arrived the first party of Oblates destined for the same mission, chief among whom was the famous Father Casimir Chiourou, the Apostle of Tulalip (d. 1891). In 1854 they joined with other tribes of that region in the treaty of Medicine Creek, by which they gave up their reserved lands as a condition for the reservation assigned them. In the next year they joined the Nezqually and others in the general outbreak of the Washington tribes, known as the Yakima War, which was not finally brought to an end until 1858, when the work of civilisation and Christianisation was again taken up; but it has been sadly checked by the moralization consequent upon the removal of reservation restrictions under the recent Individual Allotment Act. Upon this point both official and mission authorities agree. With whiskey and pauperisation by white swindlers the end seems not far off. More than half of the tribe are classed as Catholic, and besides the Government reservation school, the St. George mission school, established in 1888, and in charge of a secular priest assisted by six Franciscan sisters and a lay teacher, has an attendance of sixty pupils, in addition to the several forms of moral capital of our race. As an artist he did much to maintain religion among men. After the death of Meissonier (1894), Puvia was elected by acclamation to the presidency of the National Society of French Artists, which was a great tribute to the moral dignity and the rectitude of his character and his life increased the respect paid to the artist and the thinker. He married the Princess Marie Cantacuzene whom he had met in Chassériau's studio. He survived her by only a few months. His last work was a lovely "Watch of St. Genevieve," reproduced her features and consecrates the memory of that charming companion. It is perhaps this sorrow mingled with an immortal hope which imparts to this supreme work a haunting poetry and unforgettable beauty. Puy. See LE PUY, Diocese of.

Puyallup Indians, an important tribe of Salishan linguistic stock, formerly holding the territory along the river of the same name entering near the head of Puget Sound, and now occupying an allotted reservation, together with several kindred tribes, in the neighbourhood of Tacoma, Pierce County. Their near neighbours, the Nezqually, speak a dialect of the same language. The name is said to mean "shadow," referring to the dense forest shades, and to have been applied originally to the country about the mouth of the stream. The tribes of the Puget Sound region made acquaintance with Catholic priests and laymen as far back as the advent of the Spanish explorers in 1774-95. One of the accompanying companions, a cross, assumed the name of St. Andrew's. In 1792 Father Marquette, a Jesuit, followed. He visited the Puget Sound region in 1792-93, making headquarters at Fort Vancouver, from which point Father Demers in 1839-41 visited the tribes northward along Puget Sound, instructing and baptising many. In 1843 another secular, Father Joseph Lemaître, made tours of the Puget Sound and lower Vancouver Island. In 1847

PYRER

PYRER, JOHANN LUDWLSVON OBEBRERT (Felső-Eör), b. at Langh near Stuhlweissenburg, Hungary, 2 Nov., 1772; d. at Vienna, 2 Dec., 1847. He was descended from an old Hungarian noble family. His father was one of the eighteen brave hussars who distinguished themselves in the battles of Kumberghfer. Graduated from Stuhlweissenburg and Fuenfkirchen, he applied for a civil service position in Ofen, but was unsuccessful. In 1792 he entered the Cistercian chapter house at Lillienfeld, where he was ordained priest (1796). In quick succession he was steward, chancellor, prior, abbott, for a time, parish priest at Tütnitz, and brought the monastery to the greatest material and spiritual prosperity. He was appointed Bishop of Zips (1815), Patriarch of Aquileia and Primate of Dalmatia with his see in Venice (1820), and finally Archbishop of Erlau, earning the love and veneration of his diocesans. He founded health resorts in Karlsbad and Gastein for sick soldiers, a seminary for country school teachers at Erlau, and donated 10,000 florins toward the adornment of the cathedral at Erlau. His great collection of paintings forms the basis of the Hungarian National Museum. For these charitable gifts he was knighted by the emperor with the title of Felső-Eör.

Pyrrher wrote dramatic, epic, and lyric poetry. His first dramatic work, "Historische Schauspiele," appeared in 1810, and contained three five-act tragedies: "Die Corvinen," "Karl der Kleine, König von Ungarn," and "Zrinis Tod." It was not even considered worthy of discussion or criticism, and the various editions of his collected works do not contain the drama. The "Tunisia," an epic in twelve cantos, describing the conquest of Tunis by Charles V, appeared in 1820, and there have been frequent later editions. A sketch of a "Tunisia" with striking resemblances was found in the textbooks of the Jesuit Jacob Masen. It is possible that the Jesuit's text was eloquent ("Ipsius") was used as the model of Pyrrher's youth. Another epic, "Rudolphus," glorifies Rudolph of Hapsburg, and was printed in Vienna in 1824. Grillparzer dramatized the same material in his "Ottokar Glück und Ende," which has many similarities with the well-known poems of the Latin poet Avancini, S.J., probably read in the

PYRHONISM, a system of scepticism, the founder of which was Pyrrho, a Greek philosopher, about whom very little is known except that he died in 270 B.C. The best known of Pyrrho's disciples was Timon of Phlius, known as the sillographer. Pyrrho's scepticism was so complete and comprehensive that the word Pyrrhonian is sometimes used as a synonym for scepticism, or, rather, the scepticism of Pyrrho's school covered three points. (1) All the dogmatists, that is to say, all the philosophers who believed that truth and certitude can be attained, were mere sophists; they were self-deceived and deceivers of others. (2) That Pythagorean, not because of the possibility that our faculties deceive us, but also because, in themselves, things are neither one thing nor the other, neither good nor evil, beautiful nor ugly, large nor small. Or, rather, things are both good and evil, beautiful and ugly, large and small, so that there is no reason why we should affirm that they are one thing rather than the other. This conviction was expressed in the famous saying, oôs ous òllor, nothing is one thing than another; the paper is not more white than black, the piece of sugar is not more sweet than bitter, and so forth. (3) The reality of things being inaccessible to the human mind, and certitude being impossible of attainment, the wise man doubts about everything; that is, he recognizes the futility of inquiry into reality and abstains from judging. This abstention is called têôcôô. It is the foundation of happiness. Because he alone can attain happiness who cultivates imperturbability, apôpaçia; and then only is the mind proof against disquietude when we realize that every attempt to attain the truth is doomed to failure.

The system of the Pyrrhonists, as well as the other sceptics of that period, believed that there is no possibility of attaining happiness unless one first realizes that all systems of philosophy are equally true. The Pyrrhonist, as well as the other sceptics of that period, believed that there is no possibility of attaining happiness unless one first realizes that all systems of philosophy are equally true. This belief, that the Pyrrhonist, as well as the other sceptics of that period, believed that there is no possibility of attaining happiness unless one first realizes that all systems of philosophy are equally true. This belief, therefore, an abdication of all the supposed rights of the mind, and cannot be dealt with by the ordinary rules of logic or by the customary canons of philosophical criticism. 

Pythagoras and Pythagoreanism.—Pythagoras, the Greek philosopher and mathematician and founder of the Pythagorean school, flourished about 530 B.C. Very little is known about the life and personality of Pythagoras. There is an abundance of biographical material dating from the first centuries of the Christian era, from the age of neo-Pythagoreanism, but when we go back to the centuries nearer to Pythagoras's time, the information is very scanty. It seems to be certain that Pythagoras was born at Samos about the year 550 or 560 b.c., that he travelled to Magna Graecia in Southern Italy about the year 530, that he founded there a school of philosophy, and that he died at Metapontum in Sicily. The detailed accounts of how he invented the musical scale, performed miracles, pronounced prophecies, and did many other wonderful things, belong to legend, and seem to have no historical foundation. Similarly the story of his journey into Egypt, Asia Minor, and even to Babylon, is not attested by reliable historians. To the region of fable belongs also the description of the learned works which he wrote and which were long kept secret in his school. It is certain, however, that he founded a school of philosophical society, for which he drew up a rule of life. In this rule are said to have been regulations imposing secrecy, a protracted period of silence, celibacy, and various kinds of abstinence. The time-honoured tradition that he discovered the theory of numbers, for which various reasons, more or less ingenious, were assigned by ancient and medieval writers, has been upset by some recent writers, who understand the phrase, "Abstain from beans" (κατεκοπασ allure), to refer to a measure of practical prudence, and not to a gastronomic principle. Yellow, black and white, were, according to this interpretation, the means of voting in Magna Graecia, and "Abstain from beans" would, therefore, mean merely "Avoid politics"—a warning which, we know, was warranted by the difficulties in which it was involved. The history of the active share which it took during the founder's lifetime in the struggles of the popular with the aristocratic party in Southern Italy. The school was instructed by its founder to devote itself to the cultivation of philosophy, mathematics, music, and gymnastics, the aim of the organization being primarily ethical. The theoretical doctrines taught by the master were strictly adhered to, so much so that the Pythagoreans were known for their frequent citation of the Ipsa dixit of the founder. Naturally, as soon as the legends began to grow up around Pythagoras, many tenets were ascribed him which were in fact introduced by later Pythagoreans, such as Philolaus and Archytas of Tarentum. It seems to be certain that, besides prescribing the rules that were to govern the society, Pythagoras taught: (1) a doctrine of transmigration of souls which he probably borrowed from the Bacchic and Orphic mysteries, the whole spirit of the doctrine being religious and ethical, intended to show, by successive incarnations of the soul in the bodies of different animals a system by which certain vices and virtues were to be punished and rewarded after death; (2) in a general way, the doctrine that mathematics contains the key to all philosophical knowledge, a germ, so to speak, which was afterward to be developed into an elaborate number-theory by his followers; and (3) the notion that virtue is a harmony, and may be cultivated not only by contemplation and meditation but also by the practice of gymnastics and music. The subsequent elaboration of these three central doctrines and their application is the work of the followers of Pythagoras. The Pythagorean philosophy in its later elaboration is dominated by the number-theory. Being the first, apparently, to observe that natural phenomena, especially the phenomena of the astronomical world, may be expressed in mathematical formulas, the
Pythagoreans were carried on by the enthusiasm characteristic of discoverers to maintain that numbers are not only the symbols of reality, but the very substance of real things. They held, for example, that one is the point, two the line, three the surface, and four the solid. Seven they considered to be the fateful number because of funerals at seven, maturity begins at fourteen, marriage takes place in the twenty-first year, and seventy years is the span of life usually allotted to man. Ten is the perfect number, because it is the sum of one, two, three, and four—the point, the line, the surface, and the solid. Having, naturally, observed that all numbers may be ranged in parallel columns under "odd" and "even", they were led to attempt a similar arrangement of the qualities of things. Under odd they placed light, straight, good, right, masculine; under even, dark, crooked, evil, left, feminine. These opposites, they contended, are found everywhere in nature, and the union of them constitutes the harmony of the real world.

The account given by the Pythagoreans of the "harmony of the spheres" is the best illustration of their method. There are, they said, ten heavenly bodies, namely, the heaven of the fixed stars, the five planets, the sun, the moon, the earth, and the counter-earth, which is said to be because it is necessary to make up the number ten, the perfect number. It is a body under the earth, moving parallel with it, and, since it moves at the same rate of speed, it is invisible to us. The five planets, the sun, the moon, and the earth with its counter-earth, moving from west to east at rates of speed proportionate to the distance of each from the central fire, produce eight tones which give an octave, and, therefore, a harmony. We are not conscious of the harmony, either because it is too great to be perceivable by human ears, or because, like the blind smith who has grown accustomed to the noise of his hammer on the anvil, we have lived since our first conscious moments in the sound of the heavenly music and can no longer perceive it. In their psychology and their ethics the Pythagoreans used the idea of harmony and the notion of number as the explanation of the mind and its states, and also of virtue and its various kinds. It was not these particular doctrines of the school so much as the general notion which prevailed among the Pythagoreans of the importance of number, that influenced the subsequent course of speculation among the Greeks.

Unlike the Ionians, who were scientists and related philosophy to knowledge merely, the Pythagoreans were religiously and ethically inclined, and strove to bring philosophy into relation with life as well as with knowledge. Aristotelianism, which reduced philosophy to knowledge, never could compete, in the estimation of its advocates, with Christianity, as neo-Pythagoreanism did, by setting up the claim that in the teachings of its founder it had a "way of life" preferable to that taught by the Founder of Christianity.

William Turner.

Pyx. The word pyx (Lat., pyxis, which transliterates the Greek, pyxides, a box-wood receptacle, from ψῆφος, box-tree) was formerly applied in a wide and general sense to all vessels used to contain the Blessed Eucharist. In particular it was perhaps the commonest term applied to the cup in which the Blessed Sacrament actually rested when in the Most Holy Sacrament was reserved above the altar. Thus the Custumal of Cluny in the eleventh century speaks of the "deacon taking the golden pyx (auraeae pyxidem) out of the dove (columba) which hangs permanently above the altar". In later times however it has come about that the term pyx is limited in ordinary usage to that smaller vessel of gold, or silver, girt, in which the Eucharist is commonly carried to the sick. Such vessels are sometimes made flat like a watch, sometimes mounted upon a little stand like a miniature ciborium. From the resemblance in size and shape the word pyx is also used to denote the small silver vessel or custode in which the Sacred Host is commonly kept in the Tabernacle, that it may be transferred thence to the monstrance when the Blessed Sacrament is exposed for the service of Benediction. In the Middle Ages pyxes for carrying the Eucharist to the sick were not unfrequently made of ivory. In spite of synodal decrees it is to be feared that there were many churches both in medieval and later times which preserved no proper pyx for taking Viaticum to the sick. In these cases the custom seems to have prevailed, even if it was not officially tolerated, of carrying the Host wrapped in a corporal in a burse which was suspended round the priest's neck or even of placing it between the leaves of a breviary.

The "pyx-cover", or "pyx-cloth", of which we sometimes read in medieval inventories, was a veil which hung over the pyx as it was suspended above the altar, and it was consequently a cloth of considerable size. At the present day the pyx when carried secretely to the sick, as is the case in most Protestant and many Catholic countries, is generally carried in a burse or pyx-bag, i.e. a silk bag suspended round the priest's neck within which the pyx is wrapped in a diminutive corporal used for that purpose.

Quality (Gr. ὑπόσχωμα—Plato, Aristotle—modo; Lat. qualitas; quale) is used, 1st, in an extended sense, as whatever can be attributed to the subject of discourse; and 2nd, in its exact signification, as that category which is distinguished from the nine others enumerated by Aristotle. In the present article the word is treated in its stricter sense. The eighth chapter of the "Categories" treats of quality, as distinct from substance and the other predicaments. It is described, however, in the opening words of the sixth chapter of the same book as that on account of which we say that anything...\(\frac{1}{d} \lambda εν, \epsilon \eta \mu \nu \nu \tau ς \tau \iota \nu \iota [sino] \lambda \gamma ρυγη.\) It is thus the accidental form which determines the subject to a special mode of being. It is the reply to the question Quaests sit rea, as St. Thomas Aquinas remarks; and from its correlatives it is distinguished. Its definition is pointed out by James Mill in his "Analysis". As the notion is a simple one, it is not possible strictly to define it; for, to do this, it would be necessary to split it up into genus and differentia—an impossibility where the simplest concepts are concerned. It is itself not a real genus, since many particular things, not generically identical, can be subjects of the same predicate, analogically employed. Quality is the category according to which objects are said to be like or unlike; and, in this sense, quality is one or other of the four modes in which substance is determined to being talis or talis, i.e. such or such. Considered thus, it is an accidental determination (cf. Form).

The four divisions of quality are: (1) Habit, or condition (habitus); a permanent and comparatively stable quality by which man, considered as to his nature or operation, is well or ill-adapted towards his natural end. Strictly speaking, only man can be the subject of habit. It is thus distinguished from disposition; which is used of other than human beings. Less stable conditions, as hot, cold, sick, well, are also mentioned here. (2) Natural powers or incapacities (ratio non actionis et non motus); these are distinguished, as accidents, from the substance; and are further distinguished among themselves as are the distinct acts from which they are inferred. The important Scholastic thesis of the real distinction of nature from its faculties arises in this connection. (3) Power of causing sensations and results of the modification of sense; the one belonging, as quality, to the objects of sense; the other to the senses that are modified. (4) Figure, or circumscribing form of extended bodies. St. Thomas Aquinas insists upon the fact that this mode of quality (morphology) is the most certain index of the identity or diversity of species, especially in plants and animals. Quality admires in the concrete, though not in the abstract, of more and less; and in some cases, though not in all,

Francis Mersham.

Quadratus, the first of the Christian apologists. He is said by Eusebius (Chron. ad ann. Abrab. 2041, 124 a. d.) to have been a disciple of the Apostles (auctor apostolorum). He addressed a discourse to the Emperor Hadrian containing an apology for the Christian religion, during a visit which the latter made to Athens in 124 or 125. With the exception of a short passage quoted by Eusebius (Hist. Eccl., IV, iii), this apology has entirely disappeared. Eusebius states (Chron.) incorrectly, however, that the appeal of Quadratus moved the emperor to issue a favourable edict. Because of the similarity of name some scholars have concluded (e.g. Bardenhewer, Patoiogy*, p. 46) that Quadratus the apostolic is the same person as Quadratus, a prophet mentioned elsewhere by Eusebius (Hist. Eccl., III, xxxvii). The evidence, however, is too slight to be convincing. The later references to Quadratus in Jerome and the martyrologies are all based on Eusebius or are arbitrary enlargements of his account.

Patrick J. Healy.
Faith is required. This erroneous opinion, demanding with Jansenism (1) extraordinary preparation, thereby deferring Communion “for the riper age” of twelve, fourteen, or sixteen. The catechism ("absolutely forbidden"), makes (2) "the Holy Eucharist a reward and a remedy for human frailty", which is contrary to the teaching of the Council of Trent that Holy Communion is "an antidote by which we are freed from our daily faults and preserved from mortal sins". The error assumes (3) that riper years and more complete instruction give better dispositions than the innocence and candor of more tender years. As first Communion is not essentially different from any other Communion the extraordinary preparation herefore demanded is (4) contrary to the "Sacra Tridentina", which for daily communicants, including children, requires only the state of grace and a good intention.

Abuses following from errors.—(a) Depriving the child of the beginning of its rational life of the right of living in Christ through Holy Communion, a right given by baptism; (b) causing the loss of angelic first innocence in many by those times of deprivation of Christ and of graces, years for many the seed-time for snares and vices, all of which might have been avoided by the custom of some places, children to live in the state of sin by not allowing them to go to confession until the age determined for first Communion, or of denying them absolution when they confessed ("absolutely condemned") and "to be done neither by the ordinary of the law permiss it"; (c) denying the Viaticum to dying children who had not received their first Communion, and burying these as infants, thereby depriving them of the suffrages of the Church, to which they were entitled ("utterly detestable"); (d) "ordinary to proceed severely against those".

Conditions for first Confession and first Communion.—(a) The age of discretion, which applies equally to both sacraments. This may be judged (1) by the first indication of the child using its reasoning powers; (2) by the child knowing what is right from wrong. No determined age is placed as a condition; the age of seven is mentioned because the majority of children arrive at the years of discretion, that is, begin to reason, about this period, some sooner, some later. (b) A knowledge such as a child just beginning to reason can have about on life, the good and punishes the wicked, and about the mysteries of the Trinity and the Incarnation. It is not necessary that the child should commit to memory accurate theological definitions, which may convey no idea to (c) the child of the fact of giving Holy Communion to infants immediately after baptism, and frequently before the beginning of their rational life, has been modified but never condemned; it is even approved to-day among the Greeks and Orientals; (d) the decree of the Fourth Lateran Council (1215, can. xxxi) has never been revoked or modified, and in virtue of it all are obliged, as soon as they arrive at the years of discretion, to receive both the Sacraments of Penance and Holy Communion at Easter time; (d) the "testimony of the greatest authors justifies the interpretation of the Lateran Decree that the Lateran decree obliges "children when they begin to have some use of reason." (also Ledesma, Vaeques, St. Antoninus); (e) the Council of Trent confirmed the Lateran decree pronouncing anathema against all who deny "that the faithful of both sexes who have attained the use of reason are obliged to receive Holy Communion every year, at least at Easter time" (Sess. XIII, de Euch., c. viii, can. ix).

Errors condemned by the "Quam singulari".—(a) A grave and serious discretion is required for first Communion than for first Confession. (b) To receive Holy Communion a more complete knowledge of the articles of
be continued afterwards by sending the children to the public catechetical instructions, or by supplying the instruction in the house. The formal admission of the child to first Communion rests with the father, or the one taking his place, and with the confessor. The decree supposes these to act together, and when they agree on the admission no one may interfere. Where the parents are不同意 or are children to another confessor, for every confessor has a right to admit a child to private first Communion.

General Communion.—A public ceremony devolving not on the confessor but on the parish priest, who is required to have yearly one or several of these general Communions which may be simple or solemn. The simple (a) will admit the (1) little children making their first Communion, also (2) those who have previously approached the Holy Table. The decree requires some days of instruction and preparation for the young communicants by the pastor in a public manner. This can be given as conditions and circumstances permit, attention being paid to the spirit and substance of this provision. Every pastor can arrange a solemn ceremony in which those would participate who are old enough, really (1) to understand the lessons. Every year during the time the faithful can satisfactorily their Easter duty, the "Quam singulari" must be read to the people in the vernacular. Every five years in their ad limina, ordinaries will be obliged to report the observance of the decree to the Holy See.

Quanta Cura. See Syllabus of Pius IX

Quantity (Gr. μέτρον; Lat. quantitas, quantum, correlate to suntum). Aristotle, in his "Categories" places quantity (with which he deals at length from the logical standpoint in the sixth chapter) first in his enumeration of the nine accidents. His list of the possible heads of classification of predicates has reference to a concrete, material subject, and, as shown by the last two predicaments (jacere and haber), principally to man. Quantity does not, therefore, as philosophy is at present divided, fall properly under the treatment of ontology, but of cosmology. It presupposes the material. In "Metaphysics" IV, the concrete quantum is described as "that which is divisible into the parts included in it, of which any and each is potentially one and hoc quid". By this description the inexistences of the quantum are discriminated from the elements in the compound, the matter and the form, which each potentially "each hoc quid". Quantity is distinguished into (1) continuous, and (2) discrete. Continuous (geometrical) quantity is that which consists of parts having position in reference to each other, so that the limit of the one is the limit of the next. That potentially "one and hoc quid", do not form a multitude, an aggregate of units, but one divisible quantum, or measurable size. They are not actual entities. (This doctrine is not unanimously held in the School.) Continuous quantity is further subdivided into (1) successive, and (2) permanent. Time and movement are examples of successive, the line, surface or tridimensional body are examples of permanent. It is to be noted that time and movement have no reality apart from quantified things which move, and of which the movement is measurable; and that the line and superficies are no more than abstractions practised upon the real quantum. Tridimensional quantity is that which has discontinue parts. The resultant whole is a unity per accidens, in which the elements coexist as a plurality. Number and speech are given as examples. Quantity has no contrary, nor does it admit degrees. There is no contrary to the one, nor is any one quantity, as such, more a quantity than another. Large, small, etc., as used in reference to extended things, fall more properly under the category of relation. Equal and unequal are affirmed of objects in virtue of their quantity alone. Not only is material substance affected by the accidental form, but all the other accidents are measurable, at least per accidens, as when we say "much and little white". St. Thomas ("Summa", III, Q. lxvii, a. 2) makes all the accidents related to their accidents in diverse degrees. The whole subject of colour is said to be the superficies".

An important question is raised as to the nature of the distinction to be drawn between substance and quantity. The School generally, following Aristotle, holds that such a distinction is not possible. In reality, the indivisible substance potentially divisible (Physics, I, 2), the distinction to be admitted is a real one. There is considerable diversity of opinion as to whether this can be demonstrated by arguments of natural reason. Aristotle's own argument lies in the consideration that length, breadth, and depth are quantities, but are not substances. But against this it has been urged that these things do not exist as such at all. They are abstractions formed by the dissociation produced by varying concomitants. Suares, Pech, De San, Nys, and others hold that the distinction is demonstrable; but most of the arguments advanced are negative ones. For Descartes and his school, quantity, or extension, is the essence of corporeal substance. The distinction to which allusion has just been made has no place in the system (cf. DESCARTES). The definition of the Council of Trent, however, teaches that quantity is really distinct from substance. It is of faith that the substances of bread and wine in the Eucharist are changed at the consecration (Sess. XIII, cap. iv); but the quantity remains unaltered. To escape this difficulty Cartesianes had recourse to several explanations, none of which seems to be in any way satisfactory. Continuous quantity is seen to be, in the philosophy of the School, an attribute and accident of body. Corporeal substance, as such, is not quantitatively divisible. When actuated by quantity it becomes so; but is not yet spatially displayed. The accident is thus distinguished by Scholastics from the further accident of formal extension which is complementary to it, and by which the parts, already recognized distinct by quantity, are localized in space. The quantity, by being determined by this accidental form, matter is held to be individuated; the principle of individuality of corporeal beings is materia quantitatis signa.

Quapaw Indians.—A tribe now nearly extinct, but formerly one of the most important of the lower Mississippi region, occupying several villages about
the mouth of the Arkansas, chiefly on the west (Arkansas) side, with one or two at various periods on the east (Mississippi) side of the Mississippi, and claiming the whole of the Arkansas River region up to the border of the territory held by the Osage in the north-western part of the state. They are of Siouanian stock, spoken with the same language and dialectic variants, by the Osage and Kansa (Kaw) in the south and by the Omaha and Ponca in Nebraska. Their name, properly Uogakha, signifies 'down-stream people', as distinguished from Umatilla or Omaha 'up-stream people'.

and the Illinois and other Algonquian tribes they were known as Akansa, whence their French name of Akenas and Akanasse. According to concurrent tradition of the cognate tribes the Quapaw and their kinmen originally lived far east, possibly beyond the Alleghenies, and, pushing gradually westward, descended the Ohio River—hence called by the Illinois the 'river of the Akansa'—to its junction with the Mississippi, whence the Quapaw, then including the Osage and Kansa, descended to the mouth of the Arkansas on the Ohio, with the Ponca, went up the Missouri.

The Quapaw, under the name of Capaha or Pacaha, were first encountered in 1541 by de Soto, who found their chief town, strongly palmsed and nearly surrounded, lying on an island in a lake on the Arkansas (west) side, apparently in the present Phillips County, where archeological remains and local conditions bear out the description. The first encounter, as usual, was hostile, but peace was finally arranged. The town is described as having a population of several thousand, by which we may perhaps understand the whole tribe. They seem to have remained unvisited by white men for more than 130 years thereafter, until in 1673, when the Jesuit Father Jacques Marquette, accompanying the French commander Louis Jolliet, made his famous voyage down the Mississippi, to the villages of the "Akansea" who gave him warm welcome and listened with attention to his exhortations, during the few days that he remained until his return. In 1682 La Salle and his party, in the course of his second voyage, found the Quapaw and the Mississippi generally four in number, corresponding in name and population to four sub-tribes still existing, viz. Ugahphati, Ushitiuihi, Twidamin, and Tafooahshita, or, under their French forms, Kappa, Osoteooue, Touriman, and Tongina.

In 1683 the French commander, Tonti, built a post on the Arkansas, near its mouth at the later Arkansas Post, and this became the regular occupation of the Quapaw country. He arranged also for a resident Jesuit missionary, but apparently without result. About 1697 a smallpox visitation greatly reduced the tribe, killing the greater part of the women and children of two villages. In 1727 the Jesuits, from their house in New Orleans, again took up the work, and Father Du Poisson was sent to the Quapaw, with whom he remained two years. On the morning of 27 November, 1729, while on his way to New Orleans on behalf of his mission, he was preparing to say Mass in a garrison, when the signal for slaughter was given and he was struck down in front of the altar, the first victim in the great Natchez massacre. In the ensuing war, which ended in the practical extermination of the Natches, the Quapaw rendered efficient service to the French against the hostile tribes. A successor (Father Cavette) was appointed to the Arkansas mission, but details are unknown. It was vacant in 1750, but was again served in 1764 by Father S. L. Meurin, the last of the Jesuits up to the time of the expulsion of the order. Fathers Pierre Gibault (1792-98) and Paul Josias (1792-98), and Maximilian undoubtedly attended the Indians.

Shortly after the transfer of the territory to the United States in 1803 the Quapaw were officially reported as living in three villages on the south side of the Arkansas River above the present site of the Arkansas Post. In 1818 they made their first treaty with the government, ceding all claims from Red River to beyond the Arkansas and east of the Mississippi, with the exception of a considerable tract between the Arkansas and the Saline, in the south-eastern part of the state. In 1824 they ceded this also, excepting eighty acres occupied by the chief Saracen (Sarrasin) below Pine Bluff, expecting to incorporate with the Caddo of Louisiana, but in this they were disappointed, and after being reduced to the point of starvation by successive floods in the Arkansas and Red River, most of them wandered back to their old homes. In 1834, under another treaty, they were removed to their present location in the north-east corner of Oklahoma. Sarrasin, their last chief before the removal, was married to a Mississippian and became a missionary (Congregation of the Missions) who arrived in 1818 and ministered alike to white and Indians. He died about 1830 and is buried adjoining St. Joseph's Church, Pine Bluff, where a memorial window preserves his name. The pioneer Lazarist missionary among the Quapaw was Rev. John M. Odin, afterward Archbishop of New Orleans. In 1824 the Jesuits of Maryland, under Father Charles Van Quickenborne, took up work among the native and immigrant tribes of the present Kansas and Oklahoma. In 1846 they established the first mission among the Osage, on Neosho River, by Fathers John Shoemakers and John Bax, who extended their ministration also to the Quapaw for some years. The Quapaw together with the associated remnant tribes, the Miami, Senea, Wyandot and Ottawa, are now served from the Mission of "Saint Mary of the Quapaws", at Quapaw, Okla., in charge of a secular priest and several Sisters of Divine Providence, about two-thirds of the surviving Quapaw being reported as Catholic. From perhaps 5000 souls when first removed they have been reduced by removals, and consequent demoralization to approximately 3200 in 1867, 1600 in 1750, 476 in 1843, and 307 in 1910, including all mixed bloods.

Besides the four established divisions already noted, the Quapaw have the clan system, with a number of gentes. Polygamy was practised, but was not common. Like the kindred Osage they were of cere- monial temperament, with a rich mythology and elaborate rituals. They were agricultural, and their architecture and general culture when first known were far in advance of that of the more backward tribes. Their towns were palmsed and their "town houses", or public structures, sometimes of timbers dovetailed together, and roofed with bark, were frequently erected upon large artificial mounds to guard against the frequent inundations. Their ordinary houses were rectangular, and long enough to accommodate several families each. They dug large ditches, constructed fish weirs, and excelled in the pottery art and in the painting of skins for bed covers and other purposes. The dead were buried in the ground or in coffins in the lowest floors of their houses, being frequently strapped to a stake in a sitting position and then carefully covered with earth. They were uniformly friendly to the whites, while at constant war with the Chickasaw and other southern tribes, and are described by the earlier explorers as differing
from the northern Indians in being better built, polite, liberal, and of cheerful humour. Their modern descendants are now fairly prosperous farmers, retaining little of their former habit or belief.

Quarantine, the select proper, little has been recorded beyond some brief vocabularies and word lists, but of the so-called Dhegia language, including the dialects of the Omahta, Ponca, Osage, Kansa, and Quapaw, extended study and publication have been made, particularly by the linguists and anthropologists of the Bureau of American Ethnology (see Piling, "Siouan Bibliography").

JAMES MOONEY,

Quarantines is an expression frequently used in the grante of indulgences, and signifies a strict ecclesiastical penance of forty days, performed according to the practice of the early Church. Hence an indulgence of seven quarantines, for instance, implies the remission of as much temporal punishment as would be blotted out by the corresponding amount of ecclesiastical penance.

A. J. MAAS.

Quaratesmus, FRANCISCUS, writer and Orientalist of the seventeenth century, b. at Lodi (Lombardy), 4 April, 1683; d. at Milan, 25 Oct., 1650. His father was the celebrated Father Quiz, who was Superior of the Lodi Pape. At an early age he was enrolled among the Franciscan Observantins at Mantua. For many years he held the chairs of philosophy, theology, and canon law, and became successively guardian, custos, and minister of his province. Later (1649) he occupied the two highest places in the order that of definator and procurator general. The memoirs of the order extol his consummate virtue, particularly his piety, prudence, and extraordinary meekness. His long apostolate in the East and the magnificent works he has left us have secured for Quaratesmus the world-wide fame, especially among earlier historians, Biblical scholars, and Orientalists. On 3 March, 1616, he went to Jerusalem, where he became Guardian and Vice-Commissary Apostolic of Aleppo in Syria (1616-8), and Superior and Ordinary Apostolic of the East (1618-9). During this period he was twice imprisoned by the Turks. In 1620 he returned to Europe, but in 1625 was back in Jerusalem, whence the following year he addressed from the Holy Sepulchre an appeal to Philip IV of Spain, inviting him to send the Holy Father to the Holy Land. He died at the time dedicating to him his work, "Hierosolymo affiliato". Between 1616 and 1626 he wrote his classical work, "Elucidatio terre sancte", adjudged by the learned a monumental contribution to history, geography, topography, and chivalry. During 1627-9 he was at Aleppo as papal commissary and as vicar-patriarch for the Chaldeans and Maronites of Syria and Mesopotamia. In 1639 he went to Italy to render an account to the Holy See of the state of the Eastern Churches; he then returned to the East, but how long he remained is not known. Meanwhile he journeyed through Egypt, the Holy Land, Syria, Mesopotamia, Cyprus, Rodi, Constantinople, and a large part of Asia Minor; he also visited Germany, France, Belgium, and Holland. In 1637 he was guardian of S. Angelo (Milan), where in 1643 he completed his other great work on the Passion of Christ.

No bibliographer has yet given us a complete list of his works. His published works are: (1) "Historica, theologica et moralis terre sanctae elucidatio: in qua plures ad veterem et presentem ejusdem terrae sanctae statum spectantia accurate explicatur" (2 fol. vols., pp. xxx-924-98 and 1014-120, Antwerp, 1639); second edition edited by P. Cypriano da Treviso (4 pts. in 2 fol. vols., Venice, 1850-1); (2) "De sacratissimis D. N. Christi quinque vulneribus, varia, pia et lucullana tractatio." (5, no. 3, fol. vols.; I: 202; II: 258; III: 368; IV: 400; V: 271, besides an index of pp. 200 (Venice, 1852), approved by the examining theologians in 1643, but unknown to bibliographers; only three copies are extant—one in the library of Beers, the Ambrosiana of Milan, and the National Library of Turin); (3) "Hierosolymo afflicte et humiliata deprecatio ad suum Philippum IV Hispaniarum et Novi Orbis potentissimum ac Catholicae Regnum" (1 quarto vol., pp. 74, Milan, 1631), very rare; there is a copy in the Ambrosiana of Milan; (4) "Ad SS. DD. N. Architecti, VII Pont. Opt. Max. Fr. Francisci Quaratesii Laud. Ord. Min. Pia Vota pro anniversaria Passionis Christi solemnitate" (1 quarto vol., pp. xx-58, Milan, 1656), of which there is one copy in the Ambrosiana; (5) "Pro confessoribus Mariae Virginis maria tractatus" (1 quarto vol., Palermo, 1648); (6) "Itinerario di Caldeca del Rev. P. Francesco Quaratesio e di Fr. Tomaso da Milano suo compagno, Min. oss. e Gouv. Batt. Eliano. Maronita, ed Elia Patriarcha e con li Nestoriani etc., l'anno 1629", edited by Marcello da Civezza in "Storia delle missioni Francescane", XI, 595-608.

Still in manuscript are: (1) "Apparatus pro reductione Challadorum ad catholicae fidem" ("six manuscript volumes", says Fr. Cyprian), which Quaresmus wrote about the Khalid, to which he refers in "Elucidatio terre sancte", I, li; (2) "Adversus errores Armenorum" ("three volumes in folio", says Sbaralea), preserved in the Convent of Lodi; (3) "De헓마, Sanguine Agni digesta", left incomplete, but containing two quires of "Epistola ex oriente", in the archives of the Propaganda Fide. These and other manuscript works are said to be preserved, some in the municipal library of Pavia and Lodi and some at Jerusalem.

Quaterdecimans. See EASTER CONTROVERSY.

Quebec, ARCHDIOCESE OF (QUEBECIENI), in Canada, comprises the counties of Beauce, Bellechasse, Dorchester, Kamouraska, Lévis, L'Islet, quebec, Megantic, Memramcook, Part of Temiskaming, Montmorency, Portneuf, and Quebec. The early missionaries, the Récollets (1615-20) and the Jesuits (1625), depended directly on the Holy See. The Jesuits having returned alone in 1632, the Archdiocese was erected as an archbishopric in 1633, and became a suffragan of the See of Quebec. The diocese was comprised in the province of Quebec (1663), and erected a province in 1821. The Province of Quebec was divided into two in 1867, when the See of Quebec comprehended all the possessions of France in North America: Newfoundland, Cape
Breton, Acadia, Île St. Jean, all New France from the Atlantic to the plains of the far West, the valley of the Mississippi and Louisiana, a territory much larger than Europe. After the treaty of Paris (1783), the Bishop of Quebec kept Newfoundland and what now forms the Dominion of Canada. That immense diocese was successively diminished by the erection of new sees until by the formation of Chicoutimi (1878) it was reduced to its present boundaries (see CANADA, CATHOLICITY IN). Bishops.—(1) François de Montmorency Laval (q. v.), consecrated (1658) Bishop of Petreas and Vicar Apostolic of New France, landed at Quebec (1659) and, having hastily overthrown the pretensions of the Archbishop of Rouen, set about the organization of his diocese. His first report to the Holy See (1660) states that there were only twenty-six priests, of whom sixteen were Jesuits; eight churches or chapels in Quebec and the neighbourhood, with three others in Montreal, Three Rivers, and Tadoussac; about 2000 inhabitants. No house, no revenue for the bishop, no cathedral, and no income for churches. Two orders of nuns applied themselves to the instruction of girls: the Ursulines (founded in 1639 by Ven. Marguerite de la Fléche) and the Congregation of Notre Dame (founded by Ven. Marguerite Bourgeois, 1659) and granted approbation by Bishop Laval in 1669 and 1676. The Sisters of St. Joseph of the Incarnation, and the Congregation of Notre Dame founded by Ven. Marguerite Bourgeois, and granted approbation by Bishop Laval in 1669 and 1676. The Sisters of St. Joseph of the Incarnation kept the hospital established in Montreal (1642) by Jeanne Mance, and the Quebec Hôtel-Dieu (1639) was entrusted to the order of St. Augustine, the Sisters of the Mercy of Jesus. Bishop Laval founded the seminary of Quebec (1663), which became a lower seminary in 1668, but had no classes before the Conquest. The pupils attended the lectures of the Jesuit college opened in 1653, and when the bishop's request, classes in theology were soon added to philosophy. For its maintenance the institution was granted the tithes established in 1663; parish priests and parishes were to be served by its members; what remained of the tithes was devoted to the building of churches and priests' houses. The first parish erected was that of Quebec (1664) which, suppressed by the Bull of erection of the diocese, was re-established by the bishop in 1684 and united to the seminary; he also instituted a chapter. The parish church of Quebec, begun in 1647, consecrated in 1668 by the prelate, became and remains the cathedral. Eleven other parishes were erected in 1678. In 1683 eighteen priests of the seminary did parish work along the St. Lawrence. The Montreal parish, with Our Lady of Bon-Secours, was united to the seminary of the Sulpicians (1758). In Acadia, Port-Royal was served by the Abbé Petit, sent in 1676, and the Abbé Thury founded the Pentagœt mission in 1684. There were numerous Indian missions, some residential, some among wandering tribes, almost all in the hands of the Jesuits. Bishop Laval, in spite of many obstacles, faithfully visited his diocese and confirmed nearly 5000. The population (1683) was 10,275 in Canada, 600 Acadians, and 1512 converted Indians. The census of 1866 states that there were 44 priests, 12 students in theology, 43 Jesuits, 12 Recôlisites (returned in 1870), 28 Ursulines, 28 Hospitallers of the Mercy of Jesus, 16 Hospitaliers Notre-Dame, and 15 Sisters of the Congregation of Notre Dame.

(2) Jean-Baptiste de la Croix Chevriére de St. Vallier, b. 1653; d. 1727, visited Canada as vicar-general of Bishop Laval (1686–90) and became his successor in 1698. A year's captivity at Twenty-francs from the king enabled him to increase the number of parish priests from twenty to thirty-six. The Jesuits were entrusted with the mission of the Illinois (1690) and other Indians of that region; the Recôlisites with the Cape Breton, and the Seminary of Quebec with Acadia and the mission of the Tamarois on the left shore of the Mississippi, which it kept until after the Conquest. Two of its members, the Abbé St. Cosme and Foucault, fell victims there to their zeal. Parishes were rendered independent of the seminary (1792). For the improvement of science in the clergy and of church discipline, ecclesiastical conferences were organized (1700), four synods held, and a ritual with a catechism published. The General Hospital of Quebec was founded (1697) under the Ursulines, and the Hôtel-Dieu of Three Rivers (1697), which was in the meantime a hospital and a school. He approved (1688) the Charron Brothers, founders of the General Hospital of Montreal (1694). They were Hospitaliers and schoolmasters and, until the extinction, half a century later, kept schools in Montreal, Three Rivers, and a few other places. Instruction was more common at that epoch than is generally admitted by historians. The Jesuits and the Sulpicians early established primary schools, teachers went about from place to place, and mostly all parish priests were schoolmasters. Though a most charitable man, he was not amiable. He had hurt the feelings of many, chiefly in the separation of parishes from the seminary (1692), and complaints had reached France. His resignation was called for by the king and, upon his refusal, he was retained in Paris several years (1694–7), and again from 1709 to 1713, after having been five years a prisoner in England (1704–9). During that voyage he had gone to Rome and obtained the canonical union to the See of Quebec, chapter, and seminary, of the Primate of Macon, Lestrade, and Benevent, granted by the king to Bishop Laval.

(3) Louis-François Duplessis de Mornay, b. 1663; d. 1741, coadjutor of Bishop St. Vallier (1713), and his successor (1727–33). He never went to Canada, sending his successor to administer in his stead, his coadjutor, Bishop Dosquet.

(4) Pierre-Herman Dosquet (q. v.), consecrated (1725) Bishop of Sambes, bishop from 1733 to 1739. His chief acts were the establishment of the sisters of the Congregation of Notre Dame at Louisburg (1735) and the resignation to the king of the abbey of Benevent, more a burden than a source of revenue for the Quebec bishops. A yearly allowance of nine thousand francs was granted in return. He resigned his see in 1739, and received the abbey of Brein with an income of six thousand francs.

(5) François-Louis Pourroy de L'Aubervière, b. 1711; d. 1740, consecrated in Paris (1739) by Bishop Mornay, unfortunately died a few days after landing at Quebec.

(6) Henri-Marie de Pontbriand, b. 1708; d. 1760, was consecrated in Paris (1741). A man of great science and zeal, most devoted to his pastoral duties, he visited several times his diocese, even the distant missions of the Presentation (Ogdenburg) and Detroit, occasionally taught theology in the Seminary, and established early treatises for priests. The new Order of Grey Nuns, recently founded in Montreal by Madame D'Youville and entrusted with the General Hospital, received his encouragement and
approval (1755). He aided the victims of the plague in 1746, 1757, and 1758, enabled the Ursulines to rebuild their convent at Three Rivers, destroyed by fire (1755), and retrieved a similar convent on the Quebec Hôtel-Dieu (1755). In his pastoral letters, he exhorted the clergy to grant to the king for his wars a part of their tithes and encouraged Canadians to do their duty to their country, recalling the fate of the Acadians in 1755. During the siege of Quebec, broken in health by work and cares, he retired to a nearby parish and could see after the surrender, his palace and the seminary, the churches of the Jesuits and the Recollects greatly damaged by bullets and shells, half of the city houses, the church of Loretto, and the cathedral, which had recently (1744–9) been rebuilt on a larger scale, entirely destroyed.

(7) Jean-Olivier Briand (q. v.), bishop from 1766 to 1784. One of the vicars-general charged with the administration of the diocese during the vacancy, he ruled the district of Quebec. The Canadians, by two delegates, and the chapter, by an address, had entreated the King of England to maintain the Catholic hierarchy. More successful than the Abbé Montgolfier, rejected by England, the Abbé Briand, elected by the chapter in his place, was indirectly notified that his consecration, which took place in Paris (1766), had to thwart the intentions of England of anglicizing her new subjects in faith and language. Circumstances besides seemed most unfavourable. The population, 42,000 in 1739, was in 1760, 60,000; of 151 priests only 138 remained. The Recollects and Jesuits were forbidden to receive novices. The chapter, prevented from filling its vacancies, soon died. Canonically notified—or not (it may be doubted)—of the suppression of their order, the Jesuits were left, until the death of the last, Father Casot (1800), in peaceful possession of their estates, which were afterwards forfeited to the Crown. In Louisiana they had been all banished after 1763, with the exception of Father Meunir, and their several chapels among the Illinois destroyed, while the properties of the mission of the Tamaroys were sold for a farthing by the Abbé Forget-Duverger, the last priest sent by the seminary. The Recollects disappeared one by one, Father Berye, the superior, who received an annuity of £500, dying in 1800, left the last priest of the order, in 1813. The college of the Jesuits having been changed into military stores and barracks, the hope of education rested upon the seminary of Quebec, where classes opened in 1765. The loyalty of the bishop during the American War of Independence greatly contributed to the loyalty of the people towards the new republic for Canada. He could write in 1775: “Religion is perfectly free. I can exercise my ministry without any restriction.” As a proof that he united firmness with the respect of civil authority, it may be remembered that he refused to take the Test Oath, until the formula was made acceptable to a Catholic, and once said to General Murray: “My head shall be cut off before allowing you to appoint priests to any parish.” The Government granted him an annuity of £250 besides £150 for the episcopal palace that he had rebuilt and rented for public use. With three thousand francs voted by the clergy of France in 1785, it formed nearly all his revenue. Nevertheless, he found means for frequent and abundant charities. The number of parishes was about one hundred, more than twenty-five having been erected since the Conquest. A pastoral letter to the clergy contains interesting statistics: 46,323 births and 24,731 burials from 1759 to 1769, and 43,995 births with 26,127 burials from 1769 to 1777, giving a net increase of 39,460 for the whole period between 1759 and 1777. From 1758, and for several years, no parish was regularly vacant and ordained ninety priests. Having been allowed by Rome, for fear of a vacancy, to choose and consecrate a coadjutor with future succession, he consecrated in 1772 the Bishop of Dorylea and gave him authority in 1784.

(9) Louis-Philippe Mariauchau D’Eglois (q. v.) was the first Quebec bishop born in Canada. He was pastor of Saint-Pierre-d’Orléans and kept until his death his small parish. According to the Ursuline annals, in 1782 priests were very scarce and several parishes without pastors. Vacancies were quickly filled, whereas, in 1786–90, the number of parishes being 121, the census of 1790 numbers 146 priests, of whom 142 were in office. Returning Acadians settled in several of the maritime provinces and were served by Vicar-General Bourg and the Fathers Girouard, Le Roux, and Donat, of the congregation of the Holy Ghost, while the Irish and Scotch Catholics of the same region were attended by the Abbés Phelan and Jones, who resided at Halifax.

(9) Jean-François Hubert (q. v.), consecrated Bishop of Almire and coadjutor of Quebec (1788), filled the see from 1788 to 1797. Every year he spent three months visiting the religious communities and a part of his diocese. In 1795 he visited Baie-des-Chaleurs. He ordained 53 priests and confirmed 45,148 people. The number of priests, in 1794, was 160 for a population of 160,000 Catholics. During the French Revolution, 34 came from France. Nine were sent to Acadia and four to Upper Canada. The seminary of Montreal, on the verge of ruin, obtained recruits, and kept possession of its estates, which, thanks to the firmness of Bishops Plessis and Panet, were declared, under Queen Victoria, its lawful property. Bishop Hubert, to please Lord Dorchester, appointed coadjutor the Abbé Bailly de Messein, parish priest of Pointe-aux-Trembles (Portneuf co.), consecrated Bishop of Capesa in 1799. A distinguished man in some regards, successful missionary in Acadia (1767–71), professor of the seminary (1772–7), and afterwards (1778–82) private teacher of the governor’s children, he favoured the establishment of the mixed university contemplated by some New England loyalists settled in Canada, and which Bishop Hubert considered and firmly opposed as an anti-Catholic agency. The coadjutor died in 1794, apologizing for his errors. Another and different coadjutor was chosen, Pierre Denault, to whom Bishop Hubert resigned his authority in 1797.

(10) Pierre Denault (q. v.) was pastor of Longueuil and kept his parish even after his consecration as Bishop of Canathe (1795). The parishes of Lower Canada numbered then about one hundred and forty, some of which he visited every year. He also visited Upper Canada in 1801 and 1802, and created, for English-speaking Catholics, the parishes of St. Andrew and St. Raphael, which he entrusted to Rev.
Alex. McDonell. On his visit to the maritime provinces in 1803, he confirmed 8800 people. The primary school founded by Abbé Brassard at Nicolet he made a classical school (1803), now the seminary of Nicolet. His generous contributions to the new college of the Suplicians (1804-5) also show his devotion to education.

(11) Joseph-Octave Plessis (q. v.), consecrated Bishop of Canatha in 1801, Bishop of Quebec from 1806 to 1826. His great achievement was the organization of the Church in Canada in which he was providentially aided by the American invasion of 1812-15. After the treaty of Ghent (1814) he was for the first time officially acknowledged as Catholic Bishop of Quebec, and granted by the king an annuity of £1000. He obtained from Rome, besides the erection of the Vicariate Apostolic of Nova Scotia (1817), the appointment of bishops for Upper Canada, Montreal, New Brunswick, including Prince Edward's Island, and the Magdalen Islands, and for the North-West, where the Abbé Provancher and Dumoulin had begun the mission of the Red River. England assented, but on the express condition that these bishops would be only auxiliary and vicars-general of Quebec. He also obtained from the pope not to use, while the Government objected, the title of archbishop granted to him in 1819. All the new prelates were consecrated by him on his return: McDonell (1820), McEachern and Larigule (1821), Provancher (1822). He ordained 114 priests, preserved the college of Nicolet, and encouraged St. Hyacinth College, begun by Abbé Girouard (1811). Like his predecessors, he fiercely opposed the royal institution which placed education in Protestant hands, and endeavoured to obtain Catholic primary schools. A more favourable law was voted in 1824. As a member of the Legislative Council from 1817, he had great influence. In 1822 he contributed to prevent the union of the Canadas intended by the English House of Commons.

(12) Bernard-Claude Panet, b. 1753; d. 1833, parish priest of Rivière-Ouelle, Quebec, Bishop of Saldes and coadjutor of Quebec (1807), was bishop from 1825 to 1833. The chief events of his administration were: the building of Nicolet College (1827), to which he contributed the sum, large for the time, of $32,000; the foundation of the College of Ste-Anne-de-la-Pocatière (1827) by the Abbé Painchaud; the educational law of 1829 which granted allowances for the creation of parish schools and the maintenance of colleges, convents, and academies already in existence; the erection in Quebec, with his help, of St. Patrick's church for the Irish; the sale to the Government of the episcopal palace built by Mgr Briand. An annual rent of £1000 was paid, which, although irredeemable, was redeemed in 1888 by the sum of $74,074, given to Cardinal Taschereau.

(13) Joseph Signay, b. 1778; d. 1850, Bishop of Fussa and coadjutor of Quebec (1837), administrator (1838), bishop (1833), archbishop from 1844 to 1850. There were epidemics of cholera in 1832, 1834, and 1849. Quebec was almost entirely destroyed by fire in 1845. In 1847 typhus visited the Irish exiles at Groceille. Among many priests deserving grateful mention must be mentioned the Abbé Paul, and then secretary to the bishop and afterwards vicar-general, who founded homes for nearly five hundred Irish orphans. Important events were: the law on education (1841) which allowed the election of school commissioners having power to see that the schools were conducted, and choose teachers and raise funds therefor; the erection of Quebec (1844) into a metropolis with three suffragan sees, Kingston, Montreal, and Toronto; the Oblates (1844) and the Jesuits (1849) admitted into the diocese and charged respectively with the Sagueneen mission and the Sodality of the Blessed Virgin of the Upper Town; societies for the Propagation of the Faith (1837), colonization (1838), and temperance (1843). The report of Bishop Signay to the Holy See in 1843 states that the diocese contained 200,000 Catholics, 170 churches, and 38 parishes or colleges or seminaries. In the Red River mission, under Bishop Provancher, out of 5140 souls, more than 2700 were Catholics. Vicar-General Norbert Blanchet and Modeste Demers had opened (1838) the mission of British Columbia, while other missionaries worked among the Indians. In Lake Superior the Oblates under Signay was the last to receive the annuity of £1000 granted to Mgr Plessis. In 1847 he entered the present episcopal palace.

(14) Pierre-Flavien Turgeon, b. 1777; d. 1867, elected in 1831 and consecrated in 1834 Bishop of Sydme and coadjutor of Quebec, became Bishop in 1849, and bishop in 1850. That same year a meeting of the bishops at Montreal prepared the first Council of Quebec, held in 1851 under his presidency. After directions on liturgy and discipline, against social and moral dangers, its most important decree is that on Catholic universities and normal schools, which gave birth (1852) to Laval University and to Laval Normal School in 1857. Pius IX was also petitioned to form new sees. St. Hyacinth and Three Rivers were erected in 1852, while Halifax became a metropolis. A second council took place at Quebec in 1854. The foundation of the Quebec Sisters of Charity (1849) and of the Good Shepherd Institute (1850), the reorganization of ecclesiastical conferences, the publication of publicists of Nicholas Butler's for English-speaking Catholics are the chief acts of Bishop Turgeon's administration. In 1855, owing to ill-health, he left the administration of the diocese to his coadjutor.

(15) Charles-François Baillargue (q. v.), as parish priest of Quebec (1831-50), procured for his parish the Brothers of the Christian Schools, and established the conferences of St. Vincent de Paul. As bishop, the great events of his administration were the third (1869) and fourth (1868) Councils of Quebec, attended by the suffragan Bishop of Montreal, Ottawa, St. Boniface, Three Rivers, St. Hyacinth, Hamilton, Sandwich (now London), Kingston, Toronto, and (in 1868) Rimouski. Besides several disciplinary decrees, the erection of the ecclesiastical provinces of Toronto and St. Boniface was decided and a petition was added for the canonization of Sister Marie de l'Incarnation, foundress of the Quebec Ursulines. Bishop Baillargue attended the Vatican Council (1869), but was forced by ill-health to return before voting for papal infallibility, which he favoured. He died in 1880. He consecrated five bishops and ordained one hundred and ninety priests.

(16) Elzevir-Alexandre Taschereau, b. 1820; d. 1898, for several years teacher of philosophy in the seminary, and was one of the founders of Laval University; he was rector (1880-8), and again, in 1889, vicar-
general (1862), theologian of Archbishop Baillargeon at the Vatican Council, administrator (1870), archbishop (1871), cardinal of the title of Santa Maria della Victoria (1886). Among the many facts of his administration may be quoted: the foundation of the Hospital of the Holy Heart, which he entrusted to the Sisters of the General Hospital (1873); the erection of the Chictoutimi college and see (1878); the inauguration of a classical course of studies in the Commercial College of Lévis (1879); the creation of more than fifty parishes with the funds of colonization and of the Propagation of the Faith, kept since 1876 for local wants; the foundation (1892) of the now prosperous order of Our Lady of Perpetual Help, by the Abbé Broussard; the fifth (1873), sixth (1878), and seventh (1896) Councils of Quebec. Among the decrees must be mentioned that on the improvement of the theological and philosophical studies after St. Thomas’s principles, according to Leo XIII’s direction. Archbishop Taschereau had to deal with some perplexing cases: he was papal delegate for the division of Notre Dame parish in Montreal (1871), and the conclusion of his report was adopted by Cardinal Barnabo. In the excising question of Catholic Liberalism, his pastoral letters of 1875 and 1877 procured for the country a lasting peace. Another cause of discord was the universal issue of the decree “Jumundum” of 1886, which, by the decree “Jumundum” (1896), has become nearly independent. In 1888 the long pending debate on the Jesuits’ estates ended by an agreement between Prime Minister Mercier and Father Turgeon, S.J., authorized by Rome. The Government paid an indemnity of $400,000 to be divided among the Jesuits, Laval University, and the bishoprics for educational purposes. A share of $60,000 was granted to the Protestant Board of Education. When Cardinal Taschereau handed over the administration to his coadjutor (1894), the archdiocese contained 320,000 Catholics, 932 secular priests, 33 regulars, 3 colleges or seminaries, 65 convents, 195 churches and chapels, 192 parishes and missions, although more than 50 had been cut off for the new sees of Rimouski and Chietoutimi.

(17) Louis Nazerine Begein, b. 1840, after several years of studies in Rome, where he was ordained in 1865, filled in the seminary of Quebec the successive positions of professor of theology, director of students, and prefect of studies. Principal of the Laval Normal School, Bishop of Chietoutimi (1889), coadjutor of Quebec (1891) with the title of Archbishop of Cyrene, granted future succession (1892), he took possession of the see in 1898. He has written books on infallibility, the rule of faith, and the veneration of the saints. During his administration the archdiocese has greatly developed by the admission of several orders of men and women, and by the creation of many new parishes. He played a leading part in the struggle of the Canadian bishops against the unjust law of 1896, by which the Catholics of Manitoba had been deprived of their schools. After the delegation of Mgr. Merry del Val, now Secretary of State to Pius X, he received (1898) the Encyclical letter “Affari vos” (1897), in which Leo XIII, while he praised the bishops for their vindication of Catholic principles of education, advised union and charity when claiming justice. On the tercentenary of the foundation of Quebec (1908) a monument was erected to Bishop Laval. Important events are: the organization of the “Action sociale catholique”, a branch of the mother organization, the action sociale; the establishment of the seminary at Quebec since 1907; the first Plenary Council of Canada (1909), attended, under the presidency of Archbishop Sharette, delegate Apostolic, by 7 archbishops, 26 bishops, 1 prelate Apostolic, 1 mitred abbot, and 5 episcopal proxies. At this date (April, 1910) the decree of the same date as that of 1821, by which Paul Eugène Roy, b. 1859, was consecrated auxiliary bishop in 1908. His classical course was made in Quebec; after taking in France the degree of licentiate in letters, he was professor of rhetoric and prefect of studies in the Quebec seminary, became pastor of the Canadians at Hartford, Conn., and in 1901 was first missionary of Jacques-Cartier in Quebec. He is the chief force in the “Action Sociale”.

Organization.—The Archdiocese of Quebec is incorporated under the title “La Corporación Episcopale Catholique Romaine de Québec” by XII Victoria, ch. 36, which also grants (§ 7) incorporation to all dioceses then existing or to be afterwards erected in Canada. “L’Evêque catholique de Québec” was personally, and remains, incorporated by letter patent of Queen Victoria in 1845. Parishes receive civil incorporation after canonical erection, but possess their legal rights even without it. Church property, administered under the pastor’s presidency by churchwardens elected by parishioners, cannot be legally alienated without the bishop’s assent. In the ecclesiastical province of Quebec, a mutual insurance, with its seat in Quebec, covers risks on church buildings and parsonages to the amount of $7,500,000. A similar insurance exists for Catholic educational or charitable institutions.

The parochial church of Quebec is the cathedral. Begun in 1647, consecrated by Bishop Laval in 1666, rebuilt on a larger scale by Bishop Pontbriand (1744-9) and again, after the siege by Bishop Briand (1767-71), it was honoured in 1874 by the title of basilica. With the exception of a few students, sent every year to Europe to receive a training as professors, most of the clergy are educated in the higher seminary of Quebec. None is admitted until after satisfactory classical studies and two years of philosophy. The course of theology lasts four years. Four times a year all priests in office have to meet by groups of ten and are twelve to treat of questions of theology or church history determined by the bishop, to whom report must be sent. Two retreats every year are preached in the seminary, so that all the clergy may attend one or the other. An ecclesiastical association (“La Caisse St. Joseph”) grants a pension to its members out of office through sickness or old age.

Charities.—Two hospitals (Hôpital-Dieu) for the sick; 12 for old persons of both sexes; 7 orphansages; 3 patronages for foundlings; 1 refuge for repentant girls—all entrusted to religious orders; several prosperous societies or conferences of St. Vincent de Paul, a Tabernacle Society and an Association for the Protection of Maid Servants.

Religious Orders.—Male.—(The asterisk shows which have in the diocese a novitiate or at least a preparatory novitiate.) The Jesuits, Franciscans*, Capuchins*, Dominicans, White Fathers, Oblates, Fathers of the Sacred Heart*, Brothers of the Christian Schools, of Christian Instruction, of St. Viateur, of the Sacred Heart, Marists*, Fathers and Brothers of St. Vincent de Paul. The Fathers of St. Croix have a house and students following a year of theology at Laval. The Franciscans have their own classes of theology

Statistics (1910): 359,000 Catholics; 810 secular and 100 regular priests; 218 parishes and 25 missions; 206 churches and chapels (only two parishes are exclusively of Irish residents); 14 Franciscan Missionaries of Mercy*; 1 Sisters of the Mercy of Jesus*; of Charity*; of Jesus-Marie*; of the Holy Family; of Charity of St. Louis*; of St. Francis of Assisi, of the African Missions (White Sisters*); of St. Joseph of St. Valley*; of the Perpetual Help*; of the Holy Redeemer (Redemptoristines*); of the Precious Blood*; of Hope, and Cistercian Sisters of the Trappistines*.

The population of Quebec, Province of—Geography.—The province of Quebec occupies mainly the two slopes of the vast basin formed by the St. Lawrence River whose course is determined by a series of glacial ranges. Its boundaries are: to the north, the district of Ungava; to the northeast, Labrador; to the east, the Gulf of St. Lawrence; to the southeast, New Brunswick, and the States of Maine and New Hampshire; to the south, the States of Vermont and New York, and the Country of Glengarry and Prescott in Ontario; to the west, the province of Ontario. Quebec is comprised between the 45th and 54th degrees of latitude north, and the 57th and 79th degrees of longitude west of Greenwich. Its area is 361,870 square miles, about twice as large as that of the United Kingdom, France, Belgium, and Holland united. No country in the world of the same extent possesses so many and so abundant waterways, chief of which are the St. Lawrence, discharging the Great Lakes, and navigable to its very source, and its principal tributaries: the Ottawa, the Pembroke, and the Saguenay, each of which surpasses in navigability the largest rivers of Europe. Innumerable cascades falling from the Laurentian heights represent boundless mechanical forces; the forest resources of the province are immense, and the richest in the world. The principal cities are: Quebec, the capital, founded in 1608, population, according to the last census (1901), 68,840; Montreal, founded 1642, population, exclusive of lately annexed municipalities, 207,730; Three Rivers, founded 1834, population, 8,811; Quebec and Montreal, exclusive of that portion of the civil province depending on the metropolitan City of Ottawa, of 163,611, giving a total Catholic population for 1910 of 1,631,327, Quebec and Montreal, exclusive of that portion of the civil province depending on the metropolitan City of Ottawa, of 163,611, giving a total Catholic population for 1910 of 1,631,327, Quebec and Montreal, exclusive of that portion of the civil province depending on the metropolitan City of Ottawa, of 163,611, giving a total Catholic population for 1910 of 1,631,327, Quebec and Montreal, exclusive of that portion of the civil province depending on the metropolitan City of Ottawa, of 163,611, giving a total Catholic population for 1910 of 1,631,327, Quebec and Montreal, exclusive of that portion of the civil province depending on the metropolitan City of Ottawa, of 163,611, giving a total Catholic population for 1910 of 1,631,327.
proverbially numerous, in spite of a notable infantile death-rate, should be far greater, were it not for the continuous flow of emigration to the United States and to the western provinces of Canada, with a comparatively small immigration from Europe. The Roman Catholic and Protestant schools are organized according to authentic statistics, amounted to 10,000 for the single year of 1909. (For history, see CANADA.)

Correction and Education.—All penitentiaries and prisons are provided with Catholic chaplains subsidized by the State, and frequent days of obligation, as well as Sunday, are observed. Reformatories for youth are managed at the public expense by the Brothers of Charity for older boys, by the Sisters of the Good Shepherd for girls, and by the Sisters of Charity for younger children of both sexes, the Government contributing in the last two cases a per capita sum for a limited number of juveniles. The two largest sanitariums in the province are managed, by government contract, by the Sisters of Providence and of Charity, in Montreal and Quebec, respectively. Homes for idiots, enjoying government subsidies, are likewise in the care of religious. According to the latest available statistics (1908), the province of Quebec, with a ratio of 13:91 per 10,000 of population, comes fourth in order of excellence, after the three maritime provinces, where there has been no marked improvement in the last decade, the number of convictions according to population, being one for each 96 inhabitants, Prince Edward Island and New Brunswick alone surpassing Quebec.

Schools.—The public-school system in the province of Quebec, without being ideal, is, in a notable measure, respectful of the rights of the family and of the Church. This desirable condition results mainly from the constitution of the Council of Public Instruction, composed, ex officio, of the hierarchy of the Church, and of representatives of the laity, a normal school of the last named, and of an equal number of laymen. The latter are nominated exclusively by the lieutenant governor in council. The council is presided over by a superintendent of public instruction who represents the State; there is no minister of education, and politics are thereby partly excluded from the administration. Several principals of normal schools and lay professors have lately been added to the council. The council has the power to distribute a limited portion of the public moneys for primary and classical schools, to propose certain changes in the normal schools, to fix the fees of examiners for teaching licences, to approve or reject all textbooks. But its powers are more advisory than legislative, nearly all its deliberations being subject to government sanction. A committee similarly organized attends to the educational interests of the Protestant minority. The most striking feature of the Quebec school law is the absolute liberty enjoyed by each of the two chief religious denominations of controlling its own schools agreeably to the wishes of parents. In municipalities where Roman Catholics form the majority, Catholic schools cannot interfere with the rights of Protestants, and vice versa. In this respect, of all the school laws of the dominion, that of Quebec may justly be considered as the fairest and most conducive to religious harmony; never was a majority so liberal towards a minority. The school grants are even proportionally larger to the latter (the Protestant minority) than to the former. It has been rightly proclaimed that nowhere has the separate school law been more generously and conscientiously applied, and that, to the honour of French Catholic Quebec, there has never been any occasion to invoke government interference for the protection of the minority. This fair treatment extends likewise to the language. The French-speaking province of Quebec amply provides for the requirements of the English-speaking minorities, as regards education in their mother tongue. Moreover, a course of English, in many cases quite efficient, is given in every French school of the intermediate and higher grades. It must be noted that there is only one school law for the province, under which all the schools, Catholic and Protestant, are organized. To interest the people more deeply in the schools and give greater unity and strength to the system, the legislature has granted it on the parish organization. Each parish is thus incorporated three times: (1) for church affairs; (2) for municipal affairs; (3) for school affairs. The parish priest is eligible as school commissioner, and has the right to visit the schools with the exclusive choice of textbooks relating to religion. In parishes where there is a Protestant minority, the minority has a right to a dissentent separate school, controlled by special trustees. Lay inspectors, nominated by the governor in council, visit all schools under control of the school commissioners; diocesan clerical inspectors, chosen by the respective bishops, are authorized to visit even schools receiving a partial grant from the Government. Normal or training schools, based on the principle of denominationalism, were definitely created in 1857, two for the Catholics, one in Quebec for both sexes, the Laval, and one in Montreal, the Jacques-Cartier, for male teachers, and one for Protestants, in Montreal, the McGill. Theoretically, no separate schools for women teachers only have been established in Montreal, Three Rivers, Rimouski, Chicoutimi, St. Hyacinth, Hull, Sherbrooke, Valleyfield, Nicolet, and Joliette, under the management of religious foundations, and allowed to pre-existing educational institutions. In each of the ten Catholic normal schools of the province, the principal is a priest nominated by the Catholic committee. Another late improvement is the establishment of special schools of domestic economy under the management of sisters. (For legislation relating to the Church, see CANADA.)

The latest report of the superintendent of public education for the school year 1909–10 gives the following general statistics for the province of Quebec: schools, 6760; teachers, 14,000; pupils, 394,945; average attendance, 308,982; average per cent, 78.23. The same report shows an increase above the figures of the year previous of 7552 in the number of pupils. There has also been a considerable increase in the expenditure, due to grants for technical schools, and to the newly organized normal schools. The total government outlay for 1909–10 was $6,210,530, showing an increase above that of 1907–08 of $1,744,993. The contrast between the amount spent and the number of schools, teachers, and pupils, instead of signifying an inferior quality of education, testifies to the economy wrought by the employment of teaching religious orders, 5805 of whose members (out of a total of 14,000 teachers) are employed in the public schools. (For statistics regarding universities, classical colleges, and the several teaching orders, see CANADA.)

The accompanying table of comparative school statistics for the entire dominion was published officially.
by the Department of the Interior in 1908. (Those
marked with an asterisk are estimated.)

Of the two oldest provinces of the dominion, Ontario
and Quebec, the latter stands first as regards the
number of schools, of teachers, and of average attend-
ance, being inferior only in the number of pupils
(irrespective of the ratio to each population), and in
expenditure. About one-eleventh of the number of pupils
in the province of Quebec are non-Catholics

The following table, based on the preceding official
figures, shows the relative standing of each province of the
dominion, according to the percentage of average
attendance for 1908:

lic.

Queensland. See Brisbane, Archdiocese of.

Quelen, Hyacinthe-Louis de, Archbishop of
Paris, b. at Paris, 8 Oct., 1778; d. there 31 Dec., 1839.
He was educated at the Collège de Navarre, and under
the private tuition of M. Emery and other ecclesi-
sastics. Ordained in 1807, he served a year as Vicar-
General of St. Brieuc and then became secretary to Carrell
Fesch. When the latter was sent back to his dio-
cese, de Quelen exercised the sacred ministry
at St. Sulpice and in the military hospitals. Under the Restora-
tion of 1814 he became successively spiritual director of the schools in the archdio-
cese, Vicar-General of Paris, and coadjutor archbishop to Cardinal de Talleyrand-Périgord, succeeding the lat-
ter in 1821. The favours of Louis XVIII and Charles X
did not make him subservient. As a peer of the realm he opposed, on behalf of the middle classes, the conver-
sion of the national debt. At his reception into the French Academy he publicly lauded Chateaubriand,
then in disgrace. While blessing the corner-stone of the Chapelle Expiatoire he demanded, though in
vain, an amnesty for the excluded members of the
Convention; and the ordinance of 1828, disbanding the Jesuits and limiting the recruiting of the clergy,
was issued against his advice. Although de Quelen
had not approved the royal ordinance of July, 1830,
which aimed at restoring absolute monarchy, he was neverthe-
less but as regards the number of schools, of teachers, and of average attendance, being inferior only in the number of pupils (irrespective of the ratio to each population), and in expenditure. About one-eleventh of the number of pupils in the province of Quebec are non-Catholics.

did not make him subservient. As a peer of the realm he opposed, on behalf of the middle classes, the conver-
sion of the national debt. At his reception into the French Academy he publicly lauded Chateaubriand,
then in disgrace. While blessing the corner-stone of the Chapelle Expiatoire he demanded, though in
vain, an amnesty for the excluded members of the
Convention; and the ordinance of 1828, disbanding the Jesuits and limiting the recruiting of the clergy,
in his "Lyra Catholica" (1849), are easily accessible in the reprinted work (London, 1884). For first lines of the various translations, sources, authors, see Julian "Dict. of Hymnology" (2nd ed., London, 1907, 944). To his list should be added the translations of Archbishop Baghawe ("Hymnary and Missal Sequences", London, 1900, 106-7), and Judge Donahoe ("Early Christian Hymns", New York, 1908, 80-1). The revised form of the Latin text as well as the older forms, with variant readings and some interesting notes, may be found in Daniel ("Thesaurus Hymnologicus", I, 172; II, 382; IV, 135), and in Mone (Lateinische Hymnen des Mittelalters, II, 128-31). For Latin text and English tr., ancient plain song harmonized, and alternative musical setting, see "Hymns, Ancient and Medieval" (London, 1909, Hymn 222). The official or "typical" melody will be found in the "Antiphonary"

H. T. HENRY

Quercia, Jacopo della, sculptor, b. (it is said) at Quercia Grossa, near Siena, 1374; d. 20 October, 1438. His father, a goldsmith, taught him design. When art was sixteen he made an equestrian wooden statue for the funeral of Azzo Ubaldini; he is believed to have left Siena soon after this, owing to party strife and disturbances. In 1401 he reappeared in Florence, a competitor for the gates of S. Giovanni (assigned to Quercia); he executed in Ferrara various sculptures, notably the Madonna of the Pomegranate. One of his most exquisite works, the tomb of Ilaria del Carretto, second wife of Paolo Guinigi, is in the Cathedral of Lucca; dates about 1413. The Gothic altarpiece at S. Frediano, Lucca, with figures of Our Lady and saints (c. 1414) is by him. He spent ten years on his Fonte Gaia, in the Piazza del Campo, Siena; it has figures of Our Lady and of the theological and cardinal virtues, relics of the creation of man and expulsion from paradise, and various waterspouting animal forms. The fountain was restored by Tito Saracchi in 1868. Also in Siena (Baptistery of S. Giovanni) is the font made from Jacopo's designs (1417-30). The surrounding statuette, the Baptist, the marble reliefs of the Prophets, and one of the six bronze-gilt panels (Zacharias led out of the Temple) are from his hand. A very important work is the great doorway of St. Petronius, Bologna, with fifteen bas-reliefs of Genesis (1425-38). Raphael and Michelangelo are both indebted to these sculptures. In the ambulatory of S. Giacomo, Bologna, is the monument of Antonio Bentivoglio (d. 1435). The mandorla of the Assumption, Sta Maria del Fiore, Florence, has been claimed for Jacopo, but modern authorities give it to Nanni del Banco. The forms of Jacopole are highly tense, graceful, and animated.

Querétaro, Diocese of (de Querétaro), in Mexico, suffragan of Michoacán. Its area is that of the state of the same name, 4,492 sq. miles, population, 243,515 (m. c. 1910). The principal city, residence of the bishop and the governor, is Querétaro, population, 25,011, founded by the Otomi Indians in 1540, and occupied by the Spaniards since 1531. The Carmelites established themselves there in 1601, the Deguinos in 1615, the Fathers of Mercy in 1836, the Dominicans in 1846, the Augustinians and the Fathers of the Oratory of St. Philip also had houses in Querétaro. The Jesuit college of Saint Francis Xavier was suppressed in 1767 by Charles III on the occasion of the expulsion of all Jesuits from the Spanish possessions. One of the most notable institutions of Querétaro was the college of Apostolic missionaries, which Innocent XI called the greatest influence for the propagation of the Faith in the Indies. Missionaries went forth from it to evangelize Sonora, California, Texas, and Tamaulipas. In 1848 the Government of the Republic asked for some of its members to take charge of the missions of Sierra Gorda. Almost all of the present diocese of Querétaro formed part of the Archdiocese of Mexico until 26 January, 1882, when by the Bull "Optimum Maximum" of Pius IX, the See of Querétaro was created. The diocese has two seminaries with 288 students; it numbers 101 parochial schools and nine Catholic colleges, which together contain 5196 students. There are one Protestant college with 65 students and two Protestant churches. Adjoining the residence of the bishop, in the capital near the church of La Cruz, is the Convent of La Cruz, occupied as headquarters by Maximilian during the siege of the city by General Escobedo in May, 1867. The Capuchin Convent was used as a prison for the Emperor Maximilian and his two generals, Miramón and Mejía. It was on the hill of Las Campanas on the outskirts of the town that these generals were shot, 19 June, 1867. An elaborate mortuary chapel has replaced the former modest monument erected on the site. At Querétaro was ratified in 1848 the treaty by which Mexico ceded to the United States, at the close of the war, the territory covered by Texas, New Mexico, Arizona, and Upper California.

CAMILLO CIVILLI.

Quersel, Pasquier (Pachare), b. in Paris, 14 July, 1634; d. at Amsterdam, 2 December, 1719. Descended from an ancient noble family he completed at the Sorbonne a brilliant course in philosophy and theology. At the age of twenty-three he entered the congregation of the Oratory where his talents were
profitably employed in the direction of the young. He composed for the use of the students under his charge, and published in 1671 an "Épitome of the Morals of the Evangelists, or Christian Thoughts on the Texts of the Four Evangelists". By important successive developments, this work became The New Testament in French with Moral Reflections on each verse" (Paris, 1687-92) and gave rise to lively polemics until at last, in 1708, his doctrines were condemned by Clement XI (see JANSENIUS). But the edition of 1671 already contained five of the 101 propositions (12, 15, 30, 60, and 65) later censured in the Bull "Unigenitus". Quesnel was profoundly imbued with the errors of Baius and the Jansenists, and he had skilfully spread these views in his "Moral Reflections" on the New Testament. Furthermore, he had adopted, in relation to the papacy, the teaching of Marco Antonio de Dominis (q. v.) and of Richer. He published (Paris, 1675; Lyons, 1700) a complete edition of the works of Leo the Great. The notes and dissertations which he added, though very learned, are spoiled by his attacks upon infallibility, and even Roman primacy. In consequence, this work was placed under the ban of the Index, and Quesnel’s only reply to the condemnation was disrespectful recrimination. On account of his Jansenist opinions, which he emphasised more and more, he was relegated to Orléans. In 1684, having refused to subscribe to the formula which the General Assembly of the Oratory felt obliged to draw up against the current errors, he was compelled to quit the congregation. He then went to Belgium to join Antoine Arnauld, at whose death (1684) he was present, and whose place he took at the head of the party. The difficulties of a sojourn in a foreign land failed to dampen his ardour for proselytizing or abate his literary activity. The dictionary of Moreri attributes to him some sixty discourses, ascetic or polemical, several of which were published under assumed names or anonymously at Brussels, where for some time he remained in hiding. But in 1703 Philip V, acting in concert with the Archbishop of Mechlin, Humbert of Precipiano, had him arrested and imprisoned in the archiepiscopal palace. Nevertheless, he succeeded in escaping and reaching Holland, where, at Amsterdam, where he continued, despite all bans and censors, to write in support of his ideas. Obstinate in the pursuit of his aims, he was not always delicate in his choice of means. When the royal commissioners discovered him disguised in secular dress and crouching behind a cask, and wished to assure themselves of his identity, he declared that his name was Rebecq, one of his numerous pseudonyms. On the part of a man who like all those of his party scorned mental restrictions and equivocations, the expedient, to say the least, was singular. Still more disloyal was his attempt to cloak his doctrines with the authority of Bossuet. The latter had been requested to examine the text of the "Réflexions morales" and had consented to do so. He had even drawn up an advertisement as a preface to a new edition, insisting, however, on the correction of one hundred and twenty propositions which he had found reprehensible. As this condition was not accepted, he refused his co-operation and held back his proposed "Avertissement". But later on Quesnel obtained from the herald of Bossuet, the latter had prepared, and which he published as an authentic work under the title "Justification of the Moral Reflections, by the late M. Bossuet". Up to the time of his death the ardent Jansenist was incessant and insatiate. He re-proved and reproached the last sacraments, and in presence of two Apostolic prothonotaries and other witnesses, he made a profession of faith over his own signature, in which he declared "that he wished to die, as he had always lived, in the bosom of the Catholic Church, that he believed all the truths taught by her, condemned all the errors condemned by her, that he recognized the Sovereign Pontiff as the chief Vicar of Jesus Christ, and the Apostolic See as the centre of unity". That these formulas concealed some inadmissible restrictions is attested by the very teetotaler who left in doubt no view of Article 7 which completes them, and in which it is said the writer "persists in his appeal to a future General Council, regarding the constitution "Unigenitus", and regarding the grievances à propos of which he sought the judgment of the Court".

Among the numerous works of Quesnel besides those already mentioned we may cite especially: "Lettres contre les audités adressées aux religieuses qui ont soin de l’éducation des filles"; "L’Idée du Sacerdoce et du Sacrifice de Jésus Christ"; "Les trois consécritures: la consécration baptismale, la sacerdotale et la consécration religieuse"; "Élvation à N. S. J. C. sur sa Passion et sa Mort"; "Jésus pénitent"; "Du bonheur de la mort chrétienne"; "Prières chrétiennes avec des pratiques de piété"; "Office de Jésus avec des réflexions"; "Recueil de lettres spirituelles sur divers sujets de la morale et de la piété"; under the pseudonym of Géry, "Apologie historique de deux censures (contre Lessius) de l’Université de Douais"; under the pseudonym of Geermin, "Tradition de l’Eglise Romaine sur la prédestination des saints et sur la grâce efficace"; "La discipline de l’Eglise tirée du Nouveau Testament et de quelques anciens conciles"; "Causa Arnoldina", a work produced under another form as "La justification de M. Arnauld"; "Entretiens sur le sacrement de Rome contre les Jésuites de Châlons accompagnées de réflexions morales"; finally seven "Mémoires" serving as a history of the constitution "Unigenitus". This list, however incomplete, comprises in its first part only the most generally useful and edifying works; as a offset the seven last numbers are either impregnated with the Jansenist principles or consecrated principally to their defence.

QUESNELISM.—The theological errors of Quesnel found their most complete expression in his "Réflexions morales". Although they appear there only on certain occasions, during a very long period in which some are more hidden in the expression of pious considerations, they really form a systematic work which shows their author to have adopted a radically false but coherent system, which is fundamentally only a synthesis of the systems of Baius and Jansenius. To make this clear, one has only to compare the hundred and one propositions condemned in the Bull "Unigenitus", and faithfully extracted from the "Réflexions morales" with the theories previously defended by the Bishop of Ypres and his predecessors in the University of Louvain. For Quesnel, like Baius, conceived human nature in its three successive states: innocence, fall, and restoration. All his essential theories are based on a confusion between the natural and the supernatural order, which necess
sarily entailed the assertion of an intrinsic difference in regard to gratuity as well as to efficacy, between the grace of the Creator and the grace of the Redeemer. "The grace of Adam produced only human merits" (prop. 34); but "being a consequence of the creation, it was due to nature when whole and unimpaired" (prop. 35). Its loss through the original fall mutilated one nature, and man has become "a sinner is, without the grace of the Liberator, free only to do evil" (prop. 38). Moreover, this grace "is never given except by faith" (prop. 26). Faith which is the first grace and the source of all the others, is "the thing delivered Him by God, to be unimpeded faith, and it works only by charity" (prop. 51). Consequently "outside of the Church no grace is given" (prop. 29), and "the first grace given to the sinner being the remission of sins" (prop. 28), all his acts, as long as he remains a sinner, are sins (prop. 44-8), so that "the prayer of the wicked is a new sin, and what God grants to them is a fresh condemnation" (prop. 59).

This is all resumed in the thesis of the double contrary love: There are only two loves, from which all the others are born; (1) our affection of God (charity properly so called) which refers everything to God and which God rewards; and love of self and of the world, which is evil as it does not refer to God what should be referred to Him (prop. 45). This reading not only of the malice and the evil effects of attrition, that is, of all repentance which does not arise from pure charity; for, "fear restrains only the hands; the heart remains attached to sin, as long as it is not led by the love of justice" (prop. 61); and "he who refrains from evil only through fear of punishment has already sinned in his heart" (prop. 62). Thus, the erroneous conception of the really gratuitous and supernatural character of the original grace bore its legitimate fruits, rigorism and despair; it resulted, as far as concerns attrition, in a conclusion already condemned by the Council of Trent. In Quenael we find likewise the doctrine of the "Augustinus" (see JANSSENIS). Like that famous book, the "Réflexions Morales" did not admit either purely sufficient grace or real liberty of indifference; on the contrary, it denied them both: "Charity is the operation of the omnipotent hand of God, which nothing can hinder or retard" (prop. 10), "it is nothing but the omnipotent will of God who commands and who executes his commands" (prop. 11). "When God wills to contemplate, in its entirety, the whole soul, the will of God is infallibly carried into effect" (prop. 12). "When God wills to save a soul and touches it with the interior hand of his grace, no human will can resist it" (prop. 13); "there is no attraction but yields to the attraction of grace, because nothing resists the Omnipotent" (prop. 16). In a word, the action of grace can and must be likened to that by which God created the world, realised the Incarnation, raised Jesus Christ from the dead, and by which He worked every other miracle (prop. 20). The doctrine of Chauchet was not astonishing then, inasmuch as the Divine precepts cannot be observed by men of good will who make the effort. For, on the one hand, "the grace of Jesus Christ, the efficacious principle of all good, is necessary for any good work whatsoever; without it not only is nothing done but nothing can be done" (prop. 2); "the will without prevenient grace has no light save to go wrong, no zeal but to hasten to destruction, no strength but to wound itself: it is capable of all evil, and incapable of any good" (prop. 39). On the other hand, when grace is given, even in so slight a degree that the grace acts, therefore anyone fail in his duty, it can only be because he has not received the indispensable grace. For "grace is that voice of the Father teaching men interiorly and leading them to Jesus Christ; who-

ever, having heard the exterior voice of the Sun, does not come to him, has not been taught by the Father" (prop. 17). And yet, according to Quenael, man will be held guilty and condemned for those transgressions which he cannot possibly avoid (prop. 40). But, since the observing of commandments and therefore of the conditions necessary for salvation is not within the reach of all, it is cruel that one should bear the intention of God to save nor the efficacy of the sufferings of the Saviour extend to all mankind. So "all those whom God wishes to save through Christ are infallibly saved" (prop. 30), and if "Christ Himself delivered Him to death, why is it not only to snatch the first-born, that is the elect, from the hand of the exterminating angel" (prop. 32).

All these extraordinary ideas of Quenael's concerning grace, and his obstinate defence of them against legitimate authority, had, as a practical and logical result, a second group of errors no less serious about the Church, its membership, discipline, and government in general. According to Quenael, the Church is invisible; for it comprises "as members only the saints" or "the elect and the just" (prop. 72-7), and even according to the Gospel as much as by not believing in the Gospel" (prop. 78). It is an abuse in the Church "to forbid Christians to read the Holy Scriptures and especially the Gospel" (prop. 85), one of which is to be read at least in Church "at least in the liturgy, and at all times" (prop. 79-84). "It is the Church that has the power of excommunicating, to be used by the chief pastors with the consent, at least presumed, of the whole body" (prop. 90). This, as the author states explicitly in his seventh "Mémoire", supposes that the multitude of the faithful, without distinction of rank, is properly speaking the sole depository of all ecclesiastical power; but, as it cannot exercise this power by itself, the community entrusts it to the bishops and the pope, who are its agents and its mandates; and, in this sense, the pope is only "the ministerial head" of the episcopal body. Moreover, "the fear of an unjust excommunication must never keep us from doing our duty" (prop. 91), "to suffer in peace an undeserved excommunication and anathema rather than betray the truth" (quoting the St. Vincent council) (prop. 12). The directly personal character and object of these last declarations are apparent. The same may be said of the articles that protest against the abuse of multiplying oaths among Christians (prop. 101), or speak of the "false prophecy and the error of the modern age" (prop. 105-111), or the "truth is subjected (prop. 93-100), and which, crowning this sad arrayment with an assertion more offensive than the others, see in the abuses pretended to have been discovered "one of the most striking proofs of the senile decay of the Church" (prop. 95).
Pacific Ocean, is not the least. Las Casas accused Quevedo of having violated a trust, accumulated wealth, and neglected the Indians; but Las Casas was far from being in his condemnation. It is impossible to determine how much truth the charges contain. Quevedo returned to Spain (1518) and presented two memorials to King Charles. One was against Pedrarías, and the other advocated restricting the powers of all governors in the New World for the better protection of the natives. When these documents were shown to Las Casas, he offered them, appeared to be a race of men whom it would be impossible to instruct or improve unless they were collected in villages or missions and kept under continuous supervision. In this he was right, as all subsequent experience has shown. Bishop Quevedo soon fell sick and died at Barcelona.

ZEPHYRN ENGELHARDT.

Quiche (Uatlactca), the principal aboriginal tribe or nation of Guatemala. They belong to the great Mayan linguistic stock (see Maya Indians), as do also their neighbours in the same state, the Cakchiquel, Pokochi, and Tzutuhil, the four dialects constituting but one language. The Quiche occupied north-central Guatemala, including the present districts of Quiche, Totonicapan, and a part of Quesaltenango. Like those of the other Mayan tribes, their traditions pointed to a northern or north-eastern origin, and their fairly authentic history went back to about A. D. 700. (Maya history seems fairly authentic as far back as the second century.) They were subjugated by Pedro de Alvarado about 1525, with even more than the customary atrocities, and rapidly declined under the system of slavery and heavy tribute imposed, notwithstanding the warnings of the pope and the humane laws promulgated by the Spanish monarch, at the instance of Las Casas. Even before the conquest was complete the Dominican Fathers Pontaz and de Torres had taken up their residence among the Quiche and begun the work of Christianization. In 1530 Father Marquardt (d. 1533) arrived from Spain to organize the Church in Guatemala, and in 1533 was confirmed as bishop. He gave special attention to the Indians and their languages, becoming particularly proficient in the Quiche, into which language he translated the catechism. On his appeal the Spanish Viceroy of Guatemala (1536) established at Santiago a convent of Dominicans for the conversion of the natives. They were reinforced two years later by Fathers Zambrano and Dardon, of the Order of Mercy (Merced), who established a convent of that order in the same city. Under these two orders, working in harmony together with the Franciscans, who entered the field in 1541, the conversion of the Indians was gradually effected, the new converts being gathered into towns for their better government and instruction. The entire tribe is long since Christian, although many of the ancient rites and beliefs persist in daily life. Their present number is near 150,000.

In agricultural habit, architecture, literary method and productiveness, religious ceremonial, and general culture, the ancient Quiche resembled the Maya, with only minor differences. In their genealogy was recorded in the "Popol Vuh", the earth was brought into form by Gugumatz, the Plumed Serpent (equivalent to the Quetzalecatl of the Aztec), who finally created four men and four women, who became the ancestors of the race, assigning to each pair at the same time a special tutelary god, whose first duty it was to produce fire and light, to clear the world of evil monsters and to institute ceremonies and sacrifices.

The "Popol Vuh", or "National Book", the great literary monument of the Quiche, is a compendium of their ancient traditions handed down from before the conquest. The present version, evidently a copy from an older record, was written in the Quiche language by one of the tribe, apparently shortly after the conquest. It was first brought to attention through a Spanish translation by the Dominican Father Francisco Ximénez (c. 1725). In 1861 a more correct French translation, with the original text, was published in Paris by the Abbé Brasseur de Bourbourg. Of the work Brinton says: "This may well be considered one of the most valuable monuments of ancient American literature and its substantial authenticity cannot be doubted."

Quichua Indians, formerly the dominant people of the Empire of Peru, and still the largest homogeneous body of Indians in existence, constituting the bulk of the rural population of Peru and Ecuador. The name—written also Quichus, Quechuas, Kechua—most probably signifies those who "speak correctly", as distinguished from tribes of alien stock. Innumerable tribes or small nations comprising the Quichuan linguistic stock occupied a territory nearly conterminous with that of the empire at its greatest extent, but reaching out somewhat beyond its borders on the north, and extending on the south, with interruptions, to about Coquimbo, Chile, at 30° S. lat. The Incas seem to have had their original territory somewhere between Paucartambo and Cuzco. The Quichua proper, living south from Cuzco, were among their earliest conquests. Of the cognate tribes the principal were the Huanacavira, Manta, Cara, Cañari, and Quitu (Ecuador); the Llanos, Rucanos, and Quichua proper (Peru), the latter about Cuzco and the upper Apurimac in central Peru, all of a high stage of civilization; the cognate Malaba and other small tribes above Esmeraldas, on the Ecuador-Colombia frontier, remained unconquered and uncivilized. Of the nations or tribes conquered and incorporated by the empire, but of alien stock, the principal were the Aymará tribes, on the Peru-Bolivia border; the Yunga tribes, on the coast from the Gulf of Guayasiquil to below Truxillo; and the Calchaqui, in north-west Argentina. The Aymará were probably the direct originators and inspirers of the Quichua civilization, and still preserve their separate identity and language to the number of over half a million souls of pure or
mixed blood. At the period of its greatest expansion, about the year 1500, the Empire of Peru probably contained at least ten million souls. Under the Spaniards the natives rapidly decreased. In 1590 an official census gave them as 8,280,000 souls.

In 1839 d’Orbigny estimated the Quichua and Aymaräter respectively at approximately 1,306,060 and 581,000 souls, about one third of each being of mixed blood. The present total probably approximates 2,500,000, but separate Indian figures are not available.

The foundations of Quichua history are laid in the mythic period, but the sequence of events may be traced with fair degree of probability back to about the year 1000. According to tradition their culture hero appeared first at Tiahuanaco (Lake Titicaca); he brought about order upon earth and apportioned its sovereignty among four rulers, one of whom was Ayra-Manco. Ayra-Manco was one of three wonderworking brothers, who, with their three sisters, had their residence at Paveco-tambo, "House of Veneration", south of the site of Cusco, or according to another version, at Paucar-tambo, "House of Beauty", some two hundred miles to the north-west. Owing to a dispute over the possession of a magic golden slings, the brothers separated, two of them being finally transformed into stone statues, while the third, by supernatural command journeyed to Cusco (i.e., navel, or centre), where he built a temple to the sun and established his capital as the first Inca king of Peru, under the title of Manco Capac, "Manco the Ruler". Eliminating the mythic features, Manco Capac's period is fixed by Bollaert at about the middle of the eleventh century. Without conceding the extravagant claims of Montesinos, who gives a list of 101 Inca rulers up to the Spanish conquest, we may assume that his work fairly summarizes the history and traditions of the Quichua. The earlier rulers seem to have devoted their attention largely to the elaboration of a calendar, the regulation of religion, and the building up of their kingdom by concessions of land to refugees from various quarters. Almost from the beginning there were established clustered orders of priests and virgins of the sun.

There is probably no foundation for the claim advanced by Montesinos that the use of letters was known in remote antiquity, but subsequently lost. As far as known, the quipu was the only mnemonic system in use in Peru. Rocca, the eleventh (?) ruler before the conquest, is said to have been the first to assume to himself and his successors the title of Inca. The Calchaqui of Tucuman were subdued under Viracocha (about 1390); the Chinchas and Chimú, to the latter of whom belonged the great temple of Pachacamac, about 1400. The Moços of eastern Bolivia were brought into alliance by Yupanqui (d. 1430). Tupac Yupanqui, toward the close of the fifteenth century, subdued the Cañari of Ecuador, and began the conquest of Quichua, which was accomplished by his son, Huayna Capac, in 1487. Huayna Capac divided the sovereignty between his two sons, giving Quito and the northern provinces to Atahualpa, and leaving the southern provinces, or Peru proper, to Huascar. On his death in 1525 civil war soon broke out, and almost at the same time Pisarro's band landed on the coast. Huascar was captured by his royal brother and was killed in 1533. Within the year the Empire of Peru was brought to an end, after a short struggle, by the treacherous seizure of Atahualpa himself by Pizarro, by whom he was executed on 29 August, 1533 (see Peru). Tupac Amaru, nephew of Huascar and last of the direct claimants to imperial dignity, was beheaded by order of the viceroy in 1571.

The natives were now parcelled out into repartimientos and miltayos as slaves, or forced labourers, the result being the swift and terrible waning of their numbers. Although the spirit of the Indians was well-nigh broken there were occasional outbreaks, the most notable of which was the great rising of 1780 led by another Tupac Amaru, claiming descent from the old Inca race, who for a time restored Indian supremacy over a large extent of territory. Being finally taken he was butchered at Cusco, together with his wife, children and all his relatives, with a barbarous cruelty never exceeded in history. His sacrifice, however, resulted in a mitigation of the oppressive system, which was finally abolished at the close of the war of independence (1824), in which the Indians bore their full part. With the establishment of settled conditions after the Conquest, the work of Christianizing the natives was begun, chiefly by the Dominicans and Jesuits, and before the close of the seventeenth century practically the whole of the native race of the former empire, west of the Cordilleras, was converted.

The civilization of the ancient Quichua was not quite equal in some respects to that of the Maya nations of Yucatan and Guatemala. The social organization, while imperial in form, was really based upon the clan system. For administrative purposes the empire was divided into four great districts (rumpa), respectively north, south, east, and west from Cusco, the capital. Land was held and tilted by the clan in common, and every able-bodied person, not assigned to other service, was a producer. Of the crop, one-fourth was assigned to the workers and their families; one-fourth to the dependent sick, widows, and orphans; one-fourth to the Government,
and one-fourth to religion. From the one-half claimed for Government and religion a portion was held in reserve for famine seasons and other emergencies. Seeds, wool, leather, and cotton were also distributed, under supervision of the Government, which also regulated the ownership of livestock. Military service was a universal obligation.

To hasten the assimilation of the conquered peoples, large bodies of them were regularly colonized in the older portions of the empire, the inhabitants of these latter districts being transplant- ed to the new possessions. The religion of the Sun was made obligatory throughout the empire as was also, so far as possible, the use of the Quichua language.

There seems to be no doubt that the ancient Peruvians had attained the monotheistic idea. Their god was the Sun from whom the Incas themselves claimed descent, although the white-skinned and bearded culture hero, Viracocha, "Sea Foam" (?), apparently a personification of the dawn, was regarded with almost equal veneration. The emperor was the great high priest of the nation. The ceremonial forms were elaborate and magnificent and without the bloody rites so frequent and sickening in other native systems. The great Temple of the Sun in Cuzco contained a massive golden image of the sun, and the walls and roof were covered with plates of solid gold, which the unfortunate Atahualla in vain delivered as a ransom to the faithless Pizarro. The great Sun temple at Quito and the temple dedicated to the Yuncas god Pachacamac were of nearly equal magnificence. The dead were wrapped in cloths and deposited in graves or tombs of various construction. At Ancón on the coast is a vast necropolis from which thousands of mummified bodies have been resurrected. Near Trujillo, in the Yuncas country, are several great burial pyramids, one of them two hundred feet high, filled with bodies in separate niches. From one of these pyramids sixteen millions of dollars in gold are said to have been taken.

The golden wealth of Peru under the Incas almost surpasses belief. The country was rich in the precious metal, which was systematically mined by the Government. Silver was mined in due proportion and worked, like gold, into objects of skill and beauty. Tools, weapons and household implements were fashioned of copper, bronze, and stone. Iron was unknown. Emeralds and porphyry were in use for decorative or sculptural purposes. Their potters excelled in general workmanship and in variety and ingenuity of design. Head flattening prevailed. Clothing, blankets, and other textile fabrics were woven from cotton and from the hair of their flocks. Agriculture had reached a high standard, with systematic irrigation, mountain terracing and use of guano manure from the coast islands. Great herds of llamas and alpacas were kept as burden-bearers or for their hair. The vicuña was protected for game purposes. It is in architecture and engineering that the Quichua have left their most enduring monument. Their temples, fortresses, canals, and stupendous mountain roads are still the wonder of every traveller; and the great imperial highway stretching along the Andes for a thousand miles from Cuzco to Quito was the equal of any of the famous Roman roads, and is still in good preservation.

The modern Quichua is of medium height, with large chest, dark-brown skin, and well-marked features; strong, enduring and long lived; industrious, gentle, and disposed to melancholy. He is given to music and song recitation. He is fond of church ceremonial, with which he frequently mingles some of his ancient rites and loves to set up wayside shrines and decorate them with flowers. Their houses, outside of the towns, are of stone or wood, and thatched with grass, of one room, without window or chimney. Their favourite dish is cuya, a highly peppered meat stew, and the favourite intoxicant is chicha, of corn chewed, boiled with water, and fermented. They are great smokers. They are dressed in woollen clothing of their own weaving, generally surmounted by a cloak, and a white sombrero or skull-cap. The Quichua language has been extensively cultivated; it is capable of expressing fine shades of meaning. Of the several dialects, that of Cuzco is considered the standard and that of Quito the most remote. It is still the language of Ecuador and Peru, outside of the principal cities, and even of the wild tribes formerly attached to the Jesuit and Franciscan missions of the upper tributaries of the Amazon. The earliest study of it is the "Gramática de la lengua general del Perú", by the Dominican Father Domingo de Santo Tomás (Valladolid, 1560). Between that date and 1754 nine other grammars and dictionaries by the missionaries were published at Lima. Of modern studies the most important are: Markham, "Grammar and Dictionary of Quichua"

---

**Earthly Vase from Trujillo, probably of Yuncas Origin**

**Megalliego "Sun Circle" sillantani near Renq, South Peru, probably of Atacama Origin**

(London, 1884); Anchorena, "Gramática Quechua" (Lima, 1874); von Tschudi, "Organismus der Khetaua Sprache" (Leipzig, 1887); and Middendorf, "Das Ruma Simi oder die Keshua Sprache" (Leipzig, 1890). Of its abundant native literature the most remarkable example is the pre-Conquest dramas of Atlanqa, of which the best of many editions is that of Zegarra, "Ollanta: Drame en vers Quechua du temps des Incas" (Paris, 1787, tr. London, 1871). A collection of modern native folk songs, under the title of "Yarwas. Quitenos", was published by España at Madrid in 1881.
QUICUMQUE

JAMES MOONEY

Quicumque Christum queritis, the opening line of the twelfth (in honour of the Epiphany) and last part of the Presanctified (q. v.). This twelfth poem or hymn contains 52 tetrabody strophes, and an irregular selection from its 208 lines has furnished four hymns to the Roman Breviary, all of which conclude with the usual Marian doxology ("Jeux tibi sit gloria," etc.), not composed by Prudentius, slightly varied to make the doxology appropriate for the several feasts employing it.

The four centos are:

1. Quicumque Christum queritis (Matins and first and second Vespers of the feast of the Transfiguration), comprising ten strophes (lines 41-44, 45-50) and the doxology (which changes its second line):

   Jeux, tibi sit gloria, Qui te revellas parvulis, etc.

Although written for the Epiphany, the lines forming the cento apply well to the Transfiguration, as Daniel notes (Thes. Hymnol., I, p. 138). Of the 18 translations in English verse, two are by Catholics.

2. O sola magnificum urbs (introduced by Pius V into the office of the Epiphany and assigned to Laudes), comprises six strophes (77-80, 5-8, 61-4, 69-72) with the doxology (which changes its second line):

   Jeux, tibi sit gloria, Qui apparaisti gentibus, etc.

The Roman Breviary changes the opening words of the second strophe, "Hac stella" into "Quem stella". The hymn has never been adopted by the Catharians, Cistercians, Dominicans (these last using at Lauds the hymn "A paene unigenitus"). Of the seventeen translations into English verse, six are by Catholics.

3. Audis tyrannus anxius (Matins of the Holy Innocents and of the octave day), comprising twelve strophes (93-100, 135-6) and the (unchanged) doxology, "Jeux tibi sit gloria," etc. The Roman Breviary changes the opening word of the third strophe "Quo proficit" into "Quid proficit".

4. Sallve flores martyrum (Lauds and Vespers of feast of the Holy Innocents and of the octave day), comprising (in the Roman Breviary cento) 13 strophes (125-132) and the (unchanged) doxology, "Jeux, tibi sit gloria," etc. The third line of the second strophe is, in the Roman Breviary, "Aram sub isam ..." instead of the original "Aram antae isam ..."

There are in all about twenty-five versions into English, of which about half are by Catholics.

JULIAN, Dict. of Hymnology (2nd ed.), 404, 1900, for first lines of translations, etc. To his list should be added the text of all four hymns in BROSSAWS, Breviary Hymns and Missal Sequences (London, 1900), and in DONAHUE, Early Christian Hymns (New York, 1908); also, HENRY, Hymns of the Holy Innocents in Ecclesiastical Review (Dec., 1899), 557-558, for Latin text and English translation and comment; KELLNER, Kirchenlied (Hamburg, 1895), for German translation and comment of the Holy Innocents; TANNACH, Sacred Latin Poetry (3rd ed., London, 1874), gives Latin text (in 36 no. of no. 4); Hymns Ancient and Modern, historical ed. (London, 1909), nos. 72, 82, for Latin and English texts; musical forms and comment on (36) of the latter.}

H. T. HENRY.
Quietism

Councils of (Kierzy, Carlsbadum). Several councils were held at Quièry, a royal residence under the Carolingians, but now an insignificant village on the Oise in the French Department of Aisne. The synod of September, 838, ordered the monks of Saint Calais in the Diocese of Le Mans to return to their monastery, from which they falsely claimed to have been expelled. The bishop had also condemned some of the liturgical opinions of Amalarius of Metz (q. v.). The two succeeding councils, held respectively in 849 and 853, dealt with Gotteschick (q. v.) and his peculiar teaching respecting predestination. The first of these meetings sentenced the recalcitrant monk to corporal castigation, deposition from the priestly office and imprisonment; his books were to be burned. At the second synod the famous four decrees or chapters (Capitula) drawn up by Hinomar (q. v.) on the predestination question were published. They asserted: (1) the predestina-
tion of some to salvation, and, in consequence of Divine foreknowledge, the doom of others to everlasting punishment; (2) the remedy for evil tendencies of free will through grace; (3) the Divine in-
tention as the union. The first of these meetings sentences the recalcitrant monk to corporal castigation, deposition from the priestly office and imprisonment; his books were to be burned. At the second synod the famous four decresses or chapters (Capitula) drawn up by Hinomar (q. v.) on the predestination question were published. They asserted: (1) the predestina-
tion of some to salvation, and, in consequence of Divine foreknowledge, the doom of others to everlasting punishment; (2) the remedy for evil tendencies of free will through grace; (3) the Divine in-
tention as the union. The first of these meetings sentences the recalcitrant monk to corporal castigation, deposition from the priestly office and imprisonment; his books were to be burned. (6) Even then it is subject to interruptions and alterations of intensity, sometimes strong and sometimes weak.

The prayer of quiet does not entirely impede the exercise of the faculties of the soul. The will alone remains captive. The intellect and memory appear to have greater activity for the things of God in this state, but not their power to act. The whole world seems even escape the bounds of restraint and wander on strange and useless thoughts, and yet the will, attracted by the charm of the Divine presence, continues its delights, not wholly in a passive way, but capable of eliciting the Courts of actions and aspirations. As to the bodily senses St. Francis de Sales tells us that persons during the prayer of quiet can hear and remember things said near them; and, quoting St. Teresa, he observes that it is a species of superstitious to be so jealous of our repose as to refrain from coughing, and almost from breathing for fear of losing it. God who is the author of this peace will not deprive us of it for unavoidable bodily motions, or even for involuntary wanderings of the imagination. The spiritual fruits are, interior peace which remains after the time of prayer; and the disposition for spiritual duties, a heavenly light in the intellect, and stability of the will in goodness. It is by such truths true mystics may be discerned and distinguished from false mystics.

Quietism (Lat. quies, quieta, passivity) in the broadest sense is the doctrine which declares that man's highest perfection consists in a sort of psychical self-anamolization and a consequent absorption of the soul into the Divine Essence even during the present life. In the state of "quietude" the mind is wholly inactive; it no longer thinks or wills on its own account, but remains passive while God acts within it. Quietism is thus generally speaking a sort of false or exaggerated mysticism (q. v.), which under the guise of the loftiest spirituality contains erroneous notions which, if consistently followed, would prove fatal to morality. It is fostered by Pantheism and similar theories, and it involves peculiar notions concerning the Divine co-operation in human acts. In a narrower sense Quietism designates the mystical element in the teaching of various sects which have sprung up under the influence of one or more of the chief religious orders. This mystic gift cannot be acquired, because it is supernatural. It is God Himself who makes His presence felt in the inmost soul. The certain sight of God therein obtained is not the same as the light of faith, though it is founded upon faith. The gift of wisdom is especially employed in this degree, as it is in every degree of contemplation. According to Scaaramelli the office of this gift, at least to a certain extent, is to render God present to the soul and so much the more present as the gift is more abundant. Scaaramelli also holds that this is the ordinary gift of wisdom which is necessarily connected with sanctifying grace and is possessed by every just man, but of wisdom as one of the charismata or extraordinary graces of the Holy Ghost, specially granted to privileged souls.

(1) At first the prayer of quiet is given from time to time only and then merely for a few minutes. (2) It takes place when the soul has already arrived at the prayer of recollection and silence, or what some authors call the prayer of simplicity. (3) A degree of prayer is not a definite state excluding reversions to former states. (4) A time often comes when the prayer of quiet is not only very frequent but habitual. In this case it occurs not only at the time set for prayer, but every time that the thought of God presents itself.
QUETISM

returns the indifference aimed at by the Oriental mystics. The wise man is he who has become independent, and free from all desire. According to some of the Stoics, the sage may indulge in the lowest kind of sensualities, so far as the body is concerned, without incurring the least defilement of his soul. The Neoplatonists held that the Nous or Intellect, this to the world-soul, and this again to individual souls. These, in consequence of their union with matter, have forgotten their Divine origin. Hence the fundamental principle of morality is the idea of the soul itself as such. The Supreme dominion of nature and his highest happiness in rising to the contemplation of the One, not by thought but by ecstasy (ekeinos).

The origin of these quietistic tendencies is not hard to discover. However strongly the Pantheistic conception of the world may appeal to the philosophic mind, it cannot do away with the obvious data of experience. To say that the soul is part of the Divine being or an emanation from God enhances, apparently, the dignity of man; but there still remains the fact that nothing can be accomplished, anything but Divine. Hence the craving for deliverance and peace which can be obtained only by some sort of withdrawal from action and from dependence on external things, and by a consequent, immersion, more or less complete, in the Divine being. These abstractions from the world, or from the contemplation of Christianity, had revealed to mankind the truth concerning God, the moral order, and human destiny. Gnosticism (q. v.), especially the Antinomian School, looked for salvation in a sort of intuitive knowledge of the Divine which emancipated the ‘spiritual’ from the obligations of the moral law. The same quietistic tendency appears in the teaching of the Euchites, or Messalians (q. v.), who maintained that prayer frees the body from passion and the soul from evil inclination, so that sacramentals and penitential works are useless. They were condemned at the Synod of Nice in 318 (383) and at Ephesus (431). The Bogomil (q. v.) of the later Middle Ages were probably their lineal descendants.

Medieval Quietism is further represented in the vagaries of Blasius Chaum (q. v.), according to which the supreme aim of life on earth is the contemplation of the uncreated light whereby man is intimately united with God. The means for attaining to such contemplation are prayer, complete repose of body and soul, and the suppression of all passions. Errors of the Beguines (q. v.) and Beghards condemned by the Council of Vienne (1311–12) are the propositions: that man in the present life can attain such a degree of perfection as to become utterly impovable; that the ‘perfect’ have no need to fast or pray, but may freely grant the body whatsoever it craves; that they are not subject to any human authority or bound by the precepts of the Church (see Denzinger-Bannwart, 471 sqq.). Similar exaggerations on the part of the Fritacelites (q. v.) led to their condemnation by the Council of Xi (1317) (Denzinger-Bannwart, 484 sqq.). The same pope in 1329 proscribed among the errors of Meister Eckhart (q. v.) the assertions that (prop. 10) we are totally transformed into God just as in the sacrament the bread is changed into the Body of Christ; (14) since God wills that I should have sinned I do not wish that I had not sinned; that (18) we should bring forth the fruit not of external actions, which do not make us good, but of internal actions which are wrought by the Father abiding within us (Denzinger-Bannwart, 501 sqq.).

Quite in accord with their Pantheistic principles, the Brethren and Sisters of the Free Spirit (thirteenth to fourteenth centuries) held that they who have reached perfection, i.e., complete absorption in God, have no need of external worship, of sacraments, or of prayer; they owe no obedience to any law, since their will is identical with God’s will; and they may indulge in the carnal desires to any extent without staining the soul. This is also substantially the teaching of the Illuminati (Almbrados), a sect that disturbed Spain during the sixteenth and seventeenth centuries.

Michael de Montaigne also developed Quietism in the strictest sense of the term. From his writings, especially from his “Dux spiritualis” (Rome, 1675), sixty-eight propositions were extracted and condemned by Innocent XI in 1687 (Denzinger-Bannwart, 1221 sqq.). The key-note of the system is contained in the first proposition: man must annihilate his powers and this is the inward way (via interna); in fact, the desire to do anything actively is offensive to God and hence one must abandon oneself entirely to God and thereafter remain as a lifeless body (prop. 2). By doing nothing the soul annihilates itself and returns to its source, the essence of God, in which it is transformed and divinized, and then God abides in it (5). In this inward way, the soul has not to think either of reward or of punishment, of heaven or hell, nor yet of anything but Divine. Hence the craving for deliverance and peace which can be obtained only by some sort of withdrawal from action and from dependence on external things, and by a consequent, immersion, more or less complete, in the Divine being. These abstractions from the world, or from the contemplation of Christianity, had revealed to mankind the truth concerning God, the moral order, and human destiny. Gnosticism (q. v.), especially the Antinomian School, looked for salvation in a sort of intuitive knowledge of the Divine which emancipated the “spiritual” from the obligations of the moral law. Errors of the Beguines (q. v.) and Beghards condemned by the Council of Vienne (1311–12) are the propositions: that man in the present life can attain such a degree of perfection as to become utterly impovable; that the “perfect” have no need to fast or pray, but may freely grant the body whatsoever it craves; that they are not subject to any human authority or bound by the precepts of the Church (see Denzinger-Bannwart, 471 sqq.). Similar exaggerations on the part of the Fritacelites (q. v.) led to their condemnation by the Council of Xi (1317) (Denzinger-Bannwart, 484 sqq.). The same pope in 1329 proscribed among the errors of Meister Eckhart (q. v.) the assertions that (prop. 10) we are totally transformed into God just as in the sacrament the bread is changed into the Body of Christ; (14) since God wills that I should have sinned I do not wish that I had not sinned; that (18) we should bring forth the fruit not of external actions, which do not make us good, but of internal actions which are wrought by the Father abiding within us (Denzinger-Bannwart, 501 sqq.).
deceived, and the soul, willing only what God wills, enjoys an imperturbable peace: this is the mystic death. They who pursue this path must obey their superiors outwardly; even the vow of obedience taken by religious extends only to outward actions, only God and the director enter into the soul's interior. To say that the soul's interior life should be governed by the bishop is a new and very ridiculous doctrine; for on hidden things the Church passes no judgment (55-68).

From this summary it is readily seen why the Church condemned Quietism. Nevertheless, these doctrines were not confined to the higher ranks of the clergy, such as the Oratorian, Pietro Matteo Petrucci (1636-1701), who was made Bishop of Jesi (1681), and raised to the cardinalsate (1686). His works on Mysticism and the spiritual life were extolled by the Jesuit Paolo Segneri, and a controversy ensued which resulted in an examination of the whole question by the Inquisition, and the proscription of fifty-four propositions taken from eight of Petrucci's writings (1685). He submitted at once, resigned his bishopric in 1696, and was transferred to the XII Apostolic Visitor. Other leaders of the Quietist movement were: Joseph Beccarelli of Milan, who retracted before the Inquisition at Venice in 1710; François Malaval, a blind layman of Marseilles (1627-1719); and especially with all the Jesuits in the province of the director of Mme. Guyon, whose views were embraced by Fénélon.

The doctrine contained in Fénélon's "Explication des Maximes des Saints" was suggested by the teachings of Molinos, but was less extreme in its principles and less dangerous in its application; it is usually designated as Semiquietism. The controversy between Bossuet and Fénélon has already been noticed (see FÉNELOM). The latter submitted his book to the Holy See for examination, with the result that twenty-three propositions extracted from it were condemned by Innocent XII in 1699 (Denzinger-Bannwart, 1327 sqq.). According to Fénélon, there is an habitual state of the love of God which is wholly pure and disinterested, without fear of punishment or desire of reward. In this state the soul loves God for His own sake—not to gain merit, perfection, or happiness by loving Him; this is the contemplative or unitive life (Props. 1, 2). In the state of holy indifference, the soul has no longer any voluntary deliberate desire in its own behalf except on those occasions in which it does not feel fully equal to the vocation and the state to which it has been called. In that state we seek nothing for ourselves, all for God; we desire salvation, not as our own deliverance or reward or supreme interest, but simply as something that God is pleased to will and that He would have us desire for His sake (4-6). The self-abnegation which Christ in the Gospel requires of us is simply the renunciation of our own interest, and the extreme trials that demand the exercise of this renunciation are temptations whereby God would purify our love, without holding out to us any hope of reward, even regard to our eternal welfare. In such trials the soul, by a reflex conviction that does not reach its innermost depths, may have the invincible persuasion that it is justly reproached by God. In this involuntary despair it accomplishes the absolute sacrifice of its own interest in regard to eternity and loses all appeal but to the pure and unselfish acts it never loses perfect hope which is the disinterested desire of obtaining the Divine promises (7-12).

While meditation consists in discursive acts, there is a state of contemplation so sublime and perfect that it becomes habitual, i.e., whenever accompanied with all the prayer is contemplative, not discursive, and it needs not to return to methodical meditation (15-16).

In the passive state the soul exercises all the virtues without adverticing to the fact that they are virtues; its only thought is to do what God wills; it desires even love, not as its own perfection and happiness, but simply in so far as love is what God asks of us (18-19). In confession the transformed soul should detest its sins and seek forgiveness not as its own purification and deliverance but as something that is love and the love of God for His will and for His glory (20). Though this doctrine of pure love is the evangelical perfection recognized in the whole course of tradition, the earlier directors of souls exhorted the multitude of the just only to practices of interested love proportioned to the graces bestowed upon them. Pure love alone constitutes the whole interior life and is the one principle and motive of all actions that are deliberate and meritorious (22-23).

While these condemnations showed the determined attitude of the Church against Quietism both in its extreme and in its moderate form, Protestantism contained certain elements which the Quietist might have consistently adopted. The doctrine of justification by faith alone, i.e., without good works, accorded very well with Quietist passivity. In the "visible Church" as proposed by the Reformers, the Quietist would have found a common control of ecclesiastical authority. And the attempt to make the religious life an affair of the individual soul in its direct dealings with God was no less Protestant than it was Quietist. In particular, the rejection, as part or in whole, of the Catholic director of Mme. Guyon, would lead the devout Protestant to a Quietist attitude. As a matter of fact, traces of Quietism are found in early Methodism and Quakerism (the "inward light"). But in its later developments Protestantism has come to lay emphasis on the active, rather than the inert, contemplative life. Whereas Luther maintained that faith without work suffices for salvation, his successors at the present day attach little importance to dogmatic belief, but insist much on "religion as a life," i.e., as action. The Catholic teaching avoids such extremes. The soul indeed, assisted by Divine grace, can reach a high degree of contemplation, of detachment from created things and of spiritual union with God. But such perfection, far from leading to Quietistic passivity and Subjectivism, implies rather a more earnest endeavour to labour for God's glory, a more thorough obedience to lawful authority and above all a more complete subjugation of sensuous impulse and tendency.

QUIGLEY, JAMES EDWARD. See CHICAGO, ARCHDIOCESE OF.

QUIGNÉS. See QUIRINUS, FRANCIS.

QUILON, DIOCESAN OF (QUILONENSIUS), in India on the Malabar coast, suffragan of Verapoly, comprises the southern half of the native state of Travancore, and the British territories of Tangacherry and Anjengo. It stretches from the northern branch of the River Chandy to the south, and is bounded on the east by the slope of the Ghauts, and on the west by the Indian Ocean, on the coast of which, however, there is one narrow strip belonging to the Diocese of Cochin. Out of a total population of 1,000,000, the Catholics number 116,000. The see is always presided over by 59 priests, of whom 17 are Diocesan Carmelite Fathers from various provinces of Europe, the rest being native clergy. The bishop's residence, cathedral, and the preparatory seminary with 33
students are all at Quilon, and there are 9 candidates for the priesthood at Kandy Seminary, Ceylon. 

In 1816—Down to 1838 the territory comprised by this diocese formed part of the Padroado Diocese of Cochin (see COCHIN, DIOCESE OF). In that year, by the Brief "Multa Præclare", jurisdiction was withdrawn from the See of Cochin, and this portion of its territory was placed under the Vicar Apostolic of Malabar (Verapoly). In 1845 its separation into a distinct vicariate was decreed by the Holy See. This arrangement was effected in 1853, and on the establishment of the hierarchy in 1886 it was finally elevated into an episcopal see, suffragan to Verapoly. 

Living (or principal) Carmelites: 
Bernardino Baccinelli of St. Teresa, pro-vicar Apostolic, 1845–53; 
Bernardino Pontanova of St. Agnes, nominated 1853 but died shortly after; 
Maurice of St. Albert, nominated 1854 but died shortly after; 
Charles Hyacinth Valerga, 1854–64; 
Marie Ephrem Garrelon, 1866–68; 
Ildefonso Borghma, 1871–83; 
Ferdinand Maria Ossi, 1883, became first bishop in 1887, died 1905; 
Aloysius Maria Bensiger, present bishop from 1905. 

Religious Communities.—Discalced Carmelite missionaries, 17; Convent of Discalced Carmelites at Trivandrum, 5 fathers; Sisters of the Third Order Apostolic of Our Lady of Mount Carmel, 37 (of whom five are Europeans) and 2 novices, for the education of girls and the care of orphans, with convents at Trivandrum, Quilon, and Tangacherry; Missionary Canoneses of St. Augustine, 14 European sisters and 13 native lay sisters, for the education of girls and the care of orphans, with convents at Mulagamude, Cape Comorin, and Nagercoil; Sisters of the Holy Cross (from Menzingen), 9 sisters, for nursing the sick in government hospitals at Trivandrum and Quilon; Sisters of the Holy and Immaculate Heart of Mary (from Pondicherry), 8 sisters, 3 novices, and 5 postulants, for instruction of girls in vernacular schools, with convent and novitiate at Cagneraode. 

Boys' Schools.—The Children's Friend Normal School, Quilon, for training Malayalam schoolmasters, with 59 students; St. Francis's Normal School, Nagercoil, for training Tamil schoolmasters, with 72 students; St. Joseph's English High School, Trivandrum, with 533 pupils; St. Aloysius's English High School, Quilon, with 413 pupils. 

Girls' Schools.—Under Sisters of Third Order of Carmel: Holy Angels' Convent, Trivandrum, boarding establishment with 32 boarders, English high school with 435 pupils, industrial and technical school with 37 pupils; St. Joseph's Convent, Quilon, boarding establishment with 27 boarders, English middle school with 173 pupils, industrial school with 37 pupils; Convent of Our Lady of Mount Carmel, Tangacherry, boarding establishment with 15 boarders, English middle school with 71 in the English and 39 in the Malayalam department, industrial school with 31 pupils. 

Under Canoneses of St. Augustine: Convent of the Holy Infant Jesus, Mulagamude, vernacular school with 350 pupils, industrial school with 276 pupils, besides 1250 outdoor lace-workers; Convent of the Immaculate Conception, Cape Comorin, vernacular and industrial schools with 120 pupils; St. Joseph's School, Nagercoil, with 200 pupils. 

Under Sisters of the Holy Heart of Mary: Blessed Margaret's Home, Cagneraode, vernacular school with 80 pupils. 

Besides these there are two mixed schools, viz., St. Joseph's Middle English School, Anjengo, with 173 pupils; St. Leo's vernacular middle school, Tekkara, with 113 pupils. In other places, 132 vernacular primary schools with 7060 pupils. Total number of schools in the diocese, 144; total of pupils, 10,857. 

Charitable Institutions.—Orphanage for boys at Mulagamude, with 15 inmates; Holy Angels' Orphanage, for girls, Trivandrum, with 83 inmates; St. Joseph's Orphanage, for girls, Quilon, with 47 inmates; Mount Carmel Orphanage, for girls, Tangacherry, with 21 orphans; Infant Jesus Orphanage, Mulagamude, with 276 inmates, foundling home and widows' home; dispensary at Mulagamude; nursing department in general hospital, Trivandrum, women and children's hospital, Trivandrum, and district hospital, Quilon, under Sisters of the Holy Cross. 

Madras Catholic Directory (1910). 

ERNST R. HULL. 

Quimper, Diocese of (Corisopetensia), includes the Department of Finistère; as re-established by the Concordat of 1802 it embraces a large portion of the 

ancient Diocese of Quimper, also known as the Diocese of Cornouailles, the whole of the Diocese of St. Pol de Léon, and a small part of the Dioceses of Tréguier and Vannes. From 1802 to 1859 it was suffragan of Tours, and since 1859 it has been a suffragan of Rennes. 

I. DIocese OF QUIMPER.—We have two versions of the catalogue of the bishops of Quimper: one in the Cartulary of Quimerl, of the twelfth century; the other preserved in a Quimper cartulary of the fifteenth century. Both mention a St. Corentinus as first Bishop of Quimper; his biography is of very late origin. Nothing accurate is known about him, but he is supposed by some to have been ordained by St. Martin in the fourth century, while others claim that he was a sixth-century monk. Duchesne has proved that the Diocese of Quimper must have been represented at the Council of Angers (432) by one of the four prelates, Sarmatio, Charia, Rumorus, and Viventi, and at the Council of Vannes (c. 465) by one of the two prelates Albinus and Liberatus. He puts little credence in the traditions that make St. 

The Cathedral, Quimper
Gonoganus (Goennoc) or St. Allorus (Alori) successors of St. Corentin. Among the bishops may be mentioned: Philippe de La Chambre, Cardinal de Boulogne (1546-50); Nicholas Cajetan (1550-60); Cardinal de Sermontet, in 1565; and St. Pol de Léon.—The Christian religion seems to have been preached in Léon twenty years before the evangelization of Cornouaille, but ancient Breton chronology is very uncertain. The legend of St. Paul Aurelian, written in 884, shows that the Bretons believed the See of Léon had been founded in the Merovingian epoch. Paul Aurelian, a Gallic monk, founder of monasteries at Guesnant on the north-west coast of Brittany and on the Island of Batz, was believed to have founded in an abandoned fort a monastery which gave origin to the town of St. Pol de Léon, afterwards the seat of a diocese. He was the first titular of the see, a wonder-worker and prophet, and was held to have died in 575 at the age of 140 years, after having been assisted in his labours by three successive condutors. Some of the legends give the names of three saints among his successors: Goulvin (Gouleyn), Tenenanus (Thénéan), and Guesnoveus (Gouesnon). Duchesne accepts as certain that the monastery of Léon was founded by Paul Aurelian during the sixth century. As for the see it would seem that the civitas (afterwards known as Carhaix) was soon after included in the Diocese of Quimper; and the ancient Diocese of the Orléans, from which the chief town in the civitas was thus cut off, was translated to St. Pol de Léon at an uncertain date. Duchesne thinks that the Lithardus Uxomensis (not Oximensis) who assisted in 511 at the Council of Angers was a Bishop of Sées and not of Léon. He is not certain that there are traces in history of a Diocese of Léon as far back as the middle of the ninth century.

Jean François de La Marche, Bishop of St. Pol de Léon from 1772, took refuge in England in 1792, and organised material assistance for the émigré clergy as well as spiritual comfort for the French prisoners detained in England; he obtained a grant of the Castle of Winchester for the French priests, and gathered there no less than eight hundred of them. He died in 1792.

The hermit, St. Ronan, a native of Ireland, often held to be one of the 350 bishops consecrated by St. Patrick, was in the fifth century one of the apostles of Cornouaille and the neighbourhood around Léon. In his honour, every six years, on the second and third Sunday of July, the "Great Trombide" is held, an immense procession of fifteen or twenty thousand persons, through 5 parishes, halting at 12 improvised chapels. It was mainly the Dioceses of Quimper and St. Pol de Léon that saw the zeal of the great apostles of Brittany in the seventeenth century: the Dominican Michel Le Noblez (1577-1652), who has been declared Venerable, native of Plouguerneau in the Diocese of Léon, and who preached the catechism in the churches and in the public squares with the help of symbolical painted charts; and his famous disciple, the Venerable Julien Maurice, S.J. (1605-83), whose sermons were extremely popular. The Dominican Albert Le Grand, born at Morlaix, assisted this great religious revival by his "Lives of the Saints of Brittany" (1638). Maunoir found time to publish a Breton dictionary, and some sermons at the Roman Jubilee, funds came in which allowed its completion.

The Cathedral of St. Pol de Léon was built between the thirteenth and sixteenth centuries. The church of Notre Dame de Creiserak, in the same town, restored in the fourteenth century, has a belfry which the Bretons claim to be the oldest in the world. Formerly Quimperlé had an important Benedictine abbey, Sainte Croix, founded in 1029, and where the Benedectines of St. Maur took up their residence in 1665. It was suppressed by the Revolution. Brest, one of the great fortified harbours of France, is in the diocese.

Among saints specially honoured in the diocese are St. Hiliutus (Ilut or Ydeuc), disciple of St. Cadoc and founder of the monastery of Lan-Ilut, where he had for disciples St. David, St. Gildas the Albanian. St. Samson, St. Magloire; St. Guengalesans (Guénolé), founder and first Abbot of Landevennec, who died, according to some, about 448, according to others in 532, or as others compute in 616; St. Gildas, founder and first Abbot of Rhuys and many other monasteries in Cornouaille (sixth century); St. Gervex; Archbishop of St. Pol de Léon, disciple of St. Tugdual, and founder of the church of Notre Dame de Creiserak (sixth century); the hermit, St. Hervarue (sixth century); St. Melorius (Melar), a Breton prince, a victim of a political conspiracy, and honoured as a saint; the Ovissin (d. 1191), founder of the monastery of Carnoct; St. Jean Disalceac (d. 1349), founder of the convent of St. Francis at Quimper.

Le Coz (1740-1815), who under the Revolution as Archbishop of Rennes (1790-1802), was one of the mainstays of the constitutional schism, had previously been principal of Quimper College.

Among those born in the Diocese of Quimper are: the Jesuit Bougeant (1699-1743), author of the "History of the Treaty of Westphalia," the Jesuit Har- man (1646-1729); the critic Fréron (1710-71), an opponent Voltaire; Abbé Logrig Duval (1765-1819), who under the Revolution directed the "Congrégation" for a time, after having founded many charitable and philanthropic institutions.

The principal shrines of the diocese are: Notre Dame de Folgoet, near Lesseven, a pilgrimage dating from 1419; Notre Dame de Locmaria at Quimper, a church which dates from the eleventh century, when the Abbey of Locmaria was founded by Count Alain Canhaz (1013-40); Notre Dame de Fau, a chapel founded 1500 years ago, replaced in 1538 by a large church where the unique religious festivals known as "Great Pardons" take place.

Before the application of the Associations Law (1901), there were in the diocese Jesuits, Benedictines of the "Prière qui vire," and many teaching orders of brothers. An important religious community for women originated in the diocese, the Religious de la Retraite du Sacré-Cœur. In 1899 the religious congregations in the Diocese of Quimper had charge of 1 foundling hospital, 35 nurseries, 1 orphanage for boys, 9 orphanages for girls, 10 workrooms, 4 refugees, 29 hospitals, 165 district nursing houses, and 8 houses of retreat. In 1905 there were in the Diocese of Quimper 773,614 inhabitants, 48 parishes, 262 auxiliary parishes, and 250 curacies supported by state funds.

GEORGES GOUTAY.
Quin, Michael Joseph, originator of the "Dublin Review," b. at Thurles, Co. Tipperary, Ireland, 1708; d. Bath, 18 Oct., 1750. On London he was called to the Bar at Lincoln's Inn and while waiting for practice devoted himself to journalism. For the "Morning Herald" he wrote an account of his experiences in Spain during the latter part of 1822 and the first four months of 1823. This he published in book form. Quin died in the following year he issued two translations, "Memoirs of Ferdinand VII" and "A Statement of some of the principal events in the public life of Don Agustin de Turbide." He became editor of the "Monthly Register," in 1829, and held the post for seven years. During this period he contributed many articles on foreign policy to the "Morning Chronicle," and edited "The Catholic Journal," a weekly newspaper which ran for one year only. Further travels in Hungary, Wallachia, Servia, and Turkey furnished him with material for a new book in 1833, called "A Steam Voyage down the Danube," which was so successful that it was translated into French and German. But his most lasting work was the "Dublin Review," which has ever since remained the leading Catholic periodical in the British Isles. Of its first beginnings Cardinal Wiseman wrote: "It was in 1836 that the idea of commencing a Catholic Quarterly was first conceived by the late learned and excellent Mr. Quin, who applied to the illustrious O'Connell and myself to join in the undertaking." Quin became the chief contributor, writing five articles in the first number and four in the second. But the enterprise was not remunerative. After two numbers he resigned the editorship, being unable to devote so much time and trouble without financial advantage, but continued to contribute articles to succeeding issues. During 1842 he edited "The Tablet," pending the disputes between Lucas and the publishers. His remaining works are: "The Trade of Banking in England" (1833); a pamphlet on the proposed abolition of local probate courts (1834); "Nourmahal, an Oriental Romance" (1838); "Petra," translated from the French (1839), and "Steam Voyages on the Seine, the Moselle and the Rhine" (1843). He married a daughter of Edward Wallis of Burton Grange, York, and had three daughters by her.

Edwin Burton.

Quinones (Quintianus), Saints.—(1) Under the date of 1 April the present "Roman Martyrologium" mentions a saint of this name, together with a companion named Irenaeus. In the "Martyrologium Hieronymianum" the same saint is mentioned with three companions under the same date, the topographical note "in Asia Minor" being appended [ed. De Rossi-Duchene (38)]. We have no further information concerning these martyrs.

(2) A bishop Quinianus, probably identical with the "episcopus Urucitanus," suffered martyrdom with several other confessors in Africa during the persecution under the Vandals, Huerie (476-84), as related by Victor Vitiesia ("De persecutione Vandalica", I, xxii; II, xxvii; ed. Halm in "Mon. Germ. Hist.: Auct. antiq.", I, 8, 18). His feast is celebrated on 23 May. In the "Martyrologium Hieronymianum" several other African martyrs of this name are mentioned on various other days, but nothing further is known of them.

(3) A long list of Christian martyrs from Catania in Sicily are found in the above-mentioned martyrology [ed. cit., (3)], and also in the present "Roman Martyrology." Duchene largely favored t these martyrs with the name of a Saint Quintianus. Concerning this whole group, however, we have no historical information.

(4) In the list of Roman confessors who languished in prison during the Decian persecution (a. d. 250) a certain Quintianus also occurs ("Episcopus Luciani ad Celenarium") inter Epist. Cypriani, XXII; iii, ed. Hartel, II, 535).

(5) The Synod of Agde (596) was attended by a Quinctianus, then Bishop of Rodes. A native of Africa, he had fled from the Arians to Gaul, and been appointed Bishop of Rodes (Ri598). In the following year he was condemned between the Franks and the West Goths, he was a zealous supporter of Chlodwig I. He was, therefore, compelled to leave the territory of the West Goths, and proceeded to Auvergne, where he was hospitably received by Bishop Quinctianus, the latter having been appointed Quinctianus successor to St. Apollinaris, Bishop of Clermont. On the death of the latter, Quinctianus succeeded to the See of Clermont, which he occupied until his death on 13 November, 525 or 535. His feast is celebrated on this date, except at Rodes, where it is kept on 14 June. In the "Roman Martyrology" his name stands under both dates.

J. P. Kirsch.

Quifiones (Quignonese), Francis, cardinal, b. in the Kingdom of Leon, Spain, c. 1482; d. at Veroli, Italy, 5 Nov., 1540. He was the son of Diego Fernandez de Quifiones, of Otoro, in Stirling, and was a page of Cardinal Ximenes, and at the age of sixteen entered the Order of Friari Minor in the convent of Los Angeles (Spain), taking the name of Francis of the Angels (1498). Having completed his studies, he successively discharged all the various offices of his order as custos, provincial general, and minister general. In 1521 he had obtained special permission and faculties from Leo X to go to the missions in America, together with Father Glapion, O.F.M., confessor of Charles V, but Glapion died in the same year, and Quifiones was elected provincial general of the Ultramontane Franciscans (1521-23). In the general chapter of the order at Burgos, in 1523, he was elected minister general (1523-27). As general, he visited the convents of Spain (1523-25) and a great part of Italy and Belgium (1525-27), promoted studies, maintained generalities, and was less active in behalf of missions. In 1524 he sent twelve missionaries to Mexico, among them Father Juan Juarés, who later became the first bishop within the present territory of the United States. (See Engelhardt, "The Missions and Missionaries of California," San Francisco, 1908, I, 604.)

After the sack of Rome and the imprisonment of Clement VII (May, 1527), Quifiones, who was distantly related to Charles V, and also his confidant, seemed the aptest man to effect the release of the pope, and a full reconciliation between him and the emperor. He was thrice sent to the emperor for this purpose, and his efforts were crowned with success by the deliverance of Clement (Dec., 1527), and the treaties of Barleona (1528) and Cambrai (1529). As these embassies rendered his effective government of the order impossible, Quifiones renounced the generalship in December, 1527, and in September of the following year he was created cardinal of the title of S. Croce in Gerusalemme, hence his name "Cardinal of the Holy Cross." From 1532 to 1533 he was also Cardinal of Coria, in Spain, and for a short time, in 1539, administrator of Accrino (Naples), but he was never Cardinal Bishop of Palestrina, as some authors assert. Cardinal Quifiones always occupied a distinguished position in the Sacred College and was a member of the Holy Roman Empire in Germany. When Paul III contemplated assembling a general council at Mantua, he sent (1536) the Cardinal of the Holy Cross to Ferdinand I, King of
the Romans and of Hungary, to promote that cause. The cardinal, however, did not live to see the opening of the Council of Trent in 1545. His body was brought from Veroli to Rome and buried in his titular church in a tomb which he had prepared for himself.

Chierici, a grammarian, was appointed his executor, but his best known for his reform of the Roman Breviary undertaken by order of Clement VII (see Breviary: VI. Reforms). Quinquagesima, the last Sunday of the great Lenten season, was observed in the West as a day of spiritual preparation for Easter, and its celebrations are still observed in many Catholic countries.

Livarius Oliger.

Quinquagesima (fifteenth), the period of fifty days before Easter. It begins with the Sunday before Ash Wednesday, called Dominica in Quinquagesima or Esto Misi from the beginning of the Ignatius of Loyola. In the second class, and the liturgical colour of the Mass and Office is violet. For many early Christians it was the beginning of the fast before Easter, hence called, as with the Syrians, Dom. in pressus jagunt. For some, Quinquagesima marked the time after which meat was forbidden and was therefore called Dom. carnis primum, ad carnes tollendas, carnea sola; by the Poles, Nada, zapasina. Since these regulations affected mainly the clergy, we find the name carnis primum sacerdotium and in German it was fasten. Where abstinence from meat began earlier, this Sunday introduced the time in which neither milk nor eggs, etc. (oae et lacticitia) were allowed, hence called by the Greeks Dom. casei comestris et ororum; Mêchob, sublataionis ororum et casei; Austrians, Kasaer; Czechs Michaschingsondag, Sonntag in der Bulleroche; Italians, de latitanti; and Servians, bele poklade (white meats). The Slavs name it Ned. III. predopepelnina, i.e. the third Sunday before Ash Wednesday; the Bohemians, Ned. II. po denisku, i.e. the second Sunday after the ninth before Easter. In Quinquagesima, and the next two Sundays were used to prepare for Lent by a good confession; hence in England we find the names Shrove Sunday and Shrovetide. As the days before Lent were frequently spent in merry-making, Benedict XIV by the Constitution Inter Corpas (1 Jan., 1748) inflicted a kind of Forty Hours' Devotion to keep the faithful from dangerous amusements and to make some reparation for sins committed. Quinquagesima also means the time between Easter and Pentecost, or from the Saturday after Easter to the Sunday after Pentecost; it is then called Quinquagesima Paschae, puaschalis, or interstiti.

Quintana, Agustín, missionary and Indian philo-

Quirini, Sanorte, cardinal and scholar, b. at Venice, 30 March, 1680; d. at Brescia, 6 January, 1755. In 1696 he entered the Benedictine Order at Florence, and was appointed professor of Sacred Scripture in his monastery in 1705. Five years later he started on an educational journey through Germany, the Netherlands, England, and France. In 1718 the pope appointed him a member of the commission instituted for the revision of the Greek liturgical books, and in 1725 named him Bishop of Corfu. A few years later Quirini was transferred to the Bishopric of Brescia and elevated to the cardinalate. He was placed at the head of the Vatican Library in 1730, and became subsequently prefect of the Congregation of the Index. He was elected a member of the Vienna Academy of Sciences in 1747 and of the Berlin Academy the following year. About this time his opposition to the proposed reduction in the number of holy days involved him in a controversy with Muratori, which lasted until Rome enjoined silence on both parties in 1750. His part in the discussions concerning the Patriarchate of Aquileia received in his enforced retirement from Rome the following year. Quirini generously contributed from his personal means to the relief of the financial needs of the German missionary districts. His writings include works on the liturgy and history of the Greek Church, the history of the papacy (Paul II), and that of Corfu and Brescia. They also include an edition of Cardinal Pole's correspondence (Brescia, 1744-57).

Quirini (Quirini), Angelo Maria, cardinal and scholar, b. at Venice, 30 March, 1680; d. at Brescia, 6 January, 1755. In 1696 he entered the Benedictine Order at Florence, and was appointed professor of Sacred Scripture in his monastery in 1705. Five years later he started on an educational journey through Germany, the Netherlands, England, and France. In 1718 the pope appointed him a member of the commission instituted for the revision of the Greek liturgical books, and in 1725 named him Bishop of Corfu. They also include an edition of Cardinal Pole's correspondence (Brescia, 1744-57).

Quirinus, CENSUS OF. See CHRONOLOGY, BIBLICAL.

Quirinus, SAINTS.—Several martyrs of this name are mentioned in the "MartYROLOGY Hieronymianum" and in the historical Martyrologies of the eastern Church, and the legends of these saints are still to be found in the catalogue of saints of the Roman Church.

(1).—According to the legendary Acts of the martyr St. Maris and St. Martha, a Roman martyr Quirinus (Cyrius) was buried in the Catacomb of Pontianus, now known as the Catacomb of the Graces. The graves of the Roman martyrs do not mention him. His feast is celebrated on 25 March. Perhaps this Quirinus is meant by the expression "Romae sancti Cyri" found in the "Martyrologium Hieronymianum" of 24 March (cf. "Acta SS." III, March, 543 sqq.; Dufourcq, "Les Gesta martyrum romains", I, 240). In the eighth century the relics of the martyr were translated to the Benedictine abbey of Tegernsee in Bavaria.

(2).—Another Roman martyr named Quirinus was buried in the Catacomb of Marcellus on the Via Appia. Both the name and the place of burial are mentioned in the "Martyrologium Hieronymianum" (ed. De Rossi-Duchesne, 52), as also in the Itineraries to the graves of the Roman martyrs (De Rossi, "Roma sotterranea", I, 180–1). His name does not occur in the Itineraries of the fourth century under date of 30 April, which is the day that the Martyrology of Jerome assigns him. He is introduced into the legendary Acts of Sts. Alexander and Balbina, where it is said he was a tribune (Dufourcq, loc. cit., 175). Ado took the name from these Acts and put it in his Martyrology under date of 30 March, on which day it is now also found in the Roman Martyrology (Quentin, "Les martyrologes historiques", 490). In 1650 the relics of Quirinus were given by Leo IX to his sister Gepa, Abbess of Neuss. In this way the relics came to the beautiful Romanesque Church of St. Quirinus at Neuss which still exists.

(3).—The relics of a third St. Quirinus, now in Rome, were brought thither from Pannonia. This St. Quirinus was Bishop of Scicia, now Sisseeck in Croatia, and suffered martyrdom in 309. He was thrown into the water with a millstone about his neck and drowned. The genuine Acts of the martyrdom of the saint are still in existence (Ruinar, "Les martyrs", Ratibosek, 592), also a hymn in his honour by Prudentius (loc. cit., 524). Upon the incursion of the barbarians into Pannonia at the beginning of the fifth century the inhabitants fled to Italy and took the bones of St. Quirinus with them. The remains were taken to Rome and interred in a vaulted burial chamber near the Church of St. Sebastian on the Via Appia (De Waal, "Die Apostelgruft ad Catacumbas ad der Via Appia", Rome, 1894). His feast is observed on 4 June.

(4).—The name of a martyr Quirinus, who is venerated in Tivoli, is found in the present Roman Martyrology under the same date of 4 June. There is no historical account of him; he is, perhaps, identical with one of the martyrs of this name who are mentioned in the Martyrology of Jerome among groups of martyrs under the dates of 12 March, 3 and 4 June. Under 4 June a Quirinus is mentioned with a statement of the place, "Nivinduo civitate" (Mart. Hieron., 31, 73, 75).

(5).—At Malmedy, in Rhenish Prussia, is venerated a St. Quirinus, who is unrelated to the others. In the ninth century his relics were translated to the abbey church there. According to the legend he was put to death, together with a companion Nicasius, in the pagan Vulcansianus (Vexin). No trustworthy historical reports of him exist. His feast is observed on 11 October.

See Acta SS., for the various dates mentioned; Bibl. hagialis, Latina, s. v. Quirinus; POTTIER, Bibl. historica mediævæ, 2nd ed., II, s. v. Quirinus. For St. Quirinus of Rome see UBRAIN, Bon Martyrologium d. christian. Gemeinde zu Rom (Leipzig, 1878), s. v. Quirinus.

J. P. Kirsch.

Quito, ARCHIEPISCOPATE OF (QUITENSIS).—The city of Quito, formerly known as San Francisco de Quito, capital of the Republic of Ecuador, is situated 14° south of the Equator, and 114 miles inland from the Pacific Ocean. It stands at an elevation of about 9300 feet, and has a population of some 70,000, mostly mestizos. It was the capital of the Inca Huaynapacapo and Atahualpa, and was burnt by Rumiñahui in 1533. Sebastian de Belalcazar captured Quito the following year. In 1541 it was made a city by Charles V; in 1565 it became the headquarters of a separate Franciscan province. Quito formed part of Peru till 1718, when it was included in Nueva Granada. The seminary in charge of the Jesuits was the centre of ecclesiastical studies for all middle and northern South America. The Dominicans and Augustinians had high schools in Quito. In 1733 the city was ruined by a great earthquake. Independence was declared there on 19 August, 1809; and the following year witnessed a terrible massacre of the nobility, even women and children being put to the sword. President Montes defended the patriots two years later in the Pansicoli; Sucre gained his great victory in 1822. In 1829 Quito became the capital of Ecuador.

The city is built on very uneven ground, and the streets run in parallel lines. The most important square is the Plaza Mayor, on the southern side of which is the cathedral, on the eastern the city hall, and on the western the government house. The square was turned into a beautiful garden by President Garcia Moreno, who was assassinated here 6 Aug., 1875. Quito is remarkable for its many beautiful churches, especially the old seventeen-century Jesuit Church of Santa Ana, San Francisco, La Merced, and El Sagrario. The present university, which was founded by Sixtus V and Philip II in 1566, but opened only in 1621 by the Jesuits, still occupies a portion of the old Jesuit college and has an excellent library, formed in part from that of the San Luis seminary. There are 32 professors and 216 students. The observatory was erected under the direction of the celebrated astronomer Father Menten. Garda Moreno invited the German Jesuits to lecture in the university by the following year, and the society was also opened to the Masonic parties. The College of St. Ferdinand contains a tablet with a Latin inscription commemorative of the French and Spanish mathematicians who measured the degree of the meridian here in 1736–41. The chief manufactures of the city are woollens, laces, rugs, carpets, and tobacco. There is also a large export trade in religious oil-paintings.

The Diocese of Quito was erected by Paul III on 3 Jan., 1545, at the request of Charles V, and made suffragan of Lima. The first bishop was Mgr. Gavildá, who died in 1563. In 1565 the Holy See proceeded to the beatification of Maria Ana de Jesús de Paredes y Flores, the "Lily of Quito" (b. 31 Oct., 1618; d. 26 May, 1645). By the Bull "Nos semper Romanae Pontificibus" of 13 Jan., 1484, Pius IX made Quito a metropolitan see, with the Dioceses of Cuenca and Guayaquil as suffragans, to which have since been added the Sees of Ibarra, Riobamba, Loja, and Portoviejo. The first archbishop, Mgr. Francisco Xavier de Garaycoy, previously Bishop of Guayaquil, was appointed in 1572. His successor, Mgr. Mendoza y Susaeta, was born at Quito 2 Jan., 1545; consecrated Bishop of Ibarra, 30 July, 1585; transferred to Quito, 14 Dec., 1605, and entered into possession on 6 July, 1606, succeeding Mgr. Pedro Rafael González (b. at Quito, 14 Oct., 1589; Bishop of Ibarra, 29 Sept., 1587; coadjutor titular
Archbishop of Synnade, 15 June, 1893, succeeding to the archbishopric in Aug., 1893). The Archdiocese of Quito includes the provinces of Pichincha, León, and Tunguragua, and contains 81 parishes, 195 priests, and 420,860 Catholics. The seminary is in care of the Lazarists.

WOLF, Geografía y geología del Ecuador (Leipzig, 1883); CÉVALLOS, Resumen de la historia del Ecuador (Guayaquil, 1878–80); GONZÁLEZ Y SUÁREZ, Historia eclesiástica del Ecuador (Quito, 1881); MEDINA, La imprenta en Quito (Santiago, 1904); HERRERA, Apuntes para la historia de Quito (Quito, 1874); VELÁZCO, El regno de Quito (Quito, 1841–4); Boletín eclesiástico, the official organ of the church province of Quito.

A. A. MacERLEAN.
Rabanus (Rhabanus, Rabanus), Maurus Magnentius, Blessed, Abbot of Fulda, Archbishop of Mainz, celebrated theological and pedagogical writer of the ninth century. b. at Mainz about 778 (7847); d. at Winkel (Vinicellum) near Mainz on 4 February, 856. He took vows at an early age in the Benedictine monastery of Fulda, and was ordained deacon in 801. A year later he went to Tours to study theology and the liberal arts, under Alcuin. He endeavored himself to his aged master, and received from him the surname of Maurus in memory of the favourite disciple of St. Benedict. After a year of study he was recalled by his abbot, became teacher and, later, head-master of the famous school of Fulda. His fame as teacher spread over Europe, and Fulda became the most celebrated seat of learning in the Frankish Empire. In 814 he was ordained priest. Unfortunately, Abbot Ratgar's mania for building temporarily impeded the progress of the school, but under Abbot Egil (818–823) Rabanus was once more able to devote himself entirely to his vocation of teaching and writing (see Carolingian Schools; Fulda, Diocese of). In 822 Rabanus was elected abbot, and during his reign the monastery enjoyed its greatest prosperity. He completed the new buildings that had been begun by his predecessor; erected more than thirty churches and oratories; enriched the abbey church with artistic mosaics, tapestry, baldachins, reliquaries, and other costly ornaments; provided for the instruction of the laity by preaching and by increasing the number of priests in country towns; procured numerous books for the library, and in many other ways advanced the spiritual, intellectual and temporal welfare of Fulda and its dependencies. In the political disturbances of the times he sided with Louis the Pious against his rebellious sons, and after the emperor's death he supported Lothair, the eldest son. When the latter was conquered by Louis the German, Rabanus fled from home in 840, probably to evade taking the oath of allegiance. In 841 he returned and resigned his abbacy early in 842, compelled, it is believed, by Louis. He retired to the neighbouring Petersberg, where he devoted himself entirely to prayer and literary labours. In 845 he was reconciled with the king and in 847 succeeded Otgar as Archbishop of Mainz. His consecration took place on 26 June. He held three provincial synods. The 31 canons enacted at the first, in the monastery of St. Alban in October, 847, are chiefly on matters of ecclesiastical discipline (Acta in Mansi, "Conc. Coll. Ampl.", XIV, 899–912). At the second synod, 848, in connexion with a diet, the monk Gottschalk of Orbais and his doctrine on predestination were condemned. The third synod, held in 852 (8517), occupied itself with the rights and discipline of the Church. Rabanus was distinguished for his charity towards the poor. It is said in the "Annales Fuldensis" that, during the famine of 850, he daily fed more than 300 persons. Mabillon and the Bollandists style him "Blessed", and his feast is celebrated in the Dioceses of Fulda, Mainz, and Limburg on 4 February. He was buried in the monastery of St. Alban at Mainz, but his relics were transferred to Halle by Archbishop Albrecht of Brandenburg.

Rabanus was probably the most learned man of his age. In Scriptural and patristic knowledge he had no equal, and was thoroughly conversant with canon law and liturgy. His literary activity extended over the entire field of sacred and profane learning as then understood. Still, he remained true to himself, either as an educator or a writer, for he followed in the beaten track of his learned predecessors. A complete edition of his numerous writings is still wanting. Most of them have been edited by Colyvenerius (Cologne, 1627). This uncritical edition is reprinted with some additions in P. L., CVII–CXII. His poems were edited by Dümmler in "Mon. Germ.: Poeta lat. aevi Carol.", II, 154–244. He was a skilful versifier, but a mediocre poet. His epistles are printed in "Mon. Germ.: Epist.", V, 379 sq. Most of his works are exegetical. His commentaries, which include nearly all the books of the Old Testament, as well as the Gospel of St. Matthew and the Pauline Epistles—a commentary on St. John is probably spurious—are based chiefly on the exegetical writings of St. Jerome, St. Augustine, St. Gregory the Great, St. Isidore of Seville, Origen, St. Ambrose, and St. Bede. His chief pedagogical works are: "De universo", a sort of encyclopedia in 22 books, based on the Etymologies of Isidore; "De computo", a treatise on reckoning; "Excerptio de arte grammatici Prisciani", a treatise on grammar, etc. Other important works are: "De ecclesiastica disciplina"; sermons, treatises, a martyrology, and a penitential.

Michael Ott.

Babbi and Babbinism. —The special condition which prevailed in Palestine after the Restoration led to the gradually increasing importance of the Temple, and of the priesthood ministering in it. The spirit of Ezra's reform outlasted the reformer and survived in the authority henceforth attached to the Law, an authority soon to overshadow the prestige of the Temple and of the priesthood itself; and tended to put into prominence the teachers and expounders of the Law, the Scribes (Sopherim). Originally the word aṣāre meant "scriven"; but rapidly it was accepted as a matter of course that the scribe who copies the Law knows the Law best, and is its most qualified expounder: accordingly the word came to mean more than it implies etymologically. Knowledge of the Law became the chief passport to fame and popularity. The earliest scribes, like Ezra, who came to be hailed as the model of the "ready scribe" (I. e. skilful) in the Law of Moses (I Esd., vii, 8), were
priests; but in time a large body of lay teachers came
to swell the ranks of the scribes. As gradually the
spell of Hellenistic fashions fell upon the priesthood,
the lay scribes found themselves more and more the
only guardians and exponents of the Law. When the
Pharisees came to be regarded as a distinct sect
(about 150 a.c.) the scribes as a rule adhered to them
as being the more scrupulous observers of the Law
(yet Mark, ii, 16; Luke, v, 30, and Acts, xxiii, 9, seem
to imply that some scribes belonged to the party of the
Sadducees). At any rate, from that time onwards
they were accorded the title of ‘teachers of the people.
Until the fall of Jerusalem they were chiefly congregated in Judea; but in later
times we hear of their presence in Northern Palestine,
even in Rome, and in every important centre of the
Dispersion.

From the earliest times the scribes seem to have
conceived an exalted opinion of their merits: ‘The
wisdom [knowledge] of the scribe cometh by his time
of leisure: and he that is less in action [less steeped
in business] shall receive wisdom. With what wisdom
shall he be laden whom the Lord hath filled [can
acquire] that holdeth the plough, and that glorifieth
in the goad, that driveth the oxen therewith, and is
occupied in their labours, and his whole talk is about
the offspring of bulls?’ (thus Hebrew; Ecclesi., xxviii, 23;
but it is more surely the scribe by theSemites
belonged to a higher caste. And so it was under-
stood by the people who, after the time of Hillel,
introduced the custom of saluting them ‘Rabbi’.
The word, derived from the Hebrew Rab, ‘great’,
orally seems to have been equivalent to ‘my
lord’; when it became the distinctive title of the
scribe the specific force of its pronoun was lost, and
‘Rabbi’ was used very much like our ‘Doctor’.
That this title was far from unpleasant in the ears
of the scribes we know from Matt., xxiii, 7. In point of
fact a pupil never would omit it when speaking to
or of his teacher (Berach, xxvii, 1), and it became
a universal usage never to mention the name of a
doctor of the Law without prefixing ‘Rabbi’. Nay
more, in order to show the person greater honour,
this title was intensified into ‘Rabban’ [‘Rabboni’;]
so that in the course of time custom established a
kind of hierarchy among these various forms:
‘Rabbi’, the doctors said, ‘is more than Rab,
Rabban more than Rabbi, and the proper name more
than Rabban.’ The latter part of this traditional
reverence is particularly in view in the two
texts Doctor Hillel and Shammi, always designated by
their unqualified proper names; the successors of
Hillel, as Gamaliel, were titled Rabban, and so also
was by exception Johanan ben Zakka; Palestinian
doctors are commonly known as Rabbi So-and-so,
yet Rabbi Judah the Saint, who composed the Mishna,
is not infrequently called merely Rabbi (par
excellence); in the same manner, Rab, without the
proper name, designates Abba Arika (d. a.d. 247), the
founder of the School of Sora, while Rab is the title
premised to the works of Amora of Babylon.

The Law, of course, must be the exclusive study
of a Rabbi, as it is the one source of religious knowledge,
the perfect embodiment of the will of God, and the
people’s sole binding rule of daily life. But the Law
does not cover explicitly every possible case; yet, as it is
a Divinely-given Law, it must be, in the mind of the
learned Rabbi, participate in the infinitude of the
Divine Lawgiver; therefore, not only the sentences
but the individual words, even the number of letters,
many more, the ‘dots and tittles’, must convey a mean-
ing, since God willed every one of them, and since
in all that He does He acts for a reason: thus does the
Law apply itself to all possible occurrences. Hence
arose in the schools that immense mass of inferential
teaching deduced from the written word according
to the rules of a special process of reasoning, handed
down for generations in the esoteric teaching of the
faithful scribes as the official interpretation of the
Law, and finally committed to writing, particularly
in the Mishnas and Talmuda. Under this parasitic
vegetation of traditional teaching the Law itself came
gradually to be accorded a distinct and definite
about the Law. The Law is therefore understood
to be at the root of every tradition, even when,
in practice, tradition as good as makes void the letter
of the Law (Matt., xv, 1-6; Mark, vii, 9-13); nay
more, we hear of Rabbi pretending to prove by the
Law itself (Ex., xxvii, 30) what is afterwards to be
preferred to the written word (Megill., iv, 74d; cf.
Sanhedr., xi, 3). This exaggerated authority these
oral traditions obtained on account of the origin
attributed to them. They generally purported to have
been handed down from some other source to the
students by Divine inspiration as esoteric wisdom to be
imparted to the initiated disciples. Some claimed for
them a still higher antiquity, going back to Moses
himself (thus at least is usually understood the
opening sentence of the ‘Pirque Aboth’, cf. ‘Pebah’
tr. Schabii, ii, 37), even in part to the twelve Patriarchs,
Enoch, and Adam. This voluminous body of exegeti-
cal traditions, the logical system according to which
inferences are drawn and the theological conceptions
upon which this whole oral teaching is grounded, are
therefore equally deserving of study to the student of
Rabbinism. What has been said above of its theo-
logical basis may suffice to show the two radical errors
which lie at the bottom of it: infinity of the Scriptures,
and necessity of interpreting them in every detail in
accordance with that severe precision which alone is
worthy of God.

A few words on the principles of Rabbinical logic
may not be useless to help form a judgment of the
whole system. The traditional exegesis was of two
kinds. The one was, the Halaka, the Halakah, the
Halakot, the Halakot, the Halakah, the Halakot, the
Halakah, the Halakot, the Halakah, the Halakot, the

the Halakah, the Halakah, the Halakah, the Halakot,
in the Targum of Onkelos and the Greek version of Aquila, acquired prominence later on, seemingly owing to the influence of Arabic learning, especially among the Qaraites. The Sodh first found favour among the Essenes and the Zealots, but attained its full development only in the Kabbalistic system of the Cordovero-Jerusalem school, but behold, all the nations of the earth will know by its fruits, the vagaries of the Kabbala, the last term of the natural evolution of the Haggada, make evident the falsity of the principles underlying the method of Rabbinical exegesis.

**RABELLAIS, BISHOP OF EDessa, in the later years of his life one of the foremost opponents of Nestorianism, was the son of a heathen priest and a Christian mother. He was converted by Eusebius, Bishop of Chalcis (his native town), and Acacius, Bishop of Aleppo. After his conversion he became a monk. For a time he was a devoted admirer of Theodore of Mopsuestia, but there was some quarrel, the details of which are not known, and Theodore publicly rebuked him at a synod. In 412 he was appointed Bishop of Edessa and died in 435. According to the statements he wrote in his Life, he and St. Cyril the first took a decided stand against Nestorius and denounced the heresiarch to his face. At the Council of Ephesus, however, he was on the side of John of Antioch, and his name is found among the subscriptions to two letters (Labbe, ii. p. 1533, III (2nd ed. p. 1557) in which St. Cyril’s doctrine is denounced as heretical. But a few months later he realized that St. Cyril was in the right, and became his most uncompromising ally against Nestorianism. His task was not an easy one, for his diocese, owing chiefly to the prestige of Theodore of Mopsuestia, was a stronghold of Nestorianism. The zeal with which Raballias endeavoured to suppress Theodore's writings was unfairly attributed by Ibas, in his letters to Maris, to personal rancour against the memory of the deceased (Ibas’ letter is quoted in the Council of Chalcedon and may be found in Labbe, Hardouin, Mansi, or Hefele). Most of the surviving works of Raballias were published by Overbeck, “S. Ephremi Syri, Rabule Episc. Edesseni, Balaei aliorumque opera selecta” (Oxford, 1865). Raballias’ Syriac translation of St. Cyril’s "De Fide Recta" was first published by Philip Pusey (Oxford, 1877). Most of the writings of Raballias were translated into German by Bickell in Thalhofer’s "Bibliothek der Kirchenväter". According to Burkitt, 1864, Ephram's quotations from the Gospel (Cambridge Texts and Studies, VII, 2) and “Evangelion Da Mepraseh” (Cambridge, 1901), Raballias was the author of the Peshito. The chief authority for his Life is an anonymous panegyric composed soon after his death by a cleric of Edessa. This work was published by Overbeck and translated by Bickell in Duval, La litt. syriac (Paris, 1899), 161-2. Bardenhewer, t. Shahan, Patrology (St. Louis, 1908), 559-6; Venables in Dict. Christian. Biog. v.

**F. J. BACCHUS.**

**RABELLAIS, FRANCOIS.**—The life of this celebrated French writer is full of obscurities. He was born at Chinon in Touraine in 1483, 1490, or 1495. According to some, his father was an apothecary, according to others a publican or inn-keeper. He began his studies with the Benedictines and finished them with the Franciscans near Angers. He became a Franciscan in the convent of Contente-la-Fontaine, where he remained fifteen years and received Holy Orders. But the spirit of his order not being favourable to the studies then esteemed by the Renaissance and for which he himself displayed great aptitude, he left the convent. Through the mediation of Bishop Geoffroy d’Eatisse he secured pardon from Clement VII, who authorized him to enter the Benedictine abbey of Maillézeais. In 1630 he was at Montpellier as a medical student, and the following year professor of anatomy at Lyons and head physician at the hospital of Pont-du-Rhône. At Lyons he was much in the society of Doctor and Marot, and became the father of a child who died young. In 1534 Cardinal du Bellay brought him to Rome as a physician, and in 1536 he obtained from Paul III an indulgent which absolved him from his infractions of conventional discipline and allowed him to practise medicine. The next year he received the degree of Doctor of Medicine at Montpellier. In 1540 the pope permitted him to abandon the conventional life and to join the canons of St-Maur-les-Fossés. He took advantage of this to resume his wandering life. In 1541 he was at Turin as physician to the governor, Guillaume du Bellay. Perhaps through fear of prosecution which his works might draw upon him he went in 1546 to practise medicine at Metz, where he was in the pay of the city, but Cardinal du Bellay, being again sent to Rome, induced him to go thither. Du Bellay returned to France at the beginning of 1450 and secured for him the benefices of St-Martin-de-Meudon and St-Christophe-du-Jambet, both of which he resigned two years later, after having, it is said, fulfilled his duties with regularity and seriousness. He died most probably at Paris either, as is generally thought, in 1553, or in 1559. Statements regarding his last moments are contradictory. According to some he died as a free-thinker and jester, saying, "Draw the curtain, the farce is played out," according to others his end was Christian and edifying.

Rabelais wrote various works, including almanacs, but he was chiefly known for the celebrated romance entitled, "La Vie de Gargantua et de Pantagruel". This work comprises four books which appeared from 1532 (or 1533) to 1552; a fifth, the most daring in its ideas, appeared after the death of its author (1562-64); it is not certain that it is his. This history of giants is a chaos wherein are found learning, eloquence, coarse humour, and extravagances. It is impossible to analyse it.

Rabelais was a revolutionary who attacked all the past, Scholasticism, the monks; his religion is scarcely more than that of a spiritual-minded pagan. Less bold in political matters, he cared little for liberty: his ideal was a tyrant who loves peace. His strange
fictions seem to be a veil behind which he conceals his ideas, for he desires his readers to imitate the dog to whom a bone has been thrown and who must break it in order to reach the marrow. But many of his gigantic buffooneries were merely the satis- faction of a vast humour and a boundless imagination. He took pleasure in the worst obscenities. His vocabulary is rich and picturesque, but licentious and filthy. In short, as La Bruyère says: “His book is a riddle which may be considered inexplicable. Where it is bad it is beyond correction; it has the charm of the rabble; where it is good it is exquisite and exquisite; it may be the daintiest of dishes.” As a whole it exercises a baneful influence.

GEORGES BERTRIN.

Raccolta (Ital., “a collection”), a book containing prayers and pious exercises to which the popes have attached indulgences. The full title of the last official edition is: “Raccolta di orazioni e pie opere, per le quali sono state concediti dai Sommi Pontefici le SS. Indulgenze” (Rome, 1898). The Raccolta was first published at Rome in 1807 by Teodoro Galli, one of the consultants of the Congregation of Indulgences. In the sixth edition there is printed a Decree, dated 30 Nov., 1825, which recognizes the indulgences as authentic, and in the eleventh—the last published by Canon Galli—there is a Decree, dated 17 Nov., 1836, which approves the Raccolta as “preladatum opus omnibus Christifidelibus vivis atque defunctis maxime perutil”. Two new editions were published by Aloysius Primavalli, substitute secretary of the congregation, and were specially approved by a Decree of 15 Dec., 1854. The editions of 1877, 1886, and 1898 are the official publications of the Sacred Congregation of Indulgences and Holy Relics (see ROMAN CURIA). The Raccolta contains, arranged in convenient order, the prayers, novenas, pious practices, etc., to which general indulgences have been attached, as well as the decrees and rescripts granting the indulgences, and the conditions requisite for gaining them. All the indulgences contained in the Raccolta are applicable to the souls in purgatory. It is forbidden to publish the entire Raccolta without the approval of the Roman congregation (Decret. auth., nn. 361, 415). There is an approved edition of the Raccolta in English, especially adapted for the use of the faithful.

F. X. DELANY.

Race, Human.—Mankind exhibits differences which have been variously interpreted. Some consider them so great that they regard the varieties of the human race as distinct species; others maintain the unity of the human race, looking upon the differences as not sufficiently great to constitute different species. The apparently unlimited fertility of crossed races is a fact in favor of the unity of mankind. The diversities are indeed only quantitative, the difference between the most opposite varieties (e. g. the darkest blacks and the lightest whites) being bridged over by numerous intermediate stages. The unity of mankind is moreover supported by the intellectual development of man, which is more or less evident in the most primitive savages and the representatives of the highest culture. The various types of human beings now living are only different races. G. Schwalbe thought that the primitive Quatermary type of man with the prominent bridges, low brow, close lower jaw, etc. (the homo primigenius), must be distinguished as a separate species from the homo sapiens. The peculiarities of this homo primigenius, he claimed, did not fall within the limits of the variations of the homo sapiens. However, the researches of T. H. Huxley, especially his investigation of the skulls of the aboriginal Australians, show that the same peculiarities are to be found even in men now living. Consequently, the homo primigenius is simply one of the races of mankind, although a primitive one.

The physical differences found in the human race may be grouped together into basic types or “races”, which are divided further into sub-races. Another grouping is into “nations” and “tribes”, which may be described as political units of men of like speech and customs. The investigation of physical differences is the task of anthropology (the science of man), whose duty it is to establish numerically in the most exact manner possible the conspicuous differences between the fundamental types and between the mixed races arising from them. A number of methods may be used to attain this end. The method of height and measurement aims at expressing mathematically the differences in size, whether of the whole body or of its parts. The ratio of the different measurements is computed, thus obtaining relative measurements or indices, and so the different parts of the body form with one another are determined. For this purpose the greatest possible number of individuals of a race are measured; the average of the results is regarded as the expression of the racial peculiarity, or the results are represented in the form of curves which express the numerical values derived from the study of a group. As absolute and relative measurements alone do not suffice to determine racial peculiarities, outline drawings have of late been resorted to, and the forms thus obtained have been compared. This method has the advantage that all possible dimensions and angles can be measured later independently of the object. On these outline drawings or projections H. Kitaesch constructed triangles and quadrangles (crani-trigonometry), or sought to define the curves as segments of circles (cyclography of the skull).

To the graphical method and that of measurement should also be added the description of morphological peculiarities. The most striking difference in men is that of stature. Consequently, it has been esteemed a separate race into groups of the criterion. Even in Europe, marked differences have been shown to exist between the tall northern peoples of Scandinavia, England, and North Germany on one hand, and the low statured peoples of the Mediterrane- an (especially the Italians) on the other. In other regions also tall races are found, e. g. the Fuegians; other races are distinguished by their extremely low stature, e. g. the Bushmen of Africa, the Lapps of the Arctic, above all the extremely small tribes of the forests of Central and Western Africa (stature generally under four feet eleven inches), who are now grouped together as Pygmies, and the natives of the Andaman Islands in the Bay of Bengali, the Semand of Malacca, and the Negritos of the Philippines. While the weight of the body, depending greatly on external causes, is not serviceable for differentiation, the proportions of the body on the other hand vary in different races. The primitive races are characterized in particular by a short trunk, long arms, and long legs, in contrast to the civilized peoples, who have a long trunk, short arms, and short legs. The difference is greater than those between members of different classes in one and the same people, as J. Ranke has proved.

G. Frisch made use of the length of the spinal column for the comparison of the bodily proportions (modulus). In this way be constructed a curve, which Schnirch, and later, looking various peoples: the white race has the pro-
portions of the canons, the Fuegian undue length of the ant harms the negro undue length of all four extremities, and the Chinese deficient length of all four extremities.

As regards the skeleton the attempt was made, in the first place, to determine racial peculiarities by the study of the skull. The length, breadth, and height of the cranium were determined, and from these were calculated the length-breadth, length-height, and breadth-height indices—that is, the breadth and height were expressed as percentages of the length or breadth. According to the Frankfurt Agreement of 1832, skull measurements are to be taken from the center of the brachycephalos (up to 74-9), medium or mesocephalous (75-0 to 79-9), and broad or brachycephalous (80-0 and over); and further into low or chamaecephalous (up to 70-0), medium or orthocephalous (70-1 to 75-0), and high or hypsicephalous (over 75-0). According to the international agreement of 1883 the following designations were added to those already in use: ultralocephalous (55-0 to 59-9) hyperdolichocephalous (60-0 to 64-9), hyperbrachycephalous (85-0 to 89-9) and ultrabrachycephalous (90-0 to 94-9). The French call skulls with a length-breadth ratio of 77-78 to 80-0 brachycephalous; those with a ratio of 80-01 to 83-33 subbrachycephalous; only the indices of 77-78 to 80-0 are looked upon by them as mesocephalous. For the front of the skull the criteria used in determining the peculiarities of a race are the height and breadth, the facial angle, and the form of the nostrils, orbit, and mastoid processes. As to the breadth of the zygomatic arch (supposing it equal to 100) to the height of the entire face (from the nasion to the gnathion), and to the height of the upper face (from the nasion to the prosthion), give facial indices which are divided by R. Martin into the following groups: (1) Index for the entire face: hypereuryprosopus (to 79-9), euryprosopus (80-0 to 84-9), mesoeprosopus (85-0 to 89-9), leptoprosopus (90-0 to 94-9), hyperleptoprosopus (over 95-0). (2) Index for the upper face: hypereuryonic (to 44-9), euryonic (45-0 to 49-9), miosial (50-0 to 54-9), leptonic (55-0 to 59-9), hyperleptonic (over 60-0). The expressions euryprosopus and euryonic correspond to the chameanconous of the Frankfurt Agreement; leptous is the same as leptoprosopus. According to the Frankfurt Agreement euryprosopus (to 80-0), mesoconous (80-1 to 85-0), hypconous (over 85-0); the nostrils are leptorhine (to 47-0), mesorhine (47-1 to 51-0), platyrhine (51-1 to 58-0), hyperplatyrhine (over 58-0); the palate is lepto, more or less reduced; hyperplastyphynal (over 85-0). The facial part of the skull with a facial angle up to 82 is called prognathous; with an angle of 83 to 90, orthognathous; with an angle of 91 and over, hyperorthognathous. By facial angle is meant that formed by the line connecting the nose-frontal suture and the point farthest forward on the upper jaw between the central incisors (the alveolar point) with the German horizontal plane. The German horizontal plane passes through the lowest point of the under edge of the orbits and the upper border of the orifice-aperture. Besides these indices, to which correspond groups more or less generally recognized, other points of importance for the shape of the braincase and the facial part of the skull are: the ratio of the greatest breadth of the braincase to the smallest frontal breadth (smallest distance between the temporal lines over the sphenoidal process of the frontal bone); also the ratio of the breadth of the sphenoidal to the smallest breadth of the forehead, and to the breadth of the face at the two angles of the lower jaw. At the base of the skull measurements can be taken and extend from a point on the occipital foramen with the German horizontal plane, and of the angle formed by this German plane with the surface between the occipital foramen and the sphen-o-basilar joint.

In the comparison of crania, especially of the ratios of angles, it is necessary to place the skull in a definite position. To attain this various methods have been used besides the German horizontal plane already mentioned. G. Schwabhe has recently used the glabellina-inion line (glabella, the central point between the arches of the eyebrows; inion, the protuberance of the occiput at the median line) for the comparison of the brainpan at the sagittal sutures, while H. Klaatsch has returned to the glabella-lambda line formerly proposed by Hamy (lambda, the point of union of the lambdoidal and sagittal sutures). In the German method the broad face (face of the highest point from the glabellina-inion line), the height of the bregma (the linear distance of the bregma from the point of comparison, i.e., the distance between the point of intersection of the coronal and sagittal sutures by the glabellina-inion line), and their ratios to the glabella-inion line (which is taken as 100), can be determined. On this line Schwabhe traced the frontal angle (that between the tangent of the frontal bone at the glabella and the glabellina-inion line), the bregma angle (bregma-glabellina-inion); the lambda angle (bregma-glabellina-inion-opistion; the opistion is the posterior border of the occipital foramen). Schwabhe also determined the position of the bregma (distance of the base point of the bregma-vertexals from the glabella) and the index of this position to the glabella-inion line, the lambdoidal-cerebral index (distance of the point of the lambdoidal arch to the tendon of the arch of the frontal bone). The other bones of the skull were not made the object of exhaustive study until more recent times. Particular mention should be made, as important in the comparative anatomy of races, of the cross-section of the diploysis of the long bones, and of the position of the epiphyses to the diaphysis.

Not only the structure of the skeleton, but also the musculature and the general formation of the soft parts are taken into consideration. As regards the musculature attention is given especially to the varieties found in the face; measuring the thickness of the soft parts of the face (by piercing with needles such parts in fresh or preserved cadavers) also yields good results, when there are sufficient subjects for investigations. Apparently, the facial expression of the Mongoloid is mainly conditioned by the high and length of the soft parts in the region of the cheek. Racial differences are also shown by the nose. The nose of Europeans and Asiatic Indians is long, narrow, with the root extending back from the eyes; the nose of the Mongoloid is low and broad, the back straight or convex, the wings are appressed, the nostrils set vertically to the upper lip, the elevation (that is the height of the point above the lip) relatively large. According to Topinard's theory noses are divided into aquiline, straight, flat, hooked, and Semitic noses. The nose of the aboriginal Australians is poorly developed; it does not project, the roots are broad and the back broad and rather concave, the wings decided projecting; the nostrils lie parallel to the upper lip, and the elevation is slight. There are a large number of intergrades between these extreme ones (e.g., according to Topinard, the Mongoloid, negroid, and Australoid). The roots of the nose may enter the forehead without depression, by a sharp bend, or in a flat curve. The region above the orbit and beneath the border of the orbit varies. Either the entire part projects in a ridge (brow ridges, torus supraorbitalis), or only the glabella, that is the prominent part of the forehead just above the root of the nose, seems to curve, or projections arise from a somewhat depressed glabella, the root of which is a low orbital border, the sections on the sides being then flat (planum supraorbitalis). The forehead is either flat and receding, or is full, domed, and rises more or less abruptly. The position of the sockets of the
eyes is horizontal in the white race and inclines obliquely upwards in Mongoloids; in the latter case the lacrimal caruncle is generally not free, but is covered by a fold that inclines downward in a curve (the Mongolian eyelid). In the same way the edge of the Mongolian eyelid, which in other cases is free, generally lies under a reverse fold. The forms of the ear and mouth are less used as racial characteristics. They display only individual variations, although a peculiarity of the negro race is the great protrusion and thickness of the lips.

Especially important for the differentiation of races are the colour of the eyes and skin, and the form and colour of the hair. The colour of these parts of the body is conditioned by a brownish pigment, on the amount and seat of which the shade of colour depends. Eyes are called blue and blue-grey when only the black layers of the iris contain the pigment, which appears blue through the cloudy outer layers of tissue. If the other layers of the iris also contain pigment, the eye appears from light to dark brown. The pupils are like a dark circle, the blood-vessels of the retina appearing red only in albino persons with very little or no pigment. The other parts of the eye also contain more or less pigment. The pigment of the skin is found chiefly in the epidermis; it shows itself in brownish children of all ages (at times also in white infants), as the Mongolians and negro, pigment in the true skin or corium produces blue spots in the region of the loins, called the blue Mongolian spot. In hair the horny outer portion is the main seat of the pigment. Besides the amount of air in the hair is also of importance; hair containing a great amount of air (appearance of age) looks grey or white, this condition being usually accompanied by a disappearance of the hair-pigment. Hair is divided as to colour into flaxen, light brown, black, red, grey; it is laminated, smooth, wavy, or curly. Lank hair generally shows a round cross-section, and curly an oval one; there are other cross-sections (e.g. the reniform or elliptical). In the same individual the eyes, hair, and skin may be of different colours. Blue eyes, flaxen hair, and white skin constitute the blonde type; brown eyes, brown hair, and dark skin make the brunette type. Between these two types are all possible variations and mixtures. Although the human race must be regarded as a unity and physical phenomena there exist differences and still exist differences which permit a classification into various groups and races. Even the most ancient remains of man, dating from the glacial period in Europe, show differences that justify the acceptation of at least two races. Remains of skeletons that occur in the Quaternary age have been found in France, Germany, and Austria. The shape of the crania found at Spy, Krapina, La Chapelle aux Saints, Le Moustier, etc., resembles that of the skull discovered at Neandertal, the geological stratification of which is uncertain. These remains can be grouped together as the "Neandertal race", which had a long, narrow, low skull with very retreating forehead, enormous brow ridges (torus superorbitalis), powerful masticating apparatus, upper jaw without the fossa canine, heavy under jaw with broad ascending branch, no chin, and chin part with an outward convex curve. Some of these characteristics are still to be found among the Eskimo and aboriginal Australians. The bones of the skeletons indicate a bulky, relatively low-sided frame, with long legs and short arms. The knees somewhat bent. Variations existed even in this era. The Krapina remains belong to crania somewhat broader than do the remains of the Neandertal race of Western Europe. The strata in which these remains of the skeletons were regarded as belonging to the last warm intermediate period (or the last glacial period), and were found with remains of the early Paleolithic period, the stage of civilization represented by the Saint-Acheul and Le Moustier remains. During the glacial period, particularly during the late Paleolithic period (as represented at Aurignac, Solutré, and La Madeleine), human beings of different form existed. Their remains, as those found at Laugerie-Basse, Chancelade, Mentone, and Combe-Capelle, may be grouped together as the "Cro-Magnon Race". The peculiarities of the Neandertal race are not to be found; the generally long dolichocephalic crania have a good vault, and are relatively high without great brow ridges; the apparatus for mastication is less powerful; the upper jaw contains plainly fossa canine; the under jaw is less massive, the chin being fine and projecting. In the structure of the cranium the Cro-Magnon race on the whole resembled the modern European. Local variations are recognizable. It is not impossible that both diluvial races lived at the same era, so that crossing appeared, as would seem the case from the skulls found at Galley Hill and at Brunn. The bones of the skeletons indicate a higher stature. Variations with a broader skull appeared in Europe very soon after this, if not along with the long-skulled Cro-Magnon race in the diluvial epoch, so that the present different shaped and coloured races (at times also in white infants), as the Mongolians and negro, pigment in the true skin or corium produces blue spots in the region of the loins, called the blue Mongolian spot. In hair the horny outer portion is the main seat of the pigment. Besides the amount of air in the hair is also of importance; hair containing a great amount of air (appearance of age) looks grey or white, this condition being usually accompanied by a disappearance of the hair-pigment. Hair is divided as to colour into flaxen, light brown, black, red, grey; it is laminated, smooth, wavy, or curly. Lank hair generally shows a round cross-section, and curly an oval one; there are other cross-sections (e.g. the reniform or elliptical). In the same individual the eyes, hair, and skin may be of different colours. Blue eyes, flaxen hair, and white skin constitute the blonde type; brown eyes, brown hair, and dark skin make the brunette type. Between these two types are all possible variations and mixtures.

While in the course of the prehistoric epochs in Europe the variations in the form of the skull multiplied, Schliess believes that the various prehistoric ages (Stone age, Bronze age, Iron age) show races with well-defined forms of the skull. At present time the European, of all the branches of mankind, has been the most thoroughly investigated anthropologically. Notwithstanding the crossings which have occurred continuously for centuries, certain groups with a distinct character have existed. For the Northern race, Stature, the shape of the skull, and the colour of the complexion have been taken as the criteria of these groups. According to this classification there is in the interior of Europe, in Alpine territory, a brunette or pigmentation of medium stature and with a broad head; towards the north the crania are smaller, the colour of the skin, hair, and eyes lighter, the stature is higher; towards the south the stature decreases, the complexion is darker, but the skull in the south, as in the north, is narrower than in the case of the first-named class. Starting from the north to the south, Ripley names these three types: (1) Teutonic race: long head and face, very light hair, blue eyes, high stature, narrow and partly curved nose; (2) Alpine race: round head, broad face, light chestnut brown hair, nut-brown eyes, robust medium stature, variable but generally broad, strong nose; (3) Mediterranean race: long head, long face, hair dark-brown to black, dark eyes, medium to small stature, rather broad nose. Between these pure types there are innumerable crossings.
the shape of the cranium or hair, the colour of the skin as the principle of classification, or have used a combination of several. Several ethnological peculiarities (especially the language and degree of civilization) were invoked for aid in characterization. Linneus differentiated four varieties of the _homo diurnus_ (a sub-division of the _homo sapiens_): (1) European; (2) Asiatic; (3) African. Not only were the colour of the skin and eyes, the colour and form of the hair, and the form of the nose used as criteria of these four divisions, but the different temperaments of the four races were also considered, and proportional criteria of character, mode of dress, and whether the individual races were governed by customs, laws, beliefs, or arbitrary rule.

Blumenbach already attempted to group the races of mankind on the basis of purely somatological peculiarities, selecting five typical forms of the cranium as the criteria of the five races of men. He took as the normal type the skull of the Caucasian race, which is distinguished by harmony of the individual parts, none being unduly prominent: with roundness (converse of flatness), and a moderate modification, narrow cheek-bones, round alveolar arch, and an orthognathous upper jaw. To the Caucasian type belong: Europeans (except the Lapps and Finns), Western Asiaties, and North Africans. Around this type there are mesocephalic races related to it and to one another. The Mongolian race includes most Asiaties, the Finnish tribes, the Lapps and the Eskimo; it has an almost square skull (exceedingly brachycephalic), flat nose, flat projecting malar bone, somewhat broad alveolar arch, and projecting chin. The American race has a higher forehead, highly developed superciliary arch, deeply sunken bridge of the nose, cheek-bones strongly projecting sideways, and high, broad, and strong lower jaw. In this race Blumenbach included all aboriginal Americans except the Eskimo. The skull of the Malay race is brachycephalic; the parietal bones project strongly sideways, the nose and cheek-bones are flat, and the upper jaws slightly prognathous. To this race belong the inhabitants of Malasia in Asia and the natives of the islands of the Pacific and Indian Oceans. The Ethiopian race includes the inhabitants of Africa except the Caucasian Africans in the north; the skull is dolichocephalic, the forehead full, the cheek-bones prominent, the nostrils wide, the alveolar arch marked and prominent, the jaws prognathous, and the lower jaw wide. All these races have equal importance in the racial classification and are related to these cranio-geographic others of a general somatological character, deduced from the observation of the members of the body, chiefly of the head and its parts. Blumenbach's classification still has adherents, B. P. Ehrenreich, for example, being a vigorous supporter of it. He adds to the classification, however, those races that have become known or at least better known since Blumenbach's time. These are mainly the blacks of Asia and the aboriginal races of Australia and Oceania. According to Ehrenreich, the classification is: (1) Caucasian-Mediterranean; (2) African-Nigrilian; (3) Mongolian; (4) American; (5) Malay Polynesian; (6) Australian. In addition there is (7) the Papuans and Melanesians, including the Dravidians and the Kolerian tribes of India, whose position in Ehrenreich's anthropological system must still be regarded as uncertain.

Blumenbach's classification was based on observation and description. There now followed a series of attempts to determine the differences by measurements. For the determination of the variations in the facial part of the skull Camper had already settled by measurement the facial angle, that is the angle made by the profile line and the auriculo-subnasal line (the line from the ear orifice to the lowest part of the nose). A. Retzius introduced the word orthognathism to signify an almost right facial angle (90°), and called the profile face orthognathous. Finally having noticed that in Sweden the Germans had narrow skulls, while the skulls of the Lapps were broad, Retzius sought to determine these shapes mathematically by the length-breadth index. He combined the groups of dolichocephalic and brachycephalic cranias gained in this way with the groups of facial angles, and thus arrived at four main types of crania: orthognathous dolichocephalic, orthognathous brachycephalic, prognathous dolichocephalic, and prognathous brachycephalic. This classification of the shapes of the cranium was unsatisfactory, even when mesocephalic cranias were separated from the others, since the various forms appear within every race, although perhaps with varying frequency. Wecker's investigations proved that cranias ranging from dolichocephalic to hyperbrachycephalic are found in the Mediterranean, Malay, and American races; the Mongolians appear to be rather mesocephalic and hyperbrachycephalic, while the black races incline more to dolichocephaly. His racial classification is based on the shape of the skull and face. He supposed six sub-species: chamaeprosopos dolichocephalic, chamaeprosopos mesocephalic, chamaeprosopos brachycephalic, leptoprosopos dolichocephalic, leptoprosopos brachycephalic, leptoprosopos mesocephalic. These sub-species have, through migrations and penetrations, spread over the entire world, and may be grouped into eighteen varieties according to the nature of the hair (smooth, bristly or coarse, and wavy).

Besides the shape of the skull, other somatological peculiarities have been employed by P. Topinard in the classification of races. Following Cuvier's classification, he takes as his main divisions the white, yellow, and black races, which he characterizes mainly by the shape of the nose. The narrow-nosed (leptorhine) white race has wavy hair with oval cross-section. Of those with dolichocephalic cranias, one division is blonde and large (Anglo-Scandinavian or Cymric); another large with red hair (first type of the Finns); a third bruneet and relatively small (the Mediterranean races). The mesocephalic type with brown hair and relatively small stature is found in the Semites and Egyptians. The brachycephaly type is composed of the little Lapps and Ligurians with brown hair, and the Cello-Slavs of medium height. The large, yellow race with red hair (second type of leptorhine), coarse, straight hair of round cross-section, also contains dolichocephalic, mesocephalic, and brachycephalic types. The Eskimo are small, dolichocephalic, and have a yellow skin; the Tehuelches are large, dolichocephalic, and have a reddish skin; the Polynesians are large, mesocephalic, and have a reddish skin. The brachycephalic type is represented by the Quarani and Peruvians, the former being of medium size with yellow skin, and the latter small with olive skin. According to Topinard, the broad-nosed (platyrhine) black race was divided by Topinard into one group with straight hair of oval cross-section, and a second group with woolly hair of elliptical section. The first group, comprising the aboriginal Australians, are dolichocephalic, tall, and have a black skin; all three types of skull appear in the second group. The very small yellowish Bushmen, the large black Melanesians, and the African negroes are dolichocephalic, the medium-sized black Tasmanians mesocephalic, the small black Negritos brachycephalic.

A. Frizaly hair, broad nose.—(a) yellow skin: (1)
the Bushman races, comprising Hottentots and Bushmen—yellow skin, stetagonal, small stature, dolichocephalic; (b) dark skin; (2) Negrito races, comprising both Negro and Negro—reddish-brown skin, stature very short and broad, brachycephalic; (3) Negro, comprising the Negritian and Bantu stocks—black skin, dolichocephalic; (4) Melanesians, comprising Papuans and Melanesians—blackish-brown skin, medium stature, dolichocephalic.

B. Hair frizzy or wavy. (a) dark skin: (5) Ethiopians—reddish-brown skin, narrow nose, large stature, dolichocephalic; (6) aboriginal Australians—chocolate brown skin, broad nose, medium stature, dolichocephalic; (7) Dravidians—blackish-brown skin, broad or straight nose, small stature, dolichocephalic; (b) dirty white: Assyroids—nose narrow, and convex with thick end.

C. Hair wavy, brown or black in colour, eyes dark.
   — (a) skin light brown: (9) Indo-Afghan—hair black, nose narrow, straight or convex, tall stature; (b) dirty white skin, black hair: (a) tall stature, long face: (10) Arabians and Semites—aquiline nose, projecting occiput, dolichocephalic, elliptical face; (11) Berbers—nose straight and thick, dolichocephalic, square face; (12) Inhabitants of the European coasts—nose straight and small, mesocephalic, face oval; (3) Small stature: (13) Inhabitants of the Iberian island—dolichocephalic; (c) dull white skin, hair brown: (14) Inhabitants of Western Europe—small stature, strongly brachycephalic, face round; (15) Inhabitants of countries on the Adriatic—tall stature, brachycephalic, long face.

D. Hair wavy or straight, flaxen in colour, eyes light, skin pinkish white. — (16) Northern Europeans—hair generally wavy, flaxen or reddish, tall stature, dolichocephalic; (17) Eastern Europeans—hair generally straight, tow-coloured, small stature, sub-dolichocephalic.

E. Hair straight or wavy and black, dark eyes.
   — (a) Skin light brown: (18) Ainos—body very hairy, nose broad and concave, dolichocephalic; (b) Skin yellow, body without hair: (19) Polynesians—nose projecting and often convex, tall stature, elliptical face, brachycephalic or mesocephalic; (20) Indonesians—small stature, nose flat and often concave, projecting cheek-bones, face lozenge-shaped, dolichocephalic; (21) Native Americans—small stature, nose projecting and straight, mesocephalic or dolichocephalic.

F. Straight hair.—(a) Sallow skin: (a) Straight or aquiline nose: (22) North American races—tall stature, mesocephalic; (23) Native races of Central America and South America—tall stature, mesocephalic; (g) Straight nose: (24) Patagonians—tall stature, brachycephalic, square face; (b) Skin yellow-brown: (25) Eskimo—small stature, face round and flat, dolichocephalic; (c) Skin pale yellow: (26) Samoyeds—sub-nose, small stature, brachycephalic; (27) Ugric race—nose straight or concave, small stature, mesocephalic or dolichocephalic, projecting cheek-bones; (28) Turks or Turko-Tatars—straight nose, medium stature, very brachycephalic; (d) Skin sallow: (29) Mongolians—projecting cheekbones, Mongoloid fold, slightly brachycephalic.

Huxley classifies mankind on a somatic-antropological basis. He divided the human race into four main types: the Australoid, Negroid, Xanthocroïd and Melanoïd, after which he sub-divided the Melanoïd. The aboriginal Australians are the chief representatives of the dolichocephalic Australoid type (dark skin and eyes, wavy black hair, flat nose, pronounced osseous supracleithral arch, and very prominent body). Outside Australia, Huxley claimed to have found the Australoid type in the interior of the Deccan, and among the Egyptians. The standard for the Negroid type is the African negro. Huxley wrongly considered this type as almost without exception dolichocephalic. It generally lacks a bony superciliary arch; skin and eyes are brown to black; the hair black, short and frizzy or woolly; the nose broad and flat; the lips thin and protruding, while the prognathism is universal. According to Huxley, the particular modifications of the Negroid type are: the small Bushmen with lighter skin; the partly brachycephalic Negritos with heavy superciliary arch, living in southern and southwestern Asia (the Malay Peninsula), and in the Andaman, Philippine, and South Sea Islands (Papuans) as far as Tasmania. Among these Negritos there has been a considerable crossing with Polynesians and Malaysians. Huxley grouped together the inhabitants of the greater part of Central Europe as the Xanthocroïd or fair-white type. This group is characterized by an almost colourless soft skin, blue or grey eyes, and light hair; the shape of the skull ranges from dolichocephalic to brachycephalic. In the south and west this type comes into contact with the Melanoïds, in the north and east, where it extends to Hindustan, with the Mongolid type. According to Huxley all Asia and its surrounding islands in the east and south-east, the east and north-east of Europe, and the whole of America are inhabited by yellowish-brown skin, black eyes, black, lamb hair, small, flat nose, oblique fold of the eyelid, but no projecting bony superciliary arch; the type is partly brachycephalic, partly dolichocephalic. The Melanoïds or brunettes live on both the Mediterranean Sea, and extend through Asia Minor across Arabia and Persia to Hindustan. The skin is brownish, the fine wavy hair almost black, the eyes dark. Huxley considered the Melanoïds the result of a mixture of the Xanthocroïd and Australoid.

The attempt of Linnaeus to employ intellectual peculiarities as criteria has also been repeatedly imitated. Thus, Friedrich Müller has combined somatic (form of the hair) and linguistic peculiarities to form the basis of his racial classification. According to his theory mankind is divided, according to the shape of the head, into woolly-haired and alean-haired. The woolly-haired races are subdivided into those with tuft-like hair (Hottentots, Papuans), and those with fleecy hair (African negro, Kaffir); the alean-haired (21) Native Americans—small stature, nose projecting and straight, mesocephalic or dolichocephalic.

Following Couvier and Topinard, W. H. Flower, an Englishman, separates mankind into three main divisions: (a) Ethiopean or Negroid Races: (a) The African type of negro; (b) Hottentots and Bushmen; (c) The Oceanic negro or Melanesians; (d) Negritos.

II. Mongoloid Race: (a) Eeekimo; (b) The Mongols proper, comprising the Mongolo-Altaic group; and the southern Mongolian group; (e) Malaysians; (f) Polynesians.

III. Caucasians, comprising Xanthocroïd and Melanoïd. From these three main races (called
archimorphic by C. H. Stratz), G. Fritsch has dis-
tinguished the mixed races derived from them as
metamorphic. Both divisions have a strongly de-
veloped instinct for migration (nomadic peoples),
which may prove the growth of civilization. At
the same time Fritsch and Stratz assumed a series
of tribes without an instinct for migration (non-
nomadic peoples); these were named by Stratz pro-
tomorphic. These theories, however, have scientific
value as working hypotheses, even though the one or
the other may prove the growth of civilization.

Following in part the investigations made by
Klaatsch of the skeleton, Stratz takes as protomor-
phic criteria: great individual variability; normal
proportions (according to the calculations of Fritsch)
with slightly increased length of the arm; total height
six or seven times the height of the heads; external
appearance little different in the two sexes; women
with small hips and mamma areolata; light to dark
brown skin; hair of the head very varied with oval
cross-section; hair on the body moderately developed;
pronounced protuberance of frontal bone; inclination
to dolichocephaly and prognathism; strong, broad jaws;
facial part of the skull large in proportion to the back
of the skull; coarse features; broad nose; small
orbits widely separated from each other; pointed ear;
the parietal bone in the middle, the forehead,
slender frame; narrow vertebrae; smaller curvature
of the vertebral column; narrow pelvis; platyknemic
thibia; nates weak; femur slight; no calves; tendency
to a crouching position and to turning the foot in-
wards; foot adapted for climbing; prehensile foot;
foot development of the ankle-bone (talus), of the
heel-bone (calcaneus), of the cuboid bone (as cubo-
deum), of the toe; very slight arch to the sole of the
foot; entire sole set on the ground in walking; early
development of sexual instinct. Stratz has selected the
above criteria for the division of the three archimo-
orphic races. Those of the melanodermic or black race
are: excessive length of the legs; total height 7 to
7-5 heads; skin from dark brown almost to black;
the hair of the head thick, black, and frizzly, with
an elliptical cross-section; hair on the body scant;
inclination to dolichocephaly (with a very decided
breadth of the skull behind); pronounced pro-
gnathism; powerful broad, and high jaws. Among
the characteristics of the yellow or xanthodermic race
are: deficient length of the limbs; total height 7 to
8 heads; yellowish brown hair, or light yellow skin,
black and coarse hair of the head, with a round cross-section;
hair on the body scant; inclination to brachycephaly; broad,
short jaw; slight frontal ridge; short, small, strong foot
with moderately increased length of the leg; male or white race are:
normal proportions; stature, 7-5 to 8 heads; mamma papillata; light brown
to almost white skin; orthognathism; from slight to
hardly noticeable frontal ridge; narrow, high jaws;
large muscles of the seat and calves; narrow, long
foot with powerful arch; strong ball of the great toe;
powerful heel.

Stratz has also sought to compare the different
races according to their relationship and develop-
ment. According to him, the aboriginal Australians
of to-day are the nearest to the common monogenic
original form. The second earliest protomorphic
races are the Papuans, Koikoins, and kindred races.
After the black races in Africa had become separated
from the main stock of mankind, the third earliest
protomorphic group separated from the first stock
(black, yellow, and white) and continued from the interior of the
peninsula, Kanakas, and Andamans. After the
main yellow race had been thrown off from the main
stock, the fourth earliest protomorphic group was
formed (according to Stratz, the Ainos, Veddas,
Dravidians, and the Celts). Finally the main
white race was developed. The metamorphic races
are to be regarded as races still in the process of
formation. Fritsch regards the three archimorphic
main races as centres de radiation: the white race
in South-Western Asia, the yellow race in North-
ern Eastern Asia, and the black race in Central Africa.
The white stock divided into the Semitic and Sans-
kritic branches; the yellow into the Chinese and
Scythian branches; while the Finn-Tatar branch
belongs to both the white and yellow stocks. The
black stock divided into the Pelagic branch (living
in the islands south and south-east of Asia) and the
African branch. According to Fritsch, owing to the
universal fertility of crosses among mankind, the
contact of the main stocks with one another and with
the protomorphic races gave rise at the points of con-
tact to the metamorphic races. Fritsch took as pro-
tomorphic non-nomadic peoples (i.e. as remains
of original primitive peoples): in Africa, the Bushmen,
Akkas, Longoros, Batuas; in Australia, the natives
of Queensland; in Asia, the Dravidians, Veddas,
Guang, Senoi, Kubu-kubu, Hieng, Miao-Tee, Ainos;
in America, the Makus, the Greg tribes of Eastern
Brazil, Fugianas; in Europe, the Neandertal race,
the Alpine race, the European dwarf race, and the
Lapps living in stone huts.

On the basis of the theories of Stratz and Keane,
scholars make the following classification:
I. Early races (that is the almost disappeared
remains of earlier races): (1) "Paleo-Asiatic,
Mongolian race (the Ainos); (2) Ethiopian race
(the Nubians); (3) dwarf race.
II. Chief family groups: A. Light colour or
European-West-Asiatic group of races: northern
Alpine, and Mediterranean main races; B. Asiatic-
Polynesian group of races: Mongolian stock, Malayo-
Polynesian stock; C. Negrito group of races:
(1) Negro; (2) dark-coloured Indian (Dravidic races);
(3) Indonesian and Oceanic Negritos, Melanesians;
(4) Australians and Tasmanians; D. American group of races.
III. Hybrid races: (1) Finno-Ugrian hybrid race;
(2) Berber hybrid race.

Most of the above racial classifications offer cer-
tain advantages, but also show faults that may not
be overlooked. All contain three great groups which
may be characterized by the most striking attributes
as the smooth to wavy-haired white race, the coarse-
haired yellow race, and the frizzly-haired black race.
In addition, however, there is a series of other dif-
ficulties, somatological and ethnological. However,
it is difficult to group together a number of
branches of these three main stocks. Most writers
who desire to give a descriptive summary of the races
of peoples of the world (as Deniker, Brunfels, Schurts,
and others) have, therefore, primarily
guided themselves by the abodes of these races, and
have grouped them according to the divisions of the
earth within which it can be shown that various
branches and subordinate groups live.

</table>
Race, Negro.—The term negro, derived from the Spanish and the Latin words meaning "black" (negro, negro), may be applied to any man and woman, but it is more strictly confined to certain peoples and tribes of Central Africa and their descendants in various parts of the world. The Blumenback fivefold division of mankind considers the negro in the first place under Ethiopian, embracing the Kalim, Nubia, and Abyssinia. The second division includes the negroes. Pritchard and Latham rightly protest against the error of considering the term negro synonymous with African. There are dark-skinned people of various types throughout the tropical countries of the world, and the negro is dark-skinned, with woolly hair and other characteristics, while differing in minor traits. It is a mistake to hold, as some do, that all negroes have common traits. Professor Jerome Dowd, a Southern white man, declares that "to speak of all negroes in Africa as one race having common characteristics, is as misleading and as unscientific as if we should consider all Europeans and Americans as of one race and attribute to all of them the same traits." Observations and the records of the African continent go to show that it is not true with negro races that the skin colors are lowest in the scale of civilization. The negro is originally a native of the Sudan and other parts of West and Central Africa, where there is now a population of about 128,000,000 blacks. In the West Indies, South America, and other parts of the world, the descendants of Africans, though in the United States those of mixed blood, the mulattoes, and even those with a preponderance of white blood are classed as negroes.

History.—The origin of the negro race dates from the formation of races in the twilight of human history. Like the origin of the human race in general, it is a subject for anthropologists and theologians. The ethnological aspects of the question are many and varied. The original African is said to be the Bushman, or negro, or black, the Bushman, and the Bantu, or mixe, was usually brown in colour, who invaded South Africa, driving out the original Bushman. But centuries of slavery have so broken and intermingled the different stocks that it is difficult to find the negro without any mixture of foreign blood.

The history of the black man in America, with which we are most immediately concerned, began with the African slave-trade. Under the compulsion and rod of the slave-master the negro became part of the population of the New World. The negro slavery of modern times followed the discovery of America. The Portuguese, who possessed a large part of the west African coast, began the employment of negroes as slaves, in which they were followed by others colonizing the New World. The first country in the New World to which negroes were extensively brought was Haiti, or Hispaniola. The aboriginal race had at first been employed in the mines there, but this kind of labour was found so fatal to them that Lais Casas, Bishop of Chiapa, the celebrated protector of the Indians, although at a later period he disapproved of slavery, urged Charles V to substitute African slaves as a stronger race. Accordingly, the emperor, in 1517, authorized a large importation of negroes. Sir John Hawkins was the first Englishman who engaged in the traffic. Others of his countrymen soon followed his example on an extensive scale. England had between 1680 and 1700, no fewer than 300,000 slaves from Africa, and between 1700 and 1786 Jamaica alone absorbed 610,000. A Dutch ship brought from the Guinea Coast to James-town, Virginia, a cargo of twenty negroes in 1620; this was the beginning of slavery in the English colonies of America. An English company obtained the monopoly of sugar production in the West Indies for thirty years; the contract was annulled by Spain in 1739, and England consequently declared war on Spain. The number of slaves annually exported from Africa amounted, at the end of the eighteenth century, to 74,000. Between 1680 and 1736 there were 2,113 negroes brought into the British colonies of America, including the West Indies. Altogether it is estimated that probably 12,000,000 slaves were landed in North and South America from the beginning to the end of the slave-trade. An equal number is claimed as killed by the African slave raids and on their way to America. The slave-trade was usually attended with extreme cruelty; the ships which transported the slaves from Africa to America were overcrowded to such an extent that a large proportion died on the passage. The treatment of the slave after his arrival depended much on the character of his master; restraints, however, were imposed by law in the various settlements to protect slaves from injury.

Early in the eighteenth century Cartagena, in Colombia, was noted slave market. This was the field of labour of St. Peter Claver, of the Society of Jesus, the apostle of the negroes. As many as twelve thousand slaves were landed annually at Cartagena. They were usually in a wretched condition, and the treatment of the negroes is one of the bitterest complaints. In time a strong Christian sentiment asserted itself against the traffic. In Catholic times in Europe and the East, under the benign influence of the Catholic Church, the nations gradually emancipated the slaves. From the beginning of the African slave-trade the papacy, from Pius II, in the sixteenth century, to Leo XIII, in the nineteenth, issued encyclical and directed anathemas against the barbarous and inhuman treatment of human beings in slavery. The traffic and its cruelties were condemned by the Holy See before the discovery of America. In America the Friends, or Quakers, of Pennsylvania, in 1776, required their members holding slaves to emancipate them. Abolition societies were formed to discourage and oppose the slave-trade. On a great increase in the traffic, action was taken by the British Government to stop further importation of slaves into the colonies was prohibited in 1807. The United States prohibited the importation of slaves from Africa in 1808, though to some extent slaves continued to be brought into the country secretly and unlawfully up to the emancipation of the slaves. The importation of slaves was likewise forbidden in the South American republics. Eventually, all the states of Europe passed laws or entered into treaties prohibiting the traffic.

The next thing sought was the total abolition of slavery and the emancipation of slaves. This was brought about in the British colonies in 1834. The French emancipated their negroes in 1848. In Haiti slavery ceased as far back as 1791; its abolition was one of the results of the negro insurrection of that year. Many of the Spanish-American states abolished slavery on declaring their independence; the others have since that time abolished the institution. Brasil passed a law of gradual emancipation in 1871. Pope Leo XIII, in 1888, wrote to the bishops of Brazil setting forth the position of the Church on slavery: he condemned the cruelties and deplorably recommended the abolition of slavery. In the United States slavery was firmly established at the time of the Declaration of Independence and was recognized by the Constitution, ratified in 1788. There were then several hundred thousand slaves in the republic. Slavery declined in the Northern states, but not in the South, where negro labour was required for the cultivation of sugar and cotton. The diversity of
feeling and interest between the North and the South on the question of slavery brought about the Civil War. Negro slavery was then brought to an end in the United States, when, in the interest of the Union and as a military measure, President Lincoln issued his 13th Amendment to the Constitution, January 1, 1863.

Since acquiring freedom the negro has increased in numbers and advanced in a material way. Discrimination, prejudice, and fierce criticism have spurred on the more ambitious and more respectable class among them to acquire education and property. In less than forty years of freedom, up to the year 1900, the number of black people that could read and write rose from 5 per cent to 55½. The rate of increase of the negro population is estimated by the United States Census authorities to be about 15 per cent for the ten years preceding the Census of 1900. The Census Reports for 1900 give 8,833,994 negroes for the Continental United States. There are also 363,742 persons of pure or mixed negro blood under United States jurisdiction in Porto Rico. The Census statistics for 1910 in relation to the various races are not as yet available, but by using the normal percentage of increase, we may estimate the approximate figures for that year, placing the present negro population of the Continental United States at 10,138,092. The census of mulattoes or those of mixed blood of varying degree was taken in 1850, 1860, 1870, and 1880, with the result that enumeration is acknowledged to be very subject to error, some general results have been obtained. The indications are that from 11 to 16 per cent of those classified as negroes have some degree of white blood. The figures warrant the belief that between one-sixth and one-ninth of the negro population of the Continental United States have been regarded by four groups of enumerators as bearing evidence of an admixture of white blood. In the South negroes form about one-half of the population, and ten per cent of the entire negro population of the country were living in the adjoining states of Georgia, Alabama, and Mississippi. These, together with the adjacent Atlantic Coast states (Virginia, North and South Carolina) and the Gulf states (Louisiana and Texas), had then each over half a million negroes. In 1900 the negro population was distributed by states as follows:

- Georgia: 1,034,813
- Mississippi: 907,630
- Alabama: 650,804
- South Carolina: 782,321
- Virginia: 660,722
- Louisiana: 650,804
- North Carolina: 624,469
- Texas: 620,722
- Tennessee: 480,243
- Arkansas: 366,856
- Kentucky: 284,706
- Maryland: 235,064
- Florida: 230,730
- Missouri: 154,244
- Pennsylvania: 156,845
- New York: 99,232
- Ohio: 96,901
- District of Columbia: 88,702
- Illinois: 85,078
- New Jersey: 69,844
- Indiana: 57,505
- Kansas: 52,003

The remaining states had less than 50,000 each, making up the total of 8,833,994.

Leagues and Clubs — The Census Reports show that the negro agricultural labourers, farmers, planters, and overseers, unclassified labourers, servants, waiters, launderers, and laundresses constituted 83+ per cent, or about five-sixths, of the negroes in all wage-earning occupations in the Continental United States. The same document also shows that 27 occupations include 95+ per cent, or over nineteen-twentieths, of all negroes in wage-earning occupations. More than three-fourths (77.3 per cent) of the negroes live in the country. In 1900 there were in the United States 7,407,717 farms operated by negroes. These farms were covered 38,239,000 acres. In 1900, 4,099,943.76 acres of the 7,407,717 farms operated by negroes 21 per cent were owned entirely, and an additional 4·2 per cent owned in part, by the farmers operating them; in other words, forty years after emancipation 25·2 per cent, or about one-fourth, of all negro farmers had become landowners. The value of all taxable property now owned by the coloured people in the United States is estimated at $550,000,000.

Education.—Statistical summaries which are available from 16 former slave states give for 1908-9 in the common schools for coloured children an average daily attendance of 1,116,811. In these schools are employed 30,334 coloured teachers. There are 141 public high schools for the coloured race with 10,933 pupils and 473 teachers. The governmental education report for 1910 also gives statistics of 189 secondary and higher schools, colleges, industrial schools, etc., for coloured students (excluding public high schools). These schools are usually under the control of various religious denominations. Some are controlled by private corporations and are classed non-sectarian. The school system is admitted to be incomplete. The denominations are given in the list, namely, St. Joseph’s Industrial School, Clayton, Delaware, and St. Francis’s Academy, Baltimore, Maryland. There are, besides these, two other Catholic boarding schools for coloured boys, one at Rock Castle, Virginia, and the other at Montgomery, Alabama, besides the Van de Voyer College, at Richmond, Virginia, and others. There are also several Catholic boarding schools for coloured girls where academic and industrial branches are taught. The Sisters of the Sacred Heart, of Cincinnati, have institutes at Rock Castle, Virginia, and Cornwells, Pennsylvania. The coloured Oblate Sisters, of Baltimore, and the Holy Family Sisters, of New Orleans, have each several boarding institutions. The Catholic day schools for coloured children number about one hundred. No education is given in the South except in separate schools.

Many of the schools described in the Government report of non-public high schools are termed normal and industrial schools and institutes. Others are termed mission schools. They are operated largely by the religious denominations of the North. Considerable income is also derived from tuition fees and private subscriptions. Generous allotments are also received by the non-Catholic institutes from educational funds established for freedmen by Northern philanthropists, such as the Peabody Fund, the John F. Slater Fund of New York. The John F. Slater Fund alone disbursed $72,050 (about £14,590) to various coloured institutes throughout the South in 1909-10. The so-called non-sectarian colleges receive also state and municipal aid. In 1868 Samuel Chap- man Armstrong, a celebrated friend of the negro, founded Hampton Institute of Virginia for the education of negroes and Indians. At the present writing (1911) Hampton Normal and Industrial Institute has 1374 students, male and female, with 112 white and coloured teachers. Hampton has been the inspiration of an extensive system of similar educational and industrial institutes for the coloured race throughout the South. The most noted offspring of Hampton is Tuskegee Normal and Industrial Institute, Tuskegee, Alabama, which now has 1195 students, male and female, with 135 instructors, all coloured. The property of the institute is valued at $1,278,635 (£255,727). It has a large endowment, which is being increased. The total income of the school for 1909-10 was $358,949.

Religion.—The negro has a religious nature. His
docile, cheerful, and emotional disposition is much influenced by his immediate environment, whether those surroundings be good or evil. Catholic faith and discipline are known to have a wholesome effect on the race. Observing men and judges of courts have remarked on the law-abiding spirit existing in Catholic communities. (For a variety of religions of the negro, a discussion of the negro’s civilization do not always tend to elevate the morality of the negro. The negro is naturally gregarious, and the dissipation and conditions of city life in many instances corrupt the innate simplicity of the younger generation to the sorrow of their more conservatively religious Negroes.) (For a view of religion in these later times among the blacks in the native African home of the race, see Africa.) Contrary to a prevalent opinion, the negro, when well grounded in the Catholic faith, is tenacious of it.

In the United States the negroes and their descendants naturally adopted more or less the religion of their masters or former owners. Thus it comes that, outside of Maryland and the Gulf Coast, in a large section of the South comprising former slave states and colonized by English Protestants, the negroes went over to any part of the negro’s religion. Catholics and the Catholic faith were entirely unknown to the negroes in those states. In colonial times the religion of Catholics and the religion of negroes were regarded with suspicion, but the latter is considered by many negroes as Christian. Under the law of Virginia as it was in 1705, Catholics, Indians, and negro slaves were denied the right to appear as witnesses in any case whatsoever, not being Christians. The negro Methodists are those who are in a manner affiliated to the white Methodists, as also those who form independent bodies having no connexion with the white bodies. The three more important organizations of coloured Methodists are the African Methodist Episcopal Church, the African Methodist Episcopal Zion Church, and the Coloured Methodist Episcopal Church. These bodies claim together 869,710 members. With other African Methodists the total number of coloured Methodists is probably near 1,500,000, with 13,000 churches. The greater number of coloured Protestants are Baptists. A significant fact is that the Baptist congregations are independent of each other. However, according to statistics given for 1908, there are eighty-nine thousand organizations and six hundred district associations with 18,307 organized negro Baptist churches. There are 17,658 ordained preachers in the United States. The entire number of coloured Baptists is given as 2,330,535. The number of negroes adhering to other Protestant sects is comparatively insignificant. Taken together there are probably about 4,000,000 negroes who profess Protestantism in the United States. There are probably about 200,000 coloured Catholics, which leaves over 5,000,000 who profess no Christianity. Remembering that some of the Baptist sects do not baptize young children, we may conclude that there are over 6,000,000 negroes in the United States unconverted. On the other hand, the vast majority of those who claim adherence to some Protestant denomination have no definite notions of Christian doctrine and have equally vague ideas about Christian morality. This state of things may be largely attributed to the lack of definite religious training in youth. The negroes of the West India Islands and of South America have for the most part the religion of the original conquerors and settlers of those regions, and the matter is treated under the respective proper titles.

Archbishop Hughes of the Catholic negroes of the United States live chiefly in those Southern states originally settled in part by Catholics. Among these are Maryland and the states on the Gulf of Mexico, namely, Florida, Mississippi, and especially Louisiana, where the larger number dwell. The bishops of the Catholic Church, in times past, mad zealously endeavored to spread the elevating influence of the Catholic Faith among the coloured people of this country. The two later councils of Baltimore, in burning words, urge work among the coloured race. The Second Plenary Council implores priests “as far as they can to convert the negroes to the Catholic faith, and make of them and themselves, wholly and entirely, if possible, to the service of the coloured people”. The want of men and means has much hampered the work. At one time it was reported that many thousands had lost the Faith for want of priests to care for them. It is said that in one composition of Louisiana alone as many as 30,000 stayed away. But strenuous efforts are now being made to reclaim them. The supply of priests devoted to the interests and salvation of the negro race is recognized as a serious problem, as there seems to be hardly a sufficient number of vocations among youth. Some time before his death, Pope Leo XIII issued a letter urging a native clergy. Pope Pius X has also encouraged missionary work among the negroes.

It is almost impossible to obtain the exact number of Catholic negroes in the United States. While a great number of negroes live in the southern states, some negroes have their own churches, to the number of about sixty, many others are mingled among whites in widely separate parishes, where no report is ever made of the colour of the members. However, a conservative estimate gives 225,000 as the approximate number in the Continental United States. There are about ninety-five priests labouring exclusively among coloured people. Of these the Fathers of the Society of St. Joseph, about fifty in number, labour in twelve Southern dioceses and have their mother-house at Baltimore, Maryland. The remainder are twenty-eight diocesan priests in various dioceses and priests of the Society of African Missions, in the Diocese of Savannah; of the Society of the Divine Word, in the Dioceses of Natchez and Little Rock; of the Congregation of the Holy Ghost, in Pennsylvania and Virginia. There are five priests in the country who are coloured men. Some white sisters are assisting the good work for the race, teaching 11,000 children in the parish and mission schools. Besides these, there are two communities of coloured sisters. One of these is the Oblate Sisters of Providence. The Sisters of the Holy Family, another order of coloured women, now has 116 sisters, who have charge of seventeen schools and asylums situated in the Southern diocese of New Orleans and in the dioceses of Galveston and Little Rock. They also conduct a Government school with 295 pupils in British Honduras.

A commission established by the Third Plenary Council of Baltimore for the Catholic missions among the coloured people and Indians, consisting of three archbishops, distributes the funds collected for this purpose annually throughout the United States; and a special “Catholic Board for Mission Work among the Coloured People”, incorporated by the hierarchy in 1907, fosters missionary spirit among Catholics in favour of the coloured people and labours also to provide funds for this object. (See Priests, Confraternities of: VI. The United States.)

Rachel (γυναίκα, "a evo"), daughter of Laban and younger sister of Lia. The journey of Jacob to the "east country" (Mesopotamia) in quest of a bride of his own kin, and his providential meeting with Rachel in the open country followed by his introduction into the household of Laban are told with idyllic charm in the twenty-ninth chapter of Genesis. Jacob, being in love with Rachel, agreed to serve her father for her seven years. Laban accepted, and the seven years seemed to Jacob "but a few days, because of the greatness of his love". He was deceived, however, by Rachel, who at the end of the term of service gave him to wife, not Rachel, who "was well favoured, and of a beautiful countenance", but her elder sister Lia, who was "blist-eyed"; and Jacob received the younger daughter to wife only on condition of serving seven years more. Rachel, being for a time without off-spring and envious of her sister, to whom four children were born, gave to Jacob as a secondary wife her handmaid Bilhah, whose child, of the times, would be reckoned as her own. From this union were born Dan and Naphtali. In the quarrel which arose between Jacob and Laban, Rachel as well as Lia sided with the former, and when departing from her father's home she carried away with her the teraphim or household gods, because of their protecting influence over herself and her husband (Gen., xxxi, 19). Among the sons of Rachel after the "Lord remembered" her were Joseph and Benjamin, in giving birth to the latter of whom Rachel died. At the point of death "she called the name of her son Benoni, that is, The son of my pain: but his father called him Benjamin, that is, The son of the right hand". Rachel was buried "in the high-way that leadeth to Ephrath, this is Bethlehem. And Jacob erected a pillar over her sepulchre: this is the pillar of Rachel's monument, to this day" (Gen., xxxv, 18-20). The exact location of the grave of Rachel is a disputed point. A passage in Jeremiah (xxxvi, 15) would seem to indicate that it was on the northern border of Benjamin towards Ephraim, about ten miles north of Jerusalem. Tradition, however, has from at least the fourth century fixed the spot four miles south of Jerusalem and one mile north of Bethhem.

James F. Driscoll.

Racicot, Zottie. See MONTREAL, ARCHIDIOCESE OF.
family, asked Racine for a drama to be represented by her protégées. He wrote "Rhetor," which had an enormous success. Every night, the splendid of the chorus, the perfection of the characters, and the wonderful art of the play as a whole. The other was "Athalie," a drama of the same kind.

As a dramatic writer, Racine was one of the leaders of the classic school. His dramatic art was a protest against the heroic and bombastic tragedies which, until that time, had been the fashion. We read in the preface to "Britannicus": "What can I do to satisfy my stern critics? It would be very easy to do so if I were willing to sacrifice common sense, not only to nature and art but also to the sensational." Corneille liked an action rather complicated, "full of incident, a large number of theatrical surprises, and numberless high-flew speeches." Racine, to quote his own words, always chose "a simple action, not overladen, which, progressing steadily to the catastrophe, is sustained by the interest, the feelings, and the passions of the characters." Again, while in Corneille the characters are secondary to the action, in Racine the action is secondary to the characters. Florens so do not concern themselves with sensational situations in his tragedies, but rather with a deep and complete study of the passions by which the human heart is a prey and, above all, of love. Racine is the great painter of love, but love as he conceives it is always violent, impetuous, jealous, and most often fatal. The effect of his method was to bring about a change in that of the French drama. Racine's style is simple and smooth, always pure, elegant, harmonious, and, nevertheless, when necessary, strong and bold. Racine was a sensitive, vain, and irritable man, with deeply religious feelings, and a keen, supple, and strong intellect. He displays in his work almost unique powers of psychological analysis, a wonderful delicacy of sentiment, and an exquisite sense of literary art.

The standard text of his works is MEMOIRE (7 vols., Paris, 1868-73); etime, in Head's "The French Classics," which (London, 1867); TROLLOPE, Corneille and Racine in the French Classics (London, 1845); TROLLOPE, Corneille and Racine in Foreign Classics (London, 1881); BOURRÉ, Les Époques du théâtre français (Paris, 1892); DEGGART, Les grands écrivains français (Paris, 1898); STENDHAL, Racine et Shakespeare (Paris, 1891); VICTOR, Rhein, Vol. VI (4th ed., Paris, 1892); DE GROUCHY, Documents inédits relatifs à Jean Racine (Paris, 1892); LEMAITRE, Impressions de théâtre, I, II, IV (Paris, 1893-99); FIGUE, Vie de Septime Sévère. JÉAN LEFEBRE.

Rader. See PASCASUS RADERUS.

Radau, J. See FORTUNATUS, VENANTIIUS HONORIUS CLEMENTIUS.

Rader, Matthew, philologist and historian, b. at Anninchen in the Tyrol in 1561; d. at Munich, 29 December, 1584. At the age of twenty he entered the Society of Jesus, and subsequently taught the humanities for twenty-one years in different Jesuit institutions. He wrote several school dramas, but was particularly known among Catholics and non-Catholics for his scholarly attainments. In 1598 he published an improved and expurgated edition of Martial, and in 1628 one of Quintus Curtius. His edition of the Acts of the Eight Ecumenical Council was incorporated by Labbe and Cossart in their collection of the acts, and that of the acts of St. Claudio, published in 1614, was reprinted by Migne in his Greek patriarch (LXXXVIII, 585 sqq.). More important than the publications just mentioned were his now very rare works: " Bavaria Sancta" (Munich, 1615-17), and "Bavaria Fidei" (Munich, 1628). Both were written in the Dietrich Bible, addressed to the Diet of Worms, and the former was partly published in a German translation by Father Rasser at Straubing in 1840.

Raderwitz, JOSEPH MARIA VON, b. at Blankenburg, 6 February, 1797; d. at Berlin, 25 December, 1853. Raderwitz was of Hungarian descent, though his family had lived in Germany since 1745. In his youth he fought with the French in the War of Liberation, but had no feeling against the German cause. While an army officer in the service of the Elector of Hesse (1815-23) he gained an extensive knowledge of modern languages and history, and laid the foundation of his religious and political convictions. As the child of a military family who had lived in purely Protestant surroundings, but in time he grasped the historic fact of the Incarnation of God, the founding of the Church by Christ, and the superiority of the truth of Christian dogsma and the Catholic view of life over all philosophy, thus becoming a strong Catholic. Repeled in politics by Liberalism, which he considered superficial, he studied Burke and Haller, adopted the theories of the latter, and became an opponent of Absolutism in every form. His preference was for constitutional government by the Estates, but he considered a representative constitution unavoidable at that time. In 1823 Raderwitz entered the Prussian army, and from this time served Prussia with enthusiasm. The king took a kindly interest in him, the crown prince was his friend, and by his marriage with Count, 14th wife of the Christian-German followers of Haller in issuing the "Christian-German" followers of Haller in issuing at Berlin the "Politisches Wochenblatt" (see JACKE) and wrote largely for the periodical. For this transgression of military traditions the king removed him from Berlin in 1835. Until 1848 he
was Prussian military attaché at the German Diet at Frankfurt, and from 1842 also Prussian ambassador at the Courts of Karlsruhe, Stuttgart, and Darmstadt. He had nothing to do with the dispute between the government and Prussian Catholics in 1837.

After Frederick William IV ascended the throne in 1840 Radowitz was frequently called to Berlin to give advice and was also sent on missions to other countries. Notwithstanding the secret opposition of Austria and the open opposition of the States of central Germany, his duties as military attaché led him to examine the constitution of the German confederation, the immediate reform of which he declared to be a necessity if Germany were to be preserved from a revolution. He soon felt himself called to become the reformer of the Confederation, and, in view of the difficulties in the way, advocated the stimulation of the German people by a war whenever the opportunity offered itself (e. g. in 1840, during the strained relations between France and Germany, and in 1846, when the Schleswig-Holstein question became acute); victory was to be utilized to strengthen the German position among the European Powers and to develop Germany internally. He desired to make Germany a nation to contend and to estimate it by the addition of Switzerland and the Netherlands. He wished Prussia to take the lead in the reorganization of internal affairs, as he had discovered at Frankfurt that Austria's interests lay in eastern and southern Europe, and could not be depended on for German interests. To attain these reforms by peaceful means, he considered it necessary to place military matters and legislation under the control of the people. He wrote in 1846: "A strong central power could then be formed as need required.

To accomplish his desires he advised the king to attain the unity which the law of the German people demanded by introducing a constitutional form of government, in which the parliament should be less powerful than the crown and independent of the bourgeoisie and capitalists. He proposed social legislation to win the support of the working class for the government, but on account of the weak character of Frederick William IV, these plans were not carried out. While in Baden Radowitz watched the approach of the revolution. In 1846 he wrote the "Gespräche über Staat und Kirche", setting forth in the form of a dialogue all the antitheses in the German life of his time and pointing out in a clear, simple manner what he would have done to improve conditions. In a memorial presented in November, 1847, he urged the king to take up at last the reform of the Confederation, as Germany had been carried into the revolutionary movement. He was sent on this business to Vienna and Paris, but he was able to accomplish anything Metternich was overthrown in March, 1848, and Frederick William IV, after granting a parliamentary constitution, called a Liberal ministry. Radowitz withdrew from public affairs, but without any effort on his own part was elected member of the preliminary Parliament of Frankfurt, where he brilliantly represented more as orator than as leader the Christian and conservative principles. Though the majority of Catholics were adherents of the revolution, Radowitz worked both to attain this end, and to prevent the whole national movement from failing. He was willing that Austria should merely be connected with the German states in a "new confederation", by which he was largely mistaken, and proposed Frederick William IV as German Emperor, March, 1849, though the king had declined the election.

In April Radowitz was called to Berlin and by his advice the king invited all the German governments to accept Austria to carry out the principle and constitution agreed upon at Frankfurt in a freer confederation called the "Union", all revolutionary elements being suppressed. To Austria he offered to exchange guarantees of their possessions. Fear of Prussia led most of the German governments to accept this proposition, and the Liberal Liberals also agreed. Radowitz, however, was not made minister, and the Conservative party was rapidly growing in strength in Prussia. They opposed him because he was willing in the plan of the Confederation to concede too much to the Liberal party, and to the people. At too late an hour (26 September, 1850) the king appointed Radowitz minister of foreign affairs. Austria had gained time to plan its measures, and Radowitz wished to settle the matter by war. Austria and Prussia were reconciled, but Frederick William gave up the idea of war. Radowitz retired from his post on 2 November, and went to London as extraordinary ambassador but could gain no diplomatic success on account of the weakness Prussia had shown. In the spring of 1851 he retired into private life. In 1852 the king prevailed upon him to come again to Berlin, where, however, he performed only military duties. He was an active author all his life. At the close of his twentieth year he had written an "Iconographie", and later he published numerous pamphlets. The pamphlet issued, April, 1848, on "Deutschland und Friedrich Wilhelm IV" attracted much attention. The "Gespräche" was followed during the fifties by five volumes of collected writings. The first volume of his comprehensive biography, published in 1859, gives the remainder of his literary works up to May, 1848. The second volume, which is being prepared by Meinecke, is expected to give a detailed explanation of much that is not clear in the Prussian-German policy of 1849-50. His son has had a brilliant career in the "public opinion". He can especially be noticed in 1885 when threats of war disturbed European diplomacy, and lately was the representative of Germany at the conference at Algeciras.

Parnassus, Joseph von Radowitz (Leipzig, 1860); Chiliasmum, VII (Würzburg, 1865), 463 sqq.; Allgem. deutscher Biog., XXVII, 141 sqq.

Martin Spahn.

Rudolph of Biro (or of Tongres; RUDOLPH VAN DE BEKE), historian and linguist, b. at Breda, in Dutch Brabant, about the middle of the fourteenth century; d. at Tongres, 3 Nov., 1403. He pursued his studies in various parts of Europe—in Italy, where he was in 1362, at Paris, and at Orleans (1367-75), where he studied canon and civil law. In 1371 at the latest he was subdeacon. In 1377 at the deanery of Tongres by a Bull of Gregory IX, he took possession of his charge in 1383. In the interval he returned to Italy; in 1381 he was still at Rome, where he had as master Simon of Constantinople, Archbishop of Thessalonica, and, after 1383, he was replaced at Tongres by a vice-dean. During this time he had matriculated at the new University of Cologne (founded in 1388), where for a time he was
RAGUSA

Raguenue, Paul, Jesuit missionary, b. in Paris, 18 March, 1609; d. 8 Sept., 1651. He entered the society in 1628. In 1636 he went to Quebec, and was soon sent to the Hurons with Le Moyne, Duperon, Jogues, and Garnier, to labour under Brébeuf during the long and painful period preceding the conversion of that nation. He was one of the heroic band who, in 1637, being exposed to death at every moment, signed and sent to their superior as their last will a joint act of resignation to martyrdom. In 1645 Raguenue was superior of the Huron mission which counted eighteen workers. He possessed a perfect mastery of the language. The death of Brébeuf, Jogues was the signal for many conversions, and Raguenue writes with admiration of the fervour of his neophytes. Five of his fellow-missionaries won the martyr's crown in different posts under Raguenue's direction, the first being Father Daniel (4 July, 1648). He remained at his post at St. Mary's on the Wye until persuaded by the Huron captains to join the fugitives on St. Joseph's island to avoid a notable increase in the number of conversions (3000 Indians being baptized in 1649) of the Iroquois, yielding to the entreaties of the few whom famine, pestilence, and the fury of the Iroquois had spared, led the small band of 400 survivors, the remnants of a nation of ten thousand, to their final refuge, Quebec, after a long and perilous journey. In 1650 he became vice-rector of the college of Quebec and superior of the Canadian mission. It was during this time that he directed in the ways of holiness a highly privileged soul, Sister Catherine of St.-Augustine, whom he wrote. His influence in the supreme council and with Governor de Lauzon was the occasion of his removal to Three Rivers (1656). The year following he was sent as superior to the Iroquois mission. On his way to Onondaga he witnessed the butchery of his Huron companions, for which he reproved the murderers, the Senecas and Onondagas, at the peril of his own life. Informed of the impending massacre of all the French in the Iroquois country, Raguenue's genius planned and realized their escape and return to Quebec (1658). He returned to France (1662) with Bishop Laval, and remained there as procurator of the mission. Besides a life of Sister Catherine of St.-Augustine (Paris, 1671), Raguenue wrote "Relations" of 1648-9, 1649-50, 1650-1, and 1651-2. No other Jesuit in Canada wrote so much as he. On one of his missions he saw and mentioned Niagara Falls thirty-five years before Hennepin, the alleged discoverer, described the cataract.

LIONEL LINDSAY.

RAGUSA (Epidauros). Diocese of (RAGUSINA), a bishopric in Dalmatia, suffragan of Zara. The episcopate of its first bishop Fabianus was followed
by a long series of bishops. For more than a thousand years Ragusa was an independent republic and consequently had archbishops. The first archbishop was Joannes II (d. 970). After the dissolution of the republic (1501) the see was vacant for a long time, until in 1569 Ragusa elected a bishop. At the present day the diocese has a Catholic population of 73,000, with 115 secular priests; religious orders of men, 93 members in 19 houses; religious orders of women, 51 members.

From Lucas of Leyden Raimondi also learned much; his burin gained in mellowness from engraving Perazzo's work. Rapidly assimilating and always simplifying, Marcantonio's "Mars and Cupid" (1566) finds him master of technique and finally in style.

About this time Raimondi left for Rome, stopping at Florence to sketch Michelangelo's (lost) cartoon for The Climmers which he afterwards engraved in Rome (1510). Seeing a proof of this Raphael exclaimed, "It is the finest I have ever seen and the finest that can be seen!" The two artists became friends and Raimondi's next work was Raphael's "The Death of Lucretia". This and later plates show the darks becoming less dramatic and the burin work more "open". Raimondi left much to Raimondi, never giving him a finished picture but a pencil or pen outline drawing, knowing that the proper treatment and elaboration would come from his engraver; and hence there is often a marked discrepancy between an oil by Raphael and Raimondi's engraving thereof. Marcantonio's triumphs in Rome equaled those of Raphael; Dürer wrote for proofs from his hand, and German engravers flocked to Rome to study under him. Romano and Aretino subsequently induced him to engrave obscene or suggestive plates, for which he was imprisoned by Pope Clement, who, however, freed him several months later at the solicitation of Cardinal de Medici. In 1527, at the sack of Rome, he is said to have escaped, leaving a fortune and his plates in the victors' hands. Some authorities record that he died four years before this, heartbroken at the death of Raphael. Raimondi opened up a new province of the burin—reproduction; he inspired the largest following that ever an engraver had, and he drew as well as da Vinci or Raphael. "His sentiment was noble, his taste pure" (Delaborde); his style, simple and sober, his modeling of figures beautiful, and he was the first engraver who omitted details. Of texture, tone, and local colour of modern engravers he had not a trace. Raimondi engraved about six hundred plates. His best are: "Adam and Eve" (probably the finest); "Virgin with the Bare Arm"; "Massacre of the Innocents"; "The Plague"; "The Judgment of Paris" (with a trace of goldsmith-like shading).

Leigh Hunt.

Rainald of Dassel, b. probably not before 1115; d. in Italy, 14 August, 1167. A younger son of a rich Saxon count, Rainald I, and destined as such to be an ecclesiastic, he was sent to the cathedral school at Hildesheim. At a later date he probably went to Paris. As early as 1130 he is said to have had a high reputation for classical learning, and to have been a member of the cathedral chapter of Hildesheim. According to documentary evidence he was provost in 1148, and on 1154 is noted by the Venetian Senate on Dürer's complaint, the young man subsequently added his own to Dürer's initials.
ter at Münster, but declined the See of Hildesheim. As a consequence, his successor, Frederick II, from 1163 to Eugenius III at Rome, he first revealed his political ability, and in 1156 the emperor appointed him chancellor of the empire. The Diet of Besançon (October, 1157) left no doubt as to the drift of his policy. He inaugurated a German policy which insisted upon the rights and the power of the German kings, the strengthening of the Church in the German Empire, the lordship of Italy, and the humiliation of the papacy. Full of life, at times rough and blunt and again careful and calculating, Rainald, who, in spite of his ecclesiastical dignities, knew how to wield the sword, henceforth influenced the policy of his imperial masters. Though he did not wish to separate Germany entirely from Rome and still held the medieval respect for the Church, his temperament carried Barbarossa much further than the latter desired, or than was advantageous under the circumstances. When Frederick finally submitted, it was Rainald who prevented him from making concessions which might have proved of advantage. The struggle with the curia began at the Diet of Besançon, where Rainald opposed the emperor's idea of an interdict, and in 1159 at the curia in Rome, which might mean fief as well as benefit. In the expression used, that the pope would have been glad to grant the emperor even greater beneficia (or benefits), it was thought that the old desire of the curia for the material gains was to be found. In 1159 Rainald undertook a diplomatic journey into Italy to prepare the way for the emperor. In 1159 he was appointed Archbishop of Cologne, and during the schism between Alexander III and Victor IV supported the imperial pope. In 1160 he was the ambassador of the emperor to the court of the French and English kings, whom he endeavored to win to the side of the antipope, but he did not succeed. In 1161 he joined the emperor before Milan and influenced him to consent to the destruction of the city. Rainald was also employed in diplomatic negotiations with Genoa, Pisa, and Louis VII; those, however, failed. In 1163 Alexander III communi
cated Rainald, who had loudly proclaimed in these negotia
tions the right of the emperor to dispose of the papal see. Basing his action on the Romanian decree, Rainald was once more successfully employed in Italy in the affairs of the emperor. When Victor IV died, Rainald, of his own volition and without waiting for the consent of the emperor, elected at Lucca a new antipope, Paschalis III. Frederick would hardly have consented to school with 37 native and 17 day scholars; besides 25 elementary schools attended by native boys from the villages. For education of girls: the Franscan Nuns of St. Mary of the Angels—Convent of the Assumption, Mhow, 15 nuns and 4 lay sisters, convent high school with 21 boarders and 47 day scholars, St. Joseph's School with 12 boarders, St. Anne's School with 37 native and 17 day scholars; Convent of St. Mary Magdalen, Ajmere, with 10 nuns and 4 lay sisters, convent high school with 34 boarders and 105 day scholars. Charitable institutions: besides those attached to the foregoing, there are agricultural orphanages at Maripar with 72 inmates, and at Thanda with 29 Bilh orphans; St. Joseph's Convent, Thanda, for Bilh girls; surgical home at Indore attended by 4 nuns;—also dispensaries in seven places.

F. KAMPERS.

Rainalducci, Pietro, Antipope. See John XXII, Pope.

Rainpootana, Prefecture Apostolic of, in India, attached to the Province of Agra, comprises ap
proximately the collection of Native States which make up the Rajputana Agency. To the north it is bounded by the Bahawalpur State and the Punjab; on the east it extends to Abahari, Pipli, Rania, Sirsa, Hisaar, Rewari, the Native States of Alwar, Bharatpur, Dholpur, and as far as Sipri (which however belongs to Agra), then to Lallitpur and Bina; on the south it reaches to the limits of the Bhupal State and the River Nerbudda; on the west to the borders of the Bombay Presidency—excepting Mount Abu and Abu Road station, which belong to the Archdiocese of Bombay. Out of a total population of 10,800,000 (of Catholics number about 3,464 (346), of Eurasians 609, natives 2,581) who have 9 churches and 8 chapels served by 24 Capuchin Fathers of the Province of Paris, assisted by 10 lay brothers of the same order. The residence of the Prefect Apostolic is at Ajmere.

History.—Originally a portion of the Vicariate Apostolic of the Great Mogul, and later on of the Thibet-Hindustan mission, Rajputana had no ecclesiastical history down to the year 1891, when it was separated from the Archdiocese of Agra, and made into a prefecture apostolic. At this date it had only one mission station, Jaipur. Besides this, a priest was residing at Ajmere in charge of a small community of Eurasians and Goanese, and there were also stations for troops at Nasirabad, Neemuch, and Mhow, served by three military chaplains. Since the coming of the French Catholic Missions in the middle of the year 1892, many have been established at Ratlam, Thanda, Maripar, Jhabua, Jhalrapatan, Parbatspur, and Bhawanikhera, besides sub-stations visited from time to time. There have been two prefects Apostolic.—Father Bertram, 1892-1902, and Father Fortunatus, present prefect Apostolic from 1903.

Institutions.—The Third Order of St. Francis of Assisi, with 35 members, besides various confratri
tories numbering 347 members. For education of boys: St. Anselm's School, Ajmere, with 37 boarders and 17 day scholars; St. Joseph's School, Jaipur, for training teachers and catechists, with 26 native orphans; School of the Sacred Heart, Mhow, with 35 boarders and 8 day scholars; besides 25 elementary schools attended by native boys from the villages. For education of girls: the Franciscan Nuns of St. Mary of the Angels—Convent of the Assumption, Mhow, 15 nuns and 4 lay sisters, convent high school with 21 boarders and 47 day scholars, St. Joseph's School with 12 boarders, St. Anne's School with 37 native and 17 day scholars; Convent of St. Mary Magdalen, Ajmere, with 10 nuns and 4 lay sisters, convent high school with 34 boarders and 105 day scholars. Charitable institutions: besides those attached to the foregoing, there are agricultural orphanages at Maripar with 72 inmates, and at Thanda with 29 Bilh orphans; St. Joseph's Convent, Thanda, for Bilh girls; surgical home at Indore attended by 4 nuns;—also dispensaries in seven places.

ERNST R. HULL.
the Kennebec. The colonists of New England regarded with suspicion and hatred the arrival of a Frenchman in the midst of savages who were for the most part hostile to the English. The latter perceived the possibility of his best interests were to survive this hostility. Hence the Indian outrages perpetrated on the eastern frontier of New England during Rale's long residence among the Abenakis were for the most part attributed, either directly or indirectly, to him. Rale made his headquarters at Norridgewock, then a church. During Queen Anne's war, frequent attacks were made by the English upon Norridgewock, and in 1705 the church was burned. Rale and his converts escaped capture by flight.

The Treaty of Utrecht, 1713, established relatively peaceful conditions for a short time. A conference was held by the English and the Indians at Portsmouth, of which we have two conflicting reports. According to Penhallow (Indian Wars) the Indians acknowledged themselves subjects of Great Britain, who, in return, promised them free possession of their lands about the Kennebec. Rale denies, however, that the Indians promised submission to England. His source was the verbal report of the Abenakis, who, if they had made any promises, carefully concealed the misrepresentations. It is most probable, however, that the savages had no idea of what a promise of submission to England meant. This is Parkman's opinion (Half-Century of Conflict, 1, 212–13). Ere long English encroachments upon Indian lands again stirred up the Abenakis. As a result, hostilities broke out in Sept., 1721. In the following January an English expedition started for Norridgewock with the purpose of apprehending Fr. Rale. The missionary escaped, however, and soon returned to his mission. In August, 1724, another English force was sent out to capture him. The attacking party came upon Norridgewock unexpectedly; the Indians were routed, and fled, leaving behind them many wounded and dead, among the latter their beloved missionary. Rale's long residence with his flock, over a quarter of a century, gave him an intimate knowledge of their tongue. As evidence of this he prepared a dictionary of the Abenaki language, the MS. copy of which is preserved in the library of Harvard College. Some Indian prayers and a catechism, still in use among the Penacooks and Passamaquoddy, are attributed to him. In "The Jesuit Relations," LXVII, are two lengthy letters written by him from Norridgewock.

H. C. SCHUYLER.

RALPH CROCKETT, VENERABLE, English martyr, b. at Barton, near Farndon, Cheshire; executed at Chichester, 1 October, 1588. Educated at Cambridge, and ordained at Reims in 1585, he was cap- tured by the English. At Long Sutton, in the Isle of Ely, in April, 1586, with three other priests, Thomas Branson, George Potter, and his fellow-martyr, Edward James (b. at Breaston, Derbyshire, about 1557) ed- ucated at Derby Grammar School, St. John's College, Oxford, and the English colleges of Douai and Rheims, ordained by Bishop Goldwell of St. Asaph in October, 1588; all were sent up to London and committed to prison 27 April, 1586. After the failure of the Armada the Government determined to revenge itself on some of the priests in its custody. Crockett and James with two others, John Owen and Francis Ed- ward James and George Potter, were selected for trial, which took place at Chichester on 30 September, 1588. All were con- demned to death, under 27 Eliz. c. 2, for being priests and coming into the realm; but Owen on taking the oath of supremacy was respited. The other three were drawn on one hurdle to Broyle Heath, near Chi- chester, where Owen desired to go. After being kept there for some time, he was moved to Chichester prison, and there did serious penance, and the sacraments. He was then moved to Merton, and there on 2 Nov., 1588, died a martyr. He was buried in the chancel of St. Mary's, Chichester. He was beatified by Pope Benedict XIV in 1743, and canonized by Pope Pius IX on 6 July, 1862.

JOHN B. WAINWRIGHT.

Ralph Sherwin, Blessed, English martyr, b. 1550 at Rodlesley, near Longford, Derbyshire; d. at Tyburn, 1 December, 1581. In 1568 Sir William Petre nominated him to one of the eight fellowships which he had founded at Exeter College, Oxford, probably acting under the influence of the martyr's uncle, John Woodward, who from 1550 to 1566 had been rector of Ingestone, where Ralph had lived. There Blessed Ralph took the degree of M.A., 2 July, 1574, and was accounted "an acute philosopher, and an excellent Grecian and Hebri- cian." In 1575 he fled abroad and went to the Eng- lish College at Douai, where a friend of his, a priest of the English College, and before, he was an ordained priest by the Bishop of Cambrai. On 2 Aug., 1577, he left for Rome, where he stayed at the English College nearly three years, becoming leader of the movement which placed it under the super- vision of the Jesuits. On 18 April, 1580, he set out for England, a member of a party of fourteen; at Milan they were the guests of St. Charles for eight days, and Blessed Ralph preached before him. On 9 November, 1580, he was imprisoned in the Marshalsea, where he converted many fellow-prisoners, and on 4 Dec. was transferred to the Tower, where he was severely racked, 15 Dec., and afterwards laid out in the snow. The next day he was raked again, after which second torture he "lay for five days and nights without any food or speaking to anybody. All which time he lay, as he thought in a sleep, before our Lord Jesus Christ." After with his own hands he was himself, not finding any distemper in his joints by the extremity of the torture. After over a year's imprisonment he was brought to trial, on an abeud charge of treasonable conspiracy, in Westminster Hall, 12 Nov., 1581. He was then boiled back to the Tower, whence he was drawn to Tyburn on a hurdle shared by Blessed Alexander Briant. He suffered very bravely, his last words being, Jesus, Jesus, Jesus, esto mibi Jesu! CAMM, Lives of the English Martyrs, II (London, 1905); ALLEN, Briefe Historie, ed. Pollen (1805). For particulars of John Wood- ward: The Tablet (London), 11 March, 1911.

JOHN B. WAINWRIGHT.

RAM, PIERRE FRANÇOIS XAVIER DE, b. at Louvain 2 Sep., 1604; d. there 14 May, 1685; Belgian histori- an and rector of the Catholic University of Louvain. He belonged to an ancient family, originally from the Province of Zeeland. De Ram entered the seminary at Mechlin, where he was ordained in 1827. During the trying period when King William I of the Netherlands was carrying on his campaign against the Catholics, faith in the South Netherlands was on the wane, whilst de Ram was still young, he took an active part in the struggle maintained by the Belgian clergy against the government of the Netherlands, republi- cating eighteenth-century works, in which, in a series of historical studies he maintained the doctrines of Jorren. He combated the latter's disciple, King William I. He was next appointed keeper of the diocesan records.
and professor in the episcopal seminary at Mechlin. In order to stay the spread of 'Protestantism in the Netherlands he collaborated with a movement for the publishing of religious works, bringing out "Van oude naam (N. A. Rehm) headed "Enlargement of the 'Rambler"." "The Rambler was commenced on 1st of January 1848 as a weekly magazine of home and foreign literature, politics, science and art. Its aim was to unite an intelligent and hearty acceptance of Catholic dogma with free enquiry and discussion on questions which the Church left open to debate and, while avoiding, as far as possible, the domain of technical theology, to provide a medium for the expression of independent opinion on subjects of the day, whether interesting to the general public or especially concerning Catholics". Before the year 1848 was over the new venture succeeded so well that it was found necessary to increase the size of the magazine and to issue it in a monthly form. It continued to be published as a monthly serial from 1 Sept., 1848, to 1 Feb., 1859. "During this period of ten years and a half" says the same announcement, "we at first endeavoured to restrict it to topics of social and literary interest, without entering directly into the graver problems of moral or political philosophy, but the events of the time and the circumstances of English Catholicism—compelled us more and more to open our pages to investigations of a deeper and more complex nature." In view then of the fact that "The Rambler" had thus "assumed a less ephemeral character than ordinarily belongs to a monthly periodical", a new series was started in May, 1859, of which the numbers, in a slightly enlarged form, appeared only every two months. This came to an end in May, 1862, and, in accordance with the announcement above quoted, a quarterly journal, "The Home and Foreign Review", under the same editorial management, appeared in its place in July. For some time before this "The Rambler" had contrived to give considerable offence to the Catholic authorities in England and particularly to Cardinal Wiseman. Before June, 1861, we find Manning writing confidentially to Rome that he hoped soon to be able to announce the cessation of "The Rambler" (Purcell, "Life of Manning", II, 384). The change from a monthly to a two-monthly form had really marked a crisis in the journal's history, for in May, 1859, at the intervention of Cardinal Wiseman, Simpson had with the consent of Newman and Newman had consented to take it over, though his connexion with the periodical was to prove a very brief one. Acton then succeeded to the direction, Simpson, however, continuing to write a great number of the articles. Amongst the other leading contributors were Wetherell and H. N. Oxenham, "The Home and Foreign Review", which was supported by the same staff of writers, soon came into conflict with the authorities, notably both with Cardinal Wiseman and Bishop Ullathorne, and it lasted only until April, 1864.

Rambler. The, a Catholic periodical (not of course to be confused with the older "Rambler", published a century earlier by the famous Dr. Johnson), has an importance in the history of English Catholicism during the nineteenth century which is not to be measured by its circulation. Related to the current, and associated with the names of Sir John (afterwards Lord) Acton (q. v.), Richard Simpson and, for a brief period, Newman himself, it represented a phase of converted thought which was in opposition to the extreme Romanism of W. G. Ward and Manning, and which eventually led to increasing friction with the leading members of the newly established English hierarchy. The chief external facts in the history of the periodical are recounted in an announcement which appeared in the last number published under the old name (May, 1869) headed "Enlargement of the 'Rambler'." "The Rambler was commenced on 1st of January 1848 as a weekly magazine of home and foreign literature, politics, science and art. Its aim was to unite an intelligent and hearty acceptance of Catholic dogma with free enquiry and discussion on questions which the Church left open to debate and, while avoiding, as far as possible, the domain of technical theology, to provide a medium for the expression of independent opinion on subjects of the day, whether interesting to the general public or especially concerning Catholics." Before the year 1848 was over the new venture succeeded so well that it was found necessary to increase the size of the magazine and to issue it in a monthly form. It continued to be published as a monthly serial from 1 Sept., 1848, to 1 Feb., 1859. "During this period of ten years and a half" says the same announcement, "we at first endeavoured to restrict it to topics of social and literary interest, without entering directly into the graver problems of moral or political philosophy, but the events of the time and the circumstances of English Catholicism—compelled us more and more to open our pages to investigations of a deeper and more complex nature."

In view then of the fact that "The Rambler" had thus "assumed a less ephemeral character than ordinarily belongs to a monthly periodical", a new series was started in May, 1859, of which the numbers, in a slightly enlarged form, appeared only every two months. This came to an end in May, 1862, and, in accordance with the announcement above quoted, a quarterly journal, "The Home and Foreign Review", under the same editorial management, appeared in its place in July. For some time before this "The Rambler" had contrived to give considerable offence to the Catholic authorities in England and particularly to Cardinal Wiseman. Before June, 1861, we find Manning writing confidentially to Rome that he hoped soon to be able to announce the cessation of "The Rambler" (Purcell, "Life of Manning", II, 384). The change from a monthly to a two-monthly form had really marked a crisis in the journal's history, for in May, 1859, at the intervention of Cardinal Wiseman, Simpson had with the consent of Newman and Newman had consented to take it over, though his connexion with the periodical was to prove a very brief one. Acton then succeeded to the direction, Simpson, however, continuing to write a great number of the articles. Amongst the other leading contributors were Wetherell and H. N. Oxenham, "The Home and Foreign Review", which was supported by the same staff of writers, soon came into conflict with the authorities, notably both with Cardinal Wiseman and Bishop Ullathorne, and it lasted only until April, 1864.

HERBERT THURSTON.
thin, so that he had more the appearance of a ghost than of a human being. He was a great thinker, fond of solitude, and out of place in society. In 1726 he married Jeanne-Marie-Louise Montaut, and had two children, a son and three daughters, one of whom entered the Order of the Visitation. Without denying the merits of Lully (1633–1687) and Couperin (1663–1733), the founders of the French opera, and even admitting that Rameau was not right in all the details of his theory, we must acknowledge that he opened up a new road, which was followed by all who came after him. His main principle, for the defence of which he had to sustain hard struggles, was that melody, far from being sufficient for a good piece of music, is either ends or ends of harmony, so that the real guide of every composer is harmony, not melody. His chief merit consists in having established the relations between science and art, and in having highly developed the symphonie part of the opera. His most famous theoretical works are: "Traité de l'harmonie réduite à son principe naturel" (1722); "Génération harmonique" (1737); "Démonstration du principe de l'harmonie" (1750); "Code de musique pratique" (1760). Only at the age of forty-five he began to write for the stage; in sixteen years (1733–1749) he composed about thirty operas and ballets, the best of which are: "Castor et Pollux", "Les Indes Galantes", "Dardanus et Zoroastre". Of his church music some motets only are known. He left many compositions for solo instruments or with other instruments, eighteen of which have been lately published by Vincent d'Indy. Durand, in Paris, has undertaken a complete edition of Rameau's works, under the direction of Saint-Saëns.

MALET, Éloge historique de M. Rameau (Paris, 1766); Pougny, Rameau, Ensay sur sa vie et ses ouvres (Paris, 1787); Laurens, Mémoires relatifs à R. M. et à l'Opposition de Paris à l'autorité de l'Académie française (1802); Lamy, Rameau (Paris, 1900), 2 edit.

A. WALTER.

Ramey Abbey, Huntingdonshire, England, was founded by Alwine (Ethelwine, Egelwine), a Saxon noble, in 969. He was encouraged in the undertaking by St. Oswald of York, who advised him that where men have renounced the world "the air becomes salubrious, the fruits of the earth are gathered in abundance, famines and pestilence disappear, the State is duly governed, princes are opened, and captives set free, those wrecked at sea are relieved, the sick are healed and the weak find means for their conveins."

The site chosen by Ramsey (Ramey, ramaie, ramsaie, ramista), was then the largest and finest of the islands of a great marsh formed by the waters of the Ouse. It was afterwards connected with the mainland by a causeway constructed by the monks. Here Aednoth, nephew of Alwine, commissioned by Oswald to make preparations, built a wooden church and offices, and as soon as was all ready, the saint sent twelve monks from his monastery of Westbury (Worcester) to take possession. The wooden minster was dedicated by Oswald and St. Dunstan of Canterbury to St. Mary, all Holy Virgins, and St. Benedict. Soon a fine stone church with towers was erected and consecrated by St. Oswald, Archbishop of York, assisted by Aescwio, Bishop of Dorchester, in 991. The year following (992) the two founders, Alwine and Oswald, died, and the monastery, governed then by priors (Germanus and Aednoth), was permitted to elect an abbot. Aednoth, son of Aednoth the prior, was the first to hold the office.

Alwine handsomely endowed his foundation with lands and privileges. He also presented the new church with the altar-frontal (altare frontale majore for fons altaris) of wood, covered with silver plates and many-coloured jewels. King Edgar, Henry I, Henry II, and others extended and confirmed the possessions and liberties. In 1002 the body of St. Ives (Ivo) was miraculously discovered in the neighbourhood and this led to the establishment of the dependent priory of St. Ives. Another dependent priory or cell was Modney, in Norfolk. The abbot had a seat in Parliament and ranked next after Glastonbury and St. Alban's. At the Dissolution (1539) John Wardeboys, alias Lawrence, willingly resigned the abbey into the king's hands and received a pension of £206, 13s. 4d. per annum. The estates were granted by Henry VIII to Sir Richard Williams, alias Cromwell. The revenue, according to Dugdale, was £1716. 12s. 4d., but according to Speed, £2883. 15s. 3½d. Nothing important remains of the buildings but a ruined Late Gothic gateway.

J. C. ALMOND.

Ramus, Peter (Pierre de la Ramée), Humanist and logician, b. at Cuth in Picardy, 1515; d. in Paris, 1572. In spite of many difficulties, including poverty and the loss of both his parents at an early age, he succeeded in obtaining a good education, and graduated at the University of Paris in 1530 as Master of Arts. The thesis which he defended "Quæscunque ab Aristotele dicta sunt, commentitia sunt" ("All Aristotle's doctrines are false") indicates the direction of his thoughts even at that time. He was an outspoken and uncompromising opponent of the Aristotelian philosophy which was at that time the authoritative philosophy in every European centre of learning. His two principal works, "Aristotelica Animadversiones" and "Dialectica Institutiones", both of which were written in elegant humanistic Latin and published in Paris in 1543, brought him into still sharper conflict with the official world of scholarship. The books were condemned by the University of Paris, an act which was made the subject of debate in the French Parliament, until Francis I interposed by appointing a committee to listen to a disputation between Ramus and his principal opponent, Anthony of Gouvea. The majority of the committee decided against Ramus, and condemned him as "raeeh, arrogant and impudent". This decision was confirmed by the king. In 1547, after the accession of Henry II, and owing to the protection of the Cardinal of Lorraine, Ramus was accorded greater liberty, and succeeded in obtaining a position as teacher, or "royal lecturer", at the College of Navarre. In 1562, he renounced Catholicism and became a Calvinist. In the massacre of St. Bartholomew, in 1572, he was singled out by his enemies and put to death with every circumstance of cruelty and brutality. Ramus was a writer of more than ordinary brilliancy and effectiveness. He sought out the weak points in the in front of teaching logic that of the logicians, and directed his attack against them with the ability, and indeed, very much in the manner, of the celebrated Italian Humanist, Vives. He objected especially to what he called the sterility of the logic.
then currently taught, and pleaded for a reform of the science along lines of broader human interest. In his positive teaching, that is to say, in the logic which he wished to substitute for the Aristotelian system, he was not very successful. In a general way, he may be said to have advocated a closer union between rhetoric and logic, between the art of exposition and the art of argumentation. Among his followers, the "Ramists", as they were called, were the Englishman, William Temple, and the Germans, Sturm, Freige, and Fabricius. In the official academic world he met with opposition not only at the University of Paris but also at Wittenberg. He sought to join his aforesaid and his aforesaid. His opponents were called Anti-Ramists. For a time, his campaign against Aristotle had the effect of rallying to his views the Anti-Aristotelians of every country in Europe. His influence, however, did not last long, although some writers find evidences of it as late as 1628 in the famous "Port Royal Logic".

WADDINGTON, De Paris Ramis vis (Paris, 1848 and 1855); STÖCKL, Geschichte der Phil. des Mittelalters, Ill (Mainz, 1900). 296 sqq.

WILLIAM TURNER.

RANCE, JEAN-ARMAND LE BOUTHIOLLIER DE, abbot and reformer of Notre Dame de la Trappe, second son of Denis Bouthillier, Lord of Rance, Councillor of State, etc., b. at Paris, 9 June, 1626; d. at La Trappe, 27 Oct., 1700.Originally intended for the Knights of Malta, the illness of his elder brother caused his father to dedicate him to ecclesiastical service, in order to preserve the family's numerous benefices. On the death of his brother, 1637, he became Canon of Notre Dame de Paris, Abbot of the Chapter of La Trappe, and of several other places, which gave him a revenue of about 15,000 livres.

He early gave evidence of great precociousness in study, publishing, at the age of twelve years, an edition of Anacreon, with Greek notes, dedicated to his godfather, Cardinal Richelieu. In 1651, he was ordained priest by his uncle, the Archbishop of Tours. This dignity did not effect a change in his manner of life, which was worldly in the extreme. In 1659, his father died, leaving him a further increase in his estate. At the age of twenty-six he was thus left absolutely his own master, handsome of person, polished and with practically unlimited wealth. Feasting, and the pleasures of the chase, to which he was passionately attached, divided his time with preaching and other sacerdotal ministrations. His uncle, who desired him as coadjutor, made him archdeacon, caused him to be elected deputy of the second order to the General Assembly of the French Clergy in 1655, and had him appointed first chaplain to Gaston, Duke of Orleans, in 1656.

For several years his conscience reproached him for his scandalous conduct, but he paid little heed to its voice. The death of the Duchess of Montbazon, in 1657, gave him the first serious thought leading to his conversion. He retired to his Château de Veretsa, where he gave himself full reflection on the vanity of life, and put himself under the spiritual guidance of his good friend, the Abbot of St. Germain-des-Prés. He sought advice, and disposed of all his possessions, except the Abbey of La Trappe, which he visited for the first time in 1662. He decided to become a religious, and obtained permission from the king, in 1663, to become and regular Abbot. After he had passed through his novitiate and made profession, he took formal possession of his monastery as its regular Abbot, and began the work of its reform, which, after he had overcome immense difficulties, was solidly established in his own abbey, from whence it was adopted into numerous other monasteries. His time and energy were so taken up with this work that, during the first years of his retirement he obliged himself to an entire separation from the world. He devoted his spare time to manual labour, and to the compilation of spiritual books. These last things, far from being neglected by no means inconsiderable. Amongst the most important are: "Vies de plusieurs solitaires de La Trappe"; "Le traité de la sainteté et des devoirs de la vie monastique"; "La règle de St. Benoît, primitivement expliquée selon sa vérité originelle"; etc.

His penitential mode of life made him many enemies, and caused him to be accused of Jansenism, but he refrained from defending himself, until finally, at the request of his most intimate friends, he wrote to the Marchal de Bellefont, stating that he had signed the "Formula" (against Jansenism) without restriction or reservation of any kind; adding that he had always submitted himself absolutely to those whom God had placed over him, i.e. the pope and his bishop. If this is considered insufficient to vindicate his orthodoxy, the letters and pamphlets with which he attacked the Jansenists, as published by Bossuet, are certainly enough to justify him from this charge. In 1695, feeling his health to be declining, he obtained permission from the king to resign his position, and for several years continued to give an example of humility and resignation. His remains are interred at the Monastery of La Grande Trappe.

EDMOND M. OBRECHT.

RANDALL, JAMES RYDER, journalist and poet. b. 1 Jan., 1839, at Baltimore, Maryland; d. 16 Jan., 1908, at Augusta, Georgia. As author of "Maryland, my Maryland!", the famous war song of the Confederacy, he has been frequently styled the "Poet Laureate of the Lost Cause". He received his education at Georgetown University, but did not graduate. He travelled in South America and the West Indies and upon returning to the United States, accepted the chair of English Literature at Poydras College, Pointe-Coupée, La., then a flourishing Creole institution. Hearing of the attack upon the Federal troops in Baton Rouge, on 21 and 22 Jan., in which a classmate had been wounded, his Southern sympathies were so aroused that during the night by the light of a candle he composed what is generally acknowledged to be America's most martial poem, which first appeared in the New Orleans "Sunday
RANSOM

Delta" of 26 April, 1861. Reaching Baltimore, it was set to the music of "Lauriger Horatius" by Miss Jennie Cary, who added "My Maryland" to each stanza. A German musician of Southern sympathies eventually set the poem to "Tannenbaum, O Tannenbaum", the original of "Lauriger Horatius". After the close of the war, Ransell engaged in newspaper work, holding several important editorial positions, eventually becoming Washington correspondent for the Augusta "Chronicle". He was the author of numerous other poems, none of which, however, attained the popularity of "Lauriger Horatius". His later work breathed a deeply religious tone.

Maryland, My Maryland, and other Poems (Baltimore, 1908); Poems of James Raper Randall, ed. Andrews, with a biographical sketch of the poet (New York, 1910).

WILLIAM J. DWYER.

RANSOM, Feast of Our Lady of, 24 Sept., a double major, commemorates the foundation of the Mercedarians (q. v.). On 10 Aug., 1223, the Mercedarian Order was legally constituted at Barcelona by King James of Aragon and was approved by Gregory IX on 12 Feb., 1225. The Mercedarians celebrated their institution on the Sunday nearest to 1 Aug. (on which date in the year 1233 the Blessed Virgin was believed to have shown St. Peter Nolasco the white habit of the order), and this custom was approved by the Congregation of Rites on 12 Feb., 1616 (Decretum Gratianum, Juria Pont., VII, 130). But the calendar of the Spanish Mercedarians of 1644 has it on 1 Aug., double Proper lessons were approved on 30 April, 1616. The feast was granted to Spain (Sunday nearest to 1 Aug.) on 15 Feb., 1680; to France, 4 Dec., 1689. On 22 Feb., 1686, it was extended to the entire Latin Church, and the date changed to 24 September. The Mercedarians keep this feast as a double of the first class, with a vigil, privileged octave, and proper Office under the title; "Solemnitas Descensionis B. Mariae V. de Merced. Our Lady of Our Lady of Ransom is the principal patron of Barcelona; the proper Office was extended to Barcelona (1868) and to all Spain (second class, 1883). Sicily, which had suffered so much from the Saracens, took up the old date of the feast (Sunday nearest to 1 Aug.) by permission of the Congregation of Rites, 31 Aug., 1805 (double of the second class). The Mercedarians have a special feast (double major), Apparition of Our Lady to St. Peter Nolasco in the choir of Barcelona, on the Sunday after 24 Sept. In England the devotion of Our Lady of Ransom was revived in modern times to obtain the rescue of England as Our Lady's Dowry.

COLVENBURG, KAL. Marianum (Summa Aureae, III), 17 Jan. and 10 Aug.; HOLEWCK, Passi Mariiani (Rivista, 1902).

F. G. HOLEWCK.

RAPELH, the most famous name in the history of painting, b. at Urbino, 6 April (or 28 March), 1483; d. at Rome, 6 April, 1520. He belongs to the Umbrian School. Raphael is only a Christian name, the full name being Raphael (Raffaele) Santi (Sanzio) is an absolutely incorrect form. His father, Giovanni Santi, held an important but indefinite post at the Court of Urbino. He was the artistic factotum of Duke Federico, one of the most wealthy and most enlightened art-lovers of his age. The best painters, Piero della Francesca, Melozzo, and Justus of Ghent, were in his service and had made Urbino one of the most prominent art centres of the time. The ducale palace is one of the most beautiful mansions in Italy. Nor was the social and worldly life less advanced; at this Court was written the "Cortegiano" of Baldassare Castiglione, the complete handbook of the man of the world, according to the ideal of the Renaissance. The relations which Raphael formed these early surroundings (especially about 1500), the serene and pure moral atmosphere which he breathed and which is characteristic of his genius, followed him throughout his life.

Giovanni Santi died on 1 August, 1494. The orphan, placed under the guardianship of his maternal uncle, entered the studio of a charming painter, Timoteo Viti, a pupil of Francia, who had just returned to take up his residence in the country. Probably to the beginning of this apprenticeship, perhaps somewhat previous to it, belongs Raphael's famous sketch-book of the Academy of Venice. This book was discovered in 1803 by Bossi and purchased by Cigognara for the City of Venice. It is a small portfolio, now mutilated, consisting of a hundred pen-and-ink drawings; the author copied, in particular, the "Savantino" and the "Philosopher" attributed to Ercole de' Roberti, which were then in the palace of Urbino (half of them are now at the Louvre and the other half at the Barberi.
commissions. He was only given small pictures to paint, portraits of middle-class people, such as Angelo and Maddalena Doni (Uffizi, 1506) and the “Donna Graviga” (pregnant woman) of the Pitti Palace, and an especially large number of Madonnas which he executed for private oratories. But nothing could show more advantageously the progress he had made since his Umbrian period. He had found a model of a more regular type, a fuller oval and a richer form than was Perugino’s usual model. His sense of life became more natural without losing any of its poetry. Raphael’s Madonnas are all his own; they have not the melancholy affection of those of Botticelli, nor the mysterious smile of those of Leonardo. They are all near to us, material and human. Their familiarity,

of a thoroughly Franciscan grace, is expressed with the greatest tact. They retain the easy good-humour, sometimes excessive, indulged in by the painters of the North. They are not intended to be “edifying”, properly speaking, but in these matters degree is a matter of taste. As Burnhardt has said, for the first time since Phidias, art reached those heights where human beauty by its nobility and perfection of form undertakes to call forth the divine.

The Madonnas of the Florentine period may be divided into three groups according to the nature of the motif and the composition. The oldest and most simple are those which represent the Madonna with the features of a young Italian woman, standing and at half-length, holding the Christ Child in her arms. The masterpiece of this class is the “Madonna of the Grand Duke” (Florence, Pitti Palace, 1505). Despite a trace of timidity in the arrangement the Virgin is so charming that one cannot prefer even the more perfect Madonnas of the next period. This simple composition has given rise to many variations, such as the little “Cowper Madonna” (Panshanger), so tenderly pensive, and the charmingly spirited, sweet, and impassioned “Madonna Caia Tempi” (Munich). The second group does little more than modify the first by the introduction of new elements, such as interior decoration or landscape, for example the “Virgin of Orleans” (Chantilly), the “Bridgewater Madonna”, the “Colonna Madonna” (Berlin), and the great

Florentine Period (1504–08).—After a short visit in the summer at Urbino, Raphael went to live at Florence towards the end of 1504. The four years he spent there were a new and decisive stage in his career. At that date Florence was the most intense and active centre of the Renaissance (and the period was pregnant with artistic development). Leonardo da Vinci had just deserted Mantua, and the two trends of the movement, revealed (1506) in their rival “cartoons” (now lost) of the Signory perfect models of historical composition. In the stimulating atmosphere of a perpetual contest dominated by an impassioned love of beauty and fame Raphael found fresh incentive. The knowledge and skill of the rest of the Florentine painters were calculated to amaze the young provincial and sharpen his ideas, which proved most profitable to his talent. At Florence he began his education over again; he resumed his studies and in a few years learned and formed forms that he had acquired from Timoteo and Perugino. His earnings were still modest. During his stay in Florence Raphael was a young, unknown artist with a good future. He had few acquaintances and not many

Palace). Morelli (Lermoliev) thinks he recognizes in these drawings the hand of Pintoricchio, but the old opinion has prevailed over his criticism. These are rather the first studies and attempts of Raphael between his twelfth and fifteenth years. Though child-

In June, 1499, Raphael had not yet left Urbino. In May, 1500, he must have been at Perugia, but could not have entered Perugino’s studio prior to that date, for the latter, who had been away for twelve years, returned then to paint the Cambio frescoes. Therefore, Vasari’s story of Raphael’s education by Perugino is not to be believed, being pure fable. Perugino’s influence was important to a young man of eighteen, and, in fact, with his wonderful faculty of assimilation, Raphael had soon succeeded in mastering the suggestions and methods of the older painter, his poetic sense of light and space, his harmoniously symmetrical system of composition. He shortly became a sort of foreman, or head of the studio, supervising the making of those countless Madonnas for which Perugino’s “workshop” was the best patronized in Italy. This period of somewhat commercial production is the least interesting of Raphael’s life. The “Virgin of the Book” at the Hermitage and the “Virgin between St. Jerome and St. Francis” (Berlin) are among his most significant works. The “Cru-

iXII.—41
“Cowper Madonna” (Panshanger), the two last-named being contemporaries (1506 or 1507) and to a certain extent twins. The third group, however, almost a new stage, represents a sort of composite and style. Raphael was then obviously under the influence of the great Dominican painter, Fra Bartolommeo, one of those who did most in the sixteenth century to organize the truly Florentine pictorial tradition. This learned painter who was gifted to a high degree with a sensitive balance and beautiful composition, was a greatly influenced the young Umbrian, the influence becoming apparent as early as 1505, when Raphael executed at San Severino, Perugia, a fresco of which he painted only the upper part (it was completed in 1521 by the aged Raphael himself). This fresco, an inasmuch as it contained the germ of the “Disputa,” merely reproduces the arrangement of Fra Bartolommeo’s “Last Judgment.” To him Raphael owes the methods by which he produced the Virgin’s of the third group, in which the Madonna appears at full length in a landscape with the Infant and the young St. John. The sublime trio in such compositions as “La Belle Jardinière” (Louvre, 1507), the “Madonna of the Meadow” (Vienna), or the “Madonna of the Goldfinch” (Uffizi, Florence) is an idea directly derived from the teachings of the young Umbrian. Raphael detaches himself from the external symmetry of Perugino’s art, attaining a harmony at once more complex, intimate, and living.

From this period date several more important works, those in which he combined the praise painted in the “noble” style. He began to receive orders and to gain a reputation. On settling out for Rome he left unfinished the “Madonna of the Baldacchino” (Pitti Palace, 1508), and it is not known when it was completed, but it is without originality and might pass for a picture by Fra Bartolommeo. Preferable to it is his “Madonna Ansidei” (National Gallery, 1507), less “modern” and more “Peruginesque,” but one of the loveliest things conceivable in this traditional style. From 1508 dates the “Entombment” of the Casino Borghese. This work, ordered by Atalanta Baglioni for the chapel of her son Grifonetto at Perugia, is Raphael’s first attempt in the historic manner. His client was important and he had an opportunity to gain distinction; it is evident that he spared no pains. Prepared for by an extensive use of drawings, he was nevertheless one of the artist’s least fortunate ventures. It is spoiled by excessive labour. Raphael wished to display all his knowledge and resources, uniting on the same canvas the qualities of the two masters of the School of the Signorelli, the men whom at most admired and who tantalised him most, Leonardo da Vinci and Michelangelo. Too many contradictory ambitions injured the result and the great attempt ended in failure. But his contemporaries judged otherwise, and the “Entombment” ranked Raphael among the foremost of the Florentine painters. Thenceforth all eyes were on him. The period of beginnings and attempts was over. In the summer of 1508 the young man went to Urbino. Julius II had just ascended the papal throne. Duke Guidobaldo recommended Raphael to the pope, who was having the Vatican repainted and re-decorated. In October, 1508, Raphael reached Rome.

Roman Period (1508–20).—The twelve years of Raphael’s life in Rome are unparalleled. In this short and young master multiplied masterpieces and left behind him the most complete, serene, and harmonious expression of the Renaissance. The painter of the Madonnas and of the little pictures of the Florentine period underwent the most surprising “transfer,” once more a most productive decorative painter on a vast scale. His genius set itself to the most exalted as well as the most diverse tasks, his inexhaustible resources permitting him to conceive of and complete within a few years the Stanze or Chambers of the Vatican, the tapestry designs of the Loggia, the Loggie, not to mention other undertakings as architect, archaeologist, sculptor, and painter, and fifty pictures or portraits, nearly all of which are masterpieces. It is a metamorphosis without precedent or explanation. When we consider that this vast and immortal work was executed in only twelve years by a young man who was twenty-six when he began and who died at thirty-seven, we must question whether the world has twice beheld the wonder of such a genius.

Julius II, the reigning pope, was one to whom modern speech willingly accords the title “superman” or “hero.” He was one of the first to conceive of and pursue the policy of Italian unity. Beyond doubt this warrior pontiff, who entered the citadel of Mirandola through the breach, had a somewhat temporal idea of his power, but through art he endowed the Church with an intellectual importance which it seemed to have lost since the Great Schism. In his powerful hands Rome became what it only recently ceased to be, the capital of the civilised world. Art and science took their place among the chief ideas of his time. As Pope he was more interested in great ideas, but when faced with the chief problems of the sixteenth century; when the question arose as to whether the Church would absorb or reject and condemn progress, whether or not it would conflate its own ideals with the humanist spirit, Julius II deserves the credit for having taken sides with the Renaissance and prepared the stage for the moral triumph of the Church. The great creations of Julius II, Bramante’s St. Peter’s and Raphael’s Vatican, are inseparable from the great ideas of humanity and culture represented by the Catholic Church. Here art surpasses itself, becoming the language of something higher, the symbol of one of the noblest harmonies ever realised by human nature. At the will of this extraordinary man Rome became at the end of the sixteenth century the meeting place and centre of all that was great in art and thought. With the infallible sense and discernment of great judges of men, the pope had immediately called to his service those who would do most honour to his reign. He did not make a mistake, and posterity can only say with Himmler that the direction of a genius is best shown in his selection of Raphael. There was nothing in the young man’s work to presage the wholly new genius he was to display nor the unequalled powers of composition, nobility, and beauty that are his. It is probable that Bramante who, like Raphael, was a native of Urbino, actively furthered his young townsmen’s interest with the pope, and caused him to be received among the inner circle of artists whose balance of intellect and taste and culture which attracted the artists of the time. Raphael was the first to introduce that new force which was to revolutionise the papal chancery and the Roman schools. It was the pope himself who called Raphael to Rome, and the young master was to paint for Julius II the Stanza della Segnatura, the Stanza d’Eliodoro, the Stanza della Papiata, the Stanze di Eliodoro and of Papiata, and the Loggie of the Vatican. He was at first in the service of the pope and quickly rose to be his chief architect, the cost of the work being met by Julius II. Raphael was placed in charge of the works at the Vatican, and the pope himself took an active part in the work, directing it and helping Raphael to carry out his ideas. The pope was a great patron of the arts, and Raphael was one of his favourite artists. He painted for him several of the most important works of his life, including the frescoes in the Stanza della Segnatura, the Stanza d’Eliodoro, and the Stanza della Papiata. He also painted the Loggie of the Vatican, which were completed in 1512. These works were such a success that Raphael was appointed chief architect of the Vatican, and he carried on the work of Bramante and others in the decoration of the palace. He remained in Rome for many years, and his art continued to develop, as can be seen in the works he produced during this period. He died in 1520, but his influence on the art of the Renaissance was immense. He was one of the greatest masters of his time, and his works remain as a lasting monument to his genius.
pope dismissed all the others and unhesitatingly confided to the youngest and the last comer (1509) the vast task of decorating the Chambers. The first of these was called the "Stanza della Segnatura," it being that of a tribunal of the Roman Curia. It is a somewhat irregularly vaulted hall with two windows which are neither on the same axis. These unfavourable conditions (which were repeated in the other chambers) the young artist turned to his advantage. This hall contains a plentitude of art and an intellectual harmony which will never be surpassed. On the four triangles of the ceiling he placed representations of regular movements, in the guise of young women crowned and surrounded by genii. Theology, Law, Science, and Poetry. In the circles he painted as the general arrangement, an informing impression of the things represented. With its two and eleven planes, its hierarchical aspect, its regular movement descending from the Father to the Holy Ghost, from the Son to the Host placed vertically below Him, to rebound in concentric waves through the two parallel hemicycles of the celestial and the terrestrial Church, the "Disputa" is stamped with theological majesty. In contrast to this presentation of august solemnity, in which everything follows an emphatically Scholastic method— the deduction from principles of a rigorous chain of reasoning like that of ontology— the "School of Athens" displays the most varied action, effervescence, scattered groups, and the agitation of a scientific congress. Ideas, methods, everything is changed; we pass from one world to another.

No other painter could sensibly express the most delicate nuances by the pure language of forms. On the other hand, in such subjects it was allowable for the artist to make a abundant use of allegory. There existed for the purification of abstract ideas a whole body of figures often characterized by complicated attributes; often long inscriptions, streamers, phylacteries, completed the representation. Pinturicchio proceeded in this manner in the Borgia apartments, as did also the author of the magnificent tapestries of Madrid. With better taste Raphael forbore this confusion of kinds, the mingling of fiction with reality, of personifications with persons. For the representation of ideas he made use only of real and historical persons, philosophy being represented by Socrates, Plato, Aristotle, and Democritus.

Thus this chamber of the Vatican became a sort of mirror of the tendencies of the human mind, a summary of all its ideal history, a sort of pantheon of spiritual grandeur. Thereby the representation of ideas acquired a dramatic value, being no longer, as in the Middle Ages, the immutable expression of an unchangeable truth, but the impassioned search for knowledge in all its branches, the moral life of humanity. Finally these historic figures conceived of as portraits for which the artist made use of all the documents possessed by the iconography of his time, blended in heroic familiarity with contemporary persons, the very circle of Julius II and Raphael. There are found Bramante, the Duke of Urbino, Raphael, Sodoma, and twenty others named by Vasari. Thus abstract ideas became animating and are afforded the magnificent spectacle of the world of the spirit, the society formed of the harmonious concert of the highest intelligences. Nevertheless these frescoes, which are so full of life, are perhaps the most highly decorative ever imagined. It is wonderful to see how the artist's thought adapts itself to the law of architecture, readily inventing simple and monumental motifs which endow his ideas with imperishable grandeur. Berenson is perhaps mistaken in reducing Raphael's genius to the incomparable mastery of the language of extent which he calls "composition." It is just to cheapen his unique and enchanting qualities as designer and painter, plastic gifts which no other mortal ever possessed in the same degree. It is none the less true that the ease with which Raphael moves
about in space, the aerial, spacious qualities which characterize his frescoes, is one of the essential parts of his particular magic. He is the greatest decorator who ever lived.

It is worthy of note that the titles of these two famous frescoes are a later and incorrect invention of the eighteenth-century engravers. The "Disputa" is really a picture of the life of the Church and an affirmation of the dogma of the Real Presence. The title of the "School of Athens" is due to mistaking the figures of Aristotle and Plato, although they are designated, by the titles of their writings, for those of St. Paul and Dionysius the Areopagite. Moreover, the whole of this second scene is but a new illustration of the traditional theme of the seven liberal arts or the seven disciplines of the trivium and quadrivium.

The paintings on the other two walls were, as has been said, obstructed by a window. Raphael easily found a most ingenious solution of the difficulty. The painting of "Law" was divided into three parts: on the lintel he painted the three theological virtues (they are among his most exquisite creations), to left and right of the window he depicted in two symmetrical scenes "Civil Law" (Justinian bestowing the Pandecta; this scene is imitated in Melozzo's fresco in the Vatican Library) and "Canon Law" (Gregory IX, with the features of Julius II, publishing the Decretals). These two frescoes are unfortunately much damaged. On the opposite wall Raphael painted Parnassus. This shows a mountain-top crowned with laurel where Apollo, surrounded by the Muses, his divine daughters, plays on the lyre; Homer sings, and about the inspired blind man is gathered his ideal family: Virgil leading Dante, Petrarch conversing below with Anacreon, Alceus, and the wonderful Sappho. Thus on the poetic mount beside the source of Helicon the dream of Humanism is fulfilled in the joy of living and intellectual pleasures. The whole code of classic art is formulated in these unrivalled pictures. In them beauty, nobility of posture, purity and grace of form, the sense of rhythm and life—all combine to form one joyous whole. The serenity of Greek art is recovered without effort, and the noblest harmony is the result. It is the most complete expression of the magnificent ideal which for a time was believed realizable in the Church and which was called Humanism.

The decoration of the second Chamber or Stanza of Heliodorus is quite different. The pope was not one to bear the responsibility of long with impersonal allegories. He was eager for glory and greatness and his own apotheosis or rather the panegyric personified by Julius II, forms the subject of the new chamber. His portrait was to appear on all sides, and in fact it is found in two out of every four of these frescoes. They were begun in 1511 and completed in 1514 under Leo X, whose countenance appears in the last fresco, "St. Lawrence halting Attila". This scene, his pupils, shows, despite the beauty of the picturesque idea, inferior execution. The "Deliverance of St. Peter", with its night effects, its various lights (the moon, torches, and the nimbus or radiance of the angel) is one of the most famous but not the most beautiful or purest of the artist's works. But the frescoes of the other two walls, "The Expulsion of Heliodorus from the Temple" and the "Mass of Bolsena" are among his finest creations. The "Heliodorus" (an obvious allusion to the despoilers of the Papal States and the war-cry of Julius II, "Fatebardi!" is a splendid work of dramatic art wherein everything is simultaneously composed and expressed with startling clearness and energy. The "Mass of Bolsena" is perhaps still more beautiful. Raphael never produced a richer and more perfect composition; never was he more picturesque and noble, more dramatic and strong. Furthermore, as regards colouring, it is impossible to imagine anything more beautiful than the portrait of the pope or the Swiss Guard grouped kneeling at his feet. In this instance the always-impressionable artist was influenced by the Venetian, Sebastiano del Piombo. With his usual genius and rapidity of assimilation he added the Venetian palette to his art.

Julius II died on 21 Feb., 1513. His successor, Leo X, lost no time in restoring or ascertaining to Raphael all his commissions and duties. But the work in the Chambers was almost neglected. In the third in point of time Raphael painted only one fresco, the "Incendio del Borgo" (1514). The other three are all by his pupils and are very poor. The "Incendio" itself is one of his least happy and poorest works. Michelangelo had just uncovered the ceiling of the Sixtine Chapel, and this masterpiece was obviously in Raphael's thoughts. He sought only to assemble nude bodies in sculptural attitudes. Though it displayed more skill and beauty in details, it bears the same years previous in the "Entombment". The entire fourth Chamber, that of Constantine, was painted after the death of Raphael, under the direction of Giulio Romano, and it is very difficult to state precisely what remains of the spirit and original ideas of Raphael.

The frescoes of the Hall of Constantine were painted to convey the impression of immense tapestry. Tapestries were the fashion, after Raphael, by command of Leo X, had painted the cartoons for the "Acts of the Apostles" which were to be copied in the studio of Pieter van Aelst at Brussels. Ordered in 1514, the hanging, composed of ten pieces, was suspended on the walls of the Vatican in 1519. Stolen in 1527 during the sack of Rome, these tapestries were not restored to the Vatican till 1898, and are now preserved at the South Kensington Museum in London. This work de luxe, woven of threads of silk and gold, is the most robust and easily intelligible of all Raphael's productions. It is 112 feet long and after an interval of a century the epic inspiration of Masaccio. Many of the details are textual reminiscences of the frescoes of the Carmine. At the same time
Raphael's genius rarely manifested itself so freely or with such happiness in so beautiful a story. This happiness, the joy of creating, ease, and fertility are the beneficent characteristics of all the later works of Raphael. It is evident that the artist profoundly enjoyed the beauty of his inventions and the feeling is communicated to the spectator, lifting him above himself. Once more antiquity and Christianity, the profane and the sacred, were mingled but in a natural and properly "historic" form. To revive the Temple with its twisted columns (two of which are preserved at St. Peter's and which Bernini imitated in the baldacchino in the following century), to reproduce according to a bar-relief a scene of sacrifice (Sacrifice of Lystra) to imagine an agora, a sort of Athenian forum, surrounded by porticoes and temples in which all antiquity lived again, and to set in this scene the "Preaching of St. Paul" was to Raphael an uninterrupted pleasure.

Such works have remained the unsurpassable model of historic composition, each of them begetting for more than two centuries a lengthy posterity and inspiring many echoes in"art of Ananias" inaugurated the series of lurid miracles. Without such examples as the "Sacrifice of Lystra" and the "Preaching of St. Paul" Poussin's art would hardly be understood. The "Conversion of St. Paul" is a marvel of noble and luminous composition in a subject which seventeenth-century art often treated with vulgarity. But the finest examples of this splendid series are the first two scenes which form the evangelical prelude or prologue to the "Acts"; the "Calling of the Good Shepherd", and the "Peace Over" are works in which the Umbrian soul, the serene and poetic sensibility of Raphael could not be surpassed. Here the artist has given us the true colour of things, the pastoral charm and original atmosphere of the prechristian. The idyllic and confident sense of life as it is expressed in the catecombs or on the tomb of Galla Placidia, in the type of the Good Shepherd, the moral perfume so long vanished or evaporated were successfully revived by the wonderful divination and taste of a great artist. Raphael's genius would seem to have been bestowed by Providence to restore lost feelings to Christianity.

This same poetry as of a higher kind of eclogue characterizes the second of the great works undertaken by Raphael at the command of Leo X, the decoration of the Loggie, known as the Loggie of the Vatican. This was a story added by Raphael to the two stories of the façade built by Bramante. It comprised three arcades and as many little cupolas, each of which received four small pictures. In the decoration of this gallery Raphael's idea was to rival the"Thermes" of Titus, the recent discovery of which had stirred artistic and literary Rome. The walls were covered with charming succoses by John of Udine; trellises painted so as to deceive the eye framed the pictures on the vaulted ceilings. Nothing exceeding the grace of this portrait, flooded with sunlight and completed by the horizon of the Roman Campagna. The ceiling was painted from 1513 to 1519, but Raphael had not time to make it his own handiwork, executing only the designs, and those of the last three cupolas are not at all worthy of him. Here he conceived from the Creation to the Last Supper. The first "scenes" illustrate the same subject from Genesis which Michelangelo had just painted on the ceiling of the Sixtine Chapel. But Raphael does not outshine his rival, being only spiritual and charming where the latter is magnificent. In the accompanying compositions often occurs a reflection of the lovely pictures which Pietro Cavallini had painted about 1280 in the basilica of S. Lorenzo, reproduced in a MS. of the Vatican still extant. But the pastoral scenes are wholly original with Raphael, especially those in which landscape figures largely. Nothing could be more nobly graceful than the "Angels received by Abraham", the "Meeting of Jacob and Rachel", or "Moses saved from the waters". "Raphael's Bible" as it is often called, is a series of epic miniatures, the clearness of interpretation of which rivals their simplicity. The "Death of Agostino" for the Luxemburger John Göritz a figure of Isaia which is almost a plagiarism, and in 1514 for the Sienese banker, Agostino Chigi, the four celebrated "Sibyls" of S. Maria della Pace. By their divine elegance the latter recall the sublime qualities of the"Camera della Segnatura". For Chigi were also painted in 1516 the cartoons for the mosaics which were to adorn Santa Maria della Popolo, his funeral chapel, but only the figures of God the Father and the planets were finished. Finally this Maccan of many projects conceived the ostentatious idea of having the pope's favourite painter decorate the villa which he was building in the Trastevere and which in the seventeenth century was called the Farnesina. This delightful summer palace, one of Peruzzi's most charming creations, is a perfect type of a country house, a patrician dwelling of the Renaissance period, and was decorated by the most popular masters of the age. Sodoma decorated the first story with subjects from the "Marrige of Alexander" which form an heroic and voluptuous epithalamium. Raphael had to decorate the large gallery on the ground floor. The first fresco was the "Triumph of Galatea". Raphael took as his theme the celebrated verses from Politian's "Giostra" which had already inspired Botticelli. But what is the mythology of this fascinating artist beside the resurrection of the immortal and chaste paganism? Zeuxis and Apelles did not do
otherwise. It is curious that Raphael made the purest profession of faith in idealism with regard to this figure of a woman which arouses all the sensuous cupidity which is due to painting his "Galatea" he writes to his friend Castiglione, "I should consider myself a great master if it had only half the merits of which you write. I know that to paint a beautiful woman I should see several and should have you also to assist in my choice. But as I have few good judges or good models I work according to a certain idea which presents itself to my mind. If this idea possesses any perfection I do not know it, though this is what I endeavour to attain." Plato might recognize himself in these exultations; for they might be a recovered fragment of the "Jen" or "Phaedrus".

The "History of Psyche" on the ceiling of the large gallery was painted in 1518 when Raphael, overburdened with work, had no leisure and confided to his pupils, chiefly to Giulio Romano, the task of executing his sketches and designs. His original sketches are marvels, and the composition of the frescoes, despite their rather heavy and vulgar colouring, is calculated to charm an artist's eye. With his spiritually inclined imagination Raphael feigned a gate opening into an archway opening into a pergola with trellis, an arched and vine-covered pergola through which appear in mid-heaven the winged whitness of the goddesses. Two or three figures fill these azure triangles. These ideal and floating figures are a very festival. But the middle of the pergola is covered with a ceiling formed by a double tapestry which depicts in two scenes the "Entrance of Psyche to Olympus" and the "Marriage of Psyche". Giulio Romano's coarse execution and the still more regrettable retouching of Maratta could not wholly distasteful those incomparable works.

Pictures and portraits of the Roman period.—Together with these vast decorative works Raphael continued to produce as though for pastime works of small size but great importance, for they are the sole means whereby his art could be known outside of Italy, and Raphael become more than a name to the great European public. Moreover, there are many masterpieces among these works of small compass. The Madonnas of the beginning of the Roman period still reveal the breath of the preceding period. The lovely little "Virgin of the Casa Alba" (St. Petersburg, 1510), the Leonardi-like "Madonna Aldobrandini" (National Gallery), the charming "Madonna of the Veil" of the Louvre (1510), still preserve a remnant of the Florentine grace and of the Seradian spirit of the time. The "Virgin of the Candelsticks" 1511 for Sigismondo Conti after the Camera della Segnatura marks the transition to a new manner. The graceful figure of the Virgin seated amid clouds on a sunlit throne with her Child in her arms recalls the celestial figures of the Disputa; the three saints and the donor kneeling below on the earth before the beautiful landscape, the Child with a cartel on which was formerly written the ex-voto, show brilliant and scholarly painting, but perhaps too evident imitation. The "Virgin of the Fish" (Madrid, 1513), the "Virgin of the Candlesticks" (London, 1514), the "Virgin of the Curtain" (Madonna della Impennata, Pitti, 1514) are unfortunately among his pupils' works. There is a coldness, a lack of the artist's personal qualities and peculiar sensibility, which chills works otherwise charmingly calm. Execution is a part of art which seems material but which is in reality quite spiritual; through it the artist betrays his emotion, gives us his confidence, and communicates his impressions. The work of another lacks the moral qualities of style. Raphael was therefore not sufficiently careful of his reputation when he confided his most original inspirations to his pupils, for they lost in being expressed by others. The division of labour which has but few inconveniences in decorative works becomes fatal in works of a "lyric" or familiar nature, and more so when the artist himself is conscious of his power; the art is stamped with his personality. It is this which injures or spoils irreparably some of his most famous works, such as the "Spasimo" of Madrid, the "Madonna of the Rose" (or "La Perla") of the same museum, the "St. Michael" of the Louvre, and the "Holy Family" known as that of Francis I (all these belong to the years 1516–18). A thought of Raphael's translated even by such a master as Giulio Romano or Francesco Penni has nevertheless only the value of a shadow or a copy. Translation in such a case too often means betrayal.

Some works of this period are nevertheless by the artist himself and are rightly numbered among his most popular works. The "Madonna of the Chair" (Pitti Palace) is perhaps the best liked by women. No other links so happily the familiar charm of the Florentine period with the maturity of the Roman period. She is only a peasant in the costume of a contadina with the national kercifich on her hair, but Raphael never found in such simple materials a more profound and natural combination of forms, such curving lines, such by far the arabesque garden is a perfect expression of maternal love seems to be enclosed within the perfect circle of this picture. It is the perfection of genre pictures, wherein the most ordinary human life reaches its noblest expression, a universal beauty. Art has lived K. four centuries on this sublime idea. Though from Giulio Romano to Ingres it has been imitated a thousand times, no one has discovered the secret of its perfection. Among tableaux de grace must be mentioned together with the little "Vision of Ezekiel" of the Pitti Palace, the splendid picture of St. Cecilia of Bologna (1515). This painting, as well as its contemporaries the "Madonna of the Chair" and the "Sistine Madonna", coincides with the appearance of a new model whose portrait we have in the famous "Donna Velata" of the Pitti Palace. It was she who posed for the St. Cecilia as for the Dresden picture. These two pictures, especially the second, occupy a place apart in Raphael's works. Here the artist directly attempts the expression of the supernatural. The Dresden picture is the most beautiful devotional picture in existence. The impression is obtained not only by the idealism of its form, but by the vision-like representation of space, by the scheme of clouds on which the Virgin is upheld, and the solemnity of the drapery. An almost forbidding mystery fills this majestic canvas, truly unequalled in Raphael's works. It would seem as if the artist, who had been forewarned by the story of the Egyptian excommunication had not interrupted the "Transfiguration" (Vatican Gallery, 1520). The upper part, which is all Raphael had time to complete, is one of his highest inspirations. In uniting this 'glory' with the earthly and agitated scene below, he was confronted with a problem which it required all his genius to solve. The devotion of his pupils, who assumed the task of completing this well-nigh unrealistic task, produced only a cold and confused work.

This is why we often prefer Raphael's portraits, which, in spite of the taste of those days neglected, to his most talked-of works, his most famous Virgins. It is now the fashion to praise the portrait painter at the expense of the painter of the Madonnas and even of the decorator. It is truly said that in the first two Chambers the bearing in conception and method is the life of the whole. Later, starting with the Chamber of the Incendio, Raphael, doubtless following Michelangelo's example, ceased to introduce portraits into his historical works; he no longer represented individuals, but only the generic species, valuable indeed to paint portraits and even here, though he has equals, no one excels him. The half-dosen portraits he has left, the Julius II of the Uffizi, the Leo X of the

Pitti Palace, the portrait of Phædrus Inghirami (Boston, Fenway Court), and that of Castiglione (Louvre) are rivals of the most perfect work of Titian, Velasques, and Rembrandt. There is no doubt that the original of the splendid "Donna Velata" of the Pitti Palace was the inspiration which led a pedant to murder Raphael as he was about to start on a series of designs for a series of paintings for a nobleman in the Barberini Palace, which bears on a bracelet the name of Raphael, is the work of Giulio Romano, and the signature is a forgery of the seventeenth century.

Raphael's fame, after three centuries of unclouded splendour, has been violently attacked during the last century. The progress of historical criticism and the discovery of the "Primitives" were the beginning of a reaction as violent as it was unjust. It was asserted that the Renaissance, instead of furthering the progress of art, was a source of decadence. A school was founded bearing the standard of the Pre-Raphaelites. This school, whose herald was John Ruskin, did much good, but without denying it its due, it is time to reject some of its narrow and prejudiced judgments. There is no doubt that Raphael, like other men of genius, had pupils worthy of him. It would be strange to reproach him with the fact that his art was quite personal to himself. It may be that compared with Leonardo and especially with Michelangelo, Raphael seems less great or less original. He made no discoveries in nature like those of his great rivals, he added nothing to our knowledge of anatomy, of modelling, or construction; he is not a colourist like Titian, nor even a draughtsman in the absolute sense of the word, such as was Dürer or Pollaiuolo. It is probable that Raphael will never recover the singular position accorded Cézanne by the critics of our time as the faults of the "Perfectionist" and the professor whose instructions are always to be consulted. On the other hand, he appears more and more the most exquisite and perfect expression of an age and a society which will never return. Nevertheless the fact remains that if there have been rarer or more learned painters than he, he excels them all in his incomparable sense of beauty. No other has shown us so much nobility in nature, no one ever had or led us to form a better opinion of human nature. No other painter handled so completely all the resources of his brush. He knew what he would make of such a pen, and the painter and decorator. No one has known so well how to invest the highest and most precious ideas with plastic forms. He has given form to our dreams.

Raphoe, Diocese of (Rapotensis), comprises the greater part of the Co. Donegal (Gael. Tironaadh), in the ecclesiastical province of Armagh. Raphoe (Gaelic Raithoth, fort of cottages) was the first of St. Columba's Irish foundations to become an episcopal see. The monastery which he founded there in the middle of the sixth century was renovated about the year 700 by Adamnan, who succeeded him in Raphoe as well as in Iona. Though Adamnan died in Iona (704) he spent the last six years of his life in Ireland, and his mother's kindred were the clan that occupied the Raphoe district. It has been suggested that then, though not before, he may have been in episcopal orders with a sede vacante at Raphoe (Corimhne Couliscoille, 12). Be that as it may, for Eunan, who was venerated as first Bishop of Raphoe and so recorded by early Irish writers and the ancient calendars, is no other than Adamnan, whose name has the same pronunciation with Irish speakers. There is no record of a break in the line of the Catholic succession in Raphoe. But from the death of Nial O'Boyle in 1610 to the appointment of James O'Gallagher in 1725, owing to the violence of persecution, the diocese was administered by vicars except during the episcopate of John O'Culann from 1625 to 1661. The sufferings of this prelate are characteristic of the times. He was arrested, taken to Dublin, and twice brought before the viceroy and Privy Council. About 1643 he again fell into the hands of his enemies. Along with some prominent men of his diocese he was besieged by English soldiers and forced to surrender. Though promised quarter, seventy-two of his followers were put to the sword, and the bishop was given a choice between death by drowning and death at the hands of the military. Elected the latter fate he was stripped naked, and as the crossbows and matchlocks failed to discharge against the kneeling victim, pikemen were advancing to dispatch him, when Colonel Sir James Akin arrived upon the scene and prevented the murder, severely rebuking the soldiers. The bishop was then confined for four years in Derry in a dark dungeon where cold, hunger, and thirst were his portion. In the exchange of prisoners after Owen Roe O'Neill's victory at Benburb he regained his liberty in 1647. But when the remnant of the Irish army under Heber MacMahon was defeated next Letterkenny in 1650, O'Culann's life was once more in daily peril. He made his way out of the country in 1653, and died at Brussels 24 March, 1661. Six brothers, all older than himself, held high offices in the Church. The eldest, Galenus, a doctor of the Sorbonne and Abbot of Boyle, was imprisoned in Dublin, tortured, and hanged. The next Bishop of Raphoe, whose appointment comes just a hundred years after that of O'Culann, had also to fly for his life. In 1734 James O'Gallagher escaped capture by mounting a horse in the dead of
night shortly before soldiers came to seize him. He sought refuge on a remote island in an Irish lake and, during a year's concealment there, wrote for publication a treatise in which he had been at Lissadell to deliver to his flock, and which, when printed in 1736, became a powerful reminder of the duties of a Christian life throughout the western half of Ireland at a time of fierce aggression on the Faith. A marked man, he could not show himself again in Raphoe, and he was exiled to Kildare in 1737, where he found it needful to make a secluded spot in the Bog of Allen the centre of his apostolic labours.

Driven out at the Reformation, a Catholic bishop has never since resided at Raphoe. Even before the flight of the earls from Rathmullen (1607) Donal MacCongail, a remarkable prelate, who was present at the Council of Trent in 1563 and at the Ulster provincial council in 1587, seems to have resided most of his time at Killybegs on ground now occupied by structures connected with St. Columba's Marine Industrial School. A remnant of the ancient cathedral church of Raphoe still shows in the chancel of the Protestant cathedral there; but no ruin marks the site of the ancient monastery. It is different with the foundations of Gartan, Glenoulmbille and Kilruane, which are associated with the names of Columba. More striking to the eye are the remains of the remarkable abbeys founded during the Middle Ages in the Diocese of Raphoe. The Cistercians were at Asaroe, near Ballyshannon, the Carmelites at Rathmullen, the Franciscans in almost every district of Tirconnail. The most celebrated of these foundations was the Franciscan Abbey of Donegal under whose shelter, after it was dismantled, the "Annals of the Kings of Ireland" were compiled by the Four Masters (1632-1636). After the plantation of Ulster in the seventeenth century not an acre of good land remained in the hands of a Catholic in Tirconnail. To this day some of its consecrated abbey lands yield an annual income of close on £2,000 sterling to Trinity College, Dublin.

Dr. Patrick McGee (1820-1861) brought the Loreto Sisters into the Diocese of Raphoe (1854); Dr. Daniel McGee (1861-1871), afterwards Primate of all Ireland, introduced the Sisters of Mercy (1867), and Dr. James McDevitt (1871-1879) established the Raphoe Diocesan Society (1872) and the Raphoe Brothers college in 1894. The year 1901 is an important date in the history of Raphoe; it was then that the ancient cathedral chapter was re-established by Leo XIII and St. Columba declared joint patron with St. Eunan of the new cathedral. In that year also the new cathedral, which together with the bishop's residence is at Letterkenny, was solemnly dedicated. Cardinal Logue, a native and former bishop (1879-1887) of Raphoe, presided, and Archbishop Keane of Dubuque, also a native, preached the dedication sermon. St. Eunan's (Adamson's) College was begun at Letterkenny on 23 September, 1904, the twentieth centenary of St. Adamnan, and opened in 1906. There are many pilgrimages in Raphoe, the most frequented being Doon Well, Inniskell, St. Columba's Well, and Glenoulmbille.

Rapin, René, French Jesuit, b. at Tours, 1621; d. in Paris, 1687. He entered the Society in 1639, taught rhetoric, and wrote extensively both in verse and prose. His first production, "Eloges Sacres" (Paris, 1659), won him the title of the Second Theocritus, and his poem on gardens, "Hortorum libri IV" (Paris, 1665), twice translated into English (London, 1673; Cambridge, 1706) placed him among the foremost scholars of that day. Of his other essays, the best known are: "Observations sur les poëmes d'Horace et de Virgile" (Paris, 1669); "Réflexions sur l'usage de l'éloquence de ce temps" (Paris, 1672); "Réflexions sur la poétique d'Aristote et sur les ouvrages des poètes anciens et modernes" (Paris, 1676). He is also the author of several theological and ascetic treatises like "De nova doctrina dissertatio seu Evangelium Jansenistarum" (Paris, 1650); "L'esprit du christianisme" (Paris, 1672); "La perfection du christianisme" (Paris, 1673); "La foi des derniers siècles" (Paris, 1679). These books and many other pamphlets were collected in "Œuvres complètes" published at Amsterdam, 1709-10. Rapin's best titles to celebrity are his two posthumous works: "Histoire du jansénisme", edited by Gazeau (Paris, 1801), and "Mémoires sur l'église, la société, la cour, la ville et le jansénisme", edited by Aubineau (Paris, 1865). The latter book is the counterpart of the Jansenistic "Mémoires de Godefroi Hermant sur l'histoire ecclésiastique du XVII siècle", edited by Gazeau (Paris, 1801). In the latter, Rapin endeavours on every occasion to find Rapin at fault, but recent studies on Jansenism show that he is, in the main, reliable.

Rappold. See MELFI and RAPOLLA, DIOCESE OF.

Raskolnikov (Russian raskolnik, a schismatic, a dissenter; from raskol, schism, splitting; that in turn from raz, apart, and kol'ot, to split; plural, raskolniki), a generic term for dissidents from the Established Church in Russia. Under the name Raskolnik, the various offshoots and schismatic bodies originating from the Greek Orthodox Church of the Russian Empire have been grouped by Russian historians and ecclesiastical writers. Strictly speaking, the name Raskolnik refers merely to those who have kept the outward forms of the Byzantine Rite; the others who have deserted its ritual as well as its teachings are grouped under the general Russian name of Soklanstvo (sectarianism). In the present article they are both treated together, excepting them but slightly known outside of Russia. The Raskolniks represent in the Russian Church somewhat the antithesis of Protestantism towards the Catholic Church. Protestants left the Church because they claimed a desire to reform it by dropping dogmas, beliefs, and rites; the Raskolniks left the Russian Church because they desired to keep alive the minutest rites and practices to which they were accustomed, and objected to the Russian Church reforming them in any respect. In doing so they fell into the greatest obloquies, and a sectarianism more or less than the minutiae of ritual, rejected nearly every doctrine the Church taught throughout the world.

I. TRUST RASKOLNIKs.—Even from the time that the Russians were converted to Christianity there were various dissident sects among them, reproducing in some respects the almost forgotten creases of the early ages of the Church. These are mere names to-day, but the main separation from the Russian Established Church came in 1654 when Nikon, Patriarch of Moscow, convened a synod at Moscow for the reform of the ritual and correction of the Church books. But, in the time the air in Southern Russia was filled with the idea of union with Rome, in Central and Northern Russia there was the fear of the Polish invasion and the turning to Latin customs. When Nikon corrected
the Church service books, into which many errors had crept by careless copying, and conformed them with the common books, great was the alarm lest he was departing from old Slavonic hallowed words, and was making cause with the stranger outside of Russia. When he undertook to change the style of popular forms and ceremonies, such as the sign of the cross, the spelling and pronunciation of "Jesus", shoving the beard, or to differ in the number of Alleluias before the Gospel, he aroused popular resentment, which rose until there came an open break in which every point he proposed was rejected. Afterwards when Peter the Great came to the throne (1689-1725), and established the Patriarchate of Moscow, substituted the Holy Synod and made himself the head of Church authority, changed the forms of the ancient Russian-Slavonic letters, and set on foot a host of new things in Church and State, the followers of the old order of things publicly condemned him as the Antichrist and denounced the State Church for ever, while clinging to the older forms of their fathers. But both Nikon and Peter had the whole Russian episcopate with them as well as the great majority of the Russian clergy and people. And when the two factions who had partitioned the established Greco-Russian Orthodox Church became also known as Stariobiaditsi (old Ritualists) and Staroveretsi (old Believers), in allusion to their adherence to the forms and teaching prevailing before Nikon and Peter.

As none of the Russian bishops seceded from the Established Church the Raskolniks therefore had but an incomplete form of Church. Of course a number of priests and deacons adhered to them, but as they had no bishops they could not provide new members of the clergy. Soon death began to thin the ranks of their clergy and it became apparent that within a brief period they would be left without any priesthood whatever. Then some of their leaders began to deny that a priesthood was necessary at all. This led to the splitting of the Raskolniks into two distinct branches: the Popovetsi (Priestly, i.e. "Pope"-ly), who insisted on the hierarchy and priesthood, and the Bezpopovetsi (Priestless, i.e. without "Pope"), who denied the necessity of any clergy whatever. The latter, however, accepted their ministrations. The fortunes of these two denominations or sects were quite different. The former grew to great importance in Russia, and are now said to have between thirteen and fifteen millions of adherents. The latter subdivided again and again into smaller and smaller sects and were numbered between three and four millions, all included. They will be taken up separately.

Popovetsi or Hierarchical Raskolniks.—At first these renewed their clergy by taking over dissatisfied or dismissed priests from the Established Orthodox Church, after having them take an oath against all the reforms instituted by Nikon and Peter; but this method was hardly satisfactory, for in most cases the material thus obtained was of a low moral grade. They believed that the whole Russian Church, which had gone over to Antichrist, but still were valid bishops, and hence endeavoured to have priests ordained by them, but in vain. They searched the Eastern world for a bishop who held their peculiar ideas, and it seemed almost as though they must eventually change for lack of clergy, when chance aided them. A community of Popovetsi monks had settled at Bielokrinitsa (White Fountain) in Bukowina. Ambrose (1791-1863), a Greek monk, was appointed Bishop of Sarajevo in Bosnia, and was consecrated by the Patriarch of Constantinople. When the patriarch deposed him, and when his resentful feelings against the Constantinople authorities were at their height, the Raskolniks approached him with the request to become their bishop. On 16 April, 1846, Ambrose agreed to go over to their faith and adopt all the ancient practices, consecrate other bishops for them, and become their metropolitan. On 27 October, 1846, he was solemnly received in the monastery of Bielo-krinitsa, took the necessary oaths, celebrated pontifical Mass and assumed episcopal jurisdiction. Bielo-krinitsa is only a few miles from the Russian border, and a hierarchy was soon brought into being for Russia. After bishops were consecrated for Austria and Turkey, bishops were consecrated and installed in Russia. The Russian Government could not crush the head of the Raskol Church, for it was in Austria. The Popovetsi grew by leaps and bounds, commencing a few years after the consecration of their first clergy and vied with the Established Church. At present they have, since the decree of toleration in 1905, a well-established hierarchy in Russia, with a metropolitan at Moscow, and bishops at Saratoff, Perm, Kazan, Caucasus, Samara, Kolomea, Nijni-Novgorod, Smolensk, Vyatka, and Kaluga.

Their chief stronghold is the Rogozhsky quarter in Moscow, where they have their great cemetery, monastery, cathedral, church, and chasels. In 1863, at the time of the Polish insurrection the Raskolniks were accused by the Polish garrison of preparing a revolution, and were suspected of being engaged in correspondence with the pope, a charge they strenuously denied. The letter to the "Holy Catholic Apostolic Church of the Old Believers", supporting the tsar and declaring that on all main points they were in agreement with the Established Church. This again split their church into ten factions which have been named the Okhrashniki or Ecclesiasticalists and the Razdorniki or Controversialists, who denied the points of agreement with the national Church. In addition to this the Established Church has now set up a section of these Raskolniks in union with it, but has permitted them to keep all their peculiar practices, and these are called the Yedinoversi or "Unitists".

A great many of the controversial section of the Raskolniks are coming into the Catholic Church, and already some eight or ten priests have been received. Bezpopovetsi, or the Priestless, seemed to represent the despairing side of the schism. They have their great stronghold in the Preobrazhenky quarter in Moscow, and are strong also in the Government of Archangel. They took the view that Satan had so conquered and enthralled the Church that the clergy had gone wrong and had become his servants, that the sacraments, except baptism, were withdrawn from the laity, and that they were left leaderless. They claimed the right of free interpretation of the Scriptures, and modelling their lives accordingly. They recognize no Hierarchy, and are numbered between three and four millions, all included. Lest this be said to duplicate Protestantism, one must remember that they have kept up all the Orthodox forms of service as far as possible, crossings, bowings, icons, candles, fastings, and the like, and have regular and well-maintained monasteries with their monks and nuns. But they had no element of stability; and their sects have become innumerable, ever shifting and varying, with incessant divisions and subdivisions. The chief of the subdivisions are: (1) Pomorskiei (the dwarfs) into four divisions, all being in the same diocese, and of which it is very devout; (2) Fodeiotes (Theodians) who founded hospitals and laid emphasis on good works; (3) Bebrachniki (free lovers) who repudiated marriage, somewhat like the Onedia community in New York; (4) Brunniki (wanderers) a peripatetic sect, who went over the country, declaring their doctrines; (5) Molchaniaki (mute), who seldom spoke, believing evil came through the tongue and idle conversation; and (6) Niemolaniaki (non-praying), who taught that as God knows all things it is useless to pray to him. All these sects are divided into smaller ones, as many of the strange sects in England and America, so that it is almost impossible to follow them. Often they indulge in the wildest immorality, justifi-
ing it under the cover of some distorted text of Scripture or some phrase of the ancient Church service.
'II. SECTARIANS.—The various bodies which make up the Sektsamwacht have seceded from the national Russian Church quite independently of the schism at the time of Nikon and the reform in the Church books. They cannot be divided, much less reconciled with the various sects ranging from Protestantism, and are ruled upon some distorted idea of the Church, or a rule of life or doctrines of the Faith. Some of them are older than the schism, but most of them are later in point of time. The principal ones comprise between one and two million, and may be subdivided or classified as follows: (1) Klyjzii (Flagellants), who believe in severe penances, reject the Church, its sacraments and usages. They are also called the Ludzi Bashi, or "God's People", and also the "Farmazans" (Free-masons) on account of the secret initiations they have. They hold secret meetings in which they sing wild, stirring hymns, dress in white, and jump, dance, or whirl, much like the negro revivalists in the Southern States.
(2) Skoptzi (Eunuchs) who not only teach absolute celibacy, but mutilate themselves so as to be eunuchs. They also are supposed to be the pure, and walk untainted through this world of sin, and take the literal view of Matt., xix, 12. Women are also mutilated, particularly after they have borne children to recruit the sect, but these children are not born in wedlock. The Skoptzi are said to be usurers and money changers.
(3) Molokani (Milk-drinkers) said to be so named because they make it a point to drink milk and use other prohibited foods during Lent and fast days, to show their objection to the Orthodox Church. They observe all external ceremonies of religion, but lay stress upon the Bible. They say there is no teacher of the Faith but Christ himself, and that we are all priests; and they carry their logic so far as to have neither church nor chapel, simply meeting in one another's houses.
(4) Dukhobors (Spirit wrestlers) are those who deny the Holy Ghost and who place but a minor importance upon the Scriptures. They are better known to America, for some thousands of them emigrated to Canada, where they are now good colonists. They give a wide place to tradition, and designate man as the "living book", in opposition to dead books of paper and ink. In some respects they are pantheists, saying that God lies within us, that we must struggle with the spirit of God to attain the future life. They do not have an historical relation to the Gospel narratives, but take them figuratively.
Their ideas of the Church is in conformity with their belief; they consider it an assembly of the righteous on earth, whether Christians, Jews, or Moslems. Yet they have all the peculiarities and fanaticism of the Slav.
(5) Stundists, or a kind of Russian Baptist. These seem to be an offshoot from the Lutharians or Mennonites who settled in Russia. The name is derived from the German Stunde or hour, because they assembled at stated hours to read the Bible or worship. They rejected the sacraments, even baptism at first, but yet retain it. They gave up all Church holidays, and agreed with the Molokani in repudiating the idea of a clergy. They are nearly all little Russians, in

erratic religious beliefs in Russia as in the United States. There are the Pissany (Dancers), Samoboli (Self-gods), Chilenniki (Computers), who have changed Sunday as so to fall on Wednesday, and Easer to the middle of the week, Paskoverites, Radstokkie (so named after their founders), and numerous others, who, amusingly with the various founders and believers. In addition to these are the various missionary enterprises and local churches of Western Protestantism, of which the Lutharians and Baptists are the leading ones.

RASS, ANDREAS, Bishop of Strasburg, b. at Solingen in upper Alsace, 6 April, 1794; d. at Strasburg, 17 November, 1887. After receiving his classical training at Scheltstadt and Nancy, Rass studied philosophy and theology at the seminary at Mains under Liebermann and was ordained priest in 1816. At first he was a teacher in the seminary for boys at Mains. In 1822 he received his degree as doctor of theological faculty of Wurtzlar. When Liebermann left Mains for Strasburg Rass was made, in 1825, director of the seminary at Mains and professor of dogmatics at the same place. After failing to be elected Bishop of Mains in 1828, on account of the opposition of the Hussite Government, he had the opportunity for a short time of the theological seminary at Moleheim; in 1829 he became superior of the seminary for priests at Strasbourg and professor of dogmatics, theology, and homiletics. On 5 August, 1840, he was made coadjutor Bishop of Strasbourg with the right of succession, and was consecrated on 14 February, 1841. In 1842 he became Bishop of Strasbourg. As bishop he devoted himself particularly to the training of the clergy and the extension of religious societies. He was one of the most determined defenders of Papal Infallibility at the Vatican Council. His declaration in 1874 in the German Reichstag that the Treaty of Frankfort was recognized by the Catholics of Alsace and Lorraine did much to shatter the great popularity he had until then enjoyed among his fellow-countrymen of Alsace.

In his earlier years, before he was raised to the episcopate, Rass showed great and very creditable activity as an author. One undertaking which is much to his honour is the founding, with Nicholas Weis, of the "Katholik" at Mains in 1827. Rass also, with the aid of Weis, published a large number of works, chiefly translations and revisions of French and English originals. Among the most important of these are Alban Butler's "Leben der Vater und Märtyrer" (20 vols., Mains, 1822-26; 2nd ed., 23 vols., 1836-40); a brief summary of this work: "Leben der Heiligen Gottes" (4 vols., Mains, 1826-27); later, completely revised by J. Holzwarth (2 vols., Mains, 1854-55); 13th ed. (1903); another was the "Bibliothek der katholischen Kanzeleibesonderungen" (15 vols., Frankfort, 1839-39). Rass also brought about the German translation of the "Annenal der Verbreitung des Glaubens", which he edited, and in this way did much to promote the interest in missions to the heathen. During his episcopate Rass published his well-known and most important work: "Die Convent seit der Reformierung nach ihrem Leben und aus ihren Schriften dargestellt" (13 vols. and index, Freiburg, 1860-90).

BESKIND (pseudonym for Grekkin), Andreas Rass, Bischof von Strasburg (Wurtzlar, 1873) in the series "Deutschlands Episcopat in Lebensbildern", 1, pt. 4); Rass, Mgr A. Rass, "Biographie de Strasbourg, biographie de l'Alsace, new series, XXI (1901), 662.; Rass, André Rass et l'oeuvre de la propagation de la foi" (Kehlheim, Strasbourg, 1899).

FRIEDRICH LAUCHERT.
Rationale, an episcopal humeral, a counterpart of the pallium, and like it worn over the chasuble. At the present time it is only used by the Bishops of Eichstätt, Paderborn, Toul, Constance, and Hildesheim. The habit and the pallium is in the form of a humeral collar, ornamented in the front and back with appendages. The one used by the Bishop of Cracow is made of two bands crossing the shoulder and joined at the breast, and at the back, having the appearance of a discoid connected by medallions. During the Middle Ages the use of the pallium was affected by a number of German bishops, e.g. the Bishops of Würzburg, Ratisbon, Eichstätt, Naumburg, Halberstadt, Paderborn, Minden, Speyer, Metz, Augsburg, Prague, Olmuts, and by the Bishops of Liège and Toul, whose dioceses at that time belonged to the German Empire. There is no account of this rationale being worn by any other bishops except a few in territories adjoining that of Germany (Cracow, Aquileia). Of the above-mentioned bishops many only used it temporarily. The earliest mention of the rationale dates from the second half of the tenth century. The earliest representations are two pictures of Bishop Sigebert of Minden (1022-3), in which the pallium is shown as a large square, which were both incorporated in a Mass Ordo belonging to Bishop Sigebert. The form of the rationale during the Middle Ages was manifold. Besides the two forms which have survived to our time, there were two other types, one closely resembling a Y-form pallium, the other being the form of a square. The difference that instead of being striped vertically, it was simply tasselled in front and at the back. There were no rules governing the ornamentation of the rationale, as is clearly seen by representations of it on monuments, and by such rationally as have been preserved (Bamberg, Ratisbon, Eichstätt, Paderborn, Munich). The edges were generally adorned with small bells.

The Rationale is an imitation and an equivalent of the pallium. That this is the case is evident, as from other papal Bulls, from the Bull of John XIX (1027), conferring on the Patriarch Poppo of Aquileia the pallium and the rationale at the same time, with the condition that he could only wear the pallium on high festivals. It appears, however, that the humeral ornaments of the Jewish high-priests (ephod, etc.) were not without influence in evoking this pontifical adornment, as may be seen from the original rationally preserved at Bamberg and Ratisbon. The name at least is derived from the appellation of the breast ornament of the high priest. From the tenth to the thirteenth century the rationale was also the name of an episcopal or ornament similar to a large pectoral clasp, made of precious metal,
ornamented with diamonds, and worn over the chasuble. It is frequently met with in pictures of the twelfth and thirteenth centuries, and is generally square, seldom round in form. Its use was discontinued in the course of the thirteenth century, and it is only at Reims that its use can be traced to the beginning of the sixteenth century. It originated undoubtedly in the pomp developed in episcopal vestments during the tenth century, and took its name from the breast ornament of the Jewish high-priest.

Joseph Braun, *Die liturgische Gewandung im Occident und Orient* (Freiburg, 1907).

**Rationalism** (Latin, ratio—reason, the faculty of the mind which forms the ground of calculation, i.e., discursive reason. See Apologetics: Atheism; Bible; Deism; Empiricism; Ethics; Exegesis, Biblical; Faith; Materialism; Miracle; Revelation). The term is used: (1) in an exact sense, to designate a particular moment in the development of Protestant thought in Germany; (2) in a broader, and more usual, sense, to cover the view (in relation to which many schools may be classed as rationalistic) that the human reason, or understanding, is the sole source and final test of truth. This view, which has occasionally been applied to the method of treating revealed truth theologically, by casting it into a reasoned form, and employing philosophical categories in its elaboration. These three uses of the term will be discussed in the present article.

(1) The German school of theological Rationalism formed a part of the more general movement of the eighteenth century "Enlightenment." It may be said to owe its immediate origin to the philosophical system of Christian Wolff (1679–1754), which was a modification, with Aristotelian features, of that of Leibniz, especially characterized by its spiritualism, determinism, and dogmatism. This philosophy and its method exerted a profound influence upon contemporaneous German religious thought, providing it with a rationalistic point of view in theology and exegesis. German philosophy in the eighteenth century was, as a whole, tributary to Leibniz, whose "Thedodicè" was written, principally against the Rationalism of Bayle: it was marked by an infiltration of English Deism and French Materialism, to which the Rationalism in the present considered had great similarity, and towards which it progressively developed; and it was vulgarized by its union with popular literature. Wolff himself was expelled from his chair at the University of Halle on account of the Rationalistic materialism in his *Physica* and *Ethica*, in *Exercitationes de partibus naturæ* (1670–1774); cf. "Causa Dei et religionis naturalis adversus atheismum," and "Modesta Disputatio," *Halle*, 1723. Retiring to Marburg, he taught there until 1740, when he was recalled to Halle by Frederick II. Wolff's attempt to demonstrate natural religion rationally was in no sense an attack upon revelation. As a "supernaturalist" he admitted truths above reason, and he attempted to support by reason the supernatural truths contained in Holy Scripture. But his attempt, while it incensed the Pietistic school and was readily welcomed by the more liberal and moderate among the orthodox Lutherans, in reality turned out to be strongly in favour of the Naturalism that he wished to condemn. Natural religion, he asserted, is demonstrable; revealed religion is to be found in the Bible alone. But in his method of proof of the authority of Scripture reason was had to reason, and thus the human mind became, logically, the ultimate arbiter in the case of both. Supernaturalism in theology, which it was Wolff's intention to uphold, proved incompatible with such a philosophy, the prior form of which was expressed in his system. This, however, is to be distinguished from pure Naturalism, to which it led, but which it never became theoretically identified. Revelation was not denied by the Rationalists; though, as a matter of fact, if not of theory, it was quietly suppressed by the creed of which they were the competent judge of all truth. Naturalists, on the other hand, denied the fact of revelation. As with Deism and Materialism, the German Rationalism invaded the department of Biblical exegesis. Here a destructive criticism of very similar type to that of the Deists, was levelled against the miracles recorded in the Bible and the authenticity of the Holy Scriptures. Nevertheless, the distinction between Rationalism and Naturalism still obtained. The great Biblical critic Semler (1725–91), who is one of the principal representatives of the school, was a Rationalist in the latter; in company with Teller (1734–1804) and others he endeavoured to show that the records of the Bible have no more than a local and temporary character, thus attempting to safeguard the deeper revelation, while sacrificing to the critics its superficial vehicle. He makes the distinction between theology and religion (by which he signifies ethics).

The distinction made between natural and revealed religion necessitated a closer definition of the latter. For Supernaturalists and Rationalists alike religion was held to bE "a way of knowing the Deity," but consistently, for the Rationalists, in the observance of God's law. This identification of religion with morals, which at the time was utilitarian in character (see Utilitarianism), led to further developments in the conceptions of religion, the meaning of revelation, and the value of the Bible as a collection of inspired writings. The earlier orthodox Protestant view of religion as a body of truths published and taught by God to man in revelation was in process of disintegration. In Semler's distinction between religion (ethics) on the one hand and theology on the other, with Herder's similar separation of religion from theological opinions and religious usages, the cause of the Christian religion, as they conceived it, seemed to be put beyond the reach of the shock of criticism, which, by destroying the foundations upon which it claimed to rest, had gone so far to discredit the older form of Lutheranism. Kant's (1724–1804) criticism of the reason, however, formed a turning-point in the development of Rationalism. For a full understanding of his attitude, the reader must be acquainted with the nature of his Pietistic upbringing and later scientific and philosophical formation in the Leibniz-Wolff school of thought (see Kant, Philosophy of). As far as concerns the point that occupies us at present, Kant's reaction toward the assertion of reason was to proceed with natural, though not utilitarian, morals. When he met with the criticisms of Hume and undertook his famous "Kritik," his preoccupation was to safeguard his religious opinions, his rigorous morality, from the danger of criticism. This he did, not by means of the old Rationalism, but by throwing discredit upon metaphysics. He accepted all the proofs of the existence of God, immortality, and liberty were thus, in his opinion, overthrown, and the well-known set of "categorical imperatives" in his *Groundwork of the Metaphysics of Morals* (1785), which is presented to reason, is a general commandment. His conception was that which Kant himself never seems to have reached the view—to which all his work pointed—that religion is not mere ethics, "conceiving moral laws as divine commands," no matter how far removed from Utilitarianism—nor even an affair of the mind, but of the heart and will; and that revelation does not reach man as a rational demonstration, but consists in a personal adaptation towards God. This conception was reached gradually with the advance of the theory that man possesses a religious sense, or faculty, distinct from
ways existed in philosophy, and has generally shown itself powerful in all the critical schools. As has been noted in the preceding paragraph, German Rationalism had strong affinities with English Deism and French Materialism, two historic forms in which the tendency has manifestly manifested itself. But in the vulgarization of the ideas contained in the various systems that composed these movements, Rationalism has degenerated. It has become connected in the popular mind with the shallow and misleading philosophy frequently put forward in the name of science, so that a double confusion has arisen, in which (i) questionable philosophical speculations are taken for scientific facts, and (ii) science is falsely supposed to be in opposition to religion. This Rationalism is now rather a spirit, or attitude, ready to seize upon any arguments, from any source and of any or no value, to urge against the doctrines and practices of faith. Beside this crude and popular form it has taken, for which the publication of cheap reprints and a vigorous propaganda are mainly responsible, there runs the deeper and more thoughtful current of intellectual Rationalism, which either rejects religion and revelation altogether or treats them in much the same manner as did the Germans. Its various manifestations have little in common in method or content, but are the general appeal to reason as supreme. No better description of the general appeal to reason as supreme is the statement of the objects of the Rationalist Press Association. Among these are: “To stimulate the habits of reflection and inquiry and the free exercise of individual intellect... and generally to assert the supremacy of reason as the natural and necessary means to all such knowledge and wisdom as man can achieve.” A perusal of the publications of the same will show in what sense this representative body interprets the above statement. It may be said finally, that the practical effect, and the content of Rationalism, that is the principles of Protestantism; and that the intermediary form, in which assent is given to revealed truth as possessing the imprimatur of reason, is only a phase in the evolution of ideas towards general disbelief. Official condemnations of the various forms of Rationalism, absolute and mitigated, are to be found in the Syllabus of Pius IX.

(3) The term Rationalism is perhaps not usually applied to the theological method of the Catholic Church. All forms of theological statement, however, and all practical developments of dogmatic theology, are rationalistic in the true sense. Indeed, the claim of such Rationalism as is dealt with above is directly met by the counter claim of the Church: that it is at best but a mutilated and unreasonable Rationalism, not worthy of the name, while that of the Church is rationally complete, and integrated, moreover, with super-rational truth. In this sense Catholic theology presupposes the certain truths of natural reason as the premacula fidei, philosophy (the ancilla theologiae) is employed in the defence of revealed truth (see Apologetics), and the content of Divine revelation is treated and systematized in the categories of natural thought. This systematization is carried out both in dogmatic and moral theology. It is a process contemporaneous with the first attempt at a scientific statement of religious truth, comes to perfection of method in the works of such writers as St. Thomas Aquinas and St. Alphonsus, and is consistently employed and developed in the Schools.

RATIO

654

RATIO

Historia Rationalismus in the Nineteenth Century

FRANCIS AVELING.

RATIO STUDIOREM.—The term "Ratio Studiorum" is commonly used to designate the educational system of the Jesuits; it is an abbreviation of the official title, "Ratio atque Institutio Studiorum Societatis Jesu," i.e. "Method and System of the Studies of the Society of Jesus." The Constitutions of the Society from the beginning enumerated among the primary objects of the Society: teaching catechism to children and the ignorant, instructing youth in schools and colleges, and lecturing on philosophy and theology in the universities. Education occupied so prominent a place that the Society could rightly be styled a teaching order. Even during the lifetime of the founder, St. Ignatius, colleges were opened in various countries, at Messina, Palermo, Naples, Gandia, Salamanca, Alcalá, Valladolid, Lisbon, Bilлом, and Vienna; many more were added soon after his death, foremost among them being Ingolstadt, Cologne, Munich, Prague, Innsbruck, Douai, Bruges, Antwerp, Liège, and others. In the fourth part of the general constitutions, but until the third general chapter, there had been laid down concerning studies, but there was as yet no definite, detailed, and universal system of education, the plans of study drawn up by Fathers Nadal, Ledesma, and others being only private works. With the increase of the number of colleges throughout Europe, a uniform system was felt more and more. During the generalate of Claudio Acquaviva (1581-1615), the educational methods of the Society were finally formulated. In 1584 six experienced schoolmen, selected from different nationalities and provinces, were called to Rome, where for a year they studied philosophical works, examined regulations of colleges and universities, and weighed the observations and suggestions made by prominent Jesuit educators. The report drawn up by this commission was sent to the various provinces in 1589 to be examined by at least five experienced men in every province. The remarks, censures, and suggestions of these men were utilized in the drawing up of a second plan, which, after careful revision, was printed in 1591 as the "Ratione atqueue Institutio Studiorum." Reports on the practical working of this plan were again sent to Rome, and in 1599 the final plan appeared, the "Ratio atque Institutio Studiorum Societatis Jesu," usually quoted as "Ratio Studiorum." Every possible effort had been made to produce a practical system of instruction; the whole plan had been consulted, suggestions solicited from every part of the Catholic world, and all advisable modifications adopted. The Ratio Studiorum must be looked upon as the work of individuals, but of the whole Society.

At the present time the question of origin is a favourite topic of historical investigation. It has been asserted that the Ratio was modelled chiefly on the theories of the Spanish Humanist, Luis Vives (see Vives, Juan Luis), or on the plan of the famous Strasbourg "reformers" and educationist, John Strum. No such dependence has been proved, and we can unhesitatingly point to other sources. The method of teaching the higher branches (theology, philosophy, and the sciences) was an adaptation of the system prevailing in the great Catholic universities, especially in Paris, where St. Ignatius and his first companions had studied. The literary course is modelled after the traditions of the humanistic schools of the Renaissance period; it is probable that the flourishing schools of the Netherlands (Leuven and Louvain) provided the model for various features of the Ratio. Certain features common to the Ratio and the plan of Sturm are accounted for naturally by the fact that the Strasburg educationist had studied at Liége, Louvain, and Paris, and thus drew on the same source from which the framers of the Ratio drew their inspiration. Several Jesuits prominent in the drawing up of the Ratio were natives of the Netherlands, or had studied in the most celebrated schools of that country. But, as is evident from the description of the origin of the Ratio, its authors were not mere imitators; the most important source from which they drew was the collective experience of Jesuit teachers in various colleges and countries. The document of 1599 remained the authoritative plan of studies in the schools of the order until the suppression of the latter in 1773. However, both the Constitution and the Ratio explicitly declared that, according to the special needs and circumstances of different countries and times, changes could be introduced by superiors. As a consequence, there was and is a great variety in many particular points found in different countries and periods. After the restoration of the Society in 1814, it was felt that the changed conditions of intellectual life necessitated changes in the Ratio, and in 1832, the Revised Ratio was published; nothing was changed in the essentials or the fundamentals, but the attention was directed to the adaptation of the Ratio to branches of study. In the colleges Latin and Greek remained the principal subjects, but more time and care were to be devoted to the study of the mother-tongue and its literature of history, geography, mathematics, and the natural sciences. In more recent times still greater emphasis has been laid on non-Classical branches. Thus the Twenty-third General Congregation (legislative assembly of the Society) specially recommended the study of natural sciences. Non-Classical schools were pronounced proper to the Society as well as Classical institutions. In regard to methods, the present general declared in 1910 that, "as the early Jesuits did not invent new methods of teaching but adopted the best methods of their age, so will the Jesuits now use the best methods of our own time." This voices the practice of Jesuit colleges, where physics, chemistry, biology, physiology, astronomy, geology, and other branches are taught according to the established principles of modern science. From this it is clear that it is not the intention of the Society to make the Ratio Studiorum stationary and binding in every detail; on the contrary, it is intended that the educational system of the order shall adapt itself to the exigencies of the times.

Concerning the character and contents of the Ratio a brief descriptive account will suffice. The final Ratio did not contain any theoretical discussion or exposition of principles. Such discussions had preceded and were contained in the trial Ratio of 1585. The document of 1599 was rather a code of laws, a collection of regulations for the officials and teachers. These regulations are divided as follows: I. Rules for the provincial superior; for the rector, in whose hands is the government of the whole college; for the prefect of studies, who is the chief assistant of the rector and has direct supervision of the classes and everything connected with instruction, while another assistant of the rector, the prefect of discipline, is responsible for all that concerns order and discipline; II. Rules for the professors of theology: Scripture, Hebrew, dogmatic theology, ecclesiastical history, canon law, and more than the professors of philosophy, physics, and mathematics; IV. Rules for the teachers of the studio inferior (the lower department), comprising the literary branches. In this department there were originally five classes (schools), later frequently six: the three (or four) Classical schools, prepared for a classical secondary education, and the three (or four) Classical schools, prepared for a classical higher education. The classical school had a classical high school; then the class of Humanities and the class of Rhetoric (freshman and sopho-
more). Besides Latin and Greek, other branches were taught from the beginning under the name of "accessories"—especially history, geography, and antiquities. As was said above, gradually more attention is given to the modern tongues and its literature. Mathematics and natural sciences were originally taught in the higher course (the department of Arts), together with philosophy; in more recent times they are taught also in the lower department. In philosophy, Aristotle was prescribed as the standard author in the old Ratio, but he is not mentioned in the revised Ratio; St. Thomas Aquinas was to be the chief guide in theology. The Ratio Studiorum does not contain any provisions for elementary education. The cause of this omission is not, as some have thought, contempt for this branch of educational activity, much less opposition to popular instruction, but the impossibility of entering that vast field to any great extent. The Constitutions declared elementary education to be "a laudable work of charity, which the Society might undertake, if it had a sufficient number of men". In missionary countries, however, Jesuits have frequently devoted themselves to elementary education.

It be asked what is most characteristic of the Ratio Studiorum, the following features may be mentioned: It was, first of all, a system well thought out and well worked out, and formulated at a time when in most educational establishments there was little system. The practical rules and careful supervision insured efficiency even in the case of teachers of moderate talent, while to the many teachers of more than ordinary ability sufficient scope was left for the display of their special aptitudes. The arrangement of subjects secured a combination of literary, philosophical, and scientific training. The Ratio insisted not on a variety of branches taught simultaneously (the bane of many modern systems), but on a few well-related subjects, and these were to be taught thoroughly. To secure thoroughness, frequent repetitions (daily, weekly, and monthly) were carried on in all grades. What the teacher presented in his praelectioni (i.e. explanation of grammar or authors in the lower grades, or lecture in the higher faculties) was to be assimilated by the student through a varied system of exercises: compositions, discourses, tests, etc. The Ratio stipulated that the expenses connected with the training were not unfrequently inflicted by educators of the seventeenth and eighteenth centuries being strictly forbidden. For the moral training of the pupil much was expected from the personal contact with the teacher, who was supposed to take an interest in every individual pupil. Religious training was the foremost object, and religious influence and inspiration were to pervade all teaching.

In modern times objections have been raised against various features of the Ratio Studiorum, but most of them are either based on a misunderstanding of the Ratio, or directed against features which are entirely unessential. Thus the supervision and examination of students by other pupils, the constant colloquial use of Latin, etc. are secondary features which have been attacked in most cases. More has been said against the supposed disastrous influence of emulation and rivalry, encouraged by the Ratio, and the awarding of prizes and premiums. This system is not necessarily dangerous and, if properly and cautiously used, may become a wholesome incentive, since the modern educational system was looked upon by many as the greatest modern discovery in education, the Ratio Studiorum was severely censured for upholding the "antiquated system of prescribed courses". As the free elective system is now considered a failure by the foremost educationists, it is not necessary to refute this charge against the Ratio Studiorum. Beside, there is nothing in the Jesuit system which prohibits a reasonable amount of election, and many American Jesuit colleges have introduced certain elective branches in the higher classes. In regard to the numerous controversies concerning Jesuit education, Mr. Brown, U.S. Commissioner of Education (1911), has well observed that "in most of these controversies the Jesuit side is the side of many who are not Jesuits" (Educational Review, Dec., 1904, p. 531). Even critics who judge the Ratio with excessive severity are compelled to admit that it contains "much educational wisdom and experience, practical skill, and a pedagogical insight which never swerves from the main purpose" (Professor Fleischmann). Most of its essential features can well be retained and will prove advantageous no matter what new branches of study or methods of teaching are introduced.

Some points deserve to be specially treated on account of the serious objections raised against the Ratio. We hear frequent, and often animated, discussions concerning the aim or scope of educational systems and of various branches of study. What was the intellectual scope of the Ratio Studiorum? It cannot be better defined than in the words of the general of the Society, Father Martin, who said in 1692: "The characteristics of the Ratio Studiorum are not to be sought in the subject matter, nor in the order and succession in which the different branches are taught, but rather in what may be called the form", or the spirit of the system. This form, or spirit, consists chiefly in the training of the mind [efforto ingenit], which is the object, and in the various exercises, which are the means of attaining this object." This training or formation of the mind means the gradual and harmonious development of the various powers or faculties of the soul—of memory, imagination, intellect, and will; it is what we now call a general and liberal education. The training given by the Ratio was not to be specialized or professional, but general, and was to lay the foundation for professional studies. In this Ratio the system of a modern college was to be introduced into the world of the Jesuits and modern systems which aim at the immediately useful and practical or, at best, allot a very short time to general education; it stands in sharp contrast with those systems which advocate the earliest possible specialization. This is what educationists think, with many others, that "the higher the level on which the professional specializing begins, the more effective it will be". Besides, there are many spheres of thought, many branches of study, especially literary and historical, which may not be required for professional work but which are necessary for a higher, broader, and truly liberal culture. The educated man is to be not merely a wage-earner, but one who takes an intelligent interest in the great questions of the day, and who thoroughly understands the important problems of life, intellectual, social, political, literary, philosophical, and religious. To accomplish this a solid general training, preparatory to strictly professional work and reasonably prolonged, is most valuable. One of the means, in fact, of attaining this liberal training, the Ratio finds in the study of the Classics which has been said and written, within the past decades, for and against the value of the Classics as a means of culture. The Ratio does not deny the educational value of other branches, as sciences, modern languages, etc., but it regards the curriculum not merely because it is the old traditional system, but because, so far, it has proved to be the
best means for giving the mind the much desired liberal culture and general culture. It cannot be denied that the study of Latin, in particular, is excellently fitted to train the mind in clear and logical thinking. Immanent logic has been called the characteristic of the Latin language and its grammar, and its study has been termed a course in applied logic. Some writers have asserted that the Roman prescribed Latin because it was the language of the Church, and of political and scholarly intercourse of former centuries, and that for this reason the perfect mastery of Latin, the acquisition of a Ciceroian style, was the primary aim of Jesuit education. It is true that in former ages, when Latin was the one great international tongue of the West, the study of this language had an eminently practical purpose, and both Protestant and Catholic schools aimed at imparting a mastery of it. But this was by no means the only object even in those days. As a distinguished French Jesuit educator expressed it in 1669: "Besides literary accomplishments gained from the study of the Classical languages, there are other advantages, especially an exquisite power and facility in writing," that is, in modern terms, mental training. The same is evident from the fact that Greek was always taught, certainly not for the purpose of conversation and intercourse. As there are many other advantages, besides the formal training to be derived from the study of the Classics, the Ratio needs no apology for the high value it sets on them.

As was said above, the various exercises (the "prelection", memory lessons, compositions, replications, and contents) are the means of training the mind. The typical form of Jesuit education, minutely described in the Ratio, is called prelection; it means "lecturing" in the higher faculties, and its equivalent (Vorlesung) is even now used in German for the lectures in the universities. In the lower grades it means "explanation", but, as it has some special features, it is best to retain the word in an English dress as "prelection". It is applied both to the interpretation of authors and to the explanation of grammar, prosody, precepts of rhetoric, poetry, and style. In regard to the authors, the text was first to be read by the teacher, distinctly, accurately, and intelligently, as the best introduction to the understanding of the text. Then follow the interpretation of the text, formerly a paraphrase of the Latin, but now a vernacular; linguistic explanations of particular sentences; study of poetical or rhetorical precepts contained in the passage; finally, what is called "erudition" (i.e. antiquarian and subject explanation, including historical, archaeological, geographical, biographical, political, ethical, and religious details, according to the contents). From many documents it is evident that a great deal of interesting and useful information was given under this head. But what is more important, the systematic handling of the text, the comprehension of the explanation of every point of view, was an excellent means of training in accuracy and thoroughness.

Still it has been maintained that this method of teaching was too "formal" too "mechanical", and that it was the result of "originality and independence of mind, love of truth for its own sake", were suppressed (Quick). Should this "independence of mind" be taken as unrestrained liberty of thought in religious matters, as outspoken or disguised Rationalism which places itself above the whole deposit of Divine Revelation? Indeed, be it remembered that the Latin and the whole Jesuit teaching are opposed to this kind of "originality and independence of mind". This, however, is a question of philosophy and theology rather than of pedagogical methods. Still, even some Catholic writers have thought that the Jesuit system is unfavourable to the development of great individualities, at least of the best of the order. Cardinal Newman says: "What a great idea, to use Guizot's expression, is the Society of Jesus! What a creation of genius is its organization; but so well adapted is the institution to its object that for that very reason it can afford to crush individualities in individuals that theologians to counteract with one another. "In this intellectual freedom its members justly glory; inasmuch as they have set their affections not on the opinions of the Schools, but on the souls of men" (Ibid., II, 369). The history of the Society is the best refutation of the charge of crushing individualities. The literary and scientific activity of the order has been admired by its bitterest enemies. It has produced not only great theologians (Suarez, Vasques, Molina, de Lugo, and others), but men prominently mentioned in modern literature, in comparative language, as Hervas, Beschi, Ricci, Prémare, Gaubil; in the field of mathematics and natural sciences high distinction has been obtained by Clavius, called the "Euclid of his age", chief protagonist in the controversy on the Calendar, Gregory XIII; Grimaldi, Scheiner, and Secchi are famous as astronomers; Athanasius Kircher was a polyhistor in the best sense of the term; Hardouin, though frequently hypercritical and eccentric, was a most acute critic and in many ways far in advance of his age; Petavius was the father of the historical treatment of dogma and a leader in chronology; and the Bollandists have achieved a work which is truly a monumentum perennius. If the number of great men be taken as a criterion of the merit of an educational system, a long roll can be exhibited of pupils who were among the most prominent men in Europe: poets like Calderon, Tasso, Cornelle, Molière, Goldoni; orators like Bossuet; scholars like Galileo, Descartes, Buffon, Muratori, Montesquieu, Malesherbes; statesmen like Richelieu; church dignitaries like St. Francis de Sales and Benedict XIV, called "the most learned of the Popes". All these men were trained under the Ratio, and, though it would be puerile to claim all their greatness for the system of education which it contains and which the Calendrier Ratio did not crush the originality and individuality of these pupils, whether members of the order or outside it. Nor has the educational system of the Society been sterile in more recent times in this regard; among its pupils it numbers men who have become distinguished in every walk of life.

The history of the practical working of the Ratio is the history of the colleges of the Society. In 1706 the number of collegiate and university institutions was over 750; Latin America alone had 96 colleges before the suppression of the Society. Some of the Jesuit colleges had over 2000 pupils each; while it is impossible to give an absolute average, 300 seems to be the very lowest. This would give the 700 and more colleges a sum total of over 210,000 students, all trained under the same system. Even more Catholics bestowed great praise on the educational efficiency of the Jesuit schools; it was a common complaint among Protestants that many non-Catholic parents sent their sons to Jesuit schools because they considered the "training" and "education" there superior to their own children's education. The suppression of the Society in the second half of the eighteenth century meant the total loss of property, houses, libraries, and observatories. After its restoration it had to struggle into existence under altered and unfavourable conditions. During the nineteenth
century the Jesuits were persecuted almost without cessation in one country or other, and driven out again shortly afterward. These persecutions hampered the educational work of the Society and prevented it from obtaining the brilliant success of former days. Still, the Jesuits possess now a respectable number of colleges, which is continually increasing, particularly in English-speaking countries.

Pachtler, Ratio Studiorum et institutiones scholasticae Societatis Jesu per Germaniam ob Vigintes in Monumenta Germaniae Pædag. sec. X. (1887-94), the standard work containing the text of the various revisions of the Ratio Studiorum and many other valuable documents; Monumenta historiae Societatis Jesu, I: Historia generalis, 12 fascicles; II: Historia generalis, 9 fascicles; III: System of the Jesuits to the Great Educators Series (New York, 1892); Scrinium, De Usu et Præstio, (1892); Viewed in the Light of Modern Educational Problems (St. Louis, 1903); valuable notes on this work by Brown in Educational Review (December, 1904), 523-34; Duns, Die Studienordnung der Gesellschaft Jesu (Freiburg, 1896); Commentaries on the educational practice of the Society by the Jesuits Soeken, Jovanczy, Koppff, Penning, Bonifacius, and Posseney, translated into German and annotated by Stier, Schwickert, Zobell, Scrimo, and Fuhl, in Ritter's Geschichte der Katholischen Pädagogik, X. XI (Freiburg, 1899-1901); Quo Vadis, Educational Reform (New York, 1893); Füschling, Gesch. der Pädagogik, Unterricht auf den deutschen Schulen (2nd ed., Leipzig, 1890); Schmid, Gesch. der Erziehung, III-V (Stuttgart, 1894-1901); Fleischmann, The Catholic Encyclopedia (Handbuch der Pädagogik, v. v. Jesu-uiten-pädagogik.

ROBERT SCHWICKERATH.

RATIBON (REGensburg), Diocese of (RATIBONENSIS), suffragan of Munich-Freising. It embraces the greater portion of the administrative district of Oberpfalz, and portions of the districts of Upper and Lower Bavaria, and Upper Franconia (see GERMANY, map), an area of about 5,540 square miles. It is divided into the three episcopal commissariats of Ratibon, Amberg, and Straubing, and into thirty deaneries. In 1910 it numbered 473 parishes, 167 benefices (exclusive of 74 united with other prebends), 500 parochial churches, 371 curacies, and 36 other pastoral offices, 1,293 clergy (including 442 pastors and 150 regular priests), and over 650,000 Catholics. In addition to the ordinary, there is a concistor bishop (consecrated 18 April, 1111); the cathedral chapter consists of a provost, 8 canons, 6 cathedral vicars, and a cathedral preacher. The dean of the collegiate chapter of Our Lady "Zur Alten Kapelle" in Ratibon, with 11 members, and a chapter in the collegiate Church of St. John the Baptist and John the Evangelist at Ratibon, with 7 members. The diocesan institutions include the college for the training of priests. The University of Ratibon, with four courses in theology and one in philosophy, and the episcopal seminaries for boys at Ratibon, Metten, and Straubing. For philosophical and theological studies there exists at Ratibon a state lyceum, in which 10 religious and a few lay professors lecture.

The monasteries and monastic institutes are: for the Benedictines, the Abbey of Metten with a gymnasion and episcopal seminary for boys (43 fathers, 8 clerics, and 15 lay brothers) and the Priory of Walchensee for the Cistercians. There are 3 monasteries of the Discalced Carmelites, with 22 fathers, 3 clerics, and 21 brothers; 2 monasteries of the Caleced Carmelites, with 13 fathers, and 11 brothers; 5 monasteries of the Franciscans, with 21 fathers, and 45 brothers; 1 Capuchin monastery, with 7 fathers and 7 brothers; 2 hospecies of the Minorites, with 4 fathers and 8 brothers; 2 Augustinian priories, with 7 fathers, and 6 brothers; 3 Redemptorist colleges with 27 fathers, and 28 brothers; 4 monasteries of the Brothers of Mercy, with 5 fathers and 10 brothers; 1 monastery of the Dominicans, with 30 brothers, in 25 hermitages; 3 convents of the Poor Clares; 2 of the Dominican Sisters; 2 of the Cistercian Sisters; 1 of the Ursulines; 1 of the Elisabethines; 1 of the Franciscan Sisters of the Third Order; 1 of the Ladies of the Good Shepherd; 76 establishments of the Poor School Sisters; 3 of the English Ladies; 23 of the Sisters of Mercy in 12 institutions; 1 mother-house and 67 branches of the Sisters of the Third Order of St. Francis of Mallersdorf; 5 establishments of the Franciscan Sisters from the mother-house at Dillingen; 1 institute for the Daughters of the Divine Redeemer from the mother-house at Niederbronn in Alsace; 1 convent of Carmelite Sisters. The total number of sisters is 2400. The religious and social societies are highly developed; it will be sufficient to mention here the Confraternity of Perpetual Adoration, the Congregations of Mary for men, boys, and girls, and other Catholic associations for work, merry-meetings, and apprentices, the students' associations, the Albertus Magnus association, the Volksverein for Catholic Germany, and the Catholic Press Association for Bavaria.

Among the churches of the diocese may be mentioned: the Gothic cathedral of St. Peter, begun in 1275, but not completed until the fourteenth century; the old cathedral, or St. Stephaniskirche (end of tenth century); the Churches of St. Emmeram (eleventh century), and St. Jakob (fifteenth century) near the former Dominican Church of St. Blasius (1273-1400), all at Ratibon; the churches of Amberg, Straubing, Naabburg; numerous old monastery churches, such as those of Woltenburg, Prüfening, Ober-Alteich etc. Much-frequented places of pilgrimage are: Mariahilf, near Aschaffenburg, near Hemau; the Kreuzberg, near Schwandorf; and Neukirchen beim hl. Blut.

Ratibon, the oldest town in Bavaria, had its origin in the Roman camp, Castra Regina, the remains of whose walls exist to-day. Christianity was introduced during the time of the Romans. In the sixth century Ratibon was the chief town of Bavaria, and the seat of the apostolic labours of several holy evangelists, such as St. Rupert (about 097), St. Emmeram (about 710), St. Erhard (about 720), and Blessed Albert (about 720). In 739 St. Boniface divided the Duchy of Bavaria into the four Dioceses of Ratibon, Passau, Freising, and Salzburg, and appointed as first Bishop of Ratibon Blessed Gawibald or Goubild (739-61). The early bishops were chosen alternately from the canons of the Church of St. Peter and the monks of the Benedictine monastery of St. Emmeram, of which monastery they were simultaneously abbots; after the elevation of Salzburg to metropolitan rank by Leo III, Ratibon was placed under the suzerainty of the Church of St. Peter, and, after their removal, through that of the Carlovians and Ottos, the bishops received much property and many gifts for their churches. The possessions of the chapter consisted of the three free imperial domains Donauaust, Worth (both on the Danube), and Hohenfurth on the River Lautrach, the domain of Pechlarn below the Enns, and the administration of a few places in Lower Bavaria. During the early period the chief care of the bishops was the conversion of the Slavs, Bohemia being for the most part also annexed for Christian use. In 817-48, 14 Bohemian princes at Ratibon in 847, and Bohemia long belonged to the diocese. Under Ambricho (864-91) Louis the German built the celebrated "Alte Kapelle" in which his spouse Emma and the last Carolingian emperors Arnulf and Louis the Child found their resting-places. During the reign of Blessed Tuto (894-931) the see suffered much from the inroads of the Hungarians; Bishop Michael (942-72) took personal part in the wars against these invaders, especially in the battle of Lechfeld (950). St. Wittig, the last bishop of Ratibon, continued to the separation of Bohemia from the Diocese of Ratibon, and also separated the property of the cathedral from the Monastery of St. Emmeram.

The era of the following bishops is characterized by
the foundation of numerous monasteries. Gebhard I (968–1035) founded the Abbey of Pruli; his attempt to convert the Protestants, however, met with little success. Gebhard II (1036–60) received the Abbey of Kempten; during his episcopate the collegiate chapter of Oetting and the convent of Geisenfeld were founded (1046–49) to serve as a bulwark against the spread of Protestantism. Gebhard III (1106–93) espoused the cause of the emperor in the conflict between the Catholic and Protestant churches, while Blessed William, provost of St. Emmeram and later abbot of the renowned monastery of Hirsau, the 'hero of monasticism and champion of reform,' was one of the closest friends of Albert. Under Otto IV (1152–80), who received neither papal ratification nor consecration, the Benedictine abbey of Osterleitz was founded; under Hartwich I (1105–26) were founded the See of Ratisbon, and the Benedictine monasteries of Mallerod, Preising, Reichenbach, and Ensdorf; under the zealous Konrad I (1126–32), the Cistercian abbey of Waldsassen, the Benedictine monastery of Buborg; under Heinrich II (1132–53), the Premonstratensian monastery of Windberg and several chapters of Augustinian Canons. Under Henry III (1156–80), excommunicated by Alexander III's crusade; Konrad IV again confirmed the dominion of the bishops over the city of Ratisbon, which in the following period gradually acquired independence and developed into a free town of the empire. In 1211, Konrad gave the Franciscan Order a residence and chapel in the city. Under Siegfried the Carmelites and Dominicans also established themselves in the diocese. Prominent among the Franciscans was Blessed Bernhard of Ratisbon, one of the greatest preachers of the Middle Ages. The Dominicans gave to the diocese a new bishop, Albertus Magnus, on whose voluntary retirement Leo Thundorfer (1262–77), who began the building of the noble cathedral, was elected. The building was continued vigorously under Heinrich II of Rotenbeck (1277–96), who led a truly holy life and proved himself an excellent spiritual and secular prince. Konrad of Luppur (1296–1313), Nikolaus of Stachowitz (1313–40), and Konrad VI (1340–81) were also distinguished bishops. Albert of Stauf (1409–21) was a reformer among the popes of Pisa, devoted himself to the reform of the monasteries and the clergy; in 1419, at a diocesan synod, he issued an excellent pastoral instruction for his diocese. Albert and his immediate successors—Johann of Streitberg (1421–29) and Konrad VII of Brandenburg (1429–45), a Westphalian, who had taken the field against the Hussites, who had made several devastating inroads into the territory of the diocese. Heinrich IV of Abeberg (1465–92), an admirable bishop, took energetic measures against the Hussites and other fanatics, against the superstitions of the people, and the incontinency of the clergy; to the restoration of discipline and order in the monasteries, especially in several convents, he devoted a restless activity. In the same spirit worked Rupprecht II, Count Palatine of Sponheim (1492–1503). Few dioceses had to suffer more in consequence of the war between the Wittelsbachs concerning the succession in Bavaria-Landschat.

The religious innovations of Luther were on the whole successfully opposed by Johann III of the Wittelsbach family, the administrator of the diocese (1507–32); in 1524 he took part in the assembly of the South-German bishops and princes at Ratisbon, which, under the presidency of the papal legate Campeggio, decreed the execution of the Edict of Worms and the maintenance of the old religion. Under his successor Johann II (1538–48), however, the new doctrines were allowed to spread, and this prelate was unable to prevent the town from accepting the Reformation and demolishing the cathedral. The negotiations at the Diet of Ratisbon in 1541 resulted in the Ratisbon Interim, which went very far towards meeting the wishes of the Catholics, notably the introduction of the Protestant princes. The efforts of the zealous Georg Marschalk of Pappenheim (1548–83) and David Kölderer of Burgstall (1567–79) met with especially obstinate resistance from the city. Under Philipp von Wartenburg (1579–88), son of Duke William V of Bavaria, and afterwards cardinal, the Jesuits were assigned a college at Ratisbon, with which a gymnasium was combined in 1589. Wolfgang II von Hausen (1600–13) was a zealous patron of the Jesuits and promoter of Catholic reform, and joined the Catholic League in 1603. Albert Under Graf von Hohenems, Count Palatine Wolfgang Wilhelm became a Catholic in 1614, brought back under his spiritual jurisdiction a portion of the Protestant parishes, especially in the Upper Palatinate; even the town of Eger with its territory was recovered in 1627 for the Catholic faith.

The Thirty Years' War caused great injury to the diocese; Duke Bernhard of Weimar, a partisan of the Swedes, captured the town of Ratisbon and a portion of the diocesan territory in 1633, looted the church treasures, and carried away the valuable large collections and held the bishop in confinement for fourteen months. Frans Wilhelm von Wartenburg (1649–81), who was also Bishop of Osnabrück, Minden, and Verden, sought to supply the growing need of priests by founding in the territory large charities and founded the Steinbom (1658–85) began the series of bishops from the House of Wittelsbach, which for nearly a century occupied the episcopal see. Albert was simultaneously Bishop of Freising, as was Joseph Klemens (1685–1716), who, as Elector of Cologne (from 1688), espoused the cause of Louis XIV in the War of the Spanish Succession, and was for this reason, like his brother elector Max Emmanuel, placed under the imperial ban. Cardinal Johann Theodor (1719–83) occupied, in addition to Ratisbon, the Dioceses of Freising and Liège, and other benefices. Excellent administrators were the last prince-bishops, Anton Ignaz von Fugger (1769–87), Max Prokop von Törring (1757–89), and Joseph Konrad von Schroffenberg (1790–1803). On the secularization of the German Church in 1802, a portion of the diocese was left undisturbed for a time; then Napoleon named, even during the lifetime of Schroffenberg, as Archbishop of Ratisbon and Prince-Primate of Germany, Karl Theodor von Dalberg, Elector of Mainz, and assigned him a portion of the former ecclesiastical territory. Napoleon was only in 1805 that the Dalbergs were again restored to the ancient diocese, which consented to the exercise of archiepiscopal power (1805–17). Although Dalberg, in his desire to save his precarious sovereignty, accepted Cardinal Fesch, Napoleon's uncle, as coadjutor, he was compelled to surrender the secular territory of the Diocese of Ratisbon to Bavaria in 1810, whereupon its secularization was finally accomplished. With Dalberg's death the short-lived Archdiocese of Ratisbon came to an end.

The Bavarian Concordat of 1817–18 declared Ratisbon a simple suffragan see in the newly-created ecclesiastical province of Munich-Freising, and assigned to it its present limits. The first bishop of the new diocese was the former coadjutor, Johann Nepomuk von Wolf (1821–28). He was succeeded by the celebrated Michael Salter (1829–35). Georg Michael Wittmann, who was named successor to the latter, died before his consecration (1833). Frans Xavier von Schwab (1833–41), under whom Diepenbrock (later cardinal) worked at Ratisbon, restored the cathedral. Von Simmern (1842–67) founded the boys' seminary at Metten and the priests' hermitage, and prepared the way for the reform of church music. Ratisbon now possesses the world-renowned school for the special study of Church music, founded by
Haberl, Ignatius von Senesézy (1858–1906) completed, with the help of King Louis I, the towers of the cathedral, founded the boys’ seminaries at Ratibon and Laufen, and reformed the liturgy in accordance with the Roman model, and greatly promoted the religious life of the diocese by frequent tours of visitation, the establishment of new pastoral offices, the holding of popular missions, and the building of churches and monasteries. At the Vatican Council he belonged to the Congregation on Faith, and was one of the most resolute champions of the dogma of the infallibility of the pope. In the ecclesiastico-political war in Bavaria, especially since the appearance of the Old Catholic movement and its encouragement by Munich bishops, Senesézy always fearlessly and unyieldingly contended for the rights of the Church. The pallium was conferred on him as a mark of distinction by the pope in 1906. He was succeeded in 1906 by Antonius von Henle, who had occupied the See of Passau from 1901 to 1906.

JESSE LINS.

Ratisbonne, Maria Alphonsine, a converted Jew b. at Strausburg on 1 May, 1814; d. at Ain Karim near Jerusalem, on 6 May, 1884. He belonged to a wealthy and prominent Jewish family in Alsace. After studying law at Paris he became a member of his uncle’s famous banking firm, and in 1841 was betrothed to the daughter of his oldest brother. As she was only sixteen years old, the marriage was postponed, and Ratisbonne entered upon a pleasure trip to the Orient. Though nominally a Jew, he was a radical infidel, a scoffer at religion, and, after the conversion of his brother Theodor, a rabid enemy of every effort his intended tourist trip to the Orient, he came to Rome, where on 20 January, 1842, he was miraculously converted to Catholicism in the Church of S. Andrea delle Fratte by an apparition of the Blessed Virgin. After his conversion he assisted his brother, Theodor, in founding the Sisterhood of Our Lady of Sion in 1843, was ordained priest in 1847, and entered the Society of Jesus. Desirous, however, to devote himself entirely to the conversion of the Jews, he left the society with the consent of Pius IX, transplanted the Sisters of Sion to Jerusalem in 1855, and built for them in 1856 the large Convent of Ecco Homo with a school and an orphanage for girls. In 1860 he erected the Convent of St. John on the mountain at Ain Karim, together with a church and another orphanage for girls. Here Alphonse laboured with a few companions (Pères de Sion) for the conversion of Jews and Mohammedans until his death. For boys he erected the orphanage of St. Peter, near the Gate of Jaffa outside of Jerusalem, with a school for mechanical arts in the city.

Michael Ott.

Ratisbonne, Maria Theodor, a distinguished preacher and writer, and director of the Archiconfraternity of Christian Mothers, b. of Jewish parentage at Strausburg, 26 Dec., 1822; d. in Paris, 10 Jan., 1884. He raised in luxury, was educated at the Royal College of his native city, and, at the age of manhood, was considered a leader among his people, who unanimously elected him to replace Samson Liber- man when the latter was converted in 1824. The conversion of his three friends, Emile Dreyfus, Alfred Mayer, and Samson Liber- man, caused him to study the Bible and the history of the Church. For two years the work of grace went on within him, and finally he was baptized in 1826. He entered the seminary, and received Holy orders in 1830. He worked in his native diocese until 1840, when he became subdirector of the Confraternity of Notre Dame des Victoires at Paris. It was whilst in this city, in 1842, that his brother Alphonse, a free-thinker animated with the greatest hatred against Christianity, was miraculously converted at Rome, and suggested to him to secure a home for the education of Jewish children. Providence seemed to design him for the work, and answered his prayer for light by sending him the two daughters of a Jewish lady whom he subsequently converted. During the same summer he went to Rome; Gregory XVI decorated him a Knight of St. Sylvester, complimented him for his “Life of St. Bernard”, and granted his request to labour for the conversion of the Jews. Houses were opened under the patronage of “Our Lady of Sion” for the Christian education of Jewish boys and girls. Pius IX gave Ratisbonne many marks of his affection, and Leo XIII appointed him prothonotary Apostolic. At his death he received the last Sacraments from the Archbishop of Paris, and the final blessing from Leo XIII. His chief works are: “Essai sur l’Education Morale” (1828); “Histoire de Saint-Bernard” (1841); “Méditations de Saint-Bernard sur le Présent et Futur” (1853); “Le Manuel de la Mère Chrétienne” (1860); “Questions Juives” (1869); “Nouveau Manuel des Mères Chrétiennes” (1870); “Le Pape” (1870); “Mystères Évangéliques” (1872); “Réponse aux Questions d’un Israélite de notre Temps” (1878).

Martin A. Hehir.

Ratramnus (RATRAMNUS), a Benedictine monk at the Abbey of Corbie, in the present Department of Somme; one of the most important ecclesiastical authors of the ninth century, d. after 868. Scarcely anything is known of his life. His best known work is a treatise on the Holy Eucharist, entitled “De corpore et sanguine Domini”. It was written at the instance of the Emperor Charles the Bald, against a work of the same title by Paschasius Radbertus (q. v.). The basis of Ratramnus’s work is an attempt to solve the two questions: 1. Do we in the Holy
Eucharist directly see the Body of Christ with our bodily eyes, or is the Body of Christ hidden from our sensory vision? 2. Is the Eucharistic Christ identical with the historic Christ? In the solution of the first question, Ratschinger distinguishes truly between the invisible substance, "invisibilis substantia," which he says, is truly the body and blood of Christ, "vere corpus et sanguis Christi" (lix), and the external appearances which after the consecration by the priest remain the same as they were before (i.e., the figures of bread and wine) but which, according to Ratschinger, were not really present (lxv). This position is tempered slightly in his later works, as he begins to admit the possibility of the appearances as well. In the end, however, he remains convinced that the Eucharistic Christ is not in everything identical with the historic Christ "who was born of Mary, suffered, died, was buried, ascended into heaven and sitteth at the right hand of the Father" (cap. lxxix). The work had almost been forgotten during the Middle Ages. Attention was again called to it by Blessed John Fisher, Bishop of Rochester, who cited it in defence of the Catholic doctrine on the Eucharist in the preface to his work: "De veritate corporis et sanguinis Christi in Eucharistia, adversus Joh. Geolampadum" (Cologne, 1527). It was first printed with the wrong title: "Bertrami presbyteri ad Carolum Magnus Imperatorem" (Cologne, 1532). A wrong interpretation of the words "figura" and "veritas," and a few ambiguous passages, gave rise to the later name. Many Catholics and most Protestants that Ratschinger taught a merely symbolical presence of Christ in the Eucharist. Various German, French, and English translations made by the Sacramentarians only served to corroborate this opinion. For this reason it was placed on the Index of Prohibited Books in 1559, but was removed in 1900. His best work, from a literary as well as a dogmatic standpoint, is "Contra Graecorum opposita Romanam ecclesiam infamantium, libri quattuor". It was written in 898 at the request of the bishops of the province of Reims, and formed a refutation of Photius who, in a letter to the King of Bulgaria, had fiercely assailed the "Filioque", the papal primacy, and various customs of the Latin Church. His earliest work, "De eo quod Christus ex virgine natus est libere", defends the Catholic doctrine that the birth of Christ occurred in a natural manner. In his work: "De predestinatione, libri duo", he upholds the double predestination for salvation and damnation but not for sin. A treatise in defence of the expression "trina Deitas", against Hinemar, has been lost. It is only a fragment that remains, and is unprinted. His works are in "P. L.", CXXI, 1-346 and 1153-6, his extant letters in "Mon. Germ. Epist.", VI, 149 sqq.

Michael Ott.

Ratschinger, Georg, political economist and social reformer, b. at Rickering, near Deggenhofen, in lower Bavaria, 3 April 1844; d. at Munich, 3 December 1899. Ratschinger was a pupil at the gymnasia at Passau during the years 1855-63, studied theology at Munich, 1863-67, and was ordained priest in 1867. In 1868 he received the degree of Doctor of Theology at Munich. During the following years, he directed himself partly to pastoral, and partly to journalistic work. In 1869 he was chaplain at Berchtesgaden; 1870-71, he was editor of the journal "Freikirchlicher Volksblatt" at Würzburg; 1872-74, chaplain at Landshut; 1875-77, editor of the "Volksfreund" at Munich. During the years 1875-77 he was a member of the Bavarian Diet; 1877-78 he was a member of the Imperial Reichstag; during this period he belonged to the Centre Party. With exception of a pastorate of three years at Günzach, 1885-88, Ratschinger lived for a several years at Munich, where he devoted himself to journalism and research. From 1893 Ratschinger was once more a member of the Bavarian Diet, where he was now a moderate adherent of the "Bauernbund" (Peasant Union) party, his views of social politics having changed him in the meantime from a pastorate to the Centre Party. In 1898 he was again elected a member of the Reichstag. As a literary man Ratschinger deserves much credit for his scholarly work in political economy and in historical subjects. His chief work, however, distinguished by erudition, richness of thought, and animated exposition, is: "Ge- schichte der Armenpflege". (prize essay, Freiburg, 1866, 2nd revised ed., 1884); "Die Volkswirtschaft in ihrer sittlichen Grundlagen. Ethischesche Studi- en über Cultur juridicums" (Freiburg, 1881; 2nd completely revised ed., 1895); this work maintains the ethical principles of Christianity as the only sure basis for political economy and opposes the materialistic system of what is called the "classical political economy" of Adam Smith. "Forschungen über bayerische Geschichte" (2nd ed., 1887; 3rd ed., 1896) contains a large number of studies on early Bavarian history and on the history of civilization, based on a series of unconnected treatises which had first appeared in the "Historisch-politische Blätter". Of these smaller works, some should be mentioned: "Das Concil und die deutsche Wissenschaft" (anonimously issued at Mainz, 1872) appeared first in the "Katholik", 1872, 1; "Die Erhaltung des Bauernstandes" (Freiburg, 1883).

Rauscher, Joseph Othmar, Prince-Archbishop of Vienna, b. at Vienna, 6 Oct., 1797; d. there 24 Nov., 1875. He received his earlier education at the gymnasium in Vienna, devoting himself chiefly to studies in languages; he also gave much time to the study of poetry, and many examples of his verses have survived. Later his desire to enter Holy Orders was opposed by his parents, but he finally overcame their objections. After his appointment as curate in Hüttseldorf, and later professor of church history and canon law at Salzburg, where Friedrich Prince Schwarzenberg, director of the Oriental Academy at Vienna, was among his pupils. In January, 1849, Cardinal Schwarzenberg named his former teacher Prince-Bishop of Seckau, "in recognition of his distinguished qualities, knowledge, and services". In this capacity Rauscher performed great services in a short time, introduced pastoral conferences, and restored to the Redemptorists their mission houses. He also fostered religious associations, and put an end to the intrigues of the Rungearner, although important business detained him for the most part in Vienna. Scarcely was he consecrated than he hurried to the capital to attend the great epochal assembly which inaugurated the ecclesiastical revival in Austria; between 29 April and 20 June, 1849, twenty-five bishops and four episcopal proxies held sixty sessions. The last in order of consecration, Rauscher took the most prominent part in the transactions. He laid before the assembly a promemoria, which, as usual, was accepted as the decrees of the assembly; five of the seven memorials addressed to the Ministry of the Interior. He also drew up the decrees to serve for the bishops "as the common rule of their aim and activity." The beautiful pastoral of the bishops to the clergy was also written by Rauscher. Before the bishops separated, they chose a committee
of five members for the settlement of the memorials and the arrangement of all current affairs. As the representative of this committee, he acted at times as its sole agec.

Rauscher was the father of the Austrian Concordat. On 14 Sept., 1852, a cabinet order appeared, naming him imperial plenipotentiary for the conclusion of a concordat. The negotiations were long and troublesome; during the whole Rauscher remained Perner, Archbishop of Vienna, and made his solemn entry into the Cathedral of St. Stephen on 15 Aug., 1853. To promote the Concordat he found it necessary to visit Rome, where he was engaged in the most difficult negotiations. He had several times to take part in the solemnities in connexion with the Definitive of the Immaculate Conception. Finally, on 18 Aug., 1855, the Concordat was signed and on 5 Nov. it was published as a law "applicable throughout the empire". For the homogeneous introduction of the Concordat sixty-six bishops assembled in Vienna in 1856. Rauscher was raised to the cardinalate in 1855. By 1 Jan., 1857, ecclesiastical courts, for which Rauscher composed the celebrated instructions ("Instructio pro indicis ecclesiasticis"), were established in all the dioceses. The synods prescribed the special application of the Concordat to the individual dioceses. The decrees of the Viennese Council of 1858, skillfully directed by Rauscher and ratified by Rome, still serve as an example of the Church's ecclesiastical activity. The sciences, both religious and general, as well as the religious orders and associations and art, flourished during the concordat era. Rauscher's magnanimity is revealed by his foundation of the Austrian house for pilgrims at Jerusalem, thus giving the citizens of the Hapsburg Empire a home in the Holy Land.

Up to this period Rauscher's zeal had been constructive; after the unfortunate Austrian wars of 1859-66, he found himself compelled to adopt the defensive, since the blame for the defeats was most unjustifiably referred to the Concordat. The archbishops and prince-bishops are members of the House of Peers; thus, when the war on the Concordat opened in the Reichstag in 1861 and its revision was demanded, Rauscher with the other episcopal members of the Upper House deliberated concerning an address to the emperor. When the House of Delegates demanded the removal of the religious orders from the penitentiaries, hospitals, and other state institutions, the Rev. Dr. Bouchet, of the House of Peers, on 13 June, 1863, "in the effort of artificial agitation has been spared to open a campaign against defenceless women, who ask of this earthly life only necessities, and serve their fellow-creatures in privations and discomforts. This unworthy agitation bears the stamp of hatred towards Christianity, but it has likewise in it something cowardly and ignoble, of which even one estranged from Christianity should be ashamed." In consequence of the events of 1866, the storm against the Concordat and the Church broke out violently, and the Emperor had to listen to the demands of the new laws concerning marriage, the schools, and the interconfessional relations, in respect to which points there were many gaps in the Concordat, came up for discussion in the House of Peers, Rauscher immediately called and directed the debates on the Concordat, urging harmony between the spiritual and secular powers. When the decrees had been sanctioned, and the new laws had been vigorously condemned by the pope, there arose great dissatisfaction and turmoil. To demonstrate the illogical position of the agitation, Rauscher demanded, "Is it not permissible for a pope to pronounce a law unjust? Every newspaper arrogates to itself the right of stigmatizing the injustice of all laws, which do not agree with its partisan views". A little later the pastoral of Bishop Rudiger of Linz was seised, and the bishop himself subsequently condemned the fourteen days' imprisonment by which the pastoral was to be suppressed. However, Rauscher immediately obtained from the emperor the annulment of the sentence and of the consequences which it entailed with respect to civil rights and relations.

Still greatly excited, the Austrian bishops proceeded to the Vatican Council. Rauscher was among those few, who was able to take part in the solemnities in connexion with the Definitive of the Immaculate Conception. Finally, on 18 Aug., 1855, the Concordat was signed and on 5 Nov. it was published as a law "applicable throughout the empire". For the homogeneous introduction of the Concordat sixty-six bishops assembled in Vienna in 1856. Rauscher was raised to the cardinalate in 1855. By 1 Jan., 1857, ecclesiastical courts, for which Rauscher composed the celebrated instructions ("Instructio pro indicis ecclesiasticis"), were established in all the dioceses. The synods prescribed the special application of the Concordat to the individual dioceses. The decrees of the Viennese Council of 1858, skillfully directed by Rauscher and ratified by Rome, still serve as an example of the Church's ecclesiastical activity. The sciences, both religious and general, as well as the religious orders and associations and art, flourished during the concordat era. Rauscher's magnanimity is revealed by his foundation of the Austrian house for pilgrims at Jerusalem, thus giving the citizens of the Hapsburg Empire a home in the Holy Land.

Up to this period Rauscher's zeal had been constructive; after the unfortunate Austrian wars of 1859-66, he found himself compelled to adopt the defensive, since the blame for the defeats was most unjustifiably referred to the Concordat. The archbishops and prince-bishops are members of the House of Peers; thus, when the war on the Concordat opened in the Reichstag in 1861 and its revision was demanded, Rauscher with the other episcopal members of the Upper House deliberated concerning an address to the emperor. When the House of Delegates demanded the removal of the religious orders from the penitentiaries, hospitals, and other state institutions, the Rev. Dr. Bouchet, of the House of Peers, on 13 June, 1863, "in the effort of artificial agitation has been spared to open a campaign against defenceless women, who ask of this earthly life only necessities, and serve their fellow-creatures in privations and discomforts. This unworthy agitation bears the stamp of hatred towards Christianity, but it has likewise in it something cowardly and ignoble, of which even one estranged from Christianity should be ashamed." In consequence of the events of 1866, the storm against the Concordat and the Church broke out violently, and the Emperor had to listen to the demands of the new laws concerning marriage, the schools, and the interconfessional relations, in respect to which points there were many gaps in the Concordat, came up for discussion in the House of Peers, Rauscher immediately called and directed the debates on the Concordat, urging harmony between the spiritual and secular powers. When the decrees had been sanctioned, and the new laws had been vigorously condemned by the pope, there arose great dissatisfaction and turmoil. To demonstrate the illogical position of the agitation, Rauscher demanded, "Is it not permissible for a pope to pronounce a law unjust? Every newspaper arrogates to itself the right of stigmatizing the injustice of all laws, which do not agree with its partisan views". A little later
RAVALLI

1875, III (1889); WOLFGURGEBER, Cardinal Bauscher. *Mit dem Porträt Bauschers und einem Facsimile seiner Handschrift* (Freiburg, 1886).

COLESTIN WOLFGURGEBER.

RAVALLI, Antonio, missionary, b. in Italy, 1811; d. at St. Mary’s, Montana, U. S. A. 2 Oct., 1864. He entered the Society of Jesus about 1833. With Fathers Vercuryszere, Accoliti, and Nobili, Brother Huybrechts, and six sisters of the Congregation of Notre Dame de Namur, he responded to Father de Smet’s appeal for the American mission in 1843, arriving at Fort Vancouver 5 Aug., 1844, after a voyage of eight months. Having made a short stay at the Mission of St. Paul on the Willamet (Champoeg, Oregon), where he made a study of the English language, and gave attention to the sick (being skilled in medicine in addition to his many other accomplishments), he joined Father Adrian Hoecken in the spring of 1845 at the mission of St. Ignatius, among the Kalispel (Pend d’Oreille), on the upper Columbia, Washington. After some time he was transferred to the Flathead Mission of St. Mary’s on Bitter Root River, western Montana, where he remained until the mission was temporarily abandoned on account of the hostile Blackfeet in 1850, when, in 1844, he assumed charge of the Sacred Heart Mission established by Father Nicholas Point among the Cœur d’Alénes (Skitsawish) of Northern Idaho. Here he supervised the building of a handsome church which, with its altar and beautiful statues, carved by himself, has been described by a traveller as “a credit to any civilised country.” Governor Stevens, who saw it in 1855, says in his official report: “The church was designed and superintended by the superior of the mission, Father Ravalli, a man of skill as an architect and, undoubtedly, judging from his well-thumbed books, of various accomplishments.”

In the general outbreak led by the Yakima in 1856-67 his influence was largely instrumental in holding the northern tribes quiet.

In 1866 Father Congiato, superior of the Rocky Mountain missions, established the old Mission of St. Mary’s on the Bitter Root, among the Flatheads, and among those appointed at the station was Father Ravalli, who had been with it at its abandonment sixteen years before. Here he remained until his death.

His finest eulogy comes from a Protestant historian: “Fifty years a Jesuit and forty years a missionary, one of the last that worked in the ranks of the Church in Montana, his fame stands very high in Montana, where a later generation knows more of him than even of Father de Smet” (Chittenden). (See also FLATHEAD INDIANS; KALISPEL INDIANS; MONTANA, CATHOLIC MISSIONS OF THE UNITED STATES.)

JAMES MOONEY.

RAVENNA. ARCHDIOCESE OF (RAVENNATENIS).—The city is the capital of a province in Romagna, central Italy, on the left of the Rivers Montone and Ronco, the source of which is a vast alluvial plain, not far from the mouths of the Po. The Corsoi Canal, constructed by Clement XII in 1736, connects the city and the wet dock with Porto Corsini, on the Adriatic Sea, which is now five miles away. Ravenna is situated on a vast alluvial plain, partly marshy. A pine grove that extends at a distance of two miles from the city, and extends as far as Cervia, was already famous in antiquity, when it extended to the north as far as Aquileia. This grove was greatly damaged by the winter of 1879-80, and also by fire in 1905. The vast extent of the country is cultivated by an intensive system; and the silk industry also flourishes there.

In ancient times, and in the early Middle Ages, Ravenna was on the coast, the sea forming at this place a lagoon that is shown on the maps of the sixteenth century; the city itself was traversed in all directions and surrounded by natural streams and official canals; the most important was the canal from the city of Augusta; so that Ravenna resembled Venice. Until the time of the first emperors, the houses were all built of wood, or on pile foundations. Its geographical position and the prehistoric objects that have been found at the city show Ravenna to be of ancient origin. It increased very much when the Umbrians in the S. C. Etruscans took refuge there at the invasion of the Gauls, against whom it allied itself with Rome, at a date that cannot be established with precision, retaining its own city regulations. After the Social War, it obtained Roman citizenship (88 B. C.); and having aided with Marius, Sulla deprived it of its autonomy, and annexed it to the province of Cisalpine Gaul. Before crossing the Rubicon, Caesar stopped there, concealing his designs under the apparent concern that he entertained for the creation of a school of gladiators. Augustus recognized the military importance of the city, protected, as it was, on the land side by water, and he made it the second station of the imperial fleet, the first being Misenum, near Pozzuoli.

Around the station of the fleet (cassa) there soon sprang up a city which too was protected and which consisted of the dockyards and of the houses of employees connected with that place. Cassius was surrounded by walls of its own; and thereafter, the Via Cassarea, which connected it with Ravenna, became flanked with houses on either side, giving rise to the birth of Cassarea. Tiberius built a common wall around Ravenna and Cassius. The chief public buildings were outside the Porta Aurea, among them the amphitheatre, the temple of Apollo, a circus, baths, and a manufactory of arms. Scarcely any of the buildings of that age are preserved; and the aqueduct of Trajan is completely covered by alluvial deposits; the Porta Aurea was torn down in the sixteenth century; and all that remains of the buildings of Cassius are the columns of a few temples, scattered about in different churches of the city, while some of them were transported to Venice; some sculptures are preserved in the museum (Augustus and his family), or serve to adorn a few churches (San Giovanni in Fonte, San Vitale); there is a mosaic pavement which is also of that period. Funereal monuments of naval constructors; the most interesting one of them, in the collection of the Museum, is that of the Longidiana family. Thunenla, widow of Armiussi, and Marbod, King of the Marcomanni, were confined at Ravenna. In 404 this city became the imperial residence, Honorius preferring it to Milan, and being more exposed to the incursions of the barbarians and of Alaric, who was serving in the pay of the empire. At this time Ravenna was adorned with its most famous monuments, secular and sacred, the latter of which have been in great measure preserved. Already about 380 Bishop Ursus had dedicated a splendid basilica to the Resurrection of Our Lord (called Anastasis in the Byzantine period); on its site the present cathedral stands, entirely remodelled in the eighteenth century, the only remains of the ancient basilica being a few sculptures and mosaics, and two sarcophagi, one of which is said to be that of St. Bartianus; there remain only a few fragments of the ambo of the bishop Angelius (sixteenth century).

No vestige remains of the palace of Honorius, of A. Laurensium, and of Scilla Placidia (445 B.C.). Of the churches that were erected under Honorius, there remains Santa Agata, a basilica of three naves, which in 1893 was restored to its ancient form; it possesses a notable ambo, and ancient columns. San Pietro in Clusium was so much enlarged in the eleventh century as to make room for fortifications. Under Galla Placidia there was built the Church of San Giovanni Evangel-
ista, which in the transformations that it underwent in the fourteenth century and in 1747 lost all the mosaics with which it was adorned, preserving only its remains, enshrined perhaps to the date of 1316. Of the Church of Santa Croce only one half remains. In the Church of San Giovanni Battista only the columns are ancient. Most important is the chapel of the archbishop-palace of San Pietro Cisolo, square in shape, and possessing mosaics, of which the beardless Christ in the centre is notable. The mausoleum of Galla Placidia, which is the Church dei Santi Nario e Celso (440), contains the best mosaics of Ravenna. It is built in the shape of a Latin cross, and has a cupola that is entirely in mosaics, representing the twelve apostles in a blue field and the five other apostles are represented on the vaults of the transverse arm; over the door is a representation of Christ as the Good Shepherd, with flowing hair, and surrounded by sheep; opposite, there is a subject that is interpreted as representing St. Lawrence. There are three sarcophagi, but it is not known whose they were; the largest is said to have been that of Galla Placidia, and that her body was deposited there in a sitting position, clothed with the imperial mantle; in 1477, however, the contents of the sarcophagus were accidentally burned.

Of the same period is San Giovanni in Fonte, which was the baptistery of the Catholics, dedicated by Archbishop Neon (449-52). It is believed that this church was built over a well of the same name. It is of octagonal shape, with the interior walls and vault adorned with mosaics. In the centre of the apse is the baptism of Christ, on a golden field, with a personification of the River Jordan; around are grouped the twelve apostles on a blue field, and below are other figures, possibly of the prophets; there are also arabesques, etc. The marbles of the floor seem to have been taken from secular buildings. The art of this period has the merit of ancient art applied to Christian subjects, although its technique already begins to show decadence; for the rest it is still Roman, showing no traces of Oriental influence.

The same is true of the artistic period inaugurated by Theodoric, King of the Goths. After the battle of Verona, Odacer withdrew to Ravenna, where he withstood a siege of three years by Theodoric. The taking of Rimini, however, deprived Ravenna of supplies, and thereby compelled the latter city to capitulate. Archbishop Joannes served as the peace mediator (493). Theodoric employed Roman architects for his monastery. The mosaics are placed by pairs between the single pilasters, above and below, are embellished with exquisitely beautiful capitals. The mosaics of the apse and the lateral walls are better than those of the period of Theodoric, although not equal to those of the period of the empire. In the apse is represented a juvenile Christ, seated upon the orb, and surrounded by two angels, St. Vitalis, and the Archbishop Ecclesiis; below to the right is the Empress Theodora with her suite, and to the left Justinian and his suite, there being in the latter the Archbishop Maximianus, in whose time (546-56) the mosaics were executed.

Other representations are of Abraham extending hospitality to the three angels; the sacrifice of Isaac; the sacrifice of Abel; the Eucharistic Sacrifice (table with bread and wine), and the sacrifice of Melchisedec (these have a dogmatic value); there are also representations of Moses, of the prophets, of the Apostles, and of other saints. Among the ancient sarcophagi, a notable one is that of the Exarch Isaac (641), in the San Orestes Basilica, which must be a work of the fifth century. A remarkable representation of the Magi, and of the resurrection of Lazarus. San Vitale was the model of the palatine chapel of Charles the Great of Aachen. San Apollinare
Classe is a work of the same Julianus. This church, which is a basilica of three naves, divided by two lines of marble columns, has preserved its ancient structure better. The marble incriptions of the walls were removed in 1449 by Sigismondo Malatesta. In the lateral naves there are the sarcophagi of eight archbishops, nearly all of them with metrical inscriptions. The mosaics of the apse have been restored; they represent, around a cross on a blue background, the Transfiguration, the preaching of St. Apollinaris, the sacrifice of Abel; Abraham, Melchisedec, the Emperors Constantine IV, Heraclius, and Tiberius granting privileges to the Archbishop Reparatus (671–77), and four are the portraits of bishops. Pope Leo III was the pope, which happened again in 705 in the case of Pope John VI. When, by order of Leo the Isaurian the Exarch Paulus wished to destroy the sacred images about the year 727, Ravenna revolted, and in the fighting that followed the Exarch himself was killed. Agnellus tells of a battle between the Ravennese and the Greeks at a time that is not well defined.

In 752 Aistulf, King of the Lombards, took Ravenna; then, however, Pope Stephen II (III) obtained the intervention of Pepin, and the exarchate was united to the dominions of the Holy See. Thereafter Ravenna and the exarchate were governed in the name of the pope by the archbishop, assisted by three tribunes who were elected by the people. Soon, however, the archbishops came to consider themselves feudatories of the empire; and in fact in the confirmation of their temporal power by Henry II and Barbarossa no mention is made of the sovereignty of the pope. The archbishops of Ravenna were the most faithful supporters of the rights and policy of the emperors in Italy, while the emperors on different occasions held their courts at Ravenna. In 1198, however, that city—where the communal institutions had been greatly developed—placed itself at the head of the league of the cities of Romagna and of the Marches against the imperial power; and consequently Innocent III was able easily to enforce the rights of the Holy See over Ravenna, which were ratified by Otto IV and Frederick II at periods when those princes needed the good will of the pope. In the war of 1218 the Guelph Pietro Traversari, having vanquished the faction of the Ubertini and Mainardi, declared himself Lord of Ravenna, and was succeeded by his son Paolo in 1226. Paolo fought against Frederick II, who in 1240 took the office of podestà from Paolo’s son, also named Paolo. In 1248, however, the pope took Ravenna, and the Traversari returned to power; but in 1275 they were driven from the city by Guido Novello da Polenta, who was made perpetual captain. His son Lamberto (1297–1316) abolished the demo-

The Good Shepherd
V-Century Mosaic in the Mausoleum of Galla Placidia, Ravenna

restored the church, to which later there was annexed a Camaldolese monastery.

Ravenna is to-day substantially as it was at the beginning of the Byzantine period: subsequent ages have done nothing except to pass by, transforming, not always happily, the work of the fifth and sixth centuries. In 539 the city fell into the hands of Belisarius, who, pretending to accept the crown of Italy offered to him by Vitiges, was allowed to enter the town; but when the Goths attempted to retake it (548–550), it was held against them. At the close of the war, Ravenna became the seat of the Byzantine governor, and accordingly was better able than Rome to preserve its outward splendour. The Lombards attempted several times to take possession of the city; in 597 Paroald, Duke of Spoleto, succeeded in taking Classe, but was driven from it two years later by the German Droctulf; the same occurred to Ariulfo in 592, and in 716 to Paroald II, the latter of whom was compelled to restore Classe by Liutprand, who in turn took possession of it 726. Liutprand succeeded in taking Ravenna itself in 731, not, however, without the assistance of a party in the town that was averse to Byzantine domination. This aversion had already manifested itself in 692, when Constans II wished to take Pope Sergius to Constantinople; the militias of Ravenna and the Pentapolis hastened to the assistance of the pope, which happened again in 705 in the case of Pope John VI. When, by order of Leo the Isaurian the Exarch Paulus wished to destroy the sacred images about the year 727, Ravenna revolted, and in the fighting that followed the Exarch himself was killed. Agnellus tells of a battle between the Ravennese and the Greeks at a time that is not well defined.

In 752 Aistulf, King of the Lombards, took Ravenna; then, however, Pope Stephen II (III) obtained the intervention of Pepin, and the exarchate was united to the dominions of the Holy See. Thereafter Ravenna and the exarchate were governed in the name of the pope by the archbishop, assisted by
cratic government, and having died without children was succeeded by his cousin Ostasio I and Guido Novello, of whom the latter was a lover of letters and of art; he received Cata. he was a man of honour and called to Ravenna Giotto, who painted the vault of San Giovanni Evangelista with frescoes, while other artists who studied under him adorned with frescoes Santa Maria in porta fuori (supposed portraits of Guido da Polenta, Dante, Chiara, and Francesca da Polenta). The thirteenth century. Dante died at Ravenna (1321) and was buried in the vestibule of the Church of San Francesco. His present mausoleum was erected in 1482 by Bernardo Bembo. Ostasio I, who had assassinated his brother Archbishop Rinaldo, soon thereafter drove from Ravenna Guido, who attempted in vain to return. Ostasio received from Louis the Brave and from Pope Benedict XII the title of vicar. Not less cruel than Ostasio was his son Bernardino (1446-59), against whom his own brothers conspired; they died, however, in the same prison of Cervia into which he had been treacherously thrown. A better ruler was Guido Luccio, who in his old age in 1389 was thrown into prison by his sons, where he ended his days. He defended Ravenna during the period of Ostasio IV, who died in 1431. Ostasio V in 1438 was forced into an alliance with Duke Filippo Maria of Milan by that prince, on which account the Venetians invited him to Venice, where he soon learned that the annexation to Venice had been proclaimed at Ravenna. He died in a Franciscan convent, the victim of a mysterious assassination. The Venetians governed Ravenna by provveditori and podestà. In 1509 Julius II attempted to retake all of Romagna that was held by the Venetians, and sent the Duke of Urbino with an expedition. Ravenna was defended by the podestà Marcello and by the captain Zeno; but at the news of the defeat of Agnadello, the republic ordered the restoration of Ravenna to the Holy See.

Three years later, in 1512, there took place near this city the disastrous battle in which the French defeated the allied Pontifical and Spanish troops. In 1527, notwithstanding their alliance with Clement VII, the Venetians occupied Ravenna and the Romagna, which, however, they were compelled to restore in 1529. The popes governed Ravenna throughout this period at the monument of the battle of 1512, erected in 1557; the tombs of Guidaolo Guidiarello, and Tullio Lombardo, in the Museo Nazionale; those of Uffo Numai and Tommaso Flamiente, in the Church of San Francesco (1509), and, above all, the church and the monastery of Santa Maria in Portu (1538), built on the site, and in part with the materials, of the Church of San Lorenzo in Cesarea (fifth century); it has a Byzantine Madonna of the tenth century. Its construction was undertaken when the Regular Canons of Portu were obliged to leave Santa Maria in portu fuori; the church has three naves, and an octagonal cupola; the stalls of the choir are adorned with beautiful carvings, and the loggia of the garden of the annexed monastery is of very pure style. The façade dates from 1754. The city was adorned with princely palaces, received especially the work of the architects Danisi, Grossi, Morigia, and Zumaglini, while Nicolò Rondinelli, at Santo Domingo, Cotignola, Luca Lunghi and his sons, Guido Reni, at the Duomo, and other painters adorned the churches. Many artistic works were also moved to Ravenna. Besides the fortifications already constructed by the Venetians, which were enlarged, there was dug in 1654 the Canale Pantillo (named in honour of Innocent X), by the Cardinal legate Dogni, and, in the city, the Cemetery of the military, which were necessary not only to facilitate maritime commerce but to preserve the city from inundation in consequence of the raising of the beds of the rivers. In 1797 Ravenna became a part of the Cispadian Republic, and later of the Casilpine Republic. The Austrians took it from the French, who in turn drove the former from the city in 1800-01. The town was incorporated into the Kingdom of Italy, after it was attacked again by the Austrians, and finally was restored to the pope. Provisional governments were established in 1801, 1849, and 1859; and in 1860 the annexation of Ravenna to the Kingdom of Italy was declared.

The academy of fine arts has some paintings by well-known masters, mentioned above: San Romualdo, by Guercino; a collection of Byzantine and of Slav Madonnas, and sculptures by Canova and Thorwaldsen. The Museo Nazionale contains collections of Etruscan, Greek, Roman, and Byzantine coins and inscriptions, and also coins and inscriptions of the Middle Ages; fragments of ancient sculptures, and a bust of Innocent X by Bernini. It occupies the monastery of the Camaldolese of Classe, whomoved into the city in 1515. The archiepiscopal palace also has a lapidary hall, ancient vestments, a Lenten calendar for the years 552 to 829, and a chiselled ivory throne of the sixth century, taken to Ravenna in 1001 by Ottone III, who received it from Pietro Orseolo, Doge of Venice.

According to local tradition, St. Peter himself founded the Church of Ravenna, and established as its first bishop St. Apollinaris, a native of Antioch, who according to the same tradition suffered martyrdom under Nero; the acts of his martyrdom, however, are scarcely any historical value; they were probably written under the bishop Mauro (642-61), and intended, together with the alleged Apostolic origin of the See of Ravenna, to abet the autocratic aspirations of that bishop. However, in 1756 there was discovered near Classe a Christian cemetery in which there were found inscriptions that date from the second century; and in 1904 in Classe itself there was unearthed another graveyard, the upper layers of which date from the fifth century. It may be concluded, therefore, that Christianity was taken to Ravenna by sea, not by land. It is certain that St. Apollinaris was the first bishop, and that he suffered martyrdom. According to the list of the bishops of Ravenna, handed down to our times by Agnellus (ninth century), who received it from the bishop Marianus (546-56), of whom there is no reason to doubt, Severus was the twelfth of the series; and as he is among those who signed at the Council of
Sardica (343), the epoch of St. Apollinaris may be established as belonging to the beginning of the third century, or possibly to the last decades of the second century, when the Church, under Commodus, enjoyed a measure of peace that was propitious to the development of hierarchical organization. Ravenna accordingly gave a Christianization to Emilia. The only martyr among its bishops was St. Apollinaris, whose martyrdom occurred, possibly, under Septimius Severus.

Other martyrs were St. Ursicinian, SS. Fuscus and Maura, St. Vitalis (not the St. Vitalis of Rome), etc. Among their bishops, besides the two already named, mention should be made of Joannes Angelopes (430-33), so-called because he had the gift of seeing his guardian angel; he obtained through Gallus Placidus the title and the rights of metropolitan of the fourteen cities of Emilia and Flaminia. The archbishops, as in the past, continued to be confirmed and to be consecrated by the pope: St. Peter Chrysologus (453-49), formerly Deacon of Imola, was so confirmed and consecrated. For the rest, the presence of the imperial court, and later, of that of the exarch, archbishops in Ravenna, of the archbishop's great descent of their dignity and a certain spirit of independence in regard to Rome; while the popes on the other hand were disposed to cede no measure of their rights, as was shown in the case of Simplicius, who threatened Joannes without the right to consecrate his suffragans; in the case of Felix IV, in regard to the questions that arose between Bishop Ecclesius (521-34) and his clergy; and in the case of St. Gregory the Great, who was compelled to repress the excess of pomp of Archbishop Joannes V (578-608) and that of his clergy, and who, on account of those conditions, at the death of Joannes, caused the election of Mariniano (606), who had been a companion of the pope at the monastery of Sant' Andrea.

The better to insure the subordination of the archbishops, the latter were forced to sign at the time of their consecration a declaration to that end (indica et cauteam), in which were written the chief duties and rights of those prelates. In connexion with this declaration, there arose differences of interpretation between Pope Vitalianus and Archbishop Marcellus (648-71), which led to the death of Maurus having sought and obtained the privilege of autonomy from the Emperor Constans II, who was a Monothelitist, and therefore ready to humiliate the pope; even on his deathbed, Maurus exhorted his electors to choose St. Apollinaris, whom he had called to Rome; and accordingly Reparatus (671-77) did not go to Rome for his consecration.

It is uncertain whether Reparatus or Theodorus (677-88), who also was consecrated by his suffragans, re-established the union with Rome. The bishop of Agatho (680) adhered to the Roman Council of Agatho (680); for the rest, he was hated by his clergy for having suppressed many abuses among them. There followed St. Damianus (688-705); St. Felix (705-23), who at first also had aspirations to independence; but then the pope put an end to the movements of Agathus, despatched a fleet to punish Ravenna for its complicity in his dethronement, as he believed, the archbishop was taken to Constantinople, blinded, and sent to Pontus, whence he was recalled by Philippicus Bardanes (712). Of the constancy of Ravenna against Iconoclasm, mention has already been made above. Sergius (748-69) also had differences with the popes. Georgius (835-46) went to France in search of a grant of autonomy, but was imprisoned by the troops of Charles and Louis II, at war at that time with Bavaria (835), and with difficulty was able to return to his country. Matters again became acute under Archbishop Joannes X (850-78), who, moreover, had displeased the clergy and people of his own see and his suffragan bishops by his overbearing acts, consecrating bishops against the pleasure of the people and the clergy, imposing heavy expenses upon his suffragans in the visits that he made every other year, preventing his suffragans from communicating directly with Rome, etc. Accordingly, he was cited to appear at Rome by Nicholas I; but when he having refused to obey the summons, the pope went in person to Ravenna, he became convinced of the general aversion to the archbishop, who, being then deprived of the protection of the emperor, was compelled to appear before the council (861), which reprimanded him. Later, however, he was again created a cardinal in the see of Trier and Cologne. He was the founder of the Benedictine monastery of Isola Palazzola.

Romanus (878-88) also was disaffected to the Holy See; Joannes XII (905) became Pope John X. Peter VI (927-71) was obliged to protect the property of the Church in two synods; Gerbertus (968-98) became Pope Sylvester II; under Leo II (999-1001) the Ravennase grammian Vilgardus was condemned for heresy; Arnoldus (1014-19) was a brother of St. Henry II, who gave to the archbishops temporal dignity in the cities of Ravenna, Bologna, Cesena, and Cervia, without mentioning the sovereignty of the pope; of Archbishop Gebhardus (1027-44), St. Peter Damian says that he maintained himself unsullied in the general corruption of that day; Hundfredus (1046-54) had both the right to consecrate his suffragans; in there arose the question of precedence between the bishops of Milan and Ravenna at the imperial court, which gave room to an altercation between the suites of those prelates at the coronation of Henry III. Hundfreus, like his successor, Enrico (1062-71), was the with the imperial party, and opposed the pope; Enrico was a candidate for the antipope Cadalou. Guidbertus, who was chancellor of Henry IV, caused himself to be elected antipope, in opposition to Gregory VII (1080), by whom he had been excommunicated since 1076. At the beginning of the twelfth century the Blessed Petrus Onesti founded the Congregation of the Regular Canons of Santa Maria in Porto. Anselmus (1155-58), formerly Bishop of Havelberg, is famous for his legations to Constantinople and for polemical works against the Greeks. Guido da Biandrate (1158-69) favoured the schism of Barba-roessa, who was his protector. In the time of Gherardo (1170-90), there arose the question between the monks of Classe and those of San Martino in regard to the body of St. Apollinaris, and the latter, as it was claimed, had been transferred to their church for its safety against the incursions of the Saracens.

Filippo Fontana (1251-70) preached the crusade against Exeter. After his death the see remained vacant for two years, until Gregory X appointed instead Bonifacius Eischi (1274-94). St. Rinaldo Conco-reggi (1303-21) restored Christian life, and held six provincial synods. Rinaldo da Poitiers was killed by his own brother, Ostaio (1322), who then usurped the Lordship of Ravenna. Fortunio Vescovador (1387) made a treaty with the Duke of Perugia and the Manfredi of Perugia, and concluded a peace between Venice and Genoa. Pileo de Prata (1370-87), a man of stern doctrines, was made a cardinal by Urban VI, and sent as legate to Germany and Hungary, which countries he held in obedience to the Holy See. Cosmo Migliorati (1387) became in 1400 Pope Innocent VII, and named as his successor at Ravenna his nephew, Giovanni Migliorati (1400-10), whom he made a cardinal. Roverella (1445-76), later a cardinal, was a man of great learning, and was in various occasions excommunicated to England and elsewhere. Pietro Accolti (1524-32) had been professor of canon law at Pisa, and secretary to Julius II. Benedetto Accolti (1532-49), a famous man of letters and historian, was imprisoned under Paul III for unknown
reasons. An awakening of Christian life, such as had taken place on former occasions in Italy, was affected at this time at Ravenna. The pious priest Gerolamo Maluselli established the congregation of secular priests. Jean Tappe provided these with a lay oratory, and the Blessed Gentile, widow, and Margherita de' Molli, who were their spiritual directors. Cardinal Guilio della Rovere (1565-78) acquired great merit by the ecclesiastical reforms he effected; he held many provincial and diocesan synods, and by a Vigilantia of 16 December 1566, he went to the aid of Cardinal Cristoforo Boncompagni (1578-1603), Pietro Aldobrandini (1604-21), and Luigi Capponi (1621-1645), of whom the latter caused the paintings of the cathedral to be executed. Maffeo Fasetti (1727-41) restored the cathedral. The revolution of 1796 that broke out at Ravenna, Archbishop Antonio Codronchi displayed great firmness and prudence (1785-1826). Cardinal Enrico Orfei (1860-70) was for two years prevented by the new Government from taking possession of his see.

At the present time the suffragans of Ravenna are Bertinoro, Cesena, Forlì, Rimini, and Sassina; Cerre was united to Ravenna in 1909. The ecclesiastical provinces of Bologna (1585), and Ferrara (1736), as well as Modena, until 1106 belonged to Ravenna. Ravenna has 108,061 inhabitants, and 154 secular priests; 3 religious houses for men, with 11 priests, and 10 religious houses for women; 1 educational institution for boys, under the Salesians, and 6 for girls.

Raveyn, Josse, b. about 1506, at Tiel, a small town in Flanders, hence often called Tiletanus (Jodacus). He studied philosophy at the Collège du Lyce, in the University of Louvain, and in 1525 graduated fourth. He was appointed to teach philosophy in the same college, where he continued his course of theology, under the professors, Ruard Tapper and Jean Leonard, named Hasselius. From 1540 to 1553 he was president of the College of Houterie, and associated with the Abbé de Ste-Gertrude as guardian of the privileges of the university. In 1546 he became ordinary professor in the theological faculty and canon of the first rank in the collegiate chapter of St-Pierre. He was then only a licentiate in theology, but received the doctorate on 5 October following. On the recommendation of Charles Quint he was sent to the Council of Trent (1551) and took an active part in the preparatory work of Sessions XIII-XVI. Arrived at Trent in Sept., 1551, with his four colleagues from the University of Louvain, he presented in November a memorandum "super articulis de doctrina, de justicia, de indulgentia et extremis ucionibus." Later he drew up another on the two articles concerning the Mass. Called by Ferdinand I to the Conference of Worms in 1557, he accompanied François Sonnini and Martin Rustuccia, and three others, to the Bishops of the Low Countries: Jean Delphinus, Barthélemy Latomus, and P. Canisius. About 1558 he was made provost of Walcourt, in Namur. In 1561, on the resumption of the work of the general council, he was proposed as a delegate, but failing health forced him to decline the honour. In 1559 he succeeded Ruard Tapper as Director of the nuns in the hospital at Louvain, an office he filled till his death, 1570. Through personal merit Raveyn was selected as rector of the university in 1546 and 1550. He was a pious and learned priest, zealous in teaching purity of doctrine. Through his efforts the teachings of the Emancipator Baius were censured by the Spanish University of Salamanca and Alcalá, by the Faculty of Paris in 1560, and by Pius V in his Bull "Ex omnibus afflictions," 1 Oct., 1567.

Raveyn's works are: "Epistola Ven. Patri Laurentio Villanove centum," against Baianism; "De monstratio religiosus christianae ex verbo Dei"; "Confessionis, sive doctrine, quae nuper edita est a ministris qui in ecclesiis Antverpiensem irresperuent et Augustanae confessiones se assentendi profutur succinita confutatio"; "Apologia Catholica confutatoriam profanae illius et pestilentis confessionis, quam Antverpiensem appellantio ministeriis quidem dignum, contra inaneae cationes Matheae Placæ Illirici"; "De concordia gratiae et liberri arbitrii"; "Epistola" a Michaeli de Bey; "Adlogium, de Rebus decreto concilii Tridentini de sacramentis adversus censuras et examini Martini Kenntini" in two parts. In this "Apology", which is his chief work, the author comments on, and brilliantly defends, the dogmatic decrees of Sessions IV-VI, the doctrine concerning the Sacraments, the original sin and justification, the sacraments in general, baptism, confirmation, the Eucharist as a sacrament and as a sacrifice. He died before writing a third part, in which he intended to treat of the other sacraments.

Ravigan, Gustave Xavier Lacroix de, French Jesuit, pulpit orator, and author, b. at Bayonne (Basses-Pyrénées), 1 Dec., 1775; d. at Paris, 26 Feb., 1855. Sent quite young to Paris, he studied in private boarding-schools, and attended lectures at the Lycée Bonaparte. He first thought of entering the diplomatic service but decided in 1813 for the law. On Napoleon's return from Elba, de Ravigan joined the Due d'Angoulême's Royal Volunteers and made the unsuccessful Spanish campaign, distinguishing himself under fire at Héletsane. He soon resigned his commission of lieutenant of cavalry and resumed his law studies. Called to the bar he was elected in 1817 a king's counsel in the Paris circuit and in 1821 deputy attorney-general. He was becoming famous when in May, 1822 he entered the Sulpician seminary at Issy. This made a sensation, heightened when on 2 November, he was received into the Jesuit novitiate at Montmorency. Here he laid the foundations of that lofty but practical spirituality, spirit of mortification and prayer, mastery over self, generosity, and zeal which ever marked him. After his novitiate he studied theology and was ordained priest 25 July, 1828. Like Bourdaloue, de Ravigan prepared for the pulpit in a professor's chair. For two years at St. Acheul near Amiens, for three months at St. Denis, he taught dogmatic theology. While at Brie and at Estavayer on the Lake of Neuchâtel, he gave missions and retreats in the neighbouring country. His stirring Lenten course in the Cathedral of Amiens (1835), his success at Paris in St. Thomas d'Aquin (1838) pointed him toMgr de Quelen as the logical successor of Lacordaire at Notre Dame.
On the Notre Dame conferences de Ravignan's oratorical fame mainly rests ("Conférences du R. P. de Ravignan de la Compagnie de Jesus", 6 vols., 4 vols., 5th ed., Paris, 1897); "Conférences de Revd. Fr. de Ravignan" (Lent of 1846), tr. Fetherston (London, 1847), cf. also, "The Catholic Pulpit" (London, 1849). The subjects treated were the endless conflict of truth and error: God, man, the Divinity, Person, and Doctrine of Christ, the Church and its dogmas. Here the orator introduced a course of moral conferences, but returned to apologetics in a study of the relations between reason and faith. Reading these conferences now, we find little colour, imagination, or dramatic movement; we miss the compelling magnetism of the speaker. De Ravignan was "Virtue preaching Truth". His logic, the serene authority of his affirmation, his union of his power in repose, his noble presence, his piously seal captivated, do not brandish his hearers. The men's retreats begun by him, and in which he excelled, completed the work. Superior of his brethren at Bordeaux (1837-42), at Paris (1848-51), then, as afterwards, he was preaching in almost every important city in France. He was heard also in Rome, in Belgium, and in London (1851) where he assisted Manning at his first Mass. Everywhere he was winning souls.

In 1843-45, public opinion led by Thiers, Cousin, Michelet, Libri, Quinet, Béranger, had set against the Jesuits. Some said they were working for the Bourbons, others, that they were too loyal to the House of Orleans. Montalembert, Dupanloup, Vatisans, Bougnat, Barthelemy defended them. De Ravignan, the foremost Jesuit in France, was accused of having left the order; at another time, of having made unworthy concessions to the Government. He easily cleared himself with his superior-general, Fr. Roothaan, and vindicated his order, its asceticism, its constitutions, its doctrine, its work, in a calm, logical, but serenely eloquent book, "De l’Existance et de l’Institut des Jesuites" (Paris, 1841; 4th ed., Paris, 1870)." Seager (London, 1844) and Atchison (London, 1844). The book created a sensation. Royer-Collard enthusiastically praising it. Twenty-five thousand copies were sold in one year, but the fight continued. Through its agent, Pellegrino Rossi, the Government of Louis-Philippe asked Gregory XIV to secularize the French Jesuits. The pope replied that to do so would be a violation of the concordat and the constitution, that no crime was imputed to the order, that the French episcopal spoke well of it. He refused, although the Government and its agent tried to create a contrary impression. De Ravignan advised a firm constitutional resistance, but Fr. Roothaan, to spare further embarrassment to the Holy See, without commanding, suggested that the French Jesuits might temporarily and partially disband. They did so, and for a few years, as a corporate body, to exist in France. A painful controversy withMgr Affre, the future martyr Archbishop of Paris, whose measures against the order in 1844 Gregory XVI was obliged to stop, was a sore trial to de Ravignan. Throughout he remained loyal to the Society, respectful but firm with the archbishop. Another trial terminated his life. Gregory XIV"s rescript of 1850 for the liberty of education, though recognizing the shortcomings of the measure and trying to eliminate them, he urged the Catholics to unite and to use their opportunities. He was accused of disrupting their ranks of being a blind follower of de Falloux, Montalembert, and Dupanloup. He was again triumphantly vindicated.

Twice again de Ravignan came prominently before the public. In 1855 he preached the Lenten sermons at the Tuileries, before Napoleon III and Empress Eugénie. Sickness had undermined his strength, but he spoke with much of his old vigour, and with the same authority and unction. In 1847 Créteineu-Joly had published his "Clément XIV et les Jésuites". His strictures on Clement XIV were severe and unfair. In 1852 the learned Augustine Theiner had written his "Geschichte des Pontifizats Clemens XIV". In it Clement XIII the defender of the Jesuits was attacked, Clement XIV, who suppressed them, wronged by injudicious flatteries. At the request of Fr. Roothaan, de Ravignan wrote: "Clément XIV et les Jésuites" (Paris, 1854, 2 vols.) He endeavoured to put the facts in their true light. The literary merit of the work is not of the highest, but the author writes with impartiality and candour. The work of de Ravignan's years or at least was fertile in results. The confessional, direction of souls, retreats and conferences for noble ladies, familiar talks to the poor, employed his zeal. Many thought him careless of his reputation, but though anxious to do well, he preferred to do good. Honours sought him. Several times his name was mentioned for the Archiepiscopal See of Paris, but faithful to his vows, he refused the honour. He preferred to work as a simple religious in every good cause. He championed the proclamation of the Dogma of the Immaculate Conception, supported Péllet and Gratry in the organization of the French Oratory, and Muard in the formation of the Benedictine monastery of la Pierre-qui-Vire. After a two months' sickness, tenderly watched by his friend, superior, and future biographer, de Ponlevoy, he died a saintly death. Berry had knelt in tears at his bedside; Mgr Dupanloup preached his funeral oration; thousands followed the remains of the "Apologie de Paris" to the grave.

Besides the volumes mentioned, de Ravignan did not publish anything of great importance. Following works have been written about him, and edited since:

JOHN C. REVILLE.
Rawes, Henry Augustus, Oblate of St. Charles, hymn-writer and preacher, b. at Easington near Durham, England, 11 Dec., 1826; d. at Brighton, 24 May, 1883. He was born at Houghton-le-Spring, where his father was headmaster, and at Trinity College, Cambridge, where he proceeded B.A. in 1849 and M.A. 1852. Rawes entered the Anglican ministry, and after holding curacies at St. Botolph's, Aldgate, and St. Bartholomew's, Mincing Lane, became warden of the House of Charity, Soho, 1854. In 1856 he was received into the Catholic Church at Edinburgh by Fr. Ignatius Grant, S.J., and on Whit-Monday, 1857, became one of the original members of the English Congregation of Oblates. He died at St. Mary of the Angels, Bayswater. Ordained priest in November, 1857, Fr. Rawes took charge of the poor district of the Potteries, Notting Hill, where he built the Church of St. Francis of Assisi. As Cardinal Wiseman bears witness, "this has been built entirely at the expense of Fr. Rawes, an Oblate, who has spent all his fortune upon it."

Raymbault, Charles, missionary, b. in France, 1602; entered the Society of Jesus at Rouen (1621); d. at Quebec, 1643. He was procurator for the Jesuits in New France, and was sent with Father Pijart to organize the Huron mission of St. Ignace (1637). When the time came (1640) to give missionaries to the wandering tribes who frequently visited the Hurons, chiefly Nipissings and Algonquins, living east and north of Lake Huron and on the banks and islands of the Ottawa, Raymbault was sent with Father Pijart to follow them. This mission offered greater hardships than that of the Hurons, Neutrals and Indians of the Tobacco Nation. The generosity and devotedness of the Jesuits soon bore fruits. When the Saulteaux Indians (1641) besought the "blackrobes" to visit them, Raymbault travelled, with the future martyr Jogues, as far as the Sault Ste. Marie on a voyage of exploration and with a view to a more permanent apostolate. The missionaries, besides their desire to conquer souls, were interested in the discovery of the famous passage to the Western Sea. Shortly after his return, Raymbault intended to join the Nipissings in their winter quarters but he fell exhausted with fatigue, and was brought to Quebec, where he soon died, the first Jesuit who died in Canada. He was buried beside the St. John's College gates. According to Raymbault, when he was removed to the Roman Catholic Church in 1643, he was a man of great stature, of ordinary talent and learning, of sound judgment, excellent heart, and experienced in temporal affairs.

Raymond IV, of Saint-Gilles, Count of Toulouse and of Tripoli, b. about 1043; d. at Tripoli in 1105. He was the son of Robert II, Count of Toulouse, and in 1088 succeeded his brother, William IV, who had died without male issue. From 1066 he had been Count of Rouergue, of Nîmes, and of Narbonne, thus becoming one of the most powerful lords of southern France. In 1093 he received the pope, Urban II, on his own estates and took the Cross with enthusiasm, vowing never to return to his own dominions. After a pilgrimage to Châlons-Dieu, he set out in October, 1096, entrusting the care of his dominions to his son Bertrand. His army was composed of Aquitanians and Provençals, the pope's legate, Adhémar of Monteil, Bishop of Le Puy, accompanying him. He traversed Lombardy and proceeded to Constantinople through the valleys of the Eastern Alps. After many a successful combat with the half-barbarous Slavs, who were developing a very young state at Durazzo, where he found letters from the Emperor Alexius inviting him to Constantinople, Raymond accepted, leaving his army, which in his absence pillaged the country, and was attacked by the imperial troops. At Constantinople Raymond refused to swear allegiance to Alexius, as most of the crusading chiefs had done. He afterwards took an active part in the expedition against Jerusalem, and, notwithstanding his rivalry with Bohemond, exercised a very great influence on the course of events. He could not prevent Bohemond from taking Antioch in 1098, and out of spite against the Norman chief he became reconciled with the Emperor Alexius, to whom he restored the city of Laodicea (February, 1099). After his rupture with Bohemond, Raymond directed the great bulk of the crusaders against Jerusalem, and was active in the capture of the Holy City (8 July, 1099). He refused the title of king, and left Jerusalem to return to Constantinople in 1100. He was chosen chief of a new army of crusaders, which was destroyed by the Turks at the Battle of Asin Hor, Syria. Returning to Tarsus, he was imprisoned at Tarsus by Tancred, and, on being released, seized Tripoli (1103), where he died two years later.

Rawlins, Alexander, Venerable. See Walsh, Henry, Venerable.
Raymond, son of Raymond VI, Count of Toulouse, b. 1156; d. 1222; succeeded his father, Raymond V, in 1195. He was a debauched and sceptical prince, who successively put away three wives, taking as his fourth Jeanne, sister of Jean de Lusignan, Count of Lusignan. Loaded with all the benefits of the Church, he showed the greatest benevolence to the heretical Cathares or Albigenses, whom his father had persecuted, refused to molest them, even allowing them to preach before him, and perhaps allied himself with their sect. His court was dissolve, and he took no notice of the reproof of the legate of Innocent III, Pierre de Castelnau, who finally excommunicated him in 1207. But shortly after, an equerry of the count having treasonably killed de Castelnau, Raymond was immediately deposed by the pope. Raymond, frightened into submission, expelled the heretics from his dominions, and on 18 June, 1209, in the presence of the pontifical legate, did public penance before the Church of St-Gilles. When the crusaders, assembled in the north of France, invaded Languedoc, Raymond, in the Crusade, joined the siege of Béziers and Carcassonne in 1209. Returning to Toulouse, Raymond tried to elude his obligations and was excommunicated by the Council of Avignon. He then went to Rome to clear himself of the murder of de Castelnau, and was received by Innocent III, but on his return found his estates entirely overrun by Simon de Montfort. In 1212 he held only Toulouse and Montauban. His brother-in-law, Peter, King of Aragon, came to his rescue, but was killed at the battle of Murat in 1213. In 1215 Simon de Montfort besieged Toulouse and 261 houses perished. Instead of organizing resistance, Raymond had negotiated with the pontifical legates, who made him the most humiliating propositions. Deprived of his estates, he retired to England, later appearing at the Lateran Council (1215), where he sought to interest Innocent III in his favour. The pope, however, ceded the estates of Raymond to Simon de Montfort, reserving for his son only the Marquessates of Provence and Beaucaire. An exile in Aragon, Raymond VI reassumed his troops, and took Toulouse (7 November, 1217) after defeating and killing Simon de Montfort, who was killed 25 June, 1218. Before his death Raymond VI had wrested from Amaury de Montfort nearly all the conquests of his father.

Raymond VII, Count of Toulouse, son of Raymond VI, b. at Beaucaire, 1197; d. at Milhaud, 1249; had espoused a sister of the King of Aragon, and had assisted his father in the reconquest of his estates. In January, 1224, Amaury de Montfort, reduced to the sovereignty of Narbonne, concluded a treaty with him, but ceded his rights in the south to Louis VIII of France. In vain Raymond VII offered his obedience to the assembly of Bourges in 1226; a new Crusade was decided upon. Louis VIII seized Avignon and occupied Languedoc without resistance, but on his return to the north he died 8 Nov., 1226, at Montpensier. Raymond VII, profiting by the feebleness of Blanche of Castile, took several places from Imbert de Beaujeu, senechal of the province. This subjection to his power; in 1228, two new crusades began to plunder the country of Toulouse, and soon Raymond lost nearly all his strongholds. He then asked peace from Blanche of Castile. After the conference of Meaux, Raymond returned to Paris, and on 12 April, 1229, in the Church of Notre Dame, did public penance and was released from his excommunication. He pledged himself to demolish the walls of Toulouse, and to give his daughter Jeanne in marriage to Alphonse of Poitiers, brother of King Louis IX. Returning to Toulouse, Raymond VII kept his promises and accepted the establishment of the Inquisition. In 1234 he went to Rome, and received from the pope the restitution of the Marquisate of Provence. In spite of his zeal in suppressing heresy, he was several times accused of favouring the massacre of the inquisitors. He allied himself with the Emperor Frederick II against the pope. In England, Henry III, against Louis IX. The victory of the latter at Taillebourg caused him to renew his oath of fealty. In 1247, as he was starting for Palestine with St. Louis, he died, leaving his estates to his daughter Jeanne.

Raymond Lully (Pramon Lull), "Doctor Illuminatus", philosopher, poet, and theologian, b. at Palma in Majorca, between 1232 and 1236; d. at Tunis, 29 June, 1315. In 1294 he went to Tunis, preaching from James of Aragon until thirty years of age, he then became a hermit and afterwards a tertiary of the Order of St. Francis. From that time he seemed to be inspired with extraordinary zeal for the conversion of the Mohammedan world. To this end he advocated the study of Oriental languages and the refutation of Arabian philosophy, especially that of Averroës. He founded a school for the members of his community in Majorca, where special attention was given to Arabic and Chaldaean. Later he taught in Paris. About 1291 he went to Tunis, preached to the Saracens, disputed with them in philosophy, and after another brief sojourn in Paris, returned to the East as a missionary. After undergoing many hardships and privations he returned to Europe in 1311 for the purpose of laying before the Council of Vienna his plans for the conversion of the Moors. Again in 1315 he set out for Tunis, where he was stoned to death by the Saracens.

Raymond's literary activity was inspired by the same purpose as his missionary and educational efforts. In the mufliy age of Averroës, he came from his facile pen, in Catalonian as well as in Latin, he strove to show the errors of Averroism and to expound Christian theology in such a manner that the Saracens themselves could not fail to see the truth. With the same purpose in view, he invented a mechanical contrivance, a logical machine, in which the subjects and predicates of theological propositions were arranged in circles, squares, triangles, and other geometrical figures, so that by moving a lever, turning a crank, or causing a wheel to revolve, the propositions would arrange themselves in the affirmative or negative and thus prove themselves to be true. This device he called the Ars Generalis Ultima or the Ars Magna, and to the description and explanation of it he devoted his most important works. Underlying this scheme was a hypothetical philosophy, or rather a theosophy, for the essential element in Raymond's method was the identification of theology with philosophy. The scholastics of the thirteenth century maintained that, while the two sciences agree, so that what is false in philosophy cannot be false in theology, or vice versa, they are, nevertheless, two distinct sciences, differing especially in that theology makes use of revelation as a source, while philosophy relies on reason alone.

The Almoravids had completely separated them by maintaining the twofold standard of truth, according to which what is false in philosophy may be true in
Raymond, carried on by his zeal for the refutation of the Arabians, went to the opposite extreme. He held that there is no distinction between philosophy and theology, between reason and faith, so that even the highest mysteries may be proved by means of logical demonstration and the use of the Ars Magna. This of course removed all distinction between natural and revealed knowledge. Unlike Abelard's, however, Raymond's rationalism was of the mystic type: he taught expressly that, for the understanding of the highest truths, reason must be aided by faith; that once faith has flooded the soul, reason, like a rock, is taken and strengthened by faith, "is as capable of showing that there are three persons in one God as it is of proving that there cannot be three Gods." "Relying on the grace of God," he writes, "I intend to prove the articles of faith by convincing reasons" ("Opera""). Strassburg ed., p. 966). On the other hand, he held that, although reason needs this Divine assistance, faith is just as much in need of reason; faith may deceive us unless reason guides it. He who relies on faith alone is like a blind man who, relying on the support of others, finds what he wants, but often misses it; to be certain of finding his object, he needs sight as well as touch. So Raymond held that a man, in order to find out the truth about God, must bring reason to the task as well as faith.

These principles were taken up by the followers of Raymond, who for a time had so great an influence, especially in Spain, that they succeeded in founding chairs at the Universities of Barcelona and Valencia for the propagation of the doctrines of the "Illuminated Doctor." The Church authorities, however, recognized the dangerous consequences which follow from the breaking down of the distinction between natural and supernatural truth. Consequently, in spite of his praiseworthy zeal and his crown of martyrdom, Raymond has not been canonized. His rationalistic mysticism was formally condemned by Gregory XI in 1376 and the condemnation was renewed by Paul IV. Raymond's works were published in ten folio volumes at Mainz, 1721–42. There are, besides, several editions of portions of his writings. His poems and popular treatises, written in Castilian, had a very wide circulation in his own day, and their style has won him a high place in the history of medieval Spanish literature. The best known edition of the works in which he describes his logical machine is the Strassburg ed. of the "Rivista Lulliana," a periodical devoted to the exposition of Raymond's philosophy, was started at Barcelona in 1901.

Raymond Martini, Dominican, theologian, Orientalist, b. at Subirats, Catalonia, c. 1220; d. after July, 1294. In 1250 he was selected by his superiors to study Oriental languages, in 1264 became a member of the commission appointed by Jaime I of Aragon to censure the writings possessed by the Jews, and subsequently preached to the Moors in Spain. Returning to Catalonia (1270) he successfully taught the Oriental languages and wrote against the Jews and Moors. His chief work, "Pugio Fidei Christianae" completed after 1278, printed in Paris, 1651, and Leipzig, 1837, is written in Latin and Hebrew. It appeals to the Hebrew Scripture as a means of understanding the New Testament and refuting the truth of Christianity against the Jews. The work, which clearly indicates that Raymond Martini was extremely well-read in Hebrew literature, is much valued on account of its citations from the Talmud and other sources, and has also been highly esteemed as a polemical source. It is not probable, however, that it was known and used by St. Thomas Aquinas.

Martini's other works are the recently discovered "Explanatio simboli apostolorum ad institutionem fidellim edita," written about 1256, of which important fragments were edited by Denifle, and two polemical works also antedating the "Pugio Fidei" which did not both lost, "Summa contra Alcoranon" and "Capitulari Judaeorum." The latter two works are dedicated to the Emperor Frederick II, the former to the King of France.

J. A. McHugh.

Raymond Nonnatus, Saint (in Spanish San Ramón), b. 1200 or 1204 at Portello in the Diocese of Urgel in Catalonia; d. at Cardona, 31 Aug., 1240. His feast is celebrated on 31 August. He is pictured in the habit of his order surrounded by ransomed slaves, with a padlock on his lips. He was taken from the womb of his mother after her death, hence his name. Of noble but poor family, he showed early traits of piety and great talent. His father ordered him to tend a farm, but later gave him permission to take the habit of the order at Barcelona, at the hands of the founder, St. Peter Nolasco. Raymond made such progress in the religious life that he was soon considered worthy to succeed his master in the office of ransomer. He was sent to Algiers and liberated many captives. When money failed he gave himself as hostages. He was zealous in teaching the Christian religion and made many converts, which embittered the Mohammedan authorities. Raymond was subjected to all kinds of indignities and cruelty, was made to run the gauntlet, and was last sentenced to imprisonment. The hope of a greater sum of money as ransom caused the governor to commute the sentence into imprisonment. To prevent him from preaching Christ, his lips were pierced with a red-hot iron and closed with a padlock. After his arrival in Spain, in 1239, he was made a cardinal by Gregory IX. In the next year he was called to Rome by the pope, but came only as far as Cardona, about six miles from Barcelona, where he died. His body was brought to the chapel of St. Nolasco, near his old farm, and was placed in the Roman martyrlogy by Alexander VII. He is invoked by women in labour and by persons falsely accused. The appendix to the Roman Ritual gives a formula for the blessing of water, in his honour, to be used by the sick, and another of candles.

BUTLER, Lives of the Saints; STADLER, Heiligenlexikon; Ams, Kirchengesch. von Spanien, III, 1; Acta SS., Aug. VI, 729.

Francis Meierman.

Raymond of Penafort, Saint, b. at Villafraanca de Beniazaar, near Barcelona, in 1175; d. at Barcelona, 1275. He was professor of canon law in 1195, and taught for fifteen years. He left Spain for Bologna in 1210 to complete his studies in canon law. He occupied a chair of canon law in the university for three years and published a treatise on ecclesiastical legislation which still exists in the Vatican Library. Raymond was elected as prior of the Dominican Order by the preaching of Blessed Reginald, prior of the Dominicans of Bologna, and received the habit in the Dominican Convent of Barcelona, whither he had returned from Italy in 1222. At Barcelona he co-founded with St. Peter Nolasco of the Order of Mercedarians. He also founded institutes at Barcelona and Tunis for the study of Oriental languages, to convert the Moors and Jews. At the request of his superiors Raymond published the "Summa Casuism," of which several
editions appeared in the sixteenth and seventeenth centuries. In 1229 Raymond was appointed theologian and penitentiary to the Cardinal Archbishop of Sabina, John of Abbeville, and was summoned to Rome in 1230 by Gregory IX, who appointed him chaplain and grand penitentiary. The reputation of the saint for juridical science decided the pope to employ Raymond of Penafort’s talents in re-arranging the canons of the Church. He had to rewrite and condense decrees that had been multiplying for centuries, and which were contained in some twelve or fourteen collections already existing. We learn from a Bull of Gregory IX to the University of Paris that Bologna, so many of the decrees in the collections were but repetitions of ones issued before, many contradicted what had been determined in previous decrees, and many on account of their great length led to endless confusion, while others had never been embodied in any collection and were of uncertain authority.

The pope announced the new publication in a Bull directed to the doctors and students of Paris and Bologna in 1231, and commanded that the work of St. Raymond alone should be considered authoritative and alone be used in the schools and courts. Raymond completed his work the pope appointed him Archbishop of Tarraconza, but the saint declined the honour. Having edited the Decretals he returned to Spain. He was not allowed to remain long in Spain when he was elected General of the Order in 1238; but he resigned two years later. During his tenure of office he published a revised edition of the Dominican Constitutions, and it was at this request that St. Thomas wrote the “Summa contra Gentiles”. St. Raymond was canonized by Clement VIII in 1601. His “Summa de Penitentia et Matrimonio” is said to be the first work of its kind. His feast is 23 Jan. Monumenta Historica Ord. Pred., V. iv.; Bullarium Ord. Pred.; Penia, Vita S. Raymundo; Montier, Hist. des Maîtres Généraux (Paris, 1903); Finer, Acta Argentinensia, II (1906), 902-4; Quotid. Schol. Script. Ord. Pred.; Balmes, Raymundo (1901).

Michael M. O’Kane.

Raymond of Sabunde (Sabonde, Seson, Sereye, etc.), b. at Barcelona, Spain, towards the end of the fourteenth century; d. 1432. From 1430 to his death he taught theology, philosophy, and medicine at the University of Toulouse. Apparently, he wrote several works on theology and philosophy, one of which is now lost. His most important work is “Opuscula Euchariana”. It was first written in Spanish, translated into French by Montaigne (Paris, 1609) and into Latin at various times (e. g. Deventer, 1487; Strasbourg, 1496; Paris, 1509; Venice, 1551, etc.). Montaigne bears witness to the extraordinary popularity which the work enjoyed in his day. It represents a phase of decadent Scholasticism, and is a defence of a point of view which is subversive of the fundamental principle of the Scholastic method. The Schoolmen of the thirteenth century, while holding that there can be no contradiction between theology and philosophy, maintain that the two sciences are distinct. Raymond breaks down the distinction by teaching a kind of theology, the doctrine, namely that, as man is a connecting link between the natural and the supernatural, it is possible by a study of human nature to arrive at a knowledge even of the most profound mysteries of Faith. The tendency of his thought is similar to that of the rationalistic theoc- reony of Raymond Lully (q. v.).

Willam Turner.

Raynald (Rinaldi), Odorico, Oratorian, b. at Treviolo in 1595; d. at Rome, 22 January, 1671. Of patrician birth, he studied at Parma and Padua, joined the Oratorians in Rome, and, distinguished for his piety, was appointed superior general of his congregation. He was entrusted with the continuation of the annals of Bar- ronius and, after the publication of the first volume, was offered the direction of the Vatican Library by Innoceint X, which honour he declined. The continuation of Baronius extends from 1598 to 1655 and was published at Rome, 1646-77. He was the ablest continuer of the great historian. Although his work is marred here and there by inaccurate chronological data and lack of criticism, the numerous original documents which he discovered are of invaluable value. Raynald also published excerpts in Latin and Italian both from the work of Baronius and his own continuation of it. Excerpts in Baronius-Thurian, pp. iii-viii; Annales Bollandiae, XX (Brussels, 1870), 24-33.

A. Weber.

Raynaud, Turéophile, theologian and writer, b. at Sospel near Nice, 15 Nov., 1583; d. at Lyons, 31 Oct., 1663. He entered the Society of Jesus, 21 November, 1602, taught grammar and humanities at Avignon, then philosophy, and theology at Lyons, and died at the age of sixty. He was very zealous for souls, a theologian of broad erudition, and a writer of great fertility, having produced ninety-two separate works, covering almost the entire field of theology. His style, however, is often prolix and sometimes obscure, while in his controversial writings he indulges in satire and invective. His collected works, revised by himself shortly before his death, were published under the direction of his confère, Fr. John Bertet, in nineteen volumes (Lyons, 1655). A twentieth volume, entitled “Th. Raynardi Apopompeus” (i.e. the scapegoat), containing a number of writings which the author had purposely excluded from the collection, was published by an anonymous editor a few years later (Cracow, 1659); this volume was condemned by the Congregation of the Index. The main titles alone of the “Opera” are given, to show the nature and extent of his writings: I. “Theologia Patrum: Christus Deus Homo”; II. “De Attributioni Christi”; III. “Moralia disciplina”; IV. “De virtutibus et virtutibus”; V. “Theologia naturalis”; VI. “Opuscula eucharistica”; VII. “Memoriae, VII-IX, Hagiologium”; IX. “Pontificia”; XI. “Critica sacra”; XII. “Miscella sacra”; XIII. “Miscella philologica”; XIV. “Moralia”; XV-XVI. “Hetero- chria spiritualis”; XVII. “Ascetica”; XVIII. “Polemica”; XIX contains general works.

Raynaud, François-Juste-Marie, a French poet, dramatist, and philologist, b. at Brignoles, Var, 8 September, 1761; d. at Passy, 27 October, 1836. He studied law at Aix and, on being admitted to the bar, practised there. When the Revolution broke out, he showed at first great enthusiasm for liberty and was elected to the Legislative Assembly, where he sided with the Girondins. He soon abandoned the new ideas. During the Terror, he was arrested and imprisoned at the Abbaye. Being freed after the ninth Thermidor, he returned to his native city and obtained great success as an attor- ney-at-law. In his leisure hours, he indulged in writing poems, “Socrate au temple d’Aiglaure” (1802), and tragedies, “Éléonore de Bavière” and “Les templiers”, which were played in 1805 by special command of Napoleon. Raynald was elected to the French Academy in 1807. From 1806 to 1814, he was a member of the Legislature. After Napoleon’s downfall, he retired from politics and devoted his time to literature and a comparative
study of languages. He was one of the pioneers of Romance philology and made a lasting reputation by his researches on the troubadours, although his conclusions now seem haughty and often mere conjectures. He was admitted to the Academy of Inscriptions and Belles-Lettres in 1815. His chief works besides the dramas above mentioned are the tragedy "Les États de Blois" (1809), and a few others never produced on the stage: "Cabinet d'Utile", "Don Carlos", "Déborah", "Charles I", "Jeanne d'Arc à Orléans"; various contributions to Romance philology: "Recherches sur l'antiquité de la langue romane" (Paris, 1816); "Éléments de la grammaire de la langue romane" (Paris, 1816); "La grammaire des troubadours et des poètes galants" (1816); "Des troubadours et les cours d'amour" (1817); "Grammaire comparée des langues de l'Europe latine dans leurs rapports avec la langue des troubadours" (1821); "Choix des poésies originales des troubadours" (Paris, 1821); "Lexique de la langue des troubadours" (Paris, 1824); "Nouveau choix des poésies originales des troubadours" (Paris, 1836-44).

JUILLET, Les poètes français d'Époque capétienne (Paris, 1844); MERLET, Tableau de la litt. franç. de 1600 à 1815 (Paris, 1875); OIDEI, Histoire de la litt. franç. (III, 1882); AUBERT, Histoire de l'empire, de la Révolution, de l'Empire et de la Restauration (Paris, 1891).

LOUIS N. DELAMARRE.

Reading Abbey, Surrey, England, was founded by Henry I in 1121, who built it, writes William of Malmesbury, "between the rivers Kennet and Thames, in a spot calculated for the reception of almost all who might have occasion to travel to the most populous cities of England, where he placed monks of the Cluniac Order, who are to this day a noble pattern of holiness and an example of unwearied and delightful hospitality." The foundation charter declares that the new monastery takes the place of three others, Reading, Cholsey, and Wallingford. The exceptional noun of the Virgin Mary and St. John the Evangelist; accords it every civil privilege conceded to royal monasteries, and instructs the abbots to employ the alms at his disposal for "the entertainment of the poor, pilgrims, and guests." The first abbots was Hugues de Boves, later Prior of St. Pancras, Leuvis, afterwards Archbishop of Rouen. From the beginning it was an independent English abbey, which, whilst retaining the Cluniac observance, elected its own abbots, paid no impost to the mother-house, was exempt from Cluniac visitation, and never acknowledged the jurisdiction of the General Chapter or Abbot of Cluny. Hence, though it has been described as a Cluniac establishment in ancient documents, even in papal letters of so late a date as 1306, it was never an "alien" house, and Cluny can only claim the credit of having set it going with monks and monastic customs. The abbey precincts covered about thirty acres and were surrounded on three sides by a great wall with four embattled gateways, one of which, the western or compter gate, served as the town prison. It was entered through an inner gateway, washed by Sir G. Scott in 1861) within the abbots held his manorial court. The church, consecrated by St. Thomas a Becket in 1104, was 450 feet long and 95 feet broad, with transepts (200 ft.), a Lady-chapel (75 by 50 ft.) built in 1314, and a square central tower with spire. The monastic buildings were on the same scale, and the chapter-house, of which the nave (70 by 42 ft.), was frequently used as a national council chamber, where Parliament sat, and many synods and ecclesiastical councils were held. There was a leper-hospital, closed in 1413 for lack of inmates. The hospital had a guest hall (100 ft.), a dormitory (200 ft.) and provision for twenty-six poor pensioners. Part of the building (the dormitory) still exists and for many years was in use as the Royal Grammar School of King Henry VII. The abbots were often in poverty, the building was disused and the buildings stripped of their carved and dressed stonework for the repairing and building of churches, bridges, and the like, and not much more than the core of some of the walls, huge masses of flint-concrete, is left to preserve the memory of the great abbey which Henry I designed as the monument of his piety and where his body and that of his son were buried. The chief spiritual treasures of the abbey were the hand of St. James the Apostle (now in the sacristy of St. Peter's, Marlborough), presented by Henry I, and the skull of St. Philip, given by King John.

Reason.—General Meaning.—Both in ordinary life and in philosophical discussions the term reason is of frequent occurrence in different significations. Etymologically the word comes to us, through the French, from the Latin ratio, which is originally the vocative noun of the verb "to think" (i.e. I propose a res to my mind). According to Donaldson, res = h-ra-is, a derivative from hir = yelp (hand); hence res is "that which is handled", and means an object of thought, in accordance with that practical tendency of the Roman mind which treated all realities as palpable. Ratio, in opposition to res, denotes the mode or act of thinking; by extension it comes to designate on the one hand the faculty of thinking and on the other the formal element of thought, such as plan, account, ground, etc. This wide use of the word reason to denote the cognitive faculty (especially when dealing with intrinsic evidence, as opposed to authority) is still the commonest. The word has been used in this sense in a definition of the Vatican Council (Denzinger, "Enchiridion", 11th ed., Freiburg, 1911, nn. 1785-6); but already in Aristotle we have a clear distinction between intellect (intellect), as the intuitive faculty, and reason (logia), as the discursive or inferential faculty. This distinction was maintained by the Schoolmen. Yet, since Kant, the word reason has been used to shelter a bewildering chaos of nothings. Besides unity, restored by Sir G. Scott in 1861) within the abbots held his manorial court. The church, consecrated by St. Thomas a Becket in 1104, was 450 feet long and 95 feet broad, with transepts (200 ft.), a Lady-chapel (75 by 50 ft.) built in 1314, and a square central tower with spire. J. C. ALMOND.
transcendental sense as the function of subsuming under the unity of the ideas the concepts and rules of the understanding. Subsequent German philosophers, as Schopenhauer complained, "tried, with shameless audacity, to smuggle in under this name an entirely spurious faculty of immediate, metaphysical sense—true and false—fitted into the word-grooves prescribed by syntax. But if, developing Aristotle's thought, we regard a syllogism as the unit of reasoning, then we may define it as the inference of a relation between A and C from a relation of A to B contained with a relation of B to C. As an illustration we might instance Mill's famous example of the village matron's inference. Mill calls it reasoning from particulars by analogy; but it can easily be seen to be a syllogism; this drug (A) cured my Lucy (B), who had the same sickness as this neighbour's child (C), and hence will cure this child (C). All reasoning seems to consist in such unit steps, and it seems misleading to talk of inference in materia; material and formal are relative terms.

PSYCHOLOGY OF REASONING.—There is an important sense, however, in which the word reason has been applied to reasoning, to denote illation in which the relational formality has not yet been dissected out. The same laws of thought rule the philosopher's reasoning and the peasant's, but the former's conclusions, and not the actual process as a whole. Yet none denied that in this life our knowledge is a thing of shreds and patches, laboriously woven from the threads of sense. It is only in patria, for instance, that God's existence will be to us as evident as the principle of contradiction is now. The bestial vision will, in fact, be not only as evident, but also as immediate as our present intuition of personal consciousness. But then we shall be on a level with the angels, who are subject intelligences or pure intuitions. An angel, in Schopenhauer's philosophy, is practically the equivalent of nosis (intellectus, intellegentia) when used by such writers as Aristotle, Porphyry, Plotinus, or pseudo-Dionysius, to denote not a faculty, but a species of being.

Opposed to this ideal intellung, so characteristic of Scholastic angelology, is our actual human experience, which is a vercludere, a coming to be. Man is rational in the sense that he is a being who arrives at conclusions from premises. Our intellectual life is a process, a voyage of discovery; our knowledge is not a static ready-made whole; it is rather an organism in flux, and as it grows and increases, becomes the basis of further inference. Hence, too, the word reason is used to signify a premise or ground of knowledge, as distinguished from a cause or real ground. So important is this distinction that one may say herein lies the nucleus of all philosophy. The task of the philosopher is to distinguish the a priori of logic from the a priori of time; and that this task is a difficult one is testified by the existence of the many systems of psychology and evolutionism. Reasoning, therefore, must be asserted to be a process sui generis—perhaps the clearest answer to go to the question, so much discussed by the old logicians, as to what kind of causative influence the premises exert on the conclusion. We can only say, they validate it, they are its warrant. For inference is not a mere succession in time; it is a nexus thought-of, not merely an association between thoughts. An irrational conclusion or a misleading association is as much a fact and a result as a correct conclusion; the existence of the latter is explained only by its logical parentage. Hence the futility of trying to arrive at the completed thought of a human thought—"the conclusion of a train of reasoning—simply by the accompanying sense-data and psychological associations. The question of validity is prior to all problems of genesis; for rational knowledge can never be the product of irrational conditions.

Allowing then the indefinability of ratiocination, we may proceed to seek if inference is homogeneous; in other words, are there different forms of reasoning? This raises the difficult question as to whether deduction and induction are ultimately irreducible modes of reasoning. The issue is usually confused by a very narrow definition of the word, implied in fitting the word-grooves prescribed by syntax. But if, developing Aristotle's thought, we regard a syllogism as the unit of reasoning, then we may define it as the inference of a relation between A and C from a relation of A to B contained with a relation of B to C. As an illustration we might instance Mill's famous example of the village matron's inference. Mill calls it reasoning from particulars by analogy; but it can easily be seen to be a syllogism; this drug (A) cured my Lucy (B), who had the same sickness as this neighbour's child (C), and hence will cure this child (C). All reasoning seems to consist in such unit steps, and it seems misleading to talk of inference in materia; material and formal are relative terms.

PSYCHOLOGY OF REASONING.—There is an important sense, however, in which the word reason has been applied to reasoning, to denote illation in which the relational formality has not yet been dissected out. The same laws of thought rule the philosopher's reasoning and the peasant's, but the former's conclusions, and not the actual process as a whole. Yet none denied that in this life our knowledge is a thing of shreds and patches, laboriously woven from the threads of sense. It is only in patria, for instance, that God's existence will be to us as evident as the principle of contradiction is now. The bestial vision will, in fact, be not only as evident, but also as immediate as our present intuition of personal consciousness. But then we shall be on a level with the angels, who are subsistent intelligences or pure intuitions. An angel, in Schopenhauer's philosophy, is practically the equivalent of nosis (intellectus, intellegentia) when used by such writers as Aristotle, Porphyry, Plotinus, or pseudo-Dionysius, to denote not a faculty, but a species of being.

Opposed to this ideal intellung, so characteristic of Scholastic angelology, is our actual human experience, which is a vercludere, a coming to be. Man is rational in the sense that he is a being who arrives at conclusions from premises. Our intellectual life is a process, a voyage of discovery; our knowledge is not a static ready-made whole; it is rather an organism in flux, and as it grows and increases, becomes the basis of further inference. Hence, too, the word reason is used to signify a premise or ground of knowledge, as distinguished from a cause or real ground. So important is this distinction that one may say herein lies the nucleus of all philosophy. The task of the philosopher is to distinguish the a priori of logic from the a priori of time; and that this task is a difficult one is testified by the existence of the many systems of psychology and evolutionism. Reasoning, therefore, must be asserted to be a process sui generis—perhaps the clearest answer to go to the question, so much discussed by the old logicians, as to what kind of causative influence the premises exert on the conclusion. We can only say, they validate it, they are its warrant. For inference is not a mere succession in time; it is a nexus thought-of, not merely an association between thoughts. An irrational conclusion or a misleading association is as much a fact and a result as a correct conclusion; the existence of the latter is explained only by its logical parentage. Hence the futility of trying to arrive at the completed thought of a human thought—"the conclusion of a train of reasoning—simply by the accompanying sense-data and psychological associations. The question of validity is prior to all problems of genesis; for rational knowledge can never be the product of irrational conditions.

Reason and Feeling.—These experiences have, however, been interpreted in an anti-intellectualist sense. The Pragmatist school regards reasoning as completely determined by the satisfaction of a higher or interest. And, again, many philosophers (Kant, the Modernists, and many Protestant theologians under the influence of Schleiermacher) have exaggerated the dualism between head and heart. In fact, a species of epistemological mysticism has been devised (cf. Gefühlspflaume, raisons du cœur, etc.). So far
as this bears on the problem of reason, we may briefly state the problem. It is true that our reason works passively—that is, reason is selective of our subject-matter, but it is not creative or transforming. Nature is an ordered cosmos of which we form a part, so that every object in it has a "practical" bearing on our lives, is connected with our rational, sensitive, or natural apperception. The known is never completely out of resonance with our volitions and emotions. To affirm anything, or to reason about a subject, is at once to take up a position before it. This is especially true of moral and religious matter, and indeed the emotions and ethical convictions are too often urged as a proof of their irrationality. But we should not forget that the liability to be influenced by emotional causes is no confined to ethical or religious reasoning. To put the case generally, we may ask: What precisely is meant by regarding feeling (or will) as forming with reason a co-ordinate source of knowledge? (Cf. G. E. Moore, "Principia Ethica", sec. 79–80.) It may be meant that to have a certain feeling towards a conclusion is the same as to have reasoned it; and this is true in the sense that the complex (thesis + justification) is true. But while draw a conclusion, I do not mean that I prefer it or am affected by it. And the fact that the two things can be distinguished is fatal to the assumed co-ordination between emotion and reason. As St. Thomas urges against the pseudo-mystics and Augustinians of the Middle Ages, there is no way to include cognition; and, we may add, emotion is a mode of experience, only insomuch as it presupposes knowledge.

Again, it may be meant that, without certain experiences of feeling and willing, we should not be able to draw certain ethical conclusions. This may be admitted as a psychological fact, viz. that there are many exercises of reason which we shall not correctly perform without an ethical habituation (θέαμα τινως, as Aristotle said). In this connection it is interesting to note that Cardinal Newman's object in writing the "Grammar of Assent" was "to show that a right moral state of mind germinates or even generates good intellectual principles". This is very far from countenancing the Kantian view of the practical reason. The School admits a more real reason or "synteresis" (Gevissen, psychological conscience), in the sense of a natural habit of moral principles. But St. Thomas strenuously denies that it is specialis potentia ratione altior (a special faculty higher than reason).

Another idea—Perhaps we may be added to the so-called reason of animals. Man is called animal rationale: this expression stands for what Aristotle might call θεωρητικός. The word θεωρήτης (in German, Lebewesen), which Aristotle applied even to God, does not mean "animal", but "living being". Is there, then, any rational animal Catholic philosophy attributes to animals a faculty (via estimation) whose function, analogous to that of reason, might, for want of a better name, be called "estimation". Such a faculty also exists in man, but in a higher form and was called by the School ratio particularis or via cogitationis. Unless animals had this organic faculty, it is hard to see how they could apprehend those pragmatic relations (intentiones), such as utility, danger, etc., which are not objects of external sense. To this extent we may allow that the psychical life of brute animals is one of "meanings" and "values" in some way they apprehend aspects and relations. Otherwise such complex co-ordinations as those required for nest-architecture and food-quest would be inconceivable. The extreme views of Beeth, Ueberweg, and others, return to Cartesian Mechanism, and really refute themselves. The danger lies rather in the anthropomorphic exaggeration of the powers of the animal mind. Experience has shown how fatly easy it is to read human feelings and reasonings into the "mind" of one's favourite cat or pet lap dog. Continuous, patient observations, like those of Mrs. Mary Austin on her favourite Yorkie on the dancing-mouse, are worth any number of isolated anecdotes. It may be safely affirmed that there is not a single unambiguous record of animal ratiocination. Such experiments as those of Thorndike (on hungry cats) (in a room in a house) (in a room in a house) to learn the way out to food) are easily explained by the gradual stereotyping of association between visual impression and motor response, to the exclusion of other random associations. That animals are incapable of rational volitions is confirmed by the recent observations of Forel, Plauth, and others who have shown that bees (and probably all insects) have no memory of facts, but only of time and distance.

Reason, therefore, is still the exclusive prerogative of man. (See Deduction, Induction, Instinct, Intuition.)

HISTORY.—For Aristotle see Bonitz, Index Aristotelicus (Berlin, 1870); KAPPEL, Aristoteles—Lexikon (Paderborn, 1884), 8. vV. (1804), 7th ed. (Berlin, 1874): MAIER, Die Syntestik des Aristoteles (Tubingen, 1896–1900). For the Latin tradition see Bréhier and Breuer, Aristoteles (Freiburg, 1900, I. iii; Stöckel, Geschichte der Philosophie des Mittelalters (Munich, 1884–86); finlay (2 vols. (Dublin, 1906); SCHRÖDER, Thomas—Learners Aristotelis: Ratio: Syntax, Synthesis. For general history, see Einleitung in die Philosophie, der Philosophen, Begriffe (3rd ed., Berlin, 1910); VERBALEN, Versammlung der Kantianer in Kauf- en, Critical Philosophy of Mind (I, 1898), J. DELBOEUF, Die psychische praktische Kantianer (1901) and his introduction. Cf. also EXECER, Aids to Reflection (On the Difference in Kind of Reason and the Understanding). The Scholastic expression everetem comes from the idea of a false reading in the mind of St. Jerome (P. L., XXII, 22), and should be understood; the original sive et ratio (obscuri) being suggested; on its meaning see APEL, Die Lehre der Scholastiker von der Syntax (Breslau, 1851); JAHN, in Theologie. Quantenab., 1870; NITSCHE, in Zeit. für Kirchengesch, 1817–17 (1870).

Recanati and Loreto, Diocese of (Recinensis), province of Ancora, Central Italy, so called from the inhabitants of ancient Recina, capital of Pioenum, who, after the devastation of their country by Alaric, established Recanati. Claudius, who attended the Council of Rimini, is believed to have been Bishop of Regens. Recanati was subject to the Diocese of Umma until 1240, when Gregory IX deprived Osimo of its see and transferred it to Recanati. Ranieri, Bishop of Osimo, was the first Bishop of Recanati. In 1263, Recanati, having espoused the cause of
Manfred, was deprived of the see which was retransferred to Osimo. Restored in 1289, the See of Recanati was again transferred, in 1320, to Macerata. In 1357 Recanati, united with Macerata, was again made a diocese. Noteworthy persons: Marino del Tocco (1412), whose election was contested by the party of John XXIII and King Ladislaus; Giovanni Vitelleschi (1431), afterwards cardinal and commander of the armies of Eugenius IV. In the sixteenth century the sees of Macerata and Recanati were several times separated and reunited. In 1556 Sixtus V definitely separated Macerata from Recanati and created the Diocese of Loreto, to which in 1591 was added aqua principaliter that of Recanati. The first bishop of the united sees was Rutilio Benonzi (1567), who was succeeded by the cardinals Agostino Gelamini (1613) and Giulio Roma (1621). Other bishops were: Cardinal Alessandro Crescenzi (1576), and Lorenzo Gherardi (1693), both famed for their benefactions; Stefano Bellini (1807) and Giuseppe Cardani (1814). The Abbey of S. Maria in Potenza is in this diocese. Recanati was the birthplace of Blessed Girolamo Gherarducci and Blessed Placido (fourteenth century), also of the littérateurs Monaldo and Giacomo Leopardi. The united diocese have a parish with a population of 26,000; 36 seculars, and 40 regular priests; 8 religious houses of men and 12 of women; 1 school for boys and 5 for girls.

**Rechab and the Rechabites.**—Rechab was the father of Jonadab who in IV Kings, x, 15-28, appears as a fervent supporter of Jehu’s attack on the House of Ahab in his endeavours to root out the idolatrous worship which that dynasty had encouraged. The characteristic principles which actuated his descendants were gather from Jeremiah xxxv, where the Rechabites, being invited to drink wine, answered, “We will not drink wine: because Jonadab the son of Rechab, our father, commanded us, saying: You shall drink no wine, neither ye, nor your children, for ever: Neither shall ye build houses, nor sow seed, nor plant vineyards, nor have any, but you shall dwell in tents all your days, that you may live many days upon the face of the earth, in which you are strangers” (Jer., xxxv, 6, 7). It was evidently the belief of Jonadab and his Rechabites that the settled life with its forms of civilisation led to apostasy from the Jewish religion. In 1 Par., ii, 55, the clan of the Rechabites is connected with the Cintes (Kenites). Vigouroux, Dict. de la Bible, s. v.

**Recollection, as understood in respect to the spiritual life, means attention to the presence of God in the soul. It includes the withdrawal of the mind from external and earthly affairs in order to attend to God and Divine things. It is the same as interior solitude in which the soul is alone with God. This recollection is twofold: one which may be acquired by our own efforts aided by the ordinary grace of God. Thus any devout soul can acquire the habit of thinking of God’s presence and of fixing attention upon Him and His Divine perfections. This is called active recollection. The other, called passive, does not depend upon our own efforts, but is an extraordinary gift, by which He summons the whole faculties of the soul and manifests His presence and His perfections; this kind of recollection is classed by mystical writers as the first degree of infused contemplation. The common reason of recollection belongs to ascetical devotion and practice. It is necessary for all who wish to attain Christian perfection. Without it, it is most difficult to make progress in virtue. Therefore, it is necessary to observe the means by which it may be acquired. These are: (1) silence and solitude, according to our state of life, keeping in mind, at the same time, that one may be recollected amidst the duties of an active life; (2) the avoidance of distracting and dissipating occupations not dictated by reason or required by necessity. Multiplicity of occupations is an obstacle to recollection. Father Faber says that the man who undertakes too much is a foolish man, if not a guilty one. (3) The frequent exercise of the presence of God. As recollection is itself an application of the mind to the Divine presence within us, it is evident that the shortest way to its acquisition is frequently to call to mind that our souls are the temples of God.

**Rector (Lat. regere, to rule).—**Priests who preside over missions or quasi-parishes are called rectors: in England and the United States they are removable and irremovable, or permanent. These latter are known also as diocesan rectors (M. G). A rector is applied likewise to the heads of universities, seminaries, and colleges; to the local superiors of religious houses of men; to the pope, as rector of the world, in the conferring of the tiara. In some universities, e. g. Louvain, the actual rector is known as rector magnificus. Rector general is the title given to the superior general of certain religious, e.g. Clerics Regular of the Mother of God. In ancient times bishops as rulers of cities and provinces, especially in the Papal States, were called rectors; also administrators of the patrony of the Church (e. g. rector Sicilici). To a rector who has resigned is often given the title rector emeritus. One who supplies the place usually occupied by a rector is styled pro-rector (in parishes, administrator), while assistants to rectors in institutions are known as vice-rectors (in parishes, as curates, assistant, or associate, rectors etc.). Rector is used by Gregory the Great in the “Regula Pastoralis” as equivalent to pastor.

**ANDREW B. MEHAN.**

**Rector Potens, Verax Deus, the daily hymn for Sext in the Roman Breviary, finds its theme in the west heat and light of the day (the fourth, or sixth hour of the day) sun, and prays the Almighty Ruler to take from the heart the heat of passion. Baudot (“The Roman Breviary"), London, 1909, 34) thinks the hymn "probably" by St. Ambrose: "We know, moreover, that the hymn for Vespers, Tenebrae, and None (probably also the hymn for Sext) are his." Perhaps, however, Baudot refers to other hymns ascribed to the saint by Bäumer ("Gesch. des Brevis," 1895, 135). Whatever probability attaches to the hymn for Sext and None, it affects especially that for Sext, none of the three being found in the oldest Benediction cycle, while all three are found in the later Celtic cycle. (For discussion of authorship, see RERUM DEI TENAX VIGOR.) It is interesting to note that the second stanza is in rhyme throughout:

Exatinge flammae litium, 
Auer calix noemoxium, 
Confer salutem corporum 
Ver支援 pacem orbdium.

Bisangti thinks the rhyme merely a matter of chance. Fumot thinks it deliberate, but no reason for it is offered. A more cogent reason in this fact for denying it to St. Ambrose. J ohner ("A New School of Gregorian Chant", tr. New York, 1906, 55) selects the first line to illustrate
his contention that whilst in ordinary speech anyone would pronounce the line thus: Rector potens verax Deus, a no less familiar error in its lower lines: Rector potens verax Deus. "In German (or English), this kind of thing is impossible. But that does not give us a right to forbid the composer of Gregorian melodies to make use of this and similar licentious phrasings. We Germans (and English-speaking people) frequently pronounce Latin suavely exaggerated accent that the words fall too heavily on the ear. Other nations, the French, for example, pronounce the words more smoothly, with a lighter accent."

(For the full argument, see pp. 55, 60.)

JULIAN, Dict. of. Hymanology, & c., for MSS., references, authors, first lines of trn, etc. To his list should be added the Catholic trs. of BISHAWE, Brevis Hymin and Missae Sequences (Lon- don, 1900); DONAHUE, Early Christian Hymns (New York, 1934); RUSSELL, Hymns Hororum in Irish Ecc. Record (1900), 231; HENRY, Hymns of the Little Hours in Ech. Revue (Sept., 1890), 204-09, with Latin text and commentary: PINCHOT, Les hymnes du breviare romain, 1 (Paris, 1874), 105-10, for text and comment. H. T. HENRY.

Recusants, English.—The first statute in which the term "Popish Recusants" is used is 35 Eliz. c. 2, "An Act for restraining Popish Recusants to somewhaires place of abode," which was passed in 1593. The statute defines a recusant as one "convicted for not repairing to some Church, Chapel or usual place of Common Prayer to hear Divine Service there, but forbearing the same contrary to the tenor of the laws and statutes heretofore made and provided in that behalf." The Recusancy Acts are: 1 Eliz. c. 2, 23 Eliz. c. 1, 29 Eliz. c. 6, 35 Eliz. c. 2, 3 Jac. 1. c. 5, 7 Jac. 1. c. 6, and 3 Car. 1. c. 2. But several statutes declare that other offences shall be deemed acts of recusancy, and that those convicted of them shall be deemed "popish recusants convict." As time went on there were other recusants who were not Catholics, but who for one reason or another refrained from attending the Church of England services. This fact must be remembered in dealing with the Recusancy lists, though, of course, far the larger number of recusants were Catholics. The number of recusants was very great, as may be seen by one instance adduced by J. S. Hannon in his pamphlet, "Convinced and Convicted," p. 50. An Order of Charles II (op. cit. inf.), where on one day (24 Feb., 1699) the names of 1755 recusants were presented in the single town of Thirsk. The recusancy laws were in force from the reign of Elizabeth to that of George III, though they were not always put into execution with equal vigour. Lists of recusants for various counties exist in the Pipe Rolls preserved in the Record Office, London. Others are to be found in the British Museum, Bodleian Library, and in various local archives.

EDWIN BURTON.

Redeemer, Feast of the Most Holy.—The feast is found only in the special calendar of some diocesan and religious orders, and first celebrated with proper Mass and Office on the Sunday after St. Valentine's Day, or on 23 October. In Venice this feast has been observed for more than three centuries with great solemnity. Moroni in his "Dizionario" gives some interesting data concerning the origin of this feast. In 1576 a plague broke out in Venice which in a few days carried off thousands of victims. To avert this scourge the Senate assented to the exhibition of the image of the Redeemer of mankind, and to offer therein each year on the third Sunday of July public and solemn services of thanksgiving. Scurrely had the plague ceased when they began to fulfil their vow. The church was designed by the famous Andrea Palmati, and the castle where it was laid by the painters Trevisan on 3 May, 1577.

The celebrated painters Paolo Veronese and Jacopo Tintoretto decorated the interior. The church was consecrated in 1592, and, at the urgent solicitations of Pope Gregory XIII, placed in charge of the Benedictine Fathers.

By consecration of Pope Benedict XIV, dated 8 March, 1749, the Congregation of the Most Holy Redeemer solemnizes this feast as a double of the first class with an octave on the third Sunday of July. The same congregation also keeps the feast as a greater double on 25 October and 25 February, and has, besides, the privilege of reciting once a month the votive office of the Most Holy Redeemer. In Rome also Pope Pius VIII introduced the feast and by a Decree of 8 May, 1860, the Sacred Congregation of Rites assigned it to 23 October and 25 February. The characteristics of the Mass and Office are joy and gratitude for the ineffable graces and benefits of the Redemption. This appears especially from the Introit "Gaudens gaudebo," from the antiphons of Lauds "Cantate Domino," from the Epistle "From St. Paul to the Ephesians, chap. i," "Blessed be the God and Father of our Lord Jesus Christ, Who hath blessed us with spiritual blessings in Christ". For this reason white is the colour of the vestments, and not red, as in the Mass of the Pas- trent.

JOSEPH WOZET.

Redeemer, Knights of the, a secular community founded in 1608 by the Duke of Monteno, Vincent Gonzaga, on the occasion of the marriage of his eldest son Francis II Gonzaga with Marguerite of Savoy. It was founded in honour of the Precious Blood of Jesus Christ, a relic of which has been venerated since time immemorial in the cathedral of Monteno. The诺mens of the order consisted of a crimson mantle embroidered with the cross on which were figured three drops of blood in a monstrance. The duke was invested with these insignia by his son, Cardinal Ferdinand Gonzaga, and with the approbation of Paul V proclaimed grand master of the order, a dignity inherited by his successors in the duchy. The duke in turn distributed the same insignia to fourteen knights chosen from the highest nobility of Monteno and the neighbouring states. The statutes of the order obliged the members to devote themselves to the defence of religion, the Holy See and their sovereign. This order lasted only a century. It disappeared when the last of its dukes, Ferdinand Charles, having died childless, the Emperor Joseph I in 1708 merged the duchy into his hereditary states.

See HERLAND, Origines des chevaliers ordre militaires (Antwerp, 1690).

CH. MOELLER.

Redemption, the restoration of man from the bondage of sin to the liberty of the children of God through the satisfactions and merits of Christ. The word redemption is the Latin Vulgate rendering of the Hebrew kaphar and Greek apótympōma, with the former meaning generally a ransom-price. In the New Testament, it is the classic term designating the "great price" (I Cor., vi, 20) which the Redeemer paid for our liberation. Redemption presupposes the original
elevation of man to a supernatural state and his downfall from it through sin; and inasmuch as sin calls down the wrath of God and produces man's servitude under evil and Satan, Redemption has reference to both God and man. On God's part, it is the acceptance of satisfaction made whereby the Divine holiness and the mercies of God are satisfied. On man's part, it is both a deliverance from the slavery of sin and a restoration to the former Divine adoption, and this includes the whole process of supernatural life from the first reconciliation to the final consummation. Double satisfaction, namely, God's satisfaction and man's restoration, is brought about by Christ's vicarious office working through satisfactory and meritorious actions performed in our behalf.

1. Need of Redemption.—When Christ came, there were throughout the world a deep consciousness of moral depravity and a vague longing for a restorer, pointing to a universally felt need of rehabilitation (see Le Camus, "Life of Christ", I, i). From that subjective sense of need we should not, however, hastily conclude to the objective necessity of Redemption. Is it not the memory only held against the Rationalist School, the low moral condition of mankind under paganism or even under the Jewish Law, is itself, apart from revelation, no proof positive of the existence of original sin, still less does it necessitate Redemption. Working in this double light, the Tendinist School, concerning both original sin and Redemption, some Greek Fathers, like St. Athanasius (De incarnatione, in P. G., XXV, 105), St. Cyril of Alexandria (Contra Julianum, in P. G., LXXV, 925), and St. John Damascene (De fide orthodoxa, in P. G., XCV, 963), so emphasized the fitness of Redemption as a remedy for original sin as to make it appear the sole and necessary means of rehabilitation. Their sayings, though qualified by the oft-repeated statement that Redemption is a voluntary work of mercy, probably inculcated by St. Augustine (De civitate Dei, iv. 28), I pronounce necessary in the hypothesis of original sin. That view is now commonly rejected, as God was by no means bound to rehabilitate fallen mankind. Even in the event of God deeming, out of his own free volition, the rehabilitation of man, theologians point out other means besides Redemption, e.g., Divine concordation pure and simple on the sole condition of man's repentance, or, if some measure of satisfaction was required, the mediation of an exalted yet created intercessor. In one hypothesis only is Redemption described as absolutely necessary and that is if God should demand an adequate compensation for the sin of mankind. The juridical axiom "honor est in honorante, injuria in injuriato" (honor is measured by the dignity of him who gives it, offence by the dignity of him who receives it) shows that mortal sin bears in a way an infinite malice and that nothing short of a person possessing infinite worth is capable of making full amends for it. True, it has been suggested that such a person might be an angel hypothetically united to God, but, whatever be the merits of this view, St. Paul practically disposes of it with the remark that "both he that sanctifieth, and they who are sanctified, are all of one" (Heb., ii, 11), thus pointing to the God-Man as the real Redeemer.

11. Mode of Redemption.—The real Redeemer is Jesus Christ, who, according to the Nicene creed, "for us men and for our salvation descended from Heaven; and was incarnate by the Holy Ghost of the Virgin Mary and became man. He was also crucified for us, suffered under Pontius Pilate and was buried." The energetic words of the Apostle to the Hebrews, "I lift up my eyes unto the hills, from whence cometh my help; for he thatDubnamed, against the Philistines, point to incarnation and sacrifice as the groundwork of Redemption. Incarnation, or the personal union of the human nature with the Second Person of the Blessed Trinity, is the necessary basis of Redemption because this, in order to be efficacious, must include as attributions of the one Redeemer both the humiliation of man, without which there would be no satisfaction, and the dignity of God, without which the satisfaction would not be adequate. "For an adequate satisfaction," says St. Thomas, "it is necessary that the act of him who satisfies should be made in the nature of one who is both God and Man." (III, Q. 1, a. 2, ad 2am). Sacrifice, which always carries with it the idea of suffering and implication (see Lagrange, "Religions semiennes", 244), is the complement and full expression of Incarnation, namely, by which the angelic hands operation, owing to its infinite worth, would be sufficient for Redemption, yet it pleased the Father to demand and the Redeemer to offer. His labours, passion, and death (John, x., 17-18). St. Thomas (III, Q. xli, a. 6, ad 6am) remarks that Christ, wishing to liberate man not only by way of power but also by way of justice, sought both the high degree of power which flows from His Godhead and the maximum of suffering which, according to the human standard, would be considered sufficient satisfaction. It is in this double light of power and justice that we should always view the two concrete factors of Redemption, namely, the satisfaction and the merits of Christ.

A. Satisfaction of Christ.—Satisfaction, or the payment of a debt of full reparation, in the moral order, an acceptable reparation of honor offered to the offended and, of course, implies a penal and painful work. It is the unmistakable teaching of Revelation that Christ offered to His heavenly Father His labours, sufferings, and death as an atonement for our sins. The classical passage of Isaiah (lii, iii), the Messianic character of which is recognised by both Rabbinical interpreters and New Testament writers (see Condivin, "Le livre d'Isaie", Paris, 1905), graphically describes the servant of Jehovah, that is, the Messias, Himself innocent and unoffending, who took upon Himself the sorrows of the whole human race and bore them with patience and resignation, in order to save us from our sins. St. Paul (Rom., xii, 1) teaches that every Christian should imitate this sacrifice of Jesus Christ, and that all Christians have in the Church a share in this sacrifice. The word "sacrifice" does not always mean to offer a thing to God, but to offer it for a cause, as when St. Paul says, "Let us therefore offer to God continual sacrifice of praise, th'offering of prayer being acceptable according to the will of God" (Heb., xi, 4). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., xii, 11). The service of God is often said to be a sacrifice, as when St. Paul says, "...we serve the Lord Christ." (Rom., x27, 28). In view of this and of the very explicit assertion of St. Peter (I Pet., i, 11) and St. John (i, 2) the Modernists are not justified in contending that "the dogma of Christ's expiatory death is not evangelical but Pauline," (prop. xxxviii condemned by the Holy Office in the Decree "Lamentabili", 3 July, 1907). Twice (I Cor., xii, 23; xv, 3) St. Paul disclaims the authorship of the dogma. He is, however, of all the New Testament writers, the best expounder of it. The redeeming sacrifice of Jesus is the theme and burden of the whole Epistle to the Hebrews, and in the other Epistles, which most exactly criticise regard as surely Pauline, there is all but a set theory. The main passage is Rom., iii, 23 sq.: "For all have sinned, and do need the glory of God. Being justified freely by his grace, through the redemption, that is in Christ Jesus. Whom God hath proposed to be a propitiation, through faith in his blood, to the shewing of his justice, for the remission of former sins." Other texts, like Eph., ii, 16; Col., i, 20; and Gal., iii, 13, repeat and emphasise the same thought.

The early Fathers, engaged as they were by the problems of Christology, have added but little to the soteriology of the Gospel and St. Paul. It is not true, however, to say with Ritschl ("Die christliche Lehre von der Rechtfertigung und Versöhnung", Bonn, 1889; Harnack ("Précis de l'histoire des dogmes",..."
REDEMPTION

tr. Paris, 1893), Sabatier ("La doctrine de l'expiation et son application historique", t. III, 908) that they view Redemption "as the desecration of human virtue by incarnation and knew nothing of Christ's vicarious satisfaction. "An impartial inquiry", says Rivière, "clearly shows two tendencies: one idealistic, which views salvation more as the supernatural restoration of a fallen mankind to an image of the Divine, the other realistic, which considers it rather as the expiation of our sins through the death of Christ. The two tendencies run side by side with an occasional contact, but at no time did the former completely absorb the latter. Salvation enjoyed by our realistic an 'act through the death of Christ' (Le dogme de la rédemption, p. 209). St. Anselm's famous treatise "Cura Deo homo" may be taken as the first systematic presentation of the doctrine of Redemption, and, apart from the exaggeration noted above, contains the synthesis which became dominant in Catholic theology. Far from being adverse to the satisfactive victrix popularized by St. Anselm, the early Reformers accepted it without question and even went so far as to suppose that Christ endured the pains of hell in our place. The Divine life of Jesus, as St. Caius (d. 1592) in his "De Deo servitore" was the first who attempted to replace the traditional dogma of Christ's vicarious satisfaction by a sort of purely ethical exemplarism. He was and is still followed by the Realists, in which sects we see the doctrine of justification all but defined by the Church, a spirit of vindictiveness unworthy of God and a subversion of justice in substituting the innocent for the guilty. "The vindictiveness of a piece of gross anthropomorphism, comes from confusing the sin of revenge and the virtue of justice. The charge of injustice ignores the fact that Jesus, the juridical head of mankind (Eph., i, 22), voluntarily offered Himself (John, x, 15), that we might be saved by the grace of one Saviour even as we had been lost by the fault of the one Adam (Rom., v, 15). It would be a crude conception indeed to suppose that the guilt or culpability of men passed from the consciences of men to the conscience of Christ: the penalty alone was voluntarily assumed by the Redeemer and, in paying it, He washed away our sins and restored us to our former supernatural state and destination.

B. Merits of Christ.—Satisfaction is not the only object and value of Christ's theandric operations and sufferings; for these, beside placating God, also benefit man in several ways. They possess, in the first place, the merit of instruction, by which man is brought to the right path and proper to prayer, according to John, xi, 42: "And I knew that thou hearest me always." However, as satisfaction is the main factor of Redemption with regard to God's honour, so man's restoration is due principally to the merits of Christ. That merit, or the quality which makes human acts worthy of a reward at the hands of another, attaches to the works of the Redeemer, is apparent from the easily ascertained presence in them of the usual conditions of merit, namely (1) the wayfarer state (John, i, 14); (2) moral liberty (John, x, 18); (3) conformity to the ethical standard (John, viii, 29); and (4) Divine promise (Is., iii, 10). Christ merited for Himself, not indeed grace nor essential glory which were both given to Him at the union of the two natures, but additional honour (Heb., ii, 9) and the exaltation of His name (Phil., ii, 9-10). He also merited for us. Such Biblical phrases as to receive "of his fulness" (John, i, 16), to be blessed with His blessings (Eph., i, 3), to be made alive in Him (I Cor., xv, 22), to owe Him our eternal salvation, as (v. 20), are a communiation of the union from us to Him and that at least by way of merit. The Council of Florence (Decretum pro Jacobitis, Denzinger-Bannwart, n. 711 (602)) credits man's deliverance from the dominion of Satan to the merit of the Mediator, and the Council of Trent (Sess. V, cc. iii, vii, xvi and canon iii, x) repeatedly connects the merits of Christ and of the development of our supernatural life in its very substance. The Church of Session V says anathema to whoever claims that original sin is cancelled otherwise than by the merits of one Mediator, Our Lord Jesus Christ, and canon x of Session VI defines that man cannot merit without grace through which Christ merited our justification.

The objects of Christ's merits for us are the supernatural gifts lost by sin, that is, grace (John, i, 14, 16) and salvation (I Cor., xv, 22); the prenatural gifts which are not the gifts of the state in the state of innocences are not, at least in this world, restored by the merits of Redemption, as Christ wishes us to suffer with Him in order that we may be glorified with Him (Rom., vii, 17). St. Thomas, explaining how Christ's merits pass on to us, says: Christ merits for others as other men in the state of grace merit for themselves (III, Q. xlix, a. 1). With us merits are essentially personal. Not so with Christ who, being the head of our race (Eph., iv, 15; v, 23), has, on that score, the unique prerogative of communicating to the subordinate personal members of humanity. In Him, in His state of Deification of the Holy Ghost," says Schwelm, "which impels us individually through the various stages of grace toward life eternal, impels Christ but as the leader of all; and so the same law of efficacious Divine grace and of the universality of Christ's merits and the universality of Christ's merits (Le Christ, 422). It is true that the Redeemer associates others to Himself "For the perfecting of the saints, . . . for the edifying of the body of Christ" (Eph., iv, 12), but their subordinate merit is only a matter of imitation and creates no right, whereas Christ's, on the sure ground of His dignity and mission, can claim for us a participation in His Divine privileges.

All admit, in Christ's meritorious actions, a moral influence moving God to confer on us the grace through which we merit. Is that influence merely moral or does it effectively concur in the production of grace? From such passages as Luke, vi, 19, "virtue went out from him", the Greek Fathers insist much on the μόρφος περιστάσεως or τις εισόδημα, of the Sacred Humanity, and St. Thomas (III, Q. xlix, a. 6) speaks of a sort of efficacia whereby the actions and passions of Christ, as vehicle of the Divine power, cause grace by way of instrumental force. Those two modes of action do not exclude each other: the same act or set of acts of Christ may be and probably are endowed with twofold effect: one, proper to prayer, according to John, xi, 42: "And I knew that thou hearest me always." However, as satisfaction is the main factor of Redemption with regard to God's honour, so man's restoration is due principally to the merits of Christ. That merit, or the quality which makes human acts worthy of a reward at the hands of another, attaches to the works of the Redeemer, is apparent from the easily ascertained presence in them of the usual conditions of merit, namely (1) the wayfarer state (John, i, 14); (2) moral liberty (John, x, 18); (3) conformity to the ethical standard (John, viii, 29); and (4) Divine promise (Is., iii, 10). Christ merited for Himself, not indeed grace nor essential glory which were both given to Him at the union of the two natures, but additional honour (Heb., ii, 9) and the exaltation of His name (Phil., ii, 9-10). He also merited for us. Such Biblical phrases as to receive "of his fulness" (John, i, 16), to be blessed with His blessings (Eph., i, 3), to be made alive in Him (I Cor., xv, 22), to owe Him our eternal salvation, as (v. 20), are a communiation of the union from us to Him and that at least by way of merit. The Council of Florence (Decretum pro Jacobitis, Denzinger-Bannwart, n. 711 (602)) credits man's deliverance from the dominion of Satan to the merit of the Mediator, and the Council of Trent (Sess. V,
that the Humanity of Christ is finite and that the qualification of infinite would make all Christ's actions equal and place each of them on the same level with His sublime surrender in the Garden and on Calvary. However the word and the idea passed into current theology and were even officially adopted by Clement VI (Extravag. Com. Unigenitus, V, ix, 2), the reason given by the latter, "propter unionem ad Verbum", being the identical one adduced by the Fathers.

It is true that, according to the axiom "actiones sunt suppositorum", the value of actions is measured by the dignity of the person who performs them and whose expression and coefficient they are, therefore the theandric operations must be styled and are infinite because they proceed from an infinite person. So, not only the finite intrinsic worth of the theandric operations is replaced by the extrinsic acceptance of God, it is altogether proof against the charge of Nestorianism levelled at it by Catholics like Schwane and Rationalists like Harnack. His arguments proceed from a double confusion between the person and the nature, between the agent and the objective conditions of the act. The Sacred Humanity of Christ is, no doubt, the immediate principle of Christ's satisfactions and merits, but that principle (principium quod) can be also the Person of the Word (principium quod), borrows from it the ultimate and fixed value, in the present case infinite, of the actions it performs. On the other hand, there is in Christ's actions, as in our own, a double aspect, the subjective and the objective, only are they uniform and equal while, viewed objectively, they must needs vary with the nature, circumstances, and finality of the act.

From the adequacy and even superabundance of Redemption as viewed in Christ our Head, it might be inferred 'that there is neither need nor use of personal effort on our part towards the performance of satisfactory works or the acquisition of merits. But the inference would be fallacious. The law of cooperation, which obtains all through the providential order, governs this matter particularly. It is only through, and in the measure of, our cooperation that we appropriate to ourselves the satisfactions and merits of Christ. When Luther, after denying human liberty on which all good works rest, was driven to the manifestly absurd conclusion that faith alone is the sole means of appropriating the fruits of Redemption, he not only fell short of, but also ran counter to, the plain teaching of the New Testament calling upon us to deny ourselves and carry our cross (Matt., xvi, 24), to walk in the footsteps of the Crucified (I Pet., ii, 21), to suffer with Christ (Phil., iii, 1), in order to be a co-redeemer with Him (Rom., viii, 17), in a word to fill up those things that are wanting to the sufferings of Christ (Col., i, 24). Far from detracting from the perfection of Redemption, our daily effort toward the imitation of Christ are the test of its efficacy and the fruits of its fecundity.

"All our glory", says the Council of Trent, "is in Christ in whom we live, and merit, and satisfy, doing worthy fruits of penance which from Him derive their virtue, by Him are presented to the Father, and through Him find acceptance with God" (Sess. XIV, c. viii).

IV. Universality of Redemption.—Whether the effects of Redemption reached out to the angelic world or to the earthly paradise is a disputed point among theologians. When the question is limited to fallen man it has a clear answer in such passages as I John, ii, 2; I Tim., ii, 4, iv, 10; II Cor., v, 15; etc., all bearing out the Redeemer's intention to include in His saving work the universality of men without exception. Some apparently restrictive texts like Matt., xx, 28, xxvi, 28, Rom., v, 15; Heb., ix, 28, where the words "men of old" or "many" (most inadequate), are used in reference to a certain extent of Redemption, should be interpreted in the sense of the Greek phrase τούτων τῶν, which means the generality of men, or by way of comparison, not between a portion of mankind included in, and another left out of, Redemption, but between Adam and Christ. In the determination of the many problems that arose from this point in which the Church was guided by the principle laid down in the Synod of Quierzy [Denzinger-Bannwart, n. 319 (2821)] and the Council of Trent [Sess. VI, c. iii, Denzinger-Bannwart, n. 785 (6777)] wherein a sharp line is drawn between the universal of Redemption and its actual application in particular cases. The universal power has been maintained against the Predestinarians and Calvinists who limited Redemption to the predestinate (cf. the councils named above), and against the Jansenists who restricted it to the faithful or those who actually come to faith (prop. 4 and 5, condemned by Alexander VIII, in Denzinger-Bannwart, 1294-5 (1161-2)) and the latter's contention that it is a Semipelagian error to say that Christ died for all men has been declared heretical [Denzinger-Bannwart, n. 1086 (970)].

The opinion of Vasques and a few theologians, who placed children dying without baptism outside the pale of Redemption, is commonly rejected in Catholic schools. In such cases no tangible effects of Redemption are ascribed to them, deposing them outside the redeeming virtue of Christ. They are not excluded by any Biblical text. Vasques appeals to I Tim., ii, 3-6, to the effect that those children, not having any means or even possibility to manifest any sign of grace, do not seem to be included in the saving will of God. But 11 infants at all, the text would exclude likewise those who, as a matter of fact, receive baptism. It is not likely that Redemption would seek adult infants laden with personal sins and omits infant labouring under original sin only. Far better say with St. Augustine: "Nuncupavuli homines non sunt, ut non pertinent ad eos quod dictum est: vult omnes salvos fieri?" (Contra Julianum, IV, xliii).

With regard to the de facto application of Redemption in particular cases, it is subject to many conditions, the principal being human liberty and the general laws which govern the world both natural and supernatural. The Universalists' contention that all should finally be saved lest Redemption be a failure, not only unproved by, but also opposed to, the New Dispensation, is far from corroborating the general laws of the natural order, places in the way of salvation many indispensable conditions or laws of a freely established supernatural order. Neither should we be moved by the reproaches of failure often levelled at Redemption because of the place it gives to the free will, at whose disposal the centuries of Christianity, a comparatively small portion of mankind has heard the voice of the Good Shepherd (John, x, 16) and a still smaller fraction has entered the true fold. It was not within God's plan to illumine the world with the light of the Incarnate Word at once, since he waited thousands of years to send the Desired of the Nations. The laws of progress which obtain everywhere else govern also the Kingdom of God. We have no criterion whereby we can tell with certainty the success or failure of Redemption, and the mysterious influence of the Redeemer may reach farther than we think in the present as it certainly has a retroactive effect upon the past. There can be no other meaning to the very comprehensive terms of Revelation. The graces accorded by God to the countless generations preceding the Christian era, whether Jews or Pagans, were, by anticipation, the graces of Redemption. There is little sense in the trite dilemma that Redemption could benefit neither those who were already saved nor those who were forever lost, for the Just Judge and Law owed their salvation to the merited merits of the coming Messias and the damned lost their souls because they spurned the graces of illumination and
good will which God granted them in prevision of the saving works of the Redeemer.

V. Titles and Offices of the Redeemer.—Besides the names Jesus, Saviour, Redeemer, which directly express the work of Redemption, there are other titles commonly attributed to Christ because of certain functions which are either implied in or connected with Redemption, the principal being Priest, Prophet, King and Judge.

A.—The sacerdotal office of the Redeemer is thus described by Manning (The Eternal Priesthood, I): "What is the Priesthood of the Incarnate Son? It is the office he assumed for the Redeption of the world by the oblation of Himself in the victim of our mankind. He is Altar, Victim, and Priest by an eternal consecration of Himself. This is the priesthood forever after the order of Melchisedek who was without beginning of days or end of life—a type of the eternal priesthood of the son of God." As sacrifice, if not by the nature of things, at least by the positive ordinance of God, is part of Redemption, the Redeemer must be a priest, for it is the function of the priest to offer sacrifices as an act of devotion in order to induce the newly-converted Jew to abandon his old priesthood and to cling to the High Priest who entered heaven, St. Paul, in his Epistle to the Hebrews, extols the dignity of Christ's sacerdotal office. His consecration as a priest took place, not from all eternity, but on the parting from the Father, as some of the theologians seem to imply, but in the fulness of time and through the Incarnation, the mysterious union which made Him priest being none else than the Hypostatic Union. His great sacrificial act was performed on Calvary by the oblation of Himself on the Cross, is continued on earth by the Sacrifice of the Mass and consummated in heaven through the sacrificial intention of the priest and the glorified wounds of the victim. The Christian priesthood, to which is committed the dispensation of the mysteries of God, is not a substitute for, but the prolongation of the priesthood of Christ: He continues to be the offerer and the oblation; all that the consecrated and consecrating priests do, in their ministerial capacity, is to "show forth the death of the Lord" and apply the merits of His Sacrifice.

B.—The title of Prophet applied by Moses (Deut., xviii, 15) to the coming Messiah and recognized as a valid claim by those who heard Jesus (Luke, vii, 16), means not only the foretelling of future events, but also the chief of the missions or public office of the name of God. Christ was a Prophet in both senses. His prophecies concerning Himself, His disciples, His Church, and the Jewish nation, are treated in manuals of apologetics (see Melivane, "Evidences of Christianity," lect. V-VII; Lezourc, "Jésus-Christ," 12th ed. by Le Prophète). Of teaching power (Matt., vii, 29), a necessary attribute of His Divinity, was also an integral part of Redemption. He who came "to seek and to save that which was lost" (Luke, ix, 10) should possess every quality, Divine and human, that goes to make the efficient teacher. What Isaiah (lv, 4) foretold, "Behold I have given him for a witness to the people, for a leader and a master to the Gentiles," finds its full realisation in the history of Christ. A perfect knowledge of the things of God and of man's needs, Divine authority and human sympathy, precept and example combine to elicit from all generations the praise bestowed on Him by His hearers—"never did man speak like this man" (John, vii, 46).

C.—The kings and the frequent bestowal on the Messiah of the Old Testament writers (Ps. ii, 6; Isa. ix, 6, etc.) and openly claimed by Jesus in Pilate's Court (John, xviii, 37) belongs to Him not only in virtue of the Hypostatic Union but also by way of conquest and as a result of Redemption (Luke, i, 32). Whether or not the temporal dominion of the universe belonged to His royal power, it is certain that He understood His Kingdom to be of a higher order than the kingdoms of the world (John, xvii, 36). The spiritual kingship of Christ is essentially characterized by its final object which is the supernatural welfare of men, its ways and means which are the Church and the sacraments, its members who are only such as, through grace, have acquired the title of adopted children of God. Supreme and universal, it is subordinate to no other and knows no limitations of time or place. While the kingly functions of Christ are not always performed visibly as in earthly kingdoms, it would be a contradiction to them to refer Christ's Kingdom as a merely ideal system of thought. Whether viewed in this world or in the next, the "Kingdom of God" is essentially hierarchic, its first and last stage, that is, its constitution in the Church and its consummation in the final judgment, being official and visible acts of the King.

D.—The Judicial office so emphatically asserted in the New Testament (Matt., xxv, 31; xxvi, 64; John, v, 22 sq., Acts, x, 42) and early symbols (Densinger-Bannwart, nn. 1—41 (1—13)) belongs to Christ in virtue of His Divinity. And just as the triumph of Redemption is considered at the right hand of God, in token not only of rest after the labours of His mortal life or of glory after the humiliations of His Passion or of happiness after the ordeal of Golgotha, but also of true judicial power (St. Augustine, 'De Div. Lib. XI, c. 21), so the Lord's power over living and the dead. His verdict inaugurated in each individual conscience will become final at the particular judgment and receive a solemn and definitive recognition at the assaults of the last judgment. (See Atonement.)

OXENHAM, The Atonement (London, 1881); RIVIÈRE, Le dogme de la Rédemption (Paris, 1905); HUDSON, Le mystère de la Rédemption (Paris, 1910); GAULIN, La sacrenerie et le sacrement d'extasie (Paris, 1906); HULL, Outline of dogmatic theology (New York, 1894); WIL- liam and Scannell, Manual of Catholic theology (London, 1901); THOMAQUERIE, Synopsis theologica dogmatique (Rome, Fournel, Paris, 1909), with a good bibliography, 114, 404, and passim; RIVIÈRE, Christiane des Bédories (Linz, 1903), MOTT, Historial Christi als derwobener Gemüthen (Ratisbon, 1892), J. F. SOLLIER.

Redemption in the Old Testament means either strictly deliverances by payment of a price or ransom, or simply deliverance by power, as from oppression, violence, captivity, etc. In the Hebrew Text, the idea of redemption is directly expressed by the verbs גָּדִיא p’ddah, and by their derivatives to which the idea of redemption is intimately connected. Of these two verbs, the former, גָּדִיא, is used technically in the Mosaic Law, of the redemption by price of an inheritance, or of things vowed, or of tithes; the latter, p’ddah, of redeeming the first-born of children or of animals. Outside the Law, and in relation to the Mosaic throne, redemption is specifically that of man from sin by Christ's death. The idea is distinctly expressed by the verb נָפּוֹשׁ (from נָפְשׁוּ, a verb 'to find') and its derivatives, it is the opposite of נָפְשׁוּ, conveyed by the term יָמָּס (to buy, to purchase) and by its compound יָמָּס. The following is simply a treatment of legal redemption.

I. Redemption of Persons.—The first-born male of every Jewish family was consecrated to Yahweh and had to be redeemed at the price of five sicles or about $2.75 (Ex., xiii, 2, 13; Num., xviii, 16; etc.). Every other Israelite, whether male or female, could be consecrated to God by a personal vow, or by the vow of those to whom he or she belonged. Jephthah's voluntary dedication of his daughter to Yahweh for his vow concerning her (Judges, xi, 31-39), was contrary to the Law. Many Israelites carried out their dedication to God, under the form of the Nazarite vow. Most, however, availed themselves of the redemption allowed by the Law. The sum then to be
paid as ransom for males between 20 and 60 years of age, 50 sacred sicles; for females of a similar age, 30 sicles; for boys between 5 and 20 years old, 20 sicles, one out of 10 girls of a corresponding age, 10 sicles; for male children from one month to 5 years of age, 5 sicles; and for those of the female sex, 3; and finally, for old men over 60 years of age, 15 sicles, and for old women, 10. The poor who could not afford this amount had to pay the price fixed by the priest, according to their means (Lev., xxvii, 2–8). Persons lying under anathema could not be redeemed.

II. REDEMPTION OF ANIMALS.—According to the Mosaic Law, the first-born male of animals was sacred to the Lord, and, if a first-born of legally clean animals, and a lamb or kid was offered in sacrifice. As unclean animals should not be immolated to Yahweh, their first-born was either to be redeemed according to the valuation of the priest, with the addition of one-fifth of the value, or be sold and the price given to the priest (Lev., xxvii, 27). The first-born of an ass, however, had to be redeemed with a lamb, or, if not redeemed, put to death (Ex., xiii, 13). Outside of the first-born, any animal could be dedicated to God by vow. It could be redeemed only if it were legally unfit for sacrifice, in which case the price for it was given to the priest, with the valuation of the priest, to which was added one-fifth of the value (Lev., xxvii, 11–13).

III. REDEMPTION OF LAND, HOUSES, AND TITHES.—The land possessed which, in whole or in part, an Israelite sold by poverty, or sold by private treaty, could be redeemed by his next of kin (the Go’el), or by the man himself when again able to do so. The redemption price was then fixed according to the number of years yet to elapse before the Jubilee Year, at which time the property would have freely reverted to its original owner or heir. A piece of land dedicated to God could also be redeemed. Its value was reckoned according to the amount of seed required to sow it, and a reduction made in proportion to the number of years till the next Jubilee Year. The owner of the land might redeem it at this price, plus one-fifth; and if unredeemed, it went to the priestly domain at the year of Jubilee. But if the dedicant of the land had himself purchased it from a third person who had sold it because of his poverty, then at the Jubilee it reverted to the latter, and the dedicant had to compensate the priestly sanctuary by double its redemption price calculated as before (Lev., xxvii, 16–25). With regard to the redemption of sold houses, the Law distinguished between dwellings in walled cities and dwellings in unvalled places. For the former houses, the right of redemption lasted only a full year from the day of sale, at the eves, which they fell forever to their respective purchaser. For the latter, there was no term fixed for their redemption, and if unredeemed before the Jubilee they then freely reverted to their original owners. The houses of the Levites, however, could be redeemed at any time, and reverted to them if unredeemed before the year of Jubilee (Lev., xxv, 29–34). Houses which had simply vowed to God could be ransomed upon the payment of the value fixed by the priest, plus one-fifth of that value (Lev., xxvii, 14, 15).

The tithes were paid to the Lord, to the local community and to God, and hence could not be made the subject of a redemption. Tithes of agricultural produce might be commuted for their money value, plus one-fifth; but the tithes of cattle could not be redeemed (Lev., xxxi, 31–33).

Francis E. Gigot.

REDEMPTION OF CAPTIVES, ORDER FOR THE. See MERCERIANS.

REDEMPTIONS, PENTENTIAL, the substitution of exercises (especially alms-deeds), either easier or extending over a shorter period, for works of penance imposed according to the penitential canons. These dispensations allow an alleviation, or a shortening of the time of penance; they thus resemble an indulgence, and have a place in the history of indulgences. Among the Anglo-Saxons and the Irish, as manifested by their penitential books, the fundamental idea was displayed in proportion to the number and gravity of the sins, and it was a ceremony of the Church. The confessor imposed a certain number of penitential acts, prayers, fasts, flagellations, alms-deeds etc., extending over a more or less considerable period; hence arose quite naturally the desire to condense the penance into a shorter time. The priest might fix them in each case, but the penitential books show that there actually was a sort of scale in current use. Three things were considered in determining the new works: the penances already imposed, the difficulty of the penitent's accomplishing them, and finally his material condition, especially in the case of alms-deeds. Thus one unable to fast could replace fasting by the Psalter (fifty psalms); an alms of twenty solidi (for the poor, ten solidi or even less) replaced fasting of seven weeks (a curia). A penance of a week, a quarantine, or a fine of thirty-twelvemonths. A similar practice is attested in the collections of the Irish canons (Wasserschleben, "Die Bussordungen", Halle, 1851, 193) show nine methods of accomplishing a year's penance in a short time. It was even attempted to have the penance performed by others (cf. "Leges" or "Penantiale" of Eadgar in Har. Douin, "Concilia", VI, i, 699 sq.), but these substitutions, accessible only to the great, were a contradiction of penance and were severely condemned (cf. Conc. of Clovesho of 747, can. xvi–xxvii). The redemptions considered in the penitential books had only practical and not official value; however, they were officially adopted by several councils. Thus the Council of Tribur of 895 (can. iv), in determining the penance for a homicide, authorizes the redemption (while travelling or at war) of the fast on Tuesday, Thursday, or Saturday, by paying a denier, or by caring for three poor. Eventually these redemptions were offered indiscriminately to all, especially at the Council of Clermont of 1095 (can. ii), when the crusade was suggested as a ransom from all penance. This was the modern indulgence, save that in the case of an indulgence the penance to be redeemed has not been imposed on individuals, but to the proposed work is attached by ecclesiastical authority a reduction of penitential satisfaction. (See INDULGENCES.)

A. Boudinon.

REDEMPTORISTINES.—The cradle of the Redemptoristines is Scala, not far from Amalfi, Italy. Father Thomas Falcoia, of the Congregation Più Operarii, formed a community of nuns there and gave them a rule. Later he became Bishop of Casttellammare. He was director of St. Alphonsus when a new rule was said to have been given to St. Maria Celeste Crosterosca. The bishop favoured the rule and asked Alphonsus to give the nuns the spiritual exercises and to organize the community as he judged best for the glory of God. The saint disposed them for the observance of the new rule by meditation on the life and virtues of Christ. The details of their daily life were to commemorate phases of His life.
Zeal was to be exercised by prayer, each day of the week being devoted to an object affecting the well-being of the Church. They were to pray in a special manner for the apostolic works of the Redemptorists. The habit is deep red, and the scapular and choir-mantle blue. The institute began on 23 May, 1731. A second monastery was founded by Alphonse at his bishopric, in his episcopal city, St. Agatha of the Goths. Nearly a hundred years after the foundation at Scals, the Ven. Joseph Passerat sent two ladies, Mlle. Eugénie Dijon and the Countess Welsersheim, to St. Agatha to learn the rule and sparrow the setting up a reciting convent, this convent is at Rome from Cardinal Odenthal. They founded houses at Vienna and Bruges. Convents of the institute now exist in Austria, Bavaria, Belgium, France, Holland, Ireland, England, the Tyrol, Spain, and Canada. The rule was approved by Benedict XIV in 1750. (See Alphonse Maria Liguori, Saint; PASSERAT, VRERIABLE JOSEPH.)

DUMONTIER, Les premières rédemptoristes (Bruges, 1884) contains a notice on the institute; HUGUES, Vie de deux religieuses redemptoristes (Tournai, 1844); DUMONTIER, Fleurs de l'institut des redemptoristes (Tournai, 1910); Beat. et canoniz. S. D. Sororia Maria Celeste Crocetiana.

J. MAGNIER.

Redemptorists (Congregation of the Most Holy Redeemer), a society of missionary priests founded by St. Alphonsus Maria Liguori, 9 Nov., 1732, at Scals, near Amalfi, Italy, for the purpose of labouring among the neglected country people in the neighbourhood of Naples. The Redemptorists are essentially and by their specific vocation a missionary society. According to their rule they are "to strive to imitate the virtues and examples of Jesus Christ, Our Redeemer, especially the Passion, and to spread to the preacher of the word of God to the poor". They take the simple vows of poverty, chastity, and obedience, and by the vows of poverty they are bound to refuse all ecclesiastical dignities outside of the congregation. To these vows they add the vow and oath of perseverance to live in the congregation until death. Their labours consist principally in missions, retreats, and similar exercises. In order to render these labours most effective, all their sermons and instructions should be solid, simple, and persuasive. On Sundays they are obliged to preach at least one sermon on prayer and one on the intercession of the Blessed Virgin Mary. In order to secure the salutary effects of their missions, they should, after four or five months, return to the places where they have gone and preach another, short course of sermons. On missions proper the rule obliges them to hear all the confessions themselves. Wherever the Redemptorists have parishes they labour in the same spirit, both in the pulpits and in the confessionals. One of the great means of preserving truly religious fervor among all classes of the faithful is the Archconfraternity of the Holy Family, which they establish in all their parishes. These are also most solicitous in providing well-equipped parochial schools, and they take special care of growing youth.

Within ten years of the order's foundation, permanent establishments were made at Nocera, Citran, Iliceto, and Capoosee. In 1749 Benedict XIV canonically approved the work, under the title of the Congregation of the Most Holy Redeemer. Redemptorists were sent to Sardinia, Cremona, and Alonza, and to the new superior general, Pietro Paulo Blasucci, who governed the congregation until 1817. In the next six years several houses were opened in different parts of Southern Italy and Sicily, and the society flourished, though subjected to many grave trials. It was destined, however, to take on an international character. In 1785 a young Austrian, Clemens Maria Hofbauer, journeyed to Rome with a companion, Thaddeus Hübli. There they were deeply improved by the fervour of the Fathers of the church of St. Julian, and applied for admission into the community. After profession and ordination, their chief desire was to transplant the congregation to northern countries. They received permission from the general to establish a house in Vienna, and so in any other Austrian city. But the Government was unfriendly, and Father Hofbauer offered his services to the Congregation of the Propaganda at Rome. He was sent to labour for a time in Courland, Russia. In 1786, with his former companion, Father Hübli, he arrived at Warsaw, where the papal nuncio Saluzzo gave them charge of St. Benno's church, whence they were known in Poland as "Bennonites". Their apostolic zeal and untiring efforts procured the salvation of many souls, and effected the conversion of many heretics and Jews. While they were there they presented the spectacle of an uninterrupted mission. In 1793 Father Blasucci, the rector major, then residing at Nocera, appointed Father Hofbauer his vicar-general with all necessary authority. His first thoughts turned to Germany, although some seemed inopportune, since Febronianism, Josephism, Freemasonry, and infidelity held sway all over Europe. He succeeded, however, in establishing three foundations in Southern Germany, at Jesetten, Triberg, and Babenhausen, which he confided to the care of his favourite disciple, Father Passerat. These foundations were eventually suppressed, and the members banished. Father Passerat then betook himself to Switzerland, where in 1818 he organized a community at Valaisente in a disestablished Carthusian monastery. In the meantime, owing to opposition, the house at Warsaw was suppressed. In 1808 the Fathers were expelled from St. Benno's, and deported to the fortress of Kliüsten, Prussia, where they were disbanded. Father Hofbauer, after directing his companions to work for God's glory wherever and whenever they could, proceeded alone to Vienna, where he became an assistant chaplain and confessor of nuns. His influence was soon felt on all sides, even in the Congress of Vienna (1815), where the destinies of the Church in Germany were then being shaped. He was one of the seven chosen in the Council of Vienna on 7 "the Apostle of Vienna". In the meantime he kept up a constant correspondence with his former companions, did all in his power to find them suitable fields of labour, and predicted that after his death a brighter future was in store for the congregation, a prophecy which was fulfilled. He died 15 March, 1820. In accordance with the request of the Emperor Francis I, the first house of the Redemptorists was canonically established in Vienna on Christmas Day, 1820. In May several prominent young men, former disciples of Father Hofbauer, had already received the religious habit. Father Passerat succeeded Hofbauer as vicar-general; the onerous and trying duties of his office were rendered more difficult by the prevalent spirit of Josephism. The years intervening between 1815 and 1821 found some of the Fathers returning to their glory whenever and wherever they could, compelled to abandon this field. A number of flourishing foundations were established between 1820 and 1843. In 1826, at the request of the Austrian Government, a foundation was started at Liberec, Bohemia, for the benefit of the Austrian Catholics, but it did not last long. In 1829 the Redemptorists acquired the convent of Bischengberg, Alsace. The new community was sent from Val-
sainte. In 1828 the Fathers exchanged their poorly-furnished home at Valsainte for the commodious Convent of Fribourg, which proved to be a fruitful nursery for the congregation until the Revolution of 1848. Prior to 1848 six houses had been established in Augsburg in 1828; Innsbruck in 1828; Marburg and Eggenburg in 1833; and Leoben in 1834. During Passerat’s administration the congregation was introduced into Belgium by Father de Held, and in the course of the next ten years four houses were established in St-Trond in 1833, Liège in 1835, and Brussels in 1849. A foundation was also opened at Wittem, Holland, where, in 1836, an old Capuchin monastery became the house of studies. During the same period another important mission was begun in North America. In 1828 Mgr Rosé, Vicar-General of Cincinnati, visited Europe to solicit pecuniary aid and to obtain evangelical labourers. While at Vienna he applied to Passerat, from whom he secured three priests and three lay brothers; they arrived in New York on 2 June, 1829. Two other houses were opened in 1835. For seven years they laboured heroically among the whites and the Indians of northern Michigan and northern Ohio. Though they took charge of many Stations in both states, they did not secure a permanent footing, and eventually withdrew, with the exception of Detroit. In 1839 the Fathers were called to Pittsburg to assume charge of the German congregation, which was then without a priest, and torn with party strife. In a short time they made it a model Congregation. Scattered throughout the surrounding country were many Catholic settlers, to whom they preached the Word of God and administered the sacraments. This species of mission inaugurated by them wherever they were established was the beginning of many a well-organized parish of to-day. In the care of German congregations, often in a deplorable condition on account of factions, became a prominent element of the apostolate of the Redemptorists in North America. Their first concern, however, was to establish, wherever feasible, parochial schools, which are in a flourishing condition to this day. When the success of the Fathers at Pittsburg became known, applications were made to them for other foundations. They were called to Baltimore in 1840; to New York in 1842; to Philadelphia in 1847; and to Richmond in 1853. In 1847 two foundations were made in the states of Pennsylvania and Vermont. In 1847 and 1848, respectively. In 1847 and 1848 the Fathers were expelled from Switzerland and in 1848 from Austria, to which, however, they returned. Important developments were now taking place within the congregation itself. Although the Tenth congregation was subject to the rector major at Nocera in Italy, this superior left his government almost exclusively in the hands of a vicar-general resident at Vienna. As the congregation spread far beyond its original boundaries, it was deemed necessary to create a new office of provincial head of the rector major and the local superiors. Father Passerat, weighed down by age and infirmities, resigned his office in 1845. After a series of deliberations conducted by the Holy See with the superior general and the Fathers of the Transalpine provinces, Father Rudolph Simetan was appointed vicar-general in 1850. Pius IX was now persuaded that it would be advantageous to have the superior general resident in Rome. Fearing the opposition of the King of Spain, Pius IX did not devise means to convince him of the benefits arising from this step, but in vain; thereupon he decided that the Congregation of the Most Holy Redeemer, to the exclusion of the Neapolitan and the Sicilian houses, should be placed under a general superior, who was henceforth to reside at Rome. When Tournai in 1833 presented regulations for the Redemptorists from the Kingdom of Naples. On the disappearance of the latter, the Neapolitan houses were united to the body of the congregation in 1869. In pursuance of orders from the Holy See, Father Simetan convoked a general chapter. It was opened 26 April, 1855. The result of this chapter was the election of Father Nicholas Mauron, a native of Switzerland, as superior general. He was the first rector major to take up his abode at Rome. During the chapter Mauron pronounced a decree, which, in the name of Mauron, the congregation made rapid progress. The number of provinces in 1852— not including Naples and Sicily—was four; in 1890 they had increased to twelve. The French-Swiss province, which was known as the Province of Deutz, comprised the Belgian provinces (1865-67). gained admission into Spain and South America. During the presidency of Garcia Moreno two houses were established in the Republic of Ecuador. A few years later the congregation gained a foothold in Peru, Chile, and Colombia. The original Belgian province, having grown very rapidly, was divided into the provinces of Belgium and Holland. The Lower German province found a new field of labour in the eastern part of South America. The province of Holland received charge of the mission work in Surinam, South America, a settlement colonized partly by lepers. The American province of the congregation, erected in 1850, has had a striking development. Its first provincial was the Rev. Bernard Hafkenscheid, a fellow-student of Leo XIII. One of his first cares was the establishment of a seminary and the selection of a suitable place for a novitiate. He chose Cumberland, Maryland, for the future house of studies. From this nursery of study and piety many able and zealous missionaries went forth. In 1853 the novitiate, which had hitherto been in New York, was removed to Annapolis, Maryland. Here the heirs of Charles Carroll of Carrollton had donated their entire estate to the Redemptorist Fathers. This house remained the novitiate until 1907, with the exception of the years 1862-66, when it was at Cumberland, and in 1888 the students at Annapolis. In 1858-59 the present church and convent were built at Annapolis. In 1868 the students were transferred to the new house of studies at Ilchester, Maryland, which remained the Alma Mater of the Redemptorists until 1917. It housed the faculty and the students, forty-eight in number, took up their abode at Esopus, on the Hudson, where a more spacious scholasticate had been erected. From the first house of St. Alphonsus in Baltimore sprang other communities: St. Michael’s in 1839, St. James’s in 1867, and the Sacred Heart in 1874. In 1882, owing to difficulties in the Bohemian parish, the Fathers, at the earnest request of Cardinal, then Archbishop, Gibbons, assumed charge of the Bohemians. In this diocese five other parishes, one in the city of Washington, were originally founded by the Redemptorists. In 1861 the Old Mother House was opened in Chicago, Illinois, to take charge of St. Michael’s parish. It was not long before a large church and a commodious school and convent were built. The great fire of 1871 destroyed all these structures; but, thanks to
the faith and generosity of the people, they were rebuilt.

The many successful missions which the Redemptorists had given in the Diocese of St. Louis induced Archbishop Kenrick to ask for a foundation of the congregation in his episcopal city, and in 1866 a mission house was opened at St. Louis. In the same year (1866) another mission house was established in New York, near the little church of St. Alphonsus, which had been erected in 1845 for the convenience of the Germans in that section of the city; it had been served by Fathers of the Third Street community. Though now a mission church, St. Alphonsus's contains its own congregation of the Redemptorists. Subsequently, two more foundations were made in New York, one for Bohemian Catholics, and the other for the German Catholics in the northern part of the city. In 1871 an important mission house was opened at Roxbury, Boston. It was dedicated to Our Lady of Perpetual Help. Its first rector, the Rev. William H. Gross, was succeeded by the Rev. Leopold Petech, when the former became Bishop of Savannah in 1873. In 1883, when a new parish was formed in that district, the Fathers of the mission church took charge of it. Within the Redemptorist province were called to St. Patrick's Church, Quebec, Canada, the only parish church in that city for English-speaking Catholics. Four years later the American Fathers became the custodians of the miraculous shrine of St. Anne de Beaupré, near Quebec; it was eventually transferred to the Fathers of the Belgian province. The same Fathers assumed charge of St. Anne's, Montreal, a large parish in a very poor district of the city. The Baltimore province in the meantime established two other foundations in Canada: St. Patrick's, Toronto, in 1881, and St. Peter's, St. John, N. B., in 1884. In 1876 the congregation was invited to take a second church in Philadelphia, that of St. Boniface. Besides these houses the province of Baltimore founded in 1881 a separate house for its juvenile, or junior house of studies, at Northeast, Pennsylvania. Another house, to be used as a primary juvenile, was purchased in 1886 at Saratoga, New York; this is at present a mission house. In 1893 a new house was opened at Brooklyn, New York.

In 1876 the second American province was divided, the eastern under the name of the province of Baltimore, and the western as the province of St. Louis. This latter province embraced the houses of St. Louis, New Orleans, Chicago, and Chatawa. This latter took possession of yellow river, a house of studies for the province of St. Louis, but was subsequently abandoned. Since 1875 several new foundations have been established. In 1878 Kansas City, Missouri, was selected for an educational institution. The old house of St. Mary's at Detroit was abandoned in 1877, but in 1890 another house was established in the suburbs of the same city; this is now a flourishing mission and parish church. Two years later the Redemptorists began a second foundation at Chicago. In 1877 a juvenile was erected at Kirkwood, near St. Louis, and in 1888 the Fathers settled at Grand Rapids, Michigan. In 1891 a foundation was made at Seattle, Washington, in 1897 a new house of studies was erected at De Soto, Missouri. In 1894 the Fathers went to Denver, Colorado, and took charge of St. Joseph's Church; in 1896 to Des Moines, Iowa, and in 1900 to Fresno, California. In 1910 a new house was founded at Oconomowoc, Wisconsin, which will be the future house of studies of the province of St. Louis.

The manifold labours and the limited number of Fathers, the preaching of missions, the special work of the sons of St. Alphonsus, was never neglected. In 1850, however, it received a powerful impetus under the first provincial, Father Bernard. Shortly after his arrival in America he organized and trained what may be called the first band of regular missionaries, among whom were Fathers Becker, Hewit, and Walworth; these distinguished missionaries afterwards established the Congregation of the Paulists. Since then the work of the missions has increased rapidly from year to year; thus a double activity, parish work and mission work, has become a special feature of the congregation in North America. Some idea of the work of the Baltimore province during the ten years from 1890 to 1899 is conveyed by the following figures: missions, exercises, 75; confessions, 2,418,758; converts, 1,252. Parish work: baptisms, 54,608; communications, 6,827,000; first communions, 19,077; marriages, 8311; average number of school children, 13,000; converts, 1,222.

The administration of Father Mauron was rendered memorable by several important events. In 1866 Pius IX caused the miraculous picture of Our Lady of Perpetual Help to be placed in the Redemptorist Church at Rome. The devotion to the Blessed Virgin is so great that this article has since been repeated all over the world and wide. In 1871 the pope, moved by the urgent and repeated petitions of bishops and heads of religious orders, bestowed the title of Doctor of the Universal Church upon St. Alphonsus, known the world over by his theological and devotional writings. Father Hofbauer, the Apostle of Vienna, was beatified in 1889, and Brother Gerard Majella, the thumaturgus of the congregation, in 1893. The latter was canonized by Pius X, 11 Dec., 1904. The eventual administration of Father Mauron ended in 1893. In 1882 he was stricken with apoplexy, and, though he rallied from the shock, a slow decline set in, and he died 13 July, 1893. On 1 March, 1894, Very Rev. Mathias Raus was elected superior general. He was born 9 Aug., 1829, in the Duchy of Luxembourg; made his profession 1 Nov., 1853, and was ordained priest 9 Aug., 1858. After filling various important offices in the order, he was called to Rome by his predecessor to be one of the general consultants. Father Raus's administration is remarkable for the number of Redemptorist causes of beatification introduced, or about to be introduced, in Rome, thirteen in all. Among them are: Ven. John Nepomucene Neumann, superior of the American Province, who died as Bishop of Philadelphia, 5 Jan., 1860; Father Francis X. Seelos, of the American province, who died a mortal in New Orleans, 30 Dec., 1854; and Father Peter Donders, the Apostle of the Lepers in Surinam, who died in the leper colony at Batavia, in Dutch Guiana, 14 Jan., 1887. To these may be added Father Alfred Pampelon, who died at Ste-Anne de Beaupre in Canada, 30 Sept., 1896. Father Raus's administration was closed by the happy issue of the cause of Blessed Clement M. Hofbauer's canonization, which took place on 20 May, 1909. In that year the venerable superior, having attained his eighty-second year, deemed it wise to resign his responsible office, and in the general chapter opened on 26 April, 1909, the Very Rev. Father Patrick Murray, superior of the Irish province, was elected superior general of the congregation. He was born 24 Nov., 1855, made his profession 23 Oct., 1889, and was ordained priest 10 Sept., 1890.

During the past twenty years the development of the congregation has been very marked. The Roman province was particularly honoured by Leo XIII, when he confided to the Fathers the magnificent new church of St. Joachim in Rome. The French province was divided into three provinces and two religious provinces in 1900. Spain became a province, having eight houses, to which recently two more communities were added. The French province proper was
divided into two provinces, Lyons and Paris. To the former now belong the Southern Pacific vice-provinces, including Argentina and Paraguay. The Northern vice-province of Ecuador and Colombia. Since the suppression of the religious orders in France in 1904, some of the Redemptorist communities have undertaken new foundations in Belgium, and others in South America. In 1900 the Austrian province was also divided into two provinces, Vienna and Prague, with a Polish vice-province. The latter was made a province in 1909. Since the division the Viennese opened two houses in Denmark, one in Prussian Silesia, and a fourth at Linz. In 1899 the Belgian Father General requested the Government to take charge of a number of missions in the Congo State; these missions have now increased to six, Matadi, Tumba, Kiondo, Kinkanda, Kimpeese, and Sononggo. The Fathers are deeply indebted to the paternal Government of the Congo State for the progress they have made since their arrival in 1899. Several valuable missionaries have already fallen victims to the treacherous climate.

In Canada, which was made a vice-province in 1894, four more houses were opened. This vice-province on the Belgian model, numbers six houses. In the West Indies, which were also made a vice-province in 1904, there are now six houses. The province of Baltimore opened in 1902 a foundation at Mayaguez in Porto Rico. Before the completion of the island by the Province, a Spanish Redemptorista had settled at San Juan, but at the close of the Cuban War returned to Spain. The American Fathers are now there as missionaries and pastors. A parish comprising some 30,000 souls is confided to their care. Despite all their labors for the benefit of the natives their progress is very slow. On 26 July, 1911, the Belgian houses of Canada were erected into a new province.

The Upper German or Bavarian province, which was under the ban of the Kulturkampf, has recovered some of its lost ground. Since its readmittance, it has added another very important foundation. But the historic convent of Altötting has passed into other hands. In 1894 this province opened in Brazil a mission of two houses forming a vice-province. The province of Holland has added its mission in Surinam in Brazil, forming another vice-province, having under its jurisdiction three houses.

A more detailed account of the English and Irish provinces claims our attention.

The English province, begun from Belgium in 1843, owes its progress to the Rev. Robert A. Coffin, one of the band of converts associated with Newman, Manning, and Faber in the Oxford Movement. After his ordination to the priesthood he joined the Redemptorists, and gave missions throughout England and Ireland, until he was appointed first provincial of the English province in 1865. During his administration of seventeen years new houses were founded in various parts of the United Kingdom, the house at Perth being the first convent opened in Scotland since the Reformation. Leo XIII appointed the Rev. Robert A. Coffin Bishop of Southwark. His successor as provincial, the Rev. Hugh McDonald, died Bishop of Aberdeen, Scotland. 

The activity of the English Fathers is evidenced by their literary labours and their success on the missions, which resulted in more than 10,000 converts. At present the province has eight houses: Clapham, Bishop-Eton, Monkwearmouth, Bishop's Stortford, Kingswood, Edmonton, and the novitiate and house of studies at Perth, Scotland, with a total membership of one hundred and twenty-two. Besides the Rev. Robert A. Coffin, a number of noted men have joined the congregation, among them Bridgett, Livius, and Douglass.

In 1898 the houses in Ireland and Australia, hitherto subject to the English province, were con-
stituted an Irish province, and Australia, a vice-province, as its dependency. The Rev. Andrew Boylan was appointed first provincial of the British vice-province. On 25 March, 1901, the foundation of the present new novitiate house at Limerick was laid. The province of Ireland comprises four houses: Limerick, Dundalk, Belfast, and Esker; the vice-province of Australia, three houses: Warsaw, New South Wales, Ballarat in Victoria, and Perth in Western Australia. The total membership is one hundred and forty-seven. In 1906 the Rev. Andrew Boylan was commissioned to visit the Philippine Islands, and to establish there a colony of Irish Redemptorists. At present there are two houses on these islands and one in Wellington, New Zealand. The church at Limerick is celebrated for its Confraternity of the Holy Family for men and boys, founded by the Rev. Edward Bridgett, which the late Bishop of Limerick, Dr. Butler, called "the miracle wrought by the Mother of Perpetual Succour, a far greater miracle than the cure of a blind boy or the healing of a cripple." In 1903 it had the following membership: Monday, division of men, 2722; Tuesday, division of men, 2580, boys' division, 1228; total, 6258. Members are an average attendance being 3992, while the communications received in the confraternity during 1902 numbered: men, 39,860, boys, 8497; total, 48,357.

The following figures will exemplify the growth of the congregation: in 1852 (not including those of Italy) were: priests, 343; professed students, 75; priests novice, 12; choir novices, 45; professed lay brothers, 175; lay novices, 67; total, 715; houses, 45. In 1910 (including Italy) priests, 2065; professed students, 537; choir novices, 142; professed lay brothers, 962; lay novices, 343; total, 4069; houses, 218; provinces, 19; vice-provinces, 10. The constant and rapid growth of the congregation must be attributed chiefly to the erection of the so-called juvenates. Finding it difficult in some countries and impossible in others to secure a solid future for the different provinces, the Fathers deemed it expedient to receive boys who showed a disposition for the religious and priestly life, and to prepare them while still young for the higher studies. Father Hofbauer adopted this plan, and obtained thereby a number of excellent young men for the order. In the same way Father Passerat was equally successful in drawing young men to the congregation. It was in this manner that Father Mauron, the late superior general, was attracted to the order. But it was only in 1867 or 1868 that a distinct number of boys for the novitiate was followed. The idea was taken up simultaneously in the French and American provinces. Father Desurmont was the first to organise this preparatory institution in France. For many years it was customary for the American Fathers to select from their parochial schools boys who, in their opinion, would eventually become fit subjects for the novitiate. After having tested their ability, they instructed them personally in the rudiments of Latin, or sent them to a Catholic college until they reached their sixteenth year. At this age they were admitted to the novitiate, after which they completed their humanities. For the benefit of boys who did not belong to Redemptorist parishes or who lived in other cities the provincial, Father Helmsraedt (1865-77), secured a suitable place near his residence at Baltimore. One of the Fathers was appointed director. In 1899 a new method was followed. The young men were to finish their classical course before entering the novitiate. To accommodate the increasing number of boys, the provincial purchased a property then at Litchester, until finally, in 1881, a desirable college building was purchased at Northeast, Pennsylvania. Here a six years' classical course is pursued, while at the same time the moral and physical
fitness of the young men may be easily ascertained. Similar preparatory colleges, with some slight differences, have been introduced into almost every province. After a novitiate of one year, the young members pass to the higher course of studies. This embraces two years' philosophy, two years' dogmatics, and two years' moral theology, with natural philosophy, Church history, Sacred Scripture, canon law, pastoral theology, and homiletics. After the completion of their studies the young priests make what is called the "second novitiate" of six months, during which time they are trained theoretically and practically for the work of the ministry.

Bedford, Sebastian, b. 27 April, 1701; d. 2 January, 1763. Educated at St. Omer, Wattis, and Liége, he became a Jesuit and lived as chaplain with the Knights of Caledon, then with the Herberts of Powis, was much trusted by James II, and second Marquis of Powis (d. 1745), but the third was unfriendly. When he died (1748), a Protestant succeeded, the chaplaincy lapsed, and Bedford had, as he says, "to rue the ruin" of his former flock. He was next stationed at Croxeth, the seat of Lord Molineux, where he published "An Important Inquiry; or the Nature of Church Reformation fully considered" (1751). The book was a success, but the excise officers seized and destroyed 400 copies, the last half of the edition. A second and enlarged edition appeared in 1758. Bedford's extant letters (preserved by the English Jesuits) show a strong and attractive personality, and throw some light on the period when most priests were chaplains in Catholic families. FLETCHER, Records of the English Province, S. J. VII (1832), 840. J. H. PHOOCH.

Bedi, Francesco, Italian poet, b. at Arezzo, 18 February, 1603; d. at Fiesole, 13 May, 1651. Taking his degree in medicine, he entered the service of the Colonna family at Rome as a tutor, and held the position five years. In 1654 he went to Florence, where he acted as physician to the Grand dukes Ferdinand II and Cosimo III. He was constantly engaged in experiments intended to improve the practice of medicine and surgery, and yet found leisure for much literary work. He was an active member of several of the academies of the time, and, as an associate of the Crusca, aided in preparing its important Vocabolario. He taught in the Studio at Florence in 1606, as locutio publico di lingua toscana and Sacred Scripture, canon law, pastoral theology, and homiletics. After the completion of their studies the young priests make what is called the "second novitiate" of six months, during which time they are trained theoretically and practically for the work of the ministry.

Red Sea (Heb. Ydm-Šaph; Sept. Ἱεροποτικός Ερυθραῖος). The ancient name of the Red (or Erythrean) Sea was used by classical historians and geographers to designate the waters of the Indian Ocean and the Persian Gulf. In modern geography, it is applied to the north-west arm of the Indian Ocean, some 1400 miles long and lying between Arabia on the east, and Africa on the west. Understood in this latter sense, the Red Sea stretches from the Strait of Bab-el-Mandeb, in lat. 12° 40' N., to the modern head of the Gulf of Sues, lat. 30° N. Its greatest width is 205 miles, and its greatest depth about 1200 fathoms. At Ras Mohammed, in lat. 27° 45' N., the Red Sea is divided by the Peninsula of Sinai into two gulfs: that of Sues (anciently Heropoliticos sinus) on the west, now about 130 miles in length with an average width of about 18, and the northern part of the gulf of Araba, once known as the Canton of Moawer, on the east, narrower and only about ninety miles long. The Red Sea receives no river of importance, and is noted for its heat. Formerly its commerce was great, and it has much increased since the opening of the Suez Canal in 1869.

The Hebrew name Ydm-Šaph is uncertain. The meaning of Šaph is probably "reed", and the title Ydm-Šaph (Sea of Reeds) appears to have been given originally to the upper end of the Gulf of Sues, which was probably shallow and marshy, and abounding in reeds. More uncertain still is the derivation of the Græco-Roman name, Erythrean (or Red) Sea. It has been variously explained by the red corals it contains; by the colour of the Edomite and Arabian Mountains, bordering its coasts; by the glow of the sun reflected from the salt waters; by the word edom (red), which the Greeks may have rendered literally; by the name of King Erythras, who reigned in the adjacent country.

The Scriptural references to the Red Sea are directly connected with its northern gulf. Those which concern the Gulf of Akabah, on the north-west, are comparatively few and unimportant. In Ex., xxiii, 31, that gulf is simply given as the southern limit of the Holy Land; in II Kings, ix, 26; II Par., viii, 17, it is spoken of in connexion with Solomon's maritime commerce; and in II Kings, xxxii, 45, in reference to Josaphat's unsuccessful attempt in the same direction; finally, in Jer., xlix, 21, it is mentioned in a prediction of the utter ruin of Edom. The Scriptural references to the Gulf of Sues, on the north-east, are on the contrary both numerous and important, for it is the miraculous passage of that arm of the Red Sea which is described in Ex., xiv, celebrated in Moses' Canticle (Ex., xv), and repeatedly referred to in other parts of Holy Writ, despite the recent theories framed to disprove the traditional identification of the Gulf of Sues with the Red Sea crossed by Israel, at the time of the Exodus. Brugsch and others have indeed argued that the water which was dried up to let Israel pass was the northern end of the Sibonian Bog, on the shore of the Mediterranean Sea, between Egypt and the south-west extremity of Chanaan, but this theory is untenable because contrary not only to the statements of the Biblical narratives but also to the recent discoveries which have settled the position of the eastern arm of the Red Sea. Again, Beke and others have advanced the view that the eastern arm of the Red Sea, i.e., the Gulf of Akabah, and not the Gulf of Suez, is that which the Hebrews crossed. But this view also is inconsistent with the most natural interpretation of the Biblical data concerning the Exodus. The traditional identification of the Gulf of Sues with the Red Sea crossed by Israel should therefore not be given up.

It remains true, however, that the scholars who most readily admit this identification are still divided with regard to the actual place of crossing. Their disagreement is chiefly due to the difficulty of assigning the time at which the Red Sea at the time of the Exodus. On the supposition that at that time the Gulf of Sues extended northward through the large Bitter Lake to the Timna Lake, many writers maintain that the crossing was effected at a point between these two lakes and joined on by a shallow connection. To establish this position, they put forth various arguments (historical, geographical, geological) which, when closely examined, are found not to substantiate it. In fact, every attempt at proving that the Gulf of Sues extended in Moses' time as far as the Timna Lake, or even as far as the great Bitter Lake, seems to be irreconcilable with the fact that Egyptian inscriptions of the Twelfth Dynasty speak of this latter body of water as an undrinkable "lake", so that, according to the Exodus stories, Bitter Lake itself was no part of the Arabian "Gulf".

Apparently, then, those scholars are in the right who think that in the time of Moses the northern limit of the Gulf of Sues did not vary much, if at all, from what it is at the present day, and who maintain that Israel crossed the "Sea of Reeds" as near as the vicinity of the present Suez. This point is, indeed, at a considerable distance from the place where Moses was bidden to change his eastern march and to "turn and encamp" (Ex., xiv, 2), but this very distance is required to give time to convey to Pharaoh the intelligence that the Israelites had fled, and to enable his army to overtake them at a spot whence, humanly speaking, they could not escape (Ex., xiv, 5 sqq.).

The passage of the Red Sea was ever, and indeed rightly, considered as a fitting types of Hebrew history in ordinary event in their national history, and also as one of the most wonderful miracles of the Almighty in behalf of His Chosen People. Endeavours to explain away the miraculous character of the event have signally failed, for none of the documents, regarded by criticism as embodied in Holy Writ and as describing this historical fact, treats it as the mere result of natural forces. In I Cor., x, 2, the passage of the Red Sea is referred to as a fitting type of Christian baptism.

Reductions of Paraguay.—The Jesuit Reductions of Paraguay, one of the most singular and beautiful creations of Catholic missionary activity, have contributed more than any other factor to fix the name of Paraguay in history. They have been the object alike of the most sincere admiration and the bitterest criticism. An exact account, based on the best sources, should be the best justification.

I. PRELIMINARY NOTIONS.—The founding and the plan of the Reductions cannot be understood and correctly judged except in the light of colonial and missionary history. As some parts of the area, now La Plata territory at the time of the arrival of the Jesuits. The country discovered by Juan Diaz de Solis had gradually by slow stages been conquered in sanguinary, and in the beginning, disastrous battles with the warrior, liberty-loving tribes. Until 1560 the Spaniards had founded ten cities and
REDUCTIONS

orty colonies (Guevara, "Hist. de la Conquista del Paraguay, Rio de La Plata y Tucuman", Buenos Aires, 1882; Gay, "Historia da Republica Jesuitica do Paraguay", Rio de Janeiro, 1863; Monner-Sans, "Pionerias Historicas", Lueneus Aires, 1892). The natives, subdued by force of arms or submitting voluntarily, were assigned to the yoke of the Spanish encomienda system which in its more severe application made them yanaconas, or slaves, in its milder form mitayos, or serfs, to the conquistadores and the white colonists (Gay, op. cit., 45). The Spanish kings sought to better the lot of the natives by wise and humane measures for their guidance, but the difficulty of exercising control over them, and the unreliability, weakness, or selfishness of many of the officials permitted the abuse of this system to flourish (Monner-Sans, loc. cit., 43 sq.). This system resulted in frequent uprisings of the subjugated race, and an implacable hatred of the foreigners on the part of the numerous tribes still retaining their freedom, who withdrew further and further into the almost inaccessible steppes and forests in the interior, harased the colonies, still in their youth, with increasing alarms. In 1536, 1541, and 1569, the colonists, who had been told that until the Reductions were founded that conditions were essentially improved in this respect also.

The kings of Spain having the conversion of the native peoples sincerely at heart, missionaries accompanied the forces of the Crown to La Plata, and churches and parishes were founded in the new colony as soon as possible. Here, as elsewhere, the first pioneers of the Faith were sons of St. Francis (Marc. de Civezas, "Storia universale delle Missioni Francescane", Prato, 1591, VII, i, 2). Besides them we find Dominicans, Mercedarian, and, to conjecture from the oldest lists of the bishops (Gams, "Series Episcoporum Eccl. Catholicum", Ratisbon, 1873), also Augustinians and Hieronymites. The immense territory was divided into three dioceses: Paraguay (see at Asuncion), established in 1547; Tucuman (see at Santiago del Estero, later at Cordoba), 1570; Buenos Aires (see at Buenos Aires), 1582. But as late as 1559 the clergy in the colony numbered in all only twenty secular and regular priests (Gay, op. cit., 45). When the first Bishop of Tucuman, Don Francisco de Victoria, O.P., took charge of his diocese in 1551, he found in the entire diocese only five secular and a few regular priests, not one of whom could speak the language of the Indians. In 1556 the first Jesuits came to Tucuman, at his request, and in 1557, at the request of the Bishop, the Redentorists also arrived. The O.S.F., also to Paraguay. In view of the fame acquired in Europe for the young order, still in its first armour, by Francis Xavier in Eastern India, Ancheta in Brazil, and others, it was hoped the Society would prove a great aid, up to the world to converting the religious conditions in general, as towards pacifying and converting the numerous wild tribes. The colleges, seminaries, residences, and houses for spiritual retreats founded after 1553 in rapid succession at Santiago del Estero, Asuncion, since 1621), Buenos Aires, Corrientes, Tarija, Salta, San Miguel de Tucuman, Santa Fe, La Rioja, and elsewhere served to attain the first purpose; while the second purpose was fulfilled by the ministry among the Indians in the encomiendas, and by traveling missionaries who went out among the tribes still at liberty and covered the vast territory in all directions, very much as St. Francis Solanus did at about the same period. These mission excursions reflected honour upon the heroism of the missionaries, but achieved no success. Therefore in 1569, the Bishop of Aquaviva, insisted on the concentration of effort and the founding of central points in the most advantageous localities, after the fashion of similar efforts in Brazil (Händelmann, "Gesch. v. Brasilien", Berlin, 1800, 73 sq.). The first superior of the province of Paraguay, founded in 1606 (which numbered at its foundation seven Jesuits, but in 1613 no less than one hundred and thirteen), Father Diego de Torres Bollo, was commissioned to put these ideas into practice.

II. FOUNDATION OF THE REDUCTIONS.—They did not, as has been asserted, owe their origin to a previously-outlined idea of a state after the pattern of Campanella's "Sun State" ("Stimmien aus Maria-Laach", XXXV, 1883, 439 sq.), which should form the realisation of the longing of the Jesuits for power; on the contrary, they grew in the most natural manner out of the efforts to obviate those three principal difficulties in the way of the conversion of the heathen resulting from the prevailing encomienda system, namely: the oppression of the natives by force, the consequent aversion to the religion of the oppressors, and the bad example of the colonists. The new watch-word was: liberty for the Indians, emancipation from the servitium personale, and the gathering and isolating of the natives won over by the conquista espiritual in separate mission colonies or "reductions" managed independently by the missionaries. The plan proved a storm of an immense size to the colonists, which led to repeated expulsions of the members of the order from their colonies. Even a part of the clergy, looking on the encomienda system as a righteous institution, and who themselves lived by the Jesuits. The opposition to the Jesuits is quite apparent in Civesaux's treatise, which, however, can lay but little claim to being historically exact (loc. cit., 135 sqq.). The Jesuits, however, had a powerful ally in Philip III of Spain, who very energetically espoused the cause of the oppressed Indians, and who not only sanctioned the plans of the Jesuits, but furthered them very effectively by a number of royal decrees and appropriations from the public treasury, and placed them on a firm legal basis. The Cedula Real (Royal Ordinance) of 18 Dec., 1608, given at Valladolid, commanded the governor, Hermandarias de Saavedra, that, "even if he could conquer the Indians on the Paraña by force of arms he must not do so, but must gain them over solely through the sermons and instructions of the religious who had been sent for that purpose."

The Cedula Real of 30 Jan., 1607 provided that the Indians who were converted and became Christians could not be made serfs, and should be exempt from taxation for a period of ten years. The so-called Cedulas magna of 6 March, 1608, declared briefly that the Indian should be treated in the order (Monner-Sans, op. cit., 22 sq.). With these royal decrees (which were followed by a long list of others) as a basis, the Jesuits began, in explicit understanding with the highest ecclesiastical and civil authorities, who had been commanded by the government to render efficient aid, to found Reductions, first of all, in the distant north-eastern Province of Guayra (approximately the present Brasilia Province of Paraña), where, in 1609, the Loreto Reduction was founded for the Rio Paranespanema, which was founded in 1611 by the Redaction 8 (a university) situated between them and 1630 by eleven others, altogether numbering about 10,000 Christians. The Indians hastened in entire bands to these places of refuge, where they found protection and safety from the robbers who harassed them. All ecclesiastical and civil decrees notwithstanding, the traffic in slaves had experienced an astounding development among the mixed population of the captainies of St. Vicente and Santo Amaro (in the present Province of Sao Paulo, Brazil) composed of adventurers and free-booters from all nations. Well-organized bands of man-hunters, the so-called Mamelucos, had in a short time depopulated the plateau of Sao Paulo, and from 1618 onwards threatened also the Reductions, to which the startled Indians hastened from all sides.
One by one the Reductions fell into the hands of the marauders. In 1630 alone no less than 30,000 Indians are said to have been murdered in Guaya or carried off from there by force as slaves. In vain the missionaries appealed to the Spanish and Portuguese authorities for protection. They could not or would not help. In June 1628, after the last resort was to take the remaining Christians and those still coming to the Reductions founded on the Paraná and Uruguay rivers, and in 1631 the exodus was accomplished under the leadership of the heroic Father Simon Miguel. H. von Trierherrn calls this exodus "one of the greatest achievements of its kind recorded in history" ("Globus", LX, 1891, 179). Scarcely 12,000 reached their destination. ("Conquista Espiritual hecha por los Religiosos de la Compañía de Jesús en las Provincias del Paraguay, Paraná, Uruguay, y Tapes escrita por el P. Antonio Ruiz de Montoya de la misma Comp.", new ed., Bilbao, 1892, 143 sq.). In similar manner also the nine Reductions which had been founded between 1614 and 1638 on the Rio Jacuhy and in the Sierra de los Tapes in the provinces of Misiones, 1615, and Corrientes, 1617, of which numbered in all some 30,000 souls, were soon after destroyed and partially transferred to other places. The neglect of the Spanish governors to come to the aid of the missions in their peril was bitterly avenged by the subsequent destruction of the Spanish colonial system in the northern province by the Pumas of the entire province. Cast upon their own resources, the Jesuits organized, with the king's consent, an Indian militia, equipped with fire-arms, so that, as early as 1640, they could place a well-disciplined army in the field against the Pumas, and could effectively suppress robbery and pillage. Henceforth the Reductions continued to form a strong bulwark against the inroads of the Portuguese.

The main part of this "Christian Indian State", as the Reductions have been called, was formed by the 322 Guarani Reductions, which came into being during the period from 1609-1760 in the territory of the present country of Paraguay, the Argentine Provinces of Misiones and Corrientes, and the Brazilian Provinces of Rio Grande del Sur. Many of these Reductions repeatedly changed their location in consequence of the frequent inroads of the Mameluos and savage Indian tribes, retaining, however, their former names, —a circumstance which has given rise to no little confusion in older charts. The growth of the Guarani indigenous population from the time of the Jesuits is shown in the mission records. In 1648 the Governor of Buenos Aires on a visit found a population of 30,548 souls in nineteen Reductions, and in 1677 the Fiscal of the Audiencia of Charcas, Don Diego Iténez de Farías, found 58,118 in twenty-two Reductions. In 1702, 22 villages on the Paraguay and Uruguay numbered 25,000 souls; in 1717, 31 villages numbered 121,188; in 1732, 141-242; 1733, 126,389; 1734, 116,250; 1735, 108,228; 1736, 102,721; 1737, 104,473; 1738, 90,287; 1739, 81,159; 1740, 73,910; 1741, 76,960; 1742, 78,929; 1743, 84,950; 1744, 95,090 (see below). The remarkable fluctuations in the number of the inhabitants were due to repeated attacks of epidemic disease (see below).

Besides the Guarani missions, the Chiquitos Mission was founded in 1692 to the north-west, in the present Bolivia; in 1765 this mission numbered 23,288 souls (4961 families) in ten Reductions (Fernandes, "Relación de los Indios Chiquitos", Madrid, 1725; Lat. tr., Augsburg, 1733.; Ger. tr., Vienna, 1729; Bach, "Die Jesuiten und die Mission Chiquitos", Tübingen, 1827). The famous link between the Guarani and the Chiquitos missions was formed by the Mission of Taruma with three Reductions: San Joaquín (1747); San Estanislao (1747), and Belen (1760), to which 2587 souls (547 families) belonged in 1762, and 3777 souls (903 families) in 1768.

Far greater difficulties than in the Guarani missions were encountered among the numerous many-tongued "mounted tribes" of the Gran Chaco, whose depredations continually kept the Spanish colonies on the alert (Huonde, "Die Völkergruppierung im Gran Chaco am 18. Jahrhundert", in "Globus", LXXXVI, 387 sq.; Alcázar, "Carta sobre las lenguas", Madrid, 1890). At the urgent request of the Spanish authorities the Jesuits attempted to found Reductions among these tribes also. Fifteen Reductions came into existence between 1735 and 1757, which about 10,000 Indians of eleven different tribes, among them about 5000 Christians (cf. the treatise by Dobrizhoffer, "Hist. de Abiponibus", Vienna, 1784; Ger. tr., Vienna, 1783; tr., London, 1822; Bauke (Pauke), "Missionen von Paraguay", new ed. by Kohler, Ratisbon, 1870; and Bringmann, Freiburg im Br., 1888). Scattered Reductions were founded in Tucumán, particularly among the Chiriguanos and Mataguayos (1762: 1 Reduction, 268 Christians, 20 pagans), and in North Patagonia (Terra Magalóntica) where the Reduction of Huelva was founded (1765). Altogether the Jesuits founded approximately 100 Reductions, some of which were later destroyed; 46 were established between 1838 and 1766. Consequently, the accusation raised by Alciras and others that their missionary activity had become stagnated by 1767 is unfounded. Until 1767 the Reductions were continually being formed, while a constant stream of converts gained by the missionaries on their extensive apostolic journeys kept pouring into the older Reductions (cf. Ullés, "Voyage de l'Amer. mérid.", Amsterdam, 1731, 541 sq.). Between 1610 and 1768, 702,066 Indians of the Guarani tribes alone were baptized.

The founding and preservation of these Reductions were the fruit of a century and a half of toil and heroic sacrifice in the battle against the terrors of the wilderness and the indifference and fickleness of a primitive people, as well as against the reckless policy of exploitation followed by the Spaniards, to whom the Reductions were ever an eyesore. Down to 1764 twenty-nine Jesuits of Paraguay suffered death by martyrdom.

III. ORGANISATION OF THE REDUCTIONS.—A. Plan and Location of the Settlements.—The Reductions were almost always laid out in healthy, high locations, the great central stations, as for instance Candelaria and Yapeyu, on the large waterways (Paraná and Uruguay); the smaller stations were placed near other streams, the "pueblos" and on the grassy plains near the Spanish "pueblos". The form was square, all streets running in straight lines, the main streets frequently being paved. The latter gave upon the plaza the large square where the church was situated, generally shaded by trees, and ornamented with a large cross, a statue of the Virgin and frequently also with a pretty village wall; at the head of the plaza stood the church, and adjoining it, on one side, the residence of the Fathers, called the "College"; on the other, the cemetery, enclosed by a wall with a large covered hall. These, as well as the churches, at the end of the seventeenth century, were frequently plain huts; later, solid, one-story houses, built of stone or adobe, and invariably covered with tiles because of the danger of fire, about fifteen by eighteen feet in size, and divided into various apartments by partitions of wicker-work; they formed comfortable quarters for families of from four to six members (cf. Cardiel, "Declaración de la Verdad", Buenos Aires, 1900, 121 sq., 253 sq.; Quereil, "Carta sobre las ruinas de S. Ignacio Mira", Buenos Aires, 1898), and, all eventuating in the eventual disappearance of the dwellings of the Indians of the encomiendas. A portico, resting on stone or wooden pillars, and extending the entire width of the building, projected from the front of each house, so that one could walk through the entire town in rainy weather without getting wet.
The houses were arranged in separate groups (vici, insulae) of six to ten dwellings each, to diminish the danger of fire. The "college" was separated from the plaza by a wall and a small courtyard, and by another wall from the adjoining buildings, which contained the school workshops, store-houses etc. Behind lay the carefully-kept garden of the Fathers.

The churches, mostly three-aisled, built of massive blocks of stone, with a richly-decorated façade, a main door, and several wide entrances, convey an impression of grandeur even as ruins (Ave-Lallemand, "Reisen durch Süd-Brasilien". Leipzig, 1850; Gay, op. cit., 321 sq.; Hernandez, in "Razón y Fe", VI, 224; V, 235; VII, 236). In the massive bellfries, which mostly stood apart from the churches, hung six or even more bells, which latterly were cast in the Reductions. The rich interior furnishings would have graced any cathedral. Besides the church, each village had one or more chapels for the dead, in which the corpses were exposed and whence they were taken away, also a churchyard chapel. The cemetery, laid out alongside the church and enclosed by a wall with a pillared hall, was, with its rows of orange trees and its wealth of flowers, truly "a sacred garden of the dead" (Southey, "History of Brazil", 3 vols., London 1819, II, 414). To the left of the cemetery, isolated and surrounded by a wall, stood the cotiguaçu (the big house), which served as an asylum for the widows, who lived there in common; as a reformatory for women; as a home for cripples; and as a common spinning-room. Beyond the village, just at the village limits, stood the chapel of St. Isidore, the ramada or lodging-house for travelling Spaniards, and farther off the churches and stamping-mills, tanneries, and other buildings devoted to industry. The villages mostly lay open; only the Reductions more exposed to the incursions of bands of savages, and the estancias or farms, and the cattle-corrales were protected by mastes, palisades, walls, or thorn hedges. To facilitate communication and trade between the various villages, serviceable roads were laid out, often to great distances. Besides, the splendid network of rivers served as an excellent waterway, the mission operating no less than 2000 boats of various kinds on the Paraná alone and approximately as many on the Uruguay (Cunninghame Graham, "A Vanished Arcadia", London, 1901, 200) with its own wharves, as, e.g. at Yapeyu. The population varied widely in the different villages, ranging between 350 and 700 souls.

B. The Economic System of the Reductions.—The plan of the Jesuits of forming, with rude tribes of nomads, a large commonwealth, separate from the Spanish colonies, and far in the interior of a country but little explored, placed before them the difficult problem of making the commonwealth economically independent and self-sustaining. If the Indians were obliged, day by day, to gather their means of sustenance in the forest and on the plain, they would never have been lifted out of their nomadic life and would have remained half-heathens. The financial support of the Crown consisted, for the first reductions, of a moderate appropriation out of the state treasury (algún estipendio moderado, Decr. Philip III, 20 Nov., 1611; see Monner-Sans, loc. cit., 49) and of bells and articles for use in the church, and later were reduced to a temporary tax exemption, and came to vary for the missionaries doing parochial duty. In the eighteenth century this salary amounted to 300 pesos annually for the cura and his assistant (F. and A. Ullos, "Voyage de l’Amérique mérid.", Amsterdam, 1752, I, 546). Consequently the natural resources of the fertile soil had to be exploited, and the Indians, lazy and careless by disposition, had to be trained to regular work.

(1) Conditions of Property.—The economic basis was a sort of communism, which, however, differed materially from the modern system which bears the same name, and was essentially theocratic. "The Jesuits", writes Gelpi y Ferro, "realized in their Christian commonwealth all that is good and nothing that is bad in the plans of modern Socialists and Communists" (Monner-Sans, loc. cit., 130; cf. "Stimmen aus Maria-Laach", loc. cit.). The land and all that stood upon it was the property of the community. The land was apportioned among the caciques, who allotted it to the families under them. Agricultural instruments and draught-cattle were loaned from the common supply. No one was permitted to sell his plot of land or his house, called abamba, i.e. "own possession". The individual efforts of the Indians, owing to their indolence, soon proved to be inadequate, whereupon separate plots were set aside as common fields, called tupamba, i.e. "God’s property", which were cultivated by common labour, in the presence of the Padres. The products of these fields were placed in the common store-house, and were used partly for the support of the poor, the sick, widows, orphans, Church Indians, etc., partly as seed for the next year, partly as reserve supply for unforeseen contingencies, and also as a medium of exchange for European goods and for taxes (see below). The yield of the private fields and of private effort became the absolute property of the Indians, and was credited to them individually in the common barter transactions, so that each received in exchange the goods he desired. Those tupamba plots which gave a smaller yield because of faulty individual management were exchanged from time to time. The herds of live-stock were also common property. The caballos del Sanlo, which were used in processions on feast days, were especially reserved. Thus the Reduction Los Santos Apeteyes at one time owned 599 of these.

(2) Products.—The Indians themselves were content, for their needs, with the cultivation of maize, manioc, various indigenous tuberous plants and vegetables, and a little cotton. But the work conducted by the communities continued constantly to assume larger proportions, and surpassed by far the work of the Spanish colonies, both in regard to the variety of the products and to rational cultivation. Besides the common cereals (wheat and rice were grown
REDUCTIONS 692 REDUCTIONS

scarcely anywhere outside of the Reductions) and field produce, tobacco, indigo, sugar-cane, and above all, cotton were cultivated. Much care was devoted also to fruit culture, and that successfully. Even today one may find in the wilderness traces of former splendid orchards, particularly orange groves. Vine culture was attempted, but with only moderate success.

One of the most important products of the territory comprised by the Reductions was the so-called Paraguay tea (herba), which is still the largest article of export of the country. It consisted of dried leaves of the herb dubbed "te quente" (Herba Passiflora), crushed and slightly roasted, and drawn in boiling water; it was then, as it is now, the favourite beverage of the country, and almost entirely displaced the intoxicating drinks to which the Indians had been addicted to a deplorable extent. Because the herb forests (herbales) frequently lay hundreds of miles distant, and the Indians there employed must needs be deprived of regular pastoral care for too long a period, the Jesuits attempted to transplant the tree into the Reductions; their endeavours were successful here and there. The Jesuits' jealous and vain ambition means to frustrate their endeavours. The other abundant natural resources, choice sorts of wood, aromatic resins, honey bees, and the like were converted to useful purposes, and attempts were even made on a large scale, to cultivate the so-called raising attained a magnificent development, the entire country being rich in grass, and some estancias numbered as many as 30,000 sheep and more than 100,000 head of cattle, numbers which were not unusual in some of the Spanish hacendados. The herds were increased from time to time by the capture of wild cattle, and the breed improved by careful selection and breeding. Horses, mules, donkeys, and poultry were also raised on a large scale. In addition, hunting and fishing aided in providing support; these forms of sport were, however, restricted in the Guaraní Reduction for reasons of discipline. The individual Reductions devoted themselves more or less to one or the other branch of production, and supplied their wants by exchange with other Reductions. A written almanac of 1766, which the Salesians of Paraguay included in the 1st. ed. of their Annals, contains on its parchment leaves, besides the calendar, an adviser for agriculturists, with particular reference to the climate of the country; the manuscript shows what knowledge and solicitude the apostles devoted to agriculture ("Rath. Missionen", Freiburg, 1895, 259).

(3) Industries.—The vast needs of such an enormous establishment and the difficulties and expense of import necessitated the foundation of domestic industries. Thanks to the exceptional native gifts of the Guaranís, the abilities necessary for almost all the trades and crafts were soon developed in these people. Some were carpenters, joiners, wood-turners, builders; others blacksmiths, goldsmiths, armourers, bell-founders, masons, sculptors, stone-cutters, tile-makers, horn grinders, pewterers, papier-machiers, tailors, bookbinders, weavers, dyers, bakers, butchers, tanners, instrument-makers, organ-builders, copyists, calligraphers etc. Others again were employed in the powder-mills, tea-mills, corn-mills etc. Each man remained true to the craft once adopted, and provided for the transmission of his trade by teaching it to apprentices. The wonderful quality of the products of the workshops in the Reductions is shown by the beautiful cut-stone work of the churches. In some of the Reductions there were printing establishments, as for instance in Concepción, San Miguel, San Xavier, Loreto, Santa María la Mayor, where principally books of a liturgical and an ascetic nature were printed (Rodeles, "Imprentas de los antiguos Jesuítas en Europa, America y Filipinas", in "Rasón y Fáº", XXV, 43-474, and XXVII, 349; Schuller, "Un Libro Americano unico o primero impreso nas Missões Guarani S.J.", Para, 1910). It should be noted particularly that the remarkably high industrial development was not reached until after the end of the seventeenth century, when Jesuits from Germany and the Netherlands came to Paraguay in larger numbers (see the ed. of the German Jesuiten-Missionare des 17. u. 18. Jahrh., Freiburg, 1899, 68). In 1726 a Spanish procurator of the missions admitted that "Artes piaresaque [missionaria] erexerunt, sed eas omnes Germaniae missioneerunt", and that the handiwork was neglected in the Spanish colony at that time, the houses in Buenos Aires being built of clay and covered with rushes. A German lay brother of the Society of Jesus, Joh. Kraus, erected the first larger brick buildings (college and novitiate) in Buenos Aires and Córdoba; Brother Joseph Klausner of Munich introduced the first tin-foundry in the Province of Tucumán; while Indians from the Reductions, under the direction of the missionaries, built the fortifications and ramparts of Buenos Aires, Tobati, San Carlos, and other places. Only a few houses were built without the use of systematic labour only by a well-regulated administration and control. Even the children were taught to work, and day by day some of them were occupied in the workshops and spinning-rooms under special overseers, while others were led out into the fields and plantations, to the joyous strains of music, following a statue of St. Isidore carried before them, and employed there for a few hours. The women were obliged, in addition to the performance of their household duties, to spin a certain amount weekly for the use of the community, to help during the sowing and harvesting of cotton etc. Men who followed no particular trade were obliged to work at least two days weekly at communal undertakings, in the fields, or at public buildings, etc. All had to work during harvest time. Relaxation and recreation were provided in the houses set aside for leisure, which were passed in arranging common games, military drills, horse races, and the like, by the many feast-days and the days set aside for hunting trips and other expeditions. Cards and dice, however, were strictly forbidden. The heads of the Reductions were trusted with the direction of their communities (see below). Besides, each branch of trade had its own superintendents and guild-masters, who constantly remained in touch with the missionaries, who watched over all and whose presence and authority formed the driving-wheel of the whole community. All officials were obliged to give exact account of their administration, and it is a matter of fact that the accounts and administration reports were in exemplary order, according to the testimony of the government inspectors. Every year there was an exact inspection every year. Labourers and such public employees as hospital attendants, sextons, and others were kept at public cost, and the private fields of draymen and ferrymen, shepherds and others, who were engaged in public service, were tilled by others for their benefit.

(5) Distribution of Rations.—Food and dress were the same for all, with some slight concessions in favour of the caciques and public officials. The produce of the private fields provided the secondary dishes, and the meals of the caciques and officials. Meat was provided out of the common store-house in equal measure. The principal article of diet of the Indians was meat, which they obtained from the common slaughter-houses at regular intervals. Ordinarily,
animals were slaughtered three times a week; in Yapetu, with about 7000 inhabitants, about forty beeves were killed each day. In order to prevent the Indians, whose voracity was well known, from consuming their entire rations of meat in one day, they were given for their meal, maka charqui (meat dried in the sun and pulverized) of a portion of it. The sick were given special food prepared in the parsonage; the children received their morning and evening meal in common in the courtyard of the parsonage also. On high feast-days public banquets were held in common. The common store-houses also furnished additional provisions of a special nature for wedding feasts etc. Strong spirituous liquors were almost entirely replaced by maté in the Guarani Reductions.

Twice a year each family received the necessary woven woolen and cotton goods, of which the women could make clothing. In addition, each family could bring its private cotton crop to the parish mills. Only a coarse, plain cloth was woven. Goods of better quality, for the altar linens, vestments, and garments of state had to be imported. The dress of the natives was plain but decent; the attire of the men consisted of short, loose breeches, a cotton shirt, and two woolen ponchos, one for every-day wear, the other for holidays; the women wore long, loose, shirt-like gowns, with many folds. Ordinarily all went barefoot. The official garments and uniforms for festive occasions, neat and made of fine, coloured materials, were kept in separate chests in the "college", as also the banners, theatrical costumes, and insignia etc.

C. Commerce and Wealth of the Jesuits.—The accusation that the Jesuit acquired immense wealth in the Reductions is a fable, spread broadcast by their enemies and those jealous of their success, but long since disproved. "I dare to maintain", the Bishop of Buenos Aires, Dom Pedro Taxardo, wrote to Philip V of Spain in 1721, "that if the Jesuits were less virtuous, they would have fewer enemies. I have visited their missions frequently, and I can assure Your Majesty, that I have nowhere found greater order and more perfect usefulness than among these religious, who take nothing that belongs to their converts, whether it be for their own attire or for their sustenance" (Charlevoix, loc. cit., II, 94). The fact is that the Fathers bore the expense of their own sustenance, as far as possible out of the salary appropriated by the king for them (about 250 pesos), although it was smaller than the salary of the other priests, both secular and religious (600 pesos). In compensation for the provisions taken by the Fathers from the common stores, such as fish, milk, eggs, vegetables, the procurator sent each missionary a supply of salt, soap, knives, shears, glass beads, fish-hooks, pins, medals, and the like for distribution to the Indians, who were very fond of these things (Cardiel, loc. cit., 264 sq.). Southey, himself a Protestant, published as the result of his investigation covering this question, that nothing can be more certain, than that the Jesuits have not annexed the treasures in Paraguay (Hist. of Brakes, III, 508; Duhí, "Jesuitendabiln", Freiburg, 1904, 621 sq.; Monner-Sane, loc. cit., 90 sq.; Cardiel, loc. cit., "Lettres Edifiantes et curieuses", Lyons, 1819, V, 371 sq.; Cunningham Graham, op. cit., 193 etc.). The myth concerning their vast trade transactions must be classed with that of the gold mines in the Reductions, which never existed, notwithstanding the fact that hatred and envy have so persistently clung to this assertion, that the Government was forced more than once to institute investigations. Thus an investigation was conducted in 1640 by Don André de León Gasca Vida, and another, still more searching, in 1657 by Don J. Basques de Alveva. In both cases the inquiries led to a clear demonstration of the untruth of the accusations, and to the severe punishment of the accusers (see Charlevoix, "Hist. du Parag." Paris, 1737, III, 381; Cardiel, op. cit., 183; "Lettres Edifiantes, loc. cit."). The gold mines have never been found, even after the expulsion of the Jesuits. The estimates that have been made of the alleged vast income and trade profit are founded upon purely arbitrary or false suppositions. The vast herds of cattle, for example, were not representative of wealth, because of the great numbers of ownerless cattle in which the land abounded, the price of a healthy steer in consequence being halfl a peso a day. The destruction of these animals by the Spaniards. The single carved high altar in the Church of San Borja was valued at the price of 30,000 steer.

In addition, the expense of keeping up such a vast community should be borne in mind (cf. the cost of keeping up the Indian Reservations in the United States, which necessitated an expenditure of about $10,000,000 in 1892, and from 1867-1892 no less than four times that sum). Thus the high prices of the new products and iron goods that had to be imported (a Spanish hundredweight, about 102 lb., of iron from Buenos Aires cost 16 aurei, 1 ell of linen cloth 4 old rix-dollars, and even more, a fine lace abt 125 rix-dollars); the tribute to the crown, which according to Bauke (ed. Kobler, p. 490), amounted to 24,000 pesos; the building and decorating of the numerous churches far in the interior; the equipment of Indian auxiliary troops in the service of the king (see below); all of which, taken together, alone required the expenditure of almost the entire income. As a matter of fact, the entire commerce was confined to the exchange, justified by canon law, of such products as cotton, tobacco, hides, various kinds of timber, horse-hair, honey, and in particular of the highly-prized mission herba, for goods which the Reductions themselves either could not produce or at least not in sufficient quantities, such as fine cloths, silks, linen for vestments and altar use, instruments, iron and glassware, books, paper, salt, wine, vinegar, dyes, and the like. The trade by barter netted an average of one of 100,000 pesos, according to the report of the royal investigating commission (see Charlevoix, op. cit., 361), or 7 reals per capita of the population. One instance may illustrate how arbitrarily the calamities were the Jesuits judged with figures. De Poury ("Recherches philos. sur les Américains", Berlin, 1768-
69, II, 411) asserts that the Jesuits sold 4,000,000 pounds of herba annually, while the amount officially certified is only about 6000 arrobas (150,000 lbs.); he also places the number of Indians employed in its cultivation and production at 300,000, or twice the total number of Spaniards and women to children living at any one time in all the Reductions.

How purely imaginary the wealth of the Jesuits had been was proved by the inventories taken of their houses and colleges at the time of their expulsion in 1767. Other officials seized goods without previous warning, so that the Jesuits might not be able to conceal anything. But the only treasures found were the precious church articles. Only a trifling amount of money was found. The college that was most prominent, that of Córdoba, was barely self-supporting, according to the documents ("Era con escasa diferencia igual a los gastos"); see Cardiel, op. cit., 131 sq.; Funes, "Ensayo de la Historia Civil de Paraguay, Buenos Aires y Tucuman", Buenos Aires, 1816, III, i. 5, e. ix.

"The Jesuit," writes Cunningham Graham (op. cit., 204), "strange as it may appear, did not conduct the missions after the fashion of a business concern, but rather as the rulers of some Utopia—those foolish beings who think happiness is preferable to profit." D. Form of Government.—The local administration of the Reductions was arranged according to the provisions of the lex indica, after the Spanish pattern, and was composed of the corregidor or burgomaster (in the Guarani language poro quaírara, i. e. one who gives command); the tenente, or deputy; three alcaldes, i. e. bailiffs or inspectors, two for the work in the town and one (alcalde de la hermandad) for the work in the rural districts; four regidores or councillors (Guaraní tchabízó iquí, i. e. one belonging to the chief); one alguazil or police officer (Guaraní ririwararu, i. e. "the chief of those who carry the stick"); one procurador or steward, and one escribano or writer (Guaraní quaítsáppóbara, i. e. "one who draws or writes"). Besides these there were the alferes real or standard-bearer (Guaraní, aobebe rerequara, i. e. "he to whom the care of the banner is entrusted"), and a number of subaltern officials and assistants. The annual election took place at the end of December. The list of new candidates drawn up by the retiring officials was submitted to the cura for approval, who had the jus indicum of challenging the nominations. On the first of January the installation of the new officials and the investiture with the insignia of office took place in very solemn fashion at the entrance to the church. Besides their insignia the public officials had a place of honour in the church. Their final confirmation was obtained in each instance from the Spanish governor. On 1 January also the sextons, superintendents of works, the boys' directors, and others were elected. Each day after Mass the corregidor gave the cura a report of all current affairs and received from him the necessary directions, which he transmitted to those concerned. It should be noted that the old hereditary caciqueship, and also the hereditary Indian nobility, were preserved and were honored in the Reductions, and, it appears, were especially considered in the allotment of higher offices and military charges. The plan of Philip V to make the five hundred caciques of the Guaraní Reductions Knights of Santiago was not carried out, otherwise that the caciques attached no value to such a distinction.

E. Military Power.—The organization for armed self-defense against the frequent inroads of hordes of savages and of the Portuguese neighbours was not only promulgated by repeated proclamations but was carried out in accordance with the declared wishes of the king (see Monner-Sans, op. cit., 96; Cardiel, op. cit., 238; Charlevoix, op. cit., VI, 366). In concomitance with these decrees arsenals were erected in all the Reductions, in which weapons of the best quality, principally fire-arms, were stored, together with ammunition. The king repeatedly sent new sets of fire-arms, among them the musket, before 1730. Later gunpowder was produced in the Reductions themselves. Each Reduction was divided into eight companies, with a maestro de campo, generally a cacique, a sargento mayor, eight capitanes, and a corporal, to head the military police. The Reductions held regular military exercises and armed drills, together with sham battles, preserved and increased the military efficiency of the people. The governors repeatedly sent Spanish officers into the Reductions, to instruct the Indians in the use of fire-arms. The main strength of the Reductions, however, lay in their cavalry. This force had already proved itself very efficient in the defence against the Paulists; from 1641 onwards it was called into service by the governors almost year after year to help in the wars with the savage tribes, with the Portuguese, the English who threatened Buenos Aires, and, last but not least, rebellious colonists and encomiendas Indians, and rendered splendid service. Time and again kings and governors expressed their sincere gratitude for the services, which were not without cost, for the Crown nothing. The Reduction Indians between 1637 and 1735 entered the field no less than fifty times for the cause of the king, repeatedly with a large force and under considerable sacrifice of time, money, and life (see among others Sans, op. cit., 102; Lettres édifiantes, op. cit., 401, etc.).

F. Church and Religious Life.—The Reductions of Paraguay are justly called a model of a theocratic commonwealth. Religion ruled the entire public and private life. The entire community attended the principal devotions and the Holy Mass as well as the religious services, which were not only attended by the Indians but also accompanied by religious songs and encomiendas and accompanied by religious songs and encomiendas and accompanied by religious songs and encomiendas. The religious instruction was given daily for the children, on several days each week for catechumens, and every Sunday for the entire parish. Through the medium of easily catchable hymns the doctrines and the principal events of the life of Christ and the lives of the saints were impressed upon the minds of the people. A sort of religious handbook bearing the title "Ars poru cuirus vy baha yacoc ymomocoainsa" (On the Proper Use of Time), written by Bishop Priego of Asunción; d. 1730), printed at Madrid in 1769-60, in two volumes, and which was very popular, gave directions concerning the performance of various acts at home and in church in a holy and meritorious manner.

Public religious life in the splendid churches found its expression in an exceedingly brilliant manner, particularly on feast-days. Church music was carefully cultivated, especially under the direction of Italian and German Fathers, and its production would have been, according to the testimony of Don Franc. Xarque (Gay, op. cit., 214), a credit to any Spanish cathedral. In consequence, the church choirs of the Reductions were frequently invited to the Spanish cities. The ceremonies of the Feast of Corpus Christi, the patronal feasts, the Rogation and pentential processions, the devotion to the saints, particularly to the Blessed Virgin, the representations of the Crib and the Passion, mystery-plays, sacramental dances, etc., convey a convincing picture of the religious devotion of the Reductions. Religious societies also, especially the Sodalities of the Blessed Virgin, attained to a remarkable growth (see "Sodalen-Correspondencia", II, 125). The reception of the sacraments, after the Reductions first decreed it, and a solid body of older Christians had been obtained, was, according to the annual reports, and
in accordance with ecclesiastical practice of the times, very good. The members of the religious societies received Communion monthly, many of them weekly. The early marriages (boys were obliged to marry at 17, girls at 15), strict discipline, and surveillance fostered chastity among the natives, which aided the natural increase of the race, ordinarily not very fruitful (the average number of children in each family was four). Careful control and strict segregation of all objectionable elements did the rest. "Such innocence prevails among these people", Bishop Pazardo wrote, 20 May, 1720, from Buenos Aires to Philip V. " who are composed exclusively of Indians naturally inclined to all kinds of vices, that I believe no mortal sin is ever committed there, the vigilance of the shepherds foreseeing and preventing even the slightest fault" (Charlevoix, loc. cit., III, 94). A number of authentic testimonials of bishops and royal visiting inspectors speak with the greatest admiration of the religious zeal, the devotion, purity of morals, Christian brotherly love, and conscientiousness of the Indians, as well as the unswerving devotion and the edifying lives of the priests (see Charlevoix, loc. cit., Pièces justificatives; "Lettres édits.", loc. cit., 401; Cardiel, loc. cit., 118).

G. Schools and Education.—Each Reduction had, at least during the later period, an elementary school with Indian teachers educated by the Fathers; there at least the boys, above all the sons of the caciques and the more prominent Indians, from whose ranks the heads of the villages and other officials were mostly taken, could learn reading, writing, and arithmetic. In this respect also the Reductions were in advance of the Spanish colony. Even Bucareli, who later carried out the decree of expulsion in a relentless fashion, acknowledged the work of the Reduction schools (Brabo, loc. cit., 222; cf. Cardiel, loc. cit., 284; Peramas, loc. cit., 37). Boys who were especially gifted also received instruction in Latin sufficient to enable them to perform sexton's duties and to read at table in the "college". The schools for singing and music were conducted very successfully, so that each Reduction had a capable church choir and orchestra.

The accusation that the Jesuits studiously prevented the Indians from learning Spanish, in order to preserve their secrets the more securely and to prevent intercourse with the colonists, is untrue, as Bucareli attests, and is, besides, altogether absurd, since the Guarani language, then as now, was the common language of the Spaniards also. The women knew no Spanish (see Stein-Wappens, "Handb. de Allg. Geogr. und Statistik.", 7th ed., Leipzig, 1858, I, 3, 1160; also Roger and Longchamps, "Essai hist. sur la révol. du Parag.", Pau, 1827, 266). The fathers surely sought to introduce the Spanish language in their own interest, although it was very difficult for the Indians to learn and very unpopular with them; still they followed the jus indicum (Tit. I, c. vi, leg. 18) which did not oblige the natives to learn Spanish. What the Jesuits have done for the science of languages in Paraguay has been collaborated and briefly dealt with by J. Dahlmann, S.J., in his book "Die Sprachkunde und die Missionen" (Freiburg, 1891), 79.

H. Discipline and Penal Regulations.—The Indians were like children; it was necessary to accustom them to Christian morals and love of work by mildness linked with severity. The daily routine, marked by the ringing of the bell, the strict segregation of the sexes in public community, the life demanded by the jus indicum, together with a prudent system of surveillance demanded by the commingling of older Christians, neophytes, and the new arrivals constantly coming in from the wilderness, helped to achieve this result. Another precaution was the segregation, as far as possible, of the Indians from the Spaniards, and from the encomienda Indians, who were mostly of questionable moral character, a measure which Ulloa (loc. cit., 549), referring to the sad experience in Peru, considers entirely appropriate, and the observance of which the missionaries of the Gran Chaco even to-day deem necessary (see "Kathol. Missionsen", 1906-10, 135 and 157). Regarding the penal discipline, even Asara, who is so adverse to the Jesuits, admits "that they exercised their authority with a mildness and moderation (suavidad y moderación) which one must admire" ("Descripción del Hist. del Paraguay", 2 vols, Madrid, 1847, e. ciii, n. 16; Ulloa, loc. cit., 1, 544). Minor offences, such as laziness, public disturbances etc., were punished by sentences of fasting or a few blows with a whip, trespassions of a more serious character by arrest and confinement in jail on small rations. Refractory women were confined for a time in the cotiguazu, or house for the women. To prevent abuse of authority on the part of the Indian officials, they were not permitted to inflict punishment of any kind without having previously reported the case in question to the Fathers. Capital punishment was never inflicted. Crimes deserving capital punishment, which occurred but very rarely, were punished by expulsion from the Reduction and surrender of the perpetrator to the Spanish authorities. The fact that these tribes so enshrined liberty, did not undertake a single uprising against the missionaries, while on the other hand revolts among the encomienda Indians were very frequent, and the additional circumstance that two or three Fathers were sufficient to keep a population of 1000 to 2000
souls in order and discipline, surely speaks very
strongly in favour of the system and proves the un-
truth of what was asserted about apocryphal
munificence of Philip V; besides, the most celebrated
The Care of the Sick was well organized in all the
Reductions (Peramas, loc. cit.; 110; Cardiel, 248).
In each village there were four to eight nurses, well-
trained in the use of medicines, and devoted abso-
luely to their profession; they were called curarepas,
or cross-bearers, from the shape of their staffs which
terminated in a cross at the top. They made a round
of the village each day, and were obliged to give the
Fathers an exact report of the condition of the sick,
so that as a consequence scarcely an Indian died with
in the church. The remedies principally used were the indigenous medicinal herbs. In
addition, each "college" had a pharmacy. Some
Fathers and Brothers who possessed a knowledge of
medicine compiled special medicinal handbooks for
use in the Reductions. Several German Fathers and
a few lay-brothers, the latter having been apothecaries
before entering the order, deserved particularly well of the Reductions in this respect; pre-eminent in this
regard was the Tyrolean Father Sigismund Aperger
(Huonder, "Die deutschen Jesuiten-missionäre", p. 82).
Their daily work was characteristic of the healthy racial
condition of the Reductions, absolutely no power of resistance to certain contagious
diseases, such as measles and smallpox. Repeated
severe epidemics of these diseases, such as occurred in
1618, 1619, 1635, 1638, 1692, 1718, 1733, 1739,
and 1794, decimated the population of the Reductions in a
tragic manner. Thus in the one year 1735
measles brought death to 18,773 persons, and in 1737
smallpox claimed more than 30,000 victims. In 1733
12,933 children died of smallpox. Were it not for these epidemics, the population of the Guarani
missions would have been twice as large (Peramas, loc. cit.). These epidemics demanded
herculean efforts on the part of the Fathers.

K. Relations between the Reductions and the Spanish Government.—Nothing can be more absurd than the
myth of the "independent Jesuit State of Paraguay", as
mendaciously constructed by Ibades and other writers.
The entire foundation and development of the
Reductions took place with the consent of the Spanish
kings and on the strength of the royal decrees and
privileges, which were summarized, confirmed, and en-
largened in the famous decrees of Philip V of 28 Dec.
1743 (Charlevoix, loc. cit., VI, 331). As late as 1774
the Hieronymite P. Cevallos could truly maintain
that all the Jesuits had done in Paraguay "era
todo probado por reales cédulas 6 procedía de ordenes
expressas" (Cunningham Graham, loc. cit., 192). This
jurisdiction exercised by the crown, as part of the
direct jurisdiction of the crown, in such a manner,
however, that part of the sovereign rights were exer-
cised by the governor in the name of the king (from
1736 onwards all the Reductions were under the
authority of the Governor of Buenos Aires). All
royal commands and decrees were announced and
executed in the Reductions also, unless the latter
were expressly excepted. The governors confirmed
the new officials in the Reductions after the annual
elections, as also the newly appointed curas belonging
to the Society of Jesus; they made regular official
visits to the Reductions, and sent reports to the king
regarding their visitations. The Reductions were
ready for war at the call of the governors, and the
latter could always depend absolutely upon their
loyalty, a fact which they acknowledged frequently
and in glowing terms in their reports to the king
(Charlevoix, loc. cit., and "Pièces justificatives").

Further, the Reductions paid the taxes imposed and
were laid upon them, faithfully and punctually, and
moulded their conduct in accordance with all the laws
of the Society of Jesus; they were not merely
exempted or modified in their application to that ter-
ritory by special royal privileges (Deer. Phil. V,
art. 5, in Charlevoix, loc. cit.). Controversies with
the governors arising in consequence of unjust encroach-
enments were speedily arbitrated by the royal au-
dicence in Charcas, by royal inspectors or by investigating
committees, especially named and appointed by the
king himself.

Loalty to the king and enthusiasm for his cause
and person were instilled deeply by the fathers in the
hearts of the Reduction Indians, Philip V himself
declaring in his famous decree of 28 Dec., 1743 (Char-
levoix, loc. cit., 379) that in his entire colonial posses-
sions in America he had no more faithful subjects.
On all patronal feasts the royal standard was borne
in the churches; the remedies principally used
were indigenous medicinal herbs. In addition, each "college" had a pharmacy. Some
Fathers and Brothers who possessed a knowledge of
medicine compiled special medicinal handbooks for
use in the Reductions. Several German Fathers and
a few lay-brothers, the latter having been apothecaries
before entering the order, deserved particularly well of the Reductions in this respect; pre-eminent in this
regard was the Tyrolean Father Sigismund Aperger
(Huonder, "Die deutschen Jesuiten-missionäre", p. 82).
Their daily work was characteristic of the healthy racial
condition of the Reductions, absolutely no power of resistance to certain contagious
diseases, such as measles and smallpox. Repeated
severe epidemics of these diseases, such as occurred in
1618, 1619, 1635, 1638, 1692, 1718, 1733, 1739,
and 1794, decimated the population of the Reductions in a
tragic manner. Thus in the one year 1735
measles brought death to 18,773 persons, and in 1737
smallpox claimed more than 30,000 victims. In 1733
12,933 children died of smallpox. Were it not for these epidemics, the population of the Guarani
missions would have been twice as large (Peramas, loc. cit.). These epidemics demanded
herculean efforts on the part of the Fathers.

L. Exclusion of the Spaniards from the Territory of the
Reductions.—The isolation of the Indians and the exclusion of the Spaniards from the territory of the
Reductions, prompted by reasons of principle and
strictly enforced, have given the opponents of the Jesuits ample material for bitter insinuations. These
measures, however, were sanctioned by royal decrees and
were necessary for the attainment of the purpose of the
mission. "Nothing can justify this procedure better," writes Uloa (loc. cit., I, 550), "than the sad
example of the decline of the missions in Peru. It
is surely a significant fact that Governor Bucareli after the expulsion of the Jesuits strongly urged
the continuance of this system of isolation of the interest of the Indians in his instructions to his successor,
written in 1785 (Drabo, loc. cit., 320). Moreover,
officials of the crown always had free access to the
Reductions, and where no danger was to be feared,
friendly relations were maintained with the neigh-
boring Spanish colonists, and the latter were fre-
quently invited to festivities, asked to act as sponsors in
baptism, etc. Further, the villages nearest to
Amende: Santa Maria, San Ignacio Guasu, Santa
Rossi, Santiago, San Cosme, and Itapua were at the
king's request opened on certain days of each month
to Spanish merchants for the purpose of selling their
goods. A number of trustworthy Spaniards in the
service of the missions lived in the Reductions, and
each Reduction had a separate lodging-house for
travelling strangers (Cardiel, 213; Peramas, 93).

M. Relations of the Reductions to Ecclesiastical Au-
thorities.—A portion of the Guarani Reductions was
under the jurisdiction of the Bishop of Paraguay (ordin-
ated 1547), another under the authority of the
Bishop of Buenos Aires (1582), while the Reductions of
the Chiquitos belonged to the Diocese of Santa
Crus de la Sierra (1605), and the colleges and missions of Tucuman to the See of Cordoba (1670). The jurisdiction of the bishops was limited only by the exemptions of the Society of Jesus, which it held in common with the other orders and which were clearly determined by papal bulls. For the rest, the bishops exercised their episcopal authority and functions freely in the territory of the Reductions, confirmed the curas proposed by the superiors of the order, drew their tithes, performed the missions, and held from time to time confirmation visits regularly (Cardiel, loc. cit., 213) and sent reports to the king and to Rome (cf. the brilliant testimony cited by Charlevoix, loc. cit., 329; Hernandez, "El Extrafamente", 183; Laso, Hift. de las Revoluciones", I, 50, 102, 227 and passim). The visits to the distant Reductions being attended by great difficulties, the bishops conferred extensive rights and powers upon the superiors of the missions (Cardiel, loc. cit., 13, 19, and the like) between the Jesuits and the bishops, although the latter mostly belonged to other orders, were very good throughout.

One single exception is found in the case of the Bishop of Asuncion, D. Bernardino de Cardenas, O.S.F. (1642-49), whose actions brought confusion upon the entire country, and whose antipathy to the Jesuits threatened to ruin the Reductions. In 1649 he was removed to Santa Cruz de la Sierra, and later became sincerely reconciled to the Jesuits. The Cardenas affair was eagerly taken advantage of by the anti-Jesuit party, particularly under Pombal. The "Coleccion general de documentos ineditos tocantes á la persecucion que los regulares de la Compania suscitaron y siguieron tanerezmente . . . desde 1644 hasta 1660 contra el Illeso — y Raro — Sr. Fr. D Bernardino de Cardenas". Madrid, 1708, 2 vols., which was written about that time, is misleading throughout and unhistorical. There can be no doubt on which side right and wrong were, the representation of Marcellino da Civezza (loc. cit.) to the contrary notwithstanding. (See Charlevoix, loc. cit., II, 488; III, 381; Cunnigham Graham, loc. cit., 102.) From 1654 onwards the name Reductions was officially altered to Doctrinas and the mission stations treated as parishes, a procedure which, in missionary lands, was by no means contrary to the rules of the order, as the apostate Ibanes maintains. Each parish had a cura (pastor) and a vicario, in larger towns several. The entire territory of the Reductions was under the authority of a superior, who resided at Candelaria and had, in order to lighten his burden, a vice-superior in the Paraná and one in the Uruguay territory. The Doctrinas together formed a colegium, according to the rule of the order; the superior missionis acted as rector and as representative of the mission in relation to the ecclesiastical and secular authorities. He was surrounded by a council of eight consuls, chosen from among the oldest and most experienced fathers. Every three or four years the territory of the Reductions was visited once or twice by the Provincial of Paraguay. The discipline of the order was strictly enforced and the religious spirit of the members is confirmed by the official testimony of the bishops, governors, and royal inspectors (Cardiel, loc. cit., 247; Ulloa, loc. cit., I, 447). A document written in Guarani, which was found during the forcible occupation of San Lorenzo (May, 1760).

and in which the Indian Neenguiru describes the life and activity of the fathers, is touchingly beautiful (Archiv. Simancas. Est. legajo 7, 450 fol. 21 and 22).

N. How the System has been Judged.—The singular nature of the Reductions has aroused the interest and admiration of numerous thinkers, philosophers, historians, and explorers to an exceptional degree. Men of the most divergent callings and denominations, such as Buffon, Montesquieu, Châteaubriand, A. von Haller, Joh. von Müller, Macaulay, Dallas, Robertson, Wappes, Southey, Cunningham Graham, Bluntschli, Joh. Rein, Popping, von Martinus, Taugewitter, and many others have expressed their warmest appreciation. These opinions, in conjunction with the brilliant testimonials of the Spanish kings, of governors, inspectors, bishops and others should be sufficiently weighty to characterize as lies and slanderous accusations the spiteful attacks of professed enemies of the Church and the Jesuits (see bibliography below). It is to be regretted that prejudice against the Jesuit Order still spreads these lies of history. The Reduction system undoubtedly has its weak points and imperfections; they may be advanced against the system, but this should be done in a manner consistent with objective historical research. It is certainly inconsistent to bestow immoderate praise upon the system of the Incas, and at the same time to find fault with the Reduction system, which adopted and Christianized all the good features of that system (Monner-Sans, loc. cit., 51).

An objection frequently advanced against the Reductions, even by well-meaning writers, was that the Reduction system did not educate the Indians up to autonomy but allowed them to remain in a state of tutelage. This policy, they maintain, explains the decline of the Reductions after the expulsion of the Jesuits. In answer it may be briefly stated that:—

(a) The work of the Jesuits was destroyed before it had reached its highest development.

(b) As a matter of fact, the Jesuits used every effort to educate the Indians up to autonomy (for proof see Cardiel, loc. cit., II, 286). Their efforts were frustrated by the deep-rooted indolence of the race.

Proof of this is found in the fact that the Indians who left the Reductions and emigrated to the Spanish colonies failed to rise to independent positions, even among the most favourable conditions (ibid., p. 286, n. 110).

(c) The Reduction system must not be measured by European standards but according to the conditions prevailing at the time in Spanish colonies. "That it was not only suitable, but perhaps the best that under all the circumstances could have been devised for Indian tribes two hundred years ago, and then just emerged from semi-nomadism, is, I think, clear, when one re-
members in what a state of misery and despair the Indians of the encomiendas and the uninaitas passed their lives” (Cunningham Graham, loc. cit., 211).

(d) The system employed was, in fact, the only means adopted to save the Indians. “Whatever one may say of the Jesuit Missions,” Dr. K. Haebler writes (“Jahrbuch d. Geschichtswissenschaft”, 1903, III, 49), “they absolutely merit the praise that theirs were the only settlements in which the Indians did not die out, but rather increased in number.” Of the 80,000 Indians living in the Province of Santiago del Estero in the seventeenth century, only 80 remained about 1750; of 40,000 in the Cordoba territory only 40 (see Cardiel, loc. cit., 449).

(e) To what extent the self-reliance of the Reduction Indians and their appreciation of the unencumbered right of property was actually developed under Jesuit training was proved by their conduct during the war of the seven Reductions (see below), which, as is well known, was occasioned by the refusal of the Indians to surrender their land to the Portuguese, and by the fact that, for the first time in this matter, they rebelled even against the will of the Fathers. The dissolution of the Reductions after the departure of the Jesuits was not the result of their system, but of that which succeeded it.

IV. DECLINE OF THE REDUCTIONS.—The tragic decline of the Reductions is but an episode in the war against the Jesuit Order, which was begun about the middle of the eighteenth century, of which the trio of free-thinking ministers of France, Portugal, and Spain vis. Choiseul, Pombal, and Aranda, were the principal leaders, and which ended with the dissolution of the order in 1773. The principal factors can be enumerated only briefly here.

A. THE TREATY OF 1760.—The difficulties existing between Spain and Portugal because of the boundaries of their American possessions supplied the all-powerful Minister of State, Pombal, the mortal enemy of the Jesuits, with the longed-for opportunity of perfecting a clever diplomatic coup, and which simultaneous furthered the interests of Portugal and his hatred of the Society of Jesus. The treaty, secretly entered upon in Madrid on 15 Jan., 1750, contained among its provisions the agreement that Spain retain the long-contested colony San Sacramento at the mouth of the Uruguay, and transfer to Portugal, in exchange, the seven Reductions lying on the left bank of the Uruguay, i.e. about two-thirds of the present Brazilian province of Rio Grande do Sul and one of the most valuable sections of the territory of La Plata. The treaty further provided (art. 16) that the missionaries and their thirty thousand Indians leave their home, founded during a hundred and fifty years of patient toil, with bag and baggage and without delay, and settle on the opposite bank of the Uruguay. This change of location was, even from the viewpoint of colonial policy and political economy (see opinions regarding it by Bonnet de Mably and Manuel de la Sola, in Stein-Wapneus, loc. cit., I, 3, 1012, and Monner-Sans, loc. cit., 147) an incomprehensible miscarriage of justice towards the missionaries and the Indians alike, whose wishes had not been consulted in any manner; it was “one of the most tyrannical commands that was ever issued in the recklessness of unfeeling power” (Southey, loc. cit., III, 449). Southey correctly adds that the weak Ferdinand VI had no idea of the importance of the treaty.

B. THE WAR OF THE SEVEN REDUCTIONS.—The treaty caused surprise and indignation in the Spanish colony of La Plata. The Viceroy of Peru, the royal Audiencia of Charcas, and the secular and ecclesiastical authorities unanimously sent protests of the most emphatic nature to the Spanish Cabinet. They were as unsuccessful as the earnest petitions of the Jesuits, who declared that it was impossible to approach the Indians with the cruel demand to give up their home and their possessions, solemnly granted them by so many royal decrees, and to surrender them without any cause or provocation to their enemies and oppressors, the Portuguese. It was all of no avail. Ignazio Visconti, the General of the Society, over-compliant
to the wishes of the king, issued a strict command to the governors of the order to yield to the inevitable and to prevail upon the exiled Indians to submit, a task which they performed, at first indeed without success. In begging earnestly for a respite and in making every effort to have the cruel measure revoked they merely performed their duty; to present their complaints to the Inquisition, as has been done, is unjust. Their position was infinitely aggravated by the imprudent and domineering behaviour of the Spanish and Portuguese prelatures, and especially by the impassioned attitude of the commissaries of the order. P. Leon de los Aviles, A. de Andrade, and P. de Ribas were pointed out by the general and the king, and who treated as rebels his own brethren, who advised him to proceed with care and moderation. In spite of all the appeals of the Fathers, the Indians, gazed beyond bearing, rose in arms, but having no leader and lacking unity, were defeated in battle in Feb., 1756. Those who did not submit fled into the forests, where some of them carried on an unsuccessful guerilla warfare. The greater part of the Indians, following the advice of the Fathers, emigrated and settled in the Reductions of the province,Francisco de la Paraguay. In 1762 there were still 2497 families, numbering 11,064 souls, scattered there in 17 Reductions; 3052 families, numbering 14,018 souls, had returned to their old home in 1761. For in that year Spain had canceled the treaty of 1748, thereby the mistake that had been made. This War of the Seven Reductions was made to serve as one of the principal points of accusation advanced by the enemies of the Jesuits. A flood of defamatory pamphlets, falsified documents, and ridiculous fables, as, for instance, the tale of a king, Nicholas I of Paraguay, went out from an unscrupulous press which Pombal controlled, and was spread broadcast over Europe by the anti-Jesuit faction. Although their absolutely unhistoric character has long been clearly proven, these publications continue even now to vitiate the historical presentation of this period. The only known is on 2 April, 1767, Charles III of Spain, weak and duped, signed the edict which decreed the exile of the Jesuits from the Spanish possessions in America (cf. P. Hernandez, "El extrañamiento de los Jesuitas del Rio de La Plata y de las islas del Parag", Madrid, 1808; J. Nonell, "El V. P. Jose Pignatelli y la Comp. de Jesus en su extintión y restablecimiento", 3 vol., Manresa, 1983-94; Caretaglia, "P. Jose de la C. de J. en el Paraguay (1685-1767)", in "Kathol. Missionen", 1899-1900, 8 sq.). "The Jesuits in Paraguay, at least, by their conduct in their last public act, most amply vindicated their loyalty to the Spanish crown. . . . Nothing would have been easier, deployed as the Indians were at the time by the troops, than to have defied the forces which Bucareli had at his disposal and to have set up a Jesuit State, which would have taxed the utmost resources of the Spanish crown to overcome." . . . [but] "they made no fight, nor offered any resistance, allowing themselves to be taken as the sheep is seized by the butcher" (Cunningham Graham, loc. cit., 267). The Jesuit Province of Paraguay numbered at that time 584 members, 12 colleges, 1 university, 1 novitiate, 3 houses for conducting retreats, 2 residences, 57 Reductions. The Christian Indians. The taking from the Indians was heart-rending. In vain they pleaded in the most fervent manner to be allowed to keep their Fathers or to be assured that they would return (Hernandez, loc. cit., 364 sq.). They never returned.
of the great religious revolt of the sixteenth century must be sought as far back as the fourteenth. The doctrine of the Church, it is true, had remained pure; but daily living was yet fraught with threats. New ideas, and the numerous Benedictine monastic institutions of the Church continued their course uninterrupted. Whatever unhappy conditions existed were largely due to civil and profane influences or to the exercise of authority by ecclesiastics in civil spheres; they did not come from within, but were not, nor are they always occur simultaneously in the same country. Ecclesiastical and religious life exhibited in many places vigour and variety; works of education and charity abounded; religious art in all its forms was living; intellectual life was vigorous and influential; pious and edifying literature was common and appreciated. Gradually, however, and largely owing to the variously hostile spirit of the civil powers, fostered and heightened by several elements of the new order, there grew up in many parts of Europe political and social conditions which hampered the free reformatory activities of the Church, and favoured the bold and unscrupulous, who seized a unique opportunity to let loose all the forces of heresy and schism so long held in check by the hazardous action of the ecclesiastical and civil authorities.

A. Since the Barbarian invasions the Church had effected a complete transformation and revival of the races of Western Europe, and a glorious development of religious fervour. When the barbarians had become the powerful centre of the family of Christian nations, as well as such had for centuries, in union with the episcopate and the clergy, displayed a most beneficent activity. With the ecclesiastical organisation fully developed, it came to pass that the activities of the governing ecclesiastical bodies were no longer confined to the ecclesiastical domain, but affected almost every sphere of popular life. Gradually a regrettable worldliness manifested itself in many high ecclesiastics. Their chief object, viz. to guide man to his eternal goal, claimed too seldom their attention, and worldly activities became in too many cases the chief interest. Political power, material possessions, privileged position in public life, the defence of ancient historical rights, earthly interests of every kind, so often took the place of the chief aim of many of the higher clergy. Pastoral solicitude, the specifically religious and ecclesiastical aim, fell largely into the background, notwithstanding various spirited and successful attempts to rectify the existing evils.

B. Close connexion with the above were various abuses in the lives of the clergy and the people. In the Papal Curia political interests and a worldly life were often prominent. Many bishops and abbots (especially in countries where they were also territorial princes) bore themselves as secular rulers rather than as servants of the Church. Many members of cathedral chapters and other beneficed ecclesiastics were chiefly concerned with their income and how to increase it, especially by uniting several prebends (even episcopal ones) to one person, who thus enjoyed a larger income and greater power. Luxury prevailed widely among the higher clergy, while the lower clergy were often oppressed. The scientific and ascetic training of the clergy also left much to be desired, the moral standard of many being very low, and the practice of everything bad so everywhere observed. Not less serious was the condition of many monasteries of men, and even of women (which were frequently homes for the unmarried daughters of the nobility). The former possessed the greater wealth, and its members were in many places regarded with scorn. As to the Christian people itself, in numerous districts ignorance, superstition, religious indif-
ference, and immorality were rife. Nevertheless, vigorous efforts to revive religious life were made in most lands, and side by side with this moral decay appeared numerous examples of sincere and upright Christian life. Such efforts, however, were too often confined to limited circles. From the fourteenth century the demand for "reform of head and members" (reforming the conduct of its members) had been voiced with ever-increasing energy by serious and discerning men, but the same cry was taken up also by many who had no real desire for a religious renewal, wishing merely to reform others but not themselves; and seeking some other outlet for their own need for reformation of head and members, discussed in many writings and in conversation with insistence on existing and often exaggerated abuses, tended necessarily to lower the clergy still more in the eyes of the people, especially as the councils of the fifteenth century, though largely occupied with attempts at reformation, did not succeed in accomplishing it extensively or permanently.

C. The authority of the Holy See had also been seriously impaired, partly through the fault of some of the Curia; and the prestige of the unity the smaller princes. The pope's removal to Avignon in the fourteenth century was a grievous error, since the universal character of the papacy was thus obscured in the minds of the Christian people. Certain phases of the quarrel between the French and papal courts is clearly a decline of the papal power. The severest blow was dealt by the disloyal papal schism (1378-1418) which familiarised Western Christians with the idea that war might be made, with all spiritual and material weapons against, one whom many other Christians regarded as the only lawful pope. After the restoration of unity, the attempted reforms of the Papal Curia were not thorough. Humanism and the ideals of the Renaissance were zealously cultivated in Rome, and unfortunately the heathen tendencies of this movement, so opposed to the Christian moral law, affected too profoundly the life of many higher ecclesiastics, so that worldly ideas, luxury, and immorality rapidly gained ground at the centre of ecclesiastical life. When ecclesiastical authority grew weak at the fourteenth century, it necessarily decayed elsewhere. There were also serious administrative abuses in the Papal Curia. The ever-increasing centralisation of ecclesiastical administration had brought it about that far too many ecclesiastical benefices in all parts of Christendom, that in fact, the spiritual needs of the faithful, were too often considered. The various kinds of reservation had also become a grievous abuse. Dissatisfaction was felt widely among the clergy at the many taxes imposed by the Curia on the incumbents of ecclesiastical benefices. From the fourteenth century these taxes were called forth loud complaints. In proportion as the papal authority lost the respect of many, resentment grew against both the Curia and the reforming conscience of the fifteenth century, instead of improving this situation, weakened still more the highest ecclesiastical authority by reason of their anti-papal tendencies and measures.

D. In princes and governments there had meanwhile developed a national consciousness, purely temporal and to a great extent hostile to the Church; the civil powers interfered more frequently in ecclesiastical matters, and the direct influence exercised by laymen on the domain of the Church rapidly increased. In the course of the fourteenth and fifteenth centuries arose the modern concept of the State. During the preceding period many matters of a secular or mixed nature had been regulated or managed by the Church, in keeping with the historical development of European society. With the growing self-consciousness of the State, the secular government sought to cast off the ecclesiastical and secular orders, encroached on the ecclesiastical domain. During the course of the Western Schism (1378-1418) opposing popes sought the support of the civil powers, and thus gave the latter a standard occasion to interfere in purely ecclesiastical affairs. Again, to strengthen their position in the face of anti-papal tendencies, the popes of the fifteenth century made at various times certain concessions to the civil authorities, so that the latter came to regard ecclesiastical affairs as within their domain. For the future the Church was to be, not superordinate, but subordinate to the civil power, and was increasingly menaced with complete subjection. According as national self-consciousness developed in the various countries of Europe, the antagonism of the independent, national family of nations grew weaker. Jealousy between nations increased, selfishness gained ground, the rift between politics and Christian morality and religion grew wider, and discontent and pernicious revolutionary tendencies spread among the people. Love of wealth was meanwhile given a great incentive by the discovery of the New World, the rapid development of commerce, and the new prosperity of the cities. In public life a many-sided and intense activity revealed itself, foreshadowing a new era and inclining the popular mind to changes in the hitherto undivided province of religion.

E. The Renaissance and Humanism partly introduced and greatly fostered these conditions. Love of luxury was soon associated with the revival of the art and literature of Graeco-Roman paganism. The Christian religious ideal was to a great extent lost sight of: higher intellectual culture, previously confined in great measure to the clergy, but now common among the laity, assumed a secular character, and in only too many cases fostered actively and practically a pagan spirit, pagan morality and views. A crude materialism obtained among the higher classes of society and in the educated world, characterized by a gross love of pleasure, a desire for gain, and a voluptuousness of life diametrically opposed to Christian morality. Owing to a sort of spiritual degrading of the individual, the spiritual needs of the faithful, were too often considered. The various kinds of reservation had also become a grievous abuse. Dissatisfaction was felt widely among the clergy at the many taxes imposed by the Curia on the incumbents of ecclesiastical benefices. From the fourteenth century these taxes were called forth loud complaints. In proportion as the papal authority lost the respect of many, resentment grew against both the Curia and the reforming conscience of the fifteenth century, instead of improving this situation, weakened still more the highest ecclesiastical authority by reason of their anti-papal tendencies and measures.

In princes and governments there had meanwhile developed a national consciousness, purely temporal and to a great extent hostile to the Church; the civil powers interfered more frequently in ecclesiastical matters, and the direct influence exercised by laymen on the domain of the Church rapidly increased. In the course of the fourteenth and fifteenth centuries arose the modern concept of the State. During the preceding period many matters of a secular or mixed nature had been regulated or managed by the Church, in keeping with
dogma, and would find widespread support in humanistic circles.

The soil was thus ready for the growth of revolutionary movements in the religious sphere. Many grave warnings were indeed uttered, indicating the approaching danger and urging a fundamental reform of the actual evil conditions. Much had been effected in this direction by the reform movement in various religious orders and by the apostolic efforts of zealous individuals in a general ecclesiastical life and a uniform improvement of evil conditions, beginning with Rome itself, the centre of the Church, were not promptly undertaken, and soon it needed only an external impulse to precipitate a revolution, which was to cut off from the unity of the Church great territories of Central and almost all Northern Europe.

II. ORIGINAL IDEAS AND PURPOSES OF THE REFORMERS.—The first impulse to secession was supplied by the opposition of Luther in Germany and of Zwingli in German Switzerland to the promulgation by Leo X of an indulgence for contributions towards the building of the new St. Peter's at Rome. For a long time it had been customary for the popes to grant indulgences for buildings of public utility (e.g. In such cases the true doctrine of indulgences as a remission of the punishment due to sin (not of the guilt of sin) had been always upheld, and the necessary conditions (especially the obligation of a contrite confession to obtain absolution from sin) always inculcated. But the almsgiving for a good object, prescribed only as a good work supplementary to the chief conditions for the gaining of the indulgence, was often prominently emphasized.

The indulgence commissioners sought to collect as much money as possible in connexion with the indulgence. Indeed, frequently since the Western Schism the spiritual needs of the people did not receive as much consideration as a motive for promulgating an indulgence, as the need of the good object by promoting which the indulgence was to be gained, and the consequent need of obtaining alms for this purpose. The war against the Turks and other crises, the erection of churches and monasteries, and numerous other causes led to the granting of indulgences in the fifteenth century. The consequence was heightened by the fact that the secular rulers frequently made the promulgation of indulgences within their territories, consenting only on condition that a portion of the receipts should be given to them. In practice, therefore, and in the public mind the promulgation of indulgences took on an unchristian aspect, and, as a result, many came to regard them as an oppressive tax.

Vainly did earnest men raise their voices against this abuse, which aroused no little bitterness against the ecclesiastical order and particularly the Papal Curia. The promulgation of indulgences for the new St. Peter's furnished Luther with an opportunity to attack openly indulgences in general, and this attack was the immediate occasion of the Reformation in Germany. A little later the same motive led Zwingli to put forth his erroneous teachings, thereby inaugurating the Reformation in German Switzerland (see LUTHER, MARTIN; ZWINGLI, HUMANISTS). Both declared that they were attacking only the abuses of indulgences; however, they soon taught doctrine in many ways contrary to the teaching of the Church.

The great applause which Luther received on his first appearance, both in humanistic circles and among some theologians and some of the earnest-minded laity, was due to dissatisfaction with the existing abuses. His own erroneous views and the influence of his followers, who drove Luther into rebellion against ecclesiastical authority as such, and eventually led him into open apostasy and schism.

His chief original supporters were won among the Humanists, the immoral clergy, and the lower grades of the landed nobility imbued with revolutionary tendencies. It was soon evident that he meant to subvert all the fundamental institutions of the Church. Beginning by proclaiming the false doctrine of "justification by faith alone", he later rejected all supernatural remedies (especially the sacraments and the Mass), denied the meritoriousness of good works (thus condemning monastic vows and Christian asceticism in general), and finally rejected the institution of a genuine hierarchical priesthood (especially the papacy) in the Church. His doctrine of the Bible as the sole rule of faith, with rejection of all ecclesiastical authority, established subjectivism in matters of faith. By this revolutionary assault Luther forfeited the support of many serious persons disposed to break with the Church, but on the other hand won over all the anti-ecclesiastical elements, including numerous monks and nuns who left the monasteries to break their vows, and many priests who espoused his cause with the intention of marrying. The support of his sovereign, Frederick of Saxony, was of great importance. Very soon secular princes and municipal magistrates made the Reformers a prey to the true doctrine of indulgences as a remission of the punishment due to sin (not of the guilt of sin) had been always upheld, and the necessary conditions (especially the obligation of a contrite confession to obtain absolution from sin) always inculcated. But the almsgiving for a good object, prescribed only as a good work supplementary to the chief conditions for the gaining of the indulgence, was often prominently emphasized.

The indulgence commissioners sought to collect as much money as possible in connexion with the indulgence. Indeed, frequently since the Western Schism the spiritual needs of the people did not receive as much consideration as a motive for promulgating an indulgence, as the need of the good object by promoting which the indulgence was to be gained, and the consequent need of obtaining alms for this purpose. The war against the Turks and other crises, the erection of churches and monasteries, and numerous other causes led to the granting of indulgences in the fifteenth century. The consequence was heightened by the fact that the secular rulers frequently made the promulgation of indulgences within their territories, consenting only on condition that a portion of the receipts should be given to them. In practice, therefore, and in the public mind the promulgation of indulgences took on an unchristian aspect, and, as a result, many came to regard them as an oppressive tax.

Vainly did earnest men raise their voices against this abuse, which aroused no little bitterness against the ecclesiastical order and particularly the Papal Curia. The promulgation of indulgences for the new St. Peter's furnished Luther with an opportunity to attack openly indulgences in general, and this attack was the immediate occasion of the Reformation in Germany. A little later the same motive led Zwingli to put forth his erroneous teachings, thereby inaugurating the Reformation in German Switzerland (see LUTHER, MARTIN; ZWINGLI, HUMANISTS). Both declared that they were attacking only the abuses of indulgences; however, they soon taught doctrine in many ways contrary to the teaching of the Church.

The great applause which Luther received on his first appearance, both in humanistic circles and among some theologians and some of the earnest-minded laity, was due to dissatisfaction with the existing abuses. His own erroneous views and the influence of his followers, who drove Luther into rebellion against ecclesiastical authority as such, and eventually led him into open apostasy and schism. In England the origin of the Reformation was en-
tirely different. Here the sensual and tyrannical Henry VIII, with the support of Thomas Cranmer, whom the king had made Archbishop of Canterbury, severed his country from ecclesiastical unity because the pope, as the true guardian of the Divine law, refused to recognize the invalid marriage of the king with Anne Boleyn during the lifetime of his lawful wife. Renouncing obedience, the dictatorial monarch constituted himself supreme judge even in ecclesiastical affairs; the opposition of such good men as Thomas More and John Fisher was overcome in blood. The king wished, however, to retain unchanged both the doctrines of the Church and the ecclesiastical institution, and secondly, the doctrines and institutions rejected by Luther and his followers to be strictly prescribed by Act of Parliament (Six Articles) under pain of death. In England also the civil power constituted itself supreme judge in matters of faith, and laid the foundation for further arbitrary religious innovations. Under the following sovereign, Edward VI (1547–53), the Protestant party gained the upper hand, and thenceforth began to promote the Reformation in England according to the principles of the Reformation Churches. Here also force was employed to spread the new doctrines. This last effort of the Reformation movement was practically confined to England (see Anglicanism).

III. METHOD OF SPREADING THE REFORMATION. 

— One of the means of extending the Reformation was especially at the beginning, one of the chief methods employed by the reformers to promote their designs. By this means they won over many who were dissatisfied with existing conditions, and were ready to support any movement that promised a change. But it was especially the widespread hatred of Rome and of the members of the hierarchy, fostered by the incessantly repeated and only too justifiable complaints about abuses, that most efficiently favoured the reformers, who very soon violently attacked the papal authority, revolutionizing in it the supreme rule of the abuser, Calixtus. Hence the multitude of lampoons, often most vulgar, against the pope, the bishops, and in general against all representatives of ecclesiastical authority. These pamphlets were circulated everywhere among the people, who read them with intense interest, and still more violently shaken. Painters prepared shameless and degrading caricatures of the pope, the clergy, and the monks, to illustrate the text of hostile pamphlets. Waged with every possible weapon (even the most reprehensible), this warfare against the representatives of the Church, as the supposed originators of all ecclesiastical abuses, prepared the way for the reception of the Reformation. A distinction was no longer drawn between temporary and corrigible abuses and fundamental supernatural Christian infirmities, and the authority of the Church was still more violently shaken. The very revulsion of the clergy against the abuses, in the most important ecclesiastical institutions, resting on Divine foundation, were simultaneously abolished.

B. Advantage was also taken of the divisions existing in many places between the ecclesiastical and civil authorities. The development of the State, in its modern form, among the Christian peoples of the West gave rise to many disputes between the clergy and laity, between bishops and the cities, between monasteries and the territorial lords. When the Reformers withdrew from the clergy all authority, these disputes were easily settled; they enabled the princes and municipal authorities to end these long-pending strife to their own advantage by arbitrarily arrogating to themselves all disputed rights, banishing the hierarchy whose rights they usurped, and then establishing by their own authority a completely new ecclesiastical organization. The Reformed clergy thus in the name of reforming severed their only such rights as the civil authorities were pleased to assign them. Consequently the Reformed national Churches were completely subject to the civil authorities, and the Reformers, who had entrusted to the civil power the actual execution of their principles, had now no means of hindering themselves of this servitude.

C. In the course of centuries an immense number of foundations had been made for religious, charitable, and educational objects, and had been provided with rich material resources. Churches, hospitals, and schools had often great incomes and extensive possessions, which aroused the envy of secular rulers. The Reformation enabled the latter to secularize this vast ecclesiastical wealth, since the leaders of the Reformation constantly inveighed against the centralization of such riches in the hands of the clergy. The princes and municipal authorities were thus invited to seize ecclesiastical property, and employ it for their own purposes. Ecclesiastical privileges, which belonged to the incumbents only as ecclesiastical persons for administration and usufruct, were, in defiance of actual law, by exclusion of the incumbents, transformed into secular principalities. In this way the Reformers succeeded in depriving the Church of the temporal wealth provided for its maintenance, and in diverting the same to their own advantage.

D. Human passions, to which the Reformers appealed in the various ways, were another means of spreading the Reformation. The very ideas which these innovators defended—Christian freedom, license of thought, the right and capacity of each individual to found his own faith on the Bible, and other similar principles—were very seductive for many. The abolition of religious institutions which acted as a curb on sinful human nature (confession, penance, fasting, abstinence, vows) attracted the lascivious and frivolous. The warfare against the religious orders, against virginity and celibacy, against the practices of a higher Christian life, won for the Reformation a great number of those who, without a serious vocation, had embraced the religious life from purely human and worldly motives, and who wished to be rid of obligations towards God which had grown burdensome, and to be free to gratify their sensual cravings. This they could do more easily, as the conscience of the majority of the people was still so weak that the churches and monasteries rendered it possible to provide for the material advancement of ex-monks and ex-nuns, and of priests who apostatized. In the innumerable writings and pamphlets intended for the people the Reformers made it their frequent endeavour to excite the basest human incepts. Against the pope, the Roman Curia, and the bishops, priests, monks, and nuns who had remained true to their Catholic convictions, the most incredible lampoons and libels were disseminated. In language of the utmost coarseness Catholic doctrines and institutions were distorted and ridiculed. Among the lower, mostly uneducated, and abandoned elements of the population, the baser passions and instincts were stimulated and pressed into the service of the Reformation.

E. At first many bishops displayed great apathy towards the Reformers, attaching to the new movement no importance; its chiefs were thus given a longer time to spread their doctrines. Even later, though many worldly-inclined bishops, especially in civil affairs, they enabled the princes and municipal authorities to end these long-pending strife to their own advantage by arbitrarily arrogating to themselves all disputed rights, banishing the hierarchy whose rights they usurped, and then establishing by their own authority a completely new ecclesiastical organization. The Reformed clergy thus in the name of reforming severed their only such rights as the civil authorities were pleased to assign them. Consequently the Reformed national Churches were completely subject to the civil authorities, and the Reformers, who had entrusted to the civil power the actual execution of their principles, had now no means of hindering themselves of this servitude. The same might be said of the parochial clergy, who were to a great extent ignorant and indifferent, and looked on idly at the defection.
of the people. The Reformers, on the other hand, displayed the greatest zeal for their cause. Leaving no means unused by word and pen, by constant intercourse with similarly minded persons, by popular eloquence, which the leaders of the Reformation were especially skilled in employing, by sermons and tracts appealing to the weakness of the popular character, by inciting the fanaticism of the masses, in short by clever and zealous utilization of every opportunity and opening that presented itself, they proved their ardour for the spread of their doctrines. Meanwhile they proceeded with great astuteness, purported to adhere strictly to the essential truths of the Catholic Faith, retained at first many of the external ceremonies of Catholic worship, and declared their intention of abolishing only things resting on human invention, seeking thus to deceive the people concerning the real objects of their activity. They found indeed many pious and zealous opponents in the ranks of the regular and secular clergy, but the great need, especially at the beginning, was a universally organized and energetically conducted resistance to this false religion.

F. Many new institutions introduced by the Reformers flustered the multitude—e. g. the reception of the chalice by the whole people, the use of the vernacular in Divine service, the new hymns used during services, the reading of the Bible, the denial of the essential difference between clergy and laity. In this category may be included doctrines which had an attraction for many—e. g. justification by faith alone without reference to good works, the denial of freedom of will, which furnished an excuse for moral lapses, personal certainty of salvation in faith (i. e. subjective confidence in the merits of Christ), the universal priesthood, which seemed to give all a direct share in sacramental duties and ecclesiastical administration.

G. Finally, one of the chief means employed in promoting the spread of the Reformation was the use of violence by the princes and the municipal authorities. Priests who remained Catholic were expelled and replaced by adherents of the new doctrine, and the people were compelled to attend the new services. The faithful adherents of the Church were variously persecuted, and the civil authorities saw to it that the faith of the descendants of those who opposed the Reformation was rapidly sapped. In many places the people were severed from the Church by brutal violence; elsewhere to deceive the people the ruse was employed of retaining the Catholic rite outwardly for a long time, and prescribing for the reformed clergy the ecclesiastical vestments of the Catholic worship. The history of the Reformation shows incontestably that the civil power was the chief factor in spreading it in all lands, and that in the last analysis it was not religious, but dynastic, political, and social interests which proved decisive. Add, lastly, that the princes and municipal magistrates who had joined the Reformers tyrannized grossly over the consciences of their subjects and burgbers. All must accept the religion prescribed by the civil ruler. The principle "qui sumus, illius et religioni" (Religion goes with the land) is an outgrowth of the Reformation, and was by it and its adherents, wherever they possessed the necessary power, put into practice.

IV. SPREAD OF THE REFORMATION IN THE VARIOUS COUNTRIES. Germany and Austrian States.

The Reformation itself undertook in Germany when Luther affixed his celebrated theses to the doors of the church at Wittenberg, 31 October, 1517. From the consequences of papal excommunication and the imperial ban Luther was protected by Elector of Saxony, of Saxony. While outwardly adopting a neutral attitude, the latter encouraged the formation of Lutheran communities within his domains, after Luther had returned to Wittenberg and resumed there the leadership of the reform movement, in opposition to the Anabaptists. It was Luther who introduced the regulations of the German Reformation and religious functionaries. In accordance with these, Lutheran communities were established, whereby an organized heretical body was opposed to the Catholic Church. Among the other German princes who early associated themselves with Luther and seconded his efforts were: John of Saxony (the brother of Frederick); Grand-Master Albert of Prussia, who converted the lands of his order into a secular duchy, becoming its hereditary lord on accepting Lutheranism; Dukes Henry and Albert of Mecklenburg; Count Albert of Mansfeld; Count Edzard of East Friesland; Landgrave Philip of Hesse, who declared definitively for the Reformation after 1524. Meanwhile in several German imperial cities the reform movement was initiated by followers of Luther—especially in Ulm, Augsburg, Nuremberg, Nördlingen, Straubing, Constance, Erfurt, Zwickau, Magdeburg, Frankfurt-on-the-Main, and Bremen. The Lutheran princes formed the Alliance of Torgau on 4 May, 1526, for their common defence. By their appearance at the Diet of Speyer the popular religious hymns and the refusal to accept authority of the Edict of Worms against Luther and his erroneous doctrine, each might adopt such attitude as he could answer for before God and emperor. Liberty to introduce the Reformation into their territories was thus granted to the territorial rulers. The Catholic estates became discouraged, while the Lutheran princes grew ever more extravagant in their demands. Even the entirely moderate decrees of the Diet of Speyer (1529) drew a protest from the Lutheran and Reformist estates.

The negotiations at the Diet of Augsburg (1530), at which the estates rejecting the Catholic faith elaborated their creed (Augsburg Confession), showed that the restoration of religious unity was not to be effected. The Reformation extended wider and wider, both Lutheranism and Zwingerianism being introduced into other German territories. Besides the above-mentioned principalities and cities, it had made its way by 1530 into the principalities of Brandenburg, Pomerania, and Sleswick-Lüneburg, and in the next few years into Pomerania, Jülich-Cleve, and Würtemberg. In Silesia and the Duchy of Liegnitz the Reformation also made great strides. In 1531 the Smalkalde League, an offensive and defensive alliance, was concluded between the Protestant principalities of Germany and the cities. Especially after its renewal (1535) this league was joined by other cities and princes who had espoused the Reformation, e. g. Count Palatine Rupert of Zweibrücken, Count William of Nassau, the cities of Augsburg, Kempten, Hamburg, and others. Further negotiations and discussions between the religious parties were instituted with a view to ending the schism, but without success. Among the methods adopted by the Protestants in spreading the Reformation force was ever more freely employed. The Diocese of Naumburg-Zeitz becoming vacant, Elector John Frederick of Saxony installed by force in 1542, and the Reformation introduced into his domains by force. In Cologne itself the Reformation was very nearly established by force. Some ecclesiastical and territorial proved delinquent, taking no measures against the innovations that spread daily
In widening circles. Into Pfalz-Neuburg and the towns of Halberstadt, Halle, etc., the Reformation found entrance. The collapse of the Smalkalde League (1547) somewhat stemmed the progress of the Reformation. The Pfalz-Neuburg Diet and the Diocese of Naumburg, Duke Henry of Brunswick-Wolfenbüttel recovered his lands, and Hermann von Wied had to resign the Diocese of Cologne, where the Catholic Faith was thus maintained.

The formula of union established by the Diet of Augsburg in 1547-48 (Augsburg Interim) did not succeed in its object, although introduced into many Protestant territories. Meanwhile the treachery of Prince Moritz of Saxony, who made a secret treaty with Henry II of France, Germany's enemy, and formed a federation with the Protestant princes William of Hesse, John Albert of Mecklenburg, and Albert of Brandenburg, to make war on the emperor and empire, broke the power of the emperor. At the suggestion of Charles, King Ferdinand convened the Diet of Augsburg in 1555, at which, after long negotiations, the compact known as the Religious Peace of Augsburg was concluded. This compact contained the following provisions in its twenty-two paragraphs: (1) between the Catholic imperial estates and those of the Augsburg Confederation (to which the Catholic estates in the treaty peace and harmony was to be observed; (2) no estate of the empire was to compel another estate or its subjects to change religion, nor was it to make war on such on account of religion; (3) should an ecclesiastical dignity espouse the Augsburg Confession, he was to lose his ecclesiastical dignity with all offices and emoluments connected with it, without prejudice, however, to his honour or private possession. Against this ecclesiastical proviso the Lutheran estates protested: (4) the holders of the Augsburg Confession were to be left in possession of all ecclesiastical property which they had held since the beginning of the Reformation; after 1555 neither party might seize anything from the other; (5) until the conclusion of peace between the contending religious bodies (to be effected at the approaching Diet of Ratisbon) the ecclesiastical jurisdiction of the Catholic hierarchy was suspended in the territories of the Augsburg Confession; (6) should any conflict arise between the parties concerning the form of confessional attitude, an attempt was to settle such disputes by arbitration; (7) no imperial estate might protect the subjects of another estate from the authorities; (8) every citizen of the Empire had the right of choosing either of the two religions and settling in another territory without loss of rights, honour, or property (without prejudice, however, to the rights of the territorial lord over his peasantry); (9) this peace was to include the free knights and the free cities of the empire, and the imperial courts had not to sit in the provinces; (10) oaths might be administered either in the name of God or of His Holy Gospel. By this peace the religious schism in the German Empire was definitely established; henceforth the Catholic and Protestant estates are opposing camps. Almost all Germany, from the Netherlands frontier in the west to the Polish frontier in the east, the territory of the Teutonic Order in Prussia, Central Germany with the exception of the greater part of the western portion, and (in South Germany) Würtemberg, Ansbach, Pfalz-Zweibrücken, and other small domains, with numerous free cities, had espoused the Lutheran Reformation. Moreover, in the south and southeast, which remained prevalently Catholic, it found more or less numerous supporters. Calvinism also spread rapidly. But the Peace of Augsburg failed to secure the harmony hoped for. In defiance of its express provisions, a series of ecclesiastical principalities (2 archbishoprics, 12 bishoprics, and numerous abbey) were reformed and secularized before the beginning of the seventeenth century. The Catholic League was formed for the protection of this policy, interests, and to offset the Protestant Union. The Thirty Years War soon followed, a struggle most ominous for Germany, since it surrendered the country to its enemies from the west and north, and destroyed the power, wealth, and influence of the German Empire. The Peace of Westphalia, concluded in 1648 with France at Münster and with Sweden at Osnabrück, confirmed definitely the status of religious schism in Germany, placed both the Calvinists and the Reformed on the same footing as the Lutherans, and granted the estates immediately subject to the emperor the right of introducing the Reformation. Henceforth territorial sovereigns could compel their subjects to adopt a given religion, subject to the recognition of the independence of those who in 1524 enjoyed the right to hold their own religious services. State Absolutism in religious matters had now attained its highest development in Germany.

In German Switzerland a similar course was pursued. After Zurich had accepted, and forcibly introduced into the cantons the Reformed religion, Basle was an example. In Basle John Ecolampadius and Wolfgang Capito associated themselves with Zwingli, spread his teaching, and won a victory for the new faith. The Catholic members of the Great Council were expelled. Similar results followed in Appenzell, the Outer Rhodes, Schaffhausen, and Glarus. After long hesitation, the Reformation was accepted also at Berne, where an apostate Carthusian, Frans Kolb, with Johann and Berthold Hauser, preached Zwinglianism; all the monasteries were suppressed, and great violence was exercised to force Zwinglianism upon the people of the territory. St. Gall, where Joachim Vadianus preached, and a great portion of Graubünden also adopted the innovations. Throughout the empire Zwinglianism was a strong rival of Lutheranism, and a violent conflict between the two confessions began, despite constant negotiations for union. Attempts were not wanting in Switzerland to terminate the unhappy religious division. In May, 1536, a great religious disputation was held at Basle between Catholic and Zwinglian, being represented by Eck, Johann Faber, and Murner, and the Reformed by Ecolampadius and Berthold Hauser. The result was favourable to the Catholics; most of the representatives of the estates present declared against the Reformation and Zwingli and Zwingli were prohibited. This aroused the opposition of the Reformed estates. In 1527 Zurich formed an alliance with Constance; Basle, Bern, and other Reformed estates joined the confederacy in 1529. In self-defence the Catholic estates formed an alliance in 1529 for the protection of the true Faith within their territories. In the resulting war the Catholic estates gained a victory at Kappel, and Zwingli was slain on the battle-field. Zurich and Berne were granted peace on condition that no place should disturb another on account of religion, and that Catholic services might be freely held in the common territories. The Catholic Faith was restored in certain districts of Glarus and Appenzell; the Abbey of St. Gall was restored to the abbot, though the town remained Reformed. In Zurich, Berne, Basle, and Schaffhausen, however, the Catholics were unable to secure their rights. The Swiss Reformers soon composed formal statements of their beliefs; especially noteworthy were the First Helvetic Confession (1536) composed by Bullinger, Myconius, Germaine, and others (1536), and the Second Confession composed by Bullinger in 1564 (Confessio Helvética II);
the latter was adopted in most Reformed territories of the Zwinglian type.

B. The Northern Kingdoms: Denmark, Norway and Sweden.—The Lutheran Reformation found an early extension to Denmark, Norway (then united with Sweden), and Sweden. Its introduction was primarily due to royal influence. King Christian II of Denmark (1513–23) welcomed the Reformation as a means of weakening the nobility and especially the clergy (who possessed extensive property) and thereby extending the power of the throne. He first attempted to spread the teaching of Master Martin Luther in 1520 met with little success: the barons and privates soon deserted him for tyranny, and in his place elected his uncle Duke Friedrich of Schleswig and Holstein. The latter, who was a secret follower of Lutheranism, deceived the bishops and nobility, and swore at his coronation in 1523 to maintain the Catholic Religion. Seated on the throne, however, he favoured the Reformers, especially the preacher Hans Tausen. At the Diet of Odense in 1527 he granted freedom of religion to the Reformers, permitted the clergy to marry, and reserved to the king the confirmation of all episcopal appointments. Lutheranism was spread by violent means, and the faithful adherents of the Catholic religion were oppressed. His son Christian III (1533–47), "enforced" by force the edicts of prison the Danish bishops who protested against his succession, and courted the support of the barons. With the exception of Bishop Røhov of Røskilde, who died in prison (1544), all the bishops agreed to resign and to refrain from opposing the new doctrine, whereupon they were set at liberty and their property was restored to them. All the priests who opposed the Reformation were expelled, the monasteries suppressed, and the Reformation introduced everywhere by force. In 1537 Luther's companion Johann Bugenhagen (Pomeranus) was summoned from Wittenberg to Denmark to establish the Reformation in accordance with the ideas of Luther. At the Diet of Copenhagen in 1546 the last rights of the Catholics were withdrawn; right of inheritance and eligibility for any office were denied them, and Catholic priests were forbidden to reside in the country under penalty of death.

In Norway Archbishop Olaus of Trondhjem apostatized to Lutheranism, but was compelled to leave the land. This was the end of the deposed king, Christian II. With the aid of the Danish nobility Christian III introduced the Reformation into Norway by force. Iceland resisted longer royal absolutism and the religious innovations. The unflinching Bishop of Holm, John Higo, was beheaded. But elsewhere the Reformation spread rapidly after 1551. Some externals of the Catholic period were retained—the title of bishop and to some extent the liturgical vestments and forms of worship.

Into Sweden also the Reformation was introduced for political reasons by the regent ruler. Gustavus Vasa, who had been given to Christian II of Denmark in 1520 as a hostage and had escaped to Lübeck, there became acquainted with the Lutheran teaching and recognized the services it could render him. Returning to Sweden, he became at first imperial chancellor, and, after being elected king on the deposition of Christian II in Denmark, attempted to convert Sweden into a hereditary monarchy, but had to yield to the opposition of the clergy and nobility. The reformation helped him to attain his desire, although mistreatment was the great fidelity of the people to the Catholic Faith. He appointed to high positions two Swedes, the brothers Olaf and Lorenz Peterson, who had studied at Wittenberg and had accepted Lutheran's teaching; one was court chaplain, and the other professor at Upsala. Both laboured in secret for the spread of Lutheranism, and won many adherents, including the archdeacon Lorens Anderson, whom the king thereupon named his chancellor. In his dealings with Pope Adrian VI and his legates the king simulated the greatest fidelity to the Church, while he worked for the introduction of religious innovations. The Dominicans, who offered a strong opposition to his designs, were banished from the kingdom, and the bishops who resisted were subjected to all kinds of oppression. After a religious disputation at the University of Upsala the king had assigned the victory to Olaf Peterson, and proceeded to Lutheranize the university, to confiscate ecclesiastical property, and to employ every means to compel the clergy to accept the new doctrine. A popular rebellion gave him an opportunity of accusing the Catholic bishops of high treason, and in 1527 the Archbishop of Upsala and the Bishop of Westraæs were executed. Many ecclesiastics acceded to the wishes of the king; others resisted and had to endure violent persecution, an heroic resistance being offered by the nuns of Vadstena. After the Diet of Westraæs in 1527 great concessions were made to the king through fear of fresh subjection to the Danes, especially the right of confiscating church property, of ecclesiastical appointments and removals, etc. Some of the nobles were won over to the king's side, when it was made a condition that the new rite be taken to the Church by one's ancestors since 1453. Clerical celibacy was abolished, and the vernacular introduced into Divine service. The king constituted himself supreme authority in religious matters, and severed the country from Catholic unity. The Synod of Orebro (1529) completed the Reformation, although most of the external rites, the images in the churches, the liturgical vestments, and the titles of archbishop and bishop were retained. Later (1544) Gustavus Vasa made the title to the throne hereditary in his family. The numerous risings directed against him and his innovations were put down with bloody violence. At a later period arose other great religious contests, likewise of a political character.

Calvinism also spread to some extent, and Eric XIV (1560-68) endeavoured to promote it. He was, however, dethroned by the nobility for his tyranny, and his brother John III (1568-92) named king. The latter restored the Catholic Faith and tried to restore the land to the unity of the Church. But on the death of his wife Katarina, his ardour declined in the face of numerous difficulties, and his second wife favoured Lutheranism. On John's death his son Sigismund, already King of Poland and thoroughly Catholic in sentiment, became King of Bohemia under the regency of Charles, the chancellor of the kingdom, gave energetic support to the Reformation, and the Augsburg Confession was introduced at the National Synod of Upsala in 1583. Against the chancellor and the Swedish nobility Sigismund found himself powerless; finally (1600) he was deposed by an apostate from the "true doctrine", and Charles was appointed king. Gustavus Adolphus (1611-32), Charles's son, utilized the Reformation to increase the power of Sweden by his campaigns. The Reformation was then successfully enforced throughout Sweden.

C. France and French Switzerland.—In certain humanistic circles in France there originated at an early date a movement favourable to the Reformation. The centre of this movement was Meaux, where Bishop Guillaume Brignon favoured the humanistic and mystical idea of salvation. The exiles at d'Etampes, W. Farel, and J. de Clerc, Humanists with Lutheran tendencies, taught. However, the Court, the university, and the Parlement opposed the religious innovations, and the Lutheran community at Meaux was at Stockholm. Finally, the last efforts of the Reformation were found in the South, where the Waldensians had prepared the soil. Here public
riots occurred during which images of Christ and the saints were destroyed. The parlements in most cases took energetic measures against the innovators, although in certain quarters the latter found protectors—especially Margaret of Valois, sister of King Francis I and wife of Henry d'Albret, King of Navarre. The leaders of the Reformation in Germany sought to impose their views on France by the success of the Reformation in the land. The king, however, remained true to the Church, and suppressed the reform movements throughout his land. In the south-eastern districts, especially in Provence and Dauphiné, the support of the papacy was necessary to prevent the progress of Reformation, and the efforts of the Reformers to advance the work of the Reformation in the north were hindered by the efforts of the papacy to maintain the established church through the efforts of the Reformers from Switzerland and Strasbourg, until finally the desecration and plundering of churches compelled the king to take energetic steps against them. After Calvinism had established itself in Geneva, its influence grew rapidly in French reform circles. Calvin appeared at Paris as defender of the new religious movement in 1533, dedicated to the French king in 1536 his "Institutiones Christianae Religionis", and went to Geneva in the same year. Expelled from Geneva, he was removed, and the final establishment of his religious organization. Geneva, with its academy inaugurated by Calvin, was a leading centre of the Reformation and affected principally France. Pierre le Cercle established the first Calvinist seminaries in Paris; other academies were established at Lyons, Orléans, Angers, and Rouen, repressive measures proving of little avail. Bishop Jacques Spiniarius of Nevers lapsed into Calvinism, and in 1559 Paris witnessed the assembly of a general synod of French Reformers, which adopted a Calvinist creed and introduced the Swiss presbyteral constitution for the Reformed communities. Owing to the support of the Waldensians, to the dissemination of reform literature from Geneva, Basle, and Strasbourg, and to the steady influx of preachers from these cities, the adherents of the Reformation increased in France. On the death of King Henry II (1559) the Calvinist Huguenots wished to take advantage of the weakness of the Government to increase their power. The queen-dowager, Catherine de' Medici, was an ambitious intriguer, and pursued a time-serving policy. Political aspirations soon became entangled with the religious movement, which thereby assumed wider proportions and a greater importance. From opposition to the ruling line and to the powerful and zealous Catholic dukes of Guise, the princes of the Bourbon line, and the protectors of the Calvinists, these were Antoine de Vendôme, King of Navarre, and his brothers, especially Louis de Condé. They were joined by the Constable de Montmorency, Admiral Coligny and his brother d'Andelot, and Cardinal Odet de Châtillon, Bishop of Beauvais.

In spite of anti-heretical laws, Calvinism was making steady progress in the South of France, when on 17 January, 1562, the queen-dowager, regent for the young Charles IX, issued an edict of toleration, allowing the Huguenots the free practice of their religion outside the towns and forbidding all interference with and acts of violence against Catholic institutions, and ordering the restitution of all churches and all ecclesiastical property taken from the Catholics. Rendered thereby only more audacious, the Calvinists committed, especially in the South, revolting acts of violence against the Catholics, putting to death Catholic priests even in the suburbs of Paris. The occurrence at Vassy in Champagne on 1 March, 1562, where the rector of the site, Guillaume le Roi, fell into conflict with the Huguenots, inaugurated the first round of religious warfare in France. Although this ended with the defeat of the Huguenots, it occasioned great losses to the Catholics of France. Relics of saints were burnt and scattered, magnificent churches reduced to ashes, and numerous priests murdered. The edict of Amboise granted new favours to the Calvinistic nobles, although the earlier edict of tolerance was withdrawn. Five other civil wars followed, during which occurred the massacre of St. Bartholomew's Day (24 August, 1572). It was not until the line of Valois had become extinct with Henry III (1589), and Henry of Navarre (who enounced the Bourbon line had ascended the throne, that the religious wars were brought to an end by the Edict of Nantes (15 April, 1598); this granted the Calvinists not only full religious freedom and admission to all public offices, but also guarantees of the State. Ever-increasing difficulties of a political nature arose, and Cardinal Richelieu aimed at ending the influential position of the Huguenots. The capture of their chief fortress, La Rochelle (28 October, 1628), finally broke the power of the French Calvinists as a political entity. Later, many of their number returned to Catholicism, although there still remained numerous adherents of Calvinism in France.

D. Italy and Spain.—While in both these lands there appeared isolated supporters of the Reformation, or of the protestant tendencies there and there in Italy influential individuals (e. g. Vittoria Colonna and her circle) favoured the reform movement, but they desired such to occur within, not as a rebellion against the Church. A few Italians, on the other hand, espoused the Luthérian cause, especially Fernando Valdes, secretary of the Viceroy of Naples. In the cities of Turin, Pavie, Venice, Ferrara (where Duchess Renata favoured the Reformation), and Florence might be found adherents of the German and Swiss Reformers, although not so extreme as their prototypes. The more prominent had to leave the country —thus Pietro Paolo Vergerio, who fled to Switzerland and thence to Wittenberg; Bernardino Ochino, who fled to Geneva and was later professor at Oxford; Peter Martyr Vermigli, who fled to Zurich, and was subsequently active at Oxford, Strasbourg, and again at Zurich. By the vigorous inauguration of true ecclesiastical reform in the spirit of the Council of Trent, through the activity of numerous saintly men (such as Sta. Charles Borromeo and Philip Neri), through the vigilance of the bishops and the diligence of the Inquisition, the Reformation was excluded from Italy. In some circles rationalistic and anti-trinitarian tendencies showed themselves, and Italy was the birthplace of the two heresiarchs,Leslie Socinus and his nephew Faustus Socinus, the founders of Socinianism (q. v.).

The course of events was the same in Spain as in Italy. Despite some attempts to disseminate anti-ecclesiastical writings in the country, the Reformation won no success, thanks to the seal displayed by the ecclesiastical and public authorities in counteraising its efforts. The few Spaniards who accepted the new doctrines were unable to develop any reforming activity at home, and lived abroad—e. g. Francisco Enamaius (Dryander), who made a translation of the Bible for Spaniards, Joan O' Malo, Miguel Servet (Servetus), who was condemned by Calvin at Geneva for his doctrine against the Trinity and burnt at the stake.

E. Hungary and Transylvania.—The Reformation was spread in Hungary by Hungarians who had studied at Wittenberg and had embraced Lutheranism. In 1525 stringent laws were passed against the adherents of the heretical doctrines, but their numbers continued to increase, especially among the nobility, who wished to confiscate the ecclesiastical property, and to change the kingdom. Turkish victories and conquest and the war between Ferdinand of Austria and John Zapolya favoured the reformers. In addition to the Lutherans there were soon followers of Zwingli and Calvin in the country. Five Lutheran towns in Upper Hun-
gary accepted the Augsburg Confession. Calvinism, however, gradually won the upper hand, although the domestic disputes between the reformating sects by no means subsided. In Transylvania merchants from Hermannstadt, who had become acquainted with Luther's heresy at Leipzig, spread the Reformation after 1521. Notwithstanding the persecution of the Reformers, a Lutheran school was started at Hermannstadt, and the nobility endeavored to turn the Bohemian and Moravian Brethren, Archbishop Laski of Gnesen and King Sigismund I (1501-48) energetically opposed the spread of heretical doctrines. However, the supporters of the Reformation succeeded in winning recruits at the University of Cracow, at Pozna, and at Dantzic. From Dantzic the Reformation spread to Thorn and Elbing, and certain nobles favoured the new doctrines. Under the rule of the weak Sigismund II (1548-72) there were in Poland, besides the Lutherans and the Bohemian Brethren, Zwinglians, Calvinists, and Socinians. Prince Radziwill and John Laski favoured Calvinism, and the Bible was translated into Polish in accordance with the views of this party in 1563. Despite the efforts of the papal nuncio, Aloisius Lippomano (1556-58) free practice of religion was secured among the nobility in those cities, and the nobility were allowed to hold private religious services in their houses. The different Reformed sects fought among one another, the formula of faith introduced at the General Synod of Sandomir in 1570 by the Reformed, the Lutherans, and the Bohemian Brethren was condemned, and in 1573 the heretical parties secured the religious peace of Warsaw, which granted equal rights to Catholics and "Disidents", and established permanent peace between the two sections. By the zealous inauguration of true ecclesiastical reform, the diligent activity of the papal legates and able bishops, and the labours of the Jesuits, further progress of the Reformation was prevented.

In Livonia and Courland, the territories of the Teutonic Order, the course of the Reformation was the same as in the other territory of the order, Prussia. Commander Gotthard Kettler of Courland embraced the Augsburg Confession, and converted the land into a secular hereditary duchy, tributary to Poland. In Livonia Commander Walter of Plettenberg strove to foster Lutheranism, which had been accepted at Riga, Dorpat, and Reval since 1523, hoping thus to make himself independent of the Archbishop of Riga. When Margrave William of Brandenburg became Archbishop of Riga in 1539, Lutheranism rapidly obtained exclusive sway in Livonia. Several followers of Luther had indeed appeared there, and endeavoured to disseminate the Lutheran writings and doctrines. Charles V, however, issued secret edicts against the printing and spreading of the writings of the Reformer. The excesses of the Anabaptists evoked the forcible suppression of their movement, and until 1555 the Reformation found little root in the country. In this year Charles V granted the Netherlands to his son Philip II, who reformed the country in 1556. During this period Calvinism made rapid strides, especially in the northern provinces. Many of the great nobles and the much impoverished lower nobility used the Reformation to incite the liberty-loving people against the Muses being abolished and Divine service organized after the Lutheran model. At a synod held in 1544 the Saxon nation in Transylvania decided in favour of the Augsburg Confession, while the rural Magyars accepted Calvinism. At the Diet of Kaisersburg in 1556 general religious freedom was granted, and the ecclesiastical property confiscated for the defence of the country and the erection of Lutheran schools. Among the supporters of the Reformation far-reaching divisions prevailed. Besides the Lutherans, there were Unitarians (Socinians), Anabaptists, and adherents of three sects waged war against the others. A Catholic minority survived among the Greek Walachians.

F. Poland, Livonia, and Courland.—Poland learned of the Reformation first through some young students from Germany and then through the Moravian Brethren. Archbishop Laski of Gnesen and King Sigismund I (1501-48) energetically opposed the spread of heretical doctrines. However, the supporters of the Reformation succeeded in winning recruits at the University of Cracow, at Pozna, and at Dantzic. From Dantzic the Reformation spread to Thorn and Elbing, and certain nobles favoured the new doctrines. Under the rule of the weak Sigismund II (1548-72) there were in Poland, besides the Lutherans and the Bohemian Brethren, Zwinglians, Calvinists, and Socinians. Prince Radziwill and John Laski favoured Calvinism, and the Bible was translated into Polish in accordance with the views of this party in 1563. Despite the efforts of the papal nuncio, Aloisius Lippomano (1556-58) free practice of religion was secured among the nobility in those cities, and the nobility were allowed to hold private religious services in their houses. The different Reformed sects fought among one another, the formula of faith introduced at the General Synod of Sandomir in 1570 by the Reformed, the Lutherans, and the Bohemian Brethren was condemned, and in 1573 the heretical parties secured the religious peace of Warsaw, which granted equal rights to Catholics and "Disidents", and established permanent peace between the two sections. By the zealous inauguration of true ecclesiastical reform, the diligent activity of the papal legates and able bishops, and the labours of the Jesuits, further progress of the Reformation was prevented.

In Livonia and Courland, the territories of the Teutonic Order, the course of the Reformation was the same as in the other territory of the order, Prussia. Commander Gotthard Kettler of Courland embraced the Augsburg Confession, and converted the land into a secular hereditary duchy, tributary to Poland. In Livonia Commander Walter of Plettenberg strove to foster Lutheranism, which had been accepted at Riga, Dorpat, and Reval since 1523, hoping thus to make himself independent of the Archbishop of Riga. When Margrave William of Brandenburg became Archbishop of Riga in 1539, Lutheranism rapidly obtained exclusive sway in Livonia. Several followers of Luther had indeed appeared there, and endeavoured to disseminate the Lutheran writings and doctrines. Charles V, however, issued secret edicts against the printing and spreading of the writings of the Reformer. The excesses of the Anabaptists evoked the forcible suppression of their movement, and until 1555 the Reformation found little root in the country. In this year Charles V granted the Netherlands to his son Philip II, who reformed the country in 1556. During this period Calvinism made rapid strides, especially in the northern provinces. Many of the great nobles and the much impoverished lower nobility used the Reformation to incite the liberty-loving people against the Muses being abolished and Divine service organized after the Lutheran model. At a synod held in 1544 the Saxon nation in Transylvania decided in favour of the Augsburg Confession, while the rural Magyars accepted Calvinism. At the Diet of Kaisersburg in 1556 general religious freedom was granted, and the ecclesiastical property confiscated for the defence of the country and the erection of Lutheran schools. Among the supporters of the Reformation far-reaching divisions prevailed. Besides the Lutherans, there were Unitarians (Socinians), Anabaptists, and adherents of three sects waged war against the others. A Catholic minority survived among the Greek Walachians.

II. England and Scotland.—The Reformation received its final form in England during the reign of Queen Elizabeth (1558-1603). On the basis of the liturgy established in the "Book of Common Prayer" under Edward VI (1547-53) and the confession of Forty-two Articles composed by Archbishop Cranmer and Bishop Ridley in 1552, and after Queen Mary (1553-58) had failed to restore her country to union with Rome and the Catholic Faith, the ascendancy of Anglicanism was established in England by Elizabeth. The Forty-two Articles were revised, and, as the Thirty-nine Articles of the Anglican Church, became in 1562 the norm of its religious creed. The ecclesiastical supremacy of the queen was recognized, an oath to this effect (Oath of Supremacy) being required under penalty of removal from office and loss of property. Severe measures were taken against those who resisted, and the resistance, which was overcome by force. The majority of the lower clergy took the oath, which was demanded with ever-increasing severity from all members of the House of Commons, all ecclesiastics, baronets, and teachers. In externals much of the old Catholic form of worship was retained. After the failure of the movement in favour of Mary Stuart of Scotland, who had fled to England in 1568, the opposition of the English Catholics was continued with increasing violence. Besides the Anglican Established Church there were in England the Calvinistic Nonconformists, who opposed a presbyterian popular organization to the episcopal hierarchy; like the Catholics, they were much oppressed by the rulers of England.

In Scotland the social and political situation gave a great impetus to the Reformation, aided by the ignorance and rudeness of the clergy (to a great extent the result of the constant feuds). The nobility used the Reformation as a weapon in their war against the royal house, which was supported by the higher clergy. Already in 1542 supporters of the Lutheran doctrines (e. g. Patrick Hamilton, Henry Forest, and Alexander...
Seton, the king’s confessor, came forward as Reformers. The first two were executed, while the last fled to the Continent. However, the heretical doctrines continued to find fresh adherents. On the death of James V his daughter and heiress was only eight days old. The office of regent was filled by James Hamilton, who, though previously of Protestant sentiments, returned to the Catholic Church and supported Archbishop David Beaton in his energetic measures against the innovators. After the execution of the Reformer George Wishart, the Protestants formed a conspiracy against the archbishop, attacked him in his castle in 1545, and put him to death. The rebels (among them John Knox), joined by 140 nobles, then fortified themselves in the castle. Knox went to Geneva in 1548, there embraced Calvinism, and from 1555 was the leader of the Reformation in Scotland, where it won the ascendancy in the form of Calvinism. The political confusion prevailing in Scotland from the death of James V facilitated the introduction of the Reformation.

V. Different Forms of the Reformation.

The fundamental forms of the Reformation were Lutheranism, Zwinglianism, Calvinism, and Anglicanism. Within each of these branches, however, conflict arose in consequence of the diverse views of individual representatives. By negotiations, compromises, and formulæ of union it was sought, usually without lasting success, to establish unity. The whole Reformation, resting on human authority, presented from the beginning, in the face of Catholic unity of faith, an aspect of dreary dissension. Besides these chief branches appeared numerous other forms, which deviated from them in essential points, and gradually gave rise to the countless divisions of Protestantism. The chief of these forms may be briefly considered (for further treatment see the separate articles).

A. The Anabaptists, who appeared in Germany and German Switzerland shortly after the appearance of Luther and Zwingli, wished to trace back their conception of the Church to Apostolic times. They denied the validity of the baptism of children, saw in the Blessed Eucharist merely a memorial ceremony, and wished to restore the Kingdom of God according to their own heretical and mystical views. Though attacked by the other Reformers, they won support in many lands. They form the Mennonites, founded by Menno Simons (d. 1561).

B. The Schwenkfeldians were founded by Kaspar of Schwenkfeld, aulic councillor of Duke Frederick of Liegnitz and canon. At first he associated himself with Luther, but from 1525 he opposed the latter in his Christology, as well as in his conception of the Eucharist and his doctrine of justification. Attacked by the German reformers, his followers were able to form but a few communities. The Schwenkfeldians still maintain themselves in North America.

C. Sebastian Franck (b. 1499; d. 1542), a pure spiritualist, rejected every external form of ecclesiastical organization, and favoured a spiritual, invisible Church. He thus abstained from founding a separate community, and sought only to disseminate his ideas.

D. The Socinians and Other Anti-Trinitarians.

Some individual members of the early Reformers afterwards proceeded into evangelical and unitarianism. The Blessed Trinity, especially the Spaniard Miguel Serveceo (Servetus), whose writing, "De Trinitatis erroribus", printed in 1531, was burned by Calvin in Geneva in 1553. The chief founders of Anti-Trinitarianism were Lucius Socinus, teacher of jurisprudence at Mayence, and his nephew, Faustus Socinus. Compelled to fly from their home, they maintained themselves in various parts, and founded special Socinian communities. Faustus disseminated his doctrine especially in Poland and Transylvania.

E. Valentine Weigel (b. 1533; d. 1588) and Jacob Böhme (d. 1624), a shoemaker from Götitz, Thuringia, represented a mystical form of the Church. The external revelation of God in the Bible could be recognized only through an internal light. Both found numerous disciples. Böhme’s followers later received the name of Rosenkreuzer, because it was widely supposed that their most distinguished leader of a hidden guide named Rosenkreuz.

F. The Pietists in Germany had as their leader Philip Jacob Spener (b. 1635; d. 1705). Pietism was primarily a reaction against the barren Lutheran orthodoxy, and regarded religion mainly a thing of the heart.

G. The Inspiration Communities originated in Germany during the seventeenth and eighteenth centuries with various apocalyptic visionaries. They regarded the kingdom of the Holy Ghost as arrived, and believed in the universal gift of prophecy and in the millenium. Among the founders of such visionary societies were Johann Wilhelm Petersen (d. 1727), superintendent at Lüneberg, and Johann Konrad Doppel (b. 1734), a physician at Leiden. They established the Herrnhuter, conducted by Count Nicholas of Zinzendorf (b. 1700; d. 1760) on the Huterberg, as it was called, he established the community of Herrnhut, consisting of Moravian Brethren and Protestants, with a special constitution. Stress was laid on the doctrine of the Redemption, and strict moral discipline was inculcated. This community of Brethren spread in many lands.

I. The Quakers were founded by John George Fox of Drayton in Leicestershire (b. 1624; d. 1691). He favoured a visionary spiritualism, and found in the soul of each man a portion of the intelligence. All are allowed to preach, according as the spirit incites them. The moral precepts of this sect were very strict.

J. The Methodists were founded by John Wesley. In 1729 Wesley instituted, with his brother Charles and his friends Morgan and Kirkland, an association at Oxford for the cultivation of the religious and ascetic life, and from this society Methodism developed.

K. The Baptists originated in England in 1608. They maintained that baptism was necessary only for adults, upheld Calvinism in its essentials, and observed the Sabbath on Saturday instead of Sunday.

L. The Swedenborgians are named after their founder Emmanuel Swedenborg (d. 1772), son of a Swedish Protestant bishop. Believing in his power to communicate with the spirit-world and that he had Divine revelations, he proceeded on the basis of the latter to found a community with a special liturgy, the "New Jerusalem". He won numerous followers, and his community increased in many lands.

M. The Irvingites are called after their founder, Edward Irving, a native of Scotland and from 1822 preacher in a Presbyterian chapel in London.

N. The Mormons were founded by Joseph Smith, who made his appearance with supposed revelations in 1822.

Besides these best-known secondary branches of the Reformation movement, there are many different denominations; for from the Reformation the evolution of new forms has always proceeded, and must always proceed, inasmuch as subjective arbitrariness was made a principle by the heretical teaching of the sixteenth century.

VI. Results and Consequences of the Reformation.

The Reformation destroyed the unity of faith and inquisitorial, teaching that the nations of Europe, cut many millions off from the true Catholic Church, and robbed them of
the greatest portion of the salutary means for the cultivation and maintenance of the supernatural life. Incalculable harm was thereby wrought from the religious standpoint. The false fundamental doctrine of justification by faith alone, taught by the Reformers, produced a lamentable shallowness in religious life. Zeal for good works disappeared, the asceticism which the Church had practised from her foundation was despised, charitable and ecclesiastic acts were now looked upon as superfluous. Supernatural interests fell into the background, and naturalistic aspirations, aiming at the purely mundane, became widespread. The denial of the Divinely instituted authority of the Church, both as regards spiritual and temporal power, opened the door to every eccentricity, gave rise to the endless division into sects and the never-ending disputes characteristic of Protestantism and could not but lead to the complete unbelief which necessarily arises from the Protestant principles. Of real freedom of belief among the Reformers of the sixteenth century there was not a trace; on the contrary, the greatest tyranny in matters of conscience was displayed by the representatives of the Reformation. The most baneful Cessaropapism was meanwhile fostered, since the Reformation recognized the secular authorities as supreme also in religious matters. Thus arose from the very beginning the various Protestant "national Churches", which are entirely discordant with the Christian universality of the Catholic Church, and depend, alike for their faith and their organization, on the will of the secular ruler. In this way the Reformation was a chief factor in the evolution of royal absolutism. In every land, into which it found ingress, the Reformation was the cause of indecent suffering among the people; it occasioned civil wars which lasted decades, with all their horrors and devastations; the people were oppressed and enslaved; countless treasures of art and priceless manuscripts were destroyed; between members of the same land and race the seed of discord was sown. Germany in particular, the original home of the Reformation, was reduced to a state of piteous distress by the Thirty Years' War, and the German Empire was thereby dislodged from the leading position which it had for centuries occupied in Europe. Only gradually, and not essentially from the Reformation, but were conditioned by other historical factors, did the social wounds heal, but the religious corrosion still continues despite the earnest religious sentiments which have characterized many individual followers of the Reformation.

J. P. Kirsch.

Reformed Churches, the name given to Protestant bodies which adopted the tenets of Zwingli and Calvin. The spiritual principle of the distinctive title originated in 1561 at the colloquy of Poissy. Initiated in Switzerland, the movement from which the Churches sprang gained ground at an early date in France, some German states, the Netherlands, England, Scotland, Hungary, and Poland. Later, particularly in the sixteenth and seventeenth centuries, the system spread more widely throughout Europe, and to this day it is the prevailing type of Christian worship. The system has taught the separation of Church and State, and this separation has given rise to the establish of a General Synod. In 1794, this synod met for the first time; it held triennial sessions until 1812, and
then became an annual and representative body. A period of increased prosperity opened for the denomination in 1846, when numerous Hollanders settled in the United States. The church numbered 728 ministers, 684 churches, and 118,815 communicants (statistics of Dr. Carroll in the "Christian Advocate," New York, 20 Jan., 1911; this statistical authority is cited throughout for the United States). Through the emigration just referred to, the Christian Reformed Church was also transplanted to America. This denomination was organized in Holland (1835) as a protest against the rationalistic tendencies of the State Church. To it were given the titles of "Dutch Reformed Church" and "Christian Reformed Church". The former name was retained by the denomination in the United States until 1845, when it was changed to "Christian Reformed Church".

Educational and Missionary Activity. Some of the educational institutions controlled by the church were established as early as 1855. Rutgers College was founded in 1775 under the name of "Queen's College" at New Brunswick, New Jersey, where a theological seminary was established in 1832. Hobart College, founded in 1866, and the Western Theological Seminary in 1877. A board of education organized by private persons in 1828 was taken over by the General Synod in 1831; it extends financial assistance to needy students for the ministry. A "Dutch Reformed Ministers' Fund" grants similar aid to ministers, and a "Widows' Fund" to their wives. A Board of Publication has been in operation since 1855. The proselytizing activity of the Church is not confined to America; a Board of Foreign Missions established in 1832 was supplemented in 1867 by a Woman's Auxiliary Board. The Church maintains stations at Amoy, China, in the districts of Arooston and Madura, India, in Japan, and Arabia. II. The Reformed (German) Church in the United States. This church was founded by immigrants from the Palatinate and other German districts of the Reformed faith. Its history begins with the German immigration of the last quarter of the seventeenth century. Among its early ministers were Philip Boehm and George M. Weiss, whose fame is eclipsed, however, by that of the real organizer of the Church, Michael Schletter. The latter visited most of the German Reformed settlements, instituted pastors, established schools, and, in 1747, formed the first coetus. On a subsequent journey through the United States, he obtained aid from the Reformed Church in the United States for the establishment of a theological seminary. This institution was inaugurated in 1779 by the sending of missionaries to Germany. The first theological seminary was organized in 1825 at Carlisle, Pennsylvania; it was removed in 1836 to Mecberg, and in 1871 to Lancaster, Pennsylvania. The church also controls Western University (Atchison, Kansas), University of Chicago (both at Champaign, Illinois), Ursinus College (Collegeville, Pa.), Catawba College (North Carolina), and several other educational institutions of advanced grade. Its present membership is 207,116 communicants with 1226 ministers and 1730 churches. The Hungarian Reformed Church, which numbers about 5283 communicants, was organized in 1834 in New York City for the convenience of Hungarian-speaking immigrants.

III. The Reformed Churches in the Union of South Africa. Dutch settlers transplanted the Reformed faith to South Africa early in the 17th century. Churches of some importance at present exist in the country and are organized as the Reformed Churches of Cape Colony, of the Orange Free State, of the Transvaal, and of Natal. The progress in political union favourably influenced church affairs: in 1906 these separate bodies united themselves to form a federal council, and in 1909 under a general synod. Their collective membership amount to about 229,000 communicants. The movement towards union had been preceded by secessions caused by liberal and conservative theological tendencies. As a representative of conservatism the "Reformed Church in South Africa" was organized in 1859 by Rev. D. Postma. It has to-day an aggregate membership of about 16,000 communicants distributed throughout Cape Colony, Orange Free State, Transvaal, and Natal. An offshoot of the liberal spirit is the separatist "Reformed Church of the Transvaal", which was organized by the Rev. Van der Hoff and has at present about 10,000 communicants.

N. A. WEBER.

Reform of a Religious Order, in the true sense of the word, is a return or bringing back of the order from a mitigated or relaxed observance to the rigour of its primitive rule. It must be premised that mitigations of the primitive rule may be made quite lawfully (a) by the authority of the Holy See; (b) by decree of the superiors of the order itself, so far as they have power to modify its rule and observance; (c) by prescription or custom lawfully established, so long as such relaxations do not affect the vows of the religious. On the other hand, the obligations arising directly from the vows made by the members may not be modified by custom or prescription, and the abolition of abuses in such matters is not "reform" in the proper sense of the word. In cases where the mitigation or modification of the rule has been brought about by legitimate authority reform may be instituted either by the Holy See or by the general chapter (or other legislative body) of the order itself. All those who shall make their profession after the reform has been decreed are bound to submit to it. Those previously professed are held not to be bound to the reformed observance if the previous mitigations were introduced legitimately. If, however, the mitigations reform have been caused by neglect on the part of the superiors of the order, or have been introduced with their connivance, then those professed before the reform are bound to observe it. In practice, the Holy See is wont to use great discretion in this matter and prefers to invite or recommend the older religious to adopt the stricter rule. The principle underlying this is that no religious can be held bound beyond the limits to which he may be presumed to have been intended to bind himself when he made his vows.

G. ROGER HUDLESTON.
Refuge, Cities or towns which according to the Jewish law enjoyed the right of asylum and to which anyone who had unintentionally slain another might flee and be protected from the "avenger of blood". The barbarous custom of blood-revenge still exists among the Arab tribes. In virtue of it the kinman of a dead man is bound to a duty to seek him by killing the intentional or even unintentional slayer. The Biblical cities of refuge were six in number, viz., to the west, Cedes in Galilee, Sichem in Mount Ephraim, and Hebron in the south; to the east, beyond the Jordan, Bochim which is in the plains of the tribe of Ruben, Ramoth in Gilead of the tribe of Gad, and Gaulon in Basan of the tribe of Manasses (Josue xx, 7-8). It appears from Deut., xix, 2, 7, and from other considerations that three cities were originally intended—those to the west—which were probably established in the time of Josiah, when the boundaries and population of the Jewish state were comparatively small. When in post-Exilic times the Jews covered a wider area, the other three were doubtless added, as we find the number stated as six in Numbers (xxi, 14). The right of asylum was recognized in the Old Testament, but under conditions that are carefully laid down in the Jewish law. One who hadtreacherously and intentionally slain his hands with blood was allowed to find no refuge at the altar of God. Indeed he might be taken away from it to death (Deut., xxi, 14). He might even be struck down at the altar, as in the case of Josiah (III Kings, ii, 30, 31, 34). Protection was granted to those who had unintentionally taken the life of another (Deut., xix, 2-7). In order to justify his claim to immunity the fugitive had to prove to the authorities of the sanctuary or town that his deed was unpremeditated. After submitting his evidence he was allowed to remain within the prescribed precincts. He could not return to his old home, nor could the apprehension of him be taken away by money. Thus some expedition for his imprudence was exacted, and he became virtually a prisoner within the boundaries of the city to which he had fled. He could leave it only at the risk of his life at the hands of the avenger of blood. We are not informed by what means he was supported in the city of refuge, but probably he was obliged to work for his subsistence. Whether his family could join him in his exile is also a matter of mere conjecture. It is generally maintained that originally every altar or sanctuary in the land could extend its protection to anyone who had unintentionally taken the life of another. But with the suppression of the provincial high places and altars by Josiah (n. c. 621) the right of asylum naturally fell with them, and provision was made for a continuance of the ancient usage on a modified basis by the selection of certain cities of refuge.

James F. Drescoll.

Refuge, Sisters of Our Lady of Charity of the.—The Institute of Our Lady of Charity was founded (1641) by the Venerable Père Eudes, at Caen, Normandy, under the title of Our Lady of Refuge. Moved by pity for abandoned women living a life of vice, he attempted at first to unite the penitent among them and place them under the care of good and zealous women, but he soon became convinced that the only way of dealing with them was to found a congregation of holy women, who would bind themselves by vow to work for the reformation of those unfortunate ones. Thence he went to his aid temporarily, and, in 1644, a house was opened at Caen under the title of Our Lady of Charity. Other sisters joined them, and, in 1651, the Bishop of Bayeux gave the institute its approbation. In 1664 a Bull of approbation was obtained from Alexander VII. That same year a house was opened at Rennes, and the institute began to spread. When the French Revolution broke out there were seven communities of the order in France. From this parent-tree of Our Lady of Charity sprung the Order of the Good Shepherd (q. v.).

The Sisters of Our Lady of Charity do not limit their work to reclaiming the fallen; they also receive girls who are in danger of being lost or who are being brought up immorally. These form what is called the class of preservation. Government reformatories are attached to some of the monasteries. All the houses of this order are independent of each other; and each has its own novitiate, but the mother-house is still at Caen. The nunns wear a white habit and a large silver cross on the breast. To the three ordinary religious vows they add a fourth, viz., to devote themselves to the reformation of the fallen. The novitiate lasts two years. These sisters came to England in 1683 and now have houses at Bartestree, Waterlooville, Monmouth, Southampton, Northfield (near Birmingham), and Mold; in Ireland they have two houses at Dublin; in France they have seventeen: one at Caen, St.-Brieux, Reims, Le Roeux, Caen, Lyons, Valence, Toulouse, Le Mans, Blois, Montauban, Besancon, Valognes, and two at Marseille; in the United States they have two houses at both Buffalo and Pittsburg, and one at Green Bay (Wisconsin), Wheeling (W. Virginia), San Antonio and Dallas (Texas), and in Canada they have houses at Ottawa, Toronto, and Vancouver; in Mexico, two; in Italy, one at Loretto; in Spain, one at Bilboa, and in Austria, one at Salzburg.

Régale. Droit de (jus regale, jus regale, jus des portus; Germ. Regelerecht), originally denoted those rights that belonged exclusively to the sovereign as essential to his sovereignty (jura majora, jura essentia- tia), such as royal authority; or accidental (jura minora, jura accidentalia), such as the right of the chase, of fishing, mining, etc. By abuse, many sovereigns in the Middle Ages and in later times claimed the right to seize the revenues of vacant sees or imperial abbey, and gradually jus regale came to be applied almost exclusively to this assumed right. It is a matter of dispute on what ground the temporal rulers claimed these revenues. Some hold that it is an inherent right of the sovereign to impose on all others what he unfettered by the feudal system; still others derive it from them, or right which patrons or protectors had over their benefices. Ultimately, it had its origin in the assumption that bishoprics and imperial abbey, with all their temporalities and privileges, were royal estates given as feoff to the bishops or abbots, and subject to the feudal laws of the times. At first the right was exercised only during the actual vacancy of a see, but later it was extended over the whole year following the death of the occupant. Often the temporal rulers also claimed the right to collate all the benefices that became vacant during the vacancy of a diocese, with the exception of those to which the care of souls was attached.

It is difficult to determine when and where the jus regale was first exercised. In the Western Frankish Empire it made its first appearance probably towards the end of the Carolingian dynasty, that is, in the course of the tenth century. The first historical mention occurs in connection with King William II (Rufus of England), who in the death of Lanfranc in 1089, kept the archiepiscopal See of Canterbury vacant for more than three years, during which period the king seised all the archiepiscopal revenues. During the reign of Henry II (1154-89) it had become an established practice for
the King of England to take possession of the revenues of all vacant dioceses. That the pope did not recognize the right is manifest from the fact that Alexander III confined his whole of the Clarendon (1164), which provided that the king was to receive, as of seigniorial right (sicul dominico), all the income (omnes redditus et extitus) of a vacant archbishopric, bishopric, abbacy, or priory in his dominion (Mansi, XXI, 1185.). In 1176 Henry II promised the papal legate, even on condition that the regalia would last one year. With the exception of a few short periods, the right continued to be exercised by the English kings until the Reformation. Even at present the English Crown exercises it over the temporalities of vacant (Anglican) dioceses.

In Germany Henry V (1106–25), Conrad III (1138–52), and Frederic I (1155–89) are known as the first to have claimed it. Frederic I exercised it in its utmost rigour and styles it “an ancient right of kings and emperors” (Lacomblet, “Urkundenbuch für die Geschichte des Niederrheins”, I, 286). King Philip of Swabia reluctantly renounced it, together with the juss spoli, to Innocent III in 1203 (Mon. Germ.: Const., II, 9). Otho IV did the same in 1209 (ibid., 37). King Frederic II renounced it to Innocent III, first on 12 May, by a clause in the Privilege of Würzburg, in May, 1216 (ibid., 85), and again to Honorius III, at Hagena, in September, 1219 (ibid., 78). In 1233 he began to exercise it anew (ibid., 285), but only during the actual vacancy of dioceses, even for a whole year, as he had done previously. After the death of Frederic II the claim of the German Emperors to this right gradually ceased. At present the revenues of vacant dioceses in Prussia go to the succeeding bishop; in Bavaria, to the cathedral church; in Austria, to the “Religionsfonds”.

In France we find the first mention of it during the reign of Louis VII, when, in 1143, St. Bernard of Clairvaux complains, in a letter to the Bishop of Palestrina, that in the Church of Paris the king had extended the droit de régale over a whole year (ep. 224, P. L., CLXXXII, 392). Pope Boniface VIII, in his famous Bull, “Ausculata fill”, of 5 December, 1301, urged Philip the Fair to renounce it, but without avail. In France the right did not belong exclusively to the king: it was also exercised by the Duke of Aquitaine, by the Counts of Champagne and Anjou. Entirely exempt from it were the ecclesiastical provinces of Bordeaux, Auch, Narbonne, Arles, Aix, Émbrun, and Vienne. The Second Council of Lyons (1274) forbade under pain of excommunication to extend the juss regalit over any diocese which was at that time exempt from it (Mansi, XXIV, 90), and in 1499 Louis XII gave strict orders to his officials not to exercise it over exempt dioceses. Towards the end of the sixteenth century the restriction of the Council of Lyons began to be disregarded, and on 24 April, 1508, the Parliament decided that the king had the droit de régale over all the dioceses of France; but Henry IV did not carry this parliamentary decision into effect. On 10 February, 1573, Louis XIV issued a declaration, extending the droit de régale over all France. The Parliament was pleased, and most bishops yielded without serious protest, only Pavillon, of Alet, and Cautel, of Pamiers, both Jansenists, resisting. These at first sought redress through their national parlement, but the latter took the other side they appealed, in 1677, to Innocent XI. In three successive Briefs the pope urged the king not to extend the right to dioceses that had previously been exempt. The General Assembly of the French clergy held at Paris in 1681–2 sided with the king, and, deprecating vestments, were incorporated in the next year. Innocent XII, the right was maintained until the Revolution. Napoleon I attempted to restore it in a decree dated 6 November, 1813, but his downfall in the following year frustrated his plan. In 1880 the Third Republic again asserted the right, overstepping even the limits of Clarendon (1164), which provided that the king was to receive, as of seigniorial right (sicul dominico), all the income (omnes redditus et extitus) of a vacant archbishopric, bishopric, abbacy, or priory in his dominion (Mansi, XXI, 1185.). In 1176 Henry II promised the papal legate, even on condition that the regalia would last one year. With the exception of a few short periods, the right continued to be exercised by the English kings until the Reformation. Even at present the English Crown exercises it over the temporalities of vacant (Anglican) dioceses.

(See also bibliographies to Innocent XI and Louis XIV.)

MICHAEL OTT.

Regalia—According to the usage current in the British Isles the term regalia is almost always employed to denote the insignia of royalty or "crown jewels". The objects more immediately included under the collective term as commonly used are the following: the crown, the sceptre with the cross, the sceptre with the dove, the orb, the swords, the ring, the spurs, also the vestments in which the sovereign is arrayed after the union, to wit the colobium spondinis, the dalmatic, the armil, and the royal robe, or pall, as well as a few other miscellaneous objects connected with the coronation ceremony, such as the ampulla sanguinis, the regalia of state, the mantles, etc. All of these descend from pre-Reformation days, and many of them are directly religious in origin. Indeed there was a tendency not only in England, but also in Germany, France, and elsewhere, to connect these insignia with some sanctity and sometimes legendary possession of a former age, and to regard them strictly as relics. In point of fact all the English regalia were broken up and sold after the execution of Charles I, and the oldest of those now in existence had to be constructed anew at the Restoration in 1661; but it had always been the custom of old to regard them or most of them as connected with St. Edward the Confessor, to whose shrine in Westminster Abbey, where the coronation takes place, they were regarded as belonging. Even now the royal crown which the archbishop places on the king's head is still spoken of in a marginal note to the coronation service as "St. Edward's Crown" while we find in a chronicle of the fourteenth century, the "Annales Paulini", a vehement protest made in connection with the coronation of King Edward II that the crown which had been suffered to carry the "Crown of St. Edward" with his "polluted hands" (inquinatis manibus).

Most of the regalia enumerated above call for no special comment, but with regard to some forms of the significance of which has been misrepresented by Anglican writers with a more or less controversial purpose, a few words are necessary. To begin with, it has been pretended that the vestures in which the king is arrayed are the vestments of a bishop, and indicate an intention to endow the monarch with an ecclesiastical character. This contention forms part of a theory propounded by a prominent Anglican liturgist, Dr. Wickham Legg, that the king according to the medieval view was missa persona (i.e., both layman and ecclesiastic) and therefore spiritalis juridictionis capax (a fit subject for spiritual jurisdiction). The underlying and indeed the avowed purpose was to show that although it cannot be denied that the king is the official head of the Church of England, still there is nothing unbefitting in such a relation because the king is a member of the Church and consecrated to this special office by the Church herself. But the various arguments by which this contention is supported, and notably that based upon the supposed ecclesiastical character of the coronation vestments, are wholly fallacious. The dalmatic and the spondinis (alleged to be the equivalent of the alb) and the dalmatic, or superbtunica, are simply the or-
dinary dress of the later Roman Empire, and they did not acquire their liturgical character until after they had become the customary apparel of emperors on state occasions. This form of underclothing can be plainly traced in the consular diptychs upon which the pectoral attribute is indicated (Fig. 1). In these same diptychs the most prominent feature in the official vesture is an elaborately embroidered scarf which hangs down perpendicularly in front, passes round the body, and falls over the left arm. This scarf was the arruill. It is almost certainly the ancestor of the archiepiscopal pallium, but it remained for long centuries, as numberless Byzantine paintings and sculptures show, the most conspicuous element in the imperial state costume. There is serious reason to believe, though the details cannot be gone into here, that the loros is represented by this "arruill" though this is now a sort of stole which two or three centuries back was tied at the elbows. The address originally made at the delivery of the arruill declared it to be a symbol of the "Divine en-folding" (divina circumcunctio), which agrees much better with a wrap like the loros than with a stole or bracelet. Again "the Robe Royal or Pall of cloth of gold", which is embroidered with eagles, cannot with any reason be described as an ecclesiastical cope. It certainly represents the royal mantle which was normally a four-cornered garment fastened with a clasp over the right shoulder, such as is seen to recur several times in the carvings of the ivory book-cover of Queen Melisende now in the British Museum; such also as was found vesting the body of Edward I when his tomb was opened in 1774.

Not less misleading is the interpretation recently attached to one of the three swords carried before the king and known as the "sword of the spirituality" or "the sword of the Church." This does not in any way imply a spiritual or moral authority, as continued, as confused, as symbolized in the ecclesiastical Church, but it only symbolizes the solemn promise of the king to protect the Church. There were three such promises originally made by the king: the first to defend and secure peace for the Church; the second to punish wrong-doers; and the third to show justice and mercy in all his judgments. Now the three swords, now and anciently borne before the king at his coronation, were known as the sword of the clergy, the sword of the laity, and the third (crowned), which has no point, the sword of mercy. It is very reasonable to believe that these three swords typify the matter of the king's three ancient promises. As for the sword with which the king himself is girded in the coronation ceremony, this was originally in imperial coronations at Rome laid upon the tomb of Blessed Peter and, like the archbishop's pallium, presented as de corpore beati Petri sumpnum and consequently as a kind of reliquary of the Prince of the Apostles, in whose name and to defend whose authority the power of the sword is given to rulers of the Church. A theory that the orb is only a variant of the sceptre with a cross is now generally rejected, and with reason.

The questions here discussed are misleadingly treated in most manuals dealing with the coronation, e.g., Leo, The Coronation Records (London, 1902); Davenport, The English Regalia (London, 1897); Jones, Crown and Coronations (London, 1902). The reader may be referred for a fuller discussion to Tra supernunt. The Coronation Ceremonial (London, 1911); or Ideas, Is the Crowned King an Ecclesiastical Person in the Nineteenth Century and Now? For the early English and German regalia, the above works of Davenport and Leo are of value. See also the German regalia, see especially Boeck, De Institutione des heil. Röm. Reiches (Vienna, 1854); and Fremersdorff, Zur Geschichte der deutschen Reibekönigsmann in the Nachrichten of the Göttingen Akademie (1897).

HERBERT TRUBSTON.

Regeneration (Lat. regeneratio, Gr. ἰδρυμα and σαυτοθεσία) is a Biblico-dogmatic term closely connected with the ideas of justification, Divine sonship, and the disfiguration of the soul through grace. Confining ourselves first to the Biblical use of the term, we find regeneration from God used in indissoluble connexion with baptism, which St. Paul expressly calls "the laver of regeneration" (Titus, iii, 5). In his discoursing at the gate of Damascus he says to the highpriest, Saviour declares: "Unless a man be born again of water and the Holy Ghost, he cannot enter into the kingdom of God." In this passage Christianity from its earliest days has found the proof that baptism may not be repeated, since repeated regeneration from God is no less a contradiction than physical birth from a mother. The idea of "birth from God" enjoys a special favour in the Joannine theology. Outside the Fourth Gospel (1, 12 sq.; iii, 5), the Apostle uses the term in a variety of ways, treating "birth of God" as synonymous now with the "doing of justice" (I John, ii, 29), now with "faith in Jesus Christ" (I John, v, 1, 4 sq.), and elsewhere deducing from it a certain "incorruptible" of the just (I John, iii, 9; v, 18), which, however, does not necessarily exclude from the state of justification the possibility of sinning (cf. Bellarmine, De justifications), III, xv). It is true in all these passages there is no reference to baptism nor is there any reference to a real "regeneration"; nevertheless, "generation from God," like baptismal "regeneration," must be referred to justification both in the primitive and in the Protestant notion that there is in justification not a true annihilation, but merely a covering up of the sins which still continue (covering-up theory), or that the holiness won is simply the imputation of the external holiness of God or Christ (imputation theory).

The very idea of spiritual palingenesis requires that the justified man receive through the Divine generation a quasi-Divine nature as his "second nature," which cannot be conceived as a state of sin, but only as a state of sinlessness, and it is this state of sinlessness which must be explained. We can explain the statements that the just man is assured "participation in the divine nature" (cf. II Peter, i, 4; divina consors naturae), becomes "a new creature" (Gal., v, 6; vi, 15), effect which depends on justifying faith working by charity, not on "faith alone" (sola fides). When the Bible elsewhere refers regeneration to the Resurrection of Jesus Christ (I Peter, i, 3) or to "the word of God who liveth and remaineth for ever" (I Peter, i, 23), it indicates two important external factors of justification, which have nothing to do with the immediate effect of the resurrection, which shows that the preaching of the Word of God is for the sinner the introductory step towards justification, which is impossible without faith, whereas the former text mentions the meritorious cause of justification, inasmuch as, from the Biblical standpoint, the Resurrection was the final act in the work of redemption (cf. Luke, xxiv, 46 sq.; Rom., iv, 25; vi, 4; II Cor., v, 16). To the above-mentioned ideas of regeneration, generation out of God, participation in the Divine nature, and re-creation, a fifth, that of Divine sonship, must be added; this idea of justification is and is crowned by the personal indwelling of the Holy Ghost in the justified soul (cf. Rom., v, 5; vii, 11; I Cor., iii, 16 sq.; vi, 19, etc.). Since, however, this Divine sonship is expressly described as a mere adoptive sonship (adoption, adoptio; cf. Rom., viii, 15 sqq.; Gal., iv, 5), it is evident that "regeneration from God" implies no substantial emerging of the soul from the nature of God as in the case of the eternal generation of the Son of God (Christ), but must be regarded as an analogical and accidental generation from God.

As regards the use of the term in Catholic theology, no connected history of regeneration can be written, as neither Christian antiquity nor medieval Scholasticism worked consistently and regularly to develop this pregnant and fruitful idea. At every period, how-
ever, the Sacrament of Baptism was regarded as the specific sacrament of regeneration, a concept that was not limited to the Sacrament itself, but repeatedly interpreted the Pauline term "re-creation" as the universal regeneration of mankind through the incarnation of the Son of God in the womb of the Blessed Virgin. The idea of regeneration in the sense of individual justification is most conspicuous in the writings of St. Augustine. With an unrivaled keen-ness, he evolved the essential distinction between the birth of the Son of God from the substance of the Father and the generation of the soul from God through grace, and brought together into an organic association with the theological-justification (cf. e.g. "Errn in Ps. xlix", n. 2 in "P. L.", XXXVI, 565). Like the Church, St. August-ine associates justification with faith working through charity, and refers its essence to the interior renewal and sanctification of the soul. Thus, St. Augustine is not only the precursor, but also the model of the Scholastics, who worked mainly on the ideas inherited from the great doctor, and contributed essentially to the speculative understanding of the mystical project of salvation. Acheri, strictly in the Bible and tradition, the Council of Trent (Sess. VI, 1656, cc. iii, iv, in Denzinger-Bannwart, "Enchiridion", 10th ed., 1908, nos. 795–8) regarded regeneration as fundamentally nothing else than another name for the justifi- cation acquired through the Sacrament of Baptism. A. C. H. W. Junius was that: "German Mystics, Enchoacked (Eckhart, Tauler, Suso), who prefer to speak of a 'birth of God in the soul', meaning thereby the self-annihilation of the soul submerging itself in the Divinity, and the resulting mystical union with God through love.

In Protestant theology, since the time of the Reforma-tion, we meet great differences of opinion, which are of course to be referred to the various conceptions of the nature of justification. In entire accordance with his doctrine of justification by faith alone, Luther identified regeneration with the Divine "be-stowal of faith" (donatio fidelis), and placed the baptismal infant on the same footing as the adult, although he could give no precise explanation as to the way in which the child at its regeneration in baptism could exercise justification (cf. H. Wriedt, "Baptism and Kindertaufe", 2nd ed., 1901). Against the shallow and destructive efforts of Rational-ism, which made its appearance among the Socinians about the end of the sixteenth century and later re- ceived a mighty impulse from English Deism, the German "methodical" Pietism, which was an offshoot of Pietism, a salutary reaction was introduced by the Pietists during the seventeenth and eighteenth centuries. Leaving far behind the old Protestant view, the Pia-tists (Spener, A. H. Francke, Zinzendorf) referred re-genration to the personal experience of justification in union with a sincere conversion to a new life, consist-ing especially in charitable activity. German Pietism, systematically cultivated by the so-called Hohmuth, exercised a beneficial effect on English Method-ism, which was not altogether without securing regeneration in "methodical fashion", and which un-doubtedly performed good service in the revival of Christian piety. Especially those sudden conversions —such as are even to-day striven for and highly prized in Methodist circles, the American revivals and camp meetings, the Salvation Army, and the German Gemeinschaftsbevogung, with all its excrescences and eccentricities—are preferably given the title of regeneration (cf. E. Wacker, "Wiedergeburt und Bekehrung", 1893). Since Schleiermacher the variety and confusion in which the character of regeneration in learned literature has increased rather than diminished; it is indeed almost a case of everyone to his own liking. The greatest favour in Liberal and modern Positive theology is enjoyed by the theory of Albert Ritschl, according to which the two distinct moments of justification and reconciliation hold the same function related to the theme of regeneration. As soon as resistance to God is done away with in justification, and lack of trust in God—or, in other words, sin—is overcome in the forgiveness of sin, reconciliation with God and regeneration enter into their rights, thus inaugurating a new life of Christian activity which reveals itself in the fulfilment of all the obligations of one's station.

Turning finally to the non-Christian use of the term, we find "regeneration" in common use in many pagan religions. In Persian Mithraism, which spread widely in the West as a rival of the Christian religion under the Roman Empire, persons initiated into the mysteries were designated "regenerated" (renatus). While here the word retains its ethico-religious sense, there was a complete change of meaning in religions which taught metempsychosis or the transmigration of souls (Pythagoreans, Druids, Indians), in these the reincarnation of departed souls was termed "regeneration". This usage has not yet entirely disappeared, as it is current among the Theosophists (cf. E. R. Hull, "Theosophy and Christianity", Bombay, 1909; in connection with W. Stoeckl, "Siddhanta-Sastras" (Berlin, 1910), 387 sqq., 479 sqq.). This view should not be confounded with the use dating from Christ Himself, who (Matt., xix, 18) speaks of the resurrection of the dead on the last day as a regeneration (renovation).
Rufinus ("Apolgi. adv. Rufinium", III, xx) St. Jerome refers to the archive (chartarium) of the Roman Church, where the letter of Pope Anastasius I (399-401) on the controversy over the doctrines of Origen was preserved. There are also notices concerning the registration of papal letters in the documents of several popes of the fifth century. In his letter of 22 Sept., 417, to the bishops of Africa refers to the fact that all the earlier negotiations with Celestius had been examined at Rome (Courtaud, "Epist. Rom. Pontif."., 955). Consequently copies of the documents in question must have existed in the Vatican. It remained to the fixed custom of the papal chancery to copy the official papers issued by it in registers.

From the centuries previous to the pontificate of Innocent III (1199-1216) there remain only fragments of the registry volumes of the papal chancery and these in large part merely in later copies. Nearly all the volumes of the papal Regestas up to the end of the twelfth century have disappeared. The frequent local warfare in Rome and the confiscations from which the papal archives escaped only towards the latter part of the twelfth century, preserved the oldest records. The most important fragments of this period that have been preserved are the following: nearly 850 letters, in three groups, of the Regestas of Pope Gregory I (590-604). An investigation proved that the original Regestas consisted of fourteen papal years. It corresponded to the years of the pontificate, which were arranged according to indications; that each of these volumes was divided into twelve parts, before each of which the name of the corresponding month was written. In the way information is attained to the plan of the earliest volumes of the papal Regestas. A manuscript of the Vatican archives contains letters of John VIII (872-82), which begin with September, 876, and extend to the end of the pontificate. This is not an original register, but a copy of the eleventh century. Separate letters, fifty-five in number, belonging to the first four years of the pontificate of John VIII, exist in a collection contained in a manuscript of the twelfth century in the British Museum, London (MSS. Add. 8874).

The manuscript contains letters of Gelarius I (482-96), Pelagius I (556-61), Leo IV (847-55), John VIII (872-82), Stephen V (885-91), Alexander II (1061-73), and Urban II (1088-99). The study of the manuscript by Ewald ("Neues Archiv", V (1880), 275 sqq., 503 sqq.) led to important conclusions concerning the volumes of the Regestas. Another manuscript containing the letters corresponding to the pontifical year of Adrian IV (1154-59), Alexander III (1159-81), and Lucius III (1181-86) [see Löwenfeld in "Neues Archiv", X (1885), 886 sqq.]. Again, large parts of the Regestas of Gregory VII (1073-86), namely 91 letters, are contained in a manuscript in the Vatican Archives. This collection also is only an extract of the original Regestas. In it the letters are no longer arranged according to indications, but according to the year of the pontificate. A fragment of the Regestas of the pontificate of Anacletus II (1130-39), containing thirty-eight letters of various contents, has been preserved in a manuscript of Monte Cassino (Ewald in "Neues Archiv", III, 164 sqq.). Besides these collections of letters which have preserved fragments of the earliest papal Regestas, rich material is also to be found in the canonical collections of the Middle Ages. In part these collections go back directly or indirectly to the volumes of the Regestas of the papal archives, from which the authors of these collections, as Anselm of Lucca, and above all Deusdedit, gathered their greater Regestas. From Innocent III onwards the manuscript volumes of the papal Regestas still exist in the Vatican Archives.

The Regestas of the thirteenth century are beautifully written parchment volumes. Yet the most of these in their present form have been made from older volumes. How these older volumes, the real original Regestas, were planned cannot be positively decided. From the fourteenth century onwards registry volumes of paper were used for the entering of the copies. However, when the popes returned from Avignon to Rome, these paper Regestas were left at Avignon and copies of them were made in many papal Archives volumes that were brought to Rome. At a later era the original Regestas were also brought to the Vatican Archives, so that there are two series in existence for the Avignon epoch of the fourteenth century. From the end of the fourteenth century onwards the volumes of the Regestas were generally increased. Numerous investigations have been made by various scholars as to the arrangement of the volumes of the Regestas, the rules or customs observed in the entering of the separate pieces, as to the question whether the draft of the finished letter was copied, and as to many other matters in diplomacy, without reaching very certain results. In the thirteenth century the letters were divided into "Litterae communes" and "Litterae de curia" or "Curiales", the latter dealing mostly with affairs of general importance. Other headings (litterae secretae, litterae de beneficta) were also introduced. Besides the regular Regestas of the papal letters made in the papal chancery, there were similar Regestas of the papal letters executed since the fourteenth century in the Apostolic Camera. From about the thirteenth century, the numbers of petitions were also preserved, in which were entered not the papal documents, but the memorials to the pope, in reply to which the papal documents were issued.

As collections of the official documents of the papal chancery, the Regestas are a very important historical authority. For convenience in historical investigations various scholars have published in chronological order all known papal documents of large periods, with brief summaries of the contents of the letters. The three great collections of this kind are: Jaffé, "Regestas Pontificum Romanorum ab condita ecclesia ad annum p. Chr. n. 1198"; 2nd ed. by S. Löwenfeld, F. Kaltenbrunner, P. Ewald (2 vols., Leipzig, 1888). F. F. Keir has undertaken a new edition of the Regestas for this period in topographical and at the same time chronological order: "Regestas Pontif. Roman.: Italia Pontificia" (Berlin, 1906—); "Germania Pontificia" (Berlin, 1910); with the cooperation of other scholars is still carrying on his great undertaking. Jaffé's work was supplemented by Pothier, "Regestas Pontificum Francorum" (1851); "Regestae p. Crh. n. 1198 ad an. 1304" (2 vols., Berlin, 1874-75). Letters of several popes taken from the volumes of the Regestas have been published by: Löwenfeld, "Epist. Pontificum Romanorum inedita" (Leipzig, 1885), taken from the manuscript at Cambridge; Rodenberg, "Epistoleae ecclesiae. III et Regestae Rom. Pont. Selectae" (Berlin, 1883—), in "Mon. Germ. Hist." The Regestas of the letters of Gregory I were edited again by Ewald and Hartmann, "Gregorii I. Regestri" in "Bibliotheca reum Germanicarum" (2 vols., Berlin, 1868). As early as 1591 the records of John VIII were published from the manuscript in the Vatican. Of the letters of the thirteenth century, Pomet edited (Rome, 1888-96) the Regestas of Honorius III (1216-27) from the volumes of the Regestas in the Vatican Archives; the Regestas of the succeeding popes to Boniface VIII (d. 1303) were edited by the members of the Ecole Francaise, and at Rome, the publication of the Regestas of all these popes being yet incomplete; after a group of Benedictines had issued the Regestas of Clement V (1305-14), the members of the Ecole Francaise began again with John XXII (1316-34), with the intention of publishing the Regestas of the
Avignon popes to Gregory XI (1370–78). In this latter series, besides the documents of general interest, there are those dealing with the events that bore on the history of France. For the later eras only the first numbers were published of the Regesta of Leo X (1513–21), edited by Cardinal Hergenröther (see under the different popes). In addition a number of works have been issued or are in course of publication that containRegesta from the Vatican. Regesta of the fourteenth century, bearing on special points, or on the history of various countries and dioceses, e.g., Herwensky, "Excerpta ex registris Clementis VI et Innoceinti VI" (Innsbruck, 1883); Hering, "Vatikanische Akten der letzten Zeit Geschichte in der Zeit Ludwigs des Bayern" (Munich, 1890).

J. P. KIRCH.

Reggio di Calabria, ARCHIDIOCESE OF (RHEGENBUSCH), in Calabria, southern Italy. The city is situated on the slope of the Acropolis, at the extreme end of the peninsula, by a line of ferries, with Messina a line of ferries, with Messina by a line of ferries. Grain, olives, wine, fruit, fishing, the silk trade, and the manufacture of furniture have rendered Reggio an important trading point. The earthquakes of 1733 and 28 Sep., 1906, completely destroyed all the buildings, ancient and modern, and a town of wooden and corrugated iron huts now rises amid the ruins. The city was founded by the Calcidiones in the eighth century B.C., in 723 it received from Messina fugitive Greeks who rose against Rome in 725. In 959, the city adopted the Byzantine coins and coins show that it was a flourishing republic, and was governed by the laws given by Charondas to Catania (640). After the close of the sixth century B.C., Alcedian became tyrant of the city, and his son Anaxilas planned to obtain the crown of Hellespont. He obtained the crown of Hellespont, and was at last acknowledged by the Persians as their ally, but was treacherously killed. He was more fortunate in his attack on Zancle in Sicily, which he named Messana (Messina). His sons were expelled (401) from the city, which again became a republic. Dionysius of Syracuse captured it in 339 after a siege of eleven months. On his fall, it became subject to Agathocles and later joined Pyrrhus against the Romans. When Pyrrhus abandoned Italy, a mercenary Campanian fleet captured the town, and established a military republic (270). This was overthrown and severely punished by the Romans, and a settlement with all Bruttium, under their rule as a federated city. It still preserved its Grecian character in the days of Augustus. Julius Caesar sent a colony thither and embellished the city, calling it Regium Juli. In the Gothic war, the city was taken by the Persians and sacked, and despite the aid of Totila (549) was destroyed. It remained thereafter in the hands of the Byzantines, though Authari claimed it as the furthest boundary of the Lombard Kingdom. In 918 it was captured by the Saracen corsairs who were defeated and massacred by the Persians (1005). It was again captured in 1080 by Robert Guiscard, and united to his Kingdom of the Two Sicilies. In 1313 it was taken by Frederick II of Sicily, who was so forced to abandon it. It was frequently sacked by the Turks and corsairs in the fifteen and sixteenth centuries and especially in 1554 and 1595 by the Calabrian renegade Sina Pasha Cirnola. In these wars, in the treason of General Vial enabled Garibaldi to occupy the city without resistance, thus beginning the downfall of the Kingdom of Naples.

Through a misinterpretation of Acts, xxviii, 13, St. Paul was said to have preached the Gospel there, and to have consecrated his companion St. Stephen as bishop; it is probable, however, that it was evangelized at an early period. The first bishop known is Mark, legate of Pope Sylvester at the Council of Nicaea (325). Other bishops: St. Sisinnius (360), condemned in the Ancyran Synod; St. Theodorus (453); Pope Agathus at the Sixth Council (680); St. Cyrilus (749); Leontius, follower of Photius (869); St. Eusebius (d. 916). When all Southern Italy was united to the Patriarchate of Constantinople, Reggio became a metropolitan see with fifteen suffragans, and followed the Greek Rite, which was changed to the Gallican after the Norman Conquest; Archbishop Riccioli adopted the Roman Rite in 1850. The Greek Rite, however, remained in force in the church of Santissima Maria della Catolica, built by King Ugone, and governed by a Greek priest, until 1860, when the Greek Rite was declared illegal by the Greek government. Questions of jurisdiction caused frequent controversies with the archbishop. About 1800 Archbishop Annibale degli Affittii suppressed the Greek Rite in that church, and the entire diocese now follows the Roman Rite. Other bishops: Rangieri (1192); Fra Gentile (1279); Francescato; Pietro Filomarino (1404); Antonio Ricci (1453), restorer of the cathedral; Gerolamo Centelles (1529), reformer of ecclesiastical discipline; Gaspardo Riccioli (1560), a distinguished theologian at the Council of Trent, rebuilt the cathedral which had been destroyed by the Turks, and established the seminary; Mariano Ricciardi (1855–71), exiled after the annexation of the Kingdom of Naples; Cardinal Gennaro Portanova (1888). The sees suffragan to Reggio are: Bova, Cassiano (in the Ionian islands), Catanasso, Cotrone, Gerace, Naxos, Nicotera and Tropea, Opido, Squillace. The archdiocese contains 80 parishes, 200,000 inhabitants, 20 secular priests, 4 religious houses with 20 priests; 5 convents of nuns; 220 schools and 5 girls' educational institutions.

U. BENIGNI.

Reggio dall' Emilia, DioceSE OF (RHEGENBUSCH), suffragan of Modena in central Italy. The city is situated just where the ancient Via Emilia is crossed by the small River Crostolo, which flows into the River Po, through a very fertile territory. The principal industries are silk, straw, and osiers. The cathedral is the edifice of the twelfth century, restored in the fifteenth and sixteenth centuries, and has some remains of eleventh century frescoes. In the museum is the scientific collection of Abbate Spallanzani, an illustrious philosopher, physician and geologist, and the Faenza plate collection. The library has about 1000 manuscripts. There are also the state archives. Near Reggio is the famous Castle of Canossa.

Regium belonged to the Boii and was reduced into a colony by the consul L. Emilius Lepidus (187 B.C.). It was by him named Regium Lepidi. In the Treaty of Pavia Regins was included among the towns which Pepin had in mind to give to the Holy See, but it never came into possession of the latter, except later, and for a short time. In 962 it was given with Modena to Count Azzo of Canossa. After the death
of Countess Matilda (1185) the pope claimed the town as a part of her inheritance, while the emperors claimed the same as a fief of the Empire. Pending these disputes the town was governed in a communal way: at first they had consuls and in 1166 they had a bailiff, named mostly by the emperors. Reggio took part in the wars between the Lombard cities, especially against Mantua and Milan. It was mostly on the eastern side of the Ghibellines, although in 1167 it entered the Lombard League and in 1193 the league against Henry VI. After the misfortune of Frederick II, the powerful Pizio, Fogliani, Carpineti, and Coreglio were disputing the mastery of the city, which fell into the hands of Obizzo d'Este, Lord of Ferrara, but revolted against his son Asso VIII (1306), became again a commune, accepted the vicars of Henry VII and Louis the Bavarian; was subject to the pope under Cardinal Bertrand du Puyet (1222); and later (1331), John of Bohemia, who recognized the suzerainty of the pope over Reggio as well as over Parma and Modena, was made lord of the city, but sold it to the Fogliani, from whom it passed to the Gonzaga of Mantua, who sold it to Galeazzo Visconti of Milan. In 1409 it returned again to the House of Este, the line of the house of Modena, until 1859. The pope, however, always claimed to be its suzerain. After the Ferrara War, Reggio spontaneously submitted to the Pope (1522). By the Peace of Barbazza (1529) Charles V bound himself to give back Reggio to the pope, but he did not do so. In 1848 Reggio proclaimed its annexation to Piedmont, completed in 1859. Christianity entered Reggio probably from Ravenna; a local legend makes the first bishop St.Protasius, a disciple of St. Apollinaris, in the Apostolic age. Admitting his existence, also five or six historical bishops, predecessors of Papaventi in 451, it would seem that the episcopal see dates from the first half of the fourth century. St. Prosper was suzerain; what had been divided was reunited by 16 during the fourth century. Among other bishops were: Thomas (c. 701), Nodoberto, ambassador of Louis the Pious at Constantinople (817); Asso II, murdered during the Hungarian invasion in 909; Thensor (978), who rebuilt the Basilica of St. Prosper and other churches; Nicolò Maltraversi (1211), much praised by the chronicler Salimbene and often ambassador to Frederick II; Enrico de Casaccaci (1302); Battista Pallavicini (1445), the sacred poet; Marzolo Cer- veri (1540); Marcellus II; Cardinal Pope Alessandro d'Este (1621); Angelo M. Facerelli (1821), who repaired the damages of the revolution. The diocese has 246 parishes, 531 secular priests, 175,600 inhabitants; 4 houses of monks with 29 priests; 11 houses of nuns, 5 educational institutions for boys and 13 for girls, and a Catholic weekly.

University of Reggio.—Reggio was recognized as a studium generale as early as 1210; and a doctoral diploma of 1276 has been preserved, showing that there were a regular College of Doctors, regular examinations, and a University scholarium (Taconi, "Memorie storiche di Reggio", pt. III, Carpi, 1769, 215–16). But at the beginning of the fourteenth century there was no longer a single doctor in the city; and the studium generale had evidently lapsed before this.

Regina, Diocese of (Reginensis), a newly created (4 March, 1910) ecclesiastical division, comprised in part of the Canadian province of Saskatchewan, as far north as the 30th township, or about 51° 30' lat. The Catholic population amounts to 58,771, of whom 19,563 are of French descent, 16,318 Germans, about 13,000 Galicians following the Ruthenian Rite, 4759 English-speaking, 2312 Poles, and 1819 Hungarians. The rest are of various nationalities, and comprise about 1000 Catholic Indians. Fifty-nine priests (43 French, 15 German and 1 Scotch) attend to their spiritual needs. The regular clergy is represented by the Oblates of Mary Immaculate, the pioneers in the country, the Missionaries of Our Lady of Loretto, from France, the Redemptorists, and the Sons of Mary Immaculate. Nuns of five different orders either teach in the schools or serve the sick in the hospital founded last year at Regina. Besides its primary or parochial schools, there are five academies and three Indian boarding schools, the most important of which is that founded (1884) in the Qu'Appelle valley by the Rev. Jos. Hugonard, O.M.I., who still directs it. Six trades are taught, in addition to the curriculum of the schools. The same Qu'Appelle valley was the cradle of the new diocese, Fort Qu'Appelle being its only settlement until Father J. N. Ritchot established (1865) a mission at what is now Lebret. Then followed a few other missionary stations for the Indians, around which the development of the country consequent on a Government system of intense immigration had clustered. The diocese was in a most limited and primitive condition about 1888. In the following years it had a growth of 1064. The diocese now includes all the northern part of Saskatchewan, most of Man- natchewan and the counties in the south. The most important centres of white population now extant, chief among which are Regina, the capital of the province, Moosejaw, Swift Current, and Yorkton, the headquarters of a large Galician colony. Mgr. Olivier E. Matthieu, ex-rector of Laval University, Quebec, was appointed (14 July, 1911) first bishop. See archives of the Archdioece of St. Boniface.

A. G. MORICE.

Regina Coeli (Queen of Heaven), the opening words of the Easteride anthem of the Blessed Virgin, the recitation of which is prescribed in the Roman Breviary from Compline of Holy Saturday until None of the Saturday after Pentecost inclusively. In choro, the anthem is to be sung standing. In illustration of the view that the anthem forms part of the Matutines of Ascensiontide, a verse that is, one depending on the accent of the word and not the quantity of the syllable, Albin prints it ("La poésie du breviaire", Lyons, s. d., p. 102) as follows: Regina coeli laetare, Alleluia, Quia quem meruisti portare Alleluia, Resurrexit Sicut dixit, Alleluia, Ora pro nobis Deum. Alleluia.

In the first two verses ("Regina" and "Quia") the accent falls on the second, fourth, and seventh syllables (the word quia being counted as a single syllable); in the second two verses ("Resurrexit" and "Sicut dixit"), on the first and the third syllables. The Alleluia serves as a refrain. Of unknown authorship, the anthem has been traced back to the twelfth century. It was in Franciesan use, after Compline, in the first half of the following century. Together with the other Marian anthems, it was incorporated in the Minorite-Roman Curia Office, which, by the activity of the Franciscans, was soon popularized everywhere, and which, by the order of Nicholas III (1277–80), replaced all the older Office-books in all the churches of Rome. Batiffol ("History of the Roman Breviary", tr., London, 1898, pp. 158–228) admits that "we owe a just debt of gratitude to those who gave us the antiphons of the Blessted Virgin" (p. 225), which he considers four exquisite compositions, though in a style unconventioned by sentimentality" (p. 218). The anthems are indeed exquisite, although (as may appropriately be noted in this connexion) they run through the gamut of medieval literary style, from the classical hexameters of the "Alma Redemp- toris Mater" through the richly-rhythmed accentual rhythm and regular strophe of the "Ave Regina
Thomais at Naples. He attended at the death-bed of the holy doctor, received his general confession, and pronounced the funeral oration (1274). He returned to Naples, and probably succeeded to the chair of his master. Reginald collected all the works of St. Thomas. Four of the Opuscula are reports he made of lectures delivered by the saint, either taken down during the lecture or afterwards written out from memory. These are: "Pootilla super Joannem" (corrected by St. Thomas), "Pootilla super Epistola St. Pauli", "Pootilla super Tres Instructus Palearis" and "Lectura super Primum de Anima". Reginald is also considered by some as the compiler of the Supplement to the Summa Theologica. The funeral discourse published at Bologna in 1529 under the name of Reginald is the work of the Italian humanist Flaminius.

O. A. McHugh.

Regino of Prüm, date of birth unknown; d. at Trier in 915. According to the statements of a later era Regino was the son of noble parents and was born at the stronghold of Altrip on the Rhine near Speyer. Nothing is known concerning his life until he was elected Abbot of Prüm in 892. From his election to his death he was the only abbot in that monastery. He had entered the Benedictine Order, probably at Prüm itself, and that he had been a diligent student. The rich and celebrated Abbey of Prüm suffered greatly during the ninth century from the marauding incursions of the Normans. It had been twice seized and ravaged in 882 and 892. After its second devastation the Abbot Farabert resigned his office and Regino was elected his successor. His labours for the restoration of the devastated abbey were hampered by the struggle between contending parties in the Lorraine. In 899 Regino was dismissed from his office by Richarius, later Bishop of Liège, the brother of Count Gerhard and Count Mattfried of Hennegau. Richarius was made abbot; Regino resigned the position and retired to Trier, where he was honourably received by Archbishop Ratbod. He supported the bishop in the latter's efforts to carry out ecclesiastical reforms in that troubled era, rebuilt the Abbey of St. Martin that had been laid waste by the Normans, accompanied the archbishop on visitsations, and used his leisure for writing. At Abbot's suggestion he wrote an important treatise on monastic discipline for use in ecclesiastical visitsations (see Canons, Collections of Ancient, III, 286); he also wrote a treatise "De harmonica institutione" (ed. Croussemaer, "Scriptores de musica mediæ aevi", II (Paris, 1887), 1-75), for the improvement of liturgical singing; further, his great historical work, the chronicle (see Annales, I, 533), Regino was buried in the monastery of St. Maximin near Trier.

J. P. Kirch.

Regimontanus. See Müllcr, Johann.

Reginard, the name given in later antiquity and the early Middle Ages to those clerics and officials of the Church in Rome who were attached neither to the papal palace or patriarchium, nor to the titular churches of Rome, but to whom one of the city regions, or wards, was assigned as their official district. For internal administration of the Romans, it was ordered by the Emperor Augustus into fourteen regions. From the fourth century developed (evidently in connexion with the seven Roman deacons) an ecclesiastical division into seven regions, which gradually replaced the earlier civil divisions. Many branches of the ecclesiastical administration were arranged in accordance...
with the seven regions—especially the care of the poor, provision for the maintenance of the churches, and whatever else pertained primarily to the office of the deacon, according to whom each of the seven regions (diaconus regionarius). As the deacons were assisted by seven subdeacons, we also find the term subdiaconus regionarius. The notaries and defensores employed in the administration of the regions were also known as notarii regionarii and defensores regionarii. They also bore the title of acolyti regionarii. Little is known about the functions exercised by these notaries, as in general concerning the ecclesiastical administration in ancient Rome, in as far as it affected the regions.

Regis, Jean-Baptiste, b. at Istres, Provence, 11 June, 1665, or 29 Jan., 1664; d. at Peking, 24 Nov., 1738. He was received into the Society of Jesus, 14 Sept., 1683, or 13 Sept., 1679, and in 1698 went on the Chinese mission, where he served science and religion for forty years, and took the chief share in the making of the general map of the Chinese Empire. The first Chinese atlas, however, was not published until 1712 by missioners Martin de Tartre and Cardoso. It was already evident to missioners that China, of which at the end of the sixteenth century even the best cartographers were utterly ignorant. Their achievements up to the middle of the seventeenth century are summed up in the "Atlas Sinensis" published by Father Martin Martini (Amsterdam, 1655). He was greatly assisted in this work by Chinese books of geography, where he found a mass of descriptive information, the distances between important places and even maps, which, however, were very crude, the distances having been measured with little exactitude. These imperfect data he supplemented and completed by astronomical observations made in the chief towns by himself and his associates; hence the positions of his Atlas are remarkably accurate. The favour enjoyed by the missionaries with Emperor K'ang-hi (1662-1722) made it possible for them to improve on this. Fr. Ferdinand Verbiest collected the earliest definite ideas of Tatar during two journeys made to that country with the emperor (1682-3). The arrival in China (1687) of Fr. Cardoso, who went on to Tung-chou by Waynor, and who was to extend his labours in the mission, especially to geography. Provided with perfected instruments and trained in the methods of the astronomers of the Observatory of Paris the new missionaries were enabled to determine more accurately the "Memoires" and the "Histoire de l'Academie des Sciences" record their observations. Fr. Jean-Francois Gerbillon made eight journeys through Tatar and Mongolia (1688-98), acquiring more geographical information concerning them. In 1707 the great work of the general map of the empire was begun by the topographical drawing of the city of Peking and its environs, including the ancient summer residence of the emperors and 1700 towns or villages, was assigned to Fr. Antoine Thomas, a Belgian of Namur, and Joachim Bouvet, Jean Baptiste Regis, and Dominique Parrenin, all three French. K'ang-hi, who wished to take measures against the periodical overflow of the rivers of China, was so pleased with the work, and so much interested in the enterprise, that he had the necessary instruments and having plenty of time at their disposal. Our Fathers made use of the avocation of map-makers to do missionary work, to procure assistance and protection for the missionaries of the provinces, and to establish new missions. The Chinese and Tatar mandarins who accompanied them hindered them exceedingly; they had orders not to let the Fathers go where they would, and would never allow them sufficient time for the observation of meridians, the measurement of roads, the variation of the needle (magnetic needle), the rhumbs, and the estimation of positions from these elements. The work being finished the completed map had to be sent in haste to the emperor. Compared with what was done elsewhere for general maps of countries smaller than China and Tatar this work can but do honour to the Tatar prince who commanded such a worthy undertaking and assuredly it did not discredit our Fathers. This appreciation has been fully justified by the votes of the best judges, among them Ferdinand de Richthofer, the famous geologist and explorer of China, who in 1808, after a thorough examination, was so much pleased with the results of their labours that he wrote: "If it was made, the map of the Jesuits, as a whole, may be called a masterpiece." (China, I, 688).
Fr. Jartoux, who with Fr. Régis and Friddell had the largest share in it, sent a copy to France, where it was published by Fr. Du Halde with the assistance of the celebrated geographer d'Anville in the "Description de la Chine" (1735). Fr. Régis composed a short commentary on it under the name of "Nouvelle géographie de la Chine et de la Tartarie orientale," which was added in the French translation published in Paris, fr. MS. 17, 242; Fr. Du Halde availed himself of the writing to a great extent but would have done better to publish it entirely. Fr. Régis also turned his attention to the ancient Chinese books (king). Father Gaubil praises his "sans critiquem" on the subject, and the English sinologist James Legge writes: "Régis is known as the interpreter of the Yih-king. His work was edited at Stuttgart, in 1834, by Julius Mohl. One part of the first volume is occupied with Peking, and contains the most valuable introduction to the Chinese higher classes that has yet been published" ("Notions of the Chinese concerning God and the spirits"), 1852, 69). Father Gaubil describes his great virtues as humility and modesty, and says: "he was universally esteemed and loved by the mandarins of various bodies, Christians, and the people of the court who associated with him".

Joseph BRUCKNER.

Régis, Pierre Sylvain, b. at La Salvetat de Blanquefort, near Agen, in 1632; d. in Paris, in 1707. After his classical studies, he came to Paris, followed the lectures of Rohault at the Sorbonne and became a warm admirer and partisan of the philosophy of Descartes. He then, with great success, taught the principles of Cartesianism at Toulouse (1665), Aigues-Mortes, Montpellier (1671), and Paris (1680). The prohibition issued against that time against the teaching of Cartesianism (cf. Cousin, "Fragmentes philosophiques", 5th ed., Paris, 1686, III) put an end to his lectures. He was elected a member of the Academy of Sciences in 1699. His chief work is his "Oeuvres de la philosophie de Descartes," 3 vols., Paris, 1699), of which he presented a systematic way the principles of the Cartesian philosophy. Strongly opposed to Malebranche's idealism, against which he wrote several articles in the "Journal des Savantes" (1693 and 1694). Régis modified the system of Descartes on various points in the direction of empiricism. He denied that the human soul has innate and eternal ideas, maintained that all our ideas are modifications of the soul united to the body and that our knowledge of external objects is immediately as our soul and thought. His book having been criticized by Huet and Duhamel, he then wrote his "Réponse au livre qui a pour titre Censure philosophie Cartésiennne" (Paris, 1681), and "Réponse aux reflexions critiques de M. Duhamel sur le système cartésien de M. Régis" (Paris, 1692). Among his other works we may also mention his "Usage de la raison et de la foi, ou accord de la raison et de la foi," with a "Réfutation de l'opinion de Spinosa, touchant l'existence et la nature de Dieu."

XII.—46
Regium Placet. See Exquatur.

Regnault, Henri Victor, chemist and physicist, b. at Aachen, 21 July, 1810; d. in Paris, 19 Jan., 1875. Being left an orphan at the age of eight he was soon obliged to work in order to provide for himself and his sister. Up to the age of eighteen he worked as a clerk in a drapery establishment in Paris, but made use of all his spare time in studying, until he was received at the Polytechnic School in 1830. In 1832 he entered the School of Mines, was graduated, and in 1835 he attached himself to the chemical laboratory of the school, becoming professor and adjunct director in 1838, and remaining until his call to the chair of physics at the College de France. Up till then he had been working in the comparatively new field of organic chemistry, chiefly in producing new compounds by the method of substituting chlorine for hydrogen equivalents in hydro-carbons. The results were published in eighteen memoirs in the "Annales Chimie et de Physique" and earned for him the election as member of the Chemical Section of the Academy of Sciences. In 1843 he was commissioned by the Government to investigate the properties of steam and to obtain numerical data that should be of value to the steam engineer. The results, published in 1847, av. vol. XXI of the "Memoires" of the Academy of Sciences. They obtained for him the Rumford Medal of the Royal Society of London, and the exceptional appointment as Chief Engineer of Mines. In 1852 he became Director of the porcelain manufacture at Sevres, where he continued his experiments until his laboratory, instruments and papers were destroyed during the Franco-German War, in 1871. This, together with the loss of his talented son, a well-known painter, broke his spirit, and a stroke of apoplexy in 1873 was followed by years of long, slow agony. Daubrée says of him, that "only his religious faith could console him, and this consolation was not wanting". His invaluable work was done as a skilful, thorough, patient experimenter in determining the specific heat of solids, liquids, gases, and the vapour-temperatures of water and other volatile liquids, as well as their latent heat at different temperatures. He corrected Mariotte's law of gases concerning the variation of the density with the pressure, determined the coefficients of expansion of air and other gases, devised new models of investigation and invented accurate instruments. Two laws governing the specific heat of gases are named after him. This mass of numerical data are recognized as standards by the engineer as well as by the physical chemist.

He was a foreign member of the Royal Society of London, received its highest honour, the Copley Medal, in 1869, and in 1883 was made Commander of the Legion of Honour.

"Cour éleéménaire de Chimie" was published in 1847 at Paris, and received several later editions. "Premiers éléments de Chimie", Paris, 1850, 6th ed., 1874, is a shorter work. "Relations des expériences", etc., 1847-70, were collected in 3 vols., Paris, 1870.

REGULUM JURIS (rules of law), general rules or principles serving chiefly for the interpretation of laws. In a specific sense, however, regulae juris are certain fundamental laws in the form of axioms found in the "Corpus Juris", eleven inserted by Gregory IX at the end of the fifth Book of Decretals, eighty-eight by Boniface VIII in the last title of Liber Sextus Decretalium. These rules are an exposition of several laws on the same subject, conclusions or deductions, rather than principles, of law. They are decisions and conclusions, and consequently reserved to the last title of the two books mentioned, in imitation of Justinian in the "Digest" (L, I, tit. 17). While these rules are of great importance it must be remembered that they are a few general statements are without exception. Some of these axioms are so general in all matters, others are confined to judicial trials, benefices, etc. As examples the following are taken from Liber Sextus: No one can be held to the impossible (6); Time does not heal what is invalid from the beginning (18); (that is not allowed the defendant, is denied to the plaintiff (32); What one is not permitted to do in his own name, he may not do through another (47).

Regulae Canones. See Canones and Canonesses Regular.

Regulæ Clericorum Minor. See Francis Caracciolo, Saint.

Regulares (Lat. regula, rule).—The observance of the Rule of St. Benedict proclaims for the monks at an early period the name of "regulars". The Council of Veronei (755) so refers to them in its third canons, and in its sixteenth canon speaks of the "ordo regularis" as opposed to the "ordo canonici", formed by the canons who lived under the bishop according to the canonical regulations. There was question also of a "regula canonorum", or "regular canons", especially after the extension of the name to the Church. On the Synod of Ctang, Bishop of Metz, had drawn up from the sacred canons (706) (cf. capitularies (n. 69 circa 810, n. 138 of 818, 819, ed. Alf. Boretii). And when the canons were divided into two classes in the eleventh century, it was natural to call those who added religious poverty to their common life regulars, and those who gave up the common life seculars. Before this we find mention of "seculares canonicorum" in the Chronicle of St. Bertin (821) (Martine, Anecd. III, 508). In fact as the monks were ordered not to leave the world (4. 2. 2, d.) and sometimes those persons who were neither clerics nor monks were called seculars, as at times were clerics not bound by the rule. Sometimes also the name "regulars" was applied to the canons regular who distinguished them from monks by constituting a sisterhood, as in the case of Grasian (about 1139), C. xii, q. 2, c. 2 and q. 3, c. 1, speaks of canons regular, who make canonical profession, and live in a regular canonicate, in opposition to monks who wear the monastic habit, and live in a monastery. But the Decretals of Gregory IX, promulgated 5 Sept., 1234, use the word "regularis", in a more general sense, in book III, ch. xxxi, which is entitled "De regularibus et transactibus ad religionem". However in ch. xxxvii "De statu monachorum et canonicerorum regularium" the distinction is made, disappearing in the corresponding book and chapter of the Decretals of Boniface VIII (3 March, 1298), t. XVI, in 6, which is entitled merely "De statu regularium" and reappearing in the collection of Clementines (25 Oct., 1317) but with the conjunction et, which indicates the resemblance between them. (although an other edition has a similar item: c. 3 Clem. in the official edition reads "De statu monachorum, vel canonicerorum regularium").

From that time, while the word "religious" is more generally used, the word "regular" is reserved for members of religious orders with solemn vows. It means strictly those religious who have made solemn...
profession. Those who have taken simple vows in the Society of Jesus are also regulars in the proper sense according to the Constitution "Ascendente de Christo" of XIII. Write are, however, asked and encouraged, the question whether the religious of other orders can properly be called regulars before solemn profession. The novices of religious orders are regulars only in the wider meaning of the word.

A. VEMERSCH.

Reichenau, called AQUA DIVS in medieval Latin MSS. and possessing a once celebrated Benedictine monastery, is an island upon the Nidnacense (Untersee) of the great lake; contains about three and a quarter miles long. It belongs to Baden, and has 1600 Catholic inhabitants, principally vintagers and fishermen, distributed among three villages, Oberzell, Mittelzell, and Unterrzell (or Niederzell). Since 1838 the island has been connected with the mainland by a dam, one and a quarter miles in length, and with the railroad station of Reichenau (via Constance). There is a calling station for steamers on the southern shore. The word "Zell" (cell) in the names of the three villages of Reichenau indicates a monastery founded by a bishop in the island, which was the "reiche Aue" (the fertile islet) of medieval culture. Under the protection and at the suggestion of Charles Mantel, the Anglo-Saxon (?), Saint Firminus founded, with the co-operation of Count Berthold and the Alemannian Duke Sanfrid I (Nebi), the famous Benedictine monastery of Reichenau, which in earlier times, until the tenth century, bore the name of Sintclesseu (Sintlas Ow). Reichenau had attained its full glory when the Abbey of St. Gall was still comparatively unimportant. In spite of St. Firminus's banishment from his monastery through the political machinations of the Alemannian prince, Reichenau soon recovered its importance. His immediate successor, Abbot Heddo (727–34), later Bishop of Strasburg, shared the fate of the founder. The growth of Reichenau was greatly fostered by its position on the highway to Italy, which was frequented by Greek and Italian, and even Irish and Icelandic pilgrims and wayfarers. These became guests at the monastery and enriched it with gifts of precious relics, some of which are still preserved in the church treasury. Among other relics was one of special value, a cross with the blood of Christ, which was said to have been brought by an Arabian named Haesan to Charlemagne, and to have been confided to the custody of Reichenau in 925. The monastery also gloried in relics of the Confessors of St. Martin, which were brought to Reichenau from Venice in 830. On his homeward journey from St. Maurice with the relics of St. Maurice and other saints, Bishop Ulrich of Augsburg stayed at Reichenau, and, at the petition of Abbot Aelwich (934–58), gave a large portion of the relics of Saint Maurice to the monastery [cf. Schmid, "St. Ulrich, Bischof von Augsburg (989–973)", Augsburg, 1901, p. 28]. Bishop Eginus of Verona resided in Reichenau, and built (790) the parish church of St. Peter at Niederzell, a small Roman basilica with two towers, which he retired to lead the life of a hermit, dying in 802. His monument still exists. The property of the monastery was composed principally of donations made by Charlemagne, Louis the Pious, Charles the Fat (who is interred at Reichenau in the monastery church of Mittelzell), and many other royalties. The monastery was incorporated into the House of Otto. The consequence of these royal favours was the rapid growth of the monastery in importance, being granted successive immunity from secular authority, jurisdiction of a principality, and complete exemption from episcopal jurisdiction.

Reichenau displayed its greatest lustre in the first centuries after its foundation (especially between the ninth and the middle of the thirteenth centuries), during which it discharged its great work of civilisation. The men most prominent for scholarship and charity during these centuries were, e.g. Walfred Strabo (839–49); Hatto (891–913), from 891 Archbishop of Mainz; Berno (1008–48), appointed by Emperor Henry II successor of the uncultured Abbot Imbo, who had been thrust upon the monastery by the same emperor; St. Meinrad (Meyrads), Count of Zollern (d. 861), the hermit and founder of Maria-Einsiedeln, who came from the monastery of Reichenau; moreover, Hermann Contractus (d. 1054), the acute scholar and historiographer, author of the "Sales Regina." The last was a relative of St. Ulrich. These and later abbots of Reichenau and formed the famous Reichenau library and school of painters (Codex Egberti). The Reichenau school of painting is seen at its best even today in the single extant work of the tenth century;—the eight pictures on the upper part of the walls of the little Roman basilican parish church (St. Georgskirche) at Oberzell—and in the paintings on the walls of the church of St. Peter at Niederzell, which belong to the first half of the eleventh century, and were discovered by Kinsky and Regelle in 1913 (emblazoned in "Die Kunst des Klösters Reichenau im IX. und X. Jahrhundert," Freiburg, 1906). As a consequence of its prosperity, laxity and decay came upon the monastery, and caused its incorporation with the Diocese of Constance in 1541. The bishops of Constance thus became commendatory abbots, and the personnel of the monastery was reduced to twelve monks (inclusive of the prior) and a small number of novices. In 1757 the few remaining monks were forcibly removed to other monasteries, and the novitiate abolished. Members of the neighbouring monasteries performed the religious services at Reichenau until the monastery was secularized in 1802.

ULRICH SCHMID.

Reichenberger, August, politician and author, b. at Coblenz, 22 March, 1808; d. at Cologne, 16 July, 1895. He studied jurisprudence at Bonn, Heidelberg, and Berlin (1827–30), entered the Prussian civil service as aussestator (1830), travelled through France (1833) and Italy (1839–40), became a judge of the Court of Cassation (1844), visited England (1846), became chamber-president in the land court (1848) and counsel of appeal (1849) at Cologne until his retirement from civil service in 1875. Except for the interval 1863–70, he was actively engaged as a parliamentary member from 1848 to 1885, in the Frankfort Parliament, Prussian National Assembly, and Erfurt Volkskammer. From 1851 to 1863 he was a member of the Prussian Second Chamber, being one of the founders and influential leader of the Catholic party. Elected delegate to the Second Chamber for three districts, he chose Coblenz as his constituency (1870–3); he represented Cologne (1879–85) and was a member of the Reichstag (1871–84). Co-founder of the Centre, tireless in his attention to parliamentary duties, and exercising a beneficent influence over his party, though at times a hard leader, Reichenberger was highly esteemed as an orator even by his political opponents. Though a sceptic in his youth, he returned to the Faith, deeply impressed by the imprisonment of Archbishop Clemens August (1857). He took an active share in the "Spätromanische," which was one of the founders of the Borromeses Society (1848), keenly interested in the budding Catholic press, presided at the Catholic Congress of Cologne.
(1858), and championed religious freedom at numerous other gatherings. He was an outspoken friend of art and praised Gothic in his writings. He was "not a real historian or archaeologist, nor a philosopher in the domain of Christian Church. He was above all a poet, a writer of poetry of a pure, German art incorporating Christian ideas" (Pastor). Until the end of his life he promoted the completion of the Cologne Cathedral, by word and pen, and founded (1841) at Coblenz the first Dombauverein (cathedral building society). The fresh, cheerful, amiable, and kindly personality of this versatile man exercised a powerful influence. Opposed to extreme theories, he maintained a temperate attitude in both secular and ecclesiastical politics. A list of his numerous literary productions covers twenty-five printed pages (Pastor, II, 449), and contains mainly occasional writings which appeared in newspapers and magazines. Most of his separately published works were concerned with art, history, and criticism: Christliche germanische Baukunst (1845), "Fingerzeige auf dem Gebiete der kirchlichen Kunst" (1854), "Vermischte Schriften über kirchliche Kunst" (1856), "Eine kurze Rede und eine lange Vorrede über kunst" (1863), works on Merian, G. G. Ungewitter, Pugin, etc. Of importance also were his pamphlets, "Die Wahlen zum Haus der Abgeordneten" (1858) the often reprinted "Büchlein der Phrasen und Schlagwörter" (1862), etc., and his "Essay über Shakespeare" (1871). His juridical studies are most poorly represented.

Reichsberger, Peter, jurist and parliamentarian, b. at Coblenz, 23 May, 1810; d. at Bern, 31 December, 1892, was successively counsellor at Coblenz (1843), of the court of appeal at Cologne (1850), and of the supreme court of Berlin (1859) until its dissolution (1879). From 1848 he was active as a parliamentarian in the Prussian Diet, the Eutfurt Volkskath, the Prussian second chamber (1849), the constituent North-German Reichstag (1857), the Customs' Parliament (1868), and the German Reichstag, representing in the last-mentioned assembly his appointment by his death (1871) to his post. From the first we find him labouring in close connexion with his elder brother August, and, like the latter, he defended the Rhenish system of laws against the minister von Kampf's "(Oeffentlichkeit, Mündlichkeit und Schwurgerichte", 1854). Like his brother he collaborated with the author in de Filly's much-discussed book (De la Prusse, 1842), and they jointly drew up a petition for an electoral reform (1847). In the same year was published one of his best works: "Die Agrarfrage aus dem Gesichtspunkt der Nationalökonomie, der Politik und der Rechtsausübung" (1858), when a collection of their parliamentary speeches appeared, the brothers published their political programme in the pamphlet "Die Wahlen zum preussischen Abgeordnetenhaus", and two years later the "Deutschlands nächste Aufgaben für die Zukunft". Shouldering to the shoulder the two Discouri toiled in the defence of constitutional monarchy against Radicalism and of religious autonomy against bureaucratic enslavement. Less versatile than his brother, Peter surpassed him in juristic keenness and intellectual depth. His later writings are for the most part (1850), the abolition of the usury laws (1860), and the corn tax (1887). At the request of the ministry of justice he drafted a mortgage law (1851). Five years later he wrote on free agricultural laws, in 1872 on the relation between Church and State, in 1876 on the Ruhmurschen and peace between Church and State. In 1882 appeared his experiences of an old parliamentarian in the revolutionary year 1848. Though co-founder and leader of the Centre, he followed in many individual questions his own views, e. g. in the extension of the socialist law and in the question of the separation of Church and State. In 1882 he was elected a member of the Staatsrath, and in 1888 he died in Reichenau.

Hermann Cardauns.

Reifenstein, a former Cistercian abbey in Eichsfeld, founded on 1 August, 1162, by Count Ernest of Tonna. It was first called Albolderode and belonged to the electorate of Mainz. The monks, who retired from the monastery on Volkerode near Mühlhausen, displayed a brisk economic activity throughout the thirteenth century acquired about fifty estates in the neighbourhood. Little is known of the domestic life of the abbey, even the sequence of the abbeys being uncertain. A monk, Heinrich Pfeifer, left Reifenstein in 1521, became a Lutheran, preached rebellion in his native town Mühlhausen, shared the leadership with Thomas Münzer in the Thuringian Peasants' War, and in May, 1525, reduced Reifenstein to ashes. After the battle of Frankenhausen Pfeifer was seized near Eisleben and died impetently. In 1524 only six monks were left in Reifenstein, which underwent a complete decline; in 1539 one remained, and the monastery was soon deserted. In 1575 there was a single monk, and in 1607, five or six, but they led so lawless a life that Reifenstein, according to legend, once resembled a robbers' cave. The church was restored in 1582. The exemplary Abbots Philipp Busse (1589-1639) re-established discipline and order. During the Thirty Years' War the monastery was pillaged seven times and almost reduced to ashes, Abbot Philipp was carried off as a prisoner, and six or seven monks were murdered. The other monks sought shelter in caves, and begged bread from the peasants. The revival of the monastery was mainly due to the learned Abbot Wilhelm Streit (1690-1721). In 1738 it had twenty-four members, and survived the distress of the Seven Years' War. In 1802 the abbey fell to Prussia, was abolished on 2 March, 1803, and became a royal domain. The last abbot was Antonius Löfler (d. 1823). At present, agriculture and a school are the principal domestic science for young people at Reifenstein. The imposing church, built in 1743, is used as a shed.

Klemens Löffler.

Reifenstuel, Johann Georg, in religion Akanstolus, theologian and canonist; b. at Keltenbrunn (Tegernsee) 2 July, 1641; d. at Freising, 5 Oct., 1703. He entered the Franciscan (Reformed) Order in the Province of Bavaria, 3 Nov., 1658, and taught philosophy at Freising (1665), Landsbut (1667-68), and Munich. He taught theology at Munich from 1677 to 1680, when he became guardian of the convent of Weilheim (1680-83). Meanwhile he had been chosen (1677) to the reform of the educational establishments of the town, besides which he filled offices in his order. He also devoted himself to the organization and cataloguing of the episcopal and capitular library of Freising. It would be hard to praise unduly his learning, virtue, and regularity in his religious life; he enjoyed the confidence of everyone. He
first published his “Theologia moralis” (Munich, 1692), which went through thirty editions, notably those of his fellow religious Massæus Kresslinger (Modena, 1740; Munich, 1742), and Dalmatius Kiech (Augsburg, 1762), who appended “additions”; and a treatise on the “Proposiciones damnatas a summa pontificis”. An Antwerp edition (1743) includes the additions of Jacques Esteve on the Bull of the Crusades. The edition issued by Flavianus Ricci a Cimbria (Augsburg, 1777) modifies his doctrines: instead of the Propheticist who he was, he makes Reifenstuel, a Probabilist, in conformity with the official doctrine of his order. His “Ius canonical universum” (Munich, 1700) accords Reifenstuel first rank among canonists; he is equalized by none, and is highly esteemed even in modern times. Subsequent editions contain a “Tractatus de regulis iuris”, first published at Ingolstadt in 1733. The best editions are those of Venice (1730–1735), Rome (1831–32), Paris (1864). A three-volume citato compendiarum was published at Paris (1853). He is also the author of a Vita S. Francisci Solani, and a work De ceremoniis et ritibus ecclesiasticis.

OBERMAYR, Die Pfarreien, Grund und die Reifenstuel (Innsbruck, 1866); GRINDHOFER, Germania Franciscana (Innsbruck, 1793, II, 383; Hist-politisch Blätter, LXXII, 967–900 (Munich, 1873); LXXII, 590–63); HURNER, Nomenclator, SCHULTE, Gesch. der Quellcen und Lief. des canonicum Rechts (Stuttgart, 1880), I, 154–55.

A. VAN Hove.

REIMS, Archidiocease of (Rhemensis), comprises the district of Reims in the Department of Marne (Châlons-sur-Marne) and the whole Department of Ardennes, with the suppression by the Concordat of 1802, which put the district of Reims in the Diocese of Meaux, and the Department of Ardenne in that of Metz, while two episcopal councils were established in Reims and Charleville to assist the Bishops of Meaux and Metz in their administration. The archdiocese was re-established in theory by the Concordat of 1817, and in fact in 1821; it was given Amiens and Soissons as suffragans in 1821, and Châlons-sur-Marne and Beauvais in 1822. The Remi (as the Gauls of this region were called), whose capital was Durocortorum, the present Reims, were early reduced to submission by Caesar. In the third century Reims was the capital of Belgica Secundum; the Roman governors resided there, and there Valentinian sojourned in 367. As a centre of culture, it was considered comparable to Athens, and a beautiful Gallo-Roman gate (the Porte Maillot) is still to be seen there. When Christianity was introduced, it is not known; it may have been developed locally, from the earliest centuries, by the coalition of different groups of Christians; but the true ecclesiastical organization and the succession of bishops began only with the mission of Sts. Sixtus and Sinicius, who established their see in the upper part of the city during the second half of the third century. Late traditions have represented Sts. Sixtus as a disciple of St. Peter, but Archbishop Hinemar, in the ninth century, considered him as a disciple of Pope St. Sixtus II.

Tradition gives to the Church of Reims a certain number of martyrs during the persecution of Diocletian; among others, Timotheus, Apollinaris, the priest Maurus, and the virgin Maera, whose relics were gathered by the Roman Eusebius. The chapel erected over their tomb afterwards became a collegiate church under the invocation of St. Timotheus. Imbataeus, who assisted at the Council of Arles (314), was the fourth Bishop of Reims; he transferred his cathedral to the centre of the city which was much exposed to the barbarian invasions. Victoriously defended, about 366, by the consular Jovinus, a Christian, it had for bishops St. Maternian (c. 349–70) and St. Donatian (379–89), the patron of Bruges and of West Flanders. It saw the Vandals behind the archbishop, St. Nicasius, on the threshold of his church, in 406 or 407, and at the same time kill his sister St. Eutropia, his deacon St. Florens, his lector St. Jucundus, and, a short time after, his disciple St. Oriculus, and Sta. Oricula and Basilica, the sisters of St. Oriculus.

St. Remigius (Remi), b. about 440, of a distinguished Gallo-Roman family, and whom St. Sidonius Apollinaris appreciated very highly as a rhetorician, became Bishop of Reims at the age of twenty-two. His history is known through a short biography, falsely attributed to Fortunatus, and a longer one, of a legendary character, written by Hinemar in 878. St. Remigius directed the Christianization of the neighbouring regions, sending Antimond into the country about Terouanne and Boulogne, St. Vaast into the Arras district, and creating the Bishopric of Leau; he brought about the marriage of Clovis with St. Clotilda, and baptized Clovis on 23 December, 496. His success had immense political and religious results; the Gallo-Roman populations would not have submitted to Clovis the Frank, had he remained a pagan, and his conversion made him the protector of the Catholics of Burgundy and Aquitaine, whose princess were Arians. The “Testament” of St. Remigius is apocryphal, as is the letter by which Pope Hormidas was supposed to have appointed him Apostolic legate for the whole of Gaul. But it is true that St. Remigius laid the foundations of the political authority and religious power of the See of Reims, and that from his time the name of Reims was well esteemed and respected at Rome. He died 10 January, 535.

Among the bishops of Reims who followed him were: St. Nivard (649–72), who caused the monastery of Bauvillers to be rebuilt and established St. Béranger there; St. Rieul (672–98), who built the monastery of Orsais; St. Rigobert (898–742), who baptized Charles Martel, was afterwards brutally driven from the see and replaced by a certain Milo, the king’s favourite, and took refuge first in Aquitaine and then at Gernicourt, in the Diocese of Soissons, where he died; Tulpin (or Turpin, 753–800), a friend.
of Charlemagne, whose name was afterwards, not later than the end of the eleventh century, forged to a chronicle of Charlemagne and Roland, very popular in the Middle Ages.

The importance of the See of Reims, situated geographically between France and Germany, was manifested in the ninth century during the episcopates of Ebbo (816–35), whose disagreements with Louis the Debonnaire are matters of history; or Hincmar (845–82), the most illustrious of the archbishops of Reims; of Fulko (883–900), chancellor of Charles the Simple, who maintained the rights of the Carolingians against Eudes, Count of Paris, ancestor of the House of Capet; of Hervé (900–22), who laboured for the conversion of the Normans and, eventually rallying to the Capetians, crowned Robert king in 922. In 925 Count Herbert of Vermandois had his son Hugh, a boy of less than five years of age, consecrated Archbishop of Reims, but in 932 King Raoul caused Artaud (932–61) to be consecrated, and Hugh, who insisted upon his archiepiscopal rights, was excommunicated by a council in 948 and by Pope Agapetus in 949. The decisive part taken by Archbishop Adalbero (969–88) in the elevation of the Capeta to the throne, the political part played by Archbishop Arnoul (988–91 and 995–1021), as a partizan of the Capetians, in the struggle for the see of the Church, by Gerbert (991–1005), afterwards Sylvester II, are treated in the articles Hugh Capet and Sylvester II, Pope. Manasses de Gournay (1069–80) was deposed for simony at the behest of Gregory VII in the Council of Lyons. Henry of France, second son of King Louis VI (1162–75), did much to secure the recognition in France of Pope Alexander III against the antipope Octavian, and resisted the attempts of the burgheers to form themselves into a commune. William of the White Hands (1176–1202), uncle to Philip Augustus and cousin of Henry II of England, was made a cardinal in 1179, and was legate in France and Germany under Innocent III. It was he who granted to the burgheers of Reims in 1182 the Wilhelmine Charter, a concession to the communal movement. Cardinal Gui de Paray (1204–06), formerly Abbot of Citeaux, suppressed Manichaeism in his diocese. Albéric de Humbert (1206–18) took part in the Albigensian War and, in 1211, laid the first stone of the present cathedral. Jehel de Morey was created cardinal in 1413, held the office of Grand Archdeacon of Reims on Cardinal Ottoboni, nephew of Innocent IV, who became pope under the name of Adrian V. Pierre Babette (1274–98) petitioned Gregory X in 1276 for the canonization of Louis le Grand and St. Louis Bégin, VIII in 1297. The Dominican Humbert, Dauphin of Viennois, occupied the See of Reims from 1352 to 1355. Guy de Roye (1390–1409), who was killed in Italy on his way to the Council of Pisa, was the author of the "Dortinon Sapientiae." Simon de Caenmont (1408–15) was created cardinal in 1413, had an important share in putting an end to the Great Schism. Renaud de Chartres (1414–44), made cardinal in 1439, chancellor to Charles VII, showed himself very unfavourable to the mission of Joan of Arc; when the heroine was captured (23 May, 1430) he wrote a letter to the inhabitants of Reims in a spirit hostile to her, and he took no steps to rescue Joan from his suffragan, Bishop Cauchon of Beauvais. Renaud was one of the plenipotentiaries who signed the treaty of Arras between Charles VII and the Duke of Burgundy. It was commissionned by Charles VII, in 1447, to notify Amadus of Savoy that he must abdicate the papal throne, and to treat with Nicholas V for the restoration of peace to the Church. Jean Juvenel des Ursins (1451–55) was created cardinal by his sovereign; he was ordered by him to revise the process of Blessed Joan of Arc; he also wrote a history of the reign of Charles VI. Guillaume Briçonnet was created cardinal in 1493 and occupied the See of Reims from 1497 to 1507. His successor, Charles Dominique de Carrette (1507–8) was Cardinal of Final after 1503. Robert de Lenoncourt (1508–22) enriched the Cathedral with tapestries representing the life and death of the Blessed Virgin, and the church of St. Remigius with tapestries on the life of its titular saint.

In 1553 the House of Lorraine began to acquire a hold upon the See of Reims, where it was first represented by John V of Lorraine (1533–8), next by Cardinal Charles of Lorraine (1538–74), and then by Cardinal Louis de Guise (1574–88). In 1585 Reims had taken sides with the League, and the Duke of Mayenne and the Maréchal de Saint Paul ruled as masters in the city until 1604. The "Journalier" of Jean Pussot, the carpenter, is even now a capital source of information on the League spirit which animated the people of Reims, showing at the same time how they gradually rallied to Henry IV. Philippe du Bec, one of the prelates who had laboured most earnestly for Henry IV's conversion, was by him nominated Archbishop of Reims in January, 1595. The see was next occupied by another Guise, Louis of Lorraine, made a cardinal in 1615. At his death the see was given to William Gifford, an Englishman who occupied it until 1639. He had been successively canon-theologian of the cathedral of Milan under St. Charles Borromeo, dean of St. Peter's at Lille, rector of the University of Reims, a monk in the monastery of St-Benoît en Vouivre, at Mols, and founder of two Benedictine houses at Malo and Paris, spent his whole life helping the ex patriated English Catholics in France and the apostles who were going thence, with all caution, to strengthen persecuted Catholics in England. He wrote a treatise on predestination and a work against the Calvinists entitled "Calvino-Furcismus." His successor, in 1629, Henry of Lorraine, the adventurous Guise who afterwards attempted an expedition against Naples, never received Holy orders, and in 1641 Richelieu compelled him to give up the encloments of the archbishopric. In the course of the seventeenth century two religious women who belonged to the House of Guise had also been abbesses at St-Pierre-les-Dames at Reims, and Mary Stuart, at the age of six, had spent some time and received a part of her (1648–50). Among the later archbishops of Reims may be mentioned: Antonio Barberini (1657–71), cardinal in 1627; Charles-Maurice Le Tellier (1671–1710), who, unhappily, caused to be demolished the superb Bishops' palace which had been erected in the preceding age, distinguished himself by his hatred of the Jesuits and his antipathy to Roman doctrines, and bequeathed his magnificent library to the Abbey of Ste-Geneviève at Paris; François de Mailly (1710–31), cardinal in 1698; Charles-Antoine de La Roche Girardon (1762–74), cardinal in 1773, a friend of the Encyclopaedists. Jean-Baptiste de Talleyrand-Périgord (1777–1801), who was a deputy in the States-General of 1789, combated the project of the civil constitution of the clergy in several of his writings, emigrated under the Revolution, refused to resign after the Concordat, remained near Louis XVIII after 1803, returned with him to France in 1814, accepted his dismissal from the Archbishops of Reims in 1816, and in 1817 was made a cardinal and Archbishop of Paris; Jean-Baptiste-Marie-Antoine de Latil (1824–98), chaplain in the future Charles X, in 1831 left Charles IX and joined Charles X in England, and spent the last nine years of his life away from his diocese; the theologian Thomas Gousset (1840–66), cardinal in 1851; the writer and preacher Landriot (1867–74), famous during the Fy Calvins, who opposed the military execution of Abbé Miroy, one of his parish priests, by the Germans in the middle
of an armistice; Benoît-Marie Langenieux (1874–1905), one of the most illustrious prelates of the end of the nineteenth century, who took the initiative in leading pilgrimages of Christian nations, and thus played a part in the great social movement which culminated in the encyclical "Rerum novarum". He presided in 1895, as papal legate, at the Eucharistic Congress in Jerusalem, when all the Eastern Churches, whether united with Rome or separated, bore their tribute to their faith in the Eucharist. He was the first cardinal to visit the Holy Land since the Crusades. In 1896 he organized the festival to celebrate the fourteenth centenary of the baptism of Clovis.

In the Merovingian period, Reims apparently enjoyed ecclesiastical supremacy over the eleven cities of Soissons, Châlons, Vermand, Arras, Cambrai, Tournai, Senlis, Beauvais, Amiens, Terouanne, and Boulogne; and when St. Remigius detached a part of his own diocese to form what of that of Laon, it made one more suffragan for Reims. The erection of the Bishopric of Cambrai into an archbishopric see by a Bull dated 12 May, 1559, took from the metropolitan jurisdiction of Reims the Dioceses of Cambrai, Arras, and Tournai. At the same time the See of Terouanne was suppressed, and out of its territory three new dioceses were made: one of them, Boulogne, dependent on Reims; the other two, St. Omer and Ypres, dependent on Cambrai and Mechlin. The archbishops of Reims, legati nati of the Holy See, had, as primates, jurisdiction over the other metropolitanos of Gaul, From the time of Louis IV D'Outre-Mer they had been counts. They were entitled to coin money, had their town guard, and levied armies. As soon as a new archbishop was elected he made a visitation of his suffragans; in each city, on the arrival of the metropolitan, business was suspended, the people and the clergy, magistrates, even princes, went to meet him, prisons were thrown open, and exiles were recalled from banishment. The inhabitants of Saint-Quentin and Saint-Valéry were under his judicial jurisdiction, and had to bring their pleas to the archiepiscopal court of Reims. In 999 a Bull of Sylvester II recognized the right of the archbishops of Reims to crown the kings, and, at the coronation of Philip II, Archbishop Gervais took advantage of the presence of the papal legates to proclaim once for all the right of Alexander III, in his Brief of 1179, prohibited any other archbishop from arrogating to himself. Louis VII, at his coronation, raised the Countship of Reims to the rank of a duchy and peerage of the kingdom.

On the tomb of St. Remigius, as built by Archbishop Robert de Lonconcourt, there are niched figures representing the twelve peers who carry the symbols of the coronation: on the right, the six spiritual peers—the Archbishop of Reims, who anointed the king; the Bishop-Duke of Laon, who held the sacred ampulla; the Bishop-Duke of Langres, with the sceptre; the Bishop-Count of Beauvais, with the emblazoned surcoat; the Bishop-Count of Châlons, with the royal ring; the Bishop-Count of Noyon, with the balfrod—and on the left the six temporal peers—the Duke of Burgundy, holding the crown; the Dukes of Guyenne and Normandy, and the Counts of Champagne, Flanders, and Toulouse. The ceremonies of the coronation at Reims presented two characteristic features: the use of the sacred ampulla for the anointing of the king (king's evil). According to the legend—of which, however, St. Avitus, a witness of the baptism of Clovis, was ignorant in the fifth century, and the first trace of which appears in Hincmar—the holy ampulla was brought by a dove to St. Remigius when he was in the act of anointing, and thus played a part in the first miracle. This ampulla was a small crystal vial, two-thirds full of balm; its superb ornamentation was added later. It was kept at Saint-

Reims, in a reliquary which also contained a golden needle and a silver paten. When needed for a coronation, the Abbot of Saint-Remi brought it to the cathedral. The golden needle was used to mix the balm, taken from the ampulla, with chrism on the silver paten. The holy ampulla left Reims only once, when Louis XI, being sick at Plessis-les-Tours in 1483, hoped that an unction from it would cure him. The authenticity of the sacred ampulla began to be questioned when Henry IV could not be crowned at Reims because the Guises occupied Champagne; on this occasion an ampulla was used which was preserved at the abbey of Marmoutiers, and which had cured St. Martin. Jean-Jacques Chifflet, first physician to Philip IV of Spain, in 1651 wrote a book expressly to disprove the authenticity of the Reims

Cathedral, Reims, Nave and Choir

ampulla. In 1793 the vial was broken in the public square of Reims; but a few days before this was done, a constitutional parish priest had taken out some of the balm and put it in a case of safety; it was from this portion that Charles X was anointed. The legendary privilege of healing acrofula on the day of the coronation was supposed to have been given by St. Remigius to the kings of France and confirmed to them by St. Marcoul, Abbot of Nanteuil (d. 552), whose remains rested after the ninth century at Corbeny, in the Diocese of Laon—hence the pilgrimages made by several kings, after their consecration, to Corbeny. Louis XIII was the last king to make this pilgrimage (in 1610); Louis XVI had the relics of St. Marcoul brought to the Abbey of Saint-Remi, so as to avoid going out of Reims. Louis XVIII did not touch for the acrofula, but Charles X did, the day after his consecration, at the hospital of Saint-Marcoul, changing the formula, "Le roi te touche, Dieu te guérit" (The king touches thee, God heals thee), to "Le roi te touche, Dieu te guérisse" (The king touches thee, may God heal thee).

Several of the popes visited Reims. In the early days of the Carolingian dynasty it was the scene of two famous interviews: between Stephen III and Pepin the Short, and between Leo III and Charle-
magne. In 816 Louis the Debonnaire was crowned by Stephen V in the cathedral of Reims, and the pope conferred the title of Augustus on Queen Emma. Pope Leo IX came to Reims in September, 1049, during the episcopate of Guy de Châtillon; he consecrated the church of St. Remigius, and decreed that the French paid the tributes of the church on the first day of October, throughout the whole kingdom. During the episcopate of Raoul de Verd, Pope Callistus II presided at a council held at Reims from 20 to 30 October, 1119. St. Norbert came thither barefoot and in penitential garb, and Callistus conferred the habit of the monks on him by Gelasius, to preach the Gospel in all places. The council drew up a decree for the Truce of God, and excommunicated Bourdin, the antipope, and the Emperor Henry. Pope Innocent II, on 19 October, 1151, in the episcopate of Renauld de Martigné, opened at Reims a council at which St. Bernard appeared, and the antipope Anacletus was excommunicated. While this council was sitting, the pope crowned (25 October) Louis the Younger, afterward Louis VII, the present sovereign of the house of Capet. Lastly, at the request of Bernard, Bishop of Hildesheim, he canonized St. Godehard. Pope Eugene III, on 22 March, 1148, opened at Reims a council at which St. Bernard forced Gilbert de La Porée to retract his errors on the essence of God, and Samson de Sens, vigorously prosecuting Reims, caused Eon de l'Étoile to be condemned.

From the ninth century to the eleventh, the buildings of a monastery for women founded by St. Gombert were used by poor children who desired to learn, who lived on alms, prayed in the chapel of St. Patrick, and attended the school. This was the origin of the "Collège des Bons Enfants", the functions of which were regulated by Juhele's Charter, in 1245, and which prepared a certain number of boys for the priesthood. Between 1544 and 1546, Paul Grand Raoul, the scholasticus of Reims, had the college rebuilt, and it was in this building, by that time still further enlarged, that Cardinal Charles of Lorraine installed the university, for which he had obtained from Paul III a Bull of erection (5 January, 1548) and the foundation of which was sanctioned by Henry II in March, 1548. It was to comprise the four faculties of arts, theology, law, and medicine. The faculty of theology was completed through the liberality of Antoine Fournier (b. at Reims, 1532), who administered the Diocese of Mâcon for Louis XII.

The University was the stronghold of the League in Champagne, and in 1588 it adhered to the solemn declaration by which the Sorbonne declared the French people to be absolved from their oath of allegiance to Henry III after the assassination of the Duke of Guise. But when Henry IV had had himself crowned at Chartres, and the most fervent Leaguers of Reims were contemplating going into exile, the faculty of theology gave the signal for submission. In 1606, when, through the favour of Archbishop François de Salignac, the Jesuits set up an establishment, they asked to be incorporated in the university, and in 1609 they obtained their request. Repeated conflicts, however, arose between the Jesuits and the university, first in 1617, then in 1660 and 1664, again in 1722 on the question of Jansenism, and again in 1752. In 1682 the theological faculty of Reims adhered to the Four Articles, and in 1688, when Innocent excommunicated Lavardin, Louis XIV's ambassador, it voted by acclamation in favour of an appeal to a council. Until 1723 it refused to submit to the Bull "Unigenitus", and one of the Council of Laccois was sent to the Bastille at this time for six months. (On the foundations at the University of Reims made in the sixteenth century with a view to the Catholic apostolate in England, see Allen, William.)

The chapter of Reims possessed rights over 150 villages of the diocese. History records as having been members of that chapter 5 popes, 23 archbishops, 53 cardinals, and a considerable number of bishops; pursuant to what was known as the "Jouanne privilege". Obtained under Jean de Craon, its members were exempt from all jurisdiction except the pope's. Among them were held by the Carthusians (1030-1101), who was at one time scholasticus of Reims; Otton of Châtillon, who became pope in 1068 under the name of Urban II; Guillaume Coquillart, who died about 1490, in his younger days, as a law student, the author of celebrated jocose poems; Maurocron (unidentified), the first, and Bonlier and La Fontaine. A very curious festival which the chapter used to hold in the Middle Ages was the procession of the herring. At the beginning of Lent, they went in Indian file from the cathedral to St.-Remi, each dragging a herring after him by a thread—a symbol of the Lenten abstinence—and each trying to put his foot on the herring dragged by the next canon ahead of him.

The celebrated cathedral of Reims is dedicated to the BVM, St. Vith, Notre-Dame, having been destroyed by a fire in 1211; Bishop Alberic de Humbert undertook to build the present cathedral in its place. It was completed in one hundred years— from 1211 to 1311—and hence the admirable unity of design and execution which characterize it as an example of Gothic architecture. Reims have been the first architect, originating the plan and building the apse; the great doorway, crowned with the famous gallery containing forty-two statues of kings of France, is chiefly the work of Robert de Cloy, in the beginning of the fourteenth century. In the treasury of the cathedral is preserved the chalice of St. Remigius (see illustration at CHALICE), from which the kings of France used to communicate under the species of wine at the end of the coronation ceremonies, and which, according to tradition, was cut from the gold of the celebrated vase of Soissons broken by one of Clovis's soldiers. On 1 Feb., 1886, the Cathedral of Reims was affiliated to the illustrious Lateran Basilica, thereby participating in the privilege of all the indulgences and spiritual favours attached to the cathedral of Rome. In 1891 the canons of St. Peter at Rome presented to the chapter at Reims a portion of the relics of St. Petronilla; the translation of these sacred bones to Reims took place on Whitsunday, 1892.

The Benedictine monastery of St.-Remi was long independent of the archdiocese. The privileges of St.-Remi were begun in 1005 by Aimery, abbot of the monastery, and some of the capitals date from that period. The work was resumed on a simpler plan by Abbé Thirion in 1039, when the south transept was built; the apse dates from 1170, in the time of Abbé de Cévy, in the beginning of the fourteenth century. The work was resumed on a simpler plan by Abbé Thirion in 1039, when the south transept was built; the apse dates from 1170, in the time of Abbé de Cévy, in the beginning of the fourteenth century. The work was resumed on a simpler plan by Abbé Thirion in 1039, when the south transept was built; the apse dates from 1170, in the time of Abbé de Cévy, in the beginning of the fourteenth century.

The church of Ste-Croix, the foundation stone of which was laid on 26 June, 1898, on the centenary of the baptism of Clovis, was opened in March, 1901, and raised to the rank of a basilica by Leo XIII on 5 March, 1902. At present it possesses 70 chasubles and nearly 1000 reliques. The centenary celebration drew together an attendance of 77 prelates and 69 pilgrims.
ages, and was the occasion of seven congresses. Leo XIII sent Mgr Cioci, pontifical master of ceremonies, to preside at the solemn recognition of the relics of St. Remigius and their transfer to a new chase. The same pope granted to France the privilege of a national jubilee, and wrote a Latin "Ode to France" at Reims. The jubilee was the inspiration of Theodore Du bois's oratorio "The Baptism of Clovis". The hospital of Saint-Marceau was founded in 1645 by Marguerite Rousselet for cases of contagious scrofula—i.e. tuberculosis. It was the first institution to practise isolation of tuberculosis patients.

The Cinquantenaire of Charles VII at Reims (17 July, 1429), brought about by Joan of Arc, is an historical event of especial importance. Joan's father was present at the ceremony, and had his lodgings at Reims in the "Hôtel de l'Arce Rayé"; the archives of the city still preserve the accounts of expenses incurred for his entertainment. Joan wrote from Reims (17 July) a letter to Philip the Good, Duke of Burgundy, inviting him to make peace; in August, 1429, and March, 1430, she wrote from Bray-sur-Seine and from Sully to her letters to her "very dear and good friends and loyal Frenchmen, dwelling in the city of Reims", exhorting them not to lose heart under the renewed menaces of the Duke of Burgundy and the English.

The Abbey of Hautvilliers, in the Diocese of Reims, was the original home of the heretic Gottschalk. Besides the saints already mentioned, the following are especially honoured in the diocese: St. Gertrude, virgin and martyr (d. 362); St. Paul of Reims, solitary at Glannum (now Saint-Remy) in Provence, then Bishop of Trois Châteaux (second half of the fourth century); St. Victor of Mouzon and his sister Suzanne, martyrs in Orléans (d. 290); St. Similinus, father of St. Remigius; St. Celina, his mother; St. Principius, his brother; St. Bal samia, his nurse; St. Celsinus, his foster brother; Sts. Lupus, Bishop of Soissons, and Genebald, Bishop of Laon, his nephews; St. Latro, his grandnephew (all sixth-century); the saints of the little Irish colony which St. Remigius established in the valley of the Marne; St. Gibrien, his brothers Sts. Hélán, Trésain, Germanus, Vérain, Abram, and Pétran, and his sisters Sts. Francile, Prompta, and Poseana (sixth century); St. Thierry, St. Remigius's deacon, and Abbot of Mont d'Hor near Reims (d. 670); St. Rogatian, Count of Réthéil, converted by St. Remigius, and his son St. Arnoald, who was perhaps Bishop of Tours, and was assassinated at Reims; St. Leonard, a disciple of St. Remigius, who refused a bishopric offered to him by Clovis and died a solitary in the Diocese of Limoges (sixth century); St. Bertaud (472–545), a Scotchman (Scotus) by origin, solitary at Chaumont-Poreien, his friend St. Aumond, Bishop of Térouane, and his disciples Sts. Olive and Bérède (sixth century); St. Attollus, disciple of St. Remigius, founder of twelve hospitals, his son St. Elan, and his daughter St. Euphrasia (sixth century); St. Théodelph (d. 590), Abbot of Mont d'Hor, who left among the neighbouring populations such a reputation as a ploughman that his plough was preserved as a relic; St. Basile the hermit, a great pro
tector of animals, and his disciple St. Sindulphe (sixth century); St. Walfroy, monk at Ivois (sixth century); St. Baudry and his sister St. Bode, children of Sigebert of the monastery of Saint-Pierre-les-Dames at Reims, and their niece St. Dode, abbess of the monastery (seventh century); St. Gombert, missionary in Scotland and a martyr, and his wife St. Bertha, foundress of the Abbey of Avenches, who was assassinated (seventh century); St. Mériolain, Irish priest, killed near Reims (eighth or ninth century); the shepherd St. Juvinus, solitary (d. 961); St. Floutilde, ecstatic (tenth century); Blessed Odo, Canon of Reims, b. 1042, at the Church near Marne, prior of Binson (a priory the chapel of which still exists and was restored by Cardinal Langénieux), afterwards pope under the name of Urban II, whose cultus, existing from time immemorial, was recognised by the Sacred Congregation of Rites, 12 July, 1881, at the petition of Cardinal Langénieux; St. Maurilius of Reims, Archbishop of Rouen (1055–67); St. Gervais of Reims, Abbot of St. Riquier (d. 1073); Ven. Richard (d. 1046), Canon of Reims, Abbot of Saint Vanne at Verdun, ambassador from the Emperor Henry to King Robert, and to whom, in concert with St. Odilo, Abbot of Cluny, is due the adoption in Neustria of the "Peace of God"; St. Albert, Bishop of Liège, assassinated at Reims in 1192 by partisans of the Emperor, Roger, an Englishman, Archbishop of Cambrai (d. 1048); Blessed Roland, man by origin, first abbot of St. Evrard (d. 1175); Blessed Roland (d. 1160); Blessed Humbert (d. 1148), Guerrier (d. 1157), and Minoucle (d. 1186), abbots of the Cistercian abbey of Ijney, the last of whom was sent by Pope Lucian as ambassador to the Emperor of Germany and died Abbot of Clairvaux; St. John Baptist de La Salle (1651–1716), b. at Reims, Canon of Reims, founder of the Institute of Christian Brothers; Ven. Jacques Lion (1671–1738), a native of Fumay, Hieronymite monk.

Among the distinguished persons connected with this diocese may also be mentioned: Dom Marlot (1596–1667), the Benedictine, b. at Reims, and the author of a history of the city which is still a classic, first to be honoured with a professorship of rhetoric at Reims; Colbert (1619–83), b. at Reims; Mabillon (1632–1707), b. at St. Pierre- mont; Ruinart (1657–1709), author of the "Acta Martyrum"; b. at Reims; the Abbé Pluche (1688–1761), b. at Reims, professor in the college of Reims, author of the "Spectacle de la Nature" and the "Histoire du Ciel"; Tronson Ducoudray (1750–80), an antiquist; Linguet (1736–94), the controversialist who published during the duration of the Jesuits after their expulsion from France; Anquetil, director of the Seminary of Reims, and author of a history of the city (1756).

Besides the tomb of St. Remigius, the principal pilgrimages of the diocese are: Our Lady of Hope,
of Mercy, at Mâtières, dating back to 630; Our Lady Help of Christians (Notre Dame de Bon Secours), at Neuviy, dating from 1752; the Virgin at the Oak, a pilgrimage organised by Archbishop Langénieux, in 1880, to a picture which had been venerated by pious souls since the fourteenth century; the pilgrimage to the relics of St. Helena, the empress, at Hautvilliers. Before the Law of Congregations of 1901 was put into effect, there were in the Diocese of Reims Capuchins, Jesuits, Sulpicians, and various orders of teaching brothers; there are some 168 sons of Our Lady of Africa and Lazarists. Many orders of women have had their origin in the diocese: the Canonsesses of the Hôtel Dieu, dating from the sixth century; the Sisters of the Holy Infant Jesus, founded in 1670 by Canon Roland for the gratuitous instruction of poor girls, with the mother-house at Reims, a foundation which suggested to St. John Baptist de La Salle, a friend of Canon Roland, the idea of accomplishing a similar work for boys; the Sisters of the Divine Providence, teaching institutes, founded in 1850, with mother-house at Reims; the Sisters of St-Marcoul, who care for patients afflicted with cancer, paralysis, and acrofula, in the hospital of St-Marcoul at Reims. At the close of the nineteenth century the religious congregations in the diocese numbered 2 confraternities, 21 religious of both sexes, 14 orphanages, 2 workshops, 2 professional schools, 14 hospitals or hospices, 11 houses of religious women devoted to the care of the sick in their own homes, 2 houses of retreat. At the end of 1909 the Diocese of Reims contained 530,650 Catholics, 47 parishes, 545 succursal parishes, and 67 curacies (of which, under the Concordat, the salaries of 9 had been paid by the State).

GEORGES GOTAU

Reims, Synodes of.—The first synod said to have been held at Reims by Archbishop Bonnati between 624 and 630 is probably identifiable with that held at Clithy (Clibiscum) in 625 or 627. In 813 Archbishop Wullar presided at a synod of reform (Wein.

Basile, near Reims, over the synod which deposed Abp. Arnulf of Reims (Schlochweiler, "Das Konzil zu St. Basle", Mainz, 1906). In 1049, Leon IX presided at a reformed synod (Drehmann, "Papst Leo IX u. die Simonie", Leipzig, 1908). In 1115 a synod was held at which the cardinal legate Cuno of Penne announced excommunicated King Henry. In 1119 Calistus II convened a synod for the purpose of confirming the decrees of the Lateran Synod of 1123, 15 archbishops, over 200 bishops, and as many abbots. In 1148 Eugene III was present at a synod against Gilbert de la Poëze (q. v.) and the fanatic Eon de l’Etoile. In 1164 Alexander III presided at a synod which urged the crusade against Emperor Frederick I. In 1407 Abp. Guido III convened a synod to abolish the abuses that had crept into the Church of Reims during the Western Schism. In 1528 Abp. Robert III held a synod against Luther. In 1564 Cardinal Charles of Lorraine convened a reformed synod to enforce the Tridentine decrees. In 1593 Cardinal Francis of Guise held a synod at which 27 reformatory decrees were enacted. After a lapse of almost three centuries Cardinal Gousset of Reims convoked a synod at Soissons in 1849; another, at Amiens in 1853; a third, at Reims in 1857. The acts of the last three synods are printed in "Collectio Lacensis", IV, 91–246.

For the acts of the preceding and many other synods of minor importance, see GOUSSET, Actes de la province ecclésiastique de Reims (Reims, 1841); HEFEL, Conciliengesch.

MICHAEL OTT.

Reinmar of Hagenau, a German minnesinger of the twelfth century, numbered in the MSS, the Aate (the old) to distinguish him from later poets of that name. He is undoubtedly identical with the Reinmar referred to by Gottfried von Strasburg in his "Tristan" as the nightingale of Hagenau, the leader of the choir of nightingales, whose voice had just been hushed by death and who was succeeded by Walther von der Vogelweide. From this it may be inferred that the poet or his family came from Hagenau in Alsace (though there is also a place of that name in Austria), and that he died before 1210, when the first known mention of his works was written. Otherwise we know nothing of Reinmar's life except what may be gathered from his verses. He certainly was in Vienna in 1195 at the Austrian court; he also participated in a crusade, presumably undertaken by Duke Leopold in 1168, for which he lived for a long time at the Austrian court, where he enjoyed a high reputation and was much admired, even by the greatest of all minnesingers, Walther von der Vogelweide, who acknowledges himself as Reinmar's pupil, though this must not be taken in a literal sense. Reinmar's poems show the Romance influence that had been predominant since Veldeke and Hausen. They are perfect in form and thoroughly "courtly" in sentiment. Passion and natural feeling are repressed, mzze, correctness and propriety, reign supreme. General reflections are common, concrete images and situations few. However, Reinmar breaks through the bounds of convention and allows his heart to speak, as in the lament for the death of the duke, which is put into the mouth of the duchess herself, he shows lyric gifts of a high order. But this does not often happen, and most of Reinmar's poems show more elegance of form than beauty of sentiment. In a society, however, where form was valued more than contents, such poetry was bound to meet with favour. Reinmar's poems are edited in Laut, "Minnesangs Frühling", XX (4th edition, Leipzig, 1888).

ARTHUR F. J. REYNT.

Reisach, CARL VON, b. at Roth, Bavaria, 7 July, 1800; d. in the Redemptorist monastery of Contamine, France, 22 December, 1889. On the completion of his secular studies in Neuburg on the Danube, he studied philosophy at Munich (1814) and jurisprudence at Heidelberg, Göttingen, and Landshut, securing at the last (1821) the Degree of Doctor Juris Utriusque. Devoting himself a little later to the study of theology, he received minor orders at Innsbruck in 1824, was ordained in 1829, and studied for the German College at Rome, and in the following year graduated Doctor of Theology. Pius VII soon appointed him rector of the College of the Propaganda, an office which brought him into close relations with the succeeding popes, Gregory XVI. Urged by this pontiff to devote special attention to
CATHEDRAL OF NOTRE-DAME, REIMS

BEGUN BY BISHOP ALBERIC DE HUMBERT IN 1211, COMPLETED IN 1311
the affairs of the Catholic Church in Germany, he attacked the current anti-ecclesiastical views and tendencies, especially with regard to mixed marriages, in his "Hervor von der Reform und Stimmpflicht der katholischen Deutschland unserer Tage zu halten?", which appeared at Mainz in 1835 under the pseudonym Athanasius Sincerus Philalethes. In 1836 he became Bishop of Eichstätt (Bavaria), and, by the foundation of the boys' seminary (1839) and the erection of the lyceum (1843), rendered the greatest services to the ecclesiastical life of the diocese. As delegate of the pope and the Kings of Prussia and Bavaria, he mediated in the Prussian ecclesiastical dispute, and the rapid settlement of the "Cologne middle" (Kölner Wirren) was due primarily to him. In recognition of his services, he was named in 1841 Coadjutor, and in 1847 Archbishop of Munich-Freising. His zeal on behalf of the Church having rendered him unpleasing to the Government, he was, at the request of King Maximilian II of Bavaria, summoned to Rome by Pius IX as cardinal-priest, with the title of St. Anastasia. He conducted the concordat negotiations with Württemberg and Baden, took a prominent part in the preparations for the council, became in 1867 President of the Congregation of Ecclesiastic-political Affairs, in 1868 the first legate of the council, was consulted of the Congregation for the Index, for the publication of the ecclesiastical canons of the Eastern Churches, for Extraordinary Ecclesiastical Affairs, for the Examination of Bishops, member of the Congregation of the Propaganda and of Sacred Rites, Minister of Education for the Papal States, and in 1868 Cardinal-Bishop of Ostia.

Katholik, I (Mainz, 1870), 129 sq.; Molitor, Cardinal Reisch (Wien, 1874); Allgem. deutsche Biogr., XXVIII (Leipzig, 1889), 114.

PATRICIUS SCHLAGER.

Reisch, Gregor, b. at Balingen in Württemberg, about 1467; d. at Freiburg, Baden, 9 May, 1525. In 1487 he became a student at the University of Freiburg, Baden, and received the degree of magister in 1489. He then entered the Carthusian Order. During the years 1500-1502 he was prior at Klein-Basel; from 1503 to shortly before his death he was prior at Freiburg. He was also visitor for the Rhensish province of his order. As visitor he made every exertion to procure the return to the monastery of the most celebrated Humanists of the era, e.g., Erasmus, Wimpeling, Bistus Rhenanus, Udalticus Zasius, and the celebrated preacher, Geiler of Kaisersberg. John Eck was his pupil. Reisch had a great reputation for adaptability and was regarded as an "oracle". He was one of the most conspicuous, if not the most conspicuous, of the intellectual men at the commencement of the new era who sought to prepare encyclopedic works of knowledge. His chief work is the "Margarita philosophica", which first appeared at Freiburg in 1503, not as early as 1499. It is an encyclopedia of knowledge intended as a text-book for youthful students, and contains in twelve books Latin grammar, dialectics, rhetoric, arithmetic, music, geometry, astronomy, physics, natural history, physiology, psychology, and ethics. The usefulness of the work was increased by numerous woodcuts and a full index. The form is categchetical: the scholar questions and the teacher answers. The book was very popular on account of its comparative brevity and popular form, and was for a long time a textbook for the higher schools of the university, and was said by von Humboldt to say that it had "for a half-century, aided in a remarkable manner the spread of knowledge". In 1510 Reisch also published the statutes and privileges of the Carthusian Order, and assisted Erasmus of Rotterdam in his edition of Jenner.

KLEMENS LÖFFLER.

Relationship (Carnal and Spiritual).—The theologians understand by relationship in general a certain connexion of persons established either by nature or by the civil or canon law. Hence they distinguish three kinds, natural, legal, and spiritual. With legal relations we are not here concerned. Natural or carnal relationship originates in carnal intercourse of man and woman, whether marital or not. It is twofold: consanguinity and affinity. Spiritual relationship has been introduced by ecclesiastical law and is associated with the administration of the Sacraments of Baptism and Confirmation. It runs in each case between the minister and the recipient of the sacrament and also between the sponsors on the one hand and the recipient and his parents on the other. According to the existing discipline it operates as a diriment impediment of marriage between the persons named. (See Affinity; Consanguinity; Marriage.)

SLATER, Manual of Moral Theology (New York, 1908); DONNABAIL, Summulae Theologiae Moralis (London, 1898); BALLENERI, Opus Theologicum Morale (Prato, 1900).

JOSEPH F. DELANY.

Relatives, Duties of. — The general precept of charity obliging us to love our neighbour as ourselves is of course applicable to our relatives. The tie of kinship, particularly in the nearer degrees, confers upon the command a special emphasis. Thus, there is established an order of preference in favour of relatives in the observance of the law. St. Thomas teaches that the strength of the affection we have for another is contingent upon the intimacy of the bonds that unite us. No set of relations antedates that of the family, nor is there any more lasting. Ordinarily, therefore, we are to love those of our own kindred more than mere friends, and that notwithstanding whatever excellences these latter may happen to possess. This is true not only of natural affection, but also of the supernatural act of charity. Theologians have endeavoured to determine what is the respective rank enjoyed by relatives as claimants for our attachment. They seem to be pretty well agreed that husband or wife hold the first place; next come children, grandchildren, and nieces and nephews; then relations of the first degree, e.g., uncles and aunts, cousins, and second cousins; and so down to the fifth degree. It is obvious however that the succession here indicated, valid as it may be in the abstract, is often for good reasons subject to change. In any case its inversion would not be a grievous sin. There is also doubt that we are bound to our relatives in distress. All that is usually laid down in general about the duty of almsgiving, both corporeal and spiritual, holds good with added force when our kinsfolk are to be the recipients. Other things being equal, they are to be aided if need be to the exclusion of any one else. A distinction must no store by this obligation would seem to deserve the condemnation of St. Paul in the First Epistle of Timothy (v, 8): "If any man have not care of his own, and especially those of his own house, he hath denied the faith and is worse than an infidel."

JOSEPH F. DELANY.

Relativism. — Any doctrine which denies, universally or in regard to some restricted sphere of being, the existence of absolute values, may be termed Relativism. Thus one form of Relativism asserts that we are conscious only of difference or change (Hobbes, Bain, Höfling, Wundt. Cf. Maher, "Psychology", 6th ed., p. 487; American philosophers hold that truth is relative, either (a) because judgments are held (i) to have no meaning in isolation and (ii) to be
subject to indefinite modification before they can become embodied in the coherent system of ideas which (Jenyns and Hegelians generally, or else (b) because truth is conceived as a peculiar property of ideas whereby they enable us to deal with our environment more or less successfully (Pragmatism). A third affirms moral worth to be essentially relative and to emerge only when motives are in conflict (Martineau). (See ETHICS, PRAGMATISM, TRUTH.)

The term Relativism, however, is more commonly applied to theories which treat of the nature of knowledge and reality, and it is in this sense that we shall deal with it here.

**The Relativity of Knowledge.** — Whatever may be the real and primary significance of Protagoras’s famous dictum, *“Man is the measure of all things”* (δισοριοετες πεπερατω και των δεδομεν και των μεν δεδομεν, Plato, *Theet.*, 152 A; in “Mind”, XIX, 475, Mr. Gillespie maintains that the dictum has an ethical significance), it has ordinarily been understood in an epistemological sense, as a statement of the relativity of all human knowledge, of the impossibility of penetrating beyond the appearances of things. And this idea is in conformity with the general tendency of the age in which Protagoras lived. Heraclitus’s doctrine of a perpetual and universal flux, Parmenides’s view that plurality and change are but the semblance of reality, futile attempts to explain the nature of sense-perception and to account for the passage of time, all tend to rob us of the dawning consciousness (evident in Democritus) of a subjective factor in the perceptual process—all this tended to make philosophers distrust the deliverances of their senses and rely solely upon reason or intelligence. Reflection, however, soon made it clear that rational theories were no more consistent than the data of perceptual experience, and the inevitable result of this was that the Relativism of Protagoras and his followers eventually passed into the scepticism of the Middle Academy (see SCEPTICISM).

Modern Relativism, on the other hand, though it too tends to pass into Scepticism, was in its origin a reaction against Scepticism. To dispel the doubt which Hume had cast on the validity of universal judgments of a synthetic character, Kant proposed that we should regard them as ways of thinking, a mode of apprehension of the nature of real things, but not from the constitution of our own minds. He maintained that the mental factor in experience, hitherto neglected, is really of paramount importance: to it and to the space-time, the categories, and every form of synthesis. It is the formal element arising from the structure of the mind itself that constitutes knowledge and makes it what it is. Hume erred in supposing that knowledge is an attempt to copy reality. It is nothing of the kind. The world as we know it, the world of experience, is essentially relative to the human mind, whence it derives all that it has of unity, order, and form. The obvious objection to a Relativism of this kind is the outstanding thing-in-itself, which is not, and can never become, an object of knowledge. We are thus shut up with a world of phenomena, the nature of which is constituted by our minds. What reality is in itself we can never know. Yet this is, as Kant admitted, precisely what we wish to know. The fascination of Kant’s philosophy lay in the fact that it gave full value to the activity, as opposed to the passivity or receptivity of mind; but the unknowable Ding-an-sich was an abomination, fatal alike to its consistency and to its power to solve the problem of human cognition. It must be got rid of at all costs; and the simplest plan was for our dealings with it to be conducted through the reality knowable because knowledge and reality are one, and in the making of it mind, human or absolute, plays an overwhelmingly important part.

**The Relativity of Reality**, which thus took the place of the relativity of knowledge, has been variably conceived. Some, with Fichte and Hegel, view Mind or Spirit as a twofold aspect of one and the same ground—of Intelligence, of Will, or even of unconscious Mind. Sometimes, as with Green and Bradley, Reality is conceived as one organic whole that somehow manifests itself in finite centres of experience, which strive to reproduce in themselves Reality as it is, but fail so utterly that what they assert, even when contradictory, must be held somehow to be true—true like other truths in that they attempt to express Reality, but are subject to infinite reinterpretation. Others hold that Reality is identical with the real to which they refer. Still more modern Absolutists (e.g., Mackenzie and Taylor), appreciating to some extent the inadequacy of this view, have restored some sort of independence to the physical order, which, says Taylor (Elem. of Metaph., 188), “does not depend for its existence upon the fact of my actually perceiving it,” but “does depend upon my perception for all the qualities and relations which I find in it.” In other words, the *what* of the real world is relative to our perceiving organs (Life); the *how* of the real system of ideas ("Mind", new series, XIX, 232) puts it, Reality, anterior to being known, is mere δέλτα (raw material), while what we call the "thing" or the object of knowledge is this δέλτα as transformed by an appropriate mental process, and thus endowed with the attributes of space, sense, time, and so on. Thus, for example, *"superinducing form upon the matter of knowledge"* (J. Grote, *Explor. Phil.*, I, 13). Riehl, though usually classed as a Realist, holds a similar view. He distinguishes the being of an object (das Sein der Objekte) from its being as an object (Ob- jektsein). The former is the real being of the object and is independent of consciousness; the latter is its being or nature as conceived by us, and is something wholly relative to our faculties (cf. Rickert, *Der Gegenstand der Erkenntnis*, 2nd ed., pp. 17 sq., where the inconsistency of this view is clearly indicated).

The relativity of Reality as thus conceived really involves a return to the position of Kant, except that for the thing-in-itself with its unknowable character and properties not as an object of reflection, but as a thing-in-itself, but unknowable now because there is nothing to be known. On this point modern Idealism is at one with Hegel. Hume’s error consists in insisting that reality must be regarded epistemologically as dελτα, wholly propertyless and wholly indeterminate. The difference between the two views lies in this, that for the Idealist, form is imposed upon matter by the very act by which we know it, while for the Pragmatist, it is imposed only after a long process of postulation and experiment.

**Criticism.** — M. Fonssegrave in his *Essais sur la connaissance* has discussed the question of Relativism at considerable length, and is of opinion that we are justified in some sense granted to our faculties. But, while in principle he grants this universally, as a matter of fact in his own theory it is only our knowledge of corporeal objects that is regarded as strictly relative. We can know other minds as they really are because we ourselves are thinking beings, and the external manifestation of our mentality and theirs is similar in character. But "we do not know the essence of things, but the essence of our relations with things; of the laws of nature in themselves we know much less than by the study of the relations of things to our states of mind. What we know, is known in terms of the self" (p. 125; cf. pp. 184 sq.). The principal argument upon which this Relativism rests, is fundamentally the same as that used by Berkeley in his famous *Dis-
logue between Hylas and Philonous." As stated by Fonscegrive, it is as follows: "the concept of an object which should be at the same time in-itself and an object of knowledge is clearly contradictory. . . . For 'object of knowledge' means 'known'; but it is quite evident that the known, qua known, is not the same as the known. As Hylas and Philonous make out, we know what we know is not the object as it is in itself, but only as it is in our knowledge of it. Of course, if the notions of 'being in itself' and 'being as known' are mutually exclusive, the above argument is valid; but as concerning the relation of these notions, this is not so. Being in-itself merely means being as it exists, whether it be known or not. It implies therefore that the nature and existence of being is prior to our knowledge of it (a fact which, by the way, Fonscegrive stoutly maintains); but it does not imply that being as it exists cannot be known. Fonscegrive's argument proves nothing against the view that the real nature of objects is knowable; for, though in the abstract the thing qua existent is not the thing qua known, in the concrete there is no reason why its real unchanging nature cannot be known, or, in other words, why it cannot be known as it is.

The argument by which absolutists seek to prove the relativity of Reality is precisely similar to the above. We cannot think of real things, says Taylor ("On the tentativeness and reality of appearances", 144-45), except as objects of experience; hence it is in connexion with mind that their reality lies. Surely this argument is fallacious. All that it proves is that things must either be or else become objects of experience in order to be thought of by mind, and that they must be of the very essence of objects of experience. Unless reality is intelligible and can enter into experience, it cannot become the object of thought; but in no other sense does the possibility of knowing it suppose its "connexion with mind". The same argument would bring it into consciousness", but from this it follows merely that to be conceivable things must be capable of becoming objects of consciousness. Psychological considerations force us to admit that Reality, when it enters experience, becomes, or better it is reproduced as psychical fact; but we cannot conclude from this that Reality itself, the reality which is the object of experience and to which our experience refers as to something other than itself, is of necessity psychical fact. Experience or perception is only one of a condition without which we cannot think of things at all, still less think of them as existing, but it is not a condition without which things could not exist. Nor again, when we think, do we ordinarily think of things as objects of experience; we think of them simply as "things", real or imaginary, and the properties which we predicate of them we think of as belonging to them, not as "superinduced by our minds".

Our natural way of thinking may, however, conceivably be wrong. Granted that what "appears" is reality, appearances may none the less be fallacious. It is possible that they are due wholly or in part to our minds, and so do not reveal to us the nature of reality, but rather its relation to our perceiving selves, our faculties and our organs. Most of the arguments advanced in support of this view are based on psychology, and though the psychology is good enough, the arguments are hardly conclusive. It is urged, for instance, that abstraction and generalization are subjective processes which enter into every act of knowledge, and that the "real world" is not falsification, unless we assume that what we are considering in the abstract exists as such in the concrete—that is, exists not in connexion with and in mutual dependence upon other things, but in isolation and independence just as we conceive it. Nor is generalization fallacious, unless we assume, without proof, that the particulars to which our concept potentially applies actually exist. In a word, neither these nor any other of the subjective processes and forms of thought destroy the validity of knowledge, provided what is purely formal and subjective be distinguished, as it should be, from what pertains to objective content, and refers to the real order of causes and purposes.

A further argument is derived from the alleged relativity of sensation, whence in the Scholastic theory all knowledge is derived. The quality of sensation, it is said, is determined largely by the character of our nervous system, and in particular by the end-organs of the different senses. It is at least equally probable, however, that the quality of sensation is determined by the stimulus; and in any case the objection is beside the point, for we do not in judgment refer our sensation as such to the object, but rather as qualities, the nature of which we do not know, though we do know that they differ from one another in varying degrees. Even granted then that sensation is relative to our specialized organs of sense, it is, as was said, only that the knowledge which is derived through sensation in any way involves subjective determination. Secondly, sense-data do not give us merely qualitative differences, but also spatial forms and magnitudes, distance, motion, velocity, direction; but the latter are not the data of physics but also physical science, in so far as the latter is concerned with quantitative, in distinction from qualitative, variations. Thirdly, sense-data, even if they be in part subjective, suppose as their condition an objective cause. Hence, a theory which explains sense-data satisfactorily assigns to these conditions which are no less real than the effects to which in part at least they give rise. Lastly, if knowledge really is relative in the sense above explained, though it may satisfy our practical, it can never satisfy our speculative, needs. Thus, in the final analysis, we know Reality as it is. But knowledge, if it be of appearances only, is without real meaning and significance, and as conceived in an Idealism of the a priori type, also it would seem without purpose.

EXPERIENCE AS A SYSTEM OF RELATIONS. — It is commonly taught by neo-Kantians that relation is the Category of categories (cf. Renouvier, "Le personnelisme", pref. vi). Qualities are but relations in disguise (Caird, "The Phil. of Kant", 329; Green, Prolegomena" 20). Matter and its relations (Prolegomena, 9). In fact Reality, as we know it, is nothing but a system of relations, for "the nature of mind is such that no knowledge can be acquired or expressed, and consequently no real existence conceived, except by means of relation and as a system of relations" (Renouvier, "Les dilemmes de la metaph."). 11. This form of Relativism may be called objective to distinguish it from the Relativism which we have been discussing above, and with which, as a matter of fact, it is generally combined. Primarily it is a theory of the nature of knowledge, but with Green and others (e.g., Abel Rey, "La théorie de la physique", VI, 2), who identify knowledge and reality, it is also a metaphysic. Such a view supposes a theory of the nature of relation very different from that of the Scholastics. For the latter relation is essentially a relation, and an order ad, which implies (1) a subject to which it belongs, (2) a special something in that subject on account of which it is predicated, and (3) a term, other than itself, to which it refers. A relation, in other words, as the moderns would put it, is essentially and its "metaphysical mysterious and invisible link which somehow joins up two aspects of a thing and makes them one. A relation may be mutual; but if so, there are really two relations (e.g., paternity and sonship) belonging to different subjects, or, if to the same subject, arising from different fundamenta. True, in science as in
other matters, we may know a relation without being able to discover the nature of the entities it relates. We may know, for instance, that pressure and temperature vary proportionately in a given mass of gas of which the volume is kept constant, without knowing precisely and for certain the ultimate nature of either pressure or temperature. Nevertheless we do know something about them. We know that they exist, that they each have a certain nature, and that it is only by understanding this nature that we can make the relation between them arises. We cannot know a relation, therefore, without knowing something of the things which it relates, for a relation presupposes its "terms". Hence the universe cannot consist of relations only, but must be composed of things in relation.

LESLIE J. WALKER.

Relics.—The word relic comes from the Latin reliquiae (the counterpart of the Greek λείψαι), which already before the propagation of Christianity was used in its modern sense, viz., of some object, notably part of the body or clothes, remaining as a memorial of a departed saint. The veneration of relics, in fact, is to some extent a primitive instinct, and it is associated with many other religious systems besides that of Christianity. At Athens the supposed remains of Oedipus and Theseus enjoyed an honour which it is very difficult to distinguish from a religious cult (see for all this Pistor, "Reliquienkult in Athen", 1890), while Pausania mentions the translation of the bodies of Demetrius (Demetr., lli) and Phocion (Phoc., xxvii) which in many details anticipates the Christian practice of the Middle Ages. The bones or ashes of Ἀσκλεπιαv at Ephesus, of Jesus at Mothemata, of the Prophet Jeremiah at Chaldea may trust the statement of the Chronicon Paschale (Dindorf, p. 67)—of the Persian Zoroaster (Zarithustra), were treated with the deepest veneration. As for the Far East, the famous story of the distribution of the relics of Buddha, an incident which is believed to have taken place immediately after his death, seems to have found remarkable confirmation in certain modern archaeological discoveries. (See "Journ. of R. Asiatic Society", 1900, pp. 1056 seq.). In any case the extreme development of relics amongst the Buddhists of every sect is a fact beyond dispute.

I. DOCTRINE REGARDING RELICS.—The teaching of the Catholic Church with regard to the veneration of relics is summed up in a decree of the Council of Trent (Sess. XXV), which enjoins on bishops and other pastors to instruct their flocks that "the holy bodies of holy martyrs and of others now living with Christ—which bodies were the living members of Christ and 'the temple of the Holy Ghost' (I Cor. vi, 19) and which are by Him to be raised to eternal life—shall not be touched by the hands of men, for through these [bodies] many benefits are bestowed by God on men, so that they who affirm that veneration and honour are not due to the relics of the saints, or that these and other sacred monuments are useless, are sinned against the faithful, and that the places dedicated to the memories of the saints are in vain visited with the view of obtaining the blessing which wholly to be condemned, as the Church has already long since condemned, and also now condemns them." Further, the council insists that "in the invocation of saints the veneration of relics and the sacred use of images, the blessing shall be removed and all filthy lucre abolished." Again, "the visitation of relics must not be by any perversion into revellings and drunkenness." To secure a proper check upon abuses of this kind, "no new miracles are to be acknowledged or new relics recognized unless the bishop of the diocese has taken cognizance and approved thereof." Moreover, the bishop, in all these matters, is directed to obtain accurate information, to take council with theologians and pious men, and in cases of doubt or exceptional difficulty to submit the matter to the sentence of the metropolitan and other bishops of the province, "yet so that nothing new, or that previously has not been usual in the Church, shall be resolved on, without having first consulted the Holy See." The justification of Catholic practice, which is indirectly suggested here by the reference to the bodies of the saints as formerly temples of the Holy Ghost and as destined hereafter to be eternally glorified, is further developed in the authoritative work of Thomas Catechism, drawn up at the instance of the same council. Recalling the marvels witnessed at the tombs of the martyrs, where "the blind and cripples are restored to health, the dead recalled to life, and demons expelled from the bodies of men", the Catechism points out that these are facts which "St. Ambrose and St. Augustine, most unexceptionable witnesses, declare in their writings that they have not merely heard and read about, as many did, but have seen with their own eyes"; (Ambrose, Epist. xxxii, nn. 2 and 17; Augustine, Serm. cccxxvi, c. v.; "De Civ. Dei", xxii, 8, "Confessa", ix, 7). And from hence, turning to Scriptural analogies, the compilers further argue: "If the clothes, the kerchiefs (Acts, xix, 12), if the shadow of the saints (Acts, v, 15), before they departed from this life, banished diseases and restored strength, who will have the hardened heart to suppose that the Church, which is the body of Christ, does not perform works the same by the sacred ashes, the bones, and other relics of the saints? This is the lesson we have to learn from that dead body which, having been accidentally let down into the sepulchre of Eliseus, came to life when it was lifted out of the tomb, and even—"it instantly came to life" (4 Kings, xii, 21, and cf. Ecles., xviii, 14). We may add that this miracle as well as the veneration shown to the bones of Moses (See Ex., xix, 19 and Jos., xxiv, 32) only gain additional force from their apparent contradiction to the ceremonial laws against defilement, of which we read in Num., xix, 11-22. The influence of this Jewish shrinking from contact with the dead so far lingered on that it was found necessary in the "Apostolical Constitutions" (vi, 30) to issue a strong warning against it and to argue in favour of the Christian cult of relics.

According to the more common opinion of theologians, relics are to be honoured.—St. Thomas, in Summa, III, Q. xxxviii, a. 6, does not seem to consider even the word odore inappropriate—cultus relincia, that is to say with a veneration which is not that of latrina (divine worship) and which though directed primarily to the material objects of the cult—i.e., the bones, ashes, garments, etc.—does not rest in them, but looks beyond to the saints they commemorate. Christ's body, the scatterers of the seed, the eucharist, and other non-Catholic writers have striven to show that the utterances of the Council of Trent
are in contradiction to what they admit to be the "very cautious" language of the medieval Scholastics, and notably St. Thomas. The latter urges that those who have an affection to any person hold in honour all that was intimately connected with him. Hence, while we love and venerate the ash around the ear to the burial place of bones that belonged to them, and particularly their bodies, which were once the temples of the Holy Spirit, and which are some day to be conformed to the glorious body of Jesus Christ. "Whence also", adds St. Thomas, "God fittingly does honour to such relics by performing miracles in their presence" (its coronatio praesentia). It will be seen that this closely accords with the terms used by the Council of Trent and that the difference consists only in this, that the Council says per quae—"through which many benefits are bestowed on mankind"—while St. Thomas speaks of miracles worked "in their presence". But it is quite unnecessary to attach to the words per quae the idea of physical causality. We have no reason to suppose that the Council meant more than that the relics of the saints were the occasion of God's working miracles. The form of the Apo., xix, 1, 12, "And God wrought by the hand of Paul more than common miracles. So that even there were brought from his body to the sick, handkerchiefs and aprons, and the diseases departed from them" (made, of course, by faith) it would be an inexactitude in saying that there were the things by which (per quae) God wrought the cure.

There is nothing, therefore, in Catholic teaching to justify the statement that the Church encourages belief in a magical virtue, or physical curative efficacy residing in the relic itself. It may be admitted that St. Cyril of Jerusalem (A.D. 347), and a few other patristic and medieval writers, apparently speak of some power inherent in the relic. For example, St. Cyril, after referring to the miracle wrought by the body of Eliusus, declares that the restoration to life of the corpse with which it was in contact took place "to show that even though the soul is not present a virtue resides in the body of the saints, because of the righteous soul which has for so many years tenanted it and used it as its minister". And he adds, "Let us not be foolishly incredulous as though the thing had not happened, for if handkerchiefs and aprons which are from without, touching the body of the dead, are powerful in so great a matter as such, should the body itself of the Prophet raise the dead?" (Cat., xxvii, 16). But this seems rather to belong to the personal view or manner of speech of St. Cyril. He regards the chasms after its consecration "as no longer simple ointment but the gift of Christ, and in the presence of His Godhead it causes the Holy Ghost" (Cat., xxi, 3); and, what is more striking, he also declares that the meats consecrated to idols, "though in their own nature plain and simple, become profane by the invocation of the evil spirit" (Cat., xix). All of which must be doubtful as to his real belief in any physical virtue inherent in relics. Be this as it may, it is certain that the Church, with regard to the veneration of relics, has defined nothing more than what was stated above. Neither has the Church ever pronounced that any particular relic, not even that commonly venerated as the wood of the Cross, is authentic; but she approves of honour being paid to those relics which with reasonable probability are believed to be genuine, and which are invested with due ecclesiastical sanctions.

II. Early History.—Few points of faith can be more satisfactorily traced back to the earliest ages of Christianity than the veneration of relics. The classical instance is to be found in the letter written by the inhabitants of Smyrna, about 156, describing the death of St. Polycarp. After he had been burnt at the stake, we are told that his faithful disciples wished to carry off his remains, but the Jews urged the Roman officer to refuse his consent for fear that the Christians "would only abandon the Crucified One and begin to worship this man". Eventually, however, as the venerable body was retrieved, and the bones, which are more valuable than precious stones and finer than refined gold, and laid them in a suitable place, where the Lord will permit us to gather ourselves together, as we are able, in gladness and joy, and to celebrate the birthday of his martyrdom, 

There is a certain number of similar passages found a little later in the patristic writers of both East and West. Harnack's tone in referring to this development is that of an unwilling witness overwhelmed by evidence which it is useless to resist. "Most offensive", he writes, "was the worship of relics. It flourished to its greatest extent as early as the fourth century and no Church doctor of repute restricted it. All of them rather, even the Cappodocians, countenanced it. The numerous miracles which were wrought by bones and relics seemed to act upon their minds. The Church, therefore, would not give up the practice, although a violent attack was made upon it by a few cultured heathens and besides by the Manichaeans" (Harnack, "Hist. of Dog.`", tr., IV, 313).

From the Cappadocians there was no extravagance or abuse in this cult as it was recommended, and indeed taken for granted, by writers like St. Augustine, St. Ambrose, St. Jerome, St. Gregory of Nyssa, St. Chrysostom, St. Gregory Nazianzen, and by all the other great doctors without exception. To give detailed references besides those already cited from the Roman Catechism would be superfluous. Suffice it to point out that the inferior and relative nature of the honour due to relics was always kept in view. Thus St. Jerome says ("Ad Riparium", i. P. L. XXII, 907): "We do not worship, we do not adore [non colimus, non adoramus], for fear that we should bow down to the creature rather than to the Creator, but we venerate [honoramus] the relics of the martyrs in order the better to adore Him whose martyrs they are." And St. Cyril of Alexandria writes ("Adv. Julian.", vi, P. G., LXVII, 812): "We by no means consider the holy martyrs to be gods, nor are we wont to bow down before them adoringly, but only relatively and reverently as the holy corpse. As far as the words of the Gospel are concerned, no single writing supplies a more striking illustration of the importance attached to the veneration of relics in the Christian practice of the fourth century than the panegyric of the martyr St. Theodore by St. Gregory of Nyssa (P. G., XLVI, 765-48). Contrasting the horror produced by an ordinary corpse with the veneration paid to the body of a saint, the preacher expatiates upon the adornment lavished upon the building which had been erected over the martyr's resting place, and he describes how the worshipper is led to approach the tomb "believing that to touch it is itself a sanctification and a blessing, and if it be permitted to carry off any of the dust which has settled upon the martyr's resting place, the dust is accounted as a great gift and the mould as a precious treasure. And as touching the relics themselves, if that should ever be our happiness, only those who have experienced it and who have had their wish gratified can know how much this is desirable and how worthy a recompense it is of aspiring prayer" (col. 740).

This passage, like many others that might be quoted, dwells rather upon the sanctity of the martyr's resting place and upon that of his mortal remains collected as a whole and honourably entombed. Neither is it quite easy to determine the period at which the practice of venerating minute fragments of
bone or cloth, small parcels of dust, etc., first became common. We can only say that it was widespread early in the fourteenth century, and that dated inscription- stones...art of stone, with graffito inscriptions, afford evidence upon the point which is quite conclusive. One such, found of late years in Northern Africa and now preserved in the Christian Museum of the Louvre, bears a list of relics probably once cemented into a shallow circular cavity excavated in its surface. Omitting one or two words not adequately explained, the inscription runs: "A holy memorial [memoria sanc' a] of the wood of the Cross, of the land of Promise where Christ was born, the Apostles Peter and Paul, the names of the martyrs...of Carthage, of Donatus, of Cæcilia, of St. Victor, of St. Jerome, of Constantina, of St. Gregory the Great, of St. Augustine, and of St. Gregory the Great. It is certain that the immediate connection of the nature of a relic, such as this important letter reveals, had gradually grown up. Already when Eusebius wrote (c. 325) such objects as the chair of St. James or the oil multiplied by Bishop Narcissus (Hist. Eccl., VII, 235) and St. Irenæus (Adv. Haer., III, v) were clearly venerated as symbols of the gospel. The mention of the catechumens in his "De Civit. Dei" (xxii, 8), gives numerous instances of miracles wrought by soil from the Holy Land, flowers which had touched a reliquary or had been laid upon a particular altar, oil from the lamps of the church of a martyr, or by other things not less remotely connected with the saints themselves. Further, it is noteworthy that the Roman prejudice against translating and dividing seems only to have applied to the actual bodies of the martyrs reposing in their tombs in the catacombs of St. Peter and St. Paul, while the tombs enriched a little cross, destined to hang round the neck as an encolpion, with filigrees both from St. Peter's chains and from the gridiron of St. Laurence ("Epist." Mon. Germ. Hist., I, 192). Before the year 350, St. Cyril of Jerusalem three times over informs us that the fragments of the flesh of the blessed Helen had been distributed piecemeal and had filled the whole world (Cat., iv, 10; x, 19; xii, 4). This implies that Western pilgrims felt no more impropriety in receiving than the Eastern bishops in giving.

During the Merovingian and Carolingian period the cult of relics increased rather than diminished. Gregory of Tours abounds in stories of the marvelous wrought by them, as well as of the practices used in their honour, some of which have been thought to be analogous to those of the pagan "incubations" (De Glor. Conf., xx); neither does he omit to mention the frauds occasionally perpetrated by scoundrels through motives of greed. Very significant, as Hauck (Kirchengesch. Deutschl., I, 185) has noticed, is the prolongation to the text of the Salic Laws, probably written by a contemporary of Gregory of Tours in the sixth century. "That nation," it says, "which has undoubtedly in battle shaken off the hard yoke of the Romans, now that it has been illuminated through Baptism, has assumed the bodies of the holy martyrs with gold and precious stones, and the bodies which the Romans burnt with fire, and pierced with the sword, or threw to wild beasts to be torn to pieces." In England we find from the first a strong tradition in the same sense derived from St. Gregory himself. Bede records (Hist. Eccl., II, 34) how the pope "forwarded to Augustine all the things needful for the worship and service of the church, namely, sacred vessels, altar linen, church ornaments, priestly and clerical vestments, relics of the holy Apostles and martyrs and also by many books." The Penitential ascribed to St. Theodore, Archbishop of Canterbury, which certainly was known in England as an early date, declares that "the relics of the saints are to be venerated," and it adds, seemingly in connexion with the same idea, that "if possible a candle is to burn there every day" (Haddan and Stubbs, "Councils", III, 191). When we remember the candles which King Alfred constantly kept burning before his relics, the authenticity of this clause in Theodore's Penitential seems the more probable. Again the relics of English saints, for example those of St. Guthbert and St. Oswald, soon became famous, while in the case of the latter we hear of them all over the continent. Mr. Plummer..."Epist. gen." I, 873) a box containing portions of silk or cloth, known as brandea, and these brandea, after lying for a time in contact with the remains of the holy Apostles or martyrs, were to be sent to St. Gregory further offers to send Constantina some fillets from St. Peter's chains, a form of present of which we find frequent mention in his correspondence (St. Gregory, "Epist.," Mon. Germ. Hist., I, 264-66).
RELIQUARY IN THE FORM OF A DIPTYCH, FRENCH OR ITALIAN, XIV CENTURY

SILVER REPÓUSE AND GILT. OPENS LIKE A BOOK AND IS COVERED ON THE OUTSIDE WITH RED VELVET EMBROIDERED IN GOLD. THE CENTRAL PLATE OF EACH PANEL OPEN ON OTHERS. THE BODY OF THE CRUCIFIED, IN THE CENTRAL PLATE ON THE LEFT, COVERS A RELIC OF THE TRUE CROSS;

UNDER THE MISEN CHRIST ON THE RIGHT ARE RELICS OF THE HOLY INNOCENTS AND ST. SEBASTIAN, AND OTHER RELICS
RELIICS

(Bede, II, 120—81) has made a short list of them and shows that they must have been transported into the remotest part of Germany. After the Second Council of Nicaea, in 787, had insisted with special urgency that relics were to be used in the consecration of churches, and that the omission was to be supplied if any church had been consecrated without them, the Church of weighty enemies. Accordingly Cassiodorus commanded that relics were to be used, and in default of them the Blessed Eucharist. But the developments of the veneration of relics in the Middle Ages were far too vast to be pursued further. Not a few of the most famous of the early Christian churches are connected with the same matter. It must suffice to mention the famous Cenomanni inscription at Cologne, recording the translation of the remains of the so-called Eleven Thousand Virgins (see Kraus, "Inscr. d. Rheinlande," no. 294, and, for a discussion of the legend, the admirable essay on the subject by Cardinal Wiseman).

III. ABUSUS.—Naturally it was impossible for popular enthusiasm to be roused to so high a pitch in a matter which easily lent itself to error, fraud, and abuse, not only by one of them designed as an occurrence of many grave abuses. As early as the end of the fourth century, St. Augustine, denouncing certain impostors wandering about in the habit of monks, describes them as making profit by the sale of such shrines as had been set up (see St. Isidore, "De div. off.," i, 16). In the Theodosian Code the sale of relics is forbidden ("Nemo martyrum mercedur," VII, ix, 17), but numerous stories, of which it would be easy to collect a long series, beginning with the writings of St. Gregory the Great and St. Gregory of Tours, prove to us that many unprincipled persons found a means of enriching themselves by a sort of trade in these objects of devotion, the majority of which no doubt were fraudulent. At the beginning of the ninth century, as M. Jean Guiraud has shown (Mélanges G. B. de Rossi, 73—95), the exportation of the bodies of martyrs from Rome had assumed the dimensions of a regular commerce, and a certain deacon, Deudons, acquired an unwarrantable notoriety in these transactions (see Mon. Germ. Hist. : Script. XV, passim). What was perhaps in the long run hardly less disastrous than fraud or avarice was the keen rivalry between religious centres, and the eager credulity fostered by the desire to be known as the possessors of some uncertain relic. We learn from Cassian, in the fifth century, that there were monks who sought upon certain martyrs' bodies by force of arms, defying the authority of the bishops, and this was a story which we find many times repeated in the Western chronicles of a later date.

In such an atmosphere of lawlessness doubtful relics came to abound. There was always a disposition to regard any human remains accidentally discovered near a church or in the catacombs as the body of a martyr. Hence, though men like St. Ambrose and St. Jerome (4th and 5th centuries) set a good example of caution in such cases, it is to be feared that in the majority of instances only a very narrow interval of time intervened between the suggestion that a particular object might be, or ought to be, an important relic, and the conviction that tradition attested it actually to be such. There is no reason in most cases for supposing the existence of deliberate fraud. The persuasion that a benevolent Providence was likely to send the most precious "pignora sanctorum" to deserving clients, the practice already noted in the Church of St. Peter which had touched the shrine as attached to the contents of the shrine itself, the custom of making facsimiles and imitations, a custom which persists to our own day in the replicas of the Vatican statuette of St. Peter or of the Grotto of Lourdes—all these causes adequate to account for the multitude of unquestionably spurious relics with which the treasures of great medieval churches were crowded. In the case of the Nails with which Jesus Christ was crucified, we can point to definite instances in which that which was at first venerated as having touched the original nail came later to be honoured as the original itself. Join to this the large hordes of occasional unscrupulous rogue in an age not only utterly uncritical but often curiously morbid in its realism, and it becomes easy to understand the multiplicity and extravagance of the entries in the relic inventories of Rome and other ancient centres.

On the other hand it must not be supposed that nothing was done by ecclesiastical authority to secure the faithful against deception. Such tests were applied as the historical and antiquarian science of that day was capable of devising. Very often, however, this test took the form of an appeal to some miraculous sanction, as in the well-known story repeated by St. Ambrose, according to which, when doubt arose which of the three crosses discovered by St. Helena was that of Christ, the healing of a sick man opposed to all further efforts of the impostors. Similarly Egbert, Bishop of Trier, in 797, doubting as to the authenticity of what purported to be the body of St. Celsus, "test any suspicion of the sanctity of the holy relics should arise, during Mass, after the third hour, a piece of the body of St. Celsus wrapped in a cloth into a thurible full of burning coals, which remained unburnt and untouched by the fire the whole time of the Canon" (Mabillon, "Acta SS. Ord. Ben.", III, 658). The decrees of synods upon this subject are generally practical and sensible, as when, for example, Bishop Quivil of Exeter, in 1287, after recalling the prohibition of the General Council of Lyons against venerating recently-found relics unless they were first of all approved by the Roman Pontiff, adds: "We command the above prohibition to be carefully observed by all, and decree that no person shall expose relics for sale, and that neither stones, nor fountains, trees, wood, or garments shall in any way be venerated on account of dreams or on fictitious grounds." So, again, the whole procedure before Clement VII (the Antipope) in 1536, recently brought to light by Canon Chevalier, in connexion with the alleged Holy Shroud of Lirey, proves that some check at least was exercised upon the excesses of the unscrupulous or the mercenary. Nevertheless it remained true that many of the most ancient relics duly exhibited for veneration in the great sanctuaries of Christendom or even at Rome itself must now be pronounced to be either certainly spurious or open to grave suspicion.

To take one example of the latter class, the boards of the Crib (Prezeppe)—a name which for much more than a thousand years has been associated, as now, with the basilicas of Santa Maria Maggiore—can only be considered to be of doubtful authenticity. In his monograph "Le memorie Liberiane dell' Infanzia di N. Gesù Cristo," (Rome, 1894), Marin Zanfrini frankly avows that all positive evidence for the authenticity of the relics of the Crib etc., is wanting before the eleventh century. Strangely enough, an inscription in Greek uncials of the eighth century is found on one of the boards, the inscription having nothing to do with the Crib but being apparently concerned with some commercial transaction. It is hard to explain its presence on the supposition that the relic is authentic. Similar difficulties might be urged against the supposed "column of the flagellation" venerated in the Church of S. Prasede (see "Dublin Review," Jan., 1905, 115) and against many other famous relics.

Still, it would be presumptuous in such cases to blame the action of ecclesiastical authority in permitting the continuance of a cult which extends back
into remote antiquity. On the one hand no one is constrained to pay homage to the relic, and supposing it to be in fact spurious, no dishonesty is done to God by the continuance of an error which has been habitually maintained and has passed into common belief. On the other hand the practical difficulty of pronouncing a final verdict upon the authenticity of these and similar relics must be patent to all. Each investigation would be an affair of much time and expense, while new discoveries might at any moment reverse the conclusions arrived at. Further, devotions of ancient date deeply rooted in the heart of the peasantry cannot be swept away without some measure of scandal and popular disturbance. To create this sensation seems unwise unless the proof of spuriousness is so overwhelming as to amount to certainty. Hence there is justification for the practice of the Holy See in allowing the cult of certain doubtful ancient relics to continue. Meanwhile, much has been done by quietly allowing many items in some of the most famous collections of relics to drop out of sight or by gradually omitting much of the solemnity which formerly surrounded the exhibition of these doubtful treasures. Many of the inventories of the great collections of Rome, or of Aachen, Cologne, Naples, Salerno, and other towns and churches in France, Italy, and the Sainte Chapelle at Paris etc., have been published. For illustration’s sake reference may be made to the Count de Riant’s work “Exuviae Constantinopolitanæ” or to the many documents printed by Mgr Barbier de Montault regarding Rome, particularly in vol. VII of his “Œuvres complètes”. In most of these ancient inventories, the extravagance and utter improbability of many of the entries can not escape the most un-critical. Moreover, though some sort of verification seems often to be traceable even in Merovingian times, still the so-called authentications which have been printed of this early date (seventh century) are of a most primitive kind. They consist in fact of mere labels, strips of parchment with just the name of the relic to which each strip was attached, barbarously written in Latin. For example “Hic sunt reliquias sancti Victuriepiscopi, Festivitate Kalendis Septembris”, “Hic sunt patrocinia sancti Petri et Pauli Romae civi”, etc. (See Delisle, “Mélanges de l’école française de Rome,” IV, 1-8.) Doubly true today is that in no part of the world was the veneration of relics carried to greater lengths, with no doubt proportionate danger of abuse, than among Celtic peoples. The honour paid to the handballs of such saints as St. Patrick, St. Columba, &c., was a rage adventuring sacred remains carried about with them in their wanderings by the Armorican people under stress of invasion by Teutons and Northmen, the prominence given to the taking of oaths upon relics in the various Welsh codes founded upon the laws of Howell the Good, the expectation of gaining possession of these treasures, and the numerous accounts of translations and miracles, all help to illustrate the importance of this aspect of the ecclesiastical life of the Celtic races.

IV. TRANSLATIONS.—At the same time the solemnity attached to translations was by no means a peculiarity of the Celts. The story of the translation of St. Cuthbert’s remains is almost as marvelous as any in Celtic hagiography. The forms observed of all-night vigils, and the carrying of the precious remains in caskets of gold or silver, the shadowed with silk canopies and surrounded with lights and incense, extended to every part of Christendom during the Middle Ages. Indeed this kind of solemn translation (elevatio corporis) was treated as one of the most important recognitions, the equivalent of canonization, in the period before the Holy See reserved to itself the passing of a final judgment upon the merits of deceased servants of God, and on the other hand in the earlier forms of Canonization Bulls it was customary to add a clause directing that the remains of those whose sanctity was thus commemorated be properly venerated in their churches, “elevated”, or translated, to some shrine above ground where fitting honour could be paid them.

This was not always carried at once. Thus St. Hugh of Lincoln, who died in 1200, was canonized in 1221, but it was not until 1238 that his remains were translated to the beautiful “Angel Choir” which had been constructed expressly to receive them. This translation is noteworthy not only because King Edward I himself helped to carry the bier, but because it provides a typical example of the separation of the head and body of the saint, which was a peculiar feature of so many English translations. The earliest example of this separation was probably that of St. Edwin, king and martyr; but we have also the cases of St. Oswald, St. Chad, St. Richard of Chichester (translated in 1276), and St. William of York (translated 1284). It is probable that the ceremonial observed in these solemn translations closely imitated that used in the enshrining of the relics in the sepulcrum of the altar at the consecration of a church, since the two words have nothing but the development of the primitive burial service, the martyr or saint being laid to rest in the church dedicated to his honour. But the carrying of relics is not peculiar to the procession which takes place at the dedication of a church. Their presence is recognized as a fitting adjunct to the solemnities of almost every kind of procession, except perhaps those of the Blessed Sacrament, and in medieval times no exception was made even for these latter.

IV. FEAST OF RELICS.—It has long been customary, especially in churches which possessed large collections of relics, to keep one general feast in commemoration of all the saints whose memorials are there preserved. An Office and Mass for this purpose will be found in the Roman Missal and Breviary, and though they occur only in the supplement Pro alqualbus locis and are not obligatory upon the Church at large, still this celebration is now kept almost universally. The office is generally assigned to the fourth Sunday in October. In England before the Reformation, as we may learn from the fabric of the Sarum Missal, themnus quinquies was celebrated on Sunday after the feast of the Translation of St. Thomas of Canterbury (7 July), and it was to be kept as a greater double “wherever relics are preserved or where the custom is usual” by each New Church and her ministers observe no solemnities in their honour, the glory they enjoy with God is known to Him alone!”

SCHLIERER in Real-Encyclopédie d. christ Allteiteren (Freiburg, 1886); BARRIERE de MONTAULT, Oeuvres, VIII (Paris, 1869), 129-309; BEINSEL, Verzeichn. der Heiligen und ihrer Reliquien in Deutschland (2 vols., Frankfort on Main, 1885-86); BECHT, Einführung in die vor- und nachreformatorischen Heiligen- und Reliquienwissenschaft (Freiburg, 1907); MION, Il culto delle reliquie (Turin, 1908); BUNNELL, The Discovery of the True Cross XIV, De sepulcrum Evangelii, in : Theological Studies, IV, Pt. 2; PRIESTER, Der Reliquienkult im Alltäg. (Leipzig, 1898); SCHEIDMARX in Dic. Christ. Ankl. To give indications of the many monographs which have been devoted to particular relics, such as the Holy Shroud of Turin, the Holy Cost of Trier, the relic of the Passion, the Chemins de la Vierge etc., would be impossible here.

HERBERT THURSTON.

Religion.—I. Derivation, Analysis, and Definition.—The derivation of the word “religion” has been a matter of dispute from ancient times. Not even to-day is it a closed question. Cicero, in his De natura deorum, xxvii, derives it from religere (literally “fear”), carefully: “Those who carefully took in hand all things pertaining to the gods were called religiosi, from religere.” Max Muller favoured
this view. But as religion is an elementary notion, long antedating the time of complicated ritual presupposed in this explanation, we must seek elsewhere for its etymology. A far more likely derivation, one that is found in the religious sentiment and language of classic antiquity, is that given by Lactantius, in his "Divine Institutes," IV, xxviii. He derives religion from religare (to bind): "We are tied to God and bound to Him [reditus] by the bond of piety, and it is from this, and not, as Cicero holds, from careful consideration [relegendo], that religion has received its name." The objection that religio could not be derived from religare, a verb of the first conjugation, is not of great weight, when we call to mind that opinio comes from opinis and religio from re bellare. St. Augustine, in his "City of God," X, iii, derives religio from religere in the sense of recovering: "having lost God through neglect [negligentes], we recover Him [religentes] and are drawn to Him." This explanation, implying the notion of the Redemption, is not suited to the primary idea of religion. St. Augustine himself was not satisfied with it, for in his "Retractions," I, xiii, he abandoned it in favour of the derivation given by Lactantius. He employs the latter meaning in his treatise "On the True Religion," where he says: "Religion binds man to God and makes him His slave." St. Thomas, in his "Summa," II-II, Q. lxxi, a. 1, gives all three derivations without pronouncing in favour of any. The correct one seems to be that offered by Lactantius. Religion in its simplest form implies the notion of being bound to God; the same notion is uppermost in the word religion in its most specific sense, as applied to the life of poverty, chastity, and obedience, to which individuals voluntarily bind themselves by vows more or less solemn. Hence those who are thus bound are known as religious.

Religion, broadly speaking, means the voluntary subjection of oneself to God. It exists in its highest perfection in heaven, where the angels and saints love, praise, and adore God, and live in absolute conformity to His holy will. It does not exist at all in hell, where the subordination of rational creatures to their Creator is one not of free will, but of physical necessity. On earth it is practically coextensive with the human race, though, where it has not been elevated to the supernatural plane through Divine revelation, it labours under serious defects. It is with religion, as with true God worship, that the article deals. The analysis of the idea of religion shows that it is very complex, and rests on several fundamental conceptions. It implies first of all the recognition of a Divine personality in and behind the forces of nature, the Lord and Ruler of the world, the God. In the lower religions, this supernatural Being is conceived as a spirit, one and indivisible, everywhere present in nature, but distinct from it. In the lower religions, the various phenomena of nature are associated with a number of distinct personalities, though it is rare that among the numerous nature-deities one is not honoured as supreme. Ethical qualities, corresponding to the prevailing ethical standards, are attributed by the different peoples to their respective deities.

In every form of religion is implied the conviction that the mysterious, supernatural Being (or beings) has control over the lives and destinies of men. Especially in lower grades of culture, where the nature and utilization of physical laws is but feebly understood, man feels in many ways his helplessness in the presence of the forces of nature: to Him is the Supreme Being that controls them; He is it that can direct them for man's weal or woe. There thus arises in the natural order a sense of dependence on the Deity, a deeply felt need of Divine help. This lies at the basis of religion in the sovereign power of God on God that constitutes the very essence of religion, indispensable as it is. The damned recognize their dependence on God, but, being without hope of Divine help, are turned from, rather than towards, Him. Coupled with the sense of need is the persuasion on the part of man that he can bring himself into friendly, beneficent, beneficent communion with the Deity or deities on whom he feels he depends. He is a creature of hope. Feeling his helplessness and need of Divine assistance, pressed down, perhaps, by sickness, loss, and defeat, recognizing that in friendly communion with the Deity he can find aid, peace, and happiness, he is led voluntarily to perform certain acts of homage meant to bring about this desired result. What man aims at in religion is communion with the Deity, in which he hopes to attain his happiness and perfection. This perfection is but crudely conceived in lower religions. Conformity to the recognized moral standard, which is generally low, is not wholly neglected, but it is less an object of solicitude than material welfare. The sum of happiness looked for is prosperity in the present life and a continuation of the same bodily comforts in the life to come. In the higher religions, the perfection sought in religion becomes more intimately associated with moral goodness. In Christianity, the highest of religions, communion with God implies spiritual perfection of the highest possible kind, the participation in the supernatural grace of the children of God. The spiritual perfection, bringing with it perfect happiness, is realized in part at least in the present life of pain and disappointment, but is to be found fully attained in the life to come.

The desire of happiness and perfection is not the only motive that prompts man to do homage to God. In the higher religions there is also the sense of duty arising from the recognition of God's sovereignty, and consequently of His strict right to the subjection and worship of man. To this must also be added the love of God for His own sake, inasmuch as He is the infinitely perfect Being, in whom truth, beauty, and goodness are realized in their highest possible degree. While the prevailing motive in all lower religions is one of self-interest, the desire of happiness, it generally implies to some extent an affectionate as well as reverent attitude towards the deities that are the object of worship.

From what has been said it is plain that the concept of deity required for religion is that of a free personality. The error of mistaking many nature-deities for the one true God was one of the most frequent blunders of religion. But religion ceases to exist where, as in Pantheism, the deity is pronounced to be devoid of all consciousness. A deity without personality is no more capable of awakening the sense of religion in the heart of man than is the all-prevading ether or the universal law of gravitation. Religion, therefore, is essentially a relation, the relation of the subject and creature, man, to his Lord and Creator, God. Religion may thus be defined as the voluntary subjection of oneself to God, that is to the free, supernatural Being (or beings) on whom man is conscious of being dependent, of whose powerful help he feels the need, and in whom he recognizes the source of his perfection and happiness. It is a voluntary turning to God. In the last analysis it is an act of the will. In other words it is a virtue, since it is an act of the will incumbent on the subject to maintain the right order, springing from his dependence on God. Hence St. Thomas (II-II, Q. lxxx, a. 1) defines religion as "virtus per quam homines Deo debitem cultum et reverentiam exibent" (the virtue which prompts man to render to God the worship and reverence that is His by right of nature: it is the Divine Being that controls them; He is it that can direct them for man's weal or woe. There thus arises in the natural order a sense of dependence on the Deity, a deeply felt need of Divine help. This lies at the basis of religion in the sovereign power of God on God that constitutes the very essence of religion, indispensable as it is. The damned recognize their dependence on God, but, being without hope of Divine help, are turned from, rather than towards, Him. Coupled with the sense of need is the persuasion on the part of man that he can bring himself into friendly, beneficent, beneficent communion with the Deity or deities on whom he feels he depends. He is a creature of hope. Feeling his helplessness and need of Divine assistance, pressed down, perhaps, by sickness, loss, and defeat, recognizing that in friendly communion with the Deity he can find aid, peace, and happiness, he is led voluntarily to perform certain acts of homage meant to bring about this desired result. What man aims at in religion is communion with the Deity, in which he hopes to attain his happiness and perfection. This perfection is but crudely conceived in lower religions. Conformity to the recognized moral standard, which is generally low, is not wholly neglected, but it is less an object of solicitude than material welfare. The sum of happiness looked for is prosperity in the present life and a continuation of the same bodily comforts in the life to come. In the higher religions, the perfection sought in religion becomes more intimately associated with moral goodness. In Christianity, the highest of religions, communion with God implies spiritual perfection of the highest possible kind, the participation in the supernatural grace of the children of God. The spiritual perfection, bringing with it perfect happiness, is realized in part at least in the present life of pain and disappointment, but is to be found fully attained in the life to come. The desire of happiness and perfection is not the only motive that prompts man to do homage to God. In the higher religions there is also the sense of duty arising from the recognition of God's sovereignty, and consequently of His strict right to the subjection and worship of man. To this must also be added the love of God for His own sake, inasmuch as He is the infinitely perfect Being, in whom truth, beauty, and goodness are realized in their highest possible degree. While the prevailing motive in all lower religions is one of self-interest, the desire of happiness, it generally implies to some extent an affectionate as well as reverent attitude towards the deities that are the object of worship.

From what has been said it is plain that the concept of deity required for religion is that of a free personality. The error of mistaking many nature-deities for the one true God was one of the most frequent blunders of religion. But religion ceases to exist where, as in Pantheism, the deity is pronounced to be devoid of all consciousness. A deity without personality is no more capable of awakening the sense of religion in the heart of man than is the all-prevading ether or the universal law of gravitation. Religion, therefore, is essentially a relation, the relation of the subject and creature, man, to his Lord and Creator, God. Religion may thus be defined as the voluntary subjection of oneself to God, that is to the free, supernatural Being (or beings) on whom man is conscious of being dependent, of whose powerful help he feels the need, and in whom he recognizes the source of his perfection and happiness. It is a voluntary turning to God. In the last analysis it is an act of the will. In other words it is a virtue, since it is an act of the will incumbent on the subject to maintain the right order, springing from his dependence on God. Hence St. Thomas (II-II, Q. lxxx, a. 1) defines religion as "virtus per quam homines Deo debitem cultum et reverentiam exibent" (the virtue which prompts man to render to God the worship and reverence that is His by right of nature: it is the Divine Being that controls them; He is it that can direct them for man's weal or woe. There thus arises in the natural order a sense of dependence on the Deity, a deeply felt need of Divine help. This lies at the basis of religion in the sovereign power of God on God that constitutes the very essence of religion, indispensable as it is. The damned recognize their
through personal effort independently of Divine aid, seems to be an exception. But even in primitive Buddhism communion with the gods of India was retained as an element of lay belief and aspiration, and it was only by substituting the ideal of Divine communion that of Nirvana that Buddhism became a popular religion.

Thus, in its strictest sense, religion on its subjective side is the disposition to acknowledge our dependence on God, and on the objective side it is the voluntary acknowledgement of that dependence through acts of homage. It is not simply the will, but the intellect, the imagination, and the emotions. Without the conception of personal deity, religion would not exist. The recognition of the unseen world stirs the imagination. The emotions, too, are called into exercise. The need of Divine help gives rise to the longing for communion with God. The recognized possibility of attaining this end engenders hope. The consciousness of acquired friendship with a protector so good and powerful excites joy. The obtaining of benefits in action in return for coöperating in such knowledge makes the immensity of God's power and wisdom calls up feelings of awe. The consciousness of having offended and estranged Him, and of thus deserving punishment, leads to fear and sorrow and the desire of reparation. Crowing all this is the emotion of gratitude springing from the contemplation of God's wonderful goodness and excellence. Hence we see how wide of the mark are the attempts to limit religion to the exercise of a particular faculty, or to identify it with ritual or with ethical conduct. Religion is not adequately described as "the knowledge acquired by the finite spirit of its essence as absolute spirit" (Hegel), nor as "the perception of the infinite" (Max Müller), nor as "a determination of man's feeling of absolute dependence" (Schleiermacher), nor as "the recognition of all divine command" (Kant), nor as "morality touched by emotion" (Mathew Arnold), nor as "the earnest direction of the emotions and desires towards an ideal object recognized as of the highest excellence and as rightly paramount over selfish objects of desire" (J. S. Mill). These definitions, in so far as they are true, are only partial characterizations of religion.

Religion answers to a deeply felt need in the heart of man. Above the needs of the individual are the needs of the family, and higher still are the needs of the people. On the whole, religion depends that of the individual. Hence we find that religion in its outward worship is to a large extent a social function. The chief rites are public rites, performed in the name, and for the benefit, of the whole community. It is by social action that religious worship is maintained and preserved. Only in the society of one's fellow-men does one develop one's mental and moral faculties, and acquire religion. Religion is distinguished into natural and supernatural. By natural religion is meant the subject of oneself to God, being that of God and of man's moral and religious duties as the human mind can acquire by its own unaided powers. It does not, however, exclude theophanies and Divine revelations made with the view to confirm religion in the natural order. Supernatural religion implies a supernatural end, gratuitously bestowed on man, namely a lively union with God through sanctifying grace, begun and imperfectly attained here, but completed in heaven, where the beatific vision of God will be its eternal reward. It also implies a special Divine background to man, the Jehovah's special relationship to know this end as well as the Divinely appointed means for its attainment. Subjection of oneself to God, based on this knowledge of faith and kept fruitful by grace, is supernatural religion.

II. SUBJECTIVE RELIGION.—Religion on its subjective side is essentially, but not exclusively, an affair of the will, the will to acknowledge by acts of homage man's dependence on God. We have already seen that the imagination and the emotions are important factors in subjective religion. The emotions, elicited by the recognition of dependence on God and by the deepening of it, give greater efficacy to the deliberate exercise of the virtue of religion. It is worthy of note that the emotions awakened by the religious consciousness are such as make for a healthy optimism. The predominant tones of the emotion of joy, confidence, love, patience, humility, the pursuance of amendment, and aspiration towards high ideals. All these are the natural accompaniments of the persuasion that through religion man is living in friendly communion with God. The view that fear is in most instances the spring of religious action is untenable.

In subjective religion several virtues must be included, most of them being of an emotional character. The proper exercise of the virtue of religion involves the emotions as they have been based on the promise of an object, and hence known as the "theological virtues". First there is faith. Strictly speaking, faith as a virtue is the reverent disposition to submit the human mind to the Divine, to accept on Divine authority what has been revealed by God. In the wide sense, any thing evoking to the religious man a belief in the rationality of the fundamental notions of Deity and of man's relation to Deity contained in the religious traditions of the community. In practically all religions there is an exercise of authoritative teaching in regard to the intellectual basis of religion, the things to be believed. These things individuals do not acquire independently, through direct intuition or discursive reasoning. They come to know them from the teaching of parents and elders, and from the observation of sacred rites and customs. They take these teachings on authority, made venerable by immemorial usage, so that to reject them would be reproached as an act of impiety. Thus, while man has the capacity to arrive at a knowledge of the fundamentals of religion by the independent exercise of his reason, he regularly comes to know them through the authoritative teaching of his elders. Faith of this kind is practically an indispensable basis of religion. In the supernatural order, faith is absolutely indispensable. If man has been raised to the supernatural plane, it is necessarily that he can come to know that end and the Divinely appointed means for its attainment. Such a revelation necessarily implies faith. For the exercise of the virtue of religion hope is absolutely indispensable. Hope is the expectation of securing and maintaining the bringing communion with the Deity. In the natural order it rests on the conception of Deity as a morally good personality, inviting confidence. It is also sustained by the recognized instances of Divine providence. In the Christian religion hope is raised of the supernatural plane, on such knowledge of God made known through the revelation of Christ. The absence of hope paralyzes the virtue of religion. For this reason the damned are no longer capable of religion. Thirdly, the love of God for His own sake is a concomitant of the virtue of religion, being needed for its perfection. In some lower forms of religion, it is largely, if not wholly, absent. The Deity is honoured chiefly for the sake of personal advantage. Still, perhaps the majority of religions, at least the beginnings of a filial affection for the Deity, which man felt. Such affection seems to be implied in generous offerings and in expressions of thankfulness so common in religious rites. Closely associated with the virtues of hope and love, and hence intimately connected with religion as exercised by man in his frailty, is the virtue of repentance.
With all his zeal for religion, man is constantly lapping into offenses against the Deity. These offenses are often for him voluntary, present themselves as obstacles more or less fatal to the bliss-bringing communion with the Deity which is the end of religion. The fear of forfeiting the good will and help of the Deity, and of incurring His punishment, gives rise to regret, which in higher religions is made more meritorious by the sorrow felt for having offended so good a God. Hence the offender is prompted to acknowledge his fault and to seek reconciliation, so as to restore to its integrity the ruptured union of friendship with God.

The observance of religious义务 in the various religions, implies the acts of homage that are the effects of subjective religion, and also the various phenomena which are viewed as the manifestations of good will by the Deity. We may distinguish in objective religion a speculative and a practical part.

A. Speculative.—The speculative part embraces the intellectual basis of religion, those concepts of God and man, and of man's relation to God, which are the object of faith, whether natural or supernatural. Of vital importance to right religion are concepts of the Deity and of God, Divine providence and retribution, the immortality of the soul, free will, and moral responsibility. Hence the need is recognized of firmly establishing the grounds of theistic belief, and of referring the mystery of the world to the will of God. Polytheism vitiates religion, in so far as it confounds the one true God with a number of fictitious beings, and distributes among these the reverent service that belongs to God alone. Religion is absolutely quenched in Atheism, which tries to substitute for the personal Deity broad physical forces. Equally destructive is Pantheism, which views all things as emanations of an impersonal, unconscious world-ground. Agnosticism, in declaring that we have not sufficient grounds for asserting the existence of God, also makes religion impossible. Scarcely less fatal is Deism, which, putting God far from the visible world, denies Divine providence and the efficacy of prayer. Wherever religion has flourished, we find a deeply rooted belief in Divine providence. Free will—with its necessary implication, moral responsibility—is taken for granted in the creeds of most religions. It is only in grades of higher culture, where philosophic speculation has given occasion to the denial of free will, that this important truth is emphasized. Belief in the immortality of the soul is fundamental in most religions, although the nature of the soul and the character of the future life are in most religions crudely conceived. Divine retribution is also an element of religious belief throughout the world. One of the common errors founded in recent works on anthropology and the history of religions is that only in the higher religions is moral conduct found to rest on religious sanction. While the standard of right and wrong in lower religions is often grossly defective, allowing the existence of impure and cruel rites, it is nevertheless true that what is reproved as morally evil is very generally viewed as an offence against the Deity, entailing punishment in some form unless expiated. Many religions, even those of savage and barbarous tribes, distinguish between the fate of the good and that of the bad after death. The bad go to a place of suffering, or they perish utterly, or they are born in vile animal forms. Practically all give evidence of belief in retribution in the present life, as may be seen from the universal use of ordeals, oaths, and the widespread recourse to penitential rites in times of great distress.

These fundamental elements of belief have their legitimate place in the Christian religion, in which they are found corrected, supplemented, and completed by a larger knowledge of God and of His purposes in regard to man. God, having destined man for filial communion with Himself in the life of grace, has through the Incarnation and Redemption of Christ brought within the reach of man the truths and practices needed for the attainment of this end. Thus, in Christianity the things to be believed and the things to be done in order to obtain salvation have the guarantee of Divine authority. Right belief is thus essential to religion, if man is to do justice to his moral and religious duties and thereby secure his perfection. The popular cry of to-day for religion without dogma comes from the failure to recognize the supreme importance of right belief. The discovery of Christianity, supplementing and perfecting the intellectual basis of natural religion, are not to be looked on as a mere series of intellectual puzzles. They have a practical purpose. They serve to enlighten man on the whole range of his religious and ethical duties, on the proper fulfilment of which depends his supernatural perfection. Closely allied with the data of revelation are the attempts to determine their mutual relations, to explain them as far as possible in terms of sound science and philosophy, and to draw from them their legitimate bearings. One of the most fruitful fields of religious study has arisen the science of theology. Corresponding with this in function, but the very opposite of it in worth, is the mythology of pagan religions. Mythology is the product partly of the tendency to rationalize the world, partly of man's attempts to account for the origins of such factors in life as fire, disease, death, and to explain the succession of natural phenomena in an age of ignorance when a fanciful personification of nature's forces occupied the place of scientific knowledge. Hence arose the mythical stories of the gods both great and small, many of which in later generations gave scandal because of their absurdity and immorality. Mythology, being born of ignorance and unbridled fancy, has no legitimate place in sound religious belief.

B. Practical.—The practical part comprises (1) the acts of homage whereby man acknowledges God's dominion and seeks His help and friendship, and (2) the extraordinary religious experiences viewed by the worshipers as manifestations of Divine good will.

(1) The acts of homage may be distinguished into three classes: (a) the direct acts of worship; (b) the regulation of conduct outside the sphere of moral obligation; (c) the regulation of conduct within the recognized sphere of moral obligation.

(a) Acts of Worship. The acts of worship proper consist of those which directly express adoration, Thanksgiving, petition, and propitiation. In these are included acts of faith, hope, love, humility, and repentance. They take the external form of prayer and sacrifice. Prayer, as an outstanding act, is the verbal communication of man's thoughts and needs to God. In the lower religions petitions for earthly favours are the chief objects of prayer. Expressions of thanks, too, are not unknown. Besides these there are in the higher religions prayers of adoration, of petition for moral improvement, also penitential prayers. Sacrifice is equally common with prayer. Scholars are not all agreed as to the primary idea underlying the use of sacrifice. The most likely view is that sacrifice is primarily a token of respect in the form of a gift. It is often called a gift or offering, even in Holy Scriptures (cf. Gen., John). The act of sacrifice was a token of respect and good will. It is not a bribe, as some have objected, though it may degenerate into such. In like manner, man, from the earliest times, in doing homage to the Deity, came into His presence with a gift. Besides being a visible proof of man's respect,
the gift also signified that all things were God's. The giving over of the object to the Deity implied that it no longer belonged to the worshipper, but was in the possession of the Deity. Various cult objects were thus removed from ordinary use, it was passed over to the Deity by a total or partial destruction. Liquid offerings were poured out on the ground. Food offerings were generally burned. Others were cast into rivers or the sea. Very frequently, in the food offerings, only part was destroyed by fire, the rest being eaten by the worshippers. In this way was symbolized the friendly union of the Deity and the worshipping. In some cases the underlying idea was that man was the privileged guest at the Divine banquet, partaking of the food and drink consecrated to the Deity. This too had a quasi-sacramental significance. In the ancient Hebrew religion there were food offerings, including bloody sacrifices of animal victims. These were types of the great atoning sacrifice of Christ. In the Catholic religion, the sacrifice of Christ on the Cross is perpetuated by the unbloody sacrifice of the Mass, in which the eternal Lamb of God is offered under the appearance of bread and wine and is devoutly consumed by priest and faithful. The use of sacrifice has led to the office of priest. In the beginning, sacrifice was like prayer, the simplest kind, and was offered by the individual for his personal needs, by the head of the family or clan for its members collectively, and by the chief or king for the whole people.

With the growth of ceremonial prayers and rites, the office of sacrifice grew to the class of priests, whose duty it was to make the offerings in strict conformity with the complicated ritual. The institution of the office of priest is thus later than that of sacrifice. Sacrifices were first made under the open sky on raised earth or stone, which became altar. For the protection of permanent altars temples came to be built. The most solemn sacrifices were those offered in behalf of the people for the obtaining of public benefits. To accommodate the large concourse of worshippers, the temples were often built on a grand scale, surpassing in magnificence the palaces of the kings. From the earliest times religion was thus the great inspiring influence in the development of architecture and the decorative arts. The arts of sculpture and painting owe much to the religious use of images and pictures, which from time immemorial have been associated with worship. In the beginning, the invisible, intangible beings, man has generally made large use of the imagination, which, while it often misrepresents, serves to concretize and make real the things he recognizes but only vaguely grasps. This has led to the adorning of forms to represent the mysterious beings to whom man looks for aid. These forms are apt to be repulsive where the art of sculpture is rudimentary. In the higher nations of antiquity, the making of sacred images in wood, stone, and metal was carried to a high degree of perfection. Their use deteriorated into idolatry where Polytheism prevailed. The Christian religion has allowed the use of statues and paintings to represent the Incarnate Son of God, the saints, and angels, and these images are a legitimate aid to devotion, since the honour that is given them is but relative, being directed to them as the representatives of the Deity. It is like the relative honour given to the flag of the nation. The times and places of external worship deserve passing notice. In most religions we find certain days of the year set apart for the more solemn acts of worship. Such days are suggested by recurring phenomena of nature (the new and full moon, spring-time with its awakening vegetation, autumn with its ripened harvests, the two solstices); others commemorate historic events of great importance for the religious life of the people. Hence the widespread observance of religious festivals, when public sacrifices are offered with elaborate ritual and are accompanied with feasting and rest from ordinary business. In like manner certain places, made venerable by immemorial worship or by association with holy places, are consecrated as shrines and temples, and are thus to be singled out as the spots most suitable for public worship. Shrines and temples are built, to which a peculiar sanctity attaches, and annual pilgrimages are made to them from distant places.

The emotional element in external worship is a feature that cannot be overlooked. The solemn prayers and sacrifices to the Deity in behalf of the community are embellished with ritual acts expressive of the emotions brought into play in religious worship. The desire and hope of Divine help, joy at its possession, gratitude for it, is to temporary estrangement of the offended Deity—all these emotions quicken the acts of worship and find expression in chants, instrumental music, dances, processions, and stately ceremonial. These expressions of feeling are also powerful means of arousing feeling, and thus give an intense earnestness to religion. This emotional element enters into the external worship of every religion, but its extent and character vary considerably, being determined by the particular standard of propriety prevailing in a given grade of culture. Unenlightened peoples are more impulsive in expressing their emotions than are peoples of a high grade of culture. Hence the worship in lower religions is generally characterized by noisy, extravagant action and spectacular display. This is especially shown in their sacred dances, which are the most part violent, and from our point of view fantastic, but which are executed in a spirit of great earnestness. The early Hebrew religion, like most of the religions of antiquity, had its sacred dances. They are a popular feature of Islamism to-day. They have been wisely set aside in Christian worship, though in a very few places, as at Echternach in Luxemburg, and in the Seville cathedral, religious dancing gives a local colour to the celebration of certain festivals. Instrumental and vocal music is a most fitting framework for liturgical prayers and solemn sacrifices. The beginnings of music were necessarily rude. Under the influence of religion, the rhythmic chants grew into inspiring hymns and psalms, giving rise to the sacred poetic literature of many nations. In the Christian religion sacred poetry, melody, and polyphonic music have been inextricably allied with the religious dance, yet, when duly censured, not objectionable to refined taste, is the pageantry of religious ceremonial—the employment of numerous officiating ministers dressed in striking costumes and dragging behind them the ministers, bearing sacred objects, are accompanied by a long line of worshippers, marching to the sound of soul-stirring hymns and instrumental music. All this makes a profound impression on the spectator. The Catholic Church has shown her wisdom by taking into her liturgy such of these elements as are the legitimate and dignified expression of religious feeling. (b) Regulation of Conduct outside the Sphere of Moral Obligation.—This element is common to all religions. It is exemplified in the purifications, fasts, and the religious sanitation. Most of these practices rest on a sense of fitness strengthened by immemorial custom. To neglect or disregard them is thought to entail calamities. Thus the whole life of the individual is in the hands of a stern and inexorable power, whose orders must be religious observance. In the Hebrew religion practices of custom are observed in the rites closely associated with Divine worship. Most of these practices rest on a sense of fitness strengthened by immemorial custom. To neglect or disregard them is thought to entail calamities. Thus the whole life of the individual is in the hands of a stern and inexorable power, whose orders must be religious observance.
commands. This was even true of circumcision, which, while being a mutilation of a minor sort (the only form of mutilation tolerated in the Old Law), was given a highly moral signification, and made to serve as the token of God's covenant with Abraham and his descendants. The Sabbath rest, transferred in Christianity to Sunday, is likewise based on an express Divine command, and this class of external acts of homage belong also the various forms of asceticism that prevail in many religions. Such are the restrictive works of piety involving inconvenience, pain, and abstinence from legitimate enjoyments, voluntarily undertaken and, with the weightier portion of them, given a larger share of Divine favour and to secure more than ordinary sanctity and perfection. In the lower religions the ascetic tendency has often degenerated into repulsive forms of mortification based on purely selfish ends. In Christianity the various forms of self-denial, particularly the counsel of perfection (poverty, chastity, and obedience) cultivated in the spirit of Divine love, have led to the flourishing of the ascetic life within the limits of true religious propriety.

(c) Regulation of Conduct within the Recognised Sphere: The regulation of conduct within the sphere of life in which one falls within its sphere implies that the sovereign Deity is the guardian of the moral law. Moral duties, to the extent that they are recognised, are viewed as Divine commands. Their fulfilment merits Divine approval and their violation entails Divine punishment. Unfortunately the moral blindness of peoples in lower grades of culture has been as a rule grossly defective. Many things shocking to our moral sense have been done by them without the consciousness of wrong-doing. Being generally given to incontinence, polygamy, deeds of violence, and even to cannibalism, they have naturally attributed the same sentiments and practices to their gods. The religious sanction thus conceived lends strength to both the good and the evil side of their imperfect standard of conduct. While it helps them to avoid certain gross forms of wrong-doing, patent even to minds of low intelligence, it encourages the continued practice of vicious indulgences that otherwise might be more easily outgrown. This is particularly the case where these excesses have been woven into the myths of the gods, and the world's heroes, or have been incorporated into the religious rites and become, as it were, inviolable. This explains how, for example, among peoples so highly civilized as the Babylonians, Greeks, and Romans, certain laundery of pious activity could hold the same place in the liturgy, and also how, in the worship of the Astore god of war, human sacrifices with cannibal feasts could prevail to so shocking a degree. In this respect the religious systems of lower grades of culture have tended to retard reform and progress towards higher standards of conduct. It is now the glory of the religion of Christ that, starting with the highest ethical principles, it has pointed out to men the true path to moral and spiritual perfection, and given the most powerful aids to the successful pursuit of this ideal end.

(2) Manifestations of Divine Good Will.—Religion is something more than the attempt of man to secure communion with God. It is also an experience sometimes real and sometimes fancied, of the supernatural. Corresponding to the deeply felt need of Divine help is the conviction that in numerous instances this help has been given in answer to prayer. Sensible tokens of Divine good will are piously thought to reward the earnest efforts of man to secure bringing communion with the Deity. Prominent among them are the highest medical instances of Divine communications to man, revelation.

(a) Revelation.—Revelation (or God speaking to man) is the complement of prayer (man speaking to God). It is instinctively felt to be needed for the perfection of religion, which is a personal relation of love and friendship. There is secretly a religion which has not its accepted instances of Divine visions and communications. To the Theist this offers a strong presumptive argument in favour of Divine revelation, for God would hardly leave this legitimate craving of the human heart unsatisfied. This truth, indeed, has been fully met in the religion of Christ, in which man has been Divinely enlightened in regard to his religious duties, and has been given the supernatural power to fulfill them and thereby secure his perfection. In lower religions, where temporal welfare is chiefly looked to, much more important undertaking Divine assurance of success is eagerly sought through ritual forms of divination and through the use of prophecy. The office of prophet, the recognised spokesman of the Deity, is generally but not always distinct from that of priest. It had its legitimate place in the Old Law, in which the Divinely chosen Prophets not only told of things to come, but also brought to their contemporaries God's messages of warning and of moral and spiritual awakening. In Christ the office of prophet was perfected and completed. In the New Testament the office of prophet is further characterized by extraordinary mental excitement, taken by the worshippers as the sign of the inspiring presence of the Deity. In this state of religious frenzy, brought on as a rule by the exaltation of devotional states, the prophet utters oracles. Sometimes the prophecy is made after emerging from a trance, in which the prophet is thought to be favoured with Divine visions and communications. In their ignorance, the worshippers mistake these pathological states for the signs of indwelling Deity. Their counterparts may be seen to-day in the wild scenes of excitement so common in the religious revivals of certain sects, where the believers, under the influence of noisy, soul-stirring exhortations, become seized with religious frenzy, dance, shout, fall into cataleptic fits, and think they see visions and hear Divine assurances of being saved. Quite different from these violent mental disturbances are the peaceful, but no less extraordinary ecstasies of many saints, in which wonderful visions and Divine colloquies are experienced while the body is motionless and insensible. The supernatural character of these experiences is not a matter of faith, but is vouched for by the careful investigation and judgment of the ecclesiastical authorities and pronounced as such by them.

(b) Extraordinary Healing.—There are few religions in which recourse is not had to supernatural aid for miraculous cures. The testimony of reliable witnesses and the numerous ex-voto that have come down to us from antiquity leave no doubt as to the reality of many of these cures. It was natural that they should be viewed as miraculous in an age when the remarkable power of suggestion to effect cures was not understood. Modern science recognizes that strong mental impressions can powerfully influence the nervous system, and through the nervous system the organs, leading in some instances to sudden illness or death, in others to remarkable cures. Such is the so-called mind-cure, or cure by suggestion. It explains naturally many extraordinary cures recorded in the annals of different religions. Still it has its recognized limits. It cannot restore of a sudden a half-decayed organ, or heal instantly a gaping wound caused by a cancer. Yet cures like these and others equally defying natural explanation have taken place at Lourdes and elsewhere, and are authenticated by the highest medical testimony. For example, no successful conversions—In the Christian religion there are numerous instances of sudden conversions from a life of vice to one of virtue, from a state of spiritual despair to one of enthusiastic

RELIGION

...real. The latter kind are not infrequent in Calvinistic forms of Protestantism, where the fear of being outside the elect, heightened by lapse into sin, leads to spiritual depression and misery with a corresponding yearning for a Divine assurance of salvation. Such conversions, coming unexpectedly and transforming the individual into a new man, happy in the consciousness of Divine love and active in works of piety, have been popularly viewed as miraculous in every instance. That many of these conversions may be of a purely natural order seems to be shown by modern psychology, which offers the plausible theory of the sudden uprush into consciousness of subliminal activities set in operation by intense, persistent longings for a change to a better, more spiritual life. But it must be recognized that this theory has its limitations. The grace of God may be working in many conversions that allow of a natural explanation. Moreover, there are conversions that defy any such natural explanation as the working of subliminal consciousness. It cannot, for instance, explain the conversion of St. Paul, who, from a rabid hater of Christianity, was suddenly turned into one of its most ardent converts, a result that was the very antithesis of his previous conscientious belief and aspirations. That his vision of Christ was real and objective is proved by the wonderful accession of knowledge that it brought to his mind, fitting him to stand forth unchallenged as one of Christ’s Apostles. There is no more satisfying evidence of the invisible living agency. Personality is also associated with them, particularly where the phenomena are suggestive of intelligent purpose. To recognize in and behind the phenomena of nature the agency of such a power is not great, when we consider how hard it would have been for primitive man in his inexperience to co-ordinate the varied effects of nature and derive from them one and the same source of power. The more likely tendency would have been to recognize in the diverse phenomena the agency of distinct personalities, as was indeed done by the peoples of antiquity, and as is done to-day by uncultured peoples everywhere. Peoples, whose ignorance of the physical laws of nature has not been compensated by revealed teaching, have invariably personalized the forces of nature. Religion, instead of debasing on the beneficent exercise of these powers, have come to divinize them. From this danger of falling into a polytheistic interpretation of nature, primitive man was saved by Divine Revelation. Such, it would seem, was the simple philosophy forming the natural basis of religion in primitive times. It was theoretically capable of leading to a Monotheism like that of the ancient Hebrews, who viewed clouds, rain, lightning, and tempest as the signs of God’s immediate activity. But, apart from revelation, it was very liable to degenerate into polytheistic nature-worship. Its defect was primarily scientific, ignorance of the secondary causes of natural events; but it rested on a sound principle, namely, that the phenomena of nature are in some way the outcome of intelligent volition. This principle commends itself to the Christian philosopher and scientist.

IV. The Origin of Religion.—The beginnings of religion go back to the prehistoric times. In the absence of positive, historic data, the question of the origin of religion admits only of a speculative answer. It is Catholic teaching that primitive religion was a Divinely revealed Monotheism. This was an anticipation and a perfection of the notion of religion, which man from the beginning was naturally capable of acquiring. Religion, like morality, has apart from revelation a natural basis or origin. It is the outcome of the use of reason, though, without the corrective influence of revelation, it is very apt to be misconceived and misdirected. Sacred lore was transmitted orally from generation to generation till finally it was put in writing. In every religion possessing sacred books, there is a tendency to give them a much greater antiquity than they actually enjoy. We view them as inspired or the product of Divine wisdom. This latter claim vanishes quickly when they are compared with the inspired books of the Bible, which in spiritual and literary worth stand immeasurably above them.

IV. The Origin of Religion.—The beginnings of religion go back to the prehistoric times. In the absence of positive, historic data, the question of the origin of religion admits only of a speculative answer. It is Catholic teaching that primitive religion was a Divinely revealed Monotheism. This was an anticipation and a perfection of the notion of religion, which man from the beginning was naturally capable of acquiring. Religion, like morality, has apart from revelation a natural basis or origin. It is the outcome of the use of reason, though, without the corrective influence of revelation, it is very apt to be misconceived and misdirected. Sacred lore was transmitted orally from generation to generation till finally it was put in writing. In every religion possessing sacred books, there is a tendency to give them a much greater antiquity than they actually enjoy. We view them as inspired or the product of Divine wisdom. This latter claim vanishes quickly when they are compared with the inspired books of the Bible, which in spiritual and literary worth stand immeasurably above them.

A. Modern Application of the Principle of Causality.—Religion, in its last analysis, rests on a theistic interpretation of nature. The Christian philosopher arrives at this by a process of discursive reasoning, making use of arguments drawn from the study of nature and from his inner consciousness (see article God). This, however, is a highly philosophic process of reasoning, the result of the accumulated contributions of many generations of thinkers. It presupposes a mind trained to abstract reasoning, and hence is by no means easy for the average individual. It can hardly have been the method followed by the savage man, whose mind was not trained to philosophy and science. The process by which he arrived, naturally at a theistic interpretation of the world seems to have been a simple, spontaneous application of the principle of causality.

B. Primitive Application of the Principle of Causality.—There is every reason to think that primitive man’s view of nature was, to a large extent, similar to that held by peoples generally who have not risen to scientific conceptions set unconsciously in motion by intense, persistent longings for a change to a better, more spiritual life. But it must be recognized that this theory has its limitations. The grace of God may be working in many conversions that allow of a natural explanation. Moreover, there are conversions that defy any such natural explanation as the working of subliminal consciousness. It cannot, for instance, explain the conversion of St. Paul, who, from a rabid hater of Christianity, was suddenly turned into one of its most ardent converts, a result that was the very antithesis of his previous conscientious belief and aspirations. That his vision of Christ was real and objective is proved by the wonderful accession of knowledge that it brought to his mind, fitting him to stand forth unchallenged as one of Christ’s Apostles. There is no more satisfying evidence of the invisible living agency. Personality is also associated with them, particularly where the phenomena are suggestive of intelligent purpose. To recognize in and behind the phenomena of nature the agency of such a power is not great, when we consider how hard it would have been for primitive man in his inexperience to co-ordinate the varied effects of nature and derive from them one and the same source of power. The more likely tendency would have been to recognize in the diverse phenomena the agency of distinct personalities, as was indeed done by the peoples of antiquity, and as is done to-day by uncultured peoples everywhere. Peoples, whose ignorance of the physical laws of nature has not been compensated by revealed teaching, have invariably personalized the forces of nature. Religion, instead of debasing on the beneficent exercise of these powers, have come to divinize them. From this danger of falling into a polytheistic interpretation of nature, primitive man was saved by Divine Revelation. Such, it would seem, was the simple philosophy forming the natural basis of religion in primitive times. It was theoretically capable of leading to a Monotheism like that of the ancient Hebrews, who viewed clouds, rain, lightning, and tempest as the signs of God’s immediate activity. But, apart from revelation, it was very liable to degenerate into polytheistic nature-worship. Its defect was primarily scientific, ignorance of the secondary causes of natural events; but it rested on a sound principle, namely, that the phenomena of nature are in some way the outcome of intelligent volition. This principle commends itself to the Christian philosopher and scientist.

C. Intuition Theory.—Other theories have been suggested to account for the origin of religion. We shall briefly review the more common ones. According to the intuition theory, religion is an intuitive knowledge of God and of his dependence on Him. To this theory there are several serious objections. We ought to be conscious of this intuition if we possessed
it. Again, as a result of such intuition, man should be found everywhere with a monothetic religion. The whole Bible is Polytheism and the religious apathy of many individuals are inconsistent with such an intuition of God.

D. MAZ Müller's Perception Theory.—This is but a slight modification of the intuition theory. Müller thought the perception of the infinite was the source of religion, being acquired by "a mental faculty which, independent of, nay in spite of, sense and reason, enables man to apprehend the infinite under different names and under varying disguises" ("Origin and Growth of Religion", London, 1880, p. 23). But apparently Müller's theory is not so much a recognition of an independent natural man as an attempt rather to philosophic than to simple minds, and is not to be found in the generality of religions.

It is the apprehension of sovereign personality that gives rise to religion, not the mere apprehension of the infinite. How man arrives at the notion of such personality, this theory does not explain.

E. Fear Theory.—A common theory with the Greek and Roman philosophers, favoured by a few writers of modern times, is that religion had its origin in fear, particularly fear of lightning, tempests, and other dangers of nature. It is a feeling of weakness, and no mere feeling can account for the idea of personality, which may or may not be associated with a dangerous or terrifying object. Fear, like hope, may be one of the motives prompting man to the worship of the Deity, but such worship presupposes the recognition of Deity, and fear cannot account for this recognition. We have already seen that fear is not the predominating tone even in lower religions, as is shown by the universal use of rites expressing joy, hope, and gratitude.

F. Animal Theory.—A favourite theory of modern times is the animalist theory. It has been set forth with great erudition by E. B. Tylor. According to this theory, in consequence of a strong tendency to personalize, primitive peoples come to view everything as alive, even stocks and stones. They also have a crude notion of the soul, derived from dreams and visions experienced in sleep and swoons. Applying this soul idea to inanimate things, which they take to be alive, they have come to associate mighty spirits with the great phenomena of nature and have given them worship. The defects of this theory are such as to discredit it in the eyes of most scholars. In the first place, it is not true that uncultured peoples confound the living with the non-living to the extent that they take the very stones to be alive. It would, indeed, be strange if they were not at least in the way of the beast in ability to distinguish between familiar objects that are lifeless and those that show life and movement. Again, while men of lower grades of culture have a crude notion of souls, they do not need that concept to arrive at the idea of personal agency in nature. All they need is the notion of personal cause, which they get from the consciousness of themselves as sources of power and purposive action. There is every reason to think that this idea is prior to the soul concept. (See Animism.)

G. Ghost Theory.—This theory, whose prominent English champion was Herbert Spencer, identifies the primitive notion of religion with the service and propitiation of departed relatives, and attributes the worship of the great deities of nature to the mistaken applications of ancestor-worship. The first religious offering made to have been offerings of food, weapons, and utensils made to the souls of the dead, whose occupations, needs, and tastes in the next life were thought to be similar to those of earthly existence. In return for this much-needed service, the dead give prosperity and peace. A series of blunders led to the recognition and worship of the great nature-deities. Migrating peoples from beyond the sea or the mountain became known as children of the sea or of the mountain. Later generations, mistaking the meaning of the term, were led to view the sea or the mountain as their living ancestor and to give it worship. Again, departed heroes, such as Rain, Thunder, Rain-Could, came after a lapse of time to be confounded with the real sun and other natural phenomena, thus giving rise to the conception of nature-deities and to nature-worship. The defects of this theory are manifest. Mistakes like these might be made by some stupid individual of the tribe, but not by all the members of the tribe, still less by tribes over all the earth. A series of trivial and fortuitous blunders cannot account for so world-wide a fact as the recognition of such insignificant ideas. If the ghost-theory were true, we should find the religions of savages consisting exclusively of ancestor-worship. This is not the case. In all lower religions, where we find food-offerings to the dead, we also find recognized, and carefully distinguished from dead heroes, nature-deities. Among the pygmies of the Northern Congo, accounted one of the lowest of races, there is a reverent recognition of a supreme Deity, but no trace of ancestor-worship. There is thus no good ground for asserting ancestor-worship to have been the earliest form of religion, nor is it a feature in all religions, strictly speaking, in any of its forms. It is a parallel growth that has sprung up and become entwined with religion proper. The latter is of independent origin.

H. Fetish Theory.—This derives religion from the use and veneration of fetishes. A fetish is an object (generally small enough to be easily carried) in which a spirit is thought to reside, acting as a protective genius for the owner who wears it, and who venerates it because of its indwelling spirit. Generally, it is the medicine-man or wizard who makes the fetish, and charges it with the spirit. It is used till its inefficiency becomes apparent, when it is cast aside as worthless, in the belief that the indwelling spirit has departed from it. Now the use of such objects cannot be the primary form of religion. In the first place, there is no existing form of religion known in which Fetishism is the sole constituent element. Among the negroes of West Africa, where it first attracted attention, the fetish spirits are at best but inferior beings, generally distinct from the supreme heaven-god and from the powerful nature-deities associated with the sea and thunder. Again, the notion of persuading spirits to lodge themselves in stocks and stones and become the property of the wearers, is the very antithesis of religion, which implies the sense of dependence on the Deity. Far from the latter notion, being derived from the former, there is every reason to see in Fetishism a perverted notion of religion. (See Fetishism.)

I. Totem Theory.—This puts the origin of religion in Totemism, a semi-religious, semi-social institution prevailing chiefly among savage tribes. In certain tribes, every one of the component clans has a tutelary deity intimately associated with a particular species of animal or plant, which species is venerated by the clan as sacred and inviolable. It is called the ancestor of the clan. The individuals of the species are often viewed as particularly sacred because of the indwelling deity. Hence the totem animal or plant is ordinarily not used for food by the clan that bears its name. The union of clans into tribes under the leadership of one superior clan is said to have led to the absorption of the weaker totems into the totem of the dominant clan, with the result that powerful tribal deities arose. It was but a step further to the recognition of a supreme deity. Totemism labours under many of the difficulties of Fetishism. Nowhere do we find religion prevailing among the North American Indians, where Totemism has flourished with the greatest vigour, the totems are absolutely overshadowed by the great deities of the sky, air, and water. The
distinction between them and the totem spirits is absolute. Nowhere do the great deities bear the names of animals or plants as a mark of totem origin. In the majority of the religions of the world, there is no trace of the worship of animals or plants, although if it were spread if it had been the source of all other forms of religion. The totem, like the fetish, presupposes the very thing that needs to be accounted for, belief in the existence of unseen personal agents.

V. THE UNIVERSALITY OF RELIGION.—A Historical Survey. — From what has already been said, it is plain that religion, though often imperfectly conceived, is in normal conditions of human existence the inevitable outcome of the use of reason. It is but natural, then, that religion, at least in some crude form, should be a characteristic feature in the life of all peoples. This truth was widely questioned during the last few centuries, when the extension of travel to unexplored lands gave rise to reports asserting the absence of religion among many native tribes of Asia, Africa, America, and the islands of the Pacific Ocean. One by one these reports have been nullified by the contrary statements of travellers and missionaries better qualified as witnesses, so that to-day there remain but very few peoples of whom it cannot be said with certainty that they possess some form, however degraded, of religion, for these rare exceptions, for the rule, for they are insignificant tribes which, in the struggle for existence, have been driven by their enemies to inhospitable regions where the conditions of life are so wretched as to cause them to degenerate almost to a state of brutalization. A degradation of this sort can prove fatal to the sentiment of religion. A notable instance is the Indian tribe in Southern California among whom Father Baegeert, a Jesuit missionary, laboured for many years. In the account which he gave of his experiences, a translation of which was published in the "Smithsonian Report" of 1864, he testified to their stupidity and utter lack of religion. Yet their descent from Indian stocks that had well-defined religious notions is practically certain. Father Baegeert observed a few vestiges of an ancestral belief in a future life—for example the custom of putting sandals on the feet of the dead, the significance of which the Indians could not explain. Mental degradation like this may thus involve the loss of religion. But such degradation is extremely rare. On the other hand, it is a characteristic of almost all tribes in most parts of the world that aDeity coupled with well-organized rites of public worship. The absence of these has often been set down as an absence of religion. Again, unfavourable verdicts have not infrequently been based on a stay of but one or two days with tribes speaking an unknown tongue, as for example was the case with Verrazano and Amerigo Vespucci. But, even where observers have stayed for months among rude peoples, they have sometimes found it extremely difficult to obtain information in regard to religious beliefs and practices; a suspicion that the white man was seeking to obtain some advantage over them has more than once led savages to resort to deceit to conceal their religion. It is the calm, impartial judgment of anthropologists to-day that there is no people of note that is absolutely without religion.

B. Outlook. — But the further question may be asked: If religion has been universal in the past, have we any assurance that it will persist in time to come? Has not the advance of modern science been marked by an increasing skepticism of the powers of personal agency in nature, with the inevitable result, as a writer has expressed it, that God will one day be bowed out of His universe as no longer needed? To this we may reply: The advance of modern scientific culture is fatal to all polytheistic forms of religion, in which the recognized secondary causes are, throughout to be believed in. The well-established scientific truth of the unity of nature's forces is in harmony only with the monotheistic interpretation of nature. Christian Monotheism, far from being inconsistent with true science, is necessary to supplement and complete the limited interpretation of nature afforded by it. The latter, being based on observation and experiment, has for its legitimate sphere of study only secondary causes of nature. It can tell nothing of origins, nothing of the great First Cause, from which the orderly universe has proceeded. In substituting physical laws for what was formerly thought to be the direct action of Divine agency, it has not accounted for the intelligent, purposive direction of nature. It has simply pushed the question somewhat further back, but left it with its religious answer as important as ever. It is true that in modern civilized nations there has asserted itself a notable tendency to religious scepticism and indifference. It is a symptom of unrest, of an unhealthy, excessive reaction from the simple view of nature that prevailed in both science and religion for the centuries that had failed, order, ignorance of the natural causes of lightning, tempests, comets, earthquakes, droughts, and pests, has led less cultured peoples to see direct supernatural agency in their production. For them nature in all its seemingly capricious moods has had the aspect rather of master than of servant. Their sense of dependence has thus been keen and constant; their need of Divine help urgent to a high degree. On the other hand, the widespread recognition among cultured peoples of the reign of law leads men to seek natural remedies in times of distress, and only where these fail to turn to God for aid. Modern civilization, in removing many sources of ancient times that were viewed as supernatural, in greatly lessening the range of the miraculous, in binding nature in a thousand ways to beneficial service, has tended to create in the heart of man a feeling of self-sufficiency that tends to effete the virtue of religion. That this tendency, however, is an abnormal, passing distemper rather than a permanent, characteristic condition of society, is a view that is seen from the unshaken Christian faith of many of the greatest exponents of scientific culture (e. g. Clerk-Maxwell, Sir John Herschell, Lord Kelvin in England; Faye, Lapparent, Pasteur in France). It is still more strikingly shown by the conversion of scientific scepticism to God from the knowledge of scholars like Littre, Romanes, Brunetiére, Bourget, Coppée, and von Ruville. It was recognized by these and other profound thinkers that the deeply seated craving in the human heart for bliss-giving communication with God can be studied by science or by any other proposed substitute for religion.

VI. THE CIVILIZING INFLUENCE OF RELIGION. — Religion in its highest form has exercised a profound influence on the development of human culture. In the recognised sphere of activity, it has offered powerful motives to right conduct; it has been the chief inspiration of music, poetry, architecture, sculpture, and painting; it has been the dominant influence in the formation of a permanent literature. In all the early civilizations, the chief representatives of thought or cultivation of the highest known culture have been the officials in charge of religious rites. Religion has been a mighty force in the life of nations, cultivating in the hearts of men a striving for better things, a healthy tone of representative and human sympathy, a love of order, a perseverance in the face of difficulties, a readiness for generous service, in short a spirit of highminded
optimism, without which no nation can rise to greatness.

Most noteworthy has been the influence of Christianity in forming and elevating society. Its lofty ethical teachings, the peerless example of its Divine Founder, the fundamental principle that we are all children of the same heavenly Father and hence bound to treat our fellow-men not only with justice but with mercy and charity, the spirit of generous, self-sacrificing service, springing from personal devotion to the Divine Saviour and prompting to the practice of heroic virtues—all this, having for its end the spiritual perfection of the individual and the union of all men through a common bond of faith and hope, has a power in transforming the world that has exercised a mighty influence in softening and refining the rude peoples of early Europe, in breaking down the barriers of race prejudice, and in forming a common society of many nations, in which the ideal is recognized, though not yet fully attained, is a universal reign of peace, justice, chastity, charity, reverence for authority, sympathy for the afflicted, a general diffusion of useful knowledge, and in short a common participation in everything that makes for true culture. Nowhere have the works of charity flourished as much as in the different sources of charity in the Christian lands. The Christian religion has ever been the great conservative force, favouring established order and law, and opposed to hasty innovations calculated to cause a profound disturbance in existing religious or political constitutions. The influence of such a force in human affairs is incalculable, even though it may occasionally retard for a while the general recognition of some principle of permanent value in science, economics, or politics.

While, in modern civilization, state institutions and charities with Christian hospitals, asylums, and schools the work of charitable ministrations which in former times depended exclusively on the Church; while the sciences and arts no longer need the fostering influence of religion, it is nevertheless true that, in the social and moral order, the need of right religion is as urgent as ever. It has not ceased to be the mighty social power working for the highest good of the nation. Religion alone can keep alive in a people devotion to high ideals, respect for established authority, reverence for peaceful measures to secure political and industrial reforms, and a cheerful spirit of perseverance despite powerful opposition. Religion means generous optimism; irreligion means sordid pessimism. It is religion, too, that presents the highest and most efficacious motives for the upholding of the sacred tenets of moral laws. Christianity does not disdain the purely secular grounds of morality, such as the love of virtue and hatred of vice, self-respect, regard for public opinion, fear of legal sanctions; but it refines and completes these by the powerful motives that are the fruit of the teaching of Christ, the greatest ethical teacher the world has ever seen—love of God, personal devotion to Jesus, the sense of God’s presence, and the thought of Divine retribution. These motives, supernaturalized by grace, exercise a powerful influence in developing an interior conformity to the rule of right conduct, which distinguishes genuine moral worth from the mere outward show of respectability. Right religion both indicates and makes possible of fulfilment man’s duties to himself, his family, his neighbour, and the State. In the measure that he conforms to the teaching of religion will he be found to be a zealous promoter and observer of civic virtue. In short, wherever we find the practical observances of religious duties, there we find social order to a high degree. The nation that designedly and systematically expurgates religion is depriving itself of the most powerful factor operative in the upbuilding and maintaining of true public welfare.

It is on the steep incline to social and political ruin.

VII. THE MODERN SCIENTIFIC STUDY OF RELIGION.—Modern scholarship has given much attention to the study of religion. Out of this many-sided study have grown the modern branches known as the history of religion, comparative religion, and the psychology of religion, all of which are supplemented and completed by the older discipline, the philosophy of religion.

A. History of Religion.—This has for its scope the accurate and systematic exposition of the positive data that go to make up the different external observances of the world—the rites, the ceremonies, the customs, the beliefs in deities, sacred books, etc. Its point of view is purely historic. It studies each religion apart from the question of its spiritual worth and possible supernatural origin, simply as an external expression of religious belief. A sympathetic interest attaches to this study, for there are few religions, however crude, that do not represent the sincere effort of man to bring himself into communion with God. The work accomplished in this field has been immense. Religious data have been accumulated from hundreds of sources by the missionaries and travellers of other lands. Oriental religions have been carefully translated, so that to-day there is within easy reach of the scholar a very reliable survey of the chief religions of the world.

B. Comparative Religion.—Closely allied to the history of religions, out of which it has grown, is comparative religion. The scope of this discipline is the comparative study of the many elements common to different religions with the view to ascertain their underlying thought and purpose, and thus to discover if possible the causes of their genesis and persistence. In some instances, where resemblances of a striking kind are found in two or more religions, it seeks to determine whether these resemblances imply dependence. It also admits a more extensive comparison of religion with religion in order to estimate their relative value. But like the history of religions, the data of which it uses, it does not concern itself as a science with the question whether any given religion is true. Comparative religion has helped to a better understanding of many phases of external religion. It has shown how certain widespread rites and customs have been the natural product of human thought in lower grades of culture. It has enabled us to recognize in higher religions elements that are survivals of earlier stages of thought. But its ultimate aim is to impart to the student with great care, for they can easily be made to do service for contradictory and visionary theories.

The writings of authors such as Frazer and Reinach offer many examples of unwarranted conclusions supported by fact-fetched comparison.

C. Psychology of Religion.—This discipline studies the different psychical states implied in, and associated with, the religious consciousness. It concerns itself with the extraordinary and abnormal, as well as with the normal exercise of the intellectual, volitional, emotional, and imaginative activities set in motion by religion. It does not attempt to vindicate the supernatural character of these psychical experiences or to show their conformity to objective truth. Viewing them simply as mental states, it seeks to find out how far they may be explained by natural causes.

In the short period of its existence it has given much consideration to the phenomena of sudden conversions, religious frenzy, the sense of God’s presence experienced by pious Christians, and the extraordinary manifestations of mystics and non-Catholic adepts. In seeking the natural explanation of some of these experiences it has been successful; but, as has already been pointed out, it has its limitations.

D. Philosophy of Religion.—The philosophy of reli-
Religion is the crown and completion of the several disciplines already mentioned. It carries the inquiring mind beyond the sphere of natural causation to the realm of the present First Cause, the Source of all things, and shows that only in the recognition of God is a satisfactory interpretation of the universe attainable. It is the science which examines the value of religion, and investigates with careful scrutiny the grounds of theistic belief. In its method of presenting the acts of other worlds, it shows them in larger variation, due in large measure to the different theories of knowledge that obtain in the world of philosophers. Since Kant's criticism of the Scholastic arguments for the existence of God, there has been a strong tendency in many schools to neglect the cosmological and teleological arguments, and to see the evidence of Divine wisdom and goodness rather in the human mind than in external nature. A reaction is now setting in. Some of the leading exponents of biological science now recognize that evolution, as an adequate explanation of the variety of organic life, is necessarily teleological, and do not hesitate to declare that the universe is the manifestation of a creative, controlling mind.

The Latin works of St. Thomas, Scares, Leo, Maresela, etc., the following authors may be consulted: van den Greven, La Religion, son origine et sa diffusion (Paris, 1851); Heelas, Religion (New York, 1853); Jeaffreys, Study of Religion (New York, 1902); Bown, The Essence of Religion (London, 1874); Litt, The Great Religion (New York, 1892); Lang, The Making of Religion (New York, 1898); Idee, Myth, Ritual, and Religion (London, 1890); Mill, Three Essays on Religion (London, 1874); Kellaway, The Genesis of Religion (New York, 1892); Martineau, A Study of Religion (2 vols., London, 1893); Eliot, The Religious Sentiment (New York, 1876); Bliss, Problems et conclusions de l'histoire des religions (Paris, 1894); Vernet, Histoire des religions, son esprit, sa méthode, ses influences (Paris, 1897); Jordan, Compendium of Religion; its Genesis and Growth (New York, 1905); Foccart, La méthode comparative dans l'histoire des religions (Paris, 1909); James, The Varieties of Religious Experience (London, 1905); Pratt, The Psychology of Religious Belief (New York, 1907); American, The Psychology of Religions Experience (Boston, 1901); Wundt, Volkerpsychologie (Leipzig, 1904-07); Caird, Introduction to the Philosophy of Religion (Glasgow, 1901); Caldecott, The Philosophy of Religion in England and America (New York, 1901); Ladd, The Philosophy of Religion (New York, 1905); Pyle, The Philosophy and Development of Religion (2 vols., Edinburgh, 1894); Eucken, Christianity and the New Idealism (New York, 1906). See also bibliographies to Farewell and Sacrifice.

Charles F. Aiken.

Religion, Virtue of.—Of the three proposed derivations of the word "religion," that suggested by Lactantius and endorsed by St. Augustine seems perhaps to accord better with the idea than the others. He says it comes from reloqua, to bind. Thus it would mean the bond uniting man to God. The notion of it contained among the Greeks is found in St. Thomas's "Summa Theologiae," II-II, Q. lxxx. According to him it is a virtue whose purpose is to render God the worship due to Him as the source of all being and the principle of all government of things. There can be no doubt that it is a distinct virtue, not merely a phase of another. It is differentiated from others by its object, which is to offer to Almighty God the homage demanded by His entirely singular excellence. In a loose construction it may be considered a general virtue in so far as it provides the object of other virtues or requires the performance of its own functions. It is not a theological virtue, because its immediate object is not God, but the reverence to be paid to Him. Its practice is indeed often associated with the virtues of faith and charity. Still the concordant judgment of theologians puts it among the moral virtues, as a part of the cardinal virtue justice, since by it we give God what is due to Him. St. Thomas teaches that it ranks first among moral virtues. A religious attitude towards God is essentially the product of our recognition of His sovereign majesty, but that of our absolute dependence on Him. Thus, as Father Rickaby says, He is not merely "the Great Stranger,"
Jehovah; and so certain ascetic practices, even if they had a pagan origin, were nevertheless, as employed, to acquire a spiritual and Christian in meaning and inspiration. Moreover, not every doctrine or practice of a false religion is necessarily erroneous or reprehensible; there may be great nobility of character among Buddhist monks or Muslim dervishes, as there may be faults sullying the ascetic or religious habit worn in the true Church.

We need not here present a comparative analysis of the Christian religious life and the religious life of non-Christians, nor even compare our religious with the service of the God in this present age (see Anchorites; Asceticism; Buddhism; Essenism; Monasticism). But how are we to recognize the religious life of the true and Divine religion? Not by bodily mortifications, which may be surpassed in severity by those of the fakirs; not by mystical ecstases and raptures, which were experienced by those initiated into the Greek and Oriental mysteries, and are still met with among Buddhist monks and dervishes; not even by the faultless lines of all the plans of Catholic religious life, for God desires progress even in His saints (see St. Ignatius of Loyola, his spiritual exercises, and individual mistakes; but even the persons making these mistakes possess in the true religion the principles which ensure correction and gradual improvement. Besides, in its entirety, the religious life of the purest and most devoted is found to be in conformity with the moral and social laws of our present existence, as well as with our destiny; its intentions must appear sincerely directed towards personal sanctification, towards God, and the Divine order. The tree must everywhere be known by its fruits. Now, Catholic religious life infinitely surpasses all other ascetic systems by the truth and beauty of the doctrine laid down in so many rules and treatises, and by the eminent sanctity of its followers such as St. Anthony, Pachomius, Basil, Augustine, Colombanus, Gregory, and others, and finally, especially in the West, by the marvellous fruitfulness of its work for the benefit of mankind. After these preliminary observations, we may confidently look for the true religious life in the Gospel. The Evangelical Idea. We cannot regard as essential everything that we find in the full development of religious life, without ignoring historical facts or refusing them the attention they deserve; and we must correct the definitions of Scholastic writers by the light of the Gospel, to which we wish to put ourselves in harmony with history, and not be compelled to assign to religious a later origin, which would separate them by too long a period from the first preaching of the Gospel which they profess to practise in the most perfect manner. The Scriptures tell us that perfection consists in the love of God and our neighbour, or to speak more accurately, in a charity which extends from God to our neighbour, finding its motive in God, and the opportunity for its exercise in our neighbour. We say, it has its motive in God; and St. John (iv. 19) says: "He that loveth not his brother, whom he seeth, how can he love God, whom he seeth not?" (I John, iv. 20). The New Testament warns us of the obstacles to this charity arising from an attachment to and desire of created things, and from the cares caused by their possession, and, therefore, beseeches all men to cultivate charity, or, as the measure of our perfection, the New Testament gives us a general counsel to be disengaged from everything contrary to charity. This counsel contains certain definite directions, among the most important of which are the renunciation of riches, of carnal pleasure, and of all ambition and self-seeking, in order to acquire a spirit of voluntary submission and generous devotion to the service of God and our neighbour.

All Christians are bound to obey these precepts, and to follow the spirit of these counsels; and a likeness that of the first Christians will enable them to free themselves from attachment to earthly things in order to set their affections on God and the things of heaven; while the remembrance of the shortness of this life facilitates the sacrifices of wealth and natural pleasures. The first converts of Jerusalem sold all their property and goods, laying the proceeds at the feet of the apostles. But experience, by which Christ wished His faithful to be taught, soon corrected their errors on the subject of the future of the world, and showed the practical impossibility of a complete renunciation by all members of the Church. Christian society can no more continue without resources and without children than the soul can exist without the body; it has need of men engaged in lucrative professions, as well as of Christian marriages and Christian families. In short, conforming to the will of God who bestows a diversity of gifts, there must also be a diversity of operations (I Cor., xii, 4, 6). Every kind of career should be represented in the Church, and one of these should include those who make provision of the necessities of the Church and the poor. Such persons are not necessarily more perfect than others, but they adopt the best means of attaining perfection; their final object and supreme destiny are the same as those of others, but they are charged with the duty of sustaining others of that destiny and of the means of fulfilling it; and they pay for this favoured position by the sacrifices which it entails, and the benefit which others derive from their teaching and example. This life, which, in view of the great precept, follows the Evangelical counsels, is called the religious life; and those who embrace it are called religious.

At first sight, it would seem that this life ought to unite in itself all the counsels scattered through the Gospels: that would indeed be the religion of counsels, and certainly, the more fully it inspires the desire and furnishes the means of following the Evangelical counsels, the more fully it is a religious life; but a perfect realization of those counsels is impossible to man; the opportunity of practising them all does not present itself in every man's life, and one would quickly be worn out if he attempted to keep them all continually in view. We soon learn to distinguish those that are more essential and characteristic, and more calculated to ensure that freedom from whatever hinders the love of God and of our neighbour, which should be the distinguishing mark of the perfect life. From this point of view, two counsels are put prominently forward in the New Testament as necessary for perfection, namely the counsel of poverty: "If thou wilt be perfect, go sell what thou hast, and give to the poor," (Matt. xix, 21), and the counsel of perfect chastity practised for the sake of the kingdom of heaven (cf. Matt., xix, 12, and I Cor., vii, 36-40, and the commentary of Cornely on the latter).

These two counsels teach us what we have to avoid; but it remains for a man to fill his life with acts of perfection, to follow Christ in His life of charity towards God and men, or, since this would be perfection itself, to devote his life to an occupation which will make it tend towards union with God or the service of his neighbour. Religious life then is made perfect by a complete profession of loving work, either of devotion or of pious activity. The profession, negative as well as positive, is placed under the control and direction of ecclesiastical authority, which is entrusted with the duty of leading men in the ways of salvation.
and holiness. Submission to this authority, which may in one sense or another be called a duty, is therefore a necessary part of religious life. In this is manifested obedience as a counsel which governs and even supplements the two others, or rather as a conditional precept, to be observed by all who desire to profess the perfect life. The religious life which is pointed out to us by the Evangelical counsels is a life of charity and of union with God, and the great means it employs to this end is freedom and detachment from everything that could in any manner prevent or impair that union. From another point of view, in the same counsels, if special consecration to Christ and God, to whom every Christian acknowledges that he belongs. St. Paul tells us: “You are not your own” (I Cor., vi, 19); and again “All things are yours, and you are Christ’s, and Christ is God’s” (I Cor., iii, 22, 23).

II. HISTORICAL SURVEY.—(1) Earliest Examples of Religious Life.—(a) Persons.—The Christian virgins were the first to profess a life distinguished from the ordinary life by its tendency to perfection; continence, and sometimes the renunciation of riches, attached themselves to Christ. (See Nuns.) The Fathers of the first century mention them, and those of the second century praise their mode of living. Shortly after the virgins, appeared those whom Clement of Alexandria (Pædagog., I, 7, in P. G., VIII, 330) called “virgins” and whom the Latin Church called “confessores.” They also practiced chastity, and sometimes of poverty, as in the case of Origen and St. Cyprian. In the Liturgy, they took rank before the virgins, and after the ostiarii or doorkeepers. Eusebius (Hist. eccl., III, xxxvii, in P. G., XX, 291–4) mentions among the “ascetics” the greatest pontiffs of the first ages, St. Clement of Rome, St. Ignatius of Antioch, St. Polycarp, and others.

We find in the third century the first distinct traces of the kind of life in which the religious profession became by degrees perfected and brought under rule, that of the monks. The note which characterizes them at first is their seclusion from the world, and their love of retirement. Till then virgins and ascetics had edified the world by keeping themselves pure in the midst of corruption, and recollected in the midst of dissipation; the monks endeavoured to edify it by avoiding and contemplating all the world esteem most highly and declares indispensable. Thus the life of the solitary and the monk is a life of austerity as well as of retirement. The world which sent travelers and wars, also sent the ascetics; the monastery was an asylum of the persecuted, a refuge from the world, a safe heaven, the place of the religious, who sought to get rid of the dangers of the world. The religious life took the form of a war against nature. The persecution of Decius (about 250) gave the desert its first great hermit, Paul of Thebes; other Christians too sought refuge there from their tormentors. Anthony, on the contrary, at the age of 20 years, was won by that appeal which saddened and discouraged the rich young man of the Gospel, “If thou wilt be perfect, go sell what thou hast, and give to the poor” (Matt., xix, 21). He dedicated himself to the life of prayer, and retired into the desert, where he lived a life of prayer and contemplation, and was the first hermit to bring to the monastic life the great idea of the life of prayer, that of the monk. His life and death, at 100 years of age, gave a great impulse to monastic life in Egypt and Africa. Our task is only to depict the main features of religious life and its successive transformations. From this point of view, special mention is due to the great lawgiver of the Greek monks, St. Isaac. Comparing the solitary and the cenobitic life, he points out one great difference in the latter, namely the opportunity which it offers for practising charity to one’s neighbour; and while deprecating excessive mortifications, into which vanity and even pride may enter, he exhorts the superior to moderate the exterior life reasonably. St. Basil too permitted his monks to undertake the education of children; although he was glad to find some of these children embracing the monastic life, he wished them to do so of their own accord, and with full knowledge, and he did not intend that a son or daughter be restrained by an offering made by the son or daughter to St. Augustine in the common life which he led with the clergy of Hippo, gives us, like St. Eusebius at Vercelli, a first outline of canonical life. He instituted monasteries of nuns, and wrote for them in 427 a letter which, enriched with extracts from the writings of St. Fulgentius, became the rule known by the name of St. Augustine. St. Columbanus, an Irish monk (d. 615), under whose name a very rigid rule was propagated in Ireland, was the apostle and civilizer of several countries of Europe, notably of Germany.

(b) Characteristics.—After this rapid glance at the origin of the religious life we may now consider its principal characteristics. (i) End.—The life of the monks, more systematized than that of the virgins and ascetics, was a far more complete religious profession, especially for personal sanctification: contemplation and victory over the flesh were bound above all to lead to this result. The monks did not aspire to Holy orders, or rather they desired not to receive them. St. John Chrysostom exhorted them to be animated by Christian charity which willingly consents to bear heavy burdens, and without which fasting and mortification are of no profit at all. (ii) Obedience.—As good Christians, they owed obedience to their bishop in religious matters, and their profession, if they rightly understood its spirit, made prompt and complete submission easy. But religious obedience, as we understand it now, began only with the cenobitical life, and at the time of which we speak there was nothing to oblige the cenobite to remain in the monastery. The cenobitic life was also combined with the solitary life in such a way that, after a sufficient formation by the common discipline, the monk gave proof of his fervour by retiring into solitude in order to fight hand-to-hand against the enemy of his salvation, and to find in indigetia (Iustitius) the means of evading the severity of his life. (iii) Poverty.—Poverty then consisted for the hermits in the renunciation of worldly goods, and in the most sparing use of food, clothing, and all necessaries. The cenobites were forbidden to enjoy any separate property, and had to receive from their superior or the procurator everything they needed for their use; they were not, however, incapable of possessing property.

(iv) Chastity: Vows.—Having once entered the religious life, the virgin, the ascetic, and the monk felt a certain necessity to make a vow, and the return to the world would be such inconstancy as to merit the reproach of Christ. “No man putting his hand to the plough, and looking back, is fit for the kingdom of God” (Luke, ix, 62). Still we have no evidence to prove that there was a strict obligation, and there were no vows properly so called: even for virgins, the passages from Tertullian and St. Cyprian, on which some persons rely, are capable of another interpretation. Certain a woman who was bound to Jesus Christ by a profession of virginity, fell into sin, was punished only by severe ecclesiastical penalties; but St. Cyprian who regarded such a person as an adulterous bride of Christ, permitted the marriage of such as were not able to observe continency (see Koch, “Virgines Christi” in “Texte und Unter-
suchungen", (1907). The oldest decretal we possess, that of St. Siricius to the Bishop Himerius (385), brands with infamy the carnal intercourse of monks and virgins, but the question of a regular marriage is not considered until the First Lateran Council (1123) and of XIII, 137). Schenute, it is true, introduced a form of vow, or rather of oath, of which the Coptic text has been discovered; but the very reflections which he made before introducing it appear to show that it had no other effect than to secure the execution even in secret of the vow as against all outside influences. Such an entrance into the monastery: these vows therefore may be compared to the vows made at baptism. No term is specified for their duration, but Leelercq (in Cabrol, "Diet. d'arch. chrét.," a. v. Cénotibiame) assumes that the obligation continued during the term of residence in the monastery. The text is as follows, taken from the German translation of Leipolt:—

"Covenant. I promise (or I swear) before God in His holy temple, in which the word that I have spoken is my witness, that I will not defile my body in any way, I will not steal, I will not bear false witness, I will not lie, I will not do wrong in secret. If I break my oath, I am willing not to enter into the kingdom of heaven, although I were in sight of it. (On this passage cf. Pfeiffer, in "Analecta Bollandiana," 1905, 14). If I break my promise, if I hide the Holy Oath, then I will destroy my body and soul in hell, for I should have broken the oath of allegiance that I have taken." And later on occurs this passage: "As for contradiction, disobedience, murmuring, contention, obstinacy, or any such things, these faults are quite manifest to the whole community" (Leipolt, "Schenuti von Atriœ" in "Texte und Untersuchungen", 1903, p. 108).

(v) Canon Law.—The canons of the Council of Cangra (330) first introduced the law relating to regulars by the recommendations which they address to virgins, continent persons, and those who retire from worldly affairs, to practise more faithfully the general duties of piety towards parents, children, husband or wife, and to avoid vanity or pride. Other particular councils, that of Alexandria (362), of Saragossa (380), the Fifth Synod of Africa (401), and a council held under St. Patrick in Ireland (about 480), decided other matters connected with the religious life. The General Council of Chalcedon (451) makes the eremitical monasticism subject to the control of the bishop. The Councils of Arles (about 452) and Angers (455) sanction the obligation of perseverance. The same Council of Arles and the Synods of Carthage held in 525 and 534 forbade any interference with the abbot in the exercise of his functions over his monks, reserving to bishops the ordination of clerics in the monastery, and the consecration of the oratory.

(2) Regular Organization of Religious Life.—(a) Monks and Monasteries.—We have now arrived at the sixth century. It will be necessary to go back a little in order to notice the immense influence of St. Basil (331-79) over the religious life of the East and the West. The principles which he lays down and justifies in his answers to the doubts of the religious of Asia Minor, that is in what are called the shorter and longer rules, inform and guide the religious of the present day. St. Benedict was inspired by these as well as by the writings of St. Augustine and Cassian in writing his rule, which from the eighth to the tenth centuries, and more recently, has been the religious life of the West. In order to put an end to the capricious charges from one house to another, the patriarch of Western monks introduced the vow of stability, which bound the monk to remain in the house in which he made his profession. The reforms of the ten years without being attacked from without, so that they gave rise to aggregations of monasteries, which prepared the way for the religious orders of the thirteenth century. We may mention the Congregation of Cluny founded by St. Odo (abbot from 927 to 942) which, in the twelfth century grouped more than 200 monasteries under the authority of the abbot of the principal monastery, and of the Trappists, which were the eleventh century, to which the Trappists belong, and of which St. Bernard was the principal light. Less for the sake of reform than of perfection, and of adapting to a special end the combination of the cenobitic and eremitic life. St. Romuald (d. 1027) founded the Camaldolese Order, and St. John Gualbert (d. 1073) the Congregation of Vallombrosa. From the eleventh century also (1084) date the Carthusians, who have needed no reform to maintain them in their pristine fervour. St. Basil and St. Benedict were expressly concerned only with personal perfection, to which their disciples were to be led by leaving the world and renouncing all earthly wealth and natural affections. Their life was a life of obedience and prayer, interrupted only by work. Their prayer principally consisted in singing the Divine Office. But when it was necessary, the monks did not refuse to undertake the cure of souls; and their monasteries have given to the Church popes, bishops, and missionary priests. We need only recall the expedition organized by St. Gregory the Great for the conversion of England. Study and labor are not the only duties of the religious of today. St. Bonaventure, selected to the monk's children offered by their parents, undertook the task of education, which naturally led to the foundation of schools and studies. Cassiodorus (477-570) employed his monks in the arts and sciences and in the transcription of manuscripts.

(b) The Canons Regular.—Many bishops endeavoured to imitate St. Augustine and St. Eusebius, and to live a common life with the clergy of their Church. Rules taken from the sacred canons were even drawn up for their use, of which the most celebrated is that of St. Chrodegang, Bishop of Metz (766). In the tenth century, this institution declined; the canons, as the clergy attached to a church and living a common life were called, began to live separately; some of them, however, resisted this relaxation of discipline, and even added poverty to their common life. This is the origin of the canons regular. Benedict XII by his Constitution "Ad decorum" (15 May, 1399) prescribed a general reform of the canons regular. Among the canons present the day we find the Congregation the Canons Regular of the Lateran or St. Saviour, who seem to date back to Alexander II (1063), the Premonstratensian Canons founded by St. Norbert (1120), and the Canons Regular of the Holy Cross founded at Clair-vaux in the same year by St. Bernard. The canons regular ex professo united Holy orders with religious life, and being attached to a church, devoted themselves to promoting the dignity of Divine worship. With monks, Holy orders are accidental and secondary, and are superadded to the religious life; with canons, with the clerks regular, Holy orders are the principal thing, and the religious life is superadded to the Holy orders.

(c) The Mendicant Orders.—The heretics of the end of the twelfth and beginning of the thirteenth century reproached churchmen with their love of riches, and the laxity of their lives; St. Dominic and St. Francis offered on the contrary the edifying spectacle of fervent religious, who forbade their followers the possession of wealth or revenues, even in common. The mendicant order, regarded by the theologians as an idealistic: poverty, practised in common, and the mixed life, that is the union of contemplation with the work of the sacred ministry. Moreover, the mendicant orders present the appearance of a religious army, the soldiers of which are moved about by their superiors. The hierarchy of the religious army, without being divided by the various undertakings, recognizes a hierarchy of local, provincial, and general superiors. The order, or at least the province, takes
the place of the monastery. Other important points may be noticed; the mendicant orders are founded only by favour of an express approbation of the sovereign pontiff, who approves their rules or constitutions. The form of vows which relates explicitly to poverty, chastity, and obedience, which was occasioned by the famous dispute in the Franciscan Order. The Franciscans were founded by St. Francis in 1209; they are now divided into three orders according to their vows; as really belonging to the same stock: (1) the Friars Minor, formerly called Observantines, and more recently Franciscans of the Leonine Union, who may (when there is no possibility of mistake) be called simply Friars Minor; (2) the Friars Minor Conventuals; and (3) the Friars Minor Capuchins. The Dominicans, or Friars Preachers, go back to 1215. Since 1245, the Carmelites, transplanted from Asia into Europe, have formed a third mendicant order. Alexander IV added a fourth by his Constitution "Iciot" (2 May, 1256) which united under the name of St. Augustine several congregations of hermits: these are the Hermits of St. Augustine. The Servites were added in 1256 as a fifth mendicant order; and there are others. (See FRIAR.)

(b) Before we pass to a later period, it is necessary to mention the religious institutes of a quite special character. The military orders date from the twelfth century, and while observing all the essential obligations of religious life, they had for their object the defence of the cause of Christ by force of arms; among these were the Knights of Malta, formerly called the Equestrian Order of St. John of Jerusalem (1118), the Order of Teutonic Knights (1190), the Order of Knights Templars (1118), suppressed by Clement V at the Council of Vienne (1312), at the urgent request of the King of France, Philip-le-Bel.

(e) The misfortunes of Christendom were the cause of the foundation of orders vowed to the most excellent works of mercy, namely, the Redemption of Captives; the Trinitarians (Order of the Most Holy Trinity), and Mercedarians (Order of Our Lady of the Redemption of Captives). Both these date from the thirteenth century, the first being founded by St. John of Malta and St. Felix of Valois, the second by St. Peter Nolasco and St. Raymond of Pennafort. They follow the Rule of St. Augustine and are mendicant.

(f) The hospitalier orders are specially devoted to the relief of bodily infirmities; most of them are of comparatively recent origin. The most celebrated of all, the Order of Brothers of St. John of God, dates from 1572; the Cellite Brothers were approved by Pius IX, the Brothers of the Third Order of St. Anthony were approved by Honorius III in 1218.

(g) The Clerks Regular.—The mendicant orders were one of the glories of the later Middle Ages. Fresh needs led in the sixteenth century to a new form of religious life, that of the clerks regular. These are priests first of all, even in respect of their mode of life; their dress: they have no peculiar costume; they undertake all duties suitable to priests, and attend to all the spiritual necessities of their neighbour, especially the education of the young, which the mendicant orders had never attempted. Being clerks and not canons, they escaped at the same time the inconvenience of having a title of honour and of being bound to any particular church; many of them take a vow not only not to seek for ecclesiastical dignities, but even not to accept them. The first were the Theatines, founded in 1524 by St. Cajetan and Cardinal Peter Caraffa, later Paul IV; then came the Barnabites, or Regular Clerics of St. Paul, founded in 1533 by St. Anton Maria Zaccaria; the Clerks Regular of St. Francis de Sales, (consecrated by St. John Paul II) and approved in 1540, the same year which saw the beginning of the Society of Jesus. We may mention also the Clerks Regular Ministering to the Sick, called Camillians after their founder, St. Camillus de Lellis (1591). Several institutions of clerks regular, notably the Society of Jesus, make profession also of poverty in common and are thus at the same time clerks regular and mendicant orders.

(h) The Institutes with Simple Vows.—Till the sixteenth century, the orders of the West were distinguished by their object, their hierarchical organisation, their patrimonial system, and the number of inferior vows of obedience to the superior; the rule they adopted but not by the nature of their vows, which remained solemn. The tertiary nun communities of St. Dominic received (1281-91) a rule from the Dominican general, Munio of Zamora; and communities, both of men and of women, were founded in the thirteenth century with the tertiary Rule of St. Francis. In this way, many works of charity were prevented. But in the sixteenth century Leo X by his Constitution "Inter cetera", 20 Jan., 1521, appointed a rule for communities of tertiary nuns, "simpler and more easy to be observed. Their profession of the promised clausura was obliged to observe it. St. Pius V rejected this class of congregation by his two Constitutions, "Circa pastoralis" (29 May, 1566), and "Lubricum vitae genus" (17 November, 1568). They continued, however, to exist, and even increased in number, first tolerated, and afterwards approved by the bishops; and subsequently recognized by the Holy See, which, in view of the difficulties of the circumstances, has for more than a hundred years ceased to permit solemn vows in new congregations. These are the religious congregations of men and women to whom Leo XIII gave their canonical charter by his Constitution "Condite a Christo" (8 December, 1900). We may mention here an innovation introduced by St. Ignatius, who in the Society of Jesus imposed simple vows for a period preceding the solemn vows, and associated with the fathers professed by solemn vows, priests and lay brothers bound by simple vows only.

(i) The Eastern Orders. The Eastern Church, even that part of it which has maintained communion with Rome, has never known the life and many-sided vitality of the orders of the West: we find in it Monks of St. Anthony, and others of St. Pachomius; almost all the monasteries are Basilian. As the priests of the Greek Rite are not compelled to leave the wives whom they have, and as the Canons Regular were not, at least not at first, obligatory for the bishops, the latter are regularly chosen from among the monks. From another point of view, the unchanging East shows us in the monks of the present day, the institutions of the first ages of ceni Caroline

III. EXPOSITION OF THE RELIGIOUS LIFE. (1) Classical Description of Religious Life: Essential and Non-essentials. In our rapid survey of the different religious orders, we have seen something of the evolution of the religious life within the Church. The Gospel clearly shows us poverty and continence as means, and charity as the end; persecutions necessitated retirement and a first form of life entirely directed towards personal sanctification; community life produced obedience; the inconveniences caused by frequent change of residence suggested the vow of stability; the excessive multiplication and diversity of religious institutes called for the intervention of the sovereign pontiff and his express approbation of rules; the needs of soul and body grafted the practice of corporal and mental works of mercy upon personal sanctification, and joined the reception of Holy orders to religious profession; while the exigencies and difficulties of modern times caused the making of
simple vows antecedent to, or in substitution for, solemn vows.

In all these stages, the profession of the Evangelical counsels has been most carefully regulated by the Church. In the existing structure, some parts are fixed and regarded as essential, others are accidental and subject to change; we may then ask what is essential in the developed religious life. The religious state, to be perfect, requires (1) the three evangelical counsels: voluntary poverty, perfect chastity regarded as means to perfection; and in pursuit of that perfection, obedience to lawful authority (2) the essential professed habit, for the religious state means a condition or career publicly embraced; (3) the perpetual profession of these counsels, for the religious state means something fixed and permanent, and in order to ensure this stability in practices which are not made obligatory by any law, the religious promises himself to God by a perpetual vow. The religious state then is defined, as the mode of life, irrevocable in its nature, of men who profess to aim at the perfection of Christian charity in the bosom of the Church by the three perpetual evangelical counsels.

The religious state may exist in the proper sense without solemn vows, as Gregory XIII showed in his Constitutions “Quanto fructuosius” (2 July, 1553) and “Ascendente Domino” (25 May, 1554), declaring that the three habits of the religious were not essential in the religious; without community life, for the hermits were religious in the strictest sense of the word; without oral or written profession, since until the time of Pius IX, even tacit or implied profession was considered sufficient; without express and formal approbation by ecclesiastical authority, as this has only been insisted upon since the Fourth Lateran Council (1215), confirmed by the Second Council of Lyons (1274). Before this time, it was enough not to have been repudiated by ecclesiastical authority. However, in actual practice, the express intervention of ecclesiastical authority is required; this authority may be that of the Apostolic See or of the bishop. Many institutes exist and flourish with the approbation of the bishop alone; but, since the Motu Propria “Dei providentia” (16 July, 1906), the bishop before establishing an institute must obtain the written approbation of the Holy See.

Again, the Church, while not condemning the solitary life, no longer accepts it as religious. Formerly, a religious did not necessarily form a part of an approved institute; there were religious, as well as professed, as well as professed in such an institute or such a monastery. At the present day, a religious always begins by entering some approved religious family; only in exceptional cases of expulsion or final secession, does it happen that a religious ceases to have any connexion with some particular institute, and in such cases the bishop becomes his only superior. The Church insists on the use of a habit, by which the religious are distinguished from secular persons. A distinctive habit is always required for nuns; the clerical habit is sufficient for men. Those approved institutes whose members may be taken for seculars out of doors, lack that public profession which characterizes the religious state, in the sight of the Church, according to the Decree of the Sacred Congregation of Bishops and Regulars, 11 August, 1829. The question has long been discussed whether the religious state involves a donation of oneself, or whether the vows, as such, are sufficient. By such donation the religious not only binds himself to be poor, but he no longer considers he is the property of God, as much as and even more than a slave was formerly the property of his master. To show that this alienation of oneself is not necessary, it is sufficient to observe that if every religious ceased to belong to himself either for the purpose of marriage, or for the possession of property, any contrary acts would be null and void from the beginning, now this nullity has not always existed, and does not exist for all religious at the present day. In reality then the religious state consists strictly in the perpetual engagement, the source of which is found at present in the three vows.

The formal recognition of the Church has the effect of introducing the religious life into the public worship of Catholicism. As long as the promise or the vow remains a purely personal matter, the religious can offer himself to God only in his own name; his habits and holocausts are private. The Church, in ratifying and sanctioning his engagement, deputes the religious to profess in the name of the Christian community his complete devotion to God. He is consecrated especially by solemn profession, like a temple or a liturgical prayer, to give honour to God.

In practice, when offering himself to God, the religious also contracts obligations to the order whose child he becomes. Does the religious state in itself contemplate any such obligation of submission to an organized society or confession? There is nothing more natural, it is true, than that a person, who does not profess himself perfect but a simple aspirant after perfection, should choose for himself a master and guide; but even this does not seem to be a practice among the ancient religious. From all such subordination; even the pope may be a member of a religious order; the only essential obedience seems to be that which every man owes to the hierarchical Church, and to those whom she clothes with her authority.

(2) Various Forms of Religious Life.—The essential unity of the religious life is consistent with a great variety which is one of the glories of the Church, and permits a larger number of men to find a religious profession adapted to their needs and dispositions, and multiplies the services which religious render to Christian society and mankind in general. Besides the common end of religious life, which makes it a school of perfection, the different orders have special objects of their own, which divide them into contemplative, active, and mixed orders. The contemplative orders devote themselves to union with God in a life of solitude and retirement; the active orders expend their energy in doing good to men. If their activity is spiritual in its object and requires contemplation for its attainment, they are mixed orders, such as those which are devoted to acts of piety. In order to educate, the orders keep the name of active order if they devote themselves to corporal works of mercy, such as the care of sick persons and orphans.

The dominant note of their mode of life gives us, as we have seen, clerical, monastic, mendicant, military, and hospital orders. They divide themselves into various branches in the Church at large, with simple vows and solemn vows: even the number of vows differs in different institutes. There remain still two other points of difference which require to be considered, namely the juridical condition, which distinguishes religious orders from congregations, and the rule.

(3) Religious Life and the Sacred Ministry.—If the monastic life has sometimes appeared incompatible with those sacred functions which drew the monk out of his silence and retreat (see Decree of Gratian, c. XVI, q. 1, c. 1, 2, 4, 6, 8, 10, 11), the simple division into contemplative and mixed orders shows the mistake of those persons who have represented the religious life as inconsistent with the sacred ministries to the Church. If they were opposed to charity, or apostolic zeal did not presuppose and foster the love of God. This error, which had already been refuted by St. Thomas in his “Contra impugnantes religionem”, ch. iv, directed against William of St. Anouir, was renewed in the Jansenist pseudo-Coun-
Religious order has been naturally applied exclusively to institutes with solemn vows. The religious order then is, properly speaking, an institute fully approved by the Holy See, and having solemn vows of religious life. This full approbation for the whole Church calls into action the magisterial office of the pope, in giving it the pope now declares that there is nothing in the mode of life, which is hurtful to morals or propriety, but assures the faithful that it is calculated to lead souls to Evangelical perfection (cf. Suarez, “De religione,” VII, II, xvii, n. 17).

(b) Two great classes of orders.—From the point of view of their organization, the religious orders owe their division into two great classes to their very origin. The oldest, derived from monasteries formerly quite independent, leave to each religious house a certain authority under a perpetual abbot. The monks or canons also belong to a particular monastery, and special rules are made for changes, temporary or permanent, among the subjects. Such are the Black Benedictines and Cistercians, and canons regular. Many for a long time have only abbots, visitors of the monasteries forming a corporation (see below), and being the head of that congregation, Leo XIII gave the Benedictines their abbettorial, who holds office for twelve years. These same orders have no provincial superiors; the visitors more or less take their place; but the provinces are not at all like a province; and the houses are so little independent of each other that some refuse to recognize the local superior, the quality of a prelate invested with ordinary jurisdiction, though most religious writers give him this position.

(c) The Seat of Authority in the Order.—General Chapter and Superior.—In all religious orders we find the chapter, whether it be the chapter of the monastery to limit the monarchical authority of the abbott and fill a vacancy, or the general chapter, to appoint for the fixed term a new superior-general, to receive the accounts of the previous superior, and to exercise jurisdiction, within permitted limits, to modify the constitutions which have not the force of pontifical laws, and to pass new decrees for the whole order. The election of the superior-general is by secret ballot (Council of Trent, sess. XXV, c. vi) and generally requires the confirmation of the pope. The same chapter also elects the general councils, consisting of definitorial, general, or assistants, and generally also the procurator-general. In most orders, the procurator-general, who is the representative of the order in all dealings with the Holy See, is a provincial superior, and sometimes even a sort of vice-general, who takes the place of a general deceased, absent, or incapacitated: among the Discalced Carmelites and the Hermits of St. Augustine and in the Society of Jesus, he possesses no jurisdiction.

Provincial and local Superiors.—Under the superior-general, the orders not anterior to the thirteenth century have provincial superiors, who administer the affairs of the province with the assistance of a council. Sometimes they are appointed by the provincial superior, and the local superior is in other cases, sometimes the superior-general in council makes all important appointments. The provincial chapter or provincial congregation has then no jurisdiction, and can only send delegates to the general or the chapter general, in order to make known their wishes. In all...
places where the canonical Office is recited in choir, there is a conventual or local chapter, which does not exist in the orders and congregations of more recent foundation. Among the Capuchins, the provincial is appointed by the provincial chapter, and in his council appoints the local superiors. The local superior is directly assisted by a second, who holds his place in case of absence or incapacity: he is called prior in the abbeys, or sub-prior where the superior is called prior; otherwise he is termed minister. The local superior is called guardian among the Franciscans; in parishes where he is prior, superior, or vocato. The provincial and general of the Franciscans are called minister-provincial and minister-general. To replace the ordinary superiors temporarily the constitutions of orders provide vicars, vice-provincials, and vice-rectors.

The superiors have always a power of private or domestic order, called dominative, which permits them to command their subjects, and to administer property according to the rules of the institute; and the first superior of the convent, by appealing to the vote or to the qualification of making known his decision, is himself under no command. Moreover, if they be priests, the principal superiors of religious orders possess the double jurisdiction of the forum internum and the forum externum, which makes them the ordinary prelates of their religious orders. Consequently, the general or the provincials, and according to an at least probable opinion, the first local superiors also. They have jurisdiction to appoint confessors, approved by the ordinary, to reserve cases to themselves (though Clement VIII limited this power), to inflict spiritual censures or punishments, and to absolve or dispense from them: their power of dispensation with regard to their subordinates is the same as bishops generally have over their diocesan. Various privileges are conferred upon them in addition, and their power is even extended to the temporary custodians, which pass, as a matter of right, from the generals of orders to those who replace or succeed them. The legislative power ordinarily exists only in the chapter general: the judiciary power of the prelates does not extend to causes and offences which are cognizable by the Holy Office. The prelates are at the same time fathers bound to watch over the spiritual welfare of their children, heads of the community, who are empowered to make general provision for the good order of the common life, and magistrates invested with a power, however, extraordinary, to establish rules, and even to ordain the Apostles, when He said "As the Father hath sent me, I also send you." This authority is derived from the Holy See; and, as it is ordinary, it may be delegated.

In theory it extends to the spiritual direction of inferiors; but for a long time the Holy See has shown a desire to separate the direction of the conscience from the direction of outward conduct, or at least to take away all appearance of coercion from the former; thus the prelate may hear the confessions only of those who formally express a desire to be absolved by him, and for the regulation of Communions, the religious is bound to take the advice only of his confessor. In every house several confessors should be appointed, who can easily in any particular case obtain jurisdiction overreserved sins, if they have not ordinarily the necessary faculties; the prelate, however, may, according to the rule, be occupied with the direction of consciences outside the confessional; this is forbidden only in the case of lay superiors, safeguarding always the liberty of inferiors to open their minds to their own fathers.

The temporal administration is subject to the general laws, which forbid the alienation of immovable property, and of movable property of great value, and which also disallow the wastefulness and rash contracts or borrowings (see the Constitution "Ambo to"

non alienandis, III. 4, and the Instruction "Inter ex" of 1937 July, 1909). The prelate must administer like a prudent head of a family, and take care that the funds are safely and productively invested. Was stated in the article NUNES, the prelate's power of jurisdiction often extends to monasteries of the second order.

(d) Authorities outside the Order. (i) Sovereign Pontiff. - Outside its own body, the order has the sovereign pontiff as superior possessing the plenitude of authority; he has the power to suppress a religious order, or to revive it or to put it into interdict. Thus, the Second Council of Lyon (1274), Gregory X suppressed the orders which came into existence after the Fourth Council of the Lateran (1215), and Clement XIV in 1773 decreed the suppression of the Society of Jesus. Sometimes an order which has been extinguished rises again from its ashes. The order of Piarists, or Scolopi, founded by St. Joseph Calasanctius, which was abolished by Innocent X in 1664, was re-established by Clement IX; and Pius VII in 1814 restored universally the Society of Jesus, which was abolished by the White Rites on the advice of the Holy Father, in 1792, the Pope, a fortiori, may modify the constitutions, appoint new superiors, and, in short, exercise all powers that exist in a religious order.

(ii) Roman Congregations. - The pope exercises his ordinary control through the Sacred Congregation of Religious, which, since the Constitution "Sapienctia" of 19 June, 1908, is the only congregation occupied with the affairs of religious orders. Formerly, the religious of the missions were under the direction of the Propaganda, which has now no authority over them, except as missionaries; the others were under the Congregation of Bishops and Regulars, which was abolished by the constitution of 1713, or the Congregation of Propaganda was also the Congregation of Discipline and Reform of Regulars, which was principally occupied with the maintenance and restoration of an interior discipline in orders of men, and the Congregation of the State of Regulars, established by Innocent X in 1632, which was replaced under Innocent XII by the Congregation of Discipline, and re-established by Pius IX in 1847, to advise on the measures to be taken in the circumstances of the time for monasteries of men. After having issued some very important decrees on the object of letting the authority of the Holy Office works, it ceased to work; and Pius X suppressed both these congregations by his Motu proprio of 26 May, 1906. The authoritative interpretation of the disciplinary decrees of the Council of Trent gave the Congregation of the Council a power over regulars, which it used largely before the nineteenth century; but at present its authority is limited to the secular clergy. The Congregations of the Holy Office and the Index exercise over religious, as well as over the rest of the faithful, their power of judging persons charged with offences coming under the Holy Office, and of censoring books and other publications.

(iii) Cardinal Protector. - Most orders have a cardinal protector. The institution goes back to the time of St. Francis, who recognizes in him a governor, a protector, and a corrector; he is appointed by the sovereign pontiff. Since the time of Innocent XII (Constitution, "Christi fidelium", 17 February, 1694) he has ceased to have ordinary jurisdiction; he is therefore nothing more than a benevolent protector, who, from time to time intervenes in the affairs of his order.

(iv) Bishop and Privilege of Exemption. - Religious orders are exempt from episcopal jurisdiction, and in spite of exceptions to this privilege, created by the Council of Trent and later, the exemption remains the rule and the exception must be proved. The exemption is above all personal, and also local: religious are
not under the orders of the bishop, and their monasteries and churches, unless these be parochial, cannot be visited by him. The Holy See, however, in practice does not permit the rule of local exemption to be extended to secular persons during their stay in a convent, nor is the same extension to be made to those who as masters or even as servants, live in the convent as if they were part of the religious family, benefit by it. The question whether pupils who are boarders in the convent may be called familiars is open to dispute. According to the Council of Trent, the bishop has over religious a jurisdiction sometimes ordinary, sometimes delegated in the name of the Holy See, sometimes bishops may act also, as special delegates of the Holy See; the expression is somewhat obscure, but the object appears to have been to give the bishop an incontestable right to interfere in certain cases (see Vermeersch, "De relig. inst. et pers.", I, n. 968). As the exemption of regulars is not active, that is, as it does not give independent power over a fixed territory, regulars are subject to the bishop in all that concerns the administration of the sacraments to seculars, and the direction of such persons, due respect being paid to certain privileges attached to churches and colleges. Especially for the abdication of seculars, they must be approved by the bishop of the place in which confinement is required. Besides this, bishops may be entitled to interfere to permit the erection of a convent, to approve the renunciation of property made before solemn profession, to test the vocation of nuns, to approve or condemn the publication of regulars. To control, if not to refuse, collecting from house to house, to summon regulars to processions, and settle questions of precedence, to consecrate the churches of regulars, to pontificate in them, to fix the stipends of Masses, and prescribe the Collects. His name must be mentioned in the Canon of the Mass; be decides all causes which concern the Faith; he may also, in certain cases exercise over regulars his coercive power. But (at least in regard to certain orders specially exempted) it would be incorrect to say that whenever the bishop may interfere, he may also inflict censures. It is admitted also that, at least with the permission of his superior, the religious may ask the bishop to exercise some of his dispensing power, in his favour, and it is understood that the Lenten indulgences and general dispensations from abstinence apply to such requests. It would, however, be dangerous to conclude from this that the bishop may intercede to secure some grace for the regulars, and that he may intervene in some grave and public fault. When expelled, he incurs a suspension from which the Holy See alone can free him. Even one who has been set free, if he is in Holy orders, is not at liberty to leave the house until he has found a bishop willing to accept him in his diocese, and some means of honest livelihood: strictly speaking, the acceptance should be final, but in practice this is not insisted upon. If he leaves the house without doing what is required, he is suspended until he has fulfilled both conditions.

The regular may also, in theory, migrate from one order to another more severe; from this point of view, the Carthusian Order is the most perfect. In practice, failing the consent of the superior-general of both the orders in question, these migrations take place only with the authorization of the Holy See. The professed regular who migrates into another order makes his novitiate afresh therein, but retains his first profession until he has made solemn profession in his new order. Until that time, if he does not succeed in finding a place, he performs in the manner of a postulant in the former place in the order he has quitted; and even then if, in addition to the essential vows of religion, his first profession has laid any special obligations upon him, for instance that of not accepting any ecclesiastical dignities, these obligations are not extinguished by his first profession. (For the obligations of religious vows, see VOW; OBEDIENCE, RELIGIOUS; POVERTY; and for the enclosure, see CLOISTER.)

(g) Habit and Choir.—If an order has a special habit, the members are strictly bound to wear it, and if any of them puts it off without good cause, he incurs an excommunication not reserved (Const. "Ut periculosa", 2 Ne clerici vel monachi, in 6o iii, 24). This excommunication appears to exist in spite of the Constitution "Apostolica", because it concerns the interior discipline of orders, but it applies only to those who are professed under solemn vows. The obligation to retain the habit extends also to bishops of the order, if they are not canons or clerks regular.

Most orders are bound to recite the Office in choir, and say the conventual Mass. The obligation of choirm, at least the grave obligation, binds the community and the superior, whose duty it is to see that the Office is recited in common. But the religious professed under solemn vows, who do not assist in choir, are bound from the day of profession to recite the Office in private, even if they are not in Holy orders. This obligation does not apply to
lay brothers, or to persons professed under simple vows.

Orders of women. Second Orders.—In connexion with certain orders of men, there are also orders of women, instituted for similar objects, and in this respect sharing in the same evolution. We say "in this respect" for the rigours of the enclosure imposed upon nuns under solemn vows (see Cistercians) necesarily preceded any plan of reform, and after the model of the mendicant orders or clerks regular. Orders of women have sometimes an existence, and even an origin, independent of any order of men. This is the case especially with the more recent orders, such as the Sisters of the Visitation and the Ursulines. Very often they are connected by their origin and their rule with an order of men. The first monastic rules, which did not contemplate the reception of Holy orders, were as suitable for women as for men; thus there were Basilian and Benedictine nuns, simply following the Rules of St. Basil and St. Benedict. Neither the rule of the mendicant orders nor that of the clerks regular was suitable to women. St. Francis first, and then other founders, wrote a second rule for the use of nuns. Hence this conflict of a second rule placed normally under the jurisdiction of the superior-general of the first order (see NUNS).

(i) Third Orders.—The grant of a third rule to secular persons gives rise to the third orders. At this time, it might seem that these things are firmly established in community under this rule; they are then religious, ordinarily members of a congregation with simple vows. But, as we said above, there were communities of this character with solemn vows, and there is a regular Third Order of St. Francis, which goes back to the fifteenth century and which received modified constitutions from Leo XIII (20 July, 1888).

The associations of secular tertiaries are also called orders; they owe this to the fact that they profess the Christian life under an approved rule: but these are secular orders; and religious, even those under simple vows, cannot validly belong to them. By his entrance into a religious order, a novice ceases to be a secular, and seeks after Evangelical perfection, which is not the contradictory of Christian justice, but is a realization of it in an eminent degree. It has also been held that a person who has been a member of a third order before becoming a religious at once resumes his place in it, if he legitimately returns to the world. No one can belong to several third orders at the same time. Not all religious orders have third orders attached to them; but those which recognize an order of nuns as their second order generally have tertiaries also. Thus there are no Benedictine or Jesuit tertiaries: the Benedictines have no second order, and the Jesuit rule expressly forbids the Society to have an institute of nuns under its authority. In later times the Oblates of St. Benedict have been assimilated to tertiaries. Third orders are distinguished from confraternities, in as much as the former follow a general rule of life, while the members of the latter are not bound by a religious rule of life laid down according to the counsels were called religiones. The Second Council of Arles, 452, can. 25, spoke of the profession of the monastic life as professionis religiosis.

(2) Religious Congregations.—(a) Meaning of the Word "Congregation".—There has been much change in the meaning of this word. It formerly denoted the whole body of religious living together; in this sense we find it in Cassian (Collations, 2nd Book) and in the Rule of St. Benedict (chap. xvii). The edifying spectacle presented by the monastery of Cluny under St. Od. (d. 942) induced many monasteries in France to beg the holy abbot to accept their supreme direction, and he undertook to rule them from time to time. Under his first two successors, numerous monasteries of France and Italy observed the usages of Cluny, while others were reformed by monks of Cluny. At the death of St. Od., sixty-five monasteries were under his rule, which thus formed a congregation, the members of which were no longer the individual monks, but the monasteries. In a similar manner, the union of monasteries with Cheaus produced the Congregation of Ctœaux; but here the celebrated carta cartialis, drawn up in a general chapter of abbeys and monks held at Ctœaux in 1119, placed the supreme direction of Cistercian monasteries under the Abbot of Ctœaux, and realized a much greater unity which prepared the way for the religious clergy of a later period (see "Carta cartialis" in P. L., CLXVI, 1377). Here the monasteries of Premonstratensian Canons were early grouped in circles (circariata), at the head of which was a "circulator" whose office resembled that of the provincial of more recent orders. The Abbot of Prémontré, luminous Presbyter, was the Abbot of Ctœaux and thus formed a congregation, the members of which were no longer the individual monks but the monasteries.

Innocent III, by his Constitution "In singulis", which was promulgated at the Fourth Council of the Lateran, and forms ch. vii, 35, bk. 3 of the Decretals, ordered that a chapter of abbots and independent priors of every kingdom or province should be held every third year, to ensure the fervour of the observance, and to organize the visitation of the abbeys in order to prevent or correct abuses. The Council of Trent (Sess. XXV, c. viii) made congregations of monasteries general, ordering monasteries to unite themselves into congregations, and to appoint visitors having the same powers as visitors of other orders, under pain of losing their exemption, and being placed under the jurisdiction of the local bishop. There have, however, been also important reforms inaugurated by one monastery, and adopted by many others, without leading to the formation of a congregation. Such was that of William, Abbot of Hirsau (d. 1091), who wrote the Constitutions of Hirsau, the wise provisions of which, in some measure borrowed from Ctœaux and Ctœaux, made monasteries having no other bond of union than a spiritual community of prayers and merits.

In 1566, St. Philip Neri founded in Rome an association of priests who were not bound by any vow; being unable for that reason to call it an order, he called it theCongregation of the Oratory. Cardinal de Bérulle in 1611 founded a similar institute, the French Congregation of the Oratory. St. Vincent de Paul, the founder of the Lazarists, or Priests of the Mission, while introducing into his institute simple monastic vows of poverty, obedience, and chastity, insisted that it should be called secular. These vows are not followed by any act of acceptance by the Holy See or the institute. His association was called a congregation, as we see from the Bull of Alexander VII, "Ex commissis" (22 Sept., 1655). This it became usual to designate as congregations those institutes which resembled religious orders, but had not all their essential characteristics. This is the ordinary meaning generally accepted, though "Congregation" is also used of the secular congregation of Priests before long, the genus congregation was divided into several distinct species. (b) Religious Congregations properly and improperly so called.—First in order of dignity come the religious congregations properly so called. They
have all the essentials of religious life, the three perpetual vows, and the approbation of ecclesiastical authority. They are even approved by the Holy See. They lack only one accidental characteristic of an order; namely, the possession, in a word, of the Congregations of the Most Holy Redeemer, of the Passion of the Sacred Hearts of Jesus and Mary (or Pius Fathers), which have even the privilege of exemption. Institutes with perpetual vows approved by episcopal authority are thus more or less called religious congregations properly so called. Religious congregations in the wider sense of the word are institutes which have no perpetual vows, or lack one of the essential vows, or which even have no vows properly so called.

Thus the Daughters of St. Vincent de Paul make only annual vows, and as each year is completed they are free to return to the world. The Missionary Sisters of Our Lady of Africa, or White Sisters, form a religious congregation properly so called, but the White Fathers, on the contrary, are not bound by any vows, but take only an oath of obedience. We have spoken above of the Lazarists and Oratorians. The religious congregations improperly so called are sometimes designated pious congregations or pious societies.

The Institute of Charity of women, while Beneventan—that is, divided according to the quality of their members, into ecclesiastical congregations, consisting principally of priests and clerics, and lay congregations, most of whose members are not in Holy orders. Thus the Order of St. John of God, though mainly composed of laymen, includes a certain number of priests devoted to the spiritual service of its hospitals and asylums; while the Congregation of Penal Clerics of St. Victor is composed of priests and teaching brothers placed on the same footing as religious. Several religious congregations are called tertiaries of St. Francis, St. Dominic, or some other religious order; some of these date from the fifteenth and sixteenth centuries; others are more recent, such as the Third Order of St. Dominic founded by Lacordaire, which is devoted to teaching. But they must be regularly affiliated by the superior of the first order. This affiliation does not imply any dependence or subordination to the first order, but it requires as general conditions the observance of the essential points of the rule of the third order, and a certain similarity of habit. A decree of 18 Nov., 1905, of the same Congregation (cf. Periodicas de religiosis et missionaris, I, 15, p. 40; 54, p. 147; 59, p. 162; 11, 102, p. 57).

As to the law by which they are governed, religious congregations are divided into congregations dependent on the Holy See, and those under episcopal authority. The latter are strictly diocesan or interdiocesan, according as they are confined to a single diocese, or are scattered over several. Leo XIII, by his Constitution "Conditae" of 8 Dec., 1900, gave to the congregations their official character; and a set of regulations of the Congregation of Bishops and Regulars, of 20 June, 1901, known by the name of Normae, traces the general lines on which the Holy See wishes the new institutes to be constructed and the old ones reorganized.

(d) Religious Congregations dependent on the Holy See.—(i) Approbation.—Before a congregation can be placed under pontifical government, it must have received a Decree, in which commendation is bestowed on it, or merely on the intention of the founder and the object of the institution; then follows a Decree confirming the existence of the congregation, and approving its constitutions, first by a trial of some years, and then finally. Before the Constitution "Sapienti" (29 June, 1908), by which Pius X reorganized the Roman Cura, two congregations were occupied with the approbation of new institutes, the Congregation of Bishops and Regulars, and the Congregation of Propaganda; the latter approved those institutes which were founded in missions and in countries subject to its jurisdiction, and those intended exclusively for the missions. Since "Sapienti," the new Congregation of Religious alone has the power of approbation, and the religious of the whole world are under its jurisdiction: If they are missionaries, they owe obedience also to the Propaganda in all matters connected with their missionary character.

Except the approbation of tertiary communities (of both the sexes) with simple vows by the Constitution "Inter cetera" of Leo X (20 Jan., 1521) to which we have already alluded, the formal approbation of a religious institute with simple vows by the Holy See does not date back very far: the Brief of Clement XI "Inseruabilis" (13 July, 1703), approving the Constitution of the English Virgins (Institute of Mary), is perhaps the first instance in the legislation of the Congregation of Propaganda. Then the Congregation of Passionists. But on 26 March, 1687, Innocent XI, by his Constitution "Ecclesiae Catholici," erected the hospitaler confraternity of the Bethlemites into a congregation, and Clement VIII, on 15 Oct., 1593, approved with simple vows the Clerks Regular of the Mother of God. These two congregations were transformed into religious orders, the one by a Constitution of Clement XI (3 April, 1710), and the other by a Constitution of Gregory XV in 1621; but later, in consequence of a decree of the Spanish Cures, the Bethlemites were gradually extinguished. Institutes improperly called religious have been approved since the seventeenth century: we have already mentioned the Oratorians, approved in 1512, and the Priests of the Mission, approved in 1632: to these may be added the Supernians, approved in 1642, the Eudists in 1643, and the Secular Priests of the Venerable Holzhauser in 1650. For a long time the Holy See, while approving the constitutions of nuns, refused to recognize the institutes themselves. The approbation formerly required was contained in a letter of the Holy Father, "locum conservatori" ("without approbation of the institute"), which have now disappeared. Ordinarily the Holy See proceeds by steps; it requires first that the institute shall have existed for some time under a private or temporary title; then it grants special constitutions for some years, and last of all grants a final approbation. Religious congregations also receive a cardinal protector, whose office is more important in the case of an institute of nuns.

(ii) Authority of the Ordinary.—Although established under pontifical government, religious congregations are not free from the jurisdiction of the diocesan ordinary. Congregations of men owe him the common obedience of all the faithful, and of clerics, if their members are tonsured or in Holy orders. Use, rather than positive law, permits the superiors, being priests, to consider themselves as quasi-parish priests of their religious subordinates. For confessions even of their own subjects, they must be delegated by the bishop; and all approved confessors of the diocese may absolve these religious, who are subject also for reserved cases to diocesan law. The temporal administration is withdrawn from the authority of the ordinary: this is the case also with institutes of nuns. Certain institutes are entirely exempt from episcopal jurisdiction; such as the Passionists, the Missionary Fathers of the Sacred Hearts, or Pius Fathers, and the Redemptorists. Without being strictly prelates, the superiors of an
exempt institute, being priests, receive from the Holy See the power of jurisdiction in addition to the governing power belonging to all superiors, male or female. (For a comparison of these religious with regulars properly so called see the dissertation of Fr. Sales of the Holy See, 125, 345, 372, etc. miss.," Y, p. 33). It is to be remarked that the exemption of the convent does not always imply the exemption of the church. Sometimes the authority of a superior-general of a congregation of men extends to a congregation of sisters of a similar institute; but in practice the Holy See no longer approves of any but independent congregations. Whether exempt or not, congregations may never be established in a diocese, and may not open a new house, without the permission of the bishop.

(III) Organization of the Institute.—Congregations approved by the Holy See have the organization of religious orders: and the less rigorous enclosure of institutes with simple vows even permits the sisters to be organized in the same manner as orders of men. We find then at the head of the institute a superior-general appointed by a council, which, in the more important matters, must approve the measures proposed; then ordinarily provincial superiors with their councils, and local superiors. The superior-general, his councillors, and the procurator-general are always appointed by the general chapter. The congregations as in religious orders, the general chapter is the supreme power. It can, however, neither change the constitutions nor make laws properly so called; its orders remain in force until the chapter following. The general chapter meets for the election of the superior-general; if this takes place only every twelve years, there may be a meeting of the chapter after six years for the transaction of business. With this exception, the chapter is not summoned without the consent of the Holy See. Besides the general chapter, the provincial chapter, the general council, the secret council, the procurator-general, the ecclesiastical council, and two delegates appointed by the provincial chapter take part in this chapter. If the congregation is not divided into provinces, the superiors of important houses and one delegate from each house take the place of the provincials and delegates of the provincial chapter. The latter consists of the provincial, his councillors, and the superiors of important houses, accompanied by a delegate from each house. The provincial chapter has ordinarily no jurisdiction to make any change in the constitution of the chapter general. This chapter receives the accounts of the general administration, elects by secret ballot the general and his assistants or councillors, and deliberates over all important affairs of the congregation. Sometimes the sovereign pontiff, who may appoint directly to all offices, reserves to himself the right to confirm the nomination of the superior-general. The latter is generally elected for six or twelve years: in the Society of the Sacred Heart, the election is for life. Ordinarily he makes provision in his council for all changes which are not within the discretion of the chapter general. Every three years he is bound to submit to the Holy See an account in the form prescribed by the Decree of 16 June, 1906.

Where a priest or not, the superior, as head of the house, has authority over all who live in it, and derives from the vow of obedience his power to command according to the approved constitutions. He is recommended, especially if he is not a superior-general or provincial, to make moderate use of his authority, leaving in the diocese or community consultations from which he can do this only in writing. Although he controls the temporal administration, the Holy See requires that a separate person shall have charge of the accounts, even in the houses, and that a third shall deal with expenditures. The Holy See insists also that all valuables shall be kept in a chest with a triple lock, so that it can be opened only by means of three separate keys, which are to be kept by the superior, the procurator, and one of the councillors. In respect of their temporal administration, the congregations are independent of the bishop, but they cannot be established in a diocese without the Holy See, especially the precautions taken for the preservation of dowers and other funds (see the Decree "Inter ea" of 30 July, 1909, Vermeersch, "Periodica", 331, V, p. 11). Even without belonging to an exempt congregation, the superior, if a priest, obtains without difficulty the faculty of giving his subjects dimissorial letters for ordinations; and if such faculty is granted him, then, in respect of the certificates to be delivered, the competent bishop etc., the rules are the same for congregations as for religious orders.

We have treated of the admission of subjects, the novitiate, and simple profession under the titles: NOVICE; POSTULANT; and PROFESSION, RELIGIOUS. Ordinarily, and always in the more recent orders, temporary vows for some years preceded perpetual vows: these vows, even temporary, are reserved to the Holy See. While the superior has the power to dismiss religious who have not made perpetual vows, he has not always the power to release them from their obligations, and in that case it is necessary to have recourse to the Holy See. Religious who have received an anaglogue of religious orders, and those who have made perpetual vows, cannot be dismissed without the formalities prescribed for the dismissal of persons professed with solemn vows. Dismissal involves a suspension which is reserved to the Holy See; and the voluntary departure of a religious who, as a religious, has been admitted to Holy See orders, even of one whose temporary vows have expired, is not regular unless he has found a bishop and means of subsistence. The sanction is the same as for professed persons in a religious congregation. Secularization is seldom granted to members of a religious congregation, but recourse is had to dispensation from vows. Migration from one congregation to another cannot take place without the consent of the Holy See, and it is usual to seek for that consent before entering a religious order, though there is no law forbidding such entrance.

(d) Religious Congregations under Episcopal Authority.—(i) Approbation.—After the Constitutions of St. Pius V, which were opposed to simple vows, the Holy See took the oath of dedication to the Holy See, and the admission of the order is by the Holy See, and the voluntary departure of a religious who, as a religious, has been admitted to Holy See orders, even of one whose temporary vows have expired, is not regular unless he has found a bishop and means of subsistence. The sanction is the same as for professed persons in a religious congregation. Secularization is seldom granted to members of a religious congregation, but recourse is had to dispensation from vows. Migration from one congregation to another cannot take place without the consent of the Holy See, and it is usual to seek for that consent before entering a religious order, though there is no law forbidding such entrance.

More recently the Motu proprio "Dei providenti" (16 July, 1906) declared the necessity of pontifical authori-
has a very wide meaning, and by the terms of that Decree, this procedure is to be followed for all associations, whose members have a distinctive name and existence, and have joined themselves either for personal perfection, or to works of piety or charity: vows are not required. But, on the other hand, the institute thus formed remains episcopal; the ordinaries exercise over it all the rights mentioned in the Constitution "Conditæ" (ch. 1), except the right to ordain anything that the Holy See has specially laid down.

(ii) Authority of the bishop.—This Constitution formulates the principle of full and exclusive submission to the bishop; from which we conclude that the role of the bishop is the principle of natural justice and equity, which demands respect for acquired rights; by the nature of the institute, which must give its religious the means of making progress towards perfection according to the precepts of the Gospel; and by the plain exceptions of pontifical law. We say "the plain exceptions" because Decrees of the Holy See, which do not clearly refer to diocesan institutes, only give directions to bishops without restraining their power; moreover, in the immense variety of cases, prescriptions which are given to two institutes under circumstances which would be very troublesome to those whose life is diocesan; and the latter in the immediate control of the bishop often find the same security that the Holy See seeks to give by a new regulation to congregations upon itself.

We have now to distinguish between diocesan and interdiocesan institutes.—(a) Diocesan Institutes.—Congregations which exist in but one diocese are dependent only on a single bishop: he approves the institute, authorizes the erection of new houses, may forbid the extension of the institute into another diocese, and may for sufficient reasons close a house, or suppress the institute itself: he must take care, during the liquidation, not to violate the canonical laws concerning the disposal and alienation of ecclesiastical property. He may receive subjects himself, visit the houses to inquire into the religious discipline and temporal administration, and reserve to himself the approval of the most important acts. The Constitution "Conditæ" requires the superior in such a case to consult the beneficiaries and the same of male superiors to be appointed by election; the bishop may not only preside at the election, but also confirm or annul it; and when any grave cause prevents the holding of a regular election, he may, while awaiting a favourable opportunity for assembling the benefactors, make provision for the temporal government of the institute. He is bound, however, except in case of express provision in the constitutions, to leave the hands of the superior free to administer the institute and even to transfer the members (Reply of the Congregation of Bishops and Regulars, 9 April, 1895).

(b) Interdiocesan Institutes.—If the institute has houses in several dioceses, each bishop has authority over the houses in his own diocese; the consent of all is necessary to touch the institute itself, and in particular the duties which may be created by this situation may be removed by asking for pontifical approbation for the institute. Often also the bishop of the diocese of origin, in order to prevent difficulties and disputes, refuses to allow the extension into other dioceses, unless it is agreed that he shall have full authority over the religious life of the institute.

(c) Superior, Vows, Ordination.—In institutes under episcopal authority the ordinary jurisdiction is vested in the bishop, never in the superior: the latter has no power which is given him by the vows, and the internal authority which he possesses as head of the house. The vows, except the vow of perpetual chastity, if it has been absolutely taken, are not reserved to the Holy See. The dismissal of subjects does not require the formalities prescribed by the Decree "Auctis admundum" (4 Nov., 1892) which have been mere to institutes under episcopal authority. The following constitutes the only cases to which the rule applies: the dispasion properly so called; and the religious in Holy orders do not incur the suspension inflicted by that Decree on those who are expelled, or on those who depart voluntarily without having found a bishop or means of subsistence. In fact, the members of these institutes have always the same security that the ordinary superior has by this institute having received major orders in this manner, would be suspended until he had found a bishop and means of subsistence.

(i) Religious State of the Members.—The question has been raised whether members of an episcopal institute are really in the religious state, provided, be it understood, that they are bound by the three perpetual vows of poverty, chastity, and obedience. Our answer is in the affirmative, because the bishop, being the ordinary authority instituted by Christ himself, truly gives the institute to seek after the approval of the institute having received major orders in this manner, would be suspended until he had found a bishop and means of subsistence.

B. RELIGIOUS RULE.—To complete our description of the religious life, we have now to deal with the rules or constitutions by which religious are governed.

(1) Historical Survey.—In the earliest times, the religious monks were accustomed to live under the advice of some older monk in order to realize the ideal of monastic life; and very soon those who were renowned for their wisdom and holiness saw their instructions observed by a large body of disciples. Others drew up a rule of life for the use of candidates for the life of perfection. The necessity for such a rule chiefly affected the cenobites, for whom it was necessary also to organize common life and a hierarchical constitution.

The first rules were plans of perfect life, with details differing according to persons, times, and places, but framed upon the Gospel as their common fundamental rule. The first monks found their first rule in the Acts of the Apostles, iv, 32-5, where we are told how the owners of property voluntarily gave it in the hands of the community. This custom of giving was called the rule established under the Apostles (St. Pseudoiull, "Life of St. Augustine", c. v., in P. L., XXXII, 37). When intended for anchorites, the rules contained only individual counsels; those intended for cenobites dealt also with the entrance of the monastic life and the duties of obedience, and common life. Sometimes they were codifications of received usages, observed and subsequently collected by the disciples of some famous monks, sometimes they were the authentic work of the saint whose name they bore; not to mention the mixed character of certain rules composed with the help of authentic writings, but first published without any intention of making them a rule properly so called. St. Pachomius gradually compiled, according to the varying needs of the time, a synodical authentic text of which is not now in existence; certain MSS. give us more information on the subject of the rules of his disciple, Schenut. We possess the Rule of St. Benedict; the Rules of St. Basil and St. Augustin are of the mixed class. The answers of St. Basil to the questions of the monks form the first; the second consists in great measure of extracts from a letter addressed by St. Augustine in 423 to the nuns of Hippo (Ep. 211 in P. L., XXXIII, 960-5). Of the first class are the rules which are circulated under the names of Saints Anthony, Isaac, and Pachomius. We need not wonder that legend has attributed to some of the rules a superhuman origin: the Rule of St. Pachomius.
for instance, soon after its appearance, was said to have been dictated or even written on tablets by an angel; hence it acquired the name of the "Angel's Rule". These rules had no binding force, except sometimes for the inhabitants of a monastery during the term of their residence. In many monasteries various rules were observed: the monastic life did not derive its unity from the rule.

As orders began to approach more nearly to the modern form, and new ones were established having their own special objects in addition to religious profession, each institute had its own rule, which was in fact a plan of life after the spirit of the Gospel, improvised and consequently adapted to help them in the performance of their special objects of their institute. Such a rule is identified with the institute itself, and the obligation to persevere in the latter includes the obligation to observe the former. The rule takes this form among the canons regular, and more definitely in the mendicant orders. The Roman Council of 1139 recognized three rules, those of St. Benedict, St. Basil, and St. Augustine; and the Fourth Council of the Lateran (1215) refused to recognize any religious orders which did not observe a rule approved by the Holy See. Innocent III and Honorius III afterwards approved the Rule of St. Francis. Thus a new note was added to the rule, the approval of the Holy See; and the rule became a canonical law, governing the religious, although in the beginning only a private law. A step has recently been taken: until 1901, the Holy See was content to examine the laws of new institutes without troubling much over details; but as in the progress of legislation certain clauses were repeated, and new ones introduced in their place, it was decided in 1901 to enact a more uniform type of rule for new institutes: thus the Norme de 28 June, 1901, were drawn up, to be a common mould for the formation of all new institutes with but few exceptions. Henceforth the rules will be mainly the work of the Holy See, and all congregations will be, as regards their chief lines, organized in the same manner. The substance of the rule has also been greatly changed. In the beginning it was simply a short code of asceticism with such directions as were necessary for the organization of common life; and the orders properly so called, there were added to this code the regulations required by the special object of each institute: at present asceticism and the rule of life are kept distinct, and the only things to be treated of in the rules are matters of conduct.

(2) Rules and Constitutions.—In canonical language we distinguish between rules and constitutions: history easily explains this terminology. As already stated, the Fourth Council of the Lateran (1215), &c. Ne nimia. De religiosis domibus, etc. (iii, 36) confirmed by the Second Council of Lyons (1479) &c. Religionum un., ibid. in 6 (iii, 12) had forbidden new foundations of orders. The prohibition was understood in this sense that no order should be constituted under a new rule; and the sovereign pontiffs therein insisted on the advantage of the institutes they approved. Therefore, following the example already set in the eleventh century by St. Romuald, who adapted the Rule of St. Benedict to the cenobitical life, the founders chose a rule already received in the Church, adding such prescriptions as were required by the special object of their institutes. These prescriptions were called "constitutions". The term "rule" is, therefore, at present used only to denote one of the ancient rules, and more particularly the four great rules, each of which serves as a foundation to many institutes. (1) the Rule of St. Basil, or rather the collection of his rules divided into two classes, those expounded in detail, and those more concise; (2) the Rule of St. Benedict; (3) the Rule of St. Augustine formed with the help of his letter 211 to nuns, his sermons 355 and 855, concerning the ordination of clerics (P. L., XXXII, 355 sqq., and XXXIX, 1558) and some 115 letters of Fulgentius; and lastly (4) the Rule of St. Francis of Assisi, confirmed on 29 Nov., 1223, by the Constitution "Solet" of Honorius III.

The more recent laws, not only those which contain decisions on special points, but also those which apply only to particular orders or congregations, are properly called constitutions; the rule is always recommended by its antiquity: where there exist both a rule and constitutions, the rule, without having any greater force, nevertheless contains the more general and considerable elements, while the constitutions are also common to many religious orders or congregations. From this point of view, institutes are classified as follows: the more ancient orders, if not reformed, have only the rule of their founder; most orders have both rules and constitutions, and venerate the author of the rule as a sort of patriarch; while some orders and many congregations with simple vows have constitutions which with them take the place of a rule. The Rule of St. Basil governs most of the Congregations of the Eastern Church. The Rule of St. Benedict is the principal rule of the Western Monks; and it was called simply "the Rule". It governed also some military orders, such as those of Alcantara, and the Templars. The Rule of St. Augustine is common to the canons regular, the canons regular of St. Augustine, and of most special orders. Each special order required a somewhat less strict form of government: thus the Friars Preachers, the Servites, and the Religious of St. John of God have this rule besides their own special constitutions. Many congregations of hospitalers of both sexes are governed in the same manner. The Rule of St. Francis is observed by the three branches of his first order; the second order and many congregations of tertiaries also follow a rule of the same saint. The Carmelites, the Minims, the Society of Jesus, the Passionists, and the Redemptorists all have their own constitutions only.

(3) Binding Force of the Rule.—At the present day the rules and constitutions are ecclesiastical laws, and therefore obligatory, at least in their preceptive parts; but the obligation varies. In the Rule of St. Francis, for instance, some articles bind under mortal sin, others under venial sin; that of the Carmelites binds under venial sin only; and Suarez considers (De religione, VIII, 1, iii, 8) that with some respect some special morality, in cases of doubt we must presume a venial obligation. Apparently the Rule of St. Benedict and certainly the Constitutions of the Friars Preachers and the Society of Jesus do not bind directly, except to the acceptance of the penance imposed for their infirmity; nor is this spontaneous fulfilment of the penance always binding in conscience. Even then, the rule is a law, not a pure counsel: if a religious should profess himself independent of it, he would commit a grave offence against obedience; if he disregards it, he is guilty of an irregularity, and it rests with the superior to impose under sin the observance of each point of the rule. Moreover, in the motive which leads to a violation of the rule, or in the effect of such violation, there is generally an irregularity which makes the act a venial sin.

(4) Collections of Rules.—In very early times, there were collections of rules; we may mention that which in the language of the period, St. Benedict of Aniane (d. 821) called the "Concordia regularum", which was republished with additions by the Benedictine Gratianus (d. 1106) and in Paris in 1663. Broczie brought out a more perfect edition (Augsburg, 1759), which is reproduced in P. L., CIII, 393-700. Thomas of Jesus, a Carmelite, published (Antwerp, 1817) commentaries on most of the rules.
Supplement.—Perfection of the Different Religious Institutes.—If we wish to compare the different religious institutes from the point of view of their relative perfection, the excellence of the object gives the first rank to the mixed institutions, and to the contemplative institutes priority over the active. Perfection depends upon the harmonious combination of the means employed towards the end, the quality of the works to which the institute is devoted, and even the number of its means of action. The strictness of the observance, by putting further away the occasions of sin, is another reason of superiority, and above all, the strictness of obedience, which is now considered as the principal obligation of religious life. However, by canon law, respect is paid rather to the outward austerity for the life, and of this austere and strict life, the religious orders are considered the most perfect from that point of view. Institutes consisting of clerics and those with solemn vows have for this reason a certain superiority over lay institutes and those with simple vows.

Reliquaries.—It would follow of necessity from the data given in the article Relics that reliquaries—by which we understand in the widest sense, by box, casket, or shrine destined for the reception of relics—must have existed in some shape or form almost from the beginning of Christianity. With regard, however, to their construction, material etc. in the early centuries, there is not much that can be said positively. Even the names by which they were known (capa, capella, theca, pyxis, arca etc.) are quite general in character, and it seems certain that the same names also designated receptacles for the Blessed Eucharist, the holy oils, and other pious objects. Thus it becomes difficult to decide in the case of certain circular ivory said in the Berlin Museum is the best known and the earliest in date, whether they were or were not used as reliquaries. Most of them show nothing but the figures from the Gospel in the carvings with which they are abundantly decorated, but as there is one which depicts the martyrdom and execution of the popular Egyptian martyr St. Menas, it seems likely that this at least was a reliquary, intended possibly to contain the oil from his shrine. This oil was more commonly preserved in clay flasks, of which many still survive in various European collections. Passing over the phials attached to the loculi in the catacombs and supposed to contain blood, upon which disputed problems have been stirred, the earliest known reliquaries are probably certain silver boxes, two of which (one circular, the other oval in shape) were discovered at Grado in 1871 (see De Rossi in "Bull. di arch. crist.", 1872, p. 155). Both of these, along with various Christian emblems, bear inscriptions giving the names of saints, while other details confirm the view that they must have been intended for relics. A very similar box, but without inscription, was afterwards found in Numidia, and is now in the Vatican Museum. It was assigned with confidence by De Rossi to the fifth century (Bulletin, 1887, p. 119). Still another specimen, beyond all question intended for relics, has come to light in the treasury of the Sancta Sanctorum at the Lateran (Grütz, "Die römische Kapelle", 108-10). These were no doubt the kind of capella argentea which Justinian in 519 wished to send to Rome in hopes of obtaining from Pope Hormisdas relics of St. Lawrence and other Roman saints (P. L., LXIII, 474). Of somewhat later date are the pewter flasks and a little golden cross, or encoplia, still preserved in the treasury of Monza, and identified with much probability as presents sent by Gregory the Great to Queen Theodolinda. The pewter flasks contained oil, very probably only that of the lamps which burned before certain relics or in certain churches of the Holy Land. The encoplia, which is a remarkable little piece of jewellery, 3 inches in height by 2 inches in breadth, has figures and inscriptions and is believed to contain a fragment of the True Cross. St. Gregory in his letter describes it as a "phyllacterium" or "crucem cum ligno sanctae crucis Domini". Other small encoplia in the form of crosses, belonging approximately to the same period, are also preserved.

Of larger reliquaries, or shrines, our oldest surviving specimens probably date back to the seventh or eighth century. Among the remarkable objects preserved in the treasury of St. Maurice in the Valais is a gabled shrine about 10 inches long, 2½ broad, and 5½ high. It is said to have been brought from Rome by St. Martial in the fifth century, while on a plate of gold at the back particulars are given regarding its construction in honour of St. Maurice. This form of gabled shrine, which is often suggestive of a child's "Noah's Ark", remained the favourite type of reliquaries of importance during all the early Middle Ages. Perhaps the most magnificent specimen preserved is that known as the Shrine of the Three Kings in the treasury of Cologne Cathedral. After the storming of Milan (1162) the supposed relics of the Magi were carried off and brought to Cologne, where a magnificent silver casket, nearly 6 feet long, and 4½ feet high, was constructed for them. This superb piece of silversmith's work resembles in outward form a church with nave and two aisles. Of much earlier date but hardly less magnificent, owing to the profuse employment of enamel and gems, is the Marienschrein at Aachen connected by tradition with the name of Charlemagne. The Ursula Shrine at St. John's Hospital in Bruges also retains the same general form, but here the ornament is supplied by the beautiful paintings of Hans Memling. Quite different in type are the reliquary crosses mentioned by Gregory the Great, the use of which may be traced back to the fifth century, though they belong to all periods and have never completely gone out of fashion. The most venerable existing specimen is undoubtedly the crucifix in the Sancta Sanctorum of the Lateran and recently de-
REMESSIANA

scribed by Father Griesar and by Lauer. A large relic of the True Cross is probably still embedded in the hollow of the case, covered with a thick coating of balsam—a perfumed unguent which, as the "Liber Pontificalis" informs us, was applied to such reliquaries as a mark of veneration. This identical cross is prob-
ably that found by Pope Sergius (687-701) in a corner of the sacristy of St. Peter's, and it may possibly date from the fifth century.

Other medieval reliquaries, of which specimens still survive, took the form of legs, arms, and particularly heads or busts. Perhaps the earliest known is a bust from the treasury of St. Maurice in the Valais; amongst the later examples are such famous reliquaries as those of the heads of the Apostles, St. Peter and St. Paul, at the Lateran, and that of St. Januarius in Naples (cf. plate in The Catholic Encyclopedia, VIII, 296).

Under this class we may also mention the relic statues which seem to have been rather exceptionally common in England. It is conceivable that some of the prejudice of the English Reformers against "wonder-working" statues was due to the practice of making doors into the hollow of such figures and preserving relics within them. Sir Thomas More ("Works", London, 1557, p. 192) describes a case in which such a hiding-place for relics was unexpectedly discovered in the Abbey of Barking. Lastly it will be sufficient to point out that relics have at all times been kept in simple caskets on boxes, varying indefinitely in size, material, and ornamentation. In more modern times these are invariably secured by a seal, and the contents indicated in a formal episcopal act of authentication, without which it is not lawful to expose the relics for public veneration. The silver box containing the head of St. Agnes, recently brought to light in the treasury of the Sancta Sanctorum, still preserved the seal of some cardinal deacon affixed to it apparently at the end of the thirteenth century. From a graphical point of view the illustrations of reliquaries in the early German "Heiligungbücher", published in connection with various famous shrines, e.g. Einsiedeln, Wittenberg, Halle etc. are particularly interesting.

Probably the most useful work is Grimm, Die romanische Kapelle Sancta Sanctorum u. ihr Schatz (Freiburg, 1906), an account of the recent discoveries made in the treasury of the Sancta Sanctorum at the Lateran; cf. Lauer, Le trésor du Sancta Sanctorum (Paris, 1906). A more formal discussion will be found in works on Christian art: Rethem, Elements d'archéologie chrét. (Louvain, 1885), I, 476: II, 339: Otte, Handbuch der Kunst-Archäologie, I (Leipzig, 1888), 183-211: Herrgen, Handbuch der kirchl. Kunstschätzer (Leipzig, 1900). See also Diet. d. Christ. Antik. s. v. Reliquary: De Rossi, La cappella reliquaria africana in Omaggio a Leone XIII (Rome, 1885); Moliner, Hist. generale des arts appliqués à l'industrie, especially IV, pt. i (Paris, 1901); Frohner, Collections du château de Goluchow: L'orfèvrerie (Paris, 1897). For any profounder study the separate monographs and articles, of which almost every remarkable reliquary of antiquity has at some time formed the subject, should be consulted.

HERBERT THURSTON.

REMMIGIUS, titular see in Dacia Mediterranea, suffragan of Sardica. Remesiana is mentioned by the "Itinerarium Antonini" (132), the "Itinerarium Hierosolymitanum" (566), the "Tabula Peutingeriana", the "Geographus Ravennatensis", IV, vii. Justinian rebuilt and fortified it at the same time as he established numerous fortresses in that vicinity (Procopius, "De aedificiis", IV, i, iv). In the sixth century this city of ancient Moesia was counted among those of Dacia Mediterranea (Hierocles, "Synecdemus", deliv, 7). To-day it is known as Bela Planka, has 1100 inhabitants, and is a railway station between Nich and Pirot in Servia. Remesiana was a suffragan of Sardica (to-day Sofia, capital of Bulgaria), the civil and religious capital of Dacia Mediterranea which was under the Patriarchate of Rome. Two bishops are known: St. Nicetas (q. v.) and Diogenianus, present at the Robber Synod of Ephesus (449). The see must have disappeared in the sixth century.

S. PÉTÈRUS.

Remigius, Sr., Apostle of the Franks, Archbishop of Reims, b. at Cerny or Laon, 437; d. at Reims, 13 January, 553. His feast is celebrated 1 October. His father was Emile, Count of Laon. He studied literature at Reims and soon became so noted for learning and sanctity that he was elected Archbishop of Reims in his twenty-second year. Thenceforward his chief aim was the propagation of Christianity in the realm of the Franks. The story of the return of the sacred vessels, which had been stolen from the Church of Soissons testifies to the friendly relations existing between him and Clovis, King of the Franks, whom he converted to Christianity with the assistance of St. Waast (Vedastus, Vaast) and St. Clotilda, wife of Clovis. Even before he embraced Christianity Clovis had showered benefits upon both the Bishop and Cathedral of Reims, and after the battle of Tolbiac, he requested Remigius to baptize him at Reims (24 December, 496) in presence of

ST. REMIGIUS BEGINS CLOVIS TO RESTORE THE SACRED VASE TAKEN FROM SOISSONS BY THE FRANKS

several bishops of the Franks and Alemani and great
appears of the Frankish army. Clovis granted
Remigius stretches of territory, in which the latter
established and endowed many churches. He erected,
with the papal consent, bishoprics at Tournai;
Cambrai; Tournus, where he placed St. Vaast;
Lyon, which he gave to his nephew Gunbald. The
authors of "Gallia Christiana" record numerous and
munificent donations made to St. Remigius by mem-
bers of the nobility, and the latter's presence in the
cathedral at Reims. In 517 he held a synod, at
which after a heated discussion he converted a bishop of
Arian views. In 523 he wrote congratulating
Pope Hormisdas upon his election. St. Medardus,
Bishop of Noyon, was converted by him in 530.
Although St. Remigius' influence over people and
prelates was extraordinary, yet upon one occasion, the
history of which has come down to us, his course of
action was attacked. His condemnation of the offences
of one Claudius, a priest, brought upon him the
rebukes of his episcopal brethren, who deemed Claudius
deserving of degradation. The reply of St. Remigius,
which is still extant, is able and convincing (cf. Labbe,
"Concilii", IV). His relics were kept in the cat-
ithedral of Reims, whence Hincmar had them trans-
ferred to Epernay during the time of the invasion of
the Northmen, then in 1009, at the instance of Leo
IX, to the Abbey of Saint-Remy. His sermons,
so much admired by Sidonius Apollinaris (lib. IX,
cap. lx), are not extant. Of his other works we
have four letters, the one containing his defence in
the matter of Claudius, two written to Clovis, and a
fourth to the Bishop of Tongres. According to se-
veral biographers, the Testament of St. Remigius is
apocryphal; Mabillon and Ducange, however, argue
for its authenticity. The attribution of other works
to Remigius is particularly superseded by an edict of
St. Paul's Epistle, is entirely without foundation.

Remigius of Auxerre, a Benedictine monk, b.
about the middle of the ninth century; d. 908.
Remigius, or Remi, was a disciple of the Irish
teacher, Dunchad of Reims, author of a treatise on
astronomy and astrology, and who himself was himself a disciple of
Eriugena. He taught at the monastery of St-Cer-
main, Auxerre, in Paris, and at Reims. He is
the author of a number of glossaries and marginal
commentaries on the Bible, on the grammar of Priscian,
the "Opuscula Sacra" of Boethius, and the "De
Nuptiis etc." of Martianus Capella. He also wrote
a theological treatise, "Enarrationes in Psalmos".
As a teacher, Remigius interested himself in the
problem of universals, and seems to have attempted a
compromise between the extreme Realism of Eriugena
and the Anti-Realism of his teacher, Eriugena. He
investigated the problem of the origin of the universe
and gave a Christian interpretation to the passages
in which Martianus speaks of the invisible world of
ideas. His glosses are of very great interest to the
study of medieval Latin philosophy.

WILLIAM TURNER.

Remiremont, Vosges, France, monastery and
nunnery of the Rule of St. Benedict, founded by
Sts. Remigius and Amatus in 620, on hills above the
site where today stands Remiremont. The monastery be-
comes the priory of the Canons Regular of St. Augustine
who, in 1623, gave it to the Benedictines of the
Congregation of St. Vannes. It had, in 1768, 10 monks
and a revenue of 5500 livres. During three
centuries, the nunnery was a neighbour of the monastery,
and in 1720, it was decided to convert the nuns, with the help of the Emperor Louis XI,
constructed a fortified convent in the valley. About
this convent the town of Remiremont rose, and the relics of Sts. Remigius and Amatus were transported
from the monastery to the convent. Leo IX en-
riched it with other numerous relics. In 1057 the
convent was destroyed by fire and the nuns were dis-
persed; though rebuilt later it no longer strictly observed the Rule of St. Benedict. In 1294, the
Emperor Rudolph married there the Princess Eliza-
beth and, in 1295, gave to the abbess the title of a
princess of the empire. In the beginning of the sixteenth century discipline was lax and the nuns,
without the pope's consent, declared themselves
canonesses. They did not take the vows and ad-
mitted only novices who could give proof of noble
descent. Catherine III of Lorraine tried to reform
the convent, but failed. Anna of Lorraine rebuilt the
convent in 1752. It was suppressed, as was the
monastery, during the French Revolution.

Remusat, ANNE-MADELINE, VENERABLE, b. at
Marseilles, 29 Nov., 1696; d. 15 Feb., 1730. At nine
years of age she asked her parents to be allowed to enter
the convent of the nuns of the monastery of the
Union. From 1708 she began to experience severe sufferings
which, during her whole life, she bore patiently for
the salvation of souls. In 1709 her parents withdrew
her, but in 1711 she re-entered the convent and on
23 Jan., 1713, made her profession. At this time she
applied herself to prayer, and the "Spiritual Retreat"
written then is a proof of her progress in the
templative life. She experienced on 17 Oct., 1713,
a "particular and extraordinary" revelation of Jesus
concerning the glory of his Sacred Heart. As the
report of her sanctity became known, the abbess was
consulted by many, and was thus the means
of spreading devotion to the Sacred Heart. Her
influence actuated Mgr de Belœlunce to establish at
Marseilles the Association of Perpetual Adoration of
the Sacred Heart, of which she wrote the statutes.
As Jansenism and a spirit of moral laxity had
then invaded the town, Anne-Madeleine suffered keenly,
and in repARATION inflicted on her body continual
mortifications; when her superiors interdicted these
austerity, she begged Our Lord to mortify her him-
self; and from that day she suffered im a painful de-
cline, while her soul was abandoned to temptations.
In 1720, during the plague at Marseilles, Our Lord
enjoined her to institute a feast in honour of the
Sacred Heart, which Mgr de Belœlunce established on
22 Oct., 1720. From 1722 the veneration of the
Sacred Heart spread through France, to Lyons,
Rouen, Constantinople, Cairo, Spain, Louisiana,
Persia, Syria, and the Indies by her endeavours. In
1888 her cause was submitted to the Sacred Congre-
gation, whose favourable vote was given on 18 Dec., 1889. Leo XIII signed the
introduction of the cause of the Venerable servant of
God.

BEMY, ABBEY OF SAINT, founded at Reims before 590. Its early history is very obscure; at first a little chapel dedicated to St. Christopher, it obtained great renown when it acquired the relics of St. Remigius in 553, and gifts poured in upon it from pious donors. By the ninth century the abbey possessed about 700 domania and titles, and was the abode of the Benedictines. It is probable that secular priests were the first guards of the relics, but were succeeded by the Benedictines. From 780 to 945 the archbishops of Reims were its abbots. It was there that Charlemagne received Leo III in 800 and in 805 the Abbott Aviardi undertook to rebuild the Church of St.-Remi, and for twenty years the work went on uninterrupted but then collapsed. The Abbot Theodoric erected a magnificent basilica which in 1049 Leo IX dedicated and granted many special privileges. The schools and the library were, during the Middle Ages, of such great repute that Alexander III wrote a commendatory letter to the Abbot Peter. The archbishops of Reims and several princes, Caribon, Charlemagne’s brother, Henri d’Anjou (d. about 1653), and several kings, Louis IV and Philip IV, were buried in the Abbey.

Among the illustrious men of the abbey may be mentioned: Henri de Lorraine (1622-1641), who affiliated, in 1632, the abbey to the Congregation of St. Maur; J. Nicolas Colbert (1665), later Archbishop of Rouen; Charles Maurice de Tillyier (1660-1716), a great supporter of the Jesuits and of the Rochefoucault, appointed abbot by the king in 1743.

Joseph Dedieu.

RENAISSANCE, THE, may be considered in a general or a particular sense, as (1) the achievements of what is termed the modern spirit in opposition to the spirit which prevailed during the Middle Ages; or (2) the revival of classic, especially of Greek, learning and the recovery of ancient art in the departments of sculpture, painting, and architecture, lost for a thousand years in Western Christendom. Impossible though it be to separate these elements from the whole movement into which they enter, we may distinguish them from it for our present purpose, viz., to sum up the influence of that which profoundly affects the whole face of the antique, pre-Christian, or pagan world of letters and plastic remains, as it came to be known and studied from the end of the fourteenth century onwards, in relation to the Catholic Church. For ecclesiastical history goes through periods analogous to the changes brought about by secular revolutions. Roughly speaking, the age of the Fathers corresponds to the Imperial Roman period, closing in a.D. 476; the Middle Ages occupy those tumultuous years when barbarians turned Christians were learning slowly to be civilized from 476 to 1453; while the modern relations of Church and State begin with the definite emergence of nationalities in the West, at an era most critical, signalized by the destruction of the Greek Empire, the invention of printing from movable type, the discovery of America, and all this leading on to the Protestant Reformation. History, like life, is a continuous web; its various stages pass into one another by the finest degrees. But after the Great Schism was healed by the Council of Constance in 1417, the Church, turning her back once for all on a worn-out feudalism, took up its position in Europe, and Teuton emperors, found herself in the presence of new difficulties, and the character of the times was manifestly altered.

We are dwelling now in this modern epoch. The Middle Ages have become an interlude, clearly bounded on both extremities by a more civilized or humane idea of life, which men are endeavouring to realize in politics, education, manners, literature, and religion. This blending of widely dissevered ages and peoples by virtue of a complex type into a consistent, though greatly enlarged historical system, has been termed the Renaissance, taken as a whole. The word at the map will remind us of the striking fact that Christianity is bound up in space no less than in time with the Greek and Roman World. It has never yet flourished extensively outside these borders, except in so far as it subdued to ancient culture the tribes to which it was offered the Gospel. There is a mysterious and providential link, recognized in the New Testament by St. Paul, St. John, and St. Peter, between Rome as the head of secular dominion and the visible Kingdom of Christ. Roman law protected as well as preserved the sciences; Greek philosophy lent its terms to Catholic dogma. The School of Alexandria, taught by Clement and Origen, did not scruple to quote Athenian literature in illustration of revealed truths. St. Gregory of Nazianzus wrote Greek poems in a style which was furthered and encouraged by the tragic poet. There was always in the West a Puritan spirit of which from Tertullian and Novatian down to the Spanish Priscillian we may note examples; but the saints who established our tradition—Cyprian, Augustine, Jerome—held more tolerant views, and though St. Jerome felt constrained to fasten for 120 days and nights he had given to Plautus or Cicero, his own diction is severely classic. His Latin Vulgate, also, while it obeys the construction of the Hebrew. It is written in cultivated, not in rustic, language. St. Gregory the Great despised grammar as a subordinate accomplishment, but was himself a good scholar.

The loss of Greek authors and the decline of Church Latin into barbarism were misfortunes in a universal ruin; neither of these events was the consequence of a deliberate break with antiquity. Latin and Greek had become sacred languages; the Western and Eastern liturgies carried them with Holy Scripture wherever they went. Catholic Rome was Latin by tradition and by choice. No German dialect ever attainted to the privileges of the sanctuary which St. Cyril won for the Old Slavonic from Pope Nicholas I. Under these circumstances, a revival of learning, so soon as the West was capable of it, might have been foreseen. And it was equally to be anticipated that the Vatican would not reject a movement of reconciliation, akin to that which had long ago been established as the basis of all the Greek Church, and been early and unimpeachable Renaissance. The Catholic principle, in accordance with its name, assimilates, purifies, consecrates, all that is not sin, provided that it will submit to the law of holiness. And the central fact of the modern education has been set up from the age of Aristotle among Greeks, from the Augustan era in Rome, were happily amenable to this cleansing baptism. As a literature, the chief schoolbooks were singularly free from moral deformities; their teaching fell short of the New Testament; but it was often heroic, and its perils admitted of correction. Newman happily describes the Greco-Roman civilization as the soil in which Christianity grew up. And Pater concludes that it was by the bishop of Rome . . . that the teaching of which we speak could be approved as purified’, as the ideal, namely, of a perfect training in wisdom and beauty. Quite in unison with such a temper of mind, Pope Leo X in 1515 wrote to Beroaldo, the editor of Tacitus: ‘Nothing more excellent or useful has been given to man by the Creator, if we
except the true knowledge and worship of Himself, than these studies.'

When, therefore, Nicholas V (1447–55) founded the Vatican Library, his act was inspired by the tradition of the Holy See, deservedly known as the nursing-mother of schools and universities, in which the seven "liberal arts" had always been taught. Paris, the greatest of them, had received formal recognition in 1211 from Innocent III. Between the years 1400 and 1500, we know of forty-eight charters granted by the popes to as many universities, from St. Andrews to Alcalá, and from Caen and Poitiers to Wittenberg and Frankfort-on-the-Oder. But Humanism was propagated chiefly from Italian centres and by Italian Greek professors. We must bear in mind a fact which is often lost sight of, that the Scholastic philosophy had never taken deep root in the Peninsula, and that its masters chiefly flourished north of the Alps. Alexander of Hales, Scotus, Middleton, Occam, were Britons; Albert the Great was a German; St. Thomas Aquinas, his disciple, taught at Paris. On the other hand, that renaissance of Roman Law which enabled Frederick Barbarossa and his successors to withstand the papacy, began with Innocent at Bologna. Again, it was Petrarch (1303–1374) who initiated the humanistic movement which claimed for literature, i. e., for poetry, rhetoric, history, and all their branches, the rank hitherto maintained by logic and philosophy; Dante, who crystallizes the "Summa" of St. Thomas in miraculous verse, remains medieval; Petrarch is modern precisely by this difference, although we must not fancy him opposed to Church or Bible. Now when Greek manuscripts were eagerly sought after, and when Cicero dictated the canons of Latin style, the synodism with its arena of disputation could not but give place to the orator's chair and the secretary's desk. Not science but life was the end of study. We remark no considerable achievement in metaphysics until the culminating period, both of Humanism and the Reformation, had passed away.

In 1455 the library of Pope Nicholas contained 824 Latin and 362 Greek manuscripts. In 1454, at the death of Sixtus IV, the Greek MSS. had increased to one thousand. From the catalogues we infer that much interest was taken in collecting the great Fathers, the canon law, and medieval theology. Nicholas ordered, the Vatican Codex (Text of Holy Scripture; Sixtus had in his possession fifty-eight bibles or parts of bibles. Cardinal Bessarion gave his magnificent stock of books to St. Mark's, Venice; and the Mediceo Library, collected at Florence, where it still remains (was the Laurenziana), was for a while referred to Rome by Clement VII. At Basle the Dominican cardinal, John of Ragusa, left important Greek MSS. of parts of the New Testament, which were used by Reuchlin and Erasmus with advantage. These illustrations may suffice to indicate the movement, becoming universal throughout Catholic Europe, towards recovery from all sides of the treasures of the past. Another and most important step was to print what had been so recovered. Printing was a German invention. The local ordinances and religious houses favoured it greatly. Cloisters became the home of the Press; among them we may quote Marienthal (1468), St. Ulrich, at Augsburg (1472), the Benedictines at Bamberg (1474). Typography was introduced at Brussels in 1474 by the Brothers of the Common Life. They called themselves "preachers not in word but in type." And the early printed books in Germany were of a popular devotional, educational, and Biblical character.

To the Renaissance in its opening stage the honour belongs of scattering broadcast the printed Latin Vulgate, and the first translations of the sacred languages, of course with approval from the Church. Ninety-eight complete editions of the Vulgate were sent out before 1500; a dozen editions preceded the appearance in type of any Latin classic. The first book produced by Gutenberg was that exceedingly beautiful "42-line" Bible according to St. Jerome's Latin text (1455). The oldest of the English Bibles was the Coverdale Bible (1535), a revision of the ancient Catholic version which was still extant in several copies. The first dated Bible came out at Mainz in 1462; the first Venetian, in 1475, was followed by twenty-one editions. The Hebrew text was printed at Soncino and Naples between 1477 and 1486; the Hebrew Bible was dedicated at Venice to Leo X in 1517. Cardinal Ximenes renewed the labours of Origen by his Polyglot of Alcalá, 1514–22, which included the Greek New Testament. But Erasmus anticipated its publication by an indifferent text in 1516. Aldus printed the Septuagint in 1518. As regards translations on the Catholic side, they went on before and after Luther, from the Spanish of Boniface Ferrer in 1405 to the English of Douai in 1609. All these were printed; but space will not allow more than a reference to the details here, or to the changes in policy brought about, in consequence of heretical translations and the abuse of Scripture-reading, under Paul IV and the Council of Trent. During the period commonly assigned to the Renaissance at its height (1453–1527), freedom from the rule. The most important was to make Rome the intellectual centre of the world. His successors entered largely into the same idea. Pius II (Piccolomini) was a man of letters, not unlike the great Erasmus. Paul II, though severe upon neopagans, such as Pomponazzo, did not condemn the Classical movement. Alexander VI was a statesman, not a scholar and not an Italian. The fierce and splendid Julius II, himself without culture, gave commissions to Raphael and Michelangelo, but openly despised the pedants about his court. From Leo X his age receives its title—he was "the incarnation of the Renaissance in its most brilliant form."

An extraordinary enthusiasm for antiquity had set in, combined with boundless freedom of opinion, with a laxity of morals which has ever since given scandal to believers and unbelievers alike, and with a festal magnificence recalling the days and nights of Nero's "golden house". The half-century which ends in the sack of Rome by Lutheran soldiers, however dazzling from a scenic point of view, cannot be dwelt on with satisfaction by any Catholic, even when we have discounted the bloodshed. The French, the Spaniards, or the Germans, or the historians who accepted satires and party statements at their own value. Churchmen in high places were constantly unmindful of truth, justice, purity, self-denial; many had lost all sense of Christian ideals; not a few were deeply stained by pagan views. The whole career of ecclesiastics like Erasmus, Bible said in the comedies of this latter cardinal as they were acted before the Roman Court and imitated far and wide, is to us not less incomprehensible than discrediting. The earlier years of Erasmus, the whole career of Rodrigo Borgia, the life of Farnese, afterwards Paul III, until he was compelled to reform himself as well as the Curia, these all exhibit the union of subtlety, vigour, and other worldly qualities, with a disregard for the most elementary virtues, which leaves us in dumb and sorrowful amazement. Julius II fought and intrigued like a mere secular prince; Leo X, although certainly not an unbeliever, was frivolous in the extreme; Clement VII drew on himself the contempt as well as the hatred of all who had dealings with him, by his crooked ways and cowardly utterances which led to the taking and pillage of Rome.

Now, it is not unfair to trace in these popes, as in their advisers, a certain common type, the pattern of which was Cesare Borgia, sometime cardinal, but always mischief-maker, whose epithet, "sorceress," was Machiavelli. We may express it in the words of Villari as a "prodigious intellectual activity accom-
panied by moral decay". The passion for ancient literature, quickened and illustrated when the buried classic marvels were brought to light, simply intoxicated that generation. Not only did they fall away from monastic severities, they lost all decent and mainly self-critical spirit in a moral corruption against which Michelangelo in his sonnets, remind us that native Italian genius had done great things before this new spirit took possession of it. But there is no denying that in its triumphant days the Renaissance looked up to beauty, and looked away from duty, as the standard and the goal of life. It had neither eye nor sense for the beauty of holiness. When it is called "pagan" we mean this corrupting anarchic influence, represented more gracefully by genuine poets and men of letters like Politian, more grossly by such licentious singers as Lorenzo de' Medici, by Poggio, Bandello, Aretino, and a thousand others who declared that the morals of Petrarch Arbiter were good enough for them. When Savonarola in 1475 fled to the Dominican cloister at Ferrara, and there composed his lament on "the ruin of the Church," he cried out: "The temple is fallen, and the holy sanctuary." But the earthquake had not yet come. Worse things were to happen than he had seen. And a catastrophe was inevitable, of which he would be the prophet in St. Mark's, Florence, sent to a partly credulous and still more world-weary age. Savonarola (1452-98), Erasmus (1466-1536), and Sir Thomas More (1478-1535) may be taken as figures in what has been sometimes called the Christian Renaissance. They represent beyond question the mind of the Church concerning those ancient authors, not sacrificing faith to scholarship, or Holy Writ to Homer and Horace, while they allow to culture its province and its privileges. Such was to be the lasting concordat between divinity and the humanities, but not until paganism had robbed Italy of its independence and the papacy had been to the heart of Europe and the Society of Jesus been entrusted with the education of youth. On the strength of his protest against the unseemly and degrading literature which abounded in his time, Savonarola was condemned as a Puritan; his "burning of the vanities" in 1497 has been cited in proof; and he employed scolding language (see the Letter to Verino, 1497) that may be strained to this conclusion. But among his penitents were artists, poets, and learned men: Pico della Mirandola, Bartolommeo Bettini, and Miguel de Cervantes. The friar himself bought for St. Mark's at a heavy charge the famous Medicean Library; and every candid reader will perceive in his denunciation of current books and paintings an honest Christian's outcry against cancerous vices which were sapping the life of Italy. When we come to Erasmus, no fanatical, no assiduous inquisition between clean and unclean. Erasmus laughed to scorn the Ciceronian pedantries of Bembo and Sanzio; he quotes with disgust the paganizing terms in which some Roman prose-writers had set forth the scenes and scenes of the Gospels. He had a zeal for the inspired Word, and his Greek and Latin New Testament was the chief literary event of the year that saw its publication. He edited St. Jerome with minute care (1516); he did something for the chief Latin Fathers, and not a little for the Greek. In his preface to St. Hilary this true scholar commends all learning, old or new, but he would have its proper value given to each department from the Scriptures even to the Schoolmen. His "Praise of Folly" and other satirical writings were not unmindful of this. But in the midst of the chorus he had seen, but upon the self-confident ignorance which declared against good literature without knowing what it meant. So rare and indefatigable an appraiser of literary works in every form could not be insensible to the merits of St. Augustine, however much he delighted in Virgil. The scholarship of Erasmus, given to the world in a lively Latin, was universal and often profound. It was also honestly Christian; to make Holy Scripture known and understood was the supreme purpose he kept in view. And thus the "prince of humanists" could remain Catholic, while looking back with a certain abhorrence on the vandalizing of the Saxon and Carolingian, how antique learning and Catholic virtue might combine in the loftiest of ideals. More's "Utopia" won a place by itself, which it still keeps, far above the imitative and passing literature of those Latin versifiers, whose vain rhetoricians, who at best were scholiasts, but too commonly wasted their small talents in feebly reproducing the classic themes and metres. The English chancellor took a firm grip of social and religious problems, not so much regarding theory as intent on reform according toabsolute principle. He despised courtly force more than elegance; his works in the vernacular have salt and savour, wit and idiom, to commend their orthodoxy. In the same category of Christian humanists we may associate with More a goodly number of Englishmen, from Eyre, Caxton, Caxton, Hadley and Seling, who were students at Padua in 1464, to Grocyn, Linacre, Colet, Fox, and the martyred Cardinal Fisher.

In Germany the first stages of revived learning had been free from Italian dissoluteness and heathen doctrines. Cardinal Nicholas of Cusa reformed the Church, while promoting philosophy by his own speculations and collecting manuscripts. Rudolf Agricola (1443-85) united the study of the ancients with devotion to Holy Scripture; von Langen,consummate Latinist, remodelled the use of the classics; and the cathedral provost at Deltventer. The illustrious Wimpelharns, born in 1460, taught education in principle and practice on orthodox lines. He was Reuchlin's master, a genuine scholar, zealous against the newly-imported unchristian ways of the so-called "poets," and when Luther rose up, Wimpelharn opposed him as he had opposed the encroachments of Roman Law. With Reuchlin we are plunged into debate and controversy; but he, too, was sincerely religious and faithful. In 1516, however, over his adversaries, gained thereby a victory for Hebrew and Jewish studies, in which other ways the popes had taken into favour. Many Humanists, by and by, made common cause with the Reformation; Melancthon, Zwingli, Calvin, were eminently learned. But the Renaissance never was absorbed into any theological movement; reforming zeal scattered libraries, emptied universities, and too often threw back education, until its first fury was spent. The spirit of which, Puritanism is a complete expression had no affinity with Classic literature; at its touch the world of art, of dramatic poetry, of painting, sacred or secular, of Humanism in life and outside of schoolbooks, fell into dust. Heine (Uber Deutschland) saw that the Reformation was, in effect, a Teutonic answer to the Renaissance; and we now perceive that, while the dogmas of Luther and Calvin have lost their hold upon men's hearts, the revival of letters is broadening out into a transformation of democracy by means of culture: his labor, hoe opus; the question how to reconcile a perfectly-medieval past, with the modern religion and the demands of freedom for all, is one which none of the Reformers contemplated, much less did they succeed in resolving it.

Among Frenchmen, to whom we owe the word "renaissance," that problem was attacked at first. The Italian, Alexandre, coming to Paris in 1508,
gave lectures in Greek, Latin, and Hebrew. He was made rector of the university. Alessandro became a student in a day which might be justly compared with the Sorbonne changes by Mark Pattison with persecuting the great printer, Robert Estienne (1503–59), though he always obtained licence to sell his bibles and testaments. The Sorbonne objected, however, to any publication of Scripture without approved Catholic notes; and this in a day which might be justly compared with the rebuke and blasphemy. France had its own type of Humanist in that extraordinary man, Rabelais (1490–1553), a physician, priest, and obscene jester whose book is the glory and the shame of his native tongue. His treatment of the world as a creed outworn, falls back upon a kind of liberal Platonism; he would leave men to their instincts and the joy of life. Much the same philosophy, though in graver tones, is insinuated by Montaigne (1533–92) in essays tinged with scepticism and disenchantment. These two writers, who lie beyond the spring-tide of the revile, open the anti-Christian war which has lasted, with growing violence, down to our time. But the seventeenth century witnessed an adaptation of the classical forms to its own age; and this was done by a new genius, by Pascal, Bossuet, Racine, and Fénelon, which yielded a highly original blending of religion with eloquent prose and refined verse. In general, nevertheless, we shall probably allow Taine’s contention that influence of the Classics (Latin rather than Greek always) on French education has not been favourable to Christianity.

At Rome an "incredible liberty" of discussion prevailed under the spell of the Renaissance. Lord Acton quotes well-known instances. Poggio, the mocking adversary of the clergy, was for half a century in the service of the popes—Fiesco, a pagan unabashed and foul, was handsomely rewarded by Nicholas V for his abominable satires. Pius II had the faults of a smart society journalist, and took neither himself nor his age seriously. Platina, with whom Paul II quarrelled on political grounds, wrote a vindictive slanderous book, “The Lives of the Roman Pontiffs”, which, however, was in some degree justified by the project of reformation in “head and members” constantly put forth and never fulfilled until Christendom had been rent in twain. Yet Sixtus IV made Platina librarian of the Vatican. It is equally significant that “The Prince”, by Machiavelli, was published with papal licence, though afterwards severely prohibited. This toleration and frankness in good company and historical criticism to begin fair. There was need of a revision which is not yet complete, ranging over all that had been handed down from the Middle Ages under the title and style of the Fathers, the Councils, the Roman and other official archives. In all these departments forgery and interpolation as well as ignorance had wrought mischief on a great scale.

In 1440 Lorenzo Valla counselled Eugenius IV not to rely upon the Donation of Constantine, which he proved to be apocryphal. Valla’s tract was printed by Ulrich von Hutten; it became popular among Germans, and influenced Luther. But it opened to this enemy of the temporal power a place in the household of Nicholas V. For another commencement of criticism we are indebted to the same unpleasant but sharp-sighted man of letters. It was Valla who first denied the authenticity of these writings which for centuries had been going about as the treaties composed by Dionysius the Areopagite. Three centuries later the Benedictines of St. Maur and the Brancionese were still engaged in clearing out the true from the false in patristic literature, in hog’s lair in the story of the foundation of local churches. Mabillon, Ruinart, Papebroch, and their successors have cleared the ground for research into the Christian origins; they have enabled divines to consider a theory of development, the materials of which were hitherto so confused that when Vannini tried to set it forth in his Donation itself, accepted and deplored, as a fact by Dante. How great that confusion was, the Benedictine editions of the Fathers, which largely put an end to it, abundantly show: the “authentic and necessary evidences of historic religion” could not be given their full value until they had been worked over. It called for a disposition at once literary and critical, which the old method of training did not create and scarcely would tolerate. But this chapter falls outside the limits of our subject.

It is remarkable that the wealthy Christian use of ancient literature was destined to be taught by a Spanish reforming saint, himself not learned and certainly no dilettante. This was Ignatius Loyola, whose antecedents did not promise him the inheritance which Bembo and the other Ciceronian pedants had turned to such ill account. St. Ignatius, who began his order in Paris, who walked the same streets with Erasmus, Calvin, and Rabelais, did the most astonishing feat recorded in modern history. He reformed the Church by means of the papacy when he became the papal vice-chancellor; and he found in the neo-pagans to make them instruments of Catholic education. Spain had been but little affected by the Renaissance. In temper crusading and still medieval, its poetry, drama, theology, were more or less peculiarly Latin rather than Greek always) on French education has not been favourable to Christianity.

In May, 1527, Rome was laid waste, its churches profaned, its libraries pillaged, by a rabble of miscreants. “But”, said Cardinal Cajetan, “it was just judgment on the Romans.” The pagan Renaissance fell, stricken to death; it was high time for the Counter-Reformation (q.v.) to begin. The Council of Trent and the Society of Jesus took in hand to discard the old permission by allowing the forbidden in dealing with literature. The Roman Index was established by Paul IV. A rigorous censorship watched over the Italian printing press. By 1600 German importation of books across the Alps had ceased. If we would reckon the greatness of the change now wrought, we may compare the “Orlando Furioso” of Ariosto, dedicated in 1516 to Cardinal Ippolito d’Este, with Tasso’s “Gerusalemme”, especially as revised by the poet himself, and at the dictation of the Roman censor, Antoniano. It was a change so marked that Seiler termed the Italiens generally hypocrites; but we know from the calendar of saints at this time and other sources how much had been done to check the wild licence of thought and speech in the Peninsula. Giordano Bruno, renegade and pantheist, was burnt in 1600; Campanella spent long years in prison. The different measures meted out to Copernicus by Clement VII and to Galileo by Paul V need no comment. The papacy aimed henceforth at becoming ‘an idea’ government under spiritual and converted men’. Urban VIII was the last who could be deemed a Renaissance pontiff (1623–44).

St. Ignatius, alive to the causes which had provoked many nations into revolt from the clergy, made learn-

ing, piety, and obedience governing principles in his plan of reform. The old system of arts and teaching was already growing obsolete, previous to 1450. Humanism had begun to take the place of Scholasticism. Vittorino da Feltro (1378–1446), a devout layman, had his headquarters at Mantua in 1435 on the basis of good Latin, including purity in syntax, Roman history, and Stoic discipline. He gave an all-round training, social, physical, religious. At Venice and Ferrara his friend Guarino (1370–1460) was another eminent schoolmaster, mighty in Greece. We have seen how Erasmus by example and by criticism advanced the cause of literature, which was henceforth acknowledged as the proper subject of a liberal education. A gentleman—the cortigiano whom Castiglione described—ought to be proficient in the language of antiquity; such was the idea of the public school everywhere; and such it remains in England to this day. The Jesuit Order, springing up after 1530, not founded on the tradition of Benedict or Dominic, adopted this view, and their “Ratio Studiorum” (1569) was, in consequence, a literary classical scheme. The first Jesuits who came to Paris they had the Hôtel de Clermont; in Germany they began at Ingolstadt. The German College at Rome, due to St. Francis Borgia, like the Roman College of the Society itself, the English and other houses everywhere by them, attempted their zeal for learning and their success in controversy. The Fathers were always cultivated men; they taught “a good silver Latin”; and they wrote with ease, though scarcely with such idiomatic vivacity as we admire in Erasmus and Joseph Scaliger. Soon they possessed a hundred houses and colleges; “For nearly three centuries”, says a recent critic, “they were accounted the best schoolmasters in Europe.” Bacon’s judgment can never be passed over: “As for the pedagogical part, the shortest rule would be, consult the schoolmasters. Much more has been written in practice” (De Augmentis, VI, 4). They established free day-schools, devised new schoolbooks, expurgated objectionable authors, preached sound doctrines in a clear Latin style, and bestowed even upon the technicalities of medieval logic a certain grace. Some, like Mariana, wrote with native power in the classic forms. But their most telling man in the field of theology in Petavius, who belongs to France and the seventeenth century. His large volumes on the Fathers may be appreciated in point of language with Calvin’s “Institutes” and the “Augustinus” of Jansen. They discard the method familiar to Scotus and St. Thomas; they furnish to some extent criticism as well as history. And they suggest the development of dogmas with an approach to its philosophy, which neither Boethius nor Buon could quite comprehend.

All these things form part of “that matured and completed Renaissance” whereby the evil was purged out which had made it perilous in the same degree to faith and to morals. Nicholas V and other popes did well in not refusing to add culture, even the finest of the Greek, to religion. Their fault lay in the weakness which could not resist pagan luxury and a frivolous diletantism. Now serious work was undertaken for the good of the Church. Gregory XIII reformed the calendar; the text of the canon law was corrected; under Sixtus V and Clement VIII the Latin Vulgate after years of revision attained its actual shape; and the Vatican Septuagint came forth in 1587. Baronius, urged by St. Philip Neri, brought out eleven folio volumes of the “greatest church history that has ever come forth”. The Roman Breviary, the large and edited anew, was reissued by authority of St. Pius V and Urban VIII.

But the Renaissance had indulged its “pride of state, of knowledge, and of system” with dispassionate consequences for Christian inheritance. It trampled on the Middle Ages and failed to understand that in them which was truly original. The Latin of Cicero which Urban VIII cultivated, the metres of Horace, did grievous wrong to the prose and verse of our church offices, so far as they were altered. The showy architecture now designed, though sometimes magnificient, was not inspired by religion; before long sank to the rococo and the excesses of the churches with pagan monuments to disfiguring celebrities. In painting we descend from the heaven of Fra Angelico to the “corregiosity” of Correggio, nay, lower still, for Venus too often masquerades as the Madonna. Christian art became a thing of the past when the Gothic cathedral was looked upon as barbarous even by such champions of the Faith as Bossuet and Fénelon. Never did a poet inspired by Renaissance models—not even Vida nor Sannazzaro—rise to the sublime of the “Dies Irae”; never did that style produce a work equal to the “Imitation”. Dante triumphs as the supreme Catholic singer; St. Thomas Aquinas cannot be dethroned from his sovereignty as the Angelic Doctor, still, as regards faith and philosophy, he is the true “master of those that know”. But Dante and St. Thomas have long lived by Renaissance acquaintance. It was not large or liberal enough to absorb the Middle Ages. Hence its failure at the beginning as a philosophic movement, its lack of the deepest human motives, its superficiality and its pedantries; hence, afterwards, its fall into the commonplace, and the extinction of art in vulgarities, in a merely rhetoric. Hence, finally, the need of a French Revolution to teach it that life was something more serious than a “Carneval de Venise”, and of Romanticism to discover, among the ruined choirs and in the neglected shrines which men still secretly revered, a trace of that mighty medieval genius, Catholic, Latin, Teuton, and French, misunderstanding of which was the folly, and the spoiling of its achievements the crime, that we must charge upon the Renaissance in the day of its power. It has been called “the age of grace”, so whom glorified it, “to conceive the true method of effecting a scientific reconciliation of Christian sentiment with the imagery, the legends, the theories about the world, of pagan poetry and philosophy” (Pater, “Renaissance”, 49). Not less did it become the task of Goethe, Scott, Chateaubriand, Ruskin, of Friedrich Schlegel and the best German critics, to show that European culture, divorced from the Middle Ages, would have been a pale reflection of dead antiquity.

WILLIAM BARRY.
the Oratorians in 1666, but owing partly to ill-health, forthwith left them and never received more than minor orders. His extraordinary native talent and love of study enabled him to become an able liturgical writer, one of the greatest Orientalists of his time, and a trustworthy political adviser. One of the prominent men of the reign of Louis XIV, he enjoyed the friendship of numerous literary and political celebrities, among others Bossuet, whom he supported in the controversies with Richard Simon, Fénelon and the Jésuites. Towards the last he assumed the unfriendly attitude of the Gallican and Jansenist. Numerous high distinctions were conferred upon him, among them membership in the French Academy (1689), the Academy of Inscriptions (1691), and the Accademia della Crusca of Florence. Most of his writings were prepared not merely for the extension of scientific knowledge, but also in defence of the Catholic Church. Among them are contributions to “Perpétuité de la foi”, a work published by Nicole and Antoine Arnauld against the Calvinists, the fourth and fifth volumes of which are entirely due to Renaudot’s pen (Paris, 1711, 1713). He published, moreover, “Défense de la perpétuité de la foi” (Paris, 1708); “Gennadi Patriarche Constantinopolitani Homiliae de Eucharistia” (Paris, 1709); “Historia Patriarcharum Alexandrinorum” (Paris, 1713); “Liturgiarum orientalium collectio” (Paris, 1715–16); “Anciennes relations des Indes et de la Chine” (Paris, 1718). His opinion of the alleviation of poverty. He was named physician in ordinary to the king (1612) and in 1617 obtained the privilege of founding an intelligence office where poor people might make known their needs, free of charge, and inquire as to places where work could be had, and where charitable people could learn the names of the deserving poor. In 1618, he received the title of commissioner-general to the poor of the kingdom. In 1628, after the surrender of La Rochelle, he became a Catholic and from this time, thanks to the help of Richelieu, his charitable activity was most fruitful. Renaudot added to his intelligence office a pawn-shop and an auction-house. On 30 May, 1631, he established a weekly, the “Gazette de France”, in which he defended the politics of Richelieu. About 1632, he created in his intelligence office weekly conferences which constituted a kind of free school of medical sciences. Finally, dating from 1640, he inaugurated free consultations for the sick, in which he was assisted by fifteen physicians, and free visiting physicians. He published “La présence des absents” (1642), the first treatise in France on diagnosis, and which aimed at permitting sick persons at a distance from all medical aid to describe their symptoms to the physician. In 1640, the medical faculty of Paris wished to forbid him to practise; it relied upon Parliament, which was hostile to Richelieu, and a pamphlet of Guy Patin violently attacked Renaudot. Louis XIII by a decree of 14 July, 1641, decided in favour of Renaudot, but after the deaths of Richelieu and

Bayle’s “Dictionnaire” was published by Jurieu (Rotterdam, 1697).

VILLIERS, Eustache Renaudot (Paris, 1904).

N. A. WEBER.

RENAUDOT, TÉSOPHRASTE, b. at Loudun, 1586; d. at Paris, 25 October, 1653. Doctor of the medical faculty at Montpellier in 1606, he travelled in Italy in order to study the workings of the pawn-shop (mona pietatis) in that country. On his return to France, Leclerc du Tremblay, known as Père Joseph, summoned him to court to explain his theories on the Louis XIII, his enemies renewed their attacks, pretending that he had accused Louis XIII of favouring Lutheranism and that he had calumniated Anne of Austria. The provost of Paris at the end of 1643, and Parliament in 1644, prohibited him from the practice of medicine, and the medical faculty, 4 June, 1644, officially inaugurated an investigation for free consultations. Renaudot was, nevertheless, a pioneer in relief work for the poor, journalism, and medicine. The medical theories which he had held against the medical faculties of his times in favour of the use of antimony, laudanum, and quinine, have prevailed.

RENÉ

since his death. During the last years of his life he devoted his time wholly to the "Gazette".

Georges Goyau.

RENÉ, Guido, Italian painter, b. at Calvènza near Bologna, 4 Nov., 1575; d. at Bologna, 18 Aug. 1642. At one time a memoir of Guido would have extolled him to the highest position, especially if it had been written in England, for his works were very much in demand among art connoisseurs. His pictures fetched vast sums, and were held in the highest esteem by the collectors who knew nothing of and cared less for the works of the earlier Italian painters such as Gentile da Fabriano and Fra Angelico. Now for the time the works of this great craftsman are under a cloud, and his extraordinary powers of composition and conception, and his skill of draughtsmanship, are in danger of being overlooked by reason of an entire change of fashion. In his early days he was a colourist of great purity, a composer with dramatic force, regarded as one of the greatest masters of his time, and surrounded by pupils; but later on, his very success proved his undoing, and the pictures of his maturity and old age, though marked by facility and skill, evidence a certain monotonous melodrama and a thinness of Impasto which has not tended to their permanency.

He was educated first by Calvaert, later on with the Carracci, and for a while with Ferrantini. He worked with Annibale Carracci in Rome, assisted in the decoration of the Farnese Palace, the Quirinal Palace, several of the churches of Rome, and a chapel for the Borghese family, but his greatest painting in that city is undoubtedly the ceiling decoration of the Palazzo Rospigliosi—Phoeus and the Hours preceded by Aurora. He painted also in Bologna, and commenced what probably would have been his masterpiece in Naples. His works can be studied in Dresden, St. Petersburgh, Genoa, Vienna, and especially in England, as many of the famous houses of that country, such as Stafford House, Bridgewater House, Lowther Castle, Blair Castle, Kingston Lacy, Burghley House, Alton Towers, Carlton Park, Cobham Park, Narford Hall, and Windsor Castle, contain important works by him, while in Italy we find his paintings in Lucca, Milan, Modena, Firenze, Ravenna, S. Sebastiano, Turin, Venice, and elsewhere. He was a man of great energy, but unfortunately of considerable self-conceit, and of prodigious activity. He was a skilful engraver and etcher; he worked in silver point and in pastel, painted ceilings and walls in fresco, and numbered panel pictures. In his own time he was perhaps the most popular artist in Italy, and in the eighteenth century occupied a similar position in England. Presently his work will be more appreciated for its own sake than it has been, his faults will be more clearly noticed, and his excellencies have a greater weight. Our principal source of information respecting him is a MS. by Oretti in the library in Bologna, from which many authors have taken material, but it has never itself been printed. There are at present two books in hand on this painter, but neither of them are sufficiently complete to be worth quoting.

George Charles Williamson.

RENNES, Archdiocese of (Rhenodense), includes the Department of Ille et Vilaine. The Concordat of 1802 re-established the Diocese of Rennes which since then has included (1) the ancient Diocese of Rennes with the exception of three parishes given to Nantes; (2) the greater part of the ancient Diocese of Vannes; and (3) all the territory of the ancient Diocese of St. Malo; (4) ten parishes that had formed part of the ancient Diocese of Vannes and Nantes. On 3 January, 1859, the See of Rennes, which the French Revolution had desired to make a metropolis, became an archiepiscopal see, with the Dioceses of Quimper, Vannes, and St. Brevin as suffragans. Cardinal Place obtained from Leo XIII the permission for the Archbishop of Rennes to add the titles of Dol and St. Malo to that of Rennes. Rennes was the capital of Brittany. Under the Roman Empire Brittany had formed part of the province of Tertia Lugdunensis (Third Lyonnese), but from 283 to 500 it was an independent kingdom; afterwards, under the Merovingians, it ranked as a countship. The Kingdom of Brittany, founded by Nomenob (/about 845), was short-lived, and after 874 Brittany was parcelled out among a number of counts, the most important of whom was the Count of Rennes. In 992 Geoffrey I, Count of Rennes, took the title of Duke of Brittany. The solemn and final union of Brittany with France was the result of the marriage of Francis I to Claude of France, daughter of Anne of Brittany and Louis XII. Tradition names as first apostles of the future Diocese of Rennes, missionaries of the Latin race, but of an uncertain date: SS. Maximinus, Clarus, Justus. On the other hand, when in the fifth and sixth centuries bands of Christian Britons emigrated from Great Britain to Armorica and formed on its northern coast the small Kingdom of Domnonée, the Gospel was preached for the first time in the future Diocese of Dol and Alet. Among these missionaries were St. Aemilius, who, according to the legend, founded in the sixth century the town of Ploërmel in the Diocese of Redon, and then retired into the forests of Chateaugiron and Jansé and attacked Druidism on the very site of the Dolmen of the Fairy Rocks (La Roche aux Fées); St. Mén (Mevenus) who retired to the solitude of the Mount Pontecorvé and founded the monastery of Gaeu (550), known afterwards as St. Mén's; St. Lunarius and St. Suliacus who dwelt in the woods along the banks of the Rance, and Sts. Samson and Malo.

I. DIOCESE OF RENNES.—The earliest historical mention of the See of Rennes dates from 452. One of the four prelates, Sarmatio, Chariato, Rumoridus, and Vivantius who in that year took part in the Council of Angers, was Bishop of Rennes. One Athenius, Bishop of Rennes, took part in the Council of Tours in 461. Mgr. Duchesne is of opinion that the St. Amandus reckoned among the bishops of Rennes at the end of the fifth century is the same as St. Amand of Rodez. Among other bishops are the famous St. Melanius (Melane) who in 511 assisted at the Council of Orleans and had a widowed lady living for sanctity. He gave his name to a well-known abbey, which in the twelfth century possessed no less than seventy parish churches. Famous among the annals of Rennes are: St. Desiderius (Didier) whose episcopate is questioned by Mgr Duchesne (c. 682); St. Moderanmus (Muran) who died about 730 in the monastery of Berceto near Lucca; Marbodius, the hymnographer (1096-1123); the Dominican Yves Mayeuc (1507-41); Arnaud d'Ossat (1590-1600), cardinal in 1599, and prominent in the conversion of Henry IV; Godeffroy Brosseau Saint Marie (1548-78), cardinal in 1575; Charles Place (1798-93), cardinal in 1886; Guillaume Labouré (1893-1906), cardinal in 1897. Le Coz (1768-1815) during the Revolution was constitutional Archbishop of Rennes. Under the Concordat he became Archbishop of Besançon. In the Middle Ages the Bishop of Rennes had the privilege of crowning the dukes of Brittany in his cathedral. On the occasion of his first entry into Rennes it was customary for him to be borne on the shoulders of four Breton barons.

II. Diocese of Rennes—The monk Malo (d. about 600) at the end of the sixth century came from Wales at the head of a band of emigrants and founded two monasteries on the coast near the
Roman post of Aleth. Two legendary biographies of
him which date from the ninth century make him
the first Bishop of Aleth. The biography of King
Saint Judicael, written in the eleventh century,
mentions as a contemporary of the king, a Saint
Michel of Aleth. 'Trivial brevishes', of the
fifteenth century, mention three bishops prior to
Maelmson: Enogat, Guvar, and Coalfinit.
In Mgr Duchesne’s opinion one thing only is certain
that the Diocese of Aleth existed in Charlemagne’s
time. The town of Aleth was destroyed by the
Nomenni, and soon after 1141, the seat of the diocese
was removed to the Isle of St. Aaron (so-called after
a hermit who lived there early in the sixth century),
on which stood the town afterwards known as St.
Maol. This change was endorsed by Eugene III
in spite of the protests of the monks of Marmoutiers
who had a foundation on the island. Among the
bishops of St. Maol are: Blessed John de la Grille
(1144-63) under whom the see was transferred; William
de Montfort (1423-32), cardinal in 1429; William Bri-
çonnet (1493-1513); Harlay de Sancy (1632-46).
III. DIOCESE OF DOL—The Life of St. Samson,
which cannot be of earlier date than the seventh
century, mentions the foundation of the monastery of Dol
by St. Samson. He was doubtless already a bishop
when he came from Great Britain to Armorica, and it is
perhaps who assisted at the Council of Paris be-
tween 561 and 567. But in the biography there is
nothing to prove that he founded the See of Dol or
that he was its first bishop. In the twelfth century,
to support its claim against the Metropolitan of
Tours, the Church of Dol produced the names of a
long list of archbishops: St. Samson, St. Magloire,
St. Budoc, St. Génévée, St. Restoald, St. Armel, St.
Jumael, St. Turian. Mgr Duchesne discounts and
doubts this list. He is of the opinion that the abbey
of Dol may have had at its head from time to time
archbishops with episcopal jurisdiction, but that Dol
was not the seat of a diocese. Under Charlemagne
and Louis the Pious, the Vicariate of Dol and the
monastery of St. Mseen were still included in the
Diocese of Aleth; so that the first Bishop of Dol was
Festianus (Festgen) mentioned for the first time be-
tween 851 and 857, and installed by King Nomenni.
Among the bishops of Dol are: Baudri (1107-30),
author of a poem on the conquest of England by
William the Conqueror; Alain, Cardinal de Coety
(1456-74), as legate of Callistus III, brought Charles
VII to assist the Greeks against the Turks when
besieging Constantinople; Urban René de Herel (1767-95),
emigrated to England during the Revolu-
tion, but accompanied to Brittany the royalist troops
who attempted to land at Quiberon. He was arrested
with his brother, and shot at Vannes, 3 July, 1785.
There was a struggle from the ninth to the eleventh
century to free the Church of Brittany from the
Metropolitan of Tours. It is important to consider
the point closely.
From a comparison made by Mgr Duchesne be-
tween the Life of St. Convoioin, the "Indiculus de
episcoporum Britonum dispositione", and an almost
completely restored letter of Leo IV, it would ap-
pear that shortly before 859, Nomenni wishing to be
anointed king, and finding opposition among the pre-
lates of Brittany, sought to get rid of them by charg-
ing them with simony. Their only fault was perhaps
that they demanded eulogia from their priests when
the latter came to synods. After listening to a denun-
tation of Breton bishops and to St. Convoioin, founder
of the Abbey of St. Aubain, at Redon, who had been
sent to Nomenni by Nomenni, Leo IV declared that the charge
of simony must be adjudicated by a competent tribu-
nal of twelve bishops, and must be attested by seventy-
two witnesses, thereby disputing Nomenni’s claim
to a right to depose bishops. But Nomenni did de-
pose, and in a brutal manner. the four bishops of
Vannes: Aleth, Quimper, and St. Pol de Léon, and
made seven dioceses out of their four; one of the new
dioceses had its seat in the abbey of Dol and became
straightway an archdiocese. The remaining two
were in the monasteries of St. Brieuc and Pabu-
tutual (Tréguier). At the end of 850 or beginning
of 851 the bishops of the four provinces of Tours,
Sens, Reims, and Rouen, wrote a letter of reprimand
to Nomenni and threatened him with excommu-
cation. He paid no heed to them and died 7 March,
851. Salomon, Nomenni’s second successor, re-
quested Bensulet IV in vain to regularize the situa-
tion of the Breton hierarchy. In the name of the
Council of Savonnières (859) the seven metropol-
tans of the three kingdoms of Charles the Bald, of
Lothaire II, and of Charles of Provence, wrote to the
Bishop of Rennes and to the bishops occupying the
new Sees of Dol, St. Brieuc, and Tréguier, reproach-
ing them with lack of obedience to the Metropolitan
of Tours. This letter was not sent to the Bishops
of Vannes, Quimper, Aleth, and St. Pol de Léon who
wrongly occupied the sees of the legitimate bishops
illegally deposed by Nomenni. It achieved nothing.
In 862 Salomon dealt directly with Nicholas I, and at
first tried to mislead the pope by means of false
allegations and forgeries; then he restored Foiix
of Quimper and Liborius of Léon to their sees, but
still kept Susannis of Vannes and Salocon of Aleth
in exile. Nicholas I died in 867. Adrian II (867-
72) and John VIII (872-82) continued to uphold
the rights of the Metropolitan of Tours. Then came
the deaths of Salomon and of Susannis, and a con-
ciliatory mood developed. There was no formal
act on the part of the Holy See recognizing Dol as a
new metropolitan church; it never had control over
Rennes or Nantes, and it was mainly over the new
Sees of St. Brieuc and Tréguier that it exercised
ascendancy. Finally in May, 1199, Innocent III
restored the old order of things, and subordinated
anew all Brittany to Tours but did not interfere with
the diocesan boundaries set up by the daring No-
menno, and they remained in force until the Revolu-
tion. The Bishop of Dol retained until 1789 the
insignia of an archbishop, without an archbishop’s privileges. The devotion of the Seven Saints of Brittany was a widespread devotion during the Middle Ages, and probably antedates the year 1000. Four times a year, at Easter, Pentecost, Michaelmas, and Christmas, crowds of pilgrims on foot paid within thirty days a round of visits to the seven sanctuaries, Dô St. Berlo, Le Pardon de Léon, Quimper, Vannes, St. Malo. A paved road, that kept up an earlier line of Roman roads, was followed by these endless pilgrimages, whence arose the present custom of dedicating chapels to the Seven Saints. The ancient Abbeys of St. Maudé, St. Meen, a Paimpont; the abbey of Canons Regular of Rillé (founded about 1143), of Montfort (founded about 1152) were very useful in restoring the parochial services after the disorders of the early Middle Ages. Two thirds of the churches in the territory date from the eleventh or twelfth century, and were built by the monks and Canons Regular. The war of succession of Brittany (1341-64) between Jean de Montfort and Charles de Blois has an interest for the ecclesiastical historian owing to the fact that Charles de Blois has the title of Dom Piatelin, by which he was recognized as the origin of the pilgrimage of Bonne Nouvelle at Rennes had nothing to do, as was often supposed, with a victory of Jean de Montfort over Blessed Charles de Blois. Some of the saints connected with the Archdiocese of Rennes are St. Mevenus or Meen, St. Armel, St. Sulinius (Sulian), son of Brognard, and Prince of Wales, Abbot of the monastery of St. Suliani (died in 606); St. Judicael (584-658), twice King of the Bretons, twice monk in the monastery of St. Meen, and founder of the abbey of Paimpont; St. Gelgouin, canon of Dol (d. 1076 or 1079), who refused to become a bishop in spite of the appeals of Gregory VII; Venerable Robert d’Arbrissel, founder of the order of Fontevrault (d. 1117), a native of Arbrissel near Rennes, Blessed Ralph de la Futaye, founder about 1050 of the Abbey of St. Sulpine at Rennes, known originally as Our Lady of the Blackbirds; St. Yves (1253-1303), who held an official position in the Diocese of Rennes; Venerable John de St. Samson, blind from birth, a Carmelite of Rennes and the great Breton contemplative, died in 1254, leaving mankind a man of spiritual character; Ven. Pierre Quintin (d. 1629), a Dominican of Vitre, and one of the collaborators of Ven. Michel de Nobletz in his apostolate. Caradecu de la Chalotais (1701-85), born at Rennes, procurator of Brittany, was one of the first to write the way for the abolition of the Jesuits in France by his organization and constitution of the Jesuits, read to the Parliament in Dec, 1761, and in May, 1762. Grimm said that the Jesuits might consider Le Chalotais as their destroyer in France.

Others native of Rennes are the Benedictine Lobineau (1600-1727), famous for his “Histoire de la Brétagne” (1707), and the Jesuit philologist Tournemine (1661-1739). Jacques Cartier (1494-1552), the discoverer of Canada; the naval commander Duguay-Trouin (1673-1736), who took Rio de Janeiro in 1711; La Bourdonnais (1699-1753), another sailor who fought against the English in India; the writers Chateaubriand (1768-1848) and Lamennais (1782-1854) were natives of St. Malo. Duguesclin (d. 1350), famous during the Hundred Years’ War, was born at Château-Gaillard, a village in the department of the Loiret where Madame de Sévigné lived (1620-96) in near Vitre.

The chief shrines of the archdiocese are: Notre-Dame des Miracles et Vertus, in St-Sauveur’s at Léon; a place of pilgrimage, and the shrine of Rennes by the English under the Duke of Lancaster in 1357; Notre-Dame de Bonne Nouvelle, at Rennes, a Dominican’s shrine, a place of pilgrimage as early as 1468; Notre-Dame des Marais, at Fougères, dating from the tenth century, but particularly famous during the seventeenth century; Notre-Dame de la Paimpont; Notre-Dame de la Peintière at Saint Didier, a pilgrimage from very early times. Before the application of the Associations Law in 1901 there were in the archdiocese: Eudists, Recollets, Lazarists, Carmelites, and several orders of teaching Brothers. Among the confraternities of women originating in the diocese are the Daughters of the Immaculate Heart of Mary, founded in 1640 by Mlle Mory du Verger for the care of incurables, with mother-house at Rennes; The Adoratrices of the Divine Justice, a Paimpont; and mother-house at Fougères; the Sisters of the Immaculate Conception, a teaching and nursing order founded in 1831 at St. Méen by Père Corvoisier; the Sisters of the Sacred Hearts of Jesus and Mary, known as Sisters of the Ours, or of the Junior Schools, founded in 1850 by Amélie Friel, an ancient order with mother-house at Paramé and branches at Halifax and Ste Marie in Canada; Little Sisters of the Poor, founded in 1842 at Rennes by Jeanne Jugan, Fanchon Aubert, Marie Janet, Virginie Lepage of the Immaculate Conception of the Most Holy Virgin, and installed through the efforts of Abbé Ernest Lelièvre in all parts of the world. Their mother-house at St. Pern in the Diocese of Rennes controlled in 1905 106 houses in France, 51 in Spain, 29 in England, 50 in America, 16 in Italy, 13 in Belgium, 4 in Africa, 3 in Canada, 2 in Portugal, 1 in Belgium; 33,123 aged and infirm persons were cared for by 4475 sisters. At the close of the nineteenth century the religious congregations in the diocese had charge of 1,000 nurses, 31 nurseries, 1 home for infirm children, 34 orphanages for girls, 4 for girls, 34 hospitals or infirmaries, 18 district nursing homes, 2 retreat houses, 3 homes for incurables, 1 lunatic asylum. In 1909 the Archdiocese of Rennes numbered 621,384 souls in 60 parishes with 324 auxiliary parishes and 379 curacies.

Gallica christiana, IV (nov 1850), 739-67, 993-1017, 1038-68; instrumenta, 163-70, 233-44, 245-50; DUCHENNE, Pasteur françois, II, 249-74, 340-3; THERÈSE, L’Église de France (Paris, 1839); DE CORMON, Fouillée historique de l’archéologie de Rennes (6 vols., Rennes, 1866-8); IDEM, L’Église de Rennes à travers les âges (Nantes, 1885); DE LA BORDEINE AND POCQUET, Histoire de Bretagne (4 vols., Rennes, 1865-9); DE VILLEREUN, Histoire de la ville de Rennes (Paris, 1872); DELAVANCE, L’Éparchie de Rennes et Brétagne pendant la Révolution (2 vols., Rennes, 1883); DE LAMENNAIS, Histoire de la Cité d’Athis (St. Malo, 1851); CAMPOUS, L’Église de Rennes et Brétagne (Paris, 1883); DE MACON, Histoire de la Cité d’Athis (Vannes, 1908); POUILLARD, L’Église de Rennes (Paris, 1889); POUILLARD, L’Église de St. Malo, la cité corsoire (Lille, 1887); CREVECOEUR, Les Sept Sœurs de Brétagne et la pèlerinage (St. Brévin, 1889); Vies des Saints de la Bretagne armoricque, annotated by THOMAS and ABRAGM (5th ed., Quimper, 1901).

GEORGES GOYAU.

BENTO, GASTON JEAN BAPTISTE DE, b. 1611 at the castle of Beni, Diocese of Bayeux in Normandy; d. 24 April, 1649. The only son of Charles, Baron de Renty, and Elisabeth de Pasteurou, Gaston studied at the College de Navarre in Paris, with the Jesuits at Caen, and finished at the age of seventeen at the College of the Nobles in Paris. He wrote several treatises on mathematics which he excelled. The reading of the Imitation of Christ aroused the desire to become a Carthusian, but obeying the wish of his parents, he married. In 1638 he abandoned public life and devoted himself to the service of the needy and suffering. St. Francis de Sales, the great biographer of the saints, made him the mouthpiece of the charitable works he did. In 1640 the number of the Holy Works (surnamed der gute Heinrich) and induced him to found a congregation of shoemakers and tailors,
Frères Cordonniers. They worked honestly at their trade, divided their earnings with the poor and performed special acts of devotion prescribed by the pastor of St. Paul's. The statutes were approved by the Archbishop of Paris, John Francis de Gondi. After his death, Renty's body was brought to Citri in the Diocese of Soissons. When the church was opened nine years later his body was found intact. The bishop ordered it placed in a marble tomb behind the high altar. Throughout his career at court, in the army, and in politics, he maintained the esteem of all, and took an active part in public good works.

Carton de Renty

FRANCIS MERSHMAN.

Renunciation (Lat. renunciare), a canonical term signifying the resignation of an ecclesiastical office or benefice. It may be defined as the abdication of a clerical dignity made freely and spontaneously, for just reasons, into the hands of the legitimate superior who accepts it. Generally speaking, any ecclesiastical may renounce his dignity, whether his office be perpetual or temporal. To be valid, the resignation must be free, that is, not extinguished by fear, or threats, or fraud. It must be made into the hands of the superior who had conferred it, that is the pope for bishops and holders of major benefices; of the ordinary for parish priests and all incumbents of minor benefices. As to the pope himself, he may abdicate his dignity, but, as he has no earthly superior, his resignation must simply be declared canonically (see ABSCSSION). Before a renunciation is canonically valid, it must be accepted by the legitimate superior, for otherwise it would work great detriment to the Church. Moreover, no one is at liberty to resign his office unless he is certain of revenues for his competent support. A resignation may be absolute or conditional. The latter term is used for renunciations that are made in favour of a third person, or with reservation of a pension, or when incumbents exchange benefices. The causes for which resignations are lawful are given in verse in the "Corpus juris canonici" (cap. x, "de renunti", 1, 9).

Debility, ignorance, male conscience, are the reasons.

Quem mala plebs odiat, dans scandala, cedere posse.

Therefore, one may justly resign on account of ill-health, want of proper knowledge, consciousness of guilt, clerical irregularity, ill-will of the people, or scandalous behavior.

WILLIAM H. W. FANNING.

Reorizations.—I. State of the Question.—The Oratorian Jean Morin, in the seventeenth century, and Cardinal Hergernôtre, in the nineteenth, designated as "reordinations" the history of all ordinations which were considered null for any other reason than defect of the prescribed form or intention and which were repeated. This means that if there were in fact reordinations corresponding to this definition they were unjustifiable because theology determines as the sole causes of nullity of the Sacrament of Holy orders defect of the prescribed form or intention. But in the course of the history of the Church other examples of nullity have been admitted in certain circumstances. It has been admitted that all or sacraments administered or received extra ecclesiam (outside the Church) were null and had to be repeated. By the words extra ecclesiam is understood the situation of the minister or the Christian separated from the Church by heresy, or any other communication. At certain periods these separatists were considered so dangerous and were kept at such a distance that there was a tendency to deny them wholly or in part the power of conferring the sacraments. The maxim, "Out of the Church, no sacraments," was applied with more or less severity.

II. The Facts.—That this history is complex and difficult is shown by the action of the Council of Trent. The council declared as a truth of faith the doctrine affirming the validity of baptism administered outside the Church by ministers of the Christian religion, or anyone innocent, if the minister had no intention of communicating with the Church. The council was unwilling to give a definition that would place the doctrine of numerous writers in opposition to a teaching of faith. A good judge in these matters, Father Perrone, has written: "Ordinations ab illegitimo ministro peractae illitissae esse, nemo unquam theologorum dubitavit: utrum vero proterea irrita, inanes ac nullae habentes sint, implica-tissima olim quaestion fuit, adeo ut Magister Sententiarii scribat: 'Hanc quaestionem perplexam ac pene insolublem facit doctrum verba, quae plurimum dissentire videntur' (I, iv, dist. 25); deinde profert quatuor sententias, quin ulli adheerente. Monumenta ecclesiasticae prope innumera pro utraque sententia, sive affirmante irritas esse eiusmodi ordinationes sive negante, stare videntur, cum res nonnulla equales esset. Nunc iam a pluribus secus sola voce W. Tho. addit, locum, cui suffragium accesserit universae ecclesiae, ordinationes ab hereticis, schismaticis ac simoniae faciats validas omnino esse habendae"—That ordinations performed by an unlawful minister are illicit, no theologian ever doubted; but whether the Church, or anyone in heresy, or void was of old a most intricate question—so much so that the Master of the Sentences writes: "This problem is rendered complex and almost insoluble by the statements of the doctors which show considerable discrepancy" (I, iv, dist. 25). He then presents four opinions, none of which he adopts. For each view—that which affirms and that which denies the nullity of such ordinations—there seemed to be innumerable evidences from church history, as long as the question was not cleared up; but for several centuries past the teaching of St. Thomas alone has prevailed and is accepted by the whole Church, to the effect that ordinations performed by heretical, schismatical, or simoniacal ministers are to be considered as valid ["Tractatus de ordine," cap. iv, n. 136, in Migne, "Theologio cursus comple-tus," XXX (Paris, 1841), 55].

In the second half of the fifth century the Church of Constantinople repeated the confirmation and ordination conferred by the Arians, Macedonians, Nestorians, and Iudaeusians, and the Synod of Tridit, "Symodium II, Oxford, 1672, Annotationes, 105." The Roman Synod of 769 permitted and even prescribed the repetition of ordinations given by the anti-pope Constantine ("Liber Pont.," ed. Duchesne, i, 408 sqq.). In the ninth century, during the
Reparation

III. Interpretations and Conclusions.—The chief instances just cited and the attempts that have been made to justify them, constitute, from the theological and doctrinal standpoints, a forewarning of doctrinal controversies. It is not surprising that these difficulties have sometimes, and even quite recently, been used as objections against the Church and the pope, especially by Anglicans, who are always sensitive on the question of the Church doing or not doing the things that were done. It is true that the controversy of the doctrinal authority of the pope was more than once involved. But to what extent? It is obvious that the decisions of the popes on these points did not possess the character required by the Council of the Vatican for definitions involving the supreme authority of the pope in doctrinal matters. In the history of reorganizations the authority of the popes is much less concerned than in the doctrine regarding the relations of the civil and ecclesiastical powers, in which, nevertheless, as theologians maintain, papal infallibility is not involved (cf. J. Feissel, "La vraie et la fausse infallibilité des papes", Paris, 1873). The question as to the conditions for the validity of certain sacraments was one of those that caused serious divisions in the early Church. The popes cannot be held responsible for these lengthy controversies. In ancient times it was the whole Church that sought the solution of these great difficulties. At a time when ecclesiastical organization was only just beginning, the initiative, and the responsibilities as well, were heavy burdens for the Popes and the Holy See. It was not only the tradition of Rome which at first was somewhat hesitant on certain aspects of this question, but that of the Church in general, and in this very matter the tradition of Rome was incomparably more firm than that of all the other Churches. To accuse the Church in Rome in this matter is to accuse the Universal Church; and on this as on so many other questions the Anglican Church has an interest in common with the Roman Church. Old Catholics and Anglicans of the extreme bring them both. But, which, if they had the value that is claimed for them, would tell not only against the popes but also against the early Church and the Fathers. Against this manner of representing the state of theological tradition concerning the conditions for the validity of Holy orders, only they can raise objection who interpret in a strict sense the saying of Vincent of Lérins; "Quod ubique, quod semper, quod ab omnibus." But to defend this thesis is to undertake to show in tradition the absolute identity and the uniformity of their doctrines, a task which will readily appear impossible. History shows us in the life of the Church and in doctrine a movement between determined limits and the popes as regulators of this movement. To implicate the popes in the long history of these controversies it must be proved that they failed in this task, which cannot be done.

LOUIS SALZET.

Reparation is a theological concept closely connected with those of atonement and satisfaction, and thus belonging to some of the deepest mysteries of the Christian Faith. It is the teaching of that Faith that man is a creature who has fallen from an original state of justice in which he was created, and that through the Incarnation, Passion, and Death of the Son of God he has been redeemed and restored again to a certain degree of the original state of redemption. Although God might have conceived men's offences gratuitously if He had chosen to do so, yet in His Providence He did not do this; He judged it better to demand satisfaction for the injuries which man had done Him. It is better for man's education that he should take part in the work of making satisfaction. This satisfaction was made adequately to God by the Sufferings, Passion, and Death of Jesus Christ, made Man for us. By voluntary submission to His Passion and Death on the Cross, Jesus Christ atoned for our disobedience and sin. He thus made reparation to the offended majesty of God for the outrages which the Creator so constantly suffers at the hands of His creatures. We are restored to grace through the merits of Christ's Death, and that grace enables us to add our prayers, labours, and trials to those of Our Lord and fill up those things that are wanting of the sufferings of Christ” (Col., i, 24). We thus can make some sort of reparation to the justice of God for our own offences against Him, and by virtue of the Communion of Saints, the oneness and solidarity of the mystical Body of Christ, we can also make satisfaction and reparation for the sins of others.

This theological doctrine, firmly rooted in the Christian Faith, is the foundation of the numerous confessions and pious associations which have been founded, especially in modern times, for the reparation to God for the sins of men. Thus the Archconfraternity of Reparation for blasphemy and the neglect of Sunday was founded 26 June, 1847, in the Church of St. Martin de La Nuee at St. Dié in France by Mgr. Patrick Bishop of Langres. With a similar object, the Archconfraternity of the Holy Face was established at Tours, about 1851, through the piety of M. Dupont, the "holy man of Tours". In 1883 an association was formed in Rome to reparation to God on behalf of all nations. The idea of reparation is an essential element in the devotion of the Sacred Heart (see Heart of Jesus, Devotion to the).

The Mass, the representation of the sacrifice of Calvary, is specially suited to make reparation for sin. One of the ends for which it is offered is the propitiation of God's wrath. A pious widow of Paris conceived the idea of promoting this object in 1862. By the authority of the Pope Leo XIII the erection of the Archconfraternity of the Mass of Reparation was sanctioned. The confraternity of the Mass of the Most Holy Rosary, a confraternity of litanists, was also established. It was created for the propagation of the Rosary and the consecration of the world to the Sacred Heart of Jesus. In 1884, under the direction of Mgr. Perret, Bishop of Angers, the Archconfraternity of the Sacred Heart was consecrated to Our Lady of Lourdes. It was at first a local confraternity, but in 1885 it was elevated by a bull of Pope Leo XIII to the dignity of a province. The province of the Sacred Heart consists of the following confraternities: France, Belgium, Switzerland, England, and the United States of America.

T. Slaterr.
Repton, (Reptonian) Philip, Cardinal-priest of the title of SS. Nereus and Achilleus, Bishop of Lincoln (1404–1419); died early in 1424. The place and date of his birth are uncertain, but he was educated at Broadgates Hall, Oxford, and became an Augustinian canon of St. Mary de Pré, Leicester. In his order he lived a pious life, and was suspended at the Council of Blackfriars, 12 June, 1382, being excommunicated at Canterbury on 1 July. Recanting his heretical views, he was restored to the communion of the Church during the autumn of the same year, and became a student of his monastery, and was Chancellor of the University of Oxford for the years 1397, 1400, 1401 and 1402. On the accession of Henry IV he became confessor and chaplain to the king, with whom he lived in great intimacy, and on 19 Nov., 1401, he was appointed Bishop of Lincoln by papal provision, being consecrated on 29 March following. Pope Gregory XII created him a cardinal in Sept., 1408, but as the Council of Pisa on 5 June, 1409, deposed Gregory and annulled all his acts since May, 1408, Repton's cardinalate was invalidated and his position of Constant in Opposition was stated. In 1419 Cardinal Repton resigned his bishopric, probably for court reasons, and this resignation was accepted by the pope on 21 November. The date of his death is unknown, but it occurred before August, 1419, when his will was proved. His "Sermons extant in the General" are extant in several MSS. in Oxford, Cambridge, and British Museum.

Edward Burton.

Repose, altar of (sometimes called less properly sepulchre or tomb, more frequently repository), the altar where the Sacred Host, consecrated in the Mass on Holy Thursday, is reserved until the Mass of the Presanctified (see Good Friday) on the following day. It is prescribed that the altar of repose be in the church and other than the one where Mass is celebrated. In the Mass on Holy Thursday two hosts are consecrated; after the consumption of the first, the second Host is placed in a chalice, which is covered with a pall and inverted paten; over the whole is placed an oriflamme, tied to the pall. There remains on the corporal in the centre of the altar till the end of Mass, when it is carried in solemn procession to the altar of repose, there to remain in the tabernacle or in an urn placed in a prominent position above the altar. Individual churches have it one in rendering these altars of repose with their respective chapels ornate in the extreme, with rich hangings, beautiful flowers, and numerous lights. Catholic piety has made Holy Thursday a day of exceptional devotion to the Blessed Sacrament, and the presence of the altar of repose is one of the most significant signs of the faithful. Mention of the altar of repose and the procession thereto is not found before the close of the fifteenth century. The reservation of the Consecrated Species in the Mass of Holy Thursday, spoken of in earlier liturgical works, was for the distribution of Holy Communion, not for the service on the following day.

Andrew B. Meehan.

Reprobation. See Predestination.

Reputation (Property in). It is certain that a man is indefeasibly the owner of what he has been able to produce by his own labour out of his own material; employing his own resources. In much the same way his reputation, which is the outcome of his meritorious activity, is his property. To despoil him of this without adequate cause is to be guilty of formal injustice more or less grievous according to the harm done. It is a personal injury, a violation of commutative justice burdening the perpetrator with the obligation of restitution. Indeed St. Thomas, in attempting to measure the commutative value of such a violation, decides that whilst it is less than homicide or adultery it is greater than theft. This, because amongst all our external possessions a good name holds the primacy. Nor does it do to say that by wrongdoing, a man forfeits a right to which he may have hitherto won from his fellows. This statement is not true, not, at any rate, without qualification. If a man's sin is such as to affect the social organization itself, or is committed publicly, then his fair name is destroyed and can no longer be reckoned among his assets. In this instance discussion of the evil deed implies no defamation. No damage can be wrought to what does not exist. We assume, of course, that such reputation is the opinion held by many about a person's life and behaviour. If, however, a man has worked hard and often incorrectly ascribed to society the case is different. Then, barring the supposition in which it is necessary for the public welfare, our own, or another's defence, or even the culprit's good, we are not allowed to make an accusation.

S. A. J. d'Annibale says, quite certainly; the reason for it is not so easy to assign. Perhaps it may be this: Character is a public thing. Such a one therefore is in peaceful possession of the esteem of the community. Granted that this is founded upon error or ignorance as to the actual conditions, still the isolated knowledge of one or other as to the real state of affairs concerns no right to take from him the general favourable appreciation which he, as a matter of fact, enjoys. One who has injured another's reputation is bound to rehabilitate his victim as far as possible if the statement was calumnious it must be retracted. If it was true, then some expedient or other must ordinarily be found to undo the harm. If as a result of the backbiting or slander there has followed, for example, the loss of money or position, this must be made good. It is probable that for the bestowal of reputation, as such, one is not obliged to make pecuniary compensation. This is so unless a judge of competent jurisdiction has so mulcted the traducer. In that case the tale-bearer or slanderer is bound in conscience to oblige his creditor.

Joseph F. Delant.

Requiem, Masses of, will be treated here under the following heads: I. Origin; II. Formulary; III. Colour of the Ornaments; IV. Conditions for celebrating; V. Rite; VI. Solemn Funeral Mass; VII. Mass in Commemoration of All the Dead; VIII. Mass Post Abscentem Mortis Nuncium; IX. Solemn Mass on the Third, Seventh, and Thirtieth Days, and on Anniversaries; X. High Mass; XI. Low Mass.

I. Origin.—Requiem Masses are Masses that are ordered for the dead. The name from the first word of the Introit, which may be traced to the Fourth Book of Esdras, one of the Apocalypse, at the passage "Expectate pastorem vestrum, requiem sterilitatis dabitis vos... Parati estes ad præmia regni, quia lux perpetua est vos perpetuam in temporalibus" (IV Esdr., 8, 34, 35). It is also connected with a passage in Isaias, "Et requiem tibi dabit Dominus semper, et implebit splenditum animam tuae" (Is. lviii, 11). The Antiphon is from Psalm lxiv. The date of the adoption of this Introit is well known and is 24th October, the anniversary of the diaconal consecration of St. Gregory of Albino (see the
according to the indications of the Missal, in appropriate relation to the person for whom the Divine Sacrifice is offered.

The ceremonies of the Mass of Requiem are the same as those of the so-called "Mass of the Living," with the exception of a few omissions and variations, as specified in title XIII of the Rubrics. The psalm "Judica me" is omitted at the beginning; this omission certainly bears a relation to the masses of Passion Time, in which that psalm is likewise omitted. It should be noted, however, that the omission on Passion Sunday is due to the fact that the psalm is said in the Introit, and could not possibly be placed. As this psalm xiii was omitted in all the ferial masses of Passion Time, that omission was regarded as a sign of mourning, and accordingly became a characteristic of the Mass of Requiem, although the psalm itself is not at variance with the nature of this Mass. The two doxologies and the Alleluia, which are regarded as expressions of joy and festivity, are naturally omitted, to express mourning, although the Alleluia was formerly used in Masses of Requiem, as may be seen in the antiphony of St. Gregory men alluded to above (Off. Breve, "Dietio et laurus", a II [no. 1235]). Without this omission the blessing of the water which is poured into the chalice, rubricists, taking it one from the other, say with Gavantus (Rubr. Miss., II, vi, 4, g.) "Non benedicitur aqua... quae populum significant, in Christo, qui jam est in gratia." But, admitting that the water which is mixed with wine represents the people, as Benedict XIV shows upon the authority of St. Cyprian (Sacr. Miss., II, x, 13), this mystic explanation does not show why the water should not be blessed. It seems more probable that the explanation for this practice should be sought in the principle, admitted in the Latin Rites, that, as an evidence of mourning, all signs of reverence and salutations are omitted, among them the blessing of objects and of persons, just as on Good Friday the blessing of the water, all obsequies and salutations, and the blessing of the people are omitted.

III. COLOUR OF THE VESTMENTS.—Requiem Mass should always be celebrated with black vestments and ornaments, black, in the Latin Rite, representing the deepest mourning; for, as the Church robes its ministers in black on Good Friday, to show its greatest grief, caused by the death of the Divine Redeemer, while it uses the mixed colour of violet during Passion Tide, so also, in celebrating the obsequies of the dead, it uses the "animal" of greatest dark of all. Without exception to the above rule was made by the Congregation of Rites (decr. 3177 and 3844), which prescribed that when the Blessed Sacrament is exposed on All Souls day, in the devotion of the Forty Hours, the colour of the vestments must be violet. In many places it was held that bishops and cardinals might use violet vestments for the Mass of Requiem; and this opinion was put into practice. It may have originated in the fact that a Mass celebrated by the bishop is considered more solemn than others; on the other hand, it may be that, as the violet vestments were not used prior to the thirteenth century, because Innocent III makes no mention of them (Mist. Miss., I, lxv; P. L., 217), while black was used on penitential days, some bishops may have undertaken to substitute violet for black in the Requiem Mass also. This practice has received no authoritative sanction; and as the bishop, when officiating on a given day, must use vestments of the colour prescribed by the Rubrics for that day, there is no reason why he should not celebrate a Mass of Requiem Mass. And in fact, the cardinal who celebrates a solemn Mass for the dead in the pontifical chapel in the presence of the supreme pontiff, on occasions of the greatest solemnity, always uses black vestments.
IV. CONDITIONS FOR THE CELEBRATION OF REQUIEM MASSES.—The Mass of Requiem is by its very nature extra ordinem officii, according to the Rubric (Rubr. Miss.); that is, it has no relation to the Office of the day. From this point of view, the Mass of Requiem may be rightly considered a votive Mass, i.e., leading to the death (Rubr. Miss. ante Miss. Vot.), votive Masses may not be celebrated "except for some reasonable cause" (nisi rationabili de causa), since "the Mass should, as far as possible, accord with the Office" (quodam semel Missa omnino officiis conveniat); and therefore neither may Requiem Masses be celebrated without reasonable motive; and this reasonable motive does not exist when the Mass is not to be offered for one, or several, dead, in particular, or for all the dead in general. For that reason, the custom that has grown up in our days, even in some of the Roman churches, of providing only black vestments in the sacristies on days of Semi-double, Non-festive, or Non-privileged, Rite, is not to be approved. It may be said, however, in justification of this practice, that at present, Masses of this structure, Missae pro Massae transmisae, are given, for the greater part, in behalf of the dead; yet it is true that many stipends are paid with the intention of obtaining special graces in behalf of the living, particularly at the sanctuaries to which the faithful have a natural or a spiritual tie, or the Blessed Virgin. The priest, however, who knows that he should offer the Mass in behalf of living persons, and not for the departed, has no reasonable cause to celebrate the Mass of Requiem, and therefore may not licitly celebrate it. This seems to be a rule without exception that Masses which are said according to the Office of the day may be applied to the dead, is easily understood, since the formulary of the Mass is separable from the application of the Sacrifice itself. So also, there is no doubt about the Mass of the dead, and duly concelebrated Masses, even though the formulary be that of Requiem (cf. Bucceroni, "Enchir. Mor.", 3rd ed., p. 282); but it is not licit, since the liturgical rules clearly and Justly allow the reading of the Missal of Requiem only for the reason of its application to one or more of the dead.

There are other conditions for the celebration of the Requiem Mass; one is that the rite of the day should allow of the celebration; another that the celebrant be not obliged, by reason of his official charge, to say another Mass, which will be said in regard to this impediment of the rite or of the solemnity of the day, when we come to speak of the various masses of Requiem. As to the impediment that arises from the celebrant's official charge, we may say at once that it can be either the obligation of saying the conventual Mass, or that of saying the parochial Mass on a feast day. It is known that the conventual Mass, which should be celebrated by chapters, in cathedrals and in collegiate churches, is never to be omitted; since it is the chief and noblest part of the whole office (Benedict XIV, Const., 19 Aug., 1744, n. 11); for which reason, if there should be but one priest at a collegiate church, it would be his duty to say the conventual Mass, even if the solemn obsequies of one deceased were to be celebrated, as the Ritual expressly provides (VII, i, 5). The same is to be said of the parochial Mass, which the parish priest is to celebrate pro populo on each feast day; for which reason, if there should be but one parish priest at a parish on a feast day, he may be privileged to say more than one Mass, he may not celebrate the Mass of Requiem, even if it be a question of the obsequies of one deceased, presente cadavere. The reason for this prohibition is the rigorous obligation that binds each parish priest to offer the Mass on feast days for his people, an obliga-

tion which, according to the Council of Trent (Sess. XXIII, I, de ref.), arises from the Divine precept, for him who has the care of souls "to offer sacrifices for the people" (offer sacrificia pro populo). Benedict XIV (op. cit., n. 2) declares: "Eos, quibus animarum cura demandata est, non modum sacrarum Missarum Messe liceret, turbae medium pro populo sibi commissio aplicare debere", so that this is a common doctrine among canonists that has been confirmed at different times by the Congregation of the Council. Now if, in order to celebrate the Mass of Requiem, the Mass must be offered for the dead, and if there is only one Mass in a parochial church on a feast day which must be offered pro populo, it is manifest that this Mass may never be one of Requiem, but, on the contrary, as the Congregation of Rites has frequently declared, it must always be according to the Office of the feast. Also the Congregation of the Council (16 June, 1770, in Tesulana), being asked "An parochi in Dominiciis aliasque festis diebus presente cadavere, possint celebrare missam pro defuncto, et in aliam diem Missas pro populo applicandam", answered: Negative.

The Monday Privilege.—In the United States there is a faculty ("Fac. Ord.", Form I, 20) ordinarily communicated to priests through the bishops, which permits the priest to celebrate a Missa in absentia at his own residence on Mondays non impeditis officio nove lectinum. The phrase officio novem lectionum gave rise to a doubt as to whether semi-doubles only were referred to, or if doubles also were understood. The Congregation of Rites answered (4 Sept., 1875, n. 3376, ad. 1) that this Mass was allowed on all Mondays during the year, except (a) on the vigils of Christmas and the Epiphany; (b) in Holy Week; (c) during the octave of Christmas, the Epiphany, Easter, Pentecost, and Corpus Christi; (d) holy days of obligation; (e) feast days of doubles of Sacred Scripture. If the enumerated cases hinder this Mass on Monday, the privilege is transferred to Tuesday, under the same conditions, but it lapses after that day.

V. Rites.—The Office and the Mass for the Dead, in their construction, as in their varied rite, are modelled on the offices and the masses of the liturgical feasts; and, as these are divided by Double Rite, and Semi-Double Rite, with their various classes, so also, are the Masses of Requiem divided. The Mass of Requiem is well known to living persons; it will be said in regard to this impediment of the rite or of the solemnity of the day, when we come to speak of the various masses of Requiem. As to the impediment that arises from the celebrant's official charge, we may say at once that it can be either the obligation of saying the conventual Mass, or that of saying the parochial Mass on a feast day. It is known that the conventual Mass, which should be celebrated by chapters, in cathedrals and in collegiate churches, is never to be omitted; since it is the chief and noblest part of the whole office (Benedict XIV, Const., 19 Aug., 1744, n. 11); for which reason, if there should be but one priest at a collegiate church, it would be his duty to say the conventual Mass, even if the solemn obsequies of one deceased were to be celebrated, as the Ritual expressly provides (VII, i, 5). The same is to be said of the parochial Mass, which the parish priest is to celebrate pro populo on each feast day; for which reason, if there should be but one parish priest at a parish on a feast day, he may be privileged to say more than one Mass, he may not celebrate the Mass of Requiem, even if it be a question of the obsequies of one deceased, presente cadavere. The reason for this prohibition is the rigorous obligation that binds each parish priest to offer the Mass on feast days for his people, an obliga-

tion which, according to the Council of Trent (Sess. XXIII, I, de ref.), arises from the Divine precept, for him who has the care of souls "to offer sacrifices for the people" (offer sacrificia pro populo). Benedict XIV (op. cit., n. 2) declares: "Eos, quibus animarum cura demandata est, non modum sacrarum Missarum Messe liceret, turbae medium pro populo sibi commissio aplicare debere", so that this is a common doctrine among canonists that has been confirmed at different times by the Congregation of the Council. Now if, in order to celebrate the Mass of Requiem, the Mass must be offered for the dead, and if there is only one Mass in a parochial church on a feast day which must be offered pro populo, it is manifest that this Mass may never be one of Requiem, but, on the contrary, as the Congregation of Rites has frequently declared, it must always be according to the Office of the feast. Also the Congregation of the Council (16 June, 1770, in Tesulana), being asked "An parochi in Dominiciis aliasque festis diebus presente cadavere, possint celebrare missam pro defuncto, et in aliam diem Missas pro populo applicandam", answered: Negative.

The Monday Privilege.—In the United States there is a faculty ("Fac. Ord.", Form I, 20) ordinarily communicated to priests through the bishops, which permits the priest to celebrate a Missa in absentia at his own residence on Mondays non impeditis officio nove lectinum. The phrase officio novem lectionum gave rise to a doubt as to whether semi-doubles only were referred to, or if doubles also were understood. The Congregation of Rites answered (4 Sept., 1875, n. 3376, ad. 1) that this Mass was allowed on all Mondays during the year, except (a) on the vigils of Christmas and the Epiphany; (b) in Holy Week; (c) during the octave of Christmas, the Epiphany, Easter, Pentecost, and Corpus Christi; (d) holy days of obligation; (e) feast days of doubles of Sacred Scripture. If the enumerated cases hinder this Mass on Monday, the privilege is transferred to Tuesday, under the same conditions, but it lapses after that day.

V. Rites.—The Office and the Mass for the Dead, in their construction, as in their varied rite, are modelled on the offices and the masses of the liturgical feasts; and, as these are divided by Double Rite, and Semi-Double Rite, with their various classes, so also, are the Masses of Requiem divided. The Mass of Requiem is well known to living persons; it will be said in regard to this impediment of the rite or of the solemnity of the day, when we come to speak of the various masses of Requiem. As to the impediment that arises from the celebrant's official charge, we may say at once that it can be either the obligation of saying the conventual Mass, or that of saying the parochial Mass on a feast day. It is known that the conventual Mass, which should be celebrated by chapters, in cathedrals and in collegiate churches, is never to be omitted; since it is the chief and noblest part of the whole office (Benedict XIV, Const., 19 Aug., 1744, n. 11); for which reason, if there should be but one priest at a collegiate church, it would be his duty to say the conventual Mass, even if the solemn obsequies of one deceased were to be celebrated, as the Ritual expressly provides (VII, i, 5). The same is to be said of the parochial Mass, which the parish priest is to celebrate pro populo on each feast day; for which reason, if there should be but one parish priest at a parish on a feast day, he may be privileged to say more than one Mass, he may not celebrate the Mass of Requiem, even if it be a question of the obsequies of one deceased, presente cadavere. The reason for this prohibition is the rigorous obligation that binds each parish priest to offer the Mass on feast days for his people, an obliga-
solemn, that is of a more or less exalted class. The other offices, and the other masses of Requiem, according to what has been said above, will be of the Semi-Double Rite. As, on the other hand, masses of Requiem are more or less privileged, according as they are missae cantae or high Masses or are low Masses, and according to the degree of novelty among the low (see Mass, LITURGY OF THE: V. The Present Roman Mass) are more privileged than others of their respective kinds, we will divide them into solemn and low, and then subdivide them according to their places of celebration.

VI. EXEQUIAL HIGH MASSES.—An exequial Mass is one that is celebrated on the occasion of the obsequies (exequerium) of a person, before the burial. It is clearly expressed in the Ritual (RIT, I, 4): "Quod antiquissimae est instituti illud, quantum fieri potest, retinatur, ut Missa presente corpore defuncti, pro eo celebretur, antequam sepultura tradatur" (As much as possible, let the ancient ordinance be retained, of celebrating the Mass with the body of the deceased present, before it is given burial). And it was the invariable custom and, as far as we know, the earliest ages of the Church, to celebrate the Synchronia for the dead before the burial (cf. Tertullian, "De Monog.", X, and St. Augustine, "Confess.", IX, 12). And it is worthy of notice that, from those ancient times, the Mass should not be celebrated in a Mass on Sundays, as Paulinus testifies (Vita S. Ambrosii, XLVII): "Luccecentse die Dominico, cum corpus ipsius [S. Ambrosii] peractis Sacramentis divinis, de Ecclesia levaretur portandum ad basilicam ambrosianam..." (At dawn of the Lord's Day, when, after the Divine Mysteries had been celebrated, his [St. Ambrose's] body was taken from the church and carried to the Ambrosian Basilica). In this connexion, Martene cites from the "Consuetudines Cluniaciensae" ("Ant. Monarch. rit.", Venice, 1783, V, x, 22, p. 267): "Omni tempore sepelieandis est frater post majorem Missam. Si in ipso Resurrectionis Dominice vel ipsius die crepusculo obierit, quo scilicet oporteat eum ipso die sepelire, matutinalia Missa pro eo cantatur" (At any time a brother must be buried after the Mass. If he has died on the Day of the Resurrection itself or in the early hours of that day, and it is necessary to bury him that same day, the morning Mass shall be sung for him). And those edifying Benedictine "consuetudines" give the reason: "Nam tanta est auctoritatis pontificii, quoniam tu unitate hujusmodi Missa non potest negligientia intermitteri" (For the presence of the corpse constitutes such a serious reason that, even on a festival as great as this, a Mass of this kind must not be neglected).

While holding to the principle that ceremonies of mourning should not interfere with the joyousness of liturgical feasts (for which reason the solemn commemoration of all the faithful departed is transferred to the following day whenever the 2nd of November falls on a Sunday) the Church, mother, desirous of hastening the relief of a deceased child, wishes the exequial Mass to be celebrated, even on a feast day, although she places some conditions, as the Ritual shows (VII, I, 5): "Si quis die festo sit sepeliendus, Missa pro defuncto presente corpore, celebrare poterit, dum tamen Conventualis Missa et officia divina non impediantur, magnaque diei celebratiae non obstet" (If anyone is to be buried on a feast day, the Mass proper for the deceased must be celebrated in the presence of the corpse, so long as not interfered with, and the great solemnity of the day does not oppose it). Four conditions, then, are here established: (a) that the corpse of the deceased be present; (b) that the conventual Mass be not prevented; (c) that the Divine Offices be not prevented; and (d) that the great solemnity of the day do not oppose it.

(a) The presence of the corpse in the church is required, according to ancient custom, as the Ritual shows. Formerly, the actual physical presence was prescribed, but, little by little, the Church has modified this law, and it is according to the canons of the new legislation, that is since the decree of the Congregation of Rites of 13 February, 1892 (n. 3767 ad 26), the Rubric of the Missal (V, 2) has been altered. Since, in modern times, whether through the prohibition of civil laws, or because of death by contagious diseases, corpses may not always be taken to the church, the ecclesiastical law has been so broadened that the body of the deceased is considered present fictione juris, as long as it is not buried, and even if it has been buried for not more than two days. These are the words of the Decree in question: "Cadaver abeaus ob civile vetitum, vel morbus contagiosum, non solum inseptulum, sed et humatum, dummodo non ultra biduum ab obitu, cenae potest ac si foret physice present, sit ut Missa exequialis cantari" (If the corpse be shown to the public by virtue of a civil prohibition or by reason of contagion, or has been buried before two days are over, the Missal Mass may be sung). (b) The second condition is that the exequial Mass do not prevent the celebration of the conventional, or of the parochial Mass, but to this we have already referred above, under IV. (c) The exequial Mass is said with the following rubrics: "Tempestate, Missae on feast days, i. e. with the sacred functions which a parish priest should perform in behalf of his people. These days are (i) Ash Wednesday; (ii) the vigil of Pentecost, if the parish priest is to bless the font, and (iii) the days of the Major and of the Minor Litanies; so that, if there be on these days only one Mass in the parish church, it may not be of Requiem, but must be the one which the Rubrics prescribe for the day (S. C. R., decr. 3776 and 4005).

(d) The fourth condition of the Ritual for the celebration of the exequial Mass on a feast day is that the great solemnity of the day does not oppose it. Now the great solemnity of the day, in this connexion, is declared by the Church through the more solemn rite with which some feasts throughout the year are celebrated, namely, primary days of the Rite of the First Class (S. C. R., decr. 3755), which are (i) Christmas and the Epiphany; (ii) Holy Thursday, Good Friday, and Holy Saturday; (iii) Easter Sunday, the feasts of the Ascension, Pentecost, and Corpus Christi; (iv) the Immaculate Conception, Assumption, and Easter octave of the Virgin Mary; (v) the feasts of St. John the Baptist, of St. Joseph, of the Holy Apostles Peter and Paul, and of All Saints; (vi) the local feasts of the principal patron of the place, of the dedication, and of the titular of the church. It should be observed that, although the two days following Easter and Pentecost are of the First Class, the Church, to hasten the relief of the deceased, does not except them, and the solemn exequial Mass may be celebrated on these feasts, as on all other feasts of the First Class that are not named in the decree of the Church. Therefore, it may be said, therefore, that this Mass in die Deposionis is of the Double Rite of the First Class, since it is allowed on feasts of that rite.

VII. MASS OF ALL SOULS' DAY.—The commemoration of All Souls has been a very solemn one in the Church ever since the time of its establishment; and as its observance was propagated throughout the Christian world, it came to be celebrated with more and more devotion by the people, on 2 November. Nevertheless, when it occurs on a Sunday, or on a feast of the Double Rite of the First Class, as is said, it is celebrated on the following day. In this case, there being no question of hastening the relief of one who has passed away, the Church does not wish that the festivity of the Lord's Day or the solemnity of any other feast of the First Class should be
diminished by the mourning inherent in the Commemoration of the Dead. There is the further intention to facilitate the offering of all Masses, even low Masses, on All Souls’ Day for the repose of the departed. For the same reason the Church prescribed for the thirtieth; let day of the year a feast of the Second Class should occur on All Souls’ Day, it shall be transferred to the following day, in order that the Commemoration of All the Dead may be celebrated. The rite of this commemoration, therefore, is inferior to that of the Funereal Mass; since the commemoration may not be offered either on a feast day or on a double of the First Class; wherefore, it may be called a Double of the Second Class.

VIII. MASS POST ACCEPTUM NUNCIUM.—The solemn Mass of Requiem which may be offered, as soon as news of the death is received, for a person who has died in a distant place, comes in third place. It is the same Mass that is said in die depositionis, but has not the same privileges, since it may not be celebrated (a) on any holy day, (b) on feasts of the First and Second Class, or (c) on those ferials and octaves upon which Doubles of the First and of the Second Class are forbidden. Those are (a) Ash Wednesday and the ferials of Holy Week; (b) the vigils of Christmas and of Pentecost; (c) the days during the octave of the Holy Cross; the octave of Pentecost; (d) the octave day of Corpus Christi. All of this has recently been established by the Church (S. C. R., dec. 28 Apr., 1902) to facilitate the suffrages for the dead; but as the exequial Mass has already been offered for the deceased at the place of his death, the Mass post acceptum has not received all the privileges of the former. It should be remembered, however, that this Mass may be offered on a feast of the Greater or Lesser Double Rite, when offered post obitutum; in this case, the Mass loses all privileges, and a day of the Semi-Double Rite must be awaited (S. C. R., dec. 2461, ad 6). For this reason it may be said that the exequial Mass post acceptum nuncium is of the Greater Double Rite, since Doubles of the Second Class take precedence over it.

IX. MASSES OF THE THIRD, SEVENTH, TENTH, AND ANNIVERSARY DAYS.—The Requiem Mass of each of these days is privileged, because, according to ancient tradition accepted in canon law (Can. 863, 864), the third, seventh, tenth, and thirty days after the death were always commemorated in a special manner on those days. With regard to the third day, as commemorative of the three days which Christ passed in the sepulchre, and as presaging the Resurrection, there is special prescription in the Apostolic Constitutions (VIII, xii): “With respect to the dead, let the third day be celebrated in psalms, lessons, and prayers, because of Him who on the third day rose again.” It appears also, in this connection, that in ancient times there was a triduum in behalf of the deceased, as is shown by what Eusebius writes in a letter (Ep. S. Augustini, civili): “Exequias praebimus satis honorabiles et dignas tantas anime; nam per triduum hymnis Deum collaudavimus super sepulchrum ejus, et redemptionis Sacramenta tertia die obtulimus.” (We performed thedue obsequies, worthy of so great a soul, joining in hymns to the praise of God for three days at his sepulchre, and on the third day we offered the Mysteries of Redemption.) With regard to the seventh day, we have the testimony of St. Ambrose (De fide resurr.), which bears on the ancient practice of the day: “Nunc quoniam die septimo ad sepolchrum redimus, qui dies symbolum fraternae quietis est.” (Now, since on the seventh day, which is symbolic of fraternal repose, we return to the sepulchre, St. Ambrose, again, speaks of the thirty third day, and also of the fortieth day (De ob. Theodossii, i): “Quis aliis tertium diem et trigesimum; aliis septimum et quadragesimum observare consueverunt, quid docet lectio consideremus?” (As some have been wont to keep the third and the thirtieth days; others the seventh and the fortieth, what does the rule command?) The annual commemoration of a departed brother was more universal and more solemn; it resembled the feasts of the martyrs and, according to Tertullian, dates from Apostolic times (cf. Magani, “L’antica Liturgia Romana”, Milan, 1859, III, 385).

The third, seventh, and thirtieth days may be counted from the day of the death or from the day of the burial (S. C. R., dec. 2482 and 3112); the day itself of the death or of the burial should not be counted, because the language of the decree (ab obitu, a depositione) excludes those days, either one of them being not the first day, but the day from which the computation should begin. If, therefore, the burial take place on the eleventh day of the month, the first day after it, of course, will be the twelfth day of the month; the second, the thirteenth; the third, the fourteenth. So also for the seventh and the thirtieth days. There is no rule that requires the selection of the same date, either of death or burial, in computing the day for these commemorations; wherefore, one may celebrate the third day, counting from the day of the death; the seventh day, counting from the day of the burial; the thirtieth day, counting from the day of the death. On the other hand, anniversaries are usually celebrated on the day of the month upon which the death occurred; nevertheless, the Congregation of Rites, which have prescribed this day (Decree of 21 July, 1855), now allows the anniversary to be counted from the day of the burial (Decree of 5 March, 1870), which concession is useful in case the anniversary of the death should fall on a day on which this Mass could not be celebrated; in this case, annulment may be granted. The thirtieth day, for instance, may be celebrated, without excluding, in subsequent years, a return to the celebration of the anniversary of the death, according to the ancient tradition. According to the present liturgical laws, the high Mass of Requiem may be celebrated on the third, seventh, thirtieth, and anniversary days, even if those days occur on a greater or on a lesser double. Its celebration is prohibited, however, on (a) any holy day of obligation, including Sundays; (b) all doubles of the first or second class; (c) Ash Wednesday and during the octave of Carthusian Holy Cross; (d) the octave of Pentecost; (e) during the privileged octaves of Christmas, Epiphany, Easter, Pentecost, and Corpus Christi; (f) the days on which the Blessed Sacrament is exposed; (g) Rogation Days, when but one Mass is celebrated (cf. Decree 3753, 1873 and 3753). When, on the other hand, the third, seventh, thirtieth, and anniversary days are impeded, they may be anticipated by one day or postponed to a day that is not among those enumerated above, even if it be a greater or a lesser double. In case the day before, or the day on which these Masses cannot be celebrated, it will be necessary to await a day of the Semi-Double Rite upon which a Requiem Mass may be celebrated, and to use the formulary of the daily Masses (cf. Decr. 3753, ad 3).

There is another kind of anniversary Mass that is published by the new liturgical law, called late summum. It is the anniversary that is celebrated each year by chapters, religious communities, or confraternities, on a day that is not the anniversary of the death or of the burial of the deceased. The solemn Mass of the late summum is, and is given the name of the day of the Lesser Double Rite, but not of the Greater Double. The solemn Mass that is celebrated on the days of the octave of All Souls’ Day enjoys the same privilege (cf. Decr. 3753, ad 5). As has been said above (V), the Requiem Mass is celebrated on the day of the anniversary Mass (that is, it has a single Prayer) whenever it corresponds.
to the Office for the Dead in which the antiphons are doubled; and therefore, whenever, at the request of the faithful, a solemn Office is celebrated for one or more deceased persons, especially if there is a concourse of the people, the corresponding Mass must be celebrated with the Double Rite, as the Rubric of the Missal prescribes (cf. Unicae temporis ortio dicenda est in missa omnibus ... quan-
documque pro defunctis missa sollemniter celebratur" (In any Mass solemnly celebrated for the dead, only one prayer is to be said). This Mass, however, may be celebrated only on days of the Semi-Double or the Single Rite, exclusive of those days named above on which it is forbidden to celebrate the anniversaries.

Requiem Mass. This Mass, like that of the anniver-

sary late sumptum, is of the Lesser Double Rite; while the Mass of the third, seventh, and thirteenth days, as also that of the anniversary strictum sumptum, is of the Greater Double Rite, since it may be celebrated on the doubles that are not of the first or of the second class.

X. Missae Cunctae—These (sung, but not high, Masses of the Missal that are called missae cunctae according to the Missal. They are of the Semi-Double Rite, because they have three prayers, and correspond to the Office that is recited without duplication of the antiphons. It is forbidden to celebrate these Masses on any of the days mentioned above, upon which the Mass is sung by religious orders and, on the days upon which there is a feast of the Double Rite, even the Lesser, and therefore they are allowed only on semi-double, non-privileged days. To this class of Requiem missae cunctae belongs the one which the Rubric of the Missal (V, 1) provide shall be cele-

brated in the cathedrals and collegiate churches de praecipio (S. C. R., decr. 2928): "Prima die eujusque mensis (extra Adventum, Quadragesimam et Tempus Paschale) non impedito officio duplani vel semi-
duplani." This Mass is truly conventional, should be celebrated after Prime, as the Rubrics of the Missal prescribe (XV, 3), and should be sung Mass (decrees 1609 and 2424). The first of the month is understood to mean the first day of the month that is free of any double or semi-double, even transferred, Office (decrees 2380); and if there be no such free day in the whole month, the obligation ceases; which frequently hap-

pens, especially now, when the votive Offices have been admitted. In this Mass of Requiem, as in all other sung Misses hitherto mentioned, the Sequence shall be sung, as fixed, and the Missal and the general decree of 30 June, 1896 (No. 3920), provide. The three Prayers of the fourth formulary shall be used (decrees 2928), for they are adapted to the end which the Church has in view in prescribing the monthly celebration of this Mass, which is "generaliter pro defunctis sacerdotibus, benefactoribus et alienis," as the above-cited rubric shows.

XI. Low Masses.—According to the ancient canonical law, a low Requiem Mass could be celebrated only on days of semi-double, non-privileged Rite; so that, even presenti cadavere, if the rite of the day were double, although it were lesser, the Mass of the day had to be celebrated. The liturgical law, however, has been very much changed in relation to low Masses; and, as there are among them some that are more privileged than others, we will divide them according to the privileges that they enjoy.

A. Low Exequial Mass said in place of the High Mass.—As has been seen above, the Church desires that no one of its children be laid in the grave without a mention of the Mass. See how poverty often prevents the relatives of the deceased from having the obsequies celebrated with solemnity, the Church, always a loving and indulgent mother, permits the high Mass to be replaced by a low one. At first, some limitations were placed to this opportune concession (cf. Decree of 22 May, 1843, in Mechanum., ad 6); now, however, by the general Decree of 9 May, 1899 (No. 4024), this exequial low Mass, which takes the place of a high Mass, is celebrated with all the privileges of the latter. In our opinion, the low exequial Mass said in the place of the high Mass is enjoyed the privileges of the latter, through special circumstances, the high Mass may not be celebrated, even in the case of the wealthy; as, for example, if the persons invited to the funeral could not remain long at the church, and the relatives of the deceased should on this account ask that the Mass be a low one. This is actually practiced in some places, and we believe that it may not be condemned, seeing that it is in accordance with the spirit of the Church, which, in recent times, has considerably modified its regulations in this connection.

B. Low Mass on the Day of Obsequies and in the Same Church.—According to the ancient liturgical law, formulated in the Rubrics of the Missal of St. Pius V, low Requiem Mass, although the body were present, could not be celebrated on days of the Double—even Lesser Double—Rite. But the great reverence in which the Double Rite was held and by the fact that, at the time of St. Pius V, there were very few feasts of this rite in the universal calendar. But as the number of these feasts had been greatly augmented, especially in the calendars of some of the Eastern dioceses, where there was no longer any reason for the rule: first, because the Double Rite, having come to be so abundantly granted, was no longer held in the high esteem that it had formerly enjoyed; secondly, because the great number of new doubles made it impossible to celebrate the low Requiem Mass on the day of the burial. These considerations were submitted to the Congregation of Rites in February, 1896. On 19 May following, there was published the general Decree No. 3903, which begins: "Aucto postemis hisce stipulatorum maximo in calendaris particularibus, Officiiorum duplucium numero, quum pauci superiori per annum dies, qui Missas privatias de Requie fieri permittant... Thanks to this opportune decree, the low Mass, as well as the solemn one, may be celebrated at the obsequies of one deceased, even on a double. There are, however, certain conditions for the celebration of these low Masses. (1) They are allowed only on the day of the obsequies and in the church where the obsequies are celebrated, with or without presence of the deceased or his relative; (2) they must be celebrated on a Sunday, or other holy day of obligation, even though the latter may have been suppressed; (4) they may not be celebrated on a Double of the First Class, even secondary, or on a day of which the rite prevents these Doubles of the First Class—

that is, on Ash Wednesday and during Holy Week, the vigils of Christmas and of Pentecost, during the octave of Pentecost, and on the octave day of the Epiphany (ibid., ad 5). Such were hitherto the rules for low Masses on the day of obsequies and in the same church, but by a recent Decree of the Sacred Congregation of Rites these low Masses are now forbidden also on all Doubles of the Second Class. These Masses, of course, are of the Double Rite; they have but one prayer, and the Sequence is as in the solemn high Mass.

C. Low Mass in the Private Chapel, before the Burial.—This Mass of Requiem, also, is a recent con-

cession of the Church. See how poverty often prevents the relatives of the deceased from having the obsequies celebrated with solemnity, the Church, always a loving and indulgent mother, permits the high Mass to be replaced by a low one. At first, some limitations were placed to this opportune
BEREDOS 782

(of Ephem. Liturg., 1899, p. 607); these Masses have all the privileges of the exequial low Mass. The sacred texts of all the Masses that are said in what are called mortuary chapels, in the palaces of cardinals, bishops, and princes, at the death of such personages, as long as the body remains exposed there, provided these Masses are for the repose of the deceased prince or prelate. By a recent decree of the Sacred Congregation of Rites these Masses are forbidden also on all Sundays of the Second Class.

D. Low Masses in Cemetery Chapels.—In the public or semi-public oratories of cemeteries, and also in the private chapels erected in burial places, Requiem Masses may be said every day, providing they be offered for the dead, except (1) on all feasts of precept, including Sundays; (2) on the Doubles of the First or of the Second Class; (3) on Ash Wednesday and during Holy Week; (4) on the vigils of Christmas and of Pentecost; and (5) during the privileged octaves of Christmas, Epiphany, Easter, Pentecost, and Corpus Christi (S. R. C., decret. 3944). This privilege, however, does not extend to the parochial church, although that church may be surrounded by a cemetery, and therefore considered a cemetery church; neither does it extend to those octaves which have been erected in disused cemeteries (S. R. C. Decr. 28 April, 1902, in "Ephem. lit.", 1902, p. 355).

E. Daily Low Masses.—These Masses of Requiem, called daily in the Missal, may be celebrated under the same restrictions as the Rubric establishes for votive Masses (General Prece 3922, III, 2; and Rubr. Miss., V, 5); that is they are allowed on days of the Simple or the Semi-Double Rite, and are forbidden on all days of the Double, even the Lesser Double, Rite, as well as on the days named above under IX. By a recent decree of the Sacred Congregation of Rites the daily low Masses are forbidden on the following days of a Semi-Double or Simple Rite: (a) all ferials of Lent; (b) quartertenses; (c) Rogation Monday; (d) vigils; (e) ferial on which the office of a Sunday is anticipated. In the Masses of these ferials or vigils, if they are celebrated for one or more deceased persons, it is permitted to insert, in the penultimate place, the oration for the deceased person or persons, and although those Masses are celebrated in violet or green vestments, nevertheless, by consecration of the rite pontiff, the indulgence of a privileged altar may be gained. The Sacred Congregation of Rites had already declared this by the Decrees no. 1793, 2041, and 2062. They are of the Semi-Double Rite, and have three prayers at the end of the Second, and seven, the third being always an odd one, as the Missal shows (V, 4). According to the new liturgical laws, however (S. R. C., decret. 3920), if the Mass is offered for one or more dead who are named, the first prayer is said accordingly, the second is taken ad libitum, and the third is always the "Fidelium". If, on the other hand, the Mass be offered for the dead in general, the three prayers are said as the Missal provides. If the celebrant wishes to say five or seven prayers, he may say two or four, between the second, "Deus venie", and the last, "Fidelium", from among those given in the Missal, following the order in which they are there given. As is known, the Sequence may be omitted or recited in the daily low Mass, according to the choice of the celebrant.

PIETRO PIACENZA.

BEREDOS. See ALTAR, sub-title ALTAR-SCREEN.

RERUM Creator Optime, the hymn for Matins of Wednesday in the Divine Office. It comprises four strophes of four iambic dimeters rhymed in couplets, e. g.:

Rerum Creator optime, rectore nostro aspice:
Nos a quiete noxia
Mensae sopore liberam.

Its ascription to St. Ambrose is not sanctioned by the most recent authorities. Mone cites it as in an eighth-century manuscript at Trier, denying it to St. Ambrose because of its rhyme and thinking it may possibly be by St. Gregory the Great (d. 604). Pimont also regards it as by St. Gregory, but with the remark that, if a choice must be made between the two, he would certainly choose him; Biraghi does not include it in his inni sinceri of St. Ambrose, nor does Dreves place it among those "possibly his". Blume thinks that neither St. Ambrose nor St. Gregory may seriously be considered for ascription of authorship. Daniel, citing it as in a manuscript of the tenth century at Rheinau, puts it in his category of hymns of the seventh and eighth century. Pimont ("Les hymnes du breviaire roman", I Paris, 1874, pp. 90–91) gives the hymn a Latin text, uncorroborated, as a monitory. The "Hymnarium Sarisburiense" (London, 1851, p. 49) gives the uncorrected Latin text with various manuscript readings. The variants from the text of the Roman Breviary are nine in number and of small importance, but Pimont thinks that in the copula of what he styles the textu primitivi Te, sancte Christe, poccimus, Ignoscus Tu criminibus, the contrast between the holiness of Christ and the sinfulness of His petitioners is better emphasized in criminibus than in the culpibus of the Roman Breviary text (Ignoscus culpis omnibus), while the Te of the first line and the Tu of the second line heighten the energy of the prayer. He also defends gessimus in the line, "Vides malum quod gessimus", changed in our Breviary to fecimus (possibly because in the older poem the three forms, gerrandum, gestis, gessimus, of the verb gero, occur in close proximity, and also possibly because of the words of the "Misereor" ("Et malum coram Te feci"). There are eight other translations into Latin, one into English, eight by Catholics. Newman's version is given in the Marqess of Bute's "The Roman Breviary". To the list given in Julian's "Dictionary of Hymnology" (2nd ed., 1907, p. 856) should be added the version of Archbishop Bagshawe, "Most Holy Maker of the world" ("Breviarium Hymnorum Sequences", London, 1900, p. 11) and that of Judge D. J. Donahoe, "Creator of the earth and skies" ("Early Christian Hymns", New York, 1908, p. 99).

BLUMENTHAL, Die Hymnen des Thea. Hymnal. H. A. Daniels, etc. in Analecta hymnica, LI (Leipzig, 1900), with MSS references and readings.

H. T. HENRY.

RERUM Deus Tenax Vigor, the daily hymn for None in the Roman Breviary, comprises (like the hymns for Terce and Sext) only two stanzas of iambic dimeters together with a doxology varying according to the season or the feast. As in the hymns for Prime, Sext, and Compline, the theme is found in the steady march of the sun that defines the periods of the day:

Rerum Deus, tenax vigor
Immutus in te per annos,
Lucis diurnae temporae
Successivus determinatur.
O God, whose power unmoved the whole
Of Nature's vastness doth control,
Who markst the day-hours as they run
By steady marches of the sun.

The moral application is, as usual, made in the following stanza:

Largire lumen vaspre
Quo vita nasquam decidat, etc.
O grant that in life's eventide
Thy light may e'er with us abide, etc.

The authorship of the hymns for Terce, Sext, and None is now ascribed only to St. Ambrose. They are not given to the saint by the Benedictine editors (see Ambrosian Hymnography), but are placed by Biraghi amongst his invi sinceri, since they are found in all the MSS. of the churches of St. Ambrose, except those of Dominio, where the longer hymns for the hours were replaced by the present ones. Pinpoint disagrees with Daniel and argues that the saint may well have composed two sets of hymns for the hours. However, the researches of Blume (1838) show that the primitive Benedictine cycle of hymns, as attested by the Rules of Cessarius and Aurelian of Arles, did not include these hymns, but assigned for Terce, Sext, and None (for Easter-time) the hymns: "Jam surgit hora tertia", "Jam scintia sensim volvit", "Ter hora trina volvitur", the earliest MSS. of the cycle give for these hours, for the remainder of the year, the hymns: "Certum tenentes ordinem", "Dicamus laudes Domino", "Perfectum trimum numerum"; while other MSS. give as variants for Lent: "Del fide qua vivimus", "Miserere mei, Deus, speratus". This Benedictine cycle was replaced throughout Western Christendom by a later one, as shown by Irish and English MSS., which give the present hymns for the little hours.

H. T. HENRY.

RESCRIPTS

RESCRIPTS

The Condition of the Working Classes, by Pope Leo XIII, for many centuries had never been stated with such precision and authority. As the years go by and thoughtful men realize more and more how difficult it is to define the full requirements of justice in the matter of wages, a constantly increasing number of persons look upon this doctrine as the most fruitful and effective principle of industrial justice that has ever been enunciated.

JOHN A. RYAN.

Recipients, Papal (Lat. re-actiores; "to write back"), responses of the pope or a Sacred Congregation, in writing, to queries or petitions of individuals. Some recipients concern the granting of favours; others the administration of justice, e.g., the interpretation of a law, the appointment of a judge. Sometimes the favour is actually granted (gratia facta—a recipient in forme gratiosa); sometimes another is empowered to concede the request (gratia facienda—a recipient in forma commissoria); sometimes the grant is made under certain conditions to be examined into by the recipient into whose care it is committed (forma mixta). The petition forwarded to Rome comprises three parts: the narrative or exposition of the facts; the petition; the reasons for the request. The response likewise contains three parts: a brief exposition of the case; the decision or grant; the reason of the same.

Every recipient presupposes the truth of the allegations found in the supplication. Intentional falsehood or concealment of truth renders a recipient invalid, since no one should benefit through his own deceit. According to some, however, a recipient is valid if voluntary misrepresentation affect only the secondary reason of the grant. This is certainly true where there is no fraud, but merely inadvertence or ignorance of requirements; for, where there is no malice, punishment should not be inflicted; and the petition should be granted, if a sufficient cause therefor exist. A recipient in forma commissoria is valid, if the reason alleged for the grant be true at the time of execution, though false when the recipient was issued. When a matter comes before the recipient, the decision is drawn up containing the tenor of the previous concession and cause of nullity, and asking that the defect be remedied. A new recipient will then be given, or the former one validated by letters perinde salvere. If the formalities sanctioned by law or usage for the drawing up of recipients are wanting, the document will be considered spurious. Erasures, misspellings, or grave grammatical errors in a recipient will render its authenticity suspected. Excommunicated persons may seek recipients only in relation to the cause of their excommunication or in cases of appeal. Consequently in recipients absolution from penalties and censures is first given, as far as necessary for the validity of the grant.

Recipients have the force of a particular law, i.e., for the persons concerned; only occasionally, e.g., when they interpret or promulgate a general law, are they of universal application. Recipients in forma gratiosa are effective from the date they bear; others only from the moment of execution. Recipients contrary to common law contain a derogatory clause: all things to the contrary notwithstanding. Recipients of favour ordinarily admit a broad interpretation; the exceptions are when they are injurious to others, refer to the obtaining of ecclesiastical benefices, or are contrary to common law. Recipients of justice are to be interpreted strictly
RESERVATION

Recepts expire for the most part in the same manner as faculties.

A. B. MEENAN.

RESERVATION, the restriction in certain cases by a superior of the jurisdiction ordinarily exercised by an inferior. Reservations may be obtained (q. v., section Colation), in dispensing from vows (q. v.), and in absolving from sins and censures. The power of reservation is vested in its fullness in the pope, who may exercise this right throughout the world. Bishops, regular superiors, or others with similar jurisdiction in the penalistic (q. v.) may reserve to themselves the absolution of sins of their own subjects. Parish priests and local superiors do not possess this right. The chief reason for thus restricting the power of confessors is to deter evil-doers by the difficulty of obtaining absolution. Only graver mortal sins, that are external and completed, not merely attempted acts, should be reserved. Confession would prove too odious, were the confessor's jurisdiction unduly limited. Sins are reserved with censure (see CENSURES, ECCLESIASTICAL) or without censure; nearly all papal reservations belong to the former class, and the reservation is principally on account of the censure; episcopal reservations pertain for the most part to the latter category.

See BANNED POSITIONS; CENSURE; ECCLESIASTICAL, section Absolution from Censure; Council of Trent, Session XXIV, art. viii; Taunton, Law of the Church, art. vi; Reserved Case; and the works of moral theologians.

A. B. MEENAN.

RESERVATION of the Blessed Sacrament, the practice of preserving after the celebration of the Liturgy a portion of the consecrated elements for the Communion of the sick or for other pious purposes. The extreme antiquity of such reservation cannot be disputed. Alleged quotations from Justin, Irenaeus, and others in the first centuries fail to account for Eucharistic practice we possess, tells us that at the close of the Liturgy there is a distribution to each and a participation of that over which thanks have been given, and to those who are absent a portion is sent by the deacons (I Apol., xxxvii). Again St. Ireneaus as quoted by Eusebius (Hist. eccl., V, xxiv, 15) wrote to Pope Victor that "the presbyters before thee who did not observe it [i.e., the Quartodecimian practice] sent the Eucharist to the faithful, and with it the form of the Eucharist, which uses the actual word, reseruer, and seems to suggest that a man who scrapped to break his fast on a fast day might approach the Holy Table and carry the Blessed Sacrament away with him to consume it later on—"accepto corpore Domini et reservatu utrumque salutis, et participante sacramenti et executo officii" ("De orat.", XIX; C. S. E. L., XX, 192. Cf. "Ad ux.", II, 5.

In St. Cyprian, about the middle of the third century, we already find the record of Eucharistic miracles, as, for example, when he tells us of a woman who sought to open with polluted hands the casket (arca) in which she kept the Blessed Sacrament and was deterred by flames bursting from it (De Iapisi, 26; C. S. E. L., I, 256). And again, at about the same period, an account written by St. Dionysius of Alexandria has been copied by Eusebius (Hist. eccl., VI, xlvii) from which we learn that a priest, being ill and unable himself to visit a dying person who had sent a boy to him to ask for the Holy Viaticum in the middle of the night, gave the boy a portion of the Eucharist to take to the sick, to whom it was moistened with water. This story illustrates the first and primary purpose of reservation, which is thus formally stated in the thirteenth canon of Nicaea: "With respect to the dying, the old rule of the Church should continue to be observed, that anyone who is on the point of death should be deprived of the last and most necessary Viaticum" (τῷ τελευταν καὶ ἀναχωροτάτῳ ἐσόβων). But it was clearly also permitted to Christians, especially in the time of persecution, to keep the Blessed Sacrament in their own possession that they might receive it privately (see, e.g., St. Basil, Ep. cclxxix, "Ad Epist. Ep.", and St. Jerome, Ep. i. 15). This usage lasted on for many centuries, especially under certain exceptional circumstances, for example, in the case of hermits. An answer given by the Bishop of Corinth to Luke the Younger, a hermit, and anchor at Achiæ in the tenth century, contains in detail how Communion should be received under such circumstances (Combes, "Patr. Bib. Auctuar.", II, 45).

At an earlier date when certain heretically-minded monks of Mount Calamum in Palestine asked doubts whether the Holy Eucharist which had been kept to the morrow did not lose its consecration, St. Cyril of Alexandria wrote (P. G., LXXVI, 1075) that those who so spoke must be mad (μανικρονία). What is more surprising, it remained the custom in many religious houses of women in the West down to the eleventh and twelfth centuries or later to receive on the day of their solemn profession a little provision of the Blessed Sacrament, and with this they spent a period of eight days in a sort of retreat, being free to partake daily of this heavenly food (see, e.g., De Antiquis Ecclesiae Ritibus, II, 187). We also learn that Christians sought to carry the Blessed Sacrament about with them in times of grievous peril as a means of protection (St. Ambrose, De Excusse Pratix", 1, 45) or as a source of consolation. Further, as noticed above, the Eucharist was sent from one bishop to another in token of charitable communion, and it appears from the first "Ordo Romanus" (nn. 8 and 22) that a portion of the Eucharist remaining over from a previous sacrifice was mingled with the water of the Mass. The practice continued and became a token of continuity, while the practice of the Mass of the Presanctified, in which the species previously consecrated alone were used, was from an early period prescribed in the Eastern Church throughout the whole of Lent, the Sundays only excepted.

On the other hand, there appears to be no reliable evidence that before the year 1000, or even later, the Blessed Sacrament was kept in churches in order that the faithful might visit it or pray before it. Such evidence as it is for this remote period can only be a practice will be found on closer inspection to tell the other way. For example, though the altar is called by St. Optatus of Milevis ("De schism. Don.", VI, 1; in P. L., XI, 1066) the throne of the Body and Blood of Christ (sedes et corporis et sanguinis Christi), the altar is also described in the same context as a place "where Christ's Body and Blood dwell for a certain brief space" (per certa momenta). Further, the true explanation of a passage in which St. Gregory Nazianzen describes his sister Gorgonia as visiting the altar in the middle of the night (P. G., XXXV, 810) seems to be that she went there to seek such crumbs or traces of the Eucharistic species as might accidentally have fallen and been overlooked (see Journal of Theol. Stud., Jan., 1910, pp. 775-78).

It would probably then, be correct to say that down to the later Middle Ages, those who came to the church to pray outside the hours of service came there not so much to honour the Eucharistic presence as to pray before the altar upon which Jesus Christ was wont to descend when the words of consecration were spoken in the Mass.

As to the manner and place of reservation during the early centuries there was no great uniformity of practice. Undoubtedly the Eucharist was at first often kept in private houses, but a Council of Toledo in 438, which denounced those who did not immediately consume the sacred species when they received them from the priest at the altar, very
possibly marks a change in this regard. On the other hand numerous decrees of synods and penalties entered into reserved sins, as a parish priest is bound by the duty of reserving the Blessed Sacrament for the use of the sick and dying, and at the same time of keeping it reverently and securely while providing by frequent renewal against any danger of the corruption of the sacred species. Caskets in the form of a dove-shaped tower, made for the most part of one of the precious metals, were commonly used for the purpose, but whether in the early Middle Ages these Eucharistic vessels were kept over the altar, or elsewhere in the church, or in the sacristy, does not exactly appear. After the commonest usage in England and France seems to have been to suspend the Blessed Sacrament in a dove-shaped vessel by a cord over the high altar; but fixed and locked tabernacles were also known and indeed prescribed by the regulations of Bishop Quivil of Exeter at the end of the thirteenth century, though in England they never came into general use before the Reformation. In Germany, in the fourteenth and fifteenth centuries, a custom widely prevailed of enshrining the Eucharist in a "sacrament house", often magnificently decorated, on the high altar, but only a short distance away from it, and on the north, or Gospel, side of the Church. This custom seems to have originated in the desire to allow the Blessed Sacrament to be seen by the faithful without exactly contravening the synodal decree which forbade any continuous exposition. In the sacrament house the door was invariably made of metal lattice work, through which the vessel containing the sacred species could be discerned at least obscurely.

In modern times many provisions have been made to ensure reverence and security in the reservation of the Blessed Sacrament. With regard to the renewal of the species, it is laid down that the Eucharist should not be left for longer than a month, while a much less interval is recommended and generally followed in practice. The practice of burning a light before the tabernacle or other receptacle dates from the thirteenth century or earlier, but it was not at first regarded as of strict obligation. In the Greek Church the consecrated leaf is moistened with the species of wine and kupt as a sort of crumbling paste.

Residence, ECCLESIASTICAL, a remaining or abiding where one's duties lie or where one's occupation is properly carried on, as the presence of a bishop in his diocese, a rector or incumbent in his benefice, a canon in his cathedral or collegiate church: opposed to non-residence or absence. Residence is intended to guarantee service or fulfilment of duty. In the canonical import of the term a merely material abiding in a place is not sufficient; vigilance and solicitude must accompany it; a laborious residence alone satisfies the requirements. Residence for this reason differs from domicile, and secondly because the intention of remaining is involved in the definition of domicile. It may be noted that by a fiction of law one who is lawfully absent fulfils the law of residence; while, on the contrary, one unlawfully absent is considered to be present: thus one who leaves his own diocese under censure or precept, or purposely and solely (in fraudem lepis) to obtain absolution in a reserved case, is considered present. Residence is binding on clerics holding benefices, to which an obligation was attached to all benefices, but through universal custom simple benefices or those without the cure of souls do not require personal residence. A canon's presence does not necessarily extend to all hours of the day, while that of a pastor, on the contrary, is continuous, owing to the numerous and oftentimes sudden demands for his ministrations. A canon is not obliged ordinarily to dwell in close proximity to his benefice. It suffices that he be able conveniently to be present at the prescribed hours.

Residence, in some cases the office, is inculcated in various canons. The Council of Trent (Sess. XXIII, c. 1, de ref.) says: "Since by Divine precept it is enjoined on all to whom the cure of souls is entrusted to know their own sheep, to offer sacrifice for them, to feed them by preaching the Divine word, by the administration of the sacraments, and by the example of all good works; likewise to have a fatherly care of the poor and other distressed persons, and to apply themselves to all other pastoral duties; all which offices can not be rendered and fulfilled by the one who neither by the name of pastor, nor by the name of flock, but abandon it after the manner of hirelings, the sacred synod admonishes and exhorts such that, mindful of the Divine precept and made a pattern of the flock, they feed and rule in judgment and truth."
A pastor then is obliged to dwell in his parish; and, generally speaking, by reason of local statutes, in the parochial residence or rectory. Because of greater responsibilities resting upon them, the Church insists that patriarchs, primates, metropolitans, bishops, or others in charge of dioceses or quasi-dioceses, even though in a cathedral, live in the rectory, though not of necessity in the episcopal city. Bishops, moreover, are admonished by the Council of Trent not to be absent from their cathedrals, unless their episcopal duties call them elsewhere in the diocese, during Advent and Lent, Christmas, Easter, Pentecost, and Corpus Christi, on which days especially the sheep ought to be refreshed and rejoice in the Lord at the presence of the shepherd. The chancery office, the official centre of diocesan business, will be found more properly at the cathedral, even though the bishop reside elsewhere. The six cardinal bishops (see Cardinal) whose sees are in proximity to Rome are permitted to dwell in the Eternal City, while suffragan bishops administer their dioceses (Const. Clem. XVI, 'Pastorale officium'; Const. Pius X, 'Ex uxorice Romanorum Pontificem', 15 Apr. 1910).

Some maintain that the duty of residence is incumbent on parish priests and bishops by virtue of Divine as well as ecclesiastical law. The Council of Trent did settle this controversy (VIII, De syn., L. 7, c. 1). It would seem that while the canons demand a personal fulfilment of their duties on the part of pastors, the Divine precept is satisfied if the work be done even by others, though this is less fitting. The law of residence is not to be applied so strictly as not to admit of absence at times. In some cases a reasonable or just cause of absence, e. g. necessary rest, legitimate recreation, a pilgrimage, a visit to relatives or friends, business matters, sickness; in others, a grave reason is required. Grave reasons for absence may be required by the Church. The licence is urgent necessity, e. g. when one is persecuted, obliged by ill health to seek change of climate, called away in obedience to a lawful superior, attendance at an ecumenical council, making the prescribed ad limina visit. The second reason is charity in a marked degree, e. g. the prosecution of the rights of the diocese or of the Church, the promotion of peace among nations. For no cause should a pastor desert his people in time of war, pestilence, or on other occasions when their welfare is seriously menaced. The permission of the obliged must be obtained. Permission is given in writing, except for short absences, and a substitute approved by the ordinary, with competent recompense, left in charge of the diocesan statutes permits absence of a few days without consulting the ordinary. The law allows a bishop for just cause, when it is possible without detriment to his charge, to absent himself three months annually, though not during Advent or Lent or on the feasts enumerated above. For a longer absence, though advantage may not have been taken for years of the period annually allowed, a grave reason is required as well as express permission of the Consistorial Congregation. Clerics other than those mentioned are subject to local regulations and are not excused through absence. Non-residence or unlawful absence is punishable in law. Canons lose all share in the daily distributions unless actually present in choir. Where it is permitted they may use with moderation the privilege of appointing substitutes. Besides being guilty of mortal sin, bishops and rectors who violate the law of residence forfeit the fruits, i. e. salary or income, of their benefices in proportion to the time of their absence. A certain amount may be retained in recompense for other duties discharged, such as the application of Mass etc. The money forfeited is used in repairing or enlarging the pope by his mandate. If the metropolitan be thus absent, the duty of reporting the matter devolves on the senior suffragan bishop. A parochial residence of one month suffices for the lieut contracting of marriage in the parish (San Remo, art. 5); the mere fact of thirty days stay, even though by chance, if morally continuous, is sufficient. By such residence one becomes a pariah as far as marriage is concerned, and although retaining a domicile or quasi-domicile elsewhere, may obtain matrimonial dispensations from the ordinary of the place of residence. Canons, therefore, by whether this is true in the case of one who, though living in a diocese for some time, e. g. a week, only in various parishes, has not acquired a parochial residence of a month. It is certain that the previous period of a parochial, not a diocesan, domicile or quasi-domicile.

Andrew B. Meehan

Resignation. See Abbicication.

Respighi, LORENZO, b. at Cortemaggiore, Province of Piacenza, 7 October, 1824; d. at Rome, 10 December, 1889. He studied mathematics and natural philosophy, and took the degree of Doctor of Laws of the University of Bologna, where he obtained his degree ad honorem in 1845. In 1849 he was appointed as substitute to the chair of rational mechanics and hydraulics in the same university, two years later professor of optics and astronomy, and finally in 1853 he became director of the Bologna observatory, after having been for some time at the observatory of Milan. From 1855 to 1864 he discovered, at Bologna, three comets (1862 IV, 1863 III, and 1865 V) and made himself known by other important works of mathematical and astrophysical import. In 1865 the Italian Government, already established in Bologna for five years, imposed upon the university professors the oath of submission to the dynasty of Victor Emmanuel II. Three professors refused to take it: Chelini, Filopanti, and Respighi. In consequence of this refusal, the last-named had to leave the chair and the direction of the observatory. He then went to Rome, where he continued under the government of the pope, and obtained the position of astronomer at the observatory of the Capitol, directed by Calandrelli. In 1866, a year after the death of the latter, Respighi succeeded him both in the directorship of the observatory at the Capitol and in the chair of astronomy at the Sapienza. In 1866 he made important observations on the lunar crater Linnéa. In 1867 and 1868 he began his celebrated studies of the scintillation of stars. In October, 1869, he made the first spectroscopic observations on the border of the sun.

Rome having been occupied by the Italian Government (1870), Respighi (October, 1871) found himself again absent. He had been invited by the British Government to take part in an expedition to the Indies for the solar eclipse in December, 1871. This invitation gave so much distinction to the astronomer that the Italian Minister of Public Instruction offered
him a sum to defray the expenses of the journey. Respighi accepted on condition that he should not be subject to take the oath. It does honour to the minister that he did not insist upon a condition with which a loyal subject of the throne would not comply even if his refusal cost him his position.

Six years later, in 1877, Respighi was appointed Knight of the Civil Order of Savoy; to receive this honour it became again necessary to take the oath. In a letter to the Minister of Instruction, Respighi refused and returned the cross which had been already sent to him. Besides the aforenamed studies, we owe to him other very important researches, on spectra of stars and on the solar corona, as also the first systematic observations on solar protuberances. Moreover, he discovered and practised new methods to determine the diameter of the sun and the zenith distances of stars. Finally, astronomy owes Respighi a masterly catalogue of the absolute declinations of 2534 boreal stars. After Schiaparelli, Respighi was the most prominent Italian astronomer of the nineteenth century.

V. CERULLI.

Responsorium, Responsory, or Respond, a series of verses and responses, usually taken from Holy Scripture, and according the said Psalms. Responsoriums are of two kinds: those which occur in the Proper of the Mass, and those used in the Divine Office; each differing slightly both as to history and form.

I. The Responsorium of the Mass. —The psalmic solo is the oldest form of Christian chant, and was apparently derived from the Synagogue. The psalm was recited by one chanter, to whom the people answered with a refrain or response, the latter being either the alternate verses of the psalm itself, or one verse and again a refrain, sometimes a sentence taken from elsewhere. The psalm “Confitemini Domino”, every verse of which has the refrain “Quoniam ex aeterno misericordia ejus”, is a typical example, though sometimes the refrain was a mere exclamation, such as “Alleluia”. This method of chant was known as the cantus responsorius, and is mentioned in the writings of Tertullian, St. Augustine, and St. Isidore. It was an integral part of the Liturgy, that is to say it was not introduced to fill up time whilst other things were going on, but was literally a people’s chant, and in this it differs from the antiphonal chant, which was merely an accompaniment to various actions and ceremonies, e. g. the Introit, Offertory, and Communion. The responsorial parts of the Mass were the Gradual (so named from the position of the soloist, at the steps of the pulpit or ambo), the Alleluia, and at one time the Offertory. Up to the twelfth century the way of singing the Gradual was as follows: The cantor sang it from the beginning as far as the verse, and the choir repeated the cantor’s part. Then came the verse, sung by the cantor, after which the refrain, i.e. the part first sung, was repeated by all. After the twelfth century the custom began of omitting the repetition after the verse whenever another chant, such as the Alleluia or Tract, followed. The present practice is to omit the repetition on all occasions, but in order to avoid a conclusion by the soloist alone, it has become general for the choir to join in at the end of the verse. In the early Middle Ages the responsorium graduale was still sung at every Mass, and not replaced, as is present, by an Alleluia in Eastertide. It may be noted that it is still retained in Easter Week, the Graduals of which are all connected (the refrain being the same and the verses being all from one psalm), and doubtless originally formed one chant with several verses, which was performed in full on Easter Day.

The second piece of responsorial chant in the Mass is the Alleluia. It was introduced by Pope Damasus at the advice of St. Jerome, in imitation of the liturgy of Jerusalem. The chant became very elaborate, the greater part of it being devoted to the last vowel of the word alleluia, which was repeated in the many successive notes as to suggest a mystical meaning, viz., that it represented the chant of eternity, or, as Durandus says, the joy that is too great to be expressed in words. The reduction of this chant to responsorial form is due to St. Gregorius, who added verses to it. The method of singing it was as follows: The soloist began with the Alleluia, which was repeated by the choir; the soloist then continued with the verse or verses, after each of which the choir repeated the Alleluia. On Holy Saturday and the Vigil of Pentecost there was no repetition, but the verse “Confitemini” was followed immediately (as now) by the tract “Laudate Dominum”. The Offertory was originally an antiphonal chant, i.e. sung by two choirs, introduced to fill up the time whilst the obligations of the people were being made. Later on it became more convenient to leave the Verses to a soloist, and so it became a responsorial chant. One reason for this may have been that the singers, as well as the people, had obligations to offer. The change was naturally accompanied by an elaboration of the melody, both of the soloist (who sang the refrain) and of the verses. But when the popular offering fell out of use, the Offertory had to be curtailed, and the verses were dropped, in which form it is found as early as the eleventh century. At the present day the Mass for the Dead alone retains a vestige of the ancient usage, in the verse “Hostias et preces” and the repetition after it of the concluding part of the Offertory. Originally the people joined in the singing of all the Mass, responsorial chants taking up the responses after they had been commenced by the soloist. The gradual elaboration of the melodies, however, made this increasingly difficult for them, and so by degrees they were forced to relinquish their share to the trained singers of the choir. They had become thus silenced probably by St. Gregory’s time, and thenceforward it was only in the Ordinary of the Mass that they were able to take their share.

II. The Responsorium of the Divine Office. —These consist, like those of the Mass, of verses and responses, i.e. a “Chant (Gregorian) with a Canticum (sicut erat)”, and their usual place is after the Lessons of Matins. There is also a shorter form, called the responsorium breve or responsoria, which in the monastic Office always comes after the Capitulum at Lauds and Vespers, and also after the Lesson in summer. The Matins of the Roman Office it is found only in the Little Hours. St. Benedict in his Rule (written about 530) prescribes the use of responsories after the Lessons of Matins, but he gives no indication as to their form, implying rather that they were in general use and there were well-known. The earliest definite information we have as to their form is found in the description of the Roman Office at the beginning of the ninth century, given by Amalarius in his “De Ordine Antiphonarii” (Migne, P. L., CV). The method of chanting then in vogue is thus given by him: the precentor began with the first part, which the choir repeated; then the soloist sang the verse and the choir repeated the first part again as far as the verse; the soloist sang “Gloria Patri” and the choir repeated the second portion of the first part again; finally he sang the verse again from the beginning, and sang it as far as the verse, and the choir replied with a last repetition. The first Responsorium of the year, “Aspiciens a longe”, and a few others, had several verses, and in these cases the second part of the refrain was divided into many sections as there were verses being repeated after each verse, and then after the
"Gloria Patri" the full refrain again. One verse only, however, was the general rule.

A modification of the above method was introduced by the Franks, who repeated only the first part of the refrain after the verse instead of the whole of it. This dimodation in the Gallican method of singing the Responsory led to some confusion of the sense of what was being sung, and Blessed Cardinal Tommasi, quoting from Amalarius, says that in consequence it became necessary to introduce some different versals. Gaul. This in turn was violently attacked by Agobard and Florus, the liturgists of Lyons, but in the end the Gallican method of singing the Responsory prevailed over the Roman way, and became the general custom of the Church. This development, however, was largely due to the efforts of Amalarius, who was the first to consecrate the method in his compendium early in the ninth century, and who, in his Tractatus de Antiphonariis, defined the form of the Responsory in the following manner: "The Responsory is sung in the church in such a manner that when the verse is sung, the one immediately following is added to it, and when the antiphon is sung, the one immediately preceding is sung to it."

Heliashar, Abbot of St. Maximin at Trier, was responsible for many of the new Verses, but his work did not meet with the approval of Amalarius, who set himself to improve upon it in the new Antiphonary which he produced for use in the church. This in turn was violently attacked by Agobard and Florus, the liturgists of Lyons, but in the end the Gallican method of singing the Responsory prevailed over the Roman way, and became the general custom of the Church. This development, however, was largely due to the efforts of Amalarius, who was the first to consecrate the method in his compendium early in the ninth century, and who, in his Tractatus de Antiphonariis, defined the form of the Responsory in the following manner: "The Responsory is sung in the church in such a manner that when the verse is sung, the one immediately following is added to it, and when the antiphon is sung, the one immediately preceding is sung to it."

The number of Responsories used varied in the different Antiphonaries according to the number of lessons. Before the Te Deum was said at the end of Matins, extra Responsories were sometimes added on feast days after another antiphon. Numerous examples occur, for instance, in the Complin Antiphonary (Migne, P. L., LXVIII), which was compiled in the ninth century, apparently for the use of non-monastic churches in the West. The practice of using a Responsory in the Office Responsory, unlike that of the Mass, may perhaps be accounted for by the fact that the office chant was always in the hands of clerics or monks, rather than of professional singers; the latter would naturally apply themselves chiefly to the melodic development of the pieces entrusted to them, whereas the former would be more liturgically conservative and more careful of the organic structure of their pieces.

The words of the Responsories agreed either with the history in the Lessons they followed, or were proper to the feast of the day. Thus in the "Miscologus" of Bernold of Constance, the Responsories themselves are often called "Historiæ". Amalarius speaks of Responsories de historia being used after Lessons from the Old Testament, and of psalmus after those from the New. The practice of using a Responsory from the Common of Saints with a Lesson of the current Scripture has sometimes an awkward effect. Thus the French ritualist Grancoles, who flourished in the early eighteenth century, remarks that the intention of the Responsory was to furnish a meditation or commentary on what had just been read, but that such intention was frustrated when, for instance, after a Lesson describing the doings of "Absalom, Ahab, or some other wicked prince" the answer was "Ecce Sacerdos magnus", or "Sponsabo te mihi in justitiae". The Paris Breviary of 1575, introduced by Archbishop G. d'Anville, gives a series of Responsories which, considered as "moral concordances", are really works of art. The Old and New Testament passages are treated in an imaginatively illustrative manner. The feast of Our Lady's Conception: "Descendit sicut pluvia in vellus; *Benedictum nomen majestatis ejus in aeternum, et *Replebitur majestatis ejus omnis terra."

Ecce tabernaculum Dei cum hominibus et habitabit cum eis; et ipse Deus cum eis erit corum Deus.

Benedictum. *Gloria Patri. R. Replebitur. The Graduals and Responsories are certainly among the most ancient and interesting parts of the liturgy of the Church. Musically they are the highest achievement of the old Christian composers, and should always be referred to when it is desired to give specimens of the true Gregorian Chant; whilst as a literature, Batifol, speaking of the Responsory of "Proprium de Tempore", says that they are a "cheap, beautiful, and valuable" tradition, and the others, compares them to the chorus dialogues of classical Greek tragedy.

GYPRIAN ALSTON.

Restitution has a special sense in moral theology. It signifies an act of commutative justice by which exact reparation as far as possible is made for an injury that has been done to another. An injury may be done to another by detaining what is known to belong to him in strict justice and by wilfully doing him damage in his property or reputation. As justice between man and man requires that what belongs to another should be rendered him, justice is violated by keeping from another against his reasonable will what belongs to him, and by wilfully doing him damage in goods or reputation. Commutative justice therefore requires reparation in the form of restitution whenever that virtue has been violated. This obligation is identical with that imposed by the Seventh Commandment, "Thou shalt not steal." For the obligation not to deprive another of what belongs to him is identical with that of not keeping from another what belongs to him. As justice is a grave sin of its own nature, so is the refusal to make restitution for injustice that has been committed.

Restitution signifies not any sort of reparation made for injury inflicted, but exact reparation as far as possible. Commutative justice requires that each to one should have what belongs to him, not something else; and so that which was taken away must be restored as far as possible. If the property of another has been destroyed or damaged, the value of the damage done must be restored. Restitution therefore signifies reparation in the form of restitution is made by restoring to the person injured what he had lost and thus putting him in his former position. Sometimes when an injury has been done it cannot be repaired in this way. A man who commits adultery with another's wife cannot make restitution to him in the strict sense. He has done his neighbour...
an injury which in a certain sense is irreparable. He should make what reparation he can. In this and similar cases it is a disputed point among theologians whether the adulterer is obliged to offer a money compensation for the injury. If he is convicted and sentenced to pay damages by lawful authority, he will be considered for all intents and purposes, as having made satisfaction or restitution for the injury he has done. But apart from such a sentence, he cannot be obliged to compensate the injured husband in money, because there is no common measure between such injuries and compensation in goods of another order.

Commutative justice looks at objective equality, and measures the damages which he does to the other person. Aristotle called this species of justice corrective, inasmuch as it corrects and remedies the inequality which an act of injustice produces between the injurer and the party injured. The one has less than he ought to have, because the other has taken it away, and they will not be quits until restitution is made. In cases where an injury is irreparable, the injurer will be bound to do what he can so that the injured party may be content. This is called making satisfaction, to distinguish it from making restitution in the strict sense. The damage done must be paid in full, and then the cause of injury is removed. God for the injury which our sins do Him; we cannot make Him restitution, nor did He suffer damage on account of our sins. A violation of commutative justice alone imposes the obligation of making restitution in the strict sense. If the party injured or the object of the offense suffers, the more serious duties are violated, there is indeed a consequent obligation of repenting for the sin, but there is no obligation of performing the omitted act of charity or obedience now. The obligation was urgent at the particular time and in the particular circumstances in which the sin was committed. Now the need of relief which called for the act of charity, and the reason for the command which was disobeyed no longer exist, and so there is no reason for supplying now for the omitted act.

The grounds on which restitution becomes obligatory are either the possession of something belonging to another, or the causing of unjust damage to the property or reputation of another. These are called by divines the roots of restitution, for it is due on one of those two grounds if it is due at all. The moral obligation which one finds himself in possession of another person’s property, and who on that account is bound to make restitution, will depend on whether he had possession of the property hitherto in good faith, or in bad faith, or in doubtful faith. If hitherto he had possession of the property with good faith, and he now discovers that it belongs to someone else, it will be sufficient to restore the property itself to the owner, together with any fruits that still remain. If while he was in good faith he consumed the fruits, or even the property itself per se, the possessor will not be bound to make restitution for what no longer exists. If the possessor consumed what he thought was his own property, possession in good faith justified him in doing so; and if the property has perished or been lost, the owner must make the loss. But if the possessor, having in bad faith, the possessor must not only restore all that remains of the property or of its fruits, but he must also compensate the owner for any loss or damage that the latter suffered on account of being deprived of his property. For the unjust possessor must make compensation for all the damage that he has caused the owner by unwarrrantably retaining his property. If possession was begun in doubtful faith, inquiry as to title should first of all be made. In this way, or by the use of presumpions, the doubt may often be settled. If it cannot thus be settled the common opinion of divines is that restitution must be made to the doubtful owner of a portion of the property corresponding to the probability of his right, while the possessor may keep a portion corresponding to the probability of his title. A few recent theologians think that the possessor in such a case may keep possession of the property, provided that he is ready to hand it over to the true owner if and when the latter’s title is proved. If the doubt about the title arises subsequently to the beginning of possession, inquiry should be made, and if the doubt is settled, the possessor may be made to answer, for in doubt the possessor has the better claim. Fruits, as a general rule, follow the property, on the principle: Accessorium sequitur principale.

The deliberate causing of unjust damage to the property, reputation, or other strict rights of another is an act of the strict obligation of making restitution for it, as we have seen. For, although in this case there is no possession of what belongs to another, still the wronged person has not what in justice he should have, and that through the unjust action of him who did the damage. The latter therefore has unjustly taken away what belonged to the former, and he must restore to him something which is equivalent to the loss which he has suffered and which will balance it, so that equality between them may be restored. However, as a man is not to be made damager by damage done to him inadvertently and by accident, the action which caused the damage must be voluntary, with at least some confused foreknowledge of its probable effects, in order that an obligation in conscience may arise to make compensation for the damage caused. Even though in a particular case there was no theological fault of this kind, as it is called by divines, yet sometimes if the amount of diligence was not used which the law requires in the case, the law imposes the obligation of making compensation to the injured party. There is then said to be judicial fault, and after the sentence of a competent authority has imposed the obligation of making compensation, it will be matter of conscience to obey the sentence. Besides being voluntary, the injurious action must be against commutative justice in order that an obligation to make restitution may arise from it. If while exercising my own right, as by putting on the market a new patent machine, I cause loss to others, I do not offend against justice, nor am I bound to make compensation for the loss caused to others. Neither is one responsible for damage to others of which he was the mere occasion, not the cause. Thus if the arrival in a city of some great personage causes a crowd to gather, and there is a crush, and an accident, by which damage is done to persons and to property, the great personage is the occasion of the damage, not the cause; and he is not bound to make restitution for it.

The foregoing principles are applicable whenever a strict right of another has been violated. Not only when property rights, or reputation, have been injured, but when spiritual rights to innocence, or true doctrine, or religious vocation, or any others of mind or body, intrinsic to man’s nature or extrinsic, have been unjustly violated, restitution as far as possible must be made. The efficacy of the confessional in bringing about restitution of ill-gotten property and the provision of the Church of England is too well-known to need more than mention here.

T. Slater.

Restitution, Edict of. See Augsburg; FERDINAND II; GERMANY.

Resurrection is the rising again from the dead, the resumption of life. The Fourth Lateran Council teaches that all men, whether elect or reprobate, “will rise again with their own bodies which they now bear about with them” (cap. “Firmifer?”). In the language of the creeds and professions of faith this return to life is called resurrection of the body.
(resurrection carnis, resurrection mortuorum, ἀνάστασις τῶν μεταφωντο) for a double reason: first, since the soul cannot die, it cannot be said to return to life; secondly, the heretical content of Hymeneus and Philetus that the Scriptures do not mention resurrection not the return to life of the body, but the raising of the soul from the death of sin to the life of grace, must be excluded. We shall first treat of the Resurrection of Jesus Christ and then of the General Resurrection of the Body.

The Resurrection of Jesus Christ.—The fact of Christ's resurrection, the theories opposed to this fact, its characteristics, and the reasons for its importance must be considered in distinct paragraphs.

A. The Fact of Christ's Resurrection.—The main sources which directly attest the fact of Christ's Resurrection are the Four Gospels and the Epistles of St. Paul. Easter morning is so rich in incident, and so crowded with interested persons, that its complete history presents a rather complicated tableau. It is not surprising, therefore, that the partial accounts contained in each of the Four Gospels appear at first sight hard to harmonize. But whatever exegetic view as to the visit to the sepulchre by the pious women and the appearance of the angels we may defend, we cannot deny the Evangelists' agreement as to the fact that the risen Christ appeared to at least two persons. He appeared to the women already in the garden; He appeared to the women of the city, are favoured with the sight of Christ arisen, who commissions them to tell His brethren that they will see Him in Galilee (Matt., xxviii, 8–10; Mark, vi, 8). (9) The holy women relate their experiences to the Apostles, but find no belief (Mark, xvi, 11–13; Luke, xxiv, 13–35). (11) Christ appears to Peter, and therefore Peter and John firmly believe in the Resurrection (Luke, xxiv, 34; John, xx, 8). (12) After the return of the disciples from Emmaus, Jesus appears to all the Apostles excepting Thomas (Mark, xvi, 14; Luke, xxiv, 36–43; John, xx, 19–25). The harmony of the other apparitions of Christ after His Resurrection presents no special difficulties.

B. Opposing Theories.—By what means can the evidence for Christ's Resurrection be overthrown? Three theories of explanation have been advanced, though the first two have hardly any adherents in our day. (1) There is the theory of those who assert that Christ did not really die upon the cross, that His supposed death was only a temporary swoon, and that His Resurrection was simply a return to consciousness. This was advocated by Paulus ("Exegetisches Handbuch," 1842, II, p. 929) and in a modified form by Hase ("Gesch. Jesu," § 112), but it does not agree with the data furnished by the Gospels. The scourging and the crown of thorns, the carrying of the cross and the crucifixion, the three hours on the cross and the piercing of the Saviour's side cannot have brought on a mere swoon. His real death is attested by the centurion and the soldiers, by the friends of Jesus and by his bitterest enemies. His stay in a sealed sepulchre for thirty-six hours, in an atmosphere poisoned by the exhalation of spices, would have of itself sufficed to cause death. Moreover, if Jesus had merely returned from a swoon, the feelings of Easter morning would have been those of sympathy rather than those of joy and triumph, the Apostles would have been roused to the duties of a sick chamber rather than to apo-
tolic work, the life of the powerful wonderworker would have ended in ignoble solitude and inglorious obscurity, and His vaunted immortality would have changed into His silent approval of a lie as the founda-
tion stone of His Church. No wonder that later critics of the Resurrection, like Strauss, have heaped contempt on the old theory of a swoon.

(2) Rejection Theory.—The disciples, it is said, stole the body of Jesus from the grave, and then proclaimed to men that their Lord had risen. This theory was anticipated by the Jews who "gave a great sum of money to the soldiers, saying: Say you, His disciples came by night and stole Him away while we were asleep" (Matt. xxviiii, 12 sq.). The same was urged by Celsius (Orig., "Contra Cels.", II, 56) with some difference of detail. But to assume that the Apostles with a burden of this kind upon their consciences could have preached a kingdom of truth and righteousness as the one great effort of their lives, and that for the sake of that kingdom they could have suffered even unto death, is to as-
sume one of those moral impossibilities which may pass for a moment in the heat of controversy, but must be dismissed without delay in the hour of cool reflection.

(3) Vision Theory.—This theory as generally under-
stood by its advocates does not allow visions caused by a Divine intervention, but only such as are the product of human agencies. For if a Divine inter-
vention is required, we must assume that, as principles are concerned, that God raised Jesus from the dead. But where in the present instance are the human agencies which might cause these visions? The idea of a resurrection from the grave was familiar to the disciples from their Jewish faith; they had already

where most of the manifestations were made; vision-
ary appearances would have been expected in Galilee, while most apparitions of Jesus occurred in Judaea. (g) It is inconsistent with the fact that the visions came to a sudden end on the day of the Ascension.

Keim admits that enthusiasm, nervousness, and mental excitement on the part of the disciples do not supply a rational explanation of the facts as related in the Gospels. According to him, the visions were directly granted by God and the glorified Christ; they may even include a "corporal appearance" for those who fear that without this they would lose all. But Keim's theory is not tenable. If it abandons all the proofs of a bodily resurrection of Jesus, nor the enemies of the Church, since it admits many of the Church's dogmas; nor again is it consistent with itself, since it grants God's special inter-
vention in proof of the Church's faith, though it starts with the denial of the bodily Resurrection of Jesus, which is one of the principal objects of that faith.

(4) Modernist View.—The Holy Office describes

and condemns, in the thirty-sixth and thirty-seventh propositions of the Decree "Lamentabili", the theory advocated by a fourth class of opponents of the Resurrection. The former of these propositions reads: "The Resurrection of our Saviour is not properly a fact of the historical order, but a fact of the purely supernatural order neither proved nor provable, which Christian conscience cannot be left to decide from other facts." This statement agrees with, and is further explained by the words of Loisy ("Autour d'un petit livre", p. viii, 120-121, 169; "L'Evangile et l'Eglise", pp. 74-78; 120-121; 171). According to Loisy, firstly, the entrance into life immortal of one risen from the dead is not subject to observation; it is a supernatural, hyper-historical fact, not capable of historical proof. The proofs alleged for the Resur-
rection of Jesus Christ are inadequate; the empty sepulchre is only an indirect argument, while the apparitions of the risen Christ are open to suspicion on a priori grounds, being sensible impressions of a supernatural reality; and they are doubtful evidence from a critical point of view, on account of the dis-
crepancies in the various Scriptural narratives, and the mixed character of the detail coming from other parties. Secondly, if one prescinds from the faith of the Apostles, the testimony of the New Testament does not furnish a certain argument for the fact of the Resurrection. This faith of the Apostles is concerned not so much with the Resurrection as with His immortal life; being based on the apparitions, which are unsatisfactory evidence from an his-
torical point of view, its force is appreciated only by faith itself; being a development of the idea of an immortal Messias, it is an evolution of Christian con-
sciousness, though it is at the same time a corroboration of the scandal of the Cross. The Holy Office rejects this view of the Resurrection when it condemns the thirty-seventh proposition in the Decree "Lamen-
tabili": "The faith in the Resurrection of Christ pointed at the beginning of the New Testament cannot be proved historically, or is not in accord with science. Science does not know enough about the limitations and the prop-
erties of a body raised from the dead to immortal life to warrant the assertion that such a body cannot be perceived by the eyes. Regarding the body of Christ, the empty sepulchre with all its concrete circumstances cannot be explained except by a mirac-
ulous Divine intervention as supernatural in its char-
acter as the Resurrection of Jesus. Secondly, history
does not allow us to regard the belief in the Resurrection as the result of a gradual evolution in Christian consciousness. The apparitions were not a mere projection of the disciples' Messianic hope and expectation; their Messianic hope and expectations had to be realized later in other apparitions. And the Apostles did not begin with preaching the immortal life of Christ with God, but they preached Christ's Resurrection from the very beginning, they insisted on it as a fundamental fact, and they described even some of the details connected with this fact: Acts ii, 24; iii, 15; iv, 30; v, 30–34; xi, 30–37; xiii, 31–32; Rom. i, 4; iv, 25; vi, 4, 9; viii, 11, 34; x, 7; xiv, 9; I Cor. xiv, 4, 13 sqq.; etc. Thirdly, the denial of the historical certainty of Christ's Resurrection involves several historical blunders: it questions the objective reality of the apparitions without any historical grounds for such a doubt; it denies the fact of the empty sepulchre in spite of solid historical evidence to the contrary; it questions even the fact of Christ's burial in Joseph's sepulchre, though this fact is based on the clear and simply unimpeachable testimony of history (cf. Lopin, "Christologie. Commentaire des Propositions XCVIII-XXXVIII du Décret du Saint Office 'Lamentabili'", Paris, 1908).

D. Character of Christ's Resurrection. — The Resurrection of Christ has much in common with the general resurrection at the last judgment. The transformation of His body and of His bodily life is of the same kind as that which awaits the blessed in their resurrection. But the following peculiarities must be noted: (1) Christ's Resurrection is necessarily a glorious one; it implies not merely the reunion of body and soul, but also the glorification of the body. (2) Christ's body was to know no corruption, but rose again soon after death, when sufficient time had elapsed to leave no doubt as to the reality of His death. (3) Christ was the first to rise again; those raised before Him died again (Col. i, 18; I Cor. xv, 20). (4) As the Divine power which raised Christ from the grave was His own power, He rose from the dead by His own power (John, ii, 19; x, 17–18). (5) Since the Resurrection had been promised as the main point of Christ's Divine mission, it has a greater dogmatic importance than any other fact. "If Christ be not risen again, then is our preaching vain, and your faith also vain" (I Cor. xxv, 14).

E. Importance of the Resurrection. — Besides being the event for which our Christian belief the Resurrection is important for the following reasons: (1) It shows the justice of God who exalted Christ to a life of glory, as Christ had humbled Himself unto death (Phil. iii, 5–9). (2) The Resurrection completed the mystery of our salvation and redemption; by His death Christ freed us from sin, and by His Resurrection He restored to us the most important privileges lost by sin (Rom. iv, 25). (3) By His Resurrection we acknowledge Christ as the immortal God, the efficient and exemplary cause of our own resurrection (I Cor. xiv, 21). (4) He, as the model and the support of our new life of grace (Rom. vi, 4–6; 9–11).

II. General Resurrection. — "No doctrine of the Christian Faith", says St. Augustine, "is so vehemently and so obstinately opposed as the doctrine of the resurrection of the flesh" (In Ps. lxxxviii, sermo ii, n. 5). This opposition had begun long before the days of St. Augustine: "And certain philosophers of the Epicureans and of the Stoics", the inspired writer tells us (Acts, xxi, 24, 32), "were not at all displeased with him [Paul] and, conversely, he was not at all displeased with them who believed in the resurrection of the dead, some indeed mocked, but others said: We will hear thee again concerning this matter." Among the opponents of the Resurrection we naturally find first all those who denied the immortality of the soul; secondly, all those who, like Plato, regarded the body as the prison of the soul and death as an escape from the bondage of matter; thirdly, the sects of the Gnostics and Manichaeans who looked upon all matter as evil; fourthly, the followers of these latter sects, the Pessimians, the Cathari, and the Albigenses; fifthly, the Rationalists, Materialists, and Pantheists. All these sects endeavored to establish the dogmas of the resurrection, and secondly consider the characteristics of the risen body.

A. Dogma of the Resurrection. — The creeds and professions of faith and conciliar definitions do not leave it doubtful that the resurrection of the body is a dogma or an article of faith. We may appeal, for instance, to the Apostles' Creed, the so-called Nicene and Athanasian Creeds, the Creed of the Eleventh Council of Toledo, the Creed of Leo IX, subscribed by Bishop Peter and still in use at the consecration of bishops, the profession of faith subscribed by Michael Palaeologus in the Second Council of Lyons, the Creed of Pius IV, and the Decree of the Fourth Lateran Council (c. "Firmiter") against the Albigenses. This article of faith is based on the belief of the Old Testament, on the teaching of the New Testament, and on Christian tradition.

(1) Old Testament. — The words of Martha and the history of the Machabeees show the Jewish belief towards the end of the Jewish empire. "I know", says Martha, "that he shall rise again in the resurrection at the last day according to that which this prophet said of David, that he is not of the spirit of the flesh, and stretched out his hands, saying: 'These I have from heaven, but for the laws of God I now despise them; because I hope to receive them again from him.'" (II Mach. xii, 11; cf. ix, 14). The Book of Daniel (xii, 2; cf. 12) inculcates the same belief: "Many of those that sleep in the dust of the earth, shall awake: some unto life everlasting, and others unto reproach, to see it always." The word "many" may be understood in the sight of the multitude of passages, e. g. Is. lxxiii, 11–12; Matt. xxv, 28; Rom., v, 18–19. Though Ezechiel's vision of the resurrection of the dry bones refers directly to the restoration of Israel, such a figure would be hardly intelligible except by readers familiar with the belief in a literal resurrection (Ez., xxxvi). The Prophet Isaiah foretells that the Lord of hosts "shall cast down death headlong for ever" (xxv, 8), and a little later he adds: "Thy dead men shall live, thy slain shall rise again;" the earth shall disclose her dead, and shall cover her dead (..."xx–xxi). Finally, Job, bereft of all human comfort and reduced to the greatest desolation, is strengthened by the thought of the resurrection of his body: "I know that my Redeemer liveth, and in the last day I shall rise out of my grave, and my body shall be clothed again with my skin, and in my flesh I shall see God. Whom I myself shall see, and my eyes shall behold, and not another; this hope is laid up in my bosom" (Job, xix, 25–27). The literal translation of the Hebrew text differs somewhat from the foregoing quotation, but the hope of resurrection remains.

(2) New Testament. — The resurrection of the dead was expressly taught by Christ (John, v, 23–29; vi, 39–40; xi, 25; Luke, xiv, 14) and defended against the unbeliefs of the Sadducees, whom He charged with ignorance of the power of God and of the Scriptures (Matt., xxii, 29; Luke, xx, 37). St. Paul places the general resurrection on the same level of certainty with that of Christ's Resurrection: "If Christ be preached, that he rose again from the dead, how do some among you say that there is no resurrection of the dead? But if there be no resurrection of the dead, then Christ is not risen again. And if Christ be not risen again, then is our preaching vain, and your faith also vain" (I Cor. xv, 12 seq.). The Apostle preachend the resurrection of the dead as one of the fundamental doctrines of Christianity.
RESURRECTION

of Athens, for instance (Acts, xvii, 18, 31, 32), at Jerusalem (xxiii, 6), before Felix (xxiv, 15), before Agrippa (xxvi, 8). He insists on the same doctrine in his Epistles (Rom., viii, 11; I Cor., vi, 14; xv, 12 sqq.; II Cor., iv, 14; v, 1 sqq.; Phil., iii, 21; I Thess., iv, 12-16; II Tim., ii, 11; Hebr., vi, 2), and in this he agrees with the Apocalypse (xx, 12 sqq.)

(8) Tradition.—It is not surprising that the Tradition of the early Church agrees with the clear teaching of both the Old and New Testaments. We have already referred to a number of decrees and proclamations of faith which may be considered as prototypes of the Church's official expression of her faith. Here we only have to point out a number of patristic passages, in which the Fathers teach the doctrine of the general resurrection in more or less explicit terms. St. Clement of Rome, I Cor., xxv; St. Justin Martyr, "De resurrect.;" vii sqq.; Iden, "Dialog. c. Tryph.;" Ixxx; Athanasius, "De resurrect. carn.;" iii; Tatian, "Adv. Graec.;" vi; St. Ireneus, "Contra haer.;" I, x; V, vi, 2; Tertullian, "Contra Marcion.;" v, 16; Iden, "De prescript.;" I, xx; ii, 14; Irenaeus, "De princip.;" xvi, 9; Iden, "In Lev.;" v, 10; Hippolytus, "Adv. Graec.;" P. G., x, 799; St. Cyril of Jerusalem, "Cat.;" XVII, xv; St. Ambrose, "Ep. clxxii.;" i, 3; St. Epiphanius, "In anec.;" lxxiii sqq.; xcix; St. Ambrose, "De essesu frat. sui Satyri"; ii, lxxxvi, cii; Iden, "In Ps. cxvi.;" xvi, 18; Ps. Ambro., "De Trinit.;" xxiii, in P. L., XVII, 534; St. Jerome, "Ep. ad Paul.;" in LIII, 8; Rufinus, "In symbol.;" xvi sqq.; St. Chrysostom (Ps. Chrysostom), "Fragm. in libr. Job" in P. G., LXIV, 619; St. Peter Chrysologus, serm. 103, 118; "Apost. Constit.;" VII, xii; St. Augustine, "Enchirid.;" cxxi, 94; Iden, "De civ.;" Dei, XX, x; Theodore, "De provident.," or, ix; "Hist. eccl." i, iii.

The general resurrection can hardly be proved from reason, though we may show its congruity. (a) As the soul has a natural propensity to the body, its perpetual separation from the body would seem unnatural. (b) As the body is the partner of the soul's crimes, and the companion of her virtues, the justice of God seems to demand that the body be the sharer in the soul's punishment and reward. (c) As the soul separated from the body is naturally incapable of communciation with the body, it seems to demand the resurrection of the body. The first of these reasons appears to be urged by Christ Himself in Matt., xxii, 23; the second reminds one of the words of St. Paul, I Cor., xv, 19, and II Thess., i, 4. Besides urging the foregoing arguments, the Fathers appeal also to certain analogies found in revelation and in nature itself, e. g. Jonas in the whale's belly, the three children in the fiery furnace, Daniel in the lions' den, the carrying away of Henocho and Elias, the raising of the dead, the resurrection of the dead, the preservation of the garments of the Israelites in the desert, the grain of seed dying and springing up again, the egg, the season of the year, the succession of day and night. Many pictures of early Christian art express these analogies in a way, "Enocyl. Archäol.;" "Neve;" Auferstehung; Northcote and Brownlow, "Roma Sotterranea.") But in spite of the foregoing congruities, theologians more generally inclined to the opinion that in the state of pure nature there would have been no resurrection of the body. (b) All shall rise from the dead in their own, in their entire, and in immortal bodies; but the good shall rise to the resurrection of life, the wicked to the resurrection of judgment. It would destroy the very idea of resurrection, if the dead were to rise in bodies not their own. Again, the resurrection, like the creation, is to be numbered amongst the principal works of God; hence, as at the creation all things came perfect from the hand of God, so at the resurrection all things must be perfectly restored by the same omnipotent hand. But there is a difference between the earthly and the risen body. The resurrection of both saints and sinners shall be invested with immortality. This admirable restoration of nature is the result of the glorious triumph of Christ over death as described in several texts of Sacred Scripture: Is., xxxv, 8; Osee, xiii, 14; I Cor., xv, 20; Apoc., i, 4. But while the just shall enjoy an endless felicity in the entirety of their restored members, the wicked "shall seek death, and shall not find it; shall desire to die, and death shall fly from them" (Apoc., ix, 6).

These three characteristics, identity, entirety, and immortality, will be common to the risen bodies of the just and the wicked. But the bodies of the saints shall be distinguished by four transcendent endowments, often called qualities. The first is "impassibility," which shall place them beyond pain and inconvenience. "It is sown," says the Apostle, "in corruption, it shall rise in incorruption" (I Cor., xv, 42). The Schoolmen call this quality impassibility, not corruption, so as to mark it as a peculiarity of the glorified body; the bodies of the damned will be incorruptible indeed; they shall be subject to heat and cold, and all manner of pain. The next quality is that"brightness," or "glory," by which the bodies of the saints shall shine like the sun. It is sown in dishonour," says the Apostle, "it shall be clothed with glory" (I Cor., xv, 37; cf. Matt., xiii, 43; xvii, 2; Phil., iii, 21). All the bodies of the saints shall be equally impassible, but they shall be endowed with different degrees of glory. According to St. Paul: "One is the glory of the sun, another the glory of the moon, another the glory of the stars. For star differeth from star in glory" (I Cor., xv, 41-42). The third quality is that of "agility," by which the body shall be freed from its slowness of motion, and endowed with the capability of moving with the utmost facility and quickness wherever the soul pleases. The Apostle says: "It is sown in weakness, it shall rise in power" (I Cor., xv, 43). The fourth quality is that of "sublimity," by which the body becomes subject to the absolute dominion of the soul. This is inferred from the words of the Apostle: "Hoping against hope, that we shall rise a spiritual body" (I Cor., xv, 44). The body participates in the soul's more perfect and spiritual life to such an extent that it becomes itself like a spirit. We see this quality exemplified in the fact that Christ passed through material objects.

Not to mention the pertinent chapters in our current apologetic and theological treatises, or the commentaries on the principal passages of Sacred Scripture cited in the course of the article, we shall only indicate a number of monographs on the questions implied in the dogmas of the Resurrection of Christ and of the general resurrection: CELLENIUS, Gf. die letzten 500 Jähre des Toterwurms und die kritik rationalistischen, in Aramania des quattro Evangelii (Rome, 1884); DENTLER, Die Apokalypse des Johannes (Würzburg, 1896); DÖRNER, Die Antithese der Osterweiber in der neueren Theologie in Theologie und Glaube (1909); LUCKE, La resurrection de Christ devant la critique contemporaine; MANDZOT, A series of articles in Revue praxis d'apostolique (1908-9); PLATT, Die theologische des S. Paul (Paris, 1905). BATTEN, Die Lehre vom Auferstehungstitel (1877); ATBETHOFER, Die christliche Exegetik (1890); WILHELM und SCHEVEL, Manual of Catholic Theology, ii (London, 1898). 179; DE BARY and MILLIGAN, The Resurrection in the New Testament (London, 1884); COX, The Resurrection (London, 1890); WILLIAMS, Our Lord's Resurrection (London, 1892); PARROTE, Der Tod und die Auferstehung (London, 1884); PLOMMER, I Con, in the International Critical Commentary (New York, 1911). 336-47; SIMPSON, The Resurrection and Modern Thought (London, 1919).

A. J. MAAS.

and Jerome Kajsiwicz, and approved by the Holy See, 1902. Bogdan Jasiński, b. at Ciechanowice, Poland, 1807, was sent by the Polish Administration, to complete his studies at Paris, where he lost the faith and joined the Saint-Simonists. He assisted the Polish exiles who fled to Paris after their insurrection of 1830, and, gradually perceiving the fallacy of Saint-Simonism, he again embraced the Faith. Realizing that the great need of his countrymen was the Catholic Church, he with the poet Mickiewicz laboured zealously among the exiles, strengthening the weak and winning back the apostate. Among the latter were Peter Semenenko and Jerome Kajsiwicz, who asked him to enter the priesthood. When Jasiński confided to them his plan for a religious community, they joined him, and Semenenko became the chief founder and organizer.

Peter Semenenko, son of a schismatic father who abandoned the faith while at the Russian Court, and of a Protestant mother, was born in Russian Poland, 1814, baptized by a Catholic priest (probably for want of a schismatic) and so strongly desired to receive Holy Communion in the Catholic Church that he was secretly instructed by the Fathers of the Mission of America; and when eleven years old, entered the Seminary of Vilna. For this he was harshly treated by his relatives. He graduated from the Seminary at Rose, 1829, and entered the University of Vilna. Imperfectly grounded in religion, and left without spiritual guidance, he finally lost his faith and became an advocate of the Polish Insurrection and after the defeat of the insurgents sought refuge in Paris, where in both Polish and French he agitated against every legitimate authority by speech and writing. An order for his arrest was issued, but before its execution Semenkon in the salutary influence of Jasiński, had renounced his revolutionary principles, and the warrant was withdrawn.

Jerome Kajsiwicz, born at Slowiki, Poland, 1812, entered the gymnasium, 1827, and the University of Cracow, 1829, and soon joined the Polish Insurrection. He had ceased to practice his faith through godless education and perverse companionship. In an engagement with the Russians he was surrounded by the enemy's forces and severely wounded. Before losing consciousness he promised, if freed from this imminent danger, to consecrate himself to the service of God for life. In a semi-conscious condition he was brought into the Russian camp and thrown on the snow with other prisoners. Rescued by a Polish detachment, he was placed in a hospital and, when he had sufficiently recovered strength, journeyed to France, where he joined the Carbonari at Besançon. He soon saw the impurity of the secret societies with which he was associated, and withdrew from them. At Paris he met Mickiewicz, Jasiński, and Semenkon, through whose influence he returned to the Church.

Under the direction of Jasiński a religious community was formed by Semenkon, Kajsiwicz, and two other associates at Paris in 1836. Semenkon and Kajsiwicz continued their studies and were prefects of discipline at the College of St. Stanislaus. They subsequently adopted the disciplinary system of that institution. They went to Rome (1837) intending to complete their theological studies at the Propaganda, where Count Zamojski had obtained from Gregory XVI several free scholarships for Polish students, but, being Russian exiles without passports and other necessary papers, they were not admitted. Father Suszyński, S.J., collected a small sum of money for them and they lived for a month on twenty cents a day. Admitted as pupils, they were enabled to continue their studies for the priesthood and upon the arrival of two other companions (1838) led a community life of extreme poverty, having no personal income.

Jasiński, who had continued his apostolic work in Paris, came to Rome in 1840 and being in delicate health, went out with labours, privations and hardships, died after six months. When ready for Holy orders, Semenkon and Kajsiwicz were accused of being political agents and were denied ordination. Unwilling to join the Diocese of Rome to procure their "titulus ordinations", they proceeded the formation of their new Congregation, they were assisted by Count Montalembert, who prevailed on the Archbishop of Paris to confer Holy orders on them but exempt them from service in his diocese.

On Holy Saturday, 1842, Semenkon was unanimously chosen Superior and on Easter Sunday celebrated Mass in the Catacombs of Saint Sebastian, where, at the suggestion of Cardinal Micara, he and his six companions made their vows for five years. The name "Congregation of the Resurrection of Our Lord Jesus Christ" was suggested by the feast of the day. Their intention was to live according to the rule of some religious order already approved by the Church; but during an audience on 28 December, 1847, Pius IX advised them to form a Congregation independent of any other established by the Church. The Congregation should be a lay order, of no religious rule suitable to their special aim. These were compiled by Father Semenkon and approved by the Holy See in 1902.

The habit adopted is that of the secular clergy with the addition of a black woolen girdle. No special mortifications are prescribed, save a fast on the vigils of the feasts of the Immaculate Conception, Seven Dolours, and Assumption of the Blessed Virgin Mary. A postulate of six months is followed by a novitiate of one year; at the end of the third year of an alumnus' duration, clerical students are admitted to perpetual vows, while lay brothers take their final vows six years after the novitiate. The members of this congregation may belong to the Latin or the Greek Rite. The mother-house is at Rome, where reside the superior-general and his council. The superior-general, his council, and the procurator-general are elected by the General Chapter for a term of six years. These officials, the ex-superiors general, and two delegates, chosen by the Fathers of certain districts defined for this purpose, constitute the Chapter. Each superior is appointed by the general and his council for a term of three years, and the general may hold office for two consecutive terms; a third term requires a dispensation from the Holy See. Canonically established at Rome, his six auxiliaries, he must reside at Paris, and two of less than six reside are held by the papal indult and are subject to some house. The Congregation devotes itself to work in parishes and missions, held by them under the same conditions as by the secular clergy, and to the education of youth in colleges and seminaries. Both Fathers Semenkon and Kajsiwicz died as superiors general; the former in Paris, 1886; the latter in Rome, 1873.

Raschei, Alfred, b. at Aschen, 1816; d. at Düsseldorf, 1839. He combined in a brilliant and forcible manner the idealism of the Romantics and Italians, the realism of Dürer, a sense of the monumental and strict adherence to nature. He might have been the greatest of German painters, but ill health crippled his energy. Recommended to Schadow by his teacher Bastine, his first oil-painting was exhibited in Düsseldorf. He represented St. Boniface, as do two other large canvases and several sketches, which recall the realistic, powerful style of Lessing. The sketches of the "Battle of Sempach" and the "Death of Arnold von Winkel-
ried” betray the influence of Cornelius. The development of his sense of colour and expressive dramatic spirit belong to his period of attachment to Veit (1836). The “Recollection of Emperor Otto I with his brother Henry” and “The Monk at the Coffin of Henry IV” are important works. In the “Nemesis pursuing a Murderer” is already crystallized the darker mood, which clouded the later life of the painter. For the Kaiserinsaal in Frankfort he painted four characteristic pictures of monarchs. With great admiration he studied the glowing colouring of Titian in strong contrast to the pale art of the Nazarenes. After this many-sided training follow his ripest works: “Hannibal’s March” powerfully depicts in six pictures the crossing of the Alps; in the “Frescoes from the Life of Charlemagne”, in the Rathaus at Aachen (see illustration in CHARLEMAGNE), the composition and colouring are both restrained and effective; his assistant Kehren completed the series with four greatly inferior pictures; the “Death Dance” depicts the horror of the Revolution of 1848. His superhuman strivings after the ideal were little appreciated by his townsmen and contemporaries. A softening of the brain afflicted him during his last years.

Retreat, Congregation of Christian. See Christian Retreat, Congregation of. 

Retreat, Houses of Correctional. See Prisons, Ecclesiastical.

Retreat of the Sacred Heart, Congregation of the (Dames de la Retraite).—Originally founded in 1678 under the name of the Institute of Retreat, at Quimper, in Brittany, by Madeleine Claude-Thérèse de Kerméno under the direction of the Jesuit Father Huby. The holy foundress having made a retreat in a convent which accommodated ladies who desired to retire from the world and follow the exercises of St. Ignatius, conceived the idea of founding a similar convent at Quimper. Later the sisters took the name of the Dames de la retraite. During the French Revolution they were dispersed for refusing to take the oath of allegiance. On 17 July, 1804, one of their number, Madeleine Victoire de St-Luc, suffered martyrdom for her devotion to the Sacred Heart by the guillotine. Her glorious death caused the institute to flourish, the members consecrated themselves to the Sacred Heart, and in 1805 began again the work of providing retreats for seculars. In 1831, the religious and administrative authorities in France then required the sisters to add the education of youth to their other work, and they now have large schools in various places in England, France, and Belgium. In 1820 two sisters from Quimper opened a house at Redon (Ille-et-Vilaine), which eventually became the cradle of the Retreat of Angers. Meanwhile the mother-house at Quimper in 1808 opened a house at Quimperlé; in 1820 one at Leeneve (Finistère); in 1847 one at Pontchâteau (Loire-Inférieure), and in 1858 one at Brest (Finistère). The following convents were founded by the Retreat of Angers: in 1820, Redon; in 1844, Saumur (Maine-et-Loire); in 1857, a second house at Angers called l’Oratoire, and in 1863 one at Fontenay-sous-Bois (Seine). In 1880 the sisters went to England and the flourishing convent at Clapham Park was founded from Angers. In 1882 a convent was opened at Burnham, in Somersetshire, from Quimper, and after the union of Quimper and Angers (1897), another convent was opened at Westonzoyland, and in 1904, one at Clevendon. In 1898 a house at Mentone was opened, and in 1899 a large educational establishment at Brussels. The institute and its constitutions were approved definitively by the Holy See in 1910.

Francesca M. Sterle.

Retreats.—If we call a retreat a series of days passed in solitude and consecrated to practices of asceticism, in particular to prayer and penance, it is as old as Christianity. Without referring to the customs of the Prophets of the Old Testament, the forty days which Jesus Christ passed in the desert after His baptism is an example which has found many imitators in all ages of the Church. From this imitation sprang the eremitical life and the institution of the cenobites, religious who sought the solitude of the deserts or the monasteries, or in general those wishing to lead a contemplative life withdrew from the world, in order the more readily to draw nearer to God and apply themselves to exercises of Christian perfection. The “Forma cleri” of Tronson, t. IV, gives numerous texts of the Fathers and ecclesiastical writers, recommending a retreat for at least a few days. According to St. Francis de Sales (Treatise on the Love of God, XII, chap. vii), the practice of the retreat was specially restored by St. Ignatius Loyola. We may say indeed that in his “Spiritual Exercises” St. Ignatius has combined the methods of reforming one’s life and seeking the will of God in solitude. The Society of Jesus was the first active religious order in which the practice of the retreat became obligatory by rule. St. Francis of Assisi himself occasionally retired to hermitages where he gave himself up to prayer and mortification. St. Ignatius prescribed for his religious the exercises of
thirty days as an indispensable experience before admission to the vows. The custom was introduced later of repeating this thirty days' retreat during a month of the third probation, and the usage was established little by little of renewing it in an abridged form during eight days. This custom obtained the force of law by decree of the Sixth General Congregation, held in 1608, besides being imitated in other religious orders, and encouraged by a Bull of Pope Paul V, 1606.

The Society of Jesus did not reserve these exercises for its own exclusive use, but gave them to communities and individuals. Blessed Peter Faber in his "Mémoriale" testifies to having given them to the grandees of Spain, Italy, and Germany, and used them in restoring hundreds of convents to their first fervour. A letter of St. Ignatius (3 Feb., 1554) recommends giving the exercises publicly in the churches. In addition, the houses of the Society often contained rooms for priests or laymen desirous of performing the exercises privately. Ignatius, having sanctioned this custom during his lifetime, one of his successors, de Aquaviva, exhorted the provincials to its maintenance in 1599. In studying the spread of this practice we must not neglect the influence of St. Charles Borromeo. The cardinal and the Jesuits co-operated in order to promote this sort of apostolate. A fervent adherent of an exercise of the "Vía Crucis," St. Charles introduced them as a regular practice among the secular clergy by retreats for seminarians and candidates for ordination. He built at Milan an ascetarium, or house solely destined to receive those making retreats, whose direction he confided to the Oblates. The zeal of St. Charles was effectual in encouraging the sons of St. Ignatius to adopt definitively the annual retreat, and to organize outside collective retreats of priests and laymen.

It was furthered the practice. St. Francis de Sales, whose veneration for the Archbishop of Milan and his works is well known, made the retreat, praised it, and made it familiar to the Order of the Visitations, of which he was the founder (Const. XLVI). Then came St. Vincent de Paul, chosen by St. Francis de Sales to be the spiritual father of the Visitations in Paris. He was the organizer of ecclesiastical retreats in France, the plan of which had been already proposed in 1625, at the assembly of the clergy, by a curé of Normandy, Charles Dedefroy, in a small work, entitled "Colloque des Paysans". St. Vincent de Paul established retreats for candidates for ordination first at Beauvais (1628), afterwards at Paris (1631). They took place six times a year under his direction at the Collège des Bons-Enfants. Soon other clergy followed those of the Diocese of Paris who admitted; and when Saint-Lazare had been acquired (1634) this house was opened indiscriminately as a retreat for clergy, nobility, and people. In St. Vincent's time about 20,000 persons made retreats there. M. de Bérulle, founder of the Oratory, and M. Oliva, founder of Saint-Sulpice, seconded this movement of reform and sanctification. From the middle of the seventeenth century, the synodal statutes prescribed that the clergy should make a retreat from time to time. Sometimes it was made obligatory for those who obtained benefices with the cure of souls. In a word, the retreat was thenceforth an established custom of pious ecclesiastics. In 1663 M. de Kerlivo, who knew the excellent results obtained at Saint-Lazare, founded a house of retreat for men at Vannes in order to accommodate the co-operators of P. Hubert. This institution has a special importance in the history of retreats, because the regulations of Vannes generally guided the directors of other houses which the Jesuits established. These were at Quimper, Rennes, Nantes, Rouen, Paris, Dijon, Nancy, and soon in most of the large cities; then those of the Diocese of P.-Hubert. This house is open for retreats for men, one would be erected for women: as at Vannes, thanks to the Venerable Catherine de Francheville, at Rennes, at Quimper, at Paris, Nantes, etc. With a view to organizing and facilitating retreats for women, there were formed, particularly in Brittany, congregations of Ladies of the Retreat, which are still in existence.

France was not alone in having houses of exercises. They were established in Germany at Munich and Prague; in Spain, at Barcelona and Gerona; in Italy, at Rome, Perugia, Ancona, and Milan; in Sicily, at Palermo, Alcamo, Mazara, Termini, Messina, etc.; in Poland, at Wilna; in Mexico City and Pueblo. The enumeration is necessarily incomplete; it should include missionary countries, Canada, Chile, China, etc. Nor were Jesuits the only ones to busy themselves with retreats: Franciscans, Benedictines, Lazarists, Eudists, Oratorians, Passionists, Redemptorists, and others vied with them in zeal. But the suppression of the Society struck a fatal blow at the work in many a country. In Brittany, the classic land of retreats, various religious, and principally priests, continued this ministry of the Jesuits. In Franche-Comté a saintly curé, the Venerable Antoine Receveur, organized the Congregation of Christian Retreat to secure for men and women the benefits of spiritual exercises. In Italy, the Venerable Bruno Lanteri instituted a society of priests, the Oblates of the Blessed Virgin Mary, which he opened to the laity with retreats. St. Alphonsus Liguori, who from his youth had followed the exercises among the Jesuits or among the Lazarists, could not neglect this means of apostleship. He adopted it as one of his own practices and prescribed it for the Congregation of the Most Holy Redeemer. Thus the Redemptorists kept up the custom of retreats in the Kingdoms of Naples and Sicily during the second half of the eighteenth century. In Argentina and Paraguay the retreats continued, thanks to the exertions given by Maria-Antonia de San José de La Paz (1730-1799). Aided by several priests and various religious orders, she succeeded in having the exercises performed by nearly 100,000 persons.

Annual ecclesiastical retreats began as a general thing in France and other countries in 1815. Numerous promoters of these retreats came from the ranks of the secular clergy as well as from the regular orders. A large number of directors are annually engaged in giving retreats to the religious communities. Several institutions provide them exercises: Carmelites, Capuchins, Franciscans, Jesuits, who give retreats to thirty days. But there were not only priestly or conventual retreats; they were made by the faithful, grouped in parishes or in congregations, brotherhoods, third orders, etc. Thus retreats are conducted for employees, workmen, teachers, confreres, domestics, etc. We may also mention retreats at the close of a course of study, established in the College of St. Acheul at Amiens in 1825, and which, spreading by degrees, led to the organization of retreats among the alumni, a custom that has become quite general. There has been no lack of cooperation in this great work of regeneration: bishops threw open their seminaries to the laity, the Christian nobility lent their châteaux; the religious orders—Benedictines, Cistercians, Carthusians, Dominicans, Franciscans, Lazarists, Eudists, Redemptorists, Passionists, the Society of Mary, Brothers of St. Vincent de Paul, and Brothers of the Christian Schools, all encouraged the retreat, either by providing suitable places for the purpose, or by furnishing directors. The Jesuits alone possessed the exercises on French soil until 1901; they now have seven in Belgium and others in Spain, Austria, Italy, Holland, England, Canada, United States of America, North and South. They have established houses in Australia, China, India, and Madagascar. Besides the Breton congregations already spoken of, new societies especially devoted to
retreats for women have been formed, such as Notre Dame des Anges and Marie Reims... Retreats for laymen have spread greatly throughout the Catholic world during the last twenty-five years. A French Jesuit, Père Henry, was the pioneer in this great revival. In 1882 he gave himself to the task of instituting retreats for working-men, and it was not long before houses devoted to this purposed purpose were founded all over Europe. During 1908, in Belgium alone 243 retreats were given, attended by 10,253 excipients, and since 1890 in that country at least 100,000 of the labouring classes and about 25,000 professional and business men have made retreats. France, Germany, and Holland and other European States have also extended the work with gratifying results. In one house in France, Notre Dame du Haut-Mont, more than 30,500 men have made the retreat within the last twenty-five years. England and Ireland have taken up the movement, and are at present engaged with retreat organizations, as also is Canada. In the United States a generous response has been given to the movement, and a house of retreat has been founded (1911) on Staten Island, New York City. The principal reason of the success of these retreats, called cloistered to distinguish them from the parochial retreats open to all, is their very necessity. In the fever and agitation of modern life, the need of meditations which impresses itself on Christian souls who desire to reflect on their eternal destiny, and direct their life in this world towards God.

Paul Deubич.

Retz, Jean-François-Paul-Gondi, Cardinal de, Archbishop of Paris, b. at the Château of Montmirel, Oct., 1614; d. in Paris, 24 Aug., 1679. His father, becoming a widower, entered the Oratory, and was for a time (1643) the director of Anne of Austria. Retz was destined for the Church, although, as he himself declares, he "had neither the taste nor the disposition for it"; his preceptor was St. Vincent de Paul. His youth was stormy, not exempt from gallantries. However, he acquired a solid education, learned seven languages, studied sacred and profane literature and from reading Plutarch and Saintes developed a wide taste for republican maximis, and for the rôle of conspirator. This taste reveals itself when at the age of eighteen years he wrote a book on the conspiracy of Fieschi. He imitated an Italian author named Mascardi, but while Mascardi blamed the Pope and the young Retz condemned him. In 1638 to 1641 he took a part in the plots of the Count de Soissons against Richelieu; later, after the Count had been killed at the battle of La Marfée (6 July, 1641), Retz devoted himself definitively to an ecclesiastical career. Louis XIII on his deathbed named him conditor to his uncle, Gondi, Archbishop of Paris; on 31 Jan., 1644, Retz was consecrated at Notre Dame, receiving the title of Archbishop of Corinth. He soon became popular in Paris by his sermons, and by his manner of reforming the priests of the diocese. This popularity brought upon him the hostility of Mazarin, especially as in 1649 he threw himself into the movement of the so-called Fronde against this minister. He knew how to stir up the spirit of the young, Cardinal, Parlement, and the Duke of Orleans. But he hated Condé, the head of the Fronde princes, as much as he hated Mazarin, and when the Prince de Condé openly revolted against the king, Retz attached himself to the Court party. On 21 Sept., 1651, Louis XIV informed him that Innocent X had ordered him to cease his attacks. Retz promised fidelity to the royal family, and kept his promise, still continuing however in his opposition to Mazarin. Mazarin, wishing to exile him from Court, nominated him as "Director of French Affairs at Rome". This Retz refused, and, according to an expression of Bossuet, "continued to threaten with more and more men the victorious favourite". At the instigation of Mazarin, Louis XIV (16 Dec., 1652) signed an order of arrest against Retz. The latter surrendered himself, and was imprisoned at Vincennes. His uncle having died on 21 March, 1654, Retz, though a prisoner, took possession of the Archipresbyteral See of Paris by power of attorney. He soon resigned it in exchange for some abbies, and was transferred to the Château of Nantes, pending the acceptance by Innocent X of his abdication. He escaped, sailed for Spain, then went to Rome, where Innocent X wished him to return the Archbishopric of Paris. A fugitive in a strange land, he then reigned as archbishop at Rome, whence he directed the clergy of Paris, in spite of Mazarin, by a number of letters which Mazarin caused to be burned successively by the public executioner. He played a decisive rôle in the controversy which elected Alexander VII in 1655. His influence at Rome opposed that of Lionne, the ambassador of France. Seized by the spirit of political intrigues, we find him from 1655 to 1661 travelling in Germany, and Holland, and interesting himself in the restoration of the Stuarts. The contest between Retz and Mazarin ended only with the death of the cardinal; and as Louis XIV, even after Mazarin's death, did not wish Retz to return to Paris as archbishop, Retz finally resigned his see in 1662, receiving as compensation the Abbey of St. Denis, whose revenue of 120,000 livres was double that of the archbishopric. He established himself at the Château of Commercy.

More than once he played an active part in the quarrels between Louis XIV and Rome. It was he who, during the conflict between Louis XIV and Alexander VII regarding the reservation of the Host, advised Louis XIV to seize Avignon. In 1665 and 1666 he was connected with the difficulties resulting from the Bull of Alexander VII against two decisions of the Sorbonne which were directed against two infallibilist publications. He tried in vain to induce the pope to declare that anti-infallibilist teachings were not heretical, but he succeeded in preventing Alexander VII from launching an excommunication against the Parlement which had joined forces with the Sorbonne; then he obtained a condemnation by the Index of one of the two publications condemned by the Sorbonne, and he interpreted this Act as a sort of indirect disposal of the Bulls which had been directed against the Sorbonne. In his memoir on the Sacred College written in Sept., 1666, he contended that the Universal Church, in its conclaves, should be represented by cardinals chosen from all the countries of Christendom. This memoir and the manuscripts written by Louis XIV and the minister Lionne are masterpieces of diplomatic language. He took a prominent part in the conclaves which elected Clement IX and Clement X, and even obtained eight votes in the conclave of 1675 which elected Innocent XI. He died three years later during a sojourn in
Paris. His memoirs, which he began to write in 1671, were published for the first time in 1717; several English translations were made in 1723, 1764, and 1774. His language is admirable for its charm and suppleness; for the profundity of his political views, and the conciseness of his moral ideas he has been compared to Tacitus. The craving for intrigue and adventure formed the basis of his character. A man of remarkable parts, he was above all a church politician rather than a churchman or a scholar. *Œuvres de Cardinal de Retz, ed. FEUILLET, GOURDAN ET CHATEAULIER (10 vols., Paris, 1870–90); CHATEAULIER, *Le Cardinal de Retz et l'Affaire du Chapeau* (2 vols., Paris, 1897); IDEM, *Le Cardinal de Retz et ses Missions diplomatiques à Rome* (Paris, 1879); IDEM, *Saint-Vincent de Paul et les Grands* (Paris, 1882); GAGNIER, *Les dernières années du Cardinal de Retz* (Paris, 1876).

GEORGES GOTAU.

**Reuchlin (Grecized, CAPTION), JOHANNES,** celebrated German humanist, b. at Pforzheim, Baden, 22 February, 1455; d. at Liebenzell, 30 June, 1522. He studied at Freiburg, Paris, and Baele, where he won his baccalaureate in 1475, his degree of master in 1477, and later taught Greek and Latin; in 1479 he became bachelor of jurisprudence in Orleans, and licentiate of law at Poitiers in 1481. During two trips to Italy (1482 and 1490) he became acquainted with the Platonic Academy at Florence and the chief Italian philologists, he himself exciting wonder through his great philosophical knowledge. In the interval between these journeys he became counsel of Count Eberhard of Württemberg, successor in the high court and doctor of jurisprudence, meanwhile applying himself zealously to the study of Hebrew. On the death of his patron Eberhard, he fled to Heidelberg through fear of his successor, the malvolent Count Eberhard VI, who,unjustly, persisted in his enmity to the elector. In 1498 he paid his third visit to Rome, and perfected his Hebrew by intercourse with some learned Jews. In Heidelberg he wrote his two witty and successful Latin comedies, "Serius* and "Hermo*. On Eberhard's approach he returned to Stuttgart, and became imperial judge of the Swabian Confederation (1502–12), private *littetraecu*, professor of Greek and Hebrew at Ingolstadt (1520–1), and professor at Tübingen (1521–2). The chief service of Reuchlin was his introduction into Germany of the study of Hebrew. His "De rudimentis hebraicis!" (1506), containing both lexicon and grammar, was epoch-making. In 1512 he published as a manual for beginners an edition of the Hebrew text of the Pentential Psalms with a literal Latin translation. In his "De accentibus et orthographia lingue hebraica" (1518), he treats in detail the word-accents, and more briefly the rhetorical accent and musical emphasis. Less important are his cabalistic writings ("De verbo mirifico", 1494; "De arte cabalistica", 1517), in which he becomes lost in the abstruse problems of mysterious names and figures. Meanwhile his unfortunate quarrel with Johann Pfefferkorn and the Cologne Dominicans concerning the destruction of the Talmudic books had begun. (For a discussion of this, see Humanism.) Throughout the Reformation, Reuchlin, a humanist and churchman, was concerned to reconcile the Church and sought to alienate his grandnephew Melanchthon from Luther.

**KLEMSM LÖFFLER.**

**Reumont, ALFRED vON, statesman and historian, b. at Aachen, 15 August, 1808; d. there, 27 April, 1887. After finishing his course at the *gymnasium*, he took up in obedience to the wishes of his father and his own inclination, the study of medicine at Bonn and Heidelberg. The death of his father in 1828 interrupted his studies, whereupon he became first private tutor at Florence, and within the course of a year, private secretary of the Prussian ambassador in that city. Meanwhile he attended lectures, and in 1833 graduated Doctor of Philosophy at Erlangen. He was subsequently engaged in the Foreign Office at Berlin (1835–6), as secretary of the legation at Florence and Rome (1836–43), again in the Foreign Office (1843–7), where he simultaneously acted as private secretary to King Frederick William IV. This monarch always reposed great confidence in Reumont, and in 1846 enabled him. In 1847 he became counsellor of the Prussian legation at Rome, where he remained alone after the flight of the pope. In 1851 he was transferred to Berlin, and when on the annexation of this country, was placed on half pay, in consequence of an unwillingness to appoint a Catholic to the post previously intended for him: that of ambassador to the pope. Henceforth he devoted himself to his literary studies—first in Rome, then in his native Aachen, from 1858 in Berlin. When he returned to Aachen in 1878. In spite of severe bodily sufferings he always maintained his relations and a lively personal and epistolary intercourse with prominent personages of Germany and Italy, e. g. Hermann von Tüle, his intimate friend and former colleague, Marchese Gino Capponi, the illustrious literary historian of Italy, Leopold von Ranke, the great historical investigator whom he had attacked in 1830, and several members of the Prussian royal house, especially Queen Elizabeth and Emperor William I. He was a prolific author, and in almost all his works takes as his special theme the portrayal of the literary life of Italy, the communication to German readers of a deeper understanding of Italian art and history, seeking thus to prepare the way for an intellectual and culminating fusion with his native country. Among his many works dealing with Italy we must mention: "Andrea del Sarto" (Leipzig, 1835); "Reisebilderungen u. Umrisse aus südlichen Gegenen" (Stuttgart, 1855); "Italia" (2 vols., Leipzig, 1858); "Italien" (2 vols., Berlin, 1858); "Leopold Von Ranke" (4 vols., Leipzig, 1840–44); "Tavole cronologiche e sincrone della storia fiorentina" (Florence, 1841), supplementary volume (1875); "Ganganelli, Papst Clemens XIV. Seine Briefe u. seine Zeit" (2 vols., Berlin, 1851; tr. London, 1854). In his "Beitrage zur italienischen Geschichte" (6 vols., Berlin, 1853–7) he treats of "Galilei u. Rom, Francesco Burlemachi", "Gaeta", "Recollections of the year 1849", "The last days of the Order of Malta", and finally "The Queen of Etrurias attempted flight from Nizza in 1811". His "Jugend Katerines de Medici" is brilliantly written (Berlin, 1854; Italian tr. Florence, 1858; French, Paris, 1864). Among his greatest works must be reckoned: "Geschichte der Stadt Rom" (3 vols., Berlin, 1867–70); "Lorenzo de Medici il Magnifico" (2 vols., Leipsig, 1874; 2nd ed., 1883); "Geschichte Toscanas seit dem Ende des florentinischen Freistaates" (2 vols., Gotha, 1867–77); "Gino Capponi. Ein Zeit u. Lebensbild" (Gotha, 1889); "Vittoria Colonna. Leben, Dichten, Glauben im 16. Jahrhundert" (Berlin, 1893). In all his works he shows the fruit of his connexions with the royal house appeared: "Zeitgenossen. Biographien und Charakteristiken"

Reuss, Edmond, archaeologist and historian, b. at Wijneghem (Antwerp), 25 April, 1831; d. at Louvain, 24 Dec., 1903. Sent to the University of Louvain immediately after his ordination to the priesthood (1854), he soon became head librarian of the university (1859-1896). He collaborated with his rector, Mgr de Ram, in his works on the religious history of Belgium, and in 1860 they founded the quarterly Revue pour servir à l'histoire ecclésiastique de la Belgique, which Reussens continued to direct until his death. With the same teacher, he became interested in the history of the University of Louvain, to which he devoted almost exclusively the last years of his life. Through these studies he acquired a knowledge of paleography and diplomacy and became professor of a course in these branches (1881-1903) which was the first of its kind in Belgium. In 1900 he was appointed a member of the Royal Commission of History (Brussels). After teaching theology for two years he had charge of a new course in Christian archaeology from 1894-1900. In this department he soon acquired great distinction, as is evidenced by the success of his manual, his appointment (1884) to the Royal Commission of Monuments (Brussels), his participation in the exposition of ancient art, and his share in the renovation of religious art in Belgium. His principal works are: "Éléments d'archéologie chrétienne" (Louvain, 1871-5); "Éléments de paléographie" (Louvain, 1899); "Documents relatifs à l'histoire de l'université de Louvain" (Louvain, 1881-1903).

Annuaire de l'université catholique de Louvain (1905) pp. xxii; Université catholique de Louvain, bibliography and supplement, i, ii, iii (Louvain, 1900, 1902, 1904, 1906).

R. MAERE.

Reuss, name of the two smallest states of the German Confederation, which lie almost in the centre of Germany, east of Thuringia, on the western boundaries of the Kingdom of Saxony. Their united area is 440 sq. miles. Reuss alter Linie, or Reuse-Greitz, comprises 122 sq. miles and in 1905 its population was 70,603, of whom 68,549 were Lutherans, 1205 Catholics, and 54 Jews. Reuss jüngster Linie, or Reuss-Schleis, contains 318 sq. miles, and had 144,554 inhabitants in 1905, of whom 140,640 were Lutherans, 2906 Catholics, and 200 Jews. These present Principality of Reuss and the neighbouring tracts of land were inhabited in early medieval times by Slavonic races who were civilized and converted to Christianity by the German Emperor Otto I (912-973). In the 13th century the region was under the Diocese of Zeitz (founded in 969), which became a suffragan of Magdeburg. On account of the frequent inroads of the Slavs, the residence of the Bishop of Zeitz was removed to Naumburg in 1028, after which the see was called Naumburg-Zeitz. Upon the death of Gera desired y, the whole province was allotted to the Margraviate of Zeitz. As early as the year 1000, however, Emperor Otto III permitted the entire part lying on the eastern boundary of Thuringia to be administered by imperial Vogtei, or bailiff (advocati imperii). whence this territory received the name of Vogtland (terra ooguontorium), a designation that has remained to this day a geographical summary for Reuss, especially that part on the Saxon borders. The position of Vogt soon became hereditary. The princes of Reuss are descended from the Vogt of Weida. Erkenbert I (1122) is proved by documentary evidence to have been their ancestor. His younger son acquired all the whole Vogtland by deeds or marriage settlement, although in the fourteenth and fifteenth centuries they lost the greater part of their possessions, most of which fell to Saxo-Meissen (the present Kingdom of Saxony). In 1244 the Vogt Henry IV entered a German monastery. His sons divided his possessions, their seats being respectively at Weide (extinct in 1535), Gera (extinct in 1550), and Plauen. The Plauen branch was subdivided into an elder line that died out in 1572, and a younger line. Henry, the founder of the Plauen line (d. about 1300), on account of a visit to Russia received the surname of "der Reusse" (Ruthenus), whence the name passed to the country; on account of the close relations of that country with the neighbouring Saxon states, Lutheranism speedily gained a footing in Reuss.

The rulers joined the Salmakid League against the German emperor, and forfeited their possessions, but afterwards recovered them. Henry XXII is notable among the more modern princes of this house for his eminity to Prussia, which was involved in the Austro-Prussian War of 1866, when the Prussian troops occupied his domain. Henry joined the North German Confederation and the new German Empire (1871). He alone of all the confederate princes remained until his death (1902) an implacable enemy of Prince Bismarck and of all the conditions created in Germany by the foundation of the empire. His son, Henry XXIV (born in 1878), being incapable of ruling, the regency passed to the princes of the younger line of Reuss. After the death of Henry XXIV, the last scion of the younger line, the Principalties of Reuss-Greiz and Reuss-Schleis will be united. Since the end of the twelfth century all the male members of the princely house have borne the name of Henry in honour of the Emperor Henry VI of Germany (1100-7), to whom they were under great obligations. The Reformation entirely destroyed Catholicism in Reuss. The few Catholic settlers were for a long time deprived of regular religious ministrations. A Brief obtained from the papal nuncio in Vienna, 15 March, 1522, by the efforts of the Catholic Prince-Governor of Rochefort, wife of Henry XIX, placed the Catholics in the domains of the elder line under the jurisdiction of the Archbishop of Prague; and through a papal Brief of 18 March, 1874, they passed under that of the Vicar Apostolic of Saxony. The parish of Greiz has existed since 1897 and the statutes of the Catholic congregation there, dated 12 April, 1897, received government sanction on 7 June of the same year, together with the grant of a legal status under the civil law. The Princes of Reuss are friendly to the ecclesiastical powers in the other German states (Bavaria and Saxony) are not prevented from exercising their spiritual functions.

Excluding Greiz and Frauenreuth, permission of the authorities to hold religious services is required in the towns and villages of the principality. The Catholics of Reuss-Schleis were placed under the jurisdiction of the bishops of Paderborn by a decree of the papal "Congregatio de propaganda fide" of 27 June, 1809, which, however, was not officially recognized, and, when in 1883 the Catholics of the city of Gera desired political recognition, the Government made its consent dependent upon the transfer of jurisdiction to the Vicar Apostolic of Saxony. This was effected by a Decree of Propaganda dated 7 October, 1889. By a prince rescript of 14 June, 1894, the status of the Catholic
population of Gera was recognized from 1 June. They then received the rights and privileges of citizens under the civil law. The rector of Gera is not debarred from exercising his sacerdotal functions in places belonging to his parish, nor are priests from the neighbouring countries (Saxony and Saxe-Weimar). The successful progress of Catholicism is retarded in both principalities by lack of means, since neither the State nor the people contribute anything to the Catholic Church and a church tax is not permitted. The Evangelical-Lutheran Church is supported by state and communal contributions, Catholics being assessed equally with Protestants for this purpose. The Government does not interfere with its subjects in regard to the change of their religion, establishment of orders, mixed marriages, and the education of the children of such marriages in either principality. For the most part the principles obtaining in the Kingdom of Saxony prevail in Reuss. Nominally, enjoyment of the privileges of citizenship is independent of creed, but in Reuss-Greiz religious exercises can take place only by express permission. In both principalities no previous permission is required for processions on religious festivals, provided they are carried out in the customary manner. Catholic processions are not allowed. The public free schools are Evangelical-Lutheran and maintained by political or school districts. Catholics are obliged to contribute proportionally as much as Protestants, although religious instruction in their Faith is never given. A private Catholic free school (about 200 children) has existed in Gera since 1903, to which neither State nor city contributes. In Greiz the Catholics have succeeded in obtaining a school of their own since 1908, with about 130 children who are of compulsory school age. The grant of an appropriation for a high school is still pending (1911).
