no other day but the Sunday and that we should observe the paschal fast on that day only." These words of the Father of Church History, followed by some extracts which he makes from the letters of the two Sts. Gregory and Basil, tell us all that we know concerning the paschal controversy in its first stage. A letter of St. Ireneus is among the extracts just referred to, and this shows that the diversity of practice regarding Easter had existed at least from the time of Pope Sixtus (c. 120). Further, Ignatius, when at St. John at Ephesus, writing to the Romans who, like the Greek-speaking Asians, kept Easter on the fourteenth day of the month, whatever day of the week that might be, following therein the tradition which he claimed to have derived from St. John the Apostle, came to Rome c. 150 and on a similar occasion but for his own church by Pope Anicetus to relinquish his Quattuordecim ob- servance. Nevertheless he was not debarred from communion with the Roman Church, and St. Ireneus, while condemning the Quattuordecim practice, never-

theless reproaches Pope Victor (c. 168-99) with having excommunicated the Asiatics too precipitately and for having followed the moderation of his prede- cesor. The question thus debated was therefore primarily whether Easter was to be kept on a Sunday, or whether Christians should observe the Holy Day of the Jews, the fourteenth of Nisan, which might occur on any day of the week. Those who kept Easter on the fourteenth of Nisan were called Quartodecimans or ηπαυτοί (observers); but even in the time of Pope Victor this usage hardly extended beyond the Churches of Asia Minor. After the pope's strong measures the Quartodecimans seem to have given up, but cannot be proved. Origen in the "Philosophumena" (VIII, xviii) seems to regard them as a mere handful of wrong-headed nonconformists.

SECOND PHASE.—The second stage in the Easter controversy centres round the Council of Nicaea (a. d. 325). Granted that the great Easter festival was al- ways to be held on a Sunday, and was not to be coincident with a particular phase of the moon, which might occur on any day of the week, a new dispute arose as to the determination of the Sunday itself. That is to say, was it the fourteenth or fifteenth day that was to be observed? The emperor himself, writing to the Churches after the Council of Nicaea, showed them to adopt its conclusion. Among other things: "At this meeting the question concerning the most holy day of Easter was discussed, and it was resolved by the united judgment of all present that this feast ought to be kept by all and in every place on one and the same day. . . . And first of all it appeared an unworthy thing that in the celebration of this most holy feast we should follow the practice of the Jews, who have impiously defiled their hands with enormous sin . . . for we have received from our Saviour a different way. . . . And I myself have undertaken that this decision should meet with the approval of your Sacralities in the hope that your Wisdoms will gladly admit that practice which is observed at one in the city of Rome and in Africa, throughout Italy and in Egypt. . . . with entire unity of judgment. . . . And from this, and other considerations, we have concluded that the Jewish calendar for its Easter. The Syrian Chris- tians always held their Easter festival on the Sunday after the Jews kept their Pasch. On the other hand at Alexandria, and seemingly throughout the rest of the Roman Empire, the Christians calculated the time of Easter for themselves, paying no attention to the Jews. In this way the date of Easter as kept at Alex- andria and Antioch did not always agree; for the Jews, upon whom Antioch depended, adopted very arbitrary methods of intercalating embolismic months (see Iren., Adv. Haer., IV, chap. 19, p. 520). In the year of Christ 1400, that is, 158 before the common era, before they celebrated Nisan, the first spring month, on the fourteenth day of which the paschal lamb was killed. In particular we learn that they had become neglectful (or at least the Christians of Rome and Alexandria declared they were neglectful) of the law that the fourteenth of Nisan must never precede the equinox (see Schwartz, Christ- liche und jüdische Ostertafeln, pp. 138 sqq.). Thus Constantine in the letter quoted above protests with horror that the Jews sometimes kept two Paschs in one year, meaning that two Paschs sometimes fell between the same days. The Alexandrians, on the other hand, accepted it as a principle that the Sunday to be kept as Easter Day must necessarily occur after the vernal equinox, then identified with 21 March of the Julian year. This
was the main difficulty which was decided by the Council of Nicea. Even among the Christians who calculated Easter for themselves there had been considerable variations (partly due to the difference of the lunar cycle adopted, partly to a divergent reckoning of the day of the Paschal missionaries, at last as late as 319, in the Council of Arles, it had been laid down that in future Easter should be kept _uno die et uno tempore per omnem orbem_, and that to secure this uniformity the pope should send out letters to all the Churches. The Council of Nicea seems to have extended further the principle here laid down. Alexandria was expressly as having not its exact words, but we may safely infer from scattered notices that the council ruled: (1) that Easter must be celebrated by all throughout the world on the same Sunday; (2) that this Sunday must follow the fourteenth day of the paschal moon; (3) that this moon was to be accounted the paschal moon whose fourteenth day followed the spring equinox; (4) that some provision should be made, probably by the Church of Alexandria as best skilled in astronomical calculations, for determining the proper date of Easter and communicating this determination. In 321 the Emperor Marcian in Migne, P. L., LIV, 1035. This ruling of the Council of Nicea did not remove all difficulties nor at once win universal acceptance amongst the Syrians. But to judge from the cases given in the Easter or the Resurrection Motions of Dionysius Exiguus (a. p. 541; see Hefele-Leclercq, "Concilii," I, 714), as also from the language of the Apostolic Constitutions and Canons (see Schmid, Osterfestfrage, p. 63), the Syrian bishops loyally co-operated in carrying into effect the decision of the Council of Nicea. In Rome and Alexandria the lunar cycles by which the occurrence of Easter was determined were not uniform. Rome, after the hundred-and-twelve-year cycle of Hippolytus, adopted an eighty-four-year cycle, but neither gave satisfactory results. Alexandria adhered to the calculation based on Meton. But it seems to be clearly established by the most recent researches (see Schwartz, op. cit., pp. 28-29) that the lunar cycles were never understood to be more than aids towards ascertaining the correct date of Easter, also that where the calculations of Rome and Alexandria led to divergent results, compromises were made upon both sides and that the final decision always lay with accepted ecclesiastical authority.

**Third Phase.**—It was to the divergent cycles which Rome had successively adopted and rejected in its attempt to determine Easter more accurately that the third stage in the paschal controversy was mainly due. The Roman missionaries coming to England in the time of St. Gregory the Great found the British Christians, the representatives of that Christianity which had been introduced into Britain during the period of the Roman occupation, still adhering to an ancient system of Easter-computation which Rome itself had laid aside. The British and Irish Christians were not Quartodecimans, as some unwarrantably accused them of being, for they did not agree with the decision of the Easter Sunday. They are supposed (e.g. by Krusch) to have observed an eighty-four-year cycle and not the five-hundred-and-thirty-two-year cycle of Victorius which was adopted in Gaul, but the most recent investigator of the question (Schwartz, p. 103) declares it to be impossible to determine what system they followed and himself inclines to the opinion that they derived their rule for the determining of Easter direct from Asia Minor. (See, however, the very opposite conclusions of Joseph Schmidt, "Die Osterfestberechnung auf der britischen Insel" (1), pp. 1-8.) The story of this controversy, which, together with the difference in the shape of tonsure, seems to have prevented all fraternization between the British Christians and the Roman missionaries, is told at length in the pages of Bede. The British appealed to the tradition of St. John, the Romans to that of St. Peter, both sides with little reason, and neither without the suspicion of forgery. It was not until the Synod of Whitby in 664 that the Christians of Northern Britain, who had derived their instruction in the Faith from the Scottish (i.e. Irish) Franciscans, led by St. Cuthbert and St. Wilfrid and through the example of King Oswy accepted the Roman system and came into friendly relations with the bishops of the South. Even then in Ireland and in parts of the North some years passed before the adoption of the Roman Easter became general (Morn, Tracts on the Origin, Development, and Discipline of the Early Irish Church, Dublin, 1864).

**Points of Obscurity.**—These are the facts regarding the Easter controversy which are now generally admitted. Many other subsidiary details have an important bearing on the case but are more matters of conjecture. There is, for example, the perplexing doubt whether the Crucifixion of Christ took place on the fourteenth or fifteenth of Nisan. The Synoptists seem to favour the latter, St. John the former date. Clearly we should expect to find that according to the account given to the foreigners, the position of Nisan, and also our data do not admit of a very positive answer. It has been very strongly urged that the writers of the first two centuries who speak of the Pasch have always in view τὸ χριστιανὴν πάσχαν, the Crucifixion Day, when Jesus Christ Himself was offered as the Victim, the antitype of the Jewish paschal lamb. Supporters of this opinion often contend that the Resurrection was held to be sufficiently commemorated by the weekly Sunday, on the vigil of which the night-watch was kept, the Liturgy being celebrated in the morning. In any case it must be remembered that in the New Testament we have definite mention of the observance of the Sunday, or "Lord's day", there is no conclusive evidence in the first century or more of the keeping of the Pasch as a festival. Some are inclined to think that the Christian Easter first appears as setting a term to the great paschal fast which, as we learn from Ireneus, was very variously kept in the sub-Apostolic Age. Another class of obscure and rather intricate questions, about which it is difficult to speak positively, regards the limits of the paschal period as laid down by the computation of Dionysius Exiguus and the Metonic cycle. In particular it seems that Rome, rejecting 22 March as the earliest possible date of Easter, only allowed the 23rd, while, on the other hand, the latest possible date according to the Roman system was 21 April. This sometimes brought about an impediment which was relieved only by accepting the Alexandrian solution. Other computations allowed Easter to fall between the fifteenth and twenty-first day of the paschal moon and others between the sixteenth and the twenty-second. What is perhaps most important to us is that both in the solution adopted in 525 and that officially put forward at the time of the reform of the calendar by Gregory XIII, this is, that the Church throughout held that the determination of Easter was primarily a matter of ecclesiastical discipline and not of astronomical science. As Professor De Morgan long ago clearly

recognized, the moon to which Easter is
calculated in the heavens nor even the
moon itself, i.e., a moon travelling with the average
motion of the real moon, but simply the moon of the
calendar. This calendar moon is admittedly a fiction,
though it departs very little from the actual astronomi-
cal facts; but in following the simple rule given for
the dependence of Easter upon the moon of the calen-
dar, uniformity is secured for all countries of the
world. According to this rule, Easter Sunday is the
first Sunday which occurs after the first full moon
(or more accurately after the first fourteenth day of
the moon) following the 21st of March. As a result,
the corresponding date of Easter is 22 March, the
last 25 April.

The bibliography of this subject is vast, and most ecclesiasti-
cal encyclopedias devote more or less space to it. For prac-
tical purposes the text and notes of Hefele-Leclercq, Concilien, 1,
153-151 and 430-488, supply all that is necessary; though Leclercq
refers to the article Comptus posched in the Dictionnaire
D'Arkeologie for fuller treatment.

Among the more important contributions to the subject the
following may be named: EISEMANN, Studien zur christlich-
mittellaterischen Chronologie (Leipzig, 1890); IDEM in Neues
Archiv fuer Lateinisches, 8 (1894), Chronologie des Mittelalters
der Neuzeit (Berlin, 1897), 110-165; SCHMID, Die Osterfeiertage
auf dem ersten allgemeinen Concil von Nidza (Vienna, 1868);
IDEIM in Neues Archiv fuer Lateinisches, 6 (1894), die christliche
Weihnachtsfeier im 3. Jahrhundert. (Munich, 1894); HILDENFELD,
Der Passionskreuz der alten Kirche (1896); and Osterfeiertage in
Oesterreich (Vienna, 1903) in the Abhandlungen der Göttingen
Academy: this is a work of the very highest importance;
SCHMID, Die Pass-
enschriften des 8. Jahrhunderts in Zeitschrift f. litteratur (1870);
DUCHE, Hist. Anc. de l'Eglise (Paris, 1906), I, 395-
396; and Mandell Creighton, History of the Christian
Church (9th ed., New York, 1883). See also the bibliography given under
CHRONOLOGY, GENERAL; and DOMINICAL LETTERS.

Eastern Churches.—I. Definition of an Eastern
Church.—An accident of political development
has made it possible to divide the Christian world,
in the first place, into two great halves, Eastern and
Western. The root of this division is, roughly and
broadly speaking, the division of the Roman Empire
in the time of Constantine. The Western Empire,
which was the continuation of the fourth century) or
been formed by schisms which in the first instance concerned Constantinople
rather than the Western world. Another distinction,
that can be applied only in the most general and
broadest senses, is that of language. Western Christendom
includes the Latin or Roman church; the Eastern,
which includes the four Patriarchates of Antioch, Bar-

tant bodies still bear unmistakably the mark of their
Latin ancestry. It was the great Latin Fathers and
Schoolmen, St. Augustine (d. 430) most of all, who
built up the traditions of the West; in ritual and canon
law the Latin is the Roman school. In the East, in
a still broader sense the East may be called Greek. True,
many Eastern Churches know nothing of Greek; the
oldest (Nestorians, Armenians, Abyssinians) have never
used Greek liturgically nor for their literature; never-
theless they too depend in some sense on a Greek tradi-

dation. Whereas our Latin Fathers have never con-
cerned them at all (most Eastern Christians have
never even heard of our schoolmen or canonists), they
still feel the influence of the Greek Fathers, their the-
ology is still concerned about controversies carried on
originally in Greek and settled by Greek synods. The
literature of those that do not use Greek is formed on
Greek models, is full of words carefully chosen or com-
pared to correspond to some technical Greek term,
even of Greek derivatives. The root of the distinc-
tion, then, in the broadest terms, is: that a Western
Church or Church body has originally been under
endon and an Eastern Church looks rather to
 Constantinople (either as a friend or an enemy) and
inherits Greek ideas.

The point may be stated more scientifically by us-
ing the old division of the patriarchates. Originally (e.g.
at the Council of Nicaea, A. D. 325, can. vi) there were
three patriarchates, those of Rome, Alexandria, and
Antioch. Further legislation formed two more at the
expense of Antioch: Constantinople in 381 and 451;
Jerusalem in 461. In any case the Roman patriarch-
ate was the one originally formed by the church of
Christendom may be defined quite simply as the Roman
patriarchate and all Churches that have broken away
from it. All the others, with schismatical bodies formed
from them, make up the Eastern half. But it must not be
implied that the Roman Church is the only Christian
Church. The Latin half was so (in spite of a few un-
important schisms) till the Reformation. To find a
time when there was one Eastern Church we must go
down to the centuries before the Council of Ephesus
(431). Since that council there have been separate
ecclesiastical Eastern Churches whose number has
grown steadily down to our own time. The Nestorian
heresy left a permanent Nestorian Church, the Mono-
physite and Monothelete quarrels made several more,
the reunion with Rome of fractions of every Rite fur-
ther increased the number, and quite lately the Bulgari-
ian schism has created yet another; indeed it seems
as if two more, in Cyprus and Syria, are being formed
at the present moment (1908).

We have now a general criterion by which to answer
the question: What is an Eastern Church? Looking at a map we see that, roughly,
the division between the Roman patriarchate and the others forms a line
that runs down somewhat to the east of the River
Vistula (Poland is Latin), then comes back above the
Danube, to continue down the Adriatic Sea, and fin-
ally even to Illyria (Dalmatia and Istria); and again by the
southern parts of Italy and Sicily (in
and Donia and Greece) once belonged to the Roman patri-
archate, and Greater Greece (Southern Italy and Sicily)
was intermittently Byzantine. But both these lands
eventually fell back into the branches that surrounded
them (except for the thin remnant of the Uniate
Greeks). We may, then, say that any ancient Church
east of that line is an Eastern Church. To these we
must add those formed by missionaries (especially
Russians) from one of these Churches. Later Latin
and Protestant missions have further complicated the
tangled state of the ecclesiastical East. Their ad-
herents everywhere belong of course to the Western
portion.

II. Catalogue of the Eastern Churches.—It is
now possible to draw up the list of bodies that answer
to our definition. We have already noted that they
are not all on one list; those who speak with each other,
or have they any common basis of language, rite, or
faith. All are covered by a division into the great
Orthodox Church, those formed by the Nestorian and
Monophysite heresies (the original Monotheletists are
now at Uniates), and finally 13 Patriarchates corre-
sponding in each case to a schismatical body, Theol-
obically, to Catholics, the vital distinction is between
Catholic Uniates, on the one hand, and schismatics or
So the Patriarchs of Antioch, Jerusalem (this was always a very small and comparatively unimportant centre), and Alexandria, losing most of their subjects, inevitably sank in power, and the demand of their lands completed their ruin, so that they became the merest shadows of what their predecessors had once been. Meanwhile Constantinople, honoured by the presence of the emperor, and always sure of his favour, rose rapidly in importance. It itself a nee Apostolic nor primitive (the first Bishop of Byzantium was Metropolis, in 325), it succeeded so well in its ambitious career that for a short time after the great Eastern schism it seemed as if the Patriarch of New Rome would take the same place over the Orthodox Church as the rival to the Pope over Catholics. It is also well known that it was this insatiable ambition of Constantinople that was chiefly responsible for the schism of the ninth and eleventh centuries. The Turkish conquest, strangely enough, still further strengthened the power of the Byzantine patriarch, inasmuch as the Turks acknowledged him as the civil head of what they called the "Roman nation" (Rum millet), meaning thereby the whole Orthodox community of whatever patriarchate. For about a century Constantinople enjoyed her power. But after many of them even came to spend their useles lives as ornaments of the chief patriarch's court, while Cyrus protested faintly and ineffectually that she was subject to no patriarch. The bishop who had climbed to so high a place by a long course of diplomatic and treachery could for a little time justify in the Orthodox world his usurped title of "Eumenical Patriarch." Then came his fall; since the sixteenth century he has lost one province after another, till now he is too only a shadow of what he once was, and the real power of the Orthodox body is in the hands of the Eastern patriarchates of Constantinople and their "holy Synods"; while high over all looms the shadow of Russia. The separation of the various national Orthodox Churches from the patriarchate of Constantinople forms the only important chapter in the modern history of this body. The principle is always the same. More and more has the idea obtained that political modifications should be followed by the Church, that is to say that the Church of an independent State must be itself independent of the patriarchate. This by a course of reason and logic could for a little time justify for the national Church; on the contrary, in each case the much severer rule of the Government is substituted for the distant authority of the Eumdenical Patriarch. Outside the Turkish Empire, in Russia and the Balkan States, the Orthodox Churches, have at various times, been independent, or against the Christian bodies. The process began when the great Church of Russia was declared autocephalous by the Czar Feodor Ivanovich, in 1589. Jeremias II of Constantinople took a tribute to acknowledge its independence. Peter the Great abolished the Russian patriarchate (of Moscow) and set up a "Holy Governing Synod" to rule the national Church in 1721. The Holy Synod is simply a department of the government through which the Czar rules to his Church as absolutely so over his army and navy. The independence of Russia and its Holy Synod have since been copied by each Balkan State. But this independence does not mean schism. Its first announcement is naturally very distasteful to the patriarch and his court. He often begins by excommunicating the new national Church root and branch. But in each case he has been obliged to give in finally and to acknowledge one more "Sister in Christ" in the Holy Synod that has displaced his authority. Only in the specially difficult and bitter case of the Bulgarian Church has a permanent schism resulted. Other causes have led to the establishment of a few other independent Churches, so that now the great Orthodox communion consists of sixteen independent Churches, each of which (except

---

**A. SCHISMATIC CHURCHES.**

1. The first of the Eastern Churches in size and importance is Erastian and serious in Church. This is, after that of the Catholics, considerably the largest body in Christendom. The Orthodox Church now counts about a hundred millions of members. It is the mass body of Eastern Christendom, that is faithful to the decrees of Ephesus and Chalcedon, who Nestorianism and Monophysitism cut away the national Churches in Syria and Egypt. It remained in union with the West till the great schism of Photius and then that of Cerularius, in the ninth and eleventh centuries. In spite of the short-lived reunions made by the Second Council of Lyons (1274) and the Council of Florence (1439), this Church has been in schism ever since. The "Orthodox" (it is convenient as well as courteous to call them by the name they use as a technical one for themselves) originally comprised the four Eastern patriarchates: Alexandria and Antioch, then Constantinople and Jerusalem. But the balance between these four patriarchates was soon upset. The Church of Cyprus was taken away from Antioch and made autocephalous (i.e. extra-patriarchal) by the Council of Ephesus (431). Then, in the fifth century, came the great upheaval of Nestorianism and Monophysitism, of which the result was that enormous number of Syrians and Egyptians fell into schism.
that of the Bulgars) is recognized by, and in communication with, the others.

These Churches are (1) The Great Church, that is, the patriarchate of Constantinople that takes precedence of all others. It is seated at Constantinople in Europe (except where its jurisdiction is disputed by the Bulgarian Exarch and Asia Minor. Under the Ecumenical Patriarch are seventy-four metropolitans and twenty other bishops. Outside this territory the Patriarch of Constantinople has no jurisdiction. He still bears the title of civil emperor throughout the Turkish Empire, and he still intermittently tries to interpret this as including some sort of ecclesiastical jurisdiction—he is doing so at this moment in Cyprus—but in modern times especially each attempt is at once met by the most pronounced opposition on the part of the other patriarchs and national churches, who answer that they acknowledge no head but Christ, no external authority but the seven Ecumenical Synods. The Ecumenical Patriarch, however, keeps the right of alone consecrating the patriarch, and sending to it the other Orthodox Churches, except in the cases of Russia and Romania, which prepare it themselves. Bulgaria gets hers from Russia. Greece has already morted the question of consecrating her own metropolitan, and there seems no reason that Antioch should go too when the present stock is exhausted. So even this shadow of authority is in a precarious state.

(2) Alexandria (covering all Egypt as far as it is Orthodox) with only four metropolitans. (3) Antioch, extending over Syria from the Mediterranean to the Euphrates as far as any Orthodox live so far East, touching the Great Church along the frontier of Asia Minor to the north and Palestine to the south, with twelve metropolitans and two or three titular bishops who form the patriarchal curia. (4) Jerusalem, consisting of Jerusalem, from the Egyptian frontier, with thirteen metropolitans. (5) Cyprus, the old autocephalous Church, with an archbishop [who was consecrated in 1908], after eight years, renews the whole Orthodox world and three suffragans. Then come the new national Churches, arranged here according to the date of their foundation, since they have no precedence. (6) Russia (independence since 1899). This is enormously the preponderating partner, about eight times as great as all the others put together. The Holy Synod consists of three metropolitans (Kiev, Moscow, and Peter and Paul), the Exarch of Constantinople, and five or six other bishops or archimandrites appointed at the Tsar's pleasure. There are eighty-six Russian dioceses, to which must be added missionary bishops in Siberia, Japan, North America, etc. (7) Carlovita (1765), formed of Orthodox Serbia in Hungary, with six suffragans seen. (8) Czernowitz (1763), the one independent diocese of the Black Mountain. (9) The Church of Sinai, consisting of one monasticery recognized as independent of Jerusalem in 1752. The hegumene is an archbishop. (10) The Greek Church (1890): thirty-two sees under a Holy Synod on the Russian model. (11) Hermannstädte (Nagyszombat, 1864), the Church of the Vlachs in Hungary, with three sees. (12) The Bulgarian Church under the exarch, who lives at Constantinople. In Bulgaria are eleven sees with a Holy Synod. The exarch, however, claims jurisdiction over all Bulgars anywhere (especially in Macedonia) and has set up rival exarchal metropolitans against the patriarchal ones. The Bulgarian Church is recognized by the Forte and by Russia, but is excommunicated by Rome. The Church in the Diaspora is considered schismatical by all Greeks. (13) Chersones (1873), for the Orthodox in Austria, with four sees. (14) Servia (1879), the national Church of that country, with five bishops and a Holy Synod. The Serbs in Macedonia are now agitating to add two more sees (Ushub and Mount) to the Church, at the further cost of Constantinople. (15) Rumania (1885), again a national Church with a Holy Synod and eight sees. (16) Herzegovina and Bosnia, organized since the Austrian occupation (1880) as a practically independent Church with jurisdiction over the latter as a titular primacy. It has four sees.

This ends the list of allied bodies that make up the Orthodox Church (see Forte, "Orthodox Eastern Church", x, 273-337). Next come, in order of date, the old heretical Eastern Churches.

2. The Nestorians are another and a pitiful remnant of what was once a great Church. Long before the heresy from which they have their name, there was a flourishing Christian community in Chaldees and Mesopotamia. According to their tradition it was founded by Adad and Mari, two of the seventy-two Disciples. The present Nestorians count Mar Mari as the first Bishop of Ctesiphon and predecessor of their patriarch. In any case this community was originally subject to the Patriarch of Antioch. As his vicar, the metropolitan of the two cities of Seleucia and Ctesiphon (on either side of the Tigris, north-east of Babylon) bore the title of cardinal. One of these metropolitans was present at the Council of Nicaea in 325. The great distance of this Church from Antioch led in early times to a state of semi-independence, too, when the present stock is exhausted. Presently the fourth century the Patriarch of Antioch waived his right of ordaining the cardinal of Seleucia-Ctesiphon, and allowed him to be ordained by his own suffragans. In view of the great importance of the right of ordaining, as a sign of jurisdiction throughout the East, this fact is important. But it does not seem that real independence of Antioch was acknowledged or even claimed till after the schism. In the fifth century the influence of the famous Theodore of Mopsuestia and that of his school at Edessa reached to the Tigris and beyond, with this extreme Eastern Church. Naturally, the later Nestorians deny that their fathers accepted any new doctrine at that time, and they claim that Nestorius learned from them rather than from them ("Nestorius soec estus est, non ipsa Nestorius", Ebed-Jem of Nishbat, about 1300). Arsemanii, "Bibl. Orient.", III, 1, 355). There may be truth in this. Theodore and his school had certainly prepared the way for Nestorius. In any case the rejection of the Council of Ephesus (431) by these Christians in Chaldees and Mesopotamia and of Pisa (1567) by the Church of Egypt and on the rest of Christendom. When Babesus, himself a Nestorian, became catholic, in 498, there were practically no more Catholics in those parts. From Ctesiphon the Faith had spread across the frontier into Persia, even beyond the city was conquered by the Persian king (224). The Persians of Osrhoene, then always depended on Ctesiphon and shared her heresy. From the fifth century this most remote of the Eastern Churches has been cut off from the rest of Christendom, and till modern times was the most separate and forgotten community of all. Shut out from the Roman Empire (Zeno closed the school of Edessa in 489), but, for a time at least, protected by the Persian kings, the Nestorian Church flourished around Ctesiphon, Nisibis (where the school was reorganized), and throughout Persia. Since the schism the Catholics occasionally assumed the title of patriarch. The Church then spread towards the East and sent missionaries to India and even China. A Nestorian inscription of the year 781 has been found at Singan Fu in China (J. Helver, S. J., "Prolegomena zu einer neuen Ausgabe der Nestorianischen Schriften", Orientalistincongresses: Vienna, 1886, pp. 37 sq.). Its greatest extent was in the eleventh century, when twenty-five metropolitans obeyed the Nestorian patriarch. But since the end of the fourteenth century it has gradually sunk to a very small sect, first, because of a fierce
persecution by the Mongols (Timur Leng), and then through internal disputes and schisms. Two great schisms as to the patriarchal succession in the sixteenth century; the text in part is lost. Notwithstanding, the Nestorian Church with Rome, forming the Uniat Chaldean Church. At present there are about 150,000 Nestorians living chiefly in highlands west of Lake Urmiah. They speak a modern dialect of Syriac (Maclean, "Grammar of the Dialects of Vernacular Syriac", Cambridge, 1892; Nolte, "Grammatik der neusyr. Sprache", 1865). The patriarchate descends from nephew to nephew, or to younger brothers, in the family of Mamma; each patriarch bears the name Simon (Mar Shimun) as a title. Ignoring the Second Great Schism, the Nestorians restored communion with the See of Antioch in the Third (Ephesus), they only acknowledge the First Niene (252). They have a Creed of their own (Hahn, "Bibliothek der Symbole", p. 74), formed from an old Antiochenes Creed, which does not contain any trace of the particular heresy from which their Church is named. Indeed it is difficult to say how far any Nestorians now are conscious of the particular teaching condemned by the Council of Ephesus, though they still honour Nestorius, Theodore of Mopoeustia, and other undoubted heretics as saints and doctors. The patriarch is a Coptic patriarch and descends from the last of theliste Silbermagl, "Verfassung", p. 267). Their hierarchy consists of the patriarch, metropolitans, bishops, chiroepiscopi, archdeaconesses, priests, deacons, subdeacons, and readers. There are also many monasteries. They use Syriac liturgically written in their own (Nestorian) form of the alphabet. The patriarch, who now generally calls himself "Patriarch of the East", resides at Kochan, a remote valley of the Kurdish mountains by the Zab, on the frontier between Persia and Turkey. He has an undefined political jurisdiction over his people, though he does not receive a 'bend' from the Sultan. In many ways this most remote Church stands alone; it has kept a number of curious and archaic customs (such as the perpetual abstinence of the patriarch, etc.) that separate it from other Eastern Churches almost as much as from those of the West. Lately the Archbishop of Canterbury's mission to the Nestorians has aroused a certain interest about them in England.

All the other separated Eastern Churches are formed by the other great heresy of the fourth century, Monophysitism, which split off the national Churches of Egypt, Syria, and Armenia.

3. The Copts form the Church of Egypt. Monophysitism was in a special sense the national religion of Egypt. As an extreme opposition to Nestorianism, the Egyptians believed it to be the true faith of their fathers. Cyprian of Carthage (d. 444) in his letter to Africanus, Diodoreus (444-55), was deposed and excommunicated by the Council of Chaledon (451). From his time the Monophysite party gained ground very quickly among the native population, so that soon it became the expression of the Egyptian feeling against the Empire (Melchite, or Melkite) garrison and government officials. Afterwards, at the Moslem invasion (641), the opposition was so strong that the native Egyptians threw in their lot with the conquerors against the Greeks. The two sides were represented by the native Monophysites and the Orthodox minority. The Monophysites are sometimes called Jacobites here as in Syria; but the old national name Copt (Gr. Κυριακιος) has become the regular one for their Church as well as for their nation. Their patriarch, who is elected for life, may better be kept for life, and was Timothy the Cat, a fanatical Monophysite. He lives at Cairo, ruling over thirteen dioceses (Silbermagl, p. 299) and about 500,000 subjects. For him, too, the law is perpetual abstinence. There are many monasteries. The Copts use their own language liturgically and have a long list of liturgical services, and the original Greek rite of Alexandria (St. Mark). But Coptic is a dead language, so much so that even most priests understand very little of it. They all speak Arabic, and their service books give an Arabic version of the Mass. The Copts of Cairo have been found schools and seminaries and generally to promote education and such advantages among their nation. One of these, M. Gabriel Labib, who is editing their service books, promises to be a scholar of some distinction in questions of liturgy and liturgy.

4. The Church of Abyssinia, or Ethiopia, always depended on Egypt. It was founded by St. Frumentius, who was ordained and sent by St. Athanasius in 326. So Abyssinia has always acknowledged the supremacy of the Patriarch of Alexandria and still considers its Church as a daughter-church of the See of St. Mark. The same causes that made Egypt Monophysite affected Abyssinia equally. She naturally, almost inevitably, shared the schism of the mother Church. So Abyssinia is also Monophysite, and acknowledges the title of Coptic patriarch over their local bishop of Abyssinia (there were once two) who is called Abuna (Our Father) and resides at Adeva (the old see was Axum). He is always a Coptic monk consecrated and sent by the Coptic patriarch. It does not seem, however, that there is now much communication between Cairo and Adeva, though the patriarch still has the right of deposing the Abuna. Abyssinia has about three million inhabitants, nearly all members of the national Church. There are many monks and an enormous number of priests, whom the Abuna ordains practically without any previous preparation or examination. The Abyssinians have liturgies, again, derived from those of Alexandria in the old (classical) form of their language. The Abyssinian Church, being the religion of a more than half barbarous people, cut off by the schism from relations with any other Christian body except the poor and backward Copts, is certainly the least representative of the great Christian family. The people have gradually mixed up Christianity with a number of pagan and magical elements, and are specially noted for strong Jewish tendencies among them. On their altars (in the place of the Covenant containing the Ten Commandments) Lately Russia has developed an interest in the Abyssinians and has begun to undertake schemes for educating them, and, of course, at the same time, converting them to Orthodox Christianity.

5. The Jacobites are the Monophysites of Syria. Here, too, chiefly out of political opposition to the imperial court, Monophysitism spread quickly among the native population, and here, too, there was the same opposition between the Syrian Monophysites in the country and the patriarchs in the cities. Severus of Antioch (512-18) was an ardent Monophysite. After his death the Emperor Justinian (527-65) tried to cut off the succession by having all bishops suspect of heresy locked up in monasteries. But his wife Theodora was herself a Monophysite; she arranged the coronation of two monks of that party, Theodore and James. It is from this James, called Zanzalos and Baradat (Jacob Baradat), that they have their name (iaqobo, "Jacobite"); it is sometimes used for any Monophysite anywhere, but had originally the Syrian Church. hp found two Coptic bishops, whom he ordained a whole hierarchy, including one Sergius of Tellia as Patriarch of Antioch. From this Sergius the Jacobite patriarchs descend. Historically, the Jacobites of Syria are the native Church of the country, as much as the Copts in Egypt; but they no longer form so exclusively the religion of the native popula-
tion. Syria never held together, was never so compact a unity as Egypt. We have seen that the Eastern Syrians expressed their national, anti-Imperial feeling by adopting the extreme opposite heresy, Nestorianism, which, however, had the same advantage of being regarded as the "Christian Pharaoh", the Syrians are divided amongst themselves. So there have always been many more Melkites in Syria, and the Jacobites were never an overwhelming majority. Now they are a small minority (about 80,000) dwelling in Syria, Mesopotamia, Kurdistan. Their head is the Jacobite Patriarch of "Antioch and all the East". He always takes the name Ignatius and dwells either at Diarbekir or Mardin in Mesopotamia. Under him, as first of the metropolitans, is the Maphrian, a prelate who was originally set up to rule the Eastern Jacobites as a Nestorian estabishment. The Maphrian had a number of special rights and privileges that made him almost independent of his patriarch. Now he has only precedence of other metropolitans, a few rights in connexion with the patriarch's election and (when the patriarch dies he is generally succeeded by the maphrian) and the title "Maphrian and Catholics of the East". Besides these two, the Jacobites have seven metropolitans and three other bishops. As in all Eastern Churches, there are many monks, from whom the bishops are always taken. The Syrian Jacobites are in communion with the Copts. They name the Coptic patriarch in the Liturgy, and the rule is that each Syrian patriarch should send an official letter to his brother of Alexandria to announce his succession. This implies a recognition of the Copts, in which is connected with the obedience of Alexandria over Antioch. At Mardin still linger the remains of an old pagan community of Sun worshippers who in 1762 (when the Turks finally decided to apply to them, too, the extermination that the Koran prescribes for pagans) preferred to hide under the outward appearance of Jacobite Christianity. They were, therefore, all nominally converted, and they conform to the laws of the Jacobite Church, baptize, fast, receive all sacraments and Christian burial. But they only marry among themselves and even observe that they have no pagan rites in secret. There are about one hundred families of these people, still called Shamansis (people of the Sun).

6. The Malabar Christians in India have had the strangest history of all these Eastern Churches. For having been Nestorians, they have now veered round to the other extreme and have become Monophysites. We hear of Christian communities along the Malabar coast (in Southern India from Goa to Cape Comorin) as early as the sixth century (Silbermig, op. cit., 317; see also Gurnan, "Die kirchliche Geschichte" quoted below). They claim the Apostle St. Thomas as their founder (hence their name "Thomas-Christs", or "Christians of St. Thomas"). In the first period they depended on the Catholicos of Seleucia-Ctesiphon, and were Nestorians like him. They are really one of the many missionary Churches founded by the Nestorians in Asia. In the sixteenth century the Portuguese succeeded in converting a part of this Church to reunion with Rome. A further schism among these Uniates led to a complicated situation, of which the Jacobite patriarch took advantage by raising a bishop to form a Jacobite Malabar Church. There were then three parties among them: Nestorians, Jacobites, and Uniates. The line of Nestorian metropolitans died out (it has been revived lately) and nearly all the non-Uniat Thomas-Christs may be counted as Monophysites since the sixteenth century. But the Jacobite patriarch seems to have forgotten them, so that after 1751 they chose their own hierarchy and were an independent Church. In the nineteenth century, after they had been practically rediscovered by the English, the Jacobites in Syria, through the influence of Rome, by sending out a metropolitan named Athanasius. Athanasius made a considerable disturbance, excommunicated the hierarchy he found, and tried to reorganize this Church in communion with the Syrian patriarch. But the Rayas of Transjordan, the side of the national Church and forced Athanasius to leave the country. Since then the Thomas-Christs have been a quite independent Church whose communion with the Jacobites of Syria is at most only theoretic. There are about 70,000 of them under a metropolitan, who calls himself "Bishop and Gate of all India". He is always named by his predecessor, i.e. each metropolitan chooses a coadjutor with the right of succession. The Thomas-Christs use Syriac liturgically and describe themselves generally as "Syrians". They are the most important of these Monophysite bodies. Although it agrees in faith with the Copts and Jacobites it is not in communion with them (a union arranged by a synod in 726 came to nothing) nor with any other Church in the world. This is a monophysite Church in the strict sense of the word: it does not accept the Nicene Creed, the doctrine of the two natures of Christ, and the form of baptism akin to that of "Orthodox" etc. Quite lately the Gregorian Armenians have begun to call themselves Orthodox. This has no meaning and only confuses the issue. Of course each Church thinks itself really Orthodox, and Catholic and Apostolic and Holy too. But one must keep technical names clear, or we shall always talk at cross purposes. The polite convention throughout the Levant is that we are Catholics, that people in communion with the "Oecumenical Patriarch" are Orthodox, and that Monophysite Armenians, Gregorians -and Syrians- are "Uniates". We have no honourable title to which we and the Orthodox do not of course think that they have really any right. They have no real right to it, because the Apostle of Armenia, St. Gregory the Illuminator (295), was no Monophysite, but a Catholic in union with Rome. The Armenian Church was in the first period subject to the Metropolitan of Cessrea; he ordained its bishops. It suffered persecution from the Persians and was an honoured branch of the great Catholic Church till the sixth century. Then Monophysitism spread throughout Armenia through St. Thomas the Apostle, and in 627 the Armenian primates, Nerses, in the Synod of Dvin, formally rejected the Council of Chalcedon. The schism became quite manifest in 552, when the primate, Abraham I, excommunicated the Church of Georgia and all others who accepted the decrees of Chalcedon. From that time the national Armenian Church has been isolated from the rest of Christendom; the continual attempt at reunion made by Catholic missionaries, however, have established a considerable body of Armenian Uniates. The Armenians are a proud and resolute people. They are not only an Armenian, but scattered all over the Levant and in many cities of Europe and America. As they always bring their Church with them, it is a large and important community, second only to the Orthodox in size among Eastern Churches. There are about three mil-
Eastern

ness of Gregorian Armenians. Among their bishops there is no title of patriarch. The first is the Patriarch of Constantinople, who is called Catholicos in Armenia, and in the West is called Patriarch of all the Greeks. Etchmiadzin is a monastery in the province of Erivan, between the Black and the Caspian Seas, near Mount Ararat (since 1528 Russian territory). It is the cradle of the race and the chief sanctuary; the Catholicos is the head of the Armenian Church and a great extent of his nation too. Before the Russian occupation of Erivan he had unlimited jurisdiction over all Gregorian Armenians and was something very like an Armenian pope. But since he sits under the shadow of Russia, and especially since the Russian occupation of the Armenian Church by a separate administration, the Armenians of Turkey have made themselves nearly independent of him. The second rank belongs to the Patriarch of Constantinople. They have had a bishop at Constantinople since 1007. In 1481, Mohammed II gave this bishop the title of Patriarch of the Armenians, so to rivet their loyalty to his capital and to form a millet (nation) on the same footing as the Rum millet (the Orthodox Church). This patriarch is the person responsible to the Porte for his race, has the same privileges as his Orthodox rival, and has a Ibid. other sees in Cilicia (a see kept after a temporary schism in 1440) and Jerusalem (whose title was assumed illegally in the eighteenth century). The Armenians have seven dioceses in the Russian Empire, two in Persia, and thirty-five in Turkey. They distinguish archbishops from bishops by an honorary precedence only and have an upper class of priests called vardapeds, who are celibate and provide all the higher offices (bishops are always taken from their ranks). There are, of course, as in all Eastern Churches, many monks. In many ways the Armenian (Gregorian) Church has been influenced by Rome, so that they are among Eastern schismatical bodies the only one that can be described as at all latinised. Examples of such influence are their use of unleavened bread for the Holy Eucharist, their vestments (the mitre is almost exactly the Roman one), etc. This appears to be the result of opposition to their nearer rivals, the Orthodox. In any case, at present the Armenians are more Catholic than the Eastern Church is, and this is disposed for reunion than any other of these communions. Their Monophysitism is now very vague and shadowy—as indeed is the case with most Monophysite Churches. It is from them that the greatest prospect of reunion with Rome is. This brings us to the end of the Monophysite bodies and so to the end of all schismatical Eastern Churches. A further schism was indeed caused by the Monothelite heresy in the seventh century, but the whole of the Church then formed (the Maronite Church) has been for many centuries re-united with Rome. So Maronites have their place only among the Uniates. We have, then, as schismatical Eastern Churches, first, the great Orthodox Church, then one Church formed by the Nestorians heresy and five as the result of Monophysitism (those of the Copts, Abyssinians, Jacobites, Malabar Christians, and Armenians). Corresponding to each of these is a Uniat Church, with one additional Uniat community (the Maronite).

B. Uniat Churches.—The definition of a Uniat is: a Christian of any Eastern rite in union with the pope: the Uniates of the West have always been the Eastern rite. They differ from other Eastern Christians in that they are in communion with Rome, and from Latins in that they have other rites. A curious, but entirely theoretical, question of terminology is: Are Chalices and Mozarabic Catholics Uniates? If we examine the title of the Bishop of Rome, he is a Pontifex Maximus, who presides over his Diocese Universal as the Latin Church. If some of those Eastern Churches fall into schism, that is a misfortune which does not affect the others who remain faithful. If all fall away, the Eastern half of the Church disappears for a time as an actual fact; it remains as a theory and is identified with the Church Universal as the Latin Church. If some of those Eastern Churches fall into schism, that is a misfortune which does not affect the others who remain faithful. If all fall away, the Eastern half of the Church disappears for a time as an actual fact; it remains as a theory and is identified with the Church Universal as the Latin Church. If some of those Eastern Churches fall into schism, that is a misfortune which does not affect the others who remain faithful. If all fall away, the Eastern half of the Church disappears for a time as an actual fact; it remains as a theory and is identified with the Church Universal as the Latin Church.
This is what has happened. There is at any rate no certain evidence of continuity from time before the splitting comes the Union Churches. Throughout the bad time, from the various schisms to the sixteenth and seventeenth centuries, there are traces, isolated cases, of bishops who have at least wished for reunion with the West; but it cannot be claimed that any considerable body of Eastern Christians have kept the union throughout. The Maronites think they have, but they are mistaken; the only real case is that of the Italo-Greeks (who have never been schismatic).

Really the Uniats Churches were formed by Catholic missionaries since the sixteenth and seventeenth centuries. They were persuaded to reunite with the West, the situation that had existed before the schism became an actual one again. They became Catholic; no one thought of asking them to become Latin. They were given bishops and patriarchs of their own as successors of the old Catholic Eastern bishops before the schism, and they became what all Eastern Christians had once been—Uniats. That the Uniats are comparatively small bodies is the unfortunate result of the fact that the majority of the countrymen prefer schisms. It is a matter of largely making the smaller ones. But, juridically, they stand exactly where all the East once stood, before the Greek schism, or during the short-lived union of Florence (1439—53). And they have as much right to exist and be respected as any of the great Christian churches of the East had during the first centuries. The idea of latinizing all Eastern Catholics, sometimes defended by people on our side whose zeal for uniformity is greater than their knowledge of the historical and juridical situation, is diametrically opposed to antiquity; to the Catholic system of ecclesiastical organization, and to the policy of all popes. Nor has it any hope of success. The East may become Catholic again; it will never be what it never has been—Latin.

1. The Byzantine Uniats are those who correspond to the Orthodox. They all use the same (Byzantine) Rite; but they are not all organized as one body. They form seven groups: (a) the Melkites in Syria and Egypt (about 110,000), under a Patriarch of Antioch who administers, and bears the titles of, Alexandria and Antioch. They have eleven dioceses and use Arabic liturgically with fragments of Greek, though any of their priests may (and some do) celebrate entirely in Greek. The old name "Melkite", which meant originally one who accepted the decrees of Chalcedon (and the imperial laws), as against the Jacobites, is now used for these Uniats.

(b) There are a few hundred Uniats of this Rite in Greece and Turkey in Europe. They use Greek liturgically and depend on Latin delegations at Constantinople and Athens.

(c) One Georgian congregation of Constantinople (a remnant of the old Georgian Church destroyed by Russia), who use their own language and obey the Latin Delegate.

(d) The Ruthenians, of whom there are nearly four millions in Austria-Hungary and hidden still in corners of Russia. They use Old Slavonic. 

(e) The Bulgarian Uniats (about 13,000), under two vicars Apostolic, who also use Old Slavonic.

(f) Rumanian Uniats (about a million and a half) in Rumania, but chiefly in Transylvania. They have four bishops and use their own language in the liturgy.

(g) The Italo-Greeks (about 50,000), a remnant of the old Church of Greater Greece. They are scattered about Calabria and Sicily, have a famous monastery near Rome (Grottaferrata) and colonies at Leghorn, Malta, Algiers, Maltes, and Corsica, besides a church (St.-Julien le Fauvre) at Paris. They use Greek liturgically, but, living as they do surrounded by Latins, they have considerably latinized their rites.

This completes the list of Byzantine Uniats, of whom it may be said that the chief want is organization among themselves. There has often been talk of restoring a Uniats Patriarchate of Constantinople. It is said that Pope Leo XIX intended to arrange this before he died. If such a revival ever is made, the patriarch would have jurisdiction, or at least a primacy, over all Catholics of his Rite; in this way the scattered units of Melkites in Syria, Ruthenians in Hungary, Italo-Greeks in Sicily, and so on, would be linked together as are all other Uniats.

2. The Chaldees are Uniats converted from Nestorianism. In the sixteenth and seventeenth centuries a complicated series of quarrels and schisms among the Nestorians led to Eastern Christians being divided into two parties, and then another party with the Holy See. Since then there has always been a Uniats Patriarch of the Chaldees, though several times the person so appointed fell away into schism again and had to be replaced by another. The Chaldees are said now to number about 70,000 souls (Silbermagl, op. cit., 354; but Wernher, "Orbis Terr. Cath.", 166, gives the number as 33,000). Their primate lives at Mosul, having the title of Patriarch of Babylon. Under him are two archbishoprics and ten other sees. There are missionaries in Italy, in Greece, in Africa, and in those of the Nestorians. The liturgical books (in Syriac, slightly revised from the Nestorian ones) are printed by the Dominicans at Mosul. Most of their canon law depends on the Bull of Pius IX, "Reversurus" (12 February, 1866). Some time was then promised to them, but it ended with the Chaldees by another Bull, "Cum ecclesiasticis" (31 August, 1869). They have some students at the Propaganda College in Rome.

3. The Uniats Coptes have had a vicar Apostolic since 1781. Before that (in 1442 and again in 1713) the Coptic patriarch had submitted to Rome, but in neither case was the union of long duration. As the number of Catholics of this Rite has increased very considerably of late years, Leo XIII in 1895 restored the Uniats patriarchate. The patriarch lives at Cairo and rules over about 20,000 Catholic Coptes.

4. The Abyssinians, too, had many relations with Rome in past times, and Latin missionaries built up a considerable Uniats Abyssinian Church. But repeated persecutions and banishment of Catholics prevented this Uniats Church from becoming a permanent one, with a regular hierarchy. Now the Abyssinian Government is tolerant, some thousands of Abyssinians are Uniats. They have an Apostolic vicar at Keren. If their numbers increase, no doubt they will in time be organized under a Uniats Abuna who should depend on the Coptic patriarch, of whom the Abyssinians are present in a state of disorganization. It seems that the Monophysite Abyssinian books will need a good deal of revision before they can be used by Catholics. Meanwhile the priests ordained for this rite have a translation of the Roman Missal in their own language, an arrangement that is not meant to be more than a temporary expedient.

5. The Catholic Syrian Church dates from 1781. At that time a number of Jacobite bishops, priests, and lay people, who had agreed to reunion with Rome, elected one Ignatius Giarre to succeed the dead Jacobite patriarch, George III. Giarre sent to Rome asking for recognition and a pallium, and submitting in all things to the pope's authority. But he was then deposed by those of his people who clung to Jacobitism, and a Jacobite patriarch was elected. From this time there have been two rival successions. In 1830 the Catholic Syrians were acknowledged by the Turkish Government as a separate millet. The Uniats patriarch lives at Beirut, most of his flock in Mesopotamia. Under him are three archbishoprics and six other bishoprics, five monasteries, and about 250 families.

6. There is also a Uniats Church of Malabar formed by the Synod of Diamper in 1599. This Church, too, has passed through stormy periods; quite lately, since
In considering their general characteristics we must first of all again separate the Uniates from the others. Uniates are Catholics, and have as much right to be so treated as Latins. As far as faith and morals go they must be numbered with us; as far as the idea of an Eastern Church may now seem to connoto schism or a nation of opposition, the Holy See treats the Uniates as strongly as we do. Nevertheless, their position is very important as being the result of relations between Rome and the East, and as showing the terms on which reunion between East and West is possible.

III. CHARACTERISTICS OF THE SCHISMATICAL EASTERN CHURCHES.

In these Churches there is no communion among themselves, and although many of them are bitterly opposed to the others, there are certain broad lines in which they may be classed together and contrasted with the West.

The first of these is their national feeling. In all these groups the Church is the nation; the vehement and often intolerant ardour of what seems to be their religious conviction is always really national pride and national loyalty under the guise of theology. This strong national feeling is the natural result of their political circumstances. In the fourteenth and fifteenth centuries, various nations have lived side by side and have carried on bitter opposition against each other in the Levant. Syria, Egypt, Mesopotamia, and the Balkans have never had one homogeneous population, and even now the Armenian Church in the fourteenth century of the Christian Era they began to accentuate their own nationalism, crushed in politics, by taking up an anti-imperial form of religion, by which they could express their hatred for the Government. Such an attitude has characterized these nations ever since. Under the Turk, too, the only possible separate organization was and is an ecclesiastical one. The Turk even increased the confusion. He found a simple and convenient way of organizing the subject Christians by taking their religion as a basis. So the Porte recognized each sect as an artificial nation (millet). The Orthodox Church became the "Roman nation" (Rum millet), inheriting the name of the old Empire. Then there were the "Armenian nation" (Ermeni millet), the "Coptic nation", and so on. Blood has nothing to do with it. All that matters is that the Orthodox Church becomes a Roman and is submitted politically to the ecumenical patriarch; a Jew who is converted by Armenians becomes an Armenian. True, the latest development of Turkish politics has modified this artificial system, and there have been during the nineteenth century repeated attempts to set up one great Ottoman nation. But the effect of centuries is too deeply rooted, and the opposition between Islam and Christianity too great, to make this possible. A Mohammedan in Turkey, whether Turk, Arab, or Kurd, is a Mohammedan, and the Christian, whether Armenian, or Maronite, etc. Our Western idea of separating politics from religion, of being on the one hand loyal citizens of our country and on the other, as a quite distinct thing, members of some Church, is unknown in the East. The millet is what matters; and the millet is a religious body. So obvious does this identification seem to them that till quite lately they applied it to us. A Catholic was (and still is) to the more remote and ignorant people a "French Christian", a Protestant an "English Christian"; in speaking French or Italian, Levantines constantly use the word nation for religion. Hence it is, also, that there are practically no conversions from one religion to another. Theology, dogma, or any kind of religious conviction counts for little or nothing. A man
keeps to his millet and hotly defends it, as we do to our atherlands; for a Jacobite to turn Orthodox would be like a Frenchman turning German.

We have noted that religious conviction counts for little. It is hard to say how much any of these bodies (Nestorian or Monophysite) are now even conscious of what they are, or think that the cardinal issue is their schism. The bishops and more educated clergy have no doubt a general and hazy idea of the question—Nestorians think that everyone else denies Christ’s real manhood, Monophysites that all their opponents “divide Christ”. But what stirs their enthusiasm is not the metaphysical but the emotional, that what the church believes is the faith of their fathers, the heroes of their “nation” who were persecuted by the other millets, as they are to-day (for there everyone thinks that everyone else persecutes his religion). Opposed to all these little millets (plural of millet) there looms, each decade mightier and more dangerous, the West, Europe, Frangistan (of which the United States, of course, forms part to them). Their lands are overrun with Frangis; Frangi schools tempt their young men, and Frangi churches, with eloquent sermons and attractive scenes, draw them to women. They even suspect the second assiduously; for the Levantine has discovered that arithmetic, French, and physical science are useful helps to earning a good living. But to accept the Frangi religion means treason to their nation. It is a matter of life and death to them, as there are Catholic, Protestant, those are our millet; but an Armenian, a Copt, a Nestorian does not become a Frangi. Against this barrier argument, quotation of Scripture, texts of Fathers, accounts of Church history, break in vain. Your opponent listens, is perhaps even mildly interested, and then goes about his business as before. Frangis are very clever and learned; but of course he is an Armenian, or whatever it may be. Sometimes whole bodies move (as Nestorian dioceses have lately begun to coquet with Russian Orthodoxy), and then every member moves too. One claves to one’s millet whatever it does. Certainly, if the heads of any body can be persuaded to accept reunion with Rome, the rank and file will make no difficulty, unless there be another party strong enough to proclaim that those heads have deserted the nation.

The second characteristic, a corollary of the first, is the intense conservativeness of all these bodies. They cling fanatically to their rites, even to the smallest custom—because it is by these that the millet is held together. Liturgical language is the burning question in the Balkans; in all Orthodox Church there are various millets—Bulgars, Vlachs, Serbs, Greeks, whose bond of union is the language used in church. So one understands the uproar made in Macedonia about language in the liturgy; the revolution among the Serbs of Uzun in 1898, when their new metropolitan celebrated in Greek (Orth. Eastern Church, 328); the ludicrous scandal at Monastir, in Macedonia, when they fought over a dead man’s body and set the whole town ablaze because some wanted him to be buried in Greek and some in Rumanian (op. cit. 1898). The fear of the great and disastrous schism at Antioc, is simply questions of the nationality of the clergy and the language they use.

It follows then that the great difficulty in the way of reunion is this question of nationality. Theology counts for very little. Creeds and arguments, even when they are disputes of great moment, to make much of them, are really only shibboleths, convenient expressions of what they really care about—their nation. The question of nature and person in Christ, the Filioque in the Creed, asyname, and so on do not really stir the heart of the Eastern Christian. But he will not become a Frangi. Hence the importance of the Uniat Churches. Once for all these people will never become Latins, nor is there any reason why they should. The wisdom of the Holy See has always been to restore union, to insist on the Catholic Faith, and for the rest to leave each millet alone with its own native hierarchy, its own language, its own rites. When this is done we have a Uniat Church.

IV. ROME AND THE EASTERN CHURCHES.—The attempts at reunion date from after the schism of 1054, when the Cardinal Isidore of Rome made little concern about the older Nestorian and Monophysite schisms. The conversion of these people might well be left to their neighbours, the Catholics of the Eastern Empire. Naturally, in those days the Greeks set about this conversion in the most disastrous way possible, in the conviction that what they had to offer was so attractive that it would convert them back along the most impossible line, by destroying their nationality and centralizing them under the patriarch of the imperial city. And the means used were, frankly and cruelly, persecution. Monophysite conventicles were broken up by imperial soldiers, Monophysite bishops banished or executed. Of course this confirmed their hatred of Cesar and Cesar’s religion. The East, before as well as after the great schism, did nothing towards pacifying the schismaticas at its gates. Only quite lately has anything been done by the Roman Pope in an attempt to reconcile the schismaticas with the rest of the Western Catholic Church. It was in 1895 that the Pope and Patriarch of Constantinople treated with a view to reunion. The Second Council of Lyons (1274) and the Council of Ferrara-Florence (1438-39) were the first efforts on a large scale. And at Florence were at least some representatives of all the other Eastern Churches; as a kind of supplement to the great affair of the Eastern reunion with them was considered too. None of these reunions were successful. Nevertheless they were, and they remain, important facts. They (the union of Florence especially) were preceded by elaborate discussions in which the attitudes of East and West, Orthodox and Catholic, were clearly compared. Every question was examined—the primacy, the Filioque, asyname bread, purgatory, celibacy, etc. The Council of Florence has not been forgotten in the East. It showed Eastern Christians what the conditions of reunion are, and it left them always conscious of the difference and is greatly desired by Rome. And on the other hand it remains always as an invaluable precedent for the Roman Court. The attitude of the Holy See at Florence was the only right one: to be quite unswerving in their attitude to the great Church outside the Orthodox Church. In everything else that possibly can be reconciled. There is no need of uniformity in rites or in canon law: as long as practices are not absolutely bad and immoral, each Church may work out its own development along its own lines. Customs that would not suit the West may suit the East very well; and we have no right to quarrel with such customs as long as they are not forced upon us. So, at Florence, in all these matters there was no attempt at changing the old order. Each Church was to keep its own liturgy and its own canon law as far as that was the case of the Bulgarians or the Serbs, which is de fide. The very decree that proclaimed the primacy added the clause, that the pope guides and rules the whole Church of God “without prejudice to the rights and privileges of the other patriarchs”. And the East was to keep its married clergy and its levirates, to make not the Filioque in the Creed, nor use solid statues, nor do any of the things they resent as being Latin. This has been the attitude of Rome ever since. Many popes have published decrees, Encyclicals, Bulls that show that they have never forgotten the venerable and ancient Churches cut off from us by these schisms; in all these documents consistently the tone and attitude are the same. If there has been any latinizing movement among Uniates, it has sprung up among themselves; they have
oasionally been disposed to copy practices of the far

recter and mightier Latin Church with which they are

united. But all the Roman documents point the other

way, and the Kopto-Syriac Armenians, Nazorians, or

forbidden, it is because they were obviously abusers

of sacred things by the Maronite Synod of 1736. "True

ligature books have been altered in places; true

also that in the West these corrections were made

times by well-meaning officials of Propaganda whose

ligature knowledge was not equal to their pious

But in this case, too, the criterion was not conformity

with the Roman Rite, but purification from supposed

errors even by a body of their own Rite. The

Maronit Rite is so Latinized is due to its own

clergy. It was the Maronites themselves who insisted

on using our vestments, our borne bread, our Com-
munion under one kind, till these things had to be

recognized, because they were already ancient customs

to them prescribed by the use of generations.

A short survey of papal documents relating to

the Eastern Churches will make these points clear.—Be-

fore Pius IX, the most important of these documen-
tioned was Benedict XIV’s Encyclical “Allate sunt” of 2

July 1743, in which he confirmed the liturgies of

his predecessors who had already cared for the

Eastern Churches and their rites. He mentions acts

of Innocent III (1198-1216), Honorius III (1227-27),

Innocent IV (1243-54), Alexander IV (1254-61),

Gregory IX (1227-41), and Clement IV (1265-78) and

Leo X (1513-21), Clement VII (1523-

34), Pius IV (1559-65), all to this effect. Gregory

XIII (1572-85) founded at Rome colleges for Greeks,

Maronites, Armenians. In 1602 Clement VIII publi-

ished a decree allowing Ruthenian priests to celebrate

their rites in Latin churches. In 1624 Urban VIII for-

maded Ruthenians to become Latin, and Clement

IX, in 1669, published the same order for Uniat Ar-

menians (Allate sunt, 1). Benedict XIV not only

quotes these examples of former popes, he confirms

the same principle by new laws. In 1742 he re-

established the Ruthenian Church with the Byzan-
tine Rite after the national Council of Zamosc, con-

firming the same laws of Clement VIII in 1596. When

the Melkite Patriarch of Antioch wanted to change

the use of the Presanctified Liturgy in his Rite, Benedict

XIV prohibited this in 1744 and on the same prin-

ciple that the Church must be kept unaltered, and your priests

must be made to follow them” (Bullarium Ben. XIV.,
Tom. 1). He orders that Melkites who, for lack of a
priest of their own Rite, had been baptized by a Latin, should
not be considered as having obtained a Latin Rite, and
forbid absolutely that any Catholic Melkites who follow
the Greek Rite should pass over to the Latin Rite”

(5, cap. xviii). The Encyclical “Allate sunt” forbids
missionsaries to convert schismatics to the Latin

Rite; when they become Catholics they must join the

Corresponding Uniat Church (XIV). In the Bull “Eti

pastoralis” (1742) the same pope orders that there

shall be no precedence because of Rite. Each priest

shall have rank according to his own position or the

data of his ordination; in mixed dioceses, if the bishop

is Latin (as in Southern Italy), he is to have at least

one rank more than the Catholic (XII).

Most of all did the last two popes show their con-

cern for Eastern Christendom. Each by a number of

Acts carried on the tradition of conciliation towards

the schismatical Churches and of protection of Uniat

Rites. In 1728 the Synod of the Holy Synod in

Epaphia (1748), again assures non-Uniates that “we

will keep unchanged your liturgies, which indeed we

graciously honour”; schismatic clergy who join the

Catholic Church are to keep the same rank and posi-

tion as they had before. In 1833 the Uniat Rumen-

ians were to be received as teaching the Catholic

Doctrine on that occasion, as well as in the one

to the Armenians on 2 February, 1854, he again in-

sists on the same principle. In 1860 the Bulgars,

dissuaded with the Phanar (the Greeks of Constantin-

opole), approached the Patriarch of Constantinople,

Hassan; he, and the pope confirming him, promised

that there should be no latinizing of their Rite.

Pius IX founded, 6 January, 1862, a separate depart-

ment for the Oriental Rites as a special section of the

great Propaganda Congregation. Leo XIII in 1888

wrote a letter to the Armenians (Paterna charter) in

which he exhorts the Gregorians to reunify, always on

the same terms. But his most important act, per-

haps the most important of all documents of this kind,

is the Encyclical “Orientale dignitas ecclesiaria” of

30 November, 1894. In this letter the pope reviewed

and confirmed all similar acts of his predeces-

sors and then strengthened them by yet severer laws

against any form of latinizing the East. The first

part of the Encyclical quotes examples of the care

of former popes for Eastern Rites, especially of Pius IX;

Pope Leo remembers also what he himself has already

done for the same cause—the foundation of colleges at

Rome, Philippopolis, Adrianople, Athens, and St. Ann

at Jerusalem. He again commands that in these col-

leges students should be exactly trained to observe their

own rites. He regards these liturgies as representing most ancient and sacred

traditions, and quotes again the text that has been

used so often for this purpose, circumspecta varietate

applied to the queen, who is the Church (Ps. xiv, 10).

The Constitutions of Benedict XIV against latinizers

are confirmed; new and most severe laws are promul-

inated: any missionary who tries to persuade a Uniat

to join the Latin Rite is ipso facto suspended, and is to

be expelled from his place. In colleges where boys of

different Rites are educated there are to be priests of

each Rite to administer the sacraments. In case of

need one may receive a sacrament from a priest of

another Rite; but for Communion it should be, if possible,

at least who use the same kind of bread. No

length of use can prescribe a change of Rite. A

woman in marrying may conform to her husband’s

Rite, but if she becomes a widow she must go back to

her own.

In the Encyclical “Praedara gratulationis”, of 20

June, 1894, that has been often described as “Leo

XIII’s testament”, he again turned to the Eastern

Churches and invited all to this gentleness as the

gentlest way to come back to communion with us. He

assures schismatics that no great difference exists

between their faith and ours, and repeats once more

that he would provide for all their customs without

undergraduate examinations (Orth. Eastern Church, 4, 432). It was this letter that called forth the unadorned, offensive

answer of Anthimos VII of Constantinople (op. cit.,

435-438). Nor, as long as he lived, did Leo XIII cease

crushing for Eastern Churches. On 11 June, 1895,

he wrote the letter “Unitas christiana” to the Copts,

and on 24 December of the same year he restored the

Uniat Coptic patriarcathe. Lastly, on 19 March,

1895, in a motu proprio, he again insisted on the rever-

dence due to the Eastern Churches and explained the

duties of Latin delegates in the East. As a last ex-

ample of all, Pius X in his Allocution, after the now

famous celebration of the Byzantine Liturgy in his

presence on 12 February, 1908, again repeated the

same declaration of respect for Eastern rites and cus-

toms and the same assurance of his intention to pre-

serve them (Echos d’Orient, May, 1908, 129-31). Indeed this spirit of conciliatory

-mindedness is in our own time growing steadily at Rome with the

increase of liturgical knowledge, so that there is

reason to believe that whatever unintentional mis-

takes have been made in the past (chiefly with regard

to the Maronite and Uniat Armenian rites) will now

gradually be corrected, and that the tradition of the

most entire acceptance and recognition of other rites
in the East will be maintained even more firmly than in the West.

On the other hand, in spite of occasional outbursts of anti-papal feeling on the part of the various chiefs of these Churches, it is certain that the vision of unity is beginning to make itself seen very widely in the East. In the first place, education and contact with Western Europeans inevitably breaks down a great part of the old prejudice, jealousy, and fear of us. It was a Latin missionary who said lately: "They are finding out that we are neither so vicious nor so clever as they had thought. And with this intercourse grows the hope of regeneration for their own nations by the Church of the East. Once they realize that they do not want to eat them up, and that their milk is safe, whatever happens, they cannot but see the advantages we have to offer them. And with this feeling goes the gradual realization of something larger in the way of a Church than their own milal. Hitherto, it was difficult to say what the various Eastern schismatics understood by the "Catholic Church" in the creed. The Orthodox certainly always mean their own communion only ("Orth. Eastern Church", 366-370); the other smaller bodies certainly hold that they alone have the right to be called one Church; every one else—especially the Latins—is a heretic. So, presumably, for them, too, the Catholic Church is only their own body. But this is passing with the growth of more knowledge of other countries and a juster sense of perspective. The Nestorian Church is now at a map of the world can hardly be seen on believing that his sect is the only and whole Church of Christ. And with the apprehension of larger issues there comes the first wish for reunion. For a Church consisting of mutually excommunicate bodies is a monstrosity that is rejected by everyone (except perhaps some Armenians) in the East.

The feeling out towards the West for sympathy, help, and perhaps eventually communion, is in the direction of Catholics, not of Protestants. Protestantism is too remote from all their theology, and its principles are too destructive of all their system for it to attract them. Harnack notes this of Russians: that their more friendly feeling towards the West tends Romeward, not in an Evangelical direction (Reden und Aufsätze, II, 279); it is at least equally true of other Eastern Churches. When the conviction has spread that they have everything to gain by becoming again members of a really universal Church, that union with Rome means all the advantages of Western ideas and a sound theological position, and that, on the other hand, it leaves the national milal untouched, and on the stronger and more powerful an alliance, then indeed the shadowy and remote issues about nature and person in Christ, the entirely artificial grievances of the Filioque and our azyme bread will easily be buried in the dust that has gathered over them for centuries, and Eastern Christians may some day wake up and find that there is nothing to do but to register again a union that ought never to have been broken.

EBBO

EBENDORFER

Returning to the synod at Thionville, Ebbo was deposed by the emperor and the assembled bishops and brought back as prisoner to the Abbey of Fulda. Somewhat later he was given in custody to Bishop Fululf of Liesieux and after a time died there. He is said to have been very large, so wide as that which was then called Northumbria became too heavy a charge for one see; accordingly, in 678 Archbishop Theodore constituted Bernicia (that part of the Northumbrian realm which lay to the north of the River Tweed) a suffragan diocese and consecrated Eata its bishop. The new diocese was to have two episcopal sees, one at Hexham and the other at Lindisfarne, at the two extremities of what is now the County of Northumberland. Eata was to be styled "Bishop of the Bernicians". This arrangement lasted only a few years, and the See of Hexham was then assigned to Trumbert, while Eata kept Lindisfarne. In 684, after the death of Trumbert, St. Cuthbert was elected Bishop of Hexham, but when the latter expressed a desire to remain in his old home rather than remove to the more southern see, Eata readily consented to exchange with him, and for the last two years of his life occupied the See of Hexham, while Cuthbert ruled as bishop at Lindisfarne. Like most of the early saints of the English Church, St. Eata was canonized by general repute of sanctity among the faithful in the region where he lived, and a pilgrim church was built by his sons at the place where his feast is kept on 26 October, the day of his death.

E. MACHERSON.

Ebbo (Ebo), Archbishop of Reims, b. towards the end of the eighth century; d. 20 March, 851. Though born of German serfs, he was educated at the court of Charlemagne who gave him his liberty. After his elevation to the episcopate of the See of Reims, Le Debonnaire, and was his councillor in the government of Aquitaine. When Louis became emperor he appointed Ebbo archbishop of the vacant See of Reims in 816. Acting on the suggestion of the emperor, he went to Rome in 822, in order to obtain permission from Pope Paschal I to preach to the Gospel to the Danes. The pope not only gave his sanction but also appointed Ebbo papal legate for the North. In company with a certain Haligbar, probably the one who was Bishop of Cambray (817-831), and Willerich, Bishop of Basle, he crossed the Alps in the spring of 823, and after preaching with some success during the following summer he returned to France in the autumn of the same year. Twice again he returned to Denmark, but each time his stay was of short duration and without any lasting effect on the pagan Danes whose Christianization was brought about a few years later by St. Ansgar. When, in 830, the sons of the emperor rose in rebellion against their father, Ebbo supported the emperor; but three years later he turned against him and on 13 November, 853, presided at the shameful scene enacted at the Church of St. Mary at Soissons, where the aged emperor was deposed and compelled to perform public penance for crimes which he had not committed. As a reward for this disgraceful act Ebbo received the rich Abbey of St. Vaast from Lothaire. He continued to support the rebellious Lothaire even after Louis had been solemnly reinstated in March, 834. Being prevented by a severe attack of the gout from following Lothaire to Italy he took refuge in the cell of a hermit near Paris, but was found out and sent as prisoner to the Abbey of Fulda. On 2 February, 835, he appeared at the Synod of Thionville, where in the presence of the emperor and forty-three bishops he solemnly declared the monarch innocent of the crimes of which he had accused him at Soissons, and on 28 February was solemnly excommunicated from the pulpit of the cathedral of Metz. 

V.—16

MICHAEL OTT.

Ebendorfer, Thomas, German chronicle-pro- fessor, and statesman, b. 12 August, 1835, at Hasel- bach, in Upper Austria; d. at Vienna, 8 Jan., 1864. He made his higher studies at the University of Vienna, where in 1852 he received the degree of Master of Arts. Until 1857 he lectured at the University of Vienna on the history of art and on grammar. After 1849 he was also admitted to the theological faculty as cursor biblicus. In 1857 he was made licentiate and in 1863 master of theology; soon after he became dean of the theological faculty, in which body he was a professor until his death. Three several years, 1847, 1858, and 1862 he was rector of the Uni- versity of Vienna; he was also canon of St. Stephen's, and engaged in the apostolic ministry as preacher and as pastor of Perchtoldsdorf and of Falkenstein near Vienna. He ranks high among the professors of the University of Vienna in the fifteenth century. In the struggles which it had to sustain he championed the rights and interests of the university with zeal and energy. He represented the university at the Council of Bzole (1432-34), took an active part in all its dis- cussions, and was one of the delegates sent by the council to Prague to confer with the Hussites. From 1440 to 1444 he was sent to various cities as ambassa- dor of Emperor Frederick III. He disapproved of the attitude of the Council of Bzole towards the pope and the emperor, and eventually withdrew from it. His advocacy of the rights of the Vienna University, coupled with the attacks of his opponents lost him the favour of the emperor, who saw in him a secret enemy. In 1451 and 1452 he was in Italy and went to Rome where he obtained a decree of the pope for the confirmation of the privileges of the University of Vienna.
EBERHARD

between Frederick III and Albert of Brandenburg he tried to act as mediator but only fell into greater disfavour with Frederick. His last years were clouded by the disturbances of the years 1461–1463 during which Austria had much to suffer from the Bohemian king, George of Podiebrad, and from internal conflict.

Ebenendorfer is one of the most prominent chroniclers of the fifteenth century. His "Chronicon Austriæ" is a dull but frank and very detailed history of Austria to 1463. From 1400 on it is an indispensable source of Austrian history (ed. F. Seitz in "Scriptores rerum Austriacarum", II. Leipzig, 1725, 689–986; in this edition all of Book I and part of Book II were omitted). His account of the Council of Basle appears in the "Diarium gestorum concilii Basileanensis pro reductione Bohemorum" (ed. Birck in Monumenta concilii Basileanensis, Scriptores, I, Vienna, 1875, 701–763). He wrote also a history of the Roman emperors, "Chronica regum Romanorum"; Books VI and VII, which are of independent value as sources, were edited by Prümer in the "Mitteilungen des Instituts für Österreichische Geschichtsforschung", the annual of the Austrian Historical Association (Innsbruck, 1889, 1–223; 38–222). Many of his writings are as yet unedited, among them commentaries on Biblical books, sermons, "Libri de schismatibus", "Libri Pontificium Romanorum" (see Levinson, "Thomas Ebenendorf's Liber Pontificalis" in "Mitteilungen des Instituts für Österreichische Geschichtsforschung", II, 1899, 69–99).

EBERHARD, Matthias, Bishop of Trier, b. 15 Nov., 1815, at Trier (Germany), d. there 30 May, 1876. After successfully completing the gymnasmum course of his native town, he devoted himself to the study of theology, was ordained in 1839, and soon after made assistant at St. Castor's in Coblenz. In 1842 Bishop Arnoldi made him his private secretary, and, at the end of the same year, professor of dogmatics in the seminary of Trier. From 1849 to 1862 he was director of the seminary and also preacher at the cathedral; in 1850 he became a member of the chapter; from 1852 to 1856 he was representative of his fellow-citizens in the Prussian Lower Chamber, where he justified the Catholic faith. On 27 Oct., 1862, he was preconized as auxiliary Bishop of Trier; after Arnoldi's death he was proposed for the episcopal see, but the Prussian Government acknowledged him only after the death of Arnoldi's successor, Pelldram, 15 July, 1867. Having chosen St. Charles Borromeo for his ideal, he spared no exertion on the one hand, to make his clergy learned, zealous, devout, and thoroughly cultured, and on the other to cultivate a truly Christian and religious spirit in the people. To attain this double end, he bestowed very great care upon his semi- narians and demanded a constant observance of his rules on the pastoral conferences and the annual retreat. In the parishes he insisted on the instruction in Christian doctrine and on the giving of missions, took care that religious associations were established, especially among the youths and men, and tried to found everywhere good libraries for the people. At the Vatican Council he appeared several times as a speaker; he belonged to the minority of the bishops, who considered the definition of the pope's infallibility as inopportun for the time being; but as soon as the matter had been decided, he participated at once. Then, when in the beginning of the seventies the Prussian Government wished to fetter bishops and priests by its ecclesiastico-political legislation, Bishop Eberhard unflinchingly defended the rights of the Church and thus became one of the first victims of the so-called Kulturkampf. At first he was fined an exorbitant sum, but since he could not pay it, he was retained in the prison of Trier from 6 March to 31 December, 1874. New persecutions began after he had been dismissed; the flourishing institutions which belonged to the Church were closed and the appointment of priests was made impossible. Under this unhappy condition of his diocese accellerated his death. He is the author of a dissertation "De tituli Sedis Apostolicæ ad insigniamdem sedem Romam us antiquissimam" (Trier, 1846). His sermons, masterpieces of oratory, are still quoted in Germany (ed. by the H. Dieth. in 6 vols. (Trier, 1877–1883; Freiburg, 1894–1903). MÖLLER, Matthaeus Eberhard (Würzburg, 1874); KRAFT, Matthias Eberhard (Trier, 1878); DITTMER, Matthaeus Eberhard im Kulturkampf (Trier, 1900).

PATRICIUS SCHLAGER.

Eberhard of Ratibon (or SALZBURG; also called EBERHARDUS ALTAENensis), a German chronicler who flourished about the beginning of the fourteenth century. Hardly anything is known of his life; the only positive facts are obtained from documents of the years 1294–1305, which show that within this period he was active as a magister, Augustinian canons, and archdeacon. He is the author of a chronicle which begins with the election of the King of Hungary and extends to 1305. He desired to give an account of Bavarian history only, but was unable to fully execute this intention. In reality he describes more or less fully events occurring outside of Bavaria that seem to him of importance. The value of the chronicle is increased by the greater detail with which he treats the last five years, and in this part are also added important letters which serve to make the narrative more life-like. There is no doubt that the work was influenced by Hermann, the celebrated Abbot of Niederaltaich, the founder of the new period of annalistc writing and to whom is due a wonderful development in the art of historical writing in Bavaria during the latter half of the thirteenth century. The "Annales" of Eberhard were formerly held to be a direct continuation of Hermann's chronicle, but in the introduction to his edition of the "Annales" Jaffé has disproved this hypothesis. Eberhard's chronicle is, rather, an independent work, connected with its continuations (the so-called "Continuatio Altaenensis" and "Continuatio Ratisponensis") only by occasional paraphrases of what Eberhard has said or by information they occasionally add to his statements. The earliest edition of the "Annales" is that of H. Canius in his "Lectiones antiques", I, 307–358. An improved edition was published by Böhm, "Fontes", II, 509–533, and another by Jaffé in "Mon. Germ. Hist. Scriptores", XVI, 592–605.

KEHR, Hermann von Altaiich und seine Fortsetzer (Gottingen, 1886), 60–81. LORENS, Deutsche Geschichtsquellen und MA. (1886), I, 183 sq.

PATRICIUS SCHLAGER.

EBIONITES.—By this name were designated one or more early Christian sects infected with Judaistic errors.

The word Ebionite, or rather, more correctly, Ebionites, "Epionios", is a transliteration of the Aramaic יפוני meaning "one from Greece". It first occurs in the Septuagint (see Irenæus, Adv. Haer., I, xxxvi, 2, but with no indication of meaning. Origen (C. Celsum, II, i; De Princ., IV, i, 22) and Eusebius (Hist. Eccl., III, xxvii) refer the name of these sectaries either to the poverty of their understanding, or to the poverty of the Law to which they clung, or to the poor opinion they held concerning Christ. This, however, is obviously not the historic origin of the name. Other writers, as Tertullian (De Præser., xxxii; De Carne Chr., xiv, 18), Hippolytus (cfr. Pseudo-Tert., Adv.,
Hear, III, as reflecting Hippolytus’s lost “Syntagma”), and Epiphanius (Hærers, xxx), derive the name of the sect from a certain Ebion, its supposed founder. Epiphanius even mentions the place of his birth, a hamlet called Kefalon, in the district of Crete, and relates that he travelled through Asia and even came to Rome. Of modern scholars Hilgenfeld has maintained the historical existence of this Ebion, mainly on the ground of some passages ascribed to Ebion by St. Jerome (Comm. in Gal., iii, 14) and by the author of a complaint of anti-Christian patriots against the monotheists. But these passages are not likely to be genuine, and Ebion, otherwise unknown to history, is probably only an invention to account for the name Ebionites. The name may have been self-imposed by those who gladly claimed the blessing of being poor in spirit, or who claimed to live after the pattern of the first Christians in Jerusalem, who laid their goods at the feet of the Apostles. Perhaps, however, it was first imposed by others and is to be connected with the notorious poverty of the Christians in Palestine (cf. Gal., ii, 10). Recent scholars have plausibly maintained that the term did not originally designate any heretical sect, but merely the orthodox Jewish Christians of Palestine who continued to observe the Mosaic Law. These, ceasing to be in touch with the bulk of the Christian world, were drifted away from the standard of orthodoxy and became formal heretics. A stage in this development is seen in St. Justin’s “Dialogue with Trypho the Jew”, chapter xlvii (about a.d. 140), where he speaks of two sects of Jewish Christians estranged from the Church: those who observe the Mosaic Law for themselves, but do not require observance thereof from others; and those who hold it of universal obligation. The latter are considered heretical by all; but with the former St. Justin would hold communion, though not all Christians were willing to think the same indulgence. St. Justin, however, does not use the term Ebionites, and when this term first occurs (about a.d. 175) it designates a distinctly heretical sect.

The doctrines of this sect are said by Irenæus to be like those of Cerinthus and Carpocrates. They denied the Divinity and the virgin birth of Christ; they clung to the observance of the Jewish Law; they regarded St. Paul as an apostate, and only used a Gospel according to St. Matthew (Adv. Haer., I, xxxvi, 2; III, xxii, 2; IV, xxxiii, 4; V, ii, 3). Their doctrine concerning baptism (see Baptism (q.v.)) and Tertullian (De carne Chr., v, 18), but their observance of the Law seems no longer so prominent a feature of their system as in the account given by Irenæus. Origen is the first (C. Cels., vii, 34) to classify the Ebionites, a distinction which Eusebius also gives (Hist. Eccl., III, xxvii). Some Ebionites accept, but others reject, the virgin birth of Christ, though all reject His pre-existence and His Divinity. Those who accepted the virgin birth seem to have had more exalted views concerning Christ and, besides observing the Sabbath, to have kept the Sunday as a memorial of His Resurrection. The milder sort of Ebionites were probably fewer and less important than their stricter brethren, because the denial of the virgin birth was commonly attributed to all. (Orig., Hom., in Luc., xvii.) St. Epiphanius calls the more heretical section Ebionites, and the more Catholic-minded, Nazarenes. But we do not know whence St. Epiphanius obtained his information or how far it is reliable. Ebionite literature is very hazardous, therefore, to maintain, as is sometimes done, that the distinction between Nazarenes and Ebionites goes back to the earliest days of Christianity.

Besides these merely Judaistic Ebionites, there existed a later Gnostic development of the same heresy. This is evident from the fact that it differs essentially from the main schools of Gnosticism, that it absolutely rejected any distinction between Jehovah the Deity, and the Supreme Good God. Those who regard this distinction as essential to Gnosticism would even object to classing Ebionites as Gnostics. But on the other hand the general character of their teaching is unmistakably Gnostic. This can be gathered from the Pseudo-Clementines and may be summed up as follows: Matter is eternal, and an emanation of the Deity; may it constitute, as it were, God’s body. Creation, therefore, is but the transformation of pre-existing materials. God the “creator” of the Universe by the instrumentality of His wisdom which is described as a “ demiurgic hand” (χειρ δημιουργίας) producing the world. But this Logos, or Sophia, does not constitute a different person, as in Christian theology. Sophia produces the world by a successive evolution of syzygies, the female in each case preceding the male but being finally overcome by him. This universe is, moreover, divided into two realms, that of good and that of evil. The Son of God rules over the realm of the good, and to him is given the world to come, but the Prince of Evil is the prince of this world (cf. John, xiv, 30; Eph., i, 21; vi, 12). This Son of God is the Christ, a middle-being between God and creation, not a creature, yet not equal to, nor even to be compared with, the Father (παντόκρατος ο θεός). The “prophecy” of the first revelation, Moses of the second, Christ of the third and perfect one. The union of Christ with Jesus is involved in obscurity. Man is saved by knowledge (gnosis), by believing in God the Teacher, and by being baptised unto remission of sins. Thus he receives knowledge and strength to observe all the precepts of the Law. Christ shall come again to triumph over Antichrist as light dispels darkness. The system is Pantheism, Persian Dualism, Judaism, and Christianity fused together, and here and there re minds one of Mandaeistic literature. The “Recognitions”, as given us in Rufinus’s translation (revised?), come nearer to Catholic teaching than do the “Homilies”.

Amongst the writings of the Ebionites must be mentioned (a) their Gospel. St. Irenæus only states that they used the Gospel of St. Matthew. Eusebius modifies this statement by speaking of the so-called Gospel according to the Hebrews, which was known to Hegesippus (Eus., Hist. Eccl., IV, xxii, 8), Orig. (Jerome, De vir. ill., ii), and Clem. Alex. (Strom., II, ix, 45). This, probably was an apocryphal or apocalyptic original, but genuine Hebrew character. St. Epiphanius attributes this to the Nazarenes, while the Ebionites proper only possessed an incomplete, falsified, and truncated copy thereof (Adv. Haer., xxxvii). It is possibly identical with the Gospel of the Twelve.

(b) Their Apocrypha: “The Circuit of Peter” (Χριστοῦ Παντοκράτορος Μεταφρασμένο ΑΠΟ ΑΓΙΟΥ ΟΣΤΗΡΟΥ) and Acts of the Apostles, amongst which the “Ascents of James” (Ανάβασις Ιάκωβος). The first-named books are substantially contained in the Clementine Homilies under the title of Clement’s “Compendium of Peter’s itinerary sermons”, and also in the “Recognitions” ascribed to the same. They form an early Christian didactic novel to propagate Ebionite views, i.e. their Gnostic doctrines, the supremacy of James, their connexion with Rome, and their antagonism to Simon Magus. (See Clementines.)

(c) The Works of Simeon of the House of the Healing Power” (Τοῦ Τείχοντος Καινῆς Κεριάς), purporting to have been written about a.d. 100
and brought to Rome about A. D. 217 by Aleibiades of Apamea. Those who accepted its doctrines and its new beliefs, the Echeleistae, or "Philos., IX, xiv-xvii; Epiph., "Her., xix, 1; loc. iv.".

Of the history of this sect hardly anything is known. They exerted only the slightest influence in the East and none at all in the West, where they were known as Symmacianists. In St. Epiphanius's time small communities for a time seemed to have existed in some hamlets in Syria and Palestine, but they were lost in obscurity. Farther east, in Bavaria and Persia, their influence is perhaps traceable amongst the Mandeans, and it is suggested by Ullschnhorn and others that they may be brought into connexion with the origin of Mohammedanism.

Eben, the name of two German mystics, whom historical research has shown to have been in no wise related.

(1) Christina, b. of a patrician family on Good Friday, d. at Engelthal, 27 December, 1535. From her mother she inherited a deeply religious spirit, which early manifested itself in a fondness for prayer and mortifications. Hardly had she made her First Communion when her parents acceded to a desire, which she had expressed since her seventh year, of entering the Dominican convent at Engelthal in the vicinity of Nuremberg. At the end of her year of novitiate she was striken with a dangerous illness, which reappeared three times annually from her thirteenth to her twenty-third year. Each year, for the remainder of her life, she suffered a relapse of this mysterious sickness. Christina did not, however, on this account relax her penitential practice or fail in her duties as superior, to which she had been early elected. In her thirteenth year she began to enjoy frequent visits from the Master, from whose words she drew light and counsel for her own direction. As a result she was misunderstood by all save her confidantes, and was ordered to leave the convent. In obedience to this order she returned to Nuremberg in 1532, and at whose command, in the Advent of 1317, she began to write a diary of her spiritual experiences in chronological order. After an introduction in which she reviews in a simple, unaffected manner the whole history of her life till 1317, the diary of her experiences is continued on till 1353. She speaks of herself in the third person as von dem menschen. Most of this diary was written by her own hand save when she dictated on account of illness. It is preserved, in a complete version of the fifteenth century, in a manuscript (cod. 90) at Nuremberg. Excerpts are to be found also at the same place (cod. 89, 91), at Stuttgart (cod. 90), and Medingen. We learn from this source that Christina played an important part by her prayers in the settlement of the difficulties arising from the riots at Nuremberg in 1349; from the earthquake which occurred on the same year; the Black Death; the Flagellants' processions of 1349; and the long quarrel between Louis the Bavarian and the Holy See. She also tells us of the absence of a director from the removal of Konrad to Freiburg in 1324 till 1351, when Henry of Nordlingen visited her and gave her advice sufficient for the remainder of her life. The treatise "Von der genaden uberlast" which the Stuttgart Literary Society edited over her name in 1871 is probably not her work.

(2) Margaretha, b. of rich parents at Donauwörth, 1261; d. at Dillingen, 1351. She received a thorough classical education in her home, and later entered the Dominican convent at Maria-Mederingen near Dillingen, where she was solemnly professed in 1306. In 1312 she was dangerously ill for three years, and subsequently for a period of nearly seven years she was most of the time at the mercy of disease. From her she could exercise her desire for penance only by obedience from wine, fruit, and the bath. On her return from home, whither she had gone during the campaign of Louis the Bavarian, her nurse died, and Margaretha grieved inconsolably, until Henry of Nordlingen assumed her spiritual direction in 1322. The correspondence that passed between them is the first collection of this kind in the German language. At his command she wrote with her own hand a full account of all her revelations and intercourse with the Infant Christ, as also all answers which she received from him even in her sleep. This diary is preserved in a manuscript of the year 1353 at Medingen. From her letters and diary we learn that she never abandoned her adhesion to Louis the Bavarian, whose soul she learned in a vision had been saved.

Ecclesiarch. See SACHRANT.

Ecclesiastes (Sept. τεκμεραρχης, in St. Jerome also CONCIONATOR, "Preacher") is the name given to the book of Holy Scripture which usually follows the Proverbs; the Hebrew Kohelet probably has the same meaning. The word preacher, however, is not meant to suggest a congregation nor a public speech, but only the solemn announcement of sublime truths (γραμτον, passive γραμτος, Lat. congregare, I (III) K., viii, 1, 2; γραμτον, in public, pal., XV, 14; XXVI, 26; γραμτος to be taken either as a feminine participle, and would then be either a simple abstract noun, προκονιον, or in a poetic sense, tanta ellegans, or must be taken as the equivalent of the Hebrew הגדה, at whose command, in the Advent of 1317, she began to write a diary of her spiritual experiences in chronological order. After an introduction in which she reviews in a simple, unaffected manner the whole history of her life till 1317, the diary of her experiences is continued on till 1353. She speaks of herself in the third person as von dem menschen. Most of this diary was written by her own hand save when she dictated on account of illness. It is preserved, in a complete version of the fifteenth century, in a manuscript (cod. 90) at Nuremberg. Excerpts are to be found also at the same place (cod. 89, 91), at Stuttgart (cod. 90), and Medingen. We learn from this source that Christina played an important part by her prayers in the settlement of the difficulties arising from the riots at Nuremberg in 1349; from the earthquake which occurred on the same year; the Black Death; the Flagellants' processions of 1349; and the long quarrel between Louis the Bavarian and the Holy See. She also tells us of the absence of a director from the removal of Konrad to Freiburg in 1324 till 1351, when Henry of Nordlingen visited her and gave her advice sufficient for the remainder of her life. The treatise "Von der genaden uberlast" which the Stuttgart Literary Society edited over her name in 1871 is probably not her work.

Introduction.—Everything human is vain (i, 1-11); for man, during his life on earth, is more transient than all things in nature (i, 1-7), whose unchangeable course he admires, but does not comprehend (i, 8-11).

Part I.—Vanity in man's private life (i, 12-15); vain is human wisdom (i, 12-13); vain are pleasures and pomo (i, 1-23). Then, rhetorically exaggerating, he draws the conclusion: "Is it not better to enjoy life's blessings which God has given, than to waste your strength uselessly" (ii, 24-26). As epilogue to part i at the time of death, all things are in- mutably predestined and are not subject to the will of man (iii, 1-15). In this first part, the reference to the writer himself, the self-assuccion, on account of the excessive luxury described in III Kings, x, is placed in the foreground. Afterward, more authoritatively he concludes with "I saw", and explains what he has learned either by personal observation or by other means, and on what he has meditated. Thus he says:

Part II.—Sheer vanity is also in civil life (iii, 16-25); vain and absurd is a lifetime because of the iniquity which reigns in the halls of justice (iii, 16-22) as well as in the intercourse of men (iv, 1-3). The strong expressions
In iii, 18 sqq., and iv, 2 sqq., must be explained by the writer's tragic vein, and this does credit to the writer, who, speaking as Solomon, deplores bitterly what has often enough happened in his kingdom also, whether through his fault or without his knowledge. The description of the three wise men, Zedekiah, Samuel, and Solomon cannot be cleared of all guilt (see below). But even the best prince will, to his grief, find by experience that countless wrongs cannot be prevented in a large empire. Qoheleth does not speak of the wrongs which he himself has suffered, but of those which others sustained. Another of life's vanities consists in the fact that mad competition leads many to fall into idleness (iv, 4–6); a third causes many a man through greed to shun society, or even to lose a throne because his unworthiness frightens him to seek the help of other men (iv, 7–16). Qoheleth then turns once more to the three classes of men named: to those who groan under the weight of injustice, in order to exhort them not to sin against God by murmuring against Providence, for this would be tantamount to disdaining God in His temple, or to breaking a sacred vow, or to denying Providence (iv, 17–v, 5): in the same way he gives a few salutary counsels to the miser (v, 9–10) and describes the misery of the supposed foolish king (vi, 1–6). A long oratorical amplification follows (vi, 7–30). The immutability of predestination of all things by God must temper contentment and modesty (vi, 7–vii, 1, Vulg.). A serious life, free from all frivolity, is best (vii, 2–7, Vulg.). Instead of passionate outbreaks (vii, 8–15), he recommends a golden mean (vii, 16–23). Finally, Qoheleth inquires into the deepest and last reason of "vanity" and finds it in the sinfulness of woman; he evidently thinks also of the sin of the first woman, through which, against the will of God (30), misery entered the world (vii, 24–30). In this part, also, Qoheleth returns to a human point of view most modestly: the blessings granted by God, instead of giving oneself up to anger on account of wrongs endured, or to avarice, or to other vices (vii, 22; v, 17 sqq.; vii, 15).

Part III begins with the question: "Who is as the wise man?" (In the Vulg. these words have been wrongly placed in chap. vii.) Qoheleth here gives seven or eight important rules for life as the quintessence of true wisdom. Submit to God's ("the king's") will (viii, 1–8). If you observe that there is no justice on earth, contain yourself, "eat and drink" (chaps. vii, 24–29). It is a great thing in life by human wisdom; it is better to enjoy modestly the blessings of life and to work according to one's strength, but always within the narrow limits set by God (viii, 16–ix, 12.—In the Vulg. ad idem must be dropped). In this "siege" of your city (by God) seek help in true wisdom (ix, 13–x, 9). It is always important not to lose your temper because of wrongs done to you (x, 4–15). Then follows the repetition of the advice not to give oneself up to idleness; sloth destroys countries and nations, therefore work diligently, but leave the success to God without murmuring (x, 16–xi, 6). Even amid the pleasures of life do not forget the Lord, but think of death and judgment (xi, 7–xii, 8).

In the epilogue Qoheleth again lays stress upon his authority as the teacher of wisdom, and declares that the pith of his teachings is: Fear God and keep the Commandments; for that is the whole man. In the above analysis, as must be expected, the writer of this article has been guided in some particulars by his conception of the difficult text before him, which is not always quite satisfactory on the same. Many critics do not admit a close connexion of ideas at all. Zephtal regards the book as a collection of separate aphorisms which form a whole only externally: Bickell thought that the arrangement of the parts had been totally destroyed at an early date; Dietrick supposed that the book had been supplemented and enlarged in strata; Luther assumed several authors. Most commentators do not expect that they can show a regular connexion of all the "sayings" and an orderly arrangement of the entire book. In the above analysis an attempt has been made to do this, and we have pointed out what means may lead to success. Several parts must be taken in the sense of parables, e.g. what is said in ix, 14 sqq., of the siege of a city by a king. And in vii, 2, and x, 20, "king" means God. It appears to me that iv, 17, is not to be taken literally; and the same is true of x, 8 sqq. Few will hesitate to take xi, 1 sqq., figuratively. Chap. xii must convince every one that bold allegories are quite in Qoheleth's style. Chap. iii would be very flat if the proposition, "There is a time for everything" , carried a deeper meaning than the words disclose at first sight. The strongest guarantee of the unity and sequence of thoughts in the book is the theme, "Vani tas vanitatum", which emphatically opens it and is repeated again and again, and (xii, 8) with which it ends. Furthermore, the constant repetition of "said" or of similar expressions, which connect the arguments for the same truth; finally, the sameness of verbal and rhetorical turns and of the writer's tragic vein, with its hyperbolic language, from beginning to end.

In order to reconcile the apparently conflicting statements in the book, that seem contradictions of manifest truths of the religion of the author, ancient commentators assumed that Qoheleth expresses varying views in the form of a dialogue. Many modern commentators, on the other hand, have sought to remove these discrepancies by omitting parts of the text, in this way to obtain a harmonious collection of maxims, or even affirmed that the author had no clear ideas, and, e.g., was not convinced of the spirituality and immortality of the soul. But, apart from the fact that we cannot admit erroneous or varying views of life and faith in one writer, with evident alterations in the text or the proposed form of a dialogue as poor make-shifts. It suffices, in my opinion, to explain certain hyperbolic and somewhat paradoxical turns as results of the bold style and the tragic vein of the writer. If our explanation is correct, the chief reproach against Qoheleth—viz., that against his orthodoxy—falls to the ground. For if iii, 17; xi, 9; xii, 7, 14, point to another life as distinctly as can be desired, we cannot take iii, 18–21, as a denial of immortality. Besides, it is evident that in his whole book the author expounds the view of man, rational or earthly life; but to this may be truly applied (if the hyperbolic language of the rhetorical mood is taken into consideration) whatever is said there by Qoheleth. We cannot find fault with his comparing the mortal life of man and his death to the life and death of the beast (in vv. 19 and 21 nm must always be taken as "breath of life") Again, iv, 2 sqq., is only a hyperbolic expression; in like manner Job (iii, 3) curses in his grief the day of his birth. True, some allege that the doctrine of immortality was altogether unknown to early antiquity; but even the Sacrifice (Luke, xx, 37) adduced the testimony of Moses for the resurrection of the dead and was not contradicted by his adversaries. And ix, 5 sq. and 10, must be taken in a similar sense. Now, in dooming all things earthly to destruction, but attributing another life to the soul, Qoheleth admits the spirituality of the soul; this follows especially from xii, 7, where the body is returned to the earth, but the soul to God.

Sometimes Qoheleth also seems to be given to fatalism; for in his peculiar manner he lays great stress on the immutability of the universe, and his immediately divine. But he considers this immutability as dependent on God's will (iii, 14; vi, 2; vii, 14 sqq.). Nor does he deny the freedom of man within the limits set by God; otherwise his admonitions to fear God, to work, etc., would be meaningless. Man's evil was brought into the world through his own fault (vii,
29. Heb.). Just as little does he confute the freedom of God's decrees, for God is spoken of as the source of all wisdom (ii, 26; v, 5). His views of life do not lead Qoheleth to stoical indifference or to blind hatred; on the contrary he shows the deepest sympathy with the misery of the suffering and earnestly deprecates opposition against God. In contentment with one's lot, in the quiet enjoyment of the blessings given, in the power of God, he discerns the golden mean, by which man prevents the vagaries of passion. Neither does he thereby recommend a kind of epicureism. For the ever-recurring phrase, "Eat and drink, for that is the best in this life," is rooted in the very soil of wisdom, by which he recalls man from all kinds of excesses. He recommends not idle, but moderate enjoyment, accomplished by incessant labour. Many persist in laying one charge at Qoheleth's door, viz., that of pessimism. He seems to call all men's efforts vain and empty, his life aimless and futile, and his lot deplorable. It is true that a sombre mood prevails in the book, that the author chose as his theme the description of the sad and serious sides of life: but is it pessimism to recognise the evils of life and to be impressed with them? It is not a mark of wisdom to mind as the essence of this state is, and, on the other hand, the peculiarity of the frivolous to ignore the truth? The colours with which Qoheleth paints these evils are indeed glaring, but they naturally flow from the poetical-oratorical style of the work, from its character as a meditation, which likewise gives rise to the hyperbolical language in the Book of Job and in certain psalms. However, Qoheleth, unlike the pessimist, does not inveigh against God and the order of the universe, but only man. Chap. vii, in which he inquires into the last cause of evil, closes with the words, "Only this I have found, that God made man right, and he hath entangled himself with an infinity of questions [or phantasies]". His philosophy shows us also the way in which man can find a modest happiness. While severely condemning exceptional pleasures and luxury, (chap. ii), it counsels the enjoyment of those pleasures which God prepares for every man (viii, 15; ix, 7 sqq.; xi, 9). It does not paralyze, but incites activity (ix, 10; x, 18 sqq.; x, 1 sqq.). It stays him in his afflictions (v, 17; vii, 17; xi, 7); it discovers at every step how necessary is the fear of God. But Qoheleth's greatest trouble seems to be his inability to find a direct, smooth answer to life's riddles; hence he so frequently deplores the wisdom of his days, this wisdom, commonly so called, i.e. the wisdom resulting from man's investigations, he knows another kind of wisdom which soothes, and which he therefore recommends again and again (vii, 12; Heb. viii, 1; ix, 17; xii, 9-14). It is true, we feel how the author wrestles with the difficulties which beset his inquiries into the riddles of life; but he overcomes them and offers us an effective consolation even in extraordinary trials. Extraordinary also must have been the occasion which led him to compose the book. He introduces the beginning of Solomon, and this forcibly recalls Solomon shortly before the downfall of the empire; but we know from the Scriptures that this had been prepared by various rebellions and had been foretold by the infallible word of the prophet (see below). We must picture to ourselves Solomon in these critical times, how he seeks to strengthen himself and his subjects in this sore trial by the true wisdom which is a relief at all times; submission to the immutable will of God, the true fear of the Lord, undoubtedly must now appear to him the essence of wisdom. As the inspired character of Ecclesiastes was not settled in the Fifth Ecumenical Council but only solemnly reaffirmed against Theodore of Mopsuestia, the faithful have always found edification and consolation in this book. Already in the third century, St. Gregory Thaumaturgus, in his paraphrase, then Gregory of Nyssa, in eight homilies, later Hugh of St. Victor, in nineteen homilies, set forth the wisdom of Qoheleth as truly celestial and Divine. Every age may learn from his teaching that man's true happiness must not be looked for on earth, not in human wisdom, not in luxury, not in royal splendour; that many afflictions await everybody, in consequence either of the iniquity of others, or of his own passions; that God has shut him up within narrow limits, lest he become overweening, but that He does not deny him a small measure of happiness, however great things are above him" (vii, 1, Vulg.), if he enjoys what God has bestowed on him, in the fear of the Lord and in sultant labour. The hope of a better life to come grows all the stronger the less this life can satisfy man, especially the man of high endeavour. Now Qoheleth does not intend this doctrine for an individual or for one people, but for mankind, and he does not prove it from supernatural revelation, but from pure reason. This is his cosmopolitan standpoint, which Kuenen rightly recognized; unfortunately, this commentator wished to confine it to certain Hellenistic times. Nowack refuted him, but the universal application of the meditations contained therein, to every man who is guided by reason, is unmistakable.

The Author of the Book.—Most modern commentators are of the opinion that Qoheleth's style points not to Solomon, but to a later writer. About this the following may be said:—

(1) As a matter of fact, the language of this book differs widely from the language of the Proverbs. Some think that they have discovered many Aramaicisms in it. What can we say on this point?—It cannot be gainsaid that Solomon and a great, if not the greatest, part of his people understood Aramaic. (We take the word here as the common name of the dialect closely related to the Biblical Hebrew.) Abraham and Sara, as well as the wives of Isaac and Jacob, had come from Chaldea; it is therefore probable that the language of that country was preserved, beside the language of Palestine, in the family of the Patriarchs; at any rate, in Moses' time the people still used Aramaic, even after the death of Jachin and Boaz (I Kings v, 14).§ 38, while Moses himself at once substitutes the Hebrew קורין, the name of the miraculous food, however, remained קורין. A large portion of David's and Solomon's empire was peopled by Arameans, so that Solomon required another hand to render copies of the books to them, and for this reason he sent to Gabael (I Kings iv, 4, Heb.; II Sam. (K.), x, 19; cf. Gen. xxviii, 18). He was conversant with the science of the "sons of the East" and exchanged with them his wisdom (I K., v, 10-14, Heb.). But, as Palestine lay along the commercial routes between the Euphrates and the Phoenicians, the Israelites, at least in the north of the country must have been well acquainted with Aramaic. At the time of King Eschias even the officials of Jerusalem understood Aramaic (Is., xxxvi, 11; II K., xviii, 26, Heb.). Solomon could therefore assume, without hesitation, a somewhat Aramaic style, or rather, the writer, who chose to express himself in Aramaic, moved him. As a skilful writer, he may have intended, especially in his old age, and in a book whose style is partly oratorical, partly philosophical, partly poetical, to enrich the language by new turns. Goethe's language in the second part of "Faust" differs greatly from the first, and introduces many neologisms. Now Solomon seems to have had a more important reason for it. As it lay in his very character to remove the barriers between pagans and Israelites, he may have had the conscious intention to address this book, one of his last, not only the Israelites but his whole people; the Aramaic covering of his language, then, serves as a means to introduce himself to Aramaic readers, who, in their turn, understood Hebrew sufficiently. It is remarkable that the name of God, יוהּ, never ooo
which are shown to be Hebraic by clear proofs or manifest analogies from other books. There are hardly any unquestionable Aramaisms which can neither be found in other books nor regarded as Hebraisms, which per chance have survived only in Ecclesiastes (for a detailed discussion of the reconstruction of the canonical text see Commentary, pp. 23–31). We repeat here Welte's words: “Only the language remains as the principal argument that it was written after Solomon; but how fallacious in such cases is the merely linguistic proof, need not be mentioned after what has been said referring to Ecclesiastes do not agree with the time and person of Solomon. True, the author, who is supposed to be Solomon, speaks of the oppression of the weak by the stronger, or one official by another, of the denial of right in the courts of justice (iii, 16; iv, 1; v, 7 sqq.; vii, 9 sqq.; x, 4 sqq.). Now many think that such things could not have happened in Solomon's realm. But it surely did not escape the wisdom of Solomon that oppression occurs at all times and with every people; the glaring colours, however, in which he describes them cannot make us change our opinion. In the case of a literary language, on the other hand, which is a dead language and as such essentially unchangeable, it is reasonable to suppose that in the course of time its orthography, as well as single words and expressions, have undergone changes. In the form of elements, have been subjected to change in order to be more intelligible to later readers. It is possible that Ecclesiastes was received into the canon in some such later edition. The Aramaisms, therefore, may also be explained in this manner; at any rate, the supposition that the time of the composition of a Biblical book may be deduced from its language is wholly questionable.

This is a fact admitted by all those critics who ascribe Ecclesiastes, the Canticle of Canticles, portions of the Psalms, and the Lamentations (Koehler, p. 115); Grotius found only four in the whole book; Henneberg admits ten; the opinions on this point are so much at variance that one cannot help noticing how varying men's conception of an Aramaism is. Peculiar or strange expressions are, as at once called Aramaisms but, according to Hävernick, the Book of Proverbs also, contains forty words and phrases which are often repeated and which are found in no other book; the Canticle of Canticles has still more peculiarities. On the contrary the Prophecies of Aggaius, Zacharias, and Malachias are without any of those peculiarities which are supposed to indicate so late a period. There is much truth in Griesinger's words: “We have no history of the Hebrew language”.

Proven authorities adduce Aramaisms

As all the other internal proofs against the authorship of Solomon are not more convincing, we must listen to the voice of tradition, which has always attributed Ecclesiastes to him. The Jews doubted not its composition by Solomon, but objected to the collection, or rather retention of the book in the canon; Hillel's School decided definitely for its canonicity and inspiration. In the Christian Church Theodore of Mopsuestia and some others for a time obscured the tradition; all other witnesses previous to the sixteenth century favour the Solomonic authorship and the in-
The book itself bears testimony for Solomon, not only by the title, but by the whole tone of the discourse. The patience, wisdom, and love of the old man are reflected throughout. Moreover, in xii, 9, Qoheleth is expressly called the author of many proverbs. The ancients never so much as suspected that here, as in the Book of Wisdom, Solomonlynly played a fictitious part. On the other hand, the attempt is made to prove that the details do not fit Solomon, and to contest his authorship with this single internal argument. The reasons adduced, however, are based upon textual explanations which are justly repudiated by others. Thus Hengstenberg sees (x, 16) in the king, "who is a child", an allusion to the King of Persia; Grätz thinks of the Edomite priest; but certain points of agreement indicate that the writer speaks of human experiences in general. From ix, 13-15, Hitzig concludes that the author lived about the year 200; Bernstein thinks this ridiculous and opines that some other historical event is alluded to. Hengstenberg regards this passage as nothing more than a parable; on this last view, also, the translation of the Septuagint is based (it has the subjunctive; ὥσπερ βαριῶθε, "there may come a king"). As a matter of fact, Qoheleth describes only what has happened or may happen somehow or in some case; he does not speak of political situations, but of the experience of the individual; he has in view not his people alone, but mankind in general. If internal reasons are to decide the question of authorship, it seems to me that we might more justly prove this authorship of Solomon from the remarkable passage about the snare of woman (vii, 27), a passage the bitterness of which is not surpassed by the warning of any ascetic; or from the insatiable thirst of Qoheleth for wisdom; or from his deep knowledge of men and the unusual force of his style. Considering everything we see no decisive reason to look for another author; on the contrary, the reasons which have been advanced against this view are for the greatest part so weak that in this question the influence of fashion is clearly discernible.

The time of the composition of our book is variously set down by the critics who deny the authorship of Solomon. Every period from Solomon to 200 has been suggested by them; there are even authorities for a later time; Gritz thinks that he has discovered clear proof that the book was written under King Herod (44-4 B.C.). This shows clearly how little likely the linguistic criterion and the other internal arguments are to lead to an agreement of opinion. If Solomon wrote Ecclesiastes towards the end of his life, the whole tone of the book is his explanation; or the judgments of God (III Kings, xi) which then came upon him would naturally move him to sorrow and repentance, especially as the breaking up of his kingdom and the accompanying misery were then distinctly before his eyes (see vvr. 29 sqq., 40). Amid the sudden ruin of his power and splendour, he might well exclaim, "Vanity of vanities!" But as God had promised to correct him "in mercy" (II Kings, vii, 14 sq.), the supposition of many ancient writers that Solomon was converted to God becomes highly probable. Then we also understand why his last book, or one of his last, consists of three thoughts: the vanity of earthly things, self-acquittal, and emphatic adoration to obey the immutable decrees of Providence. The last was well suited to save the Israelites from despair, who were soon to behold the downfall of their power.

There is an unmistakable similarity between Ecclesiastes and the Canticle of Canticles, not only in the pithy shortness of the composition, but also in the emphatic repetition of words and phrases, in the boldness of the imagery, in the obscurity of the whole, and in certain linguistic peculiarities (e.g., the use of the relative ἐν). The loose succession of sententious thoughts, however, reminds us of the Book of Proverbs, whence the epilogue (xii, 9 sqq.) expressly refers to Qoheleth's skill in parables. In the old lists the authorship of Solomon is between Proverbs and the Canticle of Canticles; Septuagint (Babia Batha xiv, 2), Orig., Mel., Conc. Lond., etc., also in the Vulgate. Its position is different only in the Masoretic Bible, but, as is generally admitted, for liturgical reasons.

As to the composition of the book, the critics attack the passages referring to the judgment and immortality: iii, 17; xii, 9; xii, 7; furthermore the epilogue, xii, 9 sqq., especially verses 13, 14; also some other passages. Bickell expressed the opinion that the folios of the original, when brought together, were deranged and completely confused; his hypothesis found few supporters. Ehringer (Masoratexte des Qoheleth, Leipzig, 1890) maintains, in opposition to him, that books had not at that early date taken the place of the roll. There is not sufficient evidence to assume that the text was written in verse, as Zepel does.

Owing to its literalism, the translation of the Septuagint is frequently unintelligible, and it seems that the translators used a corrupt Hebraic text. The Ital and the Copitic follow the Septuagint. The Greek of the Exodus, while translated from the Hebrew, is definitely dependent on the text of the Septuagint. This text, with the notes of Origen, partly forms the Greek and Syriac Hexapla. The Vulgate is a shifful translation made by Jerome from the Hebrew and far superior to his translation from the Greek (in his commentary). Sometimes we cannot accept his opinion (in vi, 9, he most likely wrote quid cupias, and in vii, 12, et ex quo quod peccator). (See the remants of the Hexapla of Origen in Field, Oxford, 1875; a paraphrase of the Greek text in St. Gregory Thaumaturgus, Migne, 1867.) The Chaldean paraphrase is useful for controlling the Masoretic text; the Midrash Qoheleth is without value. The commentary of Olympiodorus is also serviceable (seventh century, M., XCI, 477) and Eccumenius, "Catena" (Verona, 1352). A careful translation from the Hebrew was made about 1400 in the "Greca Veneta" (ed. Gebhardt, Leipzig, 1876).

In the Latin Church important commentators were written, after the time of Jerome, on whom many depend, by Bonaventura, Nicol. Lyranus, Deuts. thesauri, and above all by Pichon (seventeenth cent.), by Malherbe, Cordierius a Lapidis, and Bossuet. Protestant commentators: Schäfer (Freiburg im Br., 1870); Motais (Paris, 1870); Ramsbotham (Paris, 1877); Ramm (Paris, 1890); Zepplin (Freiburg, Switzerland, 1905).

Protestant commentators: Zöckler, tr. Taylor (Edinburgh, 1832); Buttrick, in Speaker's Commentary (London, 1897); Watts (London, 1883); Leimbacher (Hamburg, 1892); Sisemann (Göttingen, 1895); Wilderbee (Freiburg im Br., 1898).

G. Gietmann.

Ecclesiastical Art.—Before speaking in detail of the developments of Christian art from the beginning down to the present day, it seems natural to say something in regard to the vexed question as to the source of its inspiration. It would not be possible here to treat adequately all the various theories, which have been propounded, but the essentials of the controversy may be given in a few words. Afterwards there will be some mention of the principal works which Christian antiquity has left to us and a setting forth of the influence of the Catholic Church in stimulating and directing that artistic spirit which for so many centuries it alone was destined to keep alive.

The Christian Art. There has been much discussion of late years as to the influences which were predominant in the development of early Christian art. Professor Wickhoff in a striking essay (Roman Art, tr., 1900) has contended that in the first century after Christ the construction of the Roman style was evolved both in painting and sculpture, the salient features of which he characterizes as impressionist or "Illusionist". He marks several stages in the growth of this
style, and claims for it especially the creation of what
he calls the "continuous" method of composition, i.e.
a method by which several successive stages of the
same history are depicted together in a single painting.
Further, he contends that this Roman style was
advanced, he suggests the thought that Christian art,
obscured and weakened, it pervaded the Roman world
and maintained its identity throughout the Middle
Ages, until eventually it quickened again into fuller
life under the stimulus of the Renaissance. This view,
an exaggeration of the Romanist hypothesis which long
held the field, has been severely criticized by
many competent authorities and notably by Strzy-
gowski ("Orient oder Rom", 1901, and "Kleinasiern", 1903),
who attributes the predominant influence in the
development of Christian art to the recrudescence of
purely Oriental feeling. This, he maintains, has
always survived at Byzantium, Antioc, and Alexan-
dria, and it became operative once more when the
Greek-Roman artistic tradition at Rome had
exhausted itself after the effort of a few centuries.
Though Strzygowski may go too far when he claims
that even the art of the Romanized provinces like
Gaul came from the East direct and not through
Rome, it seems highly probable that his contention is
in substance accurate enough. It is significant that
Professor André Michel in the monumental "Histoire
des arts chrétiens en France" has endeavoured to
prove that the Christian art of the Middle Ages was
Byzantine rather than Roman in its origin. To Rome
no doubt must be assigned the prevalence of the basil-
ica type of church and the first effective conception
of the possibilities of stone vaulting. But the transfer-
ence of the seat of government by Honorius in 404
from Rome to Ravenna and the confusion that arose
in the Western Roman Empire, had far-reaching conse-
quences upon the development of art. If Rome was at
all times the seat of the papacy, the vicars of Christ
had supreme power over the moral and governing
influence in the social and civil affairs of the
Western world, while more than a hundred years after this,
beginning with the seventh century, no less than
thirteen pontifls who occupied in succession the chair of
St. Peter were of Greek or Syrian origin. But what is
perhaps most important of all, the Latin stock who
occupied what was once the great city, but what now
became only a provincial town, were morally and intel-
lectually effete. The motive power for a new develop-
ment was to come from outside. The impetuous
energy of the Teutonic race was both the latent
possibilities for the arts of peace, when that
energy was once diverted from the strenuous occupa-
tions of a time of war. Once again "Grecia capta
ferum victorem cepit"; but it was Greece enriched
the world with the inheritance of Antioch, Ephesus,
and Alexandria, while the culture that now travelled
west and north found ultimately a more responsive soil
than it had ever met with in Latium. In its adoption
by Goths, Franks, and Saxons the art of Byzantium lost
its rigidity, and something of its formalism. It was
a living stream of development, and long before the Renaissance once
more directed the minds of men to classic models, not
only architecture and sculpture, but the arts of the
painter, the iron-worker, the goldsmith, and the glass-
founder were full of vigorous life and promise
throughout all Western Europe.
The earliest specimens of decoration employed for a
Christian purpose are found in the Roman catacombs.
In the most ancient examples of all, the private cham-
bers of Roman Catacombs, and in the succeeding
centuries, there is decoration indeed, but it is only
in a negative sense that it can be called Christian art,
for while the abundant frescoes seen in the cemetery
of Domitilla and notably in the cubiculum of Amplia-
tus exclude such pagan elements as would be un-
common, the character of the painting is in every
respect the counterpart of the ornamentation of the
contemporary private houses buried at Pompeii.
There is nothing distinctively Christian. Perhaps the
frequent recurrence of the vine as a principal element
in the scheme of decoration may have been meant to
symbolize the fruit of Christ, the true vine. But
this is doubtful. Symbolism occurs early, but it can
only be recognized with confidence in the more public
cemeteries of the second century, e.g. that of St.
Callistus; here, under the influence of the "Discipline of
the Secret", it is hardly wrong to recognize the true
beginnings of a distinctively Christian art. But in it was
not until the great degree wasimitative of the
departure of the more remote forms of pagan decoration familiar at the
period. It seems constantly to be forgotten by those
who discuss this subject that it was the deliberate ob-
ject of the early Christians, during the ages of suspicion and
persecution, to exclude from their places of sepul-
ture all that would by its conspicuousness or strange-
ness attract the notice of the casual pagan intruder.
No wonder that the theme of the Good Shepherd is
introduced again and again in the frescoes of the early catacombs. This is
an index on which some critics have sometimes pretended, of the survival
of an idolatrous mythology, but the very likeness of the bearless Good Shepherd to the type of the pagan
Hermes Kriophoros—a likeness, however, which is never so exact as to make it possible
to recommend to those who wished to hide their
praying eyes of the people around them. In the same way the Orante, or
praying figure, symbolical of the Church or the indi-
vidual soul, bore a general resemblance to the statues
of Piatas, familiar enough to the ordinary Roman citi-
zen, while the dove, which was to the Christian elo-
quent of the grace of the Holy Spirit, would not have been distinguished by his pagan neighbour from the
birds consecrated to Venus. The deeper mysteries of the Eucharist and
other associated subjects were more artfully veiled in the frescoes of those early
centuries.
No doubt the fish was an object familiar enough in all kinds of pagan decoration, but that very
fact rendered it most suitable for the purpose of the
Christian when he wished to symbolize the marvellous
workings of Christ (Ἰησοῦς Χριστὸς Θεοῦ Φίλος Σωτήρ = ἸΧΘΥΣ, the fish) in the waters of baptism. What again
was more common in decoration than some form of
banqueting scene—a theme also often utilized by the
worshippers of Mithra—but these feasts depicted upon
the walls of a sepulchre had a deeper significance for the Christian, who by some
minute sign, the little cross, it may be, impressed upon the
loaves, or the fishes which decked the frugal board,
was quick to discern the reference to the life-giving
mystery of the Blessed Eucharist. There are also
human figures and Biblical scenes, especially those
connected with the liturgy for the departed—for example,
the miraculous restorations of Jonah and Daniel and
Lazarus—and in one or two isolated instances we may
perhaps recognize a presentment of the Madonna; but
the reference is always indirectly indicated by the initiated. It was under these circumstances that the
instinct of religious symbolism was developed when
the art of the Church was yet in its infancy, but the
tradition thus created has never departed from
true religious art throughout the ages.
With the triumph of the Church under Constantine
the necessity for the sedulous hiding of the mysteries of
the Faith in large measure disappeared. From a.d.
315 to the end of the fifth century was a period of trans-
formation and development in Christian art, and it
may be conspicuous and recognized in the later
examples of the Roman catacombs. Biblical scenes abound, and the
figure of Christ, no longer so frequently as the
beardless Good Shepherd, but crowned with a nimbus
and sitting or standing in the attitude of authority, is
fearlessly introduced. The nimbus is also extended to
ECCLESIASTICAL

others beside Christ, for example to Our Lady and some of the saints. Sculpture again, though in the catacombs the traces it has left are relatively few, now for the first time became the obsession of painters in the service of the Church. This is the age of the great Christian sarcophagi so wonderfully decorated with the figures of Christ and His Apostles and with biblical scenes still full of symbolic meaning. The old ways of the period of persecution had it plain, became not only an instrument of praise in the Church, but a symbol of the faithful. The allegorical method of representing the mysteries of the Faith did not disappear at once. But though with the triumph of Constantine the outline of the "chrisme", or the Greek monogram of Christ, was universally held, the devices of the Renaissance reappeared, and even into the coining, the crucifix as a Christian emblem was as yet practically unknown. For more than a century the memory of the Sacrifice of Calvary was recalled to the minds of the faithful only by some such device as that of a plain cross impressed with the figure of a lamb. The first representations of the figure of the Saviour nailed upon the Rood, as we see it upon the carved doors of Sta Sabina in Rome and in the British Museum ivory, belong probably to the fifth century, but for a long period after that this subject was not represented in Christian art, or mosaics is hardly recorded anywhere before the time of Justinian (527-565).

MOSAICS AND OTHER EARLY CHRISTIAN ARTS.—To find the beginning of the use of colour in the Roman Empire to anything like an important extent, we look at the Roman pavements composed of marbles of tessere, and representing in a flat and somewhat uninteresting manner mystical beings, extraordinary animals, fruits, flowers, and designs. Between these Roman pavements and one branch of the earliest Christian art, that of mosaic, there is a very close connexion. It seems also possible that some of the early efforts of the art of the Christian Church are to be found in the decorations of gold on glass which have been discovered in the catacombs. Upon these glasses, dating from the third to the fifth century, are found representations of Christ and of the Apostles, as well as drawings in gold-leaf, partly symbolic and partly realistic, referring to the miracles of Christ, the emblems of the Seven Spirits, a future life, and the events narrated in the New Testament. Simple and architectural art is in every way the most pleasing of the mosaic beauty. The primitive Church included within itself, not only the poor and humble, but persons of distinction, rank, and attainment, and it is clear from an examination of these drawings that some were executed by the hands of those who were possessed of a certain sort of skill, and who had been trained in a knowledge of Greek and Roman art. Contemporaneous with these, and earlier, are frescoes painted upon the walls of the catacombs, including portraits of the Apostles and of Christ, representations of the martyrs, naive pictures of the scenes from Holy Writ, and simple illuminatory symbolism. Then, between the fourth and tenth centuries, there is a long series of mosaics, in which for the first time strong evidence appears of a sense of colour. A few specimens of these mosaics adorned the catacombs, afterwards they are found in the oratories and places of worship of the primitive Church. It was speedily recognized that mosaic decorations possessed certain strong claims to attention, such as other methods of decoration lacked. While the artist himself must be responsible for fresco work, very much of the labour was done by others than he, and it was left to the public to sit in the subordinate position, and once the artist had drawn out the pattern and scheme which was to cover, for instance, the apse of the church, the actual manual labour of fitting in the tessere could be done by workmen. Then, again, the labourer who was to do the actual work in the mosaic was permanent, an actual part of the structure which it decorated; it did not vary in colour by reason of light or atmosphere, and could be cleansed from time to time. It was also capable of strong, broad effects, rendering it peculiarly suitable to positions at the end of a building, somewhat above the line of sight, and its colour could be made so emphatic and so brilliant that the darkest of curves or hollows could be lit up by its luminous beauty. It is small wonder, therefore, that from the very earliest period the Church drew to itself the skilful workers in mosaic, and these can be seen by the wonderful remains at Ravenna, in Sicily, on Mount Athos, near Constantinople, and notably at Rome, to decorate the interiors of the basilicas, and to portray upon their walls the emblems of the Divine tragedy, of the sufferings of Christ and of His saints, or to represent in hieratic magnificence the figures of Christ in glory, or in benediction, so that the scenes might be well in sight of all the worshippers within the little churches.

From the representation of single figures at the end of the church, the work speedily spread to more elaborate adornment of the walls, and from the simplicity of a single emblem, a single figure, the artistic spirit grew until it represented in pictorial effect the parables and miracles of Christ, or spread long triumphant narratives. The Apses of the apses are filled with scenes from the life of Christ, and the walls of the aisles and transepts of the larger churches. There is no city in Europe in which this earliest Christian art can be so well studied as at Ravenna. The difficulty of approaching the place in its out-of-the-way position has enhanced its extant, whereas the monuments in which it is so rich, and which relate so exclusively to its early history. The baptistery dates back to the last years of the fourth century, and was later ornamented in mosaic. There is in it a representation of the Baptism of Christ, and a circle of the Twelve Apostles; the figures, of surpassing dignity, appear to move round the dome with a swing and grace very remarkable in effect. Another circle of mosaic decorations in the same building represents the four Books of the Gospels open upon four altars, and between them four thrones of dominion with crosses; these mosaics have never been restored, and are in the condition in which their makers left them. The huge font intended for baptism by immersion, which stands below them, is proof of their antiquity, but the actual inscription of dedication with its date still exists on the rear, and metal work consisting of the great door of the baptismal chapel of the archbishop in the archiepiscopal palace are mosaics of the fifth century made during the reign of Archbishop St. Peter Chrysologus, while in the tomb of the Empress Galla Placidia are mosaic decorations of her respectable position, and it is probable that other works have been restored. The very finest mosaics in Ravenna, however, relate to the great heresy of Arianism. In the time of Theodoric, the old heresy was beginning once more to make itself felt. Arius had long been dead, Athanasius had fought his heretical bands against the Arian heresy, the Councils of Nicaea and Constantinople had been held, and had pronounced against it, and the Nicona doctrine had been confirmed, so that within the Church the heresy could no longer exist, but outside the Catholic Church there were still those who accepted it. When Theodoric, King of the Ostrogoths, came into power, Arianism became once more a force to be reckoned with, and the emperor erected a cathedral and a baptistery at Ravenna for his Arian bishops. It is in the church now called Sant' Apollinare Nuovo, which was new put in place of an old building. In the miter array of saints and virgins alluded to above exists, the greater part of it as it was when Theodoric erected the church fourteen centuries ago. In the baptistery of the Arians, near by, the mosaics upon the roof were put in place of the other, the baptistery became Catholic, and therefore date from about 550. It is not only, however, in mosaics, that Ravenna
illustrates the early art of the Church; one of its great treasures is the ivory chair of St. Maximianus (546–560), made in the first half of the sixth century, and carved with the exception of a very short time when it was carried to Venice in 1001. It is perhaps the finest example in existence of such ivory carving, and was the work of Oriental craftsmen, who entered into the service of the Church and carved this chair with its delicate and beautiful illustrations of the miracles of Christ and the history of Joseph. The same city can illustrate other branches of applied art, for the orphrey and textile fabrics made for San Giovanni in the fifth century, the sixth-century mosaics by the shops of St. Agathius (556–560), his processional cross of silver, and portions of his cathedral chair, are still preserved in the cathedral; while the art of carving in marble of the same period is exceedingly well exemplified by the splendid stone sarcophagi existing in various churches of the city. Following the time of Theodoric came the rule of the Emperor Justinian (527–565), and the episcopate of St. Ecclesiastus (521–534), while the mosaic decoration in the church of San Vitale, done in the early and middle part of the sixth century, illustrate the change that had taken place in the art, and the exquisite beauty of the mosaic work the Church was able to make use of at that time. A little journey outside Ravenna to the church of Sant' Apollinare in Classe will enable the student to bring his study of early church architecture up to a later period, as in that church there is the great mosaic erected by Archbishop Reparatus c. 671, the carved throne of St. Damianus (688–705), and the sarcophagi of various archbishops, extending in date to the end of the seventh century, and bearing religious emblems of very considerable importance. Attention should also be drawn to the pictures on unprepared linen cloth, executed in a material similar to transparent watercolour, ascribed to a period antecedent to the third century. They chiefly purport to be representations of the features of Christ. The most notable of course is the one known as the Handkerchief of St. Veronica, preserved in the Vatican, and which none but an ecclesiastical of very high rank is allowed to examine closely. Although the most important, it is by no means the only example of such a nature. There is another in Genoa, a third in the church of San Silvestro in Rome, and others in various European shrines. The metal work executed during the Ostrogothic occupation of Italy was often work commissioned by the Church for use in the ceremonial of the service, and features in the middle of the seventh century the development of classes in which to put relics, and vessels for use at the altar, belonging to this period of primitive art, are the direct result of the teaching of the Church. As, however, the religious feeling spread more and more, the desire arose among Christians to have artistic presentations of the great events of the Faith in their houses, and it is possible that the beginnings of what we may term portable pictorial work arose in this way. The very early tempera paintings on wood of Eastern and Byzantine character, some of which are actually ascribed to the hand of the Apostle St. Luke himself, may very likely have been executed, not entirely as decorations for the Church, but that the wealthier members of the community, at least, might have in their homes, in the privacy of their own oratories, some cherished representation of the Man of Sorrows Himself, or of some Apostle or saint from whom the owner was named, or towards whom he had some particular affection. In this way may perhaps be traced the beginning of the history of the icons, which are so important a feature in the life of the Eastern Church, and in many cases being found in all the rooms occupied by the various members of the family.

Ecclesiastical Art in the Middle Ages.—Leaving primitive times, the period of the Middle Ages is one of enormous artistic importance, and it is an era in which the influence of the Church has been at its height. To this period there does not belong any very long series of artistic objects relating exclusively to domestic life. There were, of course, articles of domestic interest marked by artistic skill, there were objects of personal decoration, and a few, such as the altar frontals, carried into the home; but the choicest talent and the efforts of the most supreme genius were almost invariably given to the work of the Church, and even where the commissions related to domestic ornamentation, there was generally a religious element in the decorations and the use of religious symbols. To the Middle Ages belong the magnificent works in enamels, executed for church work. There are the tall pricket candlesticks, superb chasses and reliquaries, altar-crosses, crosiers, shrines, censers and incense boats, crucifixes, morses for cope-edges, and medallions for sacred vessels, triptychs and polyptychs for use on the altar, plaques for book-covers, especially for the adornment of the Book of the Gospels, cruets, basins, chalices, and book-binding in metal en- crusted with jewels. The very first British enamels were merely a kind of coarse decoration, applied to the adornment of shields and vases; but to the eleventh century belong the vases, and drinking-vessels, but, when mention is made of the Ardagh Chalice and the Alfred Jewel, it will be realized that a period in enamel work has been reached when the Church laid its hand upon the craft. Concerning the latter, chiefly of the Alfred period, it is broadly stated that the most probable theory is that it was the ornament applied to the head of an ivory pointer used by the deacon when reading the Book of the Gospels, and that therefore this exquisite object now in the Ashmolean Museum at Oxford is one of the earliest examples of ecclesiastical enamel work. The Ardagh Chalice, of translucent enamels on silver and gold, is only one of a group of Irish shrines, reliquaries, missal-covers, crosiers, and crosses, similarly decorated, and it would appear likely that these Irish or Celtic enamels, of which half a dozen adorn the altar of Sant' Ambrogio in Milan, are perhaps among the earliest existing examples of the art in connexion with ecclesiastical possessions. In the first part of the eleventh century, Byzantium appears to have been the head-quarters of the work of ecclesiastical enamelling, and the pectoral cross in the South Kensington Museum may be taken as an example of early Byzantine work. The art of the enameller was also in existence in Germany at an early date, and here also was applied exclusively to ecclesiastical objects. Towards the twelfth century the art of Limoges came into prominence, and from that time down to the end of the thirteenth Limoges was the centre of production. In Italian enamelling, the wonderful translucent reliquary, dated 1338, the work of Ugolino of Sienna, in which is preserved the great relic of the Holy Corporal at Orvieto, is a masterpiece of the craft. The altar-frontal at Pistoja belongs to about the same period, and a little later comes the reliquary made by the brothers Arezzo, while during the whole of the fourteenth and fifteenth centuries the enamellers were kept hard at work in Italy producing objects intended for Church work in two or three distinct processes, either that of floating transparent enamels, known by the name of bassetine, or still another process called encrusing. At the end of the sixteenth century, and the beginning of the sixteenth, in the era of the Renaissance, the art left Italy, and, taking a new form, that of painted enamels, or more strictly, painting in enamels, had a recredescence in France, in the very same place, Limoges, in which the old enamels had been produced. It is in this division of applied arts that the remarkable embroierys which adorned all the sacred vestments, representing, in the most wonderful pictorial
ECCLESIASTICAL

effect, groups of saints, sacred scenes, and religious symbols. On the chasubles, cope, albs, stoles, maniples, burses, veils, mitres, frontal, super-frontals, and altar-covers, palls, bags, and panels of that period, are to be seen triumphs of art, and its employment in excess of beauty, and with a glorious richness of colour, by the hands of the faithful women of the day and designed by the men of supreme genius whom the Church had attracted to her side. Some of the very finest of this embroidery work was English, and references found in the history of English embroidery before the end of the seventh century, as St. Aldehelm. Bishop of Sherborne, celebrated in verse the skilful work of the Anglo-Saxon embroiderers. Indeed, at one time, rather too much attention in the convents for women seems to have been given to this fascinating needlework, for a council held in 747 recommended that the reading of books and psalm-singing by the nuns should receive greater attention, and that not quite so many hours should be spent in needlework. As early as 855, the Anglo-Saxon King Ethelwulf when journeying to Rome took with him as presents silken vestments richly embroidered in gold, executed in his own country, and there are fragments of a stole and mantle, found in the tomb of St. Cuthbert (d. 687), which were produced under the auspices of the wife of King Ethelred and placed in his saint's coffin. From that time down to the middle of the sixteenth century there was a constant demand for the work of the skilled embroiderers, and this section of art, so particularly suitable to ecclesiastical purposes, was one of perennial richness. It is well that some stress should be laid upon the question of embroidery, inasmuch as in the Middle Ages it was almost exclusively a branch of ecclesiastical art, and nearly everything that can be termed of importance in fine embroidery, especially in fine English embroidery previous to the nineteenth century, is ecclesiastical. Enormous labour was given to the production of these beautiful vestments, and as an example it may be mentioned that a frontal presented to the Abbey of Westminster in 1271 took the whole labour of four women for three years and three-quarters. Lincoln Cathedral in the fourteenth century possessed over six hundred vestments in its sacristy, while the Abbey of Westminster had very nearly double as many, and even the English churches were far behind those of Spain in the sumptuous manner in which they were adorned. Embroidery was arrayed in every possible necessity for the work, and no branch of art has a greater importance between the twelfth and the fifteenth centuries than this one of embroidery. Fortunately, a sufficient number of the old vestments have come down to the present day to give a satisfactory idea of their importance and beauty, and the records and inventories of church goods prior to the sixteenth century afford still further information concerning this branch of art. The spirit of devotion which has ever given the instinct to decorate the house of God with the very finest works of which man is capable led to this lavish display of artistic genius in the service of the Catholic Church, but it must also be borne in mind that there were other, subordinate causes to account for the work. The Church, following its Divine Master, has always imputed the importance of good works, and it has ever encouraged the faithful to give to its service of their best. If their skill was in metal-work, in embroidery, in carving wooden figures or wonderful choir-stalls, in stained glass, in jewellery, in fresco or mosaic, such art was to be ascribed to God's service, as the chosen gift the artist had to lay upon the altar, symbolic of his devotion to his faith. Even beyond that, there came the occasions in which the penance for sin took the form of the devotion of artistic gifts to the work of the Church. The venerable Eadward, for example, which this artistic labour was the constant employ-

ment of those persons who had devoted their entire life to the religious career, in the various monastic houses belonging to the different orders. One further cause must not be overlooked, the fact that it was the Crown, the clergy, and the nobility who alone could command the necessary reason of the productions of the men of genius of the time, and that while the commissions given by the clergy would most certainly be for church purposes almost exclusively, those given by the Crown and the higher nobility were in almost all instances for exactly the same purposes, and this for a double reason. First, the desire to render the home beautiful had not yet arisen to any considerable extent, and secondly, there was every wish to make the private chapel or oratory, the public church or royal sanctuary the focus of life, both to carry out the instincts of the religious feeling and please those who held control of spiritual things, as well as to he aup a reward for good deeds which would have a corresponding equivalent in the future life and might serve as retribution for the deeds of violence that formed so integral a part of the life of these centuries.

The period under consideration was not so much one of portable pictures as of applied art, devoted to the interior decoration of the sacred buildings, and to every other piece of the service of the altar. One section of ecclesiastical art deserves special mention: this is the monastic orders, namely, that of illumination and transcription. All over Europe the monks of the pre-Renaissance time were engaged in preparing the books of the day, and these books were almost exclusively religious purposes. The number of those concerning domestic matters, agriculture, or the classics, transcribed by these diligent students, is relatively small, but the series of religious works from their diligent pen is an exceedingly long and executed for the par- paring manuscripts for use within the cloisters and for the service of the altar, as well as for the great patrons of the monasteries who desired to have books of devotion for their own use, or for gifts to other sovereigns or noblemen. These manuscripts are of incomparable beauty, being transcribed with extraordinary skill upon the finest of vellum, and adorned with initial let-
ters, calendars, and illustrations, that are triumphs of artistic skill, and marvels of ingenuity. The Books of Hours, Missals, Breviaries, and Psalters having their origin in the cloisters were largely employed in France, Germany, England, and Italy during the Middle Ages are now among the greatest artistic treasures of the world, and with regard to them there is one very striking fact which must never be overlooked. This does not re-

late exclusively to the period of devotion, it belongs nearly as much to every work of art produced during this period, and it is the fact that these triumphs of skill for the most part anonymous. In the period hardly any great names are recorded in connexion with such work. There is a wonderful series of artistic treasures, but signatures scarcely ever exist. Here and there the name of an illuminator is known, or perchance the name of the place where he worked, occasionally the name of a wood-carver or a worker in stained glass has been preserved and there are just a few cases in which the name of the celestial monk who painted over the manuscript is known, but the instances are exceedingly few, and they occur, one might say, by accident rather than by intention. With respect to illuminations in books of devotion, one monk took up the task where the other had left it. Death caused no cessation of the self-imposed labour, but of course it never died, and in the present day great literary works are undertaken by the leading orders, in the full knowledge that to carry them out will extend far beyond the life of the writer who begins the undertaking, but that the task as a whole will be equally able to continue the task, so in the early days the monks laboured in
their cloisters, each at his own work; each generation of monks in the footsteps of the former, hiding the individual identity in the name of the order and content, as the work was done for the greater glory of God, that while the work should remain, the monks themselves should not. The individual work was more striking in considering this period than the singleness of aim and devotion to duty which characterised these artists and led them to have no desire to perpetuate their own names, but simply to carry out to the best of their ability the allotted task for the glory of God and His Church. Partly, of course, the reason was that the dignity of personal labour was not fully realised, but the reason for this anonymity lies mainly in the facts already stated, that the work was religious work, that the aim was a religious aim, and that the identity of the person did not matter, so long as the Church was properly served by her faithful. There is one other aspect of the artistic work of the pre-Renaissance time to be alluded to. It is by no means confined to the pre-Renaissance period, but extends through the succeeding centuries, and it should extend to all the artistic labour of the present day, but it is more especially a feature of the period under discussion. It is that determination which is never satisfied with the work which has been done, but which is always straining forward for finer and better work. It is the unquenchable, unceasing desire for perfection which has always characterised the greatest art-workers of the world, and it finds its earliest and perhaps its strongest development in this period.

The early Italian painters fall into two groups: the first, that which may be called the group of the miniaturists or illuminators, as, for example, Enrico, Berglinieri, and Oderico; the second, the very primitive painters, such as Margaritone, Spinello, Ucello, Cimabue, Duccio, Memmi, Lorenzetti, and the various early masters of Siena and Florence. The predecessors of these artists, for the most part, worked without any reference to nature, under Byzantine influence, copying slavishly the methods fixed by the Greek Church. Their pictures, whether they illustrated scenes from the Sacred Writings, the legends of the Church, or the lives of the saints, were designed and painted according to fixed rules. Their work was inferior to that of the Byzantine workers in mosaic, but followed the same conceptions of art; in every way, in attitudes, compositions, types of face, folds of drapery, it is still the work of artists who, following the definite rules of tradition, so that the painter was little more than a mechanic. Still, despite what may be termed the ugliness of this particular school, there was a strong spirit of devotion exercising the minds of the artists, and they were able to put a certain amount of sympathy into their hard, angular productions, thus showing that their works were painted with religious sentiment, and with a desire to evoke that sentiment in others. Margaritone was one of the first to break through the hard crust of rules, and although his works do not show any very striking novelties based upon that of his predecessors, yet in his pictures and in those of the earliest painters of Siena, we begin to find the desire to paint a Mother of God bearing some living resemblance to a Mother of Man. There is a struggle towards tenderness and sweetness of countenance, a desire to represent raiment gently floating in easy curves, and a greater command of sentiment, together with a simplicity in story-telling, which mark this primitive school, and prepare the way for the forerunners of natural treatment, Giotto himself.

PERIOD OF THE RENAISSANCE.—The great era of transition from the Middle Ages to modern times which is called the Renaissance may be divided into the three periods of the Early Renaissance, Full Renaissance, and Late Renaissance. Here again the influence of the Church is found just as strong and as definite as in the past. The growing desire to have magnificent churches created the necessity for other workers in art. The first years of this period give in Italy the earliest workers known by name in fresco, in portraiture, in pictures, Cimabue, Orsini, Giotto, and others. In their "frescoes" the "dripped"-in effect, the tempera paintings of Assisi, Siena, Pisa, and other parts of Italy, is seen the beginning of the long list of painters whom the Church enlisted in her service. In bronze work Ghiberti produced the gates of the Baptistery of Florence, and with the appearance of Brunelleschi a new school of architecture for ecclesiastical buildings arose. In this period belongs also the introduction of printing, and here again, just as emphatically, the Church took the lead. The earliest printers were churchmen, belonging to a religious order, the earliest books those of religion—the first actual printed sheet being the Indulgence of Pope Nicholas V—followed by a long list of religious and liturgical works, Sacred Scriptures, and patristic literature. In the Low Countries the Van Eycks developed the methods of oil-painting and there arose a great school of artists, among whom were Van der Goes, Van der Weyden, Bouts, Crispius, Memling, and others, who formed the transition from the Gothic school. Their most important works were altar-pieces, and in some cases all their paintings were of a religious character, while in others the paintings not only served the various churches but were also commissioned the altar-pieces, or who had had their own private chapels decorated by these artists; therefore the intimate connexion between art and the Church was just as close as ever. Towards the close of the Early Renaissance period is found the work in sculpture of Donatello and those of his school, Desiderio da Settignano, the Rossellini, Duccio, Verrochio, and Mino da Fiesole; almost all the fine work of these men was for ecclesiastical purposes. Here and there are a single detached statues, as for example the Pietà of St. Gherardo, and the Crucifix by Donatello; then it must be remembered that these were figures of saints, and intended for buildings more or less of a religious character, or for those erected by guilds distinctly religious, while some of the sculptors named, as for example Duccio of Perugia, were only known by the work they executed for the decoration of churches. During this period among the workers in Germany were Adam Kraft, Veit Stoess, and the Visschers, who are associated with the superb tabernacle, the series of Stations of the Cross and the great bronze shrine in the church of Strasbourg, as well as with other works of religious work. In England, the tomb of Henry V, and that of Henry VII by Torrigiano, both at Westminster, must not be overlooked. Every branch of artistic craftsmanship was at this time employed for the benefit of the Church. Finiguerra, Ghiberti, and other sculptors were at work at the great silver altar of the Florentine baptistery. The jewellers, Ghirlandajo, Verrochio, and Francia were making jewels for altar vestments, medals for the great ecclesiasties, and pictures for the churches, Luca della Robbia was preparing his vitriol and enamel medallions, while upon that of his predecessors, yet in his pictures and in those of the earliest painters of Siena, we begin to find the desire to paint a Mother of God bearing some living resemblance to a Mother of Man. There is a struggle towards tenderness and sweetness of countenance, a desire to represent raiment gently floating in easy curves, and a greater command of sentiment, together with a simplicity in story-telling, which mark this primitive school, and prepare the way for the forerunners of natural treatment, Giotto himself.

In England, the tomb of Henry V, and that of Henry VII by Torrigiano, both at Westminster, must not be overlooked. Every branch of artistic craftsmanship was at this time employed for the benefit of the Church. Finiguerra, Ghiberti, and other sculptors were at work at the great silver altar of the Florentine baptistery. The jewellers, Ghirlandajo, Verrochio, and Francia were making jewels for altar vestments, medals for the great ecclesiasties, and pictures for the churches, Luca della Robbia was preparing his vitriol and enamel medallions, while upon that of his predecessors, yet in his pictures and in those of the earliest painters of Siena, we begin to find the desire to paint a Mother of God bearing some living resemblance to a Mother of Man. There is a struggle towards tenderness and sweetness of countenance, a desire to represent raiment gently floating in easy curves, and a greater command of sentiment, together with a simplicity in story-telling, which mark this primitive school, and prepare the way for the forerunners of natural treatment, Giotto himself.
turiocchio, Francia, Albertinelli, and Fra Bartolomeo, almost exclusively religious painters, prepared those masterpieces of religious art to set upon the altars of the private chapels and great churches of the day, that are the highest points of the late-mature phase of all religious art.

This era was also the period of Humanism, of the return to the love of the classics. It may be difficult in this complex period to mark the boundary line between religion and that strange paganism which was an emblem of the classical revival, but the Certosa of Pavia and the works of the early Quattrocento painters, represented by such men as Schongauer and the elder Holbein, mark that side by side with the Humanistic movement there was a strong religious one. In this religious movement art had its full share, and engaged in its tasks, not however with the suavere simplicity and singleness of aim which belonged to an earlier period, but still with a definite determination that the best products of artistic craftsmanship should be devoted to the service of God. There was, however, a growing desire that the home should be more beautiful and more luxurious. The decoration of churches was ceasing to be the sole aim of the artist — worker, and he was finding other fields, but the chief encouragement of art still came from the Church and for the Church, and even upon domestic work the Church set her seal. The period of the Old Renaissance may be taken as lasting from 1450 to 1550, and here must be noticed the advent of a new movement in art, or at least a stronger development of what had undoubtedly begun to arise in the previous century. Hitherto, in pictorial art, notably in that of Italy, the aim had been form, drawing, composition, draughtsmanship, and the expression of spiritual conceptions rather than colour; but in the Venetian School, that took its rise in the earlier century with the first Bellini, Carpaccio, and Crivelli, and that was to see its development at this time in Titian, Veronese, and Tintoretto, the claims of colour gain a supremacy over the kindred branches of pictorial art. The Venetian School, as the one in which brilliant colour attains to its apocalypse, and everything else is subordinated to it. The simplicity of aim which characterized such a man as Fra Angelico passed away, the devotional feeling that marked the works of Albertinelli and Fra Bartolomeo gave place to an overpowering desire for decoration as such, and in Venice, although the Church commissioned the great altar-pieces and the scenes of account for which the noble artists were responsible, it had to be content to accept Venetian tradition and to see religious scenes treated as gorgeous pieces of sumptuously coloured decoration. Although there might not be the simplicity of a past generation, yet the brilliance displayed by the artists the same desire to offer to the Church the greatest works of their genius. In this period of the Full Renaissance are found the work of Raphael and of Michelangelo; of Cloutet, Mabuse, and Scorel; of Dürer, Holbein, and Cranach; of Leonardo da Vinci, and of Correggio, while in applied arts there was immense industry and great development. The German metal-workers and goldsmiths prepared church vessels innumerable; Cellini and Caradosso produced ornaments for church vestments; the screen and the woodwork for King's College Chapel, Cambridge, typified the ecclesiastical wood-carving of the time; while the stained-glass windows at King's College Chapel, in other chapels, and in great churches show what was attained in this branch of ecclesiastical art.

The fall of Florence marked the close of the period of great art in that city, while the paintings and tapestries executed for Francis I at Fontainebleau, for Louis XII at Tours, and some sculpture done by Michelangelo for the Medici Chapel, all point out the enhanced power of the Humanistic movement and the devotion of that devotion to faith which had been so marked a feature of the earlier centuries. The epoch of the Late Renaissance, extending from 1500 to 1600, and overlapping that of the Full Renaissance, was still, however, distinguished by a considerable amount of worklessness of all kinds. The paintings of Luini, Gaudenzio Ferrari, Andrea del Sarto, Sodoma, Bronzino, and Peruzzi, are strongly religious, full of right feeling, and almost exclusively done for churches, religious houses, guild chapels, and private oratories, but outside of Italy the connexion between the Church and art was by no means so apparent; Spanish supremacy in Northern Europe had been destroyed, and 1576 was marked by the rapid decline of Spain. The Iberian goldsmiths and iron-workers still certainly produced their famous grilles, jewels, morsels, and reliefs, but the work that needlework the finest workers of Castile were elaborating some of the most perfect examples of church vestments that have ever been produced. In bronze, the smiths of Aragon were casting superb church candelabra, and some of the weavers in France and England were producing tapestry decoration for churches; but the greater part of the Gobelin, Brussels, and Mortlake tapestry-weaving was for domestic use, the greatest architects were working on domestic architecture, the potters on domestic pottery, and the printers and engravers upon work which was not predominantly religious. The period of the Old Renaissance stood out, however, as representing persons of deep personal religion, who brought their own devotion to duty to bear upon the work they executed. Such men were Giulio Romano, Palladio, and the Behaims, but the period of that supreme hold which the Church had retained upon the art of the world, for which she had initiated, developed, and encouraged, was passing away, never more to appear in its full fruition. Some reference should be made to the system under which during this time many of the great decorative schemes were executed in Italy, where the behaim's had the Church given to the Italian painters took various forms. It was permissible for an influential or a wealthy family to have allotted to it a small chapel in the large parish or town church, and the decoration of the chapel was left to the care of the family whose name it received. In some cases, these chapels were built onto the church, and in such instances an architect, a builder, a decorator, and an artist were all employed, and the Church gladly gave permission for such additions to the church structure, and provided a fund, for which the Church could do and an opportunity to make an endowment for perpetual Masses for its deceased members. In cases where a new structure was not erected, a portion of the existing church was enclosed as a private chapel, perhaps in memory of a father, a mother, or a child, and a painter of repute was called in to devise a scheme of decoration for its walls, in which would be introduced the figures of saints to whom the deceased persons had been dedicated, or scenes from the lives of the secular saints; in many cases life-size figures of the saints were represented with their hands upon the kneeling figures of the donors of the chapel. There was no thought of an anachronism; it was considered perfectly right that representations of persons who had died but a few weeks or months before should be introduced into the scenes in which the saints of early church history were depicted. It then became the ambition of later members to add to the beauty of the family chapel as means allowed. The walls having been decorated, an altar-piece would be painted by another artist, while perhaps, following him, yet another third would ornament the choir, while men would be called in to supply objects used in the sacred service, or vestments and books for the priests. In this way these little chapels became shrines for artistic work, the productions of many hands, representing the desires of many persons to place their work at the service of the Church, to act dutifully
towards the family itself, and to make a suitable offering in recompense for crimes committed. Another consequence of this religious asceticism was the rivalry in their profession, to decorate different walls of a church, or the two sides of an altar-piece, or again when some great addition was made to the fabric, on account of an important event, such as the canonisation of a local saint, or a marked interposition of Providence on behalf of the town, different influential persons in the place would undertake to be responsible for portions of the building, each calling in his own favourite painter, and in this way the work would be completed. Or it might be that an order desired to decorate a church or house with portraits of the ancestors of the family, and the commission would be given to some notable artist, who perhaps was unable to complete the task, or who died before its completion. In such cases, others were called in to complete it, and in this way the fabric was beautified by various successive hands.

The number of definitely personal commissions which the sixteenth-century artist had was small, as even in the instances where a patron ordered a picture, it was generally an altar-piece for the family chapel, or else the decoration of some building belonging to the town, or to the church, the guild being nearly always a religious association, the commission came under the category of religious work. It is all this which marks the great distinction between art and craftsmanship previous to the sixteenth century, especially for Muscovites of Christianity to about 1260 in Italy, and about 1460 in Northern Europe, the dominant art is architecture, chiefly employed in the service of the Church, and the art of painting and carving were only applied subordinate to its enrichment. During the Renaissance period the intensive arts, sculpture, painting, and the various art-crafts began to develop and detach themselves, to exist and strive after perfection on their own account, and while architecture still held an important position, it was no longer dominant; the arts which supplied the interior decoration of the building, and the objects needed in the service of the Church, ceased to be considered as subordinate, but were taking each its own high position under the guidance of workers of supreme genius. From the period, however, of the Full Renaissance, the great dignity of architecture begins to diminish, especially as regards ecclesiastical buildings, and architects devoted themselves almost exclusively to domestic and civic work. Architecture ceased to be personal, democratic, local, and became professional and more or less uniform throughout the country, which would cause the more or less uniform style, which otherwise would have been severely because the designing of detail became in many cases the work of others than the executant workmen. The same sort of difficulty was baffling the pictorial art and the arts of the craftsmen. The personal element was no longer the main strength of an art. The ecclesiastical side of the work was almost non-existent, and the crafts suffered by reason of the fact that the commercial element had entered into art, and the adornment of the house, the palace, and the person was considered of far greater importance than the adornment of the church, and the sacrifice of the life of the worker for the greater glory of God.

Post-Renaissance Period.—There are certain political explanations of this great change between the art of the sixteenth and the art of the seventeenth century. There were several forces at work which were hostile or indifferent to artistic development, such as the religious, dynastic, and commercial wars, the difficulties of the Reformation, and constitutional problems, while the grouping together of small towns into larger provinces and countries was doing away with the rivalry of the craftsmen in the small places, and permitting a spirit of greater uniformity in style to spread throughout a large section of Europe. Add to all these colonial expansion, huge enterprise, and great commercial prosperity, constantly broken into by ravaging wars, and the causes for the decay of that spirit which marked the earlier periods are apparent. Spain and Italy were, in the seventeenth century, almost the only two countries in which any close connexion between art and the Church was kept up. England was troubled with the religious question, and struggling with great constitutional problems, while it had given itself over to the faith of the Reformers, and such art as it was producing was that of the great architectural triumph of Sir Christopher Wren in the rebuilding of the churches of London, and the various sections of craftsmanship concerned with trade and the material world. There was much there were still some great goldsmiths at work, and some even greater workers in wrought iron, preparing the rejas for the Spanish cathedrals, while pictorial art was at its very highest in that country, and its masterpieces, with the exception of those of the very highest artist of all, Velazques, were devoted to subjects suggested by the Church. Yet there had been no country in which the painter had been so trammelled by traditional restrictions as in Spain. The very manner in which each saint was to be represented, the method in which his or her shrine was to be built, the colouring which was to be applied to each garment, had been a matter of stern decree, it had needed the profound genius of a Velazques to break through the traditional rules, and to open for his successors, and the men of the period of the Second Revival. Commencing with such painters as Pantoja della Crus and Vicente Carducci, the great Spanish School had produced the Ribaltas and Ribera, and then the majestic Velazques. In Spain the only great painter to follow Velazques was Murillo, but there were many whose works were marked by distinction, excellence, and beauty, especially Zurbaran, Iriarte, Juan de Valdes, Alonso Cano, and Orrente. The seventeenth century was, in various countries of Europe, one of the important periods of artistic production, and although the Italian schools, the Realists, and the painters of the Second Revival were men whose productions at the present time are out of favour, yet they deserve more than a passing notice, while contemporary with them there are others who rank among the veritable giants of the artistic craft. The late Italian artists, the Carracci, Caravaggio, Sassio Ferrato, Carlo Dolci, Domenichino, Luca Giordano, Carlo Maratta, Guido Reni, Salvador Rosa, and others, show in their work melodramatic style, love of magnificent colouring, and intense shades. The draughtsmanship of these artists to a certain extent could cause the modern artist to think that they are at present, for they certainly represent an important epoch in the art history of the world, and one which must never be overlooked. Many of their works were altar-pieces painted for churches, or were intended for church decoration, but at the same time they were greatly influenced by the Humanistic movement, and by the eager desire to represent the stories of classical writers pictorially. The commercial prosperity of Holland, at a time when other nations were lacking in material wealth, was one of the reasons for the existence of a veritable crowd of artists just at this time. The Church had ceased to commission pictures in Holland, and very seldom were stories, either from Holy Writ, or from the lives of the saints, represented by this school of artists.
Enland, and to a lesser extent to France, and that Italy, Germany, Spain, and the Netherlands took but a very small share in the artistic development of the eighteenth century, instead of, as in preceding periods, being the great centres of development themselves. The history of art, in contradistinction to that of the Church, was now complete, and portraiture, whether concerning itself with the great decorative single figures or family groups of Reynolds and Gainsborough, or with the productions of the leading miniature painters, Conway, Engleheart, Fugler, or with their numerous followers, was exclusively applied to the multiplication of portraits of those persons who were able to afford to employ the artist, and who desired to possess and distribute to others such delightful representations as would adorn the home and the person. Ecclesiastical art, or art for the decoration of the church, had hardly any existence.

In England towards the middle of the nineteenth century a new movement having in it some of the instincts of earlier Italian art began to arise. The foremost person in this new school was Edw. J. Jones. In the wonderful succession of poetic visions which he presented, marked by a play of fancy, a fertility of inventiveness, tender witchery of inspiration, exquisite colour, and grace and harmony of line and grouping, he was able to develop an abstraction of religious emotion to a far fuller extent than he himself had intended, and to vivify the old legends of primitive times which had formed part of his inheritance from Celtic ancestors. His appearance on the horizon of art was to a great extent coincident with the blossoming forth of what has been termed the Oxford Movement in religion, a growing desire for a deeper and fuller devotion, an eager determination to return to earlier and purer lines of thought in religion, to set faith free from the regulations of statecraft, and to rid the very monotonous, static, and lifeless aspect of something approaching closer to the fiery enthusiasm and the sumptuous ceremonial of the passionate faith of earlier days. The progress of this movement within the Protestant Church led to a considerable number of accessions to the Catholic Faith, but in the Church of its origin it worked a complete revolution. Once more there arose the determination that the house of God should be beautiful, and once again art, with all the various crafts closely connected therewith, entered into the service of religion, very much in the manner that it had been done in previous ages. The try-workers, under the influence of William Morris and Burne-Jones, were set to work to prepare panels of glowing colour for the decoration of churches. The stained-glass painters, under the influence of these craftsmen, sought out old designs, originated new schemes of colour, and worked hard to discover old secrets of technic. The earlier schools of embroidery were studied, and all over the country women set to work to make vestments and to execute needlework of rare distinction and great beauty. A revival took place in the art of the metal-workers and in that of the stone-mason. Many fine wrought-iron grilles were made, and the claim of the artist to prepare the design and to superintend the carrying out of its execution was once more considered and gladly entertained.

Quite apart from the religious aspect of the movement, there was in the Oxford revival the origin of the effort towards greater refinement, greater beauty, and more attention to handicraft, which, commencing in the middle of the nineteenth century, has by no means reached its culmination in the early years of the twentieth.

One of the first and most important of the movements which aimed to break away from the artistic traditions of the eighteenth century took place in the early part of the nineteenth century in Germany, and was led by Overbeck. The Academy of Vienna, at the time that he entered it, was under the direction of Fugler, a talented miniature painter, but a follower of the pseudo-classical school of David, and a firm believer in the tenets of those opinions, too conservative to vary from them in the least degree. Overbeck felt that he was the victim of a most deplorable thought was suppressed within the academy, and that Christian art had been diverted and corrupted until nothing Christian remained in it. The differences between him and his followers and their fellow-students were so serious that the upholders of Overbeck left their leaders, and Overbeck, leaving Vienna, Overbeck journeyed to Rome, reaching it in 1810, and remaining there for fifty-nine years. Here he was joined by such men as Veit, Cornelius, Schadow, with others of less importance; together they formed a school which was known as the Nazarenes, or the Church-Romantic painters. They built up a severe revival on simple nature and the serious art of the Umbrian and Bolognese painters, and although for a long time they laboured under great difficulties, yet, after a while, they were able to exert considerable influence. The Nazarenes were the forerunners of a new spirit of religious devotion, which his influence helped very largely to purify the art of his time. The secessions from the conservative line adopted by the Royal Academy in England late in the nineteenth century were not marked by the particular element of religious fervour distinguishing Overbeck, but were the result of a similar determination to return to nature, and understand the art of painting in the open air, with not only a strict adherence to realism in choice and treatment of subject, but also the subordination of colour to tone gradation. These secessions in England, which came about in the movement in France which had preceded them, and which was connected with the name of Millet.

In Catholic countries there are arising some signs that the old practice of enlisting the services of art for the purposes of religion may be developed, but the signals of an approaching movement are not very strong as yet, and the Church has a good deal to learn with regard to decoration, to design, and to craftsmanship from the earlier periods of its history. Foremost among the signs of the new spirit must be placed the erection of the most perfect buildings in England, erected at the truest and most careful study of the past and with every desire to give full play to the spirit of the present and to the original talent of its designer, while avoiding anything that could be called a slavishcopying of the past. This building affords an example of revived use of mosaic properly applied, in method following the work of Ravenna, and planned by a great artist, Bentley. It affords the most perfect scheme of interior decoration that could well be conceived. In other countries of the faith that of Eton is equally clear, but the Church which has fostered and encouraged art from its very birth has so many glorious examples in its midst of the great achievements of profound genius that it can only be a matter of time before its ancient use of the fine arts is revived. A close study of the past would enable the Church to once more set about the task of employing the craftsmen of the world to produce their finest work in the domain of ecclesiastical art.

Illustrations explanatory of the different branches of ecclesiastical art will be found under the special articles: IVORIES; MANUSCRIPTS, ILLUMINATION OF; METAL-WORK; PAINTING; RELIGIOUS ART; SCULPTURE; WOOD-CARVING.

Kraus, Geschichte der christlichen Kunst (Freiburg im Br., 1855-1900); Michel, Histoire de l'art depuis les premiers temps.
the noblest of all the material arts. Even the needs of the liturgy itself are in a sense subsidiary to the needs of the faithful. Aesthetically speaking, an old and sound saying. But, on the other hand, among the needs of the faithful must be reckoned, under normal circumstances, the adequate carrying out of the liturgy. It is, of course, perfectly true to say that a church is not only a building, but also itself the expression of an act of worshipful homage. This, however, it ceases to be, at least in the highest degree, unless, as has been said, the aesthetic qualities of the building have been entirely subordinated to its primary purpose. It only needs a little reflection to see that such a procedure would be very unpractical bearing on modern church-building. There is always a danger lest we should be dominated by technical terms and conventional opinions about the merits of this or that style of architecture, derived from times and circumstances that have passed away; lest we should be led by sentiment or fashion, or mere lack of originality, to copy from the buildings of a bygone age without stopping to consider whether or how far the needs of our own day are those of the days when those buildings were raised. And the chief use which modern art can for the study of the art of ecclesiastical architecture is not that it directs attention to a number of buildings more or less beautiful in themselves, but that it cannot fail to bring home to us that all true architectural development was inspired, primarily, by the desire to find a solution of the problem of the church.

Roughly speaking, all ecclesiastical architecture may be said to have been evolved from two distinct germ-cells, the oblong and the circular chamber. From the simple oblong chamber to the perfect Gothic cathedral the steps can be plainly indicated and admitted of being substantially traced. This is the actual course of architectural development in Western Europe (Brown, "From Schola to Cathedral", passim), while the links which connect the simple circular chamber with a gigantic cruciform domed church, like St. Peter's in Rome or St. Paul's in London, are still more obvious, though the actual course of development in the case of domed churches has been far less continuous and regular.

The Origins of Ecclesiastical Architecture.

That the first places set apart for Christian worship were simple chambers oratories dedicated to the worship of God (Bond, Gothic Architecture in England, 1). Since, however, the word building'' is apt to suggest, primarily, "the actual putting together of materials by manual labour and machinery", it may be desirable to amend or restrict the definition given above by saying that architecture is the art of planning, designing, and drawing buildings, and of directing the execution thereof (Bond, op. cit., 2). And in this art as in all others, including that of life itself, the fundamental principle should always be that of subordinating means to ends, and that the result is never the same as the principle when the principle is or has been abandoned or lost sight of, the result may indeed be, or may have been, a building which pleases the eye, but it must needs be also one which offends that sense of the fitness of things, which is the criterion of the highest kind of beauty. Now a certain class of ecclesiastical architecture was ascribed to the purpose of public worship; and in all sounds ecclesiastical architecture this purpose should be altogether paramount. To build a church for the admiration of "the man in the street", who sees it from outside, or of the tourist who pays a passing visit, or of the artist, or of anyone else who is less than a Franciscan, or who does not use the church for prayer, the hearing of Mass, and the reception of the sacraments, is to commit a solecism in...
The earliest improvement on the crude form of the oblong chamber with its rectangular annex, and one which may well have become usual even while the liturgy was confined to a single room in a private house, was to throw out a semicircular apse at the end of the chamber opposite the door, or to select for the purposes of worship a room thus built. And this would almost certainly be the form adopted, at least in Rome, as soon as the Christian communities began to possess separate buildings in which to hold their religious assemblies. The square-ended type of sanctuary which manifests itself throughout the history of English ecclesiastical architecture, may possibly be found a surviving indication of the very early introduction of Christianity into these islands (Scott, op. cit., 4).

The apse, of course, was placed the seat of the bishop, round the walls on either side were the subcessive of the assistant clergy, while the altar stood beneath the arch formed by the opening of the apse, or slightly in advance of it. On the latter side of the altar would be a space reserved for clerics of inferior rank: i.e. the schola cantorum, as soon as an organized body of singers, under whatever name, came into existence. Outside the boundary of this space, however it may have been marked, the general body of the faithful would have their place, and at the lower end of this chamber, or in some kind of ante-room or narthex, or possibly even in an outer court, would be placed the catechumens and—when ecclesiastical discipline was sufficiently developed—the penitents.

This particular form of the domestic church, re- mains the模型 of scholas cantorum, and for a century or more, the schola cantorum, as so long as an organized body of singers, under whatever name, came into existence. Outside the boundary of this space, however it may have been marked, the general body of the faithful would have their place, and at the lower end of this chamber, or in some kind of ante-room or narthex, or possibly even in an outer court, would be placed the catechumens and—when ecclesiastical discipline was sufficiently developed—the penitents.

This particular form of the domestic church, re- mained the model of scholas cantorum, and for a century or more, the schola cantorum, as so long as an organized body of singers, under whatever name, came into existence. Outside the boundary of this space, however it may have been marked, the general body of the faithful would have their place, and at the lower end of this chamber, or in some kind of ante-room or narthex, or possibly even in an outer court, would be placed the catechumens and—when ecclesiastical discipline was sufficiently developed—the penitents.

The visions recorded in the Apocalypse are, of course, Divine revelations; but, as the vision of Ezekiel was cast in the mould of the Jewish ritual, so also those of St. John may be regarded as naturally intended to reflect the ritual of primitive Christianity (Scott, op. cit., 211 sqq.; Weisszicker in "Jahrb. f. deutsche Theol.", xxx, 480 sqq.; Lange, op. cit., 298 sqq.). There, then, in the midst, we see the throne, wherein there sit One enthroned, of whom the Christian bishop is the representative; and with Him are four and twenty presbyters, who are "priests" (κριταὶ), ranged in a semicircle (κυκλοστῶν), twelve upon each hand (Apoc., iv, 2, 4). Within the space bounded by these seats is a pavement of glass "like to crystal" (possibly of glass) and the emblems of the altar (Apoc., iv, 6; vi, 9; viii, 3; ix, 13; xvi, 7). On the latter side of this are the one hundred and forty-four thousand "signed", or "sealed", who "sing a new canticle", and who incidentally bear witness to the very early origin of the schola cantorum, at least in some rudimentary form (Apoc., vii, 4; xiv, 1-3).

The altar is that "great multitude, which no man could number, of all nations, and tribes, and peoples, and tongues", the heavenly counterpart of the cactus fahion (Apoc., vii, 9).

To each of these chapels would belong aaisles there is indeed no illusion, but it is at least possible that in the mention of the outer court which is "given unto the Gentiles" we may find the earliest traces of the atrium or portico, which in later ages formed part of the palaestra of a fully equipped basilica (Apoc., xii, 2; Scott, op. cit., 29). Moreover the problem of the precise details of internal arrangement, which might perhaps have been thought to have been of comparatively late development, appear to be clearly implied. Every one is aware that in the basilicas of the fourth and succeeding centuries the altar was surmounted by a baldachin, or ciborium; and it is hardly less certain that the ciborium was not merely a canopy, but a means of support for curtains which during certain portions of the Liturgy were drawn round the altar. Traces of these ancient curtains still survive in those which flank our modern altars, in our tabernacles, and in the very name tabernacle, i.e. "tent", and also, curiously enough, in "those imitations of silken pavilions, cast in bronze, . . . which we see in the canopies of S. Maria Maggiore and St. Peter's" (Scott, op. cit., 29). Reverting to our point of departure, we may notice that the aisle curtains which, when drawn close, concealed the entire sanctuary from view. In the East these have, of course, been replaced by the iconostasis, a screen formerly latticed but now usually solid; while in the West they are represented, not without some change of position, by our chancel screens, which it is thought have found another modified survival in the Lentsen veil of the Middle Ages.

Now, whatever may be the case as regards the civory with its veils, there are clear indications in the Apocalypse to this effect, and for the linings of the schola cantorum, as soon as an organized body of singers, under whatever name, came into existence. Outside the boundary of this space, however it may have been marked, the general body of the faithful would have their place, and at the lower end of this chamber, or in some kind of ante-room or narthex, or possibly even in an outer court, would be placed the catechumens and—when ecclesiastical discipline was sufficiently developed—the penitents.

This particular form of the domestic church, re- mained the model of scholas cantorum, and for a century or more, the schola cantorum, as so long as an organized body of singers, under whatever name, came into existence. Outside the boundary of this space, however it may have been marked, the general body of the faithful would have their place, and at the lower end of this chamber, or in some kind of ante-room or narthex, or possibly even in an outer court, would be placed the catechumens and—when ecclesiastical discipline was sufficiently developed—the penitents.
of so many early Christian churches, the more or less incongruous and heterogeneous spoils of older and non-Christian edifices. Of this church, in its original form, we can only conjecture, at fixed intervals, as it were, within the arch of the terminal apse, which forms its immediate and appropriate background.

S. Maria Maggiore is considerably smaller than were any of the other three chief basilicas of Rome (St. Peter’s, St. Paul’s, and the Lateran). Each of these, in addition to a nave of greater length and breadth, was furnished (as may still be seen in the restored St. Paul’s) with a double aisle. This, however, was an advantage which was not unattended with a serious drawback from a purely aesthetic point of view. For a great space of blank wall intervening between the top of the lateral colonnade and the clerestory windows was of necessity required in order to give support to the pent-house roof of the double aisle. And it is curious, to say the least, that it should not have occurred to the builders to divide the space, as in St. Agnese, where the low level of the floor relative to the surface of the ground outside may have suggested this method of construction; but whereas, in the East, the provision of a gallery (used as a gymneceum) was usual from very early times, it never became otherwise than exceptional in the West. Taking Paul and West together, we find among early and medieval basilican churches examples of all the combinations that are possible in the arrangement of aisles and galleries. They are (1) the single aisle without gallery, which, of course, the commonest type of all; (2) the double aisle without gallery, as in the three great Roman basilicas; (3) the single aisle with gallery, as in S. Agnese; (4) the double aisle with single gallery, as in St. Demetrius at Thessalonica; and finally, as a crowning example, though of a later period, the double aisle surmounted by a double gallery, as in the Duomo of Florence. These, however, are modifications in the general design of the building. Others, not less important, though they are less obviously striking, concern the details of the construction. Of these the first was the substitution of semi-circular arches for the flat lintels, and the second that of the pillar of masonry for the monolithic column. The former change, which had already come into operation in the first basilica of St. Paul Without the Walls, was so obviously in the nature of an improvement in point of stability that it is unnecessary to dwell on it; the second is a matter of the utmost universal acceptance (Dehio and v. Bezold, Die kirchliche Baukunst des Abendlandes, i, 161).

The differences which have already been mentioned were, however, by no means the only ones which distinguished the Romanesque from the Roman transept. The transept of a Romanesque church, especially of those which were attached to monasteries, was usually provided with one or more apses, projecting from the east side of its northern and southern arms; and from this it appears, plainly enough, that the purpose, or at least a principal purpose, of the medieval transept was to make provision for the corresponding main entrances or chapels. A pair of transept apses, projecting eastwards, already makes its appearance at Hersfeld and Werden. At Bernay, Boscherville (St.-Georges), and Cerisy-la-Forêt (St.-Vigor), each arm of the transept was provided with an entrance corresponding respectively to the aisle and to the projecting arm. The same arrangement is found also at Tarragona. At La Cha-
rité, a priory dependent on Cluny, each arm had three apses, so that there were seven in all, immediately contiguous to one another, and varying in depth from the center to the outer arm. This plan was the mother of the transept system. The plan of Cluny itself was that of a cross with two transverse beams. Of the western transept each arm had two apses; of the eastern each had three, two projecting eastwards and one terminal. Saint-Benoît-sur-Loire had likewise a double transept, furnished on the same principle with six subsidiary apses. Among English cathedrals—it may here be mentioned—both Canterbury and Norwich have a single chapel projecting from each arm of their respective transepts; and at Ely the "Gothic" porch, which forms a western transept, opens eastwards into two apsidal chapels, contiguous on either side to the main walls of the cathedral.

Far more important in their bearing on the later history of architecture than these developments of the transept were certain changes which gradually took place in connexion with the chancel. It is not unusual in Romanesque churches, to find the chancel flanked, like the nave, with aisles, terminating in apsidal or square-ended chapels. But in moreconsiderable churches, especially in France, the chancel is often carried round by an ambulatory behind the chancel apse; and when this is the case, the ambulatory most commonly opens into a series of radiating chapels. These are, in the earliest examples, entirely separate from one another, being sometimes two or four, but more usually five, in number. In later examples the number of chapels increases to seven or even nine; and they are then contiguous, forming a complete corona or chevet.

The first beginnings of this system go back to so early a date as the fifth century. In 470 this idea, as Quicherat has shown, had a semicircular ambulatory at the back of the altar, in which, a few years later, was placed the tomb of Perpetus himself. From Tours the type seems to have passed to Clermont-Ferrand (St. Vitalis et Agricultura), and thence, many centuries later, to Orleans (St-Aignan, 1029). Many centuries later, the church of St.-Sernin, in Toulouse, was rebuilt, and in the foundations of this edifice, which can still be traced, we find what is probably the earliest example of a chevet or corona of radiating chapels. It served, in its turn, in the course of the following centuries, as the model, in this respect, of Nîmes-Dame de la Couture at Le Mans (c. 1000), St-Remi at Reims (c. 1010), St-Savin at Saint-Savin (1020–30), the cathedral at Vannes (c. 1030), St-Hilaire at Poitiers (1049), and the abbey church at Cluny, as rebuilt in 1089. Shortly before 1100 the church of St. Martin was once more rebuilt, on a scale of greater splendour; and once more the new building became the model for other churches, chief among which were those of St-Sernin at Toulouse (1096), of Santiago at Compostela (c. 1105), and of the cathedral at Chartres (1112).

The history of ecclesiastical architecture in Western Europe during the relatively short period which alone deserves to be regarded as one of more or less continuous and steady advance, and which extends, roughly speaking, from 1000 to 1300, may be described as the history of successive and progressive attempts to solve the problem, how best to cover with stone vaulting a basilican or quasi-basilian church, that is to say, a building of which the leading feature is a nave flanked with aisles and lighted with clerestory windows (Dehio and v. Besold, op. cit., p. 296; Bond, op. cit., p. 12). For the solution of this problem, more or less complete of all previous attempts to solve it satisfactorily, and by no means a mere aesthetic striving after beauty of architectural form, which led step by step to the development of the Gothic architecture of the thirteenth century in its unsurpassed and unsurpassable perfection.

The advantages of a vaulted, as compared with a timber, roof are so obvious that we are not surprised to find, dating from the tenth century or at latest from the beginning of the eleventh, the barrel-vaulted aisles (Violet-le-Duc, Dict., I, 177). Indeed these first attempts at continuous vaulting would probably have been made much earlier; but for the invasions of Saracens and Northmen, which delayed till that period the first beginnings of a steady development in ecclesiastical architecture, but which by their wholesale destruction of pre-existing buildings may be said to have prepared the way for that same development. The vaulting of the nave, however, in the case of any church of considerable size was already in the eleventh century well advanced that the problem was seriously faced. And when at last it was definitely taken in hand, this was done under pressure of dire necessity. Everyone who is at all conversant with medieval chronicles, or with the history of the cathedrals of Western Europe, must be aware how extremely frequent were the disasters caused by conflagrations (Dehio and v. Besold, op. cit., I, 296), and it was natural enough that the church-builders of the later Middle Ages should aim at making their buildings, at least relatively, fireproof.

The simplest form in which the vaulting of a rectangular chamber can take is, of course, the cylindrical barrel-vault; and this is, in fact, the form which was adopted in many of the earliest examples of vaulted roofs, especially in the south of France; a form, too, which was extensively used in Italy during the age of the Renaissance. But, though simplest alike in conception and in construction, the cylindrical barrel-vault is in fact the least satisfactory that could be devised for its purpose; and the objections which militate against its employment are quite valid against that of the barrel-vault whose cross section forms a pointed arch. Of these objections the chief is that the horizontal thrust of a barrel-vault is evenly distributed throughout its entire length. Theoretically, then, this thrust requires to be met, not by a series of buttresses, as the Romans had done, but by means of arches, and columns suffi-
are found at Lyons (St-Martin d'Ainay), at Lesterez, Givry, and Carcassonne (St-Nazaire) (Dehio and v. Besold, op. cit., Pl. 122, figs. 3-6). An improvement on this design, in view of the illumination of the nave, consists in giving to the vaulting of the aisles the form of a "rampant" arch, as at Silvacanne, and from this idea the definite point, why the famous pointed arch was not a mere generalization of the semi-circular arch. Its development took the form of a simple quadrant, as at Parthenay-le-Vieux, Preuilly, and Fontenoit. This method of quadrant vaulting, as Viollet-le-Duc and others have observed, provides a kind of continuous internal "dung batterie," though it is by no means certain that the idea of the flying buttress, which very closely resembles the construction of Northern France was actually suggested by these Southern buildings (Viollet-le-Duc, Dict., I, 173). In point of stability, the hall-churches of the eleventh century leave nothing to be desired. Their great defect is want of light (Viollet-le-Duc, Dict., I, 176). And this defect almost equally affects a class of buildings which may be described as two-storied hall-churches, and which are found principally, if not exclusively, in Auvergne and its neighbourhood. These are furnished, like a few of the Roman basilicas and certain Byzantine churches, with aisles which are not a mere triforium contrived in the thickness of the walls, but a chamber of equal dimensions with the nave. This arrangement not only affords additional light, but also, by reason of the greater height of the edifice, for which the adoption of a bar-vaulted construction was a liberal supply of light, unimpeded by neighbouring buildings. This last-mentioned advantage is, however, almost entirely negated by the circumstance that, in this class of buildings, each bay of the gallery is subdivided by means of coupled or grouped arches, so that the additional obstructions offered to the passage of the light almost entirely counterbalance the possible gain through additional fenestration. We say "the possible gain" because, in fact, the galleries of these churches are but sparingly provided with windows. In these churches (which to the English reader should of special interest by reason of their affinity in point of construction to the Westminster cathedral) the aisle is usually cross-vaulted, while the gallery has a quadrant vault abutting in the wall of the nave just below the springing of the transverse arches. The most noteworthy example of such a church is Clermont-Ferrand (Notre-Dame du Port), Issoires (St-Paul), and Conques. To the same family belongs, moreover, the great church of St-Sernin at Toulouse, already mentioned, which is distinguished from those previously described by the adoption of the system of a succession of transverse barrel-vaults, such as are seen in the unique instance of the church of St-Philibert at Tours. Such a construction is, however, "ponderous and inelegant, and never came into general use" (Moore, Gothic Architecture, 42). The system of cross-vaulting, which has now to be considered, may be regarded as a combination of longitudinal with transverse barrel-vaulting, inasmuch as it may be described as consisting of a central barrel which is penetrated or intersected by a series of transverse vaults corresponding to the successive bays or compartments of the nave. The advantages of cross-vaulting are threefold. In the first place the total amount of the outward lateral thrust is very greatly diminished, since one-half of it is now replaced by longitudinal thrusts, which, being opposed in pairs, neutralize one another. Secondly, all that is left of the lateral thrust, as well as the longitudinal thrusts, and the whole of the vertical pressure, instead of being distributed throughout the whole length of the building, is now collected and delivered to the supports, which may be piers, buttresses, or pillars. Thirdly and lastly, a perfectly developed system of cross-vaulting makes it possible to heighten the clerestory windows that their archivolt shall reach the utmost interior height of the building, and so to broaden them that their width between re- cesses may approximate to the very closely related column and column below. By these improvements (as ultimately realized in the perfected Gothic of the thirteenth century) the somewhat rudimentary design of the ancient Roman basilicas may be said to have reached the highest development of which it was capable. The gradual development of cross-vaulting, it is to be observed, did not take place in those districts of Southern and Central France which had already become the home of the barrel-vault and to a less degree the cupola, but first in Lombardy, then in Germany, and finally in Northern France and in England. In these countries the evolution of the Romanesque timber-roofed basilican church had— with local variations of course—reached a far more advanced stage than was ever attained in those regions where the Romanesque bar-vaulted church had an early date had in a manner put a check on architectural progress. And it is noteworthy that in Lombardy and Germany, when cross-vaulting was first adopted, its development was far less complete than in Northern France, and that in like manner the advance towards perfection was both less rapid and less complete in Normandy than in Picardy and the Ile-de-France. These two districts were the last to adopt the system, but it was here that it was, within the brief space of less than fifty years (1170-1220), brought to its final perfection. The reason may probably have been, as Dehio and von Besold suggest, that the architects of the Ile-de-France, in the days of Philip Augustus and St. Louis, were less tramelled than those of Normandy by the traditions of a school. The comparative lack of important architectural monuments at an earlier date left them, say these writers, a more open field for their inventive enterprise (op. cit., I, 418).

The simplest form of cross-vaulting is of course that which is formed by the intersection of two cylindrical barrel-vaults of equal diameter. And the use of ribbed groining, was the method mostly adopted by the Roman builders in their civic edifices. In the case of a pillared or columned church, however, this method had its disadvantages. In particular, having regard to the dimensions of the aisle and its vaulting, the builders of Northern Europe had all but universally adopted the plan of so spacing the columns and pillars which flank the nave that the intervals between them should be one-half the width of the church. Now the only means by which an equal height could be given to vaults of the same diameter was by means of a pointed arch; and so it came about that the pointed arch was adopted, not primarily for aesthetic reasons, but rather for constructive purposes. And the same is to be said of the use of ribbed groining. The medieval builders, who, as has been said above, possessed neither a tenacious mortar nor the command of an abundant supply of rough labour, and who therefore could not—even had they wished it—have adopted the massive concrete masonry of the Romans, were driven by the very necessities of the case to aim at lightness in the construction of their vaults, and at the same time to depend for stability not on the cohesion of the materials, but on the reduction of thrusts to a minimum, and on their skilful transmission to points where they could be effectively resisted. It was, then,
plaine desirably to substitute for a vaulting of uniform thickness a framework of ribs on which a comparatively thin layer of stones (cut to the requisite curve) could be laid, so far as possible, and lighten the whole construction by moulding the ribs and likewise the columns which supported the vaulting. The same principle of aiming at lightness of construction led to the elimination, as far as possible, of all masses of solid masonry above the columns and arches of the nave. This was done by the enlargement of the windows and the development of the triforium, till the entire building, with the exception of the buttresses, and of the spandrels below the triforium, became a graceful framework of grouped shafts and arches. (See plan, p. 17.) The first stage in the evolution of architecture of the pointed arch was not, however, reached, until, for the solid Romanesque buttresses, which rested on the vaulting of the aisles, and which were not only clumsy but often proved inadequate for their purpose, the genius of the Gothic builders hit upon the epoch-making device of the flying buttress. By means of this device the thrust of the main vaulting was not, indeed, as has been too often said, "met by a counter-thrust," but was transmitted to the solid buttresses, mostly weighted with lead, to which they were buttressed outwards to a great distance from the aisles, and the spaces between which were sometimes utilized, and might with advantage have been more often utilized, for a range of lateral chapels. (Bond, op. cit., 754; cf. Moore, op. cit., 20.) The subject of Gothic architecture in its details is, however, one that needs separate treatment, and for present purposes this very inadequate indication of some of the general principles involved in its development must suffice.

The Circular Church and Its Derivatives. — It was stated at the outset of this article that all ecclesiastical architecture may be said to have been developed from two primitive germs, the oblong and the circular chamber. Of these very numerous churches, prinicipally, but by no means exclusively, Eastern or Italian, which may be regarded as the products of the second line of development, we shall speak very briefly. That a circular chamber without any kind of annex was unsuitable for the ordinary purposes of public worship is plain enough. And the most obvious modification of this rudimentary form was to throw a long sanctuary into the building, as in St. George's, Thessalonica, or in the little church of St. Tommaso in Limine, near Bergamo. It was hardly less obviously convenient to build a projecting porch or narthex on the opposite side, as in St. Elias's, also at Thessalonica, and to complete the cross-plan of the nave and the choir by a central cupola, as is done in the sepulchral chapel of Gallaeae at Ravenna. Thus it was that churches having the form of a Greek cross, as well as other varieties of what German writers call the Centrals, may be said to owe their origin to a very simple process of development from the circular domestic building. Among the almost endless varieties on the main theme may be here enumerated: (1) buildings in which a circular, or polygonal, or quadrilateral aisle, whether in one or more stories, surrounds the central space; (2) buildings in which, though the principal open space is cruciform, and the whole is dominated by a central cupola, the ground-plan shows a rectangular outline, the cross being, as it were, "boxed" within a square; and (3) buildings in which one or more of the arms of the cross is considerably elongated, as in the Duomo at Milan, St. Peter's in Rome, and St. Paul's in London. The last-named modification, it is to be observed, had the effect of assimilating the ground-plan of those great churches, and of many lesser examples of the same character, to that of the Romanesque and Gothic cruciform building, whose general features of the unadorned rectangular basilica is incontestable. Among ecclesiastical edifices of historical importance or interest which are either circular or polygonal, or in which the circular or polygonal centre predominates over all subsidiary parts, and is elaborated far as possible, may be mentioned the Pantheon in Rome, St. Sergius at Constantinople, S. Vitale at Ravenna, S. Lorenzo at Milan, the great baptisteries of Florence, Siena, and Pisa, and the churches of the Knights Templars in various parts of Europe. St. Luke's at Siracusa in Phocis, besides being an excellent example of the use of a true cruciform architecture, affords a good example of the "boxing" of a cruciform building of the Greek type, by enclosing within the walls the square space between the adjacent limbs of the cross.

Practically, however, the full development of cruciform from circular buildings became possible only when the problem had been solved of roofing a square chamber with a circular dome. This has in some cases been done by first reducing the square to an octagon, by means of "squinches" or "trumempettes," and then raising the dome on the octagon, by filling in the obtuse angles of the figure with rudimentary pendentives or faced corbeling. But already in the sixth century the architect and builder of Santa Sophia had shown for all time that it was possible, by means of the "fat" dome, "the great dome," of immense size, on four arches (with their piers) forming a square. The use of pendentives being once understood, it became possible, not only to combine the advantages of a great central dome with those of a cruciform church, but also to substitute domical for barrel-vaulting over the limbs of the cross, as at S. Marco, Venice, St-Front, Périgueux, and S. Antonio, Padua, or even to employ domical vaulting for a nave divided into square bays, as in the cathedral at Angoulême and other eleventh-century churches in Périgord, in S. Salvatore at Venice, in the London Oratory, and (with the difference that saucer domes are here employed) in the Westminster Cathedral. Nor should it be forgotten that in the nave of St. Paul's, London, the architect had shown that domical vaulting is possible even when the bays of nave or aisles are not square, but pronouncedly oblong. Indeed, if account be taken of the manifold disadvantages of barrel-vaulting as a means of roofing the nave of a large church, it may safely be said that the employment of some form of the dome or cupola is as necessary to the logical and structural perfection of the building on one side of the crossing and the use of flying buttresses are necessary to the logical and structural perfection of the architecture of the pointed arch.

Systems and Styles of Architecture in Relation to Modern Needs. — A word must now be said, in conclusion, as to the merits of the several types of system and styles of architecture, more especially in relation to the needs of our own day. Of systems, indeed, there are in truth only three, the tetrabed or that of which the horizontal lintel may be regarded as the generating element, and of necessity postulates a timber roof; that of the round arch, which by virtue of the law of economy postulates, as has been said, the use of domical rather than barrel-vaulting; and that of the pointed arch, which, if carried to perfection, postulates lobed groining and the use of the flying buttress. There are two systems, however, admires of two methods of treatment which are sufficiently distinctive to be classed as two "styles," viz. the neo-classical, or Renaissance, and the Byzantine, and which shall be particularised presently.

Now as the Pantheon in Rome, and that of the timber roof, may be very briefly dismissed. In the great majority of cases we must, indeed, of necessity be content with such a covering for our churches; but no one would choose a wooden roof who could afford a vaulted building. And the Gothic, type of Romanesque archi-
ECCLESIASTICAL

be regarded as finally out of court. On the other hand, the Gothic architecture of the thirteenth century, e.g., in the great cathedrals of Northern France and of Cologne, it may be quite fearlessly asserted: (1) that every single principle of construction employed therein was the outcome of centuries of practical experience, in the form of successive and progressive attempts to solve the problems of church vaulting; (2) that the great loftiness of these buildings was not primarily due (as has been sometimes suggested) to any mere Emporstroben, or "upward-soaring" propensity, but was simply the aggregate result of giving to the windows of the aisles and of the clerestory a width, in proportion to their height, of about the triforium a height sufficient to allow of the abutment of the aisle roof; and (3) that every subsequent attempt to modify, in any substantial particular, this perfected Gothic style, was, of its nature retrogressive and decadent, as might be illustrated from the English Perpendicular and the Italian and Spanish varieties of Gothic architecture. Nevertheless it must be admitted that thirteenth-century Gothic, though perfect of its kind, has its limitations, the most serious of which—in relation to modern needs—is the necessarily restricted width of the windows. In the case of the Milan cathedral, attempted to improve on his French predecessors by exceeding their maximum width of fifty feet, and to construct a Gothic building with a nave measuring sixty feet across, it was found impossible, as the building proceeded, to carry out the original design without incurring the almost certain risk of a collapse, and hence it was necessary to depress the clerestory to its present stunted proportions.

Now under modern conditions of life, especially in the case of a cathedral of first-class importance, a nave of far greater width is the means desirable; and in order to secure this greater width it is necessary either to fall back on the unsatisfactory compromise of Italian or Spanish Gothic, as illustrated in the cathedrals of Milan, Florence, or Gerona, or else to adopt the principle of the round arch, combined, by preference, with domical vaulting. This, as everyone knows, is what Mr. Bentley has done, with altogether conspicuous success, in the case of the Westminster Cathedral.

Of the design of this noble edifice it is impossible to speak here. But it may be worth while to indicate one feature of the Byzantine rather than the neo-classic or Renaissance treatment of the round arch system. The principal difference between the two is this: that, whereas the neo-classical style, by its use of pilasters, treats every pier as though it were a column, the Byzantine boldly distinguishes between piers and columns, and employs the latter exclusively for the purposes which monolithic shafts are suited to fulfill, for instance the support of a gallery; while the piers in a Byzantine building make no pretence of being other than what they are, viz., the main supports of the vaulting. The Byzantine method of construction, as employed at Westminster, has the further advantage that it brings within the building the whole of the spaces between the buttresses, thereby at the same time increasing the interior dimensions and avoiding the awkward appearance of ponderous external supports. Nor is the Byzantine style of architecture suitable for a great cathedral alone; and one may venture to hope that the great experiment which has been tried at Westminster will be fruitful of results in the future development of ecclesiastical architecture.

ECCLESIASTICALS (abbrev. Eccles.) the longest of the deuterocanonical books of Holy Writ, and the last of the Sapiential writings in the Vulgate of the Old Testament.

I. TITLE.—The usual title of the book in Greek MSS. and Fathers is Sophia Ἡσυχία Ἡσυχία ἡ Ὀρθόδοξα, "the Wisdom of Jesus, the son of Sirach," or simply Σοφία Ἡσυχία the Wisdom of Sirach." It is manifestly connected with, and possibly derived from, the following subscription which appears at the end of recently-discovered Hebrew fragments of Ecclesiasticus: "Wisdom [Hôdmâ] of Simeon, the son of Yeshhâ, the son of Eleszar, the son of Sirâ." Indeed, its full form would naturally lead one to regard it as a direct rendering of the Hebrew heading: Ἡσυχία ἡ Ὀρθόδοξα, "Wisdom," is applied to it in the Talmud, while Rabbinic writers commonly quote Ecclesiasticus as Bnô Sûrâ. Among the other Greek names which are given to Ecclesiasticus in patristic literature, may be mentioned the simple title of Σοφία, "Wisdom," and the honorary designation τὸ τὰς ὅρθοδοξας, "all-virtuous Wisdom." As might well be expected, Latin writers have applied to Ecclesiasticus titles which are derived from its Greek names, such as "Sapientia Sirach" (Rufinus); "Sagesse, fils de Sirach," (index Claromontanus); "Liber Sapientiae" (Roman Missal). It can hardly be doubted, however, that the heading "Parabolæ Salomonis," which is prefixed at times in the Roman Breviary to sections from Ecclesiasticus, is to be traced back to the Hebrew title spoken of by St. Jerome in his prologue to the Solomonic writings. Be this as it may, the book is most commonly designated in the Latin Church as "Ecclesiasticus," itself a Greek word with a Latin ending. This title—not to be confused with "Ecclesiastes" (Ecc.)—is the one used by the Council of Trent in its solemn decree concerning the books to be regarded as sacred and canonical. It points out the very special esteem in which this didactic work was formerly held for the purpose of general reading and instruction in church meetings: the Book of Ecclesiasticus, which were also called Ecclesiasticus by Rufinus, has preserved by way of pre-eminence the name of Ecclesiasticus (Liber), that is a "church reading-book."

II. CONTENTS.—The Book of Ecclesiasticus is preceded by a prologue which professes to be the work of the Greek translator of the original Hebrew and the genuineness of which is undoubted. In this preface to his translation, the writer describes, among other things,
his frame of mind in undertaking the hard task of rendering the Hebrew text into Greek. He was deeply impressed by the wisdom of the sayings contained in the book, and therefore wished, by means of a translation, to place those valuable teachings within the reach of all the faithful. The method of the translator might be described as that of a text, living in more perfect accord with the law of God. This was a most worthy object, and there is no doubt that in setting it before himself the translator of Ecclesiasticus had well realized the general character of the contents of that sacred writing. The fundamental thought of the book, that wisdom is the gift of God, is so clearly seen and emphasized in the translation of the Septuagint that the word of God as understood and inculcated in inspired Hebrew literature; for the contents of this book, however varied they may appear in other respects, admit of being naturally grouped under the general heading of “Wisdom.” Viewed from this standpoint, which is indeed universally regarded as the author’s own standpoint, the contents of Ecclesiasticus may be divided into two great parts: chs. i-xiii, 14; and xiii, 15-l, 26. The sayings, which chiefly make up the first part, tend directly to inculcate the fear of God and the fulfilment of His commandments, wherein consists true wisdom. This they do by pointing out, in a concrete manner, how the truly wise man shall conduct himself in the manifold relationships of practical life. They afford a most varied fund of thoughtful rules for self-guidance “in joy and in sorrow, in prosperity and in adversity, in sickness and health, in struggle and temptation, in social life, in intercourse with friends and enemies, with high and low, rich and poor, with the good and the wicked, the wise and the foolish, in trade, business, and one’s ordinary calling, above all, in one’s own house and family in connection with the training of children, the treatment of men-servants and maid-servants, and the way in which a man ought to behave towards his own wife and women generally” (Schürer). Together with these maxims, which resemble closely both in matter and form the Proverbs of Solomon, the first part of Ecclesiasticus includes several more or less long descriptions of the origin and excellence of wisdom (cf. i, iv, 12-22; vi, 18-37; xiv, 22-xxv, 11; xxiv). The contents of the second part of the book are of a decidedly more uniform character, but contribute no less effectively to the setting forth of the general topic of Ecclesiasticus. They first describe at length the Divine wisdom so wonderfully displayed in the realm of nature (xiii, 15-xiii), and next illustrate the practice of wisdom in the various walks of life, as made known by the model of the wise man himself. Without the high priest Simon, the writer’s holy contemporary (xlii-l, 26). At the close of the book (l, 27-29), there is first, a short conclusion containing the author’s subscription and the express declaration of his general purpose; and next, an appendix (lxi) in which the writer returns thanks to God for His benefits, and especially for the gift of wisdom, and to which are subjoined in the Hebrew text recently discovered, a second subscription and the following pious ejaculation: “Blessed be the name of Yahweh from this time forth and for evermore.”

III. ORIGINAL TEXT.—Until quite recently the original language of the Book of Ecclesiasticus was a matter of considerable doubt among scholars. They, of course, knew that the Greek translator’s prologue states that the work was originally written in “Hebrew,” Ἱθακείᾳ, but they were in doubt as to the precise significance of this term, which might mean either Hebrew proper or Aramaic. They were likewise aware that St. Jerome, in his preface to the Solomonic writings, speaks of a Hebrew original as in existence in his day; but it still might be doubted whether it was truly a Hebrew text, or not rather a Syriac or Aramaic translation in Hebrew characters. Again, in their eyes, the citation of the book by rabbinical writers, sometimes in Hebrew, sometimes in Aramaic, did not appear decisive, since it was not certain that they came from a Hebrew original. And this was their view also with regard to the quotations, this time in classical Hebrew, by the Bagdad gaon Saadiah of the tenth century of our era, that is of the period after which all documentary traces of a Hebrew text of Ecclesiasticus preserved by himself or the community of which he was a member, had disappeared. Still, most critics were of the mind that the primitive language of the book was Hebrew, not Aramaic. Their chief argument for this was that the Greek version contains certain errors; for example, xxiv, 37 (in Gr. verse 14), “light” for Ἰσραήλ; v, 22 (Gr. verse 15), “against” for ὑπερ; xli, 24, 25 (Gr. verse 22, 23), “ Tyrhians” for “enemies” (תיריה); etc.; these are all accounted for by supposing that the translator misunderstood a Hebrew original before him. And so the matter stood until the year 1899, which marks the beginning of an entirely new period in the history of the original text of Ecclesiasticus. Since that time, much documentary evidence has come to light, and it tends to show that the book was originally written in Hebrew. The first fragments of a Hebrew text of Ecclesiasticus (xv, 6-14, 8) were given to the East to Cambridge, England, by Mrs. A. S. Lewis; they were identified in May, 1899, and published in “The Expositor” (July, 1899) by R. S. Schechter, reader in Talmudic Cambridge University. About the same time, in a box of fragments acquired for the Bodleian Library, Oxford, nine leaves apparently of the same MS. (now called B) containing x, 9-xiii, 11, were found by A. E. Cowley and Ad. Neubauer, who also soon published them (Oxford, 1897). Next followed the identification by Professor Schechter, first, of seven leaves of the same Codex (B), containing xxxi, 11-xxxii, 11; xxxii, 11-xxxiii, 3; xxxv, 11-xxxvi, 21; xxxviii, 30-xxxviii, 28b; xlix, 14c-ii, 30, and next, of four leaves of a different MS. (called A), and presenting iii, 6e-7i, 31a-4, 36d-xxxvi, 26. These eleven leaves had been discovered by Dr. Schechter in the fragments brought by him from the Cairo genizah; and it is among matter obtained from the same source by the British Museum, that G. Margoliouth found and published, in 1899, four pages of the MS. B, containing xxxii, 12-xxxii, 1a; xxxvii, 21-xxxvii, 29. Early in 1900, I. Levi published two pages from a third MS. (C), xxxvi, 29a-xxxviii, 1a, that is, a passage already contained in Codex B; and two from a fourth MS. (D), presenting in a defective manner, vi, 18-27b, that is, a section already found in Codex A. Early in 1900, E. E. Evans, E. T. West and R. de Vaux discovered, in the high priest Simon, the writer’s holy contemporary (xlii-l, 26). At the close of the book (l, 27-29), there is first, a short conclusion containing the author’s subscription and the express declaration of his general purpose; and next, an appendix (lxi) in which the writer returns thanks to God for His benefits, and especially for the gift of wisdom, and to which are subjoined in the Hebrew text recently discovered, a second subscription and the following pious ejaculation: “Blessed be the name of Yahweh from this time forth and for evermore.”

As might naturally be anticipated, and indeed it was desirable that it should so happen, the publication of these various fragments gave rise to a controversy as to the originality of the text therein exhibited. At a very early stage in that publication, scholars eagerly noticed that although the Hebrew language of the fragments was apparently classical, it nevertheless contained readings which might lead one to suspect its actual dependence on the Greek and Syriac versions of Ecclesiasticus. Whence it manifestly important to determine whether, and if so, to what extent, the Hebrew fragments reproduced an original text of the book, or on the contrary, simply presented a late re-transliteration of Ecclesiasticus into Hebrew by means of the versions just named. Both Dr. G. Bickell and
Professor D. S. Margoliouth, that is, the two men who but shortly before the discovery of the Hebrew fragment of Ecclesiasticus had attempted to reconstruct the ancient text of the first small parts of the book into Hebrew, declared themselves openly against the originality of the newly found Hebrew text. It may indeed be admitted that the efforts naturally entailed by their own work of reconstruction, particularly in his preface to the Bird Beckett for noticing and appreciating those features which even now appear to many scholars to tell in favour of a certain connexion of the Hebrew text with the Greek and Syriac versions. It remains true, however, that, with the exception of Israel Levi and perhaps of the original text of the Hebrew, Talmudic scholars of the day are of the mind that the Hebrew fragments present an original text. They think that the arguments and inferences most vigorously urged by Professor D. S. Margoliouth in favour of his view have been disposed of through a comparison of the fragments published in 1899 and 1900 with those that had appeared at an earlier date, and through a close study of nearly all the facts now available. They readily admit in the MSS, thus far recovered, scribal faults, doublets, Arabisms, apparent transpositions of words in certain current versions. But their minds all such defects do not disprove the originality of the Hebrew text, inasmuch as they can, and indeed in a large number of cases must, be accounted for by the very late character of the copies now in our possession. The text and fragments, they hold, belong, at the earliest, to the tenth, or even the eleventh, century of our era, and by that late date all kinds of errors could naturally be expected to have crept into the original language of the book, because the Jewish copies of the work did not regard it as canonical. At the same time, these defects do not invalidate the ancient text and fragments, in the manner of Hebrew in which Ecclesiasticus was primitively written. The language of the fragments is manifestly not rabbinic, but classical Hebrew; and this conclusion is decidedly borne out by a comparison of their text with that of the quotations from Ecclesiasticus, both in the Talmud and in the Saadia, which have already been referred to. Again, the Hebrew of the newly found fragments, although classical, is yet one of a distinctly late type, and it supplies considerable material for lexicographic research. Finally, the comparison of the text of the Massorah MSS. and the text of the newly discovered in only one place (Cairo) points to the fact that the work in its primitive form was often transcribed in ancient times, and thus affords hope that other copies, more or less complete, of the original text of Ecclesiasticus were made. From this view point, their study convenient, all the extant fragments have been brought together in a splendid edition, "Fascimiles of the Fragments hitherto recovered of the Book of Ecclesiasticus in Hebrew" (Oxford and Cambridge, 1901). The metrical and statistic structure of parts of the newly discovered text has been particularly investigated by H. Grimm and N. Schloël, whose success in the matter is, to say the least, indifferent; and by Jos. Knabenbauer, S.J., in a less venturesome way, and hence with more satisfactory results.

IV. ANCIENT VERSIONS.—It was, of course, from a Hebrew text incomparably better than the one we now possess that the grandsons of the author of Ecclesiasticus rendered the book into Greek. This translator was a Palestinian Jew who came to Egypt at a certain time, and desired to make the work accessible in a Greek dress to the Jews of the Dispersion, and no doubt also to all lovers of wisdom. His name is unknown, although an ancient, but little reliable, tradition ("Synopsis Sacrae in St. Matthew's work") calls him Jesus, the son of Stephanus. His Hebrew qualifications for the task he undertook and carried out cannot be fully ascertained at the present day. He is commonly regarded, however, from the general character of his work, as a man of good general culture, with a fair command of both Hebrew and Greek. He was aware of the great difference which exists between the respective genius of these two languages, and of the consequent difficulty attending the efforts of one who aimed at giving a satisfactory Greek version of a Hebrew writing, and therefore begets extravagant claims, in the manner of readers indulgence for whatever shortcomings they may notice in his translation. He claims to have spent much time and labour on his version of Ecclesiasticus, and it is only fair to suppose that his work was not only a conscientious, but also, on the whole, a successful, rendering. This is, he says, the guarded manner of the exact value of the Greek translation in its primitive form, for the simple reason that a comparison of its extant MSS.—all apparently derived from a single Greek exemplar—shows that the primitive translation has been very often, and in many cases seriously, tampered with. The great uncial codices, the Vatican, the Sinaitic, the Ephraemite, and partly the Alexandrian, though comparatively free from glossees, contain an inferior text; the better form of the text seems to be preserved in the Venetus Codicis, the Sinaitic MSS., and the Hebrew text, the form of the glossees. Undoubtedly, a fair number of these glossees may be referred safely to the translator himself, who, at times, added one word or even a few words to the original before him, to make the meaning clearer or to express himself from the manner of the Hebrew. But the great bulk of the glossees resemble the Greek additions in the Book of Proverbs; they are expansions of the thought, or hellenizing interpretations, or additions from current collections of gnomic sayings. The following are the best-ascertained results which flow from a comparison of the Greek version with the text of our Hebrew fragments. Oftentimes, the corruptions of the Hebrew may be discovered by means of the Greek; and, conversely, the Greek text is proved to be defective, in the line of additions or omissions, by reference to parallel places in the Hebrew. At times, the Hebrew discloses considerable freedom of rendering on the part of the Greek translator; or enables one to perceive how the author of the version mistook one Hebrew letter for another; or, again, affords us a means to make sense out of an unintelligible expression in the Hebrew. Lastly, the Hebrew text confirms the order of the contents of xxx-xxxxvi which is presented by the Syriac, Latin, and Armenian versions, against the unnatural order found in all existing Greek MSS. Like the Greek, the Syriac version of Ecclesiasticus was made from the Massorah, etc. This is wellnigh universally admitted; and a comparison of its text with that of the newly found Hebrew fragments should settle the point forever: as just stated, the Syriac version gives the same order as the Hebrew text for the contents of xxx-xxxxvi; in particular, it presents mistaken renderings, the origin of which, while inexplicable by supposing a Greek original as its basis, is easily accounted for by reference to the text of the Hebrew fragments. But the Hebrew text from which it was made must have been very defective, as is proved by the numerous and important lacunae in the Syriac translation. It seems, likewise, that the Hebrew has been rendered by the translator himself in a careless, and at times even arbitrary, manner. The Syriac version has all the less critical value at the present day, because it was considerably revised at an unknown date, by means of the Greek translation. Of the other ancient versions of Ecclesiasticus, the Old Latin is the most important. It was made before St. Jerome's time, although the precise date of its origin cannot now be ascertained; and the holy doctor apparently revised its text but little, previously to its adoption into the Latin Vulgate. The unity of the Old Latin version, which was formerly undoubted,
The statement, although it is not found in the Hebrew. His close acquaintance with the "Law, the Prophets, and the other books delivered from the fathers", that is, with the three classes of writings which make up the Hebrew Bible, is distinctly borne witness to by the prologue to the Greek version of 1 Enoch. The fact that which the study of the Hebrew fragments has shown to be derived from the sacred books of the Jews, is an ample proof that Jesus, the son of Sirach, was thoroughly acquainted with the Biblical text. He was a philosophical observer of life, as can be easily inferred from the nature of iv, xiv, vii, 17, of the wider knowledge which he acquired by traveling much, and of which he, of course, availed himself in writing his work (xxiv, 12). The particular period in the author's life to which the composition of the book should be referred cannot be defined, whatever conjectures may have been put forth in that regard by some recent scholars. The data to which others have appealed (xxxi, 22 sqq.; xxxviii, 1-15; etc.) to prove that he was a physician are insufficient evidence; while the similarity of the names (Jason-Jesus) is no excuse for those who have identified Jesus, the son of Sirach, a man of manifestly pious and honourable character, with the ungodly and hellsing high priest Jason (175-172 B.C. — concerning Jason's wicked deeds, see II Mach.; iv, 7-20).

The title, which Jesus, the author of Ecclesiasticus, lived has been the matter of much discussion in the past. But at the present day, it admits of being given with tolerable precision. Two data are particularly helpful for this purpose. The first is supplied by the Greek prologue, where we read that the grandson of Jesus of Sirach came into Egypt, and to the prophecy known as the "Joseph prophecy", not long after which he rendered into Greek his grandfather's work. The "thirty-eighth year" here spoken of by the translator does not mean that of his own age, for such a reference is irrelevant in rendering a prologue. It naturally denotes the date of his arrival in Egypt with a reference to the years of rule of the then monarch, the Egyptian Ptolemy Euergetes; and in point of fact, the Greek grammatical construction of the passage in the prologue is that usually employed in the Septuagint version to give the year of rule of a prince (cf. Aggeus, i, 1; ii, 1, 10; Zach., i, 1, 7; vii, 1; I Mach., xiii, 42; xiv, 27; etc.). There were indeed two Ptolemys of the surname Euergetes (Benefactor): Ptolemy III and Ptolemy VII (Physcon). But to decide which one is the dedicatee of the Book of Ecclesiasticus is an easy matter. As the first, Ptolemy III, reigned only twenty-five years (247-222 B.C.), it must be the second, Ptolemy VII, who is intended. This latter prince shared the throne along with his elder brother (from 246 to 222 B.C.) and afterwards ruled alone (from 145 B.C. onwards). But he was wont to reckon the years of his reign from the earlier date. Hence "the thirty-eighth year of Ptolemy Euergetes", in which the grandson of Jesus, the son of Sirach, came to Egypt, is the year 132 B.C. as the beginning of the reign. The author of Ecclesiasticus, may be regarded as having lived and written his work between forty and sixty years before (between 190 and 170 B.C.), for there can be no doubt that in referring to Jesus by means of the term υἱὸς and of the definite phrase δυτικοῦ Ἰουδαίου, Jesus, the writer of the prologue designates his grandfather, and not a more remote ancestor. The second data is that which is particularly available for determining the time at which the writer of Ecclesiasticus (Ived) is supplied by the book itself. It has long been felt that since the son of Sirach celebrates with such a genuine glow of enthusiasm the deeds of "the high priest Simon, son of Onias", whom he praises as the last in the long line of Jewish worthies, he must himself have been an eyewitness of the glory which he depicts (cf. 1, 1-10, 22, 23). This was, of course, but an inference.
-as long as it was based only on a more or less subjective appreciation of the passage, one can easily understand why many scholars questioned, or even rejected, its correctness. But with the recent discovery of the original Hebrew of the passage, there has come a new, and distinctly objective, element, which rendered the writer's task more feasible, and thus prepared the way for the appearance of the inference. In the Hebrew text, immediately after his eulogium of the high priest Simon, the writer subjoins the following fervent prayer: “May His [i.e. Yahweh's] mercy be continually with Simon, and may he establish with him the covenant of Phineas, that will impart to them a day of glory and a day of heaven” (I, 24). Obviously, Simon was yet alive when this prayer was thus formulated; and its actual wording in the Hebrew implies this so manifestly, that when the author's grandson rendered it into Greek, at a date when Simon had been dead for some time, he felt it necessary to modify the text before him, and hence rendered it in the following general manner: “May His mercy be continually with us, and may He redeem us in His days.” Besides thus allowing us to realize the fact that Jesus, the son of Sirach, was a contemporary of the high priest. In Ecclesiasticus affords us certain details which enable us to decide which of the two Simons, both high priests and sons of Onias and known in Jewish history, is the one described by the writer of the book. On the one hand, the high priest Simon the younger (Antiq of the Jews, Bk. XII, chap. i, § 9), whence it is inferred that he was a renowned high priest worthy of being celebrated among the Jewish heroes praised by the son of Sirach. On the other hand, such details given in Simon's panegyric, as the facts that he repaired and strengthened the Temple, fortified the city against siege, and protected the city against robbers (cf. Eccles., I, 1–4), are in close agreement with what is known of the times of Simon II (about 200 B.C.). While in the days of Simon I, and immediately after, the people were undisturbed by foreign aggression, in those of Simon II the Jews were sorely harassed by hostile armies, and their territory was pillaged. If we consider the pious wish of Josephus (Antiq. of the Jews, Bk. XII, chap. iii, § 3), it was also in the later time of Simon II that Ptolemy Philopator was prevented only by the high priest's prayer to God, from desecrating the Most Holy Place; and that Simon the younger held himself and his name in high esteem both at home and abroad (cf. III Macc., ii, iii). It appears from these facts—to which others, pointing in the same direction, could easily be added—that the author of Ecclesiasticus lived about the beginning of the second century B.C. As a matter of fact, recent Catholic scholars, in increasing number, prefer this position to that which identifies the high priest Simon, spoken of in Eccles., I, with Simon I, and which, in consequence, refers the composition of the book to about a century earlier (about 280 B.C.).

VII. THE ARRANGEMENT.—At the present day, there are two principal views concerning the manner in which the writer of Ecclesiasticus composed his work, and it is difficult to say which is the more probable. The first, held by many scholars, maintains that an impartial study of the topics treated and of their actual arrangement leads to the conclusion that the whole book is the work of a single mind. Its advocates claim that, throughout the book, one and the same general purpose can be easily made out, to wit: the purpose of teaching the practical value of Hebrew wisdom, so that one and the same method in handling the materials can be readily noticed, the writer always showing wide acquaintance with men and things, and never citing any exterior authority for what he says. They affirm that a careful examination of the contents discloses a distinct unity of mental attitude on the author's part towards the same leading topics, towards God, life, the Law, wisdom, etc. They do not deny the existence of differences of tone in the book, but think that they are found in various paragraphs relating to minor topics; that the diversities of treatment which we go beyond the range of one man's experience; that the author very likely wrote at different intervals and under a variety of circumstances, so that it is not to be wondered at if pieces thus composed bear the manifest impress of a somewhat different frame of mind. Some of them actually go so far as to maintain that, in Ecclesiasticus, the author has collected thoughts and maxims that were already in current and popular use, may even have drawn material from collections of wise sayings no longer extant or from unpublished discourses of sages; but they, each and all, are positive that the author of the book "was not a mere collector or compiler; his characteristic personality stands out too distinctly and prominently for that, and notwithstanding the diversified character of the apothegms, they are all the outcome of one connected view of life and of the world" (Schurer).

The second view maintains that the Book of Ecclesiasticus was composed by a process of compilation. According to the defenders of this position, the compilatory character of the book does not necessarily conflict with a real and profound feeling of selection and connecting the elements of the work: such a purpose proves, indeed, that one mind has bound those elements together for a common end, but it really leaves untouched the question at issue, viz. whether that one mind must be considered as the original author of the contents of the book, or, rather, as the combiner of pre-existing materials. Granting, then, the existence of one and the same general purposes in the work of the son of Sirach, and admitting likewise the fact that certain portions of Ecclesiasticus belong to him as the original author, they think that, on the whole, the book is a compilation. Briefly stated, the following are the grounds for their position. In the first place, from the very nature of his work, the author was like "a gleaner after the grape-gatherers"; and in thus speaking of himself (xxxiii, 16) he gives us to understand that he was well acquainted with the writings of Josephus (Antiq. of the Jews, Bk. XII, chap. iii, § 3). It was also in the later time of Simon II that Ptolemy Philopator was prevented only by the high priest's prayer to God, from desecrating the Most Holy Place; and that Simon the younger held himself and his name in high esteem both at home and abroad (cf. III Macc., ii, iii). It appears from these facts—to which others, pointing in the same direction, could easily be added—that the author of Ecclesiasticus lived about the beginning of the second century B.C. As a matter of fact, recent Catholic scholars, in increasing number, prefer this position to that which identifies the high priest Simon, spoken of in Eccles., I, with Simon I, and which, in consequence, refers the composition of the book to about a century earlier (about 280 B.C.).

VIII. THE DIVISION.—At the present day, there are two principal views concerning the manner in which the writer of Ecclesiasticus composed his work, and it is difficult to say which is the more probable. The first, held by many scholars, maintains that an impartial study of the topics treated and of their actual arrangement leads to the conclusion that the whole book is the work of a single mind. Its advocates claim that, throughout the book, one and the same general purpose can be easily made out, to wit: the purpose of teaching the practical value of Hebrew wisdom, so that one and the same method in handling the materials can be readily noticed, the writer always showing wide acquaintance with men and things, and never citing any exterior authority for what he says. They affirm that a careful examination
smaller collections containing each the same saying, or differencing considerably in their general tenor, or supplied with their respective titles. Finally, there seems to be no trustworthy authority characterizing of Ecclesiastus in a second, but unauthorized, prologue to the book, which is found in the "Synopsis Sacre Scripturæ". In this document, which is printed in the works of St. Athanasius and also at the beginning of Ecclesiastus in the Complutensian Polyglot, the actual redaction of the book is ascribed to the Greek translator as a regular process of compilation of detached hymns, sayings, prayers, etc., which had been left him by his grandfather, Jesus, the son of Simon.

VII. DOCTRINAL AND ETHICAL TEACHING.—Before setting forth in a summary way the principal teachings, doctrinal and ethical, contained in the Book of Ecclesiastes, it will not be amiss to premise two remarks which, however, elementary, should be distinctly borne in mind by anyone who wishes to view the doctrines of the son of Sirach in their proper light. First, it would be obviously unfair to require that the contents of this Sapiential book should come fully up to the high moral standard of Christian ethics, or should equal in clearness and precision the dogmatic teachings contained in the sacred books of the Old Testament or in the living tradition of the Church; all that can be reasonably expected of a book composed some time before the Christian Dispensation, is that it shall set forth substantially good, not perfect, doctrinal and ethical teaching. In the second place, both good logic and sound common sense demand that the silence of Ecclesiastes concerning certain points of doctrine be not regarded as a positive denial of them, unless it can be clearly and conclusively shown that such a silence must be so construed. The work is mostly made up of unconnected sayings which bear on all kinds of topics, and on that account, hardly ever, if ever at all, will a sober critic be able to pronounce on the actual motive which prompted the author of the book either to mention or to omit a particular point of doctrine. Nay more, in presence of a writer manifestly wedded to the national and religious traditions of the Jewish race, as the general tone of his book proves the author of Ecclesiastes to have been, every scholarly worthy of the name will readily see that silence on Jesus' part regarding some important doctrine, such as that of the Trinity, is no different from the fact that the son of Sirach did not abide by the belief of the Jews concerning that doctrine, and, in reference to the special point just mentioned, did not share the Messianic expectations of his time. As can readily be seen, the Sapiential book consists of two great parts: (1) a section of sayings explicitly or implicitly set forth elementary canons of historical criticism; and (2) a second section, which contains, besides, simply set forth elementary canons of historical criticism; and they would not have been dwelt on here were it not that they have been very often lost sight of by Protestant scholars, who, biased by their desire to disprove the Catholic doctrine of the inspired character of the Testament, have done their utmost to depreciate the doctrinal and ethical teaching of this deutero-canonical book.

The following are the principal dogmatic doctrines of Jesus, the son of Sirach. According to him, as according to all the other inspired writers of the Old Testament, God is one and there is no God beside Him (xxxvi, 5). He is a living and eternal God (xxviii, 1), and although His greatness and mercy exceed all human comprehension, yet He makes Himself known to man through His wonderful works (xvi, 15, 25; xxviii, 1), and also through the Last Judgment (xvi, 12), which He produced by His word of greatness and goodness (xliii, 15–xliii; etc.). Man is the choice handwork of God, who made him for His glory, set him as king over all other creatures (vi, 8), bestowed upon him the power of choosing between good and evil (xv, 14–22), and will hold him accountable for his own personal deeds (xvii, 9–16), for while tolerating moral evil He reproves it and enables man to avoid it (xv, 11–21). In dealing with the latter, He is mighty to forgive (xvii, 11) and: "How great is the mercy of the Lord, and His forgiveness to them that turn to Him" (xxvii, 28); yet no one should presume on the Divine mercy and hence delay his conversion, "for His wrath shall come on a sudden, and in the time of vengeance He will destroy the ungodly ones" (v, 6–9). From among the children of men, God selected for Himself a special nation, Israel, in the midst of which He wills that wisdom should reside (xxix, 13–16), and in behalf of which the son of Sirach offers up a fervent prayer, replete with touching reminiscences of God's mercies to the prophets of old, and with ardent wishes for the reunion and exaltation of the chosen people (xxxvi, 1–19). It is quite clear that the Jewish patriarch who put forth this petition to God for future national quiet and prosperity, and who furthermore confidently expected that Elias' return would contribute to the glorious restoration of all Israel (cf. xlviii, 10), looked forward to the introduction of Messianic times. It remains true, however, that in whatever way his silence be accounted for, he does not speak anywhere of a special revelation to Israel, of the people of the New Testament or of the future coming of a personal Messiah. He manifestly alludes to the narrative of the Fall, when he says: "From the woman came the beginning of sin, and by her we all die" (xxv, 33), and apparently connects with this original deviation from right conduct, the miseries and passions that weigh so heavily on "the children of Adam" (x, 1–11). He says very little concerning the next life. Earthly rewards occupy the most prominent, or perhaps even the sole, place, in the author's mind, as a sanction for present good or evil deeds (xiv, 22–xxv, 6; xvi, 1–14); but this will not appear strange to anyone who is acquainted with the limitations of Jewish eschatology in the more ancient parts of the Old Testament. He depicts death in the light of a reward or of a punishment, only in so far as it is either a quiet demise for the just or a final deliverance from earthly ills (xlii, 3, 4), or, on the contrary, a terrible end that overtakes the sinner when he least expects it (ix, 16, 17). As regards the underworld or Sheol, it appears to the writer nothing but a mournful place where the dead do not praise God (xxv, 9, 10).

The central, dogmatic, and moral idea of the book is that of wisdom. Bén Sîrâ describes it under several important aspects. When he speaks of it in relation to God, he almost invariably invests it with personal attributes (i, 1); he regards it as a gift just as a child may receive it (i, 2); he portrays it as a universally diffused, but not universal (xxiv, 6 sqq.). It is the formative, creative power of the world (xxiv, 3 sqq.), yet it is itself created (i, 9; also in Greek: xxiv, 9), and is nowhere treated as a distinct, subsisting Divine Person, in the Hebrew text. In relation to man, wisdom is described as a reality which comes from the Almighty and works most excellent effects in those who love Him (i, 10–13). It is identified with the "fear of God" (i, 16), which should of course prevail in a special manner in Israel, and promote among the Hebrews the perfect fulfillment of the Mosaic Law, which the author of Ecclesiastus regards as the living embodiment of God's wisdom (xxiv, 11–20, 32, 33). It is a priceless treasure, to the acquisition of which one must devote all his efforts, and the imparting of which to others one should never grudge (vi, 19–20; xx, 32, 33). It has a leading position in the last judgment (xxviii, 6), and is to preserve the virtues of faith, hope, and love of God (ii, 8–10), of trust and submission, etc. (i, 18–23; x, 23–27; etc.); which also secures for him happiness and glory in this life (xxxiv, 14–20; xxxvii, 37, 38, etc.). It is a frame of mind which prevents the discharge of the ritual law, especially the offering of sacrifices, from becoming a heartless compliance with mere outward

ECCLESIASTICAL
obscenities, and it causes man to place inward right-

eousness far above the offering of rich gifts to God (xxvi). As can readily be seen, the author of Ecclesi-
stics insinuated in all this a teaching far superior to that of the Prophets, as also to that of the sages, and

no way inferior to that of the prophets and of the other pious writers before him. Highly commendable, too, are the numerous pithy sayings which the son of Siraich gives for the avoidance of sin, within the negative part of proverbs, which may be

said to consist. His maxims against pride (iii; 30; vi;

2-4; x; 18-21; etc.), covetousness (iv; 36; v; i; xi; 18-

21), envy (xxx; 22-27; xxvi; 22), impurity (ix; 1-13;

xix; 1-3; etc.), anger (xvii; 1-14; x; 6), intemperance (xxvii; 30-34), sloth (vii; 16; xxii; 1, 2), the sins of the
tongue (iv; 30; vii; 13; 14; xi; 2; 3; i; 36-40; v; 16; 17;

xxvii; 15-27; etc.), evil company (xi; 31-36; xxii, 14-

18; etc.), display a close observation of human nature, stigmatize vice in a forcible manner, and at times

point out the remedy against the spiritual distemper.

Indeed, it is probably no less because of the success

which Bena Stru attained to in branding vice than

because of that which he obtained in directly inculcating

virtue, that his work was so willingly used in the early
days of Christianity for public reading at church, and

began to have the present day, the pre-eminent title of

"Ecclesiasticus." Together with these maxims, which nearly all bear

on what may be called individual morality, the Book of

Ecclesiasticus contains valuable lessons relative to

the various classes which make up human society.

The natural basis of society is the family, and the son

of Sirach supplies a number of pieces of advice espe-
cially appropriate to the domestic circle as it was then

constituted. He would have the man who wishes to

become the head of a family determined in the choice

of a wife by her moral worth (xxvii; 29-36; xi; 15-28).

He repeatedly describes the previous advantages re-

sulting from the possession of a good wife, and con-

trasts them with the misery entailed by the choice of

an unworthy one (xxvi; 1-24; xxv; 17-36). The man,

as the head of the family, he represents as

indeed as vested with more power than would be granted to him

among us, but he does not neglect to point out his

numerous responsibilities towards those under him: to

his children, especially his daughter, whose welfare he

might more particularly be tempted to neglect (vii;

25-31), and his much concerning who would be the

"first servant be dear to thee as thy own soul" (vii;

23; xxxiii, 31), not meaning thereby, however, to

encourage the servant's idleness or other vices (xxxiii;

25-30). The duties of children towards their parents

are often and beautifully insisted upon (vii; 29, 30;

8, 27; xii; 5-7), and the author voices a variety of

suggestions to the choice and the worth of a real friend

(v; 8-17; ix; 14, 15; xii, 8, 9), to the care with which such a one

should be preserved (xxii, 25-32), and also to the

worthlessness and dangers of the unfriendly friend

(xxv; 1-4; 17-24; xxvi; 8). The author has no bias

against those in power, but on the contrary considers it

an expression of God's will that some should be in

exalted, and others in humble, stations in life (xxxiii;

7-15). He conceives of the various classes of society,
of the poor and the rich, the learned and the ignorant, as able to become endowed with wisdom (xxvii;

21-29). He would have a prince bear in mind that he is in

God's hand, and owes equal justice to all, rich and

poor (v; 18; x; 1-13). He bids the rich give alms, and

visit the poor and the afflicted (iv; 1-11; vii; 35; 39; 40), for almost directly to obtain forgiveness of sin (iii; 33, 34; vii; 10, 36), whereas hard-

heartedness is in every way hurtful (xxxv, 25-29).

On the other hand, he directs the lower classes, as we

might call them, to show themselves submissive to

those in higher condition and to bear patiently with

the misfortunes of others (xxv; 26-30; xxvi; 1-13; ix; 18-21; xii; 1-8). Nor is the author of Ec-

clesiasticus anything like a misanthrope that would

set himself up resolutely against the legitimate plea-

sures and the received customs of social life (xxx, 12-

42; xxxii, 1 sqq.); while he directs severe but just

rebukes against those who outrage them in the name of

Christian morality. Finally, he has favourable sayings about the physician (xxviii, 1-15), and about the dead (vii; 37; xxxviii, 16-24); and strong words of caution against the dan-

gers which one incurs in the pursuit of business (xxvii;

xxxvii, 1-4; vii; 18). The book is,"

Eccleston, SAMUEL, fifth Archbishop of Baltimore, U. S. A., b. near Chestertown, Maryland, 27 June,

1801; d. at Georgetown, D. C., 22 April, 1851. His father was Samuel Eccleston, an Episcopalian. After

her husband's death, Mrs. Eccleston married a Cath-

olic gentleman named Stenson. Samuel was thus

brought under Catholic influence, and sent to St.

Mary's College, Baltimore, where he was converted.

Entering St. Mary's Seminary in 1819, he was ordained

priest, 24 April, 1825. He went to Isey, France, for

further theological studies, and, returning to Balti-

more in July, 1827, was made vice-president, and two

years later president, of the College. On 19 Sept., 1834, he was consecrated titular Bishop of Thermia, and coadjutor with the right of succession for Baltimore, and, upon the death of Archbishop

Whitfield, 19 October, 1834, succeeded to the metro-

politan see. He bore a large part in the organization

of the Episcopalian Church, the order, and, until Bishop Whelan's appointment in 1841.

During his term of office many new churches were erected. He contributed largely of his own means

towards the building of the cathedral. To provide for

German Catholics the Redemptorists were invited

from Austria in 1841; the Brothers of the Christian

Schools were introduced into the United States in

1846, establishing Calvert Hall School at Baltimore,

and the same year the Brothers of St. Patrick took

charge of a manual labour school (since discontinued)

near that city. At the important question of the

Church, 1845-1849, 11 November, 1849, of St. Charles' College, founded by

the generosity of Charles Carroll of Carrollton. Five

provincial councils, the third to the seventh inclusive,

were held at Baltimore under Archbishop Eccleston.

J. P. W. MCNEAL.

Eccleston, THOMAS OF, thirteenth-century Friar

Minor and chronicler, dates of birth and death un-

known. He styles himself simply "Brother Thomas" and

Bale seems to have first given him the title "of

Eccleston." He appears to have entered the order

about 1232-3 and to have been a student at Oxford

between 1230 and 1240. After the latter year he was

stationed at the convent in London, but he does not

appear to have written or left any works in these

years. He is chiefly famous for his chronicle "De Adventu Frat-

rum Minorum in Anglia," which extends from the

coming of the friars into England under Agnellus of

Pisa, in 1224, up to about 1258, when the work was

probably completed. Eccleston declares that he spent

twenty-six years on the writing of it; but this is a

probable, as, on the whole, the anxiety he has shown

most of the information it contains being derived from
personal knowledge or verbal communication, although he seems to have had access to certain written documents now lost. His "De Adventu" is a collection of notes rather than a finished work. He describes with extreme simplicity and vividness what has been called the heroic period of the Franciscan movement in England. Incidentally it throws some light on the trend of early Franciscan events and thought in general. Four MSS. of the "De Adventu," all of which go back to one lost archetype, are known to scholars. The chronicle has been often edited; in part by Brewer in the "Monumenta Franciscana" (Rolls Series, London, 1858); and by Howlett in the same series (1882); by the Friar Minor at Quaracchi (in AnalectaFranciscana, I, 1885, 217-57); by Liebermann in the "Monumenta Germaniae" (XXVIII, Hanover, 1885, 560-69). A critical edition of the complete text is due and peculiar titles are in various editions of Eccleston's work by Father Cuthbert, O.S.F.C., "The Friars and how they came to England" (London, 1903).

PASCAL ROBINSON.

Echard, Jacques, historian of the Dominicans, b. at Rouen, France, 22 Sept., 1644; d. at Paris, 15 March, 1724. As the son of a wealthy official of the king he received a thorough classical and secular education. He entered the Dominican Order at Paris and distinguished himself for his assiduity in study. When Jacques Quétif, who had planned and gathered nearly one-fourth of the material for a literary history of the Dominican Order, died in 1698, Echard was commissioned to complete the work. After much labour and extensive research in most European libraries this monumental history appeared in two quarto volumes under the title "Scriptores ordinis predicatarum recentior, notissque historici illustrati" etc. (Paris, 1721). Besides a sketch, based chiefly on Pignon and Salazar, and a list of each writer's works, with the dates and a review of the various editions, Echard enumerates the unpublished, spurious, and doubtful works, with valuable indications as to their whereabouts. He displays throughout a keen, sane, and incisive criticism which has been highly praised by competent critics (Journal des Savants, LXXIX, 567). A new revised edition was prepared in 1748 by Édouard Coulon, O.P.

DENYER in Archiv. fur Litteratur und Kirchengeschichte (1888), II, 165 seq.; MONTEZ in La Grande Encyclopédie, s. v. THOS. M. SCHWERTNER.

Echea, Baltasar de, painter, b. at Zumaya, Guipuzcoa, Spain, in the latter part of the sixteenth century; d. in Mexico about the middle of the seventeenth. As a painter he was a natural talent, and was thought to be his son, he is known as Echea the Elder. He was one of the earliest Spanish artists to reach Mexico, arriving at about the same time, near the end of the sixteenth century, as Sebastian Arteaga and Alonso Vasques. He was then a young man, and there is a tradition that his wife, also a painter, was his instructor. Echea, whose subjects are chiefly religious, had especial skill in composition, and his best works, which have much charm of colour and tenderness of treatment, are thought to recall those of Guercino and of Michelangelo. At the request of San Carlos, in the City of Mexico, there are some of his best pictures, notably "The Adoration of the Magi," "Christ in the Garden," "The Martyrdom of San Aponiano," "The Holy Family," "The Visitation," "The Holy Sepulchre," "Saint Ann and the Virgin," "The Apparition of Christ and the Virgin to San Francisco," "The Martyrdom of San Ponciano," and "Saint Cecilia." In the church of San José el Real, generally known as the "Profesa," are several others, including "St. Isabel of Portugal," while he executed for the church of Santiago Tlatelolco fifteen altar-pieces. A certain work of "Candia" and "San Sebastian," believed to be by his wife. Among the smaller paintings of Echea is one of San Antonio Abad with St. Paul, the first hermit. The artist also had a reputation as an author, among his works being one on the Bucayan legend 

AUGUSTUS VAN CLEEF.

Echinus, a titular see of Thessaly, Greece. Echinus (Eci-no, also Ekhvly) was situated on the northeastern shore of the Gulf of Lamia (Maiac sinus). To-day it is a small village, Akinhos (Af'mv), of 500 inhabitants, in the demes of Phalara and the eparchy of Phthiotis. On the conical hill which rises above the village are remains of the old walls. The city has not destroyed by earthquake many times, particularly in 426 n. c. and A. D. 551. Philip II of Macedon left it to the Malians, and Philip V took it from the Ætolians. It was fortified by Justinian. The sea, mentioned in "Notitiae episcopatuum" as late as the eighth century or thirteenth, was swallowed up by the strait of Lefkandia. The bishoprics of Echinus, of Cerasa, of Lefkandia (or Lefkandia), and of Aratus, all were united to the see of Larissa. Three bishops are known: Theodore in 431, Peter in 451, and Aristotele in 459 (Lequien, Oriens christianus, II, 115).

Leake, Northern Greece (London, 1835), II, 90; Faubry-Wibrow, Reis-Ecloga, s. v.

S. Pétriédès.

Echtarnach, Abbey of (also Eternach, Lat. Eternacensis), a Benedictine monastery in the town of that name, in the Grand Duchy of Luxembourg and the Diocese of Trier. It was founded in 998 by St. Willibrord, an English monk of Ripon, who became the first Bishop of Frisia and Archbishop of Utrecht. Although a bishop, he ruled the monastery as abbot until his death in 739. The abbey stood near the River Ern on land given him for the purpose by St. Irmine, Abbess of Oerlen and daughter of Dagobert II. It had many royal and other benefactions, including Pepin and Charlemagne, who conferred upon it great privileges. In 859 the monks were displaced by secular canons, as was so often the case with the early monasteries, but in 971 Emperor Otto I restored the Benedictine life there, bringing forty monks thither from the great Abbey of St. Maximin at Trier, one of which was Ravenger by name, was made abbot. The monastery became very celebrated and was, during the Middle Ages, one of the most important in Northern Europe. It continued to flourish until the French Revolution, when it was suppressed, and the monks dispersed. The buildings put up by St. Willibrord were burnt down in 1017, and a new abbey was then erected. The church was Romanesque in style, but Gothic additions and alterations were made in the fourteenth and sixteenth centuries. In 1797 it was sold and became a pottery factory, but in 1881 it was reacquired by the townsmen, through whose generosity and devotion it was restored and made a parish church. The reconsecration took place with great solemnity in 1888, and since that date the work of restoration and decoration has continued steadily. It is popularly called "the cathedral," though not the seat of a bishop. The conventual buildings, originally erected in 1017-31, have been frequently rebuilt and added to, and they were entirely modernised in 1732. At the suppression they became State property and have for many years served as barracks. The library was noted for a number of precious MSS. of very early date which it contained; some of them are now in the Bibliothèque Nationale at Paris.

The Dancing Procession.—The Abbey of Echtarnach owes much of its fame, especially in modern times, times,
to the curious “dancing procession,” which takes place annually on Whit Tuesday, in honour of St. Willibrord. The cult of the saint may be traced back almost to the date of his death, and the stream of pilgrims, whose interest in the saint is still preserved. The Emperors Lothair I, Conrad, and Maximilian may be numbered amongst them. The tomb stands before the high altar, and has been recently entirely renewed. On it is a recumbent effigy of the saint, and amongst other relics preserved there are a nail, a crozier, and a piece of cloth said to have been used to him. The origin of the procession cannot be stated with certainty. Authentic documents of the fifteenth century speak of it as a regular and recognized custom at that time, but for earlier evidence there is only tradition, preserved down to the present day. Under the patronage of the abbey, the festival became something of a great public event, and when a pestilence raged amongst the cattle of the neighbourhood, the symptoms of which were a kind of trembling or nervous shaking followed by speedy death, the people thought that by imitating these symptoms, more or less, while imitating the interests of St. Willibrord, the evil might be stayed. The desired result was obtained, and so the dancing procession to the saint’s tomb became an annual ceremony. Nowadays it is made an act of expiation and penance on behalf of afflicted relations and especially on behalf of the poor, and the procession is even to-day a popular occasion, and all nervous diseases. The function commences at nine o’clock in the morning at the bridge over the Sare, with a sermon by the parish priest (formerly the abbey of the monastery); after this the procession moves towards the basilica, through the chief streets of the town, a distance of about 11 kilometres. Three steps forward are taken, then two back, so that five steps are required in order to advance one pace. The result is that it is well after midday before the last of the dancers has reached the church. They go four or five abreast, showing off their best dress, and many bands accompany them, playing a traditional melody which has been handed down for centuries. A large number of priests and religious also accompany the procession and not infrequently there are several bishops as well. On arrival at the church, the dance is continued around the tomb of St. Willibrord, when litanies and prayers in his honour are recited, and the whole concludes with Benedictus of the Blessed Sacrament. Though curious and even somewhat ludicrous, the people perform it in all seriousness and as a matter of course. The festivity of Echternach, a great concourse of tourists as well as pilgrims, and as many as ten thousand people generally take part in it. The procession took place annually without intermission until 1777. Then, on account of some abuses that had crept into it, it was forbidden by the Archbishop of Trier, and in 1786 Joseph II abolished the procession altogether. Attempts were made to revive it ten years later but the French Revolution effectually prevented it. It was recommenced, however, in 1806 and has continued ever since. In 1826 the Government tried to change the day to a Sunday, but since 1830 it has always taken place on Whit Tuesday, as formerly.

**Echter, Julius Eck**

In 1507 he entered on his duties as canon of Würzburg, an office to which he had been appointed in 1554; in 1570 he became dean of the cathedral chapter, and in 1573, at the age of twenty-nine, he became bishop of Würzburg. Various causes had combined to bring the diocese into a sad state. Deeply in debt and poorly administered, it had an almost entirely Protestant population. The clergy, in point of virtue and learning, were for the most part unequal to their task, and the cathedral chapter was adverse to any ecclesiastical reform. During the first ten years of Echter’s government the attempt to unite the Abbey of Fulda and the Bishopric of Würzburg, after the deposition of the Prince-Bishop Balthasar of Sulzbach, utterly failed. The cause of the new union flourished, grew rapidly, and furnished the see with the priests and officials needed to counterbalance the more or less irreligious temper of the population. The bishop was now able to take decisive steps against Protestantism. He banished all Lutheran preachers from his territory and removed all priests who were unwilling to observe the rules of their office. The public officials had to be Catholics, and none but Catholic teachers could be appointed. He began, moreover, courses of careful instruction for non-Catholics, and threatened to coerce them with penalties and even with banishment. Within three years about 100,000 returned to the Catholic Church. Public worship was also improved by the introduction of new devotions, processions, and the establishment of confraternities. Bishop Echter restored ruined monasteries or devoted their revenues to the erection of new parishes and to the building of three hundred new churches. The tapering towers of these churches, called after the bishop “Julius towers”, still preserve his memory. His most beneficial and lasting monument, after the great act of benefaction for which he founded with the endowment of the abandoned monastery of Heiligenthal, was skillful administration. He improved the decadent economic conditions of his ecclesiastical states, reduced taxes, perfected the administration of justice, and established many primary schools. In a word, he proved himself one of the most capable rulers of his time. Not only in his own diocese did he display an extraordinary and varied activity, but as the founder and soul of the Catholic League, he exercised a decisive influence on the future of Germany.

**Buchinger, Julius Eck** vom Messegern (Würzburg, 1843); WEGELS in Allgemeine deutsche Biographie, XIV, 671-84.

**Patrickius Schlegel.**

**Eck (Eckius), Johann**, theologian and principal adversary of Luther, b. 15 Nov., 1484, at Eck in Switzerland; d. 10 Feb., 1543, at Ingolstadt. His family name was Maier, and his father, Michael Maier, was for many years magistrate in the town, the latinized name of which, Eckius or Eckius, was adopted after 1535 by Johann. His uncle, Martin Maier, pastor at Schwäbisch Hall, had in 1499 built a house (1495) and educated him. In 1498, when twelve years old, he was admitted to the Heidelberg University; thence he went in 1499 to Tübingen where he received the degree of Master of Arts in 1501; then to Cologne and in 1505 to Freiburg in the Breisgau. After his graduation in the faculty of artes
he began the study of philosophy and theology, took
courses at the same time in jurisprudence, physics,
mathematics, and geography, joined the Humanistic
movement, and, in addition to Latin, learned Hebrew
and Greek. Among his compatriots at the universi-
ty were many distinguished scholars. His uncle now
withdraw his allowance and Eck was obliged to earn
his livelihood as a tutor while continuing his studies.
In 1505 he was appointed rector of the Artisten
Maurer zu Meiss, i.e. principal of the hall for students in
arts at Meissen, and became lecturer in the school of
Theology; he lectured on the "Sentences" in 1506;
was promoted to the licentiate in 1509; and in 1510,
when twenty-four years old, he received the degree of
Doctor of Theology. He had been ordained to the
priesthood in 1508, with a papal dispensation from his
age-requirement. Shortly after graduating as doctor,
he was invited (1510) by the Duke of Bavaria to the
professorship of theology in Ingolstadt. He was ap-
pointed pro-chancellor of the university in 1512, and
during his professorate of thirty-two years filled re-
peatedly the "Oecolai", or university rector; and rector;
he also served as pastor and was appointed canon in
Eichstätt. At Freiburg and during his earlier years
at Ingolstadt, his literary activity was remarkable,
not only in theology but also in other departments of
scholarship and the sciences which have been preserved partly in print and partly in MS. He engaged in geographical research and published a series of philosophical works, some of which were to serve as textbooks in the faculty of arts at Ingol-
stadt. In these writings he attempts to combine in a
rational synthesis the advantages of the older philos-
ophy with those of the new. His principal theologi-
cal work during this period, entitled "Chrysopassus",
treats of predication with special reference to the
dogmas of grace and free will which were so soon to
become the landmark of Lutheran orthodoxy. He re-
ceived the centre of sharp discussion. The tenor of this
treatise, written when its author was only twenty-eight
years old, evinces both confidence and modesty.

Luther's appearance, and especially the Disputa-
tion at Leipzig (1519), formed the turning-point in
Eck's intellectual development and in his activity as
a theologian. Thenceforth he is a prominent figure
in the history of that period. With a clear insight into
the meaning of Lutheranism, he was the first to cham-
ploy the cause of Catholic teaching against Protestant
errors, and to present the Lutheran doctrine of the
crucial, untiring, and thoroughly equipped in theo-
logy. The rest of his life was spent in conflict with
the Reformers in Germany and Switzerland. He de-
defended the Catholic Church, its doctrines and its insti-
tutions, in his writings, in public debates, in his public
speeches at the diets, and in his diplomatic missions.
For the betterment of ecclesiastical life and the spread
of genuine reform he laboured earnestly by preaching
to the people and by insisting on the scientific educa-
tion of the clergy. As a reply to Luther's "theology"
he wrote his "Defence of Lutheranism" in 1519, which
was the first book that advocated the cause of the
Bishop of Eichstätt. Both Luther and Karlestadt
answered bitterly and then it was agreed to submit
the points at issue to the test of a public debate,
which was held in Leipzig, 27 June–15 July, 1519.
Eck came off victorious, exposed Luther's heresy, and
won over as a loyal adherent to the Catholic standard,
George, Duke of Saxony. During the same year he
published several essays attacking the tenets of Luther,
and grew steadily in prominence as an au-
thority on theological questions. In 1520 he visited
Rome to report on the condition of the Church.
and to secure the condemnation of Luther's heresy.
He submitted his essay on the Primacy of Peter to
Leo X, was appointed prothonotary Apostolic, and
was charged as papal legate, along with the two other
legates Alemannus and Guicciardini, to carry out in
Germany the provisions of the Bull "Munus Domini",
which excommunicated Luther and condemned his 41
theses. The execution of this mandate was beset with
difficulties on every side. Eck, through his "Epistola
da Carolum V" (1521), admonished Emperor Charles
V to enforce his laws, to the universality of which
were many distinguished scholars. His uncle now
withdraw his allowance and Eck was obliged to earn
his livelihood as a tutor while continuing his studies.
In 1505 he was appointed rector of the Artisten
Maurer zu Meiss, i.e. principal of the hall for students in
arts at Meissen, and became lecturer in the school of
Theology; he lectured on the "Sentences" in 1506;
was promoted to the licentiate in 1509; and in 1510,
when twenty-four years old, he received the degree of
Doctor of Theology. He had been ordained to the
priesthood in 1508, with a papal dispensation from his
age-requirement. Shortly after graduating as doctor,
he was invited (1510) by the Duke of Bavaria to the
professorship of theology in Ingolstadt. He was ap-
pointed pro-chancellor of the university in 1512, and
during his professorate of thirty-two years filled re-
peatedly the "Oecolai", or university rector; and rector;
he also served as pastor and was appointed canon in
Eichstätt. At Freiburg and during his earlier years
at Ingolstadt, his literary activity was remarkable,
not only in theology but also in other departments of
scholarship and the sciences which have been preserved partly in print and partly in MS. He engaged in geographical research and published a series of philosophical works, some of which were to serve as textbooks in the faculty of arts at Ingol-
stadt. In these writings he attempts to combine in a
rational synthesis the advantages of the older philos-
ophy with those of the new. His principal theologi-
cal work during this period, entitled "Chrysopassus",
treats of predication with special reference to the
dogmas of grace and free will which were so soon to
become the landmark of Lutheran orthodoxy. He re-
defended the Church against the attacks of Wenzel and
the others, the bishops, and other privileges, the power of enacting, independently of
the bishops, degrees for the moral reformation of
the clergy; and furthermore the right to appropriate,
for use against heretics and Turks, a fifth part of all
cash revenues.

Eck in the meantime combated Lutheranism by his
letters and essays. Between the years 1522 and 1526
he published eight voluminous treatises against Luther.
Through his influence the University of Ingolstadt
retained its strictly Catholic attitude and strenuously
opposed the rise of the heresies. Eck had also a consider-
able share in organizing the "Catholic Federation" founded 5 June, 1524, by the leaders in
Church and State for the purpose of safeguarding the
ancient faith and enforcing the Edict of Worms. He
was one of the committeemen of the various dioces-
es of the Church against Zwingli and his adher-
ents, and participated in the religious discussion
in Baden (1526). When the Protestants, at the Diet of
Augsburg in 1530, proclaimed the "Augsburg Confes-
sion" defining their religious views, Eck headed the
Catholic champions upon whom the refutation of the
articles in this confession devolved. Together with
Wimpina and Cochleus he represented the Catho-
lic party at the conference (16 Aug.) between Catho-
lic and Lutheran theologians relative to the "Con-
fession" of 1526. His own "Augsburg Confession"
erved on the sub-committee which canvassed the
results of the conference. Zwingli also had presented at
Augsburg a Confession of Faith and this Eck alone
refuted. Eck then drew up 404 heretical theses upon
which he challenged the Protestant theologians to
public debate. The challenge was not accepted; the
only answer from the Protestant party was a torrent
of abuse. In the negotiations relative to the Council
of Trent, Eck was consulted by the emperor, Charles
V, as well as by the pope, Paul III, and was charged
by the latter to settle the disputes between
Theological. At the religious disputation in Worms (1540), Eck again appeared as the chief Catholic representative
and debated with Melanchthon on the issues involved
in the "Augsburg Confession". This discussion was
continued during the Diet of Ratisbon (1541), at which
besides Eck, the emperor delegated as spokes-
men on the Catholic side, Julius Pfug and Gropper.
Eck maintained clearly and decisively the Catholic
position, and quite disapproved the "Ratisbon In-
terin". He also went on a mission to England and
the Netherlands, and finally in 1548 was invited
by Charles V to return to Rome to report on
the condition of the Church. In 1529 the bishops of
Denmark invited Eck and Cochleus to the discussion at Copenhagen; but neither appeared. Eck fully deserved the promi-
ience gained by him during the struggle against Prot-
estanism. He was the most distinguished theologian
of the time in Germany, the most scholarly and cour-
ageous champion of the Catholic Faith. Frank
and even in disposition, he was also inspired by a sincere
love of truth; but he showed none the less an intense
self-consciousness and a jovial bluntness of speech
which characterized the men of that age. His ad-
versaries, lampooning him publicly, taxed him with
drunkenness and immorality; but the general tone of
the writings published against Eck and the readiness
of the Protestants to calumniate their victorious
opponent, suggests some suspicion as to the truth of
the accusations and make them, so far as the evi-
Eckhart was prolific. His most important works are: "Loci communes adversus Lutherum et eis hostes ecclesiae" (Arguments against Luther and Other Enemies of the Church), printed first in 1535, 46th edition in 1576; essays on the Primacy of Piacenza, the Sorbonne, the Society of Jesuits, etc. He also published numerous polemical writings against Luther, Zwingli, Bucer, and other leaders of the new religious movements. He compiled the results of the numerous disputation in which he participated and the sermons he preached on various subjects. In 1539 he published a German version of the Scriptures, translating the Old Testament from the original and adopting Erasmus's translation of the New Testament. Eck, however, was able as a theologian than as a stylist. He also published a collection of most of his writings prior to 1535 entitled "Opera Johannis Eckii contra Ludderum in 5 partes" (Ingolstadt, 1530–1535). In this edition parts I–II contain his polemical writings on the Primacy, Penance, etc., against Luther; parts III–IV, his reports of the debates in Piacenza, the Sorbonne, the Society of Jesuits, etc. He also wrote the "Loci Communes", part V (4 vols.), his Latin sermons.

J. P. KIRSCH.

Eckhart, ANSELM, missionary, b. at Bingen, Germany, 4 August, 1721; d. at the College of Polotsk, Polish Russia, 29 June, 1809. Entering the Society of Jesus at nineteen, he was sent as a missionary to Brazil. Two years after his arrival in that country, he and his brethren were seized like felons and carried to Portugal, where they languished in prison till death relieved them or till they themselves, when all was done, was summoned by his own Judge. Father Eckhart was confined for eighteen years in the underground dungeons of Almeida and St. Julian. He wrote the story of his sufferings and those of his companions in the death of Joseph I of Portugal in 1777, Pombal fell into disgrace, and those of his victims who survived were released from their katholique dungeons. The Society of Jesus, which had been suppressed four years earlier by the Brief of Clement XIV, had continued to exist in Russia. Father Eckhart applied for readmission, and for thirty-two years following had the consolation of wearing the habit of the prescribed order. After filling the office of master of novices at Dünaburg, he was sent to the College of Polotsk, where this venerable confessor of Jesus Christ, the last of his order, perhaps, of his country, preserved in extreme old age the same vigour of soul which had sustained him in the missions and in captivity. He died full of days and merits in the eighty-eighth year of his age and the sixty-ninth after his admission to the Society.

EDWARD F. SHILLMAN.

Eckbert (Ekbart, Egbert), Abbot of Schönau, b. in the early part of the twelfth century of a distinguished family along the Middle Rhine; d. 23 March, 1184, in the Abbey of Schönau. He was for a time a canon in the collegiate church of St. Cassius and Florentius at Bonn. In 1155 he became a Benedictine at Schönau in the Diocese of Trier, and in 1166, after the death of his first abbot, was placed at the head of the monastery. A man of great zeal, he preached and wrote much for the salvation of souls and the conversion of heretics. The Cathari, then numerous in the Rhineland, gave him especial concern. While a canon at Bonn he often had occasion to debate with heretics, and after his monastic profession, was invited by Archbishop Rainald of Cologne to debate publicly with the leaders in the sect in Cologne itself. His chief works are: "Sermones contra Catharos" with extracts on the Manicheans, from St. Augustine (P. L., CXCV); "De Laude Crucis" (ibid.); "Soliloquium seu Meditationes" (ibid.); "Ad Beatam Virginem Deiparam sermo panegyricus" (ibid.), CLXXXIV; "De sancto Elisabetha virgine", a biography of his sister, a Benedictine nun and a famous visionary and mystic (see ELISABETH OF TOLEDO), a portion of which is in Acta SS., June, IV, 601 sqq. (ed. Palmié, 1687). A complete edition of his works is found in Roth, Die Visionen der hl. Elisabeth und die Schriften der Abtei Ekbert und Ermescho von Schönau" (Brünn, 1815).

Stecher in Kirchenlex., s. v. Egbert, Hiihner, Nomenclo- rator (Innsbruck, 1889), IV; CHEVALLER, Bio-Bibl. (Paris, 1903), s. v.

FRANCIS J. SCHAFER.
Francis Orientalis et episcopus Wirtheburgensis" (1729), also in two volumes, an excellent work whose rich materials are treated with scientific exactness.

FATRICIUS SCHLAGER.

Eckhart (Eckard, Eckard), Johann, Meister (the Master), Dominican preacher, theologian, and mystic, b. about 1260 at Hochheim, near Gotha; d. in 1327 at Cologne. He made his philosophical and theological studies in the Dominican Order. Although a professed mystic he was also an able man of affairs, admirably manifesting the spirit of his order by uniting throughout his career great activity with contemplation. After a period of teaching he was made, in 1298, prior of the Dominican convent at Erfurt and vicar-provincial of Thuringia. Two years later he began to lecture at Paris, where in 1302 his order gave him the degree of Master of Sacred Theology. In the following year he was elected provincial of the Province of Saxony, to which office he was re-elected in 1309, where he was also appointed vicar-general of Bohemia and charged to reform its convent. His term of office having expired in 1311, he again took a professorial chair at Paris, whence he went in 1314 to teach at Strasbourg. After three years he was made prior of the monastery. He finally returned to the schools in 1320, when he was made first professor of his order at Cologne, where he remained until his death.

Eckhart's activity was also displayed in the pulpit, of which he was an illustrious orator, and by his writings in the form of treatises and sayings. As a preacher he displayed rhetorical flourish and avoided oratooral passion; but effectively employed the simple arts of oratory and gave remarkable expression to a hearty sympathy. Using pure language and a simple style, he has left us in his sermons specimens of the beautiful German prose of which he was a master. In these sermons, really short catechetics, we find frequent citations from such writers as Seneca and Avicenna, as well as from the theologians and Fathers. His discourses are directed to the intellect rather than to the will and are remarkable for their depth of mystical teaching, which only those who were advanced in the spiritual life could fully appreciate. His favourite themes are the Divine essence, the relations between God and man, the faculties, gifts, and operations of the human soul, the return of all created things to its source, and the surpassing of the life of the soul to the life of the spirit, which partake of the catechetical character of his sermons. In his sayings he presents them in short and pithy form. Although the writings of Eckhart do not present a connected and studied system, they reveal the mind of the philosopher, the theologian, and the mystic. The studies of Henry Denifle, O.P., while showing that Eckhart had been less of a philosopher than he was supposed to be, show also that he was a Scholastic theologian of very superior merit, as is shown in 1309, the first of the fragmentary writings of Albert the Great and of St. Thomas Aquinas, but departed from their Scholastic method and form. Some opponents of Scholasticism, admiring his aphorisms and originality of method, have pronounced him to be the greatest thinker before Luther. And there have been Protestants who called him a Reformer. It was, however, as a mystic that Eckhart excelled. He is held by many to have been the greatest among the German mystics, and by all to have been the father of German mysticism. To Tauler and Suso he gave not only a complete and successful style, possessing a heartiness like that of his own. Although he frequently quotes from the writings of the Pseudo-Areopagite and of John Scotus Eriugena, in his mysticism he follows more closely the teaching of Hugh of St. Victor.

The very nature of Eckhart's subjects and the untechnicality of his language were calculated to cause him to be misunderstood, not only by the ordinary hearers of his sermons, but also by the Schoolmen who listened to him or read his treatises. And it must be admitted that some of the sentences and treatises were Beghardic, quietistic, or pantheistic. But although he occasionally allowed harmful sentences to proceed from his lips or his pen, he not infrequently gave an antidote in the same sermons and treatises. And the mystical tenor of his teaching shows that he was not a Beghard, nor a quietist, nor a pantheist. While at Strasbourg, although he had no relations with the Beghards (q.v.), he was suspected of holding their mystical pantheism. Later, at Frankfort suspicion was cast upon his moral conduct, but it was evidently groundless; for, after an investigation ordered by the Dominican general, he was appointed to a prominent position at Cologne. Finally the charge was made at a general chapter of his order, held at Venice in 1325, that some of the sentences and treatises were of a dangerously heretical nature. Father Nicholas, O.P., of Strasbourg, having been ordered by Pope John XXII to make investigation, declared in the following year that the works of Eckhart were orthodox. In January, 1327, Archbishop Heinrich of Cologne undertook an independent inquiry. He finally appealed to the schools in 1320, when he was made first professor of his order at Cologne, where he remained until his death.

The entire works of Eckhart have not been preserved. Pfeiffer in "Deutsche Mystiker des 14. Jahrhunderts" (1857), II, has given an incomplete edition of his sermons. Additions have been made by Sievers in "Zeitschrift für deutsche Alterthümer," XV, 373 sqq.; Wackenagel in "Altdutsche Pdigtgen" (1875), 156 sqq., 172 sqq.; Beringer in "Alemannia" III, 13 sqq.; B. Beck in "Deutschland" XVIII, 230 sqq.; Ruffini in "Italische Pdigtgen" (1875), 231 sqq.; and others. There is a translation in High German by Landauer, "Meister Eckharts mystische Schriften" (1903). Eckhart's Latin works bore the title "Opus Tripartitum." In the first part (Opus propositionum) there are over one thousand theses, which are explained in the second part (Opus questionum), and proved in the third part (Opus expositum). Of these only the three prologues are known. Denifle discovered also a portion of the third part, part of an explanation of Genesis, a commentary on Exodus, Sirach, xxiv, Wisdom, Esther, Esther Fragments. Quoted in and Echard, Script. Ord. Fr., I, 507-8; Bach, Meister Eckharts der Vater der deutschen Spekulation als Beitrag zu einer Geschichte der Philosophie der christianischen Zeit (Vienna, 1864); Denifle in "Zeitschrift für deutsche Alterthümer" (1885), 259-88; Idem, Meister Eckharts latinschen Schriften, etc., in "Deutsche Literaturzettel" (1895); I. Graff, Meister Eckhart (Leipzig, 1885); HARTMANN, Der Geistliche in der deutschen Reformation (Leipzig, 1886); SCHWARZ, "Die Geistlichen im 15. Jahrhundert" in "Deutsche Musik in Predigungen in Jahrbuch für Phil. u. spek. Theol." (1900), XIV, 413-27.

A. L. McMAHON.

Eckhel, Joseph Hilarius, German numismatist, b. 13 January, 1737, at Enzelsfeld near Pottenstein, in Lower Austria, where his father, Johann Anton Eckhel, was steward to the Prince of Montecuccoli; d. 10 May, 1797. In 1745 he was sent to study in Vienna,
in 1751 was admitted into the Society of Jesus, and thirteen years later was ordained priest. He had studied humanities in Leoben and philosophy in Graz, besides mathematics, Greek, Latin and Hebrew. The fruit of his literary labours, produced in his twenty-first year, was an "Exercitium grammaticum in prophetiam Obadie." This he published as an appendix to the "Institutiones linguae sacre" of F. J. Engsler. After his ordination, and probably for some time before, he was professor at the Jesuit gymnasium at Leoben and Steyer; probably also at Judenburg, and finally at the college of Vienna, where he taught poetry and rhetoric, and acquired a mastery of Latin, which he handled with ease and elegance. He still possesses two rather comprehensive catalogues from his hands, "Piusius Urbis" and "Piusius Ruris." He left, besides, two German poems written for special occasions, in the style of that period, and a speech of the same nature delivered on the occasion of the journey of Emperor Joseph II to Italy.

How he became a numismatist, Eckhel himself has told us in the preface to his "Numi veteres anecdoti." Whilst teaching at the Academic Gymnasium he published by Eckhel's request in its cabinet of coins, which was under the supervision of his fellow-Jesuit, P. Khell. The collection, containing principally Greek and Roman coins, had been considered considerable size through the exertions of the learned Erasmus Fröhlich, who had edited an as catalogue of most of the ancient coins; Eckhel set to work selecting the coins which were as yet unknown and unedited, and added thereto the unedited coins of the choice collections of Count Michael Vieay and Paul Festetics. Forced by ill-health to abandon teaching, he devoted himself entirely to numismatics and archaeology. With the permission of his superior he went to Italy in 1772 for his further education. In Bologna and Rome he studied all the accessible coin collections, but found his richest treasures in Florence. Raimondo Cocchi, prefect of the Archdiocesan Museum, received him most cordially and obtained for him the commission to arrange the coins which had been collected by Cardinal Leopoldo de' Medici, and which had afterwards been very considerably increased. Cocchi, who died shortly after this, recommended Eckhel to the Archduke Peter Leopold, who in turn gave him his mother, the Empress Maria Theresa. Meanwhile (1773) the Society of Jesus was suppressed, and Eckhel, like his brethren, was secularised. Returning to Vienna through the South of France in January, 1774, he was delighted to be entrusted by the empress with the task of transferring the collection which belonged to the university college of the Jesuits, to the court cabinet, where, however, it received a separate place. In March of the same year, having acquired an excellent reputation as a numismatist, he was named director of the cabinet of ancient coins, with Duval as his superior. After the latter's death (1775) he received sole charge. Eckhel was commissioned to deliver bi-weekly lectures on numismatics in the coin cabinet. In the fall of 1775 he was promoted to the chair of antiquities and of the historical auxiliary sciences in the university. In the same year his first numismatic publication appeared.

J. von Bergmann writes of Eckhel's official work: "Eckhel, as is everywhere evident, was an expert administrator of the treasure committed to his charge. Without much ado, without ostentation, he wrote only what was needful and regarded merely that which was essential. Besides his very simple accounts and some reports written during the twenty-four years of his incumbency, only a very few documents concerning the collection of antique coins are in existence. He obtained the means for these acquisitions from the proceeds of the sale of duplicates of gold and silver coins. The duplication of examples resulted from the amalgamation of the collection of Francis I with that of the imperial family. Moreover, the sets of Persian and Parthian coins were transferred from the Oriental to the ancient department. The collection of Duke Charles of Lorraine, that of the Count of Arioted, and a selection of coins from the collections of suppressed monasteries were added. By means of emences and lucky finds, the list of important additions (e. g., those of Ostropatakas and Salagay-Somlyo) As a professor in the university Eckhel lectured on ancient numismatics. His delivery is described as being simple, clear, instructive, inspiring, and often amusing in humor. He was highly respected by his pupils. That he also enjoyed high reputation among his colleagues is attested by his appointment as dean of the philosophical faculty in 1789. However, he soon resigned this position.

The first number of the journal was published by Eckhel in 1769, under the title of "Numi veteres anecdoti ex museis Cassareo Vindobonensi, Florentino Magni Ducis Eturiae, Granelliano nunu Cassareo, Vitasiano, Festeticisiano, Savorgnano Veneto aliisque" (Vienna, 1776, in two 4to sections with 17 copperplates). "Catalogus Musei Cassarei" (Vienna, in two large folio parts with numerous illustrations) followed four years later. Eckhel had given the collection entrusted to him an entirely new arrangement, discarding the time-honoured alphabetical order, and substituting quite a new system. He divided ancient numismatics into two departments: the first contained the coins minted by cities other than Rome, arranged according to the geographical situation of the countries as far as this was possible; the second comprised all the coins of the Roman Empire. First come the important but crude ones, then the unclassified pieces with the inscription Roma. They are followed by those of the various families, emperors, and empresses, all arranged as far as possible in chronological order. Those whose date could not be exactly obtained are placed after each emperor as unclassified in alphabetical succession. "By this method," says Eckhel, "the author was enabled to rectify countless errors which Mezzabarba had forced upon us in his General Catalogue" ("Imperatorum Romanorum numismata, Milan, 1683). And to make these corrections principally led him to prepare this volume, to which he gives in general outside authority, but from personal observation and after lengthy and painstaking research, of everything instructive which so numerous a collection presents. The work was written in Latin and, "contrary to the present ornamental style, in the simplest language." This catalogue was followed by "Syllogis II. numorum veterum aednectorum Thersei Cesaris" and "Descriptionum numorum Antiochiae" (1768), then by the classical work "Doctrina numorum veterum," in eight volumes (1792-1796). Friedrich Kenner says of this: "Misguided dilettantism had produced most mischievous results in the field of numismatics. Lack of system, want of critical judgment, and the disorderly arrangement of the literature had begotten confusion and distrust, which prevented numismatics from taking the place among other sciences to which it was entitled. With his naturally critical eye, Eckhel mastered all the literature of his subject, eliminated errors and forgeries with the help of his profound learning, and then combined the results into an organic whole in his 'Doctrina numorum veterum': . . . Eckhel has become the founder of the real numismatics of classical antiquity and taken his place alongside of his contemporaries, Heyne and Winckelmann. Numis-
ELECTICISM

ELECTICISM

matics, hitherto despised, he changed into a kind of encyclopedia of classical antiquities, which includes elements of many-used sources for other branches of archaeology." The addenda to this work which Eckhel entered in his manuscript copy were edited by his successor, Steinbüchel.

By command of Emperor Joseph II, Eckhel wrote an excellent manual, "Kurzgefassete Anfangsgründe der alten Numismatik" (Vienna, 1787; 2nd ed., 1807). The work appeared in a Latin translation in 1799 and in a French revision in 1825. He edited, besides, "Choix des pierres gravées du Cabinet Impérial". Furthermore, a number of smaller treatises still exist in his manuscripts. His "Thesaurus veterum veterum" was used by Theodore Mommsen. He also left an extensive correspondence with the most prominent representatives of his branch of learning (Abbé Barthélemy, R. Cocchi, Cousinéry, L. Lanzi, G. Marini, F. Séguier, and others).

Eckhel died shortly after the completion of his "Doctrina". He was, as Bergmann writes, "a man of firm and decided character, serious, but at the same time cheerful, indulging in sarcasm, and at times heated, attacks on cant and literary arrogance. He was unwise in his use of thousands of blunders committed by other writers, and was modest and not at all disputatious in his controversies. He spoke as he thought and acted as he spoke." Later scholars rank Eckhel's scientific importance equally high. On the first centenary of his birth a medal was struck by the Maria Theresia Infirmary, St. Mathias, R. Nyhams, Antiqu. Conditoria. The distich which Michael Denis dedicated to his dead friend will vindicate its own truth:

Eckhelium brevis hora tuli, sed diva Moneta
Scripta viri secum vivere secuta jubet.

Von Bergmann, Dem Andenken des Abbé J. H. Eckhel in Zeitschrift der preuss. Gesellschaft der Wissenschaften, XXIV (1857), 296-384; Kenter, Eckhel, ein Vortrag (Vienna, 1871); the same in Allgemeine Deutsche Biographie, 32 (1877), 623 seq.

Karl Domang.

Eclecticism (Gr. ἐλεκτικός, Lat. elegere, to select), a philosophical term meaning either a tendency of mind in a thinker to conciliate the different views or positions taken in regard to problems, or a system in philosophy which seeks the solution of its fundamental problems by selecting and uniting what it regards as true in the various philosophical schools. In the first sense, eclecticism is a characteristic of all the great philosophers, with special development in some, such as Leibniz; an element of the integral method of philosophy was, however, less emphasized in the divergent schools. The term eclecticus, however, is properly applied to those who accept Eclecticism as the true and fundamental system of philosophy. It is with Eclecticism in this strict sense that we are dealing here.

As a rule, in the history of philosophy, Eclecticism follows a period of scepticism. In presence of conflicting doctrines regarding nature, life, and God, the human mind despair of attaining scientific and exact knowledge about these important subjects. Eclecticism then aims at constructing a system broad and vague enough to include, or not to exclude, the principles of the divergent schools, though giving at times more importance to those of one school, and apparently sufficient to furnish a basis for the conduct of life. In the latter period of Greek philosophy, during the two centuries preceding the Christian Era and the three centuries following, Eclecticism is represented among the Epicureans by Aselepiades of Bithynia; among the Stoics by Boethus, Panetius of Rhodes, (about 180-110 b. C.), Posidonius (about 50 b. C.), and later on by the neo-Cynics, Demetrius and Demonax (about A. P. 150); in the New Academy by Plutarch (about 80 b. C.) and Antiochius of Ascalon (d. 68 b. C.); in the Peripatetic School by Andronicus of Rhodes (about 70 b. C.), the editor and commentator of the works of Aristotle, and later on by Aristocles (about A. P. 180), Alexander of Aphrodisias (about A. P. 205), and Philo of Elea (d. 90). In Greece, (A. dominated in their epiphry in the third, and Simplicius in the sixth, century of our era. The eclectic system was, by its character, the one which was best suited to the practical mind of the Romans. With the exception of Lucretius's doctrine, their speculative philosophy was always and altogether eclectic, while Simplicius was the most important of their ethical philosophy. Cicero is, in Rome, the best representative of this school. His philosophy is a mixture of the scepticism of the Middle Academy with Stoicism and Peripateticism. The School of the Scipios, with its Quintus Scipio Africanus, and Cato the Elder, was partly Stoic and Cynic, partly Pythagorean. Under the empire, Seneca, Epicurus the slave, and the Emperor Marcus Aurelius combined the principles of Stoicism with some doctrines taken from Platonism. The neo-Platonic School of Alexandria, in the second and third centuries after Christ, is considered by some as eclectic; but the designation is not exact. The school borrows, indeed, many of its principles from Pythagoreanism, Stoicism, Peripateticism, and especially from Platonism; but all these doctrines were denominated by and interpreted according to principles of religious mysticism which make this neo-Platonism an original though syncretistic system. The same may be said of the Christian writers of this school who take some of their philosophical principles from the Jews, but who are guided in their choice as well as in their interpretation by the teaching of Christian revelation.

In modern times Eclecticism has been accepted in Germany by Wolff and his disciples. It has received its most characteristic form in France in the nineteenth century from Victor Cousin (1792-1867) and his school, which is sometimes called the Spiritualistic School. Drawn away from sensualism by the teaching of Royer-Collard, Cousin seeks in the Scottish school a sufficient foundation for the chief metaphysical, moral, and religious truths. Failing in this attempt, he takes up the different doctrines he then current; he is successively influenced by Maine de Biran whom he calls "the greatest metaphysician of our time", by the writings of Kant, and by personal intercourse with Schelling and Hegel; finally, he turns to the works of Plato, and the Orphics, Pythagoreans, Dionysius of Alexandria, and Leibnitz. He then reaches the conclusion that the successive systems elaborated throughout the preceding ages contain the full development of human thought; that the complete truth is to be found in a perfect fusion of all the elements, and uniting, under the guidance of common sense, of the fragmentary truths, expressed by the different thinkers and schools of all ages. Four great systems, he says, express and summarise the whole development of human speculation: sensism, idealism, scepticism, and mysticism. Each contains a part of the truth, and possesses exclusively the whole truth. Human thought cannot invent any new system, nor can it neglect any of the old ones. Not the destruction of any of them, but the reduction of all to one, will put us in possession of the truth.

There is, indeed, something true in Eclecticism. It would be folly for each thinker to deliberately ignore all that has been said and taught before him; such a method would render progress impossible. The experience and knowledge acquired by past ages is a factor in the development of human thought. The history of philosophy is useful; it places at our disposal the truths already discovered, and by showing us the errors into which philosophy has fallen, it guards us against them and against the principles or the dogmas that have caused them. This is the element of value contained in Eclecticism, Eclecticism errs when it substitutes for personal reflection...

Etc.
Ecuador, Republic of (La República del Ecuador), an independent state of South America, bounded on the north by Colombia, on the east by Brazil, on the south by Peru, and the west by the Pacific Ocean. The north-western corner of the State is crossed by the Equator, hence its name. No part of America has been so prominent for scientific explorations, especially geographic and physiographic, as this country. It is shut in by the history of the last half of the nineteenth century. One, sent out in 1735 by the French Government for the purpose of measuring the meridian near the Equator, recalls the names of La Condamine and Bouguer. The other (1799-1804) forever associates Alexander von Humboldt with the history of the New World.

Area, Physical Features, etc.—Ecuador is the third smallest of the South American republics. It forms, approximately, an isosceles triangle wedged between Colombia and Peru. Indenting the south-west coast is the Gulf of Guayas (in which lies the large Island of Guayaquil) in which lies the large Island of Puná. As in the case of other South American republics, the boundaries of Ecuador are ill-defined and subject to modification by treaty. Its area is variously given as from 80,300 to 152,000 sq. miles, to which must be added the Galapagos Islands (which lies about 500 miles off the coast, and covering from 2490 to 3000 sq. miles. These islands are about ten in number, only one of which (Isabella or Albemarle) is inhabited by some two hundred people. The eastern half of Ecuador is low, wooded, and traversed by many rivers emptying into the Marañon or Upper Amazon; the western is very mountainous, the high Andes chain dividing the two sections. This mountain range runs nearly due south from the southern boundary of Colombia to the Peruvian frontier. It has a number of peaks 20,000 and over, all of volcanic origin, and among them Chimborazo (20,500 ft.), and many volcanoes. Of the latter, Cotopaxi (19,613 ft.), Tunguragua (16,690 ft.), and Sangai (17,464 ft.) are still active; Antisana (19,335 ft.), Fichuicha (15,918 ft.), etc. have been extinct for a century or more; while Alitar, Cotacachi, etc. show traces only of activity in ages long past. The Ecuadorian table-land and higher mountain valleys are temperate, though the temperature is low in the greater altitudes. The year is divided into the dry and rainy season. Under the Equator, however, there is little difference between the seasons. The coast valleys and shores are very hot and the climate generally unhealthy. Ecuador has but one navigable river, the Guayas, which empties into the Gulf of Guayas. The other principal body of water in Ecuador is Lake Chunguito, though the flora of this region is luxuriant and the vegetation is very rich. The coast is composed of rich in cichons bark, and extend eastward to a height of nearly 10,000 feet. Then follows a sub-Andean zone for the next 3500 feet, in which cereals thrive in an average temperature of from 53 to 59° Fahr. This is followed by what are called the prairies, cold and stormy wastes, treeless, and exposed to daily snows, which reach an altitude of 15,000 feet above sea-level, and where the tough puna-grass flourishes. On the eastern slope of the Andes dense forests are found again and the cinnamon tree. Animal life is plentiful and is found in profusion in the vegetation. As far as known, Ecuador is fairly rich in minerals. It is the only South American state, with the exception of Colombia, where emeralds have been found in any quantity (near the coast at Manta and Esmeraldas); their location, however, is uncertain. The population is estimated to be about 2,272,000 of whom about 400,000 are supposed to be Indians. Exact statistics, however, do not exist. Of the 400,000, one-

Ecthesis. See HERACLITUS, EMPEROR; MONOTHEITES.
half is allowed to the wild forest-tribes of the Eastern section and the other half to the remnants of the diverse sedentary tribes which formerly occupied the table-land and coast. The whole country is divided into fifteen provinces besides the Eastern territory and the Galapagos Islands.

History.—Of the pre-Columbian conditions and languages of the Indians of Ecuador little is known. The coast tribes have almost disappeared and those of the higher regions have adopted Spanish customs. That they differed from the Peruvians seems likely. The best-known were the Cañaris, the Carangas, and the Purusos or Puruayas; a tribe known as the Suyris is mentioned in the neighbourhood of Quito. They were all sedentary; knew how to work gold, silver, copper, and possibly bronze; and practised the fetishism common to primitive Americans. The coast tribes built their houses of wood and cane, while those of the interior used stone. They were skilful navigators, some of their vessels being estimated at thirty tons, and propelled by oars and cotton sails.

The Spaniards, led by Francisco Pizarro, first saw the coast of Ecuador in 1525. From Tumaco, or Atacames, where they touched, Pizarro dispatched Ruiz, his pilot, to the south. In the account of Pizarro we have the earliest description of the Ecuadorian coast people. The natives of the Guayas region, he says, resemble those of Peru, verifying his pilot's reports, and in 1528 returned to Spain to prepare for the conquest of Peru. He returned in 1531, landing at Coaque, and, marching south along the shore, established himself, despite the hostility of the natives, on the island of Puná. The permanent Spanish occupation of Ecuador, however, began in 1534, from Piura in Peru under Sebastian de Belalcazar. He had a tedious campaign to Quito, in which he was assisted by the Cañaris. In 1534 three towns were established: San Francisco de Quito (15 Aug. 1534); Guayaquil, which was established at its present site, Chimbo; and Guayaquil, which was also originally founded at a place distinct from the one it now occupies. Meanwhile Pedro de Alvarado had landed on the coast with a considerable force from Guatemala. Reaching the central plateau he was confronted by Belalcazar and Diego de Almagro the elder. An amicable agreement was reached, and Gonzalo Pizarro pushed into the cinnamon country, but made little headway and had to turn back. His lieutenant, Orellana, however, floated down the Amazon and landed on the island of Trinidad in 1538 and gave the first information about south-eastern Ecuador.

The second epoch of civil wars in Peru, the uprising of Gonzalo Pizarro against the viceroy Nuñez de la Vela, came to an end with the defeat and death of the viceroy near Quito in 1538. After the death of the head-quarters of the Crown's representative, and with this as a basis the independence movement was put down. During the colonial period the Church founded institutions of learning such as the University of Quito and established a printing press at the same place in 1760. Political disturbances were few, but during the sixteenth, seventeenth, and eighteenth centuries volcanic and seismic phenomena were frequent and often disastrous. An attempt was made in 1809 to overthrow the Spanish power, and Ecuador, Colombia, and Venezuela, together with the rest of Spanish South America, then engaged in efforts towards independence. In 1820 Guayaquil succeeded in throwing off Spanish control, and the battle of Pichincha (22 May, 1822) finally put an end to the domination of the mother country. Ecuador, with Colombia and Venezuela, next formed a confederacy that continued until 1830, when the union was dissolved and the first Ecuadorian congress met. Since then Ecuador has been torn by internal dimensions and foreign complications, chiefly with Colombia. The opposing political parties are the Conservatives and the Liberals. The former have been in power and have a great extent adopted a policy of secularisation in church matters. From 1833 to 1908 Ecuador has had nineteen presidents.

Government, Education, Etc.—Ecuador is a constitutional republic. From 1833 to 1885 it had no less than ten constitutions; the last was adopted in 1885. The executive head is the president, elected with the vice-president directly by the people for a term of four years. The senators (30) and the deputies (41) are also elected by direct vote, the former for four, the latter for two, years. Congress adjourns biennially at Quito, the capital, on 10 August, and is in session for sixty days. The principal cities are: Quito (80,000), Guayaquil (51,000), Cuenca (30,000), Riobamba (18,000), and five of 10,000 or more inhabitants. Guayaquil is the chief seaport. In 1904 Ecuador had 165 miles of railroad and 2565 miles of telegraph, both of which have since been added to. The monetary unit is the sucre, about equal to the peso of other Spanish-American countries, but subject to fluctuation in value. The chief exports are cacao, vegetable ivory, indiarubber, and straw hats.

Educational statistics are scanty. There is a university at Quito with thirty-two professors and two hundred and sixteen students (1905). Institutions for higher education are found at Guayaquil and Cuenca. In 1905 the number of government schools is 357; primary schools 1088 with 1495 teachers and 68,380 pupils; and 9 high schools and colleges.

Religion.—Soon after the discovery of the country missionaries began their labours in Ecuador, and in 1545 the Bishopric of Quito was erected. Work among the different Indian tribes on the tributaries of the Guayas and of the Amazon was difficult, and the Dominican missions were destroyed in 1599 by the savage Jivaros. Later, however, the Dominicans re-established themselves and were assisted by the Jesuits who had been in Quito since 1565. By the close of the seventeenth century Ecuador was well evangelized, but after the expulsion of the Jesuits in 1767, who on the Napo alone had thirty-three missions with 100,000 inhabitants, the Dominicans were unable to keep up the work and the natives fell back into paganism. The revolution destroyed all traces of two hundred years of untiring labours. Since 1848 Ecuador has formed an ecclesiastical province. The population is Catholic except for a small number of foreigners and a few pagan Indians in the east.

Up to 1861 the government was in the hands of the Liberal and largely anti-Catholic party. When Garcia Moreno (q. v.) was elected president (1861-65 and 1869-75), however, he reorganized civil and religious affairs. Under him a concordat (20 Nov., 1863) was concluded with Rome that was to run for a hundred years and was extended in 1879. In 1883 schools and missions given to the Jesuits (who had been recalled) and others, and in 1874, at the time of the ascension of the Holy See, ten per cent of the State's income was guaranteed to the pope. Moreno was murdered 6 Aug., 1875, and his death not only put an end to the concordat, but under the new regime which succeeded him a series of persecutions occurred. In 1885, when Bishop Schumacher took charge, nearly all the native clergy were suspended and replaced by Europeans and practically a new hierarchy established. The religious and moral education of the people was likewise in bad condition. The revolution of Alfaro in 1895 was a severe blow to the Church. The orders, among them the Capuchins, Salesians, Missionaries of St. Francis of Assisi, and the religious, were all banished and Bishop Schumacher fled. In 1902 the State religion was the Catholic, but other creeds are not interfered with. Since tithes were abolished the State has provided for the maintenance of Catholic worship; it also supports religious educational institutions, such as the three seminaries at Quito and six elsewhere, one in each of the six dioceses. Civil marriage was recognized in 1902, and two years later the
Church and its property were placed under State control. At the same time it was enacted that no new or foreign religious order would be permitted in the country. Suffragan to Quito, which became an archbishopric in 1848, are: Cuenca (1786), Guayaquil (1837), Ibarra (1862), Loja (1866), Puerto, or Portobelo (1874), Riobamba (1860). There are also four vicariates apostolic: Ambato, Ibarra, and Quito, subject to the Congregation of Extraordinary Ecclesiastical Affairs: Canelos and Macon, Mendes and Gualaquiza, Napo, Zamora.

The first known mention of the Ecuadorian coast is made by Joseph of Espinosa in his description of the port of Loja in 1532. Francisco Pizarro and Diego de Almagro (1525–26) in Documentos para la Historia de la España America, 1928, also mention it. Another important source is the Acta de las Indias (Madrid, 1589), which contains much information about the Spanish conquest of the Americas. The first printed version of the Acta de las Indias, in four volumes, is published in Mexico City, 1847–72, and in a third edition, 1930. The Acta de las Indias is an important source for the history of the Americas, especially for the period of the Spanish conquest.

The title “Edda” is given to this work in the most important manuscript which we possess of it, the “Upsala Codex”, dating from about 1300. The meaning of the word Edda is not certain. The older explanation of “great-grandmother” is now generally discarded, and the most commonly accepted rendering being “poetic” (from dhr, “spirit”, “reason”). Some scholars derive the word from Oddi, the name of a place in southern Iceland, where Snorri lived. The word was intended to supply the skald all the necessary information concerning mythology, poetic diction, and versification. Besides a formdæl (preface) of later origin it contains three parts. (1) “Gylfaginning” (Gylf’s Deception), an abstract of Old Scandinavian mythology in the form of a dialogue between King Gylfi and three gods. Added to this are the “Bragarœður” (Bragi’s Sayings), stories about Odin and Thor, related by Bragi, the god of poetry, to the sea-god Agr. (2) “Skáldskaparmál” (Diction of Poetic Eikons) and synonyms (dækt hætt), interspersed with mythological and legendary stories. (3) “Háttatal”, a panegyric on the Norwegian King Håkon Hakonarson and Jarl Skal, containing one hundred and two strophes, each of which is composed in a different metre. This is followed by a prose commentary written, however, after Snorri’s death by an unknown author. The work was unfinished when Snorri died and was subsequently revised and amplified by other writers. The best edition of the Snorra Edda is that published in 1869 by the Aegir and Thorsberg (Copenhagen, 1848–1857). Selections were edited by E. Wilken (Paderborn, 1887; glossary to this edition, Paderborn, 1883). Parts were translated into German by Gering (Leipzig, 1892), into English by Dasey (1942), by Blackwell in Mallet’s “Northern Antiquities” (London, 1770), and by R. B. Anderson (Chicago, 1880).

II. “The Elder Edda”, a collection of mythological and heroic songs in the ancient Icelandic language. Altogether there are thirty-three such songs, twenty-nine of which are contained in the famous “Codex Regius”, the most important of the Eddic manuscripts. This codex was found in Iceland in 1643 by Bishop Brynjolf Sveinsson. It had no title, and, since it contained poems, portions of which are cited in the Snorra Edda, the bishop concluded that this was the Snorra source and set up the title “Edda”. He furthermore assumed that the priest Semund (1056–1133), whose reputation for learning had become proverbial, was the author, or at least the collector of these songs, and he therefore wrote on a copy of the Codex Regius, “Codex Semundi multiscii” (Edda of Semund the wise), and the title “Edda” has since then remained in general use to designate the kind of poems found in the “Codex Regius”. Such poems differ both in content and form from the so-called skaldic poems. There is no doubt that some of these poems were collected and written down in Iceland from oral tradition; but nothing certain is known concerning their age, original home, and authorship. All this has to be inferred from internal evidence, and hence opinions differ widely. It is agreed, however, that these poems are not common Scandinavian, but purely Norwegian; they were composed either in Norway or in Norwegian settlements like Iceland and Greenland. As to their age, it is conceded that none dates earlier than the middle of the ninth, and that some were written as late as the thirteenth century. The subject-matter of the songs is taken either from mythology or heroic saga. Among the mythological poems the most famous is the “Völsunga” (the prophecy of the volva or sibyl), the most important source for our knowledge of the Germanic Norse mythology. Important among the heroic poems is the “VafthrœðhisPJmi” and “GrímmsPJmi”, where Odin’s superior wisdom is set forth.

Of the songs dealing with Thor the best known is the “Thrymskvitha” (the song of Thrym), relating Thor’s quest of his hammer. The sententious form of the Northmen is represented by the “Hávamál” (sayings of the High One, i. e., Odin). Among the heroic poems the chief interest attaches to the lays of Sigurd and the Nifungs. Unfortunately this cycle of poems is incomplete owing to a great gap of time between the Old Norse and the modern languages. The contents of the lost poems may be gained from the prose version of the “Volsungasaga”, the author of which still had before him the complete collection. The first complete edition of the “Elder Edda”, with Latin translation, was issued by the Anna-Magnus Society (Copenhagen, 1787–1825). The first critical edition, on which all subsequent ones were based, was given by Sophus Bugge (Christiansia, 1867). A lithographic facsimile edition of the “Codex Regius”, with a diplomatic text, was given by Wimmer and Jónsson (Copenhagen, 1891). Other editions are those of Simons and Gering (Halle, Vol. I, text, 1888–1901; Vol. II, glossary, 1903); F. Jónsson (Halle, 1888–90, 2 vols.); Hildebrand-Gering (Paderborn, 1904); F. Detler and R. Heinzel (Leipzig, 1903, 2 vols.). The
poems of this kind not found in the "Codex Regius" were edited by Heuser and Ranisch, "Eddeis Minor" (Dortmund, 1903). The best translation into German is the metrical version of Hugo Gering (Leipzig, 1882). The first English version (of the mythological songs only) was made by A. C. Cole (Bristol, 1797). A complete English version is that of Benj. Thorpe (London, 1865-66). The songs are also translated in Vignusson and Powell's "Corpus poeticon boreale" (Oxford, 1883), and some songs are also rendered in Magnusson and Morris's "Translation of the Volusagase" (Bristol, 1870). A new translation by W. H. Carpenter is in preparation (1908).

ARTHUR F. J. REMY

EDDIUS (AEDDI). See WILFRID OF YORK.

Edelmaen, the family name of four engravers.—GERARD, b. in Antwerp c. 1640; d. in Paris, 2 April, 1707. Galle instructed him in the rudiments of his art. In Antwerp, the youth imbibed that Antwerp's vigour and energy characterising Rubens's school of engravers, which was later to transform the art in France and impart to it Northern freshness and simplicity. In 1665 Gerard came to Paris, studied with de Polly, quickly surpassed him, and almost immediately realized the height of his powers, which remained unimpaired until his death. Le Brun and Colbert called Louis XIV's attention to Edelmaen, who received commissions, a pension, the title of engraver to the king, apartments in the Gobelins, and the position of Director in the Gobelins cabinet from the monarch whose features he depicted in fourteen engravings. In 1675 he was naturalized; in 1677 he became a Royal Academician; and soon thereafter the order of Chevalier of Saint-Michel was conferred upon him.

Edelmaen was one of the greatest masters of pure engraving. He never used etching or dry-point on his plates, and of the four hundred that he produced there is not one that is poor or second-rate. Edelmaen's work was epoch-making: he revolutionized engraving, abandoning lines that crossed to form spaces, and replaced them by Deligne's "Drafting," and changed their direction, thus avoiding the monotony that had marked all previous work in France. Edelmaen had all the merits of his predecessors and, besides, rendered texture, colour, and light and shadow as they never before had been rendered. His strokes were clear and bold, and the results beautifully finished, harmonious, and silvery. His proofs were the first to possess the quality called technically by engravers "colour." Sometimes they were slightly "metallic." Reproductions on steel by Edelmaen preserved more of the originality and quality in the originals than the latter possessed. He worked with marvellous facility and concealed his consummate science under an unobtrusive technique. While he did not confine his burin to portraits, it was these which gave him his greatest fame, for he so accurately depicted all the notable men of his time, in the Church and the Court, and in literature and art, that we, to-day, gain an insight into their very character. The greater part of his work was reproductive, but he sometimes engraved from his own drawings, for he was a superb draughtsman. Edelmaen was chosen to engrave Raphael's "Holy Family," Le Brun's "Magdalen," and "Alexander Visiting the Family of Darius," the first-named bringing him instant fame. Only two impressions before letters of the "Holy Family" exist. Edelmaen's life was one of piety, contentment, and tireless labour; it was made up of teaching engraving to his son and his two brothers and working on his own plates. Death found him engraving the "Alexander Entering the Tent of Darius," a superb plate finished by Pierre Drevet. To his family he left a fortune. Plates wholly his own were signed "Gerard Edelmaen," or "Edelmaen aeques"; but when his compatriot Piau or Gaspard Edelmaen assisted him the signature was "Edelmaen." Among his pupils were Gaspard, Jean, and Nicolas Edelmaen, Lombard, and Trouvain. His principal works are: "Portrait of Louis XIV," after Le Brun; "Portrait of Rigaud," after Rigaud; "Portrait of Mme. Hélyot with a Crucifix," after Gallot; "Portrait of Philippe de Champaigne," which the artist thought his best work, after Champaigne; "Combat of the Four Horsemen," after da Vinci.

Nicolau, son of the preceding, b. in Paris in 1650; d. there in 1730. He studied under his father, Gerard, and to perfect himself subsequently went to Italy. In Venice he produced many plates in the style of his father, whom, however, he never equalled in vigour or quality. He engraved several plates for the Cossat collection. His masterpiece is a "Virgin and Infant" after Correggio.

His works include a "Portrait of his Father," after Tortebat; "Portrait of Cardinal Giulio de' Medici," after Raphael; "Portrait of John Dryden," after Kneller.

Jean, b. in Antwerp, c. 1643; d. in Paris, 1680. He was a younger brother and pupil of Gerard, with whom he worked and whose style he imitated. Plates wholly his own are much inferior to those of his celebrated brother, though they have considerable merit. He engraved "The Deluge," after A. Vorese, is his masterpiece. He made many engravings of the statues in the gardens of Versailles.

GASPARD-FRANCOIS, b. in Antwerp, 1652; d. in Paris, 1722. Gaspard, the youngest brother of Gerard, who was his teacher and co-worker, was inferior in talent to the other members of the Edelmaen family, and did not long follow the career of engraver. Because he used a signature similar to that of Gerard and because his master often helped him with his plates, much of his work is difficult to distinguish from Gerard's.

Leigh Hunt.

Eden. See Paradise, Terrestrial.

Edesius and Frumentus, Tyrian Greeks of the fourth century, probably brothers, who introduced Christianity into Abyssinia; the latter a saint and first Bishop of Axum, styled the Apostle of Abyssinia, d. about 383. When still mere boys they accompanied their uncle Metropolis on a voyage to Abyssinia. When their ship stopped at one of the harbours of the Red Sea, people of the neighbourhood massacred the whole crew, with the exception of Edesius
and Frumentius, who were taken as slaves to the King of Axum. This occurred about 316. The two boys soon gained the favour of the king, who raised them to positions of trust and shortly before his death gave them the crown. The kings that succeeded them, however, prevailed upon them to remain at the court and assist her in the education of the young prince Erasanes and in the administration of the kingdom during the prince’s minority. They remained and (especially Frumentius) used their influence to spread Christianity. First they encouraged the Christian merchants, who were temporarily in the country, to practise their faith openly by meeting at places of public worship; later they also converted some of the natives. When the prince came of age Edessa returned to his friends and relatives at Syracto and in Elymais, and soon the Christian faith was established throughout Abyssinia. The people called him Abuna (Our Father) or Abba Salama (Father of Peace), titles still given to the head of the Abyssinian Church. In 325 Emperor Constantius addressed a letter to King Aesanas and his brother Seianis in which he vainly requested them to substitute the ‘Arian bishop Theophilus for Frumentius, “Apol. ad Constantium” (P. G., XXV, 631). The Latins celebrate the feast of Frumentius on 27 October, the Greeks on 30 November, and the Copts on 19 December. Abyssinian tradition credits him with the first Ethiopian translation of the New Testament.

MICHAEL OTT.

Edessa, a titular archiepiscopal see in that part of Mesopotamia formerly known as Osroene. The name under which Edessa figures in cuneiform inscriptions is unknown; the native name was Osrho, after some local satrap, this being the Armenian form for Choe- roes; it became in Syriac Ourhoof, in Armenian Ourhal, in Arabic Er Raha, commonly Oura or Urfa, its present name. Edessa was a branch of the Syrian Church, and in the 5th, 6th, and 7th centuries, 303 B.C. c., called it Edessa, in memory of the ancient capital of Macedon of similar name (now Vodena). Under Antiochus IV (175-164 B.C.) the town was called Antiochia by colonists from Antioch who had settled there. On the foundation of the Kingdom of Osroene, Edessa became the capital under the Abgar dynasty. This kingdom was established by Nabatean or Arabian tribes from North Arabia, and lasted nearly four centuries (132 B.C. to A.D. 244), under thirty-four kings. It was at first more or less under the protectorate of the Parthians, then of the Romans; the latter even occupied Edessa from 115 to 118 under Trajan, and from 216 to 244, when the kingdom was definitely suppressed to form a Roman province. The literary language of the tribes which had founded this kingdom was the Osroenean, a continuation of the Syrian.

The exact date of the introduction of Christianity into Edessa is not known. It is certain, however, that the Christian community was at first made up from the Jewish population of the city. According to an ancient legend, King Abgar V, Ushaña, was converted by the apostle of the twenty-four discip- pies. (For a full account see ABAR.) In fact, how- ever, the first King of Edessa to embrace the Christian Faith was Abgar IX (c. 206). Under him Christianity became the official religion of the kingdom. As for Addai, he was neither one of the seventy-two disciples to whom Christ appeared, nor was he the Apostle Thaddeus, as Eusebius says (Hist. Eccl., IV, xiii), but a missionary from Palestine who evangelized Mesopotamia about the middle of the second century, and became the first bishop of Edessa. (See Docminus of Adiab; He was succeeded by Aggas, then by Palout (Palut) who was ordained about 200 by Seraphon of Antioch. Thenceforth the Church of Edessa, until then under that of Jerusalem, was subject to the metropolitan of Syria. The aforesaid relations with Jerusalem and Antioch caused an important Syriac literary movement at Edessa of which the city long remained the centre. Thence came to us in the second century the famous Peshitto, or Syriac translation of the Old Testament; also Tatian’s Diatessaron, which was compiled about 172 and in common use until St. Rabula (Rabula), Bishop of Edessa (412-35), forbade its use. Among the illustrious disciples of the School of Edessa special mention is due to Bardeesanes (154-222), a schoolfellow of Abgar IX, the originator of Christian religious poetry, whose teaching was continued by his son Harmonius and his disciples. (See BARDEZAES AND BARDIUS.)

A Christian council was held at Edessa as early as 197 (Euseb., Hist. Eccl., VII, xxiii). In 201 the city was devastated by a great flood, and the Christian church was destroyed (“Chronicon Edessense”, “ed. on. 201). In 222 the relics of the Apostle St. Thomas were brought from India, on which occasion his Syriac Acts were written. Under Roman domination many martyrs suffered at Edessa: St. Scharbbil and Barsamy, under Decius; Sts. Gürja, Schámöna, Habib, and others under Diocletian. In the meanwhile Christian priests from Edessa had evangelized Eastern Mesopotamia and Persia, and established the first Churches in the kingdom of the Sassanides. Atitlätät, Bishop of Edessa, assisted at the Council of Nicaea (325). The “Peregrinatio Silviae” (or Etheria) (ed. Ganurrini, Rome, 1867, 62 sqq.) gives an account of the many sanctuaries at Edessa about 388.

When Nisibis was ceded to the Persians in 363, St. Ephrem left his native town for Edessa, where he founded the celebrated School of the Persians. This School, lasting for two centuries, was a great school of Persia, and closely watched by St. Rabula, the friend of St. Cyril of Alexandria, on account of its Nestorian tendencies, reached its highest development under Bishop Ibas, famous through the controversy of the Three Chapters (q.v.), was temporarily closed in 457 and finally in 482, by command of Emperor Zeno, when the teachers and students of the School of Edessa repaired to Nisibis and became the founders and chief writers of the Nestorian Church in Persia (Labourt, Le christianisme dans l’empire perse, Paris, 1900, 130-141). Meanwhile Edessa prospered at Edessa, even after the Arab conquest.

Suffice it to mention here among the later celebrities of Edessa Jacob Bardesac, the real chief of the Syrian Monophysites known after him as Jacobites (q. v.); Stephen Bar Sudafal, monk and pantheist, to whom was owing, in Palestine, the last crisis of Origenism in the sixth century; Jacob, Bishop of Edessa, a fertile writer (d. 708); Theophilus the Maronite, an astronomer, who translated into Syriac verse Homer’s Iliad and Odyssey; the anonymous author of the “Chronicon Edessense,” the writer of the history of the “Man of God,” in the fifth century, which gave rise to the legend of St. Alexius. The oldest known dated Syriac manuscripts (a. d. 411 and 462), containing Greek patriarchal texts, come from Edessa.

Rebuilt by Emperor Justinian, and called after him Justinopolis (Evagrius, Hist. Eccl., IV, viii), Edessa was
Edgeworth owned an estate at Firmont, or Fairymount, a few miles distant from Edgeworthstown, where the elder branch of the Edgeworth family resided. The Edgeworths were of English descent, and went to Ireland in the reign of Elizabeth. The title, "Edgeworth de Firmont", by which the abbé was universally known in France, was derived from Firmont, the ancestral patrimony of his family. The vicarage house at Edgeworthstown where he passed his childhood is believed to be the same in which Oliver Goldsmith went to school to the Rev. Patrick Hughes. The Rev. Robert Edgeworth through conscientious motives resigned his living, embraced the Catholic religion, and devoted himself to life at home intolerable under the penal laws, with his family (all of whom became Catholics) removed to Toulose in France, where Henry Essex, then four years of age, received his early training for the ecclesiastical state. Subsequently he went to the seminary of Tenere-Trois, Paris, at the suggestion of Bishop Moylan of Cork (at one time a curé in Paris). After a course of theology at the Sorbonne, Henry Essex Edgeworth was ordained priest and the capital of France became the theatre of his apostolic labours. The Irish bishops offered him a mitre in Ireland, an honour which he declined with his usual humility. On the removal of her confessor, Madame Elisabeth, sister of the ill-fated Louis XVI, requested the superior of Les Missions Etrangères, where the abbé resided, to recommend her another and he hesitatingly selected the Abbé Edgeworth. The Archbishop of Paris approved of the choice, and introduced him at court. Thus he became known to the royal family as a devoted friend. In their fallen fortunes he stood by them at the risk of his life, followed the survivors after the Revolution into exile, and died in their service.

When the Archbishop of Paris was obliged to fly in 1792 in order to save his life, he vested the Abbé Edgeworth with all his powers, making him his grand vicaré, and committed the great diocese to his care. In answer to the urgent entreaties of his friends to seek safety in Ireland or England, at this time, the abbé replied: "Almighty God has baffled my measures, and tied me to this land of horrors by chains I have not the liberty to shake off. The case is this: the wretched master [the king] charges me not to quit this country, as I am the priest whom he intends to prepare him for death. And should the iniquity of the nation commit this last act of cruelty, I must prepare myself for death, as I am convinced the popular rage will not allow me to survive an hour after the tragic scene; but I am resigned. Could my life save him I would willingly lay it down, and I should not lose in vain" (Letter to Mr. McCabe, priest in London).

At last, on the 20th of January, 1793, he was summoned by the Executive Council to proceed to the Temple prison at the desire of "Louis Capet", who was condemned to die on the following day. The abbé, having remained in the Temple all night, said Mass in the king's apartment on the morning of the execution, sat beside him in the carriage on the way to the scaffold.
fold, and, when the axe of the guillotine was about to fall, consoled his beloved master with the noble words: "Son of St. Louis, ascend to heaven." In his graphic and authoritative account of the last moment of Louis XVI (the original of which in French is preserved in the British Museum) the abbé is silent about this fine apostrophe, which everyone has heard of; but, when asked if he made use of the memorable expression, he replied that, having no recollection of anything that happened to himself at that awful moment, he neither affirmed nor denied having used the words. He was allowed to leave the scene of the execution unmolested, and so escaped; but soon after his head was demanded in several clubs, so that he was obliged to quit Paris and take refuge at Bayeux; whence at that time he might easily have escaped to England. Three chief considerations, however, bound him to the land of horrors. He had a great diocese committed to his care; he had promised Madame Elisabeth, then in prison, never to desert her, and he could not abandon his mother and sister, still living in Paris. Dressed as an ordinary citizen, and passing under the name now of Essex, now of Edgeworth, and again of Henry, he eluded capture and the guillotine, until finally in August, 1796, after the death of his mother, and the execution of Madame Elisabeth, he escaped to Portsmouth, and proceeded to London.

Mr. Pitt offered to settle a pension for life on him, but he respectfully declined it. During the three months he spent in London he was lionized by fashionable society. His brother, Usher, who resided at Firmount, and his relatives at Edgeworthstown, proud of his fame and renown, were most anxious to see him in Ireland; and, in fact, he was on the point of revisiting the land of his birth when he was entrusted with confidential despatches for Louis XVIII, then at Hambourg. This charge took him out of the restful and agreeable seclusion of the convent; and when, in April, 1802, he returned to France, he found the abbey to be in ruins. The Emperor Paul settled a pension of 500 roubles per annum on him. When Napoleon invaded Russia in 1807 it happened that some French soldiers were taken prisoners, and sent to Mittau. A contagious fever broke out among them, and in attending to their spiritual wants Abbé Edgeworth, knowing nothing of the plague, joined the sick, and, as the priest, and a member of the parish, naturally became the victim to the plague. The daughter of Louis XVI, despite the manifest danger of contagion, attended night and day at the sick bed of her "beloved and revered invalid, her more than friend, who had left kind words for her family," to use her own words. He was interred at Mittau. Louis XVIII wrote his epitaph, a copy of which, together with a letter of condolence, was sent by Louis' orders to Mr. Usher Edgeworth, the abbé's brother, residing in Ireland.

EDINBURGH.

Edinburgh, the capital of Scotland, though not its largest city, derives its name from the time (about A.D. 620) when the fortress of Edwin's burgh was raised on a lofty spur of the Pentland Hills, overlooking the Firth of Forth, and established the Anglian dominion then past the Northumbrian Kingdom. Edinburgh Castle was a royal residence in the reign of Malcolm Canmore, husband of St. Margaret, who died there in 1093. Round the castle the town grew up, and a little lower down the collegiate church of St. Giles, predecessor of the present church bearing that name, was built in the twelfth century. St. Margaret's son, King David I, founded the Abbey of Holyrood, at the foot of the castle hill, 1128; but the town of Edinburgh for several centuries did not extend beyond the ridge sloping eastwards from the castle. In the sixteenth century Edinburgh became the real capital of Scotland, that is, the seat of the Parliament and the Government, as well as the residence of her kings, and the scene of many of the most important provincial councils which regulated the affairs of the Scottish Church. James II was the first king crowned at Edinburgh instead of the old Abbey of Scone, and he and his successors conferred many privileges on the capital, and did all in their power to develop it and increase its prosperity. The buildings of the city gradually spread outside the ancient walls, all along the sloping ridge which extends from the castle at the top to Holyrood at the bottom; and towards the end of the nineteenth century the New Town was built to the northward, beyond the extensive lake (since drained) which stretched under the castle hill.

During the past hundred years Edinburgh has steadily increased in population and wealth, if not so rapidly as other cities which are greater centres of manufactures and commerce. The unrivalled beauty of its situation, and the social and other advantages which it offers as the capital of the country, as well as the remarkable educational facilities afforded by its many splendidly equipped schools and colleges, have always made it exceptionally attractive as a place of residence. Literary taste and culture were long the special characteristic of Edinburgh society, and it still preserves whatever has remained of all his previous glory. The city the title of the Modern Athens in the second quarter of the nineteenth century, when Scott, Wilson, Jeffrey, Brougham, and others made it famous by their personality and their genius. Modern facilities of travel and of intercommunication have inevitably given to Edinburgh, as to every centre of population in the kingdom outside London, a certain note of provincialism; but it has not altogether lost the dignity and charm proper to a capital. The population of Edinburgh is now (1898) 371,000, an increase of more than 100,000 in the thirty years preceding. The area of the city is more than 11,000 acres. It returns four members to Parliament, and is governed by a town council of fifty members, presided over by the lord provost. Printing, brewing, and distilling have long been here, and still are, the principal industries. Edinburgh is the seat of the supreme court of Scottish law, which in its internal forms as well as in many essential points differs greatly from the law of England. The president of the courts are the lords-justice-general and the lords-justice-clerk; and the judges, properly entitled "senators of the college of justice," enjoy the official title of lord. The supreme courts occupy the ancient Scottish Parliament house, a stately seventeenth-century building; and under the same roof is the 'Advocates' Library, one of the most extensive and valuable collections of books and manuscripts in the kingdom.

EDINBURGH UNIVERSITY, the only one of the four Scottish universities not founded in Catholic times, was established in 1582 by royal charter granted by James VI, and was speedily enriched by many benefactions, prominent among which was the occupation of the site of the ancient collegiate church of St. Mary-in-the-Fields, or the Kirk o' Field (well known as the scene of the mysterious murder of Lord Darnley), and have in recent years been greatly extended and embellished. The university comprises the usual faculties of divinity, law, medicine, and arts, and has pro-
duced many eminent men. The Edinburgh medical school has a world-wide reputation, and attracts students from all parts of the empire, as well as many foreigners. No religious tests prevent Catholics from enjoying the full benefit of university education in Edinburgh; but the number of Catholics frequenting the schools is remarkably small. The total number of students frequenting the university is between three and four thousand.

ECCLESIASTICAL HISTORY.—Edinburgh is naturally much bound up in its ecclesiastical history with the country at large. In the earliest centuries of its existence, belonging as it did to the Kingdom of Northumbria, Edinburgh was included in the Diocese of Lindisfarne, as we find from the list of churches belonging to that see compiled by Simeon of Durham in

dral had been in existence for some fifteen years. It has no architectural interest, but a spacious chancel was added, and other improvements carried out, in 1891. A cathedral for the Episcopalian body (whose bishop resides in Edinburgh) was erected about 1878, at a cost of over $500,000, from funds left by two charitable ladies. It is a Gothic building of much dignity, and by far the finest ecclesiastical building, either ancient or modern, now existing in Edinburgh. The Presbyterians have some handsome churches, but the grand old church of St. Giles, now in their hands, has been hopelessly vulgarised by the "restorer". A new church built by the Irvingites is adorned within by some fine mural paintings.

The seven Catholic churches which (besides the cathedral) supply the needs of the Catholic population

THE CASTLE AND SCOTT MONUMENT, EDINBURGH

854. The early connexion of the city with Lindisfarne is shown by the dedication to St. Cuthbert of its oldest church, founded probably in the ninth century. St. Cuthbert's church was presented to the newly established Abbey of Holyrood by King David; it was the richest church in Edinburgh, and possessed several outlying chapels, such as St. Ninian's, St. Roque's, and St. John Baptist's. When the diocesan system came to be fully established in Scotland, under Malcolm and Margaret and their sons, Edinburgh was included in the metropolitan Diocese of St. Andrews, and continued to be so until the suppression of the ancient hierarchy in the sixteenth century. The archbishop's see, as well as the episcopal residence, was of course in the primateal city of St. Andrews, beyond the Pirth of Forth; and there was no building known as a cathedral in Edinburgh prior to 1634, when the new Anglican Diocese of Edinburgh was formed out of the ancient archdeaconsry of Lothian, and Forbes became the first occupant of the see. The old collegiate church of St. Giles was at this time, and during the revival of Episcopalianism in Scotland, used as the cathedral of the Protestant bishop. As regards the Catholic Church, Edinburgh was the head-quarters of the vicars Apostolic of the Eastern District of Scotland from the time of the foundation of that vicariate in 1828, when the church now known as St. Mary's Catholic Catho-
made progress in the Scottish capital as elsewhere in the kingdom. Catholics are generally respected, and may and do rise to high positions of trust in the commercial, legal, and municipal world.

Something remains to be said of the religious houses which have flourished in Edinburgh in ancient and modern times. The principal and wealthiest monastery in former days was the Abbey of Holyrood, founded by David I for Augustinian canons, who were brought from St. Andrews. The Blackfriars or Dominican monastery was founded by Alexander II in 1230, on a site now occupied by a hospital. The Greyfriars or Franciscan church (of the Observant branch of the order) stood in the Grassmarket until it was destroyed by fire in 1845. The Whitefriars or Carmelites did not settle in Edinburgh until 1518. Their house of Greenside, near the Calton Hill, was transformed at the Dissolution into a lepers' hospital. Beyond the Carmelite house, nearer Leith, stood the preceptory of St. An-

[Image: CHURCH OF ST. GILES (XIV CENTURY)]

thony, the only house of that order in Scotland. The collegiate churches in and about Edinburgh included those of St. Giles and St. Mary-in-the-Fields (already mentioned), Trinity Church, Restalrig, Corstorphine, Creighton, and Dalkeith. Trinity church, one of the most exquisite Gothic buildings in Scotland, was destroyed in the nineteenth century by a deplorable act of vandalism, to make room for new railway works. Neither the Benedictine nor Cistercian monks, who had numerous houses in Scotland, were established in Edinburgh. The Cistercian or Bernardine nuns, however, possessed the convent of St. Mary-in-the-wynd (or lane) near a hospital, where the sisters tended the sick. The Dominican nuns had also a convent (called Schynns or Shenes, from St. Catherine of Siena) in the outskirts of the city. The numerous hospitals in Catholic Edinburgh comprised St. Mary Magdalen's in the Cowgate, founded in 1503 (the chapel remains, and is now used as a medical mission-hall); St. Leonard's, at the foot of Salisbury Crags; St. Mary's, in Leith Wynd, for twelve almsmen (converted into a workhouse by the Edinburgh magistrates in 1619); St. Thomas's, near the water-gate, founded in 1541 by Abbot Crichton of Holyrood for seven almsmen in red gowns; and Ballantyne's Hospital, founded by Robert Ballantyne or Bellenden, Abbot of Holyrood. The two religious orders of men now working in Edinburgh and its seaport of Leith are the Jesuits and the Oblates of Mary Immaculate. The former serve one of the largest churches in the city, and the latter have a house at Leith. There are eight convents of nuns, the oldest being St. Margaret's (Urruline), founded in 1835, the first since the Reformation. The nuns keep a high-class school and attend several hospitals. St. Catherine's Convent of Mercy has a well-equipped training-college for teachers as well as a ladies' school. The other convents are those of the Sisters of Charity, Little Sisters of the Poor, Sisters of the Sacred Hearts, Little Sister of Charity for Girls, Order of Mary Helpers of the Holy Souls, and Sisters of the Immaculate Conception. The other Catholic institutions of the city include a children's refuge, orphanages for boys and girls, home for working boys, home for destitute children, dispensary, and home for penitents.

D. O. HUNTER-BLAIR.

Editions of the Bible.—In the present article we understand by editions of the Bible the printed reproductions of its original texts. We are not concerned with copies of the versions of the Bible, whether printed or written; nor do we purpose to consider the manuscript copies of the original text. The written reproductions are described under Codex Alexandrinus and similar articles. See also CRITICISM, BIBLICAL, in the latter part of which article (Vol. IV, pp. 499, 500) will be found an explanation of the nomenclature of Bible codices and the symbols by which they are denoted. The translations of the Bible will be treated under the title VERSIONS OF THE BIBLE. Since the original text of the Bible was written in Hebrew or Greek (the original Aramaic portions can for the present purpose be considered as coincident with the Hebrew), our study of its printed reproductions naturally considers first the editions of the Hebrew text, and secondly those of the Greek.

I. EDITIONS OF THE HEBREW TEXT OF THE BIBLE.—Roughly speaking, there are three classes of editions of the Hebrew text: 1. The so-called Incunabula (Lat. cunabula, pl. "cradle"); 2. The common editions; 3. The critical editions. The reader will see that this division has an historical as well as a logical basis.

1. The Incunabula.—Technically speaking, the Incunabula are the editions issued before the year 1500. From our present critical standpoint, they are very defective; but since they represent manuscripts now lost, they are important even for critical purposes. The following publications constitute the main body of the Incunabula:

(1) The quarto edition of the Hebrew Psalter with the commentary of Rabbi David Kimchi, printed in 1477, probably at Bologna, 1472. This publication is much more perfect and correct than the foregoing.

(2) The folio edition of the Pentateuch, with vowels and accents, containing the Targum of Onkelos and the commentary of Rabbi Samuel Jarchi, printed at Bologna, 1482. This publication is much more perfect and correct than the foregoing.

(3) The so-called Earlier Prophets, i. e. the Books of Josue, Judges, Samuel, and Kings, printed in 1488 at Soncino, near Cremona, in Italy.

(4) The folio edition of the Later Prophets, i. e. Isaiah, Jeremiah, Ezekiel, and the Twelve Minor Prophets, printed soon after the preceding publication, without accents and vowels, but interleaved with the text of Kimchi's commentary.

(5) The Psalter and the Megilloth, or "Rolls", i. e. the Canticles, Lamentations, Ecclesiastes, and Esther, printed in the same year as the preceding publication, at Soncino and Casale, in Italy, in a quarto volume.

(6) Three folio volumes containing the Hagiographa with several rabbinic commentaries, printed at Naples in 1482: the text is accompanied by the vowels, but not by the accents.
(7) A complete Hebrew Bible, in folio, printed in 1488 at Soncino, without any commentary. Its text, accompanied by both vowels and accents, is based partly on the previously printed portions of the Hebrew Bible, partly on Hebrew manuscripts, but it lacks accuracy.

(8) A folio containing the Hebrew and Chaldee Pentateuch with Rashii's commentary, printed in 1490 in Tula del Dari.

(9) A most accurate and highly esteemed quarto edition of the Pentateuch, printed at Lisbon in 1491.

(10) A second complete edition of the Hebrew text, in quarto, printed in 1494 at Brescia. The editor calls himself Gerson ben Moses of Soncino. The text, which is accompanied by its vowels and accents, exhibits many peculiar readings not found in any other edition. The type is small and indistinct, the proofreading most slovenly; in a word, the edition is utterly defective. Luther based his translation on it.

(11) The foregoing text is repeated in an octavo edition printed at Pisa in 1494.

(12) A folio edition of the Hebrew Bible, printed on parchment, bears no indication of its date or place of printing; it probably appeared in Constantinople and Venice.

(13) To these may be added Seb. Münster's Hebrew-Latin Bible, printed in folio at Basle, 1534 and 1546, since its text is based on that of the 1488 and 1494 editions. Here also belong, for the same reason, the "Biblia Rabbinica Bombergiana", first edition (see below) of R. Sternheim, which exhibits many peculiar readings not found in any other edition. The type is small and indistinct, the proofreading most slovenly; in a word, the edition is utterly defective. Luther based his translation on it.

The subsequent editions were influenced principally by Ben Chayim's text, and only secondarily by the Complutensian Polyglot. Thus the former text was repeated by Bрагadin (Venice, 1617), and, in a slightly modified form, by Justinius (Venice, 1551, 1552, 1563, 1573). The editors of Genesis (1618), Hebraica de Garai (Venice, 1566, 1568, 1582), Plantin (Antwerp, 1656), Hartmann (Frankfort, 1595, 1598), the editors of Wittenberg (1586, 1587), and Torres (Amsterdam, 1705). Long before the last publication appeared, an edition by Buxtorf printed first the Targum and the Septuagint text (Basle, 1611), then Chayim's rabbinic Bible in four folio volumes (Basle, 1618, 1619). Though he corrected some of Ben Chayim's mistakes, he allowed others to remain and even introduced some new ones. He ought not to have regulated the vocalisation of the Targum to the vowels in the Chaldee fragments of the Bible, and it was at least inconsistent to change the Massorah according to the Hebrew text, seeing that Ben Chayim, whose text he professed to follow, had modified the Hebrew text according to the Massorah.

(2) Dependent, or Mixed, Editions.—In the editions thus far mentioned the text of one or the other of the two principal forms of the Hebrew Bible was reproduced without any notable change. We have now to consider the attempts made to correct the text either according to the reading of other editions or according to that of ancient manuscripts.

(a) Texta Correcta according to Printed Texta.—The first mixed text of the Hebrew Bible appeared in the Antwerp Polyglot (1569–72); the same text was repeated in the Hebrew Bible, 1st edition by the editorship of Jacob ben Chayim, the most celebrated Jewish scholar of his time. He brought the text into closer agreement with the Massorah, and added several more Jewish commentators. The work appeared in Venice, in four folio volumes, 1555–56, and was justly regarded as the first Hebrew Bible. It won the approbation of both Jewish and Christian scholars, so that it had to be republished in 1547–49, and 1568; the last edition was brought out under the direction of John de Gara. In spite of the great merits of the work, it is not wholly free from defects; Ben Chayim paid too much attention to the Massorah and too little to reliable old manuscripts. The principal codex he followed fell afterwards into the hands of de Rossi, who testifies that it is quite defective and has not been carefully edited. Chayim printed it without correcting its most glaring mistakes.

(b) Texta Correcta according to Codices and Printed Texta.—The mixture of Chayim's text with the Complutensian could not give permanent satisfaction. Every comparison of the mixed text with that of any good manuscript brought to light many discrepancies and suggested the idea that a better Hebrew text might be obtained by the study of good codices. The first attempt to publish a Hebrew text thus corrected was made by John Leusden with the cooperation of the printer Jos. Abias (Amsterdam,
3. Critical Editions.—The editions thus far enumerated can hardly be called critical, since their editors either lacked the necessary apparatus or did not consider it prudent to correct the received Hebrew text according to the full light of their textual information. Later on, two classes of scholars published really critical editions intended for textual criticism rather than its critical value. Oeclesis, too, endeavored to correct Athias’s text according to earlier editions, but was not always successful (Frankfort, 1677, 1692, 1716). Jablonsky corrected the second edition of Athias according to the readings of several codices and of the better previous editions, paying special attention to the vowels and accents (Berlin, 1699, 1712); his first edition is commonly regarded as being one of the best. Van der Hooght corrected the second edition of Athias according to the Massorah and the previously printed editions (Amsterdam and Utrecht, 1705); his attention to the smallest details and the printer’s care account for the general favor with which the edition was received. A still more perfect reprint of the edition was published by Props (Amsterdam, 1724). Simonis, too, published correct and cheap reprints of Van der Hooght’s Bible. Opitis corrected the edition of Athias according to the readings of seventeen of the best previous editions and of several manuscripts (Kiel, 1709; Züllichau, 1741). He supervised the proof in person, and even the type was set for its size and terminus, so that the edition is considered the most accurate extant. J. H. Michaelis edited the first Hebrew text with variants (Halle, 1720). He based it on the text of Jablonsky which he compared with twenty-four earlier editions and with five manuscripts preserved in Erfurt. The more important variants he added at the bottom of the page. It has been found that the comparison was made rather superficially as far as the printed editions were concerned, and there is no good reason for supposing that more care was taken in the comparison of the manuscript text. Still, the edition remains valuable, because it is the first of its kind, and some of its variants deserve attention even to-day. The Oratorian Father Houbigant tried to produce a text far superior to the commonly received one. Taking Van der Hooght’s text as his basis, he added his own corrections and conjectures in critical notes. His apparatus consisted of a number of manuscripts, the ancient versions, and the Hebrew context. The preci- piciety of his inferences and the rashness of his conjectures were to a large extent corrected, though the merit of his work has been duly appreciated by scholars. His “Note Critique” were printed in separate form in Frankfort (1777), after the full edition had appeared in Paris (1753).

Here may be mentioned the work of the Italian Jew, Salomó Norzi. He began in the early years of the seventeenth century to compare Bomberg’s text with the best of the printed editions, with a number of good manuscripts of both Bible and Massorah, with the Biblical citations found in the Talmud, the Midrashim, and the Tosefta, and with the Talmud, and with the Massorah, annotations of the more notable Jewish commentators: the results of his long study he summarized in a Massorah-critical commentary intended to accompany the text of the Hebrew Bible, which had been rather scantily corrected. The title of the work was to be “Reparer of the Breach” (Ia., ivii., 12), but the author died before he could publish his book. Nearly a century later, a Jewish physician named Raphael Chayim Italia had Norzi’s work printed at his own expense under the title “Offering of the Gift” (Man- tua, 1774), and it was reprinted with the “Massorah Magna” (Venice, 1828; London, 1876); the prophetic “Codex of St. Petersburg”, dating back to 910, phototyped by Strack in 1876; all the recently discovered or recently studied codices and fragments, together with the works of the ancient Jewish grammarians and lexicographers. But even with these means at their command, the editors of the Hebrew text did not at once produce an edition that could be called satisfactory from a critical point of view. The editions of Döderlein-Imeier (Leipzig, 1793) and Jahn (Vienna, 1807) only popularized the old text, the scholars in question having been preoccupied with their own work. The edition published under the name of Hahn and prefixed by Rosenmüller (Leipzig, 1834) is anything but critical. The stereotyped editions of Hahn (Leipzig, 1839) and Theile (Leipzig, 1849) remained for many years the best
COMPLETENSIA POLYGLOT. DEUT., XXXII, 35-40

those editions of the deuterocanonical books of the Old Testament is connected with that of the Septuagint editions.

The newly invented art of printing had flourished for more than half a century before a further attempt was made to publish an edition of the Greek New Testament. The Canticulae, Magnificat, and Benedictus were printed at Milan, 1481; at Venice, 1486 and 1496, as an appendix to the Greek Psalter; and the Gospel of St. John, 1, 1494, 1504, appeared at Venice, 1495 and 1504, together with the poems of St. Gregory Nazianzen; the beginning of the Fourth Gospel, John, 1, 1-14, was published at Venice, 1495, and at Tubingen, 1511. Not that the reading public of that age did not feel interested in the other parts of the New Testament; but it did not show any desire for the Greek text of the Bible. After the beginning of the sixteenth century the world's attitude with regard to the Greek text of the New Testament changed considerably. Not counting the publication of codices, mere reprints of the text in some parts of the Testament, the number of editions of the complete Greek text has been estimated at about 550; in other words, since the beginning of the sixteenth century, every year has witnessed the publication of, roughly speaking, a new edition of the Greek text. For our present purpose, we may consider the principal editions under the four headings of the Complutensian, the Erasmian, the Received, and the Critical text.

1. The Complutensian Text.—It was the Archbishop of Toledo, Cardinal Ximenes de Cisneros, who began at Alcalá, in 1502, the preparation of the edition of the Old Testament in Hebrew, Greek, and Latin, and of the New Testament in Greek and Latin. It has been thus far impossible to ascertain what codices served as the basis of the work called the Complutensian Polyglot. Though Leo X sent from the Vatican Library some manuscripts 'venerandae vetustatis' for the use of the scholars engaged in the work at Alcalá, it is quite certain that the well-known Codex Vatichanius was not among them. It appears that the Greek New Testament text of the Polyglot rests on the readings of a few manuscripts only, belonging to the so-called Byzantine family (see Criticism, Biblical, s.v. Textual). The charge that the Complutensian text was corrected according to the evidence of the Latin Vulgate, is now quite generally acknowledged in regard to I John, v. 7. The New-Testament text is contained in the fifth or, according to other arrangements, in the last of the six folios of the Polyglot; it was finished 10 Jan., 1514, and though the rest of the work was ready 10 July, 1517, four months before the great cardinal's death (8 Nov., 1517), it was not published until Leo X had given his permission proprio motu, 22 March, 1520.

The Complutensian text, corrected according to certain readings of the Erasmian and that of Stephanus, was repeated in the Antwerp Polyglot published, under the auspices of King Philip II, by the Spanish theologian Benedict Arias Montanus and his companions, and printed by the celebrated typographer, Christopher Plantin, of Antwerp, 1569-72. The Greek New Testament text occurs in the fifth and in the last of the eight folios which make up the Antwerp Polyglot; in the fifth it is accompanied by the Syriac text (both in Hebrew and Syriac letters), its Latin version, and the Latin Vulgate; in the eighth volume, the Greek, the Syriac, and the Vulgate passages, and is accompanied by the interlinear Latin Vulgate text. The text of the fifth volume of the Antwerp Polyglot was repeated only in the fifth volume of the Paris Polyglot, 1630-33, while that of the
The text seems to be a page of a printed book, possibly a history or a commentary on the New Testament, discussing the printing practices and editions of the text. The text is in Latin and mentions various editions and printings of the New Testament, including the English version of 1616, which was reprinted in 1617 with a supplement. The author refers to the work of Desiderius Erasmus and discusses the challenges of printing the text in the 16th century. The text also mentions the work of John Felle, who printed the text anonymously in Oxford in 1675. The edition discussed was also printed in Amsterdam in 1710, with additional apparatus including male and female text and critical apparatus. The text concludes by discussing the importance of textual criticism and the role of scholars in preserving the text.
Tischendorf's fifth recension is found in his "Editio Octava Critica Maior" (Leipzig, 1864–72, Giesecke and Devrient). In his first recension Tischendorf is further removed than Lachmann from the Revised Text; in his second he favours the Latin Vulgate; in the third, and still more in the fourth, he returns to the readings of the Received Text, especially of Griesbach; but in the fifth he again follows the examples of Lachmann and favours the readings of his first recension rather than those of his third and fourth. Tischendorf will always occupy a high rank among the editors of the Greek text, but he is rather a student of the text than a text critic. The labours of many other scholars of the eighth to the sixth century had to be supplied by C. R. Gregory on account of the great editor's untimely death (7 Dec., 1874). Gregory published these "Prolegomena" in three instalments (Leipzig, 1884, 1890, 1894), giving the reader a most satisfactory and complete summary of the information necessary or useful for the better understanding of the Greek text and its apparatus.

(5) The discrepancy between the text of Scholz's edition (Leipzig, 1860–69) and the readings of the new critical editor Tischendorf is the more formidable because of the textual questions more thoroughly in order to relieve the existing uncertainty. The favourable reception of his "Book of Revelation in Greek ... with a new English Version" published with a "Prospectus of a Critical Edition of the Greek Text" (London, 1867) and "Preparation" encouraged him to continue the arduous course of studies he had begun. After collating all the more important manuscripts which were to be found in England, he visited the libraries of Rome, Florence, Modena, Venice, Munich, Basle, Paris, Hamburg, Dresden, Wolfenbüttel, and Utrecht for an accurate study of their respective codices. It has been noted that when the results of Tregelles differ from those of Tischendorf, the former are usually correct. He was enabled to publish the Gospels of St. Matthew and St. Mark in 1857; those of St. Luke and St. John in 1861; the Acts and the Catholic Epistles in 1865; the Pauline Epistles in 1869–70. While engaged on the last chapters of the Apocalypse, he had a stroke of apoplexy, so that this part had to be finished by the hand of a friend (1872). Seven years later, Hort and Strane added "Prolegomena", and the work "Tischendorf. A reprint of the text without its critical apparatus appeared in 1887. The character of the work is well described by its title, "The Greek New Testament, Edited from Ancient Authorities, with their Various Critical Readings in the Critical Text and the Latin Version of Jerome" (London, 1857–79).

(6) The textual labours of Tregelles and Tischendorf were, to a certain extent, overshadowed by the work achieved by the two eminent Cambridge scholars, Brook Foss Westcott and Fenton John Anthony Hort. Like their predecessors, they acknowledged and followed the principles of Lachmann; but they differed from Lachmann as well as from Tischendorf and Tregelles in utilizing and systematizing the genealogical grouping of the ancient readings, thus connecting their textual labours with the text of the New Testament (1872–81) and distinguishing four branches of textual tradition. (a) The Western has a tendency to paraphrase the text and to interpolate it from parallel passages and other sources. It is found mainly in Codex D, the old Latin Version, and partly in Curzon's Syriac manuscripts. (b) The Alexandrian is purer than the Western, but contains changes of a grammatical character. It is found in the oldest uncial codices, except in B (and part of G), a number of cursives, and the Egyptian versions. (c) The Syriac is a mixture of all the other texts, or at least of all the characteristics of all the others. It is found in the later uncials, and in most of the cursives and versions. (d) The neutral text comes nearest to the original text, being almost identical with it. Its
pure form is found nowhere, but the readings of Σ and some of the oldest uncials, especially of B, give us the nearest approach to it. As to the value of the several classes of readings, Hort believes that most of the Western, Alexandrian, and Ephesian readings have been rejected; these latter he finds nowhere before the middle of the third century. All the necessary explanations have been collected in a volume accompanying Westcott and Hort's "New Testament in the Original Greek" (Cambridge and London, 1881). The volume contains an introduction (324 pages) and an appendix (173 pages). The introduction treats of the necessity of Textual New Testament Criticism (pp. 4–18), of its various methods (19–72), of the application of its principles to the restoration of the New Testament text (73–297), and finally of the character, the aim, and the arrangement of the new edition (288–324). The appendix contains critical comments on difficult passages (pp. 1–140), notes on certain orthographic and grammatical discrepancies between the ancient codices (pp. 141–173), and finally a complete list of the Old Testament passages employed in the New (pp. 174–188). The volume containing the text of Westcott and Hort's edition was printed also separately in the year of the first appearance. In 1885 (1887, etc.) the text appeared separately in a volume of smaller size, and in both volumes the original work was published anew in their larger form.

(7) Westcott and Hort's Greek New Testament, though hailed with delight by a great number of textual critics, did not meet with unchallenged praise. Among the dissenters were Codet, Wunderlich, Dobischits, Jülicher, Bousset, and Burgen (The Revision Revised; The Quarterly Review, 1881–82; 2nd edit., London, 1885). Of these, some, object to Westcott and Hort's method, others to their appreciation of Codex Β, others to their attitude towards the so-called Western readings, others, finally, to their conclusion as to the character of the Received Text. In the third and fourth editions of his "Plain Introduction to the Criticism of the New Testament", F. H. Scrivener writes against the views of Tischendorf, Tregelles, and Westcott-Hort, he favours the readings of the later manuscripts in the reconstruction of the Greek New Testament text, and advocates the return to a text-form similar to the Received Text. Among his various publications we may notice "The New Testament in the Original Greek, together with the chief readings of the Revised Version" (3rd Edition, London, 1894) and his various collations of texts (Twenty Manuscripts of the Gospels, London, 1853; Collation of Codex Sinaiticus with the Received Text, Cambridge and London, 1863, 1867). Here may be mentioned also "The Greek Testament with a critically revised text, a digest of various readings, and marginal references to verbal and idiomatic usage, prolegomena, and a critical and exegetical commentary" edited by Henry Alford, afterwards Dean of Canterbury (London, 1849–1857; sixth edition, 1871); Tischendorf was of opinion that Alford's version of the text was not satisfactory. Again, "The New Testament in the Original Greek, with Notes and Introduction" (London, 1856–60; newly edited with index, 1867), by Christopher Wordsworth, Canon of Westminster, is a mixture of the texts of Griesbach, Lachmann, Tischendorf, and Elsevier. Finally, in connection with the Revised Edition, Professor C. Palmer, of Oxford, published "The Greek Testament, with the Readings adopted by the Revised of the Authorised Version" (Oxford, 1851; Clarendon Press). The chief works devoted to the textual restoration of the Greek New Testament which have appeared in recent years, we must mention the edition of B. Weiss: Part I, Acts, Catholic Epistles, Apocalypse (Leipzig, 1894, Hinrichs); Part II, The Pauline Epistles together with Hebr. (1896); Part III, The General Epistles, and the Apocryphal Letters, appeared 1902–05, in three volumes; the mistakes of the first issue were corrected as far as possible. Richard Francis Weymouth edited a handy form "The Resultant Greek Testament" (London, 1888, Elliot Stock; cheap edition, 1892 and 1898; third edition, 1903); but, the Syrian manuscripts, which the editor may not give the reader anything of his own, but he furnishes an amount of textual erudition which the Bible student can hardly afford to neglect. Dr. E. Nestle has edited a "Novum Testamentum Graecum apparatus criticus" (Stuttgart, 1888, 1889, 1901, 1903, 1904, 1900) based on the four most prominent of the recent texts: Tischendorf, Westcott-Hort, Weymouth, and Weiss. All the variants of the four editions, excepting as to minor details, are noted, so that the reader obtains at a glance the results of the foremost textual criticism on any given text. It would be difficult indeed to contrive a handier and more complete edition of the Greek text than this of Nestle's, which seems likely to become the Received Text of the twentieth century.

(9) It is, therefore, all the more to be regretted that Nestle's edition is not yet forthcoming. But it cannot be recommended to the general Catholic reader. Not to mention other shortcomings, it places John, v, and viii, 35–88, 11, among the foot-notes, and represents Mark, xvi, 9–20, together with an alternative ending of the Second Gospel, as a "Western non-interpolation," suggesting that it is an ancient Eastern interpolation of the sacred text. The rules of the new Index enumerate with precision those classes of Catholics who may read texts like that of Nestle; others must content themselves with one or another of the following editions: P. A. Graetz edited the Complutensian text (Tibingen, 1821; Fust); L. Van Es published a edition of the Complutensian and the Erasmian text (Tibingen, 1827; Fust); Jaumann adheres closely to the edition of Tittmann (Munich, 1832; Lindauer); we have already mentioned Tischendorf's text prepared for Catholic readers under the influence of I. M. Jager (Paris, 1847, 1851, 1859); Reithmayr produced a edition of this latter text and that of Lachmann (Munich, 1847; Ratisbon, 1851); V. Loeh derived his text, as we shall see, as part of his letter to W. Tauchnitz published, with the approbation of the proper ecclesiastical authority of Dresden, Theile's text almost without change, together with the text of the Latin Vulgate; Brandesheide edited the Greek text and the Latin Vulgate of the New Testament in such a way as to bring the former as much as possible into agreement with the latter (Freiburg, 1901, etc.); finally, M. Hetzenauer published his "Novum Testamentum Graecum" (Innsbruck, 1904, Wagner), reproducing in separate form the Greek text of his Greek New Testament edition (1890–96). It is more independent of the Vulgate text than Brandeschide, and he adds the more important variants in the margin, or in footnotes, or again in an appendix critica.

(10) It must not be imagined that the textual criticism of the New Testament has arrived at a state that can be regarded as final. Without doing injustice to the splendid results attained by the labours of the scholars enumerated in this article, it must be confessed that the condition of the textual criticism of the New Testament is more uncertain to-day than it was two centuries ago. The first is the product of this time has been the copy actually sent out to Antioch. Even if stu-
dents repudiates Blaas's view, they will be influenced by the conservative work of H. von Soden, which is now (1906) in course of publication (Die Schriften des NT. in ihrer ältesten erreichbaren Textgestalt hergestellt auf Grund ihrer Textgeschichte, Berlin, Duncker). The writer distinguishes between the original form and the development of each of these recensions gives rise to a number of subdivisions. The problem for the textual critic is to discover the archetype which lies in each case at the bottom of the three recensions. If von Soden's method should eventually prove to be false, it may at least contribute to the improvement of our Greek New Testament editions.

Several sources have been mentioned in the course of the article. We might refer the reader for a list of the other principal authors to RAUSCHENBECK and HUNDEMBURG in Kirchenrecht. A. T. BIBAS, to G. von HERBARDT in Reuss's Reimsparkle. LANDER, in DMLZ, ed. MARCK (Halle, 1778), I, 197 sqq.; ROHMANN, Handbuch für die Literatur der bibelischen Kritik und Exegese (Göttingen, 1877), I, 278 sqq.; HICKS, Einleitung in die ältesten Ausgaben des neuen Testamentes (4th ed. Stuttgart, 1847), I, 285 sqq.; TRESENER, An Account of the Printed Text of the Greek New Testament (London, 1854); HICKS and ROHMANN, in Gudrun (1856), 3, 46 sqq.; O'CALLAHAN, A List of Reprints and other works in printed Greek, published in the British Empire up to 1890 (Albany, 1891); REUS, Bibelhistorie Neues Testament (Berlin, 1871); HAYMANN, in Gudrun (1872); HALL, A Critical Bibliography of the Greek New Testament as Published in America (Philadelphia, 1883); HUNDEMBURG, Editionen des neustamentlichen Textbuchs und der Synopsen (Leipzig, 1883); TREGESTOL, Die neuesten Editionen des neuen Testamentes und ihrer litterarischen Beschreibung (Leiden, 1890); Schaff, A History of the Christian Church and the English Version (3rd ed. New York, 1883), 497 sqq.; ROHMANN, Die neuesten Textbuchs der Synopsen (Zürich, 1892); LUCAS, Textkritik und Textkritiker (Berlin, 1893), 18 sqq.; BLAAS, Acta Apostolorum etc. (Göttingen, 1898); Id., Acta Apostolorum, etc. (Leipzig, 1899); Id., Evangelium sec. Johannes (2 vols.); GREFFERT, Textkritik des neuen Testamentes (Leipzig, 1902); GREGORY, Canon and Text of the N. T. (New York, 1907); von Soden, Die Schriften des NT. in ihrer ältesten erreichbaren Textgestalt etc. (Berlin, 1902, 1906).

A. J. MAAS.

Edmondsbury. See Bury St. Edmunds.

Edmund, Congregation of Saint, founded in 1843, by Jean-Baptiste Muard, at Pontigny, France, for the work of popular missions. The members also devote themselves to parochial work, to the education of youth in seminaries and colleges, to the direction of purows and to the promotion of missions. The mother-house is at Pontigny, but since the expulsion of the religious orders the superior general resides at Hitchen, England. In the United States, the congregation has two houses: a missionary house and apostolic school at Swanton, Vermont, for the training of young men who wish to study for the priesthood and the religious life; and a college at Winooski, Vermont, with 12 fathers, 8 scholastics, and 100 pupils.

E. M. SALMON.

Edmund Arrowsmith, Venerable, English martyr, b. in 1585 at Hadding; executed at Lancaster, 23 Aug., 1628. He is of great reputation for the numerous favours, spiritual and temporal, which are won through his "Holy Hand", still preserved as an object of veneration in the church of St. Oswald, Ashton, near the martyr's birthplace. His parents suffered much for their religion, and the future martyr was once, when a child, left shivering in his night-clothes by the pursuivants, who carried his parents off to Lancaster jail. He entered Douai College in 1605, but was forced to interrupt his studies; he was, however, ordained priest in 1612. Lancaster was the scene of his missionary labours and he was eminent for "fervour, zeal and ready wit". Apprehended, probably in 1622, he was brought before Bridgeman, Protestant Bishop of Chester, and had a lively discussion with him and his ministers. Regaining his liberty he entered the Society of Jesus in 1623, and made his novitiate on the Mission, retiring to Essex for a spiritual retreat. He was eventually betrayed by false brethren, tried at Lancaster in 1628, and was found guilty of high treason for being a Jesuit priest and a seducer in religion. His fellow-prisoner, Father John Southworth, afterwards a martyr, absolved him as he went forth to undergo the usual butchery.

PATRICK RYAN.

Edmund Campion, Blessed, English Jesuit and martyr; he was the son and namesake of a Catholic bookseller, and was b. in London, 25 Jan., 1540; executed at Tyburn, 1 Dec., 1581. A city company sent the promising child to a grammar school and to Christ Church Hospital. When Mary Tudor entered London in state as queen, he was the schoolboy chosen to give the Latin salutatory to her majesty. Sir Thomas White, lord mayor, who built and endowed St. John's College at Oxford, accepted Campion as one of his first scholars, appointed him junior fellow at seventeen, and, dying, gave him his last messages for his academic family.

Campion shone at Oxford in 1560, when he delivered one oration at the reburial of Amy Robsart, and another at the funeral of the founder of his own college; and for twelve years he was to be followed and imitated as no man ever was in an English university except himself and Newman. He took both his degrees, and became a celebrated tutor, and, by 1568, junior proctor. Queen Elizabeth had visited Oxford two years before; she and Dudley, then chancellor, won by Campion's bearing, beauty, and wit, bade him ask for what he would. Successes, local responsibilities, and allurements, his natural ease of disposition, the representations, above all, of his friend Bishop Cheynell of Gloucester, blinded Campion in regard to his course as a Catholic: he took the Oath of Supremacy, and deacon's orders according to the new rite. Afterthoughts developing into scruples, scruples into anguish, he broke off his happy Oxford life when his proctorship ended, and betook himself to Ireland, to await the reopening of Dublin University, an ancient papal foundation temporarily extinct. Sir Henry Sidney, the lord deputy, was interested in Campion's future as well as the revival which, however, fell through. With Philip Sidney, then a boy, Campion was to have a touching interview in 1577.

As too Catholic minded an Anglican, Campion was suspected, and exposed to danger. Hidden in friendly houses, he composed his treatise called "A History of Ireland", written from an English standpoint it gave much offence to the native Irish, and was severely criticized, in the next century, by Geoffrey Keating in his Irish History of Ireland. Urged to further effort by the seal of Gregory Martin, he crossed to England in disguise and under an assumed name, reaching
London in time to witness the trial of one of the earliest Oxonian martyrs, Dr. John Storey. Campion now recognized his vocation and hastened to the seminary at Douai. Cecil lamented to Richard Stanhope of Fotheringay, 'so much as to cause some of the diamonds of England'. At Douai Campion remained for his theological course and its lesser degree, but then set out as a barefoot pilgrim to Rome, arriving there just before the death of St. Francis Borgia; 'for I meant', as he said at his examination, 'to enter into the Society of Jesus, thereof to vow and to be professed'. There he accomplished promptly in April (1573), being the first novice received by Mercurianus, the fourth general. As the English province was as yet non-existent, he was allotted to that of Bohemia, entering on his noviciate at Prague, and spending his probation year at Brunn in Moravia. Returning to Prague, he taught in the college and wrote a couple of sacred dramas; and there he was ordained in 1578. Meanwhile, Dr. Allen was organizing the apostolic work of the English Mission, and rejoiced to secure Fathers Robert Parsons and Edmund Campion as his first Jesuit helpers. In the garden at Brunn, Campion had had a vision, in which Our Lady foretold to him his martyrdom. Comrades at Prague were moved to make a scroll for P. Edmundus Campanius Martyr, and to paint a prophet. Campion set out from Rome, had many adventures, and called upon St. Charles Borromeo in Milan, and upon Beza in Geneva. Campion was met in London, and fitly clothed, armed, and mounted by a devoted young convert friend. His office was chiefly to reclaim Catholics who were wavering or temporizing under the pressure of governmental tyranny; but his zeal to win Protestants, his preaching, his whole saintly and soldierly personality, made a general and profound impression. An alarm was raised and he fled to the North. They then produced the famous tract, the "Decem Rationes". He returned to London, only to withdraw again, this time towards Norfolk. A spy, a former steward of the Roper family, one George Eliot, was hot upon his track, and ran him and others down at Lyford Grange near Wantage in Berkshire on 17 July, 1581.

Amid scenes of violent excitement, Campion was derisively paraded through the streets of his native city, bound hand and foot, riding backwards, with a paper stuck in his hat to denote the "seditionous Jesuit". First he was cast into the Stocks and then again to the same blinding, to the same slow torture, to the same unspeakable humiliation. On Campion's return to the Tower, the priest was then examined under torture, and was reported to have betrayed those who had harboured him. Several arrests were made on the strength of the lie. He had asked for a public disputation. But when it came off in the Norman chapel of the Tower, before the Dean of St. Paul's and other divines, Campion had been denied opportunity to prepare his debate, and had been severely racked. Thus weakened, he stood through the four long conferences, without chair, table, or notes, and stood undefeated. Philip Howard, Earl of Arundel, who was looking on in the flush of worldly pride, became thereby inspired to return to God's service. The privy council, at its wits' end over so purely spiritual a "traitor", hatched a plot to impeach Campion's loyalty, and called in the hireling Eliot. In November, 1581, the hired informer of the Scottish Inquisition was sent to Westminster Hall, 20 Nov., 1581. Campion, pleading not guilty, was quite unable to hold up his often-wrenched right arm, seeing which, a fellow-prisoner, first kissing it, raised it for him. He made a magnificent defence. But the sentence was his death, by hanging, drawing, and quartering: a sentence received by the martyrs with a joyful shout of Homo deus et Deum. Campion, with Sherwin and Briant, who were on a separate hurdle, was dragged to Tyburn on 1 December. Passing Newgate arch, he lifted himself and his companions to the full height of the arch, and his arms were tied still in situ. On the scaffold, when interrupted and taunted to express his mind concerning the Bull of Pius V excommunicating Elizabeth, he answered only by a prayer for her, "your Queen and my Queen". He was a Catholic Englishman with political opinions of his own, no doubt; in this as much as ever Felton did, for the primacy of the Holy See. The people loudly lamented his fate; and another great harvest of conversions began. A wild, generous-hearted youth, Henry Wallpole, standing by, got his white doublet stained with Campion's blood; the incident made him, too, in time, a Jesuit and a martyr.

Historians of all schools are agreed that the charges against Campion were wholesale sham. They praise his high intelligence, his beautiful gait, his fiery energy, his most chivalrous gentleness. He had renounced all opportunity for a dazzling career in a world of master men. Every tradition of Edmund Campion, every remnant of his written words, and not least his unstudied golden letters, show us that he was nothing less than a man of genius; truly one of the most brilliant Englishmen of the time. He was beatified by Pope Leo XIII on 9 Dec., 1886. Relics of him are preserved in Rome and Prague, in London, Oxford, Stonyhurst and Roehampton. A very convincing portrait was made soon after his death for the Gesù in Rome under the supervision of Spanheim. And if there is a copy in oils at Stonyhurst, and a brilliantly engraved print in Hazart's Kerckelycke Historie (Antwerp, 1669), Vol. III (Engelhard, etc.), though not in every copy of that now scarce work.

Campion was, with the rest, printed by Spanheim in Holinshed's Chronicles (1587), then in Warburton's book under the same title (1583), and again by the Hibernia Press (Dublin, 1869); Edmund Campion Decem Rationes et alia Opuscula, carefully edited (Antwerp, 1831); this included Orationes, Letters, and the Narratio Divitii, Henrici VIII, Regis Angliae, ob Uxore et ob Ecclesiis, first printed by Hearnefield. There is no modern ed. or tr. The standard biography is Simpson, Edmund Campion, Jesuit Polymath of England (London, 1866; reissued, London, 1907). Accounts of Campion's life, labours, and death are in Chaloner, Memoirs of the Most Eminent Bishops; Poole, The Life of the Society of Jesus, and Stanton, Mendacity of England and Ireland. The article on Campion in the Catholic Encyclopaedia, Biog. and that in Gilly, Bibl. Doc. Engl. Cath., are based, in phrase, as in fact, upon Simpson, op. cit. A most accurate sketch is contained in Life of Edmund Campion, ed. and enl. by CAMM (2 vols., London, 1905 11, 266-357. A sketch by Gower appears in The English Martyrs (Catholic Truth Society, 2 vol., London, 1892). For minor points connected with Campion see The Month (August, 1895; September, 1895; January, 1896), and especially the third and fourth, Volume XII, Series III, 1881, pp. 630, 723. Besides a bibliography in Gilly, pp. 344-392, there is a more extensive one in Simpson, Edmund, Collected, on de Backer, Bibl. Lat. Cat., c. de J. A small book devoted to him is The Blessed Edmund Campion in the St. Nicholas Series (London, 1907). L. I. G. UINX.

Edmund Rich, Saint, Archbishop of Canterbury, England, b. 20 November, c. 1180, at Abingdon, six miles from Oxford; d. 16 Nov., 1240, at Soissey, France. His early chronology is somewhat uncertain. His parents, Reinald (Reginald) and Mabel Rich, were remarkable for piety. It is said that his mother constantly wore haircloth, and attended almost every night at Matins in the abbey church. His father, even during the lifetime of his mother, cared for the monastery of Berdwin. Edmund had two sisters and at least one brother. The two sisters became nuns at Cateby. From his earliest years he was taught by his mother to practise acts of penance, such as fasting on Saturdays on bread and water, and wearing a hair shirt. When old enough he was sent to the monastery of Berdwin. The Child Christ appeared to him while he was walking
EDMUND

EDUCATION

alone in the fields. In memory of what passed between him and Christ on that occasion, he used every night to sign his forehead with the words "Jesus of Nazareth", a custom he recommended to others. Anxious to preserve the purity of mind and body, Edmund regularly went for a swim in the river Thames whenever he procured two rings; one he placed on the finger of Our Lady's statue in St. Mary's, Oxford, the other he himself wore.

About 1135, in company with his brother Richard, he went to the schools of Paris. Thenceforward, for several years, his life was spent between Oxford and Paris. He taught with success in both universities. After having devoted himself to the study of theology, Edmund acquired fame as a preacher, and was commissioned to preach the Sixth Crusade in various parts of England. All this time his austeritys were very great. Most of the night he spent in prayer, and the little sleep he allowed himself was taken without lying down. Though thus severe to himself, he was gentle and kind towards others, especially to the poor and sick, who were regularly attended. In 1222 Edmund became treasurer of Salisbury cathedral. Ten years later he was appointed to the Archbishops of Canterbury by Gregory IX and consecrated 2 April, 1234.

In defending the generous and prudent disposition, he firmly defended the rights of Church and State against the exactions and usurpations of Henry III. He visited Rome in 1237 to plead his cause in person. This fearless policy brought him into conflict, not only with the king and his party, but also with the monks of Rochester and Canterbury. Determined opposition met him from all sides, and constant appeals were carried to Rome over his head. In consequence, a papal legate was sent to England, but Henry adroitly managed the legate's authority to nullify Edmund's power. Edmund was compelled to give up the Church to give up his work of teaching of the poor. In 1239, according to a tradition of decay and Anne of Edmund's. He retired in 1240 to the Cistercian Abbey of Pontigny. Here he lived like a simple religious till the summer heat drove him to Saissy, where he died. Within six years he was canonized by Innocent IV. His body was taken to Pontigny, and numerous miracles have been wrought at his shrine. Notwithstanding the devastation that from time to time has overtaken Pontigny, the church is still venerated as the mother church. Important relics of the saint are preserved at Westminster Cathedral; St. Edmund's College, Ware; Portsmouth Cathedral, and Ercington Abbey. The ancient proper Mass of St. Edmund, taken from the Sarum Missal, is used in the Diocese of Portsmouth, of which St. Edmund is patron. In September, 1874, 350 English pilgrims visited St. Edmund's shrine. The community, known as Fathers of St. Edmund, were forced to leave their home at Pontigny, by the Associations law. The "Speculum Ecclesiae," the "Ordo," and the "Provisional Constitutions" are the most important of St. Edmund's writings.

Besides the three ancient lives of St. Edmund by Matthew Paris, Robert Bacon, and Robert Rich, there is a fourth entitled BEATRICE OF FONTIGNY in Martene and Durand, Thesaurus Anecdotorum, for a complete account of the MSS. records, the reader is referred to WALLACE, St. Edmund of Canterbury (London, 1892), 1-18, and to DE PARAVICINI, St. Ed- mund of Abingdon (London, 1868), xiii-xliii; BUTLER, Lives of the Saints (New York, 1942); WARD, St. Edmund Archvop, of Canterbury, London (1843); TRACTABILE; WARD, St. Edmund Archvop, of Canterbury (London, 1903); ARCHER in Dict. of Nat. Biog., s. v.

COLUMBUS EDMONDS.

EDMUND the Martyr, Saint, King of East Anglia, b. about 840; d. at Hoxne, Suffolk, 20 November, 870. The earliest and most reliable accounts represent Edmund as the political king of East Anglia, though, according to later legends, he was born at Nuremberg (Germany), son to an otherwise unknown King Aldmeun of Saxony. Though only about fifteen year old when crowned in 855, Edmund showed himself a model ruler from the first, anxious to treat all with equal justice, and closing his ears to flatterers and traitors. He also attached himself to the bishop of Dunstable, who died in 865. Edmund then retired for a year to his royal tower at Hunstanton and learned the whole Psalter by heart, in order that he might afterwards recite it regularly. In 870 he bravely repulsed the two Danish chiefs Hinguar and Hubba who had invaded his kingdom. He soon returned with overwhelming numbers, and pressed terms upon him which as a Christian he felt bound to refuse. In his desire to avert a fruitless massacre, he disbanded his troops and himself retired towards Framlingham; on the way he fell into the hands of the invaders. Having loaded him with chains, his captors conducted him to Hinguar, whose insipid demands he again rejected, declaring his religion dearer to him than his life. His martyrdom took place in 870 at Hoxne in Suffolk. After beating him with cudgels, the Danes tied him to a tree, and cruelly tore his flesh with whips. Throughout these tortures Edmund continued to call upon the name of Jesus, until at last, exasperated by his constancy, his enemies began to discharge arrows at him. This cruel sport continued until he had the appearance of a porcupine, when Hinguar commanded his head to be struck off. From his first burial-place at Hoxne his relics were removed in the tenth century to Beodricsworthy, since called St. Edmundsburge, where arose the famous abbey of that name. His feast is observed in Nov., and he is represented in Christian art with sword and arrow, the instruments of his torture.

G. E. PHILLIPS.

Education.—In General.—In the broadest sense, education includes all those experiences by which intelligence is developed, knowledge acquired, and character formed. In a narrower sense, it is the work done by certain agencies and institutions, the home and the school, for the expansion of the human mind. The child is born with latent capacities which must be developed so as to fit him for the activities and duties of life. The meaning of life, therefore, of its purposes and values as understood by the educator, primarily determines the nature of his work. Education aims at an idea, and this in turn depends on the view that is taken of man and his destiny, of his relations to God, to his fellowmen, and to the physical world. The content of education is furnished by the previous acquisition of mankind in literature, art, and science, in moral, social, and religious principles. The inheritance, however, contains elements that differ greatly in value, both as mental possessions and as means of culture; hence a selection is necessary, and this must be guided largely by the educational ideal. It will also be influenced by the nature of the educative process. Teaching must be adapted to the needs of the developing mind, and the endeavour to make the adaptation more thorough results in theories and methods which are, or should be, based on the findings of biology, psychology, and sociology.

The work of education begins in infancy; but it is, for obvious reasons, continued in institutions where other teachers stand in place of the parents. To secure efficiency it is necessary that each school be properly organized, that the teachers be qualified, and that the subject be subjected to review. Since the school, moreover, is so largely responsible for the intellectual and moral formation of those who
training, the development of free personality was impossible. In China, the family, with its sacred traditions and its ancestor-worship, was dominant; in Persia, education was controlled by the State; in Egypt by the priesthood; in India by the different castes. There was, doubtless, in the Oriental mind a consciousness of personality: but no effort was made to strengthen it and give it value. On the contrary, the Hindu philosophy, which regarded knowledge as the means of redemption from the miseries of life, placed that redemption itself in nirvana, the extinction of the individual through abode in the bliss of the being of the world. The position of woman was, in general, a degraded one. Though the early training of the child devolved upon the mother, her responsibility brought with it no dignity. But little provision was made for the education of girls; their only vocation was to marry and bear children, and render service to the head of the family.

In view of these facts, it cannot be said that education as the Western world conceives it owes any great debt to the East. It is true that some of the sciences, especially mathematics, astronomy, and chronology, and some of the arts, as sculpture and architecture, were carried to a certain degree of perfection; but the very success of Oriental ability and skill in these lines only emphasizes by contrast the deficiencies of Oriental education. Even in the sphere of morality the same antagonism appears to be true. The viewpoint education from the sacrifice need not be denied that many of the sayings, e.g. of Confucius, evince a high ideal of virtue, while some of the Hindu proverbs, such as those of the "Pantächántara", are full of practical wisdom. Yet these facts only make it more difficult to answer the question: Why was the actual living of these people so far removed from the formally accepted standards of virtue? Nevertheless, Oriental education has a peculiar significance; it shows quite plainly the consequences of sacrificing the individual to the interests of human institutions, and of reducing education to a machine-like process, the aim of which is to mould all minds upon one unchanging pattern; and it further shows how little can be accomplished for real education by despotic authority, which demands, and is satisfied with, an obedient theory or creed. Even civilized peoples carry on the work of education for a long time before they begin to reflect upon its meaning, and such reflection is guided by philosophical speculation and by established social, religious, and political institutions, rather than by the work of exceptional minds, and presents a higher ideal than might be inferred from their educational practice. Nevertheless, an account of what was done by the principal peoples of antiquity will prove useful by bringing out the profound modification which Christianity wrought.

ORIENTAL EDUCATION.—The invention of writing was of the utmost importance for the development of language and the keeping of records. The earliest texts, chiefly of a religious nature, became the sources of the means of education. Such as in China the writings of Confucius, in India the Vedas, in Egypt the Book of the Dead, in Persia the Avesta. The main purpose in having these books studied by youth was to secure uniformity of thought and custom, and unvarying conformity with the past. In this respect Chinese education is typical. The school writings contained minute prescriptions for conduct in every circumstance and station of life. The pupil was obliged to memorize in a purely mechanical fashion; whether he understood the words as he repeated them or not. He read his memory with a multitude of established forms and phrases, which subsequently he employed in the preparation of essays and in passing the governmental examinations. That he should learn to think for himself was of course out of the question. With such a
These ideals again, underwent a decided change during the fifth century B.C. In one respect at least it was a change for the better; it extended the rights of citizenship. The constitution of Solon was set aside and that of Cleisthenes adopted in its stead (509 B.C.). The democratic character of the latter, with its increase in prosperity from expansion of foreign relations, afforded new opportunities for individual ability and endeavour. This heightened activity, however, was not put forth in behalf of the common good, but rather for the advancement of personal interests. At the same time morality was deteriorated and support it had drawn from religion; philosophy gave way to scepticism; and education, while it became more intellectual, laid emphasis on form rather than on content. The most influential teachers were the Sophists, who supplied the growing demand for instruction in the art of public discussion and offered information on every sort of subject. Developing in practical directions the principle that "man is the measure of all things", they carried individualism to the extreme of subjectivism alike in the sphere of speculative thought and in the practice of life. The purposes of education were correspondingly modified, and new problems arose. Now that the old standards and basis of morality had been rejected, the main question was to replace them by others in which due allowance would be made for individual opinion and knowledge flowing otherwise for social needs. The answer of Socrates was: "Know thyself" and "Knowledge is virtue", i.e. a knowledge drawn from personal experience, yet possessing universal validity; and the means prescribed by him for obtaining such knowledge was his questioning method of question and answer, by which he developed the power of thinking. As an intellectual discipline, this scheme had undoubted value; but it left unsolved the chief problem: how is knowledge, even of the highest kind, to be translated into action? Plato offered a twofold solution. In the "Republic", setting out from his general theory that the idea alone is real, and that the good of each thing consists in harmony with the idea whence it originated, he reaches the conclusion that knowledge consists in the perception of this harmony. The aim of education, therefore, is to develop knowledge of the good. So far, this scheme contains little more promise of practical results than that of Socrates. But Plato adds that society is to be ruled by those who attain to this knowledge, i.e. by those who have that knowledge. The classes, soldiers and artisans, are subordinate, yet each individual, being assigned to the class for which his abilities fit him, reaches the highest self-development and contributes his share to the social weal. In the " Laws", Plato attempts to revise and combine certain elements of the Spartan and of the Athenian system; but this reactionary scheme met with no success. This problem, finally, was taken up by Aristotle in the "Ethics" and the "Politics". As in his philosophy, so in his educational theory, he departs from Plato's teaching. In the "Politics", for instance, as for society is happiness: "What we have to aim at is the happiness of each citizen, and happiness consists in a complete activity and practice of virtue" (Politics, IV). More precisely, happiness is "the conscious activity of the highest part of man according to the law of his own excellence, not unaccompanied by adequate, external conditions". Merely to know the good does not constitute virtue; this knowledge must issue in practice, the goodness of the intellect (knowledge of universal truth) must be combined with goodness of action. The three things which make men good and virtuous—nature, habit, and reason—"must be in harmony with one another (for they do not always agree); men do many things against habit and nature, if reason persuades them that they ought.
We have already determined what natures are likely to be most easily moulded by the hands of the legisla
tor; we have ascertained the soil, and we know how to cultivate it; we learn some things by habit and some by instruction" (Politics, Bk. VII). Education, however, must always be adapted to the peculiar character of the State: "The citizen should be moulded to suit the form of govern-
ment under which he lives" (ibid., VIII). And again, "It is right that the citizens should possess a capacity
for affairs and for war, but still more for the enjoy-
ment of peace or leisure; right that they should be
capable of such actions as are indispensable and sal-
tary, but still more of such as are moral per se. It is
wishful that they should learn how to learn, that they should
even be educated while they are still children, and at all
other ages, till they pass beyond the need of educa-
tion" (ibid., IV). "Neither must we suppose that
any one of the citizens belongs to himself, for they all
belong to the State, and are each of them a part of the
State, and the care of each part is inseparable from
the care of the whole" (ibid., VIII).

In the theories of Plato and Aristotle are found the
highest reaches of Hellenic thought regarding the pur-
pose and nature of education. Each of these great
thinkers founded schools of education, and their
thoughts have profoundly affected the thought of all subsequent
time, yet neither succeeded in providing an education
sound and permanent enough to avert the moral and
political downfall of the nation. The diffusion of
Greek thought and culture throughout the world by
commerce, conquest, or philosophical reasoning, or
through the imitation of worthy models and, as far as possible, of living con-
crete examples. "Vita discimus, "We learn for life,"
said Seneca; and this phrase sums up the whole pur-
pose of Roman education. In the course of time, ele-
mentary education was conducted by private teachers and were supplementary
to the home instruction. About the middle of the
third century B.C. foreign influences began to
make themselves felt. The works of the Greeks were
translated into Latin, Greek teachers were introduced, and schools established in which the educational char-
acteristics of the Greeks reappeared. Under the di-
rection of the literatus and the grammaticus education
took on a literary character, while in the school of the
orator the art of oratory was carefully cultivated. The
importance which the Romans attached to eloquence is
clearly shown by Cicero in his "De Oratore" and by
Quintilian in his "Institutes"; to produce the orator
became eventually the chief end of education. Qui-
tilian's work, moreover, is the principal contribution
to educational theory that we owe to the Romans. The
enlightening process was a gradual one. The rigorous
Roman character yielded but slowly to the intellec-
tualism of the Greeks, and when the latter finally tri-
umphed, far-reaching changes had come about in
the family, the spirit of selflessness which in turn broke out in discord, thus opening the
way for the conquest of Greece by Roman arms.

The Romans.—In striking contrast with the Greek
character, that of the Romans was practical, utili-
tarian, grave, austere. Their religion was serious,
and it permeated their whole life, hallowing all its
relations. The family, especially, was far more sacred
than in Sparta or Athens, and the position of woman
as wife and mother more exalted and influential.
Still, as with the Greeks, the power of the father over
the life of his child—patria potestas—was absolute, and
in the earlier period at least, the exposure of children
was a common practice. In fact the Laws of the
Twelve Tables provided for the immediate destruction of
deformed offspring and gave the father, during the
whole life of his children, the right to imprison, sell,
or slay them. Subsequently, however, a check was
placed on such practices. The ideal at which the
Roman aimed was neither harmony nor happiness,
but the performance of duty and the maintenance of
his rights. Yet this ideal was to be realized through
some means. Deep within the family feeling, it was always subordinate to devotion to the public
weal. "Parents are dear," said Cicero, "and children
and kindred, but all loves are bound up in the love of
our common country" (De Offic. i, 17). Education
therefore was essentially a preparation for civic duty.
"The child in the Roman home learns to love the
only school, and the parents the only teachers. Of scien-
tific and aesthetic training there was little or none.
To learn the Laws of the Twelve Tables, to become
familiar with the lives of the men who had made Rome
great, and to copy the virtues which he saw in his
father were the chief endeavour of the boy and youth.
Thus the moral element predominated, and virtues of
a practical sort were inculcated: first of all pietas, obedi-
ence to parents and to the gods; then prudence, fair
dealing, courage, reverence, firmness, and earnestness.
These qualities were to be developed by a certain
philosophical reasoning, and the discipline of
evils which sprang from an exaggerated individualism.
Once the idea was accepted that each man is his own
standard of conduct, neither brilliancy of literary pro-
duction nor fineness of philosophic speculation could
prevent the decay of patriotism, and of a virtue which
had never looked higher than the State for its sanction.
Aristotle himself, at the close of his "Ethics," points
out the radical difficulty: "Now if arguments and
to be able by themselves to make people good, they would, in the words of Thucydides, be enti-
tled to receive high and great rewards, and it is with
theories that we should have to provide ourselves.
But the truth apparently is that, though they are
strong enough to encourage and stimulate young men
of liberal minds, though they are able to inspire with
goodness a character that is naturally noble and sin-
cerely loves the beautiful, they are incapable of con-
verting the mass of men to goodness and beauty of
character." No such "conversion" was aimed at by
the Sophists. Appealing to the natural tendencies of
the human mind, they developed self-interests, which in turn broke out in discord, thus opening the
way for the conquest of Greece by Roman arms.
sungs the minutest details of life and of religious practice. Throughout the Old Testament, God appears as the teacher of His chosen people. He sets before them the knowledge which He has in store, rather than himself: "You shall be holy, because I am holy" (Lev., xi, 46). Through Moses and the Prophets He gives them His Commandments and the promise of a Messiah to come. But He also placed upon them the duty of instructing their children: "Hear, O Israel, the Lord our God is one Lord. Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy might. And these words which I command thee this day, shalt thou commit them unto thy children, and shalt teach them..." (Deut., vi, 4–7). In accordance with this injunction, education, at least in the earlier period, was given chiefly in the home. Jewish family life, indeed, far surpassed that of the Gentiles in the purity of its relations, in the position it secured to woman, and in the care which it bestowed on children, who were regarded as a blessing vouchsafed by God and destined for His service by fidelity to the Divine law. An important function of the synagogue was also the instruction of youth, which was committed to the rabbis and the doctors. Schools, as such, came into existence only in the later period, and even then the teaching was permeated by religion. Though the Old Testament contains no theory of education in the stricter sense, it abounds in maxims and principles upon which are all the more weighty because they are inspired by Divine wisdom and because they have a practical bearing upon life. God Himself showed the dignity of the teacher's office when He declared: "They that are learned shall shine as the brightness of the firmament and the stars for ever." (Dan., iii, 3). In the light, however, of a more perfect revelation, it is clear that God's dealings with Israel had an ultimate purpose which was to be realised, "in the fullness of time": Not only the utterances of the Prophets, but many signal events in the history of the Jews and many of their ritual observances were types of the Messiah; as St. Paul says, "All these things happened to them in figure." (1 Cor. xi, 11), and "The law was our pedagogue in Christ." (Gal. iii, 24). As the Supreme Schoolmaster of Mankind, God imparted to them the truth which they presently needed, also prepared the way for the greater truths of the Gospel.

Christian Education. — As in many other respects, so for the work of education, the advent of Christianity was a realisation of a long-cherished aspiration. The Christian Church, both in East and West, had its schools; the education imparted in them had no parallel in the systems of the heathen world. Not only does the Christian conception of life differ radically from the pagan view, not only does the Christian teaching impart a new sort of knowledge and lay down a new principle of action, but Christianity, moreover, that gives the effective means of making its ideals actual and of carrying its precepts into practice. Through all vicissitudes of conflict and adjustment, of changing civilisations and varying opinions, in spite even of the shortcomings of its own adherents, Christianity has steadfastly upheld before men the life and the teachings of its Divine Founder.

Jesus Christ as Teacher. — "God, who, at sundry times and in divers manners, spoke in times past to the fathers by the prophets, last of all, in these days hath spoken to us by His Son" (Heb., i, 1–2). This command is as important or by God. It reveals and true way of living: "The grace of God our Saviour hath appeared to all men; instructing us, that, denying ungodliness and worldly lusts, we should live soberly, and justly, and godly in this world, looking for the blessed hope and coming of the great God and our Saviour Jesus Christ. For this which concerneth me is to prove unto men acceptable, and willing to be received. Therefore I will not be negligent to put you always in remembrance of these things, though ye know, and be established in them. For the establishment and comfort of their faith, the Mission Christ declared: "I am come a light into the world; that whosoever believeth in me, may not remain in darkness" (John, xii, 46); and again, "For this was I born, and for this came I into the world; that I should give testimony to the truth" (John, xviii, 37). The knowledge which He came to impart was not an intellectual possession or theory: "I am come that they may have life, and may have it more abundantly" (John, x, 10). He taught, therefore, as one having authority; He insisted that His hearers should believe the truths which He taught, even though they might seem to be "hard sayings." His doctrines, indeed, made no appeal either to pride of intellect or to selfishness or to passion. For the most part, as in the Sermon on the Mount, they were diametrically opposed to the maxims that had obtained in the pagan world. They were the highest and the greatest, not only in proposing eternal life as the ultimate goal of man's existence and action, but also in enjoining the denial of self as the chief requisite for attaining that destiny. Service to the neighbour was insisted upon, but this was to be rendered in the spirit of love, the new commandment which Christ gave (John, xiii, 34). Faithfulness also to civic duty was required, but the sanction which imparted force to such obligations was man's elevation to a higher citizenship in the Kingdom of God. To strike deeper than the earthly life, so far as possible, was the ideal to which every other good was subordinate; "Seek ye first the kingdom of God, and his justice, and all these things shall be added unto you" (Matt., vi, 33).

Truths of this kind, so far removed from the natural tendencies of human thought and desire, could be imparted only by one who embodied in himself all the qualifications of a perfect teacher. The philosophers no doubt might, and did, formulate beautiful theories regarding knowledge and virtue; but Christ alone could say to His disciples, "I am the way, the truth, and the life" (John, xiv, 6). And whatever worth they attained in theory to personality was of far less significance than the actual realization of the highest ideal in Christ's own Person. He could thus rightfully appeal to that imitative tendency which is so deeply rooted in man's nature and from which so much is expected in modern education. The axioms, also, that we learn by doing, and that knowledge gets its full value only when it issues in action, finds its best exemplification in Christ's dealings with His disciples. He "begun to do and to teach" (Acts, i, 1). In His words He gave evidence of His power over all nature and therefore of His authority to require faith in His words: "The works themselves which I do give testimony of me, that the Father hath sent me" (John, v, 30). To His disciples, when they hesitated or were slow to understand, He answered, "He that believeth and is baptized shall be saved; but he that believeth and is not baptized shall be condemned" (Mark, xvi, 16). When Stephen was stoned, "Otherwise believe for the very works sake" (xiv, 12). What He demanded in turn was no mere outward profession of faith or loyalty: "Not every one that saith to me, Lord, Lord, shall enter into the kingdom of heaven; but he that doth the will of my Father" (Matt., vii, 21).

The necessity of manifesting belief through action is constantly pointed out both in the literal teaching of Christ and in His parables. These, again, illustrate His practical wisdom as a teacher. They were drawn from objects and circumstances with which His hearers were familiar. In each instance they were adapted to the manner of thinking suggested by the local surroundings and the customs of the people; and they were often called forth by an incident that seemed unimportant, which was made now by His followers and again by His tireless enemies. Thus the simplest things of nature—the vine, the fig-tree, the birds of the air, and the grass of the field—were made to yield lessons of the deepest moral significance. His aim was not to adorn His own discourse, but rather to bring into clearer view the now by His hearers more vividly, and to secure for it greater permanence by associating in their thought some supernat-
ural truth with the facts of daily experience. Sensory perception, memory, and imagination were thus developed to form a mental setting for the great truths of the Kingdom. The same principle found its application in the institution of the Sacraments which are the spiritual elements that are outward signs of inward grace. As St. John Chrysostom aptly says, "Wert thou incorporeal, He would have bestowed on thee incorporeal gifts in their bare reality; but because the soul is bound up with the body, He gives thee intelligible things under sensible forms" (Homil. lx, ad populum Antioch.). In fact the whole teaching of Christ is the clearest proof of the principle that education must adapt itself in method and practice to the nature of those who are to be taught. In accordance with this principle He prepared the minds of His followers beforehand for the institution of the Holy Eucharist, for His own death, and for the coming of the Holy Ghost (John, vi, xiv, xv); and He even reserved certain truths to be made known by the Paraclete: "I have yet many things to say to you; but you cannot bear them now. But when he, the Spirit of truth, is come, he will teach you all truth" (xvi, 12, 13). Thus the completion of His work as a teacher is left not to human conjecture or speculation, nor to the theories of philosophers, but to the teaching of the Holy Ghost that He Himself shall send in His name (John, xvi, 14). This course was best realized by those who were nearest to Him; yet even those of the Jews who were not among the Apostles, but were, like Nicodemus, disposed to judge fairly, confessed His superiority: "We know that thou art come a teacher from God; for no man can do these signs which thou dost, unless God be with him" (John, iii, 2).

The Aim of Christian Education.—Had Christ's mission ended when He quitted the earth, He would still have been in word and work the ideal teacher, and would have influenced for all time the education of mankind so far as its ultimate aims and basic principles are concerned. But as a matter of fact, He made ample provision for the perpetuation of His work by training a select body of men who for three years were constantly under His direction and were thoroughly imbued with His spirit. To these Apostles, moreover, He gave the command: "Going therefore, teach ye all nations . . . . and behold I am with you all days, even to the consummation of the world" (Matt., xxviii, 19, 20). These words are the charter of the Christian Church, setting forth that its direct aim was not the imparting directly to the doctrine of salvation, and therefore to the imparting of religious truth, they nevertheless, or rather by the very nature of that truth and its consequences for life, carry with them the obligation of insisting on certain principles and maintaining certain characteristics which have a decisive bearing on all educational problems.

1. The truth of Christianity is to be made known to all men. It is not confined to any one race or nation or class, nor is it to be the exclusive possession of highly educated minds. This characteristic of universality is in plain contrast with the highest conceptions of the pagan world. The cultured Greek had only contempt for the barbarian, and the Roman looked upon outside nations as subjects to be governed rather than as people to be taught. But at Athens also and at Rome there was the distinction between free citizens and slaves, in consequence of which the latter were excluded from the benefits of education. As against these narrow limitations Christ charged His Apostles to "teach all men"; and St. Paul, in the same spirit, declared that "the grace of God was given unto every man separately". While the value of education is thus enhanced, the sense of responsibility is correspondingly increased; so that the freer development of the person is not allowed to culminate in selfishness nor in that extreme individualism which is a threat to social organization.

2. The commission given to the Apostles was not to expire with them; it was to remain in force "all days, even to the consummation of the world". Perpetuity, therefore, is an essential feature in the educational work of the Church. When the Church had indeed flourished and advanced from phase to phase of development, but they did not contain the element of enduring vitality. In the higher departments of learning, as in philosophy, school had followed school into vapour and into decay. And in education itself, one ideal after another had been put forward only to be displaced. Christianity, on the contrary, while it could never become a rigid system, held up to mankind certain unchangeable truths which should serve as criteria for determining the value of every fundamental theory of life and of education. By insisting, especially, that man's destiny was to be attained, not in any form of temporal service or success, but in union with God, it proposed an ideal which should be valid for all time and amid all the variations of human thought and endeavour. That such changes would inevitably come to pass, Christ, without doubt, foresaw. In view of these, a merely human teacher would have provided for the stability of his work by devices which, if successful, would have attested his greatness; but God has gone to the root of human nature. But Christ's guarantee to the Apostles is at once simpler and surer: "Behold I am with you all days". The task of instructing the world in Christian truth would have been impossible but for this permanent abiding of Christ with His appointed teachers. On the other hand, once the force of His promise is realized, the significance of Christianity as a perpetual institution becomes evident: it means that Christ Himself through a visible agency was to continue for all time the work He began during His earthly life as the Teacher of the human race.

3. It has already been pointed out that some of the pagan peoples, and notably the Greeks, had attained a very high conception of personality; and it has also been shown that this conception was by no means perfect. The teaching of Christianity in this respect is so far superior to any other that if a single element could be designated as fundamental in Christian education it would be the emphasis which it lays on the worth of the individual. In the first place, Christianity had its origin, not in any abstract speculation as to the value of the individual, or idealism as to the nature of the Person who was absolutely perfect. It was not, then, obliged to cast about for the ideal man, or to present a theory as to what that ideal might possibly be: it could and it did point to a realization which far surpassed the most exalted ideal of human wisdom. In Christ first appeared the full dignity of human nature through its elevation to personal union with the Word of God; and in Him, as never before or since, were manifested those traits which furnish the noblest models for imitation.

4. Christianity, furthermore, elevated human personality by the value it set upon each human soul as created by God and destined for eternal life. The State is no longer the supreme arbiter, nor is service to the public weal the ultimate standard. These, it is true, within their legitimate sphere have just claims upon the individual. Christianity by no means teaches that such claims can be disregarded or the corresponding duties neglected, but rather that the discharge of all social and civic obligations will be more thorough when subordinated to, and inspired by, fidelity in the relationship of human beings to the Divine. In Christianity the value of personality is thus enhanced, the sense of responsibility is correspondingly increased; so that the freer development of the person is not allowed to culminate in selfishness nor in that extreme individualism which is a threat to social organization.
thought and practice of paganism. The position of woman was lifted at once to a higher plane; she ceased to be a chattel, or a mere instrument of passion, and became the equal of man, with the same personal worth and the same eternal destiny. Marriage was no longer a union entered into through caprice or convention, but an indissoluble bond involving mutual duties and obligations to the governing of the family and of the dignity of a sacrament, which not only sanctified the marital relation and its purposes, but also conferred the graces needful for the due fulfillment of its obligations. The whole meaning of the family was thus transformed. Parenthood was indeed maintained, but such an exercise of the patri potestas as the destruction or the exposure of children could not have been tolerated once it was realized that the child’s personality also is sacred, and that parents are responsible not simply to the State, but also to God, for the proper education of their offspring. Christianity, moreover, laid upon the child the duty of respecting and obeying his parents, not out of servile fear or hard necessity, but through a spirit of reverence and filial love. The ties of home-life were thereby strengthened. The whole work of education took on a new character because it was consecrated in its very source by religion.

5. In respect of its content Christianity opened up to the human mind wide realms of truth which unclossen reason could not possibly have attained, and was richer in moral teaching than any other form of philosophy than the most learned speculations of pagan thought. Upon those truths, also, which the philosophers had but vaguely discerned, or about which they had remained in doubt, it shed a new light. There could be no further questioning, for the Christian, as to the existence of a personal God, the reality of His providence, the immortality of the soul, the freedom of the will, and the resulting accountability of man to Divine Justice. Above all, the nature of the moral order was set forth in unmistakable terms. Christianity insisted that morality was not mere outward conformity to custom or law, but the inner rectitude of the will, that aesthetic refinement was of far less consequence than purity of heart, and that love of the neighbour as proven in deeds, not personal gain or advantage, was the true norm of human relationships. That such a conception of life, with its emphasis on really spiritual aims, must lead to the formation of educational ideals unknown to the pagan world, is obvious. But on the other hand it would be wrong to infer that Christianity, in its “otherworldliness”, reduces or neglects the values of the secular, the outward form of what matters is, that life here gets its highest value by serving as a preparation for the life to come. The question is not whether one should live now without any regard to the future or look forward to the future with no concern for the present; but rather how one should profit by the opportunities of this life in such wise as to secure the other. The problem, then, is one of establishing proportions, i.e. of determining values according to the standard of man’s eternal destiny. When education is defined as “preparation for complete living” (Herbert Spencer), the Christian can take no objection to the words as they stand; but he will insist that nothing can be “complete” which leaves out of consideration the ultimate purpose of life, and hence that no education really “prepares” which thwarts that purpose or sets it aside. It is just this completeness in teaching all men, in harrowing all truths, in elevating all relationships, and in leading the individual soul back to the Creator—that forms the essential characteristic of Christianity as an educational influence.

The Educational Work of the Church.—Next in importance to Christ’s personal teaching was the establishment of a teaching body whose mission was identical with His own: “As the Father hath sent me, I also send you” (John, xx, 21); and “He that heareth you, heareth me” (Luke, x, 16). He was not content with proclaiming once for all the truth of the Gospel, nor did He leave its wider dissemination to individual enthusiasm or initiative; He founded a Church to carry on His work. The spread of His doctrine was entrusted, not to books, nor to schools of philosophy, but to the governing of the world by the organization that spoke in His name and with His authority. No other body of teachers ever undertook so vast a work, and no other ever accomplished so much for education in the highest sense. Apart from the spreading of the Christian faith, the earliest form of Christian instruction was that given to the catechumens (q. v.) in preparation for baptism. Its object was twofold: to impart a knowledge of Christian truth, and to train the candidate in the practice of religion. It was conducted by the bishop and, as the number of catechumens increased, by priests, deacons, and other clerics. Until the third century this mode of instruction was an important adjunct to the Apostolate; but in the fifth and sixth centuries it was gradually replaced by private instruction of the converts, who were often numerous and included the whole “catechetical” schools to those who had been baptized in infancy. The catechumenal schools, however, gave expression to the spirit which was to animate all subsequent Christian education: they were open to every one who accepted the Faith, and they united religious instruction with the ordinary educational work of the day. The “catechetical” schools, also under the bishop’s supervision, prepared young clerics for the priesthood. The courses of study included philosophy and theology, and naturally took on an apologetic character in defense of Christian truth against the attacks of pagan learning. One of the oldest of these schools was at the Lateran in Rome; the most famous was that of Alexandria (see Doctrine, Christian).

In addition to this formal instruction, the Church from the beginning carried on through her worship an educational work embodying the deepest and soundest psychological principles. The ritual at first was of necessity simple; but as the Church was allowed a larger freedom, and her worship passed from the catacomb to the basilica, staterel forms were introduced; yet their essential purpose was the same. The Mass, which has always been the central liturgical function, appeals to the mind through the medium of sense. It combines light and colour and sound, the action of the priest, and the dramatic movement that fills the sanctuary, especially in the more solemn service. Beneath the mass outward forms, the inward meaning remains, in every detail, full of a symbolism that brings vividly to mind the life and personality of Christ, the work of redemption, and the enduring sacrifice of the Cross. In due proportion, each item of the liturgy conveys a lesson through eye and ear to the highest faculties of the soul. Sense, memory, imagination, and feeling are thus aroused, not simply as aesthetic activities, but as a support of intellect and will which thereupon issue in adoration and thanksgiving for the “mystery of faith”. On the other hand, the liturgy has always included in its purpose the participation of the faithful, and hence it prescribes the response of the people to the prayers at the altar, the chanting of certain portions of the service, bodily postures and movements in keeping with the various phases of the sacred rite. The faithful are not merely bystanders or onlookers; they are not to maintain a passive, receptive attitude, but rather to give active expression to the religious thought and feeling aroused in them. This is especially evident in the sacramental system. While each of the sacraments is to be perceived as a sign and a source of grace to be received; and the reception involves in each case a series of actions which manifest the faith and disposition of the recipient. Moreover, each sacrament is
adapted to some particular need, and the whole system of sacraments, from baptism to extreme unction, builds up the spiritual life by processes of cleansing, strengthening, consoling, and healing, which parallel the stages and requirements of organic growth.

In a larger way, also, the liturgical year, as it commemorates the principal events in the life of Christ, brings into Christian worship a variety which affects to some extent both the details of the liturgy itself and the religious feelings which it inspires—from the joy of Christmas to the triumph of Easter and Pentecost. For the due observance of the greater festivals the Church provides, as in Advent and Lent, by seasons of preparation. The Old Law with its types foreshadowed the New. Christ himself prepared His disciples beforehand for the mystery of the Eucharist, for His death, and for the coming of the Holy Ghost. The Church, following the same practice, arouses in the mind of the faithful those thoughts and feelings which form an apperceptive preparation for the central mysteries of faith and their proper observance at appointed times. Along with these greater solemnities come year by year the commemorations of the Christian heroes, the men and women who have walked in the footsteps of Christ, marked for the mission of His kingdom, working for their blood for His sake. These are held up as models to be imitated, as realizations more or less perfect of the sublime ideal which is Christ Himself. And among the saints the foremost place is given to Mary the Mother of God, the ideal of the Christian womanhood, to whom the Son of God was "subject" in the home at Nazareth. Each festival in her honour is at once an exhortation to copy her virtues and an evidence of the high station to which woman was raised by Christianity. The liturgy, then, is an application on a large scale of those principles which underlie all real teaching—appeal to the senses, association, apprehension, expression, and imitation. The Church did not begin by theorizing about these, nor did she wait for a psychological analysis to determine their value. Instructed by her Founder, she simply incorporated in her liturgy those elements which were best fitted to teach men the truth and lead them to act in conformity with the Gospel. It is none the less significant that modern education is adopting for its own purposes, I. e., the teaching of secular subjects, the psychological principles which the Church from the beginning has put into practice.

While the Church, in her interior life and in the execution of her mission, gave proof of her vitality and of her ability to teach mankind, she necessarily came into conflict with the pagans and the Christianized pagans who were the legacy of paganism. In point of religious belief there was, of course, a clean break between the polytheism of Athens and Rome and the doctrines of Christianity. But philosophy and literature were factors which had to be counted with as well as the educational system, which was still largely under pagan control. Schools had been opened by converts who were imbued with the ideas of Greek philosophy—by Justin at Rome, and Aristides at Athens; while, at Alexandria, Clement and Origen enjoyed the highest repute. These men regarded philosophy as a means of guiding reason to faith, and of defending that faith against the attacks of paganism. Others again, like Tertullian, condemned philosophy outright as something with which the Christian could have nothing to do. In regard to the pagan classics the conflict of opinion was even sharper. Some of the greatest theologians and Fathers, like St. Basil, St. Gregory Nazianzen, and St. Gregory of Nyssa, had studied the classics under pagan masters and were therefore in favour of young Christian youths being sent to non-Christian schools on the ground that literary studies would enable them the better to defend their religion. At the same time these Fathers would not permit a Christian to teach in such schools lest he should be obliged to take part in idolatrous practices. Tertullian (de Idololatria, c. x) insists on the same distinction: the teacher, he says, should agree in doctrine, which parallel the stages and requirements of organic growth.

Meanwhile the work of education was not neglected. In the Empire gave way very before barbarian invasion, the Church found a new field of activity among the vigorous races of the North. To these she brought not only Christianity and civilization, but also the best elements of classical culture. Through her missionaries she became the teacher of Germany and France, of England and Ireland. The task was a difficult one, and its accomplishment was marked by many vicissitudes of temporary failure and hard-won success. At times, indeed, it would seem that the desire for learning had quite disappeared even among those for whom the acquisition of knowledge was an obligation. Yet these drawbacks only served to stimulate the zeal of ecclesiastical and civil rulers in behalf of a more thorough and systematic education. Thus the salient feature of the Middle Ages is the co-operation of Church and State for the development of schools. Schoolmasters and scholars were in the service of their Church, and the many examples of the abbacies in the Frankish Kingdom are illustrative examples of princes who joined their authority with that of bishops and councils to secure adequate instruction for clergy and people. Among churchmen it suffices to mention Chrodegang of Metz, Alcuin, St. Bede, Boethius, and Cassiodorus (see the several articles). As a result of their efforts, education was provided for the clergy in the cathedral schools under the direct supervision of the bishop and for the laity in parochial schools to which all had access. In the curriculum, religion held the first place; other subjects were few and elementary, comprising at best the trivium and quadrivium (see Arts, The Seven Liberal). But the significance of this education lies not so much in its content as in the fact that it was the means of arousing a love of learning among the peoples that had just emerged from barbarism, and of laying the foundations of Western culture and science. The history of education records no greater undertaking; for the task was not one of improving or perfecting, but of creating, and had not the Church gone vigorously about her work, modern civilization would have been regarded for centuries. (See Schools; Middle Ages.)

One of the chief factors in this progress was monas-
sicism (q.v.). The Benedictine monasteries especially were homes of study and depositories of the ancient learning. Not only sympathetic writers, like Montalembert, but those also who are more critical, acknowledge the service which the monks rendered to education. In its highest expression, that of the culture of a constant warfare, of perpetual lawlessness and the rule of might, monasticism offered the one opportunity for a life of repose, of contemplation, and of that leisure and relief from the ordinary vulgar but necessary duties of life essential to the student. . . . Thus it happened that in the last part of the Middle Ages the sole schools for teaching; they offered the only professional teaching; they were the only universities of research; they alone served as publishing houses for the multiplication of books; they were the only libraries for the preservation of learning; they produced the only scholars; they were the sole educational institutions of this period. (Paul Monroe, A Text-Book in the History of Education, New York, 1907, p. 255.) In addition to their prescribed studies, the monks were constantly occupied in copying the classic texts. While the Greek chronicler, in his discourse on the life of the Church, transformed Constantine and to the monasteries of the East, it is primarily to the monasteries of the West that we are indebted for the survival of the Latin classics (Sandys, A History of Classical Scholarship, 2nd ed. Cambridge: University Press, 1902). Philosophy and education were carried on in the monastery school and was intended primarily for the novices. In some cases, however, a schola exterior, or outer school, was added for lay students and for aspirants to the sacred priesthood. The course of study included, besides the several arts, the reading of Latin authors and the music of the Church. Finally, through their annals and chronicles, the monks provided a rich store of information concerning medieval life, which is invaluable to the historian of that period. The chief importance, however, of the monastic schools is found in the fact that they were conducted by an organized body of teachers who had withdrawn from the world and devoted their lives, under the guidance of religion, to literary pursuits and educational work. The same Christianity that had sanctified the family now gave to the profession of teaching a sacredness and a dignity which made teaching itself a noble vocation.

Two other movements form the climax of the Church's activity during the Middle Ages. The development of Scholasticism (q.v.) meant the revival of the study of grammar in the schools, and the study of Aristotle in the monasteries. But it also meant that philosophy was now to serve the cause of Christian truth. Men of faith and learning like Albertus Magnus and Thomas Aquinas, far from dreading or scorning the products of Greek thought, sought to make them the rational basis of belief. A synthesis was thus effected between the highest speculation of the pagan world and the teachings of theology. Scholasticism, moreover, was a distinct advance in the work of education; it was an intellectual training in method, in systematic thought, in severe logical reasoning, and in the methods of solving for truths as a whole, it furnished an important tool for thought; but the purport of which was that, for the keenest intellect, the findings of reason and the truths of Revelation could be harmonized. Having used the subtilities of Greek thought to sharpen the student's mind, the Church then placed upon him her dogmas without the least fear of contradiction. She thus united in a consistent whole whatever was best in pagan science and culture with the doctrine entrusted to her by Christ. From a human point of view the Church was under many disadvantages. The loss of the universities, the confiscation of monastic and other ecclesiastical property, and the opposition of various governments seemed to make her task hopeless. Yet these difficulties did not deter the Church from her mission, and her vitality. The Council of Trent gave the impulse by decreeing that a more thorough education of the clergy should be secured through the seminaries (q.v.) and by urging upon bishops and priests the duty of aiding the parochial schools. Similar measures were adopted by provincial and diocesan synods throughout Europe. Then came the religious orders founded for the express purpose of educating Catholic youth. (See especially Institute of the Brothers of the Christian Schools; Society of Jesus; Oratorians.) And to these finally must be added the numerous congregations of women who devoted their lives to the Christian training of girls. However different in organization and method, these institutions had for their common purpose the spread of religious truth along with secular knowledge among all classes. Thus all the then known branches of science were represented; the student body comprised all classes, laymen and clerics, seculars and religious; and the diploma conferred was an authorization to teach everywhere. The university was thus, in the educational sphere, the highest expression of a modern culture, and the principle that completely and all along characterized the teaching of the Church; and the spirit of inquiry which animated the medieval university remains, in spite of other modifications, the essential element in the university of modern times. The changes which have since taken place have for the most part resulted from separating the theories which in the Church had built into a harmonious unity. As Protestantism by rejecting the principle of authority brought about innumerable divisions in belief, so it led the way to the rupture between Church and State in the work of education. The Renaissance in its extreme forms ranked pagan culture above everything else; and the Reformation in its fundamental tenet went beyond the individualism which led to the decline of Greek education. Once the schools were secularized, they fell readily under influences which were foreign to the Church, and humanist philosophy detached from theology formulated new theories of life and its values, that moved, at first slowly then more rapidly, away from the positive teachings of Christianity. Science in turn cast off its allegiance to the Church and was abandoned for the new field of knowledge worth seeking. The most serious practical result was the separation of moral and religious from purely intellectual education—a result which was due in part to religious differences and political changes, but also in large part to erroneous views concerning the nature and need of moral training. Such views again are in general derived from the denial, explicit or implicit, of the supernatural order, and of its meaning for human life in its relations to God; so that, during three centuries past, the main endeavour outside the Catholic Church has been to establish education on a purely naturalistic basis, whether this be aesthetic culture or scientific knowledge, individual perfection or social service. In its earlier stages Protestantism, which laid so much stress on faith, could not consistently have sanctioned an education from which religious ideals were eliminated. But according as its principles worked out to their legitimate consequences, it became less and less capable of opposing the naturalistic movement. The Catholic Church has thus been obliged to carry on, with little or no aid from the State, the only true Catholic educational enterprise in behalf of those truths on which Christianity is founded; and her educational work during the modern period may be described in general terms as the steadfast maintenance of the union between the natural and the supernatural.

From a human point of view the Church was under many disadvantages. The loss of the universities, the confiscation of monastic and other ecclesiastical property, and the opposition of various governments seemed to make her task hopeless. Yet these difficulties did not deter the Church from her mission, and her vitality. The Council of Trent gave the impulse by decreeing that a more thorough education of the clergy should be secured through the seminaries (q.v.) and by urging upon bishops and priests the duty of aiding the parochial schools. Similar measures were adopted by provincial and diocesan synods throughout Europe. Then came the religious orders founded for the express purpose of educating Catholic youth. (See especially Institute of the Brothers of the Christian Schools; Society of Jesus; Oratorians.) And to these finally must be added the numerous congregations of women who devoted their lives to the Christian training of girls. However different in organization and method, these institutions had for their common purpose the spread of religious truth along with secular knowledge among all classes. Thus...
there arose, by force of circumstances, a distinctly Catholic system of education, including parish schools, academies, colleges, and a certain number of universities which had remained under the control of the Church or were founded anew by the Holy See. It is especially the parochial school that has served in recent times as an essential factor in the work of religious education. In some countries, e.g., Canada, it has received support from the Government; in others, as in the United States, it is maintained by voluntary contributions. As Catholics have also to pay their share of taxes for the public school system, which is under a double burden; but this very hardship has only served to place in clearer light their practical loyalty to the principles on which Catholic education is based. In fact, the whole parochial school movement during the nineteenth century forms one of the most remarkable chapters in the history of education. It proves on one side that neither loss of the State's co-operation nor lack of material resources can weaken the determination of the Church to carry on her educational work; and on the other side it shows what faith and devotion on the part of parents, clergy, and teachers can accomplish where the interests of religion are at stake. (See Schools.) As this attitude and this action of Catholics place them in a position which is not always rightly understood, it may be useful to present here a statement of the principles on which the Church has based her course in the past, and to which she adheres unwaveringly at the present time when the problems of education are the subject of so much discussion and the cause of agitation in various directions. The Catholic position may be outlined as follows:—

1. Intellectual education must not be separated from moral and religious education. To impart knowledge or to develop mental efficiency without building up moral character is not only contrary to psychological law, which requires that all the faculties should be trained, but is also fatal both to the individual and to society. No amount of intellectual attainment or culture can serve as a substitute for virtue; on the contrary, the more thorough intellectual education becomes, the greater is the need for sound moral training.

2. Religion should be an essential part of education; it should form not merely an adjunct to instruction in other subjects, but the centre about which these are grouped and the spirit by which they are permeated. The study of nature without any reference to God, or of human actions with no mention of Jesus Christ, the king of Israel, and the human legislation without Divine law is at best a one-sided education. The fact that religious truth finds no place in the curriculum is, of itself, and apart from any open negation of that truth, sufficient to warp the pupil's mind in such a way and to such an extent that he will feel little concern in his school-days or later for religion in any form; and this result is the more likely to ensue when the curriculum is made to include everything that is worth knowing except the one subject which is of chief importance.

3. Instruction in literature or any other kind is impossible apart from religious education. The child may be drilled in certain desirable habits, such as neatness, courtesy, and punctuality; he may be imbued with a spirit of honour, industry, and truthfulness—and none of this should be neglected; but if these duties towards self and neighbour are sacred, the duty towards God is immeasurably more sacred. When it is faithfully performed, it includes and raises to a higher plane the discharge of every other obligation. Training in religion, moreover, furnishes the best motives for conduct and the noblest ideals for imitation, while it sets before the mind an adequate sanction in the holiness and justice of God. Religious education, it should be noted, is more than instruction in the dogmas of faith or the precepts of the Divine law: it is essentially a practical training in the exercises of religion, such as prayer, attendance at Divine worship, and reception of the sacraments. By these means conscience is purified, the will to do right is strengthened, and the mind is fortified to resist those temptations which, especially in the period of adolescence, threaten the gravest danger to the moral development of the youth. (See Education.)

4. An education which unites the intellectual, moral, and religious elements is the best safeguard for the home, since it places on a secure basis the various relations which the family implies. It also ensures the performance of social duties by inculcating a spirit of self-sacrifice, of obedience to law, and of Christian love for the fellow-man. The most effectual preparation for citizenship is that in schooling in virtue which habituates a man to decide, to act, to oppose a movement or to further it, not with a view to personal gain nor simply in deference to public opinion, but in accordance with the standards of right that are fixed by the law of God. The welfare of the State, therefore, demands that the child be trained in the practice of virtue and religion no less than in the pursuit of knowledge.

5. Far from lessening the need of moral and religious training, the advance in educational methods rather emphasizes that need. Many of the so-called improvements in teaching are of passing importance, and some are at variance with the laws of the mind. Upon the foundations of this Church has based her course in the past, and to which she adheres unwaveringly at the present time when the problems of education are the subject of so much discussion and the cause of agitation in various directions. The Catholic position may be outlined as follows:—

6. Catholic parents are bound in conscience to provide for the education of their children, either at home or in schools of the right sort. As the bodily life of the child must be cared for, so, for still graver reasons, must the mental and moral faculties be developed. Parents, therefore, cannot take an attitude of indifference toward this essential duty nor transfer it wholly to others. They are responsible for those earliest impressions which the child receives passively, before he exercises any conscious selective imitation; and as the intellectual powers develop, the parents' example is the lesson that sinks most deeply into the child's mind. They are also obliged to instruct the child, according to his capacity, in the truths of religion and in the practice of religious duties, thus co-operating with the work of the Church and the school. The modern virtues, including that of obedience, of self-control, of purity, can nowhere be inculcated so thoroughly as in the home; and without such moral education by the parents, the task of forming upright men and women and worthy citizens is difficult, if not impossible.

That the need of moral and religious education has impressed the minds of non-Catholics also, is evident from the movement inaugurated in 1903 by the Religious Education Association in the United States, which meets annually and publishes its proceedings at Chicago. An international inquiry into the problem of moral training was started in London in 1906, and the report has been edited by Professor Sadler under the title, "Moral Instruction and Training in Schools" (London, 1908).

For the respective rights and duties of the Church and the civil authority, see Schools; State.

(London, 1881); Kreyer, Bibl. d. katholischen Pedagogik, a series of monographs, whose contribution to the training of the young for noble lives and the consecration of one's own life to the Church is of great service (London, 1885-—1893); Brosius, Idee d. d. Schule (London, 1873); Brothers Adonias, Essays Educational (Chicago, 1899); Willmann, Didaktik als Bibl. der Schulwesen (Chicago, 1896); Stepaniwski, Rites, Rules, and the Higher Life (Chicago, 1903); Ireland, Means and Ends of Education (Chicago, 1865); Ireland, Religious, Aestheticism and
Educational Association, The Catholic, a voluntary organization composed of Catholic educators and other persons who have an interest in the welfare of Catholic education in the United States of America. It includes several associations established to secure closer union and more active co-operation in special lines of work. The movement for unification began with an effort to establish a conference of seminary presidents and professors. A meeting called by the Right Rev. T. J. Conaty, Rector of the Catholic University of America, was held at St. Joseph's Seminary, New York, July 14, 1902, a meeting which was held in Philadelphia, September, 1899, but nothing further was done until April, 1904, when, at the instance of the Right Rev. D. J. O'Connell, representatives of several seminaries met and decided to revive the conference, and to hold a meeting at St. Louis in July, 1904. The first meeting of the Association of Catholic Colleges and Universities of the United States was called by the Right Rev. T. J. Conaty, and was held in Chicago in April, 1899. Annual meetings have been held since that time. The Parish School Conference was organized in 1895 by Bishop O'Connell, and it was then decided to meet at Philadelphia with the Association of Catholic Colleges and Universities in 1903. At the Philadelphia meeting the Parish School Conference passed a resolution empowering a committee on organization to confer with the standing committee of the Association of Catholic Colleges and to draw up a plan of union. These three conferences met in St. Louis 12-14 July, 1904; and a committee including representatives of each proposed a constitution to be tried for one year. The report of the committee was unanimously adopted at a joint meeting of the three and the Catholic Educational Association was formed 14 July, 1904, the Right Rev. D. J. O'Connell being unanimously elected President General of the Association. This Association held its second meeting in New York in 1905. At the fourth meeting the resolutions were the remarkable public demonstration in Carnegie Hall at the close. The third meeting was held in Cleveland, and the fourth at Milwaukee; both were notable for the increasing attendance and for the cordial approbation of the movement given by members of the hierarchy. At the meeting in Milwaukee, July, 1907, the constitution, which had been amended each year, was finally adopted, and the executive board was authorized to take steps to incorporate the association. The fifth annual meeting was held at Cincinnati in July, 1908. The membership at this meeting was 760 names at this convention; all sections of the country were represented, and a number of religious communities sent official delegates.

An idea of the general scope of these gatherings may be had from the subjects treated in the papers and the addresses delivered in all its divisions and the important contributions on "The Present Condition of Latin Studies in the Catholic Institutions of the United States"; "The Method of Teaching Religion"; "Necessity and Means of Promoting Vocations to Teaching Orders"; "School of Life under the Dominating Influence of Catholic Education"; "In the study of social questions and problems in the seminary, the present state of education and the curriculum. At the public meeting the topics were "Religious Instruction, the Basis of Morality", "The Catholic School and Social Morality", and "The Necessity of an Elementary Instruction for the Proper Performance of Civic Duties".

The convention was the largest and most representative gathering of Catholic educators that had up to that date been held in the country. The usefulness of these meetings is now generally recognized. They give an understanding of the strength and weakness of the Catholic educational position that can be obtained in no other way. A great deal of earnest and serious work is done at them; they foster a spirit of unity and co-operation in all departments of educational work; and they inspire the Catholic educator with the greatest devotion to their calling. The whole system of Catholic educational activity has been strengthened, unified and developed by the annual conventions of the association, and more especially was this the result of the meeting in Cincinnati.
