For more than two centuries the Church of England theoretically recognized only two "sacraments of the Gospel" yet permitted, or tolerated other five rites. In practice these five "lesser sacraments" were neglected, especially penance and extreme unction. An attempt in the thirteenth century to reintroduce either of them was promptly rejected, and they have never been generally restored. There has been a strong desire, dating chiefly from the Tractarian Movement, and the days of Pusey, Newman, Lydson, etc. to reintroduce all of the sacraments. Many Episcopalians and Anglicans to-day make heroic efforts to show that the twenty-fifth article repudiated the lesser sacraments only in so far as they had "grown of the corrupt following of the Apostles, and were administered more Romanismius", after the Roman fashion. Thus Morgan Dix reminded his contemporaries that the first book of Edward VI al- lowed only four "sacraments" of the Greek rite, namely those which could give absolution, as well as "ghostly counsel, advice, and comfort", but did not make the practice obligatory: therefore the sacrament of Absolution is not to be "obtruded upon men's consciences as a matter necessary to salvation" (op. cit., pp. 99, 101, 102, 103). He cites authorities who state that "one cannot doubt that a sacrament of anointing the sick has been from the beginning", and adds, "There are not wanting, among the bishops of the American Church, some who concur in deploiring the loss of this primitive ordinance and predicting its restoration among us at some propitious time" (ibid., p. 105). At any rate, it is evident that a vigorous and unavailing effort was made to obtain approbation for the practice of anointing the sick. High Church pastors and curates, especially in England,
frequently are in conflict with their bishops because the former use all the ancient rites. Add to this the assertion made by Mortimer (op. cit., I, 122) that all the sacraments cause grace ex opere operato, and we see that "advanced" Anglicans are returning to the doctrine and the tactics of the Old Church. Whence it comes and in how far their position can be reconciled with the twenty-fifth article, is a question which they must settle. Assuredly their wanderings and gropings after the truth prove the necessity of having on earth an infallible interpreter of God's word.

Division and Composition of the Sacraments.—

(a) The two penances are called "sacraments of the dead", because they give life, through sanctifying grace, then called "first grace", to those who are spiritually dead by reason of original or actual sin. The other five are "sacraments of the living", because they give grace, i.e., increase of sanctifying grace. Nevertheless, since the sacraments always give grace where there is no obstacle in the recipient, it may happen in cases explained by theologians that "second grace" is conferred by a sacrament of the dead, e.g., when one who has only venial sins to confess receives absolution and that "first grace" is conferred by a sacrament of the living (as St. Thomas, III, Q. lxxii, a. 7 ad 2 fn.; III, Q. lxxix, a. 3). Concerning extreme unction St. James explicitly states that through it the recipient may be freed from his sins: "If he be in sins, they shall be forgiven him" (Acts, V. 16).

(c) The Council of Trent declared that the sacraments are not all equal in dignity; also that none are superfluous, although all are not necessary for each individual (Sess. VII, can. 3, 4). The Eucharist is the first in dignity, because it contains Christ in person, whilst in the other sacraments Christ the Eucharist is the instrumental virtue derived from Christ (St. Thomas, III, Q. lvi, a. 3). To this reason St. Thomas adds another, viz., that the Eucharist is as the end to which the other sacraments tend, a centre around which they revolve (loc. cit.). Baptism is always first in necessity; but in the order of dignity, confirmation being between these two. Penance and extreme unction could not have a first place because they presuppose defects (sins).

Of the two penances is the first in necessity: extreme unction completes the work of penance and prepares souls for heaven. Matrimony has not such an important social work as orders (loc. cit., ad 1 um). If we consider necessity alone—the Eucharist being left out of our daily business of the Church. Whence and in how far their position can be reconciled with the twenty-fifth article, is a question which they must settle. Assuredly their wanderings and gropings after the truth prove the necessity of having on earth an infallible interpreter of God's word.

On this point the language of the twenty-fifth article ("commonly called sacraments") is more logical and straightforward than the terminology of recent Anglican writers. The Anglicans distinguish between the Eucharist and baptism as the sacraments of the Church (St. Thomas, loc. cit., a. 4).

(d) Episcopalians and Anglicans distinguish two great sacraments and five lesser sacraments because the latter have not any visible sign or ceremony ordained by God (art. XXXV). Then they should be classed among the sacramentals since God alone can be the author of a sacrament (see above III). On this point the language of the twenty-fifth article ("commonly called sacraments") is more logical and straightforward than the terminology of recent Anglican writers. The Anglicans distinguish between the Eucharist and baptism as the sacraments of the Church (St. Thomas, loc. cit., a. 4). Verily this is interpretation extraordinary; yet we should be grateful since it is more respectful than saying that these five are much less important nor so necessary as the sanctification of ministers of the Church (St. Thomas, loc. cit., a. 4).

The effects of the Sacraments.—(1) Catholic Doctrine.—(a) The principle effect of the sacrament is a two-fold grace: (1) the grace of the sacrament which is "first grace", produced by the sacraments of the dead, or "second grace", produced by the sacraments of the living (supra, IV, 3, b): (2) The sacramental grace, i.e., the special grace needed to attain perfection. Most probably it is not a new habitual gift, but a special mode or agency in the sanctifying grace conferred, including on the part of God, a promise, and on the part of man a permanent right to the assistance needed in order to act in accordance with the obligations incurred, e.g., to live as a good Christian, a good priest, a good husband or wife (cf. Proor. d. cit., 196; St. Thomas, III, Q. lxxii, a. 2). (b) Three sacraments, baptism, confirmation, and orders, besides grace, produce in the soul a character, i.e., an indelible spiritual mark by which some are consecrated as servants of God, some as soles, some as ministers. Since it is an indelible mark, the sacraments which impart a character cannot be received more than once (Conc. Trid., sess. VII, can. 9; see Character).

(b) All admit that the sacraments of the New Law cause grace ex opere operantis, not ex opere operato (supra, II, 2, 3).

(c) All admit that God alone can be the principal cause of grace (supra 3, 1).

(d) All admit that the sacraments are, in some sense, the instrumental causes either of grace itself or of something else which will be "title exigeant of grace".
(infra e). The principal cause is one which produces an effect by a power which it has by reason of its own nature or by an inherent faculty. An instrumental cause produces an effect, not by its own power, but by a power which it receives from the principal agent. When a sculptor makes a statue, the principal cause, his tools are the instrumental causes, and each can cause grace as the principal cause; sacraments can be no more than his instruments "for they are applied to men by Divine ordinance to cause grace in them" (St. Thomas, III, Q. lxi, a. 1). No theologian of to-day defends Occasionalism (see CAUSA), i.e., that effects occur by a kind of concomitance, they being not real causes but the cause sine quibus non: their reception being merely the occasion of conferring grace. This opinion, according to Pourrat (op. cit., 107), was defended by St. Bonaventure, Duns Scotus, Durandus, Occam, and all the Nominalists, and "enjoyed a real success until the time of the Council of Trent, when it was transformed into the modern system of moral causality". St. Thomas (loc. cit., III, Q. lxi, a. 1, 4; and "Quodlibeta", 12, a. 14), and others rejected it on the ground that it reduced the sacrament to a condition of grace.

(e) In solving the problem the next step was the introduction of the system of dispositive instrumental causality, explained by Alexander of Hales (Summa theol., IV, Q. v, membr. 4), adopted and perfected by St. Thomas (IV Sent., d. 1, Q. i, a. 4), defended by many theologians down to the sixteenth century, and revived in our days by Father Bilott, S. J. ("De eccles. sacram.", I, Rome, 1900, pp. 96 sq., 107 sq.). For controversy on this subject, see "Irish Eccles. Record", Nov., 1899; "Amer. Eccl. Review", May and June, 1900, Jan. and May, 1901. According to this theory the sacraments do not communicate and immediately cause grace itself, but they cause ex operes operato and instrumentally, a something else—the character (in some cases) or a spiritual ornament or form—which will be a "disposition" entitling the soul to grace ("dispositio exigitur gratiae"; "titulus exigitur gratiae", Bilott, loc. cit.). It must be admitted that this theory would be most convenient in explaining "reviviscence" of the sacraments (infra VII, e). Against it the following objections are made: (a) From the time of the Council of Trent down to recent times little was heard of this system. (b) The "ornament", or "disposition", entitling the soul to grace is not so easily obtained, hence it may be very rare. Since this "disposition" must be something spiritual and of the supernatural order, and the sacraments can cause it, why can they not cause the grace itself? (c) In his "Summa theologica" St. Thomas does not mention this dispositive causality: hence we may reasonably believe that he abandoned it (for controversy, see reviews sup. cit.).

(f) Since the time of the Council of Trent theologians almost unanimously have taught that the sacraments are the efficient instrumental cause of grace itself. The definition of the Council of Trent, that the sacraments "contain the grace with which they signify", that they "confer grace ex operes operato" (Sess. VII, can. 6, 8), seemed to justify the assertion, which was not contested until quite recently. Yet the end of the controversy had not come. What was the nature of that causality? Did it belong to the physical or to the moral order? And if to the moral order, did the act immediately produce its effects, either as the principal agent or as the instrument used, as when a sculptor uses a chisel to carve a statue. A moral cause is one which moves or entreats a physical cause to act. It also can be principal or instrumental, e.g., a bishop personally pleads for the liberation of a prisoner; the principal moral cause, a letter sent by him would be the instrumental moral cause, of the freedom granted. The expressions used by St. Thomas seem clearly to indicate that the sacraments act after the manner of physical causes. He says that there is in the sacraments a virtue productive of grace (III, Q. lxxi, a. 4) and he answers objections against conferring such power to a corporal instrument by simply saying that such power is not contained in them, but is handed on to them permanently, but is in them only so far and so long as they are instruments in the hands of Almighty God (loc. cit., ad 1um and 3um). Cajetan, Suarez, and a host of other great theologians defend this system, which is usually termed Thomistic. The language of the Scripture, the sacrament, the decrees of the council, they say, are so strong that nothing short of an impossibility will justify a denial of this dignity to the sacraments of the New Law. Many facts must be admitted which we cannot fully explain. The body of man acts on his spiritual soul; fire acts, in some way, on souls and on angels. The strings of a harp, remarks Cajetan (In III, Q. lxxi) touched by an unskilled hand, produce nothing but sounds: touched by the hands of a skilful musician they give forth beautiful melodies. Why cannot the sacraments, as instruments in the hands of God, produce grace?

Many great theologians were not convinced by these arguments, and another school, improperly called the Scotistic, headed by Melchior Cano, De Lugo, and Vasques, embracing later Henno, Tournely, Franselin, and others, adopted the system of instrumental moral causality. The principal moral cause of grace is the Passion of Christ. The sacraments are instruments which move or entreat God effectually and infallibly to give his grace to those who receive them with proper dispositions, because, says Melchior Cano, "the price of the blood of Jesus Christ is in them" (see Franselin, loc. cit., 192, 193). This system was further developed by Franselin, who looks upon the sacraments as being morally an act of Christ (loc. cit., p. 194). The Thomists and Suarez object to this system: (a) Since the sacraments (i.e., the external rites) have no intrinsic value, they do not, according to this explanation, exert any genuine causality; they do not really cause grace, God alone causes the grace: the sacraments do not operate to produce it; they are only signs or occasions of conferring it. (b) The Fathers saw something mysterious and inexplicable in the sacraments. In this system wonders cease or are, at least, so much restricted that the explanation is very unsatisfactory. Since this "disposition" must be something spiritual and of the supernatural order, and the sacraments can cause it, why can they not cause the grace itself?

(g) In his "Summa theologica" St. Thomas does not mention this dispositive causality: hence we may reasonably believe that he abandoned it (for controversy, see reviews sup. cit.).

(h) Since the time of the Council of Trent both of these systems have been vigorously attacked by Father Bilott (op. cit., 107 sq.), who propounds a new explanation. He revives the old theory that the sacraments do not immediately cause grace itself, but a disposition or title to grace (supra e). This disposition is produced by the sacraments, neither physically nor morally, but imperatively. Sacraments are practical signs of an intentional order: they signify a manifest causal order of the Divine intention; this manifestation of the Divine intention is a title exigent of grace (op. cit., 59 sq., 123 sq.; Pourrat, op. cit., 194; Cronin in reviews, sup. cit.). Father Bilott defends his opinions with remarkable acumen. Patrons of the physical causality gratefully note his attack against the moral causality, but object to the explanation, that the moral causality, as distinct from the action of signs, occasions, moral or physical instruments (a) is conceived with
difficulty and (8) does not make the sacraments (i.e. the external, Divinely appointed ceremonies) the real centre. Theologians are perfectly free to dispute and differ as to the manner of instrumental causality. *Lis est adhuc sub iudice.*

VI. MINISTER OF THE SACRAMENTS.—(1) It was altogether fitting that the ministration of the sacraments be given, not to the angels, but to men. The efficacy of the sacraments comes from the Passion of Christ. If Christ himself were not here, we should be like unto Christ in His human nature. Miraculously God might send a good angel to administer a sacrament (St. Thomas, III, Q. ixv, a. 7). (2) For administering Baptism validly no special ordination is required. Any one, even a pagan, can baptise, provided that he use the proper matter and pronounce the words of the essential form, with the intention of doing what the Church does (Decr. pro Armen., Denzinger-Bannwart, 696). Only bishops, priests, and in some cases, deacons may confer baptism solemnly (see Baptism). It is now held as certain that in baptism the contracting parties are the ministers of the sacrament, because they make the contract and the sacrament is the contract raised by Christ to the dignity of a sacrament (cf. Leo XIII, Encycl. "Acarum", 10 Feb., 1880; see Matrimony). For the validity of the other five sacraments the minister must be truly ordained. The Council of Trent formally solemnized the decree that no one who could administer all the sacraments (Sess. VII, can. 10). Only bishops can confer sacred orders (Council of Trent, sess. XXIII, can. 7). Ordinarily only a bishop can give confirmation (see Confirmation). The priestly order is required for the valid administration of penance and extreme unction (Conc. Trid., sess. XIV, can. 10, can. 4). As to the Eucharist, those only who have priestly orders can consecrate, i.e. change bread and wine into the Body and Blood of Christ. Consecration presupposed, any one can distribute the Eucharistic species but, outside of very extraordinary circumstances this can be lawfully done only by bishops, priests, or (in some cases) deacons. (3) The care of all those sacred rites has been given to the Church of Christ. Heretical or schismatical ministers can administer the sacraments validly if they have valid orders, but their ministrations are sinful (see Baptism, supra) (5). The faith works in the recipients from sin, and in cases of necessity the Church grants the jurisdiction necessary for penance and extreme unction (see Excommunication: V, Effects of Excommunication).

(4) Due reverence for the sacraments requires the minister a state of grace (see Purgatory). One who is solemnly and officially administers a sacrament, being himself in a state of mortal sin, would certainly be guilty of a sacrilege (cf. St. Thomas, III, Q. ixv, a. 6). Some hold that this sacrilege is committed even when the minister does not act officially or confer the sacrament solemnly. But from the controversy between St. Augustine and the Donatists (q. v.) in the fourth century and especially from the controversy between St. Stephen and St. Cyprian (q. v.) in the third century, we know that personal holiness or the state of grace in the minister is not a prerequisite for the valid administration of the sacrament. This has been solemnly defined in several general councils including the Council of Trent (Sess. VII, can. 12, ibid., de bapt., can. 4). The reason is that the sacraments have their efficacy by Divine institution and through the merits of Christ. Unworthy ministers, validly conferring the sacraments, cannot impede the efficacy of signs ordained by Christ to produce grace (cf. St. Thomas, III, Q. ixv, as. 5, 9). The knowledge of this truth, which follows logically from the true conception of a sacrament, gives comfort to the faithful, and it should increase, rather than diminish, reverence for those sacred rites and confidence in their efficacy. No one can give, in his own name, that which he does not possess; but a bank cashier, not possessing 200 dollars in his own name, can write a draft worth 2,000,000 dollars by reason of the wealth of the bank which he is authorized to represent. Christ left to His Church a vast treasure purchased by His merits and sufferings: the sacraments are as credentials entitled their holders to a share in this treasure. On this subject the Anglican Church has retained the true doctrine, but the English Church is not. The XXVI of the Westminster Confession: "Although in the visible church the evil be ever mingled with the good, and sometimes the evil hath the chief authority in the ministration of the Word and Sacraments, yet forasmuch as they do not the same in their own name, but in Christ's, and do minister by His commission and authority, we may use their ministry both in hearing the Word of God and in receiving the Sacraments. Neither is the effect of Christ's ordinance taken away by their wickedness nor the grace of God's gifts from such as by faith, and rightly, do receive the sacraments ministered unto them; which be effectual, because of Christ's institution and promise, although they be administered by evil men" (cf. Biliuart, de sacram., d. 5, a. 3, sol. obj.)

(5) *Intention of the Minister.*—(a) To be a minister of the sacraments under and with Christ, a man must act as a man, i.e. as a rational being; hence it is absolutely necessary that he have the intention of doing what the Church does. This was declared by Eugene IV in 1439 (Denzinger-Bannwart, 895) and was solemnly defined in the Council of Trent (Sess. VII, can. 11). The anathema of Trent was aimed at the innovators of the sixteenth century. From their fundamental error that the sacraments were signs of faith, or signs that excited faith, it followed logically that their effect in no wise depended on the intention of the minister. Men are to be "ministers of Christ, and the dispensers of the mysteries of God" (1 Cor., iv, 1), and thus they would not be without the intention, for it is by the intention, says St. Thomas (III, Q. ixv, a. 8, ad 1um) that a man subjects and unites himself to the principal agent (Christ). Moreover, by rationally pronouncing the words of the form, the minister must determine what is not sufficiently determined or expressed by the matter applied, e.g. that the unction of a good Christian subject (see Purgatory) which neutralizes the sufficiency of an external intention in the minister, it may not be followed in practice, because, outside of cases of necessity, no one may follow a probable opinion against one that is safer, when there is question of something required for the validity of a sacrament (Innoc. XI, 1672; Denzinger-Bannwart, 1151).

(b) The ministration of the sacraments is only possible when there is intention of the intention required in the minister of the sacrament are explained in the article Intention. Porrut (op. cit., ch. 7) gives a history of all controversies on this subject. Whatever may be said speculatively about the opinion of Ambrosius Catherinus (see Porrut, Lawespol) who advocated the sufficiency of an external intention in the minister, it may not be followed in practice, because, outside of cases of necessity, no one may follow a probable opinion against one that is safer, when there is question of something required for the validity of a sacrament (Innoc. XI, 1672; Denzinger-Bannwart, 1151).

(6) *Attention in the minister.*—Attention is an act of the intellect, viz. the application of the mind to what is being done. Voluntary distraction in one administering a sacrament would be sinful. The sin would however not be grave, unless (a) there be danger of making a serious mistake, or (b) according to the common opinion, the distraction be admitted as a concomitant of the Eucharistic species. Attention on the part of the minister is not necessary for the valid administration of a sacrament, because in virtue of the intention, which is presupposed, he can act in a rational manner, notwithstanding the distraction.
VII. RECIPIENT OF THE SACRAMENTS.—When all conditions required by Divine and ecclesiastical law are complied with, the sacrament is received validly and the conditions required for the effectiveness are observed, on the part of the minister, the recipient, the matter and form, but some non-essential condition is not complied with by the recipient, the sacrament is received validly but not licitly; and if the condition willfully neglected be grave, grace is not then conferred by the ceremony. Thus baptised persons contracting matrimony even after the one in the state of mortal sin would be validly (i.e. really) married, but would not then receive sanctifying grace.

(1) Conditions for Valid Reception.—(a) The previous reception of baptism (by water) is an essential condition for the valid reception of any other sacrament. The conditions required for the effectiveness are to be observed, on the part of the minister, the recipient, the matter and form, but some non-essential condition is not complied with by the recipient, the sacrament is received validly but not licitly; and if the condition willfully neglected be grave, grace is not then conferred by the ceremony. Thus baptised persons contracting matrimony even after the one in the state of mortal sin would be validly (i.e. really) married, but would not then receive sanctifying grace.

(b) In adults, for the valid reception of any sacrament except the Eucharist, it is necessary that they have the intention of receiving it. The sacraments impose obligations and confer grace: Christ does not wish to impose those obligations or confer grace without the consent of man. The Eucharist is excepted because, in whatever state the recipient may be, it is always the same food, the same Christ (Catech., en. 392d). (c) For attention, see supra, VI, 8. By the intention mfn submits himself to the operation of the sacraments which produce their effects ex opere operato, hence attention is not necessary for the valid reception of the sacraments. One who might be distracted, even voluntarily, during the conferring, e.g. of baptism, would receive the sacrament validly. It must be carefully noted, however, that in the case of matrimony the contracting parties are the ministers as well as the recipients of the sacraments; and in the sacrament of Penance, the acts of the penitent, contrition, confession, and willingness to accept a penance in satisfaction, constitute the proximate matter of the sacraments, according to the commonly received opinion. Hence in those cases such attention is required as is necessary for the valid application of the matter and form.

(a) For the licit reception, besides the intention and the attention, in adults there is required (1) for the sacraments of the dead, supernatural attrition, which presupposes acts of faith, hope, and repentance (see ATTENTION AND JUSTIFICATION); (2) for the sacraments of the living the state of grace. Knowingly receiving a sacrament of the living while one is in the state of mortal sin would be a sacrilege. (b) For the illicit reception it is also necessary to observe all that is prescribed by Divine or ecclesiastical law, e.g. as to time, place, the minister, etc. As the Church alone has the care of the sacraments, and generally her duly appointed agents alone have the right to administer them, except baptism in some cases, and matrimony (supra VI, 2), it is a general law that application for the sacraments should be made to worthy and duly appointed ministers. (For exceptions see EXCOMMUNICATION.)

(2) Reviviscence of the Sacraments.—Much attention has been given by theologians, especially recently, to the revival of effects which were impeded at the time when a sacrament was received. The question arises whenever a sacrament is received validly but unworthily, i.e. with an obstacle which prevents the infusion of Divine grace. The obstacle (moral sin) is positive, when it is known and voluntary, or negative, when it is involuntary by reason of ignorance or good faith. One who thus receives a sacrament is said to receive it feigningly, or falsely (fide), because by the very act of receiving it he pretends to properly dispose; and the sacrament is said to be validum sed informe,—valid, but lacking its proper form, i.e. grace or charity (see LOVE). Can such a person receive or receive the effects of the sacraments? The term reviviscence (resuscitation) is used by Thomas in reference to the sacraments and it is not strictly correct because the effects in question being impeded by the obstacle, were not once “living” (cf. Billot, op. cit., 98, note). The expression which he uses (III, Q. ixix, a. 10), viz., obtaining the effects after the obstacle is removed, is more accurate, though not so convenient as the newer term. (a) Theologians generally hold that the question does not apply to penance and the Holy Eucharist. If the penitent be not sufficiently disposed to receive grace at the time he confesses his sins the sacrament is not validly received because the acts of the penitent are a necessary part of the matter of this sacrament, or a necessary condition for its reception. One who unworthily receives the Eucharist can derive no benefit from that sacrament unless, perhaps, he repents of his sins and sacramile before the sacred species have been consumed. (b) It is certain and admitted by all, that if baptism be received by an adult who is in the state of mortal sin, he can afterwards receive the grace of the sacrament, viz. when the obstacle is removed by contrition or by the sacrament of Penance. On the other hand, the graces of Penance produce grace unless there be an obstacle; on the other hand those graces are necessary, and yet the sacrament can not be repeated. St. Thomas (III, Q. ixix, a. 10) and theologians find a special reason for the conferring of the effects of baptism (when the obstacle has been removed) in the character which is impressed by the sacrament validly administered. Reasoning from analogy they hold the same with regard to confirmation and Holy orders, noting however that the graces to be received are not so necessary as those conferred by baptism. (c) The doctrine is not so certain when applied to matrimony and extreme unction. But since the graces impeded are very important though not strictly necessary, and since matrimony cannot be received again whilst both contracting parties are living, and extreme unction cannot be repeated whilst the same desperately ill person lasts, theologians are enable the opinion which holds that God will grant the graces of those sacraments when the obstacle is removed. The “reviviscence” of the effects of sacraments received validly but with an obstacle to grace at the time of their reception, is urged as a strong argument against the system of the physical causality of grace (Haurwitz, V, 2), especially by Billot (op. cit., VII, 116, 126). For his own system he claims the merit of establishing an invariable mode of causality, namely, that in every case by the sacrament validly received there is conferred a “title exigent of grace”. If there be no obstacle the grace is conferred then and there; if there be an obstacle, God remains calling for the grace which will be conferred as soon as the obstacle is removed (op. cit., th. VI, VII). To this his opponents reply that exceptional cases might call for an exceptional mode of causality. In the case of three sacraments the character sufficiently explains the revival of effects (cf. St. Thomas, III, Q. 66, a. 1; Q. 3, Q. 66, a. ixix, aa. 9, 10). The doctrine as applied to extreme unction and matrimony, is not certain enough to furnish a strong argument for or against any system (see “Irish Theol. Record”, “Amer. Eccl. Review”, cited above V, 2).

A few of the most important points in the sacraments in general. (For each sacrament see special articles.)

Literature on the sacraments is very extensive: we can give only a few of the most important points in the sacraments in general.
Sacred Congregations. See Roman Congregations.

Sacred Heart. See Brothers of the, a congregation founded in 1821 by Père André Coindre, of the Diocese of Lyons, France. Its constitutions were modelled upon the constitutions of St. Ignatius based upon the Rule of Saint Augustine. Its members bind themselves for life by the simple vows of religion. There are no priests in the congregation, the objective purpose of which is the Christian education of the parochial and select schools, and commercial colleges. The growth of the congregation was slow. At the period of its origin the political condition of France was very unfavorable. It was a day of political agitation and revolution. Lyons, the cradle of the congregation, suffered severely under these revolutions. But a more hampering difficulty to its growth lay in the ill-defined government imposed upon the congregation. Père André Coindre was the superior-general and continued such till his death in 1821. Père Vincent Coindre, his brother, succeeded him in this office.

In 1840 Père Coindre assembled the general chapter of the congregation. During the discussions of the chapter, opinion among the brothers was so unanimous that it was necessary for the success of the congregation that its temporal affairs should be in the hands of the brothers themselves, and that one of their number should be superior-general. The question was referred to Mgr de Bonald, Archbishop of Lyons, who, after an exhaustive examination, judged it advisable that Père Coindre should resign the office. On 13 Sept, 1841, Brother Polycarp was unanimously chosen by the brothers as their superior-general. The title "Deus in surgente" was conferred upon the congregation, and it gave it stability and permanency. At the time of his death in 1859, there were in France alone seventy-three establishments, an increase of sixty during his administration. He had, moreover, in 1846 opened up in the United States, at Mobile, Ala., a new field of labour for the institute. In 1872 the province of the United States extended its schools into Canada, and in 1880 transferred its novitiate from Indianapolis to Arthabaskaive, P. Q., Canada. The growth of the congregation was here so rapid that it was deemed advisable to erect the establishments in Canada into a separate province. This was effected by a decree of the general chapter of the society held at Paris, near Le Puy, France, in 1900. About the same time a house of studies for postulants and a novitiate for the United States province were established at Metuchen, N. J.

The congregation has at the present time (1907) in the United States and Canada forty-eight establishments directed by 460 brothers, educating more than 9000 pupils. Just previous to the French Law of 1901, suppressing religious communities in France, there were in that country alone 1100 brothers, 150 schools, academies, colleges, asylums, deaf and dumb institutions, with 25,000 pupils, in twenty dioceses. Owing to the present religious persecution in France, the congregation has been obliged to seek new fields of labour, and twenty establishments have recently been founded in Spain and Belgium.

Brother Charles.

Sacred Heart Abbey. See Ossolama.

Sacred Heart of Jesus. See Heart of Jesus, Devotion to the.

Sacred Heart of Jesus, Missionary Sisters of the, a religious congregation having its general mother-house at Rome, founded in 1880 by Mother Francis Xavier Cabrini, who is still living. The aim of the institute is to spread devotion to the Heart of Jesus by means of the practice of spiritual and corporal works of mercy. The sisters conduct homes for the aged and the sick, orphanages for the poor and classes, they visit hospitals and prisons, and give religious instruction in their convents, which are open to women desirous of making retreats. The congregation has spread rapidly in Europe and America. In 1899, at the suggestion of Leo XIII, the sisters came to
New York, and have since opened convents in the Dioceses of Brooklyn, Chicago, Denver, Los Angeles, Newark, Scranton, and Seattle. At the beginning of 1911 the institute had in the United States: 253 sisters; 3 orphanages, and 6 hospitals managed by 713 orphans; 2 hospitals with about 3520 patients annually; and 1 dispensary where 21,630 persons were treated during the preceding years.

This congregation is to be distinguished from the Missionary Sisters of the Sacred Heart of Jesus, founded by Father Hubert Lépine, provincial of the Missionaries of the Sacred Heart, Hiltrup, near Münster, on 3 August, 1899, and approved episcopally in 1900. The latter sisters are engaged teaching in New Guiana, New Pomerania, and the Marshall Islands, in the districts confided to the care of the Missionaries of the Sacred Heart.

A. A. MACERELIAN.

Sacred Heart of Jesus, Missionaries of the
(Ismoudin.)—A religious congregation of priests and lay brothers with the object of promoting the knowledge and practice of devotion to the Sacred Heart of Jesus as set forth in the revelations of Our Lord to Blessed Margaret Mary Alacoque, and of offering personal reparation to the Divine Heart. The society's motto is, "Ametur ubique terrarum Cor Jesu Sacratissimum" (May the most Sacred Heart of Jesus be loved everywhere). It was founded at Ismoudin, in the diocese of Biskra, in Algeria, by the Abbé Jules Chevalier. Until very recent years the mother-house was in the above-named town, but since the separation of Church and State in France the society has its headquarters in Rome. The origin of the Missionaries of the Sacred Heart is closely connected with the Papal definition of the Dogma of the Immaculate Conception of the V. M., the means to lay their foundation being the outcome of special prayers addressed to the Mother of God during the nine days preceding the great religious event of 8 Dec., 1854. The founder had pledged himself to honour the Blessed Virgin under the title of "Our Lady of the Sacred Heart".

1884 an association of prayer was founded which has since been honoured with the official title of Universal Archconfraternity of Our Lady of the Sacred Heart, and enriched with numerous indulgences. The central governing body is at Rome, with local directors in various countries. The official centre for the United States is at Watertown, New York; those for other English-speaking countries are at Glastonbury, Somerset, England; Sydney, New South Wales, and Cork, where the society's first house in Ireland was founded, and an ecclesiastical college opened, in 1909.

On 2 Oct., 1887, an apostolic school was founded by Father Vande at Choisel-Benin in France, under twelve pupils. It grew and prospered, and in course of time other similar institutions arose in different countries. From these the priests of the society are chiefly recruited. The work is represented in the United States by St. Joseph's Apostolic School at Watertown, N.Y.

The personnel of the society is composed of 525 professed religious, with provincial houses in Italy, Germany, Holland, Australia, and a Provincial Superior residing in Paris, who rules over the dispersed members of the French Province, and its establishments in Switzerland; Belgium; Canada; Quebec and Newfoundland; Provinces of Quebec; South Qu'Appelle, Medicine Hat, Saskatchewan, and North Cobalt, Ont.

The Fathers at Quebec direct the Archconfraternity of Our Lady of the Sacred Heart, publish the Annals, its monthly bulletin, and conduct five missions and retreats. They also have a public chapel. The novitiate for Canada and the States is at Beauport. The other Canadian communities are engaged in parochial and religious work. In Australia, besides Glastonbury, the Missionaries of the Sacred Heart have communities at St. Albans, Herfordshire, and at Braintree, Essex. They engage in parish work and act as chaplains.

In the United States, the Society has communities at Watertown, Yonkers, R. I.; Onawa, Iowa; Casenovia and Sioux City, Wis., this last being a dependency of the German Province; the first four form an American Quasi-Province with headquarters at Natick. In all these places the Fathers have charge of parishes, except those at Sioux City, who preach missions, supply the places of absent priests, and assist the clergy. The Natick community supplies chaplains to St. Joseph's Hospital for tubercular patients at Hills Grove, and to the Rhode Island State charitable and correctional institutions at Howard, Cranston, and Sacknassett.

For the past quarter of a century the efforts of the Missionaries of the Sacred Heart have been expended chiefly in foreign mission fields. On 1 Sept., 1881, three Fathers set out from Barcelona for the South Sea Islands at the request of Leo XIII, and established a station in New Britain—now New Pomerania. To-day the priests and brothers doing missionary work in the diocese of Port Victoria on the south coast of the South Pacific number upward of 300, exclusive of the new mission lately opened in Mindanao, Philippine Islands—where thirty or more apostolic labourers from the Dutch Province are already employed—and the vast territory comprised in the dioceses of Port Victoria and Papa New Guinea, in charge of Father F. X. Geel as Administrator Apostolic, with residence at Port Darwin. The Bishop of Ponsa-Alegris has just entrusted the direction of his episcopal college to the congregation.

CHEVALIER, La Sacré-Cœur de Jésus dans ses rapports avec Marie, ou Notre-Dame du Sacré-Cœur (Paris, 1894); VAUDOUX, M. Henry Verjus (Paris, 1899); CARRIEBRE, Le P. Jean Vandel (Ismoudin, 1883); Album societatue missionariorum S.B.M. Cordis Jesu, 1911 (Rome).

ZÉPHIRIN PALOUQUIN.

Sacred Heart of Jesus, Society of the (PACIFARIETS).—This society was founded by two young missionaries of Saint-Sulpice who had emigrated to Belgium during the French Revolution, François-Eleonor de Tourmely and Prince Charles de Broglie, a son of the marshal. Their object was to form a society similar in all respects to the order founded by Father Ignatius Loyola on the old country house of the Louvain Jesuits, into which the community under Tourmely entered 8 May, 1704, numbering four members. These four were the two founders and two young officers of the army of Condé, Xavier de Tourmely, brother of the superior, and Pierre-Charles Le Glac, who joined them at Fleurs (26 June, 1704) obliged them to leave Belgium just as they were joined by a recruit who was destined to play a part of great importance, Joseph Varin de Solmon, who had also been in the army of Condé. The fugitives lived for some time at Leutenshof near Augsburg. In the church of the Benedictines at Augsburg, on 15 Oct., 1704, they consecrated themselves by a special vow to the Sacred Heart of Jesus and the Most Holy Heart of Mary, to continue the work they had begun, to offer themselves to the sovereign pontiff, and to obey him as St. Ignatius and his companions had done. When they had to leave Augsburg, the Sacred Heart numbered sixteen subjects. It wandered about for some time in Southern Germany and several of its members, Father Varin among them, were ordained priests. At length, on Easter Tuesday,
1797, it settled in the village of Hagenbrunn, three leagues from Vienna. There the foundress, not more than thirty years of age, opened a schoolbox, 9 July 1797, and Father Varin, but twenty-eight years of age, was chosen his successor.

The new superior submitted the statutes of the society for the endorsement of the eclec French bishops in Germany and the approbation of Pius VI, then deposed at Florence. The numerous postulants having greatly increased, a novitiate was opened at Prague under the protection of the Archduchess Maria Anna, and Hagenbrunn was converted into a boarding-school. This was at the close of the year 1798. Nicholas Paccanari, a native of Valsugana, near Trent, having at one time been in the garrison of S. Angelo, had then become a merchant and, having met with financial disaster, was reduced to earn his living as a sort of guide or cicerone. Though entirely without education, he possessed a remarkable natural gift of eloquence.

At about this period Paccanari was attached to the Oratory of the Caravita, a pious association at Rome under the direction of Father Gravita, who had been a Jesuit. Here Paccanari conceived a desire to re-constitute the Society of Jesus. He won over to his project those priests who were his associates in the Caravita: Joseph Sapienza, regent of the Sapienza; Halnat, of the College of Rennes, formerly a missionary in Madagascar; Epinette, of the Diocese of Le Mans. He drew up a rule of life for them and shut himself up at Loreto in a retreat which lasted eleven months. Returning to Rome in May, 1797, he obtained for his project the approval of Cardinal della Somaglia, the pope's vicar, and on 15 August, in the Chapel of the Caravita, the founder and his three companions made the three vows of religion and the vow of obedience to the sovereign pontiff. They adopted the habit of the original Jesuits and settled themselves at Spoleto. In August, 1798, Paccanari, having been received by Pius VI who was then at Sienna, obtained from the pope several privileges and a Rescript in which the society was designated "The Company of the Faith of Jesus". The pope charged him with the care of the Propaganda students who had been expelled from the seminary.

Paccanari made three journeys to Rome to collect these young men; the third time he and his companions were arrested by the French military authorities and lodged in the Castle of S. Angelo. They remained there four months, were then expelled from the Republic and returned to Germany, many of the former Jesuits had established themselves under the protection of the duke. Father Halnat, having learned of the existence of the Sacred Heart Fathers, suggested to Paccanari the idea of one foundation for the two institutes devoted to the same object. Negotiations were opened, but were interrupted by the imprisonment of Paccanari, and were resumed in 1799. The founder of the Fathers of the Faith, after a visit to Pius VI who heartily encouraged his project, repaired to Vienna. The society numbered about a score of members, only three of them priests. It had at first been well received by the Jesuits of Parma and of Venice, but its leader's lukewarmness towards the idea of union with the Jesuits of Russia rendered it suspect to those religious.

Fusion with the French community at Hagenbrunn therefore offered the only opportunity for its development. Conferences were inaugurated at Hagenbrunn, 9 April, 1799, and lasted nine days, Father Sineo della Torre, one of the Sacred Heart Fathers, acting as interpreter between Father Varin and Paccanari, who knew neither French nor Latin. The encouragement given by Pius VI was accepted by the Fathers of the Sacred Heart as a command, and their already numerous congregation allowed itself to be absorbed. On 18 April, Paccanari, still only a tonsured cleric, was received as superior-general, and the name Fathers of the Sacred Heart was changed to that of Fathers of the Faith. The general, deeming the manner of life of the Hagenbrunn Fathers too austere and too confined, shortened their hours of prayer, increased the time devoted to studies and recreation, and launched his subjects on the external life and the work of preaching. Having been introduced by Father Varin to the Archduchess Maria Anna, Pacanari gained an extraordinary ascendency over that princess, through whose good offices he received minor benefices, the subdiocesan and the diaconate from the hands of the nuncio at Vienna.

At the request of his new subjects, who were already beginning to be uneasy about his tendencies, he gave out (11 Aug., 1799) a somewhat vague statement of his intentions in regard to the original Jesuits. At last he left Germany, but only after distributing his men among the different countries of Western Europe. A college was opened at Dillingen, a foundation which lasted five or six years was made at Amsterdam, and Fathers Rosaven and de Broglie with some scholastics set out for England, where, in March, 1800, the monastery was opened at Kensington. Paccanari himself, returning to Italy, established a novitiate at Cremone, then at Este.

He scattered many of his religious among the hospitals—at that time overcrowded with wounded soldiers—in Italy and Germany. In the midst of his labours he was ordained priest at Padua, and soon after this he received from the new pope, Pius VII, permission to have a house at Rome. The Archduchess Maria Anna bought from the Theatines the Church of St. Sylvester, with its convent and gardens, at Monte-Cavallo; and in 1801 the pope in person came to install the Fathers there. In the month of August, 1802, the first congregation was held; with some temporary modifications, the old constitution of the Society of Jesus was adopted. In 1803 and 1804 Paccanari summoned to the College of St. Sylvester the young members, and the courses in philosophy, theology and the solemn theses, of this house of studies shed great lustre upon the nascent order. At that time there were 110 religious at St. Sylvester. In the beginning of 1804, again under the archduchess's patronage, the Caravita, near St. Peter's, was opened as a boarding-school for young nobles, the institution being named, after its benefactress, the "Collegio Mariano".

Throughout Italy, but particularly at Spoleto, the Pacanaristi gave missions with great success. In Nov., 1805, the Council of the Republic of Le Valais offered Paccanari the College of Sion, which was accepted. To Father Varin France had been assigned as the field of his apostolate; he returned thither in the spring of 1800 and began by preaching to the sick in the hospitals of Bicêtre and la Salpêtrière. It was at this time that, with Bishop Sophie Bara, he established the Society of the Ladies of the Sacred Heart (21 Nov., 1800). The Fathers of the Faith rapidly increased in number; in 1801 they were able to open at Lyons a boarding-school, which was transferred in the following year to the old Jesuit college at Belley. Lamartine was educated there. Another school was established at St. Etienne and another at Roanne in 1804. These foundations aroused the suspicions both of Fouché, the minister of police, and of Napoleon; but Portalis and, still more, Cardinal Fesch quieted them for a time. Missions were preached with brilliant success; at the first mission, at Tours, the extraordinary power which
Father Enfantin exercised over the crowds was unexpectedly revealed; at the second, at Amiens, more than six hundred marriages were rehabilitated.

Meanwhile Paccanari’s administration, his taste for display, his festivals, and the premature thrusting of his subjects into publicity displeased the Fathers of the Faith. Besides, Father Rozaven, the provincial of England, who had learned in 1802 certain unsavoury details of the general’s private life, pursued his inquiries, and, having attained certainty, visited Rome in 1803 to communicate the melancholy facts to Pius VII. During his absence most of his brethren in London wrote to Father Grüber, the Vicar-General of the Society of Jesus in Russia, to obtain admission individually. Father Rozaven on his return to England imitated their example and in March, 1804, he set out for Russia. Only Father Charles de Broglio remained in London, as a secular priest; he broke with his former friends, allied himself closely with the anti-concordataire bishops, and persisted in his protestations against the act of Pius VII as late as 1842. Father Varin, apprised of the course of events by Father Rozaven, referred the matter to the cardinal-legate in France, and on 21 June, 1804, broke with Paccanari. His society, having become independent, remained in France on the advice of the legate and of Pius VII himself. In the country until 1806, commissions were given at Grenoble, Poitiers, Niort, Bordeaux, and elsewhere; seminaries were opened at Roulers (Gand), Marvejols (Mende), Bassas (Bordeaux), and a college at Argentière (Lyons). This progress alarmed Fouc’hé; Napoleon issued an order for the suppression of the congregation, which was executed in Nov., 1807; the convivance of local authorities enabled it to continue the work of the seminaries, but its missions were stopped. Many of the Fathers entered the parochial ministry.

In August, 1806, Father Sineo della Torre and the Fathers in Switzerland in their turn abandoned Paccanari. In 1810 they were received as a body into the Society of Jesus, though only in foro interno, the official aggregation not taking place until 1814. Also about the year 1806 some of the Fathers of Spezia, Lombardey, and Amsterdam settled. The Society of Jesus having been restored at Naples by Pius VII (31 July, 1804), many Fathers of the Collegio Mariano went there and were admitted as novices.

In July, 1807, Paccanari received positive commands from the pope to return to Spain. A first canonical process was begun during the winter. Relegated to the convent of the Franciscans at Assisi, the general made a confession of his whole life and appeared penitent. At the end of five months he was transferred to the prisons of the Holy Office. A new trial resulted, in August, 1806, in a sentence of ten years‘ imprisonment. The sentence paid a tribute to the innocence and virtue of the other Fathers of the Faith; nevertheless it was the annihilation of their society. In 1809, when the French army opened the pontifical prisons, Paccanari at first refused to go out, but eventually left and disappeared. It is uncertain whether he withdrew to Switzerland under an assumed name, as some have asserted, or whether, under some regrettable circumstances, he was stabbed by a domestic servant and his body thrown into the Tiber, as another tradition has it. No one knows what has become of him.

The Archduchess Maria Anna, who, in spite of the commands of her brother the Emperor Leopold, had at first refused to abandon Paccanari and his work, was obliged to submit, overcome by the miserable life which her brother allowed her to live and the shame of her condemnation. She retired to Styria to die a holy death. She obtained permission for the last remnants of the Paccanarists to live, though without the religious habit, in the house of St. Sylvester. The Collegio Mariano was sold, and in 1814 a number of the Paccanarists entered the Society of Jesus.

As for the French Fathers, the fall of Napoleon enabled them to meet in Paris and deliberate as to what course they should take. Father de Cloriviere, one of the old Jesuits, and Monsignori di Greisano and della Genga (the latter afterwards Leo XII), the pope’s representatives, determined to remain in France. Father Varin, however, had already set out for Russia to ask the general to appoint a commissary to re-establish the Society of Jesus in France, when the commission was given to Father Varin himself. On his return Father Varin was received by him into the Society on 19 July, 1814. Nearly all the former Fathers of the Faith followed him; the rest remaining among the secular clergy.

Sacred Hearts of Jesus and Mary, Congregation of the, and of the Perpetual Adoration of the Blessed Sacrament, was founded at Nantes, France, as the Congregation of Picpus, was founded by Father Corduin, b. at Couray-les-Bois, in Poitou on 1 March, 1768. He was only deacon when the persecution, directed against the clergy, dispersed the students of the seminary of Poitiers, where he was being trained. Having learned that Mgr. de Bossy, Bishop of Clermont, was in Paris and would confer Holy Orders upon him, he set out for that city, and on 4 March, 1792, was ordained priest in the Irish Seminary. The ordination took place in the library, because the revolutionaries had invaded the chapel in which they were actually holding their meetings. After ordination he returned to Couray, but the violence of the persecution soon compelled him to hide elsewhere. During October of the same year, disguised, he laboured in the Dioceses of Poitiers and Tours.

Father Corduin gathered around him a few companions, to whom he communicated his views to promote devotion to the Sacred Hearts of Jesus and of Mary, and who were also willing to assist him in his great work. On Christmas night, 1800, he solemnly made his religious vows, devoting himself entirely to the love of the Sacred Hearts. During the year 1806 Father Corduin bought some disused houses in the Rue Picpus in Paris, and there established himself with a few of his religious. A college for the training of youths and a seminary were soon started. "The Good Father," as his religious used to call him, governed his congregation with tact and prudence, and in spite of many difficulties, his work prospered. Several new monasteries and colleges were founded and opened in various towns.

In 1825 the evangelization of the Sandwich Islands in the Pacific Ocean was entrusted by the Holy See to the Congregation of the Sacred Hearts; and the following year the first band of missionaries of the Sacred Hearts left France to carry the Faith to the inhabitants. In 1833 the Archipelagos of Oriental Oceania were likewise confided to the same Congregation and immediately missionaries were sent to the Gambier Islands; some of these fathers laboured in the congregation in Peru and Chile, South America. Not long afterwards other evangelical labourers were sent to the Marquesas Islands at the death of the founder in 1837. The perpetual adoration of the Blessed Sacrament was made day and night in nineteen
houses, while several other houses had also been founded abroad.

In 1871 it was formally approved by Pius VII, in 1825 by Leo XII, and in 1840 by Gregory XVI, under the name of Congregation of the Sacred Hearts of Jesus and Mary. The Congregation, with the Most Holy Sacrament of the Altar, has its special mission to impart the love and the life of Jesus and Mary to the world by its Adoration of the Most Holy Sacrament of the Altar. Its special aim is to honour and imitate the four ages of our Lord: His infancy by the instruction of children, and by the formation of youths for the priesthood; His hidden life by the exercise of the Adoration; His public life by preaching and by missionary work; His Passion and Resurrection by the works of Christian mortification. At the present day the missions confided to the Congregation of the Sacred Hearts comprise three Apostolic Vicariates: the Tahiti Islands, Marquesas Islands, and the Hawaiian Islands, where Father Damien fell a victim to his humble and generous devotion for the poor lepers of Molokai. The Congregation of the Sacred Hearts, which depends directly upon the Propaganda, is governed by a Superior General, who is elected for life. The members make perpetual but simple vows after a probation of eighteen months' novitiate. In 1899 the Congregation was visited by III. of the Most Holy Sacrament of the Altar. The Belgian province, under which England and the United States of America are comprised, has a novitiate and a house of studies at Courtray. The provincial has his residence in the monastery of the Sacred Hearts in Louvain, Mount St. Antoine, Belgium. The provincial is also the Prior of the Cathedral church of Econseal in Staffordshire; in the United States he resides in the monastery of the Sacred Hearts at Fairhaven in Massachusetts.

William de Broeck.

Sacrifice (Lat. sacrificium; Ital. sacrificio; French sacrifice).—This term is identical with the English offering (Latin offerre) and the German Opfer; the latter is derived, not from offerre, but from opera (Old High German opfaran; Middle High German opperu, oppardn), and thus means "to do solemnly, to serve God, to offer sacrifice" (cf. Kluge "Etymologisches Wörterbuch der deutschen Sprache", Strassburg, 1899, p. 288). By sacrifice in the real sense is universally understood the offering of a sense-perceptible gift to the Deity as an outward manifestation of our veneration for Him and with the object of attaining something with Him. Since, however, this offering does not become a sacrifice until a real change has been effected in the visible gift (e.g. by slaying it, shedding its blood, burning it, or pouring it out). As the meaning and importance of sacrifice cannot be established by a priori methods, every admissible theory of sacrifice must shape itself in accordance with the sacrificial systems of the pagan nations, and especially with those of the revealed religions, Judaism and Christianity. Pure Buddhism, Mohammedanism, and Protestantism here call for no attention, as they have no real sacrifice; apart from them and their numerous offshoots, we developed religions, which has not accepted sacrifice as an essential portion of its cult. We shall consider successively: I. Pagan Sacrifice; II. Jewish Sacrifice; III. Christian Sacrifice; IV. Theory of Sacrifice.

I. PAGAN SACRIFICE.—(1) Among the Indians.—The Vedism of the ancient Indians was, to an extent never elsewhere attained, a sacrificial religion connected with the deities Agni and Soma. A Vedic proverb runs: "Sacrifice is the navel of the world." Originally regarded as a feast for the gods, before whom food-offerings (cakes, milk, butter, meat, and the like) placed upon a holy grass before the altar, sacrifice gradually became a magical agency for influencing the gods, such as might be expressed in the formula, "Du ut des," or in the Vedic proverb: "Here is the butter; where are thy gifts?" The Vedic sacrificial prayers express no spirit of humility or submission; even the word "thank" is unknown in the Vedic language. The gods thus sank to the level of mere servants of man, while the high-priests or Brahmins entrusted with the complicated rites grew up as an acquired and mysterious dignity. The hands of the sacrificial ceremonial, developed to the extreme detail, became an irresistible power over the gods. A proverb says: "The sacrificer hunts Indra like game, and holds him fast as the Fowler does the bird; the god is a wheel which the singer understands how to turn." The gods derive their power and might from and power from the sacrifice as the condition of their existence, so that the Brahmins are indispensable for their continued existence.

However, the gods were not entirely indifferent to man, but gave him his assistance, is proved among other things by the serious expiatory character which was not quite eliminated from the Vedic sacrifices. The actual offering of the sacrifices, which was never effected without fire, took place either in the houses or in the open air; temples were unknown. Among the various sacrifices two were conspicuous: the soma offering of three spirits, and a second offering of the soma (Agnistoma)—a neem obtained by the pressing of some plants—took place in the spring; the sacrifice lasted an entire day, and was a universal holiday for the people. The triple pressing of the soma, performed at certain intervals during the day, was connected with the making of cakes, of milk, and the sacrifice of eleven he-goats to various gods. The gods (especially Indra) were eager for the intoxicating soma drink: "As the ox bellows after the rain, so does Indra desire the soma." The sacrifice of the horse (apamēna), executed at the command of the king and participated in by the whole people, required a whole year's preparation.

It was the acme, "the king of the sacrifices", the solemnities lasting three days and being accompanied by all kinds of public amusements. The idea of this sacrifice was to provide the gods of light with another steed for their heavenly yoke. At first, instead of the sacrifice of the horse, human sacrifice seems to have been in vogue, so that here also the idea of substitution found expression. For the later Indians had a saying: "At first the gods indeed accepted men as sacrificial victims. Then the sacrificial efficacy passed from them to the horse; the horse is of course less sacrificial. They accepted the horse, but the sacrificial efficacy went to the steer, sheep, goat, and finally to rice and barley: Thus for the instructed a sacrificial cake made of rice and barley is of the same value as these [five] animals." (cf. Hardy, "Die vedisch-brāhmānische Periode der Religion des alten Indiens," Münster, 1892, p. 150). Modern Hinduism with its numberless sects honours Vishnu and Shiva as chief deities. As a cult it is distinguished from ancient Vedism mainly by its temple service. The Hindu temples are usually artistic and magnificent edifices with towers, chapels, and halls in which representations of gods and idols are exposed. The smaller pagodas serve the same purpose. Although the Hindu religion centres in its idolatry, sacrifice has not been completely evicted from its old place. The symbol of Shiva is the phalas (linga); lingas stones are indeed met throughout India (especially in the holy places) in extraordinary numbers. The darker shades of this superstition, degenerated into fetichism, are somewhat relieved by the piety and elevation of many Hindu hymns or songs of praise (stotras), which surpass even the old Vedic hymns in religious fervor.

(2) Among the Iranians.—The kindred religion of the ancient Iranians centres, especially after its reform by Zoroaster, in the service of the true god Ormuzd (Ahura Mazda), whose will is the right and
whose kingdom is the good. This ethically very elevated religion promotes especially a life of purity, the conscientious fulfillment of liturgical and moral precepts, and the positive renunciation of the Devil and all demonic powers. If the ancient Indian religion was essentially a religion of sacrifice, this religion of the ancient Persians may be described as a religion of observance. Inasmuch as, in the old Avesta (q.v.), the sacred book of the Persians, the first prophecies of Ahuramazda and the Bozorg-Mehr are connected, in which the sacrifice of the god Ahuramazda as the savior of the world is already promised, the sacrifice ends eschatologically with the complete victory of the good god, we may designate the earliest Persionism as Monotheism. However, the theological Dualism taught in the later Avesta, where the wicked anti-god Ahirman is opposed to the good god Ormuzd as the antagonist, is already a pre-arrangement of the idea of a great extent dependent on its oneliness. The horns of the victims were gilded, and on great festivals whole hecatombs were slain; sacrifices of twelve, and especially of three victims (tripods) were the most usual. In times of great affliction human sacrifices were offered on the altars; the body was consumed in a fire and the ashes were thrown into the sacrificial trenches. The sacrificial meal was regarded as a subsidiary offering with most sacrifices, although there were also special offerings of incense. The offerer of sacrifice wore clean clothes and anointed his head, washed his hands and the altar with holy water, and strewn with solemn prayers sacrificial meat over the heads of the victims (pigs, goats, and cocks). Flutes were played while the victim was being slain, and the blood was allowed to drop through holes into the sacrificial trenches. The sacrifices of the sacrificial meal were consumed by the sacrificers and other invited guests. The sacrifice was the centre of the Greek cult, and no meal was partaken of until a libation of the wine about to be consumed was poured out to the gods. Among the characteristic peculiarities of the Greek religion may be mentioned the votive offerings (amphithraeum), which (besides lanterns, tides, votive tablets, and objects of beauty) consisted of chaplets, cauldrons, and the popular tripod göstod). The number of the votive offerings, which were frequently hung up on the sacred oaks, grew in time so immeasurably that various states erected their special treasures at Olympia and Delphi.

(3) Among the Romans.—The Romans, by far the greater extent than among the Greeks was religion and the whole sacrificial system a business of the state among the ancient Romans. Furthermore, no other people of antiquity developed Polytheism to such extremes. Peopling the world with gods, genii, and lures, they placed almost every action and condition under a specially-conceived deity (god or goddess). The calendar prepared by the pontifices gave the Romans detailed information as to how they should conduct themselves with respect to the gods throughout the year. The object of sacrifice was to win the favour of the gods and to ward off their sinister influence. Sacrifices of atonement (piaulis) for perpetrating crimes and past errors were also scheduled. In the earliest times the ancient Indo-Germanic sacrifice of the horse, and also sacrifices of sheep, pigs, and oxen were known. That human sacrifices must have been of rare use may be concluded from the fact that a later period (e.g. from the Aryan gods) into the Tiber and the hanging of woolen puppets at the crossways and on the doors of the houses). Under the empire various foreign cults were introduced, such as the veneration of the Egyptian deities Isis and Osiris, the Syrian Astarte, the Cytherean goddess of Venus, etc. The Roman Polytheion united in peace the most incongruous deities from every land. Finally, however, no cult was so popular as that of the Indo-Iranian Light-god Mithras, to whom especially the soldiers and officials of the empire, even in such distant places as the Danube and the Rhine, offered their sacrifices. In honour of the steer-killing Mithras the so-called taurobolium were introduced from the East; by taurobolium is meant the loathsome ceremony wherein the worshippers of Mithras let the warm blood of a just-slaughtered steer flow over their naked backs as they lay in a trench with the idea of attaining there by not only physical strength, but also mental renewal and regeneration.

(5) Among the Chinese.—The religion of the Chinese, a peculiar mixture of nature and ancestor-worship, is indissolubly connected with the constitution of the state. The oldest Sinism was a perfect religious system. In Davidism, Chinese philosophers associated with the Chinese sacrificial system in the form which was given it by the great reformer, Confucius (sixth century before Christ), and which has been retained practically unaltered after more than two thousand
years. As the “Son of Heaven” and the head of the State religion, the Emperor of China is also the high-priest who alone may offer sacrifice to heaven. The chief sacrifice takes place annually during the night of the prince of the solemnity of the “altar of heaven” in the southern section of Peking. On the highest terrace of this altar stands a wooden table as the symbol of the soul of the god of heaven; there are in addition many other “soul tables” (of the sun, moon, stars, clouds, wind, etc.), including those of the ten immortals of the palace of the emperor. Before every table are set sacrificial offerings of meat, fish, vegetables, etc. To the ancestors of the emperor, as well as to the sun and moon, a slaughtered ox is offered; to the planets and the stars a calf, a sheep, and a pig. Meanwhile, on a pyre to the south-east of the altar, a sacrifice of an ox lies ready to be burned to the highest god of heaven. While the ox is being consumed, the emperor offers to the soul-table of heaven and the tables of his predecessors a staff of incense, silk, and some meat broth. After the performance of these ceremonies, all the articles of sacrifice are brought to special furnaces and there consumed. In the evening the emperor offers the remainder of the sacrifice by burning it on the roof. At the northern wall of Peking, the sacrificial gifts being in this case not burned, but buried. The gods of the soil and of corn, as well as the ancestors of the emperor, have also their special places and days of sacrifice. Throughout the empire the emperor is represented in the sacrifices by his officials. In the classical ritual of “Li-k’i,” it is expressly stated: “The son of heaven sacrifices to the heaven and the earth; the vessels to the gods of the soil and of corn.” Besides the chief sacrifices, there are a number of others of the second or third rank, which are usually performed by state officials. The popular religion, with its innumerable images, which have their special temples, is undisguised idolatry.

Among the Egyptians.—The ancient religion of the Egyptians, with its highly developed priesthood and its equally extensive sacrificial system, marks the transition to the religion of the Semites. The Egyptian temple contained a dark chapel with the image of the deity; before it was a pillared hall, (hypostyle) lightly lit by a small window under the roof, and before this hall a spacious court-yard, enclosed by a circular series of pillars. The ground-plan proves that the temple was not used either for assemblage of the people on great public occasions or as a place of work for the priests, but was intended solely for the preservation of the images of the gods, the treasures, and the sacred vessels. To the sanctuary proper only the priests and the king were admitted. The sacrifices were offered in the great court-yard, where also the important public ceremonies, in which the images of the gods were borne in a ship, took place. The rites of the daily service of the temple, the movements, words, and prayers of the officiating priests, were all regulated down to the smallest detail. The image of the god was entertained daily with food and drink, placed on a throne. At the laying of the foundation-stone of a new temple human sacrifices were offered, being abolished only in the era of the Ramassides; a trace of this repulsive custom survived in later ceremonies of impressing on the sacrificial victim a seal bearing the image of a man in chains with a knife in his throat. To the face of the god of the Egyptians, Amun-Ra, the rulers of the New Empire made such extraordinarily numerous and costly votive offerings that the state became almost bankrupt. The Egyptian religion, which finally developed into abominable bestiality, fell into decay with the destruction of the Serapeum in Alexandria by the Eastern Emperor, Theodosius I (301).

Among the Semites.—Among the Semites the Babylonians and Assyrians deserve first mention. The Babylonian temple contained in the sanctuary the image of the god to whom it was consecrated, and in adjoining chambers or chapels the images of the other gods. The Babylonian priests were a priestly caste, the mediators between the gods and man, the guardians of the sacred literature, and the teachers of the sciences. In Assyria, on the other hand, the king was the high-priest, and offered up sacrifice. According to the Babylonian idea, sacrifice (libations, offerings of foods, bloody sacrifices) is the due tribute of mankind to the gods, and is as old as the world; sap, fruit, and oil, and the smoke of the offerings is for them a fragrant odour; a joyous sacrificial banquet unites the sacrificers with their divine guests. Both burnt and aromatic offerings were common to the Babylonians and the Assyrians. The sacrificial gifts included wild and tame animals, fowl, fish, fruit, curds, honey, and oil. Sacrificial animals were usually of the male sex; they had to be without defects, strong and fat, for only the unblemished is worthy of the gods. Only in the rite of purification were female animals allowed, and only in the lesser ceremonies. The offering of animals on the altar on tables (showbread) was also usual. To the sacrifices was attributed a purifying and atoning force, and the idea of substitution, the sacrificial victim being substituted for man, was clearly expressed. In the Babylonian penitential psalms especially, the sense of consciousness of sin and guilt often finds touching expression. Men were slain only with lamentations for the dead.

The demonstration that the Chanaanites originally came from Arabia (that ancient home of the races) to Palestine, and there disseminated the culture of the ancient Arabsians, is an achievement of modern investigators. While the Babylonian religion was governed by the course of the stars (astrology), the spiritual horizon of the Chanaanites was fixed by the periodic changes of dying and reawakening nature, and thus depended secondarily on the vivifying influence of the stars, especially of the sun and the moon. Wherever the force of nature revealed evidence of life, there the deity had his seat. At fountains and rivers temples arose, because water brings life and drought, death. Feeling themselves nearest to the deity on mountains, hill-worship (mentioned also in the Old Testament) was the most popular among the Semites. The deity stood an altar with an oval opening, and around it was made a channel to carry off the blood of the sacrificial victim. To the cruel god Moloch sacrifices of children were offered—a horrible custom against which the Bible so sternly inveighs. The licentious lust of the Phoenicians is, in the light of the old idea of the deity, which inclined towards gloominess, cruelty, and voluptuousness. We need only mention the worship of Baal and Astarte, Phallism and the sacrifice of chastity, the sacrifice of men and children, which the civilized Romans vainly strove to suppress. In the sacrificial system the Phoenicians had some points in common with the Israelites. The “sacrificial table of Marseilles,” which, like the similar “sacrificial table of Carthage,” was of Phoenician origin, mentions as sacrificial victims steers, calves, stags, sheep, she-goats, lambs, hogs, fawns, and fowl, tame and wild. Sick or emaciated animals were forbidden. The Phoenicians were also acquainted with holocausts (kalil), which were always suppurative sacrifices, and partial offerings, which might be sacrifices of either supplication or thanks. The chief efficacy of the sacrifice of men and animals was regarded as lying in the blood. When the victim was slain, the sacrificers participated in a sacrificial banquet with music and dancing.

Concerning pagan sacrifice in general see CREATION. Zohar. 571.
II. JEWISH SACRIFICE. — (1) In General.—That many general ideas and rites, which are found in pagan religions, find their place also in the Jewish sacrificial system, should excite as little surprise as the fact that revealed religion in general does not reject at all natural religion and nature, but seeks to adopt a higher form. The ethical purity and excellence of the Jewish sacrificial system is at once seen in the circumstance that the detestable human sacrifices are spurned in the official religion of Jehovah (cf. Deut., xii, 31; xvii, 10). Abraham's trial (Gen., xxii, 1 sqq.) ended with the prohibition of the slaying of Isaac; God ordering instead the sacrifice of the ram caught in the briars. Among the Children of Israel human sacrifice meant the profanation of Jehovah's name. (Lev., xxii, 29 sqq.) The prophets also raised their mighty voices against the disgraceful service of Moloch with its sacrifice of children. It is true that the baneful influence of pagan environment won the upper hand from the time of King Ahasu to that of Josiah to such an extent that in the ill-omened Valley of Hinnom near Jerusalem thousands of innocent children were sacrificed to Moloch. To this infectious pagan example, not to the spirit of the religion of Jehovah, is also to be referred the sacrifice which Jehophe, in consequence of his vow, reluctantly performed by slaying his own daughter (2 Kings, xv, 1 sqq.).

II. JEWISH SACRIFICE. — (2) Material of the Sacrifices.—The general name for Jewish sacrifice was originally mincha (מֵנְחָה, דָּקָה, דַּקָּה), after which the term is used for the unbloody food-offering. To the latter was opposed the bloody sacrifice (יְהֹאוֹת, נִיחֹא, זֹכָה, זָכָה). 

According to the method of offering, sacrifices were known as korban (קרבה, קרבון, קרבון), bringing near; orolah (ולהלך, ולך, ולך), ascending; the latter term being used especially of the holocaust (q. v.). The material of the bloody sacrifices must be taken from the personal possessions of the offerer, and must belong to the category of clean animals. Thus, on the one hand, only domestic animals (oxen, sheep, goats) from the stock of the sacrificer were allowed (Lev., xxii, 19 sqq.), and hence neither fish nor wild birds were admitted. Unclean animals (e. g., dogs, pigs, asses, camels) were excluded, even though they were domestic animals. Doves were about the only sort of birds that could be used. The substitution of turtle doves or young pigeons for the larger animals was allowed to the poor
(Lev., v, 7; xii, 8). Concerning the sex, age, and physical condition of the animals there were also exact precepts; as a rule, they had to be free from defect, since only the best were fit for Jahweh (Lev., xxii, 20 sq.). The memorial of the unbloody sacrifice (usually additions to the bloody sacrifice or subsidiary sacrifices) was chosen from either the solid or the liquid articles of human food. The fragrant incense, the symbol of prayer ascending to God, was an exception. The sacrifice of solids (minchah) consisted of fat rind or fat tail, or a callow bird (Lev., ii, 14 sqq.) together with oil and incense (Lev., ii, 14 sqq.), partly of the finest wheaten flour with the same additional gifts (Lev., ii, 1 sqq.), and partly of unleavened bread (Lev., ii, 4 sqq.). Since not only leaven, but also honey produced fermentation in bread, which suggests rot, the use of honey was also forbidden (Lev., ii, 11; cf. 1 Cor., v, 6 sqq.). Only the bread of the first fruits, which was offered on the feast of Pentecost, and the bread added to many sacrifices of praise were leavened, and these might not be brought to the altar, but belonged to the priests (Lev., ii, 4 sqq.; vii, 13 sqq., etc.). On the other hand salt was regarded as of no value as a memorial of the pact or as an agent of consecration (Lev., ii, 34 sqq.). Salt was prescribed as a seasoning for all food-offerings prepared from corn (Lev., ii, 13). Consequently, among the natural productions supplied to the (later) Temple, was a vast quantity of salt, which, as "salt of Sodom" was usually obtained from the Dead Sea, and stored up in the Temple (cf. Josephus, "Antiquitates," XIII, iii, 3). As an integral portion of the food-offering we always find the libation (ד', ליבנה, libamen), which is never offered independently. Oil and wine were the only liquids used (cf. Gen., xxviii, 18; xxxv, 14; Num., xxvii, 7, 14): the oil was used partly in the preparation of the libation, and partly burned with the other gifts on the altar; the wine was poured out before the altar. Libations of milk, such as those of the Arabs and the Phoenicians, do not occur in the Mosaic Law.

The fact that, in addition to the subsidiary sacrifices, unbloody sacrifices were also customary, has been unjustifiably contested by some Protestants in their polemics against the Sacrifice of the Mass, of which the sacrifices of food and drink were the prototypes. Passing over the oldest sacrifices of this kind in the case of Cain and Abel, and of Moses (cf. the books of Numbers and Leviticus), we recognize the following independent sacrifices in the sanctuary: (a) the offering of bread and wine on the showbread table; (b) the incense offering on the altar of incense; (c) the light offering in the burning lamps of the golden candle-stick. And in the outer court: (d) the daily minchah of the high priest, which, like every other priestly minchah, had to be burnt commuted as a holocaust (Lev., vii, 20 sqq. cf. Josephus, "Antiquit.," III, x, 7); (e) the bread of the first fruits on the second day of the Pasch; (f) the bread of the first fruits on the feast of Pentecost. Of the independent unbloody sacrifices, let us mention in particular the libation (אשת, memorials) for Jahweh; the rest belonged to the priests, who consumed it as sacred food in the outer court (Lev., ii, 9 sq.; v, 12 sq.; vi, 16).

(3) The Rites of the Bloody Sacrifice.—The ritual of the bloody sacrifices of special importance for the deeper knowledge of Jewish sacrifice. Despite other differences, five actions were common to all the categories: the bringing forward of the victim, the imposition of hands, the slaying, the sprinkling of the blood, and the burning. The first was the leading of the victim to the altar of burnt sacrifices in the outer court (Ex., xxi, 13). Then followed the sacrifice of the flesh (Ex., xxix, 42; Lev., i, 5; iii, 1; iv, 6). Then followed on the north side of the altar the imposition of hands (or, more accurately, the resting of hands on the head of the victim), by which significant gesture the sacrificer transferred to the victim his personal intention of adoration, thanking, petition, and especially of atonement. If sacrifice was about to be offered for the whole community, there was no further action of the unbloody sacrifices (usually additions to the bloody sacrifice or subsidiary sacrifices) performed in recognition of the imposition of hands (Lev., iv, 15). This ceremony was omitted in the case of certain sacrifices (first fruits, tithes, the paschal lamb, doves) and in the case of bloody sacrifices performed at the instance of pagans. From the times of Alexander the Great the offering of burnt sacrifices even by Gentiles was permitted to recognition of the supremacy of foreign rulers; thus, the Roman Emperor Augustus required a daily burnt offering of two lambs and a steer in the Temple (ch. Philo, "Leg. ad Cai.," § 10; Josephus, "Contra Ap.," II, vi). The withdrawal of this permission at the beginning of the Jewish War was regarded as a public rebellion against the Roman rule (cf. Josephus, "De bello jud.," II, xvii, 2). The ceremony of the imposition of hands was usually preceded by a confession of sins (Lev., xvi, 21; v, 5 sq.; Num., v, 6 sq.), which, according to Rabbinic tradition, was verbal (cf. Lev., xi, 3). The third act or the slaying, which effects as speedy and complete a shedding of the blood as possible by a deep cut into the throat, had also, like the leading forward and the imposition of hands, to be performed by the sacrificer himself (Lev., i, 3 sqq.); only in the case of the offering of the first fruits and the libation was the slaying (Lev., i, 15). In later times, however, the slaying, skinning, and dismemberment of the larger animals were undertaken by the priests and Levites, especially when the whole people were to offer sacrifice for themselves on great festivals (II Pan., xxix, 22 sqq.). The real sacrifice for the blood-sprinkling, the sacrifice of the altar as "the root and principle of the sacrifice." The explanation is given in Lev., xvii, 10 sq. If any man whosoever of the house of Israel, and of the strangers that sojourn among them, eat blood, I will set my face against him, and will cut him off among his people. For the life of the flesh is in the blood: and I have given it to you, that you may make atonement with it upon the altar for your souls, and the blood may be for an expiation of the soul.

The blood of the victim is declared in the clearest terms to be the means of propitiation, and the propitiation itself is associated with the application of the blood on the altar. But the propitiation for the guilt-laden soul is accomplished by the blood only in virtue of the life contained in it, which belongs to the Lord of death and life. Hence the strict prohibition of the "eating" of blood under penalty of being cut off from among the people (Ex., xxii, 26, 27) "because the life of the victim represents or symbolizes the soul or life of man, the idea of substitution finds clear expression in the sprinkling of the blood, just as it has been already expressed in the imposition of hands."
SACRIFICE

But the blood obtained by the slaying exerts its expiatory power first on the altar, where the soul of the victim symbolically laden with sin comes into contact with the purifying and sanctifying power of God. The application of the sprinkling and remission of sin is kippur "to expiate" (קֶּפֶר, Piel from כָּפֵר "to cover"), a verb which is connected rather with the Assyrian kupp̄ur̄ (wipe off, destroy) than with the Arabic "to cover, cover up." The fifth and last act, the burning, was connected with expiating sin as the whole victim (holocaust) or only certain portions of it were to be consumed by fire. By the altar and the "consuming fire" (Deut., iv., 24) Jehovah symbolically appropriated, as through His Divine mouth, the sacrifices offered; this was strikingly manifested in the sacrifices of Gad, Gideon, and Ehud (cf. Lev., ix., 24; Judges, vi., 21; II Kings, xvii., 38).

(4) Different Categories of the Bloody Sacrifices.—

(a) Among the various classes of bloody sacrifice, the burnt offering takes the first place. It is called both the "ascent sacrifice" (םָעָה) and the "holocaust" (םָעָה), in Philo and the Talmud, because the whole victim—with or without the portions designated for the park and the hide—is made through fire to ascend to God in smoke and vapour (see HOLocaust). Although the idea of expiation was not excluded (Lev., i., 4), it retired somewhat into the background, since in the complete destruction of the victim by fire the abolution of man to God was first expressed. The holocaust is indeed the oldest, most frequent, and most widespread sacrifice (cf. Gen., iv., 4; viii., 19; xxii., 2; Gen., xix., 9 sqq.; Lev., xvi., 1 sqq.; Num., xii., 8 sqq.). As the sacrifice of adoration per excellence, it included in itself all other species of sacrifice. (Concerning the altar, see ALTAR (IN SCRIPTURE).)

(b) The idea of expiation received especially forcible expression in the expiatory sacrifices, of which two classes were distinguished, the sin and the guilt-offering. The distinction between these lies in the fact that the former was concerned rather with the absolution of the person from sin (אֶפֶלַט), the latter rather with the making of satisfaction for the injury done (סָבָט). But the guilt-offering (sacrificium pro peccato, παράνομος, chattaath), we find that, according to the Law, not all ethical delinquencies could be expiated by it. Excluded from expiation were all deliberate crimes or "sins with raised hand," which involved a breach of the covenant and drew upon the transgressor as punishment, exclusion from among the people because he had "been rebellious against the Lord" (Num., xv., 30 sqq.). To such sins belonged the omission of circumcision (Gen., xvii., 14), the desecration of the Sabbath (Ex., xxxi., 14), the blasphemy of Jehovah (Lev., xxiv., 10), failure to celebrate the passover (Num., iv., 6 sqq.), the "sacrifice of blood" (Lev., vii., 26 sqq.), working or failure to fast on the Day of Atonement (Lev., xxiii., 21). Expiation availed only for misdeeds committed through ignorance, forgetfulness, or hastiness. The rites were determined not so much by the kind and gravity of the transgressions as by the quality of the persons for whom the sacrifice of expiation was to be offered. Thus, for the fault of the high-priest or the whole people a calf was prescribed (Lev., iv., 3; xvi., 3); for those of the prince of a tribe (Lev., iv., 23), as well as on certain festivals, a he-goat; for those of the ordinary Israelite a lamb, a young bullock, a young he-goat (Lev., iv., 18 sqq.; v, 6); for purification after child-birth and certain other legal uncleannesses, turtle doves or young pigeons (Lev., xi., 6; xv., 14, 29). The last-mentioned might also be used by the poor as the substitute for one of the small cattle (Lev., v., 7; xiv., 22). The very poor, who were unable to offer even doves, might in the case of ordinary transgressions sacrifice the tenth of an ephah of flour, but without oil or incense (Lev., v., 11 sqq.). The manner and the application of the sprinkling according to the various degrees of sin, and consisted, not in the mere sprinkling of the blood, but in rubbing it on the horns of the altar for burnt-offerings or the incense altar, after which the remainder of the blood was poured out at the foot of the altar. Concerning the details of the ceremony, the results of Biblical archaeology should be consulted. The usual and best sacrificial portions of the victims (pieces of fat, kidneys, lobes of the liver) were then burned on the altar of burnt-offerings, and the remainder of the victim eaten by the priests as sacred food in the outer court of the sanctuary (Lev., vi., 18 sqq.). Should any of the blood have been brought into the sanctuary, the flesh had to be brought to the ash-heap and there likewise burned (Lev., iv., 1 sqq.; vi., 24 sqq.).

(c) The third class of bloody sacrifice embraced the "peace offerings" (victimata pacifica, בְּכֻדֵּס וּסְלָבָם, shelamim), which were sub-divided into three classes: the sacrifice of thanks or praise, the sacrifice in fulfillment of a vow, and entirely voluntary offerings. The peace sacrifices in general were distinguished by two characteristics: (i) the remarkable ceremony of "wave" and "heave"; (ii) the communal sacrificial meal held in connexion with them. All animals allowed for sacrifice (even females) might be used and, in the case of entirely voluntary sacrifices, were not quite without defects (Lev., xxii., 23). Until the act of sprinkling the blood the rites were the same as in the burnt-sacrifice, except that the slaying did not necessarily take place at the north side of the altar (Lev., iii., 1 sqq.; vii., 11 sqq.). The usual portions of fat had, as in the case of the sacrifice of expiation, to be burned on the altar. In the cutting up of the victim, however, the breast and the right shoulder (Sept. Σπρόφυλας; Vulg. armus) had to be first separately severed, and the ceremony of "wave" (לֶתֶפֶת) and "heave" (תָּרֵעָה) performed with them. The "heave" or "portion" of the sacrifices was at first to be given to the priests in the holy place (Lev., vii., 1 sqq.).
SACRIFICE

and the poor, were admitted (Deut., xvi, 11; Lev., 19 sq.), and wine was freely drunk at this meal. Whatever remained of a sacrifice of thanksgiving or praise had to be burned on the following day; only in the case of sacrifices vowed entirely or partly to God sacrifices might the remainder be eaten on the second succeeding day, but all that thereafter remained had to be burned on the third day (Lev., vii, 15 sq.; xix, 6 sq.). The idea of the peace-offering centres in the Divine friendship, and the participation in the Divine life, inasmuch as the offerings, as guests and fellow-particiants, participated in a certain manner in the sacrifice to the Lord. But, on account of this Divine friendship, when all three classes of sacrifice were combined, the sacrifice of expiation usually preceded the burnt-offering, and the latter the peace-offering.

In addition to the periodical sacrifices just described, the Mosaic Law recognised other extraordinary sacrifices, which must at least be mentioned. To these belong the sacrifice offered but once on the occasion of the conclusion of the Sinaitic covenant (Ex., xxiv, 4 sqq.), those occurring at the consecration of priests (Ex., xix, 1 sq.; Lev., viii, Num., viii, 5 sq.), and certain occasions, such as the sacrifice of purification of a healed leper (Lev., xiv, 1 sq.), the sacrifice of the red cow (Num., xix, 1 sq.), the sacrifice of jealousy (Num., v, 12 sq.), and the sacrifice of the Nazirite (Num., xii, 1 sq.). One of these extraordinary sacrifices, the peace-sacrifice of the paschal lamb (Ex., xii, 3 sq.; Deut., xvi, 1 sq.) and that of the two he-goats on the Day of Atonement (Lev., xvi, 1 sq.) among this class. With the appearance of the Messiah, the entire Mosaic sacrificial system was, according to the view of the Rabbis, to come to an end, as in fact it did after the destruction of the Temple by Titus (A. D. 70). Concerning the sacrificial persons see Paschal-

hood.

(5) Modern Criticism.—A detailed examination of modern criticism concerning Jewish sacrifice cannot be attempted here, since the discussion involves the whole Pentateuch problem (see PENTATEUCH). What is called the "Graf-Wellhausen hypothesis" denies that the ritual legislation in the Pentateuch comes from Moses. It is claimed that the setting down of the ritual legislation first began in the exilic period. From the time of Moses to the Babylonian Captivity sacrifice was offered freely and without any legal compulsion, and always in connexion with a joyous sacrificial meal. The strict forms of the minutely-prescribed sacrificial rite were first established by the Priest's Code (=P), Divine authority being afterwards claimed for them by artificially projecting them into the Mosaic era. Even during the time of the Great Prophets nothing was known of a Mosaic sacrificial thor or, as proved by their disparaging remarks concerning the worthless- ness of sacrifice (cf. Is., i, 11 sqq.; Jer., vii, 17, 21, Amos, 5, 21 sqq.; Hab., ii, 11 sq.), the Prophets emphasized only the ancient and venerable truth that Jahweh valued most highly the interior sacrifice of obedience, and rejected as worthless purely external acts. He demanded of Cain the right sentiment of sacrifice (cf. Gen., iv, 4 sq.), and proclaimed through Samuel: "Obedience is better than sacrifices" (I Kings, xv, 22). This requirement of ethical dispositions is not equivalent to the rejection of external sacrifice. Nor can one accept the statement that Moses did not legally regulate the Jewish sacrificial system. How otherwise could he have been regarded among the Jews as the "God of the sacrifices," the Prophet, which is inconceivable without Divine service and sacrifice? That during the centuries after Moses the sacrificial cult underwent an internal and external development, which reached its climax in the extent priest's code, is a natural and intelligible assumption, indications of which appear in the Pentateuch itself. In the whole recognition of the existence of the sacrifice, the Prophet Ezechiel shows that Jahweh always stood above the letter of the law, and that he was nowise bound to maintain in unalterable rigidity the olden regulations. But the changes and deviations in Ezechiel are not of such magnitude as to justify the view that even the foundation of the sacrificial code originated with Moses. The further statement that a sacrificial meal was regularly connected with the ancient sacrifices, is an unjustifiable generalisation. For the burnt-offering (holocaustum, 'olah), with which no meal was associated, belonged to the most important sacrifices (cf. Ex., xiii, 4 sq.; Lev., viii, 1 sq.). The sacrifice of an ox was as old as the peace-offering (eshkolam), which always terminated with a meal. Again, it is antecedently at least improbable that the older sacrifices always had, as is asserted, a gay and joyous character, since the need of expiation was not less, but rather the more serious in his eyes, than that of the pagan nations of antiquity. Where there was a consciousness of sin, there must also have been anxiety for expiation.

III. CHRISTIAN SACRIFICE.—Christianity knows but one sacrifice, the sacrifice which was once offered by Christ in a bloody manner on the tree of the Cross. But in order to apply to individual men in sacrificial form through a constant sacrifice the merits of redemption definitively won by the sacrifice of the Cross, the Redeemer created the Holy or Eucharistic Sacrifice of the Mass to be an unbloody continuation and representation of the bloody sacrifice of Calvary. Concerning this eucharistic sacrifice and its relation to the sacrifice on the Cross, see the article MASS. In view of the central position which the sacrifice
SACRIFICE

The dogma of the Sacrifice of the Cross.—The universal conviction of Christianity was expressed in the hymn of Ephesians (v.24) wherein it is declared that the Incarnate Logos "offered Himself to God the Father for us for an odour of sweetness" (in Denzinger-Bannwart, "Enchiridion" n. 122), a dogma explicitly confirmed by the Council of Trent (Sess. XXII. cap. ii; can. ii-iv). The dogma is indeed nothing more than a clear echo of the third article of the Old Testament, if all the sacrifices of the Old Testament, and especially the bloody sacrifices, were so many types of the bloody sacrifice of the Cross (cf. Heb., viii-x), and if the idea of vicarious atonement was present in the Mosaic bloody sacrifices, it follows immediately that the death on the Cross, as the antitype, must possess the character of a vicarious sacrifice of atonement. A striking confirmation of this reasoning is found in the pericope of Isaiah concerning God's "servant," wherein three truths are clearly expressed: (a) the substitution of the innocent Messiah for guilty mankind; (b) the death of the servant through the sufferings of the Messiah; (c) the manner of this suffering and satisfaction through the bloody death on the Cross (cf. Is., iii, 4 sqq.). The Messiahianity of the passage, which was unjustifiably contested by the Socinians and Rationalists, is proved by the memory of the suffering of the Messiah, the blood poured out for many (Matt., viii, 17; Mark, xv, 28; Luke, xxii, 37; Acts, viii, 28 sqq.; 1 Peter, ii, 22 sqq.). The prophecy found its fulfillment in Christ. For, although His whole life was a continuous sacrifice, yet the sacrifice culminated in His bloody death on the Cross, the atonement for our sins and His twelve-thousand "redemption for many" (Matt. xx, 28). Three factors are here emphasized: sacrifice, vicarious, and expiation. The phrase, "to give his life" (δόθησαν τὴν ζωὴν), is, as numerous parallel passages attest, a Biblical expression for sacrifice; the words, "for many" (ἀνέργοις αὐτῶν), express the idea of vicarious sacrifice, while the term, "redemption" (ἀπολύμανσι), declares the object of the expiation (cf. Eph., v, 2; II Cor., v, 21). Rationalism (Socinians, Kitzchel) seeks in vain to deny that St. Paul had this idea of vicarious expiation on the ground that the expression "αὐτῶν αὐτῶν" ( *_~, instead of αὑτῷ αὐτῶν), taken in connexion with the idea of sacrifice current in his writings, bears the pregnant meaning "instead of many," not merely "for the advantage of many." This is clearly indicated by I Tim., ii, 6: "Who gave Himself a redemption for all [αὐτῶν αὐτῶν αὐτωσὶν]."

As in the Old Testament the expiatory power of the sacrifice lay in the blood of the victim, so also the expiation for the forgiveness of sins is ascribed in the New Testament to the Blood of the New Testament (see Mass, SACRIFICE OF THE). There is thus nothing more precious than the Blood of Christ: "you were not redeemed with corruptible things as gold and silver . . . but with the precious blood of Christ, as of a lamb unspotted and unfolded" (I Peter, i, 18 sqq.). While the foregoing considerations refute the assertion of modern "critics" that the expiatory sacrifice of Christ was first introduced by Paul into the Gospel, it is still true that the bloody sacrifice of the Cross occupied the central position in the Pauline preaching. He speaks of the Redeemer as God "who hath made us the abode of his glory" (Rom., viii, 17 sqq.), through faith in his blood (Rom., iii, 25). Referring to the types of the Old Testament, the Epistle to the Hebrews especially elaborates this idea: "For the blood of goats and of oxen, and the ashes of a heifer being sprinkled, sanctify such as are defiled, to the cleansing of the flesh: how much more shall the blood of Christ, who by the Holy Ghost offered himself unto God, cleanse the conscience of sins? (Heb., x, 13 sqq.). With the multiplicity and variety of the efficacy and inadequacy of the Mosaic bloody sacrifices is contrasted the uniqueness and efficacy of the sacrifice of the Cross for the forgiveness of sins (cf. Heb., x, 28: "So also was Christ once [ἀνέστη] offered unto God, and sitteth on the right hand of God") (Heb., x, 12: cf. II Cor., v, 21). The "heavenly sacrifice" of Christ, the existence of which is assumed by Thalhofer, Zill, and Scholz, cannot be deduced from the Epistle to the Hebrews. In heaven Christ no longer sacrifices Himself, but simply, through His "priestly intercession," offers the sacrifice of the Cross (Heb., ix, 25). While the Apostolic Fathers and the apologist Justin Martyr merely repeat the Biblical doctrine of the sacrificial death of Christ, Ireneus was the first of the early Fathers to consider the sacrifice of the Cross from the standpoint of a "vicarious satisfaction" (satisfaction i.e. compensation). This idea, however, did not come into frequent use in ecclesiastical writings during the first ten centuries. Ireneus emphasizes the fact that only a God-Man could wash away the guilt of Adam, that Christ actually redeemed mankind by His Blood and offered "His soul for our souls. and His flesh for our flesh" ("ơυμων χερου", V, i, 1, in P. G. VII, 1121). Though Ireneus bases the redemption primarily on the Incarnation, through which our vitiated nature was restored to its original holiness ("mythical interpretation" of the Greeks), he nevertheless ascribes in a special manner to the bitter Passion of the Saviour the same effects that he ascribes to the Incarnation: viz. the making of man like unto God, the forgiveness of sin, and the annihilation of death (Adv. haer., II, xx, 3; III, xviii, 9). It was not so much "under the influence of the Greco-Oriental mysteries of expiation" (Harnack) as of the Hebrew and the Mosaic sacrificial ritual, that Origen regarded the death on the Cross in the light of the vicarious sacrifice of expiation. But, since he maintained preferentially the Biblical view of the "ransom and redemption," he was the originator of the one-sided "old, patriotic theory of the redemption." Incidentally ("In Matt. vi, 8," in P. G. XIII, 1397 sqq.) he makes the rash statement that the ransom rendered on the Cross was paid to the Devil—a view which Gregory of Nyssa later systematized. This statement was, however, repudiated by Adamantius ("De recta et Dei Filii nostro sacrificiis in Deum sacrificiis," in P. A. XI, 1756 sqq.) as "the height of blasphemy and folly" (προς εκκλησίαν τοῦ βασιλέως, and was positively rejected by Gregory of Nazianzus and John of Damascus. This repulsive theory never became general in the Church, although the idea of the supposed "rights of the Devil" (erroneously derived from John, xi, 31; xiv, 30; II Cor., iv, 4; II Peter, ii, 19) survived among some ecclesiastical writers even to the time of Bede and Peter Lombard. Whatever Origen and Gregory and Gregory of Nyssa say of our ransom from the Evil One, they are both clear in their statements that Christ offers the sacrifice of expiation to the Heavenly Father and not to the Devil: the exemption from the slavery of the Devil is effected by Christ through his sacrifice on the Cross. As, according to Harnack's admission, the idea of vicarious expiation "is frequent among the Latins," we may easily dispense
with the testimony of Latin patristic literature. While the Greek Church adhered to the old mystical conception in connection with the theory of ransom, the doctrine of the Redemption received a further development in the theory of satisfactions” of St. Anselm of Canterbury (“Cui Deus homo” in P. L. CLVIII, 359 sqq.); this was freed of some crudities by St. Thomas Aquinas and deepened by the “ethical theory of reconciliation.” A comprehensive theory, employing dialectically all the Biblical and patristic factors, is still a desideratum in speculative theology.

(2) Theological Problems.—Other difficult questions concerning the sacrifice of the Cross have been already more successfully dealt with by theologians. On account of the remarkable and unique union of priest and victim, the death of Christ was not according to His Divine nature, but through the function of His humanity. For, since the Divine nature was absolutely incapable of suffering, it was no more possible for Christ to act as priest according to His Divine nature; than it was for God the Father or the Holy Ghost. As regards the relation between the priest and the acceptor, it is usually stated in explanation that Christ acts only as sacrificing priest, and that God the Father alone receives the sacrifice. This view is false. Even though God the Father is mentioned as the only acceptor by the Council of Trent (Sess. XXII, cap. 3), this is merely an approximate expression, which may or may not be either the Son nor the Holy Ghost in the matter of acceptance. The acceptor of the sacrifice of the Cross is thus the offended God, or the whole Trinity, to which Christ as a Logos and Son of God also belongs. One must, however, distinguish between the Divinity and the Humanity of Christ and say: while Christ as God, together with the Father and the Holy Ghost, accepted His own sacrifice in expiation of the offended Deity, He offered this same sacrifice as Man vicariously to the Blessed Trinity. While this coincidence of the three functions of priest, victim, and acceptor in the sacrifice of the Cross may constitute a mystery, it yet contains no contradiction (cf. Augustine, “De civ. Dei”, X, xx). A third problem of great importance concerns the nature of the actus sacrificii in the sacrifice of the Cross. Did the sacrificial act consist in the slaying of Christ on the Cross? The question must be answered with a decided negative; otherwise one would have to say that the function of high-priest at the sacrifice of the Cross was exercised, not by Christ, but by His torturers and their myrmidons, the Roman soldiers. In the Mosiac sacrifices also the essence of the sacrifice lay, not in the actual slaying of the victim in the letting, or rather in the sprinkling of the blood. Consequently, the sacrifice of the Cross, at which Christ functions as sole priest, must likewise be referred to the free offering of His blood for us men, inasmuch as the Redeemer, while outwardly submitting to the formidable shedding of His blood by His executioners, simultaneously offered it to God in the spirit of sacrifice (cf. John, x, 17 sq.; Heb. ix, 22; I Peter, i, 2).

IV. THEORY OF SACRIFICE.—In view of the comprehensive historical material which we have gathered both from pagan practice and from the religions Divinely revealed, it is now possible to essay a scientific theory of sacrifice, the chief lines being drawn naturally from the Jewish and Christian sacrificial systems.

Universality of Sacrifice.—One of the specially characteristic features which the history of religions places before us is the wide diffusion, even the universal, of sacrifice among the human race. It is true that Andrew Lang (“The Making of a Religion”, London, 1889) maintains the improbable view that originally the supreme, majestic, and heavenly God was little venerated among certain tribes of Africa and Australia; that even in the Jehovahism of the Israelites the sacrificial cult was rather a degeneration than an ethico-religious advance. In agreement with this (or in accordance with the view which he has put forward) the concept of sacrifice is, however, less one-sided, however, cannot be maintained before the bar of humanity the psychologists of religion. Nothing is psychologically so intelligible as the derivation of sacrifice from the naturally religious heart of man, and the history of all peoples similarly proves that scarcely a single religion has ever existed or exists to-day without some sacrifice. A religion entirely without sacrifice seems almost a psychological impossibility, and is at least unnatural. As the complete world of sacrifice among African and Australian tribes, rather than the numerous sacrifices of Mosaism, that has resulted from degeneration. Had God conceded the bloody sacrifices simply on account of the weakness of the Israelites, as above asserted, He would have promoted, rather than checked, the spread of pagan idolatry, especially if the sacrificial ritual were also taken from pagan religions. Here as elsewhere parallels in other religions prove no borrowing, unless such as is supported by strict historical evidence, and even the actual borrowings may in their new home have been combined with an entirely different interpretation of the substance of paganism into Mosaism is disproved especially by the anti-pagan and unique idea of holiness with which the whole Jewish cult is stamped (cf. Lev., xi, 44), and which shows the sacrificial chorus as one piece. A later editor could
never have imprinted the stamp of holiness on a ritual composed of pagan fragments without the pure paganism peeping through the seams and joining it. The fact is, those who give neither sacrificial thora as truly Mosaic, and see in them the expression not only of human nature, but also of the Divine will. A remarkable exception from the general rule is India, which knows neither sacrifice nor priest; sacrifice is replaced by a strict ritual of prayer, with which religious ablations and almsgiving are associated. Again, while genuine Buddhism rejects sacrifice, this rule was far from obtaining in practice, for Lamaism in Tibet has sacrifices for the dead, and the average Buddhist in Tibet offers unbloody sacrifices to his Buddha. The Hindu offers flowers, oil, food, and incense to his idols, and slays victims to the god Shiva and his spouse. And not even the believing Protestant is without a sacrifice, since, in spite of his rejection of the Mass, he at least recognizes Christ's death on the Cross as the great sacrifice of Christianity.

(2) Species of Sacrifice.—The two chief kinds of sacrifice, the bloody and the unbloody, were suggested to mankind by nature itself, and were thus known in the earliest times. To which of the two hindrances is to be considered, can never be decided. For the greater antiquity of the unbloody sacrifice equally good grounds can be offered as for that of the bloody sacrifice. The earliest historical mentions of sacrifice found in the Bible would make them coeval, for Cain as the husbandman offered the fruits of the field, while his brother Abel as the shepherd offered bloody victims (Gen., iv, 3 sq.). As regards pagan religions, many historians of religion plead for the priority of the unbloody sacrifice. Porphyrius and Theophrastus also expressed the view that the first sacrifices consisted of plants and flowers, which were burned in honor of the Deity. The soma-homa, a drink-offering common to both Indian Vedism and Iranian Parseeism, must be dated back to primeval times, when the Iranians and the Indians still formed one great people. How the Indians came to offer their very ancient horse sacrifice is unknown. It is a more smoker than that prior to the general introduction from a vegetable to a flesh diet, as related by Noe (cf. Gen., ix, 3 sq.), occasioned the rise of animal sacrifices. The rare occurrence of slaying an animal was turned into a festival, which was celebrated with sacrifices. Among the earliest Hebrews we find the ancient Hebrews were “sacrificing flesh,” with which bloody sacrifice was inseparably associated. The introduction of bloody sacrifices among the Iranians is more easily explained, since, especially in Zoroastrianism, it was esteemed a great merit to destroy the harmful animals belonging to the wicked soul Ahriman, and eventually to sacrifice them to the good god Ormuzd. Further than survives, however, we are unable to go. That the unbloody sacrifice was practised among the ancient Greeks, classical archaeologists maintain with good reason, arguing that in Homer the word sauv (Lat. sacrificium) did not mean “to slay” or “to offer a bloody sacrifice” (as it did in post-Homerick Greek), but rather to “offer a smoking sacrifice” (incense). It is not impossible that even the cruel and voluptuous cults of Anterior Asia also offered at first only vegetable sacrifices, since the fundamental idea of the sacrifice to the service of the deceased or the living is expressed most evidently and impressively in the plant world. All this is however purely hypothetical. The observation that human sacrifice once extended over the whole earth, leaves room also for the supposition that the bloody sacrifice in the form of slaughtered men claims chronological priority, the hideous custom being replaced, as civilisation advanced, by the sacrifice of animals. But among many peoples (e. g. the Chanaanites, Phœnicians, and the Egyptian) the possession of a high culture succeeded in abolishing the detestable human sacrifices. But, whatever view may be taken of the priority question, it is undoubted that both the bloody and the unbloody sacrifices reach back to prehistoric times.

Not without its significance for the scientific idea of sacrifice is the fact that the material of the bloody and unbloody sacrifices was regularly taken from things used as food and drink, and indeed from the best of these commodities. This very general circumstance affords evidence that the sacrificial gift must be taken from the finest of the gods, and must be associated, as a means of sustenance, with his physical life. The independent sacrifice of incense alone requires another explanation; this is supplied by the fragrant odour, which symbolises either the sweetness of the ascending offering of prayer or the gracious acceptance of the sacrifice by the Deity. The bloody sacrifice, on account of its symbolic connexion with the life of man, was especially expressive of complete self-oblation to the Divinity. In the crueller views of naive natural man, the ascending odour of the incense worship is soothing, calming, and assuaging. Especially crude was this unworthy materializing of sacrifice in Indian Vedism (the soma drink) and in the Babylonian story of the Flood, where it is said: “The gods suck in the fragrant odour; like flies, the gods gathered over the sacrifice.” Even the Old Testament expression, “a sweet savour for God” (odor suavissimis), was originally an accommodation to the ingenious ideas of the uncultured nomadic people (cf. Gen., vii, 1, Lev., i, 17, etc.), an anthropomorphism which was ever more clearly recognised as such according as the Israelites progressed in their ethical refinement of the idea of God and the greatness or material worth of the sacrificial gifts should be laid, since Jahweh was above necessity, but on the true sentiment of sacrifice, without which, as declared by the Prophets (cf. Is., i, 11 sqq.; Osee, iv, 6; Mal., i, 10), all external sacrifices were not only worthless, but even reprehensible.

(3) Rites of Sacrifice.—While sacrifice itself originates spontaneously in the natural prompting of religious-minded man, the particular rites, dependent on law and custom, display a manifold variety at different times and places. Among the different peoples the ceremonies of sacrifice offer indications of the variegated picture. If we emphasise only that which was general and common to all, the simplest sacrificial rite consists in the mere exposure of the gifts in a holy place, as for example the show-bread (panis propositi) of the Israelites and Babylonians, or the votive offerings (anakarana) of the Greeks. Frequently the idea of entertaining the gods or the dead is evidently associated with the offering of food and drink, e. g. among the Indians, Egyptians, and Greeks. Even in the oldest history of Israel this idea of entertainment, although spiritualized, is perceptible (Judges, vi, 17 sqq.; xiii, 15 sqq.). The true sacrifices in the strict sense were regarded only those in which a real alteration was effected in the sacrificial gift at the time of offering it. By this imputation the gifts were not only withdrawn from all profane usage, but were also completely given over to the service of the Deity and the Deity's gift. With this object in view edibles or sacrificial victims were either completely or partly burned, while libations were poured out as drink offerings. The earliest form seems to have been the whole or burnt-offering (holocaust). While only special portions of the victims (for the most part the best portions) were
burned, the remainder of the flesh was regarded as holy sacrificial food, and was eaten either by the priests or by the offerers in a holy place (or even at home) with the idea of entering into communion. Among some peoples, in the original idea of the sacrificial meal, but rather the sprinkling of the blood, which, as the bearer of life, was clearly intended in many religions to represent man himself. This idea of substitution is seen with overwhelming clearness in the sacrifice of Christ on the Cross. Among all peoples in the sacrifice, as the chief and most perfect function of religion, was surrounded with the greatest pomp and solemnity; the celebration was usually of a light and joyous character, especially in the case of the sacrifices of praise, petition, and thanksgiving. With joyous heart man consecrated himself to the Deity through the medium of the gifts he offered. External adornment, music, song, prayer, and dance heightened the festive joy. On the other hand the expiatory sacrifice was of a serious character, whether it was intended to atone for misdeeds or to avert misfortune. Not every private person was permitted to offer sacrifice; this function pertained only to certain persons or priests, whose office was immediately connected with the sacrifices. In the earliest time the head of the family or tribe performed the functions of priest—in ancient Egypt the king, as even to-day the emperor in China (see H. L. Robinson, "The Religion of the Semites", London, 1894) believe that the origin of animal sacrifices can be traced back to Totemism. When the different clans or divisions of a tribe partook at the communal meal of the sacred animal (totem), which represented their god and ancestors, they believed that by this meal they participated in the divine life of the animal itself. Sacrifice in the sense of offering gifts to the Deity, the symbolic replacing of human life by an animal, the idea of expiation, etc., are declared to belong to a much later period of the history of sacrifice. Originally the gifts of cereals had rather the character of a tribute due to the Deity and the gods, and this tribute was transferred to the animal sacrifices. It is however very questionable whether this totemistic theory, notwithstanding some excellent suggestions, entirely meets the facts. Certainly the social force of religion and its significance in the formation of communities and states does not rest on this theory; but, apart from the fact that Totemism is not, any more than Animism, an explanation of the origin of religion, the hypothesis is contradicted by the certain fact that in the earliest epoch the whole or burnt offering existed side by side with the communal meal, the former being equally old, if not older than the latter. In the consciousness of the peoples the sacrificial meal constituted not so much an element of the sacrifice, as the participation, confirmation, and completion of the same. On the same ground what is called the "banquet theory" of the late Bishop Bellford must also be rejected; this theory refers the essence of the sacrifice to the meal, and declares a sacrifice without a meal impossible (cf. The Ecclesiastical Review, XXXIII, 1905, pp. 1 sqq., 258 sqq.). This theory is not in accordance with the facts; for, as it is compelled to refer the essence of the Sacrifice of the Mass solely to the priest's communion, instead of to the twofold transubstantiation, the truth of the sacrifice experienced by the faithful is maintained only on the forced and false supposition that the Last Supper in its organic connexion with the Crucifixion imprinted on the latter its sacrificial character. (For further particulars, see MASS, SACRIFICE OF.)
SACRIFICE

(c) So far as we may gather from revelation, the most natural and probable view seems to be that sacrifice originated in the positive command of God, since, by the one religion of mankind appears to have been established in advance on a supernatural basis. The Greek legend of the invention of sacrifice by Prometheus and the giant Chiron, together with similar legends of Asiatic religions, might be interpreted as reminiscences of a positive act of sacrifice. The command to sacrifice might even after the Fall have been preserved by tradition among the descendants of Adam, and thus spread among the pagan nations of all lands. The idolatrous deviations from the paradisical idea of sacrifice would thus appear as regrettable errors, which, however, would not be more difficult to explain than the general fall of the human race. But, however plausible and probable this hypothesis may be, it is unprovable, and indeed unnecessary for the explanation of sacrifice. Regarding sacrifice in Paradise the Bible gives us no information; for the explanation of the “eating of the Tree of Life” as a sacramental food offering is a later theologumon which the acuteness of theologians, following Augustine’s lead, has devised. But without recurring to a Divine ordinance, the origin of sacrifice may easily be explained by purely psychological motives. In consideration of the contrasting elements between paganism and Christianity, which was felt more deeply in primitive times than subsequently, the only evidence of sincere inner adoration that the creature could give was by sacrificing some of his own possessions, thus visibly expressing his absolute submission to the Divine Majesty. Nor was it less in keeping with the inner prompting of man to declare his gratitude to God by gifts offered in return for benefits received, and to give through the medium of sacrificial presents expression to his petitions for new favours. Finally, the sinner might hope to free himself of the oppressive consciousness of guilt, when in the spirit of contrition he had to the best of his ability repaired the wrong done to the Divinity. The more childlike and ingenuous the conception of God formed by primitive man, the more natural and easy was for him the introduction of sacrifice. A truly good child offers little gifts to his parents, though he does not know what they mean; the same is true in the Divine service, thus seems to offer the best explanation of the origin of sacrifice.

(5) Object of Sacrifice.—As its “metaphysical form”, the object first gives sacrifice its full spiritual content, and quickens the external rites with a living soul. Three pagan religions stand out in the idea that sacrifice is intended to give symbolic expression to man’s complete surrender of himself into the hands of the Supreme God in order to obtain communion with Him. In the recognition of the absolute supremacy of God lies the juridical, and in the correlated absolute submission to God the ethical side of sacrifice. In both moments the latrunitic character of the sacrifice stands out clearly, since to God alone, as the First Cause (CAUSA PRIMA) and the Last End (FINIS ULTIMUS) of all things, may sacrifice be offered. Even the idolatrous sacrifices of pagans did not entirely lose sight of this fundamental idea, since they esteemed their idols as gods. Even sacrifices of thanksgiving and petition never exclude this essential latrunitic feature, since they concern thanksgivings and petitions to the ever-adorable Divinity. From our sinful condition arises the fourth object of sacrifice, i.e., the appeasing of the Divine anger. The fourthfold object of sacrifice supplies an immediate explanation of the four kinds of sacrifice (cf. St. Thomas, I-II, Q. cii, a. 3). With the sentiments of sacrifice incorporated in these objects is closely connected the high importance of prayer, which accompanies the rite of sacrifice in all the higher religions; Grimm thus simply declares: “Sacrifice is only a prayer offered with gifts.” Where we are to seek the culminating point of the sacrificial act (actio sacrosancti), in which we should especially express, is the most freely debated question, and concerning it the theorists are not in agreement. While some see the culmination of the sacrifice in the real alteration (immutatio), and especially in the destruction of the gift, others refer the essence of the sacrificial act to the symbolic act of putting the offering upon the altar, and after it has been subjected to any change whatsoever; a third, but not very numerous party make the sacrificial meal the chief element. This last view has already been set aside as untenable. That the meal is not essential is likewise shown by numerous sacrifices, with which no meal is associated (e.g., the purification burnt-sacrifice, and the sacrifice of the Cross). Again, the importance of the blood, which as a means of nourishment was avoided, spurned by, and even forbidden to the Jews, finds no expression in the banquet-theory. That the destruction of the gift (especially the slaying) cannot constitute the essence of the sacrifice is clear from the fact that the sprinkling of the blood (AERSIUS SACRANII) was regarded as the culmination, and the killing as only the preparation for the real sacrificial act. In fact the “destruction theory”, settled in Catholic theology since the time of Thomas Aquinas and Beaton, harmonizes neither with the historical pagan conception of sacrifice nor with the essence of the sacrifice of Christ on the Cross, nor finally with the fundamental ideas of the Mosaic cult. The destruction is at most the material, and the oblation the formal element of the sacrifice. Consequently, the idea of sacrifice lies in the self-surrender of man to God, not with the object of humanistic self-destruction, but of final transformation, glorification, and deification. Wherever a man is associated with the sacrifice, this signifies merely the confirmation and certification of the communion with God, already existing or reassembled by expiation. We may thus define sacrifice as the external obligation to God by an authorized minister of a sense-perceptible object, either through its destruction or at least its real transformation, in acknowledgement of God’s supreme dominion and for the appeasing of His wrath. In so far as this definition refers to the sacrifice of the Mass, see Mass and Sacrifice.
SACRILEGE

J. Porler

Sacrileg (Lat. sacriregium, robbing a temple, from sacer, sacred, and isere, to purloin) is in general the violation of the sacred or anything belonging to the worship of God. It is a less proper sense any transgression against the virtue of religion would be a sacrilege. Theologians are substantially agreed in regarding as sacred that and that only which by a public rite and by Divine or ecclesiastical institution has been dedicated to the worship of God. The point is that the public authority must intervene; private initiatives, no matter how ardent in devotion or praiseworthy in motive, does not suffice. Attributing a sacred character to a thing is a juridical act, and as such is a function of the governing power of the Church. It is customary to enumerate kinds of sacrilege from personal, local, and real. St. Thomas teaches (Summa, II-II, Q. 200, xix) that a different sort of holiness attaches to persons, places, and things. Hence the irreverence offered to any one of them is specifically distinct from that which is exhibited to the others. Suares (De Religione, tr. III, 1-9) does not seem to think the division very logical, but accepts it as being in accord with the canons. Personal sacrilege means to deal so irreparably with a sacred person that, whether by the injury inflicted or the defilement caused, there is a breach of the honour due to such person. This sacrilege may be committed chiefly in three ways: (a) by laying violent hands on the person; (b) the real sacriligeum consists in an infraction of what is known as the privilege of the canons (privilegium canoniæ), and is visited with the penalty of excommunication; (c) by violating the ecclesiastical immunity in so far as it still exists. Clerics according to the old-time discipline were entitled to exemption from the jurisdiction of lay tribunals (privilegium fori). The meaning, therefore, is that he who despite this haled them before a civil court, otherwise than as provided by the canons, was guilty of sacrilege and was excommunicated; (c) by any sin against the vow of chastity on the part of the recipient of the sacrament of a sacred order (in the Latin Church) and religious, even those with simple vows, if these are perpetual. The weight of opinion amongst moralists is that this guilt is not contracted by the violation of a privately-made vow. The reason seems to be that, while there is a breach of faith with Almighty God, still such a vow, lacking the indorsement and acceptance of the Church, does not make the person formally a sacred one; it does not in the juridical sense set such an one apart for the worship of God. It need hardly be noted that the partners of sacred persons in sins of this kind are to be adjudged equally guilty of sacrilege even though their status be a purely lay one.

Local sacrilege is the violation of a sacred place. Under the designation "sacred place" is included not only a church properly so-called, even though it be not consecrated, but merely blessed, but also public oratories as well as cemeteries canonically established for the burial of the faithful. These are ordinarily distinguished: (1) the theft of something found in and especially belonging to the church; (2) the infringing of the immunity attaching to sacred places in so far as this prerogative still prevails. It should be observed that in this case the term "sacred place" bears a wider meaning than the expression indicated above. It comprises not only churches, public chapels, and cemeteries, but also the episcopal palace, monasteries, hospitals erected by episcopal authority and having a chapel for the celebration of the Holy Sacrifice, and also the person of the priest when he is carrying the Blessed Sacrament. To all of these was granted the right of asylum, the outring of which was deemed a sacrilege; (3) the commissum within the sacred precincts of some sinful act by which, according to canon law, the edifice is esteemed polluted. These acts are homicide, any shedding of blood reaching to the guilt of a grievous sin, any consummated offence against chastity (including marital intercourse which is not necessary), the reflection of any unclean object within the sacred precincts of an unbaptized person or of one who has been excommunicated by name or as a notorious violator of the privilege of the canon; (4) the doing of certain things (whether sins or not), which, either by their own nature or by special provision of law, are particularly incompatible with the demeanour to be maintained in such a place. Such would be for instance turning the church into a stable or a market, using it as a banquet hall, or holding court there indiscriminately for the settlement of purely secular affairs. Real sacrilege is the irreverent treatment of sacred things as distinguished from person and property. This may happen from all by the administration or reception of the sacraments (or in the case of the Holy Eucharist by celebration) in the state of mortal sin, as also by advertently doing any of those things invalidly. Indeed deliberate and notable irreverence towards the Holy Eucharist is reputed the worst of all sacrileges. Likewise conscious maltreatment of sacred pictures or relics or perversion of Holy Scripture or sacred vessels to unhallowed uses, and finally, the usurpation or diverting of property (whether movable or immovable) intended for the maintenance of the clergy or serving for the ornamentation of the church to other uses, constitutes real sacrilege. In some cases of sacrilege may be incurred by omitting what is required for the proper administration of the sacraments or celebration of the sacrifice, as for example, if one were to say Mass without the sacred vestments.

Joseph F. Delany

Sacræs Solemnitates, the opening words of the hymn for Matins of Corpus Christi (q.v.) and of the Pontifical Office of the Most Blessed Sacrament, composed by St. Thomas Aquinas. The rhythmic stanza imitates the classical measures found in Horace and in several hymns of the Roman Breviary (see Sancctorum Mertit); but for whatever excellence the hymn lacks in respect of classical prosody it compensates in the interesting and intricate rhyme scheme. This may be illustrated by breaking up the stanza of four lines into seven. The sixth stanza, which is sometimes employed as a separate hymn at Benediction, will serve to illustrate:

Panis angelicus
Fit panis hominum:
Dat, panis, domino:
Figuris terminum:
O res mirabilis!

Manucat Dominum
Pauper, servus, et humilis.

The octave (i.e. the coincidence of the end of a word with the end of a foot) is perfect throughout all the stanzas. With what rhythm should the hymn be recited? Translators vary much in their conception of an appropriate English equivalent. The first words suggest by the tonic accent English dactylics:

Lit: the Angelic Bread
For the soul of men:
Figures and types are fed
Never to come again,

XIII.-21
Sacrist, an officer who is charged with the care of the sacristy, the church, and their contents. In ancient times many duties of the sacristan were performed by the doorkeepers (ostiarii), later by the manuelarii and the treasurers. The Decretals of Gregory IX (lib. I, tit. xxvi, "De officio sacristae") speak of the sacristan's office attached to a certain benefice, and say that his duty was to care for the sacred vessels, vestments, lights, etc. Nowadays the sacristan is elected or appointed. The "Ceremoniale episcoporum" prescribes that in cathedral and collegiate churches the sacristan should be a priest, and describes his duties in regard to the sacristy, the Blessed Eucharist, the baptismal font, the holy oils, the sacred relics, the decoration of the church for the different seasons and feasts, the preparation of what is necessary for the various ceremonies, the presguration in pontifical Mass, the ringing of the church bells, the preservation of order in the church, and the distribution of Masses; and finally it suggests that one or two canons be appointed each year to supervise the work of the sacristan and his assistants.

The under-sacristan (custos) is also mentioned in the Decretals (lib. I, tit. xxvii, "De officio custodis"). He was the assistant of the sacristan, subject to the archdeacon, and discharged duties very similar to those of the sacristan. Now the office is hardly ever attached to a benefice, but is usually a salaried position. The Council of Trent desired that, according to the old canons, clerics should hold such offices; but in most churches on account of the difficulty or impossibility of obtaining clerics, laymen perform many of the duties of the sacristan and under-sacristan.

Ceremoniale episcoporum, I (Ratisbon, 1902), vi. J. F. Googen.

Altar Societies.—There are altar societies in connexion with most parish churches. The duties of members vary according to circumstances, in some instances including those of the sacristan in the sacristan's province, such as the vestments and altar vessels, making ready for the priest's Mass, and so on, but as a general thing they consist of the payment of yearly dues into a fund for the maintenance and repair of the accessories used in the ceremonies of the Church and usually also of a certain amount of labor for this purpose. Altar societies differ from tabernacle societies in that their work is for the benefit of the church to which they are attached. (See TABERNACLE SOCIETIES.)

The SociETY of St. John Berchmans, known as the Pius Association of Servers of Mass and Sacristans, was founded by Vincent Basile, S.J., missionary Apostolic among the southern Slavs, for lay acolytes, choir boys, sacristans, and all who have any duty to perform in the services of the Church. Its object is to induce all its members to perform their duties piously and in a manner befitting the ceremonies in which they participate, for the glory of God and the edification of the faithful. The rules compiled by Father Basile bind the members to absolute silence in church, devout genuflexion when passing before the Blessed Sacrament, and the clear pronunciation of the words of the liturgic prayers. The clothing of the laity is expected to characterize their conduct even in the sacristy, and they are required to attend a monthly meeting and to receive Holy Communion at least once a month. The director should be either the pastor or a priest appointed by him. Although it is not a confraternity properly so-called, it has been approved by the Pope, Pius IX, 21 Sept., 1865, and indulgences were accorded to its members, subject to the usual conditions.

Blanche M. Kelly.

Sacristy (L. sacrarium, vestry), a room in the church or attached thereto, where the vestments, church furnishings and the like, sacred vessels, and other treasures are kept, and where the clergy meet.
and vest for the various ecclesiastical functions. It corresponds to the secretarius or diаконος of old. At present the most universal practice is to have the sacristy directly behind the main altar or at either side. The sacristy should contain cases, properly labelled, for the various vestments in all the liturgical colors; a crucifix or other suitable image in a prominent position to which the clergy bow before going to the sanctuary and on returning (Ius celebrandi missam, II, 1; a lavatory, where the officiating clergy may wash their hands (op. cit., I, i); a copy of the Decree of Urban VIII prohibiting certain offices and masses (S. R. C., 460 ad 6; 555 § Et ne); a book containing the obligations of the Church regarding foundations and their fulfillment (Innocent XI, Nuper § 26, 21 Dec., 1690). It is customary to have a holy water font, and a bell to admonish the congregation of the advent of the clergy, at the door leading to the sanctuary. The sacristy is not blessed or consecrated together with the church, and consequently is not a sacred place in the canonical sense. However, except where penalties are concerned, it enjoys on the whole the same prerogatives as the church. When a sacristy directly behind the sanctuary has two entrances, the clergy enter the sanctuary at the gospel side, and leave by the epistle side (S. R. C., 3029 ad 12). A double sacristy is sometimes forced upon the clergy, one for the altar boys. Canons too usually have their own sacristy. In cathedrals, where there is no special chapel for this purpose, there should be a separate sacristy (secretarium) with an altar, where the bishop may assist at Terce and prepare for pontifical Mass (Ceremon. Episcoporum, I, 137; II, 74; see SACRISTAN).)

ANDREW B. MEEHAN.

Sadducees.—A politico-religious sect of the Jews during the late post-Exilic and New Testament period. The older derivation of the name from ἱδατιγμα, i.e. the righteous; with assumed reference to the adherence of the Sadducees to the letter of the Law as opposed to the pharisaic attention to the superadded traditions of the elders, is now generally rejected, mainly on philological grounds. The term is associated with the proper name Sadow, Sadducee being equivalent to Sadokite. They became the dominant priestly party during the Greek and Roman period of Jewish history, and the name, whether bestowed seriously or in irony, originated doubtless to be the descent of Sadow, the high-priest prominent in the times of David and Solomon (III Kings, i, 8, 26, 32; ii, 35; I Par., xix, 22; cf. Ezech., xl, 46; xliii, 19; etc.). As a prominent political party they first appear in the reign of John Hyrcanus (135—105 b. c.). They espoused the hellenizing tendencies of the Asmanean princes in which they were strongly opposed by the Pharisees (q. v.), or Separatists, a party evolved from the earlier Asseadians, and which abhorred all forms of Greek culture as detrimental to the religious interests of the Jewish nation. Under Aristobulus I and Alexander Janneus, the immediate successors of John Hyrcanus, the power of the Sadducees was supreme, and though the opposing faction of the Pharisees came into favour during the regency of Alexandra Salome (78—69 b. c.), the Sadducees regained their ascendancy under Aristobulus II (69—63 b. c.) whom they supported in his conflict with Hyrcanus, the authority of her sons. When Pompey captured Jerusalem (63 b. c.) he executed many of their leaders, as did also Herod the Idumean on his accession to power (37 b. c.). The Sadducees retained, however, their traditional priestly functions and also a varying preponderance in the Sanhedrin, but even in this respect their influence was much diminished through the policy of Herod and later of the Roman procurators of Judea, who, arbitrarily and mainly for political reasons, appointed and removed the high-priests at will.

During this period and down to the destruction of Jerusalem the Sadducees were naturally unpopular with the masses because of their marked tendency to side closely with the ruling power, while the patriotic and exclusive Pharisees became more and more the leaders of the people. Among the religious differences between the two parties may be mentioned the denial on the part of the Sadducees of the resurrection, the immortality of the soul, and the existence of angels (Matt., xxii, 32; Mark, xii, 18; Acts, xxii, 9). They rejected likewise the oracles of the Prophets with the Pharisees maintained and emphasized as a Divinely ordained supplement to the written law. While the tenacity and exclusiveness and other characteristics of the Pharisees have been indubitably impressed on all subsequent generations of Judaism, the influence of the indifferent and materialistic Sadducees vanished completely as soon as the Jews ceased to be a nation.

JAMES F. DRISCOLL.

Sadler, Thomas Vincent Faustus, b. 1604; d. at Dieulwald, Flanders, 19 Jan., 1680-1. He was received into the Church at the age of seventeen by his uncle, Dom Walter Sadler, and joined the Benedictines at Dieulwald, being professed in 1622. Little is known of his missionary labours, but probably he was chaplain to the Shelbys of Weston and the Tchbornes in Hampshire before going to London, where he worked many years. He edited several spiritual books, often combined with Sermons, and, like Cotton, and signing himself T. V. His chief publications are "The Christian Pilgrim in his Spiritual Conflict and Conquest" (1653); "Jesus, Maria, Joseph" (1657); "The Daily Exercise of the Devout Rosarists" (1657), which was afterwards developed into a well-known prayer book, "The Daily Exercise of the Devout Christian"; "A Guide to Heaven", translated from Bonas's "Manuductio" (1672); "The Holy Desires of Death", translated from Lallemand's "Voyage" (1678). Wood attributes him to "The Child's Catechism" (1678). WYLLIE, Chronological Notes on the English Benedictines Congregation (London, 1881); Snod, Necrology of the English Congregation O. S. B. (London, 1883); Wood, Athenae Oxonienses, ed. LUMB (London, 1813-1820); O'Dowd, Life of St. Patrick (Dublin, 1857); GILLOW in Bibli. Dict. Ecc. Cath.; Cooper in Dict. Nat. Brit.

EDWIN BURTON.

Sadler, Mary Anne Madden, authoress, b. at Cooteshill, Co. Cavan, Ireland, 30 Dec., 1820; d. at Montreal, Canada, 8 April, 1903. Her father, Francis Madden, a merchant of fine tastes, encouraged her literary aspirations, and her first efforts were printed in a London magazine, while she was still a girl. After the death of her father she emigrated to Montreal (1844). Here, two years later, she became the wife of James Sadler, member of the firm, and manager of the Montreal branch of the New York publishing house D. & J. Sadler & Co. During the fourteen years that followed she continued to live in Montreal, and did most of the literary work that made her name famous. The family then moved to New York, where her husband died nine years later. The Sadlers owned a weekly paper ("The Tablet"), and in it the author's stories appeared. She contributed regularly also to its editorial columns. Her stories and translations number more than sixty volumes, and in their day enjoyed a well-deserved popularity among the rapidly-growing Irish-American community, on whose character, in its constructive period,
they exerted a powerful influence. Many of them, admirably wrought out in simplicity of style and the naturalness of the characters, were written for a special purpose. The "Blessed and Glorious" dealt with the school question; "Bessy Conway" with the trials of the Irish immigrant girl; "Aunts of Honor" and "Keepsake" with the saving of the destitute Catholic children of New York for whom the great protectorate was then founded. Irish history also supplied her with a constant source of inspiration which resulted in "The Red Hand of Ulster," "The Confederate Chiefs," "Maureen Dhu," "Life in Galway," "MacCarthy More," "The Old House by the Boyne" and other tales. She translated Orsini's "Life of the Blessed Virgin," and de Ligny's "Christ" and other works, and compiled a "Catechism of Sacred History." After her husband's death Mrs. Sadlier remained several years in New York, and then returned to Canada, where she spent the remainder of her days.

MARY ANNE MADDEN SADLIER

Sadoleto, Jacopo, cardinal, humanist, and reformer, b. at Modena, 1477; d. at Rome, 1547. His father, a distinguished lawyer, intended him for his own profession; but Jacopo devoted himself to classical and philosophical studies. At Rome he enjoyed the favour of Cardinal Caraffa, and afterwards of Leo X, who made him his secretary. In 1517 he was appointed Bishop of Campitelli near Avignon. Unlike many of the humanists, he was a man of blameless life and attentive to all his duties as a priest and bishop. It was only at the express command of the successive popes whom he served that he would consent to absent himself even for a short time from his diocese. In him were combined in an eminent degree the qualities of a man of piety, a man of letters, and a man of action. As poet, orator, theologian, and philosopher he was in the foremost rank of his time. His poem on the recently discovered Locaecon first brought him to the notice of the learned world. His mild and gentle character, shunning all extremes, and his profound learning fitted him for the difficult task of conciliating the Protestants. Indeed, his commentary on the Epistle to the Romans was considered to favour them too much, and the publication of it was forbidden at Rome until it had undergone correction. He would have nothing to do with persecuting the heretics. In 1526 he managed to persuade Paul III to be a member of a special commission for the reform of the Church. In the following December he received the cardinal's hat, at the same time as Caraffa (afterwards Paul IV) and Pole, also members of the commission. With Cardinal Contarini (q.v.), he drew up the famous "Consilium de emendanda Ecclesia," which they presented to the pope. Sadoleto was sent as legate to Francis I to bring about a reconciliation between him and Charles V (1542), but his mission failed. After 1543, when a card-ador was appointed to govern Carpentras, he was constantly at the side of Paul III, ever urging the pontiff in the path of peace and reform. Sadoleto's works were published at Verona in four volumes (1737–8), and at Rome (1759).

It is only by perusing this named work of the eminent historian that one can estimate the influence in the counter-Reformation can be estimated.

THOMAS F. MEEHAN

Sagalesus, a titular see in Pisidia, suffragan of Antioch. Sagalesus was one of the chief towns of Pisidia, near the north-west boundary of that province, in a fertile plain surrounded by hills, situated on the banks of an affluent of the Castrus, a river which is represented on its coins. Alexander stormed it, after defeating its inhabitants in the neighbourhood. Cneius Manlius ravaged the district and made it pay a heavy war indemnity. After being subject to Amyntas, Tetrarch of Lycaonia and Galatia, it became part of the Roman province of Pisidia. Nothing else is known of its history, though it is mentioned by most of the ancient geographers; it is to be noted that Strabo (XII, 569) places it less accurately in Issauria, and Ptolemy (V, iii, 6) locates it erroneously in Lycia. Until the thirteenth century the "Notitiae episcopatuum" mention it as the first suffragan see of Antioch in Pisidia. Le Quien (Oriens christianus, I, 401) mentions four of its bishops: Jovinus, present at the Council of Constantinople, 381; Frontianus, at Chaledon, 451; Theodosius, at Nicaea, 787; Leo, at Constantinople, 869. This formerly wealthy and fortified city is now a poor village, called Aghlasoun by the Turks, about twenty-three miles south of Iskenderun, in the vilayet of Iskenderun, with about one hundred inhabitants. It has immense ruined monuments, all older than the second century A.D.; a theatre, vast portico, gymnasium, ramparts, tombs, sarcophagi, churches, etc.

SAGARD, THEODAT-GABRIEL, Recollect lay brother, missionary, and historian, b. in France at the end of the sixteenth century; d. towards the close of the seventeenth. In 1623, with Nicolas Viel, the future martyr, he was sent to Canada on the Huron mission. Anne of Austria, the consort of Louis XIII, had provided them with a sum for a time. On his way to the Hurons, he acquired from Joseph Le Caron, his superior, the first rudiments of their difficult tongue, so that on reaching his post he began to catechise and baptise the Indians. He shared in the incredible hardships of his companions. The process of his martyrdom is recorded, and he is said to have recourse to the juice of the wild grape (Visis Canadensis). In one year's residence he won the affection of his nephews and acquired a certain ascendancy.
over them. When appointed, in the spring of 1624, to descend to Quebec for provisions, he was allowed by the Indians to depart on the express condition that he would return. A letter of his superior, ordering him back to France, thwarted his most ardent desire. He presented a memoir concerning the state of religion to the Duc de Montmorency, Viceroys of New France, inveighing against the agents of the trading companies toward the natives; but this was rejected by the missionaries. He corrected his superiors of the necessity of introducing a more powerful and influential religious order to cope with the difficult situation. The Jesuits having been suggested, the choice of them was ratified by Cardinal Richelieu in 1625. In 1630, he issued a history of Canada under the title: "Histoire du Canada et voyages que les Frères Mineurs Récollets ont fait pour la conversion des indiennes". It is a clear and simple account of all he saw or heard mentioned in this new land. Charlevoix criticises his Huron vocabulary as inaccurate compared with later studies of the language, but gives him credit for his good judgment and zeal for the conversion of souls and the progress of the colony.

LIONEL LINDSAY.

Sahagún, Bernardino de, missionary and Aztec archæologist. b. at Sahagún, Kingdom of León, Spain, in or before the year 1500; d. at Mexico, 23 Oct., 1590. He studied at the convent of Salamanca, where he took the vows of the order, and in 1529 was sent out to Mexico, being one of the earliest missionaries assigned to that country, where he laboured until his death more than sixty years later. He was assigned to the college of Santa Cruz in Tlaltecolco, near the City of Mexico, and took up the work of preaching, conversion, and the instruction of the native youth in Spanish and Latin, science, music, and religion, while by close study and years of daily practice he himself acquired such mastery of the Aztec language as has never since been attained by any other student. Although several times filling administrative positions, he preferred to devote his attention exclusively to the work of instruction and investigation. His zeal and pre-eminent ability in respect to the Indian language and religion attracted the attention of his superior, who directed him to compile in the Aztec language a compendium of all things relating to the native history and custom that might be useful in the labours of converting the Indians. The work thus undertaken occupied some seven years, in collaboration with the best native authorities, and was expanded into a history and description of the Aztec people and civilisation in twelve manuscript books, together with a grammar (Arte) and dictionary of the language.

Various delays enabled the author to continue revisions and additions for several years. One of these delays hinged upon the question of the hiring of clerical assistance as inconsistent with the Franciscan vow of poverty, although Father Sahagún, by reason of age and the trembling of his hand, was then unable to write himself. After five years of waiting it was decided in favour of the author, who was given the help he needed, and the complete Aztec manuscript, with the grammar and dictionary, was finished in 1569. In the meantime a preliminary manuscript document referred to Sahagún, known to Ovando, president of the Council of the Indies, on whose request the Franciscan delegate-general directed Father Sahagún to make a complete Spanish translation, furnishing all necessary assistance. On account of the fear of encouraging the educated natives to dwell upon their heathen past—a very real danger at the time—and on account also of the author's strictures upon the methods of the Conquistadores, it was not published, but was committed in manuscript, being sent from one to another of the college of the order, until finally carried to Spain and deposited in the convent of Tolosa, where it was found, and a copy made, by the archivist Muñoz shortly before 1800. It was published under the title Histoire general de la Nouvelle Espagne, in three volumes at Mexico in 1829, and in volumes five and seven of Kingsborough's "Mexican Antiquities", London, 1831.

Father Sahagún thus describes the inception of the work: "I was commanded in all holy obedience by my chief prelate to write in the Mexican language that which appeared to me to be useful in the Christian Instruction, and in order to bring them to the knowledge of the true Christian religion, to give them a true and clear idea of the doctrine of Christ, i.e., the knowledge of the Church, the Word, the Sacraments, the duties of a Christian, and the end of Christian life, and to instruct them in the Christian moral precepts, as also in the principles of the Christian religion, such as charity, faith, hope, love, and the rest. And thus the work was begun in the pueblo of Tepeopulco... I got together all the principal men, together with the lord of the place, who was called Don Diego de Mendoza, of great distinction and ability, well-experienced in religious matters, military matters, and those relating to idolatry. They being together, I set before them what I proposed to do, and prayed them to appoint me able and experienced persons with whom I might converse and come to an understanding on such questions as I might propose. They answered me that they would talk the matter over and give their answer on another day; and with this they took their departure. So on another day the lord and his principal men came and having conferred together, with great solemnity, as they were accustomed at that time to do, they chose out ten or twelve of the principal old men, and told me that with these I might communicate and that these would instruct me in any matters I should inquire of. Of these there were as many as four instructed in Latin, to whom I, some few years before, had myself taught grammar in the college of Santa Cruz in Tlaltecolco. With these appointed principal men and myself, I undertook the work of instruction in grammar, I talked many days during about two years, following the order of the minute I had already made out. On all the subjects on which we conferred they gave me pictures—which were the writings anciently in use among them—and then the grammarians interpreted to me in their language, writing the interpretation at the foot of the picture."

Besides the "Historia", the "Arte" and the "Diccionario" (the last in Aztec, Spanish, and Latin), he was the author of a number of lesser works, mostly religious and in the Aztec language, among which may be noted a volume of sermons, an explanation of the Epistles and Gospels of the Mass; a history of the coming of the first Franciscans to Mexico, in two volumes; a Christian psalmody in Aztec, for the use of the neophytes in church (Mexico, 1583–84), and a catechism in the same language. He died at the age of ninety years, sixty-one of which had been devoted to missionary labour and research. At his funeral, which was attended by all the religious and students of the city, the Indians also attended, shedding tears. In Sahagún we have the ideal missionary priest and scholar. As a young man he was noted for his beauty and grace and from the first was given to prayer and self-restraint. His religious companions affirmed that he went into frequent ecstasies. He was most exact in the duties of his order, never missing Masses, even in his old age. Always and to all persons he was gentle, humble, and courteous. In over sixty years as college professor
he rested not for a day "teaching civilisation and good customs, reading, writing, grammar, music, and other things in the service of God and the state". In addition to his unequalled charity of the Mexican language, it was said of him that he excelled in all the sciences.

JAMES MOONEY.

Sahak the Great. See Isaac of Armenia.

Sahaptin Indians, a prominent tribe formerly holding a considerable territory in Western Idaho and adjacent portions of Oregon and Washington, including the lower Snake River, with its tributaries the Saltese, Gunsand, and Goshute Creeks. They are of the Sahaptin linguistic stock, which belong also to the Palouse, Umatillas, Tenino (Warm Springs), Yakimas, and others farther to the west for whom they maintained close friendly relations, while frequently at variance with the Salishan tribes on their northern border—the Flatheads, Cœur d'Alène and Spokane—and in chronic warfare with the Blackfeet, Crow, and Shoshoni on the east and south. They can be described as living simply; they were not warlike. The name Sahaptin or Saptin comes through the Salishan tribes. By Lewis and Clark (1805) they were called Chopunnaash, possibly another form of Saptin. Their popular and official name of Nez Perce, "Pierced Noose", originally bestowed by the French trappers, refers to a form of wearing a double tassel nose through a hole bored in the septum of the nose. When first known (1805) they numbered, according to the most reliable estimates, probably over 6000, but have greatly decreased since the advent of the whites, and are still steadily on the decline. Contributing causes are incessant wars with the more powerful Blackfeet in earlier years; a wasting fever, and measles epidemic (1847) from contact with immigrants; smallpox and other diseases following the occupation of the country by miners after 1860; losses in the war of 1877 and subsequent removals; and wholesale spread of consumption due to their changed course of living under civilized conditions. In 1842 they were officially estimated at 3000; in 1862 they were reported at 2800; in 1893 the census showed 2035; in 1910 they were officially reported at 1530, including all mixed bloods, all upon the Fort Lapwai (allotted) reservation in northern Idaho, excepting the remnant of one band numbering only 97, upon the Colville reservation in north-eastern Washington. Of their numerous former bands, this one, formerly centred in Wallowa (or Wallewah) valley, Oregon, was perhaps the most important, numbering originally about 500. In their primitive condition the Nez Percé, although large and warlike, were without agriculture, depending on hunting, fishing, and the gathering of wild roots and berries. Their permanent houses were communal structures, sometimes circular, but more often oblong, about twenty feet in width and sixty to ninety feet in length, with framework of poles covered by rush mats, with roof sunk below the ground level, and earth banked up around the sides, and with an open space along the centre of the roof, for the escape of the smoke. On the inside were ranged fires along the centre at a distance of ten or twelve feet apart, each fire serving two families on opposite sides of the house, which have been variously adapted and sometimes separated by mat curtains. One house might thus shelter more than one hundred persons. Lewis and Clark mention one large enough to accommodate nearly fifty families. On temporary expeditions they used the ordinary buffalo-skin tipi or brush shelter. They had also sweat-houses and menstrual lodges. The permanent sweat-house was a shallow subterranean excavation, roofed with poles and earth and bedded with grass, in which the young and the diseased passed the winter season, and occasionally sweated themselves by means of steam produced by pouring water upon hot stones placed in the centre. The temporary sweat-house used by both sexes was a framework of willow rods, covered with blankets, with the heated stones placed inside. In the months of July and August, the exclusion of women during the menstrual period and for a short period before and after childbirth, was a subterranean structure, considerably larger than the sweat-house, and entered by means of a ladder from above. The occupants thus secluded cooked their meals alone and were not allowed even to touch the articles used by outsiders. Furniture consisted chiefly of bed platforms, baskets and bags woven of rushes or grass, wooden mortars for pounding roots and spoons of horn. The women had also her digging stick for gathering roots; the man his bow, lance, shield, and fishing equipment. The Nez Perce bow of mountain- sheep horn backed with sinew was the finest in the West. The ordinary dress was of skins, with the addition of a felshaped hat and for the women a protective skin helmet for the warrior. Aside from fish and game, chiefly salmon and deer, their principal foods were the roots of the camas (Camassia quamash) and lilies (Lilium columbianum), etc., the first being roasted in pits by a peculiar process, while the other was ground in mortars and molded into cakes for future use. The gathering and preparing devolved upon the women. Marriage occurred at about the age of fourteen and was accompanied by feasting and giving of presents. Polygamy was general, but kinship prohibition was enforced even to the third degree. Inheritance was in the male line. The standard of morality, both before and after marriage seems to have been consciously high" (Spinden). Intemperance was in the ground, the personal belongings of the deceased being deposited with the body, and the house torn down or removed to another spot. The new house was ceremonially purified and the ghost exorcised, and the mourning period was terminated with a funeral feast. Sickness and death, especially of children, were frequently ascribed to the work of animism, witchcraft, and social status. The religion was marked by the absence of elaborate myth or ritual. The principal religious event in the life of the boy or girl was the dream vigil, when, after solitary fasting for several days, the fevered child had vision of the spirit animal which was to be his or her tutelary through life. Ceremonies were the great social event of the year. The principal ceremonial was the dance to the tutelary spirit, next to which in importance was the scalp dance. The clan system was unknown. Chiefs were elective rather than hereditary, governing by assistance of the council, and there was no supreme tribal chief. They were considerably under the influence of the so-called "Dreamer religion" of the upper Columbia tribes, but had no part in the latter "ghost dance". Previous to the visit of the American explorers, Lewis and Clark (1805), the Nez Percé had had no direct acquaintance with white men, although aware of their presence beyond the mountains and on the Pacific coast. They already had horses from the South. A few years later trading posts were established in the upper Columbia region, and from the Catholic Canadian and Iroquois employees of the Hudson's Bay Company traders they first learned of Christianity and as early as 1820 both they and the Callicutt missions used many of the Catholic forms. Of the Nez Percé it has been said: "They seemed to realize the paucity of their religious traditions and from the first eagerly seconded the efforts of the missionaries to instruct them in the Christian faith." As a result of urgent appeals from the Flathead In-
The establishment of the Oregon trail through the country of the Nez Perce and allied tribes led (1849) to the epidemic disease, but which they were entirely unable to check. In 1853 the Cayuse, who held the responsible Dr. Whitman, in charge of the Presbyterian missionary in their tribe, attacked and destroyed the mission, murdering Whitman and his wife and eleven others. The Catholic Bishop Brouillet, who was on his way at the time to confer with Whitman for the purchase of the mission property, was not molested, but was allowed to bury the dead and then found opportunity to warn Spaulding in time for him to reach safety. In consequence of these troubles all the Presbyterian missionaries in the Columbia region were discontinued but the work was resumed in later years and a considerable proportion of the Nez Perce were brought into the region for the first time.

In 1855 they sold by treaty a large part of their territory. In the general outbreak of 1855–6, sometimes designated as the Yakima war, the Nez Perce, almost alone, remained friendly. In the year 1858, in consequence of the discovery of gold, another treaty was negotiated by which they surrendered all except the Lapwai reservation. Joseph, whose band held the Wallowa valley in North-Eastern Oregon, refused to be a party to the treaty, and his refusal led to the memorable Nez Perce war (1877). After successfully holding in check for some months the troops under the command of a large force of Indian scouts, Joseph conducted a masterly retreat for over a thousand miles across the mountains, but was finally intercepted by General Miles when within a short distance of the Canadian frontier. Despite the promise that he should be returned to his own country, Joseph and the remnant of his band were deported to Oklahoma, where they wasted away so rapidly that in 1885 the few who survived were transferred, not to Lapwai, but to the Colville reservation in Washington. Throughout the entire retreat no outrage was committed by Joseph's warriors. In 1872 the Cowlitz took the place of the Nez Perce at Lapwai.

In 1873 the White Fathers established themselves at Biskra, Ouargla, Tougarg, and Gerryville. Later a station was founded at Melili in Msab. Two successive attempts were made by the White Fathers to reach the Sudan by crossing the Sahara, thus reaching Timbuktu, a large market for black slaves, there to join in the struggle against slavery. The first attempt was made in December, 1875, by Fathers Menoret, Paulmier, and Bouchaud; they were slain in April, 1876, by their Touarag guides, being the first martyrs of the Society of the White Fathers, and the cause of their beatification was introduced at Rome in 1909. After this disaster the White Fathers founded two stations, not farther north in the desert, but to the north-east, at Tripoli and Ghadames. The massacre of the explorer Flat ters and his companions (1880–81) did not discourage the White Fathers in their second attempt to cross the Sahara. In 1881 Father Richard set out from Ghadames, having become so Arabic in speech and bearing that no one suspected his nationality. He intended to establish himself with Fathers Morat and Pouplard at Ghat in the midst of the desert, but all three were assassinated.

The White Fathers then left Ghadames. On 25 March, 1890, while the Brussels conference against slavery was being held, Mgr Lavivier wrote in a letter to Keller that he eradicate in Africa the great corporation of the Senoussi, which protected the slave-trade, the Sahara must be crossed, and he announced the opening of Biskra, at the entrance to the Sahara, of a house which he called the House of God, intended for the formation of the "Brothers of the Sahara", or "Pioneers of the Sahara", who would be engaged in charitable works and in extending hospitals to travellers, the native, and the Pioneers of the Sahara had to live as religious, but without monastic vows. As early as February, 1891, the station at Ouargla, suppressed in 1876, was re-
established, and in October Father Harquard sent thither six armed "pioneers" who wrote to the cardinal: "We shall endeavour to hold high the banner of the Sacred Heart and the flag of France." The White Sisters founded hospitals at Ghardsia and El Tibdi Sidi Cheikh, thus gaining the confidence of people in the region, in which the French Apostolic Prefecture was welcomed. In 1908, which succeeded in crossing the desert as far as Lake Tchad, opened wider avenues to the Catholic apostolate. The Prefecture Apostolic of the Sahara and the Sudan became a vicariate apostolic on 6 March, 1891, and in 1901 received new foundations, from which the Prefecture Apostolic of Ghardsia was separated from it. The twentieth degree of latitude forms the boundary between them. The vicariate governs 1000 European Catholics, 600 negro Catholics, 4000 catechumens, 40 missionaries, 15 sisters, 35 catechists; it has 12 churches or chapels, 10 schools, 7 orphanages, 3 leper-houses, 2 hospitals. The population of the Sahara is estimated at 4,000,000.

Sailer, Johann Michael, professor of theology and Bishop of Ratisbon, b. at Aresing in Upper Bavaria, 17 Dec. 1803. In 1825 he was ordained, and in 1828 Bishop of Ratisbon. Sailer was the son of a poor shoemaker. Until his tenth year he attended the primary school in his native place; after this he was a pupil in the gymnasium at Munich. In 1770 he entered the Society of Jesus at Landsberg in Upper Bavaria as a novice; upon the suppression of the society in 1782 he continued his theological and philosophical studies at Ingolstadt. In 1775 he was ordained priest; 1777-80 he was a tutor of philosophy and theology, and from 1780 second professor of dogmatics at Ingolstadt. Along with many others, he lost his position in 1781 when the Elector Charles Theodore transformed theological instruction to the monasteries. In the years 1781-84 while engaged in literary work he attracted the attention of the elector and Bishop Clement Wenceslaus. In 1794 the latter called Sailer to Dillingen as professor of pastoral theology and ethics, a position which Sailer held for ten years and which brought him a high reputation. His opponents, professors of Dillingen, and Rösle, the principal of the school at Pfaffenhauzen, succeeded in limiting Sailer's activities in 1793 and in securing his sudden dismissal in 1794. Sailer then went to visit his friend Winkelhofer at Munich, and pursued there by his opponents, went to the house of his friend Beck at Ebersberg. Here he devoted himself to literary work until, in 1799, he was called to a professorship at Ingolstadt. In 1800 he was transferred along with the university to Landshut. Here he taught pastoral and moral theology, pedagogics, homiletics, liturgy, and catechetics; celebrated as a preacher and a writer he was mostly called to other positions, was on terms of friendship with distinguished Catholics and Protestants, and was universally revered by his pupils, among whom was the Crown Prince Louis, later King of Bavaria. In 1818 Sailer declined the offer of the Prussian Government to send him as archbishop of Cologne. In 1819, the Bavarian Government, through the influence of the Crown Prince Louis, nominated him as Bishop of Augsburg, but the nomination was rejected by Rome. In 1821, however, after he had sufficiently justified himself, he was appointed cathedral provost, and in 1829 Bishop of Ratisbon.

The age in which Sailer lived was dominated by the "Enlightenment", which in its radical form disputed the fundamental dogmas of Christianity, and was characterized by externalism, contempt for Christian mysticism, worldliness of the clergy, degradation of the pulpit by the treatment of secular topics, relaxation of ecclesiastical discipline, denial of the primacy of reason, as well as of the State to gain control of the Church, turbulent reforms within the Church, and a one-sided training of the mind in education. In opposition to these destructive tendencies Sailer came to the defence of faith in Christ and in the fundamental principles of Christianity, and the primacy of reason, as well as of Christianity, for a faith that should manifest itself in charity, for the maintenance of godliness (Christian mysticism), and for the training of a pious and intelligent clergy. He also insisted that the pulpit should be reserved solely for the preaching of the Gospel, and that the bishops should be in union with the pope; he upheld the primacy of the papal jurisdiction, and defended the freedom and rights of the Church against the encroachments of the State. Ecclesiastical reform he ardently desired, not, however, through unauthorized agencies but by the same organs of the Church; and he insisted that education should aim at training both mind and will. Sailer laboured for the Christian ideal by his winning personality, by his utterances as teacher, parish priest, and preacher, and by his numerous works that were philosophical, theological, devotional, and biographical in character.

Thus Sailer brought back large numbers of people to Christianity and the Church. Notwithstanding his fruitful activity and his benevolence, Sailer had antagonists who opposed him partly from jealousy, partly from misunderstanding and ill-will; he was accused of heresy, indifference, mysticism and infidelity. If Sailer is judged in connection with his times, these reproaches are without foundation. In his day Sailer was a pillar of the Church. A perfectly correct judgment of Sailer has been expressed by Goyau in "L'Allemagne religieuse" (Paris, 1865): With Sailer German piety, both Protestant and Catholic, learned again to pray. This is the peculiar characteristic of his activity. Do not expect from him any religious polemics; he abhorred them; what he really cherished was the idea of a sort of cooperation of the various Christian bodies against the negations of infidelity. Sailer made a breach in Rationalism, and he was exposed to the reproaches of the various Christian bodies; he could not "be unchristian" (pp. 294, 295). The best edition of his works is "J. M. Sailer's sämtliche Werke unter Anleitung des Verfassers", ed. Joseph Widmer, 40 vols., Sulzbach, 1830-41; supplementary volume, 1845.

R. STRUDEL.

Saintes, Claude de, French controversialist, b. at Perche, 1525; d. at Crévecoeur, 1591. At the age of fifteen he joined the Canons Regular of Saint-Chéron, at Paris, where he was sent to the College of France. He afterwards received the degree of Doctor of Theology (1555). On account of the erudition of his early works and the aptitude which he showed for controversy, he was
called to the Conference of Poissy held in 1561 between the Catholics and the Huguenots, at which Theodosie of Bessa and Father Laines, general of the Jesuits, were sent through the Council of Trent to represent, with Simon Vigor, the University of Paris. Upon his return he acquired a notable reputation by his sermons and his discussions with Protestants. He published a work against their spoliation of Catholic churches and a vigorous declamation against the inexcusable severity of Bessa; the latter replied and drew upon himself a new attack from Claude de Saintes. At the same time he charged the King of France by his treatise on "L'ancien naturel des Francs" never to tolerate heretics and against these latter he defended the dogmas of the Church by an exhaustive treatise on the Eucharist. Through the patronage of the Cardinal of Lorraine, he was appointed to the Bishopric of Evreux (1575). He was very zealous in his efforts to convert Protestants. He assisted at the provincial Council of Rouen (1581) and published its records in French. When the League became active he took sides with it and worked to gain partisans; but the royal troops took possession of Evreux and the bishop was forced to flee. Unfortunately for him there were found among his papers writings in which he approved of the murder of Henry III and maintained that one could be allowed to kill a sovereign. Arrested and arraigned before the Parlement of Caen, he was condemned to death as guilty of high treason. At the request of the Cardinal of Bourbon and of several bishops, Henry IV commuted his sentence to life imprisonment, and he was confined in the château of Crévecoeur where he died two months later. His works were published, some in Latin and others in French. The more important are: "Liturge sieve missae SS. Patrum Jacobi, Basili J. Chrysoostomi" (Greek-Latin, Paris, 1560); "Discours sur le saccagement des églises catholiques par les hérétiques anciens et nouveaux calvinistes" (Paris, 1569); "Traité de l'ancien naturel des Francs en la religion chrétienne" (Paris, 1567); "Déclaration d'anciens théâmes de la doctrine de Calvin et de Béze contre les premiers fondements de la chrétienté" (Paris, 1567); "De rebus Eucharistiae controversiae libri X" (Paris, 1575).

ANTOINE DEGERT

Saint Albans, Abbey of, in Hertfordshire, England, founded about 799 by Offa, king of the Mercians. Bypassed by the VVills, it was chosen by the bishops of Old Sarum as the church of the eastern diocese, writing at the beginning of the eighth century, speaks of a church, existing at that date, of wonderful workmanship and worthy of the martyrdom it commemorated. Offa's monastery seems to have been attached to this church, which he repaired, having personally obtained the papal approval for his foundation. Willegod, a relation of the king, was made abbot. By the year 1000 the old church was evidently in a dilapidated state again and Ealdred and Eadmer, the eighth and ninth abbots, collected materials to build a new church from the ruins of the Roman city of Verulam. The actual building was only begun in 1057, when Abbot Paul of Caen, a relative of Archbishop Lanfranc, undertook the work with such energy that the whole church was completed in eleven years; a large part of this church still remains. The abbey increased in wealth and importance; Adrian IV exempted it from episcopal jurisdiction and gave it precedence over all other English abbeys. In the Wars of the Roses St. Albans suffered much, and the unsettled state of the country involved the abbey in a long series of lawsuits by which it was much impoverished. In 1521 Cardinal Wolsey became abbot in commendam, the only instance of this practice known in England. On disgrace in 1529 Robert Catton, prior of Norwich, was elected abbot, but was deprived in 1538 to make room for a nominee of Henry VIII, Robert Boreman, by whom the abbey was surrendered to the king in the following year. The list of abbots may be found in Dugdale. Matthew Paris is probably the most famous monk of the foundation, which is notorious for refusing to accept Nicholas Breakespere, afterwards Adrian IV, when he begged for admission as a novice. The church of St. Albans was used as a fortress at the dissolution of the abbey, and in 1553 was purchased from the Crown for £400 by the mayor and burgesses of the town, to be used as a parish church. Of the church built by Paul of Caen most of the nave, transepts, and presbytery still exist, but portions fell and were rebuilt in the style of the thirteenth and fourteenth centuries. The eastern part of the presbytery with the Lady chapel beyond it also belong to the latter periods. In the second half of the nineteenth century the late Lord Grimthorpe undertook to restore the building at his own expense. In spite of all remonstrance he did this in such a way that "to grimthorpe" has now become an active verb signifying the uninitiated mutilation of an ancient building under the cloak of restoration. The church is 550 feet long, and 190 wide across the transepts, the central tower being 144 feet high. It contains a famous reredos of the late fifteenth century, the reconstructed base of St. Alban's shrine, and several fine chantries and monuments. Of the conventual buildings only the gatehouse now remains.

G. ROGER HULDESTON

SAINT ALBERT, Dioecese of (SANCTI ALBERTI).—The immense territories, known to-day as the Provinces of Manitoba, Saskatchewan, and Alberta, formed till 1871 only one diocese under the name of St. Boniface. On 22 Sept., 1871, St. Boniface having been elevated to the rank of archdiocese, the new Diocese of St. Albert was canonically erected and Right Rev. Vital J. Grandin, O.M.I. (consecrated 30 Nov., 1859, Bishop of Sault and appointed coadjutor of the Bishop of St. Boniface), was transferred to the new see. The first Bishop of St. Albert died on 3 June, 1902, after a long episcopate of nearly forty-five years, and half a century of missionary life. He was succeeded by Right Rev. Emile J. Legal, O.M.I. (consecrated Bishop of Poug, 17 June, 1907, and coadjutor of St. Albert, 3 June, 1902). This diocese, even after having been subdivided in 1891 to form the Vicariate Apostolic of Saskatchewan, comprises the southern half of Province of Alberta and the western part of Saskatchewan, an area of some 150,000 square miles. It is bounded on the east
by the 110th degree of longitude; on the west by the Rocky Mountains; on the south by the United States; and on the north by the 55th degree of latitude. At the time of its erection, the total population of the diocese was from 4000 to 5000 half-breeds, 10,000 to 12,000 Indians belonging to half a dozen tribes, and a few hundred white people, employees of the Hudson Bay Company. The evangelization of these was then entrusted to twelve Oblates of Mary Immaculate.

Five missions had been established, hundreds of miles apart. The first cathedral was a log-house and the bishop’s palace a small frame building. Three schools and two orphan asylums were in charge of Sisters. The whole Catholic population numbered scarcely 10,000.

Though cut off from all means of communication with the civilized world, receiving but a yearly mail, deprived not only of all comfort, but even of the necessaries of life, obliged to travel long distances, camping outside for weeks and even months consecutively, in cold of 30 to 40 degrees, to spread the knowledge of divine Faith and establish here and there new centres of missions, the first two bishops of St. Albert and their missionaries never despairing or lost faith in the future of their work. After several years of hardship, they grew in number. In 1874-75, the Canadian Government having established a few posts of mounted police in the diocese, new settlements were founded. Reservations for the Indians were established; churches, schools, and missions built. At the same time a considerable number of half-breeds from Manitoba settled in the eastern part of the diocese, where they soon formed new parishes or missions. In 1883-84 the opening of the Canadian Pacific Railway brought colonies of immigrants, and soon the work of the missions was much increased. In 1890 the Diocese of St. Albert was divided and the Vicariate Apostolic of Saskatchewan created, which in 1911 was erected as a diocese. Since 1890 the development of the missionary work has been wonderful. An appeal was made in 1891 to the secular clergy to come and help the Oblates of Mary Immaculate who could no longer attend alone to so many stations, missions, and parishes, already erected or urgently needed. Several secular priests, and later several religious orders came to help in the work of education and evangelization. The Catholic population of the diocese is now 55,000, of which about 15,000 are Greek Catholics. They are attended by 1 bishop; 98 regular priests; 20 secular priests; and 12 other prelates. There are: churches with resident priests, 50; missions, 55; stations, 98; communities of men, 9; of women, 15; boarding schools, 14; 1 industrial school for Indians; boarding schools for Indians, 8; primary schools, 60; hospitals, 11; homes, 2; orphan asylums, 20. The great majority of the Greek Catholics have been converted to the Catholic Faith, and the Blackfeet have of late manifested better dispositions. French, English, German, and Polish-speaking Catholics have parishes or missions of their own. Thousands of Galicians of the Greek Catholic Rite have started three flourishing missions attended by Basilian Fathers of the same rite. A community of nuns, belonging also to the Greek Catholic Church, has been founded to take charge of their schools and charitable institutions.

The Diocese of St. Albert, after many years of almost insurmountable obstacles and difficulties, has become one of the most promising of Western Canada. It is connected by the transcontinental lines of the Canadian Pacific, the Grand Trunk Pacific and Canadian Northern Railways, and towns and villages spring up almost every ten miles. Immigrants come daily from all parts of the civilized world. Among them a fair proportion of Catholics take possession of the soil, settle on their homesteads, and new fields of missionary labour are incessantly opened to the seal of the secular and regular clergy of St. Albert.

**Saint Andrews and Edinburgh (S. Andrews et Edinburgensis), Archdiocese of.—The exact date of the foundation of the See of St. Andrews is, like that of the other ancient dioceses of the British Church, difficult, if not impossible, to fix. That there were bishops in the country now called Scotland, and exercising jurisdiction in the district where the city of St. Andrews afterwards arose, as early as the eighth or ninth century, is practically certain. The earliest bishop of which we have any record was Alexander, who was consecrated at the Synod of Scone in 687, to which see we shall return more fully. The early history of the diocese is, however, dark. It was not until the reign of King Malcolm III (1034-58) that notes of the appointments of bishops appear. The death of Bishop Fothard of Dumfries (1062) marks the close of the first period of the history of the see, of which scanty records and still scantier material traces remain. The English influence on Scottish national life, both ecclesiastical and civil, which followed the marriage of St. Margaret, great-niece of Edward the Confessor, to the King of Scots in 1060, had as one of its results the nomination of Turgot (Margaret’s former confessor) to the See of St. Andrews. He was succeeded by Eadmer, a Benedictine monk of Canterbury; and Eadmer by Robert, a canon regular of St. Augustine, who founded at St. Andrews in 1144 the cathedral priory for canons of his own order. It was his successor Arnold who began, at the eastern end, the construction of the magnificent cathedral, the building of which occupied more than a century and a half. Meanwhile the bishops of St. Andrews, although they claimed and exercised (as their Celtic predecessors had done) the right of presiding at all assemblies of the Scottish clergy, had never been formally granted the ecclesiastical primacy: indeed in 1225 their position was seriously affected by a Bull of Honorius III, enjoining that future synods were to be presided over by one of the bishops, styled the Conservator, to be elected by his own clergy. The archbishops, who thus became deprived the bishops of St. Andrews of their quasi-primalatial jurisdiction, remained in force until the subsequent erection of the see into an archbishopric.

It was William Lambertson, the twenty-third bishop of the diocese, who had the honour of seeing the cathedral completed and consecrated in the presence of King Robert Bruce on 5 July, 1318. The building was 355 feet in length, and consisted of a nave of twelve bays with aisles, north and south transept, each of three bays, with eastern aisles, choir of five bays with aisles, and presbytery. Sixty years after the consecration it was partly destroyed by fire, but was completely restored before 1440. Bishop Lambertson built the beautiful chapter-house, which still exists, though roofless. Among Lambertson’s most eminent successors were Henry Wardlaw, who founded the University of St. Andrews in 1411, James Kennedy, founder of St. Salvador’s College, and Patrick Grant, the last bishop of the See of St. Andrews. He was able to successfully resist the claims of the Bishop of Edinburgh and the Presbytery of the city of Aberdeen. At the union of the Church of Scotland with the Church of England, the See of St. Andrews became a diocese of the Scottish Church, and was the seat of the bishop of Edinburgh. It was not until 1644, however, that the See of St. Andrews was united with the See of Edinburgh, and the bishop of Edinburgh was made the ordinary of the diocese. The See of St. Andrews was united with the See of Edinburgh in 1644, and the bishop of Edinburgh was made the ordinary of the diocese.
bishops, and its cathedral into the metropolitan church for the whole of Scotland. Twelve sees were assigned to St. Andrews as its suffragans, those of Glasgow, Dunkeld, Aberdeen, Moray, Brechin, Dunblane, Ross, Caithness, Orkney, Argyll, the Isles, and Galloway. The last-named bishopric had hitherto been subject to York, while those of Orkney, Argyll, and the Isles had continued to form part of the province of Trondhjem in Norway. Pope Six
tus announced the new creation in letters addressed to James III and to the Scottish bishops, and he also conferred on the primatial office of Apostolic nuncio. The new metropolitan see, however, pres-erved its unique position for barely twenty years. The kingdom was in a deplorable state, and was once again in the hands of the English. The acceleration in demand, through the increasing number of people, led to a need for more ecclesiastical buildings. Archbishop Hamilton (q.v.) was hanged at Stirling (in his pontifical vestments) on 5 April, 1571; and though the few remaining members of his cathedral chapter were consigned to the flames, and the See of St. Andrews remained vacant for two years, the church was restored during the administration of Leo XIII. For nearly a century and a half the scattered Catholic parishes were under the jurisdiction of the English bishops, and the See of St. Andrews was not restored until the reign of James V. The See of St. Andrews was restored by Leo XIII. The Catholic Diocese of St. Andrews and Edinburgh, as defined in the Apostolic Constitution “Ex Supremo Apostolatus Apice” of 4 March, 1878, comprises the counties of Edinburgh, Berwick, Fife (southern part), Linlithgow, Peebles, Roxburgh, Selkirk, and (practically) Stirlingshire. The entire population of this portion of Scotland, according to the latest census, amounts to nearly 870,000, and the number of Catholics is estimated at 63,000, or about seven per cent of the whole. The number of churches, chapels, and stations at the beginning of 1911 was 87, and of missions 51, served by 69 priests, including 77 secular priests, eight Jesuits, and four Oblates of Mary Immaculate. The last-named order has one house in the diocese, and the Society of Jesus two. The religious orders of women in the diocese comprise Ursulines of the Incarnation (whose convent, founded in Edinburgh in 1835, was the first established in Scotland since the Reformation); Sisters of Mercy (two houses); Little Sisters of the Poor; and of the Immaculate Conception; Sisters of Charity of St. Vincent of Paul (four houses); Sisters of the Sacred Hearts of Jesus and Mary; Poor Clares; Helpers of the Holy Souls; Religious of Marie Ré
eratrices; Sisters of Charity of St. Paul (two houses); Sisters of the Holy Cross, Dominicanae; and Sisters of Nazare
tes. The Catholic institutions are, as a children’s refuge, industrial school and boys’ orphanage, orphanage for girls, House of Mercy for servants, home for working boys, Sacred Heart Home for penitents, dispensary and home for respectable girls, convales
cement home, and St. Vincent’s Home for destitute children. The number of congregational day-schools is fifty, and the average attendance of children at them between 10,000 and 11,000. The great majority of the Catholi
cs of the diocese (certainly over 90 per cent) are of Irish origin and parentage; of the remainder many are Italians (chiefly from Naples), Poles, and Lithuanians, the latter en
gaged for the most part as miners. The large numbers of Poles tend to become absorbed in the na
tive population, usually discarding their Polish names. The material progress in the diocese, in the way of church building, has been noteworthy in recent years. In 1859 there was one church in the capital city; by 1911 there were eight; and churches have recently been built in different parts of the diocese of considerable architectural merit, several of them being the finest ecclesiastical edifices in their respective towns. The arch
episcopal residence is in Edinburgh, where is also the cathedral of the diocese. The See of St. Andrews was wrecked by the Protestant mob (Knox’s “rascal multitude”) in 1559; and though efforts were made by the Protestant Archbishop Spottiswoode and others to restore it, it became a total ruin. Nothing now remains of it but the south wall of the nave, a fragment of the beautiful west front, the eastern gable with its flanking turrets, portions of the transept and some of the pier bases. The present archbishop is the Most Rev. James A. Smith, b. in Edinburgh, 1841, ordained in Rome, 1866, and consecrated Bishop of Dunkeld in 1890. He was translated to the See of St Andrews and Edinburgh in 1901. The last Protestant arch
dependent died in 1704; and the title remained unused until 1844, when it was revived by the episcopal synod.
Saint Andrews, University of.—The germ of the university is to be found in an association of learned ecclesiastics, formed in 1410, among whom were: Laurence of Lindores, Abbot of Soone, Richard Cornwall, Archdeacon of Lothian, Wm. Stephen, afterwards Archbishop of Dunkline. This offered occasion to the development of logic, philosophy, canon and civil law. Henry Wardlaw, the Bishop of St. Andrews, granted a charter of privilege in 1411; he sought a Bull of foundation from the antipope Benedict XIII, whose legate he was and whose claims Scotland supported. The Bull was granted in 1413; it was confirmed by royal patent in 1418. The five-hundredth anniversary of the foundation was celebrated in 1911. The University consisted of three colleges: St. Salvator's, founded in 1450 by Bishop James Kennedy, confirmed and further privileged by Popes Nicholas V, Pius II, and Paul II; St. Leonard's, founded by Archbishop Stuart and Prior Hepburn in 1512; and St. Mary's, founded by Archbishop James Beaton, under sanction of Paul III, in 1537. This occupied the site of the original pedagogy. All the foundations were amply supported by successive endowment. The college buildings ceased to be the homes of the Andrews when abolished by the reformers, but it was not until 1574 that the university began to recover. At the same time that Andrew Melville (a St. Andrews' student) was re-erecting the university at Glasgow, a commission, inspired by George Buchanan, began a series of reforms at St. Andrews, which intermittently continued throughout the seventeenth century. In 1747 St. Salvator's and St. Leonard's Colleges were united. The university was further enlarged and strengthened by the affiliation in 1897 of University College, Dundee, at which the scientific departments are chiefly conducted. A proposal by the Marquess of Bute to establish a Medical College, Blair's College, Aberdeen, was unsuccessful. Among the famous professors and students in St. Andrews of the earlier period must be named John Major, Andrew Melville, Gavin Douglas, George Buchanan, Patrick Forbes, Napier of Merchiston; its leaders and its alumni played a great part in Scottish ecclesiastical politics of the seventeenth century, most notably Zachary Boyd, Wm. Carstairs, principal of the University of Edinburgh, and Samuel Rutherford. During the last century St. Andrews can show a long list of distinguished scientists and men of letters. The total number of students (1909-10) was 571, of whom 260 were women; University College, Dundee, contributed 214 of the total.

St. Andrews' University Calendar (1910-11); ABERDONIAN, The University of St. Andrews, a Historical Sketch (1878); RAMSDALL, Universities of Europe in the Middle Ages (Oxford, 1895); COOPER, Dict. Nat. Biog., s. v. Andrew Melville; LITON, History of St. Andrews (Edinburgh, 1845).

J. S. PHILLimore.

Saint Asaph, Priory of, was one of the great religious houses in Scotland and the metropolitan church in that country before the Reformation. Its origin is uncertain, although there is no very ancient. According to the "Registram S. Andrews." the first founder was Angus, King of the Picts (735-747), who gave to Bishop Regulus, who had brought to Scotland the relics of St. Andrew, meadows, fields, and other properties. The church was, perhaps from the beginning, administered by the Bishops of St. Andrews, and had the right of the bishop. In 1144, however, at the request of King Alexander I, who may be called the second founder of the priory on account of his many donations to it, Robert, Prior of Soone, was made Bishop of St. Andrews. He brought with him some of his brother-canon regulars, whom he established in the priory, and the Canons and the Cedees served the church together, but by order of the pope in 1147 the Canons, who had previously been given the option to become canons and had refused, were removed and all their rights passed to the canons, who from that moment till the Reformation formed the Cathedral Chapter. When in 1297 Bishop Lambertson, who succeeded Bishop Frase, was chosen by the canons without the intervention of the Cedees, the latter, with the previous elections, Cumyn, Provost of the Cedees, opposed the election and went to Rome. He pleaded his case before the pope in vain, and Lambertson was consecrated bishop in 1298. The Cedees, after this, disappear from St. Andrews altogether. The priory protected by bishop's taxes and noble families prospered, and like all the great monasteries it had cells or priories as its dependencies. These were: (1) Lochleven, formerly a house of Cedees, and given to the canons by Bishop Robert and King David; (2) Monymusk, where the Cedees became canons regular; (3) Isle of May, which Bishop Wishart bought from the monks of Reading and gave to the canons of St. Andrews, pleno jure; (4) Pittenweem, an old priory, which already existed in 1270; (5) Portmok, founded in 1585 for Cedees and given to St. Andrews by Bishop Roger. Kilrimont was made over to the canons by Bishop Robert, until the prior pro tempore had precedence of all the abbots in the kingdom. To the canons of St. Andrews the now famous university of that name owes its existence. It was founded by Prior Besit and his canons in 1408, and of many of them lectured there. Some of the canons became bishops of St. Andrews or of other dioceses, and in other ways distinguished themselves for their piety or learning. Of Bishop Robert the chronicler tells us that he was a man of rare prudence, virtuous, and a scholar. In 1449, when the black plague made so many victims, he was chosen Prior of Portmok, and twentý-four canons of St. Andrews, who, as he says, were all "sufficienter litterati et morum conspectu" When in 1412 the new parish church was founded by the canons, the first incumbent was one of them, W. Romer, "vir multum laudabillis religiosis et benignus". Bishop Bell, returning from Rome, became a canon at St. Andrews, where he died in 1424. But evil days came for the priory when lay-priors or commendatories were introduced; relaxations and irregulærities crept in, and the Reformation completed the work of destruction. Instigated by the fiery preaching of John Knox, his church burned and the priory. A few years ago the late Marquess of Bute purchased the remaining ruins with a view to restore them to Catholic use.

A. ALLARIA.

Saint Asaph, Ancient Diocese of (Assayensis, originally Elyvienis), was founded by St. Kentigern about the middle of the sixth century when he was exiled from his see in Scotland. He founded a monastery called Llanion, under the condition that it must be united to the see of Argyll and Elwy in North Wales, where after his return to Scotland in 573 he was succeeded by Asaph or Assa, who was consecrated Bishop of Llanerwy. The diocese originally coincided with the principality of Powys, but lost much territory first by the Mercian encroachment marked by Wulf's dyke and again by the construction of Offa's dyke. Nothing is known of the history of the diocese during the disturbed period that followed. Domescall Book gives scanty particulars of a few churches but is silent as to the cathedral. Early in the twelfth century Norman influence asserted itself and in 1143 the Cardinal, Archbishop of Canterbury, consecrated one Gilbert as Bishop of St. Asaph, but the position of his successors was very difficult and one of them,
Godfrey, was driven away by poverty and the hostILITY of the Welsh. A return made in the middle of the thirteenth century (British Museum, Cotton MSS. Claud. B. xi) shows the existence of sixty-nine rural deaneries, seventy-nine churches, and nineteen chapels. By 1291 the deaneries had been doubled in number and there were Cistercian houses at Basingwerk, Aberconway, Strata Marcella, and Valle Crucis, and a Cistercian nunnery at Llangutug. The castle had been burned in the summer of 1295. It was a plain massive structure of simple plan, and was again destroyed during the Wars of the Roses. When it was restored by Bishop Redman the palace was not rebuilt and thus the bishops continued to be non-resident. At the end of the fifteenth century there was a church of the same name (about 800), other churches (about 928), and Mclanvs (about 1070). From 1143 the succession of the bishops is as follows: Gilbert (1143); Geoffrey of Monmouth (1152); Richard (1154); Godfrey (1158); Adam (1175); John I (1183); Reynor (1186); Abraham (1225); Hugh (1235); Howel ap Dynyvd (1240); John II (1247); Anian II (1268); Llewelyn ap Yur (Leolinus de Bromfield), 1238; Davyd ap Bledyn (1314); John Trevor I (1325); Llewelyn ap Madoc (1337); William de Spridington (1376); Lawrence Child (1382); Alexander Bache (1390); John Trevor II (1395); Robert de Lancaster (1411); John Lowe (1433); Reginald Pecock (1444); Thomas Knight (1450); Richard Redman (1471); Michael Disacon (1495); Davyd ap Forwerth (1600); Davyd ap Owen (1603); Edmund Birkhead (1613); Henry Standish (1618); see held by schematics (1585-55); The church was burned in 1555 when Rome was. April, 1555, not only the last Catholic Bishop of St. Asaph’s, but the last survivor of the ancient hierarchy. The bishop had five episcopal residences, four of which were alienated by the schismatical bishop under Edward VI. The cathedral was dedicated to St. Asaph and the arms of the see were still as: Arms of the See: Quarterly argent and azure.

Saint Augustine, ABBEY OF.—A Benedictine monastery, originally dedicated to Sts. Peter and Paul, founded in 505 outside of the City of Canterbury, on the site of the earlier Church of St. Pancras given by King Ethelbert to St. Augustine in 597. It was subsequently enlarged, and in 786 St. Dunstanthen Archbishop of Canterbury, dedicated it anew to St. Peter, St. Paul, and St. Augustine, since which time it has always been known by the name of the latter saint whose body lay enshrined in the crypt of the abbey church. In spite of its proximity to the neighbouring cathedral priory of Christ Church, the abbey enjoyed much success and the monastery was of considerable importance for many centuries. At the dissolution in 1538 the act of surrender was signed by the abbot and thirty monks, who were rewarded with pensions. The abbey itself was appropriated by Henry VIII as a royal palace, but since that time the greater part of the buildings have been allowed gradually to fall to ruin. In 1844 the remains of the abbey were sold at auction and on the site was erected a college for missionaries of the Church of England. The revenues of the abbey at the time of its suppression were £1684.

G. CYPRIAN ALSTON.
when the principles of social morality and Christian politics elaborated by the theology of the Middle Ages, were replaced by the lay and half-pagan doctrine of Machiavellianism, proclaiming the right of the strongest to rule.

The peace signed at Saint-Germain, August, 1570, between the Court and the Protestants seemed to reestablish order. It was sanctioned by conferences held at La Rochelle in which on the one side a war was planned against Philip II, all the Calvinist nobility being invited to enlist, and on the other the marriage of Henry of Bourbon (the future King Henry IV), a Calvinist and the son of Jeanne of Albrecht, with Margaret of Valois, sister of Charles IX. On 12 September, 1571, the Admiral de Coligny came to Blois, where Charles IX resided, to superintend and further this new policy, and it would seem that just at that time the king was sincere in seeking the support of Coligny and the Protestants against Philip II. And Catherine de' Medici was shrewdly endeavouring to court favour on all sides. Upon hearing of Spain's victory at Lepanto (7 October, 1571), she remonstrated with, and, Catherine IX for his lack of energy in renewing relations with Philip II; and in June, 1572, she tried to arrange a marriage between her third son, the Duke of Alençon, and the Protestant Elizabeth of England, and also made active preparations for the marriage of Margaret of Valois with Henry of Bourbon, taking the means to have the project succeed. Meanwhile Coligny, with money which Charles IX had given him unknown to Catherine, sent 4000 men to the relief of Mons, who was at the time besieged by the Duke of Alba. They were beaten (11 July, 1572) and the Duke of Alba, having ascertained that Charles IX intended to attack him, thereupon entertained the most hostile feeling toward the French King. Charles IX, greatly irritated, made open preparations for war against Spain, relying on Coligny for assistance. Suddenly, on 4 August, Catherine made her way to Charles IX, who was then hunting at Montrepius, and insisted that unless he would give up the conflict with Philip II she would withdraw to Florence, taking with her the Duke of Anjou. A conference was held and Coligny, with the idea of sustaining his co-religionists in Flanders, demanded war with Spain, but the council unanimously refused it. Then with its authority Coligny declared to Catherine that if war were not waged against Spain, another war might be expected. From this Catherine deduced that the Protestant party, with the admiral for spokesman, threatened the King of France with a religious war which would be the fourth within ten years.

At the time of the marriage of Henry of Bourbon and Margaret of Valois (18 August), the situation was as follows: on the one side were the Guises with their troops, and on the other Coligny and his musketeers, while Charles IX, although recognizing both parties, leaned more towards the Guises with a view to revenging herself on Coligny and recovering her influence over Charles IX. Just at this time Philip II was of the opinion that the King of France should strike a decisive blow against the Protestants, and we have proof of this in a letter written to Cardinal Como, Secretary of State to Gregory XIII, by the Archbishop of Rossano, nuncio in Spain. "The King (Philip II) bids me say," wrote the nuncio, "that if his Most Christian Majesty means to purge his kingdom of its enemies, the time is now opportune, and that by coming to terms with him (Philip II) His Majesty would destroy Muscovy and the Argenza, especially, as the Admiral is at Paris where the people are attached to the Catholic religion and to their king, it would be easy for him (Charles IX) to do away with him (Coligny) forever." It is probable that Philip II sent similar suggestions to his ministers at Paris, and that the latter conferred with Catherine and the Duke of Anjou, even offering them military assistance for the struggle against the Protestants. This intervention caused Catherine to plan Coligny's assassination. On 22 August, which she called Madame de Nemours, widow of the great Duke of Guise, it was decided that Maurevel should set a trap for the admiral. This was done, with the result that on the morning of 22 August, a musket-shot fired by Maurevel struck Coligny, although wounded he butted out valiantly. The Protestants became excited and Charles IX grew angry, declaring that the peace edict must be observed. He went to visit the wounded Coligny and Catherine accompanied him, but at Coligny's request she had to withdraw and, if we may credit the account given by the Duke of Anjou (Hieyn), a voice, which according to his voice, warned Charles IX against his mother's influence. But just at that moment Charles had but one idea, which was to find and punish Henry of Guise, whom he suspected of being the instigator of not the perpetrator of the attempt on Coligny's life.

It was because the attack made on Coligny on 22 August, had failed that Catherine conceived the idea of a general massacre. "If the Admiral had died from the shot," wrote Salviati, the nuncio, "no others would have been killed." Those historians who claim the massacre to have been premeditated confirm that Catherine, who was then in Paris, and Henry of Bourbon solemnized in Paris in order to bring the Protestant leaders there for the purpose of murdering them. However, this interpretation is based merely upon a very doubtful remark attributed to Cardinal Alessandrinus and of which we shall speak later, and it is more plausible to believe Catherine, who was always more inclined to placate the various parties by dint of subtle manoeuvring them, after careful deliberation, to inaugurate a series of irreparable outrages. As we shall see, the decision to have recourse to a massacre arose in Catherine's mind under pressure of a sort of madness; she saw in this decision a means of preserving her influence over the king and of preventing the vengeance of Protestants, who were exasperated by the attack made on Coligny. "The Admiral's death was premeditated, that of the others was sudden," wrote Don Diego de Zuñiga to Philip II, on 6 September, 1572. Herein lies the exact difference between the attempt on Coligny's life and the massacre, whereas the massacre was the outcome of a cruel impulse. On the night of 22 August Catherine de' Medici felt herself lessened in her son's consideration. She learned from one Bouchanvann that the Huguenots had decided to meet at Meaux, 5 September, and avenge Coligny's attack on Saint-Denis, which on Paris; she knew that the Catholics were preparing to defend themselves, and she foresaw that between both parties the king would be alone and powerless. At supper she heard Pardalian, a Huguenot, say that justice would be rendered even if the king would not render it, and Captain Pikes, another Huguenot, was of the opinion that "even if the Admiral lost an arm there would be numberless others who would take so many lives that the rivers of the kingdom would run with blood." The threats of the Huguenots and her son's consternation impelled Catherine to try to avert this civil war by organizing an immediate massacre of the Protestants.

But Charles IX had to be won over. In the account of the dreadful events subsequently given by the Duke of Anjou, he alludes to a single conversation between Catherine and Charles IX. On 25 August, but Bouchanvann and Mouren, and at the second of which took place late at night. As to the decisive interview there is conflicting testimony. The Duke of Anjou claims that Charles IX, suddenly converted to the cause by Catherine's ardent importuning, cried out: "Good God! since you deem it
well to kill the Admiral, I agree, but all the Huguenots in France must likewise perish, so that not one be left later to upbraid me." Cavalli, the Venetian Ambassador, maintained in his report that the king held out a well-founded credible fear of Catherine's threat to leave France and the fear that his brother, the Duke of Anjou, might be named captain-general of the Catholics. Margaret of Valois stated in her account that it was René, his former tutor, whom Catherine sent to reason with him, who evoked of the Duke in this behalf the king's consent. Is it then true, as certain documents claim, that toward midnight, Charles IX again hesitated? Perhaps. At any rate, it was he who, on 24 August, a little after midnight, ordered Le Charron, Présot des Marchands, in charge of the Paris police, to call to arms the capitaine and the gendarmes in order that he (the king) and the city might be protected against the Huguenot conspirators. Catherine and the Duke of Anjou had previously secured the assistance of Marcel, former Présot des Marchands. Whilst Le Charron, without any great enthusiasm, mobilised the bourgeois who were to quell a possible uprising of Huguenots, Marcel drew up the masses, over whom he had unlimited influence, and who, together with the royal troops, were to attack and plunder the Huguenots. The royal troops were especially commissioned to kill the Huguenot nobles; the mob, mobilised by Marcel, was to threaten the bourgeois who deserted the king and to side with the Huguenots. Charles IX and Catherine decided that the massacre should not begin in the city till the admiral had been slain, and afterwards Catherine claimed that she took upon her conscience the blood of only six of the dead, Coligny and five of his followers. Whether or not the passions of the multitude, over whom Marcel had absolute control, she should be held responsible for all the blood shed.

The Massacre.—Toward midnight the troops took up arms in and around the Louvre, and Coligny's abode was surrounded. A little before daybreak the sound of a pistol-shot so terrified Charles IX and his mother that, in a moment of remorse, they despatched a nobleman to Guise to bid him refrain from any attack on the admiral, but the order came too late, Coligny had already been slain. Scarcely had the Loing been crossed than Coligny reached the Château de l'Auxerrois than he started with a few men toward the Coligny mansion. Besme, one of the duke's intimates, went up to the admiral's room. "Are you Coligny?" he asked. "I am," the admiral replied. "Young man, you should respect my years. However, if you can help prevent a massacre among the people, you will save yourself, and your life to any extent." Besme plunged a dagger into the admiral's breast and flung his body out of the window. The Bastard of Angoulême and the Duke of Guise, who were without, kicked the corpse and an Italian, a servant of the Duke of Nevers, out of his bed; however, before abandoning the nobles on the side of the Guises slew all the Protestant nobles whom Charles IX, but a few days previously, when he wanted to protect the admiral against the intrigues of the Guises, had carefully lodged in the admiral's neighbourhood. La Rochefoucauld, with whom that very night Charles IX had rested till eleven o'clock, was stabbed by a masked valet; Téligny, Coligny's son-in-law, was killed on a roof by a musket-shot, and the Seigneur de la Force and one of his sons had their throats cut, the other son, a child of twelve, remaining hidden beneath their clothing; simultaneously, a body of the guard was put to the sword, and the Prince of Condé who dwelt in the Louvre were murdered under the vestibule by Swiss mercenaries. One nobleman fled to the apartment of Margaret, who had just married Henry of Bourbon, and she obtained his pardon. Whilst their servants were being slaughtered Henry of Bourbon and the Prince of Condé were ordered to appear before the king, who tried to make them abjure, but they refused.

After that the massacre spread through Paris, and Charles IX went to the Church of the Hôtel Saint-Séverin, and rose to the altar, as a butcher, battered in the doors of the Huguenot houses. A tradition, long credited, claims that Charles IX stationed himself on a balcony of the Louvre and fired upon his subjects; Brantôme, however, supposed that the king took aim from the windows of his sleeping apartments. But nothing is more uncertain as the balcony on which it is said to have stood was not there in 1572, and in none of the accounts of the Massacre of Saint Bartholomew sent to their governments by the various diplomats then in Paris does this detail figure. It was first mentioned in a book published at Basel in 1573; "Dialogue suelent sont traités plusieurs choses advenues aux Luthériens et Huguenots de France" and reprinted in 1574 under the title: "Le reveille matin des Français". This libel is the work of Barnaud, a native of Dauphiné, a Protestant greatly disliked by his co-religionists, and whose pamphlet initiated a whole series. The "Tocin contre les auteurs du Massacre de France", another narration of the Massacre of St. Bartholomew, that appeared in 1579, makes no allusion to this sinister pastime of Charles IX, and the accounts given of it twenty years afterwards by Brantôme and Sévigné do not contain this detail.

The "Tocin contre les auteurs du Massacre de France" was reprinted by Voltaire, according to which the Marché de Tesson had known a gentleman then over a hundred years old who was supposed to have loaded Charles IX's musket, is extremely doubtful, and the absolute silence of those diplomats who addressed their respective governments detailed reports of the massacre must ever remain a strong argument against this tradition.

On the following morning blood flowed in streams; the houses of the rich were pillaged regardless of the religious opinions of their owners. "To be a Huguenot," emphatically declares Mézeray, the historian, "was to have money, enviable position, or avaricious heirs." When at eleven o'clock in the morning the Présot Le Charron came to inform the king of this epidemic of crime, an edict was issued forbidding a continuation of the slaughter; but the massacre was not stopped until a few days later, when Ramus, the celebrated philosopher, was assassinated in spite of the formal prohibition of the king and queen. The number of victims is unknown. Thirty-five livres were paid to the grave-diggers of the Cemetery of the Innocents for the interment of 1100 corpses; but many were thrown into the Seine. Rankie and Henri Martin estimate the number of victims in Paris at 2000. In the provinces also massacres occurred. On the evening of 24 August, a messenger brought to the Provost of Orléans a letter bearing the royal seal and ordering him to treat all Huguenots of the province of Paris and to exterminate them, "to be sure to let nothing leak out and by shrewd dissimulation to surprise them all". Only that day the king had written to M. d'Eguilly, Governor of Chartres, that there was question merely of a quarrel between Guise and Coligny. On 25 August an order was issued to kill the factious; on the next day the king solemnly announced in open session that his decision of 24 August was the only means of frustrating the plot; on 27 August he again began to prohibit all murder; and on the following day he solemnly declared that the punishment of the admiral and his accomplices was due not to the Huguenots' conspiracy against the Court, and he despatched letters bidding the governors to repress the factious; on 30 August he ordered the people of Bourges to kill any Huguenot who should congregate, but revoked "all verbal commands that he had issued when he had
just cause to fear some sinister event." In this series of contradictory instructions may be detected the vacillation of Charles \(X\); but almost everywhere in the country the policy of bloodshed prevailed.

The general opinion throughout France was that the king had to kill Coligny and the turbulents in self-defense. Thus Attorney-General du Faur de Fibras wrote an apology for the massacre; Jodelle, Bafi, and Daurat, poets of the "Pliade", insulted the admiral in their verse; a suit was entered in the Parlement against Coligny and his accomplices whether living or dead, and its opal form was that of Béthune and Cavaignes, two Protestants who had escaped the massacre. This protracted severity on the part of the Parlement of Paris set the pace for outside places, and in many places an excess of zeal led to an increase of brutality. Lyons, Toulouse, Bordeaux, and Rouen all had their massacres. So many Lyonnais corps drifted down the Rhône to Arles that, for three months, the Arlesians did not want to drink the river water. At Bayonne and at Nantes compliance with royal orders was refused. The intervals between these massacres prove that on the first day the Court did not give formal orders, and that the massacre did not occur till 23 September and that of Bordeaux till 3 October. The number of victims in the provinces is unknown, the figures varying between 2000 and 1000. The "Martyrologe des Huguenots", published in 1581, brings it up to 15,138, but mentions only 786 dead. At any rate only a short time afterwards the reformers were preparing for a fourth civil war.

From the foregoing considerations it follows: (1) That the royal decision of which the St. Bartholomew massacre was the outcome, was in nowise the result of religious disturbances and, strictly, did not even have religious elements; it was rather the effect of a purely political act committed in the name of the immoral principles of Machiavelianism against a faction that annoyed the Court. (2) That the massacre itself was not premeditated; that, up to 22 August, Catherine de' Medici had only considered—and that for a long time—the possibility of getting rid of Coligny; that the criminal attack made on Coligny was interpreted by the Protestants as a declaration of war, and that, in the face of impending danger, Catherine forced the irresolute Charles IX to consent to the horrible massacre. Such, then, are the conclusions to be reached, for entering upon the question of that other question, the responsibility of the Holy See:

The Holy See and the Massacre.—A. Pius V (1566—May 1, 1579).—Pius V, being constantly informed in regard to the civil wars in France and the massacres and deprivations there committed, looked upon the day on which he was created pope, as the day on which he was, in the sight of God, joined to the winner of the battle of Jarnac (12 March, 1569), and on 28 March had written to Catherine de' Medici: "If Your Majesty continues openly and freely to fight (aperte ac tibere) the enemies of the Catholic Church unto their utter destruction, divine help will never fail you. Victory, courage, and glory are yours!" In 1569, he had begged the king thenceforth to tolerate in his states the exercise of Catholicism only; "otherwise," he said, "your kingdom will be the bloody scene of continual sedition." The peace concluded in 1570 between Charles IX and the Huguenots caused him great joy. He had endeavored to dissuade the king from signing it and had written as follows to the Cardinals of Bourbon and Lorraine: "The King will have more to fear from the hidden traitors and ruffians of the Huguenots than from the barefaced brigandage during the war." What Pius V wanted was an honest, open war waged by Charles IX and the Guises against the Huguenots. On 10 May, 1567, he said to the Spanish Ambassador, Don Juan de Luna: "The masters of France are meditating something which I cannot accept. They want, by bringing about which, conscience upbraids: they want to destroy by underhand means the Prince of Condé and the Admiral." To re-establish political peace and religious unity by the royal sword was the inexorable dream of Pius V who must not be judged according to our modern standards of the French Revolution. Why, even if he deemed it, could not justify the proposed means of attainment; he would sanction no intrigue, and five years previous to the Massacre of St. Bartholomew's Day, he disapproved the dishonest "means" by which Catherine dreamed of getting rid of Coligny.

B. Cardinal Alessandrino, sent from the Holy See to Paris in 1578.—Some historians have wondered whether Cardinal Alessandrino, sent by Pius V to Charles IX in February, 1572, to persuade the king to join a Catholic league against the Turks, was not an accomplice in Catherine's murderous designs. In February, Alessandrino, who had vainly endeavored to prevent the marriage of Margaret of Valois with the Protestant Henry of Bourbon, closed his report with these words: "I am leaving France without accomplishing anything whatever: I might as well not have come. Let us be mindful of this tone of discouragement, this acknowledgement of failure. In March he wrote: "I have other special matters to report to my Holiness but I shall communicate them orally..."

When the cardinal returned to Rome Pius V was dying, and he expired without learning what were the "special matters" to which Alessandrino had alluded. Whatever they may have been they certainly have no bearing upon the conclusion of this paper. When Margaret's marriage to Henry, the king said: "I have no other means of revenging myself on my enemies and the enemies of God." This fragment of the interview has furnished those who hold that the massacre was premeditated with a reason for maintaining that the solemnizing of the marriage of Margaret to Henry was in accordance with the concurrence of the papal nuncio. The most reliable critics contest the perfect authenticity of this interview, chiefly because of the very tardy account of it and of its utter incompatibility with the discouragement manifested in Alessandrino's notes written the day after he had taken place. The arguments against the thesis of premeditation as we have considered them one by one, seem to us sufficiently plausible to permit us to exclude all hypothesis according to which, six months ahead of time, Alessandrino was confidentially apprised of the outrage.

C. Salviati, Nuncio at Paris in 1679.—At the time of the Massacre of St. Bartholomew, Salviati, a relative of Catherine de' Medici, was the pope's nuncio at Paris. In December, 1591, Pius V had entrusted him with a first extraordinary mission, and at the time Catherine, according to his direction, had been expel-

led by the Venetian Ambassador, Michaelis, had secretly bade him tell Pius V that he would soon see the vengeance that she and the king would visit upon those of the religion (of the Huguenots)". Catherine's conversation was so vague that the following summer, when Salviati chanced to return to France, he thought he must have forgotten her words. He
accordingly she reminded him of the revenge that she had predicted, and neither in December, 1571, nor in August, 1572, was Salviati very explicit in his correspondence with the Court of Rome as, on 8 September, 1572, three weeks after the massacre, a dispatch from the Holy See addressed to Gregory XIII, wrote to Salviati: "Your letters show that you were aware of the preparations for the blow against the Huguenots long before it was dealt. You would have done well to inform His Holiness in time."

In fact on 5 August, Salviati had written to Rome: "The Queen wishes to make it well known that if he goes too far (donnera à l'Admiral sur les angles), and on 11 August: "Finally, I hope that God will give me the grace soon to announce to you something that will fill His Holiness with joy and satisfaction."

This was all. A subsequent letter from Salviati revealed that this covert alliance was to the scheme of vengeance that Catherine was then projecting in regard to Coligny's assassination and that of a few Protestant leaders; however, it seems that at the Court of Rome the reference was supposed to be to a re-establishment of cordial relations between France and Spain. The answers of the Cardinals of the Curia were that this last idea was what absorbed the attention of Gregory XIII and that the Court of Rome gave but little heed to Catherine's threats against the Protestants. Notwithstanding that Salviati was Catherine's relative and that he was maintaining a close correspondence with the French government, a Protestant historian, says, that the events of 24 August were accomplished independently of Roman influence. Indeed, so little did Salviati foresee the massacre of St. Bartholomew itself that he wrote to Rome the day after the event: "I cannot believe that so many would have perished if and Admiral had died of the musket-shot fired at him. . . . I cannot believe a tenth of what I now see before my very eyes."

D. The attitude of Gregory XIII in receiving the news of the Massacre of St. Bartholomew.—It was on 2 September that the first rumours of what had occurred in France reached Rome. Danes, secretary to Mandelot, Governor of Lyons, bade M. de Jou, Commander at Saint-Antoine, to inform the pope that the chief Protestant leaders had been killed in Paris, and that the king had ordered the governors of the provinces to seize all Huguenots. Cardinal de Lorraine, when in the course of his reply, and regret, said he gave him 1000. The pope wanted bonfires lighted in Rome, but Férals, the French Ambassador, objected on the ground that official communication should first be received from the king and the nuncio. On 5 September Beauviller reached Rome, having been sent there by the Emperor to the Emperor in 1572. He gave an account of the Massacre of St. Bartholomew and begged Gregory XIII to grant, antedating it, the dispensation required for the legitimacy of the marriage of Margaret of Valois and Henry of Navarre, solemnized three weeks previously. Gregory XIII deferred discussing the subject of the dispensation and a letter from the Cardinal de Bourbon dated 28 August and a despatch from Salviati, both received at this time, duly informed him of what had taken place in France. "Said Admiral," wrote the Cardinal de Bourbon, "was so wicked as to have conspired to kill said King, his mother, the Queen and his brothers. . . . He (the Admiral) and all the ringleaders of his sect were slain. . . . And what I most commend is the resolution taken by His Majesty to exterminate this vermin."

In his letter describing the massacre Salviati said, "I rejoice that it has pleased the Divine Majesty to avenge the King and the Queen-mother."

Thus all the information received from France gave Gregory XIII the impression that Charles IX and his family had been saved from great danger. The very morning of the day that Beauviller had brought him Salviati's letter, the pope held a consistory and announced that "God had been pleased to be merciful". Then with all the cardinals he repaired to the Church of St. Mark for the Te Deum, and prayed and ordered prayers that the Most Christian King might rid and purge his entire kingdom of the Huguenots. A dispatch to Gregory XIII communicated to the Valois had just escaped a most terrible conspiracy which, had it succeeded, would have unhitched France for the struggle of Christian against Turk. On 8 September a procession of thanksgiving took place in Rome, and the pope, in a prayer after mass, thanked God of having protected the Catholic Church and of having saved the Huguenots over a pernicious race (gloriosam de perfidis gentibus populo catholic o leviaitiam tribuit).

A suddenly discovered plot, an exemplary chastisement administered to insure the safety of the royal family, such was the light in which Gregory XIII viewed the St. Bartholomew massacre, and such was likewise the idea entertained by the Spanish Ambassador who was there with him and who, on 8 September, wrote as follows: "I am certain that if the musket-shot fired at the Admiral was a matter of several days' premeditation and was authorized by the King, what would it not be with conditions of circumstances. These circumstances were the threats of the Huguenots, "the insolent taunts of the whole Huguenot party", alluded to by Salviati in his despatch of 2 September; to put it briefly, these circumstances constituted the conspiracy. However, the papal historian to whom he belonged, the Guise and resided in Rome, wished to insinuate that the massacre had been planned long ahead by his family, and had a solemn inscription placed over the entrance to the Church of St. Louis des Français, proclaiming that the success achieved was an answer to the prayers, supplications, sighs and meditation of twelve years; this hypothesis, according to which the massacre was the result of prolonged hypocrisy, the outcome of a protracted ruse, was shortly afterwards maintained with great audacity in a book by Capilupi, Catherine's Italian panegyrist. But the Spanish Ambassador refuted this interpretation: "The French," wrote he, "would have it understood that their King meditated this stroke from the time that he concluded the peace with the Huguenots, and they attribute to him trickery that does not seem permissible even against heretics and rebels. And the insignificant part regarded by the ignorant Lorraine in giving the Guise credit for having set a trap. The pope did not believe any more than did the Spanish Ambassador in a snare laid by Catholics, but was rather convinced that the conspiracy had been hatched by Protestants.

Just as the Turks, as the Turks succumbed at Lepanto, the Protestants had succumbed in France. Gregory XIII ordered a jubilee in celebration of both events and engaged Vasari to paint side by side in one of the Vatican apartments scenes commemorative of the victory of Lepanto and of the triumph of the Most Christian King over the Huguenots. Finally, he had a medal struck representing an external enemy slaying the Huguenots with his sword, the inscription reading: Hugonotorum strages. There had been a slaughter of conspirators (stages) and the information that reached the pope was identical with that spread throughout Europe by Charles IX. On 21 September Charles IX wrote to the Queen of England concerning the "imminent danger" from the plot that he had baffled; on the next day he wrote as follows to La Mothe-Fénelon, his ambassador at London: "Coligny and his followers were all ready to visit upon us the same fate that we dealt out to them," and to the German nobility: Information. Certainly all this seemed justified by the decree of the French magistracy ordering the admiral to be burned in effigy and prayers and processions of thanksgiving on each recurring 24 August.
SAINT BENEDICT
out of gratitude to God for the timely discovery of the
conspiracy. It is not surprising, therefore, that, on
22 September, Gregory XIII should have written
to Charles IX: "Sire, I thank God that He was
pleased to preserve and defend Your Majesty, Her
Majesty, the Queen-mother and Your Majesty's
royal brothers from the horrible conspiracy. I do not
want to mention the cruel malevolence." Nor again is it astonishing that
the pope should have despatched Cardinal Ossini to
Charles IX with congratulations on his escape. From
Rome again Cardinal de Pellevé wrote to Catherine
de' Medici: "Madame, the joy of all honest people in
the court and at court was there more than some news
than that of Your Majesty being free from
danger." The discourse delivered 3 December by
Muret, the Humanist, was a veritable hymn of thank-
giving for the discovery of the plot contrived against
the king and almost all the royal family.
The Huguenot party having plotted regicide had to
be punished, and its punishment seemed once more
to put France in condition to combat the Turks;
such was the twofold aspect under which Rome con-
sidered the massacre. Besides, the pope's joy did not
last long. A rather involved account by Brantôme
leads us to think that, becoming better informed,
he grew angry at the news of such barbarity, and it
is certain that when, in October, 1572, the Cardinal of
Lorraine wished to present Maurevel, who had fired
on Coligny on 22 August, Gregory XIII refused to
receive him, saying: "He is an assassin." Doubtless
by this he was saying what he felt by Savoy, during the weeks preceding the massacre had, in
the light of events, become more comprehensible
and rendered it clearer that the origin of these tragic
events was the assault of 22 August; without ceasing
to rejoice that Charles IX had eventually escaped
the consequences asserted in France abroad, Gregory XIII judged the criminal, Maurevel,
according to his deserts. The condemnation by
Pius V of the "intrigues" against Coligny and the
refusal of Gregory XIII to receive Maurevel "the
assassin" establish the unbending rectitude of the
papacy, which, eager as it was for the re-establish-
ment of religious unity, never admitted the pagan theories of a certain raison d'état according to which the end justified the means. As to the congratulations and
the manifestations of joy which the news of the
massacre elicited from Gregory XIII, they can only
be truly judged by assuming that the Holy See, like all Europe, was accursed, beholding, behind the
existence of a Huguenot conspiracy of whose
overthrow the Court boasted and whose punishment
an obsequious parliament had completed.

GEORGES GOYAU.

SAINT BENEDICT. MEDAL OP, a medal, originally
a cross, dedicated to the devotion in honour of St.
Benedict. One side of the medal bears an image of
St. Benedict, holding a cross in the right hand and the
Holy Rule in the left. On the one side of the image
is a legend, generally a cross, and above the cross,
the legend inscribed the words: "Crux Sancti
Patria Benedicti" (Cross of the Holy Father Benedict).

Round the margin of the medal stands the legend
"Eius in obitu nullo presentia muniamur" (May we at
our death be fortified by his presence). The reverse
of the medal bears a cross with the initial letters of
the words: "Crux Sacra Sit Mihi Lux" (The Holy
Cross be my light), written downward on the perpen-
dicular bar; the initial letters of the words, "Non
Draco Sit Mihi Dux" (Let not the dragon be my guide),
the horizontal bar; and the initial letters of "Crux
Sancti Patria Benedicti" in the angles of the cross.
Round the margin stand the initial letters of the dis-
tich: "Vade Retro Satana, Nunnquam Suade Mihi
Vana—Sunt Mala Quae Libas, Ipsi Venena Bibas" (Be-
begone, Satan, do not suggest to me thy vanities—
even the things thou offerest are poison). At the top of the cross usually stands the
word Paz (peace) or the monogram I H S (Jesus).
The medal just described is the so-called jubilee medal,
which was struck first in 1880, to commemorate the
fourteenth centenary of St. Benedict's birth. The

MEDAL OF SAINT BENEDICT

Archabbev of Monte Cassino has the exclusive right to strike this medal. The ordinary medal of St.
Benedict usually differs from the preceding in the omission of the words "Eius in obitu etc.,", and in a
few minor details. (For the indulgences connected with
404-5.) The habitual wearer of the jubilee medal can
gain all the indulgences connected with the ordinary
medal and, in addition: (1) all the indulgences that
could be gained by visiting the basilica, crypt, and
tower of St. Benedict at Monte Cassino (Pius IX, 31
Dec. 1877); (2) a plenary indulgence on the feast of
All Souls (from about two o'clock in the afternoon of
1 Nov. to sunset of 2 Nov., as often as (loties quites),
after confession and Holy Communion, he visits
any church or public oratory, praying there according
to the intention of the pope, provided that he is hin-
dered from visiting a church or public oratory of the
Benedictines by sickness, monastic enclosure or a dis-
tance of at least 1000 steps. (Decr. 27 Feb., 1907,
Acta S. Sedia, LX, 246.) Any priest may receive the
faculties to bless these medals.

It is doubtful when the Medal of St. Benedict origi-
nated. During a trial for witchcraft at Natternberg
near the Abbey of Metten in Bavaria in the year 1647,
the accused women testified that they had no power
over Metten, which was under the protection of the
cross. Upon investigation, a number of painted
crosses, surrounded by the letters which are now
found on Benedictine medals, were found on the walls
of the abbey, but their meaning had been forgotten.
Finally, in an old manuscript, written in 1415, was
found a picture representing St. Benedict holding
in one hand a staff which ends in a cross, and a scroll
in the other. On the staff and scroll were written in full
the words of which the mysterious letters were the
initials. Medals bearing the image of St. Benedict, a
cross, and these letters began now to be struck in
Germany, and soon spread over Europe. They were
first approved by Benedict XIV in his briefs of 23
Dec., 1741, and 12 March, 1742.

ICHABOEAM, Essai sur l'histoire, la signification et les privilèges
de la médaille ou croix de St. Benoît (Pitoires, 1862; 11th ed., Paris,
Saint Boniface, Archdiocese of (Sancit Boni-facii), the chief ecclesiastical division of the Canadian West, so-called after the patron saint of the German soldiers who were among its first settlers.

Successive Arhbas.—It commenced its official existence as the vicariate-apostolic of the north-west in 1844, though Bishop Provencher, its titular, had been there with episcopal rank since 1822. At that time it comprised the entire territory west of the Great Lakes and as far north as the Pole. The same circumference became the limits of diocesan jurisdiction only in 1847, but remained in 1859 as the limits of Diocese of St. Boniface. In May, 1862, all the territory tributary to the Arctic Sea was detached therefrom and made into the Vicariate-Apostolic of Athabasca-Mackenzie. On 22 Sept., 1871, the See of St. Boniface was raised to the rank of an archbishopric, and the northern portion of its territory, a new diocese being carved, with headquarters at St. Albert, near Edmonton. The north-eastern part of this area further became in 1890 the Vicariate-Apostolic of the Saskatchewan; and this arrangement left to the Archdiocese of St. Boniface 109° W. long. for its western boundary, while in the north this ran along 52° N. lat., as far as the eastern limit of Manitoba, following afterwards the northern end of Lake Manitoba and the Nelson River to Fort York. The eastern boundary was 91° W. long. With the formation of the Diocese of Regina (4 March, 1910) new delimitations became necessary. They are the following: in the south the international boundary as far as 91° W. long.; thence to a line continuing the south boundary of Manitoba, as far as the line dividing this province from Saskatchewan, which now becomes the western limit of the archdiocese.

Population and Organization.—The Catholic population within the present area is 87,316. Though partaking of the cosmopolitan character proper to the Canadian West, the various divisions are more compact. Thus the 29,595 diocesan of French extraction control four counties absolutely. The nationality most numerously represented is that of the Galicians, who number 32,637. The English-speaking Catholics live mostly in towns, and are estimated at 9459. The same might almost be said of the Poles, who number 9369. The Germans count 2062 souls, and the Indians about 2000. In 1858, when Mgr. Taché succeeded Bishop Provencher, the entire diocese, vast as it then was, counted but two parishes with as many unorganized annexes, and three secular missions with resident priests. One priest, 4 secular and 7 Oblate priests attended to the spiritual needs of the Catholic population. At the time of the accession of the present archbishop the number of parishes had grown to thirty-five, though the area of the diocese had in the meantime been considerably diminished. There were then 86 churches or chapels, with 67 priests, of whom 31 belonged to the secular clergy. To-day, with a still more reduced territory, the archdiocese counts 1 archbishop, 1 Roman prelate, and 162 priests, of whom 95 are members of the regular clergy. Apart from the two dignitaries, 136 of the priests have French, 2 have English, 9 are English-speaking; 6 are Poles, 5 Germans, 2 Dutch, 2 Galicians, and 1 Italian. The religious orders of men in the archdiocese are the following: Oblates of Mary Immaculate, 47 priests; Jesuits, 12; Canons Regular of the Immaculate Conception, 11; Trappists, 10; Sulpicians, 1; Vincentians, 2; Redemptorists, 4; Clerics of St. Viator, 2; Basilians of the Rutenian Rite, 2. Independently of these two last, the Galician population is ministered to by 2 French priests who have adopted the Rutenian Rite, as well as by a few Redemptorists and some Oblates, while 3 more French priests are in Austria quarreling for the same missionaries.

Institutions.—The institutions of the archdiocese are: 1 college under the Jesuits, with 350 pupils; 1 lower seminary (founded 1909) with 45 pupils; 1 Oblate juniorate; 2 general hospitals; 1 maternity hospital; 1 house of refuge for girls; 3 orphan asylums; 1 asylum for old people; and 6 Indian boarding schools. The State-supported Catholic schools having been officially abolished in 1890 (see MONTBRO), the two cities of Winnipeg and Brandon, where the majority of the population is Protestant, force the Catholics to pay double taxes, since the latter have to maintain their own schools as well as those of the Protestants. But, in virtue of an agreement between the present archbishop and the Government, the country schools continue to be conducted along Catholic lines. The American Brothers of the Society of Mary direct the English parochial schools of Winnipeg and Brandon; the Western Province of the Cross of Jesus render the same service in St. Pierre. As to the Orders of women within the archdiocese, they are: Grey Nuns (first arrived in 1844); Sisters of the Holy Names of Jesus and Mary; Sisters of Notre Dame des Missions; Sisters of Providence; Sisters of St. Joseph; Sisters of Our Lady of
the Cross; Sisters of the Five Wounds of Our Saviour; Sisters of Mercy; the Franciscan Missionaries of Mary, and the Oblate Sisters of the Sacred Heart and Mary Immaculate, founded by the present archbishop.

History.—The principal events in the history of the archdiocese are intimately connected with the lives of its bishops, which will be found under the heads of Previous Bishops. Additional to those and to the data already furnished in the course of the present article are to be mentioned the burning (14 Dec., 1860) of the first stone cathedral, whose "turrets twain" have been sung by the poet Whitman. A new and somewhat more modest edifice was soon put up, which had to be razed to make room for the monumental cathedral erected by Taché's successor, Archbishop Adélaïd L. P. Langevin, O.M.I. The new temple is a massive stone building of Byzantine style, with a reproduction of the "turrets twain" of the poet. With the sacristy it measures 312 feet in length, and 280 feet along, inside, with a proportionate width. Its first stone was laid on 15 Aug., 1906, and the edifice was solemnly blessed 4 Oct. 1908. In the modest church which it replaced the First Provincial Council of St. Boniface took place in 1889, with six bishops in attendance. The present incumbents of the see are: b. at St. Isidore de Laprairie, Bishop of Ste. Foy, Diocese of Montreal, 24 Aug., 1855, he became an oblate 25 July, 1882, and was consecrated at St. Boniface 19 March, 1895.

Quite a galaxy of brilliant public men have shed lustre on the still young Diocese of St. Boniface. Without mentioning several French half-breeds who occupied high posts on the bench or in the provincial legislature, we may name M. A. Girard, who was successively Member of Parliament, speaker of the Assembly and Premier of Manitoba; Joseph Royal, a writer of note, who, after having been a member of the Manitoba Government, was appointed Governor of the North-West Territories; James McKay, a convert, who filled the rôle of President of the Council in the Girard Cabinet; Joseph Dubuc, who was successively legislator, Crown minister, and speaker of the legislature, and ended his public career as Chief Justice of his adoptive province.

The Official Catholic Directory (New York, 1911); and especially unpublished documents furnished by the Archdiocese of St. Boniface, A. Morice, History of the Catholic Church in Western Canada (Toronto, 1910).

A. G. MORICE.

SAINT-BRIEUC, DIACROIS OF (BRIOICUM), comprises the Department of the Côtes du Nord. Re-established by the Concordat of 1802 as suffragan of Tours, later, in 1859, suffragan of Rennes, the Diocese of Saint-Brieuc was made to include: (1) the ancient diocese of the same name; (2) the greater portion of the Diocese of Tréguier; (3) a part of the old Dioceses of St. Malo, Do, and Quimper, and (4) four parishes of the Diocese of Vannes. In 1852 the Bishops of Saint-Brieuc were authorized to add to their title that of the ancient Sea of Tréguier.

DIACROIS OF SAINT-BRIEUC.—An Irish saint, Briocus (Brioue), who died at the beginning of the sixth century, founded in honour of St. Stephen a monastery which afterwards bore his name, and from which sprung the town of Saint-Brieuc. An inscriptions later than the ninth century on his tomb, at Saint-Serge at Angers, mentions him as the first Bishop of Saint-Brieuc. According to Mgr Duchesne certain trustworthy documents prove that it was King Nomenoë who, about the middle of the ninth century, made the monastery the seat of a bishopric. Among the Bishops of Saint-Brieuc, the following are mentioned: St. Guillaume Pinchon (1220–34), who protected the rights of the episcopate against Pierre Maucier, Duke of Brittany, and was forced to go into exile for some time at Poitiers; Jean du Tillet (1553–64), later Bishop of Meaux; and Denis de La Barde (1641–75).

DIACROIS OF TRÉGUIER.—St. Tudual, nephew of St. Brieuc, was appointed by the latter at the close of the fifth century, superior of the monastery of Tréguier, which he had founded. The biography of St. Tudual, composed after the middle of the ninth century, relates that King Childebert had him consecrated Bishop of Tréguier, but Mgr Duchesne holds that it was King Nomenoe who, in the middle of the ninth century, raised the monastery of Tréguier to the dignity of an episcopal see. The Diocese of Saint-Brieuc and Tréguier pays special honour to the following saints: St. Jacut, first Abbot of Landouart (died about 440); St. Mandes, member of a princely Irish family (sixth century); St. Briac, disciple of St. Tudual, founder of the monastery around which the town of Boulbriac grew up (sixth century); St. Osanna, an Irish princess, who took refuge and died near Saint-Brieuc (seventh century); St. Maurice of Cornwall (1117–91), founder and first Abbot of Carnoet, in the Diocese of Quimper; St. Yves (1253–1303), born near Tréguier, ecclesiastical judge of the Diocese of Rennes, then of the Diocese of Tréguier, where he gained the name of "advocate of the poor". He was patron of the lawyers' confraternity, erected at Paris in the church of St. Yves des Bretons. His tomb, destroyed during the Revolution, was re-erected in 1890 in the cathedral of Tréguier, whither it draws many pilgrims. Numerous synods were held at Tréguier in the fourteenth and fifteenth centuries, and passed important regulations for the discipline of the Breton churches. Among the natives of the Diocese of Saint-Brieuc are: Duclos (b. 1704; d. 1772), the historian of Louis XI (b. at Dinan); Ernest Renan (b. at Tréguier, 1823; d. 1892). The Benedictine historian Dom Lobineau died at the Abbey of St. Jacut, 1727. The town of La Roche Derrien, in the diocese, was the scene of the great battle between Jean de Montford and Blessed Charles of Blois (1346), after which the latter was taken as prisoner to England.

The principal pilgrimages in the Diocese of Saint-Brieuc are: Notre-Dame de Bon Secours at Quimsanp the sanctuary of which was enriched by the munificence of the Dukes of Brittany; Notre Dame d'Espérance, at Saint-Brieuc, a pilgrimage dating from 1848; Notre Dame de La Fontaine at Saint-Brieuc, dating from the establishment of an oratory by Saint-Brieuc, and revived in 1893 to encourage devotion to that saint; Notre Dame de Quyauté,
near St-Nicholas du Pélém; Notre Dame de La Ronce, at Rostreren, a sanctuary raised to the collegiate dignity by Sixtus IV in 1483. Before the revolution of 1801 against the congregations there were in the Diocese of Saint-Brieuc, 330 parishes, and the following were founded in 1836 by Abbé Fleury, their mother-house at Broons; the Filles de La Providence, a teaching body, founded by Abbé Jean-Marie de Lernamais, with its mother-house at Saint-Brieuc; the Filles de La Divine Providence, teachers and hospitaliers, with their mother house at Crenen. The Foundation of the Monaster of St-Pater in the year 1800 at St Joseph des Châtelets, near St-Brieuc, to assist the missionaries. It has (1911) a seminary to prepare sisters for the foreign missions; and eight houses of the institute have been established in China, India, Japan, Canada, Belgian Congo, and Mexico. At the close of the 19th century the religious congregations directed in the diocese of Saint-Brieuc, 1 crèche, 33 schools, 1 school for the deaf and dumb, 2 boys' orphanages, 13 girls' orphanages, 1 refuge for poor girls, 1 penitentiary for boys, 7 homes for the poor, 13 hospitals or hospices, 6 houses of nuns devoted to nursing the sick in their own houses, 2 houses of retreat, 1 hospice for incurables, and 2 asylums for the insane. At the time of the destruction of the Concordat (1905) the Diocese of Saint-Brieuc contained 600,349 inhabitants, 45 parishes, 354 curvular parishes, 395 vicarates, towards the support of which the State contributed.

Saint-Claude, Diocese of (Sancti Claudini).—The Diocese of Saint-Claude comprised in the eighteenth century only twenty-six parishes, subject previously to the Abbey of Saint-Claude, and some parishes detached from the Dioceses of Besançon and Lyon. By the Concordat of 1802, the territory of this diocese was included in that of Besançon. Later the Concordat of 1817 re-erected the Diocese of Saint-Claude, giving it as territory the Department of Jura, and made it a suffragan to Lyon. The Abbey of Saint-Claude, the cradle of the diocese, was one of the most distinguished in the Christian world. Between 425 and 430 the hermits Saint Romanus and Saint Lupicin withdrew into the desert of Condat, where Saint-Claude now stands, and there founded their monastery of Condat; other monks were attracted to them, the land was cleared, and three new monasteries were founded: those of Lauconne, on the site of the present village of Saint Lupicin; La Balme, where Yole, the sister of Sts. Romanus and Lupicinus, assembled her nuns; and Romainmoutier, in the parish of Vaulx. After the death of St. Romanus (d. about 460), St. Lupicinus (d. about 480), St. Mimausus, St. Oyent (d. about 510), St. Antidius, St. Olympus, St. Sapiens, St. Thalasius, St. Dagamond, St. Aderic, and St. Injuriosus were abbots of Condat, which was distinguished also by the virtues of the holy monks, St. Sabinian, St. Palladius, and St. Valentine (fifth century), St. Ligarius, St. Hymentius, and St. Pustius. The rule which was followed at the beginning in the monastery of Condat was drawn up between 510 and 515 and adopted by the great monastery of Agena; later the rule of St. Benedict was introduced at Condat. Flourishing schools arose at once around Condat and from them the famous schools of Metz, Reims, and St. Vivien, and Archbishop of Lyons. In the early years of the sixth century the peasants who gathered around the monastery of Condat created the town which was to be known later by the name of Saint-Claude.

The Life of St. Claudius, Abbot of Condat, has been the subject of much controversy. Dom Benoit says that he lived in the seventh century; that he had been Bishop of Besançon before being abbot, that he was fifty-five years an abbot, and died in 694. He left Condat in a very flourishing state to his successors, among whom there were a certain number of saints: St. Rusticius, St. Aurelius (d. 678), St. Attarctus (d. 778), St. Vulfredus, St. Bertrand, St. Riber, all belonging to the eighth century. Carman, uncle of Charlemagne, went to Condat to become a religious St. Martin, a monk of Condat, was martyred by the Saracens probably in the time of Charlemagne. This emperor was a native of the region of Condat; one of the diplomas was given to the monks of Saint-Claude, and now preserved in the Juro archives, dealing with the temporal interests of the abbey, have been found by M. Poupard to be forgeries, fabricated without doubt in the eleventh century. A monk named Venance, Monk of the Abbey of Condat, with the help of manuscripts, was, about 874, appointed by Charles the Bald, Bishop of the Palace School, where he had among his pupils, St. Radbod, Bishop of Utrecht. Two abbeys of Condat, St. Remy (d. 875) and St. Aurelian (d. 895), filled the archiepiscopal See of Lyon. In the eleventh century the renown of the Abbey of Condat was increased by St. Stephen of Besse (d. 1116) and by St. Simon of Crepy (b. about 1048), a descendant of Charlemagne; this sainthood was brought up by Mathilda, wife of William the Conqueror, who made Count of Valois and Vexin, fought against Philip I, King of France, and then against Richard Coeur de Lion. He afterwards founded the monastery of Mouthe, went to the court of William the Conqueror to bring about his reconciliation with his son, Robert, and died in 1060.

The body of St. Claudius, which had been concealed at the time of the Saracen invasions, was discovered in 1160, visited in 1172 by St. Peter of Tarentaise, and solemnly carried all through Burgundy before being brought back to Condat. The abbey and the town, theretofore known as St. Oyent, were thenceforward called by the name of Saint-Claude. Among those who made a pilgrimage to Saint-Claude were Philip the Bold, Duke of Burgundy, in 1369, 1376, and 1382, Philip the Good in 1422, 1442, and 1443, Charles the Rash in 1461, Louis XI in 1456 and 1482, Blessed Amadeus IX, Duke of Savoy, in 1471. In 1500 Anne of Brittany, wife of Louis XII, went there in thanksgiving for the birth of her daughter, Claude. The territory of Saint-Claude formed a veritable state; it was a member of the Holy Empire, but it was not a fief, and was independent of the Countship of Burgundy. In 1291, Rudolph of Hapsburg named the dauphin, Humbert de Vienne, his vicar, and entrusted him with the defense of the monastery of Saint-Claude. The last abbot of Saint-Claude became a kind of Chapter, to enter which it was necessary to give proof of four degrees of nobility. The system of "commendam" proved injurious to the religious life of the abbey. Among the com-
mandatory abbots of Saint-Claude were Pierre de la Baume (1510–44) during whose administration Geneva fell away; Donatus of Austria, natural son of Philip IV (1645–79), and Cardinal d'Estrees (1681–1714). The Abbey of Saint-Claude and the lands depending on it became French territory in 1674, on the conquest of La Franche-Comté. At that time, such was the devotion to St. Claudius that the inhabitants of La Franche-Comté took him as their patron saint, and associated him everywhere with St. Andrew, the first patron of the Burgundians. Benedict XIII prepared and Benedict XIV published a Bull on 22 January, 1742, decreeing the secularization of the abbey and the erection of the episcopal See of Saint-Claude. The bishop, who bore the title of arch-bishop, inherited all the seigniorial rights of the abbey. Moreover the bishop and the canons continued to hold the dependents of the old abbey as subject to the mortmain, which meant that these men were incapable of disposing of their property. The lawyer, Christian, in 1770, waged a very vigorous campaign in favour of six communies that protested against the mortmain, and disputed the claims of the canons of Saint-Claude to the property rights of their lands. Voltaire intervened to help the communies. The Parliament of Besançon, in 1775, confirmed the rights of the Chapter; but the agitation excited by the philosophers apropos of these subjects to the mortmain of Saint-Claude, was one of the signs of the approaching French Revolution. In March, 1794, the body of St. Claudius was burnt by order of the revolutionary authorities.

Dole, where Frederick Barboressa constructed in the twelfth century an immensely strong castle in which he resided from time to time, but which has now disappeared, and where Philip the Good, Duke of Burgundy, established in 1422 a parliament and a university—transferred in 1691 to Besançon by Louis XIV—deserves mention in religious history. The Jesuits opened at Dole, in the sixteenth century, a celebrated establishment known as the Collège de l’Arc, the most important in France after the Collège de la Fèche. Anne de Saintonge (1567–1621) founded there an important branch of the Ursulines, which left its mark in the history of primary education in France. The college was closed by the Revolution (1802–05), was a native of Dole. Among the saints connected with the history of the diocese are: St. Anatolian, Bishop of Adana in Cilicia, who died a hermit near Salins in the diocese (fifth century); St. Lautenetus (477–547), founder of the monastery bearing his name; St. Bernond, who established the Benedictine abbey of Gigny and rebuilt in 926 the Benedictine abbey of Baume-les-Moines (ninth–tenth century); St. Colette of Corbie (1381–1447) (q. v.), foundress of the Poor Clare convent at Poligny, in which town her relics are preserved; her friend Blessed Louise de Savoy (1462–1503), niece of Louis XI, King of France, and daughter of Blessed Amadeus, Lord of Savoy, was Hugue de Chalon, Lord of Nozeroy, then a Poor Clare in the monastery of Orbe founded by St. Colette; her relics were transferred to Nozeroy and afterwards to Turin; Blessed John of Ghent, surnamed the hermit of Saint-Claude, celebrated in the fifteenth century for his prophecies in 1421 and 1422 to Charles VII and Henry V, King of England, relative to the deliverance of France and the birth of a dauphin; St. Francis de Sales; Sté Jane de Chantal, whose important interview at Saint-Claude in 1604 determined the foundation of the Visitacion order; Venerable Frances Monet, in religion Françoise de Saint-Joseph (1589–1669), Carmelite nun at Avignon and miracle worker, born at Bonas in the diocese; and associated with Pierre Frances Neron, martyr, a native of the diocese (nineteenth century).

The principal pilgrimages in the Diocese of Saint-Claude are: the Church of St-Pierre at Baume-les-Moines, where numerous relics are preserved; Notre-Dame-de-Mont-Roland, end of the eleventh century; Notre-Dame-Miracleuse, at Bletterans, 1490; Notre-Dame-de-la-Balme, at Epy, sixteenth century; Notre-Dame-Libératrice, at Salins, 1639; Notre-Dame-de-Miéges, 1699; Notre-Dame-d’Ermitage, at Arbos, seventeenth century; Notre-Dame-du-Chêne, at Cousance, 1774. Before the application of the Law of 1901 against the congregations there were in the Diocese of Saint-Claude, Jesuits, and various teaching orders of brothers; the Trappists still remain there. Among the congregations of nuns which were first founded in the diocese are: the Sœurs du Saint-Esprit, teachers and hospitaliers, with their mother-house at Poligny, and the Sisters of the Third Order of St. Francis of the Immaculate Conception, teachers and hospitaliers, with their mother-house at Lons-le-Saunier. At the close of the nineteenth century the religious congregations directed in the diocese 39 day nurseries, 2 asylums for invalids, 6 boys’ orphanages, 4 girls’ schools, 1 home for the poor, 1 asylum for Magdalenes, 14 hospitals or hospices, 3 dispensaries, 23 houses of nuns devoted to nursing the sick in their own homes, 1 house of retreat, 2 hospices for incurables, and 1 asylum for the insane. At the end of the Concordat period (1906), the Diocese of Saint-Claude contained 261,288 inhabitants, 34 parishes, 356 succursal parishes, 24 vicariates, towards the support of which the State contributed.

**Saint Cloud, Diocese of (Santi Claudio,)** suffragan of the Archdiocese of St. Paul, Minn., comprises the counties of Stearns, Sherburne, Benton, Morrison, Mille Lacs, Kanabec, Grant, Pope, Stevens, Isanti, Traverse, Douglas, Wilkin, Otter-Tail, Todd, Wadena, in the State of Minnesota, an area of 2,251 square miles. The bishop resides in St. Cloud, Stearns county. In 1680 Father Hennepin visited the Indians at Mille Lacs, and for one hundred and seventy years no other priest came to these regions. In 1851, when this part of Minnesota was opened to white settlers, the history of the Diocese of St. Cloud begins.
In 1852 Rev. Francis Piers (Pirc), a native of Carniola, Austria, came from his former Indian missions at Lake Superior to Minnesota to labour among the Chippewa Indians. Finding the country well adapted to agriculture, he announced the fact in some Catholic German papers, and thus caused a large immigration of German Catholics, especially to Stearns county. In 1856 Bishop Cretin of St. Paul sent three Benedictines, Fathers Demetrius de Marogna, Cornelius Wittmann, and Bruno Risé, to attend the ever-increasing population. They lived on a piece of land near the present city of St. Cloud, where they built a small log house and chapel. In 1857 they erected a college, and opened a school with five pupils. A change of location, however, was desirable, hence the land was secured around St. John’s Lake, and in 1868 a college and monastery were permanently established. They have now flourishing parishes and a university with more than three hundred students. The first abbot, Rt. Rev. Rupert Seidenbusch, was made Vicar Apostolic of Northern Minnesota (1875). He resided in St. Cloud until 1888 when, on account of poor health, he built the present provincial cathedral and died 3 June, 1895. The present Diocese of St. Cloud was created in 1889 with Rt. Rev. Dr. Otto Zardetti as its first bishop. Dr. Zardetti, a native of Switzerland, was born 24 Jan., 1846. He was ordained priest 21 Aug., 1870, and in 1881 became professor of dogma in the St. Francis Seminary, near Milwaukee. In 1886 he was made vicar-general of Bishop Marty of Yankton. As Bishop of St. Cloud, he was extremely active, and renowned as a pulpit orator. In Feb., 1894, he was made Archbishop of Bucharest in Rumania and died at Rome 9 May, 1902. When he took charge of the Diocese of St. Cloud, he found about 30,000 souls in the charge of 69 priests, 62 religious and 17 deaconesses. When he resigned, there were about 40,000 souls in the charge of 33 secular priests and 16 religious, besides 19 religious in the monastery. His successor was Rt. Rev. Martin Marty, O.S.B., also a native of Switzerland. In 1879 he was appointed Vicar Apostolic of Dakota, residing in Yankton, in 1889 first Bishop of Sioux Falls, South Dakota, and 31 Dec., 1894, was transferred to St. Cloud. He took charge of the new see 12 March, 1895, but died 19 Sept., 1896. Rt. Rev. Mgr. Jos. Bauer was administrator of the diocese until 29 Sept., 1897, when the present bishop, James Trobec, arrived as third bishop of the diocese. There are about 62,000 souls; 125 priests, 78 secular and 47 religious; 115 churches and 12 chapels; 1 university; 2 academies; 4 hospitals; 1 home for old people; 1 orphan asylum; parochial schools wherever possible. The religious communities represented in the diocese are the Benedictines and the Holy Cross Fathers; the Benedictine Sisters, who number about 400 and have charge of parochial schools, a hospital, and a home for the aged; the Sisters of St. Francis, who have charge of an orphan asylum and three hospitals; the Sisters of St. Mary of the Presentation.

The Diocesan Chronicle.

JAMES TROBEC.

Saint-Cosme, Jean François Busson (Bisson) de B, in Quebec, Canada, February, 1967; killed, 1707. Entering the Séminaire des Missions Etrangères of Quebec, he was ordained in 1690 and after serving for a time at Minas, Nova Scotia (then Acadia), was assigned to the western mission. He laboured for a time at the Cahokia (Tamaroa) mission in Illinois, until succeeded by Father Jean Bergier, probably about 1698, after which he followed Fathers Montigny and Davion, of the same seminary, to the lower Mississippi, and took up his residence among the Natchez. After the present Natchez, Mississippi, establishing the first mission in the tribe, apparently about the end of 1699. The tribes of this region, however, were generally obdurate and neither secular mis-

Saint-Denis, Abbé de See Duvergier de Hauranne, Jean.

Saint-Denis, Abbey of, is situated in a small town, to which it has given its name, about four miles north of Paris. St.-Denis (Dionysius), the first Bishop of

Paris, and his companions, martyred in 270, were buried here and the small chapel built over the spot became a famous place of pilgrimage during the fifth and sixth centuries. In 630 King Dagobert founded the abbey for Benedictine monks, replacing the original chapel by a large basilica, of which but little now remains. He and his successors enriched the new foundation with many gifts and privileges and, possessing as it did the shrine of St.-Denis, it became one of the richest and most important abbeys in France. In 653 it was made exempt from episcopal jurisdiction. A new church was commenced in 750 by Charlemagne, at the consecration of which Christ, according to popular tradition, was supposed to have assisted in person. During the ninth century irregularities crept in and the monks transformed themselves into canonos with a relaxed rule. Abbot Hilduin tried in vain to
reform them and was obliged to retire for a time, with a few of the more fervent monks, to a neighbouring priory. At length, however, he succeeded in bringing about a better state of the great and was able to return to the enjoyment of his abbey. From that time forward its splendour and importance continued to increase under the wise rule of a succession of great abbots, to whom the right of pontificia was granted by Alexander III in 1179. Most famous perhaps amongst these was Suger, the thirty-sixth of the series (1150–53), who was besides ecclesiastic in fact also a great statesman and acted as Regent of France whilst King Louis VII was absent at the Crusades. The present church of St-Denis was commenced by him about 1140 and marks the beginning of the Gothic tendency in architecture and its transition from the Romanesque style. Foundations under succeeding abbots resulted in producing one of the finest Gothic buildings in France (see Gothic Architecture).

The abbey figured prominently in the history of France and its abbots were for several centuries among the most powerful in the kingdom. The "Oriflamme", originally the banner of the abbey, became the standard of the kings of France and was suspended above the high altar, whence it was only removed when the king took the field in person. Its last appearance was at the battle of Agincourt in 1415, when Joan of Arc hung it upon a pike in the triomphe of St-Denis in 1429. Many kings and princes and other noble persons were buried there and three of the Roman pontiffs stayed in the abbey at different times: Stephen II in 754, Innocent II in 1131, and Eugenius III in 1146. Another great abbot, Matthieu de Vendôme, acted as administrator of the kingdom from St. Louis went to the Crusades in 1289. After the Council of Trent the Abbey of St-Denis became the head of a congregation of ten monasteries, and in 1633 it was united, with its dependent houses, to the new Congregation of St-Maur, when its monastic buildings were entirely reconstructed. In 1691 Louis XVI suppressed the abbacy and united the monastery with its revenues to the royal house of noble ladies at St-Cyr, founded by Madame de Maintenon. The abbey was finally dissolved at the revolution, when much damage was done to the church and tombs. It was subsequently restored, under Napoleon III, by Viollet-le-Duc, following the Concordat of 1817. It was re-consecrated to the parish of the town of the church in the summer of 1855, were brought back again to the abbey in 1819. It is now a "national monument" and one of the show-places of Paris. Many of the chartularies and other manuscripts relating to its history are now either in the Archives Nationales or in the Bibliothèque Nationale.

G. CYPRIAN ALSTON.

Saint-Dié, Diocese of (Sanci Deodati), comprises the Diocese of the Voges. Suppressed by the Concordat of 1802 and then included in the Diocese of Nancy, it was re-established nominally by the Concordat of 1817 and confirmed by the Concordat of 1818. It was transferred to the parish of the town of the church in the summer of 1855, were brought back again to the abbey in 1819. It is now a "national monument" and one of the show-places of Paris. Many of the chartularies and other manuscripts relating to its history are now either in the Archives Nationales or in the Bibliothèque Nationale.

Saint-Dié, Diocese of, erected in 1580 as suffragan of Bordeaux, includes the Island of Réunion in the Indian Ocean about 350 miles east of Madagascar. This island is 1000 sq. miles in area, and was discovered by the Portuguese, 8 February, 1513; it was originally called Sancta Appollonia, and later changed to Maccarens from the name of their leader Maccarens. In 1638 a Frenchman named Gaubert hoisted the French flag there, and in 1642 Pronis, representing the Compagnie de Lorient, took possession of it in the name of the King of France. In 1646 twelve Madagascar colonists who had revolted were transported there, and in 1649 a successor changed the name from Maccarens to Island of Bourbon; from 1654 to 1668 an attempt was made by Antoine Thureau, seven Frenchmen, and six negroes to colonize the west coast; in 1665 Regnault, who had been appointed governor of the island by the King, arrived with three ships bringing 20 labourers, a merchant, and 200 sick people, the first colonists of the island. The first aposles of Réunion were P. Louis de Matos, a Portuguese, who on his return journey from Brazil built the chapel of Our Lady of the Angels (1667), and P. Jourdité, a Lazarist father, who remained on the island from 1667 to 1670. In 1674 P. Bernardin, a Capuchin, arrived from India; he drew up laws for hunting, planted cotton, taught the young girls to sew and spin, and was governor of the island from 1685 to 1689. In 1689 he went to France to lay the needs of the island before Louis XIV. In 1703 Cardinal Maffi de Tournon, on his way to India, called at Réunion and administered confirmation.

In 1711 Clement XI entrusted the island to Lazarist missionaries, who began work there in 1714. In 1848 the island took the name of Réunion, slavery was abolished, and two years later the see was established. The first bishop was Julien Desprez (1850–57), afterwards Archbishop of Toulouse and cardinal. In 1857 in the order of S. Clément, the Bishop of Laval, Alexander Clerc, afterwards became Jesuit: Clerc died a victim of the Paris Commune. Gaultié, a midshipman on the same vessel, in after life became a Carthusian. The Church is known, in fact, by the name of the Church of the Fathers of the Holy Ghost and Saint Hilaire, of which the whole population is 173,000, of whom there are 73 parishes and 74 priests.

GEORGES GOYAT.

Saint-Dié, Diocese of (Sanci Deodati), comprises the Diocese of the Voges. Suppressed by the Concordat of 1802 and then included in the Diocese of Nancy, it was re-established nominally by the Concordat of 1817 and confirmed by the Concordat of 1818. It was transferred to the parish of the town of the church in the summer of 1855, were brought back again to the abbey in 1819. It is now a "national monument" and one of the show-places of Paris. Many of the chartularies and other manuscripts relating to its history are now either in the Archives Nationales or in the Bibliothèque Nationale.

G. CYPRIAN ALSTON.
Martin (disciples of St-Dié), Abbot Spinulus (Spin), John the priest, and the deacon Benignus (disciples of St. Ridelphus) are honoured as saints. In the tenth century, the discipline of the Abbey of St-Dié grew lax, and Frederick I, Duke of Lorraine, expelled the Benedictines, replacing them by the Canons Regular of St. Augustine. Gregory V, in 996, agreed to the change and decided that the grand priory, the principal dignity of the transformed abbey, should be held directly on the Holy See.

During the sixteenth century, profitting by the long vacancy of the See of Toul, the abbots of the several monasteries in the Vosges, without actually declaring themselves independent of the Diocese of Toul, claimed to exercise a quasi-episcopal jurisdiction as to the origin of which, however, they were not agreed; in the eighteenth century they pretended to be nulla diocesis. In 1718, Thierry de Bissy, Bishop of Toul, requested the erection of a see at St-Dié; Leopold, Duke of Lorraine, was in favour of this step, but the King of France opposed it; the Holy See refrained for the time from action. In 1777, a Bull of Pius VI erected the abbey of St-Dié into an episcopal see, and cut off from the Diocese of Toul (see Nancy-Dioecese or the new Diocese of St-Dié), which, until the end of the old régime, was a suffragan of Trier. Louis Caverot, who died as Cardinal Archbishop of Lyons, was Bishop of St-Dié from 1849 to 1876.

The Abbey of Remiremont was founded about 620 by Saint Romaric, a lord at the court of Clotaire II, who, having been converted by Saint Amé, a monk of Luxeuil, took the habit at Luxeuil; it comprised a monastery of monks, among whose abbots were Sts. Amé (570–626), Romaric (580–653), and Adalphe (d. 670), and a monastery of nuns, and numbered among its abbesses St. Maetefeldi (d. about 622), Claire (d. about 652), and Gébétrude (d. about 673). At a later period the Benedictine nuns were replaced by a chapter of ninety-eight canonesses who had to prove 200 years of nobility, and whose last abbess, under the old régime, was the Princess de Bourbon Condé, sister of the Duke of Enghien; she was prioress of the Monastery of the Temple at her death.

Besides the saints mentioned above and some others, bishops of Nancy and Toul, the following are honoured in a special manner in the Diocese of St-Dié; St. Sigisbert, King of Austria (630–96); St. Germain, a hermit near Remiremont, a martyr, who died Abbot of Grandval, near Basle (617–70); St. Hunna, a penitent at St-Dié (d. about 672); St. Dagobert II, King of Austrasia, slain by his servant Grimodal (679) and honoured as a martyr; St. Modesta, a nun at Remiremont, afterwards foundress and abbess of the monastery of Horren at Trier (seventh century); St. Goery, Bishop of Metz (d. about 642), whose relics are preserved at Epinal and who is the patron of the butchers of the town; St. Simeon, Bishop of Metz (eighth century), whose relics are preserved at Senones; Sts. William and Achery, hermits near Ste Marie aux Mines (ninth century); St. Richard (849–96), wife of Charles the Fat, who died as Abbess of Andlau in Alsace; Blessed Joan of Arc, b. at Domremy in the diocese; Venerable Mère Alix le Clerc (b. at Remiremont, 1576; d. 1622) and St. Peter Fourier (b. at Mercier, 1553; d. 1640), curé of Mattaincourt, who founded the Order of Notre-Dame. Elisabeth de Ranfaing (b. at Remiremont, 1592; d. 1649) founded in the Diocese of Toul the congregation of Our Lady of Refuge; Catherine de Bar (b. at St-Dié, 1614; d. 1698), known as Mère Mechtilde of the Blessed Sacrament, at first an Annunciade nun and then a Benedictine, founded at Paris, in 1654, the Order of the Benedictines of the Perpetual Adoration of the Blessed Sacrament; following in her footsteps Elizabeth Brem (1609–68), known as Mother Benedict of the Passion (1609–68), a Benedictine nun at Rambervilliers, established in that monastery the Institute of the Perpetual Adoration. The remains of Brother Joseph Formet, known as the hermit of Ventron (1724–84), are the object of a pilgrimage. Venerable Jean Martin Moye (1730–93), founder in Lorraine of the Congrégation de la Providence for the instruction of young girls and apostle of Su-Tchuen, was director for a brief period of the seminary of St-Dié, and established at Basse, in the diocese, one of the first novitiates of the Sœurs de la Providence (hospitallers and teachers), whose mother-house at Portieux ruled over a large number of houses before the Law of 1901.

Grandelaude, a village teacher who was sent to the Roman College in 1857 by Bishop Caverot, contributed, when a professor in the grand séminaire of St-Dié, to the revival of canon law studies in France. It is interesting to note how at St-Dié, about the beginning of the sixteenth century, the newly-discovered continent received the name of America. Vautrin Lud, Canon of St-Dié and chaplain and secretary of René II, Duke of Lorraine, set up a printing-establishment at St-Dié in which two Alsatian geographers, Martin Waldsemüller and Mathias Ringmann, began at once to produce an edition of a Latin translation of Ptolemy's "geography". In 1507 René II received from Lisbon the abridged account written in French, of the four voyages of Vespucci.

Lud had this translated into Latin under the title de san- daucourt. The printing of the translation was completed at St-Dié on 24 April, 1507; it was prefaced by a short writing entitled "Cosmographie introductio", certainly the work of Waldsemüller and was dedicated to Emperor Maximilian. In this preface Waldsemüller proposed the name of America. A second edition appeared at St-Dié in August, 1507, a third at Strasbourg in 1509; and thus the name of America was spread about. The work was re-edited with an English version by Charles G. Herbermann (New York, 1907). M. Gallois has proved that in 1507 Waldsemüller inserted this name in two maps, but that in 1513, in other maps, Waldsemüller, being better
informed, inserted the name of Columbus as the discoverer of America. But it was too late; the name of America had been already firmly established.

The principal pilgrimages of the diocese are: Notre-Dame de St-Dié, at St-Dié, at the place where St. Dié erected his first sanctuary; Notre-Dame du Trésor, at Remiremont; Notre-Dame de Consolation, at Epinal; Notre-Dame de la Bresse, at Bains; Notre-Dame de Bermond, near Domremy, the sanctuary at which Joan of Arc was prayed; and the tomb of St. Peter Fourrier at Mattaincourt. There were in the diocese before the application of the Law of

Saints-

Charles, geologist, b. at St. Thomas, West Indies, 26 February, 1816; d. in Paris, 10 October, 1876. Going to Paris at an early age, he entered the Ecole des Mines and studied there. His first work in the scientific field included a series of explorations in the Antilles, in which he gave special attention to seismic and volcanic phenomena. He returned in 1855, and three years later visited Vesu

us and Stromboli in pursuit of his volcanic studies. He evolved the theory that volcanic eruptions are due to the entrance of sea water into the fissures of the earth's crust; coming in contact with hot rocks, it produces the explosive and eruptive manifestations. This was confirmed in his mind by the fact that so many volcanoes are near the sea.

He became a member of the Académie des Sciences of Paris. He was an assistant to Elie de Beaumont in the Collège de France, and succeeded him as professor in 1875. Previous to this (in 1872) he had been made Inspector General of the Meteorological Service.

He established a chain of meteorologic stations through France and Algeria, and was first president of the observatory in Montsauzous, one of this chain. He replaced Dufrémy in the Académie des Sciences. He also did much work in chemistry, notably in the analysis of minerals and also in molecular physics. Since 1862 he had been an officer of the Legion of Honour. His works, including the popular works "Comptes Rendus" and in the "Annales de Chimie", are very numerous; the most important are the following: "Etudes géologiques sur les îles de Ténériffe et de Fogo" (1844); not completed; "Voyage géologique aux Antilles et aux îles de Ténériffe et de Fogo" (1847); "Lettres à M. Elie de Beaumont sur l'Eruption du Vésuve"; "Comptes Rendus de l'Académie des Sciences" (1855); "Éruptions actuelles du volcan de Stromboli"; "Recherches sur les principaux phénomènes de météorologie et de physique terrestre aux Antilles" (1861).

Saints-

Claire Deville, Henri-Étienne, chemi-
ist, b. at St. Thomas, West Indies, 11 March, 1818; d. at Boulogne, 1 July, 1881; brother of the preceding. Finishing his classical studies in Paris, he built himself a laboratory there and worked for eight years without teachers or students. He acquired much fame by his laboratory and in 1844 the government entrusted him with the organization of the faculty of sciences of Besançon. He was professor of chemistry in Besançon from 1845 to 1851. In 1851 he was called to Paris as maître de conférences in the Ecole Normale Supérieure, replacing Baland. In 1853 he replaced Dumas in the Sorbonne and succeeded him as professor in 1859. In 1861 he was made a member of the Academy of Sciences. His work in mineral chemistry entitles him to be considered one of the great chemists of the second half of the nineteenth century. He discovered the phenomenon of dissociation, his first notion of this going back to 1857. He discovered nitrogen pentoxide, the anhydride of nitric acid. Woehler, the greatest person in the world, discovered nitrogen oxide, in 1827. Debye was working in the metallurgy of the metal, and devised a means of preparing it by decomposing aluminum sodium chloride with metallic sodium. This was the first commercial process of producing the metal, which was for some time almost a curiosity, but whose uses are now so extensive. Napoleon III was greatly interested in the metal, the "silver of clay." Debye was associated with him in his work; and it is interesting to see how, after over fifty-six years, the metal has been introduced on a large scale into industrial use. In the technical field he worked

REDUCED FACSIMILE PAGE OF THE COSMOGRAPHIE INTRODUCTIO, PRINTED IN 1507

The second paragraph advocates the adoption of America as the name of the New World 1901 against the congregations: Canons of Lateran; Clerks Regular of Our Saviour; Eudistes; Franciscans; Fathers of the Holy Ghost and the Holy Heart of Mary; various teaching orders of brothers.

Among the congregations of nuns founded in the diocese may be mentioned, besides the Sisters of Providence, the Sœurs du Pauvre Enfant Jésus (also known as the Sœurs de la bienfaisance chrétienne), teachers and hospitalers, founded in 1854 at Charmony l'Orgueilheux; the mother-house was transferred to Remiremont. At the close of the nineteenth century the religious congregations in the diocese directed: 718; 56 day nurseries; 1 orphanage for boys and girls; 19 girls' orphanages; 13 workshops; 1 house of refuge; 4 houses for the assistance of the poor; 36 hospitals or hospices; 11 houses of nuns devoted to the care of the sick in their own homes; and 1 insane asylum. The Diocese of St-Dié had, in 1905 (at the time of the capture of the Concorde), 421,104 inhabitants; 32 parishes; 354 successual parishes; and 49 vicariates, supported by the State.

T. O’CONOR SLOANE

Saint Edmund, College of. See Old Hall.

Sainte-Geneviève, Abbey of, in Paris, was founded by King Clovis who established there a college of clerics, later called canons regular. How long these clerics observed the regular life is unknown, but in 1147 secular canons officiated in the church.

King Louis VII and Pope Eugene III, having witnessed some disorders, determined to restore the regular discipline and at first thought to call monks, but as the canons preferred some of their own order, the pope consented. At the request of Sugerus and St. Bernard, Gildwin, the first Abbot of St-Victor’s, where the canonical rule had been recently established, consented to send Odo, the Prior of his abbey. There were difficulties, but order finally prevailed and some of the canons joined the reform. Among these was the young Canon William, already known for his virtues and learning. At the request of Ablasus, Bishop of Rolland, William, who when a student at Ste-Geneviève’s had known him, William was sent to that country to reform the monastery of canons in the Isle of Easkil. In spite of untold trials, obstacles, and persecutions he succeeded in his enterprise and founded another monastery, which he dedicated to the Holy Paraclete. He died in 1206, and was canonized by Honorius III. It was natural that close relations should exist between Ste-Geneviève’s and its foundations in Denmark. Peter, a young man who made his profession at the abbey, became Bishop of Roskild; Valdemar, brother of King Knut, died at Ste-Geneviève’s; and Abbot Stephen of Tournai wrote to William and his friends to obtain lead for the roof of his abbey.

Like the Abbey of St-Victor, Ste-Geneviève’s became a celebrated seat of learning. St-Victor’s, Ste-Geneviève’s, and Notre-Dame were the cradles of the University of Paris. Abelard at different epochs lectured in this abbey-school. By right and custom the two sister-abbies frequently exchanged subjects. Peter de Ferrières, Abbot of St-Victor’s, was at one time prior of Epinay, a priory of Ste-Geneviève’s; William of Auxerre, a professed canon of St-Victor’s in 1254, held the office of cellarer, and became Abbot of Ste-Geneviève’s; and Marcel, a successively canon at St-Victor’s and Ste-Geneviève’s, was in 1198 made Abbot of Cisioing. Like most religious houses, this abbey, falling into the hands of abbots in commendam, relaxation and disorders were the consequence. In the beginning of the seventeenth century Cardinal de La Rochefoucauld undertook its reform. He brought from Sens a holy man, Charles Faure, who had already restored the canonical rule in the ancient Abbey of Silvanet. Once more the Rule of St. Augustine was faithfully observed at Ste-Geneviève’s, which became the mother-house of the Gallican congregation. Charles Faure died in 1644. The second visit of the abbey was perhaps even more glorious than the first. By the middle of the seventeenth century the abbots-general of the congregation had under his jurisdiction more than one hundred abbeys and priories. Men like Fronteau, chancellor of the university and author of many works, Leclerc, Chappelet, Reginier, Chengot, Bouyer, du Moulinet, founder of the national library, and Augustine Hay, a Scotchman who wrote the "Scotia sacra" and officiated at Holyrood, Scotland, in 1687, were sons of the French congregation. When in 1790 the revolutionary assembly declared all religious vows void, and opened the doors of all the monasteries, there were the châteaux and the thirty-nine canons at Ste-Geneviève’s. This was the end of that illustrious abbey and school.

Sainte-Marthe, Scâvole and Louis. See Gallia Christiana.

Saintes, Ancient See of. See La Rochelle, Diocese of.

Saint-Flour, Diocese of (Floropolis), comprises the Department of Cantal, and is suffragan of the Archdiocese of Bourges. Re-established by the Concordat of 1802, by which the Department of Haute-Loire was brought into this diocese, this department was dedicated to it in its re-establishment of the See of Le Puy. The tradition relative to St. Florus (Flour), who is said to have been the first Bishop of Lodève and to have died at Indiciat (later Saint-Flour) while evangelizing Haute-Auvergne, have been the subject of numerous discussions. In two documents concerning the foundation of the monastery of St-Flour, drawn up in 1013 and 1031, and in a letter written to Urban IV in 1261 by Pierre de Saint-Haon, prior of Saint-Flour, St. Flour is already considered as belonging to the Apostle times, and the "Speculum sacerdotalis" of Bernard Guir in 1529 relates at length the legend of this "disciple of Christ". M. Marcellin Boudet believes it more likely that St. Flour lived in the fifth century, and that it was he who attended the Council of Arles in 450 or 451.

At the close of the tenth century there was already a monastery at Indiciat. A local seigneur, Astorg de Brezons, surnamed "le Mal Hiverné", seized the monastery and destroyed all of it except the church. Amblard and Astorg, from 1010 to 1013, gave this church and its site to St. Peter’s at Rome; together with the monastery of Sauxillages, governed by Odilo; but later Amblard considered this donation as void, and constructed a fortress, a remnant of which is now the sacristy of the cathedral, upon the site of the old monastery; afterwards Amblard, seized with remorse at Rome, between 1025 and 1031 gave back
to Odilo all he possessed, and a large monastery was again founded. Urban II, after the Council of Clermont (1095), consecrated the church of this new monastery. The church collapsed in 1396, and no remains of it exist. Pope Calixtus II passed some time there. In August, 1317, John XXII detached Haute-Auvergne from the See of Clermont and raised St-Flour to the rank of a bishopric, the first ordinary of which was his chaplain Raymond de Montuelle. Among his successors were: Pierre d’Estaing (1361-67), afterwards Archbishop of Bourges and cardinal in 1370; Louis-Siffrein-Joseph de Salamon (1820-29), former councilier-clerc to the Parliament of Paris, who during the Revolution had secretly acted in France as the pope’s agent, a rôle concerning which he has left very important memoirs.

The Abbey of Aurillac was celebrated: it was founded by St. Géraud, Count of Aurillac, who in 898

![The Cathedral, Saint-Flour](image)

brought thither monks from Vabres; it soon became well known, according to John of Salisbury, as a centre of literary and scientific studies: Gerbert (later Sylvester II), and Guillaume d’Auvergne, friend and confidant of Saint Louis, studied there. St. Odo, Abbot of Cluny, from 926 to 943, was at first a monk at Saint-Pierre de Mauriac, and, according to some, Abbot of Aurillac. St. Peter Chavanon, founder in 1062 of the monastery of Pérac, in the Diocese of Le Puy, was for some time superior of the Abbey of Chazes, near Vic. The tragic poet, de Belloy (1727-95), author of the celebrated tragedy on the Siege of Calais, was born at Saint-Flour. Louis-Antoine de Noailles (1651-1729), Archbishop of Paris, was born at Larochefoucault in the diocese. Abbé Jean Chappe d’Auteroche (1722-69), astronomer, who in 1769 went to California to observe the transit of Venus and died there of a contagious disease, was a native of Mauriac. Abbé de Pradt (1759-1837) was born at Allanche. The Diocese of Saint-Flour is remarkable among the French dioceses for the great number of its sanctuaries and pilgrimages dedicated to the Blessed Virgin. There are sixty-five, of which the following are the more important: Notre-Dame de Claviers, at Ouasages, the statue of which is the most ancient in the diocese; Notre-Dame des Miracles, at Mauriac, sixth century; Notre-Dame de Frodières, at Saint-Flour, eleventh century; Notre-Dame de Laurie, at Laurie, a thirteenth-century sanctuary; Notre-Dame de Bon Seurs at Marmande; Notre-Dame de Quercy, which is visited annually by between 20,000 and 30,000 pilgrims; Notre-Dame de Vau Claire, at Molompae—these three dating back to the twelfth century; Notre-Dame de Valence at Ségur, belonging to the thirteenth century; Notre-Dame de Taurand at Paulhenc; Notre-Dame de Villiedieu, both dating back to the fourteenth century; Notre-Dame de Pitié at Chaudessages; Notre-Dame de Puy Rachat, at Nieuil; Notre-Dame des Oliviers, at Murat, all three dating back to the fifteenth century; Notre-Dame d’Aubespeyre, at Aubespere; Notre-Dame de la Font Sainte, at St. Hippolyte, visited annually by between 10,000 and 12,000 pilgrims; Notre-Dame de Pailhersol; Notre Dame aux Neiges, at Aurillac, all four dating back to the sixteenth century; Notre-Dame de Guèrison, at Enchanan; Notre-Dame de Lesure, both dating back to the sixteenth century.

The “Revue catholique des églises” published in 1905 an interesting monograph of the diocese; it shows that 50 per cent of the men go to Mass each Sunday, 25 per cent go every second Sunday, and 70 per cent fulfill their Easter duty. An interesting work is the “Œuvre des bergers”, which assembles several hundred shepherds from the neighboring regions each year at Pailhersol and La Font Sainte for a day’s religious exercises, the only one which they can have during the five months that they pass alone in the mountains. Before the application of the law of 1901 on the associations, there were in the Diocese of Saint-Flour Lazarists and various brotherhoods of brothers. Some congregations of nuns have their mother-houses in the diocese, in particular: the Sœurs de Saint Joseph, with their mother-house at Saint-Flour; the Petites Sœurs des Malades, with their mother-house at Mauriac; the Sœurs de l’Enfant Jésus, dites de l’Institution; and the Sœurs de la Sainte Famille, with their mother-house at Aurillac. At the close of the nineteenth century the religious congregations directed in the diocese, 1 crèche, 12 refuge halls, 1 school for the deaf and dumb, 1 boys’ orphanage, 6 girls’ orphanages, 1 home for honest poor girls, 1 hospice for chronically incurables in the insane, 1 dispensary, 1 house of retreat, 1 house of nuns devoted to nursing the sick in their own homes, 13 hospitals or hospices. At the time of the destruction of the concordat (1905) the Diocese of Saint-Flour contained 230,511 inhabitants, 24 parishes, 288 successor churches, and 180 vicarates towards the support of which the State contributed.

Georges Goyau.

Saint Francis Mission (properly Saint François de Sales, Quebec), a noted Catholic Indian mission village under Jesuit control near Pierreville, Yamaska district, Province of Quebec, Canada. It was originally established (1683) at the falls of the Chaudière, on the south side of the St. Lawrence, above Quebec, as a refuge for the Abnaki and Pemaquid Indians who were driven from their homes by the wars of that and the subsequent colonial period; these tribes were French in sympathy and, especially
the Abnaki, largely Catholic in religion through the efforts of the Jesuit missionaries. The Algonquin, Montagnais, and Micmac of Canada as well as the Nipmuc and other tribes of New England were also largely represented, but from the final preponderance of the Abnaki their language became that of the mission. In 1700 the mission was removed to its present situation. After the destruction of Norridgewock and the death of Father Sebastian Rassle at the hands of the New England men in 1724, the majority of the Abnaki removed to Canada and settled at Saint Francis, which became thenceforward a centre of Indian hostility against New England. In 1759 a strong New England force under Major Rogers surprised and destroyed the settlement, including the mission church and recording 200 Indian dead. It was soon rebuilt and still exists as one of the oldest mission settlements of Canada. In the war of the Revolution and again in the war of 1812, a number of the men fought on the British side. Among the Jesuit workers at St. Francis the most distinguished name is that of the venerable Father Joseph Aubery, in charge from 1700 until his death in 1755, who before coming to the mission had served ten years with the Micmac of Nova Scotia. Having mastered the Abnaki language he wrote much in it, his most important contribution being a manuscript French-Abnaki dictionary, which is still preserved in the archives of the mission. Owing to the former migratory habit of the Indians the population of the mission varied greatly at different periods, but is estimated to-day (1911) at approximately three hundred souls, all of mixed blood, and more French than Indian in characteristic, although they still retain their old language in their homes. Their chief industry is basket-making, which furnishes a comfortable income. (See also Penobscot Indians; Missions, Catholic Indian, of the United States.—New England.)

JAMES MOONEY.

Saint Gall, Abbey of. See Gall, Abbey of Saint.

Saint Gall, Diocese of (Sangallensis), a Swiss bishopric directly subject to the Holy See. It includes the Canton of St. Gall and, as a temporary arrangement, the two half-cantons of Appenzell Outer Rhodes and Appenzell Inner Rhodes. In 1910 its population was 9,124, of whom 117 parishes; 116 additional cures of souls; 128 Catholic priests; 233 secular priests; 46 regular priests; about 169,000 Catholics; and a non-Catholic population of 152,000. The bishop is elected by the cathedral chapter within three months after the see falls vacant. According to the concordat of the Canton of St. Gall with the Holy See, he must be a secular priest of the diocese and must be approved by the Catholic collegium of the cantonal great council. The bishop has a cathedral chapter of five resident and eight honorary canons, with a cathedral dean as its head. The resident canons have charge of the cathedral services and the care of the cathedral parish, in which they are aided by 3 condutores and 3 vicars. Besides the chapter there is also a vicar-general. For the training of the clergy there is a seminary for priests at St. Gall which, however, is limited to the actual practical seminaries for six months of the students of theology attend for their academic training: the theological faculties of the Universities of Innsbruck and Fribourg in Switzerland. The male orders are represented in the diocese only by 4 Capuchin monasteries. The female orders in the diocese are: 1 house of Benedictine nuns; 2 of Cistercian nuns; 2 of Dominic nuns; 8 of Franciscan nuns; 1 of the Sisters of the Good Shepherd; 2 of the School Sisters of the Holy Cross; 1 of Premonstratensian nuns; 1 of the Italian Missionary Sisters of St. Francis; and numerous houses of Sisters of Charity of the Holy Cross (Ingenbohl Sisters). The most noted church of the diocese is the cathedral, the church of the former Benedictine abbey (see above). Among other places of pilgrimage are: the Wildkirche in, the Santis; the little monastery of Notkersegg, near St. Gall; the parish church at Kirchberg, in the District of Tobgenburg; and Dreibrunnen, near Wil. Catholic associations are highly developed; a Catholic congress is held annually in the diocese. There are 12 Catholic newspapers, of which the "Ostschweiz", published at St. Gall, is the most important.

History.—The Abbots of St. Gall had exercised nearly all the rights of episcopal jurisdiction within their territory. After the suppression of the ancient abbey there was evident need of a reorganization of ecclesiastical affairs, which had sunk into a deplorable decay, and the plan was proposed to replace the abbey by a Diocese of St. Gall. At that era a part of the present territory of the diocese belonged ecclesiastically to the Diocese of Chur, and another part to the Diocese of Constance. In 1815 the Swiss part of the Diocese of Constance was separated from Constance by Pope Pius VII, and placed under the provisional administration of Provoet Goldin of Beromünster, in the Canton of Lucern. On the death of the provost in 1819 this district fell to the Diocese of Chur. The arrangement, however, was only intended to be a temporary one. After long negotiations the desired Diocese of St. Gall was established in 1823, but it was connected by personal union with the Diocese of Chur. However, the abbey church of St. Gall that was raised to a cathedral received a separate cathedral chapter, a separate vicar-general, and an independent seminary. The bishop also was obliged to live alternately at Chur and at St. Gall. This double diocese satisfied neither the inhabitants of the Grisons nor those of St. Gall. The former wanted their bishop for themselves; the latter feared that the Bishop of Chur might regard St. Gall merely as an appendage.
of his old diocese and look down on it. Moreover, the government of the Canton of St. Gall meddled incessantly in ecclesiastical matters and in the Church's right of jurisdiction, and demanded for itself the right of appointing a metropolitan and the universal jurisdiction over bishops and other ecclesiastical dignitaries. For the protection of the Church and its interests and the preservation of the peace and tranquility of the state, the church authorities determined to establish a separate ecclesiastical state. For this purpose, the bishops of the canton of St. Gall united in a declaration to the effect that the state should be formed into a separate religious state, and that the Church should have its own laws and jurisdiction.

Negotiations concerning the erection of a separate Diocese of St. Gall were soon begun with Rome in order to bring this state of affairs to an end. It was, however, only after great difficulties that an agreement was made that was satisfactory both to the Holy See and the state of St. Gall. The Concordat was signed by the papal nuncio and the authorities of the canton on 12 April, 1847, Pius IX issued the Bull of concordation, and on 20 June Murer was consecrated in the cathedral as first Bishop of St. Gall. The new bishopric had soon a hard fight to wage with the Liberal party, to which had gained ascendency in the canton from 1855, as to the rights and liberties of the Church. The bishop, a highly-talented and very orthodox man, was ably and vigorously supported in this struggle by Father Greith, Gallus Baumgartner (father of the celebrated Jesuit Alexander Baumgartner), the Jurist Leonhard Grin (present bishop of the Catholic diocese of St. Gallen), and the advocate J. J. Müller. Yet, notwithstanding all their efforts, they could not prevent the suppression of the newly-established Catholic lycées, the wasting of a part of the diocesan funds, or the combination of the Catholic cantonal school with the Protestant town gymnasium to form a school in which both religions were placed on a parity, to put an end to ecclesiastical influence in education. These actions were the result of the terrorism of the Liberal party (see on these events Greith, "Die Lage der katholischen Kirche unter der Herrschaft des Staatskongresses in St. Gallen," St. Gall, 1857). The bishopric, however, maintained itself notwithstanding the storms, and Catholic religious life developed and flourished greatly. A large part of the credit for this prosperity was due to Karl Johann Greith, who was elected bishop after Murer's death in 1852. Not long after his consecration Greith was also made provisional administrator of the Canton of Appenzell, which, after the dissolution of the Diocese of Constance, had up to then been administered by Chur. This provisional administration has become in fact, although not legally, a permanent condition.

In the diocese in connexion with the Old-Catholic movement in Switzerland, and Greith was accused of contravening the concordat and the constitutional oath. It did not, indeed, go as far as the deposition of the bishop, as Liberals demanded, but the episcopal seminar for boys, which Greith had founded and maintained at a great sacrifice of money and time, was closed in 1874 by the government, and has not so far been reopened. Soon after this, civil marriage was introduced by the law of the Swiss Confederation, and the religious education of the young was endangered. The bishop, however, maintained and by forcibly putting both religions on a parity in the schools. Greith was succeeded by his vicar-general Augustinus Egger (1882–1906). A widely-read author and a skilful orator, he deserves much credit for what he did to encourage Catholic life, not only in his own diocese but also in the whole of Switzerland. During his administration the extreme Radical government of the Canton of St. Gall was replaced by a moderate one, and the new constitution of 1890 has reduced the difficulty of the position of the Church in the canton, the Catholic organization being in harmony with the laws of the Catholic Church. Authorities chosen by each denomination have charge of denominational matters of a mixed nature as well as of the administration of the money and endowments of the denominations, the right to the supervision of the schools.

Augustinus Egger was succeeded in 1906 by the present bishop, Ferdinand Rüegg, b. 20 Oct., 1847, consecrated 10 June, 1906.

Joseph Lins.

Saint George, Orders of.—Knights of St. George appear at different historical periods and in different countries as mutually independent bodies having nothing in common but the veneration of St. George, the patron of knights, and as the patron saint of Lydda, a martyry of the persecution of Diocletian in the fourth century, is one of those military saints whom Byzantine iconography represented as a horseman armed cap-a-pie, like the flower of the Roman armies after the military reform of Justinian in the sixth century. The pilgrimage of Europe, encountering in the East these representations of St. George, recognized their own accoutrements and at once adopted him as the patron of their noble calling. This popularity of St. George in the West gave rise to numerous associations both secular and religious. Among secular orders of chivalry, the most famous must be mentioned the English Order of the Garter, which has always had St. George for its patron. Though Protestantism suppressed his cult, the chapel of St. George at Windsor has retained the official seat of the order, where its chapters assemble and where each knight is invested with his garter as he is 'hanged.' A second royal order under the double patronage of St. Michael and St. George was founded in England in 1818 to reward services rendered in foreign or colonial relations. In Bavaria a secular Order of St. George has existed since 1729, and owes its foundation to the marriage between the brothers Charles of Modena and Charles VII which he bore as emperor for a brief period. The present Russian Order of St. George dates from 1769, having been founded in the reign of Catherine II, as a military distinction.

There formerly existed regular orders of St. George. The Kingdom of Aragon was placed under his patronage, and in gratitude for his assistance to its armies King Pedro II founded (1201) the Order of St. George of Alama in the district of that name. Nevertheless this order received the approbation of the Holy See only in 1863 and had but a brief existence. With the approbation of the papal see the order was amalgamated with the Aragonese Order of Montesa, and thereafter known as the Order of Montesa and St. George of Alama. Equally short-lived was the Order of St. George founded in Austria by the Emperor Frederick III and approved by Paul II in 1464. This
needy prince was unable to assure a sufficient endowment for the support of his knights, and the pope gave him permission to transfer to the new order the property of a commandery of St. John at a Benedictine abbey in the town of Milestadt, to which the emperor added some parishes in his patronage. Nevertheless the knights had to rely for support on their personal possessions, therefore they did not make a vow of poverty, but simply of obedience and chastity, and, owing to this lack of resources, the order did not survive its founder. It was succeeded by a secular Confraternity of St. George founded under the Emperor Maximilian I with the approbation of Alexander VI in 1494, which likewise disappeared, in the disturbances of the sixteenth century.

Ades SS., April. Ill. 190-93; de la LLANTO, Hist. ec. de España, IV (Madrid, 1874), 169; BIENLEIFELD, Gesch. und Ver-saung aller Ritterorden (Weimar, 1841).

CH. MOEILLER.

Saint George’s, Diocese of (Sancti Georgii), Newfoundland. Beginning at Garnish it takes in the western portion of the south coast and then stretches along the Gulf of Lawrence, northwards, almost as far as the Straits of Belle Isle, lying between 55° 20’ and 59° 30’ west longitude and between 47° 30’ and 51° 20’ north latitude. Until 1892 the diocese was practically confined to the historic French shore, so long the bone of contention between politicians, and repeatedly the subject of international conferences. In consequence of the provisions of Anglo-French treaties, any attempt to establish permanent settlement on the coast was for a long time disencouraged; but the lucrative herring fishery encouraged pioneers to ignore the treaties, and by 1850 a population of about 2000 had pitched their log cabins in its land-locked bays, beyond the reach of civilization and civil authority. Until 1850 there was no resident Catholic priest on the coast. But the population increased, the people had not except when the chaplain of the French warship paid a visit, at long intervals. Dr. Mullock of St. John’s visited the coast in 1848, and again in 1852. On 7 Sept., 1850, the first resident priest arrived, Rev. Alexandre Belanger (d. 7 Sept., 1866). Owing to the difficulty of travelling, his missionary activities were confined to St. George’s Bay. He visited the Bay of Islands in 1853 and again in 1868. Mgr Sears in his report to the Society for the Propagation of the Faith informs us that the hardships attending the latter visit ended the career of the heroic Frenchman. On 2 November, 1863, the real apostle and social reformer of this unknown wilderness arrived in the person of the Rev. Thomas Sears of the Antigonish diocese. Enthusiastic and practical, he recognized the resources and the possibilities of the West, and pleaded the claims of the Coast so successfully with the Insular Government, that a mail steamer was dispatched in May, 1872. In 1873 the reclamation of the land and the police were established. In 1870 the territory was erected into a prefecture, and in 1871 Father Sears was nominated prefect Apostolic; in 1881 he received the dignity of domestic prelate. During the seventeen years of his apostolate, churches, presby-

SAINT HYACINTHE

SAINT HYACINTH, Diocese of (Sancti Hyacinthin), in the Province of Quebec, suffragan of Montreal. In answer to a petition from the Fathers of the First Council of Quebec to the Holy See, portions of the Dioceses of Montreal and Quebec were formed into a separate bishopric by a papal Bull dated 8 June, 1832. At first the new diocese was limited to the north side of the Richelieu River, and contained the greater portion of the Eastern Townships, a tract of land granted in the latter part of the eighteenth century to the American Loyalists, but now a part of the Sherbrooke Diocese. Later three parishes on the north side of the Richelieu River were annexed. To-day the diocese embraces the counties of Bagot, Ileborvile, Missisquoi, Richelieu, Rouville, Saint Hyacinthe, and a part of the counties of Brome (2 parishes), Sheffield (9 parishes), and Vercheres (3 parishes).

St. Hyacinthe, the titular city, is a typical French Canadian industrial town; it stands on the banks of the Yamaska, thirty-five miles from Montreal, and has a population of 10,000. Right Rev. J. C. Prince, Coadjutor Bishop of Montreal, was the first Bishop of St. Hyacinthe. Bishop Prince took possession on 3 November, 1832, and from the outset encountered difficulties. The residence building was turned into a cathedral and residence; unfortunately, it was burned in May, 1854. The bishop built a new residence as well as a chapel-cathedral. Bishop Prince showed untiring activity, founding twenty new parishes, establishing several missions, and in 1856 introducing from France the Sisters of the Presentation. He died on 5 May, 1860, at the age of fifty-six.

By papal Decree dated 22 June of the same year, Right Rev. Joseph La Roque, titular Bishop of Cydonia, and Coadjutor of Montreal, the second bishop, was appointed. From November, 1856, to July, 1857, he had administered the diocese during the prolonged illness of Bishop Prince, but now, overwhelmed by the responsibility forced on him, and suffering from a series of maladies, he petitioned the Holy See to be relieved of this burden. His request was granted on 17 August, 1865. As titular Bishop of Germanopolis and vicar-general, he resided in the diocese, at the monastery of the Sisters of the Precious Blood (a community which honoured him as its founder), until his death on 18 November, 1887, at the age of seventy-nine.

The vacancy was filled on 20 March, 1866, by the
Right Rev. Charles La Roque, cousin of the former bishop, who for twenty-two years was pastor of St. John's. The new bishop was a highly cultured man; he had a broad experience in parochial work, and realized the debts of his cathedral called for unusual measures, he closed the episcopal palace and retired with his staff to Beloeil, where he combined the duties of bishop and pastor of this parish till his death on 25 July, 1876. Bishop La Roque assisted at the Vatican Council, and was in favoring the creation of the Diocese of Moncton. He opened the first house of the Dominicans in Canada by giving them a parish in his titular city, and had the satisfaction of effectively reducing the cathedral debt and placing the diocese on a satisfactory financial basis.

The new bishop, Mgr. Louis-Zéphirin Moreau, was consecrated on 16 January, 1876. He had come from Montreal in 1856 as secretary to Bishop Prince. Bishop Moreau reopened the episcopal residence, and on 4 July, 1880, dedicated the stone cathedral which he had built with the money amassed by the economy of his predecessor. His cathedral chapter was installed in August, 1876, by the Most Rev. Dr. Conroy, Bishop of Ardagh and first Papal Delegate to Canada. On Bishop Moreau's invitation the Marist Brothers came from France and established their novitiate in the diocese; he also founded a community to charge four rural schools for boys and girls, under the name "Les Soeurs de St. Joseph". After seven years of administration he was given as coadjutor the Right Rev. Maxime Decelles (d. July, 1905); the latter was consecrated titular bishop of Drusipa on 9 March, 1893, and entered on his administration of the Diocese of St. Hyacinthe immediately on the death of Bishop Moreau (24 May, 1901). During his administration he opened the patronage of St. Vincent de Paul, and agitated the question of a new and larger cathedral. The execution of this idea, however, was left to his successor, Rt. Rev. Alexis-Xavier Bernard, who was consecrated by Archbishop Bruchesi on 15 February, 1906. Bishop Bernard is now in his sixty-third year. From 1876, either as secretary, archdeacon, or vicar-general, he was constantly a member of the administration. In a series of ten volumes he has compiled and published with additional biographical notes the lives of the preceding bishops of St. Hyacinthe, dedicated to the clergy and faithful of the diocese. Notwithstanding delicate health, since his elevation to the episcopate he has proved himself an indefatigable worker and an ardent apostle of temperance. He placed the patronage of St. Vincent de Paul on a stable basis, and at fourth bishop, has completely and beautifully restored and enlarged the old cathedral.

In the episcopal city of St. Hyacinthe are the following: the College-Seminary (dating from 1811) with 400 students, all following a classical curriculum; the mother-house of the Sisters of Charity (the Grey Nuns) with 400 members who have charge of the Hôtel-Dieu; the mother-house of the Sisters of the Presentation, with 600 members; the mother-house of the cloistered Sisters of the Precious Blood; the central monastery of the Dominican Fathers; the mother-house of the Sisters of St. Joseph; the convent of the Sisters of St. Martha, a community in charge of the domestic arrangements of the seminary; the novitiate of the Marist Brothers; the Institute of St. Vincent de Paul; a commercial college and an academy, both conducted by the Brothers of the Sacred Heart.

The Diocese of St. Hyacinthe has 74 parishes, and a population of about 120,000, of whom 108,000 are Catholics. The clergy number 183 secular and 18 regular priests. The religious communities number 337 men and 861 women. In the diocese are: 2 superior teaching institutions, the Seminary of St. Hyacinthe and the Petit Séminaire de Sainte-Marie de Monnoir, both under the direction of secular priests; 6 commercial colleges; 56 academies; 435 primary schools. Six hospitals and asylums provide for charitable wants.

St. Isidore, College of, in Rome, was originally founded for the use of Spanish Franciscans during the pontificate of Gregory XV. In the year 1625 the buildings passed into the hands of Father Luke Wadding, who, after making numerous additions and alterations, and with the sanction of the General of the Friars Minor and of the local Bishop, placed them into a college for the education of Irish Franciscan students. Within a few years, Wadding had provided accommodation for, and had gathered within the walls of the new college, a community of over thirty religious; and some years later the number had increased to fifty. Wadding was fortunate in being able to assure the success of the new undertaking by attracting to the college as professors some of the ablest members of the order at the time, all of them countrymen of his own. These included such men as Hickey, Fleming, Fonce, Walsh, and some years later Hard, Molloy, and Bredin. Wadding mentioned alone has to his credit no fewer than twenty-two volumes, in the various domains of philosophy, theology, history, and poetry. It is easy to understand what prestige such distinguished teachers must have brought to the college. In fact, within thirty years of its foundation, we find no fewer than seventy of its alumni engaged as professors in various schools of the order. But its claim to recognition does not rest less in the stimulus which it gave to the study of Scotistic philosophy and theology during the seventeenth century than in the number of highly trained and efficient teachers which it sent forth. Its professors were all convinced adherents of the Franciscan school and it is no exaggeration to say that, at a time when the doctrines of Scoto were beginning to lose favour even amongst Franciscans themselves, they found no more ardent nor able defenders than the professors of St. Isidore's College. It is to Wadding and his fellow-workers in the college that we owe the first complete edition of the Subtile Doctor's works, namely, the Lyons edition of 1639. While sending forth, year after year, numbers of zealous workers into the Irish mission, the college continued to possess amongst its professors men of acknowledged learning and merit.

On the occupation of Rome by the French in 1798, St. Isidore's suffered the fate of other British institutions in the city. The friars were expelled, and the college and adjoining garden confiscated and put up for auction. They were bought in by the Prince of Fomboni, who let the rooms out to lodgers, with the exception of a few which were reserved for one of the fathers who had volunteered to keep watch over the place until the advent of better times. These came with the return of the pope in 1814. The college was soon restored to its rightful owners, and the year 1819 saw Father Hughes installed as superior over a fresh band of students who had come from Ireland to fill the places of those who had been expelled in 1798. Since then St. Isidore's has remained in undisturbed possession of the Irish Franciscans, for whom it still serves as the theological and philosophical training-house of their students. Amongst its alumni may be mentioned Dr. Egan (d. 1843), the first Bishop of Philadelphia; Drs. Lambert (d. 1817), Scallan (d. 1830), and Mullock (d. 1869), the two former vicars Apostolic; and the latter second Bishop of St. John's, Newfoundland; Dr. Hughes, Vicar Apostolic of Gibraltar; and Drs. Geoghegan (d. 1864) and Shiel (d. 1872), Bishops of Adelaide, Australia. The college library is justly-
famous for its collection of rare and valuable books. Owing to Wadding’s position as annalist of the Franciscan Order and agent with the Holy See for his native country during the stormy period of the Inquisition (1587), the archives of St. Isidore became the repository of many precious documents relating to Franciscan subjects and to the civil and ecclesiastical history of Ireland during the seventeenth century. Such among the valuable MSS. belonging to the sister college of St. Anthony’s, Louvain, as escaped destruction or disorder during the disturbances is also found, for a time, a domicile in St. Isidore’s. They included many of these old Irish MSS. saved from destruction by Brother Michael O’Clery, during his tours of Ireland in search of material for the “Annals of the Four Masters.” They are sometimes referred to as the “St. Isidore MSS.” After the fall of Rome by the Piedmontese in 1870, these, together with such others as had any bearing on the civil or ecclesiastical history of Ireland, were for greater security removed to the convent of the order at Merchant’s Quay, Dublin, where they are now preserved.

J. C. HANRIAT.

Saint James of Compostela (SANTIAGO DE LA ESFADA), ORDER OF, founded in the twelfth century, owes its name to the national patron of Spain, St. James, under whose protection the inhabitants of Galicia began in the ninth century to combat and drive back the Musulmans of Spain. Compostela, in Galicia, the centre of devotion to this Apostle, is neither the cradle nor the principal seat of the order. Two cities contend for the honour of having given it birth, León in the kingdom of that name, and Uclés in Castile. At that time (1157–1230) the royal dynasty was divided into two rival branches, which rivalry tended to obscure the beginnings of the order. The Knights of Santiago had possessions in each of the kingdoms, but Ferdinand II of León and Alfonso VIII of Castile, in bestowing them, set the condition that the seat of the order should be in their respective states. Hence arose long disputes which only ended in 1230 when Ferdinand III, the Saint, united both crowns. Thenceforth, Uclés, in the Province of Cuenca, was regarded as the headquarters of the order; there the grand master habitually resided, and the rich archives of the order were preserved until united in 1869 with the “Archivo historico nacional” of Madrid. The order received its first rule in 1171 from Cardinal Jacinto (later Celestine III), then legate in Spain of Alexander III. Unlike the contemporary orders of Calatrava and Alcántara, which followed the severe rule of the Benedictines of Cteaux, Santiago adopted the milder rule of the Canons of St. Augustine. In fact at León they offered their services to the Canons Regular of St. Eloi in that town for the protection of pilgrims to the shrine of St. James and the cross terminal the famous Way of Saint James, leading to Compostela. This explains the mixed character of their order, which is hospitalier and military, like that of St. John of Jerusalem. They were recognized as religious by Alexander III, whose Bull of July 1175, was subsequently confirmed by more than twenty of his successors. These pontifical charters, which are called the “Bulla de la Espada,” secure them all the privileges and exemptions of other monastic orders. The order comprised several affiliated classes: canons, charged with the administration of the sacristies; canonesses, occupied with the service of pilgrims; religious knights living in common and married. The mar-ry, which other military orders only obtained at the end of the Middle Ages, was accorded them from the beginning under certain conditions, such as the authorization of the king, the obligation of observing continence during Advent, Lent, and on certain festivals of the year, which they spent at their monasteries in retreat.

The mildness of this rule furthered the rapid spread of the order, which eclipsed the older orders of Calatrava and Alcántara, and whose power was re-puted abroad even before 1200. The first Bull of confirmation, that of Alexander III, already enumerated a large number of endowments. At its height Santi-ago-alone had more possessions than Calatrava and Alcántara together. In Spain these possessions included 83 commanderies, of which 3 were reserved to the grand commanders, 2 cities, 178 boroughs and villages, 200 parishes, 5 hospitals, 5 convents, and 1 college at Salamanca. The number of knights was then 400; & they could muster more than 1000 lances. They had possessions in Portugal, Spain, Italy, Hungary, and even Palestine, Abrantes, their first commandery in Portugal, dates from the reign of Alfonso I in 1172, and soon became a distinct order which Nicholas IV in 1290 released from the jurisdiction of Uclés. Their military history is linked with that of the Spanish state. They fought against the Moors and the Moslems, driving out the Musulmans, doing battle with them sometimes separately, sometimes with the royal armies. They also had a regrettable share in the fatal dissensions which disturbed the Christians of Spain and brought about more than one schism in the order. Finally they took part in the last great campaigns against the Musulmans. Thus arose the obligation imposed upon aspirants to serve six months in the galleys, which obligation still existed in the eighteenth century, but from which exemption was easily purchased. Authority was exercised by a grand master assisted by a Council of Thirteen, which elected the grand master and had the right to depose him for due cause; they had supreme jurisdiction in all disputes between members of the order. The first grand master, Pedro Fernández de Fuente Encalado, died in 1184. He had had 39 successors, among them several Spanish Infantes, when, in 1499, Ferdinand the Catholic induced the pope to assign to him the administration of the order. Under Charles V, Adrian VI annexed to the crown of Spain the three great military orders (Aleántara, Calatrava, and Santiago) with hereditary transmission even in the female line (1524). Thenceforth the three orders were united under one supreme magistracy, though their titles and possessions remained separate. To discharge the detail of this administration, Charles V instituted a special ministry, the Council of Orders, composed of a president named by the king, whom he represented, and six knights, two delegates from each order. To this council belonged the presentation of knights to vacant commanderies and jurisdiction in all matters, civil or ecclesiastical, save the purely spiritual cases reserved for ecclesiastical dignitaries. Thus ended the autonomy of the orders (see CALATRAVA, MILITARY ORDER OF). Their symbol was a staff, with a sword whirled in driving motion, by the title de la Espada, and a shell (la venera), which they doubtless owed to their connexion with the pilgrimage of St. James.

St. Jean-d’Acre. See ACRE; PITOILEMIS.

Saint-Jean-de-Maurienne, Diocese of (MAURAMANENSIS), includes the arrondissement of Saint-Jean-de-Maurienne in the Department of Haute-Savoie. The Diocese was suppressed in 1631 but restored in 1793, and its territory joined to the Diocese of Chambéry under the French Empire, then in 1825 under Piedmontese rule it was cut off from Chambéry and made

XIII.—23
a special diocese, which with the rest of Savoy became French territory, 14 June, 1860. It is suffragan of Chambéry. Gregory of Tours, in his "De Gloria Martyrum", relates how the church of Maurienne, belonging then to the Diocese of Turin, became a place of pilgrimage, after the holy woman Thigris or Thela, who was a native of Valloires, had brought it to the East a finger of St. John the Baptist. Saint Contran, King of Burgundy, took from the Lombards in 574 the valleys of Suse and Maurienne, and in 576 founded near the shrine a bishopric, which was suffragan of Vienne. Its first bishop was Felmasius. In 599 Gregory the Great made futile at-

tempts to make Queen Brunehaut listen to the protests of the Bishop of Turin against this foundation. A letter written by John VIII in 878 formally designated the Bishop of Maurienne as suffragan of Tarentaise, but the metropolitans of Vienna continued to claim Maurienne as a suffragan see, and under Callistus II (1120) they carried their point. Local tradition claims as bishops of Maurienne: St. Emilianus, martyred by the Saracens (736 or 738); St. Oddiari, slain by the Saracens (916) together with St. Benedict, Archbishop of Embrun. After the Saracens had been driven out, the temporal sovereignty of the Bishop of Maurienne appears to have been very extensive, but there is no proof that such sovereignty had been recognized since Contran's time. At the death of Rudolph III, Bishop Thibaut was powerful enough to join a league against Conrad II of Franconia. The emperor suppressed the See of Maurienne, and gave over its title and possessions to the Bishop of Turin (1038); but this imperial decree was never executed.

Among the bishops of Maurienne were: St. Ayrolus (1132–46), once a monk of the Charterhouse of Portes; Louis de La Palud (1441–50), who as Bishop of Lausanne had taken an active part at the Council of Basle in favour of the antipope, Felix V, who named him Bishop of Maurienne in 1441; and afterwards cardinal; he was confirmed in both appointments by Nicholas V in 1449; John of Segovia (1451–72), who at the Council of Basle as representative of the King of Aragon had also worked for Felix V, and was appointed by him cardinal in 1441; ten years later Nicholas V gave him the See of Maurienne; he is the author of "Gesta Concilii Basilieensis";" William d'Estouteville (1473–80) was made cardinal in 1439, and as a pluralist held among other titles those of Maurienne and Rouen; Louis de Gorrevod (1490–1530) was made cardinal in 1530; Hippolyte d'Este (1539), made cardinal in 1544. Died at the command of Pius IV to the Council of Poissy, and built the famous Villa d'Este at Tivoli; Charles Joseph Filippa de Martiniana (1757–79), made cardinal in 1778, was the first to whom Bonaparte, after the battle of Marengo, confirmed his intention of concluding a confessional with Rome; Alexis Billet (1795–1802), made cardinal in 1801. Emmanuel Philibert, Duke of Savoy, took solemn possession of a canony in the cathedral of Maurienne in 1564.

Among the saints specially honoured in, or connected with, the diocese are: Saint Aper (Avre), a priest who founded a refuge for pilgrims and the poor in the Village of St. Avre (seventh century); Blessed Thomas, b. at Maurienne, d. in 720, famous for re-building the Abbey of Farfa, of which the third abbot, Lucerius, was also a native of Maurienne; St. Marinus, monk of Chandor, martyred by the Saracens (eighth century); St. Landry, pastor of Lanslevillard (eleventh century), drowned in the Arc during one of his apostolic journeys; St. Bénézet, or Bonoit de Pont (1165–84), b. at Hermillon in the diocese, and founder of the guild of Fratres Pontifices of Avignon (see BRIDGE-BUILDING BROTHERHOOD); Blessed Gabert or Gabert, disciple of St. Dominic, who preached the Gospel for twenty years in the kingdom of Aragon (thirteenth century). The chief shrines of the diocese are: Notre Dame de Charmaise, near Modane, Notre Dame de Bonne Nouvelle, near St-Jean-de-Maurienne, which dates from the sixteenth century, and Notre Dame de Beaurves at Montaiglon, dating from the seventeenth century. The Sisters of St. Joseph, a nursing and teaching order, with mother-house at St-Jean-de-Maurienne, are a branch of the Congregation of St. Joseph at Puy. At the end of the nineteenth century, they were in charge of 3 day nurseries and 2 hospitals. In Algeria, the East Indies, and the Argentine they have houses controlled by the mother-house at Maurienne. In 1906 (end of the Concordat), the Diocese of St-Jean-de-Maurienne had 61,466 inhabitants, 10 parishes, 76 auxiliary parishes, and 28 curacies, remunerated by the State.

Georges Goyau.

SAINT-JOHN AMBROSE, Oratorian; b. 1815; d. at Edgbaston, Birmingham, 24 May, 1875; son of Henry St. John, descended from the Barons St. John of Bletsoe. He was educated at Westminster School, and Christ Church, Oxford, where he graduated M. A., and where he formed his lifelong, intimate friendship with Newman. In 1841 he became secretary to Henry Wilberforce, W.C., and subsequently at East Farleigh. He then joined Newman at Littlemore which he left, to be received into the Church about a month before Newman's conversion in October, 1845. After a short time spent with Newman at Maryvale he accompanied him to Rome where they were ordained priests. Having become Oratorians they began mission work in Birmingham (1847), removing to the suburb of Edgbaston in 1852. There he devoted himself entirely to zealous missionary labours, taking a leading part in the work of the Oratory and its famous school. He was an excellent classical scholar and a remarkable linguist, both in central European tongues, and he devoted himself to overwork in translating Fessler's book on infallibility when Newman's discussion with Gladstone was pending. He was a man of marked individuality.
and Newman's tribute to him in the "Apologia" will never be forgotten.

Excerpted from a biographical sketch prefixed to the new edition of the "Apologia." The work was originally compiled, then connected to his life, but references to him will be found in Casquet, Lord Acton and his Circle (London, 1890). The information given above has been kindly supplied by the Rev. F. Bouchot, Cong. Opus. See also German, Converts to Rome (London, 1910).

EDWIN BURTON.

SAINT JOHN, CHRISTIANS OF. See NAPOLÉONIANS.

SAINT JOHN, DIOCESE OF (SANCTI IOANNIS), in the Province of New Brunswick, Canada. The diocese includes the following counties: Albert, Carleton, Charlotte, Kings, Queens, St. John, Sunbury, Westmoreland, York, and a portion of Kent. The City of St. John is the oldest incorporated city in British North America, its charter dating back to 1785; it is also the largest city in New Brunswick. Among the earliest Catholic missionaries to visit New Brunswick, which was then part of Acadia, were the Jesuit Fathers, Biard and Massé, in 1611. They remained until after the destruction of Port Royal by Argall in 1613, and were succeeded by Ursulines. One creature of the Ursulines, a clear interest was attached to the Acadian missions. Mgr. St. Valier left the St. Lawrence, 7 May, 1886, proceeded to the St. John, and reached Medocette, an Indian village eight miles below Woodstock. There the bishop established a mission, and left it under the direction of Father Simon, a Recollect. Subsequently another mission was formed at Aukpauque. After the death of Fathers Simon and Moirieu, the missions on the St. John passed into the hands of the Jesuits, among whom were Fathers Auberry, Loyard, Danielou, Lovers, Audren, and German. The Indian church at Medocette was probably the first erected. On the original site of this church a small stone tablet was discovered in June, 1890, bearing a Latin inscription the translation of which reads: "To God, most Good and Great, in honour of St. John the Baptist, the Maliseets erected this church A.D. 1717, while John Loyard, a priest of the Society of Jesus, was Procurator of the mission." After the Peace of St. Germain-en-Laye (1632), and notably after the Treaty of Breda (1667), there arrived from France colonies of Catholic immigrants, the progenitors of the Acadians now scattered over New Brunswick and Nova Scotia. About 1707 Rev. Charles D'.Inches, a convert and son of an American, who was assigned to duty in St. John. He celebrated Mass in the City Court Room on Market Square. A church was built soon afterwards, and at the suggestion of Bishop Plessis it was dedicated to St. Malachy; it was opened for worship on 1 Oct., 1815. With the influx of Irish immigrants, the number of Catholics rapidly increased. The first French settlers at St. John,Mission was the Jesuit, Father Saint-Jean. He was succeeded by Rev. Patrick McMahon, and in 1828 Rev. John Carroll, the last priest prior to the establishment of a diocese in the Maritime Provinces, was sent from Quebec.

Between 1820 and 1827 the Micmac Indians and Acadians at Richibucto were ministered to by Rev. Francois-Norbert Blanchet, who afterwards became first Bishop of Oregon City. In Aug., 1829, Charlootevone (Prince Edward Island) was created an episcopal see, with New Brunswick under its jurisdiction. Thirteen years later New Brunswick was formed into a separate diocese; its first bishop was Dr. William Dollar (b. in Ballyarina, Co. Kilkeney, Ireland; d. 29 Aug., 1851), a man of apostolic virtue and a typical pioneer bishop. He made his theological studies at Quebec, and was sent as a missionary to Cape Breton, and afterwards to Miramichi. He was Vicar-General of the Diocese of Charlottetown, and was consecrated bishop at Quebec, 11 June, 1843. His successor was Right Rev. Thomas L. Connolly (b. at Cork, Ireland), who, after receiving his preliminary education at Cork, became a novice in the Capuchin Order, and was sent to Rome to complete his studies. He was ordained in the cathedral at Lyons in 1838, and for the next four years was stationed at the Capuchin Church, Dublin. In 1842 he volunteered for the Foreign Missions, and his services were accepted by the Right Rev. William Walsh (afterwards Archbishop of Halifax). Consecrated Bishop of New Brunswick 15 Aug., 1852, Dr. Connolly arrived in St. John, his episcopal city, 11 Sept. of the same year. One of the first duties he undertook was the building of a cathedral; but it was not until Christmas Day, 1855, that the building was ready for Divine service. In June, 1854, the cholera appeared at St. John, and Dr. Connolly was not absent until after the middle of August. It is estimated that 600 Catholics died of it; as a consequence, about 150 orphans were thrown on the bishop's hands. To care for them, he organized a diocesan sisterhood known as the Sisters of Charity. In 1859 Dr. Connolly was promoted to Halifax in succession to Archbishop Walsh. A division was then made of the Diocese of New Brunswick; the southern portion (the present See of St. John) was being assigned to Right Rev. John Sweeney (b. in 1821 at Clones, Co. Monaghan, Ireland; d. 25 March, 1901). John Sweeney had emigrated with his parents in 1825; his classical studies were made at St. Andrew's College, near Charlottetown, Prince Edward Island, after which he went to Quebec for theology. He was ordained in Sept., 1844, and was first assigned to St. John, whence he went from time to time throughout the country on missions. His next labours were at Chatham and Barachois. He was vicar-general successively under Bishops Dollard and Connolly, and administrator of the diocese on both occasions when the see was vacant. On 15 April, 1860, he was elevated to the episcopate; and in 1870 he went to Rome to attend the Vatican Council. Under him the cathedral was consecrated; it was consecrated on 18 July, 1885. Bishop Sweeney was noted for his wisdom, tact, and administrative abilities. The Catholic settlement of
Johnville, Carleton County, was established by him, and grew into a flourishing colony under his encouragement. In the summer of 1869 he applied to Rome for a coadjutor, and Rev. Timothy Casey, pastor of St. John's Church, Fredericton, was appointed. In Jan., 1901, Bishop Sweeney retired to St. Patrick's Industrial School, Silver Falls.

Bishop Casey, the present incumbent (b. at Flume Ridge, Charlotte County, New Brunswick, 1862) received his early education in the public schools of St. Stephen, New Brunswick, and afterwards studied at St. Joseph's College, Memramcook, and at Laval University, Quebec; he was ordained priest 29 June, 1886. His consecration as titular Bishop of Utina and coadjutor to Bishop Sweeney took place in the cathedral at St. John, 11 Feb., 1900. Since the beginning of Bishop Casey's administration, a new school has been erected in the city; and fifteen new churches, in different parishes, have been dedicated.

There are two religious orders of men in the diocese: the Redemptorists, who arrived in July, 1884, and who are in charge of St. Peter's Church in North St. John; and the Fathers of the Holy Cross at Memramcook, who have conducted the University of St. Joseph's College since 1864. There are three communities of women: the Sisters of Charity, the Religious of the Good Shepherd, and the Little Sisters of the Holy Family. Diocesan priests number 52; priests of religious orders, 25. There are 2 orphan asylums; 2 academies, 1 house for the aged, and 1 college. The Catholic population is about 58,000.

ANDREW J. O'NEILL.

Saint John's, Knights of. See Military Orders, etc.

Saint John's, Archdiocese of (Sancti Joannis Terre Nove), in Newfoundland, erected 1904, with Right Rev. M. F. Howley as archbishop. It has the see of Grace and St. George's. In 1769 the Island of Newfoundland was made a vicariate Apostolic, with Rev. James Louis O'Donel, O.S.F., as first vicar Apostolic. Dr. O'Donel returned to Ireland in 1807, and was succeeded by Right Rev. Patrick Lambert, O.S.F., from Wexford, Ireland. Bishop Lambert ruled until 1817, when he retired to Ireland. Right Rev. Dr. Scallon, also a Franciscan and a Wexford man, succeeded him, and held the see until 1829. When Dr. O'Donel was made vicar Apostolic, there were but six priests in the island; Dr. Scallon increased the number to ten. He was the first bishop who attempted to restore the religion in the New World. In 1829 Right Rev. Dr. Fleming, O.S.F., succeeded to the episcopacy. During his administration of twenty-one years, the building of the great cathedral was started, schools and convents were erected, and the majority of the Presentation and Mercy Orders introduced. The fifth bishop was the learned Dr. Mullock, O.S.F., who was appointed coadjutor to Bishop Fleming, and arrived in the province in 1848. He was consecrated in Rome (1847); and ruled the Church of Newfoundland for nineteen years till 1869. He completed the cathedral, built the episcopal palace, the library and college, also many churches, chapels, and convents. He was the chief architect of the Province's history. In 1856 the island was divided into two dioceses: St. John's and Harbour Grace. The Diocese of St. John's comprises the eastern, southern, and western shores of the island. Harbour Grace embraced the north-eastern shore and Labrador. Bishop Mullock was succeeded by Right Rev. Bishop Power, previously president of Conliffe College, Dublin, and canon of the cathedral, a man of high literary attainments, also a brilliant pulpit orator. His episcopacy lasted until 1894, being the longest in the annals of the diocese. He completed the Church of St. Patrick, Riverhead, St. John's; and during his episcopacy the Christian Brothers, to whom is due the high state of perfection of the educational system, were introduced. The western portion of the island, known as "The French Shore", was separated during his reign from the Diocese of St. John's and made a prefecture Apostolic, afterwards a vicariate Apostolic.

In 1895 Right Rev. Dr. Howley (born in St. John's, 1843), Vicar Apostolic of St. George's, "French Shore", was transferred to the See of St. John's, becoming the seventh bishop. He undertook extensive repairs on the exterior of the cathedral, and the completion of the interior. During his episcopate, the academy for young ladies at St. John's has been enlarged, the new college built, and many other works have been inaugurated. According to the census of 1901, the Catholic population of the diocese was 45,000. There are 70 churches; 50 chapels; 35 priests; 143 schools; 21 convent schools (the schools all receive aid from the State and full religious liberty is granted); 963 pupils; 14 convents. The Irish Christian Brothers teach in the public schools, and conduct the College of St. Bonaventure's, which is also affiliated to the London University, the boys' orphanage with over 100 boys, and industrial school of Mount Cashel. The Sisters of Mercy have charge of the Orphanage of Belvedere with 100 orphan girls, teach in the public schools, and conduct several academies. The Presentation Sisters also teach in the public schools.

M. F. HOWLEY.

Saint Joseph, Diocese of (Sancti Josephi), in Missouri. The City of St. Joseph was founded by Joseph Robidoux, a Catholic, who in 1830 became sole proprietor of the trading post at the mouth of what is now called Roy's Branch, just above the Blacksnake Hille. In 1838 an Indian named Jesuit visited the obscure trading post at this place and said Mass in the rude log house of Robidoux. In 1840 Rev.
Father Vogel administered to the spiritual wants of the faithful. Robidoux, alive to the importance of his trading post, began preparations to form a town. The population was about two hundred at that time. He had surveys and plats made by Fred W. Smith, a Catholic. Smith named his plat St. Joseph; it was taken to St. Louis and laid upon the ground on 17 June 1843. The first permanent pastor was the Rev. Thomas Scanlon, who began his labours in 1847. On 17 June, 1847, a brick church was begun and in September of the same year was dedicated by Archbishop P. R. Kenrick of St. Louis. The “Overland Post” was the most important one in the Province of St. Joseph. Early in the spring of 1849 began the rush to California. As a starting point St. Joseph offered advantages which no other place possessed. There was at that time a population of 1900 souls.

At the Second Plenary Council of Baltimore in 1856, St. Joseph was among the new episcopal sees proposed. Rev. John J. Hogan was chosen its first Bishop, 3 March, 1858. The area assigned to the new diocese was that part of the State of Missouri lying between the Missouri and Chariton Rivers. On investigation the bishop-elect found that there were about 3000 souls. The Church of St. Joseph 800 families, about 3000 souls, attended by 2 secular priests. The church edifices were of the poorest kind; the largest (pro-cathedral) was a low, narrow, brick building, built at different times. Bishop Hogan was consecrated by Archbishop P. R. Kenrick, 13 September, 1858, and at once took charge of his new field of labour. In 1869, ground was broken for a new cathedral which, three years later, was opened for Divine service. The number of priests increased gradually, religious consciousness and enthusiasm were awakened, churches were built, parochial schools erected, and charitable institutions founded. On 10 June, 1869, Bishop Hogan transferred the newly-erected Diocese of Kansas City, Mo., and appointed Administrator of St. Joseph. When he resigned his administration of the Diocese of St. Joseph in 1893, the Rt. Rev. M. F. Burke, D.D., was transferred from the Diocese of Cheyenne, Wyoming, to St. Joseph. His reception by clergy and laity was most enthusiastic. Under his able administration great progress has been made in the material as well as in the spiritual upbuilding of the diocese. A heavy debt on the cathedral has been liquidated, an episcopal residence built, a school of the cathedral parish erected at a cost of $80,000, new missions established, parishes organized, and many other improvements made.

The City of St. Joseph has at present 8 parishes with 12 resident pastors, 6 parochial schools attended by 1340 pupils, 1 commercial college conducted by the Christian Brothers, 1 academy for the education of young ladies conducted by the Ladies of the Sacred Heart, and 1 hospital conducted by the Sisters of Charity. Catholic population: 10,000. Outside of the City of St. Joseph may be mentioned the Benedictine Abbey at Conception, established in 1874; the Conception Classical College conducted by the Fathers of the Abbey; the Franciscan Fathers at Chillicothe and Vincent; two charitable hospitals, one at Chillicothe conducted by the Sisters of St. Mary, the other at Maryville conducted by the Sisters of St. Francis; an academy for the education of young ladies at Chillicothe conducted by the Sisters of St. Joseph; the mother-house and academy of the Brothers of Perpetual Devotion; an orphan asylum at Conception; twenty churches with resident priests; thirty-two mission stations; and seven parochial schools. By a decree of the Sacred Congregation of the Consistory, dated Rome, 16 June, 1914, the territory containing the Counties of Atchison and Clark, Kansas, Monroe, McLean, Marshall, and St. Joseph, was detached from the Archdiocese of St. Louis and attached to the Diocese of St. Joseph. By reason of this extension the Diocese of St. Joseph now comprises the whole northern part of the State of Missouri, extending from the Missouri to the Mississippi River, and bounded on the south by the Counties of Howard, Boone, Audrain, and Pike. By the increase of territory 16 parishes have been added, and 20 more priests have been affiliated with the diocese. The Catholic population is (1911) about 34,000.

C. LINENKAMP.

ST. LOUIS, ARCHDIOCESE OF (SANTOSI LUDOVICI), created a diocese 2 July, 1826; raised to the rank of an archdiocese 20 July, 1847. It comprises that portion of the State of Missouri bounded on the north by the northern lines of the Counties of Pike, Audrain, Boone, and Howard, on the west by the western lines of the Counties Howard, Boone, Cole, Marion, Phelps, Texas and Howell, on the south by the State of Arkansas, and on the east by the Mississippi River, a territory of 28,235 square miles.

History.—The City of St. Louis was founded in 1764 by Pierre Laclede and Laclède, a French nobleman, who came to Louisiana in 1755 and entered commercial life in New Orleans. In 1762 the firm of Maizet Laclede and Co. were given the exclusive privilege of trading with the Indians of the North-west, and in the same year Monsieur Laclede with some companions came up to Fort Chartres in the interest of the firm. The Treaty of Paris in 1763 put an end to the privilege, and Monsieur Laclede purchased the interest of his partners, left Fort Chartres and landed on the west bank of the Mississippi, where in 1764 he selected a spot, at that time a wilderness, and here laid the foundations of the City. He transmitted the land to his sons, employing Indian women and children in digging out the cellar and carrying the earth away in their blankets. By the Treaty of Paris, France ceded to Spain all of Louisiana west of the Mississippi, but there was no formal occupation by the Spanish until 1770. St. Louis therefore during the first years of its existence belonged to the Diocese of Santiago de Cuba, a jurisdiction that extended throughout Louisiana. There were but two priests in the St. Louis territory: Father Luke Collet, a Recollect, and the Jesuit Father Meurin; the former died in 1765 leaving but one priest in the Mississippi Valley, Father Joseph Meurin. The story of good old Father Meurin is replete with tales of hardship and sacrifice made for the French and Indians of Illinois and Missouri.

In 1766, finding the task too great, he wrote the Bishop of Quebec: "Siest Geneviève is my residence. Thence I go every spring and visit the other parishes. I return again in the autumn and whenever I am summoned on sick calls. I am only sixty-one years old, but I am exhausted, broken by twenty-five years of mission work in this country, and of these nearly twenty years of malady and disease; show me the gates of death. I am incapable, therefore, of long applications or bodily fatigue. I cannot accordingly supply the spiritual necessities of the country, where even the stoutest men could not endure. It would need four priests. If you can give me only one, he should be appointed to Cahokia, and with the powers of vicar-general."

In 1768 Fr. P. G. Gibault, Vicar General of Quebec, arrived in the country and was with him until the formal occupation of Louisiana by the Spaniards.

Father Gibault continued his visits until the coming of the Capuchin Fathers from New Orleans in 1772, and Father Meurin remained on the east side of the Mississippi River. Prior to Father Gibault's coming, there was no church building in this territory. The records at Cahokia show that at St. Louis Father
Meurin in 1766 baptised, under condition, in a tent for want of a church, Marie, lawful daughter of John Baptiste Deschamp and of Marie Pion; and again, that he conferred the same sacrament upon Antoine, son of Lisette, a Pawnee slave, on 9 May of the same year. For this he was succeeded by Father Bernard, also a Capuchin, who remained for thirteen years and during his stay organized St. Charles and St. Ferdinand. From 1789 to 1793 there are no records to show that St. Louis had a resident priest. In 1793 Pierre Joseph Didier, a Benedictine monk, assumed charge and remained until 1799. In 1800 the territory of Louisiana was ceded to France and three years later transferred by Napoleon to the United States. Thus we find that St. Louis and the Louisiana territory during its early days was subject to the jurisdiction of: the Vicariate Apostolic of Canada, 1658-1774; the Diocese of Quebec, 1674-1784; the Province of the United States of the Union, 1784-1789; the Bishop of Baltimore, 1789-1808; the Diocese of Bardstown, 1808-1834.

In 1800 Rev. Thomas Ffynn was made parish priest of St. Louis, remaining in that position until 1806 when he removed to Ste Genevieve. Again from 1806 until 1811, when Father Savigne took charge, we were without the services of a priest. Father Savigne's ministry extended over a period of six years, and during these years the city grew to such an extent as to require the labours of a priest who could devote to it his entire time and attention. In 1810 the population numbered 1400 mostly French with some Spaniards and a constantly increasing influx of Americans. Thus far St. Louis had been but a struggling village, the surrounding country but a wilderness that re-echoed to the war-whoop of the savage or resounded with the crack of the ranger's rifle. Now things were to assume a more important aspect. In 1810 the Diocese of St. Louis. St. Louis as a diocese had its origin amidst the early ecclesiastical troubles and disputes of the Diocese of Louisiana and the Floridas. The Diocese of St. Christopher of Havana, Louisiana, and the Floridas was erected in 1787, and Rev. Joseph Trempe was appointed the first bishop; thus St. Louis was under the jurisdiction of the Bishop of Havana. On 25 April, 1793, the Diocese of Louisiana and both Floridas was created; New Orleans was designated as the cathedral city, and the Rev. Louis Peisalva y Cardenas was appointed the first bishop of the diocese. He arrived at St. Louis on 5 June, 1795. On 24 Sept., 1815, Rev. Louis William Du Bourg was consecrated Bishop of Louisiana and the Floridas, and immediately after proposed the erection of the See of St. Louis then in Upper Louisiana (sometimes called Louisiana Superior, sometimes "Alta Louisiana") Very soon after, however, he requested the withdrawal of this proposal owing to the serious and complicated troubles caused by the trustees (Marguilliers and three misguided priests of the cathedral church in New Orleans).

Open menace of violence and other serious threats prompted him to solicit the Propaganda to permit him to exercise his residence at St. Louis and to appoint Rev. Eustace Bunge as part of the Louisiana jurisdiction. Rome granted the request, and on 5 Jan., 1818, he came to St. Louis accompanied by Bishop Ffynn, of Bardstown, Ky. He was received here with great welcome, was installed with the usual solemnities by Bishop Flaget, and took possession of the pro-cathedral, a poor wooden structure in ruinous condition. The same year he founded at St. Louis a Latin Academy, which later became the University of St. Louis (q.v.). On 13 Aug., 1822, the Very Rev. Joseph Rosati, vicar-general for Bishop Du Bourg, was appointed by Pius VII titular Bishop of Tenagre, and created Vicar Apostolic of the territories of Mississippi and Alabama. This appointment Father Rosati declined, giving to the Propaganda reasons that the city and poverty of the people of Mississippi and Alabama; the utter impossibility of a priest being able to sustain himself at Natchez; Bay St. Louis being too poor to erect even an unpretentious church building, and no other city in the two states being sufficiently well-equipped with church or resources worthy of a bishop. He also emphasized the importance of his continuing as president of the seminary, as no priest was at hand equal to the task of assuming its direction. His arguments and the protests of the Bishop of Baltimore prevailed. The Brief "Quorum superiori" was dated 13 Oct., 1822, addressed to Bishop Du Bourg, revoked the appointment and suppressed the vicariate. Father Rosati, however, was not to escape episcopal honours. He was appointed coadjutor to Bishop Du Bourg and Apostolic Brief dated 22 June, 1823, and by instructions of said Brief was to reside in St. Louis. In the fifteen years of the Brief the See of St. Louis was divided, New Orleans and St. Louis to be named episcopal sees, Bishop Du Bourg to have his choice of either, and Bishop Rosati to reside over the destinies of the other. Father Rosati received these documents on 4 Dec., 1823, and letters from the Propaganda told him that he must submit to the diocese he had thus far sought to escape. Bishop Du Bourg was then in New Orleans and selected for the consecration services the Church of the Ascension in Donaldsonville, Ia., a central position, where many clergy might assemble. Here the Very Rev. Father Rosati was consecrated titular Bishop of Tenagre on 25 March, 1824, by Bishop Louis-Guillaume-Valentin Du Bourg, assisted by the Very Rev. Louis Sibourd, V.G., and the Rev. Anthony de Bedolla, O.M.Cap., rector of the cathedral church of New Orleans.

Not long after, Bishop Du Bourg found the task impossible upon him and he resigned, leaving Bishop Rosati in the difficult position of having to administer two sees. To give impetus to his work, he composed and printed a short tract, "The Propaganda of the Holy See," exposing his lack of acquaintance with the clergy and people of Louisiana and his familiarity with the districts of Missouri, Illinois, and Arkansas. He urged the appointment of Rev. Leo de Neckere, a Belgian Lazarist, as Bishop of New Orleans, and sought the intervention of Bishop Du Bourg to have this effected. His objection was sustained, and finally on 20 March, 1827, Pope Leo XII transferred him from the See of Tenagre to that of St. Louis, and requested him to continue the administration of New Orleans until such time as other provision might be made.

During this period the Diocese of St. Louis, strongly seeking, the territory extending from the Gulf of Mexico to the Dominion of Canada and from the Mississippi River to the Rocky Mountains. Owing to the existing indefinite lines of demarcation it
was at times difficult and even impossible to decide with certainty the exact confines of the diocese. The uncertainty of jurisdiction, which necessarily arose from this, influenced Rome to advise all bishops in the United States and Canada to constitute their neighbouring bishops their vicars-general; so in the archives of the diocese we find documents appointing Bishop Rosati of St. Louis to the dioceses of Quebec, Buffalo, Dubuque, St. Boniface, New Orleans, Cincinnati and Dubuque. The State of Illinois was part of the Diocese of Bardstown, Ky., established in 1808, yet Bishop Flaget in exercising his episcopal functions along the Mississippi in the State of Illinois ministered to the wants of Catholics on the western side of the river, and so also Bishop Du Bourg, when residing at St. Louis, gave his attention to the faithful in Illinois, and in this Bishop Rosati also followed the example set. However, in the year 1832, Bishop Rosati wrote to Rome that as the western half of Illinois had hitherto been cared for by the ordinary of St. Louis it would prove more expedient to attach it to the See of St. Louis not only de facto but also de jure. Pursuant to this suggestion Rome, when erecting the See of Vincennes, in the year 1834, divided the State of Illinois and attached the western half to St. Louis and the eastern half to Vincennes; thus it remained until the year 1844 when the Diocese of Chicago was established.

The Diocese of St. Louis at the time of its erection, as is found in Bishop Rosati's report to the Propaganda, dated 1 Nov., 1825, comprised the northern portion of the so-called "Louisiana Purchase" including Arkansas. In Missouri Bishop Rosati mentions the city, St. Louis, where there was but a single priest, and, as he says, need of at least two more. Here the church begun by Bishop Du Bourg was still unfinished. Financial depression having driven away some and prevented others from paying their subscriptions entered for payment of the church debt and permission asked of the State to sell the bishop's house and other church properties to meet the obligation. Thus the conditions prevalent were by no means encouraging; finally, in 1822, part of the church property was sold, including the parochial residence, as also a building in course of construction for an academy. The purchaser gave Bishop Rosati a time in which to redeem it, and to secure necessary means he sent to Europe Rev. Francis Neill, in the hope that generous Catholics there would aid him in saving the property. In 1824, Bishop Neill returned to Rome, Bishop Rosati (besides St. Louis, which he styled the most important city of the State and one of great possibilities) mentions the following others: Carondelet, or Vincennes, with a hundred very poor families of French origin; Florissant, cared for by Father Van Quickenborn, S.J., who was in charge of five scholastics, and at the same time directed a school for Indian boys; St. Charles, Portage des Sioux, Dardenne (now St. Peter's); Côte sans Desain, a French village distant about ninety miles from St. Louis; La Mine di Plumb (Old Mines), with about 200 French families; St. Michael's (Petersburg); St. Genevieve with resident priest; the Barrens (French Bois Brulé, Latin Sylnus Crema/mata), consisting then of about 200 families attended by one of the Fathers of St. Mary's Seminary, with 16 students of theology in attendance. Here too was located the Loretto Convent with 17 sisters, constituting a community though struggling with the difficulties and lack of funds the sisters maintained a free school and cared for 24 orphans. The last Louisiana town mentioned in the report was New Madrid, with 80 French families. In Illinois Bishop Rosati notes Kaskaskia with 160 families, and Prairie du Rocher, with church and resident priest, the Rev. Father Olivier, aged seventy-five years, who was almost blind and unable to render any services to the parish.

"I have offered him a room in the seminary", writes the bishop; "he is a saint who has spent himself for many years in the service of Catholics about these parts."

Aside from this report we find, in other documents extant, mention made of Apple Creek (1816); Cape Girardeau (1816); Potosi (1816); Mine La Motte (1816); Harrisonville (1818); and the Daughters of Indian Nation Missions in Kansas (1822) with Rev. Ch. de La Croix as pastor. In 1818 Rev. Michael Portier was resident at Brazeau, Mo., and in 1822 Rev. Hercules Brassoek at Drury, Ill., but as no mention of these names is found before or after this time we can only conclude that these fathers were residing with English-speaking families with the purpose probably of learning English. The report of Bishop Rosati was dated 1825, the diocese was established in 1826; yet the parishes and missions remain the same in 1826 as in 1825 and so continue until 1831. In 1827 we count 1 bishop, 4 secular priests, 8 Lazarist fathers, 8 Jesuit fathers; a total of 20 priests. In 1831 there were 11 churches with and 5 churches without resident priests; 20 missions; 1 bishop; 16 secular priests; 8 Lazarist Fathers; 11 Jesuits; a total of 35 priests. The Catholic population numbered 8000. It should be noted that on 20 Aug., 1818, Ladies of the Society of the Sacred Heart, including Madame Philippa Duchesne, Superior, Octavia Berthold, and Eugenia Audefl, with two lay sisters arrived in St. Louis and soon after located at St. Charles, Mo. In October of the same year the Lazarist Fathers came from Bardstown, Ky., and settled permanently at the Barrens. On 31 May, 1822, two Jesuits, Fathers Charles van Quickenborn and Peter Timmermans, with seven scholastics and three lay brothers, arrived, and soon after located in Florissant, Mo., while on the same day of the same year twelve Sisters of Loretto took up their permanent residence at the Barrens in Perry County. On 25 November, 1829, four Sisters of Charity arrived at St. Louis from Emmitsburg, Maryland, and began their labours in conducting a hospital, to found which Mr. John Mullanphy had given houses and lots and other properties. On 30 May of the same year Bishop Rosati approved of the foundation of the Visitation Nuns at Kaskaskia, Ill.; these later, in 1844, settled at St. Louis, being compelled to leave Kaskaskia because of the great flood of that year. On 5 March, 1836, Rev. James Fontboune arrived at St. Louis with seven Sisters of St. Joseph from the Diocese of Lyons, France. Four Ursuline Nuns arrived on 4 Sept., 1848. The Rev. Joseph Paquin was the first priest to own Missouri as his native state. He was born at New Madrid, 4 Dec., 1799.
The first bishop to be consecrated in the Cathedral of St. Louis by the Rt. Rev. Bishop Rosati was the Rt. Rev. Michael Portier, titular Bishop of Olenissa and Vicar Apostolic of Alabama and the two Floridas, the consecration taking place 5 Nov., 1826.

Bishop Rosati, born in the Kingdom of Naples on 12 Jan., 1789, he resolved even in his early days to consecrate his life to the service of God. In his youth he entered the novitiate of the Fathers of the Congregation of the Mission at Rome, was there professed, and ordained a priest. No record of his ordination is extant, due, no doubt, to the fact that Naples at that time held great sway in the Eternal City, and he commanded the expulsion and suppression of the Lazarist Fathers. It is evident, however, that it must have been either in 1811 or 1812, as documents show that on 19 Nov., 1812, the usual saecularet faculties were given him by the Cardinal Vicar of Rome. His first charge was as assistant to the Rev. Felix de Andries, C.M. This we find him occupying when in the year 1815 Bishop Du Bourg was consecrated in Rome. A few days after his consecration Bishop Du Bourg arranged with the cardinal prefect to have a colony of Lazarist Fathers go to America to work among the Indians and take charge of his new diocese. Rev. Felix de Andries was appointed superior of this band, and he selected as his associate the Rev. Joseph Rosati and the Rev. John B. Aquarumi. They, together with four lay brothers and two secular priests, the Revs. Joseph Carretti and Andrew Ferrar, and also four ecclesiastical students, on 13 Oct., 1815, departed from Rome for their future field of labour. Bishop Du Bourg, detained at Rome on important and serious business, could not accompany them. He, therefore, before their departure, appointed Father de Andries his vicar-general and Father Rosati director of the seminarians, noting in the appointment of the latter that after de Andries die, Father Rosati was to succeed him as vicar-general.

On 7 Jan., 1816, the colonists arrived at Bordeaux, took up their residence in the archiepiscopal palace and remained there several months, applying themselves to the study of the French and English languages. Finally, 12 June, 1816, they embarked at Bordeaux for Baltimore and landed there 27 July, 1816; thence they proceeded by stage to Pittsburgh, and here they were delayed several weeks because of low water in the Ohio River, finally arriving at Bardstown, 9th of October, 1817. Thereupon they most cordially and with every mark of affection, and placed at their disposal part of his seminary. Here they remained studying English under the tutelage of Bishop David, then coadjutor to Bishop Flaget. Father Rosati in a very short time had advanced sufficiently to be able to preach and hear confessions in the English language, and spoke from his occupation as professor of philosophy and theology in the seminary, devoted himself to parochial work. When in June, 1817, word was received that Bishop Du Bourg had sailed from Bordeaux and would arrive at Annapolis about 14 September on his way to St. Louis, Bishop Flaget and Fathers de Andries and Rosati, with one lay brother, set out on horseback from Bardstown, Ky., to St. Louis, a distance of over three hundred miles, there to arrange a reception for the bishop. After the installation of Bishop Du Bourg at St. Louis Bishop Flaget and Father Rosati returned to Bardstown, leaving Father de Andries and Brother Blanca at Ste Geneviève, Mo. Father Rosati remained at Bardstown as rector of the seminary until October, 1818, when by order of Bishop Du Bourg the seminary was transferred to the Barrens, Perry County, Mo. Father Rosati was its first superior and also passed over as vicar-general.

On 15 Oct., 1820, the venerated de Andries died and was succeeded by Father Rosati as superior of the Lazarist Fathers and as vicar-general of Bishop Du Bourg. Admiringly did he accomplish the work devolving on him by virtue of his new appointment. Soon, without any conscious effort, he found himself surrounded by a body of enthusiastic and willing co-workers, and his ability and scholarship were soon manifest throughout the land.

In 1821 Bishop Du Bourg intended separating Mississippi and other territory from his diocese and pleaded for the appointment of Father Rosati as vicar Apostolic. This dignity the latter's humility prompted him to decline, but later on Rome nominated him titular Bishop of Olenissa and coadjutor to Bishop Du Bourg. He was enjoined under obedience to accept the nomination, and he remained in this office until the establishment of the Diocese of St. Louis, when he was placed in charge of its destinies and entrusted with the administration of the See of New Orleans. His worth as bishop can be gleaned from the results of his administration. Numerous religious orders were introduced, and during his time and partly by his efforts, the Jesuit Fathers established their novitiate at Florissant, Mo., and founded the western province of the order. In 1827 Bishop Rosati transferred the Convent of the Sisters of the Religious of the Sacred Heart, which has since grown into the present University of St. Louis. The Religious of the Sacred Heart, the Visititation Nuns, and the Sisters of St. Joseph grew and developed by his advice and under his guidance. A home for the orphans, an institute for deaf-mutes and the St. Louis Mullenaby Hospital were made possible by his zeal and untiring efforts. In the year 1831 he began the building of the cathedral church, a beautiful, stately, and at the same time costly, structure, the cornerstone of which was solemnly blessed and laid by him on 1 Aug., 1831.

The solemn consecration of the cathedral took place on 26 Oct., 1834, Bishop Rosati himself being the consecrator, assisted by Bishops Flaget of Bardstown, Purrell of Cincinnati, and Bruté of Vincennes in presence of many priests and a great concourse of people. Here too, only two days later, he consecrated the venerable Bishop Bruté. Even to-day the cathedral stands, a monument of the faith and devotion of the Catholics of old St. Louis, the wonder and the admiration of all because of its purity of architecture and solidity of construction. In the midst of his distracting and arduous duties Bishop Rosati yet devoted time for study and literature. When the bishop died, he was clear and convincing and many of the ablest and most learned documents of the Four Provincial Councils of Baltimore are the results of his pen. He was a prudent, efficient administrator and an eloquent speaker, speaking equally well in Italian, French, and English. His audiences included men of every rank and station and so convincing were his words and so impressive his personality, that his converts during the year 1839 numbered 299. His confessional was always surrounded by penitents and in and out of the confessional he was accessible to all who sought his friendship or advice. He was content to call no time his own, but at all hours was ready to bestow his best attention upon any person who might desire to speak with him; thus he came to wield a mighty influence for good.

On 25 Apr., 1840, he attended the Fourth Provincial Council of Baltimore and presided at its close departed for Rome, where he was most graciously received by Pope Gregory XVI. Appointed by the pope Apostolic Delegate to Hayti, he was commissioned to adjust the relationship between the Holy See and the Republic of Hayti; he accepted the appointment. In doing so, however, he refused to leave the country and his替换
This Rome agreed to and asked him to name his choice; he thereupon proposed the name of the Very Rev. Peter Richard Kenrick, vicar-general to the Rt. Rev. Francis Patrick Kenrick of Philadelphia; at the same time he drew attention to the fact that only a shoemaker's son had practically been used as his coadjutor the Rev. John Timon, C.M., and that Father Timon had declined the honour. Now, he argued, in order to prevent a recurrence of the same nature it might be well to oblige Father Kenrick under obedience to accept the office. That Rome said. His suggestion is clear from a letter of the Rt. Rev. Francis Patrick Kenrick, dated Philadelphia, 4 June, 1841, addressed to Bishop Rosati in which we read: "the positive wishes of His Holiness have, I believe, secured my brother's full acquiescence". Before going to Hayti Bishop Rosati returned to the United States, and on 30 Nov., 1841, at the cathedral church at Philadelphia, he consecrated the Rt. Rev. Peter Richard Kenrick titular Bishop of Drass and coadjutor of the Diocese of St. Louis. Having arranged the affairs of his diocese, and informed himself as well as possible regarding matters at Hayti, he sailed from New York, 15 Jan., 1842, and arrived at Paris on the twenty-first day of the same month, where he was received with every mark of respect. Success crowned his efforts so far as he was able to convince the president of the advisability of signing a Concordat which should be submitted to the Holy See for approval. He left Hayti 22 February, 1842, landed at Brest, France, on Easter Sunday, and from there proceeded to Rome to report the result of his endeavours to the pope. The remainder of the year he spent in Europe. In the spring of 1843, the Concordat having been signed at Rome, he journeyed to Paris to arrange for his return trip to Hayti. It is of interest to note that on his trip to Paris he met and travelled with the papal nuncio to Brussels, the Most Rev. Vincenzo Gioacchino Pecci, titular Archbishop of Damietta, afterwards the illustrious Leo XIII., and that the latter in 1881, in speaking of this meeting, said that never during his days he had met with a prelate so saintly (nessuno si santo) and so imbued with filial love and respect for the pope. When Bishop Rosati reached Paris his health, long before undermined by the privations and exposures of his missionary life in the Far West, gave way; he was stricken with an attack of lung trouble and was convalescing during the previous month of February, and, acting on the advice of his physicians, he returned to Rome, where he died in the House of the Congregation of the Fathers of the Mission on 25 Sept., 1843. Coming to Missouri in the primeval days of its settlement, when it had scarcely a sense of Catholicity, he left the diocese in a flourishing and prosperous condition. Preparatory to the first Diocesan Synod of St. Louis, convoked by him, and opened 21 April, 1839, he issued a call for a diocesan census, the result of which shows: a Catholic population of 31,503; 3 convents of the La Salle Sisters; 1 orphan asylum and hospital in charge of the Sisters of Charity (19 sisters); 4 convents of the Sisters of Loretto, with 30 sisters; 2 convents of the Sisters of St. Joseph, with 11 sisters; 1 convent of Visitanton Nuns, with 19 sisters; 4 ecclesiastical seminaries, with 30 clerics; 3 colleges, 7 charitable institutions. In 1842 we find 39 churches, 26 resident priests; 6 chapels; 36 churches without resident priests; 60 missions; 2 bishops; 29 secular priests; 21 Lazarist Fathers; 28 Jesuits; a total of 80 priests. The Catholic population at this time is given as 100,000. Bishop Rosati died 25 Sept., 1843, and was succeeded by Peter Kenrick.

First Archbishop, Peter Richard Kenrick (1841–1860).—Some lives there are that mark an epoch—lives which by virtue of their striking power or unique position, or both, stand apart and form landmarks in history. Such was the life of Peter Richard Kenrick, the second Bishop and the first Archbishop of the Diocese of St. Louis; for an account of his life see KENRICK, FRANCIS PATRICK, and PETER RICHARD. On 20 July, 1843, St. Louis Bishop Kenrick took the rank of an archdiocese and Bishop Kenrick became its first archbishop. No suffragans, however, were assigned to him as at the time other archiepiscopal sees were under contemplation in the territory. On 25 May, 1850, he issued a call for the Second Diocesan Synod of St. Louis, the object of which was to recommend for the following August all the priests of the diocese assembled in council. This synod, which was the only one held during his life, passed regulations which obtained during his administration. He also presided at the two Provincial Councils convoked by him, the first 7 Sept., 1855, the second, 5 Sept., 1858; a third was called for May, 1861, but was postponed because of the impending Civil War. On 3 May, 1857, Archbishop Kenrick consecrated the Rt. Rev. James Duggan his coadjutor. One year later Bishop Duggan was transferred to the See of Chicago. In the spring of 1872 Archbishop Kenrick secured the appointment of the Very Rev. Patrick J. Ryan as his second coadjutor. The consecration services were held in St. Louis and Father Ryan, on 14 February, 1872, was consecrated titular Bishop of Tricomics and coadjutor to the Archbishop of St. Louis with the right of succession. Bishop Ryan remained coadjutor until 5 June, 1884, when he was promoted to the Archbishops' See of Philadelphia. After the departure of Archbishop Ryan, Archbishop Kenrick resumed, unaided, the administration of his diocese. In 1893, because of age and infirmities incidental thereto, he found it impossible to continue alone the administration and Rome sent him as coadjutor with the right of succession, the Right Rev. John J. Kain, Bishop of Wheeling, W. Va. Three years later, on 3 March, 1896, Archbishop Kenrick died in the archiepiscopal residence at St. Louis. He was a man of great learning, of modest, unassuming manner, never too reserved and never too familiar, in fact a spiritual man, a man of great soul, to whom littleness and meanness were unknown. He seldom came forward except in defence of Catholic truth and of Catholic interests that were attacked, and then rather in writing than in public meetings. His main work lay hidden from the public eye; he had to organize to support and expand his diocese; to foster the ecclesiastical spirit among his priests; to counsel wisely and prudently his brother bishops, his clergy and people of every rank and condition. For such work it was that he became so well-known and so highly esteemed, and that his name ranks so high in the history of the Church in America.

During the life of Archbishop Kenrick the expansion of the Church in the Diocese of St. Louis was unprecedented. Prior to 1843 there were but three churches in the City of St. Louis: the cathedral, St. Mary's and St. Joseph's. Next to St. Mary's was the Church of St. Francis, and in 1846, the St. Francis Xavier, and only 39 throughout the entire diocese. At the time of his death we find 58 parish churches in the City of St. Louis and 108 outside the city, also 26 chapels and 97 mission churches, with a Catholic population of nearly 200,000. In 1849, he introduced the Christian Brothers; in 1862, the Franciscans; in 1860, the Oblates of St. Mary; and in 1862, the Oblates of St. Francis; in 1869, the Alexian Brothers; in 1884, the Passionist Fathers; in 1848, the Sisters of the Good Shepherd; in 1849, the Ursuline Nuns; in 1856, the Sisters of Mercy; in 1858, the Notre Dame Sisters; in 1863, the Discalced Carmelites; in 1870, the Little Sisters of the Poor; in 1872, the Sisters of St. Francis; in 1880, the Oblate Sisters of Providence, and in 1882, the Sisters of the Precious Blood. In 1843 he founded a monthly Catholic magazine,
"The Catholic Cabinet and Chronicle of Religious Intelligence", in 1850 a weekly publication called "The Shepherd of the Valley", which was discontinued in 1954. To accomplish this, he used his considerable financial resources, his energy, and his personal charm to persuade others to contribute to the cause. He was also a skilled diplomat, able to negotiate with various factions and interest groups in order to achieve his goals. His energy, determination, and persistence were key to the success of his initiatives, and he was able to inspire others to work alongside him to bring about change. His legacy is a testament to the power of dedication and hard work, and his life serves as an example to all those who seek to make a difference in the world.
main façade with its imposing gable and deep receding central rose-window, and three great main entrances below, flanked on either side with imposing isolated towers giving great breadth to the façade, present a front of great dignity and charm. The sides, with many gabled entrances, one-story chapels and great cloth sconces, the supraported towers at angle of the dome and central transepts form a beautiful combination, giving fine light-and-shadow effects. The building is roofed with a sea-green glazed tile; the tyns of all the arches, illuminated with mosaics in subdued colours, impart warmth and interest to the whole. The building has great arched doors with sculptured panels depicting Biblical subjects. The interior is of a purely Byzantine type, an original composition in colours never before attempted in this type of church architecture. The general plan consists of two minor domes, a large central dome, and a nave, with transepts and apse, surrounded with spacious ambulatories, through which the circuit of the church may be made without crossing the more sacred parts of the building. There are spacious chapels with groined and vaulted ceilings to the right and left of the sanctuary; these are dedicated to the Blessed Sacrament and the Blessed Virgin. Other chapels of equal importance are on either side of the front minor dome, while two transepts form chapels dedicated to St. Louis and St. George. In the ambulatory circling these transepts are Stations of the Cross in bronze. The colonnades are of rare imported coloured marbles, the caps and bases of which are finished in gold with shadowed blues and reds. The ceilings, spandrels and arch balustrades are decorated with highly illuminated glass mosaics, of varied interlaceiing geometric patterns and religious emblems. The interior presents an ever-changing vista of design and colour when observed from different points of view.

The statistics of the diocease (1911) are as follows: archbishop, 1; diocesan priests, 314; regular clergy, 214; Jesuits, 83; Passionists, 12; Redemptorists, 40; Franciscans, 32; Lazarists, 42; Servite Fathers, 2; Brothers of Mary, 3; total priests, 328; churches in city, 83; churches outside city with resident priests, 156; total, 242; churches without resident priests, 98; total churches, 340; stations, 66; chapel, 120; seminary for diocesan clergy, 1; students, 250; seminaries of religious orders, 7; students, 900; colleges and academies for boys, 8; students, 2500; academies for young ladies and other institutions of higher education for females, 15; educated in higher branches, 5000; parishes with parochial schools in the city, 69; number of pupils in city, 20,936; parochial schools outside of city, 110; pupils, 9645; total schools, 179; total pupils, 30,581; newsboys' home, 1; hotel for working men, 1; orphanage, 7; orphanas, 1500; House of the Good Shepherd, 1; children in preservation class, 250; deaf-mute asylum, 2; pupils, 190; industrial schools, 3; pupils, 300; total number of young people under Catholic care, 40,321; hospitals and infirmarys, 16; patients during the year, about 10,000; asylum, 4; homes for aged, 2; Catholic population, about 375,000.

The statistics of the diocese at the time of this writing, June, 1911, are as above quoted, but by "Brief of the Consistoriale" dated Rome, 16 June, 1911, the northern portion of the diocese has been detached and formed into the diocese of Joplin, Mo. This will necessitate a redetermination of the above figures which cannot just now be done with any degree of accuracy. The territory affected comprises 11 counties: Clark, Adair, Knox, Lewis, Macon, Shelby, Marion, Chariton, Randolph, Monroe, and Ralls. In the counties named there are numbered 15 parishes with 16 more diocesan and 3 regular priests.

TANNETH.

UNIVERSITY OF ST. LOUIS, probably the oldest university west of the Mississippi River, was founded in the City of St. Louis in 1818 by the Right Reverend Louis William Du Bourg, Bishop of Louisiana. Since that time the institution has been under the direction of the Society of Jesus. On 18 November, 1818, Bishop Du Bourg opened St. Louis Academy, putting it in charge of the Reverend Francois Niel and others of the secular clergy attached to St. Louis Cathedral; in 1820 the name of the institution was changed to St. Louis College. The college was successful, but the secular clergy, owing to their duties, found it difficult to attend to this professorial work. In consequence Bishop Du Bourg, who had been President of Georgetown College, soon began to formulate plans to put St. Louis College in care of the Society of Jesus, for he realized that its existence would be precarious without some such guarantee for supplying a corps of trained professors. He therefore made application to the Provincial of the Jesuits in Maryland, but his request could not be granted, as the establishments of the Society at Georgetown and elsewhere in the eastern states fully occupied all the members at that time. However, it was in 1823 that Bishop Du Bourg visited Washington to consult with James Monroe, President of the United States, and John C. Calhoun, Secretary of War, on the Indian affairs of his diocese. Mr. Calhoun suggested that he invite the Maryland Jesuits to give him their assistance in this difficult pioneer work. Bishop Du Bourg thereupon once more entered into negotiations with the Provincial of Maryland, offering to make over to the Society of Jesus his cathedral property in St. Louis, which comprised church and college, as well as a farm near Florissant, Mo., for an Indian seminary. The Jesuits would then supply themselves with a diocesan house. The provincial accepted that part of the proposition which referred to the Indian seminary, but stated that priests could not be spared for the St. Louis educational project. Accordingly in June, 1823, the Jesuits from Whittemarsh, Md., took up their abode in Florissant, Mo., as the home of an Indian seminary. In 1824 they yielded to Bishop Du Bourg's earnest solicitations to take over St. Louis College, but the transfer was not actually effected until 1827.

The last session of St. Louis College under the management of the secular clergy was that of 1826-27. The Jesuits decided to accept the property given by Bishop Du Bourg, and in the interval the pupils of St. Louis College were accommodated at Florissant. Thence they were transferred to the new establishment in St. Louis where classes were opened under Jesuit masters on 2 November, 1829. In its new environment the college flourished, and in 1832 received its charter as a university by act of the Missouri Legislature. President Verhagen at once began to organize the post-graduate faculties. In 1834 the school of divinity was established, which continued its courses until 1860. A faculty of medicine was constituted in 1836 and was eminently successful until 1855 when, owing to the Know-Nothing movement, its separation from the university was deemed advisable. A law school was organized in 1843 but was closed four years later. In 1889 the work of reconstructing these faculties began. The school of philosophy was opened in 1889; the school of divinity in 1899; the school of medicine in 1903; the dental college, school of advanced science, and institute of law in 1908; the department of meteorology and seismology in 1909; and the school of commerce and finance in 1910. Although founded in the pioneer days of education in the West, the old professional schools of
the university did excellent work. Dr. William Beaumont, widely known for his observations in the case of Alexis St. Martin, was among the first professors of the medical school. Rush Medical College of Chicago owes its existence to an early professor at the school, Dr. Cooper. Medical College of San Francisco was founded by an alumnus, Dr. Cooper. Another student of those early days, Dr. L. C. Boisliniere, wrote a text-book on obstetrics, which is still of considerable value. In 1848 Dr. M. L. Linton organized the first medical monthly in America, the "St. Louis Medical Journal." Buckner, Barret, Garresch, and Sharp, of the old Law School, were men of national prominence in their day. Eight American prelates have had intimate connections with the university: Du Bourg of Louisiana, as founder; Rosati of St. Louis, as patron and benefactor; Van de Velde of Chicago and Carroll of Covington, as presidents; Miga, Vicar Apostolic of Indian Territory, as a professor; de Necker of New Orleans, Harty of Manila, and Chartand, Auxiliary of Indianapolis, as students. Other students of the university who rose to prominence in ecclesiastical affairs are the Very Rev. A. M. Anderledy, General of the Missionaries of St. Mary, and the Very Rev. P. J. F. Meyer, English assistants to the General of the Society. Fathers Carroll, Heylen, Smarius, Damen, and Conway were noted preachers connected with the university.

From an early date, members of the faculty devoted themselves to writing. Walter H. Hill, S.J., was among the first to write text-books on scholastic philosophy in English, and his works are still widely used. "The Happiness of Heaven", by Florentine Boudreaux, S.J., and "The Imitation of the Sacred Heart", by Peter Arnould, S.J., have gone through many editions (the most recent, 1910), and have been translated into many modern languages. Joseph Keller, R. J. Meyer, F. Garresch, and Joseph Fastre, all of the Society, wrote on ascetical subjects, while the writings of Pierre Jean de Smet did much to bring the Indian Missions into public notice. Within recent years books and studies on philosophy, theology, apologetics, ecclesiastical history, pedagogy, and canon law, have been published by the Jesuit professors, Poland, Otten, Higgins, Coppens, Gruender, Conway, Rother, Martin, Conroy, and Fanning. Fathers Coppen and McNicholl have issued textbooks on English literature. Father Finin, who has been known as an authority on the history of the Jesuits, is the author of "Loyola and the Educational System of the Jesuits". Fathers Finn, Copus, and Spalding are the authors of books of fiction for the young which have an extensive circulation.

The University Library contains more than 70,000 volumes, among them many rare and valuable works. There are also special libraries in each department of the university. The museum contains specimens illustrating the fields of geology, palaeontology and ethnology; the art collection though small contains some paintings of considerable merit. The "Fleur de Lis," a literary publication, and a number of philosophical, literary, and scientific societies, several of which publish their proceedings, furnish the student additional opportunities for mental development; the Society of the Blessed Virgin Mary and other religious organizations offer additional aids to piety. University athletics are controlled by a student's association working in connexion with the Faculty Board of Athletics. The gymnasium is fairly equipped and a splendid campus has been recently secured. The Alumni Association with records dating from 1828 is well organized and helps much to promote loyalty to the university. The General Catalogue, issued annually, and the Announcements published by the schools from time to time during the year, furnish detailed information in regard to the university.

SAINT LUCIUS

Saint Lucius (Luz), Monastery of, Chur, Switzerland. The Church of St. Lucius was built over the grave of this saint, whose relics were preserved in it until the sixteenth century. Originally the church was the cathedral. St. Valentinian enlarged it in the first half of the sixth century and built the crypt which is still in existence. In the ninth century a bishop and eight clergymen were built by Bishop Tello, the former Roman fortress and St. Luci was temporarily a branch of the Benedictine Abbey of Pfäffer. About 1140 it became a Premonstratensian abbey. At the time of the schism of the sixteenth century Theodore Schlegel, Abbot of St. Luci, was especially energetic and pro-fores, defending the Catholic Faith. He was executed by the Protestants after terrible torture on 23 January, 1529. The monks were driven out and the monastery remained empty for a hundred years, the relics of St. Lucius being taken to the cathedral. Community life was continued at Bendern in Liechtenstein. In 1624 the monastery was restored and continued to exist until the beginning of the nineteenth century. By the decision of the Imperial Delegates at Ratisbon the possessions of the monastery in Liechtenstein and Vorarlberg were given in 1802 to the Prince of Orange. Consequently the monastery had no further means of existence. In 1836, therefo-re, the abbot and community transferred the monastery and all its rights to the episcopal seminary; this transfer was confirmed in the same year by Pius VII. The seminary was transferred to the former monastery, where it still exists; it has four courses of theology and seven professors.

SAINT MAEO, ANCIENT SEE OF. See Ronkes, Diocese of.

SAINT MARK, UNIVERSITY OF.—The highest institution of learning in Peru, located at Lima, under the official name of Universidad Mayor de San Marcos. It is reputed as being the oldest university in the New World, having been created by a royal decree of 12 May, 1551, wherein Charles V granted 350 gold dollars to the priors of the Dominican order to establish in Lima an Estudia General, and conferred upon it all the prerogatives enjoyed by the University of Salamanca. This decree was confirmed by a Bull of Pope Pius V, dated 25 July, 1571. Until 30 Dec. of the same year, the school remained under the control of the Dominican fathers, when it became independent with the right to appoint to its benefices without submission to the prior. The first one elected was Dr. Gaspar de Meneses, a layman. In 1574, after a new site had been purchased at a cost of 600 gold dollars, the name Saint Mark was chosen by lot for the institution. Thenceforward, the university acquired a greater importance, and two years later a new plan of studies, adequate to the times, was adopted, with the following classes: two of Spanish grammar; one of native languages, which were then considered necessary for the propagation of the Gospels; three of theology; three of jurisprudence; two of canon law, and two of medicine. The number of students who came to Lima to follow the courses of the university increased rapidly and at one time reached 1200. As the cost of graduation was exceedingly high (about $10,000), instruction in Saint Mark, as in other colonial universities of the times, was confined to the aristocratic and wealthy classes, among whom education was an integral element of the social pursuits. These fees have been gradually reduced and the total now amounts to 50 soles ($25) for the degree of Bachelor, and 100 ($50) for that of Doctor.

The popularity of the institution continued until the time when Peru became independent (1825) and then fell into decline, which continued until 1843, after which the university was reorganized by President Ramon Castilla (28 Aug., 1861). From the year of its autonomy, the university has been directed by a council composed of the rector as chairman, a vice-rector, the dean and a delegate from each faculty, and the secretary of the University. The rector is elected by the professors with the approval and consent of the council, and each faculty chooses its own dean, regulates its courses of studies, and awards its respective degrees. At present constituted, Saint Mark has six faculties. Jurisprudence confers the degree of Doctor of Laws, with a course of five years comprising the following subjects: philosophy of law, civil law, criminal law, ecclesiastical law, mercantile law, mining and agricultural laws, law procedure, and criminal procedure. Medicine grants the diploma of Bachelor of Medicine in five years, and the title of "physician and surgeon" after two additional years of hospital practice, the subjects covered being descriptive anatomy, medical physics, public, private and international hygiene, medical and analytical chemistry, natural and medical history, general anatomy and microscopic technique, pharmacy, physiology, pathology, clinics, bacteriology, therapeutics, materia medica, surgery, ophthalmology, operative medicine, gynecology, pediatrics, obstetrics, legal medicine, etc.; this same faculty is the home of pharmacists, dentists, and obstetricians, with courses of studies covering three years. In theology the degree of Doctor is obtained after a six years' course in the subjects of dogmatic theology, moral theology, church history, liturgy and ecclesiastical calculation, sacred oratory, the Bible, and pastoral theology. The faculty of sciences is divided into three separate sections: (1) mathematical sciences, (2) physics, and (3) natural sciences, the course in each of which comprises a period of three years. Before admission to the faculty of medicine, students are required to pass two years in natural sciences, and likewise in the faculty of philosophy. Every school of engineers (independent of the university) must have studied mathematics two years. The faculty of letters confers the degree of Doctor, its course covering four years with these subjects: philosophy, history of ancient and modern philosophy, aesthetics and history of art, Spanish literature, sociology, history of civilization, history of Peruvian civilization, and pedagogy; two years in this faculty are required for admission to that of jurisprudence. The faculty of administrative and political economy confers the degree of Doctor, and its course of three years includes the following studies: constitutional law; public and private international law; administrative law; political economy and economical legislation of Peru; maritime law, diplomacy, history of the treaties of Peru, consular legislation, finance, financial legislation of Peru, and statistics. The official organ of the university is the "Revista Universitaria", a monthly publication, which has since 1906 been renamed "Revista de la Universidad de San Marcos". At the present time the number of professors of the University of San Marcos is 80.

JULIAN MORENO-LACALLE.

SAINT OMER. See Arras, Diocese of.

SAINT OMER, COLLEGE OF.—The well-known Jesuit college at St. Omer—often spoken of as the anglicized form of St. Omers or St. Omer's—was founded by Father Parsons in 1592 or 1593. All college in England, several colleges had been founded by Englishmen on the Continent—at Douai, Rome, and Valladolid; their primary object was the education of the clergy. Father Parsons recognised the need of a college intended in the first instance for the laity, out for this purpose he chose a college for girls. From England, St. Omer was twenty-four miles from Calais, in the Province of Artois, then subject to
the King of Spain. The first students were obtained by the removal of a small establishment which had been set up by Father Parsons at Eu, in Normandy. Other boys quickly followed from England and within ten years of its foundation the college numbered over a hundred scholars. Thirty years later this number had doubled. The character of the college was kept as English as possible, notwithstanding that several of the early rectors were Spanish. The buildings consisted of a large cloister joined to several smaller ones, and in 1610 a regular chapel was added. The whole was burnt down in 1684; but it was rebuilt on a comprehensive scale. A second fire, in 1725, led to further improvements in rebuilding and the greater part of the college then constructed is still standing. The college continued its work for half a century and a half. Many distinguished Catholics received their education within its walls, over twenty of whom won the crown of martyrdom.

In 1678 the Province of Artois passed into the hands of the French; but the Government was friendly to the college, which continued to prosper till the year 1792, when the Parliament of Paris decreed the expulsion of all Jesuits from France, and proposed to place the college under the direction of secular priests. In order to defeat this scheme, the Jesuits determined to remove the whole establishment. The boys expressed their willingness to accompany masters, and by one of the most dramatic adventures in the history of any school, they succeeded in escaping from France and reassembling at Bruges. Here the college was carried on until the suppression of the Society throughout the world in 1773. Even then, the college did not finally come to an end. Most of the boys escaped and many of them reassembled in the academy carried on by English ex-Jesuits under the protection of the prince-bishop at Liège. From there they were driven by the Revolution in 1794, and the Penal Laws in England having by that time been modified, they returned to their own country, where, by the generosity of Mr. Thomas Weld, one of their former pupils, they were presented with the mansion and property at Stonyhurst, which celebrated college thus claims a descent from that established at Saint Omer by Father Parsons. In this same year the French Government finding itself in possession of the building at St. Omer, but without either masters or scholars, invited the clergy of the English College at Douai to undertake its management. After some hesitation, they consented to do so, feeling that this was the only way to save it from destruction and hopes some day to restore it to its rightful owners. They accordingly transferred their preparatory school there and this became the nucleus of what was practically a new college. Their action was much traversed by the Jesuits, and a long altercation ensued. The facts were laid before the Holy See, and though no final decision was given, the Roman authorities refused to recognise the action of the Douai clergy. In its new form, the college became fairly prosperous, the scholars numbering over one hundred. The learned Alban Butler was president from 1766 to 1773, and died in the college. At the outbreak of the Revolution, however, it came to an end. The students and professors were imprisoned at Anas, in August, 1793, whence they were afterwards removed to Doullens, in Picardy, and joined to the Douai community. After the fall of Robespierre, they were removed to Douai, and in February, 1796, they were set at liberty. They returned to England, and the president, Dr. Staskel, became the head of the new College of St. Edmund at Old Hall. He was followed by two of the professors and a few of the scholars; but the college there was based chiefly on the traditions of Douai, and the secular College of St. Omer practically came to an end.

After the restoration of the French monarchy, the building was restored to the executors of Dr. Stapleton, and by them sold to the French Government. It is used to this day as a hospital.

GARDEN, Stonyhurst College (London, 1884); KEATING AND GRUGEN, Stonyhurst (London, 1901); FOETEL, Records S. J. Several contemporaries pander to the dispute between the Jesuits and Seculars when the latter seized the college: HOBES, Expulsion of English Jesuits out of St. Omer's; REBE, Plain and Succinct Narrative etc.; HODGSON, Descriptive and Historical etc.

BERNARD WARD.

SAINT-OUEN, Abbey of, Rouen, France, was a Benedictine monastery of great antiquity dating back to the early Merovingian period. Its foundation has been variously credited, among others, to Clothair I and to St. Clotilda, but no sufficient evidence has been set forth. The question is forth-coming. It was dedicated at first St. Peter when the body of St. Ouen, Archbishop of Rouen (d. 678), was buried there; the name of St. Peter and St. Ouen became common and finally Ouen only. The history of the abbey, on record from A. D. 1000, presents a very singular and remarkable natural history. The list of abbots is in "Gallica Christiana," XI, 140. In 1660 the monastery was united to the Congregation of St. Maur, and when suppressed in 1794, the community numbered twenty-four.

The chief interest of Saint-Ouen lies in its glorious chancel, which surpasses the Cathedral of Rouen in size and beauty, and is one of the few among the greater French churches completed in the present building. The third or fourth on the same site, was begun in 1318 by Abbot Jean Rousset, who had completed the choir with its chapels in the Decorated style, and a large portion of the transepts, thirty years later. The nave and central tower, more Flamboyant in design, were finished early in the sixteenth century after the original plan. Unhappily the west façade, which had been planned on a unique and most beautiful scheme, was left unfinished. Although nothing could have been simpler than to execute the original designs still existing, the whole of the old work was swept away about the middle of the last century and an ugly pretentious modern design put up instead. Internally the church is 416 feet long, 83 feet wide, and 104 feet high, the nave and tower, crowned with an octagonal tipped lanter, being 245 feet in height. Within, the effect is remarkably light and graceful; the windows seem to have absorbed all the solid wall", and the roof rests simply on the pillars and buttresses, the intervening spaces being huge masses of glass. Fortunately the old glass has been preserved, and its silvery white and jewels of colour give the final touch to one of the finest interiors in the world.

Renville, Kandiyohi, Lyon, Lincoln, Yellow Medicine, Lac Qui Parle, Chippewa, Swift, Goodhue, Big Stone, and Brown, which stretch across the State of Minnesota from east to west, in about the centre of its southern half. During the Seventeenth Prelate Council of Baltimore (5–13 May, 1849) the fathers petitioned the Holy See to erect a bishopric in what was then the village of St. Paul. No action was taken on the matter in Rome for over a year, owing to revolutionary disturbances and the absence of Pope Pius IX (1846–78) in Gaeta consequent upon the revolution in Rome. St. Paul was actually established on 19 July, 1850. Its jurisdiction extended over an area of some 168,000 square miles, i.e. over what was then the Territory of Minnesota (established 3 March, 1849). The constituent parts were: a) a larger western part, to the west of the Mississippi, formerly part of the Diocese of Dubuque, and a smaller eastern part, between the Mississippi and St. Croix rivers, formerly part of the Diocese of Milwaukee. The size remained the same even after the admission of the State of Minnesota into the Union (11 May, 1858), and up to the erection of the Vicariate Apostolic of Western Minnesota (12 Feb., 1881), of the Vicariate Apostolic of Dakota (12 Aug., 1879), and of the Diocese of Winona (3 Oct., 1889), when it was reduced to its present area. At the time of its erection the Diocese of St. Paul was assigned to the province of St. Louis, afterwards (12 Feb., 1875) to that of Milwaukee. On 4 May, 1883, it became an archdiocese, and among the enrollees at the present suffragan See of Duluth, Crookston, St. Cloud, and Winona, in Minnesota; Fargo and Bismarck, in North Dakota; Sioux Falls and Lead, in South Dakota.

The diocese was named after the town of St. Paul, which had its origin late in the thirties of last century, along the left or eastern bank of the Mississippi, near the military post of Fort Snelling. Father Lucien Galtier had built a log chapel there, and had opened it for services on 1 Nov., 1841. The rude oratory was placed under the invocation of St. Paul, the Apostle of the Gentiles, and the name was then attached to the settlement itself.

The earliest Catholic record of what became afterwards the Diocese of St. Paul is in the Rune Stone, discovered in 1898 near Kensington, Minnesota. A strange inscription on it tells us of a visit made in 1082 by thirty Norsemen to the above locality, where they were acclaimed, the remainder addressed a salutation to the Blessed Virgin Mary and called upon her for protection. Although not all the Scandinavian scholars are agreed on the authenticity of this text, still the internal evidence seems to be all in its favour; and nothing has been found so far to contradict its contents. Minnesota is a classic land in the history of early Catholic voyagers and missionaries. The first, as far as records go, were Grosseilles and Radisson, who spent some time on Prairie Island (1564–50) and in the neighbourhood of Knife lake, Kansa. The explorers arrived in 1613, when the countries around Lake Mille Lacs, the western extremity of Lake Superior, and the Mississippi. It was during these journeys that he met the Recollect Father Louis Hennepin and his two companions Michel Accouls and Antoine Auguelle, and rescued them from their captivity among the Sioux Indians. During an excursion down the Mississippi Hennepin beheld and named the Falls of St. Anthony in what is now Minneapolis. Nicolas Perrot, in 1683, established a small trading post, Fort Perrot, near the site of the present town of Wabasha, Minnesota; and during the sovereignty of the French king over the regions of the upper Mississippi. In his company was the Jesuit Father Joseph-Jean Marest, who spent considerable time among the Sioux about the years 1689 and 1702. A contemporary of Perrot, Le Sueur, established in 1689 a trading post on Prairie Island, and in 1700 another, Fort L'Huillier, on the Blue Earth River, about three miles from its junction with the Minnesota. In 1727 a post, Fort Beauharnois, was established on the western shore of the Lake of the Woods, then the explorer de La Verendrye. The missionaries of the post were the Jesuit Fathers Messager and Anselm, the latter of whom met a cruel death at the hands of savage Sioux. Religious ministrations were, of course, the chief object of the missionaries. Even the lay voyagers did what they could towards the religious betterment of the natives. Grosseil and Radisson instructed the older people in the elements of Christianity, and baptized a number of children whom they believed in danger of death.

No permanent settlements were made within the area of the Diocese of St. Paul until some time after the organization of the Government of the United States. In Sept., 1818, a mission was opened at Pembina, North Dakota, for the Catholic settlers, who had gone there from Lord Selkirk's colony near St. Boniface, Manitoba. The first priest, Father Dumoulin, and his immediate successors were sent from St. Boniface, the nearest Catholic mission in the years following until 1826 many settlers of the Red River valley were compelled to depart, owing to floods, grasshoppers, and other afflictions; and a number of them, generally Canadian and Swiss French, came to the vicinity of what is now St. Paul. Bishop Loras of Dubuque, accompanied by Father Talmour, visited the few Catholics in the region; in 1840 he sent there a resident priest in Father Lucien Galtier, who in 1844 was replaced by Father Augustine Ravoux, for more than sixty years a priest in the Diocese of St. Paul. The first Bishop of St. Paul was Rt. Rev. Joseph Cretin (1851–57), Vicar-General of the Diocese of Dubuque, appointed 23 July, 1850. His consecration took place at Belley, France, 26 Jan., 1851; on 2 July of the same year, he took possession of his episcopal see; his death occurred on 22 Feb., 1857. The small log chapel built by Father Galtier was soon replaced by a large structure of brick and stone. The property was used for functions for church, school, and residential purposes. Another stone building was begun in 1855, but not finished until after the bishop's death; it is still used as the cathedral of St. Paul. The Catholic population, which consisted of several hundred, or perhaps a thousand, grew considerably in numbers, and numbered about 50,000 at the end of the bishop's career. The increase was largely due to the bishop's own efforts, who invited Catholic settlers to the fertile plains of Minnesota. In addition to the French Canadians large contingents of Irish and German settlers arrived in the region late in the century along the Mississippi, St. Croix, and Minnesota Rivers. Wherever it was possible parishes or missions were organized, and provided with resident priests, or at least visited occasionally by priests from other stations. At his arrival in St. Paul Bishop Cretin found only a couple of priests with small congregations at St. Paul, Mendota, and Pembina; at his death there were 29 churches and 35 stations with about 20 priests attending to the spiritual needs of the Catholic people. Great efforts were made for the education of the young and for the establishment of worthy parishes. To the latter end the Sisters of the Propagation of the Faith. The Sisters of St. Joseph of Carondelet came to St. Paul 3 Nov., 1851, and soon opened schools for both elementary and higher education at St.
Paul and St. Anthony Falls. In 1855 the Brothers of the Holy Family took charge of a school at St. Paul for boys in both the grammar and higher grades. The Benedictine Fathers from St. Vincent, Pennsyl-
vania, added the school to their mission in St. Anthony Falls in 1856, and soon a college was opened near St. Cloud in Stearns County. A seminary was conducted in the bishop's own house, where the necessary train-
ing was imparted to young Levites of the sanctuary. Works of charity or of general benefit to society were also encouraged. Sister Nuns, of whom the first was formed by the Sisters of St. Joseph; the St. Vincent de Paul Society and other similar associations were organized; and a Catholic temperance society was established in 1852. Among the more noteworthy Catholic pioneers were Jean-Baptiste Farbesault, Antoine Pépin, Vital and Gervais Guerin, Joseph Turpin, Abraham Perret, Benjamin and Pierre Gervais, Joseph and his son Isaac Lepissonnier, Pierre and Sérèvè Bottineau, August L. Larpenteur, Louis Robert, Charles Basile, and William F. Forbes. Of the early priests, apart from Fathers Galtier and Ravoux, the following may be mentioned: Thomas Murray, Daniel J. Fisher, John McMahon, Francis de Vivaldi; Dennis Ledon, Marcellin Peyragousse, George Keller, Claude Robert, Louis Cailliet, Felix Tissot, Anatole Oster, Francis Pierz, Michael Würszel, Demetrios Marogna, O.S.B., and Cornelius Wittmann, O.S.B. of the Jesuit Order. Bishop Cretin the See of St. Paul remained vacant for over two years. Father Augustine Ravoux was appointed administrator; under his regime the present stone cathedral was completed and opened for service in 1858. The second Bishop of St. Paul was Rt. Rev. Thomas Langdon Grace, O.F. (1853-94). He was born, 18
Nov., 1814, at Charleston, South Carolina, entered the seminary at Cincinnati in 1829, and the priory of St. Rose, Kentucky, in 1830, where on 12 June, 1831, he made his religious profession as a member of the Order of St. Dominic. In 1837 he went to Rome for further studies, and was ordained there to the priesthood by Cardinal Patriati, 21 Dec., 1839. After his return to America in 1844 he was employed in the ecclesiastical ministry first in Kentucky, and afterwards for thirteen years at Memphis, Tennessee. In 1859 he was called to the Bishopric of St. Paul by Pius IX; his consecration took place at St. Louis, 29 July, 1860, on 29 July, 1860, during the session of his see, over which he presided until the day of his resignation, 31 July, 1884. He was then made titular Bishop of Menith, and afterwards, 24 Sept., 1889, titular Archbishop of Siunia; his death occurred on 22 Feb., 1897.

In 1865 the first Catholics were introduced in the territorial arrangement and the direction of the diocese during his incumbency. By the creation of the Vicariates of Northern Minnesota and Dakota the northern part of Minnesota and the territory west of Minnesota were erected into new ecclesiasti-
cal provinces. The Vicariate of the Missouri Border was made coadjutor in the person of Rev. John Ireland, then rector of the cathedral. The number of the Catholic people in the diocese continued to grow, largely through the bishop's activity in inviting settlers; at the time of his resignation in 1884 it amounted to about 130,000. In addition to the races already represented there came also many Catholics from Bohemia and Poland. The number of priests grew with the increase of the people, and they were so chosen as to correspond to the needs of the flock; in 1884 they were 153 in all. Side by side with the diocesan clergy there labored fathers of the Bene-
dictine Order, O.F.M., Pères du Saint-Esprit, Franciscans, Dominicans, and Oblates. Charitable institutions were kept up and multiplied wherever necessary. Hospitals were opened at Minneapolis and New Ulm, orphan asylums were erected at St. Paul and Minneapolis, and homes were established for the aged poor. The education of the children was promoted in all possible ways. Catholic schools were founded and provided with Catholic teachers; the Brothers of the Christian Schools, the Sisters of Saint Vincent de Paul, and new academies for girls were opened. The growing needs in the field of charity and education necessi-
tated the coming of more religious women. In the course of time the Congregations of St. Benedict, St. Dominic, St. Francis, Notre Dame, the Visitation, the Sisters of the Holy Cross, the Sisters of St. Joseph, the Sisters of Charity, the Poor Handmaids of Jesus Christ, and the Little Sisters of the Poor furnished their quota. Like his predecessor, Bishop Grace never lost sight of the education of candidates for the priesthood. In 1860 he opened a preparatory school for young boys who felt a vocation for the priesthood. Among his first pupils was Rt. Rev. John Shanley, late Bishop of Fargo. Unfortunately, after some years of existence it had to be given up for lack of accommodations.

To Bishop Grace succeeded his coadjutor, the Rt. Rev. John Ireland, D.D. (1884—). He was born at Burnchurch, Co. Kilkenny, Ireland, 11 Sept., 1838, and came to St. Paul with his parents in 1852. Bishop Cretin sent him to Maimieux and Hyères, France, where he completed his college and seminary course; he was ordained to the priesthood at St. Paul, 21 Dec., 1881. During the Civil War he served as chaplain to the First Minnesota Regiment, which was afterwards stationed at the cathedral. On 24 Dec., 1875, he was appointed titular Bishop of Marones and coadjutor to Bishop Grace of St. Paul, in whose cathedral he received the episcopal consecration, 21 Dec., 1875. Upon the resignation of his prede-
cessor he became Bishop of St. Paul; and on 15 May, 1888, he was raised to the metropolitan dignity as Archbishop of St. Paul. The ecclesiastical province was organized with the suffragan Sees of Duluth, St. Cloud, Winona, Jamestown (Fargo), and Sioux Falls, to which were added afterwards those of Lead (1905), Crookston, and Bismarck (1910). The creation of the Diocese of Winona diminished the terri-
tory of the archdiocese by the southern section of Minnesota. In 1910 an auxiliary bishop was ap-
pointed in the person of Rt. Rev. John J. Lawler, titular Bishop of Greater Hermopolis. The Catholic population kept steadily on the increase, so that at present it numbers about 230,000. The growth is due to the archbishop's own efforts. From the day of his consecration as bishop he organized a systematic movement for the colonization of dif-
ferent parts of Minnesota. Various settlements such as De Graff, Clontarf (Swift Co.), Adrian (Nobles Co.), Avoxka, and Harmony (Big Stone Co.), Minnesota, and Ghet (Lyon Co.), owe their origin and prosperity to his labours. With the increase of the people grew also the number of priests, which at present exceed 300. Of the religious orders, one, that of the Marist Fathers, was added to the existing ones; new associations were maintained and increased. The work of temperance found always a most zealous advocate in the archbishop. Catholic education received from him a liberal and wise patronage. Catholic grammar and high schools were multiplied and rendered more efficient. A new departure in the higher education of women was made by the Sisters of St. Joseph in the opening of St. Catherine's College in 1905. To the religious communities engaged in teaching was added another, that of the Felician Sisters.

The training of the candidates for the priesthood is imparted in two institutions. On 1 Sept., 1886, the Seminary of St. Thomas was imparted to students of both the college and seminary curriculum, with an attendance of 27 in theology and philosophy, and of 39 in the classics. St. Thomas continued to house the two departments until in 1894, when it
was continued as a college; and its growth has been so marvellous that during the past year it enrolled nearly 700 students. The seminary was transferred, in Sept., 1894, to new quarters, the St. Paul Seminary, built and endowed by the munificence of St. Paul's great citizen, James J. Hill. In the year of its opening it numbered about 60 students, and last year it had 180. The seminarians, representing 19 dioceses in the United States. In 1905 the St. Paul Catholic Historical Society was organized with headquarters in the seminary. The following events illustrate the growth of the Diocese and the Province of St. Paul within recent years. On 2 June, 1907, the consecration of the cathedral of St. Paul; and a year afterwards, 31 May, 1908, a similar ceremony was performed with reference to the new pro-cathedral of Minneapolis. The chapel of the Seminary of St. Paul witnessed, 19 May 1910, a scene extremely rare, if not unique, in the annals of ecclesiastical history. Six bishops received on that day their consecration, all six destined for service in the one Province of St. Paul. The present condition of the diocese may best be gauged from the following statistics: archdiocesan, 1; bishop, 1; diocesan priests, 275; priests of religious orders, 40; churches with resident priests, 188; missions with churches, 62; chapels, 17; theological seminary, 1; college, 1; commercial schools, Christian Brothers, 2; number of pupils in parochial schools, 21,792; boarding-schools and academies for girls, 7; orphan asylums, 3; hospitals, 3; homes for the aged poor, 2; house of the Good Shepherd, 1.

FRANCIS J. SCHAEPER.

Saint Paul-without-the-Walls (San Paolo fuori le mura), an abbey nullius. As early as 200 the burial place of the great Apostle in the Via Ostia was marked by a cella memorie, near which the Catacomb of Commodilla was established. Constantine, according to the "Liber Pontificalis", transformed it into a basilica; in 386 Theodosius began the erection of a much larger and more beautiful basilica, but the work including the mosaics was not completed till the pontificate of St. Leo the Great. The Christian poet, Prudentius, describes the splendours of the monument in a few, but expressive lines. As it was dedicated also to Saints Taurinus and Hereculanus, martyrs of Ostia, in the same year, it was called the basilica trium Dominorum. Of the ancient basilica there remain only the interior portion of the apse with the triumphal arch and the mosaics of the latter; the mosaics of the apse and the tabernacle of the confession of Arnolfo del Cambio belong to the thirteenth century. In the old basilica each pope had his portrait in a frieze extending above the columns separating the four aisles and naves. In 1823 a fire, started through the negligence of a workman who was repairing the lead of the roof, resulted in the destruction of the basilica. Alone of all the churches of Rome, it had preserved its primitive character for one thousand four hundred and thirty-five years. The whole world contributed to its restoration. The Khedive of Egypt sent pillars of alabaster, the Pope of Russia the precious malachite and lapis lazuli of the tabernacle. The work on the principal façade, looking toward the Tiber, was completed by the Italian Government, which declared the church a national monument. The interior of the walls of the nave are adorned with scenes from the life of Jesus; on the wall above is a series of mosaics (Gagliardi, Podesti, Balbi, etc.). The graceful cloister of the monastery was erected between 1220 and 1241. The sacristy contains a fine statue of Boniface IX. In the time of Gregory the Great there were two monasteries near the basilica: St. Arius's for men and St. Stefano's for women. Services were carried out by a special body of clerics instituted by Pope Simplicius. In the course of time the monasteries and the clergy of the basilica declined; St. Gregory II restored the former and entrusted the monks with the care of the basilica. The popes continued their generosity toward the monastery; the basilica was again injured during the Saracen invasions in the ninth century. In consequence of this John VIII fortified the basilica, the monastery, and the dwellings of the peasantries, surrounding the town of Joannisopolis, which was still remembered in the thirteenth century. In 937, when St. Odo of Cluny came to Rome, Alberic II, patriarch of Rome, entrusted the monastery and basilica to his congregation and Odo placed Baldovino of Monte Cassino in charge. Gregory VII did many things for the monastery and in his time Pantaleone of Amalfi presented the bronze gates of the basilica, which were executed by Constantinopolitan artists. Martin V entrusted it to the monks of the Congregation of Monte Cassino. It was then made an abbey nullius. The jurisdiction of the abbey extended over the districts of Civitella San Paolo, Leprignano, and Nuzzano, all of which formed parishes; the parish of San Paolo in Rome, however, is under the jurisdiction of the cardinal vicar.

U. BENIGNI.

Saint Peter, Basilica of.—Topography.—The present Church of St. Peter stands upon the site where at the beginning of the first century the gardens of Agrippina lay. Her son, Caio Caligula, built a circus there, in the spine of which he erected the celebrated obelisk without hieroglyphics. It was brought from Heliopolis and now stands in the Piazza di S. Pietro. The Emperor Nero was especially fond of this circus and arranged many spectacles in it, among which the martyrdoms of the Christians (Tacitus, "Annal.", XV, 44) obtained a dreadful notoriety. The exact spot in the circus of the crucifixion of St. Peter was preserved by tradition through XIII.—24.
out the centuries, and in the present Church of St. Peter is marked by an altar. Directly past the circus of Nero ran the Via Cornelia which, like all Roman highways, was bordered with sepulchral monuments. In Christian times a small city of churches and hospices gradually arose here, but without this part of Rome being included in the city limits. When in the year 847 the Saracens pillaged the Basilica of St. Peter and all the sanctuaries and establishments there, Leo IV decided to surround the extensive suburb with a wall, interrupted at intervals by exceedingly strong and well-fortified towers. Two of these towers, as well as a fragment of the wall, are still preserved in the Vatican gardens and afford an interesting picture of the manner of fortification. Owing to this circumvallation by Pope Leo the Vatican portion of the city received the name Civitas Leonina, which it has preserved to the present day (Leonine City). The Vatican Hill rises in close proximity to the river Tiber. Between it, the river, and the mausoleum of Hadrian (Castle of Sant' Angelo) lies a small plain which was not filled with houses until the early Middle Ages. The Vatican territory did not assume a thoroughly urban character until the end of the fifteenth century.

**Basilica of Constantine.**—The simple sanctuary of the Prince of the Apostles gave place under Constantine the Great to a magnificent basilica, begun in the year 333 but not completed until after his death. The southern side of the ancient basilica was erected upon the northern side of the circus, which in the Middle Ages bore the name Palatium Neronis. It was built in the form of a cross and divided into five naves by four rows of twenty-two columns each. Vast treasures were collected in the course of centuries in this principal sanctuary of Western Christendom: precious mosaic decoration internally and externally, offerings of great value surrounding the tomb of the Prince of the Apostles, magnificent vestments in the wardrobes of the sacristy, richly decorated entablature, and bright but harmoniously coloured pavements, paintings, and whatever else the love and veneration of high and low could conceive in the way of adornment. Connecting the basilica with the Porta di S. Pietro at the Castle of Sant' Angelo was a covered colonnade, through which innumerable pilgrims passed. Provision was made in the Vatican territory for their shelter, and the necessity soon arose of building a palace near the basilica in which the pope could live and receive visitors when sojourning at St. Peter's. Churches and monasteries, cemeteries and hospices arose in great numbers around the tomb of the "fisher of men." Twelve centuries elapsed between the building of St. Peter's and the first demolition of an important part of the basilica. Its rebuilding during the Early Renaissance is to be regretted, for the plan of the new church became the plaything of artistic humour. It is due to Michelangelo, who saved all that was possible of Bramante's original plan, that something aesthetically satisfactory was created.

**History of the Building.**—Owing to the neglect of the churches at Rome during the papal residence at Avignon, by the fifteenth century the decay of Saint Peter's had progressed to an alarming extent. Nicholas V, an enthusiastic Humanist, therefore conceived the plan of levelling the old church and erecting a new structure in its place. Bernardo Rossellino of Florence was intrusted with the undertaking and in accordance with his plans the new basilica was to completely surround the choir and transept of the old, and to have the ground plan of a Latin cross with an elongated nave. But with the exception of the tribune begun in 1450 and the foundations of the walls surrounding the nave nothiing further was built, as the pope died in 1455. Julius II, adopting the idea of reconstructing the basilica, instituted a competition in which Bramante, as is related, gained the prize. His unlimited enthusiasm for the mighty conception of the impetuous pope is attested by his numerous plans and drawings, which are still preserved in the Uffizi Gallery, Florence. Bramante wished to pile the Pantheon upon the Constantinian basilica, so that a mighty dome would rise upon a building in the form of a Greek cross. In the spring of the year 1566 Julius, in the presence of thirty-five cardinals, laid the foundations of this imposing structure, which posterity has spoiled and changed for the worse in an inexcusable manner. Bramante died in 1514. Giuliano da Sangallo and Fra Giocondo da Verona, who together with Raphael continued his work, died in 1516 and 1515 respectively. Raphael, yielding to all manner of influences, undertook changes but did not promote the building to any considerable extent. After his death in 1520 a sharp conflict arose whether the church should remain in the form of a Greek cross, or the nave be extended so as to form a Latin cross.

Antonio da Sangallo, who was appointed architect in 1518, and Baldassari Peruzzi, appointed in 1520, were without fixed plans and attempted all manner of experiments, of which Michelangelo, when he received control in 1548, made an end so far as this was still possible. Bramante's plan seemed to him so excellent that he built in accordance with it. By strengthening the central piers he made it possible for them to bear a dome. He did not live to see the completion of his artistic conception, since only the drum
was completed when he died. But in the years which followed the present dome, a sublime masterpiece of unsurpassed beauty, was constructed in accordance with his designs. The faithfulness with which, after the great master's death (1546), Giacomo della Porta continued the building of the dome in accordance with Michelangelo's intentions should be especially emphasized. The building might have been completed at his death, as the intention of the architect, but if in 1606 Paul V had not decided to carry out the form of the Latin cross. During the twenty years which followed Carlo Maderna constructed the present by no means unobjectionable façade and Bernini wasted time and money in adorning the front with bell-towers, which were never removed, from its pedestal to his death as he had completed them. At length on 18 November, 1626, Urban VIII solemnly dedicated the church, of which the actual construction, excepting certain unimportant details, may be considered as completed. Three clearly defined stages in the construction of St. Peter's must therefore be distinguished: (1) Bramante's Greek cross with the dome; (2) Michelangelo, a Greek cross with dome, and in addition a vestibule with a portico of columns; (3) Paul V, a Latin cross with Baroque façade. The longer they built the more they spoiled the original magnificent plans, so that the effect of the exterior as a whole is unsatisfactory. The main fault of the Renaissance lies naturally in the fact that the unsuitable extension of the nave conceals the dome from one observing the basilica from a near point of view. Only at a considerable distance is Michelangelo's genial creation in its pure and beautiful design revealed to the astonished observer. All the external walls are constructed of splendid travertine, now become gold in colour, which even in bright sunlight gives a quiet, harmonious effect.

Architecture.—Statistics.—The construction of St. Peter's, in so far as the church itself is concerned, was concluded within a period of 176 years (1450-1626). The cost of construction including all the additions of the seventeenth century amounted to about $400,000. The yearly cost of maintenance of the gigantic building, including the annexes (sacristy and colonnades), amounts to $39,500, a sum that is only exceeded when actual renewals of the artistic features (restorations, repairing, and extensive marble work on the pilasters) become necessary. The basilica is endowed with extensive properties at Rome, wide landed possessions in Middle Italy, and other capital from the income of which the entire support of the Divine Service, the clergy, and the laity is derived. The employment of these funds as the cost of the building requirements is derived. In accordance with the most reliable contemporary calculations, those of Carlo Fontana, the proportions of the building are as follows: height of the nave, 151-5 feet; width of the same at the entrance, 90-2 feet; at the tribune, 76-7 feet; height of the transepts in interior, 451 feet; entire length of the basilica including the vestibule, 693-8 feet. From the pavement of the church (measured from the Confession) to the oculus of the lantern resting upon the dome the height is 404-8 feet, to the summit of the cross surmounting the lantern, 434-7 feet. The measurements of the interior diameter of the dome vary somewhat, being generally computed at 137-7 feet, thus exceeding the dome of the Pantheon by a span of 4-9 feet. The surface area of St. Peter's is 163,182-2 sq. feet. Comparative measurements.—Length of St. Paul's, London, 506-3 feet; Cathedral of Florence, 460-4; Cathedral of Amiens, 444-2; Basilica di Santa Maria Maggiore, 419-2; St. Sophia, Constantinople, 354. Surface area: Milan, 90,482 sq. ft.; St. Paul's, London, 84,786-5; St. Sophia, 74,163; Cologne, 66,370-8; Antwerp, 53,454. The vestibule of the basilica is 232-9 feet wide, 44-2 deep, and 91-8 high. On the façade are five portals; in the chapel of the Blessed Sacra-

ment is a door which leads directly into the Apostolic Palace; in the choir chapel and in the vestibule of the left transept are doors leading to the sacristy, besides which there are four others generally used for building and administrative purposes. Besides the two low galleries for the singers in the choir chapel, there are four others of restricted size in the piers of the dome. In addition to the principal altar in the central nave and the two altars in the transepts, the basilica contains twenty-nine altars, under most of which bodies of saints, including several of the Apostles, repose.

Annex Buildings.—The colonnades which enclose the most beautiful public place in the world, the Piazza di S. Pietro, form an organic part of the basilica. Constructed in Spanish marble, they surround the piazza in elliptical form, the major axis being the minor axis 787-3 feet. For the construction of the colonnades and the equipment of the Piazza di S. Pietro about a million dollars were expended. The covered colonnades which consist of four rows of columns in the Doric style form three passages, the central one of which is the width of an ordinary wagon road. The 248 columns and 88 pilasters are entirely of travertine. Adjoining the elliptical place is a square one which diminishes in extent towards the church. Its sides consist of extensive corridors, of which the one on the right belongs to the Apostolic Palace. Above the columns of the Vatican façade are surrounded by 162 figures of saints after designs by Bernini. In the middle of the ellipse towers the celebrated obelisk of Heliopolis. Its removal to the present site took place in 1586. On both sides of the obelisk are two beautiful fountains 45-9 feet in height. The obelisk is 336 feet high, and weighs 300-2 tons. Its apex is adorned with a bronze cross containing a fragment of the True Cross. The irregular quadrangle between the ellipse and the basilica is for the most part occupied by the monumental stairway and its approach, which lead pilgrims to the higher level of the church. The area of this approach alone is greater than that of most churches of Christendom. The sacristy of St. Peter's, the house of the canons and beneficiaries, as well as the papal hospice of Santa Marta are connected with the basilica by two covered passages. The sacristy, which contains very remarkable treasure, is in 1316 built by Urban VI by Carlo Marchione. The Palazzina, which stands on the Piazza of Santa Marta behind the basilica, belongs directly to St. Peter's. It is for the time being the official residence of the archpriest of St. Peter's, who is always a cardinal.

Description of the Constitution.—As may be seen in the accompanying plan, the four principal divisions of the basilica extend from the dome and are connected with each other by passages behind the dome piers. To the right and the left of the nave lie the smaller and lower aisles, the right of which is bordered by four lateral chapels, the left by three chapels and the passage to the roof. The general decoration consists of coloured marble incriptions, stucco figures, rich giltig, mosaic decoration, and marble figures on the pilasters, ceiling, and walls. The panelling of the pavement in geometric figures is of coloured marble after the designs of Giacomo della Porta and Bernini. The extremely long sweep of the nave is closed by the precious bronze baldacchino 95 feet high, which Urban VI caused to be erected by Bernini in 1633. Beneath it is the Confession of St. Peter, where the body of the Prince of Apostles reposes. No chairs or pews obstruct the view; the eye roves freely over the glittering surface of the stalls, the magnificent movement, where there is room for thousands of people.

The centre of the entire structure is the tomb of St. Peter (see Confession; Saint Peter, Tomb or). Very interesting also are the high altar in the tribune, enclosing the chair of the Prince of Apostles, and the mighty slab of porphyry upon which the
German emperors were formerly crowned. The magnificent holy water basins to the right and to the left, well known from numerous illustrations, are supported by gigantic putti. The barrel vaulting reposes in a beautiful curve upon the pillars and the arches. Proceeding forwards we also perceive the marble reliefs of many popes on the piers while many of the pier niches contain heroic statues of the founders of the orders, a decoration which extends also over the transepts and the nave of the tribune. At the fourth pier to the right is a very important sitting statue of St. Peter, which has been erroneously ascribed to the thirteenth century, but in truth dates from the fourth or fifth. This is no adaptation of another statue, but was intended to be a statue of the Prince of the Apostles. In the left transept the confessional of the penitentiaries of St. Peter's reveal in the most beautiful manner the unity of the Faith, by offering the opportunity for confession in the most important civilised tongues of the world. Facing the Confession there stand obliquely before the dome piers the colossal marble statues of Sts. Longinus, Helena, Veronica, and Andrew. From the gallery above the statue of St. Helena the so-called great relics are displayed several times during the year. The most important of these is a large fragment of the True Cross. Above the four galleries of the dome the four Evangelists are depicted in magnificent mosaics after the designs of Cavalieri d'Arpino. In the frieze above stands the proud Latin inscription, the letters of which are six feet high: "Thou art Peter, and upon this rock I will build My Church, and I will give thee the keys of Heaven".

In the tribune of the left transept are three altars of which the middle one is particularly noteworthy, because, in the first place, the tomb of the immortal composer Piazzolla lies before it; secondly, because the bodies of the two Apostles Simeon and Judas Thaddaeus repose in a stone sarcophagus beneath the altar; and thirdly, because, as the altar-piece of Guido Reni records, the altar marks the spot in the circus of Nero where the cross stood upon which St. Peter breathed his last. The right transept has attained a special importance in most recent ecclesiastical history because in 1870 the Vatican Council held its sessions here until dispersed by the march of the crowned revolution upon Rome. Returning to the entrance we find in the first lateral chapel on the right the place made famous by Michelangelo's "Pieta" (1499). Beside it in the chapel of St. Nicholas is the treasury of the relics of St. Peter, then follows the chapel of St. Sebastian, and finally the roomy chapel of the Sacrament. Among the art treasures here is the tomb of Sixtus IV, a thoroughly simple and impressive bronze monument by Antonio Pollajuolo. From the multitude of sepulchral monuments which adorn the right transept, those of Leo XII, of Countess Matilda of Tuscany, the powerful friend of Gregory VII, and of Gregory XIII, the reformer of the calendar, deserve special mention. Against the domerester, directly in front of us, stands an altar with the "Corpus Domini of St. Jerome" after Donenichino. The passage around the dome to the right is called the Gregorian chapel, because it was decorated under Gregory XIII after the designs of Michelangelo. Next to the monument of Gregory XVI is the altar of the Madonna dell Soccorso, whose picture is from the ancient church of St. Peter. Under the altar reposes the body of St. Gregory of Nazianzus and adjoining it is the colossal tomb of Benedict XIV.

In the opposite passage of the dome pier are Canova's masterpiece, the monument of Clement XIII, and the altar-piece after Guido Reni, representing the Archangel Michael. In the same division on the left side of the church, the monument of Alexander VIII gleams in the distant light under the altar of the Madonna della Colonna, in an early Christian sarcophagus the mortal remains of Sts. Leo II, Leo III, and Leo IV repose. The altar of St. Leo I is surmounted by the colossal marble relief by Algardi, the "Retreat of Attila from Rome", the proportions of which seem too large, even for the Basilica of St. Peter. Further on is the monument of Alexander VII, and opposite this is the only oil-painted altar-piece—one by Vareni—of St. Peter's. All the remaining tombs within the church are of mosaic. Passing through the left transept we approach the passage around the fourth dome pier, where on the right, under the monument of Pius VIII, is the entrance to the sacristy, and directly in front, under the monument of Pius VII by Thorwaldsen, is the stairway to the gallery of the singers in the choir chapel. Here the left transept begins the first lateral chapel of which is used for the prayers of the canons, while the last serves as a baptistry. Adjoining the choir chapel, beyond the entrance, at a height of fifteen feet above the pavement, is an enclosed niche in which each deceased pope is interred until his body can be taken to the sepulchre definitively assigned for it. At the body of Leo XIII still reposes here, although his sepulchre in the Lateran has long been finished. The uncertainty of conditions at Rome has rendered it inadvisable as yet to undertake the removal of the body. On the tomb of Leo XI our attention is attracted by an excellent marble relief representing King Henry IV of France abjuring Protestantism. Of similar importance is another relief here upon the monument of Innocent XI, relating to the raising of the Turkish siege of Vienna by John Sobieski, King of Poland. Among the most beautiful funeral monuments of the entire basilica is that of Pope Pius VII by Antonio and Pietro Pollajuolo. Adjoining these are the two important tombs of Urban VIII by Bernini and Paul III by Guglielmo della Porta.

Sacro Grotte Vaticane is the name applied to the extended chambers under the pavement of St. Peter's. They are distinguished as the old and the newest. The former lie principally under the nave, and are 59 feet wide and 147-6 feet long. They represent the pavement of the old Basilica of St. Peter. Numerous graves of popes and emperors, which were in the Basilica of Constantine, are here, so that the low and extended place, 11-4 feet in height, is of the greatest historic interest. Among others are the graves of the popes: Nicholas I, Gregory V, a German,
Adrian IV, an Englishman, Boniface VIII, Nicholas V, Paul II, Alexander VI, and the Emperor Otto II. The heart of Pius IX also repose here in the simple urn. The new crypts extend about the tomb of the Apostle and lie under the dome. Adjoining the horse-shoe-shaped passage are a number of chapels in which very remarkable antiquities and works of art from the other churches are preserved. In the middle of the passage just mentioned is the most magnificent of all the early Christian sarcophagi, that of Junius Bassus, to which Waal has dedicated a detailed and richly illustrated monograph, sympathetic in treatment. Two altars are placed here in the closest possible proximity to the sarcophagus in which the body of St. Peter reposes, adjacent to the crypt and to Holy Mass at the altar of the Confession which was formerly very difficult, especially to women, is now easy to obtain.

The Ascend of the Dome.—It was the former custom to ascend an easy stairway to the roof of the church, but now a spacious elevator carries visitors to the heights. From the roof, which is enlivened with many small cupolas and a few guards’ houses, there is a fine panorama and a view of the Eternal City. The great dome has a circumference of about one hundred paces, and if one wishes to mount higher, a stairway between the inner and outer casing of the dome, 308 feet in height, leads into the lantern. Entering the external gallery of the lantern, the beholder is astonished by the view that greets the eye. It looks down into the gardens of the Vatican Palace, in which the people walking about seem like dwarfs. The panorama of the city unfolds itself in plastic forms. To the left tower the Sabine mountains; and beyond the extensive, sun-bathed Campagna are the beautiful Alban hills with their highest peak, Monte Cavo. On the slope of this chain lie the attractive suburban towns Frascati, Marino, Albano, and on the right gleams a silver streak—the sea. Encircling the gallery towards the west, the Vatican gardens lie beneath us, rich and varied in plan, although not artistically laid out. The entire panorama is one of great interest.

Divine Service in St. Peter’s.—Although the Lateran Basilica bears the honorary title of the cathedral of the Bishop of Rome, mother and head of all the churches of the earth, this basilica, as Waal correctly observes, has for a thousand years been an isolated church which played a very modest part in the devotions of the Roman pilgrims. It is very different with St. Peter’s. The great wealth of the basilica has always made it possible to maintain most magnificent ritual; and its proximity to the inner city, its great size, and its art treasures have always attracted everyone. Besides numerous canons, benefactors, and choristers, the church has at its disposal the Vatican Seminary, the students of which always assist in the church in the celebration of Divine Service. The performances of their vocal choirs, the Capella Giulia, are of a very high artistic order. One liturgical celebration takes place only in St. Peter’s and in no other church in the whole world: the Washing of the Altar on Maundy Thursday. At the close of the Mass on this day the so-called papal altar under the great bronze baldacchino is sprinkled with oil and wine. In an extended procession the archbishop, his vicar, the canons, the benefactors, the chaplains, and the entire clergy approach in order, and symbolically wash the altar with a sprinkler. A solemn benediction with the great relics from the tomb of St. Helena terminates this very impressive ceremony.

The great papal functions which Leo XIII was the first to resume after the sad year of 1870 have since then taken place in St. Peter’s with a few exceptions, when the Sistine Chapel or the Sala Ducale were used. Jubilees, canonizations, coronations, and other feasts in which the pope solemnly proclaims are attended by 40,000 to 50,000 people in the gigantic halls of St. Peter’s.

They wait patiently for hours until at the appointed time the Vicar of Christ, loftily enthroned upon the sedia gestatoria, blesses the worshiping throng, while in measured steps he is borne to the papal altar. A perfect silence prevails, when after long preparations the pope in full pontifical attire begins the actual service. Suddenly the magnificent tones of the Kyrie are intoned by the choir of the Sistine Chapel, who alone have the privilege of singing in the presence of the pope, and always without the accompaniment of an organ. Then the pope turns for the first time to the faithful and chants “Pax vobis” (Peace be with you). At the Elevation silver trumpets resound from Michelangelo’s dome.

Chimes of St. Peter’s.—At many of the churches, the bells of St. Peter’s possess an ample endowment of their own. This serves for their maintenance and to defray the cost of the complicated programme of the chimes. The usual daily service is simple but far more complicated are the chimes for Sundays, fast days, feast days, ember days, feasts with octaves, the anniversary of the death, election, and coronation of the present and the preceding pope, and finally, as a climax, the feast of St. Peter with its chimes seven days before and during its octave. Different chimes are prescribed at the death of a canon than at that of the pope.

The Maintenance of the Basilica.—A building of such colossal extent requires a corps of architects, who conduct the ordinary, as well as the unusual, works on the basilica. They are directed by a head architect, who in conjunction with the economist of St. Peter’s, a canon, discusses and arranges everything as far as no special question requires the vote of the chapter. A staff of selected artisans of all kinds, who are in permanent service and are called sumpitrini, is directed by a head sumpitrino. The maintenance of the mighty building is exemplary throughout.
SAINT PETER

Besides the literature cited on the articles Rome and Saint Peter in the Catholic Encyclopedia, Toye, BNM, s. v. Rome, Saint Peter, Vatican. The often mentioned works of Giuberti, Wilpert, Paston, Ghezzi, Cecioni, and Sismondi are still to receive the recognition they demand. As the highest authority is the Liber Pontificalis, ed. Ducangein (1859–92), ed. Mabillon (1866); see also Cecioni, ed. Stanzani, Bibliografa di Roma medievale (Rome, 1893); and the Summa privilegiorum, Basilica di Roma, (Rome, 1892). As well as the extensive Atlas, Richter, Topographie der Stadt Rom (2nd ed., 1901) in Hand. der kais. Alterthüme, IV. public buildings should be made of: I. der kais. Alterthüme, IV. public buildings should be made of: I. Henrici, Die wissenschaftlichen Entwicklungen für St. Peter in Dom Rom (Vienna, 1872); Contadini, Architettura del tempio di San Pietro in Milano (Milan, 1894); Dottori, Storia storica della gran cappella del tempio Vaticano (Padua, 1745); Vannucci, Monumenti illustri dei luoghi reconditi della basilica di San Pietro (Rome, 1863); Gliati, Architettura della basilica di S. Pietro in Vaticano... con una successione della storia di Roma (Rome, 1815); D'Onofrio, De via Capitale sub urbis... in sacris partibus dell'architettura e delle basiliche di Paolo e Pace di Roma (Paris, 1782); Chantler, Pilgrims Walks in Rome (London, 1903). Buildings of the Popes are those of Mollard-Decker, and Gsell-Fels. It is unnecessary to enumerate the abundant illustrative material which is easily accessible.

PAUL MARIA BAUMGARTEN.

SAINT PETER, Tomb of.—The history of the relics of the Apostles Peter and Paul is one which is involved in considerable difficulty and confusion. The primary authorities to be consulted are in opposition to one another, or at least appear to be so. There is no doubt that the bodies now seen in the tombs of the Vatican and the Ostian Way respectively, and which may perhaps be another tomb at the Catacomb of S. Sebastian, which also claims the honour of having at one time received them, and the question is as to the period at which this episode occurred, and whether there was only one or a double translation of the relics. Whatever conclusion we come to, we shall have to discern, or at least to explain away, some of the evidence which exists. The account which we give here is the simplest the consistency with the evidence, and is based upon one consistent principle throughout; namely, to assume only one translation of the relics—the one which took place at a known historical date, and for historical reasons which we can understand—and to refer to this all the allusions to a translation which occur in early authorities, even though some of them seem to have been misplaced in date. There would have been no difficulty in obtaining the bodies of the dead after their mortal remains, and the reposed Christians seem to have followed their usual custom in burying both as near as possible to the scene of their sufferings. Each was laid in ground that belonged to Christian proprietors, by the side of well-known roads leading out of the city; St. Paul on the Via Appia and St. Peter on the Via Ostiense. In each case the actual tomb seems to have been an underground vault, approached from the road by a descending staircase, and the body reposed in a sarcophagus of stone in the centre of this vault.

We have definite evidence of the existence of these tombs (trobakos) in these places as early as the beginning of the second century, in the words of the priest Caius (Euseb., "Hist. Eccl.", II, 26). These tombs were the objects of pilgrimage during the ages of persecution, and it will be found recorded in the Acts of several of the martyrs that they were seized while praying at the tombs of the Apostles. For two centuries the relics were safe enough in these tombs, public though they were, for the respect entertained by the Romans for any place where the dead were buried preserved them from any danger of sacrilege. In the year 258, however, the protection was withdrawn. Christians from henceforth were specially excepted from the open hither-to isolated Russia to the influence and cultivation of Western Europe by means of a large fortified commercial port, he chose for his new creation the southern end of the present island of Petersburgy. At this point the Neva separates into two branches, the big and the little Neva; here on 16 (27)
May, 1703, he began the citadel of Peter and Paul, the fortifications of which were built first of wood and in 1706 of stone. The Troitski church was the first wooden church of the imperial city; around it were erected houses in Dutch style and a temple for Peter and his friends. As early as 1704 the first habitations were built on the northern bank of the Neva. Some 40,000 men drawn from all parts of the empire worked for several years in the erection of the new city; a large number of them succumbed to the extreme severity of their labours and the deadly mists of the frozen ground. In 1708 St. Petersburg was unsuccessfully besieged by the Swedes. The Russian victory over Charles XII at Pultowa put an end to any danger that might have arisen from Sweden. In 1712 the city was formally made the residence of the Court.

It was Peter's desire that his new capital should not be surpassed in brilliance by the capitals of Western Europe. He intended to follow in its construction the plans of the architect and sculptor Andreas Schlüter, who was called to St. Petersburg in 1713 but died in the following year. In order to make the new capital the axis of Moscow, Peter and his successors built a large number of churches and monasteries, often equipped with the most lavish splendour. Peter sought, above all, to establish veneration for the national saint, Alexander Nevski, Grand duke of Novgorod, who died in 1263. He built a church in his honour on the spot where Alexander in 1241 gained the traditionally celebrated victory over the united forces of the leagues, Swedes, Danes, and Finns; this victory cannot be proved historically. The bones of the saint were placed in the church with much pomp in 1724. The tear itself dried up a plan for a monastery and gave to its consecration 10,000 roubles from his private fortune, besides state revenues. At Peter's death the city had 75,000 inhabitants. However, a pause now occurred in its development as Catharine I and Peter II preferred the old capital Moscow. Anna Ivanova (1730—40) was the first ruler to live again at St. Petersburg. During her reign and that of her successor, Elizabeth Petrovna, the city grew greatly and was adorned with striking buildings. Most of the older public buildings, however, belong to the reigns of Catharine II and Paul I, who were great builders. By the favour of the tears who competed with one another in adornment of their churches with splendid and enriching it with schools and collections, as well as by its advantageous position for commerce and intercourse with Western Europe, St. Petersburg has gradually surpassed its rival Moscow. It has "developed into the largest city of the empire, but has assumed more the character of a city of Western Europe than that of a national Russian one."

The history of the Catholic Church in St. Petersburg goes back to the era of the founding of the city. As early as 1703 there were a few Catholics in the city. In 1704 one of the Jesuits, who since 1684 had been living in Moscow, came to St. Petersburg in order to make the observance of their religious duties easier to the officers and soldiers stationed on the Neva; he had also the spiritual care of over 300 Catholic Lithuanians who had been taken prisoners. From 1710 the Catholics had a little wooden chapel, called the Chapel of St. Catharine, not far from the spot where the monument to Peter the Great now stands. The parish register of the chapel goes back to this year. Later, Franciscans and Capuchins took the place of the Jesuits. Although Peter the Great was kindly disposed to the Catholic community, the Holy Synod, an administrative ecclesiastical body, that he had set up, proved extremely suspicious of them. National disputes having arisen between the Franciscans and Capuchins, the Holy Synod was able to obtain an imperial decree in 1725, compelling all the Capuchins but one to leave the city. This one remained behind in the employ of the French embassy and was permitted to hold services for his countrymen in a chapel designated for the purpose. In 1737 the architect Mathey decided to rebuild it in stone and a temporary chapel was arranged. Although the Empress Anna Ivanova gave a piece of ground, the corner-stone of the new Church of St. Catharine was not laid until 1738 on account of the national feuds within the Catholic community: the Frenchmen, Italians, and Poles. The construction of the Church was delayed slowly because of lack of funds. It was built in the Renaissance style by the Italian architect, Vollandi de la Mothe, and was formally consecrated by the papal nuncio Archetti in 1738. In 1738 Catharine II confirmed the gifts of her predecessors and released the church, school, and dwelling of the Catholic priests from all taxes and imposts. In the same year she issued the "Ordinatio ecclesiae petropolitanae", which settled the legal status of the parish and was a model for the other Catholic parishes of Russia. This ordinance raised the permitted number of Catholic priests in the whole of Russia to seven. Three of them were Franciscans, who had charge of the welfare of souls at Kronstadt, Jamburg, Riga, and Reval.

The number of Catholics was considerably increased by the French emigrants whom the French Revolution caused to flee to St. Petersburg. Furthermore, the fact that the first archbishop of Peter the Great, the archbishop of Mohileff, soon transferred his residence to the capital of the empire also contributed to the strengthening of the Catholic Church in St. Petersburg. In October, 1800, the Church of St. Catharine was confided to the Jesuits at the request of the Emperor Paul. The Jesuits opened a school that was soon very prosperous, but their success and the many following conversions aroused the jealousy of the Orthodox. The Jesuits were expelled from St. Petersburg on 22 December, 1815, and from the whole of Russia in 1820. The parochial care of the Catholics of St. Petersburg was given to secular priests, and in 1816 to the Dominicans who have been in the city continuously until the present time. A Catholic Rumanian church was built during the reign of Alexander I. During the forties the number of Dominicans increased to twenty; but the closing of the Polish monasteries, from which they drew new members, reduced their number and limited them to the task to call fathers from Austria and France. Since 1888 secular priests have also been admitted to the cure of souls; still the present number of ecclesiastics is hardly sufficient to meet the needs of the entire Catholic community, the parochial care, schools, and charitable demands. In addition, there is the old limitation of administration by the governmental church consistory, the Catholic collegium, and the department of the state ministry for foreign religious, which exerts a zealous care that an active Catholic life, religious freedom, and efforts for the conversion of those of other faiths should be and remain impossible.

Ecclesiastically, as regards Catholicism, St. Petersburg is the see of the Metropolitan of Mohileff, of the general consistory, of the Roman Catholic ecclesiastical collegium (the highest collegiate church board of administration, which, however, has to obtain the consent of the minister of the interior in all more important matters), of a Roman Catholic preparatory academy for priests, and of an archiepiscopal seminary. The Cathedral of the Assumption of Mary was built in the Byzantine style in 1873 and was enlarged 1896—1902. The parish Church of St. Catharine was erected in 1734; that of St. Simon was built in 1734, that of Our Lady in 1867, that of St. Casimir in 1908, and the German parish Church of St. Boniface in 1910. In addition there are 4 public and 10 private
Catholic chapels in the city. The cure of souls is under the care of 6 parish priests and administrators, and 15 vicars and chaplains; there are also 2 military chaplains for Catholic soldiers. The orders settled in the city are the Dominicans, Assumptionists, Oblates, Franciscans, and the Sisters of St. Joseph. Besides the clerical educational institutions there is a Catholic gymnasium for boys and one for girls. Catholic religious instruction is given in 30 public intermediate schools for boys, 11 military schools, and 28 schools for girls. According to the year-book of the Archdiocese of Mohileff the number of Catholics is 87,500.

St. Petersburg was established by the city government in Russian (St. Petersburg, 1903; Sverdlin, Gana Petersburg, St. Petersb., 1908), in Russian; Baukamper, Durch Skandinavien nach Russland (Berlin, 1901); L. Freiherr von St. Petersburg (Leipzig, 1904); Sabel, St. Petersburg (Leipzig, 1904), in the translation Berliner Kunstblätter, AMMANN, St. Petersburg (Stockholm, 1910); V. HAHN and Dobson, St. Petersburg Painted and Described (London, 1910). Concerning the Catholic Church in St. Petersburg see TUBERG, Die Russische Zunft der katholischen Kirche beider Ritus in Polen u. Russland (Augsburg, 1841); TOLSTOV, Le catholicisme roman en Russie (Paris, 1863); LÉGER, les jésuites à St-Pétersbourg (St. Petersburg, 1904); Encyclopédie Roscente, XIX, s. v.; Godlewski, Monumenta ecclesiastica petropolitana, III (St. Petersburg, 1906-09); Einzeln publ. u. d. Kath. Kirche in Russland (St. Petersburg, 1910); various articles in periodicals, especially in Echo d'Orient, Bessarabie, and Revue catholique des églises.

JOSEPH LINS.

Saint-Pierre. See Martinique, Diocese of.

Saint-Pierre and Miquelon, Prefecture Apostolic of (Insularum S. Petri et Miquelonensis), comprises the only French possession in North America, a group of islands situated 48° 46' N. lat., and 55° 30' W. long. (Paris standard), having an area of 177 square miles. Geologically and geographically connected with Newfoundland, it was once likewise so historically. Known to the earliest Breton and Basque fishermen, this group already bore its present name when Jacques Cartier identified it in 1535. The first settlement was made by fishermen in 1604. In 1683 Bishop de St-Vallier visited it from Placentia, blessed a chapel, and left a priest in charge. The Recollects sent to Placentia (1691) attended this mission. The islands were subsequently ceded to England (Treaty of Utrecht, 1712), restored to France (Treaty of Paris, 1763), then to England (1778, 1803, and 1806), and thrice retroceded to France (Treaties of Versailles, 1873, of Amiens, 1802, and of Ghent, 1814). Many Acadians fled thither after the dispersion of Grand Pré (1755) and the fall of Louisbourg (1758). The first missionaries who came after the war were the Benedictines of Ardenne, with dubious jurisdiction from the Bishop of La Rochelle (1765). The islands now separated from the jurisdiction of Quebec were erected by Propaganda into a prefecture Apostolic, and formed the first mission confided by Rome to the Seminary of the Holy Ghost. M.M. Girard, prefect, and de Manach, who sailed the same day as were driven by a storm to Martinique. They were replaced (1766) by M.M. Becquet and Paradis, likewise of the Holy Ghost Seminary, or Spiritualists, as well as several of the following. In 1775 the prefect, M. Paradis, with his companion and 300 families were expelled by the English. M. de la Touche, having in 1815, M. M. Allain, vice-prefect, and his companion, M. Le Jamet, were forced by the French Revolution to leave for the Magdalen Islands, with a number of Acadians who, remaining faithful to the King of France, refused to take the oath of the Constitution. The former inhabited them, and in 1816, M. de la Touche accompanied them, applied for jurisdiction to the Bishop of Quebec. He was appointed vice-prefect in 1820. His successors, with the same title, were M.M. Charlot (1841), Le Hulloco (1854), Le Tournoux (1864), Tiberi (1883); the two last named belonged to the newly-restored Congregation of the Holy Ghost.

The present titular is Mgr. Christophe-Louis Legasse, b. at Bassemery, France, 1859, appointed in 1898, prelate of his Holiness in 1899. His chief work was the erection of the cathedral of St-Pierre, his residential town. The population, almost exclusively Catholic, varies from 4,000 in winter to 8,000 in summer, owing to the presence of the fishing crews. They are all Bretons, Normans, and Basques. Besides the six resident missionary priests, the fishermen, on the great banks, are visited every month by a chaplain on board a hospital ship which also distributes their mail. There are 7 churches or chapels, 4 stations, 6 schools, those for boys managed until 1903 by 16 Brothers of Ploërmel (Christian Instruction); 33 Sisters of St. Joseph of Cluny (teaching and nursing) were subsidized by the Government until 1903. A classical college opened by the Holy Ghost Fathers in 1873 was closed in 1892.

LIONEL LINDSAY.

Saints, Intercession and Veneration of. See INTERCESSION.

Saint-Simon, LOUIS DE ROUBROUX, DUC DE, b. 1st January, 1875; d. in Paris, 2 March, 1755. Havingquitted the military service in 1702, he lived thereafter at the Court, becoming the friend of the Dues de Chevreuse and de Beuvilliers, who, with Fénelon, were interested in the education of the Duke of Burgundy, grandson of Louis XIV. At the death of Louis XIV, he was named a member of the council of regency of the young king, Louis XV, and in 1721 was sent as ambassador to Madrid. When the Duke of Bourbon became minister, December, 1723, Saint-Simon went into retirement. It was principally between 1740 and 1746 that he wrote his celebrated "Mémoirs". As a history of the reign of Louis XIV they are an extremely precious document. The edition with commentary by Boisisle, and of which twenty-two volumes have already appeared (1911), is an incomparable monument of learning. Saint-Simon aired his hatreds, which were bitter and numerous; he was an adversary of equality, which he described as "leprosy"; he dreamed of a kind of chamber of dukes and peers which would control and paralyze royal despotism, and allow the States-General to assemble every five years to prevent the humble remonstrances of the people. Whatever the historical value of the "Mémoirs" may be, they are, by their sparkling wit, one of the most original monuments of French literature; and the "Parallèle des trois premiers rois Bourbons", written by Saint-Simon in 1746, the year in which he finished the record of the reign of Louis XIV, is an invaluable piece of literary history. On all religious questions he should be read with great precaution. Very hostile to the Jesuits, and favourable to the Jansenists, he contributed greatly to the creation of legends concerning personages such as Mme de Maintenon and Michel Le Tellier. These legends had a long existence. The reproach, historically false, of having in-
stigated the violent measures of persecutions against the Jansenists, which he hurled against Le Tellier, was all the more strange coming from his pen, since Saint-Simon himself, on the day following the death of Louis XIV, was one of the most rabid in demanding of the regent severe measures against Le Tellier and other Jesuites. Father Billaud has shown much how much care is necessary in judging Saint-Simon's assertions regarding the religious questions of his day. The historian Émile Bourgeois, who cannot be charged with prejudice in favour of religion, wrote in his turn, in 1905: "History has given up, too hastily acquired, of pleasing his faith to the word of Saint-Simon." And Bourgeois proved how inaccurate were the statements of Saint-Simon by showing what use the latter made in his "Mémoires" of documents of the diplomatist Torcy.

GEORGES GYAU.

Saint-Simon and Saint-Simonism.—CLAUDÉ-HENRI DE ROUVROY, Comte de Saint-Simon, was born in Paris, 17 Oct., 1760; d. there, 19 May, 1825. He belonged to the family of the Count of Bétheny, and was a son of the Count of Bétheny. At an early age he showed a certain disdain for tradition; at thirteen he refused to make his first Communion and was punished by imprisonment at Saint Lazare, whence he escaped. During the War of Independence he followed his relative, the Marquis de Saint-Simon, to America, took part in the battle of Mon-Saint-Michel, was later captured; he covered his liberty only after the Treaty of Versailles. Before leaving America, being as yet only twenty-three years old, he presented to the Viceroy of Mexico the plan of a canal between the two oceans. In 1788 he drew up important schemes for the economic improvement of Spain. During the Revolution he grew rich by speculation, was imprisoned for eleven months, and under the Directory, though leading a prodigal and voluptuous life, continued to dream of a scientific and social reform of humanity, gathering about him such scholars as Monge and Lagrange, and capitalists with whose assistance he proposed to found a new world. His philanthropic undertakings. He married Mlle. de Champgrand in August, 1801, and divorced her less than a year later in the hope of marrying Mme. de Staël, who had just become a widow, but she refused. In 1805, completely ruined by his prodigal and illicit life, he became a copyist at the Mont de Piété, retying for his living on his activity as a writer; failing in this, he led a life of borrowings and make-shifts, and in 1823 attempted to kill himself. Fortunately for him he made the acquaintance of the Jew Olinde Rodrigues who became enamoured of his social ideas and encouraged him to publish them; at the end of his life. When dying, Saint-Simon said to Rodrigues: "Remember that to do anything great you must be impasionned". Ardent passion is what characterized Saint-Simon and explains the peculiarities of his life and of his system. This precursor of socialism was not afraid to be a fanatic and even to patriotism. He possessed the gift of having Charlemagne among his ancestors.

The “Lettres d’un habitant de Genève à ses contemporains” (1803), the “Introduction aux travaux scientifiques du XIXe siècle” (1808), and the “Mémoire sur la science de l’homme” (1813) show him already to have conceived the idea of the reconstruction of the world. The second of these works is a hymn to Bonaparte who created the university and the institute. In 1814, assisted by the future historian, Augustin Thierry, Saint-Simon published a treatise entitled, “De la réorganisation de la société européenne,” in which he dreamed of a politically homogeneous Europe, all of whose nations should possess the same institutions, relying on England to take the initiative in this federation. Later he turned his attention to political economy. The "Industrie," which he founded, brought out in relief the conflict waged throughout Europe between the military and feudal classes on the one hand and the working class on the other. The same idea was emphasized in the "Censeur européen," edited by Charles Comte and Dunoyer, but while the "Censeur européen" distrusted scholars and learned men, Saint-Simon's originality consisted in trying to combine manufacturing industry and what he called "literary industry" and create a moral code which all men should study. This authoritative idea displeased Augustin Thierry and he abandoned Saint-Simon, who in 1817 (the date set by Monsieur Perinon for the "Utopian" period), published his book, "Le Pape," in 1819, and by those of Donald, Saint-Simon and Auguste Comte, reacting against the individualistic ideas of the French Revolution, recognized the necessity in modern society of a power similar to the medieval theocracy. The "positive scientific capacity" was to replace the ancient ecclesiastical power; there should be "no more governors to command" but "administrators to exercise a directing function"; in a society become an industrial and political association, the governmental, or military régime under which the people was "subject" should give way to the administrative or industrial régime in which the people is to be associated. Saint-Simon drew political conclusions; he found that the working people occupied too small a place in the electoral body; and desired that power should be vested in committees composed of the directing elements of the industrial world. Thus he was in no wise a democrat; he would have only the heads of the industrial hierarchy elected by the people, but would have them recruited by co-option by choosing from the lower ranks of society those who deserve an elevation of their condition. Liberal economists long considered that between their liberalism and Saint-Simon's industrialism, which accorded so many prerogatives to an industrial hierarchy, there was little difference; but Saint-Simonism as it was developed by his disciples was destined to be a socialist school.

In Saint-Simial there was always a double tendency: his positivist and scientific studies impelled him to found a purely practical and demonstrable moral code, while his sentimental and mystical ten-
Old Testament, prepared for by the Biblical societies, and expected by the Jews for eighteen centuries, which was to end in the establishment of a truly universal religion, in the adoption by all nations of a pacific social organization and the speedy betterment of the condition of the poor. Such was the dream developed in his book, "Le nouvel christianisme," which he died from finishing.

The Saint-Simonian School under the influence of the book in which Simondi made known the great labour crisis of England, considered it necessary to perfect their master's doctrine. In making the most intense industrial production the unique aim of society, Simondi had not foreseen that the pattern of the problem was much more complex. Must production be carried on even when there are no consumers? The liberals replied in the affirmative, for there are always consumers; but Fourier said no, the necessary condition of an increased production is a better distribution of labour and of wealth among the workers.

The former Carbonaro, Bazard (1791-1832), Enfantin (1796-1864), and Olindo Rodrigues, in the review "Le Producteur", which they founded, attacked the regime of competition and went so far as to aim at the theories of Adam Smith; then in 1829 Bazard's edición labelled under the same title, "Essai sur la doctrine de Saint-Simon", marks the Credo of the School. The Saint-Simonians thought that two survivals of the feudal system enabled the working-man—lending at interest and inheritance; these two survivals should disappear.

By decree, the Saint-Simonian School became a sect of Church. Enfantin assumed the rôle of pope; Bazard and later Rodrigues separated from him when, preaching the rehabilitation of the flesh, he wished to associate with him the "priest-woman", the "mother", in the government of Saint Simonism. The ceremonies he performed at Menilmontant, his title of "Grand Maitre" in 1832, the journey to Constantinople undertaken by his disciple Barrault in search of the "woman-mother" excited ridicule. Nevertheless Enfantin, whose last work only appeared in 1891, exercised great influence over many of the best minds.

Saint-Simonism left its mark on such men as the philosophe Jean Rémy Bouches, who in 1848 played an important political part, the religious critic Gustave d'Eichthal, the economists Barrault and Michel Chevalier, the publicists Edouard Charton and Maxime du Camp, General Lamoricière and Baron Blanc, future minister of Italy. The industrial movement of the eighteenth century to a large extent promoted by engineers imbued with Saint-Simonian doctrine; the railways of France, the financial establishment of the Second Empire were due to Saint-Simonian influences.

The Saint-Simonians foresaw that industry would be more and more concentrated in great syndicates and that the State as the organ of social centralization would intervene more and more. What they did foresee was that industrial production would become democratic. They had, beforehand, intuition of what we call trusts and deals, but they did not foresee legal unions, and they were thus less clear-sighted than Ketteler, Manning, and Leo XIII.

Lamartine describes Saint-Simonism as "a daring plagiarism which emerges from the Gospel and will return thither", and Isaac Pereire, the last of the Saint-Simonians, in a work entitled, "La question religieuse" (1878), urged the recently-elected Pope Leo XIII to undertake the task of universal social reform. This, the last echo of Saint-Simonism was, as it were, an appeal to the "Rerum Novarum."

GEORGES GOTAU.

Saint-Sulpice, Society of, founded at Paris by M. Olier (1642) for the purpose of providing directors for the seminaries established by him (see Olier). At the founder's death (1657) his society, approved by religious and civil authority, was firmly established. The Paris seminary and three in the provinces (Villers, Basilique, Meaux) were closed; but to give the diocesan clergy to give them besides the elements of the clerical sciences lessons and examples in sacerdotal perfection. The work in Montpellier was inaugurated and four priests appointed to carry it on, while a novitate called the Solitude had been opened to recruit directors for the seminaries. Alexandre Le Ragacos de Bretonvilliers, the successor of Olier (1657-76) drew up the Constitution of the Society and secured its approval by Cardinal Chigi, legate a latere and nephew of Alexander VII. The object of the society was to labour, in direct dependence on the bishops, for the education of ecclesiastics to give them besides the elements of the clerical sciences lessons and examples in sacerdotal perfection.

The number of subjects should be restricted, fervour being worth more than number. The spiritual and temporal government is vested in a superior general assisted by twelve assistans, like him elected for life. Together they constitute the general assembly empowered to elect by majority of votes the superior-general, his assistants, and among the latter four consultors, who shall be his constant advisers, sign the public acts, and represent the whole society. Orders of merit may be conferred by the superior and his council. They take no vows, but renounce all prospect of ecclesiastical dignities. Changes and appointments are made by the superior-general. Every Sulpician should be animated by great zeal for the glory of God and the salvation of his country, should profess detachment and abnegation, practise poverty, be submissive especially to bishops.

De Bretonvilliers transferred the Solitude of Vaugirard to the Château d'Avron, which was a family possession, where it remained until M. Tronson, his successor, established it at Lesy, which endowed the seminary.

He enacted that the community of priests of the parish of Saint-Sulpice should continue subject to a superior. This community numbered from sixty to eighty members until the French Revolution. There Fénelon exercised the sacred ministry for three years and he spoke from experience in great distress when he felt that there was nothing as he venerated more than Saint-Sulpice.

M. Tronson assumed the direction of the society in 1867 and retained it until 1700. He was remarkable for the breadth of his knowledge, his practical mind, and his deep piety. He was zealously vigilant to ward off the Jansenist scourge from the society and the seminaries under his care. At a time when the error since called Gallicanism spread everywhere he was a Roman, as the present expression is, in as far as was compatible with the submission to the bishops which his society professed.

During the eighteenth century the society carried on its work amid the difficulties which Jansenism and philosophy, by corrupting minds, incessantly aroused. François Lescaussion (1700-25) had to defend the seminary of Paris against Archbishop de Noailles, an avowed and militant Jansenist. Under his successors, Maurice Le Peletier (1725-91) and Jean Couturier (1791-70), although new seminaries were opened in the dioceses of France, the spirit of
the age crept into that of Paris, in consequence of the weakening of morals at the Court, contact with the world, and the great number of sons of the nobility who had become seminarians. At this period Saint-Sulpice was charged with the spiritual direction of schools of philosophy and even of petits séminaires both at Paris and Angers, always with the object of preparing them for the seminaries. When the Revolution broke out the seminary of Paris alone had trained more than five thousand priests, and more than half the bishops who faced that dreadful tempest (about fifty) had been in Sulpician seminaries. Claude Bournacot (1770-77) and Pierre Le Gallée (1788-1809), who governed with the mournful presc of the Revolution, were succeeded by André Emery, the man providentially chosen to guide the society during those dark days. He beheld the seminaries closed, his brethren scattered, hunted, and compelled to seek safety in exile, but he had the great consolation, at a time of frequent defections, of seeing them all faithful to their promises. Not one of them took the oath to the Civil Constitution of the Clergy. and eighteen of them died for their faith. The life of this illustrious priest belongs to the whole Church, whose rights he defended with unshakable firmness against Napoleon I (see EMMER). After the Concordat he reopened the seminaries of the society regarded as the restorer of the Society of M. Olier.

During the nineteenth century the Society of Saint-Sulpice has quietly continued its work of clerical training while sharing all the vicissitudes of the Church in France. The following superiors general have governed it: M. Duciaux (1811-20); Garnier (1826-45), a noted Hebrew scholar; de Courson (1845-50); Carrière (1850-64), an eminent theologian; Cavall (1864-75); J. H. Icard (1879-93); and Captier (1893-1900), the founder and first superior of the procure of Saint-Sulpice at Rome. Living within the walls of its seminaries, which, constantly increasing, numbered twenty-six in 1900, the Society of Saint-Sulpice has, so to speak, no history. Its members, absorbed in their professional duties, share the life of the seminarians, being solicitous to train them not only in the ecclesiastical sciences, but also in priestly virtues, and this more by their own daily example than by teaching. The Sulpician constitutes himself everywhere and always the companion and the model of the future priests, in their pious exercises, recreations, meals, and walks, briefly in all the details of their life.

That such a life is eminently fruitful is proved by the numbers, distinguished priests, founders of religious orders, missionaries and religious from Sulpician seminaries, but it will be readily understood that it furnishes few facts of history. For the Church of France Saint-Sulpice has been a great school of ecclesiastical dignity, love of study, regularity, and virtue. That the society thinks of this tribute: "Congregatio Sulpicianorum fuit salus Gal- lis." (Audience of 10 Jan., 1905, to the pastors of Paris). The recent persecutions brought about in France by the separation of Church and State did not fail to attack it. A circular of Minister Combes (1804) declared the Society of Saint-Sulpice unfitted to teach in seminaries. At the same time the old seminary of Paris was taken away from it. Nevertheless the society was not dissolved. It subsists in its essential organs, and its members, in most instances in the seminaries of its native dioceses, continue work of devotion to the clergy and the Church. At the same time the society found its branches to American soil, to Canada in 1857, to the United States in 1791. (See SULPICIANS IN THE UNITED STATES.)

M. Olier had desired to go to Canada to work for the conversion of the savages; this he was unable to do, but in union with several pious persons, among them Jérôme Le Royer de la Dauversière, he founded the Society of Notre-Dame de Montréal. The undertaking was inspired by the desire to found a city in honour of the Blessed Virgin (Villemarie in the Island of Montreal) which should serve as headquarters for the Indian missions and as a stronghold against the Iroquois. The manner in which Maisonneuve accomplished this was well known. In 1657 the dying Olier sent four of his disciples to the mission of Villemarie, where the colonists were asking for them. They were led by M. De Queylus and thenceforth the Sulpicians shared the vicissitudes of the Montreal colony. Two of them, Vignol and Lematte, have been almost lost to the Church. The other two, Gabriel and Jean, brothers of the same family, went to the Indians, the Jesuites of Notre-Dame, reduced to eighty by death and weary of a colony which yielded only expenses, ceded their rights and duties to the Society of Saint-Sulpice, which was thenceforth owner and lord of the Island of Montreal. It paid 130,000 livres in debts and pledged itself never to alienate the property of the island. M. de Bretonvilliers gave no less than 400,000 livres of his personal fortune for the maintenance of the colony and M. Faillons has calculated that from 1657 to 1710 the seminary of Paris transmitted to that of Montreal not less than 900,000 livres or one million dollars. Personal devotion was added to these expenses. When the Sulpicians came to Canada in 1668, teaching boys, exercising the sacred ministry, or doing missionary work among the savages. MM. Trévée and de Fénelon founded the mission of Kempt on Lake Ontario. Dolorie de Casson and Brehan de Gallinée explored the region of the Great Lakes in 1699, of which they made a map. In 1676 a new settlement was founded on the site of the present seminary, where M. Belmont built a fort (1685). The brandy traffic necessitated the removal of this fixed mission and in 1720 it was transferred to Lac-des-Deux-Montagnes, where it is at present. At the end of the seventeenth century the Society of Saint-Sulpice had created and organized in the vicinity of Montreal six parishes which they zealously administered, besides supplying them with churches, presbyteries, and schools. During the eighteenth century the history of the society in Canada continued closely linked with that of Montreal, in all of whose works it assisted by its religious forces. The number of priests increased to meet the needs of the time, and at the conquest (1760) they numbered thirty. They were headed by worthy men: Vachon de Belmont (1700-31), who succeeded Dolorie de Casson; Louis Normant du Paraton (1731-59), who assisted Mme de Foucauld; and Jean Monogolier, who had the difficult task of governing his community during the period of conquest. To the Sulpicians who remained after the Treaty of Paris (1763) the seminary of Saint-Sulpice ceded its possessions in Canada on condition that they would carry on the work of M. Olier. Being unable to recruit their numbers the Sulpicians of Montreal would have become extinct had not the English Government, in 1860, opened the seminary of St Mary's, founded in 1701, and which performed important services after the conquest, they founded a higher seminary (1840) for those of the clergy. In this house several thousand priests have been trained for the priesthood. They have since founded (1894) for the benefit of the clergy a seminary of philosophy at Montreal, opened the Canadian College at Rome for higher ecclesiastical study, and quite recently (1911) have organised the School of St. John the Evangelist for the recruiting of clergy.
in the Archdiocese of Montreal. Since 1866 the society has gradually abandoned the administration of its parishes in Montreal, at present retaining only those of Notre-Dame and Saint-Jacques in the city and that of Oka in the diocese. That it does not, nevertheless, stand aloof from any of the great undertakings in the city which it founded is manifested by the Laval University and the public library.

Separated from Saint-Sulpice as regards material possessions, the Montreal community maintains its spiritual alliance with Paris. The superior-general of the society makes, periodically the canonical visits of the Canadian houses, accompanied by a superior elected every five years, who is assisted by a council of twelve, four of whom, called assistants, are his habitual advisers.

As will be readily perceived the principal Sulpician work in both France and America is that of seminaries. The Sulpician is either the model of the pastor in the ministry or the trainer of the priest within the seminaries. His manner of life has been described above; his instruction and method will here be treated briefly. The sole directing principle of the studies at Saint-Sulpice is the most filial docility of judgment and will toward the orders of his learned teachers. His name for his studies is given to him by his superior or gives directions and counsels. Mindful of their responsibility for priestly souls the Sulpicians teach their pupils, not the novelty which may send them astray, nor their personal opinions which have no guarantee of certitude, but the truth enunciated with the seal of the Church and issuing thence warranted and authentic. In Holy Scripture they treat the books they explain as Divine books, avoiding the exaggerations of critical research and abiding by the interpretation of the text. In dogmatic theology they set forth the truth, at the same time warning their pupils against Rationalistic and Modernist tendencies and teaching them the distinction of dogma and apologetics they follow the historical method; in philosophy they recognize no master save St. Thomas.

Although the kind of instruction given at Saint-Sulpice tends to produce men whose knowledge is more solid than brilliant, more deep than extensive, there has been no lack of remarkable professors in any branch of ecclesiastical learning. Out of the seven hundred and thirty members which the society had numbered down to 1790 no less than one hundred and fifteen had secured their doctor's degree at the Sorbonne; and it is surely no accident that, in the course of a century and a half, no book written by a Sulpician has ever been placed on the Index. Among the theologians were: Delafosse (1701-45) and de Montaigne (1687-1767), who wrote remarkable dogmatic treatises published in the theology of Honoré Tournel; Legrand (1711-87), as famous for his apologetic writings as for his refutation of the philosophical errors of his time; Rey and Rome, authors of valuable treatises published at Lyons; Pea (1787-1853), the continuator of the ecclesiastical conferences of Le Puy; Vies, (1784-1857), author of the "Compagnie institutioni theologica" of Toulouse; Carrière (1795-1864), author of authoritative treatises on marriage, contracts, justice, etc.; Vincent (1813-99), author of the so-called "Clermont Theology". De Lantanges (1616-94) and De la Chétardye (1634-1714) wrote justly-esteemd catechisms and conversations or ecclesiastical instructions. Among the Sulpicians whose works were addressed to the general public was Blaise (1540-96), author of "L'opposition chrétienne"; Guisain (1627-92), author of the "Sages entretiens" of a soul desirous of salvation; Lasause (1740-1826), author of many works of piety; Hamon (1795-1874), whose "Méditations" are much used; Riche (1824-92), author of works intended to assist those who wish to acquire a perfect knowledge of the facts of our Church, and, after Olier himself, M. Tronson (1622-1700), whose "Examens particuliers" is a masterpiece of spiritual psychology and whose "Forma cleric" treatise on obedience, and other works are used to the clergy; Foy de Vauginois (1659-1758), who wrote "Conversations with Jesus Christ before and after Mass" (1721), very popular at that time, and one of the great undertakings of the society; Couy (1738-1842), the author of ecclesiastical retreats; Vernet (1760-1843), who wrote many works to enliven the piety of religious and priests, such as the "Nepotien"; Hamon (1725-1870), the biographer of Cardinal Cheverus and St. Frances de Sales; Galais (1723-76), "Le bon séminariste" (1739); Renzules (1794-1880), author of many works on asceticism, also meditations; Gannon (1813-90), author of the lives of holy priests; Bacques (1820-92), "Manuel du séminariste en vacances".

Among the scholars and learned men in various branches were: Laurent-Joseph Le Clerc (1677-1736), historian, theologian, controversialist, and author of the "Bibliothèque de Richelet" (1772), of a "Lettre critique sur le Dictionnaire de Bayle" (1731), and of various and learned writings; Grandet (1646-1724), who wrote "Les saints prêtres français du XVIIe siècle"; and numerous historical or devotional works; Cras (1794-97), who wrote "Le bon séminariste" (q. v.); Giai (1795-1860), who wrote "Le bon séminariste" (q. v.); Giai (1795-1860), who wrote "La vie et les œuvres de Fénelon", and wrote numerous historical works; Le Hir (1811-98), one of the most learned Hebrew scholars of the nineteenth century; Pinault (1793-1870), who compiled remarkable physical and mathematical treatises; Faillon (1800-70), editor of the "Monumenta et curiosa historiae capitale" and the "Monumenta inedita sur l'apostolat de Marie-Madeleine en Provence", and of numerous historical works on Canada and Montreal; Moyen (1828-99), who compiled a "Flora of Canada," and various scientific works; Grandvaux (1819-95), who published Le Hir's works after his death, and was very learned in the science of ecclesiastical and civil law; Dubois (1823-97), noted for his works on church history and Scripture; Brugère (1823-98), a theologian and historian of wide knowledge; Icard (1805-93), known for his writings on catechisms, canon law, and various spiritual subjects. To these names must be added those of Caron (1772-1850), a liturgist, who published the "Manuel de cérémonies selon le rit de Paris" (1848); Paris (1724-81); and Manier (1807-71), who issued philosophical courses.

A. FOURNET.

Saints Vincent and Anastasius (TRINIT FOUN TUM AQUAS SALVIAS, THE FONTAINS, OF THREE FOUNTAINS), ABBEY OF, NEAR ROME. Connected with, and belonging to the monastery are three separate sanctuaries. The first, the Church of St. Paul of Three Fountains, was raised over the spot where St. Paul was beheaded by order of Nero. Legend says that the head, severed from the body, rebounded, striking the earth in three different places, from which fountains sprang forth, flowing to the present day, and located within the sanctuary itself. The second, originally dedicated to the Blessed Virgin, under the title of "Our Lady of Martyrs", St. Blaise, a friend of his 9th legionaries, who were martyred here at the order of Diocletian, in 299. In this church is the altar "Scala Coeli", from which the church receives its present name. Within is the church and monastery dedicated to Sts. Vincent and Anastasius, built by Honorius I., in 638. The Church of the old Benedictines, who were to care for the two older sanctuaries, as well as their own church. The abbey was
richly endowed, particularly by Charlemagne, who bestowed on it Orbitello and eleven other towns, with a considerable territory, over which its abbey exercises ordinary jurisdiction (abbatia nullius).

Towards the middle of the seventh century the people of the island were subject to the Eastern monks by the Monothelites, who every four years sent their abbots to Rome, and to them this abbey was committed as a refuge. These continued in possession until the tenth century, when it was given to the Cluniacs. In 1140 Pope Innocent II withdrew the abbey from them, and entrusted it to St. Bernard, who sent them a colony from Clairvaux, with Peter Bernard of Paganelli as their abbot, who five years later became Pope Eugene III.

At the time Innocent granted the monastery to the Cistercians, he had the church repaired and the monastic quarters rebuilt according to the usages of the order. Of the fourteen regular abbots who governed the abbey, several, besides Blessed Eugene III, became cardinals, legates, or bishops. Pope Honorius III, in 1221, again restored the Church of Sts. Vincent and Anastasius and personally consecrated it; seven cardinals at the same time consecrated the seven Cardinal Bienservi (1419) was the first commendatory abbott, and after him this office was often filled by a cardinal. Popes Clement VII and VIII as cardinals held this position. Leo X, in 1519, authorized the religious to elect their own regular superior, a clausual prior independent of the commendatory abbott, who from this time forward was always to be a cardinal. From 1825, when the abbey was affiliated to the Cistercian Congregation of St. Bernard in Tuscany, until its suppression at the Napoleonic invasion (1812) the local superior was a regular abbot, but without prejudice to the commendatory abbott. The best known of this series of regular abbots was the second, Dom Ferdinand Ugelli, who was one of the foremost literary men of his age, the author of “Italia Sacra” and numerous other works.

From 1812 the sanctuaries were deserted, until Leo XII (1826) removed them from the nominal care of the Cistercians, and transferred them to the Priests Minor of the Strict Observance. The purpose of the pontiff, however, was not accomplished; the surroundings were so unhealthful that no community could live there. In 1867 Pius IX appointed his cousin, Cardinal Milevi-Ferretti, Commendatory Abbot of Fontaine, who endeavored to restore, not only the material desolation that reigned in the neglected sanctuaries, but also to provide that they be suitably served by ministers of God. To further this end he obtained that their care be again committed to the Cistercians. A community was sent there in 1868 from La Grande Trappe to institute the regular life and to try to render more healthful the lands, which from long neglect had been called the tomba (graveyard) of the Roman Campagna. Assisted by Pius IX, so long as he held the temporal sovereignty, and by other friends, especially Mgr de Mérode, they were able to supply their needs, and to secure the restoration of the degenerate Pius IX of the power to aid them, and later, when the Italian Government confiscated religious properties, they suffered with the others. They remained at Three Fountains, at first renting and later (1880) definitively purchasing it from the Government, with an additional tract of 1554 acres. They inaugurated modern civilization of the earth. The conditions that had been such an obstacle to health in the past, especially by planting a large number of eucalyptus and other trees, an experiment insisted upon by the Government in the contract of sale. The trial proved a success, so that the vicinity is now noted as healthful as Rome itself. The present commendatory abbott is Cardinal Oreglia of St. Stephano, dean of the Sacred College; and the Administrator is the Most Reverend Dom Augustine Marre, Abbot-General of the Reformed Cistercians.

Ugelli, Italia Sacra (Venice, 1717-21); Bacci, Settecentina Historia libro septem (Rome, 1748); Bleeker, Guide du voyageur a Rome e Louvain, 1861; Moreau, Fontaine est du Bois Soulierans (Lyons, 1869); Manrique, L’histoire des Chartres sur l’histoire de l’Ordre de Chevalerie (Paris, 1869); Jansen-Balley, L’histoire des Cisterciens, 1 (Vienna, 1878); Obricht, Les Trois Fontaines (Rome, 1883); Les Trois Fontaines (Rome, 1888); Gaume, Les Trois Fontaines (Paris, 1842); Archives of the Abbey of Tre Fontane.

EDMOND M. OBERCHT.

St. Sylvester, Order of, is neither monastic nor military but a purely honorary title created by Gregory XVI, 31 Oct., 1841. The idea of placing this title, borrowed from the Middle Ages, under the patronage of a pope of the fourth century is explained by the existence of a fabulous order of Constantine the Great claiming the approval of his contemporary, Sylvester I, which enjoyed a usurped authority at Rome from the seventeenth century. To end this abuse, Gregory XVI created an authentic title of KNIGHTS OF ST. SYLVESTER, to be conferred in recognition of some service rendered to the Church, the order being limited to 150 commanders and 300 Roman knights, besides foreigners of whom there was no number. The members have no privileges beyond that of wearing a decoration which consists of a gold enamelled Maltese cross with the image of St. Sylvester on one side and on the other the inscription: “1841 Gregorius XVI restituit.”

CH. MOELLER.

St. Thomas, Diocese of (Santi Thomæ in Insula), comprising the Islands of São Thomé and Principe, in the Gulf of Guinea, was erected on 23 November, 1554, as suffragan of Lisbon; in 1676 it was made subject to the metropolitan of Salvador, Bahia, Brazil, and in 1844 to Lisbon once more. The bishop, Bartolomeo de Martyrius, a Carmelite of Sandomir, was preconized on 8 March, 1816, and died in 1847. The see then remained vacant. Since 1865 it has been ruled as a vicariate. São Thomé, lying one hundred and fifty miles off the African mainland at 0° 28’ N. lat. and 6° 42’ E. long., has an area of three hundred and fifty-eight square miles and a population of 37,776 inhabitants (in 1900). It is very fertile, and is noted for its cocoa. The capital, São Thomé, situated on the Bay of Santa Anna, contains 6000 inhabitants. The island, when discovered on 1 December, 1470, by the Portuguese, was uninhabited; in 1485 João de Paiva and in 1493 Pereira attempted to colonize it. Most of the present inhabitants are of African slave origin. About 1544 a ship carrying a cargo of Angolares was wrecked at Sete Pedras and 3000 of their descendants still live in the south-west. The Capuchins arrived in 1659 and established a definite mission in 1688. Principe, lying ninety miles north-east of São Thomé and discovered in 1471, had an area of 42 square miles and a population of 4327. Its chief town is São Antonio. The diocese contains 8 parishes and 22,000 Catholics. Owing to the development of the cocoa product in recent years, the population, recruited chiefly from Africa, is estimated to have increased by over 20,000 since the last official census (1910).

A. A. MacERLEAN.

St. Thomæ (Santo Tomás), University of, Manila, founded in 1619 by the Dominican Miguel de Benavides, Archbishop of Manila. In 1645 Innocent X granted it the title of pontifical university, and in the same year it received the title of royal university from Philip IV of Spain. Attached to the university is the College of San Juan de Letran.
After a five years' course in this college, including Latin, Greek, English, mathematics, natural history, botany, mineralogy, physics, chemistry, and philosophy, the successful student receives the Degree of Bachelor of Arts. The university has the right of conferring the doctorate in theology, philosophy, in civil and canon law, medicine, pharmacy, literature, and science. The departments of the university are all within the "walled city". The university attained its greatest prosperity in 1897, just at the commencement of the Spanish-American war. In that year the number of students enrolled in the various courses was as

follows: divinity, 15; canon law, 5; civil law, 572; medicine, 361; pharmacy, 90; philosophy and literature, 51; sciences, 14; that year, however, owing to the revolution, the numbers very notably decreased until within the last two years, when there was a marked increase in attendance, the schools of medicine and pharmacy being particularly well attended. In connexion with the university there is an excellent museum of natural history. The exhibits of this museum have been awarded special premiums at the expositions of Paris, Madrid, the Philippine Islands, Hanoi in Cochinchina, and St. Louis. The museum contains excellent material for the study of anatomy, anthropology, diplogenesy, Philippine ethnology, zoology, botany, mineralogy, and numismatics. The zoological specimens and their varieties number over 10,000. These have been carefully catalogued in a notable work, "Cátedlo sistemático de toda la fauna de Filipinas", arranged by the Reverend Casco de Elera, O.P., who for many years held the chair of natural history in the university. The classes of medicine are held in St. Joseph's College and in the San Juan de Dios hospital, both founded in the seventeenth century. The medical department has well-equipped laboratories. The courses of pharmacy are given in St. Joseph's College. The library contains more than 25,000 volumes. The university is under the direction of a corporation formed by Dominicans; the rector is always a member of that order, though secular professors are appointed for the chairs of civil law, medicine, and pharmacy. The faculty numbers 60 professors and 220 assistant teachers and masters in the various departments of the university.

JOHN J. THOMPKINS.

Saint Thomas of Guiana (Guayana). Diocese of (de Guayana), suffragan of Caracas, erected by Pius VI on 19 Dec., 1791, comprises the former state of Bermejas, districts of Nueva Esparta and Guayana, and territories of Amazonas, Caura, Colón, Orinoco, and Yuruary, in the south and east of Venezuela. The first bishop was Mgr. Francisco de Ybarra, born at Guayana, Venezuela, 13 Dec., 1758, died at Sancta Fé, 23 April, 1813. His successor was Mgr. José Antonio Mohedano (1800), born in the Diocese of Toledo; (2) Mgr. José de Silva y Olave (15 March, 1815). After the troubles caused by the wars of independence Leo XII named (3) Mgr. Mariano Talaver, of Santa Fé, vicar Apostolic and titular Bishop of Tripical. Gregory XIII restored the episcopate, appointing (4) Mgr. Antonio Fortuide (12 July, 1841); (5) Mgr. Iñigo Sánchez Arroyo (1856); and (6) Mgr. Antonio Maria Durán (25 Sept., 1891), the present bishop. The diocese contains over 400,000 Catholics, and a few alien Jews and Protestants; 60 parishes (20 filial); 36 priests; 50 churches and chapels. The Carib Indians occupying Eastern Venezuela were civilized and Christianized by the early Spanish Franciscan missionaries. The episcopal city, Ciudad Bolívar (population 12,000) was established in 1764 by two Jesuits under the governorship of Joaquín de Mendoza, on the right bank of the Orinoco, and called San Tomás de la Nueva Guayana; but owing to a name change, it is now commonly known as Angostura. It played an important part in the national history, and Simón Bolívar was elected president there by the Congress of February, 1819; in his honour the city has been renamed Ciudad Bolívar.

MOLINA, Up the Orinoco and Down the Magdalena (New York, 1910).

A. A. MacErlane.

Saint Thomas of Mysapur (Sanct Thomas de Mysapar), Diocese of, suffragan to the primatial See of Goa in the East Indies, its name deriving from the site of its cathedral, in which the Apostle St. Thomas was interred on his martyrdom, and the Tamil word Mailapur (i.e. the town of peacocks), which the Greeks rendered as Malipara, the Portuguese Melapora, and the English Mysalpor. Early History.—The local Indian tradition, largely corroborated by collateral evidence, is that the Apostle St. Thomas, after preaching on the west coast of India, passed on to the east coast and fixed his see at Mysapur, which was then a flourishing city. The number of converts he made having aroused the hostility of the heathen priests, he fled from their anger to a summit of what is known as Babero Mount (situated in a direct line four miles to the south-west of Mysapur). Thither he was followed by his persecutors, who transfixied him with a lance as he prayed kneeling on a stone, A. D. 68. From the facts that the Roman Breviary declares St. Thomas to have "crowned the glory of his Apostleship with martyrdom at Calamina" and that no traces of any Calamina exist, various theories—some of them probably absurd—have been put forward to identify Calamina with Mysapur, or with St. Thomas's Mount. The writer of this article once suggested that Calamina might be a modification of Cholamandalam (i.e. the kingdom of the Cholas, as the surrounding country was in the beginning of the Christian era). On mature reflection he has found it far more reasonable to believe that Calamina was an ancient town at the foot of the hill at St. Thomas's Mount, that has wholly disappeared, as many more recent histories of Indian cities have disappeared, built as they were of mud, except for their temples and palaces which were of exquisitely wrought stone. This much is certain: till Europeans settled in the place there was no Indian name even for the hill. This is shown by the present Indian name, Faranghi Malai (i.e. the hill of the foreigners), used to denote both the hill and the town.
around its base, a service which the English name—St. Thomas’s Mount—equally renders. His body was brought to Mylapur and buried in the house in which he had lived, and which was used as a place of worship. A notable portion of the relics of the Apostle was obtained for the church of Edesse, at the close of the Christian period, by Christian traders from Persia. The Edesse relics were in course of time conveyed to Chios, and finally to Ortona in Italy, where they are yet venerated.

India’s maritime trade languished and died out about the fourth century. Through the burnt country was thus cut off all communication with the external world, the succession of bishops was kept up till the revival of Brahminism at Mylapur in the seventh century, when there was a ruthless massacre of Jains and Christians. The Bishop of Mylapur and his priests were put to death, and the remnant of his flock fled across the country to the mountains of the west. As the seas on the west coast were vacant at the time, the Apostolic succession was interrupted, and on the death of the priests then living, the Christians kept the light of their faith burning by lay baptism, the recitation of their prayers, by wearing a cross, and by visiting the tomb of the Apostle in the ruined church at Mylapur; in this they were helped by the fact that shortly after the massacre, Mylapur had been overwhelmed by the sea, which returned to its bed after wrecking the city and causing the Brahmins to flee and build a new Mylapur a mile further north. This new Mylapur was built upon the piled-up ruins of the almost purely Brahmin. The site of old Mylapur is now a sand dune, and would have been wholly forgotten but for the interest it possessed for the early Indian Christians and their successors.

Nestorian Period.—India’s maritime trade began to revive in the ninth century. The Nestorian merchants, who had found in India, brought out their own priests and subsequently bishops to minister to them, whom the Indian Christians for want of instruction did not know to be in heresy. Presently, a new Nestorian town began to rise on the sand dune that covered old Mylapur, the most prominent feature of which was a chapel over the site of the Apostle’s tomb. Hence the Persian and Arabian traders called the town Betumah (i.e. house, church, or town of Thomas. But the Indian Christians called it Tirumalapur (i.e. Holy Mylapur). It is this chapel that the ambassadors of Alfred the Great and are supposed to have visited (A.D. 883), and which John of Monte Corvino (1200), Marco Polo (1220), Blessed Oderic of Perdine (1318), and Conti (1400) did for a certainty visit. Later Betumah declined, and about 1500 was only a heap of ruins.

Portuguese Missionaries.—Shortly after the discovery of the Cape route to India, caravels of Portuguese Franciscans and Dominicans set out to evangelize the no longer sealed lands of the East, and traversed their surf-beaten coasts in search of suitable centres for their operations. There is a legend which tells how, when a caravel with some Franciscan missionaries engaged in such a search was cruising up the Coromandel Coast, one day towards midnight their attention was attracted by a light on shore and they decided to land there. They did, without knowing then or for some time after, that they had landed at the ruins of Betumah. But when they attempted to lighten the light, it preceded them inland, across the ruins of the Nestorian town, over an empty stretch of ground, past (new) Mylapur and into a forest, where the light vanished. Here the Franciscans established a mission and built a church (still extant) in honour of Our Lady of Light in 1516, whence the locality was named Luz forest. This town is now also known as the Luz quarter, is still known as The Luz—after Nossa Senhora da Luz (that is, Our Lady of Light). The Dominicans followed in their wake, and in 1520 Fr. Ambrosio, O.P., was consecrated bishop for the Dominican missions at Cranganore and Mylapur.

The following year King John III of Portugal ordered a search to be instituted for the tomb of the Apostle St. Thomas. As long as the tomb, with the counterpart of the Ortona relics, was looked for, nothing was found; but when the search was given up, both were accidentally discovered. The royal commission found traces of the old Nestorian chapel, but nothing of the tomb. But while directing operations to build an oratory commemorative of the spot, and digging deep in the sandy soil of the tomb, it found a masonry tomb, containing what might have been expected to be found in the Apostle’s tomb: some bones of snowy whiteness, the head of a lance, a pilgrim’s staff, and an earthen vase. This was in 1522. The fact brought ruined Betumah into popularity with the Portuguese, who settled there in large numbers and called the new European town San Thomé (after St. Thomas) and San Thomé de Meliapor, when they wanted to distinguish it from São Thomé, the African island, though the town was somewhat distant from Mylapur. The Portuguese Augustinians were the next missionaries to follow; they took charge of the oratory built over the grave of the Apostle, and built their priory and church adjoining it. In the meantime the Dominican missions in the surrounding country gained so much in importance, that in 1540 Fr. Bernardo da Cruz, O.P., was sent to these missions to tend them. There is nothing to show when the Fathers of the Society of Jesus settled at Saint Thomas, but by 1648 they had a college in the place and a church and residence at Mylapur, while St. Francis Xavier spent three months in 1545 at Saint Thomas praying at the grave of the Apostle for light to be given to these missionaries, and those who came after them, had no definite spheres of work, but worked side by side and in dependence on the local ordinaries, when these were in due course appointed. By the end of the sixteenth century they had extended their operations to Bengal and Burma. In 1552 the Diocese of Cochin was erected, and made to include, among other places, Ceylon and the countries bordering the Bay of Bengal. Saint Thomas was thus constituted a parish of the Diocese of Cochin; and the Augustinian church adjoining the chapel over the grave of the Apostle was designated the parish church of Saint Thomas.

Creation of the Diocese.—At the instance of King Philip II of Portugal, Paul V, on 9 January, 1606, separated the Kingdom of Tanjore and the territories to the north of the Cauvary River and bordering the Bay of Bengal, from the Diocese of Cochin and constituted them a distinct diocese with Saint Thomas of Mylapur as the episcopal city and the parish church of Saint Thomas as the cathedral. At the same time the pope appointed Dom Sebastião de San Pedro, O.S.A., who had been presented by the King of Portugal, to be the first Bishop of Saint Thomas of Mylapur, and grante d Philip and his heirs and successors in perpetuity the right of patronage and presentation to the see, and the benefices that might be created therein, by the mere facts of their creation and dotation. This right and obligation the Crown of Portugal has exercised and discharged to the present, by making the bishops of Saint Thomas of Mylapur the official residence of the priests’ salaries, with periodical increases, leave with free passages and pensions, on the lines of the Portuguese Civil Service Code, and contributing to the support of a still larger number of priests on a graduated scale. Bishop Sebastião de San Pedro arrived at Cochin in 1610, but in 1614 was appointed by the See of Cochin. In 1615 he was succeeded by Luis de Brito e Menezes, likewise an Augustinian,
Saint Thomas

who was transferred in 1628 to the See of Cochin. His successor was Luis Paulo Paulo de Estrela, O.S.B., appointed on 27 December 1636 and consecrated at Saint Thomas on 9 January, 1637. During the next fifty-six years the see continued vacant; for, though no less than nine personages were selected by the Crown for the honour, they either declined it, or were promoted, or died before their election was confirmed by the Holy See. So in the interval the diocese was governed by administrators selected chiefly from the various religious orders and appointed by the archbishops or vicars capitular sede vacante of Goa. But it was only natural that the members of the religious orders as also secular priests of other nations should have desired to share in the work of preaching the Gospel to the heathen of the far west. The French Propaganda XXI, issuing the Sacred Congregation de propaganda fide to distribute infidel regions among the religious orders and missionary societies of other nationalities as assistants to the local ordinaries, where there were any, and to supervise their operations. But occasionally the Congregation was misled—a thing that was easy enough when geographical knowledge was neither as correct nor as extensive as at the present time—and this occasioned trouble.

The foundations of the British Indian Empire of the present day were laid, so to say, by Sir Francis Day in the sandy delta of a tiny river, some three and a half miles from the beach of Fort St. George. The British invited the Portuguese of pure and mixed descent to settle in the new township; and as the Portuguese were Catholics, they were ministered to by the clergy from Saint Thomas. In 1642, the Congregation of Propaganda sent out two French Capuchins to establish a mission in Burmah. But, when they landed at Surat and travelling overland, reached Fort St. George, the British persuaded them not to go further, since they judged it prudent to have clergymen differing in nationality from, and independent of, the Portuguese ordinary at Saint Thomas to minister to the Catholics in their settlement. Accordingly, R. P. Ephraim, one of the two, wrote to the Sacred Congregation de propaganda fide representing that there was a prospect of reaping a larger harvest at Fort St. George and the fast rising native town of Madras that was beside it, than in Burmah; and in the name of Urban VIII a preface, Apostolic Letter, was signed with three and a half miles of the cathedral of Saint Thomas. It is perhaps needless to say that ever after there were continual bickerings between the local ordinaries and the French Capuchins, the former insisting on the Capuchins acknowledging their jurisdiction, a claim which the latter with their papal bulls refused to recognize.

Both the Portuguese and the British had obtained their charters for their respective forts of Saint Thomas and St. George from the local Hindu chiefs. But the Mohammedans were now extending their power southwards; and before laying siege to Fort St. George, they with the help of the Dutch surrounded and blockaded the place from the sea, took Saint Thomas and began the work of demolishing its walls in January, 1697. The Mohammedan governors then settled on the waste land, separating Saint Thomas from Mylapur, which was soon covered with the residences of Mohammedan settlers. The unchanging lust of these three townships still exists: as a European quarter, as a Mohammedan quarter and as a Brahmin quarter—while the casual observer fails to see where Saint Thomas ends and Mylapur begins and uses the names as convertible terms. However, having reduced Saint Thomas and deprived it of its hinterland, the Mohammedans did not further trouble the resident Portuguese, who regarded the place as still a Portuguese possession and managed its affairs with an elected council of which the ordinary of the place, for the time being, was the president.

Dom Gaspar Alfonso Arizna, S. J., was the fourth Bishop of Saint Thomas. His presentation was confirmed by the Holy See in 1691, and he was consecrated at Goa in 1693. He went to the new mission of Saint Thomas, on the French settlement of Pondicherry under the care of members of his own Society from France. This led to a number of complaints being addressed to Rome about the interference of the Bishop of Saint Thomas of Mylapur with the work of the missionaries Apostolic, with the result, however, that in 1702 Pope Clement XII, in his “Ex extremo” of 1704, issued an injunction restraining the missionaries from invading the rights of the diocesan. But the Congregation de propaganda fide seems to have followed an altogether different course. In 1706 it issued a Decree in support of its own missionaries, which reversed what the bishop had ordained. Under these circumstances the bishop again appealed to the pope, who, by the Brief “Non sine gravii” of 1711, annulled the Decree of the Congregation and reaffirmed the right of the diocesan to make what arrangements he chose at Pondicherry, which was situated within the limits of his diocese. Presently Carvalho del Tornel, the new bishop sent as legate of the Holy See, having touched at Pondicherry, hearing of the doings of the Capuchins, placed the French Prefecture Apostolic of Madras, the name by which Fort St. George and its surroundings were coming to be better known, under interdict. The Capuchins must have submitted forthwith and the interdict thereupon been removed, as there appears no record of its removal.

In the meantime Dom Gaspar had died (1708). Owing to his advanced years, he had been given a coadjutor with the right of succession, Dom Francisco Laynes, S.J., of the Madura mission, in the Diocese of Cochin. Dom Laynes was consecrated at Lisbon on 19 March, 1708, as Bishop of Sosopolis in paribus. He came out to India the same year, but did not take possession of his see till 1710. Though Bishop Laynes was Portuguese, the Portuguese Augustinians of Bandel, who recognized his authority, was placed Bandel under interdict on 14 July, 1714; on the submission of the Augustinians the interdict was removed (8 October, 1714). Bishop Laynes died at Chandannagore (Bengal) in 1715, and was succeeded by Manoel Sanches Golbo, who was appointed in 1717 and reached India in 1720. He refused to recognize the interdict and welcomed the Italian Barnabites as invaluable co-operators in the work of preaching the Gospel in Burma, though he had regularly served mission stations there. These friendly relations with the Italian Barnabites were always maintained, as they recognized the authority of the diocesan. Bishop Golbo was succeeded by José Penheiro, S.J., who was consecrated in 1728. He sanctioned the arrangement whereby French Jesuits were to have spiritual charge of Chandannagore, in Bengal. During his time the Barnabite mission in Burma was created a vicariate Apostolic. Bishop Penheiro died on 15 March, 1744, and was succeeded by Antonio da Incarnacao, O.S.A., who was consecrated at Goa in 1747.

It was about this time (1746) that the French marched on Madras and, making Saint Thomas their head-quarters, attacked and took Fort St. George, which they held and improved till August, 1747, when they restored it to the Dutch under the Treaty of Aix-la-Chapelle. Saint Thomas had been nominally a Portuguese possession from 1697, without the semblance of a military force to resist its occupation by a foreign power, as the French did when operating against Madras. To obviate a recurrence
of such an evil nature Admiral Boesewen annexed the place and built a redoubt to the south-east of it, thus rendering it a part of Madras, as it still is. The British took possession of Madras, though not without the help of the French Capuchins, as they suspected that the capture of Fort St. George by the French was largely due to the information supplied by them. Consequently R. P. René, on whom the suspicion rested most heavily, was deported to Europe, and the others were expelled from the island in what is now Coimbatore (Madras), where the cathedral of Madras now stands, four miles from the cathedral of Saint Thomas.

On the death of Bishop da Incarnação on 22 November, 1752, Fre. Theodoro de Santa Maria, O.S.A., was presented for the see and confirmed by the Holy See. He belonged to the priory at Saint Thomas, but he received his ecclesiastical formation in what is now Goa. Italian Barnabites destined for the vicariate Apostolic in Burma came with letters of commendation to the bishop-elect, who welcomed and speeded them to their destination. At last Fre. Theodoro, the bishop-elect, renounced the see into the hands of Fre. Bernardo de San Caetano, O.S.A., who was then consecrated bishop. Bishop Bernardo in turn consecrated one of the two Barnabites just mentioned, Dom Percotto, Bishop and Vicar Apostolic of Burma, in 1768. But Bishop Percotto did not reach the field of his labours, as on his voyage back to Burma the vessel foundered. The death of Bishop of Saint Thomas was registered to at this period as follows:—By the Portuguese Franciscans, Portuguese Dominicans, Portuguese Augustinians, and Portuguese Jesuits. Besides these, there were French Jesuits and Italian Barnabites working in the diocese in harmony with the ordinary, and French Capuchins defying their authority, at least occasionally. One drawback of this total manning of the diocese with the religious orders was the absolute neglet to form an indigenous clergy to meet the emergency that presently arose. For it was at about this time that the Marquess of Pombal suppressed the houses of the Society of Jesus in Portugal and thus cut off the supply of Portuguese Jesuits to the diocese. The emergency became still more acute, when, in 1773, Clement XIV suppressed the Society of Jesus. Withal, the situation was not quite so hopeless as to call for drastic measures in regard to the diocese from without. For it was not till 1785 that the houses of the Society of Jesus in the Portuguese dominions were suppressed. And as the Diocese of Saint Thomas of Mylapur was situated wholly outside of Portuguese territory, there was nothing to prevent the Portuguese religious orders from thriving there. Nevertheless, as at home vocations declined, the houses in India gradually died out, the last to be represented in the diocese being the Portuguese Augustinians in Bengal, the last member of the order dying in 1869.

On the extinction of a religious house in any place, the property and rights of the religious reverts to the Church, as represented by the local diocesan. But all Catholic Europe was so incensed against Portugal for the initiative taken by the Marquess of Pombal against the Society of Jesus, that without waiting to weigh the justice of their action in turn, reprimands became the order of the day in the Diocese of Saint Thomas of Mylapur, the Congregatio de Propaganda Fide supporting the missionaries of other nationalities against the Portuguese. On the suppression of the Society of Jesus by the Holy See, the Fathers of the Missions étrangères of Paris were sent out to take charge of the Society's missions in the Dioceses of Cochin, Amboyna, and of which Mgr Champenois, Bishop of Dolichum in Porti-

bus, was appointed vicar Apostolic. Bishop San Caetano resented this, as he was filling up the places of the Jesuits with Indian secular missionaries from Goa; but his protests were of little avail. In course of time, as the members of the other religious orders died out, these same Indian missionaries from Goa assumed charge of their churches under the order of their fathers, and gradually the Church in the Diocese of Saint Thomas of Mylapur was reconstituted.—

The latter did not hesitate to misrepresent the Goan missionaries to be ignorant and immoral as a whole, though the diocesan seminary at Goa was conducted by the Jesuits until their suppression, and thereafter by a member of the other religious orders till 1835. On the other hand, between 1652 and 1843, no less than seven of their fellow-countrymen were deemed worthy of episcopal consecration by the Crown of Portugal, the Holy See, and the Sacred Congregation de Propaganda Fide, not to speak of the Venerable Joseph Vaz, who was of their race. Howbeit, since then and up to the present time to a certain extent, there was a revival of the work once begun in the diocese of Saint Thomas of Mylapur, and the work, which had been in India for nearly 200 years, had already spread to the land of the north. The missionaries from Goa had been Indian secular missionaries from Goa.

Bishop San Caetano died in 1780, and was succeeded by Fre. Manoel de Jesus Maria José, O.S.A., a native of Goa and the prior of the Augustinian convent there. He was consecrated in 1785, and died in 1800. He was succeeded by Fre. Joaquim de Meneses e Athalde, O.S.A., who was consecrated and took charge of his see by procuration in 1805, but before he could come out he was transferred to the Diocese of Panchal. As a result, Fre. Papatxa de Graça, who was prior of the conventual of Mylapur, was appointed administrator, continued as such till his death on 14 July, 1817, when Fre. Clemente de Espírito Santo, O.S.F., was appointed administrator. During the latter's tenure of his office, Madras was visited by Dom Pedro d'Alcântara, O.C., Bishop of Amboyna in the time of the French. The Sacred Congregation de Propaganda Fide declared the Capuchins of Madras to be independent of the Bishop of Saint Thomas of Mylapur. But this arrangement did not in temporal but also in spiritual matters. The administrator declined to accept his decision, as being a reaffirmation of the Decree of the same Sacred Congregation, which had been annulled. Fre. Clemente resigned the administration of the diocese to Fre. Manoel de Ave Maria, O.S.A., in 1820.

The British power was now paramount in the Coromandel Coast, and English and Portuguese dominions were consequently spoken by the Indo-European population that formed the mainstay of the Catholic congregation of Madras, as it always was and still is all over India. Withal, the French Capuchins would not conform to the times, but continued to preach in Portuguese (which had disappeared in Madras) and Tamil, the language of the Indian Christians. As a result, many Indo-European families gave up the practice of their religion and in time became Protestants. Finding their representations to the Capuchin prefect Apostolic unheeded, a band of young men represented the matter to the Holy See. In response to this appeal, the Sacred Congregation de Propaganda Fide raised the French Capuchin prefecture into a vicariate Apostolic and sent out Dr. O'Connor, O.S.A., with Irish priests, in 1828 to take over the work of the Frenchmen.

Portuguese Civil War of 1866, and its Consequences — On the outbreak of the Peninsular wars, King John VI of Portugal, with his elder son Dom Pedro, sought refuge in Brazil. Presently a movement was set on foot to have his younger son, Dom Miguel, proclaimed king, a movement which had the support of the religious orders, but not of the bishops or of the secular clergy. However, John VI returned to Portugal and quelled the insurrection. In the meantime Brazil proclaimed its independence with Dom Pedro as its emperor, an arrangement in which John VI acquiesced. On the death of John VI the loyalists in Portugal proclaimed Dom Pedro of Brazil King of Portugal; but,
as Dom Pedro preferred staying in Brazil, he ceded his right to Dona Maria da Gloria, his younger daughter, appointing his brother, Dom Miguel, as regent till she should grow up, when the regent was to marry her and thus heal the rupture between the loyalists and the adherents of Dom Miguel. The adherents of Dom Miguel, however, proclaimed him king. Dom Pedro escaped to Portugal in 1832 and submitted his rights, and finally defeated his brother in 1834. Dom Miguel was perpetually banished and those who sided with him were punished, amongst those to suffer being the religious orders, whose houses were suppressed and properties confiscated.

In consequence of this last measure mainly, diplomatic relations between the Holy See and Portugal were broken off. The Sacred Congregation de Propaganda Fide deemed the moment opportune to extend the jurisdiction of the Vicar Apostolic of Madras to Saint Thomas of Mylapur and its missions southwards to the River Palar (those south of the Palar being assigned to the Vicar Apostolic of Pondicherry), to declare Burma to be an independent vicariate, and to create in the northern part of the diocese (Bengal and the adjoining countries) an independent vicariate Apostolic under Dr. St. Leger, with a staff of British priests. From a certain point of view this action was understandable under the circumstances; it caused the loyalist Portuguese to regard these measures as retaliatory and not as prompted by a desire for the spiritual welfare of the regions concerned. And, indeed, there was nothing up to this to show that Portugal had shirked her responsibilities in regard to the diocese, or that the successive ordinations of the diocese had been found wanting, beyond the mere accusation of those missionaries Apostolic who were sent into their territories and, failing to recognize their authority, had received scant courtesy. Howeit, when called upon by the Vicar Apostolic of Madras to surrender his churches and submit to him, the administrator replied that he would gladly do so when instructed by the authority that placed him there. The vicar Apostolic then called upon the priests and the subjects of the Diocese of Saint Thomas of Mylapur to submit to him, but they all replied in much the same terms. The same thing happened in the parts of the diocese governed by Bengal and Ceylon; and in Bengal; whereupon the vicar Apostolic declared the administrator, priests, and people of the Diocese of Saint Thomas of Mylapur schismatic, and from the fact that a large number of the priests in the diocese were from Goa, defined their action as the "Goan Schism." However, they were not permitted to have taken much notice of the "schism", and diplomatic relations were resumed with Portugal in 1841. Then followed a series of acts unworthy of the Church, when both sides strove to capture or recapture churches that they claimed; when church was built against church, alter raised against altar, and violence and police courts were a common resort.

On 14 March, 1836, Dom Antonio Tristão Vas Teixeira was presented by the Crown of Portugal to the Holy See as Bishop of Saint Thomas of Mylapur, and left Lisbon for India a month later. As the Holy See had in the meantime refused to confirm the presentation, the Vicar Capitular of Goa appointed him administrator of the diocese in place of Frei Ave Maria, who had died on 5 August of the same year. Dom Antonio assumed charge on 15 October following, and died on 3 September, 1852. He was succeeded by Padre Francisco Lobato, an Indian from Goa (as were all the administrators of the diocese up to 1880), who was appointed on 3 October, 1852.

On the restoration of the Society of Jesus by Pius VII the French Jesuits returned to the parts of the Diocese of Cochín, which their Portuguese brethren had colonized, though opposed by the authorities of that diocese; and in 1849, the Congregation de Propaganda Fide erected their missions into a vicariate Apostolic. In 1850 the Salesians of Annecy were sent out to take charge of the country between the Rivers Godavery and Mahanuddy, which was at the same time created a vicariate Apostolic. In the same year, the country between the Chittagong and Kabukud River was created a vicariate Apostolic, and committed to the care of the Fathers of the Sacred Heart. Prior to this, while at about the same time the Fathers of Missionnaires étrangers of Paris replaced the Italian Barnabites in Burma. Thus the Diocese of Mylapur was divided up between six vicariates: Madura, Pondicherry, Madras, Vizagapatam, Western Bengal, and Eastern Bengal and Burma.

In 1857 a concordat was entered into between the Holy See and Portugal, pending the execution of which both the vicars Apostolic and the authorities of the diocese were to enjoy pacific possession of the places they actually held. But the Crown of Portugal undertook manifestly too great a burden, to wit, to provide for the spiritual needs of the whole of India, and consequently the concordat remained a dead letter. In 1854 the Royal Missionary College of Bomjardim at Sernache, Portugal, was founded for the training of secular priests for the Portuguese missions beyond the seas. Meanwhile the missions of the diocese had been greatly reduced to a small group of vicars Apostolic. The missions were situated in British territory and as beyond the clergy there were scarcely any Portuguese subjects to be found throughout the diocese there was no particular inducement for the people to cling to the see.

In Madras itself, the Irish vicars Apostolic and missionaries had been educated at Maynooth College, and almost all of them were doctors ofdivinity. They were socially and intellectually on an equality with the best British talent. Protestant schools as well as Catholics crowded to hear their sermons in churches and their lectures on scientific matters. When Dr. O'Connor first came out, he brought letters of introduction to the governor and was a guest at Government House. On the first occasion when he drove to St. Mary's of the Angels, the quasi-cathedral of his vicariate, wearing a cocked hat and buckled shoes, long coat and knee-breeches, the old ladies protested that he could not be a Catholic bishop but the remainder of the Government to make them all Protestants. These things lent prestige to the Catholic name. One of the first things the Irish missionaries did was to open a seminary (to which a college was attached) and ordain Indo-European priests, who proved of invaluable help to the Mission. In 1882 the Missionaries of the Sacred Heart took over the care of the seminary, and the college was given to the Jesuits.

As a result, almost all the Catholic Indio-Europeans and Indians with pretensions to respectability flocked to the vicars Apostolic, till in the end it was deemed opprobrious to term one as belonging to the diocese of Saint Thomas of Mylapur. In time in the course of the negotiations preparatory to the fresh concordat of 1886, the cardinal secretary of State was in a position to show that out of 1,167,975 Catholics in British India, the Portuguese missions of the Diocese of Saint Thomas of Mylapur could actually claim only some 50,000 subjects, with a proportionate number of churches, one seminary from which a priest was occasionally ordained, one high school at Saint Thomas, two middle schools at Tuticorin and Manapad, and a number of elementary schools; while any single vicar Apostolic had a better equipment. But of these 50,000 souls which were all that were left to the Portuguese of the once splendid diocese, it is truly, though scarcely laudably, been said that "they loved the Portuguese more than their own immortal souls".

Present Condition.—Such was the state of affairs when in 1886 a fresh concordat was entered into between the Holy See and Portugal, which showed itself
disposed to accommodate itself to the changed conditions of the times. The concordat was preceded by negotiations with England, to make sure that the British Government would not object to the continuance of the Portuguese dioceses in its Eastern possessions. Accordingly, the Primacy of the East of the archbishops of Goa was reaffirmed, while in addition they were accorded the honorary title of Patriarch of the East Indies and the substantial privilege of presiding at the plenary councils of the East Indies, which were ordinarily to assemble at Goa, while the spiritual relations between the single bishops of the East were left to Goa and its suffragan dioceses to be continued. But the limits of the original Portuguese dioceses were contracted, the Diocese of Saint Thomas of Mylapur being assigned two distinct pieces of territory on the Coromandel Coast, separated from each other by a distance of some 150 miles. The first is a triangle of an area of some 800 square miles, in the northern angle of which Saint Thomas is situated; the other is roughly the ancient Kingdom of Tanjore. In addition, both by the concordat and certain appendices thereto, the diocese was given five churches in the Archdiocese of Madras—the old vicariates Apostolic of Salem and Trichinopoly were incorporated into dioceses accorded to the concordat by the Constitution "Humane salutis" of 1886, of Leo XIII—three churches in the Archdiocese of Calcutta (Western Bengal), five churches in the Diocese of Dacca (Eastern Bengal), and twenty-four churches in the Diocese of Trichinopoly (which originally belonged to the Diocese of Cochin), with their congregations.

The first bishop appointed to Saint Thomas of Mylapur on the conclusion of the new concordat was the princeless Dom Henrique José Rees da Silva, who was at the time curate to the Archbishop of Goa, and who took possession of his see in 1890. He was the first to sign himself for the sake of brevity, Bishop of Mylapur, a practice which his successors have adopted. Hence the diocese is at the present time better known in India as the Diocese of Mylapur. His was the arduous task of gathering the broken shreds of the old historic diocese, putting them together, and rendering it once again the thing of beauty it was. His first care was to reform the diocesan seminary, and in order to have an efficient body of European priests with their heart in their work, he brought out a number of young boys from Portugal and gave them a common education. He had raised the existing high-school, previous to their entering upon their ecclesiastical course of studies. His successors are reaping the benefit of his policy.

He opened a convent of European nuns at Saint Thomas, and another of Indian nuns in Mylapur, which have since thrown out branches into various parts of the diocese. He invited English-speaking priests to join his diocese (a call to which the present writer responded) and established the "Catholic Register", a weekly newspaper. His courtly manners and noble bearing made him a favourite in society. Soon the people felt it an honour to be able to point to him as a model of piety and piety of the court, the chapel over the grave of St. Thomas, and the old Augustinian priory, that had nothing antique to commend them, and built the present magnificent cathedral in the centre of which, between the nave and chancel, lies the grave of St. Thomas. Despite the good he was doing, and also the refusal of certain parties connected with the churches situated in other dioceses, and when he found the accusations brought against him accepted without demur in Europe, he resigned and retired to Portugal, as titular Bishop of Trujanopolis.

He was succeeded by Dom Antonio José de Sousa Barroso, who, within a few months of his arrival at Saint Thomas, was promoted to the See of Oporto. Bishop Barroso was succeeded by the present bishop, Dom Theotonio Manuel Ribeiro Vieira de Castro, who was presented on 12 June, 1899, and confirmed by Leo XIII ten days later. He was consecrated at Oporto on 15 August, 1899, and reached Saint Thomas on 23 December. The centenary of the Archdiocese of Madras, all of the dioceses into which the original Diocese of Saint Thomas of Mylapur is divided are served by non-British clergy, save for the Indian and few Indo-European priests, where there are any. But even in the Archdiocese of Madras, though it is served by the British Missionary Society of St. Joseph, the majority of the priests and the coadjutor bishop are from the Continent. Dacca is served by the Fathers of the Holy Cross from Notre Dame, Indians, United States of America.

According to the latest available statistics, there are in all the churches some 72,000 Catholics, 20 European and 51 Indian priests. For the diocese of Saint Thomas are: 2 high schools at Saint Thomas, one being for Indo-Europeans, the other for Indian Christians; 3 orphanages, one for Indo-Europeans at Saint Thomas, another for Indian Christians at Tanjore, managed by the Salesians, and the third at Calcutta for Indian Christians. For girls: 3 convents of the Franciscan Missionary Nuns of Mary, at Saint Thomas and at St. Thomas's Mount, which maintain schools and orphanages attached to them both for Indo-Europeans and Indians, the latter of whom are mainly looked after by Indian Sisters of the Third Order of St. Francis; 6 convents of Indian nuns of the diocesan Institute of Our Lady of Help, in popular centres, with schools and boarding establishments for Indian caste girls; there are also 8 middle-schools and 57 primary schools. The conversions for the year ending 30 September, 1907 totalled about 200, of which 135 were from heathenism, 63 from Protestantism, and 8 from Mohammedanism. The catechumens under instruction at the same time numbered 141. Thus is Portugal in the beginning of the twentieth century continuing the work inaugurated on the Coromandel Coast in the beginning of the sixteenth, in the days when the Vasco da Gama and other Portuguese were not the mere shadowy figures of the past, but walked the earth in living flesh and did their deeds of daring.

JAMES DOUTI.

St. Vallier, Jean-Baptiste de, second Bishop of Quebec, b. at Grenoble, France, 14 Nov., 1653; d. at Quebec, Canada, 26 Dec., 1727; son of Jean de la Croix de Chevrères, and Marie de Sayne. He was educated at the local seminary and took the degree of Doctor of Theology at the Sorbonne at the age of nineteen. While acting as almoner to Louis XIV his generosity and piety were noted by the vanity and dangers of the Court, but maintained and redeemed others, who were edified by his charity and seal toward the poor and infirm. He accompanied the king in a campaign to Flanders and devotedly attended the wounded and dying. Through humility he succeeded Stephen, the former Bishop of Quebec, and prefiguring a field of missionary labour and hardship. He was chosen to replace Bishop Lalva on his resignation (1854), and pending the reception of his Bull, he left for Canada as vicar-general (1855). At first his bearing towards the seminary and the other institutions showed a disposition to continue his predecessor’s policy. His zeal moved him to visit Quebec and Montreal, and even distant Acadia. Under the title "Etat présent de l’Eglise et de la
Saint-Victor, Abbey of.—In the year 1108, the famous William of Champeaux, archdeacon of Notre-Dame in Paris, who had been lecturing to crowds of students in his garden, retired to a small hermitage dedicated to St. Victor, the martyr-soldier, near the city. Here he was followed by many of his disciples, Abelard among them, and induced again to take up his lectures. Hence the origin of the Royal Abbey and School of St. Victor. With some of his followers, William had become a canon regular, but, at the request of St. Bernard, he made his life at the monastery of Châlons in 1113, and was succeeded at St. Victor's by Gildwin, a man, as the “Necrologium” records, of pious and learning, and zealous in promoting the canonical order. The abbey, by the generosity of popes, kings, queens, and noblemen, was soon richly endowed. Numerous monasteries regular were reformed by its canons: Ste.-Geneviève (Paris), Wigmore in Wales, St. Augustine's (Bristol, 1148), St. Catherine's (Waterford), St. Thomas's (Dublin), St. Peter's (Aram, Naples) were of the number. No less than forty abbots of the Order of St. Victor are mentioned in his last will by King Louis VIII, who left all his property to the church and the abbey church and 4000 pounds to be equally divided among them. At the general chapter which was convened every year, there were present some 100 abbots and priors. Before the abbey was 160 years old, several cardinals and at least eight abbots, all sons of St. Victor's, were at the head of as many abbeys, among them John, Abbot of Ste.-Geneviève (Paris), and Andrew, an Englishman, Abbot of Wigmore.

The traditions of William of Champeaux were handed on, and St. Victor's became a centre of pious and learning. The school, with those of Ste.-Geneviève and Notre-Dame, was the University of Paris. To that celebrated school flocked crowds of students from all countries. Among them were men like Hugh of Blankenburg, better known as Hugh of St. Victor, called the St. Augustine of his time; Richard, a Scotchman, the mystic doctor; Adam, the greatest poet of the Middle Ages; Peter Comestor, the historian; Peter Lombard, the maestro sententiarum; Thomas, Abbot of St. Andrew's (Verceil), to whom St. Francis sent St. Anthony of Padua for his theological studies; another Thomas, prior at the abbey who, nearly fifty years before his name-sake of Canterbury, gave his life for justice sake. To St-Victor's came, only four months before his martyrdom, the same St. Thomas à Becket and addressed his brother canons on the words: "In pace factus est locus ejus". The "Scottichronicon" records that in 1221 a canon of St-Victor's, in his capacity of papal legate, visited Ireland and Scotland, where at Perth he convoked all the ecclesiastical dignitaries to a general convention which lasted four days.

The time came when abbots in commendam were introduced and signs of decay were manifested. Towards the end of the fifteenth century some efforts were made to reform the abbey with canons brought from newly-established houses. A few years later Cardinal de Laroche would again attempted to reform it, but in vain. The canons, moreover, were implicated in the Jansenist movement, only one, the Venerable Jourdan, remaining faithful to the old spirit and traditions. At that time there lived at St-Victor Sainteul, the great classical poet, whose Latin proses were adopted by the Gallican Liturgy. The end of the abbey came with the French Revolution. In 1800 the church and the other buildings were sold, the famous library was dispersed, and a few years later everything had disappeared. There are still a few convents of canonsesses, at Bruges, Ypres, and Neuloi, who keep the rule and spirit which they originally received from the Abbey of St-Victor's.

Bonnard, Hist. de l'abbaye royale de St-Victor de Paris (1907); Gaudry, Adam de St-Victor (1888); Bonnard, Notices des chanoines de l'église (Paris, 1908).

A. Allaria.

Saint-Victor, Accard de, canon regular, Abbot of St-Victor, Paris, and Bishop of Avranches, b. about 1100; d. 1172. By some authorities he is said to have been of English extraction, by others to be of the noble Norman family of de Pertins, of Domfront. He completed his studies at the school of St-Victor's and en-
tered the cloister there. On the death (1155) of the first abbot, Ghiđin, he was elected to fill the vacant post, and at this time the abbot of rela- tion was almost at the zenith of its glory and power. Two years later the Cathedral Chapter of Sees, composed of canons regular, elected Achard for their bishop, and the choice was duly confirmed by Adrian IV. But Henry II inter- vened and intruded his chaplain Froger, or Roger. However, the relations were very cordial, and Plantagenet was quite cordial, and the abbot used his influence at the English Court to compel the royal treasurer, Richard of Ely, to disburse for the bene- fit of the poor some moneys which he was unjustly de- taining; his letter to Henry II on the matter is still extant. When, in 1162, Achard was called to the See of Avaranches, Henry made no objection to his consecration, and that same year Bishop Achard stood godfather to his daughter Elinor born at Dom- front. But the French king, Louis VII, was by no means pleased to see such a shining light of the Paris- ian Church pass over into Norman territory, as is evi- dent from a letter he then addressed to the Prior of St-Victor's. In 1163 Achard was in England assisting at the solemn translation of Edward the Confessor in Westminster Abbey.

The chief monument of his ten years' episcopate was the Premonstratensian Abbey of the Holy Trinity, Lucon, which in the same year in which he died (1164) and where at his own request he was buried, with this simple inscription: "Hic jacet Achardus episcopus cu- jus caritate ditata est paupertas nostra." His brethren of St-Victor's celebrated his memory in the following lines: "Hujus oliva domus, Anglorum gloria cleri—Jam dignus celesti lucis foveo—Pelas Achardus flores etate senili—Presul Abrincensis ex hoc signatur civilis". Not the least gem in Achard's crown is the memory of his unwavering friendship for St. Thomas à Becket through all the years of his persecu- tion. In the chronicles of St-Victor's Achard is termed "Blessed". On the contrary, (Le Clainard and the eighteenth-century French translation) of Achard's is extant in the Bibliothèque Nationale, Paris. It is a long commentary or sermon on the Temptation of Christ in the wilderness, and in it Achard discusses seven degrees of self-renunciation, which he calls the seven parts of the soul. Haurçau in his "Histoire littéraire du Maine", I, quotes several passages and terms the tract vrai morceau de style.

VINCENT SCULLY.

Saint Vincent de Paul, Society of, an international association of Catholic laymen engaging systematically in personal service of the poor, was founded in May, 1833, when eight young men, students at the Sorbonne, as a part of their "tribune Catholique" to formulate plans for the organization of a society whose object should be to minister to the wants of the Parisian poor. The master-mind conceiving the project, which was destined to make an indelible impress upon the history of modern charity work, was Frederick Osanam, a brilliant young Frenchman, lawyer, author, and professor in the Sor- bonne. With Osanam's name must be linked that of Père Bailly, editor of the "Tribune Catholique", the first president of the society, and whose wise and fatherly counsels did much to direct properly the so- cieté from its very closest stages. The so- cieté's establishment was due partly to the desire of the founders to furnish a practical refutation of the reproaches directed against Christianity by the followers of Saint-Simon, Fourier, and other popular teachers of the day. "Show us your works!" taunted the St-Simonians. "We admit the past grandeur of Christianity, but the tree is now dead and bears no fruit." To this taunt Osanam and his companions re- sponded by forming themselves into a Conference of Charity, later adopting the name of the Society of St. Vincent de Paul.

In organizing the Society, Osanam, following the inspiration of its chosen patron St. Vincent de Paul, modelled the rule upon the same principles that were in vogue in the seventeenth century. The rules adopted were very cordial, and the adherents were not to be disturbed by the politics or personal concerns at the meetings, and it was settled that the work should be the service of the pious in the persons of the poor, whom the members were to visit at their own dwellings and assist by every means in their power. The service of the mem- bers was to be exhibited to all colors, creeds, or race, the poor, the sick, the infirm, and the unem- ployed. It is a noteworthy fact that, at the first Vincentian meeting, there was enunciated by Père Bailly a principle of vital importance, now universally ac- cepted wherever organized charity is known, namely that the service of the poor ought to consist not merely of the dole out of alms, but must be made a medium of moral assistance and that each member should help in his special line. Simplicity characterizes the so- ciety. The membership is divided into three classes, active, subscribing, and honorary. The active mem- bership is composed of Christian men who desire to devote themselves in a communion in the performance of the same works of charity. Subscribing and honorary members are those who "cannot devote them- selves to the works in which the society is engaged but who assist the active members by their influence, their offerings and prayers". In the make-up of its membership the society is most democratic. Men of all walks of life are engaged in its service; the lawyer, the doctor, the professional and business man freely mingle with the untutored labouring man in relieving the wants of the poor. The conference is the unit of the society and is an integral part of the parish organization. While not in the normal membership, they are always welcomed in the work. The conference exists only with the approval of the pastor who as spiritual director enters actively into the work. Women are excluded from membership, but through auxiliary associations or as benefactresses they may co-operate in the work and share the numerous indulgences. The business of each conference is administered by a president, a vice-president, a secretary, and a treasurer, who constitute the board of the conference. The president is elected by the conference, while the other officers are appointed by the president with the advice of the board. The parish conferences hold weekly meetings.

In cities, where there exist several conferences of the society, the control of affairs is vested in a particular council in which the respective conferences have repre- sentation. In larger cities a central office is established by the particular council. Special committees are likewise usually created to deal with the larger aspects of charity, relief, and correction, which naturally fall beyond the scope of a parish con- ference. Over the particular councils and such con- ferences as are so scattered as to render impracticable the formation of particular councils, there is placed a central or superior council having jurisdiction over a territory embracing within its circumscription the councils of several dioceses or, as in some instances, of an entire country. On each of the four festivals of the society meetings are held by all the conferences in each of the various diocesan jurisdictions. Su- perior councils hold regular monthly meetings and meet oftener as occasion may require. Finally, the scheme of organization provides for the establishment of a council general, which exercises jurisdiction over the entire society, and is established in Paris, France.

In outlining the activities of the society, the found-
ers had an eye to the future needs of human kind, and dictated that "no work of charity should be regarded as foreign to the Society, although its special object is to visit poor families". It is plainly evident from this that the Society are prepared to take in hand the selection of the works in which the members may engage, and in examining the reports of the various superior councils one marvels at the wonderful array of charitable activities which are therein portrayed. There are committees in charge of fresh-air work for poor children, committees for the poor, day nurseries, the custody of paroled prisoners, care of homeless boys, clubs for boys, the visitation of prisoners and the sick in hospitals, the maintenance of chaplains for the purpose of serving Catholic inmates in public institutions, employment bureaus, the care of immigrants, the maintenance of sailors' missions, the finding of homes for orphans, and systematic inspection of their care until maturity. The society also co-operates uniformly with Catholic institutional charities and with other organizations of laymen and lay women engaged in relief work. The spiritual note predominates in all of this, and the spiritual service of the poor is undertaken as a spiritual duty belonging to the integrity of Christian life. Throughout all the traditions of the society there is an endeavour to hinder every process by which charity might be made identical with philanthropy or by which the personal character of the poor might be lost. The conference takes its name from the parish in which it is formed. The meetings are opened and closed with prayer and a short selection from some spiritual treatise is read. The society has its own feast-days, on which occasions the members receive Holy Communion as a body. By Briefs of Popes Gregory XVI, Pius IX, and Leo XIII numerous indulgences are granted to the society, its benefactors, to the poor assisted by it, and to the fathers, mothers, and wives of the members. An endeavour is made uniformly to cultivate the spirit of St. Vincent de Paul and to follow the discriminating principle of relief given in the spirit of faith taught by him. The note of personal service stands out prominently in the work of the society. The duty of serving the poor, and the need of doing it wisely, is looked upon as one which the individual himself should fulfill; in fact, one of the cardinal conditions of activity of the conference member shall go personally to visit the poor in their own homes. He combines, when he is true to the spirit and teaching of the society, the function of friendly visitor with that of investigator and the work of upbuilding the dependent as well as that of relieving him.

The rules of the society require that minutes of all meetings be kept carefully and that the reasons for all relief accorded be stated; the conference members in charge of a family are required to study the condition of the family and to give the reasons for the decision leading them to such relief. Their reasons and their judgements are the questions that are present. These minutes of the meetings, when taken in conjunction with the personal knowledge of the poor families aided, serve every purpose of record-keeping. Every care is taken to respect the privacy of the poor. The records of relief work are not open to inspection except by those who have a well-founded right to the knowledge, and this spirit is so characteristic of the society that it places at the disposal of the spiritual director certain funds which may be used in relieving exceptional cases, from which no report of whatsoever kind is made to the society itself. Another characteristic is that of distributed assistance, on the part of the society to make known the extent of the work or the generosity of its members in giving either money or personal service to the cause of charity. While all the work of the society is done by its members voluntarily and without remuneration, a readiness to employ paid workers in the specialized activities is developing under the exacting and complicated conditions of modern relief. The funds of the society are provided by the contributions of all, by collections at the conference and particular council meetings, secret collections are taken up, the proceeds going into the treasury. A box is located generally in a conspicuous place in the parish church to receive contributions from the charitable-disposed. The amounts thus received are applied to the relief of the poor, or the poor's mission engaged in special works solicit subscriptions. Considerable amounts are received in donations and from bequests. In addition, there are large numbers of generous subscribing members.

Two years after the foundation of the society, the membership had increased so rapidly that it was no longer possible to continue working alone as one body and in one place; consequently the founders realized that the time had come when, to regulate matters properly, it was imperative to divide the society into sections or groups arranged geographically. A meeting was held, geographical divisions made, and the sections under which the society was to be divided and then adopted. They were of the simplest character, merely embodying in the form of regulations the usages which had been followed and cherished from the inception of the society. There are over 100,000 active members and an equal number of honorary members. The society is organized in every country, in every community, and thriving branches are to be found in China, India, Turkey in Asia, Ceylon, Egypt, Natal, Transvaal, Philippine Islands, Canada, United States, Mexico, Central America, Brazil, Chile, Colombia, Argentine Republic, Peru, Ecuador, Uruguay, Paraguay, and British Guiana. Twelve years after the inauguration of the work, the society was introduced on the American continent. To St. Louis, Missouri, must be given the honour of having established, in 1845, the first conference of the Society of St. Vincent de Paul in the United States. In 1846 a conference was organized in New York City. In 1856 the work of the society had grown to such proportions in New York that it became necessary to establish a particular council, through which correspondence was opened with the authorities of every Catholic diocese in the United States. As a result other sections of the country were gradually organized, and in the end the society gained headway, making its influence felt and accomplishing wonders in the work of uplift; the poor. The following statistics of the work of the society in the United States for the year 1910 will serve to give some slight conception of the progress made: superior councils, 4; central councils, 4; particular councils, 34; conference, 730; members, 12,062; families relieved, 24,742; visits made, 233; 044; situations procured, 2949; amount received (exclusive of balances), $38,549; amount expended, $387,949.

An important step in the reorganization of the administration of the society in the United States was taken at the national conference held in Boston in 1911, when it was unanimously voted to create a council in each archdiocese of the United States, to be known as the metropolitan central council; diocesan councils in each diocese, to be styled diocesan central councils; and one general council for the administration of all, to be known as the superior council of the United States. This plan of reorganization is now being perfected by a committee appointed at the Boston National Conference. Since it has received the unqualified endorsement of the hierarchy of the United States and has been approved by the council general of the society in Paris, the near future probably will see the new plan of administration put into effective operation. While the Society of St. Vincent de Paul quite naturally calls forth a rather extensive
literature concerning its spirit, aims, purposes, and works, it produces of itself relatively little literature, owing to its policy of refraining from publishing any extended account of its varied activities. Reports are issued by the local conferences and councils, and the council general in Paris publishes "The Bulletin," which is regarded as the official organ of the society. The official organ of English-speaking countries is "The Bulletin," published monthly by the superior council of Ireland. "The Quarterly," published by the superior council of New York, is the official organ of the society in the United States. Superior councils of the society in some other countries likewise issue similar periodicals.

Rules of the Society of St. Vincent de Paul; Manual of the Society of St. Vincent de Paul; The Bulletin (Irish); The Quarterly (U. S.); O'Meara, Life of Frederick O'Nan (London, 1879); Society Reports.

THOMAS M. MULIN.

Sala, GEORGE AUGUSTUS HENRY, journalist, b. in London, 24 Nov., 1828; d. at Brighton, 8 Dec., 1895, having been received into the Church before death. His grandfather, a native of Rome, came to England in 1776; the family were connected with the stage. Being an unusually precocious child, young Sala began at fifteen to earn his living by draughtsmanship. His versatile talent then passed to some painting, illustrating books, etching, engraving, finally finding its real vocation in journalism. After attracting the notice of Dickens, he became a regular contributor to "Household Words" and "All the Year Round," and was sent as special correspondent to Russia.

His literary output was large and various, though his style was criticized as florid. From 1857 he was noted for the "Daily Telegraph," acting as special correspondent all over the world. Much of this journalistic work was reprinted in book form. He was a man of social and convivial habits who prided himself on his extensive knowledge of cookery. Though earning a large income, his expenses usually caused him frequent embarrassment, and the failure of his magazine, "Sala's Journal," straitened his circumstances in the last years. His love for London, which he knew intimately, characterizes many of his books.

EDWIN BURTON.

Salamanca, Diocese of (Salmanticensis, Salmantina, Salmantica), in Spain, comprises the civil Provinces of Salamanca, Caceres, Avila, and Leon, and is bounded on the north by Zamora, on the east by Avila and Valladolid, on the south by Caceres, and on the west by Portugal. The episcopal city has a population of 23,000. Its territory formed the southern portion of the ancient Vetonia, and the existence of the city of Salamanca in the Roman period is evidenced by a pretentious bridge over the River Tormes, with twenty-seven arches, measuring 500 paces in length, and probably erected in the time of Trajan. The See of Salamanca is of unknown origin, probably dating back to the generation immediately succeeding that of the foundation of the city. St. Secundus is said to have founded the Diocese of Avila. Signatures of bishops of Salamanca are found in the Councils of Toledo; in the third council is that of Eleutherius; at the consecration of King Gondeimar, that of Teveristius; in the fourth and sixth, of Hercules; in the seventh high, and two tenth, that of Justus; in the Provincial Council of Merida (metropolis of Salamanca) the signatures of Justus; in the twelfth of Toledo that of Providentius; in the thirteenth, sixteenth, and sixteenth, of Holmurb, probably contemporaneous with the Moslem invasion. Alfonso I, the Catholic, pushed his conquests as far as Salamanca, and Ordoño I captured the city, but its bishops continued to reside in Asturias, where, with the Church of San Julian, outside the walls of Oviedo, was assigned to them. Bishop Quinquillufus (802) signed a royal deed of gift. Ramiro II, who defeated the Moslemos at Simancas, began to repose Salamanca. In 1102 the see was granted the Count of Burgundy, and his wife Urraca, gave the church of the city to Don Jeronimo, the count's master, and built the Cathedral of S. Maria. The celebrated bishop, comrade of the Cid Campeador, died in 1120 and was interred in the newly-built basilica, to which he left the famous "Christ of the Battles" (Cristo de las Batallas).

Later bishops were: Gerardo; Munio, a partisan of Alfonso of Aragon; Berengario, consecrated in 1135 and transferred to Compostela in 1151; Navarro; Ordoño Gonsalo; Pedro Suarez, praised by Alexander II for teaching and prudence; and Vitalis, who maintained the validity of Alfonso IX' s marriage with his cousin Teresa of Portugal against the censures of Celestine III and the sentence of the bishops presided over by Cardinal Guillermo in 1197. From his period date the university and the most ancient and famous convents of Dominicans, Franciscans, and Clarissas. In October, 1310, the see being vacant, fifteen prelates of the ancient Province of Lusitan, presided over by the Archbishop of Santiago, assembled in the cathedral of Salamanca to try the case of the Templars, and found them innocent in Spain of all the atrocious acts of which they were charged. Bishop Juan Lucero accompanied King Alfonso XI to the conquest of Algeciras. Later on he became subservient to the caprices of Pedro I the Cruel and annulled (1354) his marriage with Blanche of Bourbon in order to unite him with Juana de Castelo. Lucero's successor, Alonso Barrosa, on the contrary, supported Henry of Trastamara against Pedro. In May, 1382, a council was held at Salamanca to take action in the matter of the schism of Avignon, and Castile decided in favour of the antipope. In another council (1410) Salamanca again recognized Inigo Luna (Benedicto XI) and Vitalis, this time St. Vincent Ferrer, laborious to convert the Jews of Salamanca; from 1460 to 1478 St. John of Sahagun enlightened the diocese by his preaching.

Salamanca has two cathedrals; the old, celebrated for its massive strength, was founded in 1100 by the aforesaid Count Raymond near the River Gate (Puerta del Rio). At the end of the thirteenth century it was not yet finished, and its main entrance, called Del Perdon (of the Pardon), was covered over in 1880 with new Doric and Composite pilasters. In 1847 it was freed of its inarticulate choir. Its building occupied so long a time that Gothic ogival arches are supported by its Roman columns. Of its three naves the principal one terminates in the main chapel on the reredos of which is to be seen the "Last Judgment" painted by Nicolás Florentino in 1446 for Bishop Sancho de Castile. In early days
none but royal personages were permitted to be buried in this main chapel; here lie Mafalda, daughter of Alfonso VIII, Fernando Alfonso, natural son of Alfonso IX of Leon, Bishop Sancho of Castile, Turnson of Pedro, and his successor, Juan de Vivero. The cloister of the old cathedral was Romanesque, but in 1780 Jerónimo Quinones rebuilt it in Renaissance style. Most remarkable of its four chapels is that of St. Bartholomew, founded by Diego de Alavís in 1448, and that of San Pedro, founded in 1584 by the Bishop Juan Luero.

The new cathedral was founded by the Catholic monarchs, who in 1491 sought to build one at Seville, but the idea was not carried into effect until 1508, when Fernando was at Salamanca. This new edifice was erected side by side with the old, leaving the latter intact. Its architects, Antón Egas and Alfonso Rodrigues, had built churches at Toledo and Seville; Juan Gil de Hontañón was master of the works. The building was begun in 1513, in the episcopate of Francisco de Bobadilla. Divine worship was held in it in 1560, and it was completed on 10 August, 1733. The tower, set on fire by lightning in 1705, was rebuilt by the celebrated José Churriguera, who made it a monument of the style (Churrigueresco) to which he gave his name. In the chapel at the centre of the rood screen are remains of Bishop Jerónimo, transferred from the old basilica in 1744, and the venerated “Christ of the Battles”. In two large silver vessels within the high altar, the relics of St. John of Sahagún and St. Thomas of Villanueva are preserved. Besides the cathedrals, a sumptuous church worthy of especial mention is that of the Dominican convent of San Esteban, occupied by the Dominicans since 1256, where, it is said, Christopher Columbus was entertained in 1484 and where he found in Fray Diego de Desa one of his most ardent protectors. The church was rebuilt in the sixteenth century, the first stone was laid on 30 June, 1524, and the work was completed in 1610. The founder of this convent was the Salamanca Fray Juan de Toledo, of the House of Alva, Bishop of Cordoba, and cardinal; here, too, is buried the famous Duke of Alba, whose wife Margaret of Austria in 1614. The college was converted into an ecclesiastical seminary by Bishop Beltrán in 1779, was made a pontifical university, and is now under the care of Jesuits. In former times there were numerous hospitals at Salamanca, but in 1851 it was agreed to combine them all into one, under the care of the Brothers of St. John of God, and dedicated to the Trinity. The library of the university and province, containing more than 100,000 volumes, is a remarkable one.

Ramón Ruiz Amado.

University of Salamanca.—This university had its beginning in the Cathedral School under the direction, from the twelfth century, of a magister scholarum (from this enseignador the colegio draw its name). In 1230, sprang the royal foundation of Alfonso IX of Leon, who “with salutary discretion summoned the most experienced masters of sacred letters and established schools” (Lucas de Tuy); which, however, does not signify, as Rashdall infers, that they taught the common sciences. Alfonso IX granted them the privileges alluded to later by St. Ferdinand, who was in reality the founder, the foundation of his father not having endured. On 6 April, 1243, in letters patent, the saintly king took under his protection the professors, students, and their property, granting them an ecclesiastical tribunal for the settlement of their disputes. Alfonso X the Wise continued the work of his father. In his time began that period of unrivalled prosperity for the university, which for so many centuries made it “the glory of Spain” (Denifle). In Toledo on 8 May, 1254, the king granted the university the privileges that are its Magna Carta, appointing curators, placing it under the authority of the bishop, exempting it from the regular authorities, and assigning salaries for the professors. The professorship of law received 500 maravedis a year, canon law 300, grammar, logic, and medicine 200. Some have endeavoured to trace an analogy between these privileges and those granted by Ferdinand I and II to the Universities of Bologna and Naples.

But the fundamental difference that characterized the Spanish university must not be overlooked, that, although a royal foundation, it was placed under the direction and control of the bishop, the dean, and the chancellor, who conferred the academic titles in the cathedral. The titles were given until 1830 in the name of the pope and king. Doctrinal and ecclesiastical professorships did not, however, contrary to Stein’s view, predominate in the university (Denifle). Departments of medicine and jurisprudence were also established, and preference was given to the law, especially canon law. By petition of the king, 6 April, 1255, Alexander IV, the original of Alexander IV, granted the university at Salamanca, “because in the multitude of the wise is the security of kingdoms, and their governments are maintained not less by the advice of the prudent, than by the energy and bravery of the strong”. Later he decreed that any accepted teacher in any branch whatsoever at Salamanca could teach his subject in any other university, with the exception of Paris and Bologna, a limitation which John XXII instituted in 1333.

Principal Façade of the University, Salamanca.
principles Alfonso the Wise had put into practice in Salamanca, he drew from the “Leyes de Partida”, commenced in 1256 and terminated in 1263. Rashdall calls this “a sort of educational code—the first of its kind in modern Europe”. In the time of Sanchon the Brave the studies declined because the salaries of the professors were not paid. Finally, Ferdinand IV, authorised by Boniface VIII, assigned for this purpose the tertia ecclesiarum, ad from this date, 7 August, 1300, the university entered upon a new era of prosperity.

Classes were once more discontinued from 1306 to 1313, when Clement V commanded the tertia to be used in restoring the churches. In 1313 a third of the tertia was once more devoted to paying the professors of law, civil and canon, medicine, logic, grammar, and music. In 1355 the minorite friar, Didaco Lupi, taught theology in Salamanca; but this branch, which in the sixteenth and seventeenth centuries was to draw the eyes of the entire world to Salamanca, did not flourish there until Benedict XIII introduced it in 1416, and Martin V re-established it in 1422. This pope gave the university its definitive constitution, and numbered it among the four greatest in the world. In 1401 the bishop, Diego de Anaya Maldonado, founded the first college for poor students, which was called the College of San Bartolomé and the Old College. This and the colleges of Cuenca, Oviedo, and Fonseca were called colegios mayores, larger colleges. Afterwards a great number of colegios menores, smaller colleges, secular, regular, and of the four military orders were founded. The Liberals suppressed the colegios menores under the pretext of their decadence but without substituting anything better, or even equally good, to help the poor students. Following this the colegios menores were also closed. The laws of 1845 swept aside the last remaining vestige of these ancient establishments for university training, secularizing them and placing them under the control of the Liberal Government. The number of students at Salamanca in 1584 reached 6778; in 1822 it amounted to only 412, and later it dropped even lower. In the catalogue of its professors figure the names of some celebrated women, such as Doña Beatriz Galindo and Doña Alvare de Alava.

Salamanca, a titular see in Cyprus. Salamis was a maritime town on the eastern coast of Cyprus, situated at the end of a fertile plain between two mountains, near the River Pedieus. It was already an important centre in the sixth century B.C. Its foundation is attributed to Teucer, son of Telamon, King of the Island of Salamis, opposite Attica; others believe it to be of Phenician origin and derive its name from the Semitic selom, peace. Its fine harbour, its location, and fortifications made it the chief city of the island. In the sixth century B.C. it had kings, allies of the princes of Cyrene; one of them, Gorgus, refused to join in the Ionian revolt, and was expelled by his brother, who took command of the troops of Salamis and the other cities; the battle was fought before Salamis, which fell again into the power of Gorgus. It was besieged by Anzirocrates, the successor of Arsinom. After the Persian expedition, the Persians had to fight for ten years against the Adiant king Evagoras, whose panegyric was composed by Isocrates. It was at Salamis in 306 B.C. that the greatest naval battle of antiquity was fought, Demetrius I, Poliorectes, defeating the Greek-Egyptian fleet of Polypoemen. In 295 B.C. Salamis passed under the sway of the kings of Egypt, and in 58 B.C. under that of Rome, at which time it possessed all the eastern portion of the island. When St. Paul landed at Salamis with Barnabas and John, surnamed Mark, returning from Seleucia, there were several synagogues, and it was there he began the conversion of the island (Acts 13: 48). Salamis was destroyed by fire in 687; the town was rebuilt by Constantius II (337–61), who called it Constantia. It was destroyed by the Arabs in 647 or 648. Its unimportant ruins are near the village of Hagios Sergios, a little north of Famagusta. After its destruction the inhabitants and clergy betook themselves to Famagusta, which became, for a long time remained the residence of the archbishops. At present they reside at Nicosia. In the article on Cyprus (q.v.) are mentioned the principal bishops of Salamis or Constantia; the list of these prelates is given in Le Quin, “Oriens christianus”, II, 1043 seq., and more fully in Hacket, “A History of the Orthodox Church of Cyprus” (London, 1901).}

S. Pátrikhs.

Salamis, Epiphanius of, b. at Besanduk, near Eleutheropolis, in Judea, after 310; d. in 403. While very young he followed the monastic life in Egypt. On his return to Judea he founded a monastery at Besanduk and was ordained to the priesthood. In his reputation for asceticism and purity, no doubt, a great deal was due to his nomination as Bishop of Constantinople (Salamis), the metropolis of the island of Cyprus. For nearly forty years he fulfilled the duties of the episcopate, but his activity extended far beyond his island. His zeal for the monastic life, ecclesiastical learning, and orthodoxy gave him extra-ordinary authority; hence the numerous occasions on which his advice was sought, and his intervention in important ecclesiastical affairs. He went to Antioch, probably in 376, to investigate Apollinarianism and to intervene in the schism which divided that Church. He decided in favour of the party supported by Rome, against Meletius, who was supported by the episcopate of the East. In 382 he assisted at the Council of Rome to uphold the cause of Paulinus of Antioch. About 394, carried away by an apparently excessive zeal, he went to Jerusalem to oppose the supposed Origenism of the bishop, John. In 400 he was at Constantinople to combat the same pretended heresy of St. John Chrysostom. He died on his return journey to Cyprus.

It was at the instance of his correspondents that Epiphanius compiled his works. The earliest (374) is the “Ancoratus”, or “The Well-Anchored”, i.e., the Christian firm, fixed against the ship of error. The Trinity and the dogma of the Resurrection are particularly treated by the author, who argues
especially against the Arians and the Origenists. There are two symbols at the end of the work: the first, which is the shorter, is very important in the history of symbols, or professions of faith, being the baptismal creed of the Church of Constantina. The second is the personal work of Epiphanius, and is intended to fortify the faithful against current heresies. In the "Anacratos Epiphanius Of Mal'Egesian Heresies of the Church. Some readers desired to have a detailed work on this question, and Epiphanius composed (374-7) the "Panarion" or "Medical chest", i.e. a stock of remedies to offset the poisons of heresy. This work is divided into three books comprising in all seven volumes and treating eight heresies. The first two are addressed to Jesus Christ; the other sixty deal with Christian doctrine. In reality the number eighty may be reduced to seventy-seven, for among the twenty heresies prior to Christ only seventeen count. Three are generic names, namely Hellenism, Samaritanism, and Judaism. In the editions of the "Panarion" each heresy is numbered in order; hence it is customary to quote the "Panarion" as follows: Epiphanius, Hær. N (the number of the heresy). Necessarily much of the information in this great compilation varies in value. The "Panarion" reflects the character of Epiphanius and his method of writing. Sometimes he quotes a heretic from inquiring carefully into the doctrines he opposes. Thus, on his own avowal (Hær., lxxi) he speaks of Apollinarism on heresy. At Constantinople he had to acknowledge to the Origenist monks whom he opposed that he was not acquainted with either their school or their books, and that he only spoke from hearsay (Sozomen, "Hist. eccl.", VIII, xi). There is, however, in the "Panarion" much information not found elsewhere. Chapters devoted only to the doctrinal refutation of heresies are rare. As an apologist Epiphanius appeared generally weak to Photius. The "Panarion" furnishes very valuable information concerning the religious history of the fourth century, either because the author confines himself to transcribing documents preserved by him alone or because he writes down his personal observations. With regard to Hieracius (Hær., lxxvii), he makes known various Egyptian historical and intellectual work were equally esteemed. In connexion with the Meletians of Egypt (Hær., lxxivii), he has preserved important fragments of the contemporary Egyptian history of this movement. With regard to Arius (Hær., lixiv), if he gives an apocryphal story concerning two letters of Arius. He is the only one to give us any information concerning the Gothic sect of the Audians (Hær., lxxxv). He has made use of the lost report of the discussion between Photius (Hær., lxxi) and Basil of Anemery. He has transcribed a very important letter from Bishop Mathellus of Ancyra (Hær., lxxii) to Pope Julius and fragments of the treatise of Aquas of Caesarea against Marcellus. With regard to the Semiarians (Hær., lxxiii), he gives in the Acts of the Council of Ancyra (358) a letter from Basil of Ancyra and one from George of Laodicea, and the stenographic text of the singular sermon of Meletius at the time of his installation at Antioch. In the chapter dealing with the Anomoeans (Hær., lxxvi) he has preserved a monograph of Eutius.

For the first three centuries Epiphanius was compelled to use only the literary sources. Some of these have been preserved, such as the great anti-heretical work of St. Irenaeus of Lyon, "Contra Haereses". Other ancient sources utilized by him have been lost, which gives exceptional value to his work. Thus he made use of the "Syntagma" of Hippolytus. The precise determination of all his sources is matter of controversy. His information is especially valuable with regard to the Samaritans (Hær., x-xii), the Jews (Hær., xiii-xx), the Ebionites (Hær., xxx) and their Gospel, with regard to the Gnostics Valentin (Hær., xxxi) and Ptolomaeus (Hær., xxxii), whose letters to Flora he quotes; and with regard to the Scriptural criticism of Marcion. The work ends with a long exposition of the Catholic faith. A summary of the "Panarion" is perhaps the work of Epiphanius. The work entitled "Of Measures and Weights" (De mensuris et ponderibus) has a more general interest than might be imagined from the title. For the time it is a real "Introduction" to Holy Scripture, containing the history of Biblical texts and Sacred archaeology. The treatise "On the Twelve Precious Stones" is an explanation of the ornaments of the High Priest's breastplate (Ex. 28, 17). Mention must finally be made of two letters of Epiphanius preserved in a Latin translation.

In theological matters Epiphanius teaches the doctrine of the Catholic theologians of his time. In the vocabulary of Trinitarian theology he conforms to the language of the Greek Church. He speaks of three hypostases in the Trinity, whereas the Latins and the Paulicians of Antioch speak of one hypostasis in three persons. At bottom it was a mere matter of words, but for some time it occasioned theological dissensions. Epiphanius clearly teaches that the Holy Ghost proceeds from the Father and the Son. The doctrine that the Holy Ghost proceeded from the Father only prevailed later in the Greek Church. This teaching cannot be traced to Epiphanius (Anacratos, 8). With regard to the constitution of the Church, he is one of the most explicit of the Greek theologians concerning the primacy of St. Peter ("Anacratos", 9; "Hær.", lix, 7). Two passages on the Eucharist are famous because they are among those which most clearly affirm the "Discipline of the Secret". The "Secret" was purely pedagogical and often neglected, consisting in grading the doctrinal initiation of catechumens and in not speaking before them of the Christian mysteries save in deliberate evasive expressions. Hence the necessity of explaining the words of Epiphanius on the Eucharist ("Anacratos", 57; "Hær.", xili, 61). In these two passages, instead of quoting the words of the institution of the Eucharist, the author gives these: "Hoc meum est...". Epiphanius views the Eucharist as a mystery of the fourth century for the devotion to the Blessed Virgin. He expresses himself on the subject in connexion with two heresies, of which one diminished, while the other exaggerated, this devotion ("Hær.", lixviii, lixix). A circumstance of his life is well known and the history of the church passes by the destruction of an image in the church of Bethel ("Letter to John of Jerusalem" in P. G., XLIII, 390).

His character is most clearly shown by the Origenist controversies, which demonstrated his disinterestedness but also his quickness to suspect heresy, a good faith which was easily taken advantage of by the intriguing, and an ardent, yet conviction, which caused him to forget the rules of canon law and to commit real abuses of power. He saw in Origen the chief cause of the heresies of his time, and especially of Arianism. He was particularly opposed to his allegorical method, his doctrines concerning the Son, in which he saw the subordination of the Son to the Father, his doctrines concerning the pre-existence of souls and the resurrection ("Anacratos", 55, 62; "Hær.", lixiv). He did not confine himself to this condemnation of Origen. He reproached the monks and bishops of his time with accepting the Origenist creeds. Hence he reproaches the Eusebians ("Contra Haereses"). His personal enmity was also directed with John of Jerusalem and with St. John Chrysostom. Apart from the injustice of the controversy, he encroached on the jurisdiction of these bishops. He was made use of by Theophilus of Alexandria, the irreconcilable enemy of Chrysostom. The chief sources relative to this controversy are:

Zucker, Literarischer Zeitungsblatt, LXXI, no. 16. Louis Salvetti.

SALAMON, LOUIS-SIFFERN-Joseph, Bishop of Saint-Floir; b. at Carpentras, 22 Oct., 1759; d. at Saint-Floir, 11 June, 1820. After studying law and theology at Avignon, at that time belonging to the Papal States, he was made auditor of the Rota by the favour of Pius VI. This office he resigned for a post in the Parliament of Paris, where he took part in the famous case of the "Diamond Necklace" (1784), which Cardinal de Rohan had purchased for Marie Antoinette (q. v.). He continued to be a member of the Parliament at the Court of Louis XVI. His devotion to the Church marked him out for persecution, and accordingly he was thrown into prison at the time of the September massacres, 1792. Twice he narrowly escaped death. On his release he wandered about in disguise, acting as vicar Apostolic. In 1801 Mgr Caprara arrived in France as papal legate, and appointed him bishop of the see of Cordoba, general of the diocese of Normandy. The new pontiff, Pius VII, did not select him for one of the sees under the Concordat, but made him Bishop of Orthia in partibus. It was not until after the Restoration that he received a French see at the suggestion of Louis XVIII (1820). His episcopate lasted only nine years, but these were full of work for the restoration of religion. The training of the clergy especially engaged his attention, as he lamented the contrast between the cultured priests of the old régime and those who were brought up during the confusion of the Revolution. His "Mémoires inédits de l'internement à Paris pendant la Révolution" (Paris, 1890). They have been translated by Frances Jackson ("A Papal Envoy during the Terror", London, 1911). His statements are sometimes at variance with established facts.

T. B. Scannell.

SALASAR, DOMINGO DE, b. in La Rioja, in the village of La Bastida on the banks of the Ebro, 1512; d. in Madrid, 4 December, 1594. He entered the Dominican monastery of San Esteban, Salamanca. Sent to Mexico, where he received the degree of Master in Theology, he was appointed to the professor's chair. His ambition to evangelise the heathen was granted and he was sent to the countries and native provinces of Guayaquil. He was characterised here by the same zeal for defending the rights of the Indians that he manifested later in an heroic degree in the Philippines. Salasar was next transferred to Florida, where he passed many years in toil and privation. From Florida he was recalled to Mexico, and then to the Philippines, where he was vicar of his order. After forty years of missionary life, he was sent to Madrid on important business connected with the Mexican mission. Political enemies tried to thwart his work and succeeded in having him thrown into prison when he sought audience of the king. It was then that his presence in Madrid was brought to the attention of Philip, who proposed his name to the pope as Bishop of the Philippines. Salasar was only to accept the dignity; but his missionary spirit prevailed. As he wrote later: "One of the reasons which made me accept this bishopric was the fact that these islands are near China. . . . For a long time I have had the conviction of that kingdom at heart, and with that thought I came to these Islands." He set out for his see via Acapulco, taking with him twenty Dominicans, twelve of whom died before reaching Mexico; of the remainder only one was able to continue the journey to the Philippines. Salasar arrived in Manila in 1581. He espoused the cause of the Filipino with a fearlessness that won for him the titles of the "intrepid Salasar," "the Las Casas of the Philippines." He held a synod of the clergy, which was later confirmed by the pope, erected a cathedral, regulated the internal affairs of the diocese, opened a college, and established a hospital. In his charity to the poor he made an endowment for the poor of all races at several places. Old age did not lessen his zeal. He was almost eighty when he set out for Spain to plead in person the cause of the natives with the king. His mission was successful; various abuses were corrected, three new dioceses were created, and Manila was elevated to a metropolitan see with Salasar as its first archbishop. He died before receiving the Bull of his appointment and was buried in the Church of Santo Tomás, Madrid. His tomb bears this inscription: "Hic jacet D. Fr. Dominicus de Salasar Ordinis Predicatorum, Philippinarum Episcopus, doctrina plana verus religiosi vates, sancti olim eius novissimus Pastor, pauperum Pater, et ipse papa. Obiit 4 die December anno 1594." Blair and Robertson, The Philippine Islands (Cleveland, 1895); Ferrando, Historia de la Santa Iglesia Metropolitana de Filipinas (Madrid, 1870); Moreno, Historia de la Santa Iglesia Metropolitana de Filipinas (Manila, 1877).

PHILIP M. Finegan.

SALE, DIACONUS OF (SALISIUS), in Victoria, Australia, comprises all the territory known as Gippsland. In 1840 Count Strzelecki, an expatriated Polish scientist, accompanied by a young Irishman named James Riley and some at least twenty-one of these "Aborigines," which they found to be singularly fertile and teeming with resources, though hitherto regarded as a tracts less waste. Its scenery is remarkably beautiful, and it is often called the "Garden of Australia." Still it was colonized but slowly, as the native inhabitants were regarded as fierce and warlike, while many natural obstacles to settlement were offered by the dense forests, lofty mountain ranges, and swift torrents. At the present time, however, it is one of the regions of Australia best known to tourists. It is rich in pasture and timber lands, while its vast mineral wealth is still only partly developed.

The capital is Sale, near the mouth of the river. The area of the diocesan see erected in 1857 at the request of the plenary synod. Its first bishop was the present titular Rt. Rev. James Francis Corbett. He was born at Limrick in 1840; his theological studies were made in France, and on his return he worked for some years as a priest in his native diocese. He went to Australia at the invitation of Archbishop Goold of Melbourne, to whom he acted as diocesan secretary while fulfilling the duties of pastor of St. Kilda's. He was assistant secretary of the synod of 1885, and on his appointment to the new see was consecrated by Archbishop Carr of Melbourne 25 August, 1885, in the church of St. Vitalis, Melbourne. On his arrival in his diocese there were within its limits three parochial districts and four priests,
three of whom afterwards returned to their former Diocese of Melbourne. There are now (1911) 9 parishes, 18 priests, 47 churches or chapels, and 10 schools with 830 pupils. The Catholic population is 11,521, and there are 61 sisters of Notre Dame de Sion.

BLANCHE M. KELLY.

Salem (Salmansweiler), also called Salomonis Villa on account of the resemblance of its primitive buildings to Solomon's Temple, an abbey situated near the Castle of Heiligenberg, about ten miles from Constance, Baden (Germany). The abbey was founded by Gunthram of Adelsreute (d. 1138) in 1136 during the reign of Pope Innocent II and Emperor Lothair II. Gunthram also gave the Abbey of Lucluce the necessary lands for the first Cistercian monastery in Alsace, the latter being a foundation of Bellevaux, first daughter of Morimond. Blessed Frowin, formerly the travelling companion and interpreter of St. Bernard, became its first abbot. He had been professed at Bellevaux, and was of the colony sent to found Lucluce; hence have arisen misunderstandings, so erroneous, that Salem was founded from Bellevaux.

Under the wise and prudent administration of Blessed Frowin and his successors, the abbey soon became very prosperous. Extensive and magnificent buildings, erected in three squares, and a splendid church were constructed between 1122 and 1311. Salem was not only the richest and most beautiful monastery in Germany, being particularly renowned for its hospitality. Amongst its greatest benefactors and patrons were Conrad of Swabia and Frederick Barbarossa. The former placed the abbey under the special protection of himself and his successors—hence the title of "Royal Abbey" which was renewed several times under Barbarossa and his successors; Innocent II also took the abbey under his particular patronage. Its growth was continuous, and even after having made three important foundations—Raitenhalsach (1149), Maristella or Wettingen (1227), and Königsburnn (1268)—it numbered 250 monks at the beginning of the fourteenth century. Its abbots, from 1454 on, were privileged to confer subdeaconship on his monks. The abbey gradually declined, though it numbered forty-nine priests and thirteen other church religious in 1498, when Abbot D. Stephen (d. 1725) became Vou van der Cistercian Congregation of Upper Germany. Caspar Oxle, who, as librarian, had increased the library to 30,000 volumes and a great number of MSS., was elected abbot in March, 1802; in September of the same year the abbey was suppressed and given to the Princes of Baden, while the library was added to that of Petershausen, and finally sold to the University of Heidelberg. The church became a parish church; the grand tower with its fifteen bells, the largest weighing 10,000 lbs., was destroyed (1805), and the other buildings were used as the grand duke's castle. Eberhard, its fifth abbot, is honoured as a Blessed of the Order. He made Archbishop of Salzburg, and entrusted with various important missions by the Holy See. Blessed Henry, a lay brother, is also mentioned in the Cistercian monastery.

EDMUND M. OBERREIT.

SALERNO, DIOCESE OF, in Campania, Southern Italy. The city is situated on the gulf of the same name, backed by a high rock crowned with an ancient castle. The surrounding country is well cultivated, and a natural harbour promotes the commerce of agricultural products; breeding of horses is carried on to a considerable extent. There are several thermal springs. The entrance to the cathedral, built by Robert Guiscard, is through a great court surrounded by porticoes, with columns of granite and porphyry, where several ancient sarcophagi are preserved. The middle doors are of bronze, beautifully decorated. In 1722 the interior was transformed by Pecori. The beautiful columns were shut up between pillars of walling, and the pointed arches were ruined. Of the ancient basilica there remains a high marble candelabrum adorned with mosaics; between the choir and the side of the high altar is the chapel of Giovanni da Procida, adorned with mosaics and containing the tomb of Gregory VII. In the chapel to the right there is a beautiful Pietà, the finest work of Andrea Salerno. Among other treasures of the sacristy is an ivory altar frontal with scenes from the Old and from the New Testament. In a tradition that it is the body of St. Matthew, the Apostle, is preserved in the crypt beneath the high altar; the columns of the vaul are beautifully incrusted with multi-coloured marbles. Among other churches are: the Annunziata; San Giorgio, which may rightly be called a picture gallery (Life of St. Bened- dict); and S. Domenico, where an arm of St. Thomas Aquinas is preserved. Charitable institutions were, and still are, numerous.

Sallerno was the city of the Salentini. After war with Hannibal (194 B.C.), a Roman colony was established there. In the Social War it was taken by the Samnites. In the eighth century the city was in the power of the Lombard dukes of Benevento; Arichis fortified it and took refuge there, when Charles the Great invaded his duchy. In 840 Sicul- fuis, brother of the Duke Sicardus who was killed by the partisans of Radegelius, was proclaimed prince at Salerno, which from that time constituted an independent principality. With the assistance of the Saracens and with the spoils of the churches Sicul- fuis defended his independence, which was confirmed in 851 by the Emperor Louis II, to whom the prince had sworn allegiance. The chief cities of the principality were Taranto, Cassano, Cosenza, Pessum, Cosenza, Salerno, Sarno, Benevento, Mileto, and Sora. The son of Siculfuis, Sico, was deposed by his tutor, Petrus, who was succeeded by his son Ademar; the latter, however, was deposed by a con- spiration, tortured, and blinded, while Guaferius was put in his place (861). In 874 the port of Salerno was so well defended that the Saracens had to abandon the blockade of the city. Guaimaros, son of Gua- ferius, struggled (880) against the Saracens and the Byzantines, but on account of his cruelty he was deposed, blinded, and thrown into prison. His son, Guaimaros II, ruled wisely.

Siculfuis became famous through the splendour of his court. He was deposed by the exiled Prince of Beneventum, Landolfo, but Pandolfo Capo-di- Ferro, Prince of Beneventum, restored Giaulfuis (974), who, through gratitude, associated with himself in the principality Pandolfo, son of his liberator, by whom he was succeeded in 978. The latter also was deposed by Manfrius III, Duke of Amalfi (981), who was confirmed in the principality by Otho II. The people of Salerno, however, rebelled against him, and gave the throne to Giovanni Lamperto, a de- scendant of the dukes of Spoleto. Under his son and successor, Giamalfo IV (984-1004), the people of Salerno were helped by about forty Norman warriors to repel the Saracens. Guaimaros IV dreamed of uniting the whole of lower Italy into a single principality; he took Amalfi and Sorrento and warred with Argiro, master of Bari, but was asse-
ominated by the Amalfians in 1031. It was only with the assistance of the Normans that his son Gisulfus III was able to recover his throne. The cruelty of Gisulfus against the Amalfians gave to Robert Guiscard, brother-in-law of Gisulfus, a pretext to wage war and to take possession of Salerno, which was bravely defended (1075). Gisulfus ended his days in the pontifical states. Thus the last Lombard principality of Italy came to an end. At the death of Guiscard his states were divided; Salerno was inherited by Roger, who was succeeded (1111) by his son William; at the latter’s death Salerno gave itself to Roger II of Sicily (1127), from whom it was taken by the Emperor Lothair (1137), although the latter was unable to hold it. In 1198 Salerno was again besieged, by land and sea, for having held Constance, wife of Henry IV, a prisoner. For this offence dreadful revenge was taken and Salerno never recovered from the damage done to it in the pillage. The heirs in 1811, together with the University of Salerno. Among the famous physicians that it produced were: Garisponio, author of the “Passionarium Salerni”; Colone (Ars medendi); and Matthaeus Platearius, author of a commentary on the “Antidotarium” of Nicolò Pietro Musandino (thirteenth century). The “Herbarium” of the school of Salerno was disseminated throughout Europe in the twelfth century. In the same century the rules of hygiene of this school were collected and edited in leonine verse; these rules, which even now are not antiquated, were the school’s greatest title to praise. The “Anonymus Salernitanus” who continued the history of the princes of Benevento from Erchemperti to 980, Andrea Sabatini a pupil of Raphael, and Andrea da Salerno were natives of this city.

In view of its position, it was natural that Salerno should receive the light of the Gospel at an early date; in fact, various saints, as Antes, Caius, and For-

The City of Salerno, from the Harbour

of the first princes of the House of Anjou bore the title of Prince of Salerno; John II invested it with Girolamo Colonna, nephew of Martin V. Charles V suppressed the principality, but the province continued to be called Principality of Salerno.

The medical school of Salerno was famous in medieval history; it was founded neither by Charles the Great nor by the Arabs, the city never having been under the dominion of either. Its origin is to be found in the Benedictine monastery of Salerno, established in 794, in which the botanical and the medical works of the ancients were studied. Its fame grew, when about the year 1070 the celebrated Costantino Africano took refuge there. He had studied in the schools of the Arabs at Babylon, at Bagdad, and in Egypt, and was presented by the brother of the caliph of Babylon to Guiscard, who took him as secretary. He gave a new impulse to philosophical and to medical studies by making known in the West the works of the Arabs. Roger I gave laws to the schools of Salerno, which was the first Western school to introduce academic degrees. New regulations were established for it by Frederick II, who ordered that no one should practise medicine without being “licensed” by that school, the fame of which waned after the fifteenth century through the competition of Naples. The school was suppressed tunatus (28 August), suffered martyrdom there. The age of Bonifacius and four other saints who preceded Gaudentius on the episcopal throne is uncertain; Gaudentius, however, was bishop in 496, which would show that the see was created towards the end of the fourth century. Other bishops were: Asterius, who went to Constantinople with Pope Agapitus in 534; St. Gaudens (eighth century); Petrus (834), formerly Bishop of Canusio, who took refuge at Salerno when the Saracens destroyed his capital, and built the Church of San Giovanni Battista; Bernardus (850), a man of great virtue, who restored several buildings. In 984 Salerno became an archiepiscopal see, the first archbishop being Amato. Other archbishops were: San Alfano (1068–83), who received the exiled Gregory VII; Romualdo Guarra (1153), who took an important part in the ecclesiastical and political affairs of the Kingdom of Naples; Nicolò Agello (1181), taken prisoner by Henry IV to Germany, where he remained for many years notwithstanding the prayers of the popes, especially of Innocent III; Guglielmo de’ Gondoni (1298), chancellor of the Duke of Calabria, whose successors, to Orazio Minutolo (1330), resided at Avignon; Barnaba Orsini (1441), who restored the cathedral; Giovanni Vera (1500), later a cardinal, who was sent on several pontifical legations to France and to England; Giro-
lamo Seripandi (1554), a famous theologian and former general of the Augustinians, whose doctrines on justification, too much akin to those of Luther, were rejected at the Council of Trent, and who afterwards became a cardinal, and died at Trent; Gaspare Cervante (1564), who founded the seminary; Marc Antonio Colonna (1568), who established another college for clerics; his nephew, Marc Antonio Colonna, the author of the biographies of the famous Trotula, who wrote a treatise on diseases of women, Abelha and Rebecca, both of whom did much for embryology, and the female surgeon Mercuriale.

U. BENIGNI.

**SALESIAN SOCIETY.** The society was founded by Venerable Don Bosco, takes its distinctive name from its patron, Saint Francis de Sales. The object for which the society was founded seems to have been the words of its constitution: "the Christian perfection of its associates obtained by the exercise of spiritual and corporal works of charity towards the young, especially the poor, and the education of boys to the priesthood."

To save the rising generation the Salesian Society was founded. In 1844 Don Bosco began to gather together poor and neglected boys. He found places for them to play in, taught them catechism and heard their confessions in the open air, afterwards taking them to one of the churches in the city, where he used to say Mass for them and give them Holy Communion. These gatherings, called "Festive Oratories," became one of the most important and useful works of the institute in attracting boys. In 1845 the first night-school was opened at Valdocco, and became a permanent institution in the course of a year. It received such a success that a second one was opened (1847) at Porto Nuovo, and a third at Vanchiglia (1849).

In the beginning Don Bosco, for lack of personnel, was forced to make use of the older and more advanced pupils, setting them as teachers and monitors over the others, but necessity soon forced him to form a regular and permanent trained staff. Many of these, having begun to develop vocations for the priesthood, and became clerics, whilst still continuing to assist in the work of education. Much opposition was made to the growing institute, but Mgr. Fransoni, then Archbishop of Turin, took it under his protection, and even King Charles Albert, through his patronage, and the King's work, became its patron, and it steadily grew.

It was, however, found impossible, in many cases, to make a permanent impression on the character of the boys during the short time that they were under the influence of the teachers at the festive oratories and the night-schools, by far the larger number of the boys not only to earn their living, but had to learn a trade beforehand to enable them to do so. Thus a new class of boys arose—the boy-artisans—which constituted the second division of good works in the rising institute.

In 1853 the Church of Saint Francis de Sales was completed and consecrated, and surrounding it large schools for the students and workshops for boy-artisans began to rise. During all this time the work was developing, and a band of devoted and efficient teachers slowly emerged from the chao of evolution. About this time Don Bosco was urged to consolidate the perpetual works by means of a religious conglomeration, and in 1857 he drew up its first set of rules. In the following year he went to Rome to seek the advice and support of his benefactor, Pius IX, and in 1859 he summoned the first chapter of the congregation, and began the Society of Saint Francis de Sales.
In 1863 and 1864 colleges were opened at Mirabello, Monferrato, and Lanzo. This was a new step, as hitherto the scope of the congregation had been almost entirely restricted to the poor. In 1874, the Statutes and Constitutions of the Society were definitively approved by Pius IX, and the Salesian Society took its place among the orders of the Church. The development of the order was very rapid; the first Salesian house outside of Italy was opened at Nice in 1870, the first in the French language in the world, in 1872. During the same period, a number of Salesian missionaries were sent to South America, and houses were founded in Argentina and Buenos Ayres. In 1876 the Salesian co-operators were organised for the purpose of assisting in the good works of the congregation. They were enriched with many indulgences by Pius IX. The Pio di Maria Ausiliatrice, or the Sons of Mary, Help of Christians, were founded to assist tardy vocations to the priesthood. In 1877 the "Salesian Bulletin", the official organ of the congregation, made its first appearance, its object being to inform the Catholic world of the good works undertaken by the institute and to beg help to support them. The "Bulletin" is now published in eight different languages.

In 1877 houses were opened in Spezia, Almago, and Montevideo. In 1879 missionaries were sent to Patagonia, and houses were opened at Navarre, Marseilles, and Saint-Cyr (France). In 1880 the first house in Spain was opened at Utrera, and in South America the mission at Viedma, capital of the Rio Negro, was established. In 1883 the first house in Brazil was opened at Niteroy, and missions were established at Terra del Fuego and the Falkland Islands. In 1887 the first house was opened in Austria at Trent, and in the same year the Salesians established themselves at Battersea in London, England, and a large band of the Bullock missionaries was sent to Ecuador. On 31 January, 1888, to the great grief of the congregation, Don Bosco died at the age of seventy-two. His successor, Don Rua, continued and developed the work of the congregation, and many more houses were opened in France, Spain, Italy, Belgium, Portugal, and South America. In 1899 houses were established in the Holy Land and in Africa. Between 1894 and 1911 houses have been founded in Mexico, Tunis, Venezuela, Patagonia, Lisbon, Bolivia, Paraguay, Montpelier, Cape Town, England, Chili, San Salvador, Peru, India, and China. The first mission opened in the United States was in San Francisco in 1898. There are now two in that city, and another at Oakland on the other side of the bay. In New York there were two missions opened respectively in 1898 and 1902. A college was opened at Troy in 1903, but transferred (1908) to Hawthorne, Westchester County, in the State of New York.

Although the real object of the Salesian Society is the Christian education of the young, especially of the poorer and middle classes, it does not refuse any work of charity for which it has suitable members. In carrying out its principal work, instead of the old pedagogical system, it adopts the presence of the one, thus promoting confidence and love among the children, instead of fear and hatred. The success of this method is seen from the number of vocations drawn from its ranks. The young aspirants are imbued with the Salesian spirit even before joining the congregation. One year is spent in the novitiate, after which triennial vows are taken before the tyro is admitted to his final profession. The growth of the congregation may be seen from the fact that it contains about 320 houses, distributed into 34 provincialates, of which 18 are in Europe, and the remaining 16 in America. The houses in Asia and Africa belong to European superiors. The mission work was suspended except in France, where most of the houses were suppressed during the regime of persecution under Combes. The houses in Portugal were left untouched during the late change of government. In 1910 the second father general of the congregation died, and was succeeded by Don Albera. The main work of the institute is the education and training of boys divided into two classes, students and artisans. The second branch is the missionary one, and it finds its scope principally in South America and Asia. The third branch is engaged in the education of adults for the priesthood and the fourth is occupied in the diffusion of good Catholic literature. The order obtains its support largely from the generosity of the Salesian co-operators, who, as a third order, contribute largely for this purpose, and to whom the "Salesian Bulletin" is sent monthly, to keep them informed of the progress of the work in distant lands, and to urge them to greater generosity.

Salford, Diocese of (Salfordiensis), comprises the Hundreds of Salford and Blackburn, in Lancashire, England, and was erected 29 Sept., 1850. It covers the east and south-eastern portions of Lancashire and embraces the manufacturing towns of Manchester, Salford, Blackburn, Oldham, Bury, Burnley, Rochdale, etc. Its area is practically coextensive with that of the ancient Catholic deanery of Manchester, which was under the jurisdiction of the diocese, but its title was taken from Salford instead of Manchester to avoid offending Protestant susceptibilities, as an Anglican See of Manchester had been erected in 1847. The Apostolic Letter of Pius IX, which divided the Lancashire District into the two Sees of Liverpool and Salford, allotted to Salford the Hundred of Leyland in addition to those of Blackburn and Salford, but a papal Brief dated 23 June, 1851, transferred to Liverpool the Hundred of Leyland which included the important Catholic town of Preston.

The Hundred of Blackburn, covering the northwestern portion of the diocese, extends twenty-four miles east to west, and fourteen miles north to south. In the chequered history of the Church following on the religious changes of the sixteenth century it had, with Salford, a long roll of recusants and martyrs for the Faith. The ruins of Whalley Abbey, a thirteenth-century Cistercian foundation, still bear their silent witness. Its abbot, John Pasel, was hanged outside its walls in 1537 for taking part in the Pilgrimage of Grace in 1536; and the property was seized for the use of Henry VIII. The first post-Reformation chapel in Blackburn was opened in 1775, and in Manchester in 1774. In 1843 the Rev. James Sharples, rector of St. Alban's, Blackburn, was consecrated Bishop of Samaria and appointed coadjutor to Bishop Brown, the first vicar Apostolic for the Lancashire District. He built at Salford St.
John's Church, which was opened in 1848 and which subsequently became the cathedral for the diocese. Dr. Sharples died 16 Aug., 1850, and the first Bishop of Salford in the restored hierarchy was Rt. Rev. William Turner (1790–1872). He was succeeded in 1873 by Rev. Henry Vaughan (1831–1906), whose episcopate was remarkable for its energetic organizing ability and initiation of works to meet the rapid growth and development of the diocese. He transferred to Westminster in 1892, the Rt. Rev. John Bilborough (1836–1903) was consecrated third bishop, the Rt. Rev. Louis Charles Casartelli, D.D., M.A., Litt.Dr., the fourth bishop, was born in 1857 and ordained priest in 1876. He was closely associated with Cardinal Vaughan in the foundation of St. Bede’s College, Manchester, in 1876, and was rector of it when he was nominated bishop in 1903. Bishop Casartelli is widely known as a writer on Oriental subjects, was a professor at Louvain, and has always been very active in the theologic-literary field. The Rt. Rev. John S. Vaughan, D.D., Bishop of Sebastopolis, was elected auxiliary bishop in 1909.

Population.—The Catholic population is estimated at about 800,000, and this is largely a growth of the last two-thirds of the nineteenth century. All the Catholic memorials and traditions lingered in Lancashire long after the Reformation, in 1890 only two Catholics were enrolled on the Manchester Poll Book. Ten years later, thirteen Catholic families, according to the returns of the Bishop of Chester, constituted the parish of Manchester with its area of sixty square miles. In 1775 the number of Catholic baptisms in Manchester was thirty-two, whilst the congregation of St. Chad’s Catholic Chapel, which had been opened in 1774, was estimated at 500. A survey made for the statistical society of the various Sunday schools in Manchester and Salford in 1838 returned the number of Catholic schools as ten, with an attendance of 4295 scholars. Similar small beginnings were witnessed in the Blackburn Hundred. In 1793 there is record of twenty-six Catholic baptisms for Blackburn. The number of Catholics in the town in 1804 was estimated at 745, and in 1819 the number had increased to 1200 for the town and district.

Missions and Priests.—At the present time there are in the diocese 135 public churches and chapels, 48 convents and private chapels, and 10 chapels of instruction, in which Mass is said. The secular clergy number 265, and in addition there are 221 from the Dominicans, Premonstratensians, Jesuits, Missionary Fathers of St. Joseph, and the Congregation of the Divine Pastor.

Education.—A chain of efficient Catholic elementary schools links up the compulsory secular instruction with the Catholic religious teaching given in them. 55,000 children are on the rolls of the 140 Catholic schools, with their 263 departments and a teaching staff of 1591 Catholic teachers. A training college for residential female teachers, conducted by the Faithful Companions of Jesus, adds to the completeness of the organization for elementary education. For secondary or higher education there are 18 schools and colleges. Stonyhurst, the great Jesuit college, is the successor of the College of St. Omer, which was founded by Father Robert Parsons, S.J., in 1592 and transferred to Lancashire on 29 Aug., 1794.

Works of Charity.—One of the great works of Cardinal Vaughan during his Salford episcopate was the founding of the Catholic Protection and Rescue Society in July, 1886. The object was to protect and save the destitute Catholic child whose mother was in danger. 6566 boys and girls have passed through its homes during the years 1886–1911, and its annual expenditure exceeds £4000. The “Har

vet”, a monthly publication, is its official organ. Orphanages for girls, institutions for the aged and poor under the Little Sisters of the Poor, night shelters for homeless girls under the Sisters of St. Vincent de Paul, the Sisters of St. Joseph in connexion with the Rescue Society, sisters who nurse the poor in their own homes under the Sisters of the Good Shepherd, who seek to reclaim the fallen, and Boys' and Girls' Industrial schools for boys under the Brothers of the Christian Schools, and Brothers of Mercy, and for girls under the Sisters of St. Vincent de Paul; all these manifest an untinging activity in ameliorating the lot of the poor, the forlorn and the sick.

The Catholic Federation and other organizations.—

Drastic educational legislation proposed by the government in 1906 and the imperative need for the organization of Catholic forces led to the formation of the Catholic Federation by Bishop Casartelli in 1906. Its primary object is the defence of purely Catholic interests, in which equality of treatment for Catholic schools largely predominates. The official organ is the “Catholic Federationist”, which was first issued in Jan., 1910, and is used by the bishop as a vehicle to convey his “message” on current questions.

Other societies are: a local branch of the Catholic Truth Society, the parent society of which was reorganized by Cardinal Vaughan when Bishop of Salford in 1884; the School of Social Science; the Society of St. Vincent de Paul; the Ladies of Charity; the Catholic Needlework Guild; the Catholic Boys' Brigade; the Catholic Philharmonic Society; and the Catholic Women's League, with its notable offshoot “The Mothers' and Babes’ Welcome”.

W. O’DRE.

Salimbene degli Adami (OGIVIENDE), chronicler, b. at Parma, 9 Oct., 1221; d. probably at Montefalcone about 1288. He was a member of a distinguished family and about 1238 entered the Franciscan Order. For a time he led a very troubled and wandering life, as his father sought to withdraw him from the order by violence. At a later date he was for a long time in the court of Florence, where he visited Ravenna, Reggio, and Montefalcone. He came into close connexion with many scholars of his age, and was also acquainted with Pope Innocent IV and the Emperor Frederick II. Besides various treatises that have been lost he wrote, towards the end of his life, a chronicle covering the years 1167–1287. This chronicle was first edited in the “Monumenta historica ad provincias Parmensem et Placentinensem pertinentia”, III (Parma, 1857), but the part issued only covered the years 1212–87. The first part of the chronicle, covering the years 1167–1212, was edited by L. Cigoli in his book “De fratribus de Salimbene et de eius chroni euctoritate” (Paris, 1878). A fine and complete edition was edited by Holder-Egger in “Mon. Germ. Hist.: Scriptores”, XXXII (Hanover, 1906). Besides a poor Italian translation by Cantarelli there is an incomplete one in English by Coulton with the title “From Francis to Dante” (London, 1906). The chronicle is one of the most useful sources of the thirteenth century for the political history of that time and is also an animated picture of the era; it is of especial importance for the history of the internal disputes in the Franciscan Order, and in the person of its impulsive and easily influenced man, is swayed by the prophecies of Joachim of Fiore, is inclined to be a partisan, especially against the secular clergy, yet

at the same time he shows sound historical sense, is an intelligent critic, and regards it as the chief object of his historical writing to present the exact truth. Michael Schlegel, British Museum (London, 1869); Gottfried, Bibliotheca historica mediæ æri (Berlin, 1868), 994.

Patriicus Schlager.

Salisbury, Ancient Diocese of (Sarum, Saris-
buriensis).—The diocese was originally founded by St. Birinus, who in 634 established his see at Dor-
chester in Oxfordshire, whence he evangelised the kingdom. It was subsequently transferred to the bishopric of Winchester, and from thence to the dioceses of Winchester, Sherborne, Ramsbury, and Salisbury. In the time of Bishop St. Headla (676–705) the see was moved to Winchester, and on Headla's death (705) a formal division took place, when the greater part of Wiltshire with portion of Gloucestershire was formed into the D
cocese of Sherborne of which St. Aldhelm became the first bishop. Ten bishops in turn succeeded St. Aldhelm before the next subdivision of the see in 909, when Wiltshire and Berkshire became the separate see of Ramsbury, restricting the Diocese of Sherborne to Dorsetshire only. The arrangement continued until the two dioceses were again united in 1058 under Herman, who had been made Bishop of Ramsbury in 1045. He lived to transfer his episcopal chair to Old Sarum in 1075. His successor, St. Osmund, built a cathedral there and drew up for it the ordinal of offices, which became the Sarum (q. v.). It was the thirteenth Bishop of Sarum, Richard Poore, who determined to remove the cathedral from the precincts of the royal castle of Old Sarum to a more convenient spot. On 28 April, 1220, he laid the foundation stones of the present cathedral, beginning with the Lady chapel which was consecrated on 28 Sept., 1225. Among those present was St. Edward. The cathedral was consecrated by the Archbishop of Canterbury, and at this time treasurer of Salisbury. The cathedral was completed in 1266, having taken nearly half a century to accomplish. It stands alone among English cathedrals in having been built all of a piece, and thus possesses an archi-
tectural unity which is exceptional; it is also remark-
able as being the first important building in the early English style. The cloisters and chapter house were shortly added; the spire regarded as the most beautiful in Europe is one of the loftiest in the world, and was a later addition, the exact date of which is unknown. It was built by W. W. Scott in 1282, divided into four arches of four sides. The cathedral is the “Valor Ecclesiasticus” of 1635, over 800 parish churches are recorded.

From the translation of the see to Salisbury the bishops were: Old Sarum: Herman, consecrated 1075; St. Osmund, 1078; vacancy, 1099; Roger, 1103; Jocelin, 1142; vacancy, 1184; Hubert Walter, 1189; Herbert Poore, 1194; New Sarum: Richard Poore, 1217; Robert Bingham, 1229; William of York, 1247; Giles de Bury, 1257; Walter de la Wyde, 1272; William le Scammell, 1284; Henry de Bradenstoure, 1287; William de la Corner, 1289; Nicholas Longespee, 1292; Simon of Ghent, 1297; Roger de Mortival, 1315; Robert Wyville, 1330; Ralph Erghum, 1375; John Waltham, 1388; Richard Milford, 1395; Nicholas Burwell, 1407; Robert Hallam, 1430; John Chandler, 1417; Robert Nevile, 1427; William Ayscough, 1438; Richard Beauchamp, 1450; Lionel Woodville, 1482; Thomas Langton, 1485; John Blythe, 1494; Henry Deane, 1499; Edmund Audley, 1502; Lorenzo Campego, 1524. In 1534 Cardinal Campego was deprived of the temporalities by order of the king, and the secular clergy were seized of the see. On Campego's death, Peter Peto (afterwards cardinal) was nominated but never consecrated. Under Mary, the schismatic bishop, John Capon (or Salcot) was reconciled and held the see till his death in 1557. Peto was again nominated, but did not take possession, and Francis Mallet was named, but ejected by Elizabeth before consecration. The cathedral was dedicated to Our Lady, Sherborne and Salisbury (Salisbury, 1821); Phillips, Institutiones clericarum in omnieta Wiltsise (n. p., 1825); Rock, Church of Our Lady (London, 1823); Locock, The position of high altar (London, 1876); Jones, Festes Ecclesiae Sarisburiensis (Salisbury, 1879–81); Idem, Salisbury in Diocese Histories (London, 1883); miniatures illustrating the history of the Cathedral, etc., of Salisbury in R. S. Sigourney (London, 1891); Watts, Art Decor (London, 1900); Wordworth, Ceremonies and processes of Cathedral Church of Salisbury (London, 1901).

Edwin Burton.

Saliva Indians, the principal of a small group of tribes constituting a distinct linguistic stock (the Salivan), centring in the eighteenth century, about and below the junction of the Meta and Orinoco, in Venezuela, but believed to have come from farther up the Orinoco, about the confluence of the Guaviare and Colombian tributaries. They are now virtually extinct and are of slight economic and social import. They lived in the upper Orinoco and its tributaries, in the region extending from the Meta above the junction of the Orinoco, to the Casiquiare river, which connects with the Amazon. They numbered at that time about 4,000 souls, only a small part residing at the mission. It was visited and described by Humboldt in 1800. Another Saliva mission, San Miguel de Macuco, on the Meta, had at one time 900 souls. On the expulsion of the Jesuits in 1767–68 the Orinoco missions were placed in charge of Franciscan fathers, but fell into decline. The revolutionary war and the withdrawal of help from the Spanish Government completed their ruin. The mission property was seized, the Indians scattered, and the tribe is now practically extinct.

James Mooney.

Salmanticensis and Complutenses.—These names designate the authors of the courses of Scholastic philosophy and theology, and of moral theology published by the lecturers of the philosophical college of the Disalced Carmelites at Alcalá de Henares, and of the theological college at Salamanca. Although primarily intended for the instruction of the younger members of the order, these colleges, being incorporated in the Universities of Alcalá (Complu-
tum) and Salamanca, opened their lecture rooms also
to outsiders. During the Middle Ages the Carmelites, with some notable exceptions, had gone hand in hand with the Dominicans in the matter of Scholastic teaching as against the Franciscan and Augustinian schools; it was therefore natural that in the sixteenth century they should maintain their old allegiance as against the Jesuits. Consequently they made strict adherence to Thomism their fundamental principle and resistance towards all that was contrary to it. The “Logic” written by Diego de Jesus (b. at Granada, 1570; d. at Toledo, 1821) appeared at Madrid, 1608, and was re-written by Miguel de la S. Trinidad (b. at Granada, 1588; d. at Alcalá, 1661), in which form it was frequently printed in Spain, France, and Germany. Near all the remaining philosophical treatises were the work of Antonio de la Madre de Dios (b. at Léon, 1588; d. 1640). The whole work was then re-cast by Juan de la Anunciación (b. at Oviedo, 1633; general from 1694 to 1700; d. 1701), who also added a supplement. It appeared at Lyons in 1670 in five quarto volumes under the title “Collegii Completensis Fr. Dissolac. B. M. V. de Monte Carmeli Artium cursus ad breviorem formam collectum et novo ordine atque faciliore stylo dispositus.” It superseded all previous editions and various supplements, such as the “Antiquitates omnia libri, distincta” (Paris, 1698), and the French Carmelite, Blas de Concepción, Antonio de la Madre de Dios laid the foundation of the dogmatic part of the Salmanticenses by publishing, in 1680, two volumes containing the treatises “De Deo uno”, “De Trinitate”, and “De angelis”. He was succeeded by Domingo de Sta Teresa (b. at Alcalá, 1600; d. at Madrid, 1654), who worked on the “Catechism” in 1647 “De ultimo fine”, “De beatitudine, etc.”, and “De peccatia”. Juan de la Anunciación, already mentioned, contributed “De gratia”, “De justificacione et merito”, “De virtutibus theologici”, “De Infrata,exports in communitate et carcerarii” in the second volume of “De penitentia” in manuscript. It was revised and continued by Antonio de S. Juan-Bautista, who, dying at Salamanca in 1699, was unable to carry it through the press. The work was therefore completed by Alonso de los Angeles (d. 1724) and Francisco de Sta Ana (d. at Salamanca, 1707). This last volume, the twelfth, appeared in 1704. The Salmanticenses have ever been held in the highest esteem, particularly at Rome where they are considered a standard work on Thomistic scholasticism. A new edition, in twenty volumes appeared in Paris as late as 1790. An abridgment (two large volumes), intended for the use of novices, was compiled by Pablo de la Concepción (general from 1724 to 1730; d. at Granada, 1734).

The moral theology of the Salmanticenses was begun in 1685 by Francisco de Jesús-Maria (d. 1677), with treatises on the sacraments in general, and on baptism, confirmation, the Eucharist, and extreme unction. The fourth edition (Madrid, 1709) underwent considerable revision on the new Decrees of Innocent XI and Alexander VII. It was augmented by a disquisition on the “Bull Cruciatu” of José de Jesus-Maria, published by Antonio del 88. Sacramento. Andrés de la Madre de Dios (d. 1674) wrote “De sacramento ordinae et matrimonii” (Salamanca, 1665). “De eucharistia”, “De justitia”, and “De statu religioso”, with all kinds of matters. Sebastian de San Joaquín (d. 1714), the author of two volumes on the Commandments, did not live to see his work through the press. Hence it was completed and published by Alonso de los Angeles, who had put the last hand to the course of dogmatic theology. St. Alphonse took the principles of the theology of the Salmanticenses; he nearly always quotes them approvingly and follows their lead, though on rare occasions he finds them somewhat too easy going. Lehmkuhl complains that they are not always accurate in their quotations.

B. ZIMMERMANN.

Salmass, a Chaldean see, included in the ancient Archdiocese of Adhobrigan, or Adherbaidjan; we know several Nestorian bishops of the latter, in the fifth to the seventh centuries (Chabot, “Syndion orientale”, 965), and in the Middle Ages (Le Quien, “Oriens christianus”, II, 283), also some Jacobite bishops (Le Quien, nos. 1561-99). It is at a date which is not quite certain, but which goes back at least to the end of the eighteenth century (Guricel, “Elementa lingus chaldaica”). Rome, 1690, p. 206), the Chaldean Catholic Archdiocese of Adherbaidjan formed one with that of Salmas, and since then it has continued to exist. It contains 8000 faithful, 10 priests, 13 parishes or stations, and 12 churches or chapels. The see is at Ourmiah; the Sisters of Charity direct the primary schools. The town and Province of Salmas in the Persian Adherbaidjan are rich in marbles, orchards, and vineyards.

Revue de l’Orient Chrétien, I, 450; Miss. cathol. (Rome, 1807), 814.

S. VALEIR.

Salmeron, Alphonsus, Jesuit Biblical scholar, b. at Toledo, 8 Sept, 1515; d. at Naples, 18 Feb, 1585. He studied literature and philosophy at Alcalá, and thereafter went to Paris for philosophy and theology. Here, through James Laine, he met St. Ignatius of Loyola; together with Laine, Faber, and St. Francis Xavier, he was one of the first companions of Loyola (1538). The small company left Paris, 15 Nov, 1536, and reached Venice, 8 Jan., 1537, and during Lent of that year went to Rome. He delivered a discourse before the Holy Father and was, in return, granted leave to receive Holy orders as soon as he should have reached the canonical age. About 8 Sept., all the first companions met at Vicenza, and all, save St. Ignatius, said their first Mass. The plan of a pilgrimage to the Holy Land was abandoned. Salmeron devoted his ministry in Sienna to the poor and to children. On 22 April, 1541, he pronounced his solemn vows in St. Paul’s Outside-the-Walls, as a professed member of the newly-established Society of Jesus. The autumn of that year, Paul III sent Salmeron and Broët as Apostolic nuncios to Ireland. They landed, by way of Scotland, 28 Feb., 1542. Thirty-four days later they set sail for Diégo and went on to Paris. For two years Salmeron preached in Rome; his exposition of the Epistle to the Ephesians thrice a week in the church of the Society effected much good (1545). After preaching the Lent at Bologna, he went with Laine to the Council of Trent (15 May, 1546) as theologian to Paul III. The Dogma
of Justification was under discussion. The two Jesuits at once won the hearts and respect of all; their discourses had to be printed and distributed to the bishops. Both set out for Bologna (14 March, 1547) with the Council. After serious sickness at Padua, Salmeron once again took up his conclave work. The next two years were filled with great activity, and spent in preaching at Bologna, Venice, Padua, and Verona. On 4 Oct., 1549, Salmeron and his companions, Le Jay and Canisius, took their doctorate in the University of Bologna, so that they might, at the urgent invitation of Wenceslas, V of Bohemia, accept chairs in Ingolstadt. Salmeron undertook to interpret the Epistle to the Romans. He held the attention of all by his learning and grace of exposition. Upon the death of Duke William, and at the instigation of the Bishop of Salzburg, much to the chagrin of the faculty of the Academy of Ingolstadt, Salmeron was returned to Verona (24 Sept., 1550). That year he explained the Gospel of St. Matthew. Next year (1551) he was summoned to Rome to help St. Ignatius in working up the Constitutions of the Society. Other work was in store. He was soon (Oct., 1551) sent to Augsburg to inaugurate the Society's first college there, but after a few months was summoned by Ignatius to go back to the Council of Trent as theologian to Julius III. It was during the discussions preliminary to these sessions that Laines and Salmeron, as papal theologians, gave their sota first. When the Council once again suspended its sessions, Salmeron returned to Naples (Oct., 1552). Paul IV sent him to the Augsburg Diet (May, 1555) with the nuncio, Limpompon, and thence into Poland; and later (April, 1556) to Belgium. Another journey to Belgium was undertaken in the capacity of adviser to Cardinal Carafa (Nov. 1557). Laines appointed Salmeron first Provincial of Naples (1558), and vicar-general (1561) during the former's apostolic legation to France. The Council of Trent was again resumed (May, 1562) and a third pontiff, Pius IV, chose Salmeron and Laines for papal theologians. The role was very delicate; the Divine origin of the rights and duties of bishops was to be discussed. During the years 1564–82, Salmeron was engaged chiefly in preaching and writing; he preached every day during eighteen Lenten seasons; his preaching was fervent, learned, and fruitful. His writings during this long period were voluminous; Bellarmine spent five months in Naples reviewing them. Each day he pointed out to Salmeron the portions that were not up to the mark, and the next day the latter brought back those parts corrected.

The chief writings of Salmeron are his sixteen volumes of Scriptural commentaries—eleven on the Gospels, one on the Acts, and four on the Pauline Epistles. Southwell says that these sixteen volumes were printed by Sanchez, Madrid, from 1597 till 1602; in Brescia, 1601; in Cologne, from 1602–04. Sommervogel (Bibliothèque de la C. de J., VII, 470) has traced only twelve editions—the eleven of the Gospels and one of the Pauline commentaries. The Gospel volumes are entitled, “Alfonsi Salmeronis Toletani, e Societate Jesu Theologi, Commentarii in Evangelicam Historiam et in Acta Apostolorum, in duodecim tomos distributi” (Madrid, 1598–1601). The first Cologne edition, together with the second (1612–18), are found complete. These voluminous commentaries are the popular and urgent explications which Salmeron had delivered during his preaching and teaching days. In old age, he gathered his notes together, revised them, and left his volumes ready for posthumous publication by Bartholomew Péres de Nuevos. Grissar (Jacobi Laines Disputationes Trentinae, I, 53) says that many of the Acts is the work of Pérez; Braunsberger (Canisii epist., III, 448) and the editors of “Monumenta Historica B. J.” (Epistola Salmeron, I, xxx) disagree with Grissar. The critical acumen of Salmeron, his judicious study of the Fathers and his knowledge of Holy Writ, make his Scriptural exegesis still worth the attention of students. He was noted for his devotion to the Church, fortitude, prudence, and magnanimity. The Acts of the Council of Trent show that he wielded tremendous influence there by his sota on justification, Holy Eucharist, penance, the liturgy, indulgences, the Sacrament of the Mass, marriage, and the origin of episcopal jurisdiction—all most important questions because of the gradual infiltration of some heretical ideas into a small minority of the hierarchy of that time.

WALTER DRUM.

SALOME.—(1) The daughter of Herod Philip and Herodias (Matt., xiv, 6–8; Mark, vi, 22; cf. Josephus, "Antiq. Jud." XVIII, v, 4), at whose request John the Baptist was beheaded.

(2) One of the holy women present at the Crucifixion, and who visited the tomb on the morning of the Resurrection (Mark, xviii, 14, 15). In Mark xxv, 40, we read: "And there were also women looking on afar off: among whom was Mary Magdalen, and Mary the Mother of James the less and of Joseph, and Salome." The parallel passage of Matthew reads thus: "Among whom was Mary Magdalen, and Mary the Mother of James and Joses, and the mother of Zebedee." (Matt., xxvii, 56.) Comparison of the two gives a well-grounded probability that the Salome of the former is identical with the mother of the son of Zebedee in the latter, who is mentioned also in Matt., xx, 20 sq., in connexion with the petition in favour of her sons. Beyond these references in the Gospel narrative and what may be inferred from them nothing is known of Salome, though some writers conjecture more or less plausibly that she is the sister of the Blessed Virgin mentioned in John, xix, 25.

JAMES F. DRISCOLE.

SALONIKI. See THESSALONICA.

SALT, always used for the seasoning of food and for the preservation of things from corruption, had from very early days a sacred and religious character. The Prophet Elisha enjoined Elishama to make palatable the waters of a well (IV Kings, ii, 19 sqq.). The Oriental used it to cleanse and harden the skin of a newborn child (Eschen., xi, 4); by strewing salt on a piece of land they dedicated it to the gods; in the Jewish Law it was prescribed for the sacrifice, and the leaves of the vine (Lev., ii, 13). In Matt., v, 13, salt symbolises wisdom, though perhaps originally it had an exorcistic signification. Its use
in the Church belongs exclusively to the Roman Rite. The Ritual knows two kinds of salt for liturgical purposes, the baptismal salt and the blessed salt. The former, cleansed by exorcisms and prayers, is given to the catechumens before entering church for baptism. According to the fifth canon of the Third Council of Carthage it would seem that salt was administered to the catechumens several times a year. This use of salt is attested by St. Augustine (Quaest. gen. 1, c. 30, C.P. 8, 40, 72, ed. John the Deacon). St. Isidore of Seville speaks of it (De off., II, xxii), but in the Spanish Church it was not universal. The other salt is exorcised and blessed in the preparation of holy water for the Asperges before high Mass on Sunday and for the use of the faithful in their homes. The present formula of blessing is taken from the Gregorian Sacramentary (P.L., LXXXVIII, 231). Both baptismal salt and blessed salt may be used again without a new blessing. The appendix of the Roman Ritual has a blessing of salt for the use of animals and another in honour of St. Hubert. The Roman Pontifical orders salt to be blessed and mixed in the water (mixed in turn with ashes and wine) for the consecration of a church. This is also from the Gregorian Sacramentary. Again salt (not specially blessed) may be used for purifying the fingers after sacred unctions.

FRANCIS MERRSMAN.

Salta, Diocese of (Saltensis), comprises the civil Province of Salta and Jujuy in the northern part of the Republic of Argentina. It was created on 17 February, 1897, the territory being taken from the ancient Diocese of Cordoba del Tucumán. Until 1896 it comprised also the civil Provinces of Tucumán, Santiago del Estero, and Catamarca, which have recently been detached to form new dioceses. The first Bishop of Salta was Nicolás Videla del Pino, who was succeeded by Fray Buenaventura Ríos Patrón, Monsignor Pablo Padilla y Bárcena, and the present bishop, Mgr. Matías Linares y Sanzetenes. The diocese possesses a handsome cathedral and seminary, and conducts a private printing plant which issues a Catholic daily paper, "Tribuna popular". Religious orders of men are represented by the Redemptorists, who devote themselves to giving missions, the Franciscan Tertiary Order of St. Francis, and the Congregation of Propaganda. The Sisters of the Good Shepherd, of the Garden of Olives, of the Sacred Heart of Jesus, and Franciscan Tertiaries devote their time to teaching, hospital work, and visiting the sick in their own homes.

JULIAN TOSCANO.

Saltillo, Diocese of (Saltillensis), in the Republic of Mexico, suffragan of Linares, or Monterey, as the case may be, is the see of the State of Coahuila (63,728 sq. miles), and its population (1910), 357,652. The city of Saltillo (5190 feet above the sea-level) is the principal residence of the bishop and of the Governor of the State of Coahuila, and, according to above census, has a population of 35,063. This city was founded in 1575 by Francisco Urrutia, and inhabited by the Huachichiles and Borrados Indians of the country, and by Tlaxcaltecas brought by the Spanish. The Franciscan Father Andres de León was one of the first missionaries in this territory in the sixteenth century. In 1827 the name of Saltillo was changed to Ciudad de León. In 1833 the city of the capital was ceded to the Mexican government, and was called Coahuila. This left of that name, but the original name always prevailed. The Franciscan Fathers of the Province of Jalisco had eight missions in Coahuila, which, in 1777, formed part of the See of Linares, or Monterey, and belonged to it until 1891, when Leo XIII erected the See of Saltillo with jurisdiction over the entire State of Coahuila.

This see has a seminary, with 20 students; 26 parochial schools; 10 Catholic colleges, among these that of St. John Nepomucene; they have altogether 3000 pupils, both boys and girls. The Protestants have 10 colleges with 781 pupils, and 33 churches. In the capital, Saltillo, the present cathedral, which was consecrated by the former patriarch of the see, in 1893, the new cathedral, the third in the city of Parras de la Fuente, with a population of 7000, is also notable. It owes its name to the wild grape vines found there by the Conquistadores.

D. Antonio Martín of Sopaza, and Fray Agustín de Espinosa, who founded the city there, 18 Feb., 1592. During the Spanish Inquisition it was the residence of the Jesuit Fathers, who gave many missions and cared for the towns of the famous Laguna. The modern city of Torrón is the most populous of the state; nevertheless it counts but few religious elements.

NOBELA, Geografía de la República Mexicana (Mexico, 1898).

CAMILO CRIVELLI.

Salt Lake, Diocese of (Lacus Salinis), includes the State of Utah, and slightly more than half of the State of Nevada. The State of Utah (with the exception of a rectangular piece in the extreme north-east corner, included within the boundaries of Wyoming), forms a parallelogram, which has a length of 350 miles north and south, and an extreme width of nearly 300 miles. Embraced within the boundaries of the state is a total area of 84,970 square miles, of which 2,790 square miles is water surface, leaving a land area of 82,180 square miles. Nevada has a total area of 110,700 square miles and of this area 71,578 square miles belongs to the Diocese of Salt Lake, viz., the Counties of Elko, Lander, Eureka, White Pine, Lincoln, and Nye, a group of counties in the eastern part of the state. This westerly boundary of the diocese, beginning at the extreme north-west corner of Elko County on the state line between Nevada and Oregon and two miles west of 117° W. long., follows south along a line parallel to this meridian for a distance of one hundred miles to the Battle Mountains, when it turns abruptly to the west, along the northerly slope of the mountains for a short distance, and then follows a south-westerly line to a point a little south of 40° N. lat. From here it continues south along an irregular line, skirting the western slope of the Shoshone Range, and thence, by an abrupt turn to the left, along a line parallel to the boundary between Nevada and California, it goes back 45 long., which it again closely follows across the Ralston and Amargosa deserts to the southern boundary of the state. This part of the diocese lies within the Great Basin, except an area of about 12,000 square miles located in the extreme southerly end, the drainage from which flows into the Colorado River.

Bound on the north by the States of Wyoming, Idaho, and Oregon, on the west by the western part of Nevada, on the south by California and Arizone, and on the east by Colorado, the Diocese of Salt Lake extends from 109° to 117° W. long., and from 35° to 42° N. lat. This is an immense territory, sparsely settled, made up of mountains, deserts, sheep ranges, arable valleys, and alluvial lands. The Catholic population is found largely in mining camps, along railroad sections, in Salt Lake City, Ogden, and Park City. The region embraced by the diocese is overwhelmingly Mormon. In 1886 all the territory now included within the boundaries of the diocese constituted a vicariate Apostolic, and the Rev. Lawrence Scanlan, the missionary then in charge, was raised to the episcopate and the vicariate committed to his care. In 1891 the vicariate Apostolic was erected into a diocese, and the Right Rev.
Salto, Diocese of (Saltensis), in Uruguay, suffragan to Montevideo. This diocese with that of Melo was erected by Pope Leo XIII by his Brief of 19 April, 1897, on the petition of the Bishop of Montevideo and with the consent of the Uruguayan Government. Montevideo was raised to the archiepiscopal rank and two titular bishops were named to assist the new archbishop. However, owing to unfavourable political conditions, no appointments to the new see were made until November 1911. The Diocese of Salto comprises the north-western portion of the Republic of Uruguay (see the Ecclesiastical Map of South America in Catholic Encyclopedia, III), including the departments of Río Negro, Paysandú, Salto, Artigas and Tacuarembó, with an area of 14,878 square miles and a population of about 197,000 inhabitants. The town of Salto (population 12,000) is situated on the Rio de la Plata opposite Concordia in Argentina. It has a large export trade, and is in communication with both Montevideo and Buenos Aires, by boat and rail. Paysandú (population 18,000) is also a busy commercial centre, the neighbouring region being extensively devoted to stock-raising. It contains a hospital and two churches.
Receiving the habit of the Jesuit Order in Genoa, he sailed for Mexico in 1875, and on arriving in that country continued his studies. Shortly after, he was assigned to a college in the province of Puebla. Declining a position in the cathedral, he received permission to devote himself to the conversion of the Indians and, in June, 1880, set out for the still unconquered and defiant Tarumi (q.v.) in the wild mountain defiles of southwestern Chihuahua. Among these, and their neighbours, the Tubar, Guassar, and others, he laboured for ten years, establishing or having charge of several missions, baptizing whole bands, winning the affection of the wild tribes, and, alone, holding them quiet, when all around were in murderous revolt. In 1890 he was appointed superior of the missions of the northwestern district. Soon afterwards, through conversations with the missionary explorer, Father Eusebio Kino, he conceived an intense desire for the evangelization of Lower California, for which undertaking official authority was finally granted in 1897, all expense to be at the cost of the missionaries. In the organization and later conduct of the work his chief collaborator was Father Juan Ugarte. The contributions for this purpose, by generous donors, formed the basis of the historic fondo piadoso, or Pious Fund, of California (q.v.; for so much conflict with powerful neighbours, chiefly the Counts of Savoy.

Tommaso III, a vassal of France, wrote the romance “Le chevalier errant”, which Ludovico (1416-75) was a wise and virtuous prince. Ludovico II constructed a tunnel, no longer in use, through the Montiaco, a remarkable work for the time. With the help of the French he resisted a vigorous siege by the Duke of Savoy in 1486, but in 1487 yielded and retired to France where he wrote “L'art de la chevalerie sous Vegèce” (1488), a treatise on good government, and other works on military affairs. He was a patron of clerics and authors. In 1489 he regained power. After long struggles for independence, this small state was occupied (1548) by the French, as a fief of the Crown. In 1588 Carlo Emmanuele I of Savoy took possession of it. Thenceforward the city shared the destinies of Piedmont with which it formed “one of the keys of the house” of Savoy. Savoy was formed an independent principality in 1559 by the treaty of Turin. Julius II in 1511 made it a diocese immediately dependent on the Holy See. The first bishop was Gianantonio della Rovere, who after eight months resigned in favour of his brother Sisto, later a cardinal. Other bishops were: Filippo Acciaioli (1418), celebrated; Benedito Antonio Pioch (1583) a learned and pious man, founder of the seminary; he was succeeded by St. Giovenale Ancina (1597-1604) of the Oratory of St. Philip, the apostle of Corsica; Francesco Agostino della Chiesa (1642); Carlo Gius. Morosso (1888), who had built the high altar of the cathedral. The diocese, since 1805, has been suffragan of Turin; it contains 91 parishes with 170,000 inhabitants; 300 secular and 30 regular priests; 31 religious houses; 4 institutes for boys and 3 for girls; and has a Catholic newspaper.

Salvador, Rudesindus. See New Norcia.

Salvaterra, Juan Maria, b. at Milan, 15 November, 1648; d. at Guadalajara, 17 July, 1717. His family was of Spanish origin, the name being written originally Diego, and often sounding like it among the Jesuit college of Parma, he accidentally came across a book upon the Indian missions. It so impressed him that he at once determined to give his life to the same work, although his parents had destined him for marriage with a lady of high rank.
Salvation, in Greek ἁλληλούα, in Hebrew יְשׁוֹעַ, has in Scriptural language the general meaning of liberation from straitened circumstances or from other evils and of a translation into a state of freedom and security (I Kings, xi, 13; xiv, 45; II Kings, xxiii, 10; IV Kings, xiii, 17). At times it expresses God’s help against Israel’s enemies, at other times, the Divine blessing bestowed on the people of God (Isa., xxiv, 8). As sin is the greatest evil, being the root and source of all evil, Sacred Scripture uses the word “salvation” mainly in the sense of liberation of the human race or of individual man from sin and its consequences. We shall first consider the salvation of the human race, and then salvation as it is verified in the individual man.

I. SALVATION OF THE HUMAN RACE.—We need not dwell upon the possibility of the salvation of mankind, or upon its appropriateness. Nor need we remind the reader that after God had freely determined to save his own race, He ought to have done so in the person of his own son, without his having recourse to the Incarnation of the Second Person of the Most Holy Trinity. Still, the Incarnation of the Word was the most fitting means for the salvation of man, and was even necessary, in case God claimed full satisfaction for the injury done to him by sin (see INCARNATION). Though the office of Saviour is really one, it is virtually multiple: there must be an atonement for sin and damnation, an establishment of the truth so as to overcome human ignorance and error, a perennial source of spiritual strength aiding man in his struggle against weakness and concupiscence. There can be no doubt that Jesus Christ really fulfilled these three functions, that He therefore really saved mankind from sin and its consequences. As teacher He established the reign of truth; as king He supplied strength to His subjects; as priest He stood between heaven and earth, reconciling sinful man with his Creator.

A. Christ as Teacher.—Prophets had foretold Christ as a teacher of Divine truth: “Behold, I have given him for a witness to the people, for a leader and a master to the Gentiles” (Isa., lv, 4). Christ himself claims the title of teacher repeatedly during the course of His mission: “You shall hear the voice of my servant, whom I shall send to you before the time” (Dan., xii, 6); “You shall hear the voice of the Lord; and you say well, for so I am” (John, xiii, 13; cf. Matt., xxiii, 10; John, iii, 31). The Gospels inform us that nearly the whole of Christ’s public life was devoted to teaching (see Jesus CRUSHER). There can be no doubt as to the supereminence of Christ’s teaching; everything else is an eyewitness to all He reveals; His truthfulness is God’s own veracity; His authority is Divine; His words are the utterances of a Divine person; He has the personal power to prove His teaching by miracles; He can internally illumine and move the minds of His hearers; He is the eternal and infinite wisdom of God Incarnate Who cannot deceive and cannot be deceived.

B. Christ as King.—The royal character of Christ was foretold by the Prophets, announced by the angels, claimed by Christ Himself (Ps. ii, 6; Isa. ix, 6–7; Esch., xxxiv, 23; Jer., xxv, 29; 3 S—Luke, i, 32–33; John, viii, 37). His royal functions are the foundation, the character and the first consummation of the kingdom of God among men. The first and last of these acts are personal and visible acts of the king, but the intermediate function is carried out either invisibly, or by Christ’s visible agents. The practical working of the kingly office of Christ is described in the treatises on the sources of revelation, on grace, on the Church, on the sacraments, and on the last things.

C. Christ as Priest.—The ordinary priest is made God’s own son by an accidental union, Christ is constituted God’s own Son by the substantial union with the Divine nature; the ordinary priest is made holy, though not impenetrable, by his consecration, while Christ is separated from all sin and sinners by the impenetrable union; the ordinary priest has access to God in a very imperfect manner, but Christ is seated at the right hand of the power of God. The Levitical priesthood was temporal, earthly, and carnal in its origin, in its relations to God, in its working, in its power; Christ’s priesthood is eternal, heavenly, and spiritual. The victims offered by the Levitical priests were either lifeless things or, at best, irrational animals distinct from the person of the offerer; Christ offers a victim included in the person of the offerer. His living human flesh, animated by His rational soul, a real and worthy substitute for mankind, on whose behalf Christ offers the sacrifice. The Aaronic priest inflicted an irreparable death on the victim which his sacrificial intention changed into a religious rite or symbol; in Christ’s sacrifice the imputation of the victim is brought about by an internal act of His will (John, x, 17), and the victim’s death is the source of a new life to him and to mankind. Besides, Christ’s sacrifice, being that of a Divine Person, requires its own acceptance with it; it is as much a gift of God to man, as a sacrifice of man to God.

Hence follows the perfection of the salvation wrought by Christ for mankind. On His part Christ offered to God a satisfaction for man’s sin not only sufficient but superabundant (Rom. v, 15–20); on God’s part supposing, what is contained in the very idea of man’s redemption through Christ, that God agreed to accept the work of the Redeemer for the sins of man, He was bound by His promise and His justice to grant the remission of sin to the extent and in the manner intended by Christ. In this way our salvation has won back for us the essential prerogative of the state of original justice, i.e., sanctifying grace, while it will restore the minor prerogatives at the Resurrection. At the same time, it does not at once blot out individual sin, but only procurers the means thereto, and individual sins are not remitted only to the sinner himself, or to the faithful, but extend to all men (I John, ii, 2; I Tim., ii, 1–4). Moreover salvation makes us co-heirs of Christ (Rom., viii, 14–17), a royal priesthood (I Pet., ii, 9; cf. Ex., xix, 6), sons of God, temples of the Holy Ghost (I Cor., iii, 16), and other Christians—Christians alter Mankind. He perfects the angelic virtues, raises the dignity of the material world, and restores all things in Christ (Eph., i, 9–10). By our salvation all things are ours, we are Christ’s, and Christ is God’s (I Cor., iii, 22–23).

II. INDIVIDUAL SALVATION.—The Council of Trent describes the process of salvation from sin in the case of an adult with good intentions (Sess. VI, v–vi). It begins with the grace of God which touches a sinner’s heart, and calls him to repentance. This grace cannot be merited; it proceeds solely from the love and mercy of God. Man may receive or reject this inspiration of God, he may turn to God or remain in sin. Grace does not constrain man’s free will. Thus assisted the sinner is disposed for salvation from sin; he believes in the revelation and promises of God, he fears God’s justice, hopes in his mercy, trusts that God will be merciful to him for Christ’s sake, begins to love God as the source of all justice, hates and detests his sins. This disposition is followed by justification itself, which consists not in the mere remission of sins, but in the sanctification and renewal of the inner man by the voluntary reception of God’s grace and gifts, whence a man becomes just instead of unjust, a friend instead of a foe and an heir according
to hope of eternal life. This change happens either by reason of a perfect act of charity elicited by a well disposed sinner or by virtue of the Sacrament either of the Infancy or of the Famine. The mortification of the respective subject laden with sin. The Council further indicates the causes of this change. By the merit of the Most Holy Passion through the Holy Spirit, the charity of God is shed abroad in the hearts of those who are justified.

Psalms and Canticles of various times and sects we must hold that the initial grace is truly gratuitous and supernatural; that the human will remains free under the influence of this grace; that man really co-operates in his personal salvation from sin; that by justification man is really made just, and not merely declared or reputed so; that justification and sanctification are only two aspects of the same thing, and not ontologically and chronologically distinct realities; that justification excludes all mortal sin from the soul, so that the just man is no way liable to the sentence of death at God’s judgment-seat. Other points are of consequence in the following process of personal salvation from sin are matters of discussion among Catholic theologians; such are, for instance, the precise nature of initial grace, the manner in which grace and free will work together, the precise nature of the fear and the love disposing the sinner for justification, the manner in which sacraments cause sanctifying graces. But these questions are treated in other articles dealing ex professo with the respective subjects. The same is true of final perseverance without which personal salvation from sin is not permanently secure.

What has been said applies to the salvation of adults; children and those permanently deprived of their use of reason are saved by the Sacrament of Baptism.

A number of questions briefly touched upon in this article are more fully elaborated under the respective entries in the volumes of the Catholic Encyclopedia. Wilhelm and Scannell, Manual of Catholic Theology, II (London, 1896), 45-56, 181-205, 345-56; Hutter, Outlines of Dogmatic Theology (New York, 1896), II, 630 sqq.; III, 112-42. All the modern theological works on Redemption and Justification. Among the older works may be mentioned: Lombard, II, dist. 26-29, with Commentaries of St. Thomas, Saint Bonaventure, and Estius; III, dist. 1, with Commentaries of St. Thomas, Saint Bonaventure, Saint of Scots, Denis the Carthusian, and Estius; Saint Thomas, Summa, I-II, QQ. six-cvii, with Commentaries of Sylvester, Generalis et Summ.; S. Albert, III, Q. i-ii, with Commentaries of Media, Sylvester, Gonet, Salmanticensis, Valentina, Tanner, Vanbrugh, Lugo, Ragusa, Staini.

A. J. MAAS.

SALVATORS. See Divine Saviour, Society of the.

Salve Mundi Salutare, a poem in honour of the various members of Christ on the Cross. A fifteenth-century MSS. ascribes it to St. Bonaventure, and Daniel thinks that this "inspired singer of the Cross" could well have composed it. The commonest ascription is to St. Bernard, and Truchfels thinks that this and other poems were "judged away from him on very slight and insufficient grounds by Mabillon," who places the hymn among the spurious (alia et suppositiva) works of the saint (P. L., CLXXXIV, 1319-24). Although the saint died in 1153, and no MS. of the hymn antedates the fourteenth century, Daniel favours the ascription of two of the cantos to the saint. Mone judged the hymn of French origin, and declared that all hope of restoring the text correctly lay in the future discovery of French MSS. This task was attempted by M. Hauréau ("Poèmes latinae attitués à Saint Bernard," Rev. R. 1870, pp. 70-73), who, finding it in only three MSS. (two in Paris, one at Grenoble), all of the fifteenth century, thinks it incredible that the hymn should have been composed by St. Bernard.

It is divided into seven cantos, headed respectively: "Ad Pedes," "Ad Genus," "Ad Manus," "Ad Latus," "Ad Pectus," "Ad Cor," "Ad Faciem" (To the Feet, Knees, Hands, Side, Breast, Heart, Face). Each canto contains five stanzas of ten lines each, except the part "Ad Cor," which has only seven. The MSS. give many variant texts and many additional titles (as "To the Mouth," "Shoulders," "Ears," "the Scourging," "the Crowning"). Mone accepts only four cantos (To the Feet, Knees, Hand, Side) as original. Daniel accepts but two original stanzas (those addressed to the Head), but not their titles, which he believes of later coinage. He thinks the oldest text is found in a Lichenthal MS. (fifteenth century) containing only the cantos beginning "Salve mundi salutare" and "Salve, salve rex sanctorum," under the "probably true" title of "Planetus super passionem Domini". However, he says, "reads the first hymn carefully, must see that it concerns the whole form of Christ suffering, and that the feet are mentioned for the sole reason that the poet places himself at the foot of the cross, prostrate and embracing the feet of the Saviour. The second poem, also, deals with the Passion generally, and only once, and passively, alludes to the knees." He attributes both the titles and the elaborations to the fourteenth and fifteenth centuries, when the devotion to the Five Wounds was growing. "Then the verses of Bernard offered convenient warps or threads which might be woven between the lines of devotion to the Cross itself."
The first lines of the cantos are: 1. Salve mundi salutare (Ad Pedes); 2. Salve Jesu, Rex sanctorum (Ad Genus); 3. Salve Jesu, pastor bone (Ad Manus); 4. Salve Jesu, summe bonus (Ad Latus); 5. Salve, salus mea, Deus (Ad Pectus); 6. Summi regis cor sermo (Ad Cor); 7. Salve caput cruentatum (Ad Faciem). In St. Bernard's "Opuscula" (Venice, 1495), the seventh canto is addressed "To the Whole Body," and commences: "Salve Jesu reverende." Julian gives the first lines of some translations (by non-Catholics) of all the cantos except three and five, and remarks that "some of the parts have suffered from neglect," and that "this should be remedied by an able translator." In the second edition of the "Dict. of Hymnology," he refers to the translation of Mrs. E. M. Shapooe (a convert to Catholicism) and gives this translation: "Salve Mundi Salutare." Shapooe's version was published in the "Rosary Magazine" (1877 and 1878) and re-published by Burns and Oates, London, 1879; its title is: "A Rhythmic Prayer to the Sacred Members of Jesus Hanging upon the Cross." The stanzaic form is that used by Mrs. Shapooe in one of her latest works, the Perfect Woman (Manresa Press, 1903), and may be illustrated by the first stanza of canto 5 (To the Breast):

O God of my Salvation, hail to Thee;
O Jesus, Sweetest Love, all hail to Thee;
O Venerable Breast, I worship Thee;
O Dwelling-place of Grace, I fly to Thee;
With trembling touch adore and worship Thee.

A different arrangement of the poem, found in Horst's "Paradisus animae christianae" (1644), has been translated by Canon Oakeley (1850), and (probably) by W. J. Copeland. The first lines of both are given by Julian. The paucity of Catholic translations is doubtless due to the fact that the hymn appears never to have been in liturgical use. However, the Roman Breviary hymn "Jesu dulcis amor meus" (Lauds of the feast of the Most Holy Winding Sheet of Our Lord, assigned to Friday after the second Sunday in Lent) is made up of lines taken, with some alterations, from these cantos. This short poem contains five stanzas of the type: "Jesu, dulcis amor meus" (l. 36); "As si preses sis, accedo" (l. 6); "Te complector cum affectu" (l. 13); "Tuorum memnor vulnerum" (l. 15). The following stanzas comprise lines 8, 97, (7), 65, 321 (Salve capit
Salve Regina, the opening words (used as a title) of the most celebrated of the four Breivary anthems of the Blessed Virgin Mary. It is said from the First Vespers of Trinity Sunday until None of the Saturday before Ascension. It is an exception in the Roman Breviary. "Dict. de liturgie" (a. v.), namely that the rite of Châlons-sur-Marne assigns it from the Purification B. M. V. until Holy Thursday. Another variation, peculiar to the cathedral of Speyer (where it is chanted solemnly every day "in honour of St. Bernard"), may have been based on either of two legends connecting the anthem with the saint of Clairvaux. One legend relates that, while the saint was acting as legate Apostolic in Germany, he entered (Christmas Eve, 1146) the cathedral to the processional chanting of the anthem, and, as the words "O clemens, O pia, O dulcis Virgo Maria" were being sung, genuflected thrice. According to the more common narrative, however, the saint added the triple invocation for the first time, moved thereto by a sudden inspiration. "Plates of brass were laid down in the pavement of the church, to mark the footsteps of the man of God through the place, and the impression made on them is said to have impressed the clemency, the mercy, and the sweetness of the Blessed Virgin Mary." (Ratisonne, "Life and Times of St. Bernard," American ed., 1855, p. 381, where fuller details are given). It may be said in passing that the legend is rendered very doubtful by the fact that the anthem originally appeared in the sixteenth century, and relates a fact of the twelfth; (b) the silence of contemporaries and of the saint's companions is of some significance; (c) the musical argument, as illustrated by Jean de Valois ("Le Salve Regina dans l'art sacré" in "Le Tribunale de Saint-Germain," May, 1807, p. 109) suggests a single author of both the anthem and its concluding words.

The authorship is now generally ascribed to Hermann Contractus (q. v.). Durandus, in his "Rationale," ascribed it to Petrus of Monsoro (d. about 1080), Bishop of Compostella. It has also been attributed to Richard de Magna (or Velay), whence it has been styled "Antiphona de Pudio" (Anthem of Le Puy). Adhémar was the first to ask permission to go on the crusade, and the first to receive the cross from Pope Urban II. Before his departure, towards the end of October, 1095, he composed the war-song of the crusade, in which he asked the intercession of the Queen of Heaven and the Salve Regina." (Migne, "Dict. des Croisades," s. v. Adhémar). He is said to have said the monks of Cluny to admit it into their office, but no trace of its use in Cluny is known before the time of Peter the Venerable, who decreed (about 1135) that the anthem should be sung processionally on certain feasts. Perhaps St. Bernard neither composed the prayer nor introduced it, nor because of the example of Cluny, or because of St. Bernard's devotion to the Mother of God (the saint was diligent in spreading a love for the anthem, and many pilgrim-shrines claim him as founder of the devotion to it in their locality), it was introduced into Citeaux in the middle of the twelfth century, and down to the seventeenth century when the Magnificat on the feasts of the Purification, Annunciation, and Nativity B. V. M., and for the Benedictus at Lauds of the Assumption. In 1218 the general chapter prescribed its daily processional chanting before the high altar after the Capitulum; in 1225 it enjoined its daily recitation on each of the months; in 1229 it ordered its singing "mediocri voce," together with seven psalms, etc., on every Friday "pro Domino Papa" (Gregory IX had taken refuge in Perugia from Emperor Frederick II), "pro pace Romanae Ecclesiae," etc., etc.—the long list of "intentions" interesting how salutary was this devotion of Our Lady. The use of the anthem at Compline was begun, says Godet ("L'Origine liturgique du Salve Regina," in "Revue du clergé français," 15 August, 1910), by the Dominicans about 1221, and was rapidly propagated by them. Before the middle of that century, it was incorporated with the B. V. M. in the Breviary. It was "modernized" Franciscan Breviary, whence it entered into the Roman Breviary. In Coutelou's "Annales ordinis Cartusianis" (Monteul, 1901) it is said (under the year 1239) that the anthem had been in use in that order (and probably from its foundation) before Gregory IX prescribed its universal use. The Carmelites sing it daily at Vespers (except from the First Sunday of Advent to the Octave of the Epiphany, and from Passion Sunday to Low Sunday) as well as after every hour of the Little Office B. V. M. The Cistercians sang it after Compline from 1251 until the close of the fourteenth century, and have sung it from 1483 until the present day—a daily devotion, except on Holy Thursday and Good Friday. The Carmelites say it after every hour of the Office. Pope Leo XIII prescribed its recitation (6 January, 1884) after every low Mass, together with other prayers—a sound provision for the future.

While the anthem is in sonorous prose, the chant melody divides it into members which, although of unequal syllabic length, were doubtless intended to close with the faint rhythmic effect noticeable when they are set down in divided form:

(1) Salve Regina (Mater misericordiae)
(2) Vita, dulcedo, et spes nostra, salva.
(3) Ad te clamamus, exules filii Hevæ;
(4) Ad te suspiramus gementes et flentes in hac lacrymarum valle.

(5) Et in cœlestia voce vosco, laudescant nos convertite.
(6) Exsultet sanctum ventrem tuum, nobis post hoc exultemus ostende.

O clemens, O pia, O dulcis (Virgo) Maria.

Similarly, Notker Balbulus ended with the (Latin) sound of "E" all the verses of his sequence, "Lausibi Christo" ("Holy Innocents"). Dreves notes that the word "Mater" is also used as a source, but is a late insertion of the sixteenth century ("Annalecta hynmica," L, Leipzig, 1907, p. 319). Similarly, he notes that the word "Virgo" in the last verse seems to date back only to the thirteenth century. Mone (Lateinische Hymnen des Mittelalters, II, 203-14) gives nine Latin hymns based upon this anthem. Daniel (Theaurus hymnologicus, II, 323) gives us the "Annalecta hymnica" gives various transpositions and tropes (e. g. XXXII, 175, 191-92; XLVI, 139-43).
The composers adopt curious forms for the introduction of the text, for example (fourteenth century):
Salve splendid praeipue superne claritatis, 
Regina vincens strenue saeclum impietatis, 
Misericordiae tua munus impende gratis, etc.
The poem has fourteen such stanzae. Another poem, of the fifteenth century, has forty-three four-line stanzae. Another, of the fifteenth century, is more condensed:
Salve nobilis regina 
pons misericordiae, etc.
A feature of these is their apparent preference for the briefer formula, "O olemens, O pia, O dulcis Maria."

The anthem figured largely in the evening devotions of the confraternity and guilds which were formed in great numbers about the beginning of the sixteenth century. "In France, this service was commonly known as a Salut, in the Low Countries as the Lof, in England and Germany simply as the Salve. Now it seems certain that our present Benedictine service has resulted from the general adoption of this evening singing of canticles before the statue of Our Lady, enhanced as it often came to be in the course of the sixteenth and seventeenth centuries by the exposition of the Blessed Sacrament, which was employed at first only as an adjunct to lend it additional solemnity."

This highly interesting view of Father Thurston (see Benedictinum of the Blessed Sacrament for some elaboration) is developed in his articles on the "Benediction of the Blessed Sacrament" ("Month", June, July, Aug., Sept., 1901) and "Our English Benedictine Service" (ibid., Oct., 1905). Luther complained that the anthem was sung everywhere throughout the world, that the great bells of the churches were rung in its honour, etc. He objected especially to the words "Queen of mercy, our life, our sweetness, our hope"; but Daniel (II, 322) points out that the language of devotion is not that of dogmas, and notes that some Protestants, unwilling that it should disappear from Lutheran churches, reconstructed it "evangelically". Balmus gave the melody in an ornate and in a simple form, together with a setting which it described as being in the eleventh tone, and which is also very beautiful. An insistent echo of this last setting is found in the plainsong of St. Alban's "Stupere gentes" (see "Recueil complet des hymnes etc."). Dijon, 1845, p. 174. There are many settings by polyphonic and modern composers. Pergolesi's (for one voice, with two violins, viola, and organ) was written shortly before his death; it is placed among his "happiest inspirations", is deemed his "greatest triumph in the direction of Church music" and "unsurpassed in purity of style, and pathetic, touching expression".

The Vesper hymn of the feast, "Festivis resonant cornua vocibus", comprising seven Asclepiadastic stanzae, and the Matins hymn, "Ira justa conditoris imbre aquarum vindice", comprising six stanzae, have been translated by Caswall (Lyra Catholica, pp. 83, 85), Bagshawe (loc. cit., Nos. 95–6), Donahoe (loc. cit., pp. 246–92). The latter was translated by Potter (Annus Sanctus, Part I, p. 85), and the Matins hymn by O'Connor (Arundel Hymns, etc., 1902, No. 80), and by Henry (Sursum Corda, 1907, p. 5).

H. T. HENRY.

Salvete Christi Vultuera, the Roman Breviary hymn at Lauds of the feast of the Most Precious Blood, is found in the Appendix to Parn Verna of the Roman Breviary (Venice, 1798). The office, added since 1735, was in some dioceses a commemorative Lenten feast, and is still thus found assigned to Friday after the fourth Sunday of Lent with rite for double. Pius X applied it to the regular feasts of the Breviary and assigned it to the first Sunday of July (double of the second class). In the fact that the feast was thus established generally after the pope's return from Gera, Faber sees an "historical monument of a vicissitude of the Holy See, a protest against the deum for a deliverance of the Vicar of Christ" (The Precious Blood, p. 334, Amer. ed.). The hymn comprises eight Ambrosian stanzae in classical iambic dimeter verse together with a proper doxology:

Salve regina, etc.

H. T. HENRY.

Salvete Flores Martyrum. See Quicumque Christum Queritis. Christ is your mediator. See SASOPORETO.
Salvianus, a Latin writer of Gaul, who lived in the fifth century. Born of Christian parents, he married a pagan woman named Palladis, who was converted together with her parents; husband and wife resolved to live thenceforth in continence. About 450 Salvianus became one of the few bishops directed by Hildebrand. Gennadius speaks of him as a priest of the Church of Marseilles. He lived and wrote in the South of Gaul. He was probably a native of the Roman Germans—of Trier, according to a conjecture of Halm (De gub., VI, xii, 72). He travelled in Gaul and in Africa. In his extant writings he does not relate the events of his life. His most famous work, extant in Greek and Latin, is the battle of Châlons (451).

Of the numerous works mentioned by Gennadius (De viris, lxvii) there remain only nine letters and two treatises: “Ad ecclesiam adversum avaritiam” and “De gubernatione Dei” or “De presenti judicio”. The fourth is one of his most interesting letters; in it he explains to his recently-converted parents-in-law the decision reached by him and his wife to observe continence. In the ninth he justifies to Solonius his use of a pseudonym in his first writing. He issued the treatise “De ecclesia” under the name of Solonius. The only extant work of this character is the book “Liber ad Constantium”, which makes the Church their heir. The “De gubernatione Dei”, in eight books was written after 439 (VII, x, 40). He endeavoured to prove a Divine explanation of the barbarian invasions. With the orthodox but depraved Romans he contrasts the barbarians, infidels or Arians, but virtuous. The passage places Salvianus in the ranks of the Latin moralists, who from the “Germania” of Tacitus down, show to their corrupt compatriots an ideal of justice and virtue among the Germans. The work, dedicated to Bishop Salomius, a disciple of Lerinum, is unfinished and seems to have appeared in fragments; Gennadius knew only five books.

Salvianus is a careful writer, much resembling Lactantius, but his style is strongly influenced by the rhetoricians, and its prolixity renders it wearisome. The same influence doubtless explains the exaggeration of his ideas on the necessity of giving all his goods to the Church and the antithesis of Roman corruption and German virtue. The “De gubernatione Dei” contains interesting pictures of manners, but all must not be taken literally. Salvianus speaks as an advocate and in doing so forces the tone, palliating what goes against his case and bringing out in the strongest light of the Society of the time by his pictures is to risk making mistakes. Apart from his style, Salvianus is not highly cultured. He has some slight knowledge of law; he is ignorant enough to attribute Plato’s “Republic” to Socrates (De gub., VII, xxii, 101). There are two extant editions of his works: Halm in “Monumenta Germania” (Berlin, 1877) and Pauly in “ Corpus script. ecclesiastico-rur. latinorum” (Vienna, 1883).

Paul Lejay

SALZBURG, ARCHDIOCESE OF (SALZBURGENSIA), conterminous with the Austrian crown-land of the same name. The Romans appeared in the lands south of the Danube under Emperor Augustus, laid out roads, founded towns, and turned the country into a province. Salzburg belonged to Noricum. Christianity was introduced by individual colonists, artisans, and soldiers; St. Maximilian, Bishop of Laeracum (Lorch), is mentioned as the first martyr of Noricum during the era of the persecutions. Although Constantinople had not participated in the mission of the Church, the Romanized territory was subsequently exposed on all sides to the attacks of barbarian peoples, and the last representative of Roman civilization in Noricum was St. Severus (d. 482). He visited Cucullus (Kuchel near Hallein) and Juvavum (Salzburg), where he found a church already established and witnessed the martyrdom of the priest, his disciple Maximus. His apocatastasis was “the last ray before utter darkness”; the whole territory was soon devastated by barbarian tribes, and it was only about 700 that Christian civilization again made its appearance. St. Rupert, Bishop of Worms, baptized Duke Theodo of Bavaria, erected at Waldsee a church in honour of St. Peter, and made Juvavum, which he founded, the seat of the episcopate. With brambles, his episcopal seat. The cathedral monastery was also named after St. Peter, and Rupert’s niece, Avendrid, founded the convent of Bonmont. St. Boniface completed the work of St. Rupert, placed the Diocese of Salzburg under the Primatial See of Mainz, and substituted the Bene-dictines for the Irish monks in St. Peter’s. He had a dispute with their abbot-bishop Virgil concerning the existence of the antipodes. Virgil dispatched the reginary bishop Modestus to Carinthia, of which the latter became the apostle. Under Virgil the and—“Liber ad Constantium”, or confraternity book of St. Peter’s, was begun.

Arno, the successor of Virgil, enjoyed the respect of Charlemagne, who, after overthrowing the Avars, assigned to him as his missionary territory all the land between the Danube, the Raab, and the Drave. While Arno was at Rome attending to some business for Charlemagne, Leo III appointed him archbishop over the bishops of Bavaria. When the dispute concerning the delimitation of their ecclesiastical provinces broke out between Aquileia and Salzburg, Charlemagne declared the Drave the boundary. The dignity of the archbishops as territorial ecclesiastics must be also attributed to Charlemagne. Arno took advantage of the intellectual life at the court of the great emperor to have manuscripts copied in 150 volumes, thus forming the oldest library in Austria. The efforts of Duke Wratiales of Moravia to withdraw his territory from the ecclesiastical influence of the Germans prepared great trouble for Archbishop Adalwin. Adrian II appointed Methodius Archbishop of Pannonia and Moravia; it was only when Wratiales had fallen into the hands of Louis the German that Adalwin could protest effectually against the invasion of his rights. Methodius appeared at the election of St. Ursula in the face, and was kept in close confinement for two and a half years. To the endeavours of the archbishop to demonstrate to the pope the justice of his claim we are indebted for the important work, “De conversione Bulgarorum et Querantontum liber unus”. However, Wratiales was compelled to release Archbishop Methodius at the command of the pope. Darkness once more settled on the land, when the Magyars ravaged the great Moravian Empire; not a church remained standing in Pannonia, as the bishops informed the pope, and Archbishop Thaddæus fell in battle. After the return of Bruno of Cologne, the “bishop-maker”, consecrated Friedrich for Salzburg, who in turn consecrated St.
Wolfgang Bishop of Ratibon. Friedrich declared the monastery of St. Peter independent. In 996 Archbishop Hartwik received the right to coin money; in the presence of Saint Henry II and his spouse Kunigunde, the archbishop consecrated the church on the Nonnberg. When St. Hemma, Countess of Friesack, founded the convent of Gurk in 1042, the first abbeys, Ida, was chosen from Nonnberg. In Salzburg the noble tendencies and great principles of the age of Gregory VII and his immediate successors, aiming at the sanctification of the Church, the success of the Crusades, the fostering of religious life among the people, and the development of monastic life, were always encouraged. The first archbishop of this period was Gebhard. Three students had set out for Paris to study philosophy and theology; during a night spent in a forest glade near a spring, they confided to one another their ideals for the future—each wished to become a bishop, and each vowed in this contingency the founding of a monastery. Their hopes were gratified: Adalbert became Bishop of Wurzburg and founded Lambach in Upper Austria; St. Altmann of Passau founded Gotoweg for twelve canons, who were replaced twelve years later by Benedictines from St. Blasien in the Black Forest; Gebhard founded Admont (1074) and the Diocese of Gurk (1072). These bishops were the mainstays of the "cause of St. Peter" in Germany. They held aloof from the Synod of Worms to which Henry IV summoned the bishops and abbots to declare their opposition to the pope. Henry therefore named an anti-bishop for Salzburg, Bertold of Moosburg, and Gebhard had to endure an exile of nine years; shortly before his death he was able to return, and was buried at Admont (1085).

His successor Theimo consecrated the church and monastery of St. Paul in Carinthia. Defeated by the royal bishop, Bertold, he was kept in strict confinement for five years at Freisach; scarcely had he recovered his liberty when he joined in the crusade of Guelph of Bavaria, was again thrown into prison, and suffered a horrible martyrdom (1102). On the abdication of Henry IV, Count Conrad I of Abensberg was elected archbishop; Conrad accompanied Henry V to Rome, when he went thither to receive imperial coronation. Pascalinus and Henry came to an agreement according to which the Church should renounce all claim to the imperial fiefs, and the emperor all claim to investiture. When this condition, on which the coronation was to take place 12 February, 1111, became known, the German bishops and even the secular nobility protested against it, fearing lest by an onslaught on all the imperial fiefs the king should make his power absolute. The pope was held in confinement, the priests robbed of their rich vestments, the church plate, and even the buckles of their shoes. When the archbishop complained of this treatment, a German knight threatened to cleave his head in twain. His dignified bearing rendering it impossible to maintain his position in Salzburg, he lived an exile until the investiture strife was definitively settled by the Concordat of 1122. Not only in the spiritual field did he devote all his energy to his diocese; he replaced the secular clergy at the cathedral by Augustinian Canons, whose rule he himself adopted in 1122, and established a conven of canonsesses. At Seckau he established the canons, and appointed the celebrated Gerhord provost of Reichenberg. He meanwhile granted established convents, such as Bethlehem (Georgenberg, Flechtl), Cistercians (Viechtren in Carinthia), Premonstratensians (Wilton near Innbruck). The Church of St. Peter was also rebuilt in Romanesque style; while previously the monks of St. Peter's had elected the archbishop, they abdicated this right in favour of the canons by the agreement of 1159 between the abbot and archbishop.

In the first contest between the papacy and empire during the Hohenstaufen period, the archbishops of Salzburg had taken the side of the Guelphs. When, in 1159, Frederick I declared in favour of Victor IV, the creation of two Ghibelline cardinals against Alexander III, Archbishop Eberhard I, Count of Hildburghausen, steedily supported Alexander. Barbarossa left him in peaceful possession of his see until his death. However, his successor, Conrad II, son of Leopold III the Pious, aroused Frederick's anger, and died a fugitive at Admont in 1168. Barbarossa now stood at the acme of his fortune. He opposed to Archbishop Adalbert, son of King Wladislaus II of Bohemia, as anti-bishop Provost Henry of Berchtesgaden; however, at the Diet of Venice (1177) "the last great diet of the Middle Ages", at which pope and emperor exchanged embraces—it was agreed that both bishops should abdicate, and that Conrad III of Wittelsbach should receive the archbishopric of Mainz, through Conrad the archbishops of Salzburg received the rank of legate Apostolic throughout the whole ecclesiastical province of Carinthia, and thus the dignity of cardinal. On Conrad's death Adalbert again succeeded to the archiepiscopate. On account of his excessive strictness he was confined in the castle of Werfen for fourteen years by his own officials. When Frederick II adopted the policy of his father in a still more exaggerated form, and was consequently excommunicated by Gregory IX, Archbishop Eberhard II of Regensburg (Switzerland) and his friend Duke Leopold VI brought about the Peace of San Germano (1230). The Christian leaders met at Anagni, whither the archbishop also came, but the duke died on the way to the meeting. The archbishop consecrated the monastery of Lilienfeld, founded by the duke, and interred him there. Meanwhile the zealous archbishop had created within his territory three new dioceses to give increased efficiency to the care of souls: Chiemsee (1216), Seckau (1218), St. Andrew's in the Lavanttal (1225). For these dioceses he appointed Henry V, who consecrated Frederick and relieved him of his empire, Eberhard also incurred excommunication. When he died suddenly the following year, still under the ban, his body was buried in an annex of the parish church of Radstadt, but forty years later it was transferred to consecrated ground in Salzburg cathedral.
During the Austrian, and the almost simultaneous German, interregna Salzburg shared in the general confusion, and had its anti-bishop. Archbishop Philip, Count of Ortstein, was a more warlike than the more peacefully inclined Ottaar favoured by the pope. The decree of Alexander IV that each bishop-elect must be consecrated by the cardinal immediately, as he paid no attention, Bishop Ulrich of Seckau was appointed in his place, and finally he himself was excommunicated and Salzburg placed under an interdict. The people thereupon drove Philip out and invited Ulrich to enter into possession; as, however, the latter died soon after, the episcopal see was vacant, the people were now free to choose as bishop Elector Friedrich of Hoheneck and Conrad IV of Praешner. Throughout the whole series of years and on all important occasions including the investiture of his sons, Albert and Rudolph, with Austria, Styria, Krain, and the Wendish March (27 December, 1280), Archbishop Frederick II of Walchen (Pinzgau) was a faithful supporter of Rudolph, and must therefore be named among the founders of Habsburg rule in Austria. Human inclinations and alliances are subject to rapid change. Rudolph's son, Duke Albert I of Austria, engaged in an almost uninterrupted feud for ten years with Archbishops Rudolph of Hoheneck and Conrad IV of Praitzenfriet. Repeatedly the armies stood opposed to each other that "one could see the white in his opponents' eyes"; several towns were demolished (Friessach). The mischievous Abbot Henry of Admont, who enjoyed Albert's confidence; no sooner had this warlike cleric met death from an arrow-wound received in the chase, than duke and archbishop found themselves on terms of peace and friendship (1297). During the succeeding period German history is dominated by the conflicts of the houses of Wittelsbach and Habsburg. The people of Salzburg remained true to the Habsburgs. During the struggle for the throne between the Bavarians and the Carinthians, and the partition of the Habsburgs, Archbishop Frederick III of Leibnitz was declared an outlaw. During the seventy years' residence of the popes in Avignon subsequent to 1300, the archbishops had to proceed thither to receive the pallium. When, in 1347, the frightful plague known as the Black Death swept through Salzburg, the Jews there were accused of poisoning the wells and subjected to cruel persecution. In imitation of the confederated towns in Germany, five towns in the territory of Salzburg formed the Igelbund (1403). They presented to the new archbishop, Eberhard III of Neuburg, an election capitation in writing, in an instrument which was surrounded with their seals as a boar (Igel) with bristles, the redress of their grievances (taxes). Already the Jews had been widely accused of stabbing consecrated Hosts, which, it was said, were subsequently discovered emitting blood (Lower Austria and Carinthia). As similar depositions were declared to have taken place in Salzburg, the Jews were banished in 1404 and a synodal ordinance declared a little later that they should be distinguishable by a pointed hat. During the Western Schism the attitude of the archbishops towards the popes varied. Archbishop Pflizer II of Puchheim at first supported the Roman pope, Urban VI, but subsequently espoused the cause of the Avignon pontiff, Clement VII. His successor, Gregory of Osterwitz, also obtained the pallium from Boniface IX at Rome. When Gregory XII was pope at Rome and Benedict XIII at Avignon, the cardinals of both parties, wishing to end the Schism, summoned the Council of Pisa (1409). The cardinals were divided into two parties, and elected Alexander V supreme pontiff, but, as the earlier popes refused to abdicate, there were now three popes. Archbishop Eberhard III supported the Pisan pope, John XXIII. In his affectionate care for the Church, King Sigismund associated himself with John in convening the General Council of Constance, but was also the more warlike than the more peaceable at the expense of Jerome of Prague. In 1428 Eberhard convened a great provincial synod of his bishops, the superiors of religious orders, and deputies of the University of Pisa; at this council by deposing both popes, and renewing the annual regulations were renewed, and new measures adopted for the revival of ecclesiastical life. In the next year a provincial synod was again held. As the heresy of Wyclif and Hus threatened to infect the people, it was decreed that no one should perjure himself, or go in the company of heretics; on the contrary, he should be denounced to the people. Dukes, counts, etc. were to imprison all persons suspected of heresy; Jews should wear a cornered hat and their wives should carry attached to their clothing a small bell. The Renaissance epoch was for Salzburg an era of cultural decay, caused by the incompetence of the territorial princes and the bad conditions of Austria under Emperor Frederick IV. The first Renaissance pope, Nicholas V, sent out legates to announce the jubilee indulgences, to promote a crusade against the Turks, and to inaugurate the reform of the clergy. The pope's legate on the Mosel (Joachim) appointed a legate for Germany, held a provincial synod at Salzburg (1451) in which monasteries were directed to return to the observance of the rule within the interval of a year. Three visitors (Abbot Martin von den Schotten, Abbot Lawrence of Mariasell, and Prior Stephen of Melk) visited the Benedictine monasteries of Austria and Bavaria, and in about fifty established uniform obedience to the rule. Under Archibishop Bernhard the political and economic depression of the archdiocese was the deepest. Seeing the Turks ravaging the archiepiscopal lands to the north and west of Augsburg, to the south and east, with ever increasing demands and imposing taxes of various kinds, Bernhard summoned a diet in 1473—the first held in the little archiepiscopal state. He resigned his office but recalled his resignation repeatedly, until finally, five years before his death, in a still abdicating spirit. At the close of this period, Leonhard of Keutschach (d. 1519) revived religious life: with astounding energy he had the burgomasters and town councillors, who were imposing unjust burdens, arrested simultaneously and confined in the castle; all Jews were banished from the land. His closing years were embittered by his suffragan Matthias Lang, who sought to depose him as Bishop of Gurk and cardinal, and aimed at the archiepiscopal see. Lang promised the cathedral chapter (monks) to effect its transformation into a chapter of secular priests, if the canons would recognize him as coadjutor with right of succession. The Bulls of Leo X decreeing these changes were not arrived. In ecclesiastical art, late Gothic ruled at Salzburg, as is gloriously demonstrated in the church on the Nonnberg and its crypts, the Margaretenkapelle in the cemetery of St. Peter, and the Franciscan church with its magnificent vault of networked work first successfully achieved in the Roman pope, Urban VI, and subsequently espoused the cause of the Avignon pontiff, Clement VII. His successor, Gregory of Osterwitz, also obtained the pallium from Boniface IX at Rome. When Gregory XII was pope at Rome and Benedict XIII at Avignon, the cardinals of both parties, wishing to end the Schism, summoned the Council of Pisa (1409). The cardinals were divided into two parties, and elected Alexander V supreme pontiff, but, as the earlier popes refused to abdicate, there were now three popes. Archbishop Eberhard III supported the Pisan pope, John XXIII. In his affectionate care for the Church, King Sigismund associated himself with John in convening the General Council of Constance, but was also the more warlike than the more peaceable at the expense of Jerome of Prague. In 1428 Eberhard convened a great provincial synod of his bishops, the superiors of religious orders, and deputies of the University of Pisa; at this council by deposing both popes, and renewing the annual regulations were renewed, and new measures adopted for the revival of ecclesiastical life. In the next year a provincial synod was again held. As the heresy of Wyclif and Hus threatened to infect the people, it was decreed that no one should perjure himself, or go in the company of heretics; on the contrary, he should be denounced to the people. Dukes, counts, etc. were to imprison all persons suspected of heresy; Jews should wear a cornered hat and their wives should carry attached to their clothing a small bell. The Renaissance epoch was for Salzburg an era of cultural decay, caused by the incompetence of the territorial princes and the bad conditions of Austria under Emperor Frederick IV. The first Renaissance pope, Nicholas V, sent out legates to announce the jubilee indulgences, to promote a crusade against the Turks, and to inaugurate the reform of the clergy. Three visitors (Abbot Martin von den Schotten, Abbot Lawrence of Mariasell, and Prior Stephen of Melk) visited the Benedictine monasteries of Austria and Bavaria, and in about fifty established uniform obedience to the rule. Under Archibishop Bernhard the political and economic depression of the archdiocese was the deepest. Seeing the Turks ravaging the archiepiscopal lands to the north and west of Augsburg, to the south and east, with ever increasing demands and imposing taxes of various kinds, Bernhard summoned a diet in 1473—the first held in the little archiepiscopal state. He resigned his office but recalled his resignation repeatedly, until finally, five years before his death, in a still abdicating spirit. At the close of this period, Leonhard of Keutschach (d. 1519) revived religious life: with astounding energy he had the burgomasters and town councillors, who were imposing unjust burdens, arrested simultaneously and confined in the castle; all Jews were banished from the land. His closing years were embittered by his suffragan Matthias Lang, who sought to depose him as Bishop of Gurk and cardinal, and aimed at the archiepiscopal see. Lang promised the cathedral chapter (monks) to effect its transformation into a chapter of secular priests, if the canons would recognize him as coadjutor with right of succession. The Bulls of Leo X decreeing these changes were not arrived. In ecclesiastical art, late Gothic ruled at Salzburg, as is gloriously demonstrated in the church on the Nonnberg and its crypts, the Margaretenkapelle in the cemetery of St. Peter, and the Franciscan church with its magnificent vault of networked work first successfully achieved in the Roman pope, Urban VI, and subsequently espoused the cause of the Avignon pontiff, Clement VII. His successor, Gregory of Osterwitz, also obtained the pallium from Boniface IX at Rome.
innovations emanating from Wittenberg were insinuating themselves into the archdiocese. Mining was being rapidly developed, and miners arrived from Saxony bringing with them the new doctrines and sectarian books. Lang strove to retain his subjects in the Faith: Luther proclaimed him a “monster”; the people of Salzburg beseeched him in his fortress High on the Lais; the latter, the Low on the Lais. Lang restored neither the church nor the land. Lang was present at the Second Diet of Speyer (1529); and in the following year held lengthy negotiations with Melanchthon at Augsburg. The fact that he involved lay peasantry to the provincial synod of 1537, which it was resolved to send delegates to a general council, created an unpleasant commotion in Rome, since it was feared that this step preasaged the formation of a national Church. In accordance with Ferdinand’s demand for the use of the chalice by the laity in 1564, Pius IV granted this privilege for Germany and the Archdioceses of Gran and Prague; however, as the emperor’s hopes were soon seen to be unfounded, the giving of Communion under both species ceased at Salzburg in 1571. The beneficent effects of the Council of Trent extended also to Salzburg, where, for the execution of Archbishop Lodron’s wishes, a provincial council, summoned in 1569 a provincial council, according to Huthaler the most important of all the synods of Salzburg, since through it “was secured for ever a solid foundation for church reform in this province in accordance with the spirit of the decrees of Trent”. Four years later he again convened a provincial council, especially notable as almost three centuries were to elapse before another provincial council was held in Germany.

The succeeding archbishops by wise moderation preserved their territory from the sufferings of the wars of religion, conducted elsewhere with bloodshed and cruelty. Lang’s successor, Archbishop Ernst, administered the archdiocese for fourteen years as “elected bishop”, although the pope had confirmed his election only on the condition that he should receive episcopal consecration within ten years, and although his brother, Duke William of Bavaria, was a strong contender for the see. During his pontificate Theophrastus Paracelsus (Philip of Hohenheim), the celebrated physician and alchemist, also Berthold, Bishop of Chiemsee, a strict censor of his age (see BERTHOLD OF CHIEMSEE).

After the religious Peace of Augsburg Archbishop Wolf Dietrich (Wolfgang Theodorich) of Raisenau and his successors acted on the policy adopted there (cujus regio, ejus religio), and followed the precedent set by Protestant princes, when they gave their subjects the option of professing the religion of their fathers or emigrating. The task of influencing the people by sermons and exhortation was confided mainly to the Franciscans and Capuchins. The former were given the convent in St. Peter’s, where previously the daughters of the nobility and the townsfolk had been educated. Archbishop Wolf Dietrich also encountered opposition at Salzburg when he began to tear down the ancient Romanesque cathedral; years were consumed in the destruction of the venerable stone edifice. He commissioned Vincenzo Scamozzi to draw up the plan of a new cathedral, which was to surpass in magnificence everything in Germany. The cathedral was cross-shaped, had three naves, a central cupola, cross-arms ending in a square tribunes, and covered in the façade. However, when the plan was completed and building was to be begun, the indefatigable archbishop found himself badly involved. The closing five years of his life were sad. To protect the salt-makers of Salzburg from the unjust customs regulations of Duke Maximilian of Bavaria, he restored to military demonstrations, which constituted a breach of national peace. The soldiers of the duke took him prisoner, and brought him to the castle of Hohen-Salzburg. Here he was subjected to unworthy treatment, and, although a promise to abdicate if liberated was extorted from him, he was retained a prisoner until his death five years later (1611). His successor, Joseph II, who had so ill-used him, was a relative; it may be that Sitticus feared that the great recklessness of Wolf Dietrich would imperil the peace of the archdiocese. In 1614 Sitticus began the rebuilding of the cathedral, in which the architect, Santino Solair, worked beneath the one of the most magnificent creations of the baroque style of architecture of Central Italy” (Ilg). It was also this archbishop who finished the residence and castle of Mirabell, and restored Hellbrunn with its fountains. While Austria and Germany were ravaged in the Thirty Years’ War and civilization declined, Archbishop Paris, Count of Lodron, accomplished such fruitful works of peace that he is remembered as “the father of his country”. The Alma Benedictina (1623), for almost two hundred years the pride and joy of Salzburg, was his work; Ferdinand II granted it the power of conferring academic degrees in all four faculties. In 1628 Archbishop Lodron erected the Augustinian convent, and in 1618 Bishop Max Gandolf, Count of Kuenberg, built in 1674 the celebrated pilgrimage church of Maria Plain; his successor, John Ernest, Count of Thun, built the college church, Fischer of Erlach being the architect. The wonderful chimes also date from this period.

Under Leopold Anton, Freiherr von Firmian, Protestant tendencies revealed themselves more vigorously than before, supported and promoted by the Protestant members of the imperial estates. In imitation of the Corpus evangelicorum, the Lutherans of the Salzburg territory formed a league, binding themselves by oath and an outward rite of mutual sprinkling of salt. The infection grew dangerous. The archbishop did all he could; he invited the Jesuits as missionaries, and engaged the help of the emperor. Later he enforced the Decree of the religious Peace of Augsburg: recantation or emigration. In ten years (1647) 30,000 persons disappeared from the Austrian territories. A few emigrated to East Prussia, or in Württemberg or Hanoverian territory; a few emigrated to Georgia in North America. A child of the era of “Enlightenment”, Archbishop Jerome Count Colloredo laboured in its spirit and with the same persistent zeal as Joseph II. However, his predecessor was the system and ecclesiastical matters alienated from him the minds of the people, as had happened in the case of his imperial prototype. The fact that the four ecclesiastics of the highest rank in Germany declared as the first point in the Punctation of Eins of the rights of the clergy could be reduced to those which he enjoyed during the first three centuries, betrays a rare historical sense, since they saved off the branch on which they sat. While Jerome in this case followed too blindly the lead of Joseph II, he displayed his courage when the emperor wished to erect new ecclesiastical provinces in Vienna and Graz. The Grazer province was to be governed by an archbishop, Göss was to be a simple diocese, and all the dioceses of Inner Austria—including the projected Diocese of Leoben—were to be placed under Graz. Colloredo refused his consent, whereupon the emperor retaliated by seizing the ecclesiastical possessions of the Innsbruck territory. Without, however, changing the archbishop’s attitude. Finally, after two years’ negotiations, a settlement was arrived at on 19 April, 1788; Salzburg abdicated its episcopal rights in Styria and Carninthia in favour of the Bishops of Seckau, Leoben, Gurk, and Lavant, but retained its metropolitan rights over them,
enjoyed the right of nomination for Sekau and La-
var at every vacancy, and for Gork at every third
vacancy. For Leoben—which, however, Engel
was the first and the last bishop—the founder was
to have the right of nomination, and the metropolita
the right of confirmation.

The classical writers of church music throw a
radiant light on Salzburg at this time. The house
in which Wolfgang Amadeus Mozart was born
(1756) now contains the Mozart museum, with com-
positions of the master, and his skull (a legacy of Hayrt).
Mozart died in 1791 at Vienna, whither he had come
at the age of twenty years. Michael Haydn occu-
pied throughout his life the position of orchestral
composer. Bishop Haydn (d. 1795) and Archbishop Jerome was a special patron of Haydn,
and was delighted by the master’s new compositions
for almost every ecclesiastical function. Among
Haydn’s works are thirty masses, over one hundred
gruel, and the glorious "Hier liegt vor deiner
Majestät" (Here lies before Thy Majesty). These
and the incomparably beautiful responsorios of Holy
Week express a deep religious sentiment. Salzburg
suffered much through the French wars, which led
to the destruction of the ecclesiastical principality.
The signers of the Peace of Westphalia agreed on
the secularization of the territory should follow; the
means of mutual compensation, the so-called
"secularization." Similarly the men of the French
Revolution soon confiscated all church property,
and the Germans, their apst pupils, completed the
secularization in Germany by the decree of the
Imperial Delegate at Ratibon. The Catholic Church
lost three and a half million acres and a yearly
income of twenty million gulden (about $3,000,000).
The archbishops of Salzburg were deprived in the
same year of their temporal sovereignty; Jerome, the
last ecclesiastical sovereign of Salzburg, died at Vienna.

During the first two decades of the nineteenth
century Salzburg had a chequered fate: from 1803
to 1805 it was an electorate under Grand-Duke Fer-
dinand of Tuscany; from 1805 to 1809 it passed into
the possession of Austria, from 1809 to the Peace
of Vienna it was Bavarian. Short as was the Bavarian
domination, M. Salzburg found time to overturn all
the old institutions. In 1810 the university was dis-
solved, although the theological faculty remained;
the monasteries were forbidden to receive novices,
and they owed their continued existence to Crown
Prince Ludwig. The Peace of Vienna restored this
bestowment to the Habsburgs. Francis I gave it an eminent archbishop in Augustin
Gruber. Gruber was born at Vienna and developed,
as catechist at St. Anna’s and as teacher of cate-
chetics for the alumni, into the classical writer on
catechetical instruction. His "Theorie der Kate-
chetik" and "Praktisches Handbuch der Katholikern
für Katholiken" (2 vols.) have appeared in numerous
editions. As alicious councillor for ecclesiastical affairs,
Gruber drafted the statute of organization for the
Archdiocese of Salzburg, on his succession to which
he laboured in the true spirit of St. Augustine.
Always mild and affectionate, he won back even the
obstinate Manhrter Sect to the Church; he lectured
personally to the ecclesiastical students, especially
on St. Augustine and the "Regula pastoralis" of Greg-
ory the Great. On his tours of visitation, he would
question the parish-priest concerning the themes suit-
able to the local conditions, and would immediately
prepare new catechetical grades, three commercial coun-
sels, the high school course, and classical courses for the B.A.
degree (Greek, Latin, English, Spanish, natural sci-
ence, higher mathematics, and philosophy). There
are 180 students. The Sisters of Charity have charge of the girls’ academy, the College of the Miraculous
Medal, at Calbayog, in which there are primary, sec-

SALZMANN, Joseph, founder of St. Francis Province
Seminary, (St. Francis, Wisconsin) known as the
"Salmannian", one of the first pioneer priests of the
North-west, b. at Münchbach, Diocese of Upper
Austria, 17 August, 1819; d. at St. Francis, Wis-
consin, 17 January, 1874. He was ordained in 1842,
and laboured very successfully in his diocese until
1847, when the visit of the first Bishop of Milwaukee,
Rev. Martin Henn, and his urgent appeal ripened his
long-felt desire to devote his life to the foreign mis-
sions. Having come to Milwaukee in October, 1847,
he was appointed to a small country mission, but soon
his extraordinary success induced the bishop to make
him pastor of St. Mary’s congregation at Milwaukee.
There the German free-thinkers resorted to every
kind of insult and calumny to thwart the success of this
inrepid champion of the Church, and he encountered a
long and bitter conflict with them. Feeling the la-
mentable scarcity of priests Salzmann conceived the
idea of founding a seminary. To collect the neces-
sary funds he went from state to state, and after
many difficulties, on 29 January, 1856, the Seminary
was opened with twenty-five students. Rev. Michael
Heiss, afterwards Bishop of Milwaukee, was its first
rector. The seminary is now one of the most
prominent in the country. Several hundreds of priests
and twenty-three bishops call it their Alma Mater.

Salzmann is also the founder of the first Catholic
normal school in the United States and of the Pio
Nono College. After years of hard struggles the Catho-
lic Normal School of the Holy Family now stands on a
solid basis and yearly sends out efficient teachers to
parochial schools. The American branch of the St.
Cecilia Society for the promotion of genuine church
music owes its existence and growth to him. Salz-
mann was of a noble character full of holy enthusiasm
for the cause of God and his Church, fearless in the
defence of truth, an eloquent preacher, a warm friend
and father of his students, and a wise counselor to priests and bishops.

waukee, 1903).

SÁMAR and Leyte, the names of two civil provinces in
the Visayan group of the Philippines which
include the islands of Balicaturo, Batac, Biliran, Capul,
Daram, Homonhon, Leyte (2722 sq. miles), Manicani,
Panas, Sámar (5031 sq. miles), and several smaller
islands, and which make up the Diocese of Cal-
bayog (CALBAYOGA), suffragan of Manila. The
Diocesan seat is at Calbayog, a city of 22,000 inhabi-
tants on the western side of Sámár; the cathedral
is dedicated to St. Peter and Paul. The first Jesuit
missionaries reached Leyte and Sámar in 1585, the
islands subsequently forming part of the Diocese of
Cebu until erected into a separate diocese, 10 April,
1910. The first bishop of the diocese was de la Anunciacion, D.D., formerly Vicar-General of
Cebu, consecrated in St. Francis’s Church, Manila,
24 June, 1910. The Lazarist Fathers have charge of
the diocesan seminary and college of St. Vincent de
Paul at Calbayog. Besides training youths for the
priesthood they give courses of primary instruction
in Roman Catholic schools, complete the Seco-

SÁMAR
Samaria, a titular see, suffragan of Cesarea in Palestine, is named. In the sixth year of his reign (about 906 B.C.), Asur, King of Israel, laid the foundation of the city to which he gave the name of Samaria, "after the name of Semer the owner of the hill" (III Kings, xvi, 24). This detached hill was 1454 feet above sea-level, and more than 326 feet above the surrounding hills. His son, Achab, married to Jesabel, a Sidonian princess, introduced the worship of Baal (III Kings, xvi, 32). Shortly after, the Prophet Elias announced the famine which for three years and more devastated the city and surrounding country (III Kings, xvii, xviii). Samaria suffered her first siege from Benadad, King of Damascus (III Kings, x, 13-16), after which she received the disaster which this same Benadad suffered at Aphec, he concluded a treaty with Achab (III Kings, xx, 34-43). The body of Achab was carried there from Ramoth Galaad, and the dogs licked his blood in the gutters, according to the prediction of the Prophet (III Kings, xxii, 1-39). Elias prophesied that King Ochonias, who fell from the window of his palace, would die of this fall, which prophecy was very shortly fulfilled (IV Kings, i). His brother and successor, Joram, threw down the statue of Baal, erected by Achab (IV Kings, iii, 2). The history of Samaria is connected with various episodes in the life of the Prophet Elyas, notably on account of the siege of the city by Benadad (IV Kings, ii, 25; vi, 8 sqq.). Jehu, founder of a new dynasty, exterminated the last descendants of Achab, and destroyed the temple of Baal in Samaria; then he was interred in the city as his predecessors had been (IV Kings, x). Nevertheless the worship of Astarte still continued on the city (IV Kings, v, 26), which was destroyed by Josia, who had transported the treasures of the temple of Jerusalem, pillaged by him, to Samaria, was buried in the tomb of the kings of Israel (IV Kings, xv, 14-16; II Par., xxv, 24) as also was his son Jeroboam II (IV Kings, xiv, 16, 24, 28). Then followed a series of reigns ending in ruinous change of rule; families of prophetesses, (Samaria) (44), and several of the chief magistrates in the temple, represented the diocesan at the Council of Nicea (325); Eusebius at Seleucia (350); Priscianus at Constantinople (381); Eleutherius at Lydda (Lydia), (415); Constantine at the Robber Synod of Ephesus (449); Marcianus, at the end of the fifth century; Belarius (536). During the French occupation Samaria was a Latin bishopric, and several titular bishops are mentioned (Eubel, "Hierarchia Catholicca medi evi", I, 445; II, 309). The Greeks also made it a titular see. It must be remembered that Sebast and not Samaria was always the correct name of this diocese. From the fourth century we meet with the cultus of St. Paul and St. Jerome at Samaria; it possessed also the tombs of Elyasius and Abdias, and that of St. John the Baptist, whose magnificent church, rebuilt by the Crusaders, is to-day a mosque (see text in Thomson, "Sacred Places", I, 102). From 985, El-Muqadsi does not mention Samaria, now being more than a hundred miles from Nablus. But in 1283, we find nothing but one inhabited house with the exception of a little Greek monastery (Burchard, "Descripito Terrae Sanctae", Leipzig, 1873, 53). Today the village of Sebsteyh, amid orchards and kitchen gardens, comprises three hundred inhabitants, all Musulmans.
SAMARIA
SAMARIA

S. VAILHÉ.

SAMARITAN LANGUAGE AND LITERATURE.—A. LANGUAGE.—The original language of the Samaritans was the vernacular of Palestine in the Hebrew tongue. This language was superseded later by Aramaic. One result of the domination of Islam there was the substitution of Arabic. Hebrew, as the idiom of the Pentateuch, both was and is for the Samaritans the sacred language; and even to-day some of them have a knowledge of it, although indeed a somewhat imperfect one of it. The pronunciation differs considerably from that settled by the Masoretic text. As the Samaritans use neither vowels nor diacritical signs, the pronunciation has only been preserved by tradition; yet, notwithstanding isolated variations, it seems to have remained, on the whole, very much unaltered from the time of its formation. The pronunciation by H. Petermann in his "Versuch einer hebräischen Formenlehre nach der Aussprache der heutigen Samaritaner" (Leipzig, 1883) is the colloquial language of the Samaritans from the last centuries before Christ up to the first centuries of the Arab occupation. The first of the extant manuscripts of the Samaritan Targum (see below), and most of the lexical and grammatical peculiarities which were ascribed to this idiom have been deduced solely from the inconsiderably corrupt manuscripts of the Targum. They rest on corruptions, arbitrary spellings, mutilated Arabic idioms, and other errors of copyists who were unacquainted with the true idiom of the language. Consequently, the existing Samaritan grammars and lexicons are in the highest degree misleading to those who are not specialists. Among these works are, for example, Uhlemann, "Institutiones linguæ Samaritanae" (Leipzig, 1837); Nicholls, "A Grammar of the Samaritan Language" (London, 1838); Petermann, "Brevis lingua Sam. grammatica" (Berlin, 1873); Castelli, "Lexicon heptaglotton" (Leipzig, 1882); Kolf, "Holländisches und Dogmatik der Samaritaner" (Leipzig, 1876.) Apart from a decided mixture of Hebrew idioms, as well as of words borrowed from the Greek and Latin, the real Samaritan language differed but little from the Aramaic spoken in the other parts of Palestine, especially from that of Northern Palestine, as, for example, it is found in the Palestinian Talmud. Owing to the secluded position of this people, its literature in the course of time must have become more and more isolated. No linguistic value can be attached to the writings in what is called the Samaritan language, produced under the influence of the authors, accustomed to speak Arabic, to write in a language of which they had no mastery.

Leaving out later flourishes added to individual letters, Samaritan written characters represent a more ancient type than the square characters and resemble those found on Hebrew coins and the inscriptions, o. seals, but with a greater inclination to the cursive. The script appears to belong to a later development of the writing used in the old Hebrew codices, and, taken altogether, a type of writing common in a part of Palestine in the fourth century before Christ may be preserved in it. It would be well if this were the unsatisfactory Samaritan type used in printing with more suitable characters in closer agreement with the old manuscripts. Among the inscriptions written in Samaritan characters the two most important are those at Nablus, the one in the minaret wall of the mosque of El-Hadr, the other belonging to a private individual. [Cf. Rosen, "Zeitschrift der deutschen morgenländischen Gesellschaft" (hereafter to be cited as ZDMG), XIV (1866), 622. The first inscription is also discussed by Blau in ZDMG, XIII (1859), 275, the second is treated in Lidsbarski, "Handbuch der nordisem. Epigraphik" (Weimar, 1898), 440.] Both inscriptions belong apparently to the period before the destruction of the Samaritan synagogue in Jerusalem (529 b.c.). The inscription on the building of the present synagogue (published by Rosen in ZDMG, XIV, 824) belongs to the year 1711. In regard to some other inscriptions, cf. B. Wright in "Proceedings of the Society of Biblical Archaeology", VI (1888), November, 25; Chouart-Ganzini, "Revue biblique" (1906), 84; Lagrange, in "Revue illustrée de la Terre Sainte" (1890), 339 (1891), 83; and "in Revue biblique" (1933), 114; Soberneim, "Samar. Inschriften aus Damakus" in "Mitteilungen und Nachrichten des Deutschen Palastina-Vereins", VIII (1902), 70; Idem, "Sieben samarit.

B. LITERATURE.—Samaritan literature consists of writings in Hebrew, Aramaic, Arabic, and for the Hellenistic period, Greek. The number of writings at present in the possession of the Samaritan community at Nablus is small. Barton has given in his "Diebold. Sacra" (Leipzig, 1881), 612 sq. a list of these books and manuscripts drawn up by Jayth, the priest at Nablus. From the seventeenth century on, manuscripts have been acquired by various European libraries. The number of these was considerably increased through the sale of manuscripts made in 1870 to the Imperial Library of St. Petersburg by the Karaite Abraham Firkovitch; these writings had been collected by him in the genizoth of the Samaritans in Cairo and Nablus.

In the remainder of this article a condensed sketch will be given of the most important writings contained in the Samaritan literature.

(1) The Samaritan Pentateuch and the Translations of It.—The most important of the works belonging to Samaritan literature is the Samaritan Pentateuch, that is the Pentateuch written in the Samaritan character in Hebrew, which is not to be confused with the translation of the Pentateuch or with the Samaritan Targum (see below). In the early Christian centuries this Pentateuch was frequently mentioned in the writings of the Fathers and in marginal notes to old manuscripts, but in the course of time it was forgotten. In 1616 Pietro della Torre, a Jesuit at Damascus; this copy came into the possession of the library of the Oratory at Paris and was published in 1645 in the Paris Polyglot. At the present time the manuscript, which is imperfect and dates from 1514, is in the Vatican Library. From the time of this publication the number of codices, some much older, has greatly increased, and Kennicott was able to compare in whole or part sixteen manuscripts ("Vet. Test. Hebr." (Oxford, 1776)). The views of scholars vary as to the antiquity of this Samaritan
recension. Some maintain the opinion that the Samaritans became acquainted with the Pentateuch through the Jews who were left in the country, or through the priest mentioned in IV Kings, xvi, 28. Others, however, hold the view that the Samaritans did not come into possession of the Pentateuch until they were definitely formed into an independent community. This much, however, is certain: that it must have been already adopted by the time of the founding of the temple on Gerizim, consequently in the first half of the 9th. It is, therefore, a recension which was in existence before the Seputagogue, which fact makes evident its importance for the verification of the text of the Hebrew Bible.

A comparison of the Samaritan Pentateuch with the Masoretic text shows that the former varies from the latter in many words, and on the other hand, very often agrees with the Septuagint. For the variant readings of the Samaritan Pentateuch see Kennicott, loc. cit., and for the most complete list see Petermann, loc. cit., 219-26. A systematic grouping of these variants is given by Gesenius, "De Pentateucho Samaritano origini indole et auctoritate" (Halle, 1815), p. 46. Very many of these variations refer to orthographic and grammatical details which are of no importance for the sense of the text; others rest on evident blunders, while still others are plainly deliberate changes, as the removal of anthropomorphisms and expressions which seemed objectionable, the bringing into conformity of parallel passages, insertion of additions, large and small, different members in the genealogies, corruptions in favour of the religious opinions of the Samaritans, among them, in Deut., xxvii, 4, the substitution of Gerizim for Jabesh, and other like changes. Although, in comparison with the Masoretic text, the Samaritan Pentateuch shows many errors, yet it also contains readings which can be neither overights nor deliberate changes, and of these a considerable number coincide with the Septuagint in opposition to the Masoretic text. Some scholars have sought to draw from this conclusion that a copy of the Old Testament used by Samaritans settled in Egypt served as a model for the Septuagint. According to Kohn, "De Pentat. Samar." (Breslau, 1885), the translators of the Septuagint used a Greco-Samaritan version, while the same scholar later claims to trace back the agreements in subsequent translations in Samaritan to the Samareiticon [Kohn, "Samareiticon und Septuaginta" in "Magazin für Gesch. und Wissenschaft des Judentums" (1894), 1 sqq., 49 sqq.]. The simplest way of explaining the uniformity is the hypothesis that both the Samaritan Pentateuch and the Septuagint go back to a manuscript common to the Palestinian Jews which varies somewhat from the Masoretic text which was settled later. However, taking everything together, the decision must be reached that the Masoretic tradition has more faithfully preserved the original form of the text.

The most celebrated of the manuscripts of the Samaritan Pentateuch that in the synagogue at Nablus. It is a roll made of the skins of rams, and written, according to the belief of the Samaritans, in the thirteenth year after the conquest of Canaan at the entrance to the Tabernacle on Mount Gerizim by Abish, a great-grandson of Aaron. Abisha claims for himself the authorship of the manuscript in a speech in the first person which is inserted between the columns of Deut., v, 6 sqq., in the form of what is called a tarkh. This is of course a fable. The age of the roll cannot be exactly settled, but up to now it has not been possible to examine it thoroughly.

The Samaritan Pentateuch was printed in vol. VII of the Paris Polyglot (1645), and in vol. I of the London Polyglot (1675). Much of the evidence of the characteristic Samaritan text is of course found in modern times, while relatively few discoveries have been made in the manuscript. The translation of the Pentateuch into Arabic.--The translation of the Pentateuch into Arabic that passed under the name of Abu Sa'id appeared in the eleventh or twelfth century, probably to drive out the translation by Saadia (d. 924). Abu Sa'id, who lived in the thirteenth century, was the reviser of the Arabic Pentateuch; formerly he was incorrectly regarded as its translator. Bloch and Kahle have lately demonstrated that this translation has absolutely no uniform character, that two, if not more, recensions are to be accepted. The translation is, in general, an exact one, although now and then an effort is evidently made to bring the Biblical text into conformity with the religious opinions of the Samaritans. Further work in preparing it is of considerable importance, for it may be proved that Saadia's translation was also used.

Abu Sa'id, Genesis, Exodus, Leviticus, ed. KURKEN (Leiden, 1843); BLOCH, Die Sevenreich (Diel., ii-iv) (Berlin, 1901), with introductory notes. Cit. as regards this, KURN in Zeitschrift für klag. Bibliographie (1903). See also KAHLE, "Die arabisch. Bibel" (Leipsig, 1898), 19 sqq., 46 sqq. (Baud, 1900-06); the celebrated Berberiue Trojan in the Barberiue Library at Rome dates from 1227 and contains in addition a translation of the Samaritan Pentateuch, but it cannot be proved that Saadia's translation was also used.

Thus the succession in order of time of the translations of the Samaritan Pentateuch coincides with
the historical facts: Samaritan Targum or translation into the Aramaic vernacular; Greek translation (Σαμαριταϊκον) for the diopora; Arabic translation from the time of the sovereignty of the Arabs.

(4) Exegetical and Theological Questions. — To this belongs also all the aggadic commentary on the Pentateuch written by Marqah in pure Aramaic and generally ascribed to the fourth century. It contains chiefly edifying meditations on selected portions of the Pentateuch in six books. The copy of it which Petermann had made from a manuscript at Nablus in 1858 is at Berlin. Portions of this have been published: Heidenheim, Books I, II, IV, and extracts from the other books in "Bibl. Samar.," III, Pts. 5 and 6 (Weimar, 1896); Baneth, "Des Samar. Marqah an die 22 Buchstaben anknüpfende Abhandlung" (Berlin, 1888); Munk, "Des Sam. M. Erzählung über den Tod Moses" (Berlin, 1890); Emmerich, "Das Siegelbild, eine Schriftenkunde des Sam. Samar." (Berlin, 1897); Hildesheimer, "Marqah's Buch der Wunder" (Berlin, 1898). The most prosperous Samaritan theological learning was that of the Judeo-Arabic literature, the pioneer in which was Samuel ibn Horkhy. The path he opened was followed by Rabbinists and Karaites. A number of Samaritan-Arabic commentaries on the Pentateuch belong to the three centuries succeeding that in which Saadia lived. Among these, for example, a commentary on Genesis dated 1053, of which Neubauer obtained a copy in 1857. "Journ. Asiat." (1873). 341. Ibrahim of the tribe of Jaqób, who probably did not live before the sixteenth century, wrote a commentary on the Pentateuch, planned on a large scale. A manuscript copy of the first four books made at Nablus through the efforts of Petermann is at Berlin. Publications from it are: Klumel, "Mischpamit, Ein samar.-arab. Commentar zu Ex. xxi-xcii, 15, von Ibrahim ibn Jakub" (Berlin, 1902); Hanover, "Das Festgesetz der Samaritaner nach Ibrahim ibn Jakub" (Berlin, 1904). Various extracts are given by Geiger in ZDMG, XVII (1863), 723; XIX (1866), 147; XXII (1868), 532. Other commentaries are to be found in manuscript libraries; the titles of a number of them are known. Works on smaller portions of the Pentateuch were also not unusual.

Among the codifications of the Law the most important is the "Kittab al-Kaff" written about 1050 by Yusuf ibn Salimah; the work is a kind of Samaritan Schudchen aruch, made up of the explanations of the most distinguished Samaritan teachers of the law. Of this work Kohn has edited the tenth chapter, "Die Zaraath-Gesetze der Bibel nach dem Kittab al-Kafi des Yusuf ibn Salamah" (Frankfort on the Main, 1899). Munajja ibn Zadakja, an important and prolific writer, taught in the eleventh or twelfth century. Various writings of his are quoted; the most widely known was his "Kittab al-Khalt," a more exact title of which would be, "Investigations and Controversial Questions between the Two Sects of Jews and Samaritans". This work is in a two-part manuscript copy of the second part, obtained by Petermann in 1898 at Nablus, is to be found at Berlin. Further information concerning this second part is given by L. Wesseneher, "Samaritanische Traditionen" (Halle, 1888). Six small fragments of this work are at Breslau and have been published by Dr. Brabanz, "Fragmenta commentarii ad Pentateuchum Samaritan-Arabic sex" (Breslau, 1875). In addition to these many theological works are cited or are to be found in manuscript libraries. Cf. Nutt, loc. cit., 131 sqq.; Steinheil, "Die arabischen Literatur der Gaza" (Frankfort-on-Main, 1897), 319 sqq.

(5) Liturgy and Religious Poetry. — A large number of the manuscripts are liturgical texts. They contain prayers and hymns for various feasts and occasions in Aramaic and Hebrew. The majority belong to a fairly late period, as the numerous Arabic idioms show. In some of them, each Hebrew or Aramaic strophe is followed by an Arabic translation. The earliest and most celebrated liturgical poet is Marqah; he is the same who comes as the author of the Aramaic translation. The poets are, for example, Abu'l Hasan (eleventh century) and his son Ab-Galga; the high-priest Pineshas ben Joseph (fourteenth century), his son Abiha, the latter's contemporary Abdallah ben Salamah; further, Abraham al-Qabas (sixteenth century) and others. The British Museum has a famous Samaritan manuscript of the Samaritan Liturgy in twelve quarto volumes.

(6) Chronicles and other Forms of Secular Literature. — A distinct branch of the literature is formed by the Chronicles. A mong the earliest is the Book of Joshua, in Arabic, the main part of which probably belongs to the thirteenth century, even though here and there it may be based on earlier records. In thirty-eight chapters it treats, somewhat in the manner of a Midrash, the history from the time of Moses to the death of Joshua, with various apocryphal additions. An appendix to the ninth chapter carries on the recital to Alexander Severus. The sole manuscript in Samaritan characters came from Cairo and is to be found now at Leyden. It was published in Arabic with a Latin translation by Jamail, "Chroniques Samaritaines" (Leyden, 1843). A Hebrew translation was issued by Kirchheim, יִנָּר יְשִׁיע (Frankfort on the Main, 1855); an English one by O. T. Crane, "The Samaritan Chronicle or the Book of Joshua" (New York, 1890). Gaster believed he had discovered the Hebraico-Samaritan "Book of Joshua" and published it in square characters, with a German translation, in the ZDMG, LXII (1908), 209 sqq., 494 sqq. He was, however, the victim of a mistification. Cf. Kahle, loc. cit., 250 sqq.; Dalmann in "Theol. Literaturzeitung" (1908), 533, 965; Frenkel, loc. cit., 481 sqq.; Yahuda Blau, "Samariterchronik: das Buch Jakobin in Assur," XXIX (1908), 877 sqq. (b) The Arabic Chronicle of Abu'l Path. — According to the statement of the author this chronicle was written at Nablus in the year 750 of the Hegira or A. D. 1355, at the request of the high-priest Pineshas. It relates the course of events from the time of Adam to that of Mohammed, using older chronicles as a basis. Some manuscripts are a continuation up to Harun-al-Rashid. The work contains numerous anachronisms and fables; it is intended to magnify the Samaritans in an unfair manner, and passes over whole periods of time. It was cited by Vilmain as "l'histoire ancienne Samaritaine" (Grenoble, 1856). The Latin translation, long announced has not yet appeared. (c) El Toleid, known as the "Neubauer Chronicle." — A copy of this chronicle, made in 1589 by the high-priest Jaqub ben Aaron, was published by A. Neubauer in the "Journal Asiatic" (1869), 385 sqq. The chronicle is written in Hebrew and is accompanied by a literal Arabic translation. The main part, written in 1149, is the work of the high-priest Eleazar ben Amram, the continuation, written in 1340, is that of Jaqub ben Israel. Other writers have brought the chronicle down to 1556. It contains hardly more than bare chronologies, from the first mention of a single historical notice, and is in reality little more than a catalogue of the high-priests and of the most important Samaritan families. (d) A chronicle edited by E. N. Adler and M. Seligsohn, "Une nouvelle
chronique samaritaine" in the "Revue des études juives", vols. XLIV, XLV, XLVI; also printed separately (Paris, 1903). It comes down to the year 1094. With exception of a few Samaritan words and the literal text, the Samaritan dialect, or language is a corrupt Hebrew full of Arabic expressions. Besides the chronicles which have become known up to now, there must have been, at least in former times, many other works of historical and legendary character. Cf. for example, "Buch Jesus", c. 1550, and also F. L. de Sacy, "Sur l'histoire de Beth-Sabbeth", in his introduction to the text. As regards other branches of secular learning, fragments or titles are known of works on astronomy, medicine etc. A few writings on grammar have been preserved, especially on that of the Hebrew language; among these authors are Ibrahim ben Faray of the thirteenth century; and an introduction to the Jewish Eusebius. Both are included in the translation of the Pantehate. These works are to be found in manuscript at Leyden. Noeldeke investigated them carefully and published the results in the "Göttinger Gelehrte Nachrichten", nos. 17 and 20 (1859). These writings give sufficient information as to the position of the Samaritan in regard to grammar and show that they did not advance beyond an uncertain groping. Of particular interest is the little treatise of Abu Sa'id on reading Hebrew, which Noeldeke gives in the original and in a translation (loc. cit., 357 sqq.). There are also many other grammatical works, which are however of little value. A manuscript written by a priest named Pinchas in the Bibliothèque Nationale at Paris contains the verb and noun forms in parallel columns of Hebrew, Samaritan, and Arabic; a copy of this manuscript is at Christ's College, Cambridge. Cf. Nutt, loc. cit., 150, and Harkavy, loc. cit., in appendix, p. 161.

(5) Epistles.—The correspondence between Samaritans and European scholars which began at the end of the sixteenth century and was continued, with occasional interruptions, up to a recent date, offers an essential contribution to the knowledge of Samaritan conditions. These letters of the Samaritans are either in Arabic or in a more or less correct Hebrew written in Samaritan characters; the latter are generally accompanied by an Arabic translation. The first European scholar to enter into correspondence with the Samaritans was Johann Adelung (1727-1775) who addressed letters to the Samaritan communities at Nablus and Cairo; but no answer was sent until after his death (1808). This was followed by the correspondence (1672-88) carried on with Thomas Marshall, Rector of Lincoln College at Oxford, through Huntington, the Anglican prebend at about 1400. The correspondence (1848-1891) with the German Giob Luftjod. After a long suspension the correspondence was resumed (1806-26) by Silvestre de Sacy. As regards a further scattered correspondence see the bibliography below.

The study of the Samaritan correspondence since the time of Huntington is de Saec, Correspondence des Samaritains de Nablus en Nicosie et Strasboure des MSS. de la Bibliothèque du synagogal, 1 sqq., contains the originals with French translations; cf. also Heidenheim in Vierteljahrschrift für religionswissenschaftliche Forschung, 4 (1817), 1 sqq. and also ED. MG., 17 (1853), 353 sqq.; Hamaker in Archiv fuer Konstheologie, V (Amsterdam, 1854), 4 sqq.; a letter addressed in 1842 to the French Government is published in E. des Annales de philosophie ciretienne (1858). Of later date are a letter to Rauch, see Zeitschrift des Deutschen Palästina-Vereins, 14 (1891), 149 sqq.; a letter addressed to King Oscar I of Sweden published by Almevik (Uppsala, 1897); one to Rosenberg in his Leben der sowjetischen Synagoge (Vienna, 1901); one to Barak in Bibl. s. c., LXX (1903), 610.

(6) Secular Literature of the Hellenistic Era in Greek.—In closing, something should be said of the secular literature written during the hellenistic era in Greek. The chronicler Thallus (about 480 B.C.) was probably a Samaritan. His work appears to have been a chronicle of the world. The majority of fragments of and references to it relate to the mythological period; a few to the history of Cyrus. The mixture of Oriental and Greek mythological stories is in entire agreement with the manner of theellenizing Jew of the Hellenistic era. For the fragments, see C. Müller, "Fragm. hist. Grec.," III, 517-519. Among the citations made by Alexander Polyhistor one from an unknown person is preserved in Eusebius, "Hist. Evang.," IX, xvi. This agrees in matter with a longer quotation (ibid., IX, xvi) and is absurdly ascribed to the Jew Eusebius. Both the fragments are to be found in C. Müller, loc. cit., III, 214. The Samaritan Theodose, who lived about 400 B.C., wrote an epic in Sicilian of which forty-seven hexameters are preserved in Eusebius, "Hist. Evang.," IX, xxi; see C. Müller, loc. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Freudenthal also thinks that C. Müller, op. cit., 217. He also seems to have embellished sacred history with scraps of Greek mythology. Fr. Schuchheim.

Samaritan Pentateuch. See SAMAARIA: SAMARITAN LITERATURE AND LITERATURE.

Sambor. See PARMENIUS, SAMBA, AND SABOM, DIOSCOE OF.

Samboga, Joseph Antons, theologian, b. at Wolfdorf near Heidelberg, 9 June, 1752; d. at Nymphenburg near Munich 5 June, according to Sailer, but 5 January according to other statements, 1815. His parents were Italians who had come from the neighbourhood of Como. He went to school at Mannheim and to the monastic school of the Augustinians at Wiesloch and then entered the University of Heidelberg. In 1770 family affairs took him to Italy where he finished his theological studies and was ordained priest at Como, 2 April, 1774. After he had laboured at Como for a while as chaplain at the hospital attached to Germania, he came to the monastery of St. Georg at Munich, 1775, was made chaplain at Helmsheim, in 1778 chaplain and in 1783 court preacher at Mannheim, in 1785 parish priest at Herrnheis. In 1797 he was again called to the court at Mannheim as teacher of religion to Prince Louis (later King Louis I of Bavaria), the oldest son of Duke Maximilian Joseph. When Maximilian Joseph went to live at Munich as Elector of Bavaria (from 1806 King Maximilian I), Samboga followed the court to that city and was later the teacher of religion to the younger children of the Elector also. He was a pious, deeply-religious priest, and belonged to the school of Sailer whose friend he was. Among his writings should be mentioned: "Schutzrede für den ehelosen Stand der Geistlichen" (Frankenthal, 1782; 2nd ed., Munich, 1827); "Ueber den Philosophismus, welcher unser Zeitalter bedroht" (Munich, 1805); "Ueber die Nothwendigkeit der Beweisung, als Rückgratz mit seinem Zeitalter" (2 vols., Munich, 1807); "Untersuchung über das Wesen der Kirche" (Linz and Munich, 1809); "Der Priest am Altare" (Munich, 1815; 3rd ed., 1819). There were published after his death: "Sammlung verschiedener Gedanken über verschiedene Gegenstände," ed. by Franz (Munich, 1818); "Karl Klein (Munich, 1818); "Zweite Sammlung", ed. by Franz Stadl (1819); "Predigten auf Sonn- und Feiertage," ed. by K. Klein (Mannheim, 1822); "Reden und Aufsätze," collected and ed. by J. B. Schmittenber-Hug. (Lindau, 1834).
SAILER, Joseph Anton Sambucus, wie er war (Musei, 1816); the sale of his specimens (Schaffhausen, 1810); Sailer’s collected works, vol. XXXVIII (2nd ed. Sulzbach, 1841), 157-416.

FRIEDRICH LAUCHERT.

Samoan or Navigator’s Islands), a group of islands situated in latitude 13° 30’ and 14° 30’ south and longitude 185° and 173° west, and composed principally of one island, Savaii, Upolu, Tutuila, Manu’a, of volcanic and coral formations. The natives are tall, muscular, hardy, and fearless seafarers, but ferociously cruel (formely cannibalistic) in war; hospitable, but indolent in peace; of dignified and courteous bearing, and skilled in navigation. The aboriginal government was an aristocratic federation of chiefs from certain families, controlling the royal succession.

The first mission work in these islands was done by John Williams, of the London (Protestant) Missionary Society, 1830. In 1836 Gregory XVI divided Oceania (which includes Samoas) between the Society of the Sacred Hearts of Jesus and Mary and the Marists. The First Catholic missionaries, Marists, landed in Samoa in 1845. In 1851 the Vicar Apostolic of Central Oceania appointed by Pius IX was also Administrator of Samoa. This double title was borne by the succeeding bishops, Elloy and Lamas, until 1900, when Pope Pius appointed Victor Apostolic of Samoa and Tokelau, with residence at Apia. The total population is estimated at 37,000, of whom 7500 are Catholics, with 1 bishop and 21 priests, several of them natives. There are 17 churches with resident pastors, 100 chapel stations under married catechists, schools under the Third Order of Mary. Divorce and immorality are the principal obstacles to Catholic progress. The London Missionary Society has 20 missionaries and 8658 church members. There are also Mormon and Wesleyan missions.

The European name of these islands was given them by Bougainville in 1768. In 1872 Commander Meade, U.S.N., negotiated the concession of a coal station in Tutuila; this was ratified by a treaty in 1878. Treaties with Germany and Great Britain followed in 1879. Native dynastic disorders and sectional agitations necessitated the Berlin Conference of 1884. The 3 interested powers, resulted in a tripartite government of the islands by the United States, Germany, and Great Britain. Popular disapproval in the United States of “foreign alliance” led to the dissolution of this agreement and a partition, in 1899, Tutuila and the islands east of 171° W. longitude to Germany, the rest of the island to the United States, under an imperial governor. Tutuila still remains (1911) under native chiefs and laws (when not conflicting with American law), with supervision by the commandant of the United States Naval Station.

Montal, Les Samoa, études historiques et religieuses (Lyons, 1890); Violette, Dictionnaire Samoa-français-anglais, à Grammaire (Paris, 1879); Turner, Nineveh Years in Polynesia (Lon- don, 1881); Krueper, Les Samoa-Inseln (Stuttgart, 1884); Griffin, List of Books in Library of Congress on Philippine Samoa and Guam, with Maps by Phillips (Washington, 1907); Report for Society of Bibliographers; Des Missions Maristes en Oceanie (1902); Annals of the Propagation of the Faith (1908); Bouchard, Kirchliche Geschichte (Munich, 1910); Battandier, Annuaire Pontifical Catholique: Missions (Revyer, 1905-36); Compilation of Messages and Papal Encyclicals of the U.S. from 1787-1902, VII, VIII, IX, X (Washington), &c. Grant, Hayes, Cleveland, Harrison, McKinley; Foreign Relations of the U.S., Correspondence, etc., relating to Samoa and Fiji, 2nd Century of American Diplomacy (New York and Boston, 1905); Irem, American Samoa Naval Treaty (New York and Boston, 1903); Memoranda furnished by Mary Department to 57th Congress, U.S. Senate (1902).

W. F. SANDS.

Samoan, title or, suffragan of Rhodes in the Cyclades. The island, called in Turkish Boussa-Adassi, is 181 sq. miles in area and numbers 55,000 inhabitants, nearly all of whom are Greek schismatics. There are nevertheless some Catholics dependent on the Latin Bishop of Chios and two convents of Fathers of the Greek Missions of Lyons and of the Greek Mission of St. Joseph. Since 1850 it has constituted an autonomous principality, governed by an autonomous Greek appointed by the Pope and recognized by England, France, and Russia. Samos was first inhabited by the Leleges, Carians, and Ionians, the latter being very active and given to navigation. Its greatest prosperity was attained under the tyrant Polygates (536-525 B.C.) and under the court of the poet Anacreon lived. The philosopher Pythagoras (b. at Samos) seems to have lived at the same time; Aesop also stayed there for a long time. At the assassination of Polygates Samos passed under Persian domination and, about 439 B.C., participated in the Persian invasion of Athens. This city, under Pericles, took it by force. Henceforth it had various fortunes, until the Romans, after pillaging it, annexed it in A.D. 70. It was included in the Province of the Isles. Under the Byzantines Samos was at the head of a maritime theme or district. It was captured and occupied in turn by Arabian and Turkish adventurers, the Venetians, Franks, Genoese, and Greeks, and the Turks in 1453. These various masters so depopulated it that in 1550 Sultan Soliman had transported thither Greek families, whence sprung the present population. From 1821 to 1874 Sultan Soliman had a large share in the war of independence and won several victories over the Turks. Among its bishops Le Quen (Orians Christ., 1, 929-32) mentions: Isidore I, at the beginning of the seventh century; Isidore II, in 692; Heraclius, in 787. Stamatrakis (Samiaca, IV, 169-285).
gives a fuller list including two aged bishops, Anastasius and George. St. Sabinianus, b. at Samos and martyred under the pagans at Troye in Champagne; there is also a St. Leo, d. at Samos, venerated on 29 April, but he seems very legendary. At first a suffragan of Rhodes, Samos was an autocrateparchial archdiocese in 1730; in 1555 it was a metropolitan see at a present, dependent on the Greek patriarchy of Constantinople. On Oct. 29, Mach., vd. 23, the Roman senate makes known to Samos (Samua) the decree favourable to the Jews. St. Paul stayed there for a short time (Acts, xx, 15). Barre, Dict. of Greek and Roman Geog. e. v.: ROMAN, Besides a. 1509, 199-8; LACROIX, Descript. civ. 1853, 814-58; GEBHOR, Description de l’ile de Samos, in Memorie della Soc. di Storia, Turquie d’Asie, I, 496-523; STAMATIDIS, Samos (5 vols. in Greek. Samos, 1868); BUCHERER, Das ionische Samos (Amberg, 1822; Munich, 1826).

S. VAILLER.

Samosata, a titular see in Augusta Euphratensis, suffragan of Hierapolis, capital of Commagene, whose kings were relatives of the Seleucids. The first was Mithridates I Callinicus (d. 96 n. c.); his son and successor, Antiochus I, died before 31 n. c., when the country was governed by Mithridates, an ally of Anthony at Actium; then followed his other son, Antiochus II, summoned to Rome, and condemned in 29 n. c. In 20 B. C., Mithridates III became king, then Antiochus III, who died in 17 B. c., in which year Tiberius united Commagene to the province of Syria. In 38 Caligula gave the province to King Antiochus IV Epiphanes Magnus, afterwards deprived of it, restored to Cleopatra in 41, and disposed again in 72 by Cassennius Petus, Governor of Syria. The sons of Antiochus withdrew to Rome and Commagene passed under Roman administration. A civil war occurred during the reign of Emperor Hadrian, Samosata was the home of the sixteenth Legio Flavia Felix, and was the terminus of several military roads. The vicinity of Lucian, the philosopher and satirist, and of Paul, Bishop of Antioch in the third century, it had seven martyrs: Hipparchus, Philoctete, etc., who suffered under Maximinus Thrax, and whose "Passion" was edited by Assemani ("Acta SS. martyrum orient. et occident.", II, 124-47; see also Schulte, "Zur der deutschen morgenländischen Gesellschaft", LI (1897), 379. St. Daniel the Stylite was born in a village near Samosata; St. Rabula, venerated on 19 February, who lived in the sixth century at Constantinople, was also a native of Samosata. A "Notitia episcopatuum" of Antioch in the early Middle Ages mentions several episcopates, this episcopate and the "Echos d’Orient", (X, 144); at the Photian Council of 879, the See of Samosata had already been united to that of Amida or Diarbekr (Mansi, "Conciliarii collectio", XVII-XVIII, 445). "As in 536 the titular of Amida bears only this title (Le Quien, "Orients christianus", II, 994), it must be concluded that the union took place between the seventh and the ninth centuries. Among the earlier bishops may be mentioned Peperius at Nicea (325); St. Eusebius, a great opponent of the Arians, killed by an Arian woman, honoured on 22 June; Andrew, a vigorous opponent of St. Cyril of Alexandria and of the Council of Ephesus (Le Quien, "Orients christianus", II, 933-6). Chabot gives a list of twenty-eight Jacobite bishops ("Revue de l’Orient chrétien", VI, 203). In February, 1098, the emir Baldoukh, attacked by Baudouin of Antioch, cut his army into pieces. In 1114 it was conquered by the chief quartered at the Museums and hostle to the Counts of Edessa, to whom it succumbed, but was recaptured by the Muselmans about 1149. At present the ruins of Samosata may be seen at Samsat on the right bank of the Euphrates, in the case of Husni Mansour and the vilayet of Mamouret-el-Aziz; there are remains of a wall towards the south, traces of the ancient wall dating probably from the first century, and finally the artificial hill on which the fortress was erected. S. VAILLER.

Sampson, Richard, Bishop of Chichester and subsequent of Coventry and Lichfield; d. at Eccleshall, Staffordshire, 25 Sept., 1554. He was educated at Trinity Hall, Cambridge, Paris, and Sens. Having been a young Doctor of Canon Law, he was appointed by Wolsey chancellor and vicar-general in his Diocese of Touournay, where he lived till 1517. Meanwhile he gained English preferment, becoming Dean of St. Stephen’s, Westminster, and of the Chapel Royal (1516), Archdeacon of Cornwall (1517), and prebendary of Newbold (1519). From 1522 to 1525 he was ambassador to Charles V. He was now Dean of Windsor (1523), Vicar of Stepney (1526), and held prebends at St. Paul’s and at Lichfield; he was also Archdeacon of Suffolk (1529). Being a man of no principle, and solely bent on a distinguished ecclesiastical career, he became a chief agent in the divorce proceedings, being rewarded therefor by the deanery of Lichfield in 1533, the rectory of Hackney (1534), and treasurership of Salisbury (1538). On 11 June, 1538, he was elected schismatical Bishop of Chichester, and as such furnished Henry VIII with such political advice, though not sufficiently thorough, to satisfy Cranmer. On 19 Feb., 1543, he was translated to Coventry and Lichfield on the royal authority alone, without papal confirmation. He held his bishopric through the reign of Edward VI, though Dodd says he was deprived for recanting his loyalty to the pope. Godwin the Anglican writer and the Catholic Pitts both agree that he did so retract, but are silent as to his deprivation. He wrote in defence of the royal prerogative "Oratio" (1553) and an explanation of the Psalm (1539-48) and of Romans (1546).

Edward Burtton.

Sampson, Saint, bishop and confessor, b. in South Wales; d. 23 July, 565 (?). The date of his birth is unknown. His parents, whose names are given as Amon of Dyfed and Anna of Gwydir, were noble, not royal, birth. While still an infant he was dedicated to God and entrusted to the care of St. Illyd, by whom he was brought up in the monastery of Llantwit Major. He showed exceptional talents in his studies, and was eventually ordained deacon and priest by St. Dubrici. After this he retired to another monastery, possibly that on Cadly Island, to practise greater austerities, and some years later became its abbot. About this time some Irish monks were returning from Rome happened to visit Sampson’s monastery. So struck was the abbot by their learning, he decreed that he should teach them Irish, and returned with them to Ireland, and there remained some time. During his visit he received the submission of an Irish monastery, and, on his return to Wales, sent one of his uncles to act as its superior. His fame as a worker of miracles now attracted so much attention that he resolved to found a new monastery or cell "far from the haunt of men", and was accompanied by a few companions to a lonely spot on the banks of the Severn. He was soon discovered, however, and forced by his fellow-countrymen to become abbot of the monastery formerly ruled by St. Germanus; here St. Dubrici consecrated him bishop but without appointment to any particular see. Now, being warned
by an angel, he determined to leave England and, after some delay, set sail for Brittany. He landed near St. Malo, the city in which he was born, and where the centre of his episcopal work in the district. Business taking him to Paris, he visited King Childerbert there, and was nominated by him Bishop of Dol; Dol, however, did not become a regular episcopal see till about the middle of the ninth century. Samson attained the age of eighty-five years, and was buried at Dol. Several early lives of Samson exist. The oldest, printed by Mabillon in his “Acta Sanctorum” from a MS. at Caiteaux, and again by the Bollandists, claims to be compiled from information derived from Samson’s contemporaries, which would refer to the “Compendium Didascalicon” of Bollandiana” has edited another and fuller life (from MS. Andeg., 719), which he regards as earlier than Mabillon’s. Later lives are numerous.

G. ROGER HULSTEDON.

Samson (םסונ), derived from שון, “sun”), the last and most famous of the Judges of Israel. The narrative of the life of Samson and his exploits is contained in chapters xiii–xvi of the Book of Judges. After the deliverance effected by Jephthah, the Israelites again fell into their evil ways and were delivered over to the Philistines for forty years. An angel of the Lord in the form of a man appears to the barren wife of Manoah of the tribe of Dan and promises her that she shall bear a son who shall deliver Israel from the oppression of the Philistines. He prescribes abstinence on the part of both mother and son from all things intoxicating, and adds that no razor shall touch the child’s head, “for he shall be a Nazarite [q. v.] of God.” The angel bearing a similar message again appears to Manue as well as to his wife, and it is only after his disappearance in the flame of a burnt offering that they recognize with great fear his celestial nature. The child is born according to the prediction and reflects the same hereditary tenor of his superhuman strength by slaying a lion without other weapon than his bare hands. Returning later he finds that a swarm of bees have taken up their abode in the carcass of the lion. He eats the honey and the incident becomes the occasion of the famous riddle proposed by him to the thirty Philistines as guests at the wedding festivities: “Out of the eater came forth meat, and out of the strong came forth sweetness.” In their inability to find the answer the guests, toward the end of seven days, feast, induce Samson’s wife to coax him to reveal it to her, and no sooner has she succeeded than she declares it to her countrymen. Samson, however, in order to provide the thirty garments pledged in the wager, goes down to Ascalon in “the spirit of the Lord” and slays thirty Philistines whose garments he gives to the guests who had declared the answer to the riddle. In anger he returns to his father’s house, and seizes one of his wedding companions for her husband.

He returns later to claim her and is informed by her father that she has been given to one of his friends, but that he may have instead her younger and fairer sister. Samson declines the offer and carries the hundred foxes he complexes through tail and tail, and having fastened torches between their tails turns them loose to set fire to the corn harvests of the Philistines which are thus destroyed together with their vineyards and olive-wood and wittily and finally by talking to his wife and delivering her up bound to the enemy. But when he is brought to them the spirit of the Lord comes upon him; he bursts his bonds and slays a thousand Philistines with the jawbone of an ass. Being thirty after this exploit, he is revived by a spring of water from the Angel of the Lord in the valley of Sorek, who is bribed by the Philistines to betray him into their hands. After deceiving her three times as to the source of his strength, he finally yields to her entreaties and confesses that his power is due to the fact that his head has never been shaved. The Philistines treacherously cause him to fall into a pit, where he falls helpless into the hands of the Philistines who put out his eyes and cast him into prison. Later, after his hair has grown again he is brought forth on the occasion of the feast of the god Dagon to be exhibited for the amusement of the populace. The spectators, among whom are the princes of the Philistines, number more than three thousand, and they are congregated in, and upon, a great edifice which is mainly supported by two pillars. These are seized by the hero whose strength has returned; he pulls them down, causing the house to collapse, and perishes himself in the ruins together with all the Philistines.

It is because of certain undeniable facts that have claimed that the biblical account of the career and exploits of Samson is but a Hebrew version of the pagan myth of Heracles. This view, however, is nothing more than a superficial conjecture lacking serious proof. Still less acceptable is the opinion which sees in the biblical narrative a development of a solar myth, and which rests on little more than the admitted but inconclusive derivation of the name Samson from šemesh, “sun.” Both views are rejected by such eminent and independent scholars as Moore and Budde. The story of Samson, like other parts of the Book of Judges, is a fusion of traditions from the sources of ancient national legend. It has an ethical as well as a religious import, and historically it throws not a little light on the customs and manners of the crude age to which it belongs.

Samson, Abbot of St. Edmunds, b. at Nottingham, near Thetford, in 1135; d. 1211. After taking his M.A. in Paris, Samson returned to Norfolk and taught in the school at Bury. In 1160 the monks of St. Edmunds sent him to Rome on their behalf to appeal against an agreement of the abbey and King Henry II, and for this on his return Abbot Hugh promptly clapped him into gaol. In 1168 Samson was a fully-ordained monk, and on his election as abbot on Hugh’s death in 1182 he had filled a number of offices. He chose himself as master, pittancer, third prior, master of novices, and master of the workmen. For the rest of his life, as Abbot of St. Edmunds, Samson worked with prodigious activity for the abbey, for the town, and for the State. He regained the right of joint election of two bailiffs for the abbey and town, made a thorough investigation of the proper-
ties of the abbey, looked into the finances, cleared off arrears of debt, rebuilt the choir, constructed an aqueduct, and added the great bell tower at the west end of the abbey, and two flanking towers. He did his best for the liberties of the town; helped the townsfolk to obtain a charter and gave every encouragement to new settlers. The monks resisted Samson's claims to the rights of the townspeople. There were no match for their abbot. A hospital at Babwell, and a free school for poor scholars, were also the gifts of Abbot Samson to the townspeople. Pope Lucius III made Samson a judge delegate in ecclesiastical causes; he served on the commission for settling the dispute between Archbishop Hubert and the monks of Canterbury; and on the Royal Council in London, where he sat as a baron, frustrated the efforts of William of Longchamp to curtail the rights of the Benedictine Order. Samson died in 1211, having ruled his abbey successfully for thirty years. Carlyle in "Past and Present" has made Abbot Samson familiar to all the world; but Carlyle's fascinating picture must not be mistaken for history.

Memorials of St. Edmunds Abbey, ed. Arnold, in Rolls Series; Notes, &c., as follows: there are many editions of Jocelin de Brakelond's De robis gestis Samsonis Abbatis.

JOSEPH CLATTON.

Samuco Indians (SAMUCO), the collective name of a group of tribes in south-western Bolivia, speaking dialects of a common language which constitutes a distinct, linguistic stock (Samucan) and includes, besides the Samuco proper, the Guarana, Morotoco, Poturero, and several others. Their original country was along the northern border of the Chaco, from about 12° south latitude and from about 50° to 62° west longitude, bordering south upon the Toba and other wandering tribes of the Chaco, and west and north-west upon the celebrated mission tribes of the Chiquito and Chiriguanos.

In their original condition the Samuco were sedentary, and combined agriculture and hunting, the men returning to the woods at the close of the planting season to hunt, drying the meat for future use. They planted corn, manioc, and a species of plum. The women wove mats and hammocks (the latter from thread spun from native cotton) and made pottery. They were noted for their industry and adventurous spirit. They went entirely naked, while the women wore only a small covering about the middle of the body. Lips, ears, and nostrils were bored for the insertion of wooden plugs. The men carried bows, lances, and wooden clubs, and the women weapons were built and carried with him. Many strangled all their children after the second, and in one tribe, the Morotoco, the women seem to have ruled while the men did the household work. They were passionately given to dancing and visiting, and to the drinking of chicha, an intoxicating liquor made from fermented corn. The majority of them were Christianized through the efforts of the Jesuits in the middle of the eighteenth century, and were established in the Chiquito missions of Bolivia, particularly in the missions of San Juan, Santiago, and Santo Corazon, where many of them, through the efforts of the missionaries, adopted the prevailing Chiquito language. Their conversion was largely the work of Father Narciso Patsi. A large part of them retained their savage independence in the forests. Those of the three mission towns numbered together 5554 souls shortly before the expulsion of the Jesuits in 1767. In 1835, according to d'Orbigny, they numbered about 1250 souls, besides about 10,000 more still wild in the remote eastern forests. The same traveller describes them as robust and well built, frank, honest, sociable, and notably fond of adventure, pleasure, and gaiety, and with a sweet and euphonious language.

Samuel. See Judges; Kings, First and Second Books Of.

San Antonio, Diocese of (Sancti Antonii), comprises all that portion of the State of Texas between the Colorado and Rio Grande Rivers, except the land south of the Arroyo de los Hermanos, on the Rio Grande, and the Counties of Live Oak, Bee, Goliad, and Refugio. It embraces an area of about 90,000 square miles. The first religious missions in the territory of what is now Texas were established among the information were those of the French secular and regular priests who accompanied the expedition of La Salle. They entered Matagorda Bay in January, 1685. La Salle built a fort called Fort St. Louis on the spot subsequently occupied by the Bahia Mission; a chapel was constructed in the fort, and for two years five priests laboured here: Fathers Zeno-bius Membré, Maxime le Clercq, and Anastasius Douay, Franciscaux, and Fathers Chefdeville and Caveller, Sulpicians. They finally abandoned Texas and returned to Canada. Shortly after their departure, Franciscans from the missions of Quérétaro and Zacatecas founded missions on the Rio Grande. The pioneer Spanish priest was the Franciscan Father Damian Masanet, who accompanied the expedition of Alonso de León in 1689. He found the field so promising that he invoked the help of the civil and ecclesiastical authorities to establish a permanent mission beyond the Rio Grande. In 1690 Father Masanet crossed the Rio Grande, accompanied by Fathers Michael Fontucubri, Francis Castejas, Anthony Bordaz, and Anthony Pereira. The friendly Indians (Asinais) received them with joy, and the first mission of San Francisco de la Nueva Santa Fe was established. In 1691, and again in 1700, additional missionaries arrived from Mexico; four more missions were established, and these were maintained until 1718, when the chief mission was transferred to San Antonio.

In 1703 the Mission of San Francisco Solano was established on the banks of the Rio Grande. It was transferred in 1712 to San Ildefonso; hence, in 1713, it was moved to San José on the Rio Grande, and, finally, in 1718 to the San Antonio River, where it was established under the title of San Antonio de Valero. This last move was made by order of Father Marqués de Valero, Vicar of the New Spain. The Mission was then under the direction of Father Antonio de San Buenaventura y Olivarès. In the year 1716 nine friars from Querétaro and Zacatecas, with Father Antonio Margil de Jesús as superior, established six missions in the most northerly part of the Province of Texas, and a few years afterwards another was built near the Presidio of Nuestra Señora del Pilar de los Adayes, seven leagues from the fort of Natchitoches, in Louisiana. The mission of La Purisma Concepción was founded in 1716, among the Sanipao, Tocnres, and other tribes. A massive stone church was erected in 1731, and is still in a fair state of preservation and is used for Divine worship. It is situated one mile south of the present city of San Antonio. In 1729 the King of Spain ordered four hundred families to be transferred from the Canary Islands to Texas. Fourteen families arrived the next year, and the city of San Fernando was founded near the fort of San Antonio de Valero. A chapel was at once raised, to serve till a proper parish church could be built. The two settlements in course of time became consolidated and the modern city of San Antonio is the result. In 1744 the cornerstone of the Church of San Fernando was laid, and on 6 November, 1748, the building was dedicated to Divine worship. A portion of
this edifice still stands and serves as the sanctuary of the present Cathedral of San Fernando.

The Province of Texas was subject to the jurisdiction of Guadalajara till December, 1777, when it became part of the newly-erected Diocese of Nuevo León, or Linares. The Indian missions continued under the care of the Franciscans, many of whom won the crown of martyrdom. In 1777 Fray Pedro Ramírez, missionary at San José, was president of all the Texas missions, and by an Indult of Clement XIV was empowered to administer confirmation in all parts of Texas. On 10 April, 1794, Don Pedro de Nava, commandant-general of the north-eastern districts of Texas, of which San Antonio formed a part, published a decree by which all the missions within his jurisdiction were secularized. Nevertheless the

Maria in 1854; another Polish colony was established at St. Hedwig, near San Antonio. Bohemians planted flourishing settlements at Fayetteville, Praha, Moulton, Shiner, and other points. In all these places there are now fine churches and schools, and an influential and constantly increasing Catholic population.

On 7 June, 1844 the Diocese of Texas was created by the Holy See. Anthony Dominic Pellicer, the first bishop, was a native of St. Augustine, Florida; he was consecrated 13 December, 1844 at Mobile, Alabama, 8 December, 1847; d. 14 April, 1880. John Clairmont, bishop, was b. 12 Jan., 1828, at Anse, Department of the Rhone, France; he laboured for thirty years on the missions in eastern and southern Texas, was consecrated in the Cathedral of San Fernando, San Antonio, 8 May, 1851, and d. 15 Nov., 1894. John Anthony Forrest, third bishop, was b. 25 December, 1868, at St. Martin, Canton St. Germain, France. Like his predecessor, he spent the whole of his priestly life in arduous missionary work in southern Texas, often helping to build churches with his own hands. He was consecrated 25 October, 1885, and d. 11 March, 1911, deeply loved and revered by all.

John William Shaw, the present bishop, was b. at Mobile, Alabama, in 1863, made his principal studies in Ireland and at Rome, and was ordained priest on 26 May, 1888. On 14 April, 1910, in the cathedral at Mobile, Alabama, he was consecrated titular Bishop of Castahala and coadjutor with the right of succession to the Bishop of San Antonio. On 18 May, 1910, he was appointed administrator of the diocese, owing to the ill-health of Bishop Forest, at whose death he succeeded to the see.

San Antonio is the largest city in Texas; it was the capital of the Spanish province and from the days of the Franciscan missions has been a centre of Catholic activity in religious, educational, and charitable work. With a population of 100,000, it has thirteen Catholic parishes. Four of these, including the Cathedral of San Fernando, are for the Mexican, or Spanish-speaking population; two are for the English-speaking; two English and German, one German, one Polish, one Flemish, and two for the coloured population. There are also several hundred Italian families, scattered among the various parishes. The city is the headquarters of several religious congregations whose works extend into the western states, and to the Republic of Mexico. The Oblates of Mary Immaculate, who since their introduction by Bishop Odin in 1849 have laboured with glorious results among the poor Mexicans of Texas, have their provincial house here, and conduct a theological seminary and an apostolic college for the training of youth for the priesthood. The South-western Province of the Oblates was established in October, 1904, with the Very Rev. H. A. Constantineau, O.M.I., D.D., as first provincial. The province includes all the states of the south and west, and the Republic of Mexico. The Congregation of the Sisters of Charity of the Incarnate Word, devoted exclusively to Christian education, have their mother-house in San Antonio, from which they direct twenty-nine academies and schools in this diocese and forty-three in neighbouring dioceses in Texas, Louisiana, and Oklahoma. The Congregation of the Sisters of Charity of the Incarnate Word also have their mother-house in the city. They conduct in the diocese twenty schools and academies, three hospitals, two orphan asylums, and a home for the aged. They have also a number of hospitals and schools in neighbouring dioceses and in Mexico.

Maria, the other religious order in the city, is the Visitation of the Immaculate Heart of Mary (Vich, Spain), who have charge of the cathedral and the other Spanish-speaking congregations at San Antonio and a

Franciscans in many instances remained as pastors, though they received their jurisdiction from the bishop, like other parish priests. Their missions subsisted in a flourishing state till about 1813, when they were suppressed by the Spanish Government, and the Indians dispersed. In 1839 Gregory XVI established a prefecture Apostolic in Texas and appointed the Very Rev. J. Timon prefect Apostolic. In 1840 the Rev. John M. Odin visited Texas as vice-prefect Apostolic. Through his efforts, warmly supported by the minister of France, de Saligny, the congress confirmed to "the Chief Pastor of the Roman Catholic Church in the Republic of Texas" the churches of San Fernando, the Alamo (San Antonio de Valero), La Purísima Concepción, San José, San Juan Capistrano, San Francisco de la Espada, Goliad, Victoria, and Rufugio, with their grounds, the latter not to exceed fifteen acres each.

A Bull erecting the Republic of Texas into a vicariate Apostolic was published by Gregory XVI on 10 July, 1841, and the Right Rev. John M. Odin was appointed Bishop of Claudiopolis and assigned to the vicariate. Religion, which had languished since the secularization of the missions and the departure of the Franciscan monks, now began to revive. New churches were built, and some of the old mission buildings restored; religious orders of men and women were introduced from Europe; schools, hospitals, and charitable institutions were established. Colonists from Europe and various parts of the United States began to pour in and settle upon the wide and fertile plains of eastern and southern Texas. A large proportion of the European immigrants were Catholics. Germans founded prosperous settlements at New Braunfels in 1844, at Goliad in 1843, and later at D'Hanis, Fredericksburg, High Hill, and other places. A colony of Poles, led by the Rev. Leopold Moczygomba, O.F.M., founded the thriving settlement of Panina.
number of rural Mexican missions; the Society of Mary (Dayton, Ohio), who conduct two colleges and a parish school at San Antonio and a college at Victoria; the Josephite Fathers, in charge of two parishes for coloured Catholics in the city; the Ursuline Nuns, two large academies; the Sisters of the Holy Ghost, dedicated to the education of both sexes; the Sisters of Mary and the Sisters of Our Lady of Charity of Refuge; the Sisters of St. Theresa of Jesus—all at San Antonio. The Sisters of the Incarnate Word and Blessed Sacrament have a fine academy at Victoria, and conduct schools at Hallettville and Shiner; the Sisters of Mercy, an academy in the city; the Sisters of the Holy Cross (Notre Dame, Indiana) conduct a large college at Austin.

Statistics (1911): priests, 130 (several, 69; religious, 61); brothers, 65; sisters, 607; parochial schools, 28; pupils, boys 1,290, girls 1,628; colleges and academies (many of which serve also as parish schools), 97; students, 2,173, girls 2,225; theological seminaries, 1; students, 12; Apostolic college, 1; students, 49; orphan asylums, 2; inmates, boys, 108, girls, 105; house of refuge, adult inmates, 68; child inmates, 17; total number of youths receiving Catholic training, 7,763; number of patients yearly at home for aged, 1; inmates, 74; churches with resident priests, 63; missions with churches, 71; total number of churches, 134; stations, 78; chapels, 14; Catholic population, about 96,500.

San Carlos de Ancud, Diocese of (Sancti Caroli Ancudenses), the most southern of the Chilian dioceses. It extends from the River Cautín on the north to Cape Horn in the south; contains the province of Valdivia, Llanquihue, and Chiloé, part of the Province of Cautín and the Territory of Magallanes; has an area of more than 77,220 square miles, and a population of 371,856 inhabitants, 356,267 of whom are Catholics. San Carlos de Ancud (3,500 inhabitants) is the episcopal city, and the other important cities of the diocese are: Valdivia (15,000 inhabitants); Puerto Montt (5,500 inhabitants); Osorno (7,600 inhabitants); and Punta Arenas (12,300 inhabitants). The diocese is divided into 48 parishes. The cathedral chapter is composed of the dean, archdeacon, dortor (diocesan) and canons, who are directed by the Jesuits and has 106 students. There are 69 secular priests and 86 regular. The male religious orders have 30 houses and are represented by 141 members, the orders being the Jesuits, Franciscans, Capuchins, Discalced Carmelites, Salesians, and Brothers of the Christian Schools. The female religious orders have 18 houses and 95 members. In Puerto Montt there is a college directed by the Jesuits, and an industrial school in charge of the Christian Brothers; in Valdivia there is a commercial school under the care of the Salesians. There are 5 girls under the care of the Institute of the Immaculate Conception of Paderborn, and the Salesian Sisters conduct another; there are also 12 primary schools, five of which are for the Indians; all these schools are in charge of religious teachers. There are 2 orphan asylums, and 6 hospitals in charge of nuns. More than 3,500 children are taught in these schools. The churches and chapels number 256. The Prefecture Apostolic of Arauco is situated within the confines of the diocese, and has 19 missions in charge of German Capuchins from the Province of Bavaria; in these missions there are 18 churches and 13 chapels. The native population of this prefecture is about 60,000. The Territory of Magallanes belongs to the Prefecture Apostolic of Southern Patagonia, under the care of the Salesians. The Prefect Apostolic, Mgr. José Fagnano, lives in Punta Arenas. The missionaries have evangelized the Indians of Patagonia and Tierra del Fuego; the latter are composed of three races, Onas, Yaganes, and Alacalufes, and are greatly reduced in numbers.

The diocese was separated from the Diocese of Chiloé on Dec. 4, 1884. Sedejó by the Bull "Ut libenter", and made a suffragan of the Archdiocese of Santiago. Five bishops have governed the diocese: D. Justo Donoso (1845–53); Fray Francisco de Paula Solar (1857–82); Fray Juan Agustín Lucero (1887–97); D. Ramón Angél Jara (1898–1910); Fray Pedro Armengol Valenzuela. Three diocesan synods have been held, 1835, 1857, and 1897, and are held in the diocese. The clergy annually hold conferences from April to October to discuss moral and ethical questions, and make an annual spiritual retreat of eight days. In almost all the parishes a nine day's mission is given to the faithful each year to prepare them for the paschal communion. The people are law-abiding and industrious, and they observe the principles and practices of their religion. Each parish has pious associations and confraternities, such as that of the Blessed Sacrament, and also various associations for the improvement of morals and for mutual social support.

Sánchez, Alonso, b. in Mondejar, Guadalajara, Spain, in 1547; d. at Alcalá, 27 May, 1593. He entered the Society of Jesus at Alcalá on 27 May, 1565. He was rector of the college of Navaracorto, taught grammar for five years, and in 1579 went to the mission of Mexico, where he was rector of the seminary. Early in 1581 he set out for the Philippines with Bishop Hainle (see Sedejó) and his companion, Antonio Sedejó, and a lay brother were the first Jesuits in these islands. The bishop made Sánchez his counsellor, appointed him to write the acts of the Synod of Manila, and, when Sánchez was sent on an embassy to China, interrupted the synod until Sánchez had returned. Twice Sánchez was despatched on official business to China, where he met celebrated Jesuit missionaries of that country and from Japan. He was thus able to publish later an interesting and curious account of the state of Christianity in China at the end of the sixteenth century. By the unanimous vote of all the Spanish officials, civil and religious, of the merchants and of the leading citizens, Sánchez was chosen to go to Madrid as representative of the colony in 1586. Sánchez's mission to Philip II was very successful, his arguments moving the king to retain the islands, which many of his advisors had been urging him to abandon. From Madrid he went to Rome, and was there welcomed by Pope Sixtus V, from whom he received many privileges for the Church in the Philippines. In a Brief of 28 June, 1591, Gregory XIV praises the apostolic labours and writings of Sánchez, calling him a true defender of the authority and rights of the Holy See. Innocent IX committed to him the bull "In hac cœnitute", in which he lauds his work. Clement VIII at his request granted various favours to the bishop and clergy in the islands. Sánchez gave an account of the Jesuit missions in the Philippines to Aquaviva, the General of the Society. It had been proposed to withdraw the fathers from the Philippines; but Aquaviva, following the plan proposed by Sánchez, determined that the Society should remain, and made the Manila residence a college with Sedejó as its first rector. Sánchez now asked to be allowed to return to the Philippines, but was sent instead as visitor to some of the Spanish missions of the Society of Jesus, where serious domestic and external troubles menaced the well-being of the entire Society. The singular tact of Sánchez gained the day; he expelled some influential but
turbulent members from the Society, and won over the king, the Inquisition, and prominent personages, so that they became better disposed towards the Society than ever before. Sánchez was elected one of the representatives of the Province of Toledo to the Fifth General Congregation of the Society, but he remarked that he had a more important journey to make than the one to Rome. He died twelve days later on the feast of the Ascension. Distinguished for unusual mental gifts, Sánchez was no less remarkable for his sanctity of life; his penances were those of an anchorite, his prayer as prolonged as that of any contemplative. His writings include chiefly short treatises, memorials, and the like. A catalogue and summary of forty-one of these, drawn up by the author, is given by Colín.

P. M. FINEGAN.

Sánchez, Alonzo Corio, b. at Benyafyro, Valencia, Spain, in 1513 or 1515; d. at Madrid, 1590. His name Ceoilo is certainly Portuguese, and was probably that of his mother. From his intimate connexion with Portugal, Philip II constantly referred to him as his “Portuguese Titian.” We have no definite information that Sánchez was ever in Italy, but he certainly carefully copied the paintings of Titian under the influence of Sir Antonio Mor, who was his great master. In 1552 he accompanied him to Lisbon when Mor was sent by Charles V to paint the portraits of the royal family, and Sánchez then entered into the service of Don Juan of Portugal, who had married Joanna, the daughter of Charles and the sister of Philip II. On the death of the Infante Don Juan, his widow recommended her painter to her brother Philip, and as Mor had just left the Court and retired to Brussels, Philip II appointed Ceoilo pintor de caballero. He was one of the earliest of the Spanish court portrait-painters, and as his work was in great demand he became a rich man. He painted Gregory XIII and Sixtus V, many of the grandees of Spain, Cardinal Farnese, and the Dukes of Florence and Sa- voy. He also executed considerable work at the Escorial and painted the triumphal arch erected at Madrid for the entry of Anne of Austria, wife of Philip II. Perhaps his most notable portrait, however, was that of St. Ignatius Loyola, executed from casts taken twenty-nine years before, and from instructions and sketches made by one of the fathers. His greatest portrait was that of his friend, Father Siguenza, which was engraved by Selma. He was buried at Valladolid, where he had founded a home for foundling children. His epitaph was written by the Marqués de Véga. Sánchez was not anoublesse goat of Titian, and his portraits are powerful and lifelike. There is one in the National Portrait Gallery in London, another at Vienna, three at Brussels, and several at Madrid. One of the churches of that city also possesses a screen decorated by him and intended to be used during Holy Week. His pictures have always been highly esteemed in Spain, where they have sold for very large sums of money on the few occasions when they came into the market. Ceoilo painted Philip II in almost every kind of costume, on foot and on horseback, and in many attitudes, but he is not generally considered to have been as successful a royal patron as he was with some of the ecclesiastics, whose portraits he drew in noble proportions.

GEORGE CHARLES WILLIAMSON.

Sánchez, José Bernardo, b. at Robledillo, Old Castile, Spain, 7 September, 1778; d. at San Gabriel, California, 15 January, 1833. He became a Franciscan on 9 October, 1794, and joined the missionary college of San Fernando, Mexico, in 1803, going to California the following year. He was stationed at Mission San Diego (1804–20); Mission Pala (1820–1); and at San Gabriel. In 1806, as chaplain, Fr. Sánchez accompanied a military expedition against the savages. In 1821 with Fr. Prefect Mariano Payeras he went with an exploring expedition into the interior to search for new mission sites. From 1827 to 1831 he reluctantly held the position of presidente of the missions and of vicar forane to the bishop. He was a very pious and energetic missionary, but dreaded the office of superior. His incessant appeals for relief were at last granted, but he survived only two years. During his term he vigorously opposed Governor Escondia’s secularization scheme. In a long series of critical notes he showed that the plan would result in the destruction of the missions and the ruin of the neophytes. “As far as it concerns me personally”, he wrote, “would that it might be to-morrow, so that I might retire between the four walls of a cell to weep over the time I wasted in behalf of these unfortunate.” There is no doubt that the sight of the inevitable ruin hastened his death. His remains were buried at the foot of the altar of San Gabriel Mission.

ZEPHYRHIN ENGELHARDT.

Sánchez, Thomas, b. at Cordova, 1650; d. in the college of Granada, 9 May, 1610. In 1567 he entered the Society of Jesus, and his admittance on account of an impediment in his speech; however, after implored delivery from this impediment before a highly venerated picture of Our Lady at Cordova, his application was granted. He held for a time the office of master of novices at Granada. The remainder of his life was devoted to the composition of his works. His life was marked by inflammation of the lungs. His contemporaries bear testimony to the energy and perseverance with which he laboured towards self-perfection from his novitiate
until his death. His penitential seal raved that of the early anchorites; and, according to his spiritual director, he caused, in his baptismal innocence to the great joy of the Rector of the College of Granada and later declared "venerable," attests the holiness of Sanchez in his letter to Francisco Suarez, a translation of which may be found in the Bibliothèque de Bourgogne at Brussels.

Sanchez belongs to those who are much abused on account of their works. The chief work of Sanchez, and the only one which he himself edited, is the "Disputationes de sancti matrimonii sacramentos". The first edition is said to have appeared at Genoa in 1602; but this can have been only the first folio volume, for which permission to print was secured in 1599, as the two succeeding volumes contain both in them, and the author's dedication the date 1603. The first complete edition was, according to Sommervogel, that of Madrid, 1605; later followed a series of editions printed at different places both before and after the author's death. The last edition seems to have been issued at Venice in 1754. The work had an extraordinary fate, inasmuch as some editions of the third volume have been placed on the Index of Prohibited Books, the grounds being not the doctrine of the author, but the perversion of the work and the suppression of what the author taught. Even in the case of the Index of Prohibited Books revised by L. X., till his Constitution "Officiorum ac sanctitatis," we may still read: "Sanchez, Thom. Disputationum de Sacramento Matrimonii tom. III. ed. Venetiae, sive alicubi, a quibus l. 8 disp. 7 detractus est integer num. 4, Decr. 4 Febr. 1627." This number is omitted from the edition of Venice, 1814; it treats of the power of the pope to grant a valid legitimation of the off-spring of marriages invalid only through canon law through the so-called sanctio in radice. The author's mode of expression shows a not always pleasing vehemence. As it deals with every possible point in the subject, it has often, quite unjustifiably, drawn upon Sanchez the charge of immorality.

Soon after the death of Sanchez a second work appeared, "Opus morale in praecepta Decalogi;" the first folio volume was prepared by the author himself, but the second volume, as well as the whole of his third work, "Consilia morala," had to be compiled by script notes. These works appear through a series of different editions, and likewise drew upon themselves the accusation of laxity, especially with reference to the question of what is called "mental reservation" (restrictio mentalis). It is true that we find in Sanchez (Op. mor. in praecepta decalogi, lib. ii, 1618) the thesis condemned by Innocent XI: "If anyone, by himself, or before others, whether under examination or of his own accord, whether for amusement or for any other purpose, should swear that he has not done something which he has really done, having in mind something else which he has not done, or some way of doing it other than the way he be employed, or anything else that is true: he does not lie nor perjure himself." The thesis rests on a peculiar definition of a "lie," which indeed is none too easy to define, and has engaged the ingenuity of scholars from the time of St. Augustine to to-day. Sanchez did not regard every mental reservation as always permissible, but was simply discussing the sinfulness of the lie (or oath) in itself; that some other sin—even grievous, according to the circumstances—may have been involved in the action, he does not deny.

According to Werns (Jus decretalium, IV, n. 20), Sanchez's work "De matrimonio" is even to-day reckoned by the Roman Curia among the classical works on marriage.

SANCHEZ 428

SANCTITY

Sanchez de Arévalo, Rodrigo, See Arevalo.
San Cristóbal de la Laguna, See Teneriffe, Diocese of.
San Cristóbal de la Habana, See Havana, Diocese of.
Sanctifying Grace. See Grace.

Sanction (Lat. sancire, same root as sanctus) signifies primarily the authoritative act whereby the legislator sanctions a law, i.e., gives it value and binding force for its subjects. Hence, objectively, the law itself is called sanction inasmuch as it is based on the consent of the subjects; thus ecclesiastical laws are often called sanctiones canonicas. In more modern language every measure is called a sanction which is intended to further the observation of the law by subjects, whether the reward to whomsoever fulfills it, or the penalty or punishment inflicted or at least threatened for nonfulfillment, whether it relates to prescriptive laws which require something to be done, or to prohibitive laws which require that something be omitted. These sanctions in turn may result from the very nature of the law, which are internal sanctions like those of the penal law, or they may be added by a positive act of the legislator, and these are external sanctions. Hence sanction is called moral, psychological, legal, or penal, according to the origin or the nature of it. (See Ethics: Law; Punishment.) A. Boudinhon.

Sanctity, Mark of the Church. — The term "sanctity" is employed in somewhat different senses in relation to God, to individual men, and to a corporate body. As applied to God it denotes that absolute moral perfection which is His by nature. In regard to men it signifies a close union with God together with the moral perfection resulting from this union. Hence holiness is said to belong to God by essence, and to creatures only by participation. Whatever sanctity they possess comes to them as a Divine gift. As used of a society, the term means that this society and its members, and is possessed of means capable of securing that result, and (2) that the lives of its members correspond, at least in some measure, with the purpose of the society, and display a real, not a merely nominal holiness.

The Church has ever claimed that she, as a society, is holy in a transcendent degree. She teaches that this is one of the four "notes" viz., unity, catholicity, apostolicity, and sanctity, by which the society founded by Christ can be readily distinguished from all human institutions. It is in virtue of her relation to the Person and work of Christ that this attribute belongs to the Church. She is (1) the fruit of the Passion—the kingdom of the redeemed. Those who remain outside her are the "world" which knows not God (1 John, iii, 1). The object of the Passion was the redemption and sanctification of the Church: "Christ also loved the Church and gave Himself for it: that He might sanctify it, cleansing it by the laver of water in the word of life." (Eph., v, 25, 26). Again (2) the Church is the body of Christ. He is the head of the mystical body: and supernatural life—the life of Christ Himself—is communicated through the sacraments to all His members. Just as the Holy Ghost dwelt in the human body of Christ, so He now dwells in the Church: and His presence is so intimate and so efficacious that the Apostle can even speak of Him as the soul of the mystical body: "One body and one Spirit" (Eph., iv, 4). Thus it follows as a necessary consequence from the two marks of the Church and her foundation: that as a society she must possess means capable of producing holiness: that her members must be characterized by holiness: and that this endowment of sanctity will afford a ready means of distinguishing her from the world.
It is further manifest that the Church's holiness must be of an entirely supernatural character—something altogether beyond the power of unassisted human nature. And such is in fact the type of sanctity which Christ endows on His Church and its members. (1) The virtues which in the Christian ideal are the most fundamental of all, lie altogether outside the scope of the highest pagan ethics. Christian charity, humility, and chastity are instances in point. The charity which Christ sets forth as the sum and substance of all the works of the Good Samaritan—a charity which knows no limits and which embraces enemies as well as friends—exceeds all that moralists had deemed possible for men. And this charity Christ requires not of a chosen few, but of all His followers. Humility, which in the Church is the very foundation of all sanctity (Matt., xviii, 3), was previously to His teaching an unknown virtue. The sense of personal unworthiness in which it consists, is repugnant to all the impulses of unregenerate nature. Moreover, the humility which Christ demands, supersedes as in its foundation a clear knowledge of the guilt of sin, and of the mercy of God. Without this it cannot exist. And these doctrines are sought in vain in other religions than the Christian. In regard to chastity Christ not merely warned His followers that to violate this virtue even by a thought, was a sin (Matt., v, 28). He went yet further. He extorted those of His followers to whom the grace should be given, to live the life of virginity that thereby they might draw nearer to God (Matt., xix, 12).

(2) Another characteristic of holiness according to the Christian ideal is love of suffering; not as though pleasure were evil in itself, but because suffering is the great means by which our love of God is intensified and purified. All those who have attained a high degree of holiness have learnt to rejoice in suffering, because by it their love to God was freed from every element of self-seeking, and their lives conformed to that of their Master. Those who have not grasped this principle may call themselves by the name of Christian, but they have not understood the meaning of the Cross. (3) It has ever been held that holiness when it reaches a sublime degree is accompanied by miraculous powers. And Christ promised that this sign should not be lacking to the Church (Mark, xvi, 17, 18; John, xiv, 12).

Such in brief outline is the sanctity with which Christ endowed His Church, and which is to be the distinctive mark of the faithful. It is, however, to be noted that He said nothing to suggest that all His followers would make use of the opportunities thus afforded them. On the contrary, He expressly taught that His flock would contain many unworthy members (Matt., xiii, 30, 48). And we may be sure that as within the Church the light are brightest, so there too the shadows will be darkest—corruptio optimi pessimae. An unworthy Catholic will fall lower than an unworthy pagan. To show that the Church possesses the note of holiness it suffices to establish that her teaching is holy: that she is endowed with the means of producing supernatural holiness in her children: that, notwithstanding the unfaithfulness of many members, a vast number do in fact cultivate a sanctity beyond anything that can be found elsewhere: and that in certain cases this sanctity attains so high a degree that God honours it by signs of His presence.

It is not difficult to show that the Catholic and Roman Church, and she alone, fulfils these conditions. In regard to her doctrines, it is manifest that the moral law which she proposes as of Divine obligation, is more lofty and more exacting than that which any of the sects has ventured to require. Her vindication of the indissolubility of marriage in the face of a licentious world affords the most conspicuous instance of this. She alone maintains in its integrity her Master's doctrine that every other religious body without exception has given place to the demands of human passion. In regard to the means of holiness, she, through her seven sacraments, applies to her members the fruits of the Atonement. She pardons the guilt of sin, and nauishes the faithful from the Blow of Death and the Blow of Christ. Nor is the justice of her claim less manifest when we consider the result of her work. In the Catholic Church is found a marvellous succession of saints whose lives are as beacon-lights in the history of mankind. In sanctity the supremacy of Bernard, of Dominic, of Francis, of Ignatius, of Theresa, is as unquestioned as is that of Alexander and of Cesar in the art of war. Outside the Catholic Church the world has nothing to show in which any degree compare with them. Within the Church the succession never fails.

Not only the knowledge stands alone. In proportion to the practical influence of Catholic teaching, the supernatural virtues of which we have spoken above, are found also among the rest of the faithful. These virtues mark a special type of character which the Church seeks to realise in her children, and which her little favour among the other claimants to the Christian name. Outside the Catholic Church the life of virginity is contumelled; love of suffering is viewed as a medieval superstition; and humility is regarded as a passive virtue ill-suited to an active and pushing age. Of course it is not meant that we do not find many individual instances of holiness outside the Church. God's grace is universal in its range. But it seems beyond question that the supernatural sanctity whose main features we have indicated, is recognised by all as belonging specifically to the Church, while in her alone does it reach that sublime degree which we see in the saints. In the Church too we see fulfilled Christ's promise that the gift of miracles shall not be wanting to His followers. Miracles, it is true, are not sanctity. But they are the aura in which the highest sanctity moves. And from the time of the Apostles to the nineteenth century the lives of the saints show us that the laws of propagation have been fulfilled at His bidding. Or, in numberless cases the evidence for these events is so ample that nothing but the exigencies of controversy can explain the refusal of anti-Catholic writers to admit their occurrence.

The proof appears to be complete. There can be as little doubt as which Church displays the note of sanctity, as there is in regard to the notes of unity, catholicity and apostolicity. The Church in communion with the See of Rome and it alone possesses that holiness which the words of Christ and His Apostles demand.

**Sanctorum Meritibus**, the hymn at First and Second Vespers in the Common of the Martyrs in the Roman Breviary. Its authorship is often attributed to Rabanus Maurus (d. 856), Archbishop of Mainz—e.g. by Blume (cf. HYMNODY, v, 2), who thinks his hymns show originality and "no small poetic power". De Nive also (Anselm, hymnos, mart. l. 128) gives a transcrption. The stanzas, in classical prosody, comprises three Aeolician lines and one Glyconic. In Horace such a stanza indicates a grave and thoughtful frame of mind; but the breviary hymns using the stanzas are usually suggestive of triumphant joy—

**SANCTORUM**
e. g. the “Festivis resonant compita vocibus” (Most Precious Blood), the “Te Joseph celebrat armis ecellitum”, and the “Sacris solemnibus” (q. v.) in rhythmical verse (q. v.). In his “Asclepiadis Chant”, New York, 1906, p. 80), places hymns in this measure among those “in which the verbal accent preponderates and the metrical accent only makes itself noticeable in certain places (particularly in the fourth line and when a line closes with a word accentuated on the penultimate)”. He illustrates the rhythmical verse by Italics. Applying his scheme to the Asclepiadische lines we should have: Sa-necto-remi meri-tis in-cly-ta gau-dii-a. His illustration of the fourth line (Glyconic) is: Vi-ceto-rem ge-nus o-phi-mum. The “Grammar of Plainsong by the Benedictines of Stanbrook (London, 1905, p. 61) remarks that the long verses have the accents on the third, seventh, and tenth syllables; and the short verse, on the third and sixth syllables; and illustrates this scheme by the last two lines of the stanza (the acute accent marking the rhythmical stress):

Gliscencs fés animus prémere cénibus Sanctàrum génus óptimnum.

In the following illustration (Holly, “Elementary Grammar of Gregorian Chant”, New York, 1904, p. 44) the acute accent indicates the tonic accent of the word; the grave accent, the place where the rhythmical or metrical accent fails; the circumflex, the occurrence on a syllable of both metrical and tonic accents:

Sanctorùm mérita inétya gaudìa Pangánus sœci, gestáque fórtiá; Gliscéna fés animus prémere cénibus Victórum génus óptimnum.

Obviously, this is refractory for singing or public recitation. Dreves (loc. cit., pp. 180–1) notes that several references are made to the hymn by Hincken of Reims, one of the most interesting being his objection to the theology of the last stanza (“Te trina Deitae”, subsequently changed into the present form: “Te summa O Deitas”). Hincken admits that he knew not the author of the hymn which “some people end with the chant or rather blasphemously [a quibusdam cantatur vel potius blasphematur] “Te trina Deitas!” The phrase objected to was nevertheless sung in the dogology of the hymn. In the revised version of the Church still sings it in the dogology of the “Sacris solemnibus” (q. v.) of the Angelic Doctor. The Paris Breviary kept the metre but entirely recast the hymn, writing the first stanza thus:

Christi-martyribus debita nos deecet, Virtus memoriae mors, memoria noster;

Quo nec blandidi, nec potuit minis.

Fallax vincere saculum.

Sanctuary, a consecrated place giving protection to those fleeing from justice or persecution; or, the privilege of taking refuge in such consecrated place. The right of sanctuary was based on the inviolability attaching to things sacred, and not, as some have held, on the example set by the Hebrew cities of refuge. It was recognized under the Code of Theodosius (399) and later by that of Justinian. Papal sanction was first given to it by Leo I, about 460, though the first Council of Orange had dealt with the matter in 441. The earliest mention of sanctuary in England was in a code of laws promulgated by King Ethelbert in 616. The right of asylum was originally confined to the church itself, but in course of time its limits were extended to the precincts, and sometimes even to a larger area. Thus, at Beverley and Hexham, the boundaries of sanctuary extended throughout a radius of a mile from the church, the limits being marked by “sanctuary crosses”, some of which still remain. In Norman times there were two kinds of sanctuary in England, one belonging to every church by prescription and the other by special royal charter. The latter was considered to afford a much safer asylum and was enjoyed by at least twenty-two churches, including Battle, Beverley, Colchester, Durham, Hexham, Norwich, Ripon, Wells, Winchester, Westminster, and York. A fugitive convicted of felony and taking the benefit of sanctuary was afforded protection for from thirty to forty days, after which, subject to certain severe
conditions, he had to "abjure the realm", that is, leave the kingdom within a specified time and take an oath not to return without the king's leave. Violation of this oath by a sanctuary was punishable by excommunication. In some cases there was a stone seat within the church, called the "frith-stool", on which it is said the seeker of sanctuary had to sit in order to establish his claim to protection. In others, and more commonly, there was a large ring or platform on which the holding of which gave the right of asylum. Examples of these may be seen at Durham cathedral, St. Gregory's, Norwich, and elsewhere. The ecclesiastical right of sanctuary ceased in England at the Reformation, but was after that date allowed to certain non-ecclesiastical precincts, which afforded shelter solely to individuals. The houses of ambassadors were also sometimes quasi-sanctuaries. Whitefriars, London (also called Alstia), was the last place of sanctuary used in England, but it was abolished by Act of Parliament in 1697. In other European countries the right of sanctuary ceased towards the end of the eighteenth century.

PROCEED in Archaeologia, VIII (London, 1877); MAIRENOW, Sacred Architecture (Stafford, 1887); nicenburch, Das Aposroph (Dortm. 1853); Cyprian Alston.

Sanctuary, the space in the church for the high altar and the choir. It is variously designated as the nave or concha (from the shell-like, hemispherical dome), and since the Middle Ages especially it has been called "choir", from the choir of singers who are here stationed. Other names are presbytery, concusus chori, tribuna or tribunal, sacer, sanctuary, sanctum, sanctuarium. From the architectural development the sanctuary has undergone manifold alterations. In Christian antiquity it was confined to the apse, into the wall of which the stone benches for the clergy were let after the fashion of an amphitheatre, while in the middle rose up the bishop's chair (cathedra). It would however be wrong to believe that this ancient Christian sanctuary had always a semicircular formation, since recent investigations (especially in the East) have revealed very various shapes. Over a dozen different shapes have already been discovered. In Syria the semicircular development advances very little or not at all from the outer wall, while beside it and especially in chapels, a space for the offering (prothesis) and for the clergy (diacronium). The sanctuary was often formed by three interconnected apses ( Dreiconchennystem), the quite straight termination also occurs. An important difference between the Roman and Oriental churches consists in the fact that in the latter the wall of the sanctuary was interrupted by a window through which the sunlight freely entered, while the windowless Roman apec was shrouded in a mysterious darkness.

As the semicircular niche could no longer in all cases hold the numbers of the higher and lower clergy, a portion of the middle nave was often enclosed with rails and added to the sanctuary, as may be seen today in the San Clemente at Rome. Outside Rome this necessity of enlarging the sanctuary was met in another way, by introducing between the longitudinal (or cross) aisle and the space a compartment or square, the basilica thus receiving (instead of the Roman T-shape) the form of a cross. This innovation was of far-reaching importance, since the sanctuary could not develop freely. This development proceeded from the beginning to the close of the Middle Ages in what may be declared as an almost wanton fashion. The idea of introduction has been for a long time the subject of a violent literary feud, since it is most intimately connected with the development of the cruciform arrangement of churches. Some investigators hold that this form is first found in the Monastery of Fulda un-der Abbot Bangulf about the year 800; according to others it occurred before the time of Charlemagne in the French monasteries of Jumièges and Reims. In various times Straygowski maintained that both views are incorrect, and that the extended sanctuary, or in other words the cruciform church, was already common in the early Christian period in Asia Minor, and was thence transplanted to the West by Basilian monks as early as the fourth or fifth century.

Sanctuaries were important for another reason. They occurred during the Carolingian Renaissance, consisted in the introduction or rather transplantation from the East to the West of the "double sanctuary". By this is meant the construction of a second sanctuary or west choir opposite the east; this arrangement was found even in ancient times in isolated instances, but its introduction in the case of larger churches gradually became universal in the West. Concerning the reasons for this innovation various theories have been put forward. It must, however, be recognized that the reasons were not everywhere the same. They were three in particular: the duplication of the titular saints, the construction of a place for the remains of a saint, and the need of a nuns' or winter choir. In addition, Straygowski has also maintained the influence exercised by the change of "orientation", that is the erection of the altar, which in the East originally stood in the west of the church, while the second reason seems to have given incentive most frequently to the construction of the second choir. Thus in 819 Abbot Amiger built a west choir with a crypt to receive the remains of St. Boniface; in Mittelsell (Richemau) this choir was constructed for the relics of St. Mark, in Echternach (1000) for the remains of St. Willibald. Especially suitable for nun's convents was the west choir with a gallery, since from it the nuns could follow Divine Service unobserved; for this reason the church built at Essen (Prussia) in 874 received a west choir in 947.

The increase of the clergy, in conjunction with the striving (in the Romanesque period) after as large crypts as possible, led to the repeated increase of the sanctuary, which, however, exercised a very prejudicial influence on the architectural arrangement of space. The sanctuary was extended especially westwards—thus in the longitudinal aisle at times also in the transverse axis of the church. Some of this excessively great extension are supplied by the cathedrals of Paderborn and Speyer. The walls of this sanctuary, which had thus become a formal enclosure, were often decorated with Biblical reliefs; here, in fact, are preserved some very important Romanesque reliefs, especially those of the last church at Bamberg and in the Church of St. Michael at Hildesheim. But even in the Romanesque period began the war against this elevated sanctuary, waged mainly by the monks of Hirsau (Germany), then highly influential, and the Cistercians. The former as opponents of the crypts, restored the sanctuary to the same level as the nave or made it only a few steps higher; they also ended the sanctuary in a straight line, and gave it only a small round apse. More important was the change made by the Cistercians, who, to enable so many priests to read Mass simultaneously, resolved the eastern portion into a number of chapels standing in a straight line at either side of the sanctuary. This alteration began in the mother-house of Citeaux, and extended with the monks everywhere even to the East.

These alterations paved the way for the third great transformation of the sanctuary: this was accomplished by Gothic architecture, which, in consequence of the improved vaults of the fourth and fifth orders, made the side aisles around the choir, as the Romanesque architects had already done in individual cases. The sanctuary indeed was not thereby essentially altered, but it was now accessible on all sides, and the faithful could attain to the immediate vicinity of the high
altar. When it was not separated by a wall, an entirely free view of the sanctuary was offered. For the most part, however, the termination of the sanctuary with walls was retained, while in front was still erected the screen, which enjoyed in the Gothic period its special vogue. This arrangement of the sanctuary is usually found in the great cathedrals after the French Revolution, and may be designated as the "cathedral type," although it also occurs in the larger parish and monastery churches. Frequently the sanctuary has an exceptional length; this is especially the case in England, and influenced the architectonic arrangement of space if the sanctuary was enclosed with walls. Its effect was more un favourable in the canon's choir (called the Trascoro) in the cathedrals of Spain, which was transferred to the middle nave as a separate construction and was cut off by high walls with gated entrances. This enclosure was most magnificently decorated with architectural and other ornamentations, but it entirely destroyed the view of the glorious architecture. Side by side with this "cathedral type" was retained the old simple type, in which the sanctuary was not accessible on all sides; this was found especially in parish churches and in the churches of the mendicant orders. When the church had three naves, the choir of the side naves lay beside the chief choir. This kind of a sanctuary remained the most popular, especially in Germany and Italy.

The Renaissance to a great extent restored to the sanctuary its original form. In the effort to increase the middle nave as much as possible, Renaissance architecture in many cases neglected the side naves or limited them to the narrowest aisles. The free approach to the sanctuary from all sides thus lost its justification. The sanctuary necessarily received a great breadth, but lost its earlier depth. In its preference for bright and airy spaces, the Renaissance also abandoned the method of separating the sanctuary from the rest of the church. In the subsequent period, the latter was replaced by the low Communion bench. Thus a person entering the church through the main door commanded a free view of the sanctuary, which, especially in Italy, was gloriously decorated with marble incriptions. As the sunlight, entering unchecked through the cupola covering the intersection, brightly illuminated the edifice, the effect was entirely different from that awakened by the Romanesque and Gothic sanctuaries. In the medieval church the sanctuary was shut off from the congregation and was inaccessible as the "sanctum sanctorum," i.e., the Holy of Holies in the Old Testament; the sanctuary of the Renaissance church stands out before us in a brilliance of light like Mount Tabor, without blinding our gaze. We believe that we are nearer the Deity, our hearts are filled with joyous sentiments, so that we might cry out with the Apostle Peter: "It is good for us to be here." In the medieval church, on the other hand, we are penetrated with a mysterious awe and like Moses feel urged to take off our shoes, for this is a holy place.

Sanctus.—I. HISTORY. The Sanctus is the last part of the Preface in the Mass, sung in practically every rite by the people (or choir). It is one of the elements of the liturgy of which we have the earliest evidence. St. Clement of Rome (d. about 94) mentioned the Sanctus, who joined the Jews in prayer, and it is not unreasonable to say that it is also sung in church; at this least seems the plain meaning of the passage: "for the Scripture says . . . Holy, holy, holy Lord of hosts; full is every creature of his glory." And we, by conscience, gathered together in one place in connection with the Word of Truth, from one mouth, that we may become sharers in his great and glorious promises" (I Cor., xxxiv, 6-7). It seems clear that what the people cry is the text just quoted. Clement does not say at what moment of the service the people cry these words; but again we may safely suppose that it was at the end of what we call the Preface, the place at which the Sanctus appears in every liturgy, from that of "Apost. Const.," VIII, on. The next oldest witness is Origen (d. 254). He quotes the text of the Sanctus (after the twelfth century) which is announced, wherefore the whole earth is full of his glory" (In Isa., hom. I, n. 2). There is nothing to correspond to this in the Prophet. It seems plainly an allusion to liturgical use and so agrees very well with the place of the Sanctus. The Anaphora of St. Athanasius (fourth century) gives the Sanctus almost exactly in the form of the Alexandrine Liturgy (Punk., "Didascalie", Paderborn, 1905, II, 174), but says nothing about its being sung by the people. From the fourteenth century we have abundance of testimony for the Sanctus in every liturgical centre. In Egypt St. Athanasius (d. 373) mentions it (Expos. in Ps., cii, 5 P., XXVII, 424); at Jerusalem St. Cyril (d. 373) (Catech. myst., V, 6), and at Antioch St. John Chrysostom (d. 407) alludes to it (in Ps. xxxiv, n. 6, P. G., LV, 393). Ter- turnian (d. about 230) ("de Oratione," 5) and Victor of Ancyra (d. 198) ("Pastor," XVIII, 23) quote it in Africa; Germanus of Paris (d. 576) in Gaul (in Dumesce, "Origines de Culte," 2d ed., Paris, 1989, p. 204), Isidore of Seville (d. 636) in Spain (ibid.). The Sanctus is sung by the people in "Apostolic Constitutions", VIII, XII, 27 (Brightman, "Eastern Liturgies," 18-19) and so in almost all the liturgies. The scanty state of our knowledge about the early Roman Mass accounts for the fact that we have no allusion to the Sanctus till it appears in the first Sacramentaries. The Leoniene and Gesalane books give only the celebrant's part; but their prefaces lead us to believe that it was sung. The presence of a passage in the Gregorian Sacramentary makes the text exactly as we have it (P. M., LXXVIII, 26). But the passage quoted from St. Clement and then the use of Africa (always similar to Rome) leave no doubt that at Rome too the Sanctus is part of the oldest liturgical tradition. In view of Clement's allusion it is difficult to understand Abbot Cabrol's theory that the Sanctus is a later addition to the Mass ("Les Origines liturgiques", Paris, 1906, p. 329).

The connexion in which it occurs in the liturgy is this: in all rites the Eucharistic prayer (Cason, Anaphora) begins with a formal thanksgiving to God for his benefits, generally enumerated at length (see the list of Holies in the Old Testament; the sanctuary of the Renaissance church stands out before us in a brilliance of light like Mount Tabor, without blinding our gaze. We believe that we are nearer the Deity, our hearts are filled with joyous sentiments, so that we might cry out with the Apostle Peter: "It is good for us to be here." In the medieval church, on the other hand, we are penetrated with a mysterious awe and like Moses feel urged to take off our shoes, for this is a holy place.

SANCTUS

Sanctus. But, apparently from the beginning of its Christian use (so already Clem. Rom., one of the dramatic touches that continually adorn the liturgy was added to the Antioch. It does not jibe with the angelic “Holy, holy, holy”); so when the celebrant comes to the quotation, the people (or choir) interrupt and themselves sing these words, continuing his sentence. The interruption is important since it is the chief cause of the separation of the original first part of the eucharistic prayer (the Preface) at Rome from the rest and the reason why this first part is still sung aloud although the continuation is said in a low voice. The only rite that has no Sanctus is that of the Ethiopian Church Order (Brightman, op. cit., 190).

II. THE SANCTUS IN THE EASTERN RITES.

In the liturgies of St. James and St. Mark and the Byzantine Rite (Rome of Pans in Lo. cit. refers to it in the Gallican) it is the “Psalmus victorius” (ψαλμος νίκης). This has become its usual name in Greek. It should never be called the Triasgion, which is a different liturgical formula (“Holy God, Holy Strong One, Holy Immortal One have mercy on us”) occurring in another part of the service (P. L., LXXV, 545, VIII, XII, 27, the form of the Epinikion is: “Holy, holy, holy Lord of Hosts (ο θεός τῶν σωτηρίων). Full (are) the heaven and the earth of his glory. Blessed forever. Amen.” St. James has: “Holy, holy, holy Lord (voc.) of hosts. Full (are) the heaven and the earth of his glory. Hymnus (is) he that comes in the name of the Lord. Hosanna, he (is) the highest.” In this the cry of the people on Palm Sunday (Matt., xxi, 9, modified) is added (cf. the Jacobite form, Brightman, p. 86). Alexandria has only the text of Isaias (ib. 132; and Coptic, in Greek, 176; Abyssinian, p. 381). In the Greek and Alexandrine form (St. Mark) the text occurs twice. First the celebrant quotes it himself as said by the cherubim and seraphim; then he continues aloud: “for all things always call thee holy (διαὰ τῶν ἀγίων) and with all who call thee holy receive, Master and Lord, our hallowing (διαθέσεως) who with them sing saying... ” and the people repeat the Epinikion (Brightman, p. 132). The Nestorians have a considerably extended form of Is., vi, 3, and Matt., xxi, 9, in the third person (ib. 284). The Byzantine Rite has the form of St. James (ib. 323—324), so also the Armenians (p. 364). In all the Western rites only the section that immediately introduces the Epinikion is said aloud, as an Ekphrasis.

III. THE SANCTUS IN THE WEST.

In Latin it is the “Tersanctus” or simply the “Sanctus.” Hymnus angelicus is ambiguous and should be avoided, since this is the usual name for the Gloria in Excelsis. Gloria in Excelsis is a part of the Canon. But it should be borne in mind that, in the Catholic liturgy, the term “Sanctus” is used only in the Canon, and the Gloria in Excelsis is not liturgical. It is a part of the Canon. But it should be borne in mind that, in the Catholic liturgy, the term “Sanctus” is used only in the Canon, and the Gloria in Excelsis is not liturgical. It is a part of the Canon.

The text of the Roman Sanctus is first Is., vi, 3, with “plenam sunt coeli et terrarum gloria tua” instead of “plena est omnis terra gloria eius”. In this way (as at Antioch and Alexandria) it is made into a prayer by the use of the second person. In all liturgies the Hebrew word for “hosts” (נְפָשַׁת) is kept, as in the Septuagint (Vulgata, “legates”). “Lord of hosts” is a very old Semitic title, in the polytheistic religions apparently for the moon-god, the hosts being the stars (as in Gen., I, I; Ps. xxxii, 5). To the Jews these hosts were the angels (cf. Lc., II, 13). Then follows the acclamation of Psalm Sunday in Matthew, xxii, 9. It is based on Ps. cxvi, 25—26; but the source of the liturgical text is, of course, the text in the Gospel. Hosanna is in the Greek text and Vulgate, left as a practically untranslatable exclamation of triumph. It means literally “Oh help” (HOMOΣ ὧς ἐλέησόν), but in Matthew, xxii, 9, it is already a epithet of Christ. In the Didache, X, 6, it occurs as a liturgical formula (“Hosanna to the God of David”). In the medieval local rites the Sanctus was often “farced” (interpolated with tropes), like the Kyrie and other texts, to fill up the long musical neums. Specimens of such farcings, including

SANDALS

one attributed to St. Thomas Aquinas, may be seen in Bonis, "Rerum liturgicarum," II, 10, § 6 (ed. Paris, 1674, p. 41). The skeleton of a Mass at the blessing of palms retains not only a Preface but also a Sanctus, sung to the original "simple" tone. The many other prayers (blessing of the font, ordinations, etc.) that are modelled on the Preface diverge from its scheme as they proceed and do not end with a Sanctus.

IV. Prebendal Rites.—At high Mass as soon as the celebrant has sung the last word of the Preface (dicentes) the choir begins the Sanctus, continuing his phrase. They should sing it straight through, including the Benedictus. The custom of waiting till after the Elevation and then adding the Benedictus, once common, is now abolished by the rubric ("De rubis servandis in canali missae", VII) of the Vatican Gradual. It was a dramatic effect that never had any warrant. Sanctus and Benedictus are one text. Meanwhile the deacon and subdeacon go up to the right and left of the celebrant and say the Sanctus in a low voice with him. Every one in the choir and church kneels (Cerrini. Episcop. II, VIII, 60). The hand-bell is usually rung at the Sanctus; but at Rome there is no bell at all at high Mass. While the choir sings the celebrant goes on with the Canon. They must finish or he must wait before the Consecration. At low Mass the celebrant after the Preface, bowing and laying the folded hands on the altar, exclaims the Sanctus in a lower voice (vox media). The bell is rung three times. Although the rubrics of the Missal do not mention this it is done everywhere by approved custom. It may be noticed that of the many chants of the Sanctus in the Gradual the simple one only (for ferias of Advent and Lent, requiem and the blessing of palms) continues the melody of the Preface and so presumably retains the same musical tradition as our Preface tone. As in the case of the Preface its mode is doubtful.

SANCY, ACHILLE HARLAY DE. See HARLAY, FAMILY OF.

SANDALS, EPISCOPAL.—FORM AND PRESENT USE.—Unlike the ancient sandals, which consisted merely of soles fastened to the foot by straps, the episcopal sandals are in the form of low shoes, and resemble slippers. The sole is of leather; the upper part, ornamented with embroidery, is made at the present day of silk or velvet. No crown is required upon the sandals; at Rome this is an exclusively papal privilege. With the sandals are worn the liturgical stockings, calige. The stockings, which are of silk, are either knitted or made by sewing together pieces of silk fabric that have been cut a suitable shape; they are worn over the ordinary stockings. The privilege of wearing the sandals and calige before only the to bishops. They may be worn by abbots and other prelates only by special privilege from the pope and only so far as this privilege grants. The pontifical foot-wear is used only at pontifical solemn Mass and at functions performed during the same, as ordination, but not on other occasions, as, for example, Confirmation, solemn Vespers etc. It is therefore in the most exact sense of the word a vestment worn during the Mass. The liturgical colour for the day decides the colour of the sandals and calige; there are, however, no black stockings or sandals, as the bishop does not make use of the pontifical foot-wear either at masses for the dead or on Good Friday. Sandals and stockings are only customary in the Latin Rites, and are unknown in the Oriental Rites.

DESCRIPTION.—Sandals and stockings belong to the liturgical vestments supported by the earliest evidence. They are depicted upon the monuments of the fifth century, for instance upon the mosaics of San Satiro near San Ambrogio at Milan, and on those of the sixth century, e.g. the mosaics in San Vitale at Ravenna. Originally the sandals were called campagi, the stockings udones. The shoes were given the name sandalia probably during the eighth to the ninth century, and this name was first applied to them in the north; the designation caligua for udones came into use in the tenth century, also in the north. As regards the original form and material of the campagi, they were slippers that covered only the top of the foot and the heel, and must have been fastened to the foot by straps. This slipper was made of black leather. The stockings were, very likely, made of linen, and were white in colour. In the earliest period the campagi and udones were by no means exclusively an episcopal ornament, as they were worn by deacons. Indeed this foot-covering was not exclusively reserved for the clergy, as not only the monuments show that the campagi and udones were worn by the laity, but Lydus also testifies to this usage (De mag., I, xvii). Campagi and udones were originally worn in the post-Constantine era as a mark of distinction by certain persons of rank, and were probably copied from the foot-wear of the ancient senators. Their use gradually became customary among the higher clergy, especially when those appeared in their full official capacity for the celebration of the Liturgy. During the eighth and ninth centuries also the Roman subdeacons and acolytes wore a distinctive foot-wear, the subdeacons, however, were simpler than the campagi, and had no straps. The sandals and stockings became a specifically episcopal vestment about the tenth century. Apparently as early as the twelfth century, or at least in the second half of the thirteenth century, they were no longer worn even by the cardinal deacons of Rome. The privilege of wearing the sandals and calige was first granted to an abbot (Fulrad of St. Denis) in 757 by Stephen III. This is, however, an isolated case, as it was only after the last quarter of the tenth century, and especially after the twelfth century that it became customary to grant abbots this privilege.

DEVELOPMENT OF SHAPE.—The calige seem to have experienced no particular development. In the later Middle Ages they were, as a rule, made of silk. The earliest enforcement in respect to calige of the regulations for liturgical colours seems to have been at Rome. T. even here probably not until the fourteenth century. The sandals retained substantially their original form until the tenth century. Then straps were replaced by three or five tongues reaching to the ankle, extensions of the upper leather upon the point of the foot, and these were fastened at the ankle by means of a string. In the twelfth century these
tongues were gradually shortened; in the thirteenth century the sandal was a regular shoe with a slit above the foot or on the side to make the putting on easier. In the sixteenth century there was a return to the early style. The heel of a high shoe now became once more a low foot-covering, like a slipper, a form which it has retained until the present time. The material of which the pontifical sandals are made was, until the thirteenth century, exclusively leather, at times covered with silk. Since the later Middle Ages, up to the present day, the sandals have been made of leather, but of silk, velvet, etc. It is not until about 1400, with the exception of entirely isolated earlier examples, that a cross is to be found upon the sandals. The fork-shaped decoration, frequently found on pontifical shoes, especially on those of the thirteenth century, was not a cross, but merely an ornament.

**Sandelians**, an English form of the Scottish sect of Glassites, followers of John Glas (b. 1695; d. 1773) who was deposed from the Presbyterian ministry in 1728, for teaching that the Church should not be governed by any laws, governmental, but only by Apostolic doctrine. Glas's son-in-law, Robert Sandeman (b. 1718; d. 1771), having been for many years an elder in the Glassite sect, removed to London in 1760, where he gathered a congregation at Glover's Hall, Barbican. Though for the most part he followed the teaching of Glas, he believed that doctrine in maintaining that faith is only a simple assent to Divine testimony which differs in no way from belief in ordinary human evidence. In 1764 Sandeman went to America to propagate his views, and founded some congregations there, for which reason the Glassites in America, like those in England, are known as Sandemanians. In England the sect has never been numerous, possessing less than a dozen meeting-places in the whole country, including two in London. It is chiefly known owing to the great chemist Sir Michael Faraday (b. 1791; d. 1867) having officiated as a member of the congregation in the middle of the nineteenth century. Membership is granted on confession of sin and public profession of faith in the Death and Resurrection of Christ. The new member receives a blessing and the kiss of peace from all present. Each congregation is presided over by several elders, all unpaid, who are elected for their earnestness of conviction and sincerity, and who hold office for life. On the death of an elder the survivors propose for election the name of a suitable member of the congregation, who is then elected by the whole body. The Sandemanians practise a weekly celebration of the Lord's supper, and the agape or love-feast, which takes the form of dining together between the morning and afternoon services. The elders alone preach, but the ordinary members take turns in offering prayers. The ceremonial washing of feet is also performed on certain occasions. They abstain from wine and strong beverages. As they consider that casting lots is a sacred process, they regard all games of chance as unlawful. They practise community of goods to a modified extent, considering all their property as liable to calls on behalf of the Church and the poor. It is also considered a duty to help the weak. If any member of the body differs obstinately from the rest he is expelled and by this system perfect unanimity is secured. They refuse to join in prayer with members of other denominations and to eat and drink with an excommunicated person is held to be a grievous sin.

The Sandemanians as a religious body are very obscure and it is difficult to obtain reliable information with regard to them, but the total membership in Great Britain is believed not to exceed two thousand. **Sandoz, Felino Maria**, often quoted under the name of Felinus, Italian canonist of the fifteenth century, b. at Felina, Diocese of Reggio, in 1444; d. at Lucera, October, 1503, according to most writers, according to others at Rome, 6 Sept. of the same year. He taught canon law from 1466 to 1474 at Ferrara, which was his family's native place, and at Pisa until 1494, when he became auditor of the Sacred Palace and lived at Rome. On 4 May, 1495, he became Bishop of Penna and Atro and on 25 Sept. of the same year Coadjutor Bishop of Lucera with right of succession. He became Bishop of Lucera in 1499. Felino was a good compiler but lacked originality. His chief work is *Lectura*, or "Commentaria in varios titulos librum I. IV, et V.* (Urbino, 1496; Hain, *Repert. biblicorum*, II, ii, 268–78, N. 14280–14325, published rather often, notably at Milan, 1504; Basle, 1567; Lyons, 1587). He also published a "Sermon de indulgentia," "Repetitiones," "Consilia," and "Epitome de regno Sicilie" (s. l., 1495). Some unedited works are mentioned in Fabricius, *Bib. latina medii et infimi aevis* with additions by Mansi, II (Florence, 1858), 558.

**A. van Hove.**

**Sander, Anton**, historian, b. at Antwerp, 1588; d. at Afflighem, Belgium, 10 Jan., 1664. Having become master of philosophy at Douai, 1623, he studied theology for a time under Malden, at Louvain, and Estius at Douai, and was ordained priest at Ghent. For some years he was engaged in parochial duties, and combated the Anabaptist movement in Flanders with great zeal and success. In 1625 he became secretary and almoner of Cardinal Alphonse de la Cueva, later becoming canon, and in 1654 penitentiary at Ypres. After three years, however, he resigned this office to devote himself entirely to scientific, and especially to historical studies. He soon found himself compelled to claim the hospitality of the Benedictine Abbey of Afflighem, since he had reduced himself to absolute poverty by the publication of numerous works. He combined high intellectual gifts with great zeal, and left behind forty-two printed, and almost as many unprinted, works. The most important are the following: "De scriptoribus Flandriæ libri III." (Antwerp, 1624); "De Gregorii vanensis eruditionis fæma claria" (Antwerp, 1624); "De Brugensis eruditionis fama claria" II" (Antwerp, 1624); "Hagiologium Flandriæ sive de sancta eius provincie liber unus" (Antwerp, 1625; 2nd ed., Lille, 1639). A general edition of these four works appeared under the title: *Flandria illustrata*. [Ed. J. de Velis, Cologne, 1644; 3rd ed., 1651; 4th ed., 1656; 5th ed., 1657; 6th ed., 1660; 7th ed., 1661; 8th ed., 1664]. Of his other works may be mentioned: "Eloquia cardinalium sanctitatis, doctrina et armis illustrum" (Louvain, 1625); "Gandavies sive rerum Gandavensium libri VI." (Brussels, 1627); "Bibliotheca belgica manuscripta" (2 parts, Lille, 1641–3); "Chirographia sacra Brabantiae sive celebrissimi saeculi xvnii et oceniorum descritio, imaginibus seuis illustrata" (Brussels, 1659; The Hague, 1726); this is his chief work.

**Paterius Schlager.**

**Sander (Sander), Nicholas**, b. at Charlwood, Surrey, in 1530; d. in Ireland, 1581. Educated at Winchester and New College, Oxford, he graduated
in 1551, and took a share in Pole's reform of the university. He had to flee under Elizabeth and was ordained at Rome, afterwards receiving the degree of Doctor of the Trinity. He also wrote there in 1560 a work "De Sacro Statu et Ordine of English exile: Cardinal Moroni (Catholic Record Soc., I). He attended the Council of Trent as a theologian of Cardinal Hosius and afterwards accompanied him and Cardinal Commendone in legations to Poland, Prussia, and Lithuania. In 1566 he returned to London, then under the rule of Elizabeth, amongst whom was his mother, his sister Elizabeth being a nun of Syon at Rouen. Nicholas became professor of theology there, and soon joined in the great controversy over Jewell's "Apologia", in which the English exiles first appeared to the world as a learned and united Catholic body. Several contributions were, "The Supper of the Lord", "A Treatise of Images", "The Rock of the Church" (Louvain, 1565, 1566, 1567), followed by his great work, "De vebilini monarchia ecclesiae" (Louvain, 1571). These works, joined with the proofs he had already given of diplomatic ability, and the high esteem of the nobles and gentry who had fled from England after the Northern Rising (1569), caused Sander to be regarded as practically the chief English Catholic leader. Almost the earliest attempt to restore ecclesiastical discipline in England after the Reformation was the "Reest of the Assemblies of Pius V" (14 August, 1567), granting to Sander, Thomas Harding, and Thomas Peacock (the former treasurer of Salisbury and president of Queen's College, Cambridge; see "Dict. Nat. Biog.", xxiv, 339; xlv, 143) 'bishoply power in the court of conscience' to receive back the clergy who had lapsed into heresy (Vatican Arch., Var. Pol., lxvi, 258; Arm., 64, xxviii, 60). When Sander was summoned to Rome in 1572, his friends believed that he would be made a cardinal, but Pius V died before he arrived.

Gregory XIII kept him as consultant on English matters, and many letters of this period are still preserved in the Vatican. In 1573 he went to Spain to urge Philip II to subsidize the exiles, and when in 1578 James Fitzgerald had persuaded Sega, papal nuncio at Madrid, with the warm approbation of Gregory, and the cold condescension of Philip, to fit out a ship to carry arms to Ireland, Sander was sent as special agent with any title or office. They landed in Dingle Bay (17 July, 1579) and the Second Desmond war ensued with its terrible consequences. Sander bore up with unshaken courage, as his letters and proclamations show, in spite of all disasters, till his death. He belonged to the first group of English exiles, who, never having lived in England during the persecution, never realized how complete Elizabeth's victory was. He believed, and acted consistently in the belief, that strong measures, like war and excommunication, were the true remedies for the great evils of the time; a mistake which, though supported by the popes of that day, was subsequently changed. The most widely known of Sander's books is his short "De schismate Anglicano". It was published after his death, first by E. Rishton at Cologne in 1585, then with many additions by Father Persons at Rome in 1588. Translated into various languages and frequently reprinted, it was fiercely controverted especially by Bishop Burnet, but defended by Joachim Le Grand. It is now acknowledged to be an excellent, popular account of the period from a Catholic point of view.

Pollen in English Historical Review (Jan., 1889, p. 272); "De der Thronen", Clio, 1903; "Gesuch der Thronen", Clio, 1876; Bellerusser, Gesch. der Kat. Kirche in Irland, I (Mainz, 1890), 188; Lewis, "Sander's History of the English Schism", London, 1899. It is also frequently mentioned in the English and Spanish State Papers, and there are many of his papers in the Vatican Archives.

Sandhurst, Diocese of (Sandhurstensis), in Victoria, Australis, suffragan of Melbourne. The cathedral city, officially known as Bendigo, is situated about one hundred miles directly north of Melbourne, in a richly-sheltered basin in the midst of a gently-rising hills rich in gold, discovered in the district in 1852. This fact attracted to Bendigo immigrants from all parts of the world, among them many Irish and others professing the Catholic Faith. The first missionary was the Rev. Dr. Backhaus. On 21 Oct., 1874, Monsignor of the Name of Mr. Crane, O.S.A., was consecrated first bishop of this diocese and arrived at the scene of his future labours early in 1875 accompanied by the Rev. M. Maher and the Rev. Stephen Reville, O.S.A. The latter was in 1888 appointed coadjutor bishop to Dr. Crane and succeeded him as bishop on 21 Oct., 1901. During the twenty-five years of Dr. Crane's active administration, and since his demise, the interests of the Church have advanced rapidly both in a spiritual and material sense. When in 1875 Bishop Crane assumed charge of the diocese it contained but four parishes with one priest in each, and no religious houses or primary school. At present the principal churches are situated at Wanganita, Beechworth, Benalla, Chichem, Shepparton, Echuca, and Rochester. The two last named parishes together with that of Kyabram are in charge of the Irish Augustinian Fathers who, at the invitation of Bishop Crane, came from the Recollect house of the close of 1886. Besides the Augustinian Fathers, there are Marist Brothers, Sisters of Mercy, Sisters of St. Brigid, Sisters of St. Joseph, Presentation Sisters, Faithful Companions of Jesus, and Good Shepherd Sisters. In many outlying districts, unable to maintain a community of their own, are flourishing primary schools in charge of lay teachers. In the immediate vicinity of Bendigo, there is now in course of construction an orphanage and Magdalene Asylum, which up to date has cost £45,000, the funds for which are derived from the estate of Dr. Backhaus.

The statistics for 1911 are: districts 22; churches, 105; secular priests, 36, regular, 6; religious brothers, 7; nuns, 200; college, 1; boarding-schools (girls), 6; primary schools, 31; superior day-schools, 13; children in Catholic schools, over 4000; total Catholic population (1901), 45,385.

San Domingo. See DOMINICAN REPUBLIC, THE.

Sandomir (Polish, Sandomier), Diocese of (Sandomierensis).—The city is very ancient, with still existing traces of prehistoric construction. Its population is 6891, of which 2364 are Catholics, 46 of the Orthodox Church, and 3433 Jews.

When King Mieszyslaw I (962-92), introduced Christianity into Poland he built two churches at Sandomir dedicated to St. Nicholas and St. John. In the Middle Ages the city became an important centre of political and religious life. Here lived several illustrious and holy personages, namely, the Blessed Salome (1120-89), daughter of Leszek the Fair and wife of Koloman 1, King of Hungary; Blessed Adelaide, daughter of Casimir the Just (1179-94), King of Poland, who founded the parochial church of St. John where she was buried (1211); Blessed Vincent Klubewek, who died in 1223 after a fruitful apostolic ministry and was canonised by Clement XIII; Blessed Czeslaw, a Dominican (d. 1294 or 1297), the author of St. Hyacinth; his relics were translated throughout Poland by Clement XII in 1735; St. Hyacinth, the celebrated and apostolic Dominican who was one of the glories of Catholic Poland; St. Cunegunde (1224-92), wife of Boleslaw the Chaste, King of Poland. In 1290 Tatar hordes completely de-
stroved the city and put all the inhabitants to the sword. Forty-nine Dominicans with Sadowski, prior of the convent of St. James, were martyred. In 1476 Jan Długosz, the celebrated annalist and Polish historian, a canon of Cracow and Sandomir, built here for the cathedral clergy a house which is still existing and is called by his name.

The Congress of Sandomir (1570) was assembled for the purpose of union between Protestant sects and the foundation of a national Protestant Church. The results were negative, but certain measures were proposed and approved for the regulation of the relations between the Protestant and Catholic Churches.

Up to the second half of the eighteenth century the city of Sandomir and its territory were under the immediate jurisdiction of the Diocese of Cracow. In 1787 through the initiative of Michael Poniatowski, administrator of the Diocese of Cracow, the Holy See created Sandomir a diocese. The first bishop was Mgr. Adalbert Radziszewski (d. 1796). In 1818, after the Concordat with Russia, Pius VII promulgated the Bull "Ex imposita nobis", which suppressed the greater part of the Diocese of Kielce and transferred its episcopal seat to Sandomir. In the next year Mgr. Stephen Holowczy, dean of the cathedral of Kielce, was consecrated bishop. The new diocese comprised the ancient Principality of Sandomir, which is now the Province of Radom, and part of the Province of Kielce. Bishop Holowczy had scarcely taken possession of his diocese before he was made Archbishop of Warsaw, and a Franciscan, Adam Prosper Burzyński, succeeded him in 1820. After the death of Bishop Burzyński (9 Sept., 1830) the cathedral chapter administered the diocese until 1840, when the rector of the seminary, Clement Bankiewicz, was made bishop at the age of eighty, and died 2 January, 1842. His successor was Bishop Joseph Joachim Goldtman, who had been Bishop of Wladislaw since 1838; he was transferred to the See of Sandomir in 1844, and died on 22 March, 1853. Bishop Joseph Michael Yuszyński, who had occupied various ecclesiastical offices in the diocese, succeeded him, and was consecrated 10 July, 1859. Under him the number of deaneries of the diocese was decreased from seventeen to seven. On his death Bishop Anthony Francis Soktiewicz, administrator of the Archdiocese of Warsaw and professor of canon law in the ecclesiastical seminary of that city, was consecrated 20 May, 1862; d. 4 May, 1901. At the time of his elevation the number of secular clergy was 278, and the Catholic population 730,940. He was succeeded on 4 September, 1902, by Stephen Alexander Zwierowicz, Bishop of Vilna, who was transferred from the latter see to Sandomir, where he died on 3 January, 1908. The present incumbent of the see is Bishop Mariano Joseph Ryn, canon of the cathedral, who was consecrated 7 April, 1910. The diocese at present has seven deans: Sandomir, Opatów, Iłża, Kosieniec, Radom, Opoczno, and Konakie. There are six churches in the city of Sandomir; the cathedral, which dates from 1112 and to which a cathedral chapter has been attached since 1818; the Church of St. James, founded in 1200 by Blessed Adelaide; here dwelt Hyacinth and Martin of Sandomir, whom Gregory IX sent as his ambassador to St. Louis, to induce him to undertake a crusade; and Raymond Eberbuckowski, author of the Acts of the Conquest of Sandomir; the Church of the Conversion of St. Paul, which was in existence in the beginning of the thirteenth century; the Church of the Holy Ghost, founded by the Religious of the Holy Ghost of Santa Maria in Sassia in 1222; the Church of St. Michael, founded in 1868 and attached to the cathedral monastery; and the Church of St. Joseph, founded in 1685 by the Protestants. There are 212 parishes in the diocese, 1 cathedral church, 1 collegiate church, 10 detached churches, and 50 chapels. The secular clergy number 250. The religious houses were all dispersed after the Polish insurrection of 1668. The regulars are represented by one Franciscan lay brother in the parish of Wysmierzyce. The Sisters of Charity, numbering forty-two, have seven hospitals at Sandomir, Radom, Strzyzowice, Opatów, Staszów, Opoczno. Near Bodzentyn is a cloistered Franciscan monastery with thirteen sisters. The canons of the cathedral number twelve, those of the collegiate church forty Catholic. Amongst the Catholic societies of Sandomir may be mentioned the Society of Charities, founded in 1905, with 155 members; the archiconfraternity of St. Stanislaus Kostka, founded in 1906, with 30 young men; the Christian Working Men's Society, founded in 1907, with 95 members, and the Catholic Society, founded in 1908 with 188 members.

A. PALMIERI.

Sands, Benjamin F., rear-admiral United States Navy, b. at Baltimore, Md., 11 Feb., 1812; d. at Washington, D. C., 30 June, 1885. His parents were Catholics and he was brought up. Moving married a Catholic, Henrietta M. French, sister of Major-General William H. French, U.S.A. He was appointed a midshipman in the navy from his native state, 1 April, 1828, and passed through the successive grades of promotion until he received the rank of rear-admiral, 27 April, 1871, and was placed on the retired list on reaching the age of 62 years, 11 February, 1874. During the Civil War he held several important commands with conspicuous success, and in 1867 was made superintendent of the Naval Observatory at Washington. During his incumbency of this office he advanced the observatory to a place equal to the most celebrated in Europe. For many years he was a member of the Catholic Indian Bureau in Washington. Notes he left were compiled by his son, F. B. Sands, into the book "From Refiner to Rear Admiral". His son George H. graduated at West Point and served in the U. S. Army. Three others, William F., F. B., and James H., also served in the navy; a daughter, Rosa, became a Visitation nun.

James Horan Sands, rear-admiral U.S. N., son of foregoing; b. at Washington, D. C., 12 July, 1846, d. there 26 October, 1911. Following the footsteps of his father he achieved a high reputation in the naval service for daring and seamanship. Appointed to the
Naval Academy from Maryland in 1809, from which he graduated four years later, he served with the North Atlantic Squadron during the War of 1812. While only an ensign he was twice recommended by boards of admirals to be advanced in grade for gallantry. After the war he had commands in the West India Squadron, and later had charge of the Brooklyn, Boston, Philadelphia, and Washington Navy Yards. He was made rear-admiral, 3rd April, 1822, and appointed at the Naval Academy, 1819-1827, introducing a much needed reform in spite of opposition in many quarters. This was his last active duty as he retired in 1807 after a sea service of eighteen years and four months and a shore duty of twenty-two years. His example as a Catholic was a strong influence in the navy, inculcating the spirit of tolerance towards Catholics in the service, and in making religious practices of whatever creed more respected. His wife was Mary Elizabeth Meade, of the famous Philadelphia family of that name, who became a convert. His son William Franklin was United States Minister to Guatemala, and two of his daughters, Clara and Hilda, became Religious of the Sacred Heart.

THOMAS F. MEEHAN.

Sandwich Islands, Vicariate Apostolic of the, comprises all the islands of the Hawaiian group. They lie just within the northern tropic, between 18° 54' and 22° 15' north latitude, and between 154° 30' and 180° 30' of longitude west of Greenwich. These islands form the present Territory of Hawaii, and belong to the United States. Honolulu, the capital, is on the Island of Oahu. Eight of the islands are inhabited, viz., Kauai, Nihiu, Oahu, Molokai, Lanai, Maui, Kahoolawe, and Hawaii. Their population (1910) was 191,900.

The first Catholic priests arrived at Honolulu on 9 July, 1827. They were the Rev. Alexis Bachelot, prefect Apostolic, the Rev. Abraham Armand, and the Rev. Patrick Short. The first two were natives of France, and the third of Ireland. All three were members of the Congregation of the Sacred Hearts of Jesus and Mary, also called the Society of Jesus. They were from the name of the street in Paris in which its mother-house is situated. They had been sent by Pope Leo XII. Protestant missionaries had arrived from New England as early as 1820, and had gained the king and chiefs over to their cause. As soon as the missionaries began to make converts a fierce persecution was raised against the natives who became Catholics. They were ill-treated, imprisoned, tortured, and forced to go to the Protestant churches, and the priests were banished. Fathers Bachelot and Short were taken to a solitary spot in Lower California, far removed from any human habitation. In 1836 the Rev. Robert Walsh, an Irish priest of the same Congregation, arrived at Honolulu, and through the intervention of the British consul, was enabled to remain on the islands in spite of the ill-will of the Protestant party, which wanted to send him back on the vessel in which he had come. In 1837 Fathers Bachelot and Short returned from California, but religious persecution still continued. In the same year there arrived from France the Rev. Louis Maigret, who afterwards became bishop, and first Vicar Apostolic of the Sandwich Islands. He was not permitted to land, but was obliged to leave the country, together with Father Bachelot, who was in very feeble health. The latter, worn out by labour and trials, died at sea shortly after (5 Dec., 1837). In the year 1839 the French Government put an end to this persecution.

On 9 July the twelfth anniversary of the arrival of the first Catholic priests, the French frigate "Artémise", Captain Laplace, arrived at Honolulu. A few hours after anchoring, the captain dispatched one of his officers to present to the king the following sum: (1) that the king is the supreme head of his religion but declared free; (2) that all Catholics shall be sent to the French Government, an account of their religion be set at liberty; (3) that the Government give a suitable site at Honolulu for a Catholic Church; (4) that the king place in the hands of the captain of the "Artémise" the sum of $20,000, as a guarantee of his good-will and peaceful mind, and sum to be returned to the French Government. The king should feel satisfied that the above conditions had been fulfilled. Hostilities were to commence if the king failed to comply within forty-eight hours with the terms of this manifesto. All the conditions were readily accepted, and peace was concluded. From this time to the present the Catholic priests have enjoyed a tolerable amount of liberty; but the Protestant missionaries and their friends have been identified with the Government and have had the important positions, using their influence as well as the government emoluments for the advancement of their cause.

In the year 1840 there arrived at Honolulu the Rt. Rev. Bishop Rouchouze, first vicar Apostolic of Oriental Oceania, appointed to this office in 1833, and having jurisdiction not only in Hawaii, but also in Tahiti, the Marquesas, and other islands. He was accompanied by three other priests, one of whom, Rev. Louis Maigret, had already been a resident at Honolulu in 1837. On 9 July, 1840, a ground was broken for the foundation of the present Cathedral of Our Lady of Peace. On the same day 280 catechumens received baptism and confirmation. In January, 1841, Bishop Rouchouze returned to France, in search of labourers and resources for his mission. He was successful in obtaining a number of priests and sisters of the Congregation of the Sacred Hearts. They left France in 1841 with a cargo of supplies on the schooner "Mary-Joseph", owned by the mission; but, unfortunately, the vessel was lost with all on board, not surviving to tell the tale. This was a severe blow for the young mission, and retarded its progress for many years. On 15 August, 1843, the newly-finished cathedral of Honolulu was solemnly dedicated, and 800 Catholics received Holy Communion.

About this time Oriental Oceania was divided into three vicariates Apostolic of Tahiti, Marquesas, and Sandwich Islands. On 11 July, 1847, Bishop Rouchouze appointed the then prefect of the mission, the Very Rev. Louis Maigret, vicar Apostolic, to succeed Bishop Rouchouze and take charge of the Sandwich Islands Mission as a separate vicariate. From this time on the mission made slow but steady progress, in spite of the odds it had to contend with. The Protestant mission found the ancient belief of the aborigines in their idols already shaken and partly discarded (owing, probably, to the fact that foreigners broke the dread taboo without incurring the wrath of the gods). They taught the Hawaiians to wear clothes, and to read and write the Hawaiian language. After having translated the Bible and given it to the natives, they considered the latter civilized and Christianized, and proceeded forthwith to develop the resources of the country. But this Christianity was superficial. The life-philosophy of the weak and incompetent natives was to shun work and enjoy all the pleasures within reach. If the foreigners had offered them but one form of Christianity and had illustrated it by their good example; if, above all, the efforts at educating these grown-up children had been directed more towards correcting the evil tendencies of their hearts than cramming their minds with very few common-sense facts, they certainly have received the blessings of Christianity, lived by it, and multiplied. But it was quite otherwise. The mild climate; the inheritance from their fathers of an unrestrained, easy-going, indolent character; the bad example of all classes of foreigners, who brought and spread the germs of disease; the contra-
SANDYS, John, Venerable, English martyr, b. in the Diocese of Chester; executed at Gloucester, 11 August, 1588. He arrived at Reims 4 June, 1583, was ordained priest in the Holy Cross Chapel of Reims Cathedral by the Cardinal Archbishop, Louis de Guise, and sent to the mission 2 October, 1584. He was cut down while fully conscious and had a terrible struggle with the executioner, who had blackened his face to avoid recognition and used a rusty and ragged knife; but his last words were a prayer for his persecutors.

JOHN B. WAINEWRIGHT.

Sanetach Indians, a sub-tribe of the Songiah Indians (q. v.). They speak a dialect of the Cowichan language of Salishan linguistic stock, and occupy several small reserves about Sanich Peninsula at the south-west point of Vancouver Island, B. C. They were estimated at 600 in 1858, but are reduced now to about 250. In primitive customs and beliefs they resemble the Songiah. The work of Christianization was begun among them by John B. Bolduc and completed by the Oblate Fathers. The whole tribe is now entirely civilized and Catholic, engaged in farming, fishing, and various other paid employments, and are described by their agent as industrious and law-abiding, fairly temperate, and moral.

JAMES MOONEY.

who was consecrated at Zacatecas, 4 Oct., 1840. He was born at Lagos, State of Jalisco, Mexico, 17 Sept., 1875, and joined the Franciscans at the age of seventeen. Ordained priest 13 Nov., 1888, he was successively master of novices and vicar of the monastery of Our Lady of Guadalupe, and laboured zealously giving missions in the towns and cities of Mexico. In 1830 he was appointed Prefect of the Missions for the Conversion of the Indians in California, and set out for this new field with ten missionaries from the college of Our Lady of Guadalupe, reaching Santa Clara, where he established his residence. The missions of California were then in a very demoralized state, owing to secular and political interference and persecution. Their utter ruin was averted by the zeal of these priests until after the passage of the decree of secularization by the Mexican Congress in August, 1834. The destruction that followed this was so widespread that in the summer of 1836 he went back to Mexico, and by a persistent appeal to its congress secured the repeal of the decree of secularization and an order for the restoration of the missions to the Church. Business in connexion with his order detained him in Mexico for several years, and then in 1841 he returned to California. He received notice of his appointment as bishop of the newly-created diocese which contained eighteen of the twenty-one historic California missions. Most of them were in ruins when he arrived at San Diego on 11 December, 1841, to commence the rebuilding of a seminary and a cathedral, and to restore to the wreck left by the plunderers the era of secularization. By heroic effort he opened a seminary at Santa Ynez 4 May, 1844, and by word, deed, and example did everything possible to re-establish the missions, but his health failed, and returning to Santa Barbara in January, 1842 he died there 13 April, 1846.

Very Rev. José Maria Gonzales Rubio, O.F.M., the vicar-general, was appointed administrator before the bishop died, and the choice was ratified by the Archbishop of Mexico. The condition of the diocese may be seen from the statement of the administrator made in a circular letter dated 30 May, 1848, and addressed to the people. “Day by day” he said, “we see that our circumstances grow in difficulty; that helps and resources have shrunk to almost nothing; that the hope of supplying the needed clergy is now almost extinguished; and worst of all, that through lack of means and supervision the worship of the diocese stands upon the brink of total ruin”. The date of this letter is the same as that on which the Treaty of Queretaro was signed, ceding California to the United States.

American Rule.—When Upper California thus became part of the United States, the Mexican Government refused to permit an American bishop to exercise jurisdiction in Lower California. To meet this difficulty Pope Pius IX detached the Mexican territory from the Diocese of San Diego or Monterey, which had been erected by Pope Gregory XV on 27 April, 1833, by decree of liberal concession of Propaganda, 1 July, 1854, divided Upper California into the two dioceses of San Francisco and Monterey. By Brief of 29 July, San Francisco was made an archbishopric, with Monterey its suffragan see. As Bishop of San Diego or Monterey, the Reverend Joseph Sadoc Alemany, O.P. (q.v.) had been consecrated in Rome by Cardinal Fuentes 30 June, 1850. He was appointed Archbishop of San Francisco, and took possession 29 July, 1853. Before all this occurred, Father Gonzales as administrator began to take measures to provide for the needs of the people, and on 10 July, 1854, he wrote from Batavia, 13 June, 1849, he tells his flock that he has asked for priests from the Congregation of the Sacred Hearts of Jesus and Mary and from the Jesuits of Oregon.

In the autumn of 1849 Father John Brouillet, then Vicar-General of Nesqually, Oregon, landed at San Francisco on a visit, and as he was the only priest in the vicinity who could speak English, the spiritual destitution of the thousands of the town trying to make the new and fast-filling city of San Francisco, and he remained there to minister to them. A few months later Father Antoine Langlois, a Canadian secular priest who had been labouring for six years in the north-west and was then on his way to Canada to enter the Society of Jesus, joined him, and by direction of his superior he also remained at San Francisco. He has left an “Ecclesiastical and Religious Journal for San Francisco” in MS., which is preserved at Santa Clara College, and in this he relates: “The first Mass said in the Mission established in the city of St. Francis Xavier [sic] was on June 17th, 1849, the third Sunday after Pentecost. Father Brouillet was specially charged to yield to the wishes of the people and labour towards the building of a Church and hold divine service therein. A beginning was made by the purchase of a piece of ground 25 by 50 varas, after he had called the more zealous Catholics together and opened a subscription for about 3500 pesos, and the building to be erected on it. . . . Religion now began to be practised in spite of the natural obstacles then in its way by the thirst of gold”.

Father Brouillet then returned to Oregon, and to succeed him in the mission Fathers Michael Accolti and John Nobili, S.J., reached San Francisco from Oregon 8 Dec., 1849 to establish in the Diocese in response to the invitation of the administrator, a house and college of their order either at Los Angeles or San José, the latter being at that time the chief city of Northern California. These two priests played a very prominent part in the subsequent development of the Church and Catholic education in the diocese. Father Accolti tried to obtain assistance from his brethren of the Missouri and other provinces of his order, and finally in May, 1854 succeeded in having the California mission adopted by the Province of Turin, Italy. In May, 1852 Father James Ryder, S.J., of the Maryland Province visited San Francisco and remained four months on business connected with the society. In March, 1850 two fathers of the Congregation of the Sacred Hearts of Jesus and Mary arrived from the Sandwich Islands, and shortly after four others of the same congregation from Valparaiso. They were the first from their congregation invited to establish themselves in the old missions in Southern California and only one of them remained at San Francisco. This was Father Flavion Fontaine, who started a school there, as he spoke English fluently. This school failed after some time, and occasioned much trouble owing to the debts he left on the property, which were assumed by Father Nobili, who undertook to continue the school as an adjunct to Santa Clara College which he had founded near San José. The Dominicans, represented by Father Anderson, were also established. He received faculties from the administrator 17 Sept., 1855, and on 13 Sept., 1855, at Sacramento, where he fell a victim to cholera early the following year. The “Catholic Directory” for 1850 has this report from California: “The number of clergymen in Northern California is about sixteen, two of whom, the Rev. John B. Brouillet and Rev. Antoine Langlois, are in the town of San Francisco, where a chapel was dedicated to Divine worship last June. The reverend clergy there have also made arrangements for the opening of a school for the instruction of children. The Catholic population is variously estimated at from fifteen to twenty thousand.”

Racial differences had made some trouble which the administrator hoped the advent of the English-speaking Jesuits would help to settle. In a letter to Father Accolti from Santa Barbara on 5 March, 1850, he says:
“Strangers have not been wanting, who, despising the priests of the country, have desired to build a church apart, and have it attended by priests of their own tongue. Such pretensions, though based on some specious reasons, have to some of the parish priests savoured more of the spirit of Johnthan of the spirit of the Church.”

Such were the conditions in the new diocese to which Bishop Alemany was appointed. He was born at Vich, Spain, 13 July, 1814, entered the Dominican Order in 1820, and in the following year, driven from Spain by government persecution, he went with a fellow-monk, Father Sol Vidal, by Rome, where they continued their studies and were ordained priests on 27 March, 1837, at Viterbo. They applied to be sent to the Philippine mission, but were assigned instead to the United States, where Father Alemany became Provincial of St. Joseph’s Province of the order. Ten years were spent in missionary work in Ohio, Kentucky, and Tennessee, during which time they learned to speak and write English fluently. After Bishop Alemany’s consecration he remained in Rome for a short time, and then, on his way back to his diocese, he stopped at Lyons and Paris, where he collected a number of mission materials and buildings, and in Ireland, where he arranged for volunteer teachers for his schools, and priests for his people. He finally reached San Francisco on the night of 6 Dec. 1850, accompanied by Father Villarasa, O.P., and Sister Mary Geamare, a religious of the Dominican mission in Baltimore, and received a warm welcome from the people of the city. Subsequently commissary general of the Dominicans in California, and died there in 1888. They found at San Francisco only two churches: St. Francis’s, a frame building attended by those who did not speak Spanish, and the old Mission Dolores for those who did. At Monterey the bishop established the first convent of nuns in California and St. Catherine’s Academy, where he and Father Villarasa taught until the arrival of Mother Luisa O’Neill and a band of nuns. The first English-speaking student to enter the priory there in 1852 was Thomas O’Neill, b. in 1832 at Dunfancon, Co. Tyrone, Ireland. After his ordination he spent more than fifty years in missionary work in the houses of the Dominicans in California.

Bishop Alemany devoted much time to the meeting the many difficulties which arose during the improvements in the diocese. Among the most pressing were the efforts made by the Catholics of English-speaking countries to secure a seat of their own in the diocese. To this end, he appointed several priests, notably the Rev. John Shanahan, who, ordained at Mt. St. Mary’s, Emmitsburg, Maryland, in 1823, after working many years in New York had gone out to California with the gold-seekers; Rev. Eugene O’Connell, and Rev. John McGinnis. Father O’Connell was born 18 June, 1815 in Co. Meath, Ireland, and ordained priest in 1842. When Bishop Alemany visited Ireland on his way home from Rome, he persuaded Father O’Connell, who was then a professor in All Hallows College, to come out to San Francisco and direct the diocesan seminary which he opened at once at the request of the bishop and Council at Baltimore in May, 1852, and he was thus able to report substantial progress in his charge, with foundations of the Jesuit, Dominicans, Franciscans, Fathers of the Sacred Heart, Sisters of Notre Dame, Sisters of St. Dominic, 31 churches, 38 priests and an estimated Catholic population of 40,000. A band of Sisters of Charity from Emmitsburg, Maryland arrived in August, 1852, and began their work in the schools. On 7 July, 1853 the bishop laid the cornerstone of St. Mary’s Church, San Francisco, and having been notified of his elevation to the newly-created Archdiocese of San Francisco, chose to reside there, assuming the title 29 July, 1853. In order to obtain more priests and religious he sent Father Hugh P. Gallagher, who had gone to San Francisco from Pittsburg, Penn., to Ireland, where he succeeded in securing two bands of Presentation Nuns and Sisters of Mercy, who arrived at San Francisco 15 Nov., 1854. The Sisters of Mercy came from Kinsale, Co. Cork, and were led by the famous Mother Mary Baptist (Kate Russell) sister of Lord Russell of Killowen. After a life full of great suffering she died in August 1854 at San Francisco, which she founded and directed for more than forty years. Father Gallagher, who had edited a Catholic paper at Pittsburg, took up that work also in San Francisco, where he directed its first Catholic weekly, the “Catholic Standard.” He was for many years rector of St. Mary’s Cathedral. Among other pioneer priests should be mentioned Rev. Fathers John Ingoldsby, John Quinn, John McGinnis, Patrick Mackin, William Kenny, Richard Carroll, who was head of the Diocesan Seminary of St. Thomas Aquinas, James Croke, for a long period vicar-general, Peter Grey, and John Prendergast, also vicar-general.

Progress was manifest in the rural sections, churches also springing up at Sacramento, Weaverville, Marysville, Grass Valley, Stockton, Placerville, San Mateo, Dalton, and Nevada. A Chinese priest, Francis Kuhn, was sent to the missions of the California Chinese for the benefit of his fellow-countrymen. The titles to the old mission property were also secured by legal action. In 1858 the archbishop visited Rome and on 15 July, 1862 convened the first diocesan synod, which was attended by forty-four priests. At this the decrees of the Council of Trent were promulgated, and a revised form was prescribed for the administration of the diocese. In 1867 the bishop left for the Holy See to establish the Vicariate Apostolic of Marysville and the Rev. Eugene O’Connell was appointed to take charge. He was consecrated titular Bishop of Flaviopolis, and Vicar Apostolic of Marysville, 3 Feb. 1861, in All Hallows College, Dublin, Ireland. He reached Marysville 8 June, and was inducted on the following day at St. Joseph’s Pro-cathedral by Archbishop Alemany. He had only four priests in his vicariate, which included the territory from 39° to 40° N. lat. and from the Pacific Coast to the eastern boundary of Nevada. In 1868 the vicariate was erected into the Diocese of Grass Valley, and Bishop O’Connell was transferred to this title 3 Feb. of that year. On 28 May, 1886 the Diocese of Sacramento (q. v.) was created out of this Grass Valley district, and Bishop O’Connell was named Titular Bishop of Foppa and Vicar Apostolic of Marysville, and Bishop O’Connell ruled it until 17 March, 1884, when he resigned and was made titular Bishop of Joppa. He died at Los Angeles 4 Dec., 1891.

The succeeding decades gave no respite to the activity and zeal of Archbishop Alemany in furthering the progress of the Church, and the weight of years and the stress of his long but willing toil began to tell on him. He asked for a coadjutor, and the Rev. Patrick William Riordan, pastor of St. James’s Church, Chicago, was selected by the pope for the See of San Francisco. He was consecrated on 16 Sept. 1883 and coadjutor of San Francisco with right of succession. The following year he was elected Bishop of San Francisco, and Riordan was left as auxiliary bishop. In 1887 the title of San Francisco was changed to that of Archbishop, and Riordan was consecrated and installed as Archbishop of San Francisco with the title of St. Francis, in the cathedral of the city, the seat of the archdiocese, on 20 Aug., 1887. He died at San Francisco 11 April, 1917.
gium, 10 June, 1865 and returning to the United States was appointed professor of theology at the Seminary of St. Mary of the Lake, Chicago. Later he served as pastor at Joliet, Illinois, and in Chicago. At the outset of the Civil War he took up the cause of Catholic education his special endeavour. There had been two earlier attempts to carry on a diocesan seminary. One had failed for lack of teachers, the other for want of pupils. In 1884 Archbishop Riordan made an appeal for a new seminary, and Mrs. Kate Johnson gave him 90 acres of fine land at Menlo Park to start St. Patrick's Seminary, a large and elaborate building was erected and he gave its management to the Sulpicians. In Aug., 1887 he encouraged the Religious of the Sacred Heart, who had come into the diocese in 1882, to begin their academy in the city and develop it into a flourishing one. In 1890 the Brothers from New York under Brother Justin took over the care of the college, which was chartered by the State in 1872. The Brothers also started their Sacred Heart College in 1878.

Archbishop Riordan brought in the Salesian Fathers to teach the children of the Italians in 1888. Father D. Franchi, a Genoese, being the first to arrive. In 1893 they were also given charge of the Portuguese colony in Oakland. The Paulist Congregation of New York were also invited into the diocese and given charge of old St. Mary's Church. The archbishop took up the claim of Mexico for the Peter Paul Fund of the Californias (q. v.) due the diocese, and prosecuted it to a successful issue before the International Arbitration Tribunal at the Hague, where it was the first case tried. He was a delegate to the Hague in 1902. The English Capuchins were given charge of the scattered missions along the coast of Mendocino in August, 1903. In 1905 the archbishop presided over the golden jubilee of St. Ignatius College and Church, which had been founded at San Francisco in 1855 by Father Anthony Maraschi, S. J.

As his health failed Archbishop Riordan requested the appointment of a coadjutor, and the Right Rev. Joseph A. Meehan, Bishop of Monterey and bishop of the Catholic Church in Los Angeles, was elevated to the titular Archibishopric of Osimo and made his coadjutor in January, 1903. He was born in Davies County, Kentucky, 30 Dec., 1847, and was ordained priest at Baltimore 20 Dec., 1879. He was chancellor of the Archdiocese of San Francisco when he was chosen for the See that was to be vacated by his death, and his administration was most successful, especially in defending the rights of the Catholic Indians. He had just settled down as Archbishop Riordan's assistant, and that prelate had started on a tour for recuperation, when San Francisco was visited by the terrible calamity of the earthquake of 29 April, 1906, and its subsequent fire. Twelve churches were burned and their parishes absolutely wiped out of existence. In the burned district, along with the churches all the institutions, schools, asylums, hospitals, the great Jesuit church and College of St. Ignatius, and the Sacred Heart College of the Christian Brothers—were destroyed. Four churches in the city were wrecked by the earthquake, and others, including the cathedral and St. Patrick's Seminary at Menlo Park, more or less damaged. Happily no lives of priests, religious, or of children in their care were sacrificed. Archbishop Montgomery took a prominent and very active part in the work that began immediately, and Archbishop Riordan returned to the city and commenced the gigantic task of restoration which was rapidly accomplished in two or three years, aided by the generosity of the Catholic congregations of the United States, who sent more than $300,000 at once to the stricken diocese; this great exertion, however, had a debilitating effect on Archbishop Montgomery, who d. 10 Jan., 1907 (see MONTEREY AND SAN FRANCISCO). On 24 Dec., 1906 Bishop Denis J. O'Connell was appointed auxiliary Bishop of San Francisco. Bishop O'Connell was born at Donoughmore, Co. Cork, Ireland, 28 Jan., 1849, and made his studies at the American College, Rome. After his ordination he carried the success of the last crusade to the Holy Land to Rome, and returned as secretary to Bishop Conroy, abp. of Baltimore, to Rome, and was appointed auxiliary Bishop of San Francisco. On 24 Dec., 1906 Bishop O'Connell was appointed auxiliary Bishop of San Francisco. On 24 Dec., 1906 Bishop O'Connell was appointed auxiliary Bishop of San Francisco. On 24 Dec., 1906 Bishop O'Connell was appointed auxiliary Bishop of San Francisco. On 24 Dec., 1906 Bishop O'Connell was appointed auxiliary Bishop of San Francisco. On 24 Dec., 1906 Bishop O'Connell was appointed auxiliary Bishop of San Francisco. On 24 Dec., 1906 Bishop O'Connell was appointed auxiliary Bishop of San Francisco. On 24 Dec., 1906 Bishop O'Connell was appointed auxiliary Bishop of San Francisco. On 24 Dec., 1906 Bishop O'Connell was appointed auxiliary Bishop of San Francisco.

Statistics. The following religious are now established in the archdiocese (1911): Men—Capuchin Fathers (Province of England), Mendocino; Ukiah. Franciscan Fathers (St. Anthony Province), San Francisco; Santa Clara; Monterey; Los Angeles; San Diego; San Salvador; Salinas; Monterey; San Jose; San Francisco; Corpus Christi Church, San Francisco; St. Joseph's Church (for the Portuguese), Oakland. Sulpician Fathers, St. Patrick's Seminary, Menlo Park. Christian Brothers (Province of San Francisco), Sacred Heart College, St. Peter's School, San Francisco; Maximiliano; St. Mary's College, St. Patrick's, Stockton; Corpus Christi, San Francisco; Corpus Christi, Richmond, Virginia, as successor to Bishop van de Vyver.

Women—Sisters of Charity of the Blessed Virgin Mary (Dubuque, Iowa), St. Bridget's School, San Francisco; Petaluma. Sisters of St. Dominic (Mission San Jose, California), Immaculate Conception Academy; St. Anthony's and St. Boniface's School, San Francisco; Fruitvale; Mission San Jose; Ukiah. Sisters of St. Dominic (San Rafael, California), Academy, San Rafael; St. Rose's Academy, St. Dominic's and Sacred Heart Schools, St. Francis; San Leandro; Stockton; Vallejo; Academy and School, Benicia, Franciscan Sisters of the Sacred Heart (Joliet, Illinois), St. Joseph's Hospital, San Francisco. Sisters of the Holy Cross (Notre Dame, Indiana), St. Charles's School, San Francisco. Sisters of the Holy Family (San Francisco), San Jose; Oakland; San Jose and Mary (Hopelaga, Montréal, Province of Quebec), St. Joseph's, San Francisco; St. Francis de Sales School, Sacred Heart School, Oakland. Sisters of St. Joseph of Carondelet (Los An-
Sisters of Mercy (San Francisco), mother-house and St. Mary’s Hospital, St. Catherine’s Home, St. Clare, San Francisco; Presentation Nuns (San Francisco, California), mother-house, cathedral school, and 2 academies, San Francisco; Berkeley; Sanoma. Sisters of Charity of Providence (Montreal), hospital, Oakland. Little Sisters of the Poor (Chicago, Illinois), San Francisco; Oakland. Little Sisters of the Holy Family (Sherbrooke, Canada), St. Patrick’s Seminary, Menlo Park. Helpers of the Holy Souls (Paris, France), San Francisco. Carmelites Sisters, San Francisco. Religious of the Sacred Heart (Chicago Province), San Francisco; Menlo Park. Ursuline Sisters (Santa Rosa, California); St. Helena. Archbishop, 1; secular priests, 206; priests of religious orders, 146; total, 352; churches with resident priest, 113; missions with churches, 63; total churches, 176; stations, 31; chapels, 57; seminary, 1; ecclesiastical students, 96; seminaries of religious orders, 3; colleges and academies for boys, 7; students, 340; homes for young ladies, 21; normal school, 1; females educated in higher branches, 5,000; parishes with parochial schools, 42; pupils, 17,000; orphan asylums, 4; orphans, 1,900; infant asylums, 1; inmates, 480; industrial and reform schools, 2; inmates, 173; protectory houses, 1; inmates, 90; total of young people under Catholic care, about 23,000; deaf-mute asylum, 1; hospitals, 6; homes for aged poor, 4; other charitable institutions, 2; baptisms, 7,957; deaths, 3,710; Catholic population, about 250,000.

Sanhedrin, the supreme council and court of justice among the Jews. The name Sanhedrin is derived originally from the Greek word συνεδρία, which, variously modified, passed at an unknown period into the Aramaic vocabulary. Among the Greek-speaking Jews, ישועה, "the assembly of the Ancients," was apparently the common name of the Sanhedrin, at least in the beginning of the ancient Biblical Hebrew the appellation בית-דינ, "house of judgment," seems to have been quite popular.

History.—An institution as renowned as the Sanhedrin was naturally given by Jewish tradition a most venerable and hallowed antiquity. Some Doctors, indeed, did not hesitate to assign the Sanhedrin in the Council of the seventy Elders founded by Moses (Num., xi, 16); others pretended to discover the first traces of the Sanhedrin in the tribunal created by Josiah (II Par., xix, 8); but neither of these institutions bears, in its composition or in its attributions, any resemblance to the Sanhedrin as we know it. Nor should the origin of the Sanhedrin be sought in the Great Synagogue, of which tradition attributed the foundation to Esdras, and which it considered as the connecting link between the last of the Prophets and the first Scribes; for beside from a, and a militia, as consequence of the functions of this once much-famed body, its very existence is, among modern scholars, the subject of the most serious doubts. Yet it may be that from the council of the nobles and chief and ancients, on which the ruling of the restored community devolved at the time of Nehemiah and Esdras (Neh., ii, 18; iv, 8, 13; v, 7; vii, 5; I Esd., v, 5, 9; vi, 7, 14; xi, 8), gradually developed and organized, sprang up the Sanhedrin. At any rate, the first undisputed mention we possess touching the ישועה of Jerusalem is connected with the reign of Antiochus the Great (223-187 B.C., Joseph., "Antiq.," X, iii, 3). From that time on, we are more or less acquainted with the Sanhedrin until its disappearance in the overthrow of the Jewish nation.

As under the Greek rulers the Jews were allowed a large measure of self-government, many points of civil and religious administration fell to the lot of the high priest and the Sanhedrin. Thus it was that, when, after the Machabean wars, both the royal and priestly powers were invested in the person of the Hasmonean kings, the authority of the Sanhedrin was naturally thrown back in the background by that of the autocratic rulers. Still the Sanhedrin, where a majority of Pharisees held sway, continued to be...
“the house of justice of the Hasmonaeans” ("Talm.", Aboda zarah, 36a; Sanh., 29b). A coup d’état of John Hyrcanus towards the end of his reign brought about a “Sadducean Sanhedrin” ("Antiq.", XVI, xi, 1; Sanh., 11b). Though considered the last representative of the ancient Sanhedrin, these men were more of a political than of a religious body. The Sadducees, but owing to the conflicts between the new assembly and Alexander, it was soon restored, to be again overthrown by the Pharisaic reaction under Alexandra. The intervention of Rome, occasioned by the strife between the sons of Alexandra, was welcomed to the Sanhedrin so far as it permitted the Roman procural Gabinus, by instituting similar assemblies at Gadara, Jericho, Amathonte, and Saphra, limited the jurisdiction of the yevneiow of Jerusalem to the city and the neighbouring district (57 B.C.). In 47, however, the appointment of Hyrcanus II as high priest of the Jews resulted in the restoring of the Sanhedrin’s authority all over the land. One of the first acts of the now all-powerful assembly was to pass judgment upon Herod, the son of Antipater, accused of cruelty in his government ("Antiq.", XI, ix, 4). The revengeful prince was not likely to forget this insult. No so new. Indeed, had he not in his power more than forty-five of his former judges, more or less connected with the party of Antigonus, were put to death ("Antiq.", XV, i, 2). The Sanhedrin itself, however, Herod allowed to continue; but this new Sanhedrin, filled with his creatures, was henceforth under his control (in the case of the aged Hyrcanus). After the death of Herod, the territorial jurisdiction of the assembly was curtailed again and reduced to Judea, Samaria, and Idumea, the "ethnarchy" allotted to Archelaus. But this condition of affairs was not to last; for after the death of Archelaus and the annexation of Judea to the Roman province of Syria (A.D. 6), the Sanhedrin, under the control of the procurators, became the supreme authority of the Jewish people; only, capital sentences pronounced by the assembly perhaps needed confirmation from the Roman officer before they could be carried into execution. Such was the state of things during the public life of the Saviour and the following thirty years (Matt., xxvi, 57; Mark, xiv, 55; Luke, xxi, 66; John, xi, 47; Acts, iv, 15; v, 21; vi, 12; xxii, 30; xxiii, 1 sq.; xxiv, 20; "Antiq.", XX, ix, 1 sq.; "Bell. Jud.", II, xv, 6; " Vita.", 12, 5 sq.). We learn from the travels of Albinus and Gessius Florus the nation into rebellion, it was the Sanhedrin that first organised the struggle against Rome; but soon the Zealots, seizing the power in Jerusalem, put the famous assembly out of thy way. Despite a nominal resurrection first at Jerusalem, immediately after the destruction of the Holy City, and later on at Tiberias, the great Beth-Din of Jerusalem did not really survive the ruin of the nation, and later Jewish authors are right when, speaking of the sad events connected with the fall of Jerusalem, they deplore the cessation of the Sanhedrin (Sota, ix, end; Echa Rabbai on Lam., v, 15).

Composition.—According to the testimony of the Mishna (Sanh., i, 6; Shebbuth, ii, 2), confirmed by a remark of Josephus ("Bell. Jud.", II, xx, 5), the Sanhedrin consisted of seventy-one members, president included. Jewish tradition appealed to Num., xi, 18, to justify this number; but whether the text of Num. had actually any influence on the determination of the composition of the Beth-Din, may be left undecided. The New Testament writers seem to divide the members into three classes: the chief priests, the scribes, and the ancients; but it might be wrong to regard these three classes as in the same hierarchy, for in the New Testament itself the word "ancients", or the phrase "the ancients of the people", is quite frequently equivalent to "members of the Sanhedrin", just as is in Josephus the word ἄρχονται

"members of the council". They were styled "ancients" no doubt in memory of the seventy "ancestors" forming the assembly set up by Moses (Num., xi), but also because the popular mind attached to the word a connotation of that lastest dignity of honor and respectability (See in "Talm.", Bab., Sanh. 17b, 88a, also in Sixr, 92, the moral and intellectual qualifications required for membership). Since the Beth-Din had to deal frequently with legal matters, it was natural that many of its members should be chosen from among men specially given to the study of the Law; this is why we so often meet a Hillel in the Sanhedrin. Most of these scribes, during the last forty years of the institution’s existence, were Pharisees, whereas the members belonging to the sacerdotal caste represented in the assembly the Sadducean idea (Acts, iv, iv, 17, 24, xxiii, 6; "Antiq.", XX, ix, 1; "Bell. Jud.", II, xvi, 3; "Vita.", 38, 39), but history shows that at other periods the Pharisaic influence had been far from preponderating. According to what rules the members were appointed and the vacancies filled up, we are unable to state; it seems that various customs prevailed on this point in different periods, from the time of Antipater, as is said above, it is clear that politics interfered more than once in the transaction. At any rate we are told (Sanh., iv, 4) that a semikah, or imposition of hands, took place at the formal installation of the new appointees; and there is every reason to believe that the appointment was for life.

Who was president of the Sanhedrin? The Bible and Josephus on the one hand, and the Talmud on the other, contain statements which may shed some light on the subject; unfortunately these statements appear to be at variance with one another and need careful handling. In I Mach., iv, 44, we read that no meeting (ἰσόποτας) might be called in the land outside of the high priest’s bidding: but it would be clearly illogical to infer from this that the high priest was appointed by Demetrius ex officio president of the Sanhedrin. To conclude the same from the passage of Josephus narrating Herod’s arraignment before the Sanhedrin ("Antiq.", XIV, ix, 3-5) would likewise perhaps go beyond what is warranted by the text of the Jewish historian: for it may be doubted whether in this occurrence Hyrcanus acted as the head of the Hasmonaean family or in his capacity as high priest. At all events, the discussion about the last forty years of the Sanhedrin’s existence: at the trial of Jesus, Caiaphas, the high priest (John, xi, 49), was the head of the Beth-Din (Matt., xxvi, 57); so also was Ananias at the trial of St. Paul (Acts, xxiii, 2), and we read in "Antiq.", XX, ix, 1, about the high priest Ananus 2 summoning the Sanhedrin in A.D. 62. What the "Rabbinical tradition speaking persistently of Hillel, and Simon his son, and Gamaliel I his grandson, and the latter’s son Simon, as holding the office of Nasi from 30 B.C. to A.D. 70 (Talm., Bab. Shabbath, 15a)? Of one of these men, Gamaliel, we find mention in Acts, vii, 54, but even though he himself had played a leading part in the circumstances referred to there, he is not spoken of as president of the assembly. The truth may be that during the first century B.C., not to speak of earlier times, the high priest was not ex officio the head of the Sanhedrin, and it appears that Hillel actually obtained that dignity. But after the death of Herod and the deposition of Archelaus, which occurred about the time of Hillel’s demise, there was inaugurated a new order of things, and that is possibly what Josephus means when, speaking of these events, he remarks that "the presidency over the Sanhedrin was then transferred to the high priests" ("Antiq.", XX, x, end). It was natural that, in an assembly containing many scribes and called upon to decide many points of legislation, there should be, next to the Sadducean presidents, men
perfectly conversant with all the intricacies of the Law. Gauged by the standard of later times, the consideration which must have attached to this position of trust led to the misconception of its actual role. Bibles, discovered in the Sanhedrin, are very likely to have arisen in the Talmud.

Jurisdiction and Procedure.—We have seen above how the jurisdiction of the Sanhedrin varied in extension at different periods. At the time of the public life of the Saviour, only the ten toparchies of Judea were de jure subject to the Great Sanhedrin of Jerusalem; the Sanhedrin in Galilee and Transjordan was de facto the Jews all over acknowledged its authority (as an instance of this, see Acts, ix, 2; xxii, 5; xxvi, 12). As the supreme court of justice of the nation, the Sanhedrin was appealed to when the lower courts were unable to come to a decision (Sanh., vii, 1; xi, 2); moreover, it had the exclusive right of judgment in matters of special importance, as for instance the case of a false prophet, accusations against the high priest, the sending out of an armed force in certain circumstances, the enlarging of the city of Jerusalem, or of the Temple courts, etc. (Sanh., i, 5; ii, iv, 3, 4); the few instances mentioned in the New Testament exemplify the authority to which the competency of the Sanhedrin extended; in short, all religious matters and all civil matters not claimed by Roman authority were within its attributions; and the decisions issued by its judges were to be held inviolable (Sanh., xi, 2–4). Whether or not the nation had been deprived, at the coming of Jesus Christ, of the right to carry death-sentences into execution, is a much-disputed question. On the one hand, such a curtailing of the Sanhedrin’s power did actually take place seems implied in the cry of the Jews: “It is not lawful for us to put any man to death” (John, xviii, 31), in the statement of Josephus (Ant., XX, i, 1) and in those of the Talmud of Jer. (Sanh., 18a, 24b). Still we see in Acts, vii, St. Stephen put to death by the Sanhedrin; we read likewise in Talm. Jer. (Sanh., 24, 25) of an adulterer put to death at the stake and a heretic stoned; and these facts occurred precisely during the last forty years of the Temple’s existence, when the power of life and death is supposed to have been no longer in the Sanhedrin. Assuming the two facts recorded in Talm. Jer. to be historical, we might explain them away, just as the stoning of St. Stephen, and reconcile them with the curtailing of the Sanhedrin’s rights by putting them to death being in popular practice. Some scholars, however, deny that the Romans ever deprived the Sanhedrin of any part of its power: the Sanhedrin, they say, owing to the frequency of cases half-religious and half-political in nature, in order not to alienate the feelings of the people and at the same time not to incur the displeasure of the Roman authorities, practically surrendered into the hands of the latter the right to approve capital sentences; the cry of the Jews: “it is not lawful for us to put any man to death”, was therefore rather a flattery to the procurator than the expression of truth.

It now appears, however, that of these views the former is more favorably received by scholars. At all events, criminal causes were tried before a commission of twenty-three members (in urgent cases any twenty-three members might do) assembled under the presidency of the Ab Beth-Din; two other boards, also of twenty-three members each, studied the questions to be submitted to plenary meetings. These three sections had their separate places of meeting in the Temple buildings: the criminal section met originally in the famous “Hall of the Hewn Stone” (Mishna, Peah, ii, 6; Eduyoth, vii, 4) and the south section of the Temple. At the court of Archelaus, iv, 4, and served also for the sittings of the “Great Sanhedrin”, or plenary meetings; about A.D. 30, that same section was transferred to another building closer to the outer wall; they had also another meeting place in property called khanyyoth, “trade-halls”, belonging to the family of Hanan (cf. John, xvii, 13). The members of the Sanhedrin sat in a semicircle that they might see one another while deliberating (Mishna, Sanh., v, 1). The presiding set before them, the one to the right and the other to the left, to take down the votes (Mishna, Sanh., iv, 2). The members stood up to speak, and on matters of civil or ceremonial law the voting began with the principal member of the assembly, whereas the younger members voted first to give their opinion in criminal affairs. For the latter description a quorum of at least twenty-three men was required: a majority of one vote sufficed for the acquittal; for a condemnation a majority of two votes was necessary, except when all the members of the court (seventy-one) were present (Mishna, Sanh., iv; Tos. Sanh., vii).

Since in spite of the identity of names there is little in common between the old Great Sanhedrin of Jerusalem and the schools of Jamnia and Tiberias, it is quite useless to dwell on the latter, as well as on the Kallah assemblies of Babylon. But it will be the more easy to understand the position of the Sanhedrin of Jerusalem there were, besides the Great Sanhedrin we have dealt with above, local courts of justice sometimes designated by the same name, in all the Jewish cities.

Besides the acts Sanhedrin in both Talmuds, and the works of Josephus, which are the principal sources of information on the subject, we may cite the following works: MAHONDES, De Sanhedrin et Pentateuque Lat. (Heb. and Gr.); MORRIS, Sanhedrin, Heb. (Berdichev, 1883); BESDEN, De synedriis et præfectoribus iurisdictoribus veterum Hebræorum (London, 1863); UNGERI, Thesaurus antiquissim, Ψευδοκερίων, ΧΥΛΑ (Paris, 1872); BURM, Le sanhedrin... son origine et son histoire (Strasbourg, 1888); BARON, Législation du Temple de Jérusalem (Paris, 1876); IDEM, Lois judaïques civiles du Temple de Jérusalem (Paris, 1877–80); STAPPF, Le Palastien au temps de Jésus-Christ (3rd ed., Paris, 1883); IDEM, Das Synedrium (2nd ed., Leipzig, 1895); IDEM, Die innere Einrichtung des grossen Synedrium zu Jerusalem und ihre Fortsetzung im späteren palästinensischen Lehrhaus bis zur Zeit des R. Johuda ha-Nasi (Breuna, 1904); LAHR, Das jüdische Synedrium und die römische Procura in Judäa in Talmud, toled, Qiddushin (1862), 411–63; LAVY, Die Presidenz im Synedrium in Franketi’s Monatsbuche (1865); SCHÖNERT, Geschichte des jüd. Volkes im Gesetze Jesu Christi, 11 (3rd ed., Leipzig, 1890), 185 sq.

Charles L. Souvay.

San José de Costa Rica, Diocese of (Sancti Iosephii de Costarica).—The Republic of Costa Rica, Central America, constitutes this diocese as a suffragan see of the Archdiocese of Guatemala. It was established in 1850, and its Catholic population in 1910 amounted to 388,000, which is practically the total number of inhabitants in the country. There are in the republic: 103 priests, of whom 101 are secular and 12 regular; 68 parish churches; 98 chapels; 1 seminary; 1 diocesan college; 1 academy for girls; 2 orphan asylums; and 4 hospitals, all supported by the Church. At San José, the capital of the republic and see of the diocese, are located the seminary with 10 students; the diocesan college with 150 pupils; the Academy of the Sisters of Our Lady of Sion with 35 sisters and 100 girls; 1 school for poor girls, connected with the same academy, with 80 pupils; 1 orphan asylum, directed by the Sisters of Charity and caring for 230 orphans. There is in the city of Cartago another orphan asylum, under the Salesian Fathers, with 235 orphans. In 1847 President José M. Castro entered into negotiations with the Holy See and secured the establishment of a bishopric at Costa Rica, and on 10 April, 1851, the Rt. Rev. Anselmo Llorente y La Fuente was appointed the first bishop, and consecrated in Guatamala, 7 Sept., of the same year. The present incumbent is the Rt. Rev. Josep Josepho de Costarica.
San Juan, Diocese of (Sancti Joannis de Cuto), in the Argentine Republic at the foot of the Cordillera of the Andes between 28° and 41° S. lat. It is a suffragan of the Archdiocese of Buenos Aires and comprises the civil provinces of San Juan, Mendoza, and San Luis, and the national district of Neuquén, has an area of 151,096 sq. miles and a population of 540,000. These provinces were a part of the Archdiocese of Santiago de Chile until 1776, when they passed under the jurisdiction of the Diocese of Cordoba. In 1826 they were constituted into a vicariate Apostolic, and on 19 Sept., 1834, Gregory XVI erected the Diocese of San Juan de Cuyo. The first bishop was Fray Justo de Santa María de Oro, a prominent figure in the history of Argentina. He was the representative from San Juan to the Congress of Tucuman, which, on 9 July, 1816, proclaimed the independence of Argentina, and in this assemblage distinguished himself by resolutely opposing the monarchical form of government for the infant nation. He died in 1838, and a handsome bronze statue has been erected to him in the principal square of the city of San Juan. He was succeeded by: José Manuel Eufracio de Quiroga Sarmiento, who died on 25 Jan., 1852; Fray Nicolás Aldazor, died in 1866; Fray José Wenceslav Achaval, who founded the seminary and established the cathedral chapter, and died on 25 Feb., 1898; and the present incumbent, Fray Manuelino del Carmelo Benavente, to whom is due the erection of the statue of Christ the Redeemer at the crest of the Andes, on the boundary line between Chile and Argentina, as a symbol of peace and good will between the two nations. Mgr. Benavente was born at Buenos Aires on 17 Aug., 1845; entered the Dominicans, and was appointed bishop on 7 Jan., 1899. There are four Catholic primary schools for boys, seventeen schools for girls, and one Catholic agricultural college in the diocese. A Catholic daily paper, "El Porvenir," is published at San Juan, and ranks highest among the daily papers of the entire province. There are one or more confraternities attached to all parish churches to encourage piety and devotion. Among the notable edifices of the diocese may be mentioned: the episcopal palace and the Church of San Domingo in San Juan; those of San Francisco, Sagrado Corazón; and Godoy Crus in his residence, and the Matria de San Luis. At the present time a project has been laid before the National Congress to divide this diocese into three, viz., San Juan, San Luis, and Mendoza.

Isidro Fernández.

Sankt Pölten, Diocese of, in Lower Austria, derives its name and origin from Fanum Sancti Hippolyti, a monastery founded there in the ninth century and dedicated to St. Hippolytus. The origin of this monastery is obscure. Some think that monks from Lake Tegernsee in Bavaria founded a Benedictine abbey on the Traisen in 791, when Charlemagne united a part of the territory of the Avars with his empire, and Passau took this district as a mission field. In the ninth century Sankt Pölten was the eastern limit of Christian civilization, the only monastery east of the Enns. It is said that the monastery was transferred to secular canons in 985, and in 1080 the great reformer Altmann of Passau replaced these by Reformed Augustinian Canons. The first provost was Engelbert. The bishops of Passau attached much importance to the spiritual and material improvement of this important support of their power in the east. Hefele in his "Konstanzgeschichte" (Vl, pt. II, 4, 3) gives the opinion of the same that Bishop Gottfried of Passau held at Sankt Pölten in 1284. These were of importance: if a priest celebrates solemnly the wedding of his son or his daughter, he is to be suspended; the secular clergy, pastors, vicars, and chaplains must confess their more serious sins to the dean, the latter to the bishop or archdeacon; everyone may confess less serious sins and negligences to whom he will. Annates are mentioned even at this early date; "the first year of the episcopal collation of vacant churches is used for the church at Passau." Another synod was held at Sankt Pölten ten years later.

Soon after this (1306) the city came very near destruction. As in other places stories were current of sacrilegious acts of Jews, especially of pierced and bleeding Hosts. These tales led to the founding of churches of the Sacred Blood; and at Sankt Pölten, as elsewhere, the Jews were robbed and murdered. Only the intercession of Bishop Wernhart prevailed upon King Albert I not to destroy the city. When the Reformation began, the monastery of Augustinian Canons was not strong enough to withstand it; in 1565 there were only three canons. Aid, however, was given by Klesl (q. v.) and the Jesuits, whose efforts many citizens were converted. Part of one of Klesl's sermons is preserved in the city archives: "Behold, for a thousand years the pictures of your forefathers holding rosaries in their hands have stood in this church." In 1706 the first settlement of the Institute of Mary (q. v.) was made at Sankt Pölten, whence they had been called from Munich by the vice-president of the Government of Lower Austria, Jakob Freiherr von Kriechbaum. At the same time Carmelite nuns settled there. They were later suppressed by the Emperor Joseph II, and the same fate befell the monastery of Augustinian canons. The fifty-ninth and last provost was Ildefons Schmidt-bauer. The emperor took the monastery for the episcopal residence and the monastery church for the cathedral. As the Diocese of Wiener-Neustadt reached almost to the capital, Vienna, Joseph II united its territory with the Archdiocese of Vienna, and transferred its bishop to Sankt Pölten. A new diocese was established at Linz and both bishops were made suffragans of the Archbishop of Vienna.

Since 1785 Sankt Pölten has had thirteen bishops,
each episcopal see averaging less than ten years. A popular tradition relating that the last provost had presided for twenty years, but this has never been disproved by the tenth bishop, Feigerle, who reigned eleven years. Some of the bishops have been very distinguished: Sigismund, Count Hohenwart, who was tutor of the Emperor Francis and the Archduke Charles and became Prince Archbishop of Vienna; the court preachers Jakob Prantl, Michael Wagner, and Ignaz Feigerle; above all Joseph Fessler, the learned professor, skilful diplomatist, and secretary of the Vatican Council (d. 1872). In 1836 Johann Leonhard resigned the bishopric. At present the diocese has two seminaries for boys, which train candidates for the priesthood. Fessler united one of these seminaries with the seminary at the Benedictine Abbey of Seitenstetten; the other was established at Melk by the present Bishop Johann Rössler. In 1908 Rössler held the first diocesan synod of the independent Bishopric of Sankt Pölten; the important constitutions and acts of this synod have been printed. The Diocese of Sankt Pölten contains 620,000 Catholics; 479 secular priests; 505 members of male orders in 16 houses; and 874 members of female orders in 94 branch houses.

C. WOLFGRUNBERG.

San León del Amazonas, Prefecture Apostolic of, in Peru. Though the section of Peru lying on the eastern side of the Andes was comprised in the Dioceses of Ayacucho, Chachapoyas, Cuzco, and Huancayo, yet there were many pagan Indian tribes, formerly evangelized by the Jesuits, living outside of the sphere of civilization, roaming through the forests, subject to no laws. Moved by their pitiable condition the Peruvian bishops, with the approval of the Government, requested the Sacred Congregation of Propaganda, towards the close of the nineteenth century, to interest itself in their evangelization. As a result by a Decree of Propaganda, on 5 February, 1900, the uncivilized eastern portion of the state, known popularly as "la Montaña", was divided into three prefectures Apostolic depending directly on Propaganda, that of San León del Amazonas being the most northerly. It comprises the regions drained by the Rio Marañón and the Amazon with their tributaries, except the Rio Ucayali, and extends to the frontiers of Ecuador, Colombia, and Brazil. To prevent controversies as to jurisdiction, which might arise with the existing sees, the mission territory, by the wording of the Decree of erection, is to be coextensive with the uncivilized portions of the older dioceses. As the Indians are nomadic the missionaries have first, by teaching them the rudiments of agriculture, to overcome their wandering habits, and then strive to implant the fundamental truths of Christianity; but frequently when success seems to be crowning their efforts the savages yield to their roving instincts, and take again to their forest life. The mission, which is supported partly by the Government but chiefly by the Society of the Propagation of the Faith in Eastern Peru, is entrusted to the Augustinians (see Peruvian Augustinians), who determine to do so, directly on their father general. The superior, R. P. Paulin Díaz, resides at Iquito; there are stations also at Peba and Puerto Melander. Another was established at Huabica in 1903, but six months later it was destroyed by the Indians and the missionary martyrs (see Peba Indians). The first bishop was Don Pedro Barajas, who spent most of his episcopal life in exile. The second and third bishops had very brief episcopates. The present (and fourth) bishop, Don Ignacio Montes de Oca y Obregón, rules in more peaceful times, and has been able to build a large seminary, where not only Mexican subjects, but also some students from the United States and Canada, receive a solid education, imparted by a choice staff of professors belonging to different orders and to the secular clergy. A school of arts and crafts has been founded under the Augustinian Fathers, also an orphan asylum and a Catholic hospital. The cathedral has its chapter, canonically established; and there are 56 parishes with their churches and schools, and about three times as many chapels. The population of the diocese is (1910) 624,748, all Catholic, except perhaps some fifty foreigners. The capital, San Luis Potosí, has 52,946 inhabitants.

San Marco and Bismignano, Diocese of (Sancti Marci et Bismianensis). In the Province of Cosenza in Calabria, Italy. San Marco Argentano (so called because it is near the ancient Argenta) was founded in the eleventh century by the Norman Drogo, who erected a high tower there. Bismignano is the ancient Besidas, or Besidianum, which in the eleventh century became the residence of a Norman count and later a feoff of the Orsini. In 1497 San-

derberg’s daughter, wife of the Prince of Bisignano, invited thither many Albanian families who established various colonies, spoke their own language, and used the Greek Rite. The first mention of a bishop in 1179. Bisignano certainly had bishops in the tenth century, when mention is made of Ulutto in the life of St. Ullo di Rossano; Bishop Federico (1381) was killed in 1339. The two sees were united in 1818. The united dioceses are immediately subject to the Holy See, and contain 64 parishes, 256 priests, 110,000 inhabitants, some convents of religious, and a house of nuns.

U. BENIGNI.

San Marino, an independent republic lying between the Italian Provinces of Forli, Pesaro, and Urbino, having an area of 38 sq. miles and a population of 10,000. Its chief resources are agriculture and the growing of vines. The government is carried on by two consuls or captains-regent, elected for six months from the members of the General Council, composed of sixty members elected for life from the nobles, the burgesses, and the rural landowners, in equal numbers. The council has legislative powers; from its members is selected the Council of Twelve, which is the supreme court. The Kingdom of Italy, by the Act of 22 March, 1862, recognized the independence of the republic, and has retained friendly relations with it, the Sanmarinese currency being accepted in the kingdom. The territory extends over seven hills, on the highest of which, Il Titano, the city of San Marino is built. There are nine parishes, including the capital, and many more parishes, some of which belong to the Diocese of Montefeltro, and the others to Rimini. The Palace of the Supreme Council, containing paintings by Guido Reni, is worthy of notice.

According to the legend, St. Marinus, a stone-cutter, came to the mountain about A.D. 350 to ply his trade and spread the truths of Christianity. Monte Titano belonged to Feliciissima, a Riminese lady, who at her death bequeathed it to the mountaineers, recommending them to remain always united. San Marino, however, in the Lombard age, belonged to the Duchy of Spoleto; in the tenth century the abbeys of the territory were under the civil government, but they soon freed themselves and formed a free commune. The Holy See recognized the independence of San Marino in 1291. In quick succession the lords of Montefeltro, the Malatesta of Rimini, and the lords of Urbino attempted to conquer the little town, but without success. When the inhabitants aided Pius II against Sigismond malatesta, the pope granted the republic some castles. In 1503, but only for a few months, it formed part of the possessions of Cesar Borgia. In the same century some feudatory lords attempted its liberty; the last effort being made by Cardinal Giulio Alberoni, legate of Ravenna, who in 1739, aiding certain rebels, contrary to the orders of Clement XII, invaded the republic, imposed a new constitution, and endeavoured to force the Sanmarinese to submit to the Government of the Pontifical States. Twice in the nineteenth century (1825 and 1833) similar attempts were made. The celebrated archiepiscopate Bartolomeo Borghesi was a native of San Marino.

U. BENIGNI.

San Martino al Cimino, a prelature nullius in the territory of the Diocese of Viterbo, Province of Rome. The district is about 1840 feet above sea-level, on the western slope of Monte Fogliano in the Cimini mountains, amidst an extensive forest of chestnut trees. It is much frequented as a health resort. The principal dignity of the collegiate chapter has the title of abbot, and his jurisdiction extends only over the commune of San Martino, which consists of only one parish. In early times it was a Benedictine abbey, first mentioned under Benedict VIII (eleventh century). In 1150 it was entrusted to Eugenius III to the Cistercians of St-Sulpice near Belley; in 1207 it came into the possession of the monks of Pontigny, who (under Abbot John, 1213–32) raised it to a state of great prosperity. After 1379 the abbots were always commendatory; in 1564 it was included in the nuncio of St. Peter's chapters. In 1645 the castle and the abbey buildings were acquired by Olimpia Pamphilj, sister of Innocent X, who established a still-existing collegiate chapter. The Gothic church possesses architectural interest.

U. BENIGNI.

San Miniato, a city and diocese in the Province of Florence, Central Italy. It is first mentioned in the eighth century as a “vicus Wallari”; there was an oratory of S. Miniato, the celebrated martyr St. Menas. From the eleventh century the inhabitants of this town were frequently at war with those of S. Genesio, a neighbouring city, where many councils and assemblies of the nobles and cities of Tuscany were held (1074, Council of S. Peter in Tusc.; 1197, Treaty of S. Genesio between Celestine III and the Tuscan cities). The inhabitants of San Miniato were of the imperial party and the town was frequently occupied by German soldiers; the emperors granted them many privileges. In 1248 S. Genesio was completely destroyed. In 1397 the town was under the rule of Florence. From 1248 the chapter was transferred from S. Genesio to S. Miniato, and in 1526 the head of the chapter obtained the episcopal dignity. In 1408 the Republic of Florence wished to have it made an episcopal see, being then a suffragan of Lucca. Finally in 1622 it became a diocese. Its first bishop was Francesco Nori (1624). The diocese is a suffragan of Florence and contains 100 parishes with 240 secular and 42 regular priests; 108,000 souls; 5 convents of men, 13 convents of nuns, with 7 educational establishments for girls.

U. BENIGNI.
July, 1458; d. at Rome, in Aug., 1530. He belonged to a family of Spanish origin, in the service of Charles III of Durazzo, holding the sees of Roeca di Mondragone from the end of the fourteenth century. He received the name by which he was known because he was born on the feast of St. Nazarius. Having lost his father at an early age, he lived in Nocera dei Pagani with his mother; returning later to Rome, where he studied with Pontanus and was a member of the academy which assembled about this scholar. In this group he received the name of Sincerus by which he is often mentioned in the letters of the times. He was closely allied with the princes of Aragon at Naples and followed Federico into the exile to which he was driven by Louis XII. King of France (1521). Relying on the generosity of the French king, Federico established himself at Tours, and Sannazar remained with him until his death (9 Sept., 1534). During this time Sannazar discovered a MS. containing the hitherto unknown works of Latin poets, the fragment of the "Halieutica" ascribed to Ovid by Pliny the Elder, the "Cynegesia" of Gratius Fabricius, Nemessius, and Rutilius Namatanianus. MS. 227 of Vienna is actually the portion of this MS. which contained the "Halieutica" and Gratius. MS. 3261 of Vienna is only a sixteenth-century copy of Nemessius and Rutilius. On returning to his own country Sannazar left it no more. In his old age he had the sorrow of seeing his villa of Tore di Mergogliano destroyed by the imperial forces. He had just rebuilt it when he died.

In his youth Sannazar wrote a work in mingled verse and prose entitled "Arcadia," in which he described the pastoral life according to the traditions of the ancients. This work had great success; it was translated and imitated, and in the sixteenth century had about sixty editions; the first was at Venice, 12 May, 1502. The "Arcadia" gave rise to the pastoral style of writing much cultivated in Italy and elsewhere. A scholarly edition was issued by Saverio Turin, 1888. Sannazar's other Italian poems were sonnets and canzoni. All were collected by Gallipoli (Padua, 1732). A correspondent of Paulus Manutius mentions another work called "Gliomeri," now lost. A work entitled "Parsa" affords an idea of it. It consisted of detached pieces of a popular character, written in the Neapolitan dialect, and intended to amuse the king's Court.

Sannazar's poetical reputation was formerly founded on his Latin works: the "Eclogiae piscatoriae," bucolic verses concerning fishers, elegies and epigrams containing interesting details concerning the life of the poet and contemporaries, his mistresses, Carmosina, Bonifacius, and Cassandra, and which are the best evidences of his sentiments; "Salices," account of metamorphoses; and especially the "De partu Virginis," a poem in three cantos which cost him twenty years of labour and won him the name of the Christian Virgil. These works show that he was a diligent imitator of Ovid and Virgil.

Christian poem is a mixture of the antique and the modern, of mythology and Biblical reminiscences. Digressions often far from happy are inserted as ornaments, for instance in connexion with the ass of the manger Sannazar reviews all the legends in which the ass has played a part. He also abuses allegorical personifications. The poem, praised by Leo X before it was known, is dedicated to Clement VII, who discovered it with praise. Sannazar's Latin works were published by Volpi (Padua, 1719) and Janus Bronckhusius (1728).

San Salvador, the name given by Columbus to his first discovery in the New World. It is one of the Bahama group of islands, and lies to the east of the southern extremity of Florida in 24° north lat. and 75° west long. It is also known under its Indian name of Guanahani. There has been endless discussion as to exactly which one of the Bahamas was first discovered by Columbus, and it is probable that men never quite agree. All the same, the generally acknowledged is that the first land discovered by him was one of the Bahamas. Different writers have at different times claimed the distinction for Cat Island, Samana, Marigana, Grand Turk, and Watling's Island. The name San Salvador was given to Cat Island during the seventeenth and eighteenth centuries, but it does not fit the description given by Columbus in as much as it is not low and level and has no interior lagoon. A noteworthy attempt to prove that Samana was the landfall was made by Captain Gustavus V. Fox, of the United States Navy, in the "Report of the United States Coast Survey" for 1880. Navarrete first advocated Grand Turk Island in 1826, and Varnhagen in 1864 wrote a paper advocating Marigana. The weight of modern testimony, however, seems to favour Watling's Island. Lieutenant J. B. Murdoch, an American naval officer, made a careful study of the coast, and found that in Cat Island there were more points of resemblance in Watling's Island than in any other of the group. Among others whose opinion carries weight, and who are advocates of Watling's Island, are Major, the map-custodian of the British Museum, and the eminent geographer, Clemente R. Markham.

San Salvador, Diocese of (Sancti Salvatoris in America Centrali).—The Republic of Salvador, often incorrectly called San Salvador from the name of its capital, is the smallest and most thickly populated state of Central America. It is bounded on the W. by Guatemala, on the N. and N. E. by Honduras, on the S. by the Pacific Ocean. It lies between 92° 26' 55" and 89° 57' 10" W. long., and 14° 27' 20" and 13° 2' 22" N. lat., being 50 miles long and 186 miles broad. It is 7225 square miles in area and is divided politically into 14 departments. The population in 1906 was 1,116,342, of which 77,200 were Lacedas (mixed Spanish and Indian blood), and 224,645 Indians, the latter being principally Pipis, but partly Chontalis. The chief towns are San Salvador (59,540), Santa Anna (48,120), San Miguel (24,788), and Nueva San Salvador (18,770); the chief port is La Union (4000). With the exception of a narrow coastal seaboard population plateau, intersected by mountains containing many volcanoes, five of which are active. The most remarkable of the

latter, Isaloo, popularly called the “Lighthouse of Salvador” from its almost continual eruptions (three to each hour), broke out in a small plain on 23 February, 1770, and has now a cone over 6000 feet high. Earthquakes are frequent and San Salvador has often suffered, especially on 16 April, 1834, when the entire city was leveled in ten seconds. Salvador is rich in minerals, gold, silver, copper, mercury, and coal being mined. The chief imports, which in 1909 had a value of $4,176,931 (gold), are machinery, woolens, cottons, drugs, hardware; the chief exports besides minerals are indigo, sugar, coffee, and Peruvian balsam, valued at $16,963,000 (silver).

Railroads connect the capital with Santa Tecla and the port of Acajutla. Education is free and compulsory but very backward. There are about 600 primary schools, with 30,000 enrolled pupils, 20 high schools (3 normal, and 3 technical), and a university at San Salvador with faculties of engineering, law, medicine, pharmacy, and dentistry. The National Library (founded 1867) has 20,000 volumes; a National Museum was established in 1903. Salvador was invaded by Pedro Alvarado in 1524, emancipated from Spain in 1821, and made part of the Federation of Central America in 1824. In 1839 it became free. Its Constitution finally adopted in 1886. Provides for a president elected for four years, with a right to nominate four secretaries of State, and a National Assembly of 70 members, 42 of whom are landholders, all elected by universal male suffrage. Catholicism is the state religion, but the civil authorities are hostile and have confiscated the sources of church revenue. San Salvador on the Rio Acelhuate in the valley of Las Maracas was founded in 1528, but rebuilt in 1539, about twenty miles south of its first site; the diocese, erected on 23 September, 1842, is suffragan of Santiago of Guatemala, and contains 589 churches and chapels, 190 secular and 45 regular clergy, 70 nuns, 89 parishes, 3 colleges for boys and 3 for girls, and a Catholic population of over 1,000,000; the present bishop, who succeeded Mgr. Carcamo, is Mgr. Antonio Adolfo Pérez y Aguilar, born at San Salvador, 20 March, 1839, and appointed on 13 January, 1888.

San Sepolcro. See Borgo San-Sepolcro, Diocese of.

San Sepolcro. Piero da, painter, b. at Borgo San-Sepolcro, about 1420; d. there, 1492. The most usual form of his name is the traditional one, Piero della Francesca, which is better authenticated in contemporary documents than what in late research had been supposed to be the more correct form, Piero dei Franceschi (Gronau, "Repertorium für Kunstwissenschaft", xvii, 392-4). He was the son of a notary, Ser Benedetto, a member of an influential family long identified with the government of the town—the Franceschi. His earliest artistic training is unknown, but he was active at Perugia in 1438, probably as an assistant to Domenico Veneziano, and he was certainly employed in the same capacity in the Church of Sant’Egidio, Florence, in 1439-40. To Domenico and probably also to Paolo Uccello, Florentine Realists who did much for the technical side of painting, we may ascribe the formative influence in his art. Piero first appears as an independent master in 1445, when he painted a still surviving altar-piece of many panels for the Brotherhood of the Misericordia in his native town. He is said to have laboured with Domenico at Loreto, and he was certainly at Rimini in 1451, when he painted a remarkable fresco in the chapel of San Francesco, representing Sigismondo Malatesta, Lord of Rimini, venerating his patron saint, Sigismund. After this he was active at Ferrara and Bologna, and, according to Vasari, he also decorated a room of the Vatican for Pope Nicholas V. In 1454 he was again at Borgo San-Sepolcro, where in 1460 he painted a fresco of St. Louis of Toulouse, now preserved in the town hall. It was probably between this date and 1466 that he painted his masterpiece, the frescoes in the choir of San Francesco at Arezzo, which may, however, have been begun earlier. The subject is the “Story of the True Cross”, involving incidents beginning with Adam and including the story of Solomon and the Queen of Sheba, Constantine and St. Helena, Heraclius and Chosroes. These frescoes rank with those by Masaccio in the Brancacci Chapel as epoch-making in the decorative art of the fifteenth century.

In the spring of 1469 Piero was at Urbino, lodging in the house of Giovanni Santi, the father of Raphael, in which city a large part of his later activity occurred. From this period probably dates the remarkable diptych of the Uffizi, containing the portraits of the Duke (then Count) of Urbino, the ideal prince of the Renaissance, and the mild and refined image of his wife, Battista Sforza, with allegorical triumphs of these rulers on the reverse side. About this time he also painted the well-known “Madonna” with saints and angels, venerated by the Duke of Urbino, now in the Brera, Milan; and the “Flagellation of Christ”, a
beautiful architectural composition in the cathedral of Urbino. According to a well-established tradition recorded by Vasari, Piero became blind in later life. At this time he wrote his celebrated treatises: "De quinque corporibus regularibus", which show him as a great geometer, and his "Prospettiva Pingendi" (Treatise on Perspective), a manual for painters. This work reveals him as the greatest master of the theory of perspective in his day, and gave him a reputation beyond Italy. His testament is recorded 5 July, 1479, and he was interred in the present cathedral of his native town in 1492.

His principal frescoes, besides those mentioned, include: the "Resurrection," in the town hall of Borgo San-Sepolcro, a marvellous piece of foreshortening and perspective; a "Heracles", now in the possession of Mrs. J. L. Gardner of Boston; and an imposing "Magdalen" in the cathedral of Arezzo. Among his panel pieces are the "Triumph of Chivalry" (New York Historical Society) and the "Annunciation" in the "Baptism of Christ" and the "Nativity", both in the National Gallery, London, the latter the first moonlight scene in modern painting; the "Annunciation" in the Gallery at Perugia; "St. Michael" in London; and "St. Thomas Aquinas" in the Folio-Pezzoli Museum at Milan. The charming "Portrait of a Young Girl" attributed to him in this gallery, as well as similar portraits in other European galleries, is now generally ascribed to another artist. Piero's position in the development of Italian art is a unique and important one. He is the greatest of that group of pathfinders, the Realists, whose scientific experiments created the grammar of modern painting. In mural painting he towers above his contemporaries as the worthy successor of Masaccio, and the connecting link between his art and that of Raphael. In the Central Italian painting of the Renaissance his position was a dominant one; he may be called the founder of the school. The chief masters of the following generation — Perugino and the rest — either studied under or were influenced by him. Of his more intimate pupils, Melozzo da Forli carried perspective to the highest perfection, while Luca Signorelli developed figure-painting to the greatest excellence attained before Michelangelo. To Florentine influence of draughtsmanship Piero united the superior colour sense of the Umbrians. Most remarkable was his rendition of light and air, in which he easily surpassed his contemporaries. His types are seldom beautiful, but they are strong and primeval, admirably modelled, and as impassive as the sculptures at the Parthenon. Perhaps the most striking feature of his art is this wonderful objectivity, in which regard he stands rivalled by Holbein and Velasques alone in modern painting.

VASARI, Vite, ed. MILANETI (1878); tr. BLAIRFIELD AND HOPKINS (1897). Of the biographies of Piero that by PRUNI (Borgo San-Sepolcro, 1889) is rather a pander; that of WERTHEM (Strasbourg, 1886) is most scholarly; another is by WATTENZI (London, 1901); RICCI, Piero della Francesca (Rome, 1910), is best for illustrations.

GEORGE KREHN.

San Severino, Diocese of (Sancti Severinii). — San Severino is a small town and seat of a bishopric in the Province of Macerata in the Marches, Central Italy. It has two cathedrals, the ancient one near the old castle, which contains precious quadrocento paintings and inlaid stalls in the choir. The new cathedral, dating from 1821, is the old Augustinian church and contains paintings by Pinturicchio (Madonna), Antonio and Gisan Gentile da S. Severino, Pomarancio, and others. The Churches of S. Domenico and S. Francesco are also adorned with fine pictures; the Church of S. Maria in Doliolo, formerly a Benedictine monastery, has a crypt believed to be the ancient temple of Feronia converted later into a church. The two sanctuaries of S. M. del Glorioso and S. Maria dei Lumi are worthy of note. The most important civic building is the communal palace, which contains some halls richly decorated and a collection of ancient inscriptions. S. Severino stands on the site of the ancient Septempeda, a city of Picenum, later a Roman colony. In the eighth century it was a fortress of the Duchy of Spoleto. The Church of San Severino gave its name later to the new town that grew up around it. In the twelfth and thirteenth centuries it was at constant war with the neighbouring cities, especially with Camerino, and always supported the cause of the emperor, particularly of Frederick II. Louis the Bavarian named as vicar of San Severino Smeduecio della Scala, who, passing into the service of the Holy See, gave great help to the expedition of Cardinal Albornoz and became feudal lord of San Severino, a post held later by his son Onofrio. His nephew Antonio paid with his life for attempting to resist the arms of Pietro Colonna, the representative of Martin V; his sons tried in vain to recapture the city (1434), which remained immediately subject to the Holy See. Among its illustrious sons were: the lacquer-workers Indovino and Giovanni di Pier Giscomo, the poet Panfilo, the physician Eustachii, the condottiere Francesco da S. Severino, and the Franciscan, Saint Pacifico. A local legend attributes the preaching of the Gospel to a holy priest, Maro. Under the high altar of the cathedral are the relics of Sta.

Hippolytus and Justinus. The saint from whom the city takes its name is commonly believed to have been Bishop of Septempedia, but his date is unknown. In the Middle Ages S. Severino was suffragan of Camerino; the old cathedral was then called the Duomo di S. S. Clara. In 1566 it had a seminary. In 1586 Sixtus V made it an episcopal see, the first bishop being Orazio Mazzari. Among his successors were: Angelo Maldacchini, O.P. (1644); Alessandro Calai Organi (1702), the restoror of the seminary; Angelo Antonio Anselmi (1796), exiled in 1799. The diocese was a suffragan of Fermo, and has 29 parishes with 18,000 inhabitants, 3 houses of nuns and 5 of religious men.

U. BENIGNI.

SANSEVERINO, GAETANO, restorer of the Scholastic philosophy in Italy, b. at Naples, 1811; d. there of cholera, 16 Nov., 1865. He made his studies in the seminary at Nola, where his uncle was rector. After his graduation he continued his studies of philosophy, with the special view of comparing the various systems. He became a canon of the cathedral of Naples, professor of logic and metaphysics in the seminary, substitute-professor of ethics in the university, and eventually scrivere in the National Library.

Sanseverino had been educated in the Cartesian system which at that time prevailed in the ecclesiastical schools of Italy, but his comparative study of the various systems supplied him with a deeper knowledge of the Scholastics, particularly St. Thomas, and of the intimate connexion between their doctrine and that of the Fathers. From that time until the end of his life he was the champion of the restoration of Christian philosophy, in which, not only by his writings, but by his lectures and conversation, he was of supreme assistance to Leo XIII. With this object, he founded, in 1840, "La Scienza e la Fede," a periodical which was continued until 1857 by his disciples and associates, Signorillo and d'Amello. His principal work is "Philosophia christiana cum antiqua et nova comparata" (5 vols., Naples, 1862). This work is incomplete, covering only logic and psychology, but one hardly knows whether to admire most its lucidity of exposition, its copiousness of argument, or the vast number of authorities it draws from. One cannot fail on a large scale, and that which assured his reputation as a teacher, was "I principali sistemi della filosofia del diritto, discorsi colloquio de' Santi Padri e de' Dottori del Medio Evo" (Naples, 1850—53), in which he discusses and confutes the systems of Rume and Gioberti on the criterion of truth. Another important work of his is "La dottrina di S. Tommaso sull'origine del potere e sul pretesto diritto di resistenza" (on the origin of authority and the pretended right of resistance) (Naples, 1853). "Elementa philosophiae christiana" (Naples, 1864—70) was written for the use of his class, and the second edition (1870) was edited by his disciple Signorillo. Besides the two already mentioned, his disciples included Talamo, Prisco (now a cardinal) Cacace, Galvanese, and Giustiniani.

Proverbia, Del Canonicus Gaetano Sanseverino (Naples, 1867).

U. BENIGNI.

SAN SEVERO, DIOCESE OF (SANTICI SEVERINI), in the Province of Foggia (Capitanata), Southern Italy, situated in a fertile plain, watered by the Radicosa and Triolo. The origin of the city is obscure. Under the Normans it became the residence of a prince, then passed under the Benedicites of Torre Maggiore, later under the Templars, on whose suppression it was dismembered. It suffered frequently from earthquakes, especially in 1827, 1828, and 1851. The Diocese of San Severo was established in 1580. The episcopal see is only the continuation of that of Civi-

tate, which in turn succeeded the ancient city of Tesum. Civitate, where the papal troops were defeated by the Normans in 1052, was an episcopal see in 1062 under Amelgerio. Among the bishops of Civitate were: Fra Vittorio de' Vitali (1258), a distinguished theologian; Luca Gauricio (1545), a distinguished astronomer; Franc. Acliato (1561), later a cardinal. In 1580 the first occupant of the See of San Severo was Martino de Martinis, a Jesuit; other bishops are: Fabrizio Verallo (1590), nuncio in Switzerland, later a cardinal; Fra' Vitali Venturi (1625), a distinguished canonist and defender of the rights of the Church; Orazio Fortunati (1670), who restored the cathedral; Carlo Felice de' Mata (1678), founder of the seminary, which was enlarged by two of his successors, Carlo Franc. Gascoli (1703) and Fra Diodoro Sommatino (1720), an Augustinian. To this diocese was added later the territory of the ancient Dragomaria, a city built in 1005 by the Byzantine Governor of Apulia. Cappelletti gives the names of twenty-eight bishops between 1061 and 1657. It seems never to have been formally suppressed. The diocese is suffragan of Benevento, and has 7 parishes, about 46,000 inhabitants, and 6 regular seminaries.

Cappelletti, La chiesa d'Italia, XIX (Venice, 1867).

U. BENIGNI.

SANSOVINO, ANDREA CONTUCCI DEL, b. at Monte San Sovino, Arezzo, 1460; d. 1529. He was a sculptor in the transition period at the end of the fifteenth and beginning of the sixteenth century, and showed the qualities of the transition in his style. He worked at first in his native town and in Florence, then for about eight years in Portugal. His best sculptures were produced in Florence and Rome after his return. The "Baptism of Christ," a marble group in the Baptistery of Florence, contains very effective figures finely contrasted. The monuments of Cardinals Basso and Sforza Visconti in the Church of Santa Maria del Popolo at Rome are also striking. They prove that he was able to combine what he had fully learned from antiquity with the art of the mature early Renaissance. The central and chief niche stands upon a high pedestal between Corinthian pillars; above the round arch of this niche is an attic, that supports the figure of God the Father upon a shell throne with a genius at each side. In the central niche the dead are represented asleep, their heads resting upon their arms, awaiting resurrection; above them in the vault of the niche is a figure of the Blessed Virgin, on a smaller scale. In and above side niches are the cardinal virtues, which rise upwards towards the genius just mentioned. The unity in the conception of the structure and the rich decoration of the details show great skill in art. It has been often asserted that there is a touch of the spirit of Raphael in the combination of dignified repose and subdued movement in the figures. Sansovino had a great task given him in the Casa Santa of Loreto, where he was to produce nine reliefs and twenty-two statues. Bramante had enclosed the marble covering, architecturally very fine, which was designed to have rich plastic ornament. Sansovino was only able to make a few of the reliefs, such as the "Annunciation" and the "Birth of Christ," the other reliefs and statuettes were made by his assistants and successors.

Among these pupils was Andrea Tatti (about 1480—1570) of Florence, who took the name of his master Sansovino. During the forty later years of his long life he was, next to Titian, one of the most distinguished artists of Venice. In Venice he represents the second epoch of the grand style in art, in the head of a clearly defined school. Among his first works was a statue of St. James, at Florence, which, with exception of a somewhat unnatural pose, has striking qualities, and a Bacchus entirely in the an-
tique style, also at Florence. Among his works at Rome is the celebrated “Madonna del Prato” in the Church of San Agostino. At Venice he adopted a style more akin to painting, which is pleasant in small works, especially if movement and animation are expressed. Among works of this class are the statuettes of Pallas, Apollo, Mercury, Pax, the relief of Pherixos and Helle which adorn the small loggia he built on the campanile, a terra-cotta Madonna, formerly gilded, placed within the campanile, a statue of Hope, and a group containing the Madonna in the palace of the Doges. The colossal statues of Mars and Neptune in front of this palace are less successful. The bronze reliefs around the choir of San Marco, and the bronze doors of the sacristy, are, however, show pictorial beauty. Sansovino made for the Chapel of St. Anthony at Padua a marble relief in the grand style; it represents the bringing back to life of one who had been drowned, and contains extraordinary contrasts of graceful and repellent figures.

As an architect, Jacopo adopted much from the style of Bramante, and in architecture as well as in sculpture brought much of the Roman Cinquecento to Venice. His chief architectural work, the public library, has always been greatly admired on account of its classic form, rich decoration, and wholly pictorial arrangement. It displays a double order of columns, Tuscan and Ionic, over which is a rich frieze and a balustrade with statues. One of his most beautiful decorative works is the small loggia mentioned before. The best of the churches is San Giorgio de’ Greci; it has always been greatly admired for its fine work in marble. Another building of tasteful construction that is ascribed to Sansovino is the Palazzo Corner della Cà Grande. Sansovino gathered about him a large number of artists, who executed the decorations of the buildings he erected. These buildings were architecturally entirely in accordance with Venetian taste. Thus he was universally regarded in Venice as a master of the first rank, and felt himself completely at home there, although at first he had thought of going to France.

G. GEBTHANN.

Santa Agata dei Gotti, Doctor of the Church (S. Agatha of Catania), in the Province of Benevento, Southern Italy; the city, situated on a hill at the base of Monte Taburno, contains an ancient castle. In the vicinity are many antiquities and inscriptions belonging to the ancient Sabinæ, a town taken from the Samnites by the Romans and made a Latin colony in 313. The present name is derived possibly from a body of Goths who took refuge there after the battle of Venediu (552); the church of the Goths in Rome, too, was dedicated to St. Agatha. In 806 Emperor Louis II captured it from the Byzantines who had taken it from the Duchy of Benevento; in 1066 it fell into the hands of the Normans. It was almost completely destroyed by an earthquake in 1466. Besides the Satican inscriptions there are two Christian inscriptions of the sixth century. It had already been an episcopal see for a long time when the first bishop, Venedius, was appointed (970); a metrical epitaph of his successor, Adelardus, is preserved in the Church of the Misericordia. Of the other bishops we may mention Felice Peretti (1566), later Sixtus V; Feliciano Nuncio, O.P. (1583), visitor of the monasteries in Germany; Giulio Santucci, a Conventual Observant, distinguished theologian; Filippo Albin (1699), who reformed the discipline and studies of his clergy; St. Alphonsus Ligouri (1762–75). The diocese is suffragan of Benevento; it contains 26 parishes, 16 churches and chapels, 93 secular and 14 regular priests, 30,500 inhabitants, 3 houses of religious men and 6 of nunis; 1 institute for young boys, and 3 for young girls.

Cappelletti, Le chiese d’Italia, XIX (Venice, 1870); Andreoli, Storia storica della città di S. Agata dei Goti (Naples, 1892).

U. BENIGNI.

Santa Casa di Loreto.—Since the fifteenth century, and possibly earlier, the “Holy House” of Loreto has been numbered among the most famous shrines of Italy. Loreto is a small town a few miles south of Ancona and near the sea. Its most conspicuous building is the basilica. This dome-crowned edifice, which with its various annexes took more than a century to build and adorn under the direction of many famous artists, serves merely as the setting of a tiny cottage standing within the basilica itself. Though the rough walls of the little house have been raised in height and are cased externally in richly sculptured marble, the interior measures only thirty-one feet by thirteen. An altar stands at one end beneath a statue, blackened with age, of the Virgin Mother and her Divine Infant. As the inscription, Hic Verbum caro factum est, reminds us, this building is honoured by Christians as the veritable cottage at Nazareth in which the Holy Family lived, and the Word became incarnate. Another inscription of the sixteenth century which decorates the eastern façade of the basilica sets forth at greater length the tradition which makes this shrine so famous as the “Christian pilgrim,” it says, “you have before your eyes the Holy House of Loreto, venerable throughout the world on account of the Divine mysteries accomplished in it and the glorious miracles herein wrought. It is here that most holy Mary, Mother of God, was born; here that she was saluted by the Angel, here that the eternal Word of God was made Flesh. Angels conveyed this House from Palestine to the town Terraso in Illyria in the year of salvation 1291 in the pontificate of Nicholas IV. Three years later, in the beginning of the pontificate of Boniface VIII, it was carried again by the ministry of angels and placed in a wood near this hill, in the vicinity of Rosano, in the March of Ancona; where having changed its station thrice in the course of a year, at length, by the will of God, it took up its permanent position on this spot three hundred years ago [now, of course, more than 600]
Ever since that time, both the extraordinary nature of the event having called forth the admiring wonder of the neighbouring people and the fame of the miracles wrought in this sanctuary having spread far and wide, this Holy House has, with so many attainments and foundations and yet remain solid and uninjured after so many centuries, been held in reverence by all nations." That the traditions thus boldly proclaimed to the world have been fully sanctioned by the Holy See cannot for a moment remain in doubt. Not a single people, even in various parts, has failed to render honour to the shrine, and an immense number of bulls and briefs proclaim without qualification the identity of the Santa Casa di Loreto with the Holy House of Nazareth. As lately as 1894 Leo XIII, in a brief conceding various spiritual favours for the sixth centenary of the translation of the Santa Casa to Loreto, summed up its history in these words: "The happy House of Nazareth is justly regarded and honoured as one of the most sacred monuments of the Christian Faith: and this is made clear by the many diplomas and acts, gifts and privileges accorded by Our predecessors. No sooner was it, as the annals of the earlier centuries reveal, transferred to Italy and exposed to the veneration of the faithful on the hills of Loreto than it drew to itself the fervent devotion and pious aspiration of all, and as the ages rolled on, it maintained this devotion ever ardent. If, then, we would sum up the arguments which support the popular belief in the miraculous transference of the Holy House from Palestine to Italy by the hands of angels, we may enumerate the following points: (1) The reiterated approval of the tradition by many different popes from Julius II in 1511 down to the present day. This approval was emphasized by an inscription in the Roman Martyrologium in 1609 and the concession of a proper office and mass in 1699, and it has been ratified by the deep veneration paid to the shrine by such holy men as St. Charles Borromeo, St. Francis de Sales, St. Ignatius Loyola, St. Alphonsus Liguori, and many other servants of God. (2) Loreto has been for centuries the scene of numerous miraculous cures. Even the sceptical Montaigne in 1582 professed himself a believer in the reality of these (Waters, "Journal of Montaigne's Travels", II, 197–207). (3) The stone of which the original walls of the Santa Casa are built is supposed by the most learned writers to be the same as that on which the house of Joseph is built, and are as are known in the neighbourhood of Loreto. But both stone and mortar are, it is alleged, chemically identical with the materials most commonly found in Nazareth. (4) The Santa Casa does not rest and has never rested upon foundations sunk into the earth where it now stands. The point was formally investigated in 1751 under Benedict XIV. What was then found is therefore fully in accord with the tradition of a building transferred bodily from some more primitive site.

It must be acknowledged, however, that recent historical criticism has shown that in other directions the Laurentian tradition is beset with difficulties of the gravest kind. These have been skilfully presented in the much-discussed work of Canon Chevalier, "Notre Dame de Loreto" (Paris, 1906). It is possible that the author has in some directions pressed his evidence too far and has perhaps overstated his case, but despite the efforts of such writers as Echeb, Faloci-Pulighetsi, Thomas, and Kresser, the substance of his argument remains intact and has as yet found no adequate reply. The general contention of the work may be summarized under five heads: (1) From the accounts left by pilgrims and others it appears that the time of the translation (1291) there was no little cottage venerated at Nazareth which could correspond in any satisfactory way with the present Santa Casa at Loreto. So far as there was question at all in Nazareth of the abode in which the Blessed Virgin had lived, was what was pointed out to pilgrims was a sort of natural cavern in the rock. (2) Oriental chronicles and similar accounts of pilgrims are absolutely silent as to any change which took place in 1291. There is not the merest hint of an appearance at Nazareth of a shrine formerly held in veneration there. It is not until the sixteenth century that we find among Orientals any hint of a consciousness of their loss and then the idea was suggested from the West. (3) There are charters and similar documents which prove that a church dedicated to the Blessed Virgin already existed at Loreto in the twelfth and thirteenth centuries, that is to say, before the epoch of the supposed translation. (4) When we eliminate certain documents commonly appealed to as early testimonies to the tradition, but demonstrably spurious, we find that no writer can be shown to have heard of the miraculous translation of the Holy House before 1472, i.e., 180 years after the event is supposed to have taken place. The shrine and church of Loreto are indeed often mentioned; the church is said by Paul II in 1464 to have been miraculously founded, and it is further insisted that the site remains of this first church was brought there by angels, but all this differs widely from details of the later accounts. (5) If the papal confirmations of the Loreto tradition are more closely scrutinized it will be perceived that not only are they relatively late (the first Bull mentioning the translation is that of Julius II, 1507), Jull, the first very guarded in expression, for Julius introduces the clause "ut pie credatur et fama est", while they are obviously dependent upon the extravagant leaflet compiled about 1472 by Teramano.

It is clearly impossible to review here at any length the discussions to which Canon Chevalier's book has given rise. As a glance at the appended bibliography will show, the balance of recent Catholic opinion, as represented by the more learned Catholic periodicals, is strongly in his favour. The weight of such arguments as those drawn from the nature of the stone or brick (for even on this point there is no agreement) and the absence of foundations, is hard to estimate. As regards the date at which the translation tradition makes its appearance, much stress has recently been laid by its defenders upon a fresco at Gubbio representing angels carrying a little house, which is asserted to represent a scene of the translation. Pulignani, "La s. Casa di Loreto secondo un affresco di Gubbio", Rome, 1907). Also there are apparently other representations of the same kind for which an early date is claimed (see Monti in "La Scuola Cattolica", Nov. and Dec., 1910). But it is by no means safe to assume that every picture of angels carrying a house must refer to Loreto, while the assigning of dates to such frescoes from internal evidence is one of extreme difficulty. With regard to the papal pronouncements, it is to be remembered that in such decrees which have nothing to do with faith or morals but which concern historical facts which can in any way be called dogmatic, theologians have always recognized that there is no intention on the part of the Holy See of defining a truth, or even of placing it outside the sphere of scientific criticism so long as that criticism is respectful and takes due regard of place and season. On the other hand, even if the Loreto tradition be rejected, there is no reason to doubt that the simple faith of those who in all confidence have sought help at this shrine of the Mother of God may often have been rewarded, even miraculously. Further it is quite unnecessary to suppose that any deliberate fraud has taken place in the formation of this history. There is much to suggest that a sufficient explanation is afforded by the hypothesis that a miracle-working statue or picture of the Madonna was brought from Terzo in Illyria to Loreto by some pious Christians and was then confounded
with the ancient rustic chapel in which it was harboured, the venue formerly given to the statue afterwards passing to the building. Finally, we shall do well to notice that at Walsingham, the principal English shrine of the Blessed Virgin, the legend of "Our Lady's house" (written down about 1465, and consequently earlier than the Loreto translation tradition) supports that in the sixteenth century. A Confessional chapel was built at Walsingham which exactly reproduced the dimensions of the Holy House of Nazareth. When the carpenters could not complete it upon the site that had been chosen, it was transferred and erected by angels' hands at a spot two hundred feet away (see 'The Month', Sep., 1901). Consecrated with this spot, it was, as a short distance of the sea, and Our Lady of Walsingham was known to Erasmus as Diva Paralutalasia.

Of the older works on Loreto it will be sufficient to mention Arrieta, Historia de las Provincias etc. (first printed about 1579, but written in 1531). It is founded upon Baptista Man- tuanus, Teramo, and a supposed "tabula, vetustate et caris conscripta", and the official history of Loreto may be regarded as contained in TURBINIIUS, Laurentius Historiae Libri V (Rome, 1687); and MARTORELLI, Pietro istorio della S. Casa nazarena (Rome, 1723). In more modern times the authors have VOUGIER, De sanctis Beatae et Beatissimae Mariae Virginis, (written in 1806, but printed only in 1839), and LEFEBVRE, La Santa Casa di Loreto (Paris, 1890). These writers showed an appreciation of the grave critical difficulties attending the Loreto tradition, but they were not equipped to express a solution.

A new epoch in this discussion, already heralded by FATHER GRIAB at the Munich Congress; by M. BOUTINNE in Revue du Clergé, XXII (1900), 241; by M. PATARD, La S. Casa di Nazareth (Florence, 1905); and by LE HARRI, Hist. de na Zarate (Paris, 1908), was brought to a climax by CHEVALIER, Notre Dame de la Loreto (Paris, 1906). Among the learned Catholic reviewers which have openly pronounced in Chevalier's favour may be mentioned the articles of D. Deendorp, Tijdschrift voor Geest- en Gezelschap (VII, 1898, 475-94; Stimmen aus Maria-Laach, II (1900), 375; Revue Biblique, IV (1907), 647-70; Revue Eucharistique, XXIII (1908), 580-59; Revue des Deux Mondes, XXVI (1908), 310-13; Revue des Deux Mondes, LXXV, 1909; Revue des Deux Mondes, LXCVII (1909), 350-63; Revue Provinciale Apollonique, III (1908), 755-61; Revue des Deux Mondes, LXCVII, 1909; and many others. The articles by Ch. Apollinaire on the same side may further be mentioned BOUTINNE, La Question de Loreto (Paris, 1910); BOUFFAY, La Vérité sur la Foi de Loreto (Paris, 1910); and CHEVALIER, La Santa Casa de Loreto (Paris, 1908). See also the articles on Loreto in the Kirchliche Hand- bendungen (Munich, 1908), and in Herders Konservativen-Forum (Frankfurt, 1907).

The articles that have openly taken part against Chevalier's thesis are comparatively few and unimportant, for example L'ami du Clergé (1906-1907); a series of articles by A. MURILLO in La Sociedad Catolica (Milan, Jan.-Dec., 1910); and other articles of the same kind, in periodicals, Revue de la petite France (Tbingen, 1909), 212-347. Isolated works in favour of the Loreto tradition are those of DEBREECHT, La Vérité sur la Foi de Loreto (Paris, 1907); F. TAPA, La Santa Casa de Loreto (Paris, 1909); POURAT, La Question de Loreto (Paris, 1907); FALCO- FULGIO, La Santa Casa de Loreto secondo un affresco di Gubbio (Rome, 1910). For an account of Loreto in English reproducing the old tradition and making a geographical standpoint see GABRIEL, Loreto the New Nazareth (London, 1895).

HERBERT THURSTON.

Santa Catharina (Florianopolis). Diocese of (Florianopolitana), is suffragan see of the Archdiocese of Porto Alegre (São Pedro do Rio Grande), in Brazil, South America, created in 1906. Its jurisdiction comprises the whole territory of the State of Santa Catharina, with a Catholic population of 405,800 out of a total of about 500,000 in 1909. It is composed of nine municipalities, and is bounded on the north by the states of Rio Grande do Sul and Rio Grande do Norte. The first known white man who explored this territory, landing in the Bay of Perdido, Sebastian Cabot in 1525 and Diego Garcia in 1526 discovered this island of Santa Catharina, then known as the Island of Pataos, and thence they proceeded to Lisbon. Santa Catharina was constituted as a state of the Brazilian Union in 1811, and in 1891, having adhered to the republic on 17 Nov., 1890. The diocese comprises the following vicariates: Florianopolis, Santo Antonio, Blumenau, Brusque, Criciuma, São Francisco, Itajai, Joinville, Garopaba, Lages, Laguna, Tijucas, Tubarão, Urussanga, and Vila Nova. The residence of the bishop is in Florianopolis, the capital of the state, situated on the western shore of Santa Catharina Island, with a magnificent harbour, pleasant climate, and a population of 18,000.

Besides the cathedral, there are at Florianopolis 12 churches, 2 monasteries (Franciscans and Jesuits), and 2 nunneries (Sisters of the Divine Providence, and Sisters of the Sacred Heart). Conceptually the diocese maintains an excellent high school in the state capital, known as the Gymnasio de Santa Catharina. There is also a college for girls, in charge of the Sisters of the Divine Providence, called Collegio Coração de Jesus. The same sisters have an asylum for orphan girls. Florianopolis has 12 Catholic cemeteries, and 1 Protestant one. Two American Franciscan Friars publish two periodicals in the diocese, one entitled "L'Amico", in the city of Blumenau, and another, "Smeto de Céo", in the city of Lages. There is another Catholic publication, edited in Florianopolis by the Associação Proteutora dos Desamparados Irmão Joaquim, under the name of "A Fe". The present bishop of Santa Catharina, Rt. Rev. João Becker, was b. 24 Feb., 1879, and appointed 3 May, 1908.

JULIAN MORENO-LACALLE.

Santa Cruz de la Sierra, Diocese of (Santa Cruz de la Sier- ra), in Bolivia, erected on 6 July, 1605, as suffragan of Lima, but since 2 July, 1609, it has been dependent on La Plata (Charcas). Its first bishop was Mgr. Antonio Calderón. The diocese comprises the departments of Santa Cruz (area 126,000 sq. miles) and Beni (district of Mojos), which lie immediately west of Matto Grosso, Brazil. The rural and wooded portions of these regions are inhabited by the Moxos Indians, among whom flourishing missions were established in the seventeenth century by the Jesuits under Father Cipriano Barraza. The conquest of the Indians was completed under Moxos Indians and many other native missions, which were suppressed after 1810, when the suppression of the society, after which the missions declined rapidly; though but many of the Moxos are now pagan, the converted Indians are fervent Catholics (see Moxos Indians). The town of Santa Cruz (population 18,000), formerly called also San Lorenzo de la Frontera, was founded in 1785 on the Rio Piray, on the eastern slope of the Andes. The diocese contains about 250,000 Catholics; 103 priests; 54 parishes; and 74 churches and chapels. The present bishop, Mgr. Belisario Santisteban, was born in the Diocese of Santa Cruz de la Sierra on 2 January, 1815; and on 26 June, 1858, appointed titular Bishop of Tibar and ordained to Mgr. Baudissin, whom he succeeded on 1 June, 1891.

SINOPSIS ERITADEAL y geograf. de la repub. de Bolivia (La Paz, 1903); BIBLIOTECA, Diccionario para la historia, geograf. de la repub. de Bolivia (La Paz, 1906).

SANTA FE, ARCHIDIOCESE OF (SANTARÉM ET IN AMERICA), in New Mexico, was erected by Pius IX in 1850 and created an archbishopric in 1875. It comprised at first the three territories of New Mexico, Colorado, and Arizona, detached from the Diocese of Durango, Mexico. Since 1888 it has been restricted to the larger portion of New Mexico. Suffragans: the Bishops of Tucson and Denver. The Catholics number about 150,000, of whom 12,000 are Pueblo Indians (Tiguex and Quirix); the majority of the remainder are of Spanish descent. There are (111) 50 parish churches and 350 mission chapels, most of them built or thoroughly repaired since 1850; these are attended by 70 priests, 8 seculars, 26 regu- lars (3111 June 1890), 26 regulars; this is a missionary in charge of from six to ten scattered missions, some of them very far apart. Of the priests, there is but one native; the others are French, Belgian, German, and Italian. Their ministerial work is governed by the decrees of the Baltimore Council and of the diocesan synod; they have se-
electrical conferences and annual retreats; they form also among themselves a Clergy Relief Union, incorporated, and they are aided by 180 religious: Christian Brothers, Sisters of Loretto, of Charity, of the Most Blessed Sacrament, of St. Francis, and of the Sorrowful Mother.

Despite the increase in recent years of English-speaking parishes, the exclusive teaching of English in the schools, the diocese at large still is a Spanish-American community. The assimilation of Mexicans and Indians with the Americans, desired by some and dreaded by many, is an arduous task. All the priests speak both English and Spanish, besides other languages, to-day. Santa Fe is divided in the confession and from the pulpit, except in a few cities (Santa Fe, Albuquerque, Las Vegas, Raton, and Roswell) where both languages are used. Likewise some of the old Spanish customs are retained, such as the administration of confirmation to infants. "Roma non obdecent", the privileges of Spain in regard to fast and abstinence are still in vogue, and the clergy live on the offerings of the faithful without regular salaries. Education, when the diocese was erected, was limited to the teaching in Spanish, exclusively, of the primary elements of religion, reading, and writing, by either the priests or religious working as instructors or helping men in a college for boys (Santa Fe); a high school (Albuquerque); eight academies for young ladies; two boarding schools for Indians; parochial schools in Santa Fe, Albuquerque, Las Vegas, Bernalillo, Jemez, Peña Blanca, Polum, Roswell, and Gallup, with an average, daily increasing, of 4000 children under Catholic care, despite the poverty of the people, and the moneyed competition of the Presbyterian and Methodist missions, which have selected New Mexico as a field of operation. There is also in the diocese an orphan asylum for girls, and four sanatoria with hospital annexed, conducted by religious, and several schools at Santa Fe, Albuquerque, Las Vegas, and Roswell. The flourishing condition of the diocese is due to the zeal of: Archbishop Lamy (1850-85); Archbishop Salpointe (1885-94); Archbishop Chapelle (1894-97); Archbishop Bourgade (1898-1908) who built the cathedral at Tucson; and Archbishop Pitaval (1909-); and of the pioneers: Very Rev. P. Equillon, Revs. G. J. Macheboeuf (afterwards Bishop of Denver), J. B. Salpointe, Gabriel Ussel, J. M. Couderet, A. Truchard, J. B. Gallaire, J. B. Fayet, J. Fialon, C. Seux, A. Fourchege etc.

The relations between church and State authorities are harmonious. Mass is said and catechism taught at the penitentiary and at the Government Indian school; at every Legislature a Catholic priest is chosen for chaplain and in nearly all country schools the teachers are Catholics.

JULES DERRACHE.

SANTAFE, DIOCESE OF (SANCTAE FIDELIS), in the Argentine Republic, suffragan of Buenos Aires, comprising the Province of Santa Fe and the gobernaciones of El Chaco and Formosa. Formed in 1844, the diocese was established at the capital of Buenos Aires (Ascuncio) by Pope Leo XIII, and administrated by Archbishop Juan Agustin Borex (b. at Buenos Aires, 1825), an envoy extraordinary to the Sacred Congregation of Propaganda, and then titular Archbishop of Ascuncio, and apostolic delegate to the Argentine MissionaryPF (1834-9). He was succeeded by Most Rev. Martinez de la Parra, and Bishop Martin L. Forner (1856-96). The diocese is divided into eight vicariates, with five sees: Buenos Aires, Cordoba, Santa Fe, Tucuman, and Mendoza. The episcopal see is at Buenos Aires.

SANTA LUCIA della MASA, PRELATURE NULLIUS OF, within the territory of the Archdiocese of Messina, Sicily, now governed by an administrator Apostolic, who is always a titular bishop. It comprises 7 parishes, with 72 secular priests.

For bibliography, see SICILY; MESSINA.

U. BENTON.
Santa Maria, Diocese of (Santo Domingo), a Brazilian see, suffragan of Porto Alegre. The latter, formerly known as the See of São Pedro do Rio Grande do Sul, was recently made an archdiocese and divided, three new sees, Pelotas, Santa Maria, and Uruguayana, being separated from it by Plus X on 15 August, 1910. Santa Maria, containing twenty-two parishes, comprises the central and northern portions of the State of Rio Grande do Sul. The climate is mild, the country well wooded and fertile, and there are many colonies of German and Italian emigrants among the inhabitants, who practise 15,000 solidiers. The See was created 2 Oct., 1765, by Mgr. Caletto having been instituted a cathedral established a hospital and school at Santa Maria in 1883. Moraes, *Up the Orinoco and down the Magdalena* (New York, 1910).

A. A. MacEerlan.

Santander, Diocese of (Sancti Andree, San- tanderensis), in Spain, takes its name not from St. Andrew as some, maled by the sound of the name, believe, but from St. Hemeterius (Santenter, San- tander), one of the patrons of the city and ancient abbey, the other being St. Celedonius. The diocese is bounded on the north by the Bay of Biscay, on the east by the south by Burgos and the south by Burgos and Palencia, and in the west by Leon and Avilés. It is suffraged to *Sancta Maria de Biscaya* and is one of the civil Provinces of Santander and parts of those of Alava and Burgos. In Roman times Santander was called Portus Victorini, in memory of Agrippa's having conquered it from the Cantabrians, and in the period of the reconquest was regarded as one of the Asturias—Alavera, on the rivers Saja and Miera. The territory was reaped by Alfonso I, the Catholic. Alfonso II, the Castile, founded the Abbey of Sta. Hemeterius and Celedonius, where the heads of those holy martyrs were kept. Alfonso VII, the Emperor, made it a collegiate church and, in the reign of King Sancho II, the Strong, granted a charter to the Abbey and port of St. Hemeterius in reward for services, and Alfonso V did as much. Alfonso VIII gave the abbey the lordship of the town on 11 July, 1187. In the fourteenth century the canons were still living in community in this abbey, and Abbot Nuño Pérez, chancellor to Queen Maria, drew up constitutions for them; these constitutions were confirmed by King Fernando IV in 1312, and later by John XXII. The town of Santander aided King Ferdinand when he conquered Seville; it broke the iron chains with which the Guadalquivir had been closed, by ramming them with a ship—which is the armorial blazon of the city.

Santander did not become an episcopal see until the reign of Fernando VI. By a Bull of 12 December, 1754, Benedict XIV confirmed the creation of the See of Santander, making the collegiate church a cathedral, and giving it territory taken from the Archdiocese of Burgos. In 1755 Fernando VI raised the town to the rank of a city. The last Abbot and first Bishop of Santander was Francisco Javier de Arriaza, a native of Madrid, who took possession in 1755 and ruled until 1761. The Province of Santander was formed into an *intendencia* in 1766, and in 1773 became an independent intendencia and one of the provinces in the definitive political organization (see Spain). The city at present has a population of 54,700 and is one of the most important harbours on the Bay of Biscay. The cathedral is a structure of very diverse periods, and at one time had the character of a fortress. Its lower portion contains a spacious crypt, called the parish church of Christ because it serves parochial uses. The dark and sombre character of the structure marks its original purpose of a pantheon. It consists of three naves with three spires forming a single tower, and a vast pinnacled chimer, its height five stories, and the whole tower has been erected in it. The building dates from the twelfth or early thirteenth century, but presents added features of many later periods. A spiral staircase,
SANT' ANGELO

constructed in the wall, leads from the crypt to the cathedral properly so called, to which the cloister of the old abbey serves as vestibule, opening on the principal street (Rua Mayor) of the city. The church itself, exclusive of the capilla mayor, is formed of three naves of unequal height, 128 1/2 feet in length, and 594 feet in width. In the choir is buried Pedro de Mino y Logroño (d. 1699), who had it built. In a corner of the nave on the Gospel side is a holy-water font of Arabic workmanship, probably brought as a memorial of the conquest from Córdoba where it served as a basin for ablutions; it bears a very poetical Arabic inscription, which has been deciphered by José de Salas; this capilla mayor, or principal chapel, was built late in the seventeenth century by Abbot Manuel Francisco de Navarrete y Ladrón de Guevara (1695-1705). The relics of the martyrs Sts. Hemeterius and Celestine are kept in the high altar. On the south is a cloister which long served as a cemetery; and in the south-eastern corner was the Chapel of the Holy Ghost, the last remains of the hospice founded by Abbot Nuño Pérez Monroy, counsellor to Doña María de Molina in the distracted reigns of Fernando IV and Alfonso XI.

Some of the historic monuments of Santander are: San Francisco, an ancient convent of the Friars Minor, facing on the Plaza de Beced; Consolación; the parish of the Society of Jesus, connected with the old Jesuit college; the new parish of Santa Lucía. Among the benevolent institutions are: the civil and military hospital of San Rafael, built in 1791 by Bishop Rafael Tomás Menéndez de Luces; the House of Charity, the Asylum of San José, for the education of poor boys; the Casa Cuna (foundling hospital); the provincial inquisicia (founding asylum), founded in 1778 by Bishop Francisco Lazo de San Pedro. The intermediate school, Instituto de Segunda Enseñanza, has been established in the old convent of the nuns of St. Clare since 1839; and the ecclesiastical seminary since 1852 in the monastery of Santa Catalina de Monte Corbán, formerly Hieronymite, a short distance from the city. There is also the pontifical seminary of Comillas, founded by Antonio López, Marqués de Coruña, placed under the care of the Jesuit Fathers and raised to the rank of a pontifical university. The distinguished men whom this diocese has produced are numberless; among them may be mentioned: St. Beatus of Liébana, Fray Antonio de Guevara, Juan de Herrera, Amador de los Ríos, and Pereda.

Sant' Angelo de Lombardi, Diocese of (Sant'Angeo Lombardorum et Brescianensium), in the Province of Avellino, Southern Italy. The city was established by the Lombards at an unknown period. There are sulphurous springs in its vicinity. In 1664 it was almost completely destroyed. It became an episcopal see under Gregory VII, but its first known bishop is Thomas, in 1179, when the see was a suffragan of Conza. In 1540 under the episcopate of Rinaldo de Cencelli, it was united to the Diocese of Bisaccia (the ancient Romules), a Samnite town captured by the Romans in 295 B.C.; it appears first as a bishopric in 1179. Another of its prelates, Ignazio Cianti, O.P. (1646), was distinguished for his learning. In 1818 it was incorporated with the See of Montevideo, the earliest known bishop of which is Marco (1049) who is called the first archbishop of Canna and Nasareth, from which it has been again separated. The see contains 9 parishes with 40,000 souls, 45 secular priests, and some religious, 3 monastic establishments, and a girls' school.

SANTA SEVERINA

Sant' Angelo in Vado and Urbania, Diocese of (Santí Angeli in Vado et Urbanænsibus). S. Angelo in Vado was a city in the Marches, on the site of the ancient "Tibernum Metaurense", a town of the Umbrian Senones, near the River Metaurus, believed to have been destroyed by the Goths. Later there arose a new burg called, in the Church of S. Michael, the Church of S. Angelo in Vado, which in 1383 became a city and an episcopal see. Urbania is situated on the River Caniano near S. Angelo, on the site of the ancient Aleria, considerable ruins of which still remain. It was destroyed at an unknown date, and rebuilt under the name of Casale Montanaro, in 1296, being in favour of the Guelphs it was demolished by the Ghibellines. It was restored again through the munificence of the Dominican bishop, Guglielmo Durante, and called Castel Durante; it was included in the Duchy of Urbino, and contained a magnificent ducal palace. It is uncertain whether the Tiberine bishop Eupodius (Euhodius?), Marius, and Innocent, who assisted at the Roman Councils of 465, 499, and 500, belonged to Tibernum Tiberiacum (Città di Castello) or to S. Angelo. At the beginning of 1635 S. Angelo was an archepiscopal titulus, subject to the Abbot of the Monastery of St. Cristo at Camerino, to whom the Archepiscopal of Castel Durante was also subject. In that year Urbanus VIII erected the two towns into dioceses, changing the name of Castel Durante to Urbania, and uniting them aequae principali under Onorato degli Onorati, who governed it for forty-eight years. Other bishops were: Gian. Vincenzo Castelli, O.P. (1711), who restored the cathedral of Urbania, and Paolo Zamperoli, O.P. (1779), sent into exile under Napoleon, dying there. The diocese is a suffragan of Urbino, and has 78 parishes with about 20,000 souls, a Caschepos convent, and 8 houses of nuns.

Santarem, Prelature Nullius of, created in 1903, in the ecclesiastical Province of Belem do Pará, with a Catholic population of 200,000. The present bishop is Rev. Armando Bahlmann, titular Bishop of Argos, b. 8 May, 1862, appointed 10 Jan., 1907, consecrated 19 July, 1908. The residence of the bishop is at Santarem, State of Pará, created 24 Oct., 1848. It is beautifully situated on the northern shores of the Tapajos River, and has a population of 28,000. The city is divided into four parishes: Santarem, Alter do Chao, Boim, and Villa Franca. The monastery of the Franciscan friars, who have charge of the missions of the prelature, is located also in Santarem. In this town, the government of the State of Pará supplies the necessary funds for a school of over 200 pupils; there are also 3 colleges for boys, 2 for girls, and 1 for boys and girls.

Santa Rufina. See Porto and Santa-Rufina, Diocese of.

Santa Severina, Archdiocese of (Sanctæ Severina), in the Province of Catanzaro in Calabria, Southern Italy. Situated on a rocky precipice on the site of the ancient Siberena, it became an important fortress of the Byzantines in their struggles with the Saracens. It is not known whether it was an episcopal see from the beginning of the Byzantine domination; when it became an archbishopric, probably in the tenth century, its suffragans were Orea, Acerenza, Gallipoli, Alessano, and Castro. The Greek Rite disappeared from the diocese under the Normans, but was retained in the cathedral during a great part of the thirteenth century. In 1298, when the see was one Giovanni, but his date is uncertain. From 1006, when the name of Bishop Stefano is recorded, the
tist of prelates is uninterrupted. Among them we may mention Ugo (1269), formerly prior of the Holy Sepulchre in Jerusalem; Jacopo (1400), who died in repute of sanctity; Alessandro della Marra (1488), who restored the episcopal palace and the cathedral; Giovan Matteo Sertori, present at the Lateran Council; Giulio Sertori (1533), legate to Ferrara under Charles V; and Antonio Santorio (1622), later a cardinal, and Fausto Caffarelli (1624), both renowned for learning and piety; Gian Antonio Paravicini (1654), even as parish priest of Sondrio in Valtellina was distinguished for his zeal in combatting and converting heretics; Francesco Falabello (1660), who suffered much in defence of the rights of his confraters. Carlo Verri (1678) was for a season Metropolitan of Bologna, and Nicolo Carminí Falco (1743), the learned editor of the history of Dio Cassius.

In 1818 the territories of the suppressed dioceses of Belcastro and S. Leone were united to Santa Severina. Belcastro, considered by some authorities to be the ancient Chonia, had bishops from 1122; the most noted was Jacopo di Giacomelli (1542), present at the Council of Trent. Bishops of S. Leone are known from 1322 till 1571, when the diocese was united to that of S. Severina. The archidioces has now only one suffragan see, Caritati, and contains 21 parishes with 45 inhabited towns, 80 priests, 4 convents, and 2 houses of nuns.

**Santiago, Knights of.** See Saint James of Compostella, Order of.

**Santiago, University of.** It has been asserted by some historians that as early as the ninth century a course of general studies had been established at the University of Santiago by King Ordoño who sent his sons there to be educated, but no absolute proof can be adduced to prove it. The first reliable sources say that it was founded in 1501 by Diego de Muñoz (Bishop of the Canaries), Diego de Muñoz (dean of Santiago), and Lope González Marzo, who on 17 July, 1501, executed the public document and subscribed it as a foundation charter, and academy for the study of the humanities, intending, as the document proves, to later include all the other faculties. The founders endowed the school from their private fortunes. On 17 December, 1504, Julius II issued a Bull in which the foundation was declared of public utility for the whole of Galicia and granted it the same privileges as those enjoyed by all the other general schools (estudios generales). In 1506 the faculty of canon law was founded by Bull of Julius II. The faculties of theology and Sacred Scripture were founded in 1556 and those of civil law and medicine in 1548, thus completing the university courses which were required at that time. The real founder of the University of Santiago was Archbishop Alfonso de Fonseca, who founded the celebrated college which bears his name. He endowed it munificently and obtained from Clement VIII (1526) the right to found faculties, assign salaries, frame statutes for the rector, doctors, lecturers, and students and for conferring degrees. The faculty of grammar and arts was installed in the hospital of Asabacheria which had been suitably arranged. In 1555 Charles V sent Cuesta as royal delegate with instructions to organise the new university. The wrangling, doubts and wrangling which generally existed between the higher colleges and the universities, Cuesta’s first care was to completely separate the University and the College of Fonseca, both as to organisation and administration.

During the first period of its existence, that is from its foundation to the time of Fonseca, among the distinguished professors of the university may be mentioned Pedro de Vitoria and Alvaro de Bazán, and in the second epoch Villagra and José Rodríguez y González, professor of mathematics, appointed by the Emperor of Russia to direct the observatory of St. Petersburg, and associated with Blot and Arago in the measurement of the meridional circle, and many others. After many disputes and agreements the Jesuits were given charge of the grammar courses in 1593, and remained in charge until their expulsion from the Spanish possessions in 1767. The department of arts was transferred from the Asabacheria to the university. The constitutions of Cuesta were modified by Guevara, by Pedro Portocarrero in 1588, and finally by Alvaro. In 1616, other changes were approved by Philip II and were in vogue until the general reforms which took place in the eighteenth century.

The colleges of Fonseca, San Clemente, San Martín, Pinario, and that of the Jesuits were independent colleges which were founded and which thrived in the shadow of the university. In the seventeenth century, in this as in all the other universities, studies fell into a state of decadence; between the university and Fonseca College arose serious differences which were not settled until the middle of the eighteenth century in the time of Ferdinand VI. But this time, however, many notable reforms were introduced, the number of professorships was increased, and more extensive attributes were granted to the rector; a treasurer was also appointed and the rector was named by royal order.

In 1769 the university was transferred to the building formerly occupied by the Jesuits and the faculties were increased, making a total of thirty-three, seven of theology, five of canon law, six of civil law, five of medicine, one of mathematics, one of moral philosophy, one of experimental physics, three of arts, and four of grammar. After the university had taken possession of the old Jesuit college it soon became evident that some additions would have to be made, and although these were carried out without any special plan they resulted in a spacious building with a severe and dignified façade. In 1799 the faculty of medicine was suppressed, but it was restored once more in 1801. Then Juan Martín de Oliva was appointed royal visitor; his visit, however, was not productive of lasting results, the recommendations he had made being set aside in 1807. From then until the present time the university has suffered from the constantly altering plans of the Government which has deprived all colleges and universities of Galicia of their autonomy. The faculty of theology was definitely suppressed in 1852. The influence of the university of Galicia has been great, and from its halls men eminent in all walks of life have passed. The library of 40,000 volumes is good, as are also the laboratories of physics, chemistry, and natural history. The latter possesses a crystallographical collection of 1024 wooden models which formerly belonged to the Abbé Haüy. The present number of students reaches between 700 and 1000, the majority of whom follow the medical and law courses.

SANTIAGO

square miles), and Talca (area 3678 square miles), and the islands of Juan Fernandez, and extends from the River Choaops, which separates it from the Diocese of Serena, to the River Maule, which forms the boundary and divides it from the Diocese of Concepcion. Its area is 26,018 square miles, and its population is estimated at 1,000,000, of whom 14,000 are non-Catholics. Erected by Pius IV in 1561 as a suffragan of the Archdiocese of Lima, it comprised all of Chile and the Argentine Provinces of Cuyo and Tucuman. This extensive territory was later subdivided, portions being taken to form new dioceses. In 1593 the entire southern portion of Chile from the River Biobio was separated to form the Diocese of Imperial, the present Diocese of Concepcion. In 1570 Tucuman was separated to form the Diocese of Cordova, the Province of Cuyo being added in 1850. In 1840 Santiago was raised to metropolitan rank by Gregory XVI, the Diocese of Serena being also erected by him, taking from Santiago all the territory which lay north of the River Choaops. The archdiocese has three suffragan dioceses: Concepcion, Serena, and Ancud. The principal cities of the archdiocese are Santiago (municipal area 43 square miles), the capital of Chile, has 400,000 inhabitants; Valparaiso, 170,000; Talca, 42,000; Curicó, 19,000; Quillota, 12,000; Viña del Mar, 27,000; and San Felipe, 11,000. Twenty-one bishops and four archbishops have governed the diocese, the Most Rev. Juan Ignacio González being the incumbent. The cathedral church is a beautiful three-naved stone edifice, Roman in style; it is dedicated to the Assumption of the Blessed Virgin, was built in the eighteenth century, and was restored during the latter part of the nineteenth century by Archbishop Casanova. It is 321 feet long, 95 feet wide, and 53 feet high. The cathedral chapter is composed of a dean, archdeacon, precentor, maestro escuela, treasurer, and eight canons.

The archdiocese is divided into 117 parishes. Valparaiso and Talca are governed by ecclesiastical governors who are invested with some episcopal jurisdiction. The churches and public chapel number about 481, and semi-public oratories are very numerous. There are 20 religious institutes of men, with 905 members, and 76 houses, and 29 religious orders of women, with 1727 members and 120 houses. The secular clergy number 412, and the regular 451. There are three secular and five religious institutes for Catholic education, with 619 students. The latter has faculties of law, engineering, mines, agriculture, and a course in engineering. The Institute of Humanities, which is attached to the university, has 400 pupils. In the secondary schools, for men as well as for women, the number of students is 43,643. The number of students in religious institutes is 5,140 students are in attendance. Primary instruction is given to more than 25,000 children in the parochial and other schools under religious direction. Normal schools for teachers are directed by the Christian Brothers, for men, and by the Salesians, and the Society of St. Thomas Aquinas, for women. There are 35 hospitals in the archdiocese under the patronage of the State, the municipalities, the Church, or private individuals; 30 of these are under the care of religious, as are also the lunatic asylums and houses for deaf-mutes. The Little Sisters of the Poor conduct two homes for the aged, and the Sisters of the Good Shepherd have houses of correction for women, and ten asylums for penitents. More than 300 missions are preached annually in the archdiocese to prepare the people for complying with the Easter precept, and more than 15,000 persons make retreats in the 19 houses which are dedicated to this purpose.

Among the numerous Catholic societies may be mentioned those of Dolores (Our Lady of Sorrows), for the care of the sick; of St. Francis Regis, for the regularization of marriages; of St. Philomena, for mutual aid; St. Joseph's Union, for working men; the National Union, also for working men; the Society of the Buena Presa (Good Press), the Society of Primary Instruction, for Catholic schools, under the patronage of St. Thomas Aquinas; the Federation of Social Works, for the Diocese of Concepcion. Its area is 26,018 square miles, and its population is estimated at 1,000,000, of whom 14,000 are non-Catholics. Erected by Pius IV in 1561 as a suffragan of the Archdiocese of Lima, it comprised all of Chile and the Argentine Provinces of Cuyo and Tucuman. This extensive territory was later subdivided, portions being taken to form new dioceses. In 1593 the entire southern portion of Chile from the River Biobio was separated to form the Diocese of Imperial, the present Diocese of Concepcion. In 1570 Tucuman was separated to form the Diocese of Cordova, the Province of Cuyo being added in 1850. University of Santiago.—For many years the prelates and influential Catholics of Chile, dissatisfied with the instruction given by the State University which had under its control all the secondary and higher grades, had desired to found in Santiago a free Catholic university. The Catholic Assembly of 1885 appointed a committee which in accord with the bishops formulated a plan to realize this desire. On
SANTIAGO

21 June, 1888, Archbishop Mariano Casanova issued the decree founding the Catholic University and naming, for its first Chancellor, Bishop Isidoro Larrain Gandarillas, titular Bishop of Martyropolis. The university was solemnly opened on 31 March, 1889; at that time it comprised only the faculties of law and mathematics, and an institute for literary and commercial courses. There was no further addition until 1896, when mathematics was divided into the two courses of agricultural engineering and architecture. In 1900 the Institute of Humanities was founded, adding a department of letters to the courses at the university. The princely legacy left in 1904 by D. Frederico Scotto and his mother made possible the foundation of an industrial and agricultural school, a course of much utility in this country where scientific and industrial and agricultural sciences are still in their infancy. In 1905 a sub-course of engineering was founded to fill a much felt want for the training of foremen and assistants to the engineers. The faculty of medicine, although undoubtedly the most necessary, has not yet been established, as the cost of maintaining it would be more than that of all the others combined. Up to the present time no faculty of theology has been founded, owing to various difficulties, but it will not be long before this will also be organized. The attendance in 1910 for the courses of law, mathematics, agriculture, industries, and languages was 619, with 51 professors; and in the Institute of Humanities 400, with 44 professors. The university has chemical, physical, electrical, and mineralogical laboratories and a library of more than 30,000 volumes. Its property, movable and immovable, amounts to about five million francs.

The Catholic University, although in many respects incomplete, is in the beginning to exercise considerable influence in the country on account of the increasing number of students and the high standing of its professors. Many of the textbooks compiled by them have been adopted by the State University. Much would be added to its power and development if the state would authorize it to confer degrees which would enable those holding them to exercise the professions of lawyer, engineer, or doctor and occupy such public offices as require these degrees. Up to the present the official university reserves this right exclusively to itself, imposing at the same time its program on the Catholic University. Since its foundation the university has had three rectors. The first was the titular Bishop of Martyropolis later created Archbishop of Anazara, D. Joaquín Larrain Gandarillas, the most eminent of the educators of Chile, for to him principally is due the foundation of the University and the Catholic University of Santiago. He devoted his entire private fortune and that of many of his relatives to the maintenance of these two great works. The second was the titular Bishop of amatonte, D. Jorge Montes, who on account of poor health was obliged to resign shortly after his appointment. The third is the Rev. Rodolfo Vergara Antunes, journalist, orator, poet, and author of various historic and didactic works which have attracted considerable notice. Among the most noted professors of the university may be mentioned: D. Abdon Cifuentes, senator and Minister of State, who has devoted his entire life to working for the freedom and the progress of private education; D. Clemente Fabres, D. Carlos Risopatrón, D. Ventura Blanco Vil, D. Ramón Gutiérrez, D. Enrique Richard Fontecilla, all noted jurists and public men; D. Joaquín Walker Martínes, Chilian representative to the United States and Argentine Legation, with 51 professors and students; D. Miguel Cruchaga, author of a treatise on international law; D. Luis Barros Méndez, litterateur; D. Francisco de Borja Cheveriera, economist and sociologist; Canon Esteban Muñoz Donoso, orator and poet; and Rev. Ramón Angel Jara, the present Bishop of Serena.

SANTIAGO DE CUBA. See CUBA.

SANTIAGO DEL ESTERO, DIOCESE OF (SANTI/X JACOBY DE ESTERO), in the Argentine Republic, erected 25 March, 1907, suffragan of Buenos Aires. Its territory exactly corresponds with that of the State of Santiago, bounded by the States of Salta and Tucuman to the N.W., La Rioja on the W., Cordoba on the S., Sante Fé on the E., and by the Territory of El Chaco on the N. E. It has an area of nearly 40,000 sq. miles and a population averaging about 5 to the sq. mile. Santiago, the cathedral city as well as the capital of the state, is situated on the Rio Dulce, about forty miles north of the Salinas Grandes, or Great Salt Marshes, of Northern Argentina. Although the newest diocese in the republic, its capital was the seat of the first bishop in that part of South America. The ecclesiastical organization of what afterwards became the Argentine Republic began in 1570 under Pius V, who erected a vicariate apostolic over the Diocese of Tucuman. This, the original diocese of all but the seaboard of that country, covered a vast and almost unexplored territory of the same name. The Spanish settlement of Santiago del Estero was then designated as the seat of the Bishop of Tucuman, built its church, and was made the cathedral. Not until nearly one hundred and thirty years later (1699), in the episcopate of Juan Manuel Mercedillo, O.P., was the see transferred to Cordova. The old diocese then forward took its name from its capital, being known as the Diocese of Cordova. Thus Cordova is still regarded as the most ancient diocese of Argentina, while the most ancient cathedral in the country is at Santiago del Estero. Early in the nineteenth century the Diocese of Salta was formed out of that part of the Cordova jurisdiction which included Tucuman and Santiago; from a portion of the Salta jurisdiction the (new) Diocese of Tucuman was formed in 1897, and from this new diocese, again, was formed, ten years later, the Diocese of Santiago del Estero.

For three years after its erection the diocese was governed by Right Rev. Pablo Padilla, Bishop of Tucuman, as administrator Apostolico, until in 1907, Right Rev. Juan Martin Martínez was appointed. Bishop. It is divided into twelve parishes. The parochial clergy are few for so large a territory—not more than one priest to each parish, besides a vicar forane and the bishop's personal staff. There are, however, three schools for boys, and an orphanage under the care of religious at the capital, besides several other approved Catholic educational institutions.

SANTINI, GIOVANNI SANTE GASPERO, astronomer, b. at Caprese, in Tuscany, 30 Jan., 1787; d. at Padua, 26 June, 1877. He received his first instruction from his parental uncle, the Abate Giovanni Battista Santini. This excellent teacher implanted at the same time the deep religious sentiments which Santini preserved throughout his life. After finishing his philosophical education early in January, 1797, at the seminary of Prato, he entered in 1802 the University of Pisa. He very soon abandoned the study of law in order to devote himself, under the direction of Prof. Paoli and Abate Pacchiano, exclusively to mathematics and the natural sciences. It appears that at Pisa Santini still wore the cassock. This cir-
Correspondance du Baron de Zach"', "Astronomische Nachrichten", etc. Besides some twenty Italian scientific societies, Santini became a member in 1825 of the London Royal Astronomical Society; in 1846 a corresponding member of the Institute of France; and in 1847 member of the Kaiserliche Akademie der Wissenschaften of Vienna. When in 1868 Venice was separated from Austria, he became a corresponding member of the last-named association. Danish, Austrian, Spanish, and Italian decorations were bestowed upon him and a complete list of his writings may be found in the "Dizionario" (pp. 22-27) by Lorenzoni, mentioned below.

SANTO DOMINGO, ARCHIDIOCESE OF (SACERDO DOMINICI), erected on 8 August, 1511, by Julius II, who by the Bull "Pontificia Romanus" on that date declared the above-mentioned see to be an archbishopric, and of San Juan of Puerto Rico. Three prelates, who had been appointed to the see comprising the ecclesiastical province created previously (1504) by the same sovereign pontiff, united their petition to that of the Crown in requesting the Holy See (see Pons Toro) to suppress the same and to constitute the prelates as suffragans to the See of Seville. This alteration was effected before any one of the prelates in question had taken possession of his diocese or had received consecration. Father Francisco Garcia de Padilla, Franciscan, who had been in 1504 the prelate designed to occupy the See of Bayona (Bayorn, Bayona) on the extinction of the same was chosen the first Bishop of Santo Domingo, having been so mentioned in the Bull of the erection of the diocese. He died before his consecration, after having named Rev. Carlos de Aragón his vicar-general and having authorised him to take possession of the diocese in the name of the bishop, who never reached America. The first bishop to occupy the See of Santo Domingo was Alessandro Geraldini, appointed in 1516 and died in 1524. He was a native of Italy, and perhaps the only representative of all America to assist at the Fifth Lateran Council.
other missionaries arrived in Hispaniola to replace a discontended element that occasioned no small annoyances to the great 12 December, 1832; elected titular Archbishop of Methylene, 8 October, 1904; consecrated at Rome eight days later as coadjutor to Archbishop de Berio of Santo Domingo, whom he succeeded in August, 1906.

Santos, João dos, Dominican missionary in India and Africa, b. at Evora, Portugal; d. at Goa in 1622. His book “Ethiopia Oriental” is the best description of the Portuguese occupation of Africa at the end of the sixteenth century, when Portugal was at the zenith of her power there. His account of the manners and customs of the Bantu tribes at that date is most valuable; he was a keen observer, and generally a sober narrator of things that he saw. This work is a Portuguese classic. On 13 August, 1586, after four months after leaving Lisbon, dos Santos arrived in Mozambique. He was at once sent to Sofala, where he remained four years with Father João Madeira. Between them they baptised some 1694 natives and had built three chapels when they were ordered back to Mozambique. After a journey of great hardships they were forced to remain on the Zambesi River, dos Santos staying at Tete for eight months. From registers found there he discovered that the Dominicans had baptised about 20,000 natives before the year 1581 at Tete alone. From Mozambique he was sent to the small island of Querimba, where he remained for two years. The registers here gave the information that 16,000 natives had been baptised before the year 1593. Next he was appointed comissary of the Bulla da Crusada at Sofala, where he stayed more than a year. His labours in Africa ended on 22 December, 1597, when he left Mozambique for India. With the exception of eleven years spent in Europe (1606–17) he lived the rest of his life in India.

SIR RODNEY WEICH.

San Xavier del Bac, Mission of, one of the eight missions founded by the Spanish Paderes between 1687 and 1720 in the Pimeria Alta, within the present limits of the State of Arizona, viz. Guevavi, San Xavier del Bac (of the water), Tumacacuri (San José, which has been reserved by Act of Congress as a national monument), Tubac (Santa Gertrudis), Sonoritaig (San Miguel), Santa Ana, and Tubac (San Cayetano). Of these only Tumacacuri and San Xavier del Bac are extant: the former, situated forty-five miles south of Tucson, is in a ruinous condition; the latter, nine miles south of Tucson, in the fertile Santa Cruz valley and close to the Papago village, has remained in a remarkable state of preservation and is visited annually by a great number of pilgrims, tourists and students of art and history. Founded in 1699 by the Jesuit missionary Eusebius Kino (Kühne), a native of the Austrian Tyrol who resigned the chair of mathematics at the University of Ingolstadt to evangelize in the New World, the Church of San Xavier del Bac was completed by the Spanish Franciscans at a later date, with the exception of one of the towers, which remained unfinished. It is built of stone and brick, with a mortar the process of which is now lost and which has retained to this day the consistency of cement. Its inside dimensions are 105 feet by 70 in the transept and 27 in the nave. It has the form of the Latin cross. Experts have been at variance regarding the style of architecture at San Xavier, some pronouncing it Moorish, others Byzantine, others again describing it as a mixture of both. It seems now established that it may not be called Moorish, as it has nothing in common with the Moorish architecture as exemplified in the Orient and Southern Spain, although it bears traces of the influence exercised by Moorish art over the Renaissance in Spain. The proper denomination should be the Spanish Mission style, viz. Spanish Renaissance as modified by local conditions in the Spanish colonies of the New World.

Directly in front of the church is an atrium, enclosed by a fence wall, where the Indians used to hold their meetings. The façade, profusely adorned with arabesques of varied colours and bearing the coat-of-arms of St. Francis, is flanked by two towers 80

feet high. From the top, made accessible by easy winding stairs out in the thickness of the walls, a comprehensive view may be obtained over the verdant Santa Cruz valley, the distant city of Tucson and the circle of lofty, pinnacled mountains.

The interior is frescoed throughout, and contains a great number of artistic statues made of wood. The reredos of the main altar and of the side chapels are elaborately decorated in bas-relief with scroll work covered with gold leaf, and are supported by columns of unique designs. Above the centre of the transept a cupola rises to a height of 55 feet. Six minor domes divide the remaining space. Two figures of lions carved in wood guard the access to the sanctuary. The terraced roof is surrounded by a balustrade in masonry, each baluster tapering into a cement finial and supporting on either side a lion’s head, reminiscent of the escutcheon of Castile and Leon.

To the west of the church is an open corte, the ancient burying ground, with fourteen pillars in the wall bearing niches for the Stations of the Cross worked in high-relief. At the west end of the corte stands a domed chapel with a belfry, used formerly as a mortuary chapel, since dedicated to Our Lady of Sorrows.

Adjacent to the church are gathered the mission
buildings, surrounding a spacious patio lined with arcades and a monumental entrance consisting of seven arches. As it now stands, San Xavier del Bac is considered the most remarkable relic of the Spanish period north of Mexico; many important features which had gradually disappeared were replaced during the years 1906–10 by the Bishop of Tucson on his own responsibility, in an effort to restore the ancient and venerable pile to its pristine grandeur and to preserve it for future generations.

From 1815 the date of the Mission of the Spanish missions, to 1866, when the Rev. J. B. Salpointe (later Archbishop of Santa Fe) came to Tucson, the mission of San Xavier del Bac was completely abandoned and left to the care of the Papago Indians, who saved it from destruction by the Apaches. Since 1888, when the Vicar Apostolic of Arizona was erected, the bishops of Tucson have, by unremitting care and frequent outlay, warded off decay and ultimate ruin from the precious monument, constantly devoting at the same time especial and personal attention to the spiritual welfare of the Papago Indians gathered around the mission. For the past thirty years the school has been supported by the clergy of the parish of Tucson for the benefit of the Papago children. It is located in the mission buildings and is conducted by the Sisters of Saint Joseph of Carondelet.

São Luís de Maranhão, Diocese of (Sancti Ludovici de Maragnano), suffragan of Belém de Pará, comprises the State of Maranhão in Northern Brazil. The Prefecture of São Luis was annexed to the See of Olinda on 15 July 1837. On 30 Aug., 1877, it was created a bishopric dependent on Lisbon; Frei Antonio de S. Maria, a Capuchin of S. Antonio, was appointed to the see, but before he took possession he was transferred to Miranda, and Gregorio dos Anjos, a secular canon of the Congregation of Our Lady, of Portugal, became its first bishop. It comprised then all Maranhão, Pará, and Amazonas. The see was vacant from 1813 till 1820; Leo XII made it suffragan to São Salvador (15 June, 1827). In Jan., 1905, the Diocese of Pinhuy was separated from São Luis, which became suffragan to Belém de Pará, 5 May, 1906. The Diocese of São Luis has an area of 177,560 square miles, and contains about 500,000 inhabitants, practically all Catholics; 57 parishes; 36 secular clergy; 12 Lazarists and Capuchins; 2 congregations of nuns; and about 100 churches and chapels. The present bishop, Francisco de Paula Silva, C.M., successor ofMgr. Alto, was born at Dilúcia, 21 Oct., 1858, joining the Lazarists he was professed in 1891; ordained on 24 Jan., 1896; appointed master of novices at Petropolis, and later rector of the Lazaret College, at Serra de Caracara, named Bishop of São Luis on 18 April, 1907; consecrated on 14 July following by Cardinal Arcoverde, of Brazil (of Brazil).

The territory of Maranhão was discovered by Pires in 1500 and granted to João de Barros in 1534 as a Portuguese hereditary captaincy. The island of Maranhão lies between the Bays of São Luís and São José. It was seized in 1612 by the French under Daniel de la Touche, Seigneur de Lrivière, who founded São Luís, near the Rio Itapicuru, the site being blessed by the Capuchins who accompanied him and who established the Convent of St. Francis. The island was seized by the Portuguese under Albuquerque in 1614. Very successful Indian missions were soon begun by the Jesuits, who were temporarily expelled as a result of a civil war in 1684 for their opposition to the enslavement of the Indians. São Luis city has about 30,000 inhabitants, and contains several convents, charitable institutions, the episcopal palace, a fine Carmelite church, and an ecclesiastical seminary.

São Paulo, Diocese of (S. Pauli Pinhalensis), suffragan of the Archdiocese of São Paulo, Brazil, South America, created on 7 June, 1906. The Rt. Rev. José Marcondes Homem de Mello, the present bishop, was born on 13 Feb., 1850, and elevated in May, 1906; he had been Archbishop of Pará, from which he resigned. The residence of the bishop is at São Carlos do Pinhal, State of São Paulo, founded in 1557 and raised to the rank of city on 21 April, 1830. It is connected with the city of São Paulo, capital of the state, by a railroad, the trip occupying about six hours. Its population is estimated at 67,000, mostly Catholics. Besides the public schools and those maintained by the diocese, there is an educational institution for the education of the Sisters, known as "Colégio de São Carlos" and directed by the Sisters of the Most Holy Sacrament.

Julian Moreno-Lacalle.

São Luís de Cáceres, Diocese of (Sancti Aloysii de Caceres), in Brazil, suffragan of Cuyabá, from which diocese (archdiocese since 5 April, 1910) it was separated by a papal Decree of 10 March, 1910. São Luís de Cáceres, otherwise known as Villa Maria, is situated in the State of Matto Grosso on the left bank of the Rio Paraguay about 115 miles W. S. W. of Porto Velho; it is the Bolivian boundary. Founded in 1776 by Luis de Albuquerque de Mello Pereira e Cáceres as a fort to oppose the Spaniards and called Maria in honour of the Queen of Portugal, it was chartered as a town in 1859. In 1895 its population was only about 1500 (mostly Indians), but over the increasing commerce between Matto Grosso and the South, people carried on is an important centre. The cathedral church is dedicated to St. Aloysius. The diocesan statistics are not yet available.

A. A. MacElrnan.
São Pedro do Rio Grande do Sul. See POSTO ALEGRE, ARCE diocese of.

São Salvador da Bahia de Todos os Santos, ARCE diocese of (SANTI SALVATORIUM OMNIT SANCTORUM), a Brazilian see created by Julius III, 25 Feb., 1551, as suffragan of Lisbon, and raised to archiepiscopal rank by Innocent XI, 16 Nov., 1676. The diocese at first comprised all Brazil, which had previously constituted the vicariate apostolic from 1570 to 1590. The first Mass in Brazil was celebrated on 26 April, 1500, at Coroa Vermelha Island by Henrique de Coimbra, O.F.M. In 1537 the Mercy Hospital was erected at Santos. The first bishop, Pedro Fernandes Sardinha, arrived at Bahia on 22 June, 1552; he left on 2 June, 1553, to return to Europe, but was shipwrecked between the rivers São Francisco and Cururupu, and murdered by the Indians, 16 June, 1556. The church was then governed by Francisco Fernandes till the arrival of the second bishop, Pedro Leitão (1569), who held the first Brazilian synod at Bahia, where he died in 1572. In 1581 there were sixty-two churches at Bahia and in the neighboring region, the Recôncavo. The first archbishop, Gaspar de Mendonça, took possession of his see by procession on 3 June, 1577. Archbishop Sebastião Monteiro da Vida (1702–22) held a provincial council and published the statutes, known as "Constituição do Arcebispo da Bahia". The first governor of Brazil, Thomé de Sousa, arrived at Bahia on 29 March, 1549; with him were six Jesuits, the first sent to the New World, under Manoel da Nobrega. Two days later the first Mass was said at Bahia. On 1 July, 1553, there arrived at Bahia the Venerable José Anchieta, S.J., the Apostle of Brazil. A native mission, São Andrê, was begun forthwith near the city. In 1554 Father da Nobrega opened a college at Piratininga. The early Jesuit missionaries contributed greatly to the progress of the new colony, giving free education, curbing the violence of the pioneers, and protecting the Indians from slavery, for which they obtained a royal decree in 1539. They also constructed, from Santos to São Paulo, a road which for three centuries remained the principal highway of the region. They compiled many important works on the native Indian languages, among which may be mentioned the grammars by Anchieta, Manoel de Viga, Manoel de Moraes, Luiz Euprepes, and Montoya; and Mammiani's "Catechismo da doutrina christã na língua brasileira da nação kiriri". The seminary at Bahia was founded by Damasus de Abreu Vieira, O.F.M.; in 1583 the Benedictines established the Abbey of São Sebastião at Bahia. The episcopal city, Bahia, was founded by Thomé de Sousa in 1549 near the site of Victoria which had been established in 1538 by Francisco Pereira Coutinho. At the beginning of the nineteenth century it contained houses of the Benedictines, Franciscans, Carmelites, Augustinians, Italian Capuchins, and the Mendicants of the Holy Land; also the Carmelites, Trinitarian, Franciscan, and Dominican tertiaries, a mercy hospital, a leper hospital, and two orphanages, in addition to many schools. It has now a population of over 200,000 inhabitants; the archdiocese contains about 2,500,000 Catholics, 5000 Protestants, 208 parishes, 240 secular and 80 regular priests, 3 colleges, and 725 secular and regular religious. The archbishop, Jeromé Thomé da Silva, was born at Sobral on 12 June, 1849; educated at the Collegio Pio-latino-americo, Rome; ordained there on 21 Dec., 1872; appointed Vicar-General of Olinda; named Bishop of Belém do Pará on 26 June, 1890; and transferred as successor of Mgr Macedo Costa to São Salvador on 12 Sept., 1893, being enthroned in Feb., 1894.

SÃO SEBASTIÃO

São Sebastião do Rio de Janeiro, ARCE diocese of (S. SEBASTIANI FLUMINIS JANUARII).—The ecclesiastical province of Rio de Janeiro, the third of the eleven constituting the empire of Brazil, was not created a bishopric, as a suffragan see of the Archdiocese of São Salvador da Bahia, by a Bull of 22 Nov., 1676. It was raised to an archbishopric in 1893, its jurisdiction comprising the Dioceses of Niterói (1892) and Espírito Santo (1892) and the Prefecture of Rio Branco. The total Catholic population of the whole province in 1910 was 2,051,800, and that of the archdiocese proper, 800,000. The jurisdiction of the latter extends over the whole territory of the federal district in which Rio de Janeiro, the capital of the republic and seat of the archdiocese, is located. There are 120 parishes in the federal district; 90 parish churches, various monasteries and nunnery; and 43 Catholic associations prominent among which are: the "Irmandade do Santíssimo Sacramento da Candelária", founded in 1609 and in charge of the bureau of charities caring for nearly 1000 indigent persons, and of the Asylum of Our Lady of Piety for the education of orphan girls; the "Irmandade da Santa Casa da Misericórdia", operating since 1545 and maintaining a general hospital, a foundling asylum, an orphan asylum, and a funeral establishment for the burial of the poor. These benevolent associations, known in Brazil as irmãoadades (brotherhoods), do a highly charitable and eminently Christian work, assisting the poor as well as caring for the orphans and the sick, by the maintenance of hospitals, asylums, savings banks, schools, etc. There are also several associations of St. Vincent of Paul, performing similar work. Of religious orders, there are in the archdiocese Jesuits, Franciscans, Carmelites, Lazarists, Dominicans, and Benedictines; of female orders, there are Sisters of Charity, Ursulines, Carmelites, Poor Clares, and others. The archdiocese maintains at Rio de Janeiro the Seminary of St. Joseph. Among other Catholic institutions of learning are: the College of the Immaculate Conception for girls; the Jesuit college of the Sacred Heart of Jesus; the College of the Sacred Heart of Mary for girls. Mention should also be made of the "Círculo Católico", a large association founded on 15 Sept., 1899, for the propagation of the Faith, and to provide young men with moral recreation. The organ of the Church in Brazil is "O Universo" (Rua Evaristo Vêga No. 61).

Rio de Janeiro was the first spot in the New World where a colony of Protestants settled. A little island in the bay was colonized and fortified by Villelaignon under the patronage of Admiral Coligny in 1555. This successful settlement was destroyed by the English in 1556, and the name of the island changed to São Sebastião. The city of Rio de Janeiro was proclaimed the capital of Brazil in 1763. After the empire was established, the imperial chapel near the palace was selected for a cathedral, which building is at present being reconstructed. Adjacent to it is the Church of Our Lady of Mount Carmel. Both are small structures, but preserve to a wonderful degree the effects of Latin-American architecture. The most noteworthy place of worship in Rio de Janeiro is the Church of the Candelaria. The corner-stone was laid about 1792, the church was completed by a famous Brazilian lady in gratitude for her rescue from a great peril at sea. The building was planned by a Brazilian architect, Evaristo de Vêga. Its two towers, surmounted by glittering domes, are among the first...
objects to attract the eye on entering the Bay of Rio de Janeiro; they rise to a height of 225 feet above the street, but, unfortunately, the narrowness of the thoroughfare which bounds them on either side detracts from the aesthetic beauty of the structure. The three bronze doors, with relief work showing extraordinary artistic detail, and the interior, finished in marble, with fine wall and ceiling paintings, are among the best of their kind in Latin-America.

The present Archbishop of São Sebastião de Rio de Janeiro is Monsignor Joaquim Cardoso Ferreira, born 18 Jan., 1856, elected 26 June, 1890, transferred to Rio de Janeiro, 24 July, 1898, and created cardinal on 11 Dec., 1905. (See Brazil, the United States of.)

JULIAN MORENO-LACALLE.

São Thião do Cabo Verde, Diocese of (Sancti Jacobi Capitis Viridis), has the seat of its bishopric on the Island of S. Nicolau and comprises the Cape Verde Archipelago, which forms one civil province, and Portuguese Guinea, on the coast of Senegambia, which forms another. Each of these two provinces is under a governor who is appointed by the national Government.

The Province of Cape Verde (Cabo Verde), with the seat of the civil and military Government at Praia, has an area of about 200 square miles between 16° 50' and 17° 14' N. latitude and between 22° 50' and 28° 30' longitude W. of Greenwich. It is made up of ten islands which are divided into the two groups of Barlavento and Sotavento. The Barlavento group consists of the islands of Boa Vista, Sal, S. Nicolau, Santa Luzia, S. Vicente, and S. Antão; the Sotavento group, of Maio, S. Thiago, Fogo, and Brava. In the Barlavento group of islands there are two judicial districts, one with its seat at Santo Antão, the other at Mindelo, on the Island of S. Vicente. The Sotavento group forms but one judicial district, the seat of which is at Praia, on the Island of S. Thiago. Each of these islands is under a municipal council (município), except Maio, which belongs to the municipio of Praia, and Santa Luzia, which is still uninhabited.

The province has a population of 142,000, of whom 47,318 are whites, 50,033 blacks, and 47,249 mulattoes. The number of foreigners is very small, not exceeding 829. The areas and population of the islands are: Boa Vista, 236 1/4 square miles, 2691 inhabitants; Sal, 79 7/8 square miles, 640 inhabitants; S. Nicolau, 94 9/16 square miles, 10,463 inhabitants; S. Vicente, 75 1/2 square miles, 10,086 inhabitants; Santa Luzia, 13 3/8 square miles, uninhabited; Santo Antão, 402 5/8 square miles, 33,838 inhabitants; Maio, 42 square miles, 1,895 inhabitants; S. Thiago, 419 1/4 square miles, 56,082 inhabitants; Fogo, 204 square miles, 17,552 inhabitants; Brava, 21 3/4 square miles, 8970 inhabitants. S. Vicente is an important port and coal station.

Ecclesiastically the province is divided as follows: Boa Vista, 2 parishes; Sal, 1; S. Nicolau, 2; S. Vicente, 1; Santo Antão, 6; Maio, 1; S. Thiago, 1; Fogo, 4; Brava, 2. Boa Vista contains 3 primary schools; Sal, 2; S. Nicolau, 1 lyceum-seminary and 5 primary schools; S. Vicente, 1 school of navigation, and 7 primary schools; Maio, 1; S. Thiago, 22; Fogo, 7; Brava, 6.

The Province of Portuguese Guinea has an area of about 14,270 square miles, with a population of 300,000. Its capital, Bolama, is the seat of the only judicial district in the province, and of the municipal council. It has three military districts, six post offices, and a railway from Bolama to Cacheu and Geba. Portuguese Guinea has a vicar-general who is nominated by the bishop of the diocese. It contains six parishes: Bolama, Biussa, Cacheu, Farim, Buba, and Geba. There are a few primary schools, which, however, are poorly attended.

Ethnography.—The population of Cape Verde consists of European and native whites, blacks, and mixed (mestiços). The language is a dialect called gambo, which is impregnated with various languages, with Portuguese predominating. The people are half civilized, are mild in disposition, not inclined to hard work, and by no means provident, so that whenever the rains fail they are liable to suffer from great scarcity of food. They have little practical ability and are given to pleasure, particularly balls, which are organized on the slightest pretext, being their favourite pastime. The arts are not cultivated; industry and commerce—what little there is—are exclusively in the hands of Europeans. The Catholic religion is professed, but its practice is modified with many superstitions, and the annual frequentation of the sacraments is: baptism, 4,872; marriages, 534; confessions and communions, 36,000.

With respect to Guinea little can be said, its population being still in a condition of savagery. Its annual statistics are: baptisms, 330; marriages, 10; confessions and communions, 20. Arabic and various African dialects are spoken.

History.—It is known that the Cape Verde Archipelago was discovered by the Portuguese in 1460, and Guinea in 1445. In 1553 these territories were ceded into a diocese by a Bull of Clement VII dated 3 Jan., 1453. The province was under the prelates of great learning, some of them also of great virtue, and to them is due all the improvement that has been brought in the condition of Cape Verde. It has no charitable organizations except a Confraternity of the Blessed Sacrament on the Island of S. Nicolau, which supports a primary school and supplies the lack of rural banks by lending capital at a low rate of interest. Mitra, Cabido, and some of the parishes enjoy the benefit of legacies made by benefactors of the diocese, which are liberally administered. There are no religious societies. The clergy are subsidized by the State and are exempt from the public burdens of military service, jury duty, etc. It is expected, however, that the legal separation of Church and State, already put in force at the national capital, will very soon be applied in this colony, and the changes which will result are as yet unknown.

JOSÉ ALVES MARTINS.

Sappa, Diocese of (Sappensis, SAPPATENSIS, ZAPPATENSIS), in Albania, established in 1602, by Alexander II. In 1491 Innocent VIII joined to it the See of Sarda (Sardoniki), and the united sees were suffragans of Antivari until the end of the eighteenth century. The See of Sarda comprised also the Diocese of Dazyum (Dagnun, Dagno, Dan); Daynensus, founded as suffragan of Antivari about the second half of the fourteenth century and united with Sarda by Martin V in 1428. The exact number of bishops of Sappa is unknown: the first Bishop of Sappa mentioned is Paulus about 1370. The most famous bishops of Sappa were George Biskr (1621–35), who wrote part of his fatherland from the Turks, and Lazarus Vladanja of Scutari (1746–49). The present, forty-first Bishop of Sappa is Mgr. James Serecci, suffragan of Scutari. He has his residence at the village of Nesani (Nencias). His diocese comprises about 22,000 inhabitants of various creeds, of whom 17,290 are Catholics.

By the Albanian Council in 1703 the Bishop of Sappa obtained some parishes pertaining to the Diocese of Pulati. The ecclesiastical students of this diocese are educated at the seminary of Scutari. The Diocese of Sappa also includes the Franciscan monastery at Daezan (Troskian), which is the monastery having "Collegium seraphicum" for their students of philosophy.

FARLATTI-COLLI, Ithacum sacrum, VII (Venice, 1819), 229–33, 271–91; GAMS, Series episcoporum ecclesiae catholicae.
Sara, princess; another form, *Sarai*, the signification of which is doubtful, is found in passages occurring before Gen., xvi, 15). Sara was the wife of Abraham and also his step-sister (Gen., xii, xx). We do not find any other account of her parentage. When Abraham goes down to Egypt because of the famine, he induces Sara, who though sixty-five years of age is very beautiful, to say that she is his sister; whereupon she is taken to wife by the King of Egypt, who, however, restores her after a Divine adjuration (Gen., xiii). In a variant account (Gen., xx), she is represented as being taken in similar circumstances by Abimelech, King of Gerara, and restored likewise to Abraham through a Divine intervention. After having been barren till the age of ninety, Sara, in fulfilment of a Divine promise, gives birth to Isaac (Gen., xxxi, 1–7). Later we find her through jealousy ill-treating her handmaiden Agar the Egyptian, who had borne a child to Abraham, and finally she loses the latter to drive away the bondwoman and her son Ishmael (Gen., xxii). Sara died at the age of one hundred and twenty-seven years, and at her death was buried in the cave of Machpelah in Hebron (Gen., xxxiv). Isaac, ii, 2, alludes to Sara as the mother of the chosen people; St. Peter praises her submission to her husband (I Pet., iii, 6). Other New Testament references to Sara are in Rom., iv, 19; ix, 9; Gal., iv, 22–23; Heb., xi, 11.

Von Hummelauer, Comm. in Genesim, passim.

JAMES F. DROLSM.

Sarabates, a class of monks widely spread before the time of St. Benedict. They either continued, like the early ascetics, to live in their own homes, or dwelt two or three together in or near cities. They acknowledged no monastic superior, obeyed no definite rule, and disposed individually of the product of their manual labour. St. Jerome speaks of them under the name of Remoboeth, and John Cassian tells of their wide diffusion in Egypt and other lands. Both writers express a very unfavourable opinion concerning their conduct, and a reference to them in the Rule of St. Benedict (c. i) is of similar import. At a later date the name Sarabates, the original meaning of which cannot be determined, was generally degenerate monks.

St. Jerome, Epist., xiii, 34; Cassian, Coll., xviii, 4, 7; Funk, tr. Cappelleria, Church History, i, 213.

N. A. WEBER.

SARAGOSSA, Diocese of (Césaragustana), in Spain, comprises a great part of the civil province of Saragossa (Zaragoza). It is bounded on the north by Navarre and Huesa; on the east by Huesca, Lérida, and Tarragona; on the south by Valencia and Teruel; on the west by Guadalajara and Soria. The episcopal city, situated on the Ebro, has 72,000 inhabitants. Before the Roman period the site of Saragossa appears to have been occupied by a little village of Elence, within the boundaries of Celtiberia. Here in A.D. 727 Octavius Augustus, then in his seventh consulate, founded the colony of César Augustus, giving it the Italian franchise and making it the capital of a juridical conventus. Pompeius Mela called it "the most illustrious of the inland cities of Hispania Tarraconensis". In A.D. 452 it fell under the power of the Suevian king Recarius; in 466 under that of Visigoth Euric. St. Isidore extolled it as one of the best cities of Spain in the Gothic period, and Pacensis called it "the most ancient and most flourishing".

The diocese is one of the oldest in Spain, for its origin dates back to the coming of the Apostle James—"a fact of which there had never been any doubt until Baronius, influenced by a fabulous story of Garcia de Loaisa, called it in question. Urban VIII ordered the old lesson in the Breviary dealing with this point to be restored (see Compostela). Closely involved with the tradition of St. James's coming to Spain, and of the founding of the church of Saragossa, are those of Our Lady of the Pillar (see Pillar, Nuestra Señora del) and of St. Athanasius and Theodore, disciples of St. James, who are supposed to have been the first bishops of Saragossa. About the year 256 there appears as bishop of this diocese Felix Cesaraugustanus, who defended true discipline in the case of Basildes and Martial, Bishops, respec-

FAÇADES OF THE OLD CATHEDRAL, SARAGOSSA

A. J. Eq.
ferred a long and terrible martyrdom. St. Valerius was exiled to a place called Emes, near Barbastro, where he died, and whence his relics were translated first to Roda, then to the church of St. Mary there, and finally to Saragossa when that city had been reconquered.

The See of Saragossa was occupied during the Gothic period by two illustrious bishops: St. Braulius (q. v.), who assisted at the Fourth, Fifth, and Sixth Councils of Toledo; and Tácio, famous for his own writings and for having discovered at Rome the third part of St. Gregory's "Morals". From 692 to 619 the bishop was Maximus, who assisted at the Councils of Barcelona and Egara, and whose name, combined with that of the monk Marcus, has been used to form an alleged Marcus Maximus, the apocryphal continuit of Flavius Dux. In 542, when the Franks laid siege to Saragossa to take vengeance for the wrongs of the Catholic princess, Clotilde, the besieged went forth in procession and delivered to the enemy, as the price of their raising the siege, a portion of the blood-stained stole of St. Vincent, the deacon.

Before the Saracen invasion three national councils were held at Saragossa. The first, earlier than those of Toledo, in 380, when Valerius II was bishop, had for its object the extirpation of Priscillianism; the second, in 692, in the episcopate of Maximus, was against the Arians; the third, under Bishop Valderedua, in 691, provided that queens, when widowed, should retire to some monastery for their security and for the sake of decorum. During the Saracen occupation the Catholic worship did not cease in this city; the churches of the Virgin and of St. Engratia were maintained, while that of the Saviour was turned into a mosque. Of the bishops of this unhappy period the names are preserved of Senior, who visited St. Eulogius at Cordoba (849), and of Elea, who in 890 was driven from the city by the Moors and took refuge at Oviedo. Paterius was sent by Sancho the Great to Cluny, to introduce the Cluniac reform into Spain in the monasteries of St. Juan de la Peña and St. Salvador de Leyre, and was afterwards appointed Bishop of Saragossa.

Alfonso I, the Fighter, of Aragon, reconquered the city on 18 Dec., 1113, and named as bishop Pedro de Librán, whose appointment was confirmed by Gelasio II. López, in his "Historia de Saragossa", says that Librán first resided at the Church of the Pillar, and on 6 Jan., 1119, purified the great mosque, which he dedicated to the Saviour, and there established his episcopal see. Hence the controversy, which began in 1135, in the episcopate of Garcia Guerra de Majones, between the canons of the Pillar and those of St. Saviour as to the title of cathedral.

In 1318 the See of Saragossa was made metropolitan by a grant of John XXII (14 June), Pedro López de Luna being bishop. For more than a century (1468-1577) princes of the royal blood occupied the see: Juan of Aragon, natural son of Juan II (1488); Alonso of Aragon (1478); another Juan of Aragon (1550); Fernando of Aragon, who had been the Cistercian Abbot of Veruela.

In the factions which followed upon the death of King Martin, Archbishop Garcia Fernández de Heredia was assassinated by Antonio de Luna, a partisan of the Count of Urgell (1411). In 1485 the first inquisitor-general, St. Peter Arbus, fell a martyr in the cathedral, slain by some relapsed Jews who were led by Juan de la Abadía.

The cathedral is dedicated to the Saviour, as it has been from the Moorish invasion. It shares its rank with the Church of Nuestra Señora del Pilar, half of the chapter residing at each of the two churches, while the dean resides six months at each alternately. The building of the cathedral was begun by Pedro Tarrjao in the fourteenth century. In 1412 Benedict XIII caused a magnificent balda-chinum to be erected, but one of its pillars fell down, and it was reduced to its present condition. In 1490 Archbishop Alonso of Aragon raised the two lateral naves, which had been lower, to an equal height with the central, and added two more; Fernando of Aragon added three other naves beyond the choir, to counterbalance the excessive width of the building, and thus, in 1550, was the Gothic edifice completed. The great chancel and choir were built by order of Archbishop Dalmau de Muré Cervellón (1481-98). In the chapel of S. Dominguito del Val are preserved the relics of that saint, a boy of seven who was crucified by the Jews in 1250. The façade of the cathedral is Renaissance, and beside it rises the tower, more modern than the body of the church, having been begun in 1790.

The Church of Nuestra Señora del Pilar is believed to have originated in a chapel built by the Apostle James. Bishop Librán found it almost in ruins and appealed to the charity of all the faithful to rebuild it. At the close of the thirteenth century four bishops again stirred up the zeal of the faithful to repair the building, which was preserved until the end of the seventeenth century. In 1681 work was commenced on the new church, the first stone being laid by Archbishop Diego de Castrillo, 25 July, 1685. This grandiose edifice, 500 ft. (about 457 English feet) in length, covers the capella angelica, where the celebrated image of the Blessed Virgin is venerated. Though the style of the building is not of the best period, attention is attracted by its exterior, its multitude of cupolas, which are reflected in the waters of the Ebro, giving it a character all its own.

Saragossa possesses many very noteworthy churches. Among them are that of St. Engratia, built on the spot where the victims of Dacian were martyred. It was destroyed in the War of Inde-
pendence, only the crypt and the doorway being left; a few years ago, however, it was rebuilt, and now serves as a parish church. The University of Saragossa was founded by Carlos I (the Emperor Charles V) in 1542, the privileges accorded to others in Spain. Its importance was afterwards promoted by Pedro Cerduna, Bishop of Tarazona; he gave it a building which lasted until it was blown up by the French in 1808. A separate building has been erected for the faculties of medicine and sciences. The archiepiscopal palace is a splendid edifice erected by Archbishop Agustín de Lescó y Falomeque. There are two ecclesiastical seminaries: that of St. Valerius and Braulius, founded by Archbishop Lescó in 1758, was destroyed by an explosion and was rebuilt in 1854 by Archbishop Bernardo Francisco Caballero; that of St. Charles Borromeo, formerly a Jesuit college, was converted into a seminary by Carlos III.

RAMÓN RUIZ AMADO.

University of Saragossa.—This university was not definitively established until 1585, its real founder being Don Pedro Curbence, Prior of the Cathedral of Saragossa, and later Bishop of Tarazona, who, by commission of the city of Saragossa, organized the university, prepared its statutes, and endowed it with an income of 30,000 reales. At the end of the sixteenth century theology, philosophy, canon and civil law, medicine, and the humanities were taught. The university was subject to the municipality that had created it until the time of Charles III. The influence of this university was always great in lower Aragon, and during the reign of Charles III, it was great throughout the kingdom. It produced the economists and the principal Jesuits who contributed so much to give to the reign of Charles III the laiciest character that it developed. At about this time the so-called Voltairean ideas were introduced into the university, the "Academia de Buen Gesto" was established, and political economy began to be dealt with, with much space given to history and polemics, led by Normante and Carcaviella. The study of economics was introduced by Aio and Aurano, and the Royal Academy of Aragon and the Academia de San Lucas helped in the development of economics. Among the professors was the physician Antonio Serrabarras; the civil lawyer Pedro Malon de Chaido; Juan Lozano Palmoreno, Pedro Simon de Abril, the Jesuit Micael Ávila de Acosta, Clemente Conmenge, Bishop of Ciudad Rodrigo, Juan Francisco Guillén, Archbishop of Burgos, Ustarroz, Aranjuez, Cariño, Portales, Vargas de Machuca, etc. With regard to its government and to the programme of its studies, the University of Saragossa, like all the universities of Spain, has lost its individual life, the professors being reduced to the level of state officials, each having the anarchical individual licence of explaining the matter assigned to him according to any programme he may see fit, or according to no programme at all. The university has faculties of law, medicine, exact sciences, physics and chemistry, and letters (historical section). There are on an average 600 students, nearly half of whom study medicine, and about one quarter each, law and science, while the remainder form the faculties of letters.

TEODORO RODRIGUEZ.

Sarayacu. See Sarayacu, Diocese of.

Sarayacu Mission, the chief Franciscan mission of the Ucayali river country, Department of Loreto, north-east Peru, in the eighteenth century, and situated upon a small arm of the river, on the west side, about 69° 46' south and 275 miles above its junction with the Amazon. The name signifies "River of the Wasp". The evangelization of the wild tribes of Eastern Peru, in the forests beyond the main Cordillera, was divided between the Jesuits and the Franciscans, the former having the territory immediately along the Marañon (Amazon) and its northern affluents, directed from the college of Quito, while the Franciscans took under their care the territory along the middle and upper courses of the Huallaga and Ucayali, directed latterly from the Franciscan college of Oopas, near Jauja, Central Peru, founded in 1712, especially for the education of missionaries. Sarayacu was established in 1791 by Father Narciso Girbal, his first colonists being some of the wild Setibo Indians. These were soon joined by bands from other tribes, and the population grew rapidly. In 1801 it was placed in charge of Fr. Manuel Plaza, who remained with it nearly fifty years until his death and was succeeded by Fr. Vicente Calvo. In the half-century during which Fr. Plaza with his three or four assistants thus governed their little community in the heart of a savage wilderness, they saw visitors from the outside world only twice, viz. Smyth and Lowe in 1835 and Castelnau in 1846. Under his direction a church and residence were built, and the grass-thatched houses laid out upon a regular town plan. The portion of the church, which called forth the admiration of these travellers, was designed and executed by one of the fathers, an Italian with architectural training. With the opening of the revolutionary struggle in 1815 all governmental aid was withdrawn from the missions, most of which were abandoned, a part of the Indians, in some cases, joining these at Sarayacu, which continued to prosper through the tireless energy of Fr. Plaza. In 1835 it contained a population of about 2000 souls, representing many tribes — Pano, Omaguas, Yameo, Conibo, Setebu, Pipibo, Sense, Amahuaca, Remo, Campa, Mayoruna, and Capachua, some of them from as far as the Huallaga and the Amazon. Each of the three principal tribes first named occupied a distinct section of the town. The Pano language was the medium of intercommunication. Besides the main town there were several other branch villages along the river, chief of which was Tierra Blanca. All of the few travellers who have left records of their visits to Sarayacu are full of praise for the hospitable kindness of the fathers and the good effect of their teaching upon the mission Indians as compared with the wild tribes of the forest, except as to the besetting sin of drunkenness, from the drinking of chicha, a sort of beer.
made from corn or plantains (bananas), in which both sexes constantly indulged, despite the protests and warnings of the missionaries. Smyth, the English officer, who saw it at perhaps its best in 1835, gives an interesting account of the town, the various tribes, the routine of mission life, and the holiday celebrations. Ten years later a general epidemic of smallpox overwhelmed the village. Only 200 Indians remained. Castelnau found only 1200 Indians at the mission.

A large part of this decrease, however, was due to the removal of the men to engage with the rubber gatherers and the boat crews on the Amazon. In 1851 the American Lieutenant Herndon stopped there and was kindly received by Fr. Caballero, who was then in charge. "Father Calvo, meek and humble in personal concerns, yet full of zeal and spirit for his office, clad in his long serge gown, belted with a cord, with bare feet and accurate posture, habitual stoop and generally bearing upon his shoulder a beautiful and saucy bird of the parrot kind, was my beau ideal of a missionary monk. He is an Arragonese, and had served as a priest in the army of Don Carlos." Two other priests, an Italian and a Catalan, with a lay brother, who did the cooking and was unwarred in his attentions, made up the household. He adds, "I was sick and weak that I shall ever remember with gratitude the affectionate kindness of those pious and devoted friars of St. Francis."

The government was patriarchal, through Indian officers under supervision of the priest. The Indians were tractable and docile, but drunken, and although the location was healthy, and births exceeded deaths, the population constantly diminished from emigration down the river. From various industries they derived an annual income of about twelve hundred dollars, from which, with their garden, the four priests and lay brother supported themselves, bought provisions, and supplied, and kept the church in repair and decent. In 1860 and 1861 there was a smallpox epidemic. In 1859 the official geographer Raimondi found there 1030 inhabitants and a flourishing school, besides about 200 more at Tierra Blanca. In the same year Fr. Calvo established another branch station at Callaria, higher up the Ucayali, as a meeting-ground for the wild tribes in that direction. This had the effect of further drawing from the diminishing importance of Sarayacu, which was finally abandoned as a mission in 1863. It continues, however, as the chief port of the Ucayali, with a mixed Indian and Spanish population with the Quechua language as the mother tongue. According to Pino Llorente, L'invasor de Loreto (Lima, 1863); Smith and Lowe, Narrative of a Journey from Lima to Pard (London, 1836).

JAMES MOONEY.

Sarbiewski, Matthias Casimir, the Horace of Poland, b. near Pian, in the Duchy of Masovia, 24 February, 1595; d. 2 April, 1649. He entered the novitiate of the Jesuits at Vilna on 25 July, 1612; studied rhetoric and philosophy during 1614-17; taught grammar and humanities during 1618-20; studied theology at Vilna from 1620-22; was sent in 1622 to complete his theology at Rome, and was there ordained priest in 1623. Returning to Poland he taught rhetoric, philosophy, and theology at Vilna from 1625 to 1629, when he went to Rome on the commission of the Holy See, and was for four years companion in his travels. The fame of Sarbiewski is as wide as the world of letters. He was gifted with remarkable general talent, especially in music and the fine arts, but his chief excellence was as a poet versed in all the schools of the ancients. He was especially devoted to Horace, whose odes he knew by heart. He also made the lyrical poetry of Pindar his own. To his familiarity with these great poets he added an industry which has given the splendid yield of his poetic works. The latest edition of these, printed at Starawie in 1892, embraces four books of lyrics, a book of epodes, his posthumous "Silvilidua" (Woodland Notes), and his book of epigrams. Of all these the lyrics furnish the best example of his genius of mind and heart. They are pitched in a high key of thought, sentiment, or passion. His themes are for the most part love and devotion for Christ Crucified, for Our Blessed Lady, or friendship for a noble patron, such as Bishop Lubienieki, Cardinal Francis Barberini, nephew to Urban VIII, and that point of view, whom he hailed as his benefactor in several odes of exquisite finish. His noblest and most sustained efforts, however, are his patriotic odes upon the fatherland, the Knights of Poland, and kindred subjects. His tenderest pieces are those in praise of the rose, the violet, the green grass, in which he rivals Horace; the Happy Touch of Horace himself. He was crowned with the poet's wreath by King Wladislaw XIV Urban VIII named him one of the revisers of the hymns of the Breviary, and he in particular is credited with having softened their previous ruggedness of metre. Some critics have urged that in his love of Horace he went so far as to become servile in imitating him, while others again have made a very virtuous out of this close imitation. As a religious he was noted for his love of solitude, turning from the attractions of court life to solitude, prayer, and useful study and occupation. His prose works are: (1) "De acuto et arguto liber unicus"; (2) "Dii gemini," a speculative work on the ancient arts and sciences; (3) "De perfecta poesi libri quattuor"; (4) "De Deo uno et infinito" (in manuscript); (5) "De angello"; (6) "De physico continuo"; (7) "Memorabilia"; (8) scattered orations, sermons, and letters.

Select poems of Sarbiewski have been translated from the original Latin into other languages. But his poetical works, as a whole, have found few translators. In Polish may be counted no less than twenty-two versions of the poet; yet, only two of these are in any measure complete, the rest being translations of chosen odes. The most notable Polish version, embracing almost all the poems, is that of Louis Kondratowicz, who also wrote the life of Sarbiewski and translated his letters. There is also a copy in Polish of all the odes extant in manuscript at Starawie, the work of some few Jesuit fathers of the province of White Russia. Detached translations also exist in Italian, Flemish, and Bohemian. In German there are at least eight or nine translations, principally from the odes, and also incomplete. The French versions are of the same character: they are three or four in number, choice odes or pieces taken from the "Poems." The English translations are fuller and more complete than any others. There are at least four that may be distinguished: the integral versions: "Odes of Casimire by G. H.," printed for Humphry Moseley, 1646; "Transla-
Sardica, a titular metropolitan see of Dacia Mediterranean. The true name of the city (now Sophia, the capital of Bulgaria) was Sardica, the city of the Serdi, a Thracian people defeated by Crassus in 29 B.C. and subjected to the Kingdom of Thrace, the vassal state of Rome. When it was conquered by the Romans in 49 B.C. the Serdi were included in the Roman Province of Thracia. The Emperor Trajan transformed the borough of the Serdi into a city which he called Ulpia Serdica. In 275 Aurelian caused Dacia beyond the Danube to be evacuated, and was invaded by these immigrants forming the new Province of Dacia, Serbia being included in this province (Homo, "Essai sur le règne de l’empereur Aurélien," 313–21). Later, Diocletian divided Dacia into Dacia Ripensis and Dacia Mediterranea. Sardica was the civil and ecclesiastical metropolis of the latter. Gallus established a mint at Sardica, and Constantine the Great, who was born in the region, contemplated making it his capital. Ecclesiastically, Sardica belonged to the Patriarchate of Rome until 733, when it was annexed to that of Constantinople until 809. With the conversion of the Bulgarians, in 865, it was one of the first cities which had a bishop. Until 1204 it was included in the Greek-Bulgarian Patriarchate of Achrida, until 1393 in the Bulgarian Patriarchate of Tarnovo, and until 1872 in that of Constantinople. Since then Sardica, or, as it is now called, Sophia, belongs to the national Church of Bulgaria. The earliest bishop is Protagenes, who assisted at the Council of Nicaea in 325; the best known is Bonoos, who shortly afterwards attacked the virginity of the Blessed Virgin. For the council held here in the fourth century see SARDICA, COUNCIL OF.

Although taken by Attila and often destroyed by the Slavs, the town remained under Byzantine dominion until 809, when it was captured by the Bulgars, who changed its name to Srebets, later transformed by the Greeks into Srditas and Triaditsa. Again occupied by the Greeks from 1018 to 1158, it enjoyed great prosperity; a section of the population was Paulician or Manichean. After some years of troubles it again fell into the power of the Bulgars.

Its present name of Sophia dates from the Middle Ages, though the precise date of its first use cannot be assigned. In the sixteenth century Srebets and Sophia were used simultaneously. In 1832 the city was captured by the Turks, and for many centuries it was the residence of the beylerbey, or governor general, of Rumelia. In 1878 Sophia was chosen as the capital of the Principality of Bulgaria, and since 1908 has been the capital of the Kingdom of Bulgaria. A vicarate Apostolic was created here at an early date and confided to the Franciscans. In 1810 Rome re-established the See of Sophia, which in 1843 was made archiepiscopal. It was suppressed towards the end of the eighteenth century, because the Catholics were persecuted by the Turks and had emigrated, mostly to Austria and Russia. Relative peace was restored in 1835, and Rome confided the direction of the Catholic missions to the Redemptorists, and when the bishops had not received episcopal consecration. The Redemptorists were replaced by the Capuchins in 1841, their superior being consecrated bishop in 1848. At present an archbishop is at the head of this vicariate Apostolic. Sophia has 105,000 inhabitants, of whom several thousand are Christians. The Christian Brothers have a school there, and the Sisters of St. Joseph of the Apparition three convents.

S. VAILLE.
Sardica, COUNCIL of, one of the series of councils called to adjust the doctrinal and other difficulties caused by the Arian heresy, held most probably in 343. (For date see Hefele, French tr., "Histoire des conciles," II, pt. II, 737-42, and Duchesne, "Histoire ancienne de l'Église," II, 215.) It was convoked by the Emperors Constant and Constans at the urgent request of Pope Julius I, Hostus of Capua, and other Western bishops, desirous of peace and hoping to secure a final judgment in the case of St. Athanasius and other bishops alternately condemned and vindicated by councils in the East and the West; desirous, also, of settling definitively the confusion arising from the many doctrinal formulæ in circulation. All such questions were referred to a general council. In order to make the council thoroughly representative, Sardica in Dacia (now Sofia, in Bulgaria), was chosen as the meeting-place. Athanasius, driven from Alexandria by the Prefect Philadarius in 359, was summoned by the Emperor Constans from Rome, where he had taken refuge, first to Milan and afterwards to Trier. At the latter place he met Hosius, who was commissioned by the pope and the emperor to preside over the council, and whom he accompanied to Sardica. Pope Julius was represented by the priests Archidamus and Philetas, desced of Justinian. Ninety-six Western bishops presented themselves at Sardica; those from the East were not so numerous.

Being in the minority, the Eastern bishops decided to act as a body, and, fearing defections, they all lodged in the same place. On the ground of being unwilling to recognize Athanasius, Marcellus of Anory, and Aselepas, who had been excommunicated in Eastern synods, they refused to sit in council with the Western bishops. Hosius of Cordova attempted to effect a compromise by inviting them to present privately to him their complaints against Athanasius, and by promising, in case Athanasius should be acquitted, to take him to Spain. These overtures failed. The Eastern bishops—although the council had been called expressly for the purpose of reopening the case in regard to those who had been excommunicated—defended their conduct on the fictitious plea that one council could not revise the decisions of another. They then drew new formal and met at Philoppolis, where they composed an encyclical and a new creed, which they falsely dated from Sardica. The Western bishops, thus abandoned, examined the cases of Athanasius, Marcellus, and Aselepas. No fresh investigation of the charges against Athanasius was considered necessary, but he was rejected, and he and the other two bishops, who were permitted to present exculpatory documents, were declared innocent. In addition to this, censure was passed on the Easterns for having abandoned the council, and several of them were deposed and excommunicated.

The question of a new creed containing some additions to that of Nicaea was discussed, but although the formulæ had been drawn up, the bishops wisely decided to add nothing to the accepted symbol, and thus gave the Arians no pretext for saying that hitherto they had not been explicitly condemned. Though the form of the proposed creed was presented to the council, it was not inserted in the encyclical addressed by the council to "all the bishops of the Catholic Church." Before separating, the bishops enacted several important canons, especially concerning the transfer and trial of bishops and appeals. These canons, with the other documents of the council, were sent to Pope Julius with a letter signed by the majority of the attending bishops. The council failed entirely to accomplish its purpose. The pacification of the Church was not secured, and the Eastern bishops grew bolder and more contumacious.

Sardinia, the second largest Italian island in the Mediterranean, lying between 41°15' and 38°51' N. lat. and having an area of 9,295 square miles. Its two principal gulfs, almost all on the western coast, are those of Cagliari, the largest, Teulada, Palmas, Carol forte, Terranova, and Tortoli. These gulfs give their names to as many ports, all of which, like the smaller ports, are fine natural harbours. The largest islands belonging to Sardinia are San Pietro, Asinara, Caprera, and S. Stefano. These are three mountain ranges in the island; the most northerly—the mountains of Limbara—rise to an elevation of 4485 feet; the central range contains Gennargentu, the culminating point of Sardinia, 8916 feet high; and the southern Monte Linas, 4055 feet. There are numerous extinct volcanoes: Monte Ferru (2448 ft.), Monte Mannu Nurri (3104 ft.), Chermule (2924 ft.), etc. The largest river is the Tirso, 94 miles long, rising in the Buddusò mountains, with two estuaries, one at the lagoon of St. Giusta, the other at the sea near Oristano. Among the other rivers are the Rio di Porto Torres, Carmin, Mannu, Flumendosa, and Samassi. There are thirty-seven lagoons along the sea-coast (Cagliari, a great fishing centre, Oristano, Sassu, Palmas, etc.). In addition there are many marshes now being reclaimed for agricultural purposes. The most extensive plains are the Campidano near Cagliari, the Piano della Nurra, and the Campo di Osieri. The island is formed chiefly of granite, trachyte, basalt, other volcanic rocks, and of chalk deposits. The climate is temperate, but malaria prevails in the plains in summer, which accounts for the small population. The fauna includes a rich variety of flora and fauna, with a great number of wild beasts, and of birds. In 1901 the island was population 737,754; at present (1911) it is estimated to be about 850,000 (90 to the square mile).

Sardinia is rich in minerals; the most plentiful metal is lead, mingled with silver. The richest beds of ore lie in the circumcannons of Iglesias, Nuoro, Luras, and Sassari, and in the mountains of Nurra. Iron is found chiefly in the mountains of the south-west, especially about Capoterra and Ogliastra. Copper, manganese, antimony, and zinc are mined in certain districts. Lignite occurs in fairly extensive beds in the eastern and southern parts of the island and is used for fuel. There is also some graphite in smaller quantities. There are 117 mines, employing 12,000 men, and having an output valued at about 21,000,000 francs (1903). The flora of the island includes vast forests of oak which supply an immense quantity of cork, olives, oranges, quinces, chestnuts, walnuts, and almonds. Among the fauna the principal are the numerous herds of buffaloes (Ovis Ammon), with large curving horns, and of goats; deer, stags, and wild boars are plentiful in the wooded mountains; wild horses disappeared only a few decades ago. The domesticated horses are remarkably sturdy; a species of small horse is largely exported to Algeria. The small Sardinian sea is in great demand as a pet on the peninsula. Oxen are used in ploughing, the beef is good, but the milk supply very short. In the oak forests there still exists a species of wild pig, like the wild boar.

Agriculture is in a backward state owing to the scarcity of population; the farms are usually small or small; 618½ square miles are incapable of cultivation. One of the worst agricultural pests in Sardinia is the locusts which come over from Africa in large swarms. The total produce for 1903 was wheat, 4,824,090 bushels; Indian corn, 178,775 bushels, wine, 65,064,970 gallons; oil, 221,110 gallons; the sali-
pans of Cagliari are the most productive in Italy, the output for the year 1905 being 1,403,372 pounds. The birds most worthy of notice are the pelicans, herons, and flamingos which come over during August in large flocks from Africa. The seas abound in fish of every kind, sardines, anchovies, and especially tuna-fish, of which more than 601,386 pounds are sold. Near Cagliari, Sulcia, and Porto Torres, the Gulf of Carbonara, has extensive beds of coral, 5512 pounds of which are exported each year.

In historic times the people of Sardinia have undergone less amalgamation than any other Italian population. According to the ancient geographers, the primitive population of Sardinia was akin to the Libyans; Iberians, Greeks, Phoenicians, Carthaginians, and Italians came later. Certainly the Latin language was adopted in the island, and even to-day the Sardinian resembles Latin more than any other of the Italian dialects. There are three chief Sardinian dialects: that of Sassari which approaches Corsican and Tuscan, that of Logudoro, and that of Cagliari (Sardinian properly so-called, somewhat like Sicilian). The most striking characteristic of the Sardinian language is that, while throughout the peninsula the article is derived from the Latin pronominal *a* (e.g., *a le, a lo, a 'o, a 'u*), in Sardinia it is *a* from *ipse* (eu, masculine; a, feminine). In the neighbourhood of Alghero, Catalan is spoken. The Sardinian is by nature taciturn and laborious, but cling to his ancient customs; the women provide all the household necessities (flour, bread, linen, cloth etc.); they like bright coloured clothing, especially red, while the men dress in black: the latter wear a peculiar cap, which is like a long stocking covering the head and hanging down the back. They are vivacious and love singing and dancing to the accompaniment of the *domodda*, the ancient lira. In old times the Gola people met together in the winter evenings and practised improvisation. There is little education among the poorer classes, but the wealthier families fully appreciate the value of higher education, jurisprudence being a favourite study. The percentage of illiterates is comparatively speaking lower (85-3 per cent of those under the age of 21 and 69-6 for those over 21) than in the Abruzzi, Apulia, Sicily, Basilicata, and Calabria. There are in the island 1056 public elementary, and 40 private, schools, 48 evening and vacation schools, 4 normal schools, 9 public academies and one not yet completed. 2 technical schools and university instruction, 3 technical schools, 2 technical institutes, 1 school of applied art, 2 schools of music, 2 universities in Cagliari and Sassari.

The bonds of family life are very strong, there being few illegitimate births; the Sardinian is quite a family man. The percentage of convictions is higher than that of the kingdom, but serious offences are less frequent (25 per 100,000 inhabitants against 25-3). Brigandage, which in times gone by afflicted the island, was caused partly by the sparseness of the population, which offered maletake a greater chance of escaping, or by the custom of the vendetta, on account of which one who had been guilty of an act of vendetta or who feared to fall a victim to it had to conceal himself and to become a brigand; another cause, in the last century, was the rapidity with which introduced in the eighteenth and nineteenth centuries in regard to some customs and rights (the right of cutting timber, of pasturing age etc.). However, for some years there have been no properly authenticated cases of brigandage in Sardinia. The island is divided civilly into two provinces: Cagliari (which includes the Spanish Sardinian Capo di Orosei and Sassari (Capo di Serra). These two provinces contain 9 departments, 92 boroughs, and 363 communes. Ecclesiastically it is divided into 3 archdioceses and 8 dioceses: Cagliari, with its suffragans sees Galtelli-Nuoro, Iglesias, Ogliastra; Oristano with its suffragans Ales and Terralba; Sassari with its suffragans Alghero, Ampurias and Tempio, Bisarchio, Bosa. Formerly there existed the Sees of Doglia, Forum Traniunum, Fasiana, Suelo (or Oristano) to which were added the German bishops of Sassari, Ottavia, Castro (Alghero), Civita (Ampurias), St. Giusta (Oristano).

**History.** —The name of the island is derived from Sardon or Sardus, the principal god venerated by the inhabitants, who had a large temple at the Gulf of Oristano. Some archaeologists have identified the Sardini to the Shardans who, in the reign of Rameses III, invaded Egypt. Concerning their race, ancient writers believe them akin to the Libyans, the Iberians, or the Corsicans. A comparison of the ideals of the most ancient inhabitants with the style of dress of the present inhabitants shows that the present Sardinian race is practically identical with the primitive race. To the latter must be attributed the peculiar monuments (about 3000 in number), called nuraghe, scattered throughout the island, which are like truncated cones, 65 feet high, and 99 wide at the base, constructed of large masses of limestone, granite, or tufa, and generally a dozen feet thick. The nuraghe faces the south and is about five or six feet high, and two feet wide; it leads to a spiral stairway in the wall of the nuraghe, which communicates with the two or three superimposed circular rooms, having a slight angular roof like that of the treasury of Mycenae. Other smaller cones are frequently found around the principal nuraghe. There are various opinions as to the object of these buildings: fortified towers, dwellings, -sacerdotal sepulchres (in none have arms been found; all contained skeletons and ornaments), pyres etc.

Scattered throughout the length of the entire island and not unlike the nuraghe in appearance are a number of groups of circular dwellings of stone measuring from fifteen to twenty-five feet in diameter. Their proximity to each other would suggest that they had once formed part of villages. They are not often met with in the north-eastern extremity, but in the middle of the island they are very frequent. Close to each of these buildings was the *tombe de giante* or giant's tomb; a vaulted chamber of about thirty or forty feet in length, with sides of rough masonry and a roof formed by a superimposed slab. Smaller tombs were also found from one or two rooms, but were more often met with in the most inaccessible regions, and assumed the shape of grottoes chiselled from the rock rather than that of vaulted chambers. The Phoenician traders naturally visited the island; Caralis (Cagliari) was their great market; Phoenician inscriptions too have been found. The Carthaginians were not content to trade with Sardinia, they wished to subdue it (about 500 B.C.); bitter wars were waged. Nevertheless, various cities were founded. In the First Punic War, L. Cornelius Scipio defeated the Carthaginians (259) near Olbia (Terranova). A little later the mercenaries rebelled against their Carthaginian masters and established a military government against which the natives revolted, thus giving the Romans an excuse for intervening (238) and taking possession of the island, which along with Corsica was formed into a province under a praetor. Native resistance was met with the severest: Sempronius Gracchus (181) partly killed and partly sold into slavery 80,000 of the inhabitants; again in 114 Cæcius Metellus had to crush an insurrection.

The Romans by constructing roads improved the economic condition of the island, which, although it was considered by the Government for the most part poor and unproductive and a place of punishment
for those condemned to the mines, enjoyed great prosperity. The chief towns were Caralis, Sulci, Nora, Neapolis, Tharros, Otricoli, Olbia, Forum Tauri, Tempe. The province was not only imperial and now senatorial. It is possible that the first seeds of Christianity were introduced into Sardinia by the few Christians who with 4000 Jews were exiled to the island by Tiberius. In the second and third centuries many Roman Christians, including Callistus, later pope, St. Pontianus, and the antipope Hippolytus, were sent to the island (described as noxia): the last two died there. Among the Sardinian martyrs are the bishops who preceded St. Lucifer of Cagliari, of whom St. Athanasius speaks, which shows that at least in the time of the Diocese, the central city of the island was Tharros; St. Bonifacius, Bishop of Cagliari, whose tombstone was discovered in 1817 in the cathedral (Corpus Inscription. Lat. Siciliae, et Sardiniae, II, n. 7753) was not a personal disciple of Christ but belonged to the age after Constantius. Other martyrs are recorded at Cagliari, Sulci, Torres; not all of them, however, have been authenticated. Up to the present time only one Christian cemetery is known, that of Bonorva near Cagliari; there are ruins of a fourth-century Christian basilica at Tharros. Christian inscriptions have been found in Cagliari (66), Tharros, Torres, and other parts.

In 456 the island was taken by the Vandals, who were wont to exile thither, especially to the neighbourhood of Cagliari, the African bishops and Catholics. In 534 it was recovered for the empire by Cyrilus, and included in the Diocese of Africa. In 551 it was captured by Totila. As far as is known the Longobards passed the island only once (589), but did not obtain control of it. Sardinia, moreover, was abandoned to its fate by the Byzantines more than the peninsula, and consequently the tradition which dates in the sixth century the origin of the three (later four) judicatures into which the island was later divided, may have a historical foundation. The tradition runs that Taletus, a citizen of Cagliari, rebelled against the Byzantine Government, proclaimed himself King of Sardinia, and divided the island among his three sons. From the letters of St. Gregory the Great we know that in 93 parts of the island, especially in the ecclesiastical possessions, there were many pagans who had to pay a tax to the judge of the island for each sacrifice. In the ninth century such was the general depravity that Paulus, Bishop of Populonia, and Abbot Saxo, legate of Nicholas I, preferred the role of Lukanus among the bishoprics to that of the bishopric of Cagliari. The episcopal seats were reduced to four in the tenth century. This decadence is to be attributed in part to the inroads in the seventh century of the Saracens, who were, however, always repulsed by the Sardinians. The latter had to establish an autonomous military organisation, which naturally led to a political organisation, the chiefs of which, while preserving the title of Byzantine governor, were called judges. In the tenth century there were four of these judges in Torres, Arborea, Gallura, and Cagliari; this distribution of the island remained till the Aragonese conquest.

Shortly after 1000, Mughebid, Emir of the Balearic Islands, conquered Sardinia and from there made descents on the Tuscan coast (Pisa and Luni). Encouraged by the pope, to whom Charlemagne had given Sardinia, the Pisans with the assistance of the Sardinians drove him out. Mughebid was defeated a second time by the help of the Pisans and other islands.

The pope's suzerainty was then recognized willingly by the judges. The Genoese and the Pisans had a monopoly of the trade and also possession of several towns on the coast, and moreover acted as arbiters in the quarrels of the judges. But later a dispute arose between the two cities, in regard to the limits of their respective rights. Moreover, as Pisa was an imperial city, the emperors claimed rights over the islands. In the struggle the Genoan towns suffered, but the commercial advantages compensated the damage caused by war. The interior which was under the control of the judges exclusively continued to flourish. Barbarossa named his uncle Welf, King of Sardinia, but in 1164 sold the kingdom to Barisone, judge of Arborea, who later became crowned by the Pope. Families in the peninsula like the Malaspina of Luni, the Visconti of Pisa, and the Doria of Genoa, had acquired property in the island and became related to the judges by marriage. The judicatures of Cagliari, Torres, and Gallura were suppressed by the Pisans. When later Adalasia, widow of Ubaldo Visconti and wife of the Genoese was the occasion of the judicature of Tempio, she married (1238) Enzo, Frederick II's bastard, the latter proclaimed himself King of Sardinia; but he was soon overthrown and after twenty-two years' imprisonment died at Bologna. The marriage of the Genoese Michele Zanche with Enzo's mother embittered the war between Pisa and Genoa. When Pisa was victorious their vassals, the della Ghersardesca and Nino di Galura, rose in revolt, some signories passing to the Visconti of Milan. Finally the Genoese got the northwest and the Pisans the southeast.

In 1297 Boniface VIII, in order to induce the King of Aragon to renounce his claim on Sardinia, Charles of Anjou, granted the investiture of Sardinia to Alfonso of Aragon. The latter aided by Branca Doria, judge of Logudoro and lord of Alghero, Ugone of Arborea, and the commune of Sasesi, began war against the Pisans, who in 1324 had signed a treaty which left them only the port and lagoon of Cagliari and two suburbs; and from these they were expelled later. On the defeat of the Pisans it was necessary to subdue the ancient allies; i.e. the Genoese and the rulers of Arborea. Mariano IV fought successfully against the Aragonese, but was carried off by a pestilence (1367); his son Guilelm IV abdicated in favour of the Aragonese, who died a little later. In the beginning the King of Aragon planted colonies of Catalonians and Aragonese in the island. Sardinia had a viceroy and a parliament composed of the three orders: barons, clergy, and the commons meeting separately and communicating among themselves by means of deputies. The charter of Eleanor was adopted as a Constitution; and the King of Aragon swore in the presence of the Sardinian deputies to observe it. Nevertheless, the Aragonese Government succeeded in establishing in the island a dominant Spanish class, either by granting them more or less fictitious titles, disfranchising Spanish prelates to most of the sees. This stirred up enmity between the natives and the ruling classes; but only one attempt at rebellion is recorded, that of Leonardo Alagon (1470). In the history of the succeeding years we may note the expulsion of all the Corsicans (1479) and Jews (1492), some Saracen inroads, and three attempts of the French to conquer the island (1528 at Castel Sardo; 1637 at Oristano; 1644 at Alghero).

The War of the Spanish Succession plunged the island in anarchy. By the Peace of Utrecht (1713) Sardinia was given to Austria, for which the mountaineers of Gallura had declared themselves from the beginning. Cardinal Alberoni's bold attempt (1717) regained the island for the Spaniards; but in 1718 by the Treaty of London it was given to Savoy in exchange for Sicily which was awarded to Austria. The dukes of Savoy then became kings of Sardinia. The kingdom comprised at that time the island of Sardinia, the Duchies of Savoy, Asta, and Monferrato, the Principality of Piedmont, the Marquisate of Saluzzo, the Counties of Asti and Nizza, and some Lombard towns as far as the Ticino. King Charles Emmanuel III (1720-73) and his minister Bogino began certain reforms in the island, a work
which was interrupted from 1773 till 1820. In 1792 the French admiral, Truquet, attempted to land at Cagliari but was repulsed. In the following years there were several attempts to throw off the power of the Piedmontese. King Charles Emmanuel IV took refuge in the island from 1799 till 1806, when his domains were invaded by the French. The Congress of Vienna restored the Republic of Genoa to the Sardinians. The kingdom then contained thirty-seven provinces. Between 1820 and 1848 feudalism, which in 1807 had caused widespread rebellion of the burgesses against the nobles, was abolished. Another project was the construction of a vast network of roads which was largely carried out. The Savoy and Italian Governments have neglected the wants and interests of the Sardinians. In 1861 after the annexation of almost all the peninsula the Kingdom of Italy was proclaimed at Florence and that of Sardinia came to an end.

The following is a list of the kings: Victor Amadeus II (1718–30), who abdicated in favour of his son Charles Emmanuel III (1730–73), regressing which he was imprisoned at Moncalieri where he died (1732). Charles Emmanuel to conquer the Milanese allied himself with France and Spain, in the War of the Polish Succession. He obtained the region on the right of the Ticino (1738). He took part in the War of the Austrian Succession, gained splendid victories (the siege of Toulon, 1746; the battle of Col dell' Assietta, 1747), but with very little profit, gaining only the county of Angera and Arona, the valley of Ossola, Vigezzo, and Bobbio. Victor Amadeus III (1773–96), for having crushed the nationalist movement in Savoy (1791) with excessive severity, was overthrown by the revolutionary army which captured Savoy and Nice. He allied himself with Austria and the campaign was conducted with great success by his brother-in-law, Charles Emmanuel IV (1796–1802) made an offensive treaty with France, whereupon his subjects revolted. The rebellion was crushed with severity and thousands of democrats emigrated either into France or to the Cisalpine Republic, whence they returned in arms. The royalists having obtained the upper hand, France intervened and obliged the king to abandon his possessions on the mainland (19 December, 1798). Charles Emmanuel withdrew to Sardinia; and in 1802 abdicated in favour of his brother Carlo Felice (1802–21), who in 1814 was returned to Turin and saw his dominions increased by the inclusion of Genoa.

As happened elsewhere the restoration did not do justice to the legitimate aspirations of the democrats. There followed the revolution of 1821 caused by a demand for a Constitution and for war with Austria to obtain possession of Lombardy, which Piedmont had coveted for centuries. As the king had agreed with Austria and Naples not to grant the Constitution, he abdicated in favour of Charles Felix, his brother, who was absent at the time; Charles Albert, Prince of Carignano, assumed the regency and on 15 March, 1831, proclaimed the Constitution of Sardinia, which was not accepted by Charles Felix (1821–31). Meanwhile, the revolutionary party had joined in the movement for Italian unity, but there was difference of opinion as to the form of that unity, whether there should be a great republic, or a federation of republics, or a confederation of federations under principalities. Many however were indifferent to the form.

In 1831, therefore, disturbances began in Central Italy but were easily suppressed. The same year Charles Felix died without offspring and was succeeded by Charles Albert (1831–49). The Piedmontese then declared for the Union of Italy, which was accepted by the House of Savoy, and to that end all the efforts of the Sardinian Government were henceforward directed. In 1847 Charles Albert granted freedom of the press and other liberal institutions. On 8 February he promulgated the statute which still remains the fundamental law of the Kingdom of Italy. One month later he declared war on Austria in order to come to the rescue of the Lombards who were eager to throw off the Austrian yoke at once. Though victorious in the first engagements, he suffered a severe defeat at Custozza and, after the armistice of Salasco, was again defeated at Novara (1849).

The King of Sardinia had for the time being to abandon his idea of conquest. Charles Albert abdicated in favour of his son Victor Emmanuel II (1849–78) and was rewarded by being proclaimed King of the Lombards. The Savoy and Italian Governments have neglected the wants and interests of the Sardinians. In 1861 after the annexation of almost all the peninsula the Kingdom of Italy was proclaimed at Florence and that of Sardinia came to an end.

The King of Sardinia had for the time being to abandon his idea of conquest. Charles Albert abdicated in favour of his son Victor Emmanuel II (1849–78) and was rewarded by being proclaimed King of the Lombards. The Savoy and Italian Governments have neglected the wants and interests of the Sardinians. In 1861 after the annexation of almost all the peninsula the Kingdom of Italy was proclaimed at Florence and that of Sardinia came to an end.

boundary of Chanaan. Sennacherib captured it in 701 B.C. (Schrader, "Die Keilschriften und das Alte Testament," 1888, 300, 26). We learn from III Kings, xvii, 24-28, that it was subject to Sidon in the time of Achab and that the Prophet Elias, after having multiplied the meal and oil of a poor woman, raised her son from the dead; the charity of this widow was recalled by Our Saviour (Luke, iv, 26). It was probably near this place that Christ cured the daughter of the Canaanite or Syrophoenician woman whose faith He praised (Mark, vii, 24-30). Sarepta is mentioned also by Josephus, "Ant. jud." VIII, xiii, 2; Pliny, "Hist. natur.," V, 17; the "Itinerarium Burgundalense;" the "Onomastikon" of Eusebius and St. Jerome; by Theodotus and Pseudo-Antoinius, who in the best extant manuscripts of the Gospels have assigned the name of Bethsaida to it; it is a small town, but very Christian (Heyer, "Intinerar hircosyriamitana", Vienna, 1809, 18, 147, 150).

It contained at that time a church dedicated to St. Elias. The "Notitia episcopatum" of Antichus in the sixth century, speaks of Sarepta as a suffragan see of Tyre (Echos d'Orient, X, 145); none of its bishops are known. Some Latin bishops, but merely titulars, are mentioned after 1346 (Eubel, "Hierarchia catholic mediæ ævi," I, 457; II, 253; III, 310; "Revue bénédictine," XXI, 281, 345-53, 535-63; XXXIV, 72). In 1185 the Greek monk Theocas (Dublin, "Itinerarium Graecorum," 7) found that its church, in almost its ancient condition; a century later, according to Burchard, it was in ruins and contained only seven or eight houses (Descripito Terra sanctæ, II, 9). Today, Sarepta is known as Khirbet Sarfend between Tyre and Sidon, on the seashore; the ruins show that the town extended 1800 metres north and south, but that it was not very wide.

Sarnelli, Januarius Maria, one of S. Alphonse's earliest companions, fourth son of Baron Angelo Sarnelli di Civitano, b. in Naples 12 Sept., 1702; d. 30 June, 1744. From his childhood he was remarkable for piety, humility, and piety in his studies. At the age of fourteen he desired to become a Jesuit, but his father objected and directed him to study law. He succeeded admirably in the legal profession, while daily Mass, visits to the Blessed Sacrament, and attendance on the sick in the hospitals filled up his time. At twenty-six he abandoned the bar and became a cleric. His zeal showed itself at once in his labours for children, whom he catechized with wonderful success. Admirable instructions on this most important matter may be found in his works for ecclesiastics. He was ordained priest in 1732 and immediately became a member of the Propaganda of Naples, a congregation of secular priests devoted to Apostolic work. A year later he went to Scala and became one of the earliest companions of S. Alphonse in founding the Congregation of the Most Holy Redeemer. Both holy men worked together and gave missions along the coast of Amalfi till 1735, when Ven. Sarnelli's health gave way. He had to return to Naples, where he spent nine years in a poor apartment with one lay brother as companion. Scarcely had his health improved than he began a crusade against the immorality of his time which has rarely been surpassed. In his visitations he revealed the necessity at the doors of ministers of state, while by his exhortations he created a public opinion which helped him on to success; and God evidently protected him in the dangers to which his zeal exposed him. His triumph was complete. His labours amongst the lowly and abandoned were continual; yet he found time to write many excellent works. He will always be known for his insistence on meditation as morally necessary. He showed how a man can live mediately, and it is within the reach of everyone. It was his labours and success in this matter that occasioned, after the servant of God's death, the Apostolic letter of Benedict XIV and the Indulgences then granted to meditation (16 Dec., 1746). A complete edition of his valuable barren works has been published at Naples, Tipografia, 3 vols., 8 Maresci, 1799. His works include:

I. WORKS OF HUMAN INFLUENCE:

1. "Dei Gratia" (Naples, 1740, 3 vols., 8 Maresci); L'Anima Illuminata; Il Mondo Reformato, 3 vols.; L'Ecclesiastico Santificato; Le Glorie e Grandezze della Divina Madre; Le Discrezione degli Spiriti; Il Cristiano Illuminato; Diretto ed ammestrato; Opera Comune; La Bestemmiarazione, legali e politiche, in difesa della citta rovinata dall'insolentiment meretricio; Il Cristiano Santificato; Lettere Spirituali; Devisioni pratiche per onorare la SS. Trinità e Maria e Devosioni per apparendirlo ad una buona morte.

He died in his forty-second year. His first biographer, S. Alphonus, writes: "As soon as he had breathed his last breath his countenance suddenly became beautiful—and his body exhaled a sweet odour—which remained in the room long after the interment." His body reposè in a side chapel in the church of the SS. Nerei and Nerone in Naples. He was declared Venerable in 1784. A decree on his heroic virtues was published in 1906, and now only miracles are required for his Beatification.

J. MAGNIE.

Sarno. See CAVA AND SARNÒ, DIOCESE OF.

Sarpi, Paolo, a Servite and anti-papal historian and statesman, b. at Venice, 14 August, 1552; d. there 14 or 15 January, 1623. At the age of 13 he joined the Servite Order, exchanging his baptismal name of Pietro for that of Paolo. He was appointed professor of theology and canon law when he was only twenty. After four years he spent a short time at Milan and then taught philosophy in his monastery at Venice. Having been elected provincial of Venice in 1574, he was elected provincial of his order for the Venetian Republic in 1579, and held the office of procurator general, with residence in Rome, from 1585 to 1588. Returning to Venice he devoted himself chiefly to literary pursuits, and about this time he wrote "Anti-Ecclesiologia" (Venice, 1622). The intimacy with Protestants and statesmen hostile to the Church caused on various occasions complaints to be lodged against him before the Venetian inquisitor. His hatred of Rome was further increased when on three different occasions the Roman Curia rejected his nomination for an episcopal see by the Republic of Venice. The three sees to which Venice had nominated him were Milopotamo in 1593, Caorle in 1600, and Nona in Dalmatia in 1601. The more he hated Rome, the more acceptable he was to Doge Leonardo Donato and the Venetian senate, which by a special decree guaranteed his protection against Rome and appointed him theological consultant of the state with an annual salary of two hundred ducats. In this capacity he effected the enactment of various anti-ecclesiastical laws, and it was chiefly due to the influence of "the terrible friar" that the interdict which Pope Urban VIII applied upon Venice (1606) remained as it were unavailing, and he was received back (21 April, 1607). A murderous assault made upon him on 5 October, 1607, is often ascribed to his ecclesiastical enemies, but there is not sufficient testimony for their complicity (see the authentic testimony of the witnesses, edited by Barzoni in "Archivio Storico Italiano", third series, XII, i, Florence,
When peace had been restored between Venice and the pope, Sarpi's political influence grew less. His life was especially associated with his hatred of Rome by publishing bitter invectives against the pope and the Catholic Church. Despite his desire to subvert the Catholic religion and make Venice a Protestant republic, he hypocritically performed the ordinary offices of a Catholic priest until his last known work is the history of the Council of Trent. "Istorie del Concilio Tridentino" (London, 1619) published under the pseudonym of Pietro Soave Polano by the apostate Marcantonio de Dominis, with additions by the latter. Without these additions it was published at Geneva, 1629, and was translated into Latin and some modern languages. It is a bitter invective against the pope and even Protestants, like Ranke, consider it devoid of all authority. For the refutation of this work by Pallavicino see PALLAVICINO, PIETRO SOPRIZA. His works were published in six volumes (Helmstadt, 1761–5) and two supplementary volumes (Verona, 1768). His letters are: "Lettere Italiane di Fr. Sarpi" (Geneva, 1763); "Scelte Lettere inedites de P. Sarpi", edited by Bianchi-Giovini (Capolago, 1833); "Lettere raccolte di Sarpi", edited by Polidori (Florence, 1863); "Lettere inedites di Sarpi a S. Contarini", edited by Castellani (Venice, 1892); important new letters (1609–16) edited by Benrath (Leipzig, 1909).

SARBINA, Dioecese of (SARSIINATENSIS), in Umbria, Province of Perugia, Italy. Besides agriculture and cattle-raising, the principal employments of the population are the sulphur and maganese industries. There are some deposits of fossil coal and sulphur springs. Ruins of temples, baths, and fortifications; and urns, pillars, bronze objects, etc., show that this town, the birthplace of Plautus, was important in ancient days. It was an Umbrian city, was captured by Cornelius Scipio in 271 B.C. and was extended 1518 it was enfeofed to the Pio di Meldola, passing later to the Aldobrandini. The cathedral is a noteworthy monument of the eighth century. The patron of the city St. Victor, believed to have been bishop about the year 300; another bishop was St. Rufinus (fifth century). We may also mention: Benno (770), who erected the cathedral; St. Apollinaris (1158), monk; Guido (1255), who defended the rights of his church and was killed for so doing; Francesco Calboli (1327), who defended the city by force of arms against Francesco Ordelaffi; Pietro del Matteo Accolla (1385) was bishop; Gianfiliago Negusanti (1398), renowned for his piety and erudition; Raffaele degli Alessi (1524), reformed the discipline and the morals of the people; Nicolò Bransi (1602) was imprisoned in the Castle of S. Angelo but liberated later. In 1607 Napoleon suppressed the see, which, having been re-established in 1817, was in 1824 united to that of Bertinoro; but in 1833 was again re-established. The diocese is suffragan of Ravenna, and contains 34 parishes, with 90 secular priests, 32,000 inhabitants, and 2 houses of monks.

U. BENZONI.

SARTO, ANDREA DEL (ANDREA D'AGNOLO), b. at Florence in 1486; d. there in 1531. He received the surname Sarto from the fact that he was the son of a tailor. At first he was the pupil of an obscure master, G. B. di Stefano, but in 1496 he entered the studio of Piero di Cosimo. He moved to Rome in 1514. It is true that Vasari says, that he had remained there long enough to study its masterpieces, he would have "surpassed all the artists of his day." Naturally diffident, he felt himself a stranger there, and hastened to return to Florence. Despite his brief career, he produced a large number of frescoes and easel pictures. In 1508
he began the fresco decoration of the little cloister of the Annunziata, connected with the Servite church and convent at Florence. He depicted five scenes from the life of St. Philip Benizi, General of the Servite friars: "The Smiting of the Blasphemers"; "The Cure of the Woman Possessed with a Devil"; "The Resurrection of Two Children near the Tomb of the Saint"; "The Veneration of his Relics". Later he added the "Adoration of the Magi" (1511) and the "Nativity of the Virgin" (1514). In 1522, by way of farewell, he painted for this convent the masterpiece, "The Madonna of the Sack", so called because in it St. Joseph is represented leaning against a sack. In 1514, in the c'oster of the Scalzo, he executed a series of ten frescoes, recounting the history of St. John the Baptist. Four allegorical figures, Faith, Hope, Charity, and Justice, complete the decorative cycle. The influence of Albrecht Dürer has been traced in several, but that of Ghirlandajo has been recognised in this as well as in the preceding cycle, though here Andrea displays a more original bent. In Poggio's villa at Cajano he painted the fresco (1521), "Cæsar receiving the Tribute of the Animal World", by way of complementing the zoological tastes of Lorenzo the Magnificent. The work was finished in 1582 by Al. Allori. A beautifully executed series of figures, especially those of Sts. Agnes, Catherine, and Margaret, were painted (1524) in the cathedral of Pisa. His last fresco, "The Last Supper", was done for the refectory in the convent of San Salvi, at the gates of Florence. Here Andrea drew his inspiration from Leonardo da Vinci. The beautiful work shows lively and varied colouring, but lacks the perfection of drawing and especially the dramatic quality of the "Last Supper" of Leonardo.

His principal pictures are: at the Pitti Palace, "The Annunciation" (1513); "Madonna with Sts. Francis and John the Evangelist" (1517); "Disputation concerning the Trinity" (1517), a very careful painting in which the artist "comes closest to intellectual expression", as he recalls from the Cross (1524); "Madonna with four saints" (1524); "The Assumption" (1526), of which there are two variations; at the Uffizi "Madonna of the Harpies, with Sts. Francis and St. John" (1517), so called because of the decorations on the pedestal on which the Blessed Virgin stands with the Infant Jesus in her arms; at the Museum of Berlin, "The Virgin with Saints" (1528); in the Dresden Gallery, "The Sacrifice of Abraham"; "The Marriage of St. Catherine"; at the Hermitage Museum, St. Petersburg, "Madonna between Sts. Catherine and Elizabeth"; at the Museum of Vienna, "The Pieta" (1517); at the Louvre, "The Virgin with the Infant Jesus, St. Elizabeth and St. John", which is an imitation of Raphael's "Madonna Canigiani"; "Charity". These two pictures were purchased by Francis I. According to Vasari, the King of France was charmed with his talent and induced him to come to Paris, where he decorated the Chêne and "Charity" must have been painted during his stay at the court. Obtaining permission to visit Florence, he departed, with money to collect works of art for Francis I; but, being of weak character and dominated by his wife, a beautiful and unscrupulous coquette, he squandered the money and did not return to Paris. He has left several portraits of himself (Pitti Palace, Uffizi, and National Gallery). Andrea del Sarto owes much to Fra Bartolommeo, borrowing from him the architecture and human positions, as in "Charity" of the Louvre, where triangle grouping is used. Andrea was above all a colourist, "the greatest colourist of the sixteenth century, in the region south of the Apennines" (Burckhardt). In this also he resembles Bartolommeo but shows more care for chiaroscuro. Like Leonardo da Vinci he excels in sfumato. His drawings, many of which are preserved at the Uffizi and the Louvre, are characterized by a melting softness which recalls Correggio's delicate execution, but this excessive love of colour led him to neglect the superior beauty of expressiveness; his pictures lack conviction and character. Not understanding the true character which each face should express, he usually confines himself to repeating the same type of Madonna and Infant Christ, and thus produces an effect of coldness and artificiality.

GASTON SORTAIS.

Sarto, GIUSEPPE MELCHIORRE. See PIUS X, POPE.

Sarum Rite (more accurately SARUM USE), the manner of regulating the details of the Roman Liturgy that obtained in pre-Reformation times in the south of England and was thence propagated over the greater part of England and Ireland, though not very dissimilar Uses, those of York, Lincoln, Bangor, and Hereford, prevailed in the north of England and in Wales. The Christian Anglo-Saxons knew no other Liturgy than that of the Mother Church of Rome. Their celebrated Synod of Clovesho (747) lays down that whatever is done on the same manner we all celebrate the Sacred Festivals pertaining to Our Lord's coming in the Flesh; and so in everything, in the way we confer Baptism, in our celebration of Mass, and in our manner of singing. All has to be done according to the pattern which we have received in writing from the Roman Church (Canon 15)—"That the Seven Canonical Hours be everywhere gone through with the fitting Psalmody and with the proper chant; and that no one presume to sing or to read aught save what custom admits, what comes down to us with the authority of Holy Scripture, and what the usage of the Roman Church allows to be sung or read" (Canon 16).

St. Osmund, a Norman nobleman, who came over to England with William the Conqueror, and was by him made Bishop of Sarum or Salisbury (1078), compiled the books corresponding to our Missal, Breviary, and Ritual, which revealed and fixed the Anglo-Saxon readings of the Roman Rite. With these he appears very naturally to have incorporated certain liturgical traditions of his Norman fellow-countrymen, who, however, equally with the conquered English, ever sought to do all things in
church exactly as was done in Rome. In appreciating the wide-spread Sarum Use, concerning which the exact literal facts are often lost in the mind that just as the Roman Rite itself has always been patient of laudable local customs, so, in medieval times the adopting of the Sarum Service Books did not necessarily mean the rejecting of existing eucaristic usages in favour of those in vogue at Salisbury. But the fitting them into the framework outlined in the Sarum Missal, Breviary, and other liturgical manuals. Again, it must not be forgotten that the Sarum Use represents in the main the Roman Rite as carried out in the eleventh century, and that the reforms introduced by Gregory VII and his immediate successors, which culminated in the twelfth-century Franciscan revision of the Breviary, only very slowly and very partially found their way into the service books of the Gallic and British Churches. Hence, the marked resemblance of the Sarum Use to those of the Dominicans, Caleche Carmelites, and other medieval religious orders.

The following are the more noticeable variants of the Use of Sarum from the developed Roman Rite of our own times.

1. At Mass, as in the Dominican Use, the Sarum priest began by saying a verse of the psalm Confrémintus with a shortened Confrémintus and verse: “Adquœra nostrum in nomine Domini”. Nevertheless, at Salisbury every celebrant was bound to have recited the whole psalm “Judica me Deus” in the sacristy before coming to the foot of the altar. The prayer “Auer a nobis was said, but not that which now follows it, in lieu of which the priest simply made the sign of the cross and proceeded to read the Officium, or as we call it, the Introtit, repeating it not only after its Gloria Patri but also after the psalm-verse which precedes the latter. From the Kyrie to the Offertory the deviations from our actual usage are slight, though on festival days this section of the sacred rite was of the enormously lengthened by varied and prolix sequences. Like the Dominican and other contemporaneous Uses, that of Sarum supposes the previous preparation of the chalice (put by the Sarum Missal between the Epistle and Gospel), and thereby materially abbreviates the Offertory ceremonial. According to an archaic usage, still familiar to ourselves from the Roman Good-Friday Rite, the prayer “In spiritu humilitatis” followed in place of preceding the washing of the priest’s hands, and the psalm “Lavabo” was omitted, so also to the “Orate Fratres” (at Sarum, “Orate Fratres et Sorores”), which the responsorial Preface onward through the Canon, the Sarum Mass word for word and gesture by gesture that of our own Missals, except that a profound inclination of head and shoulders took the place of the modern genuflexion and that during the first prayer after the elevation the celebrant stood with arms stretched out in the form of a cross. As in France and generally in Northern and Western Europe the Benediction given at the breaking of the Sacred Host was not curtained to the mere pronouncing of the words “Ex Domini sive quam vocamur” but, more particularly when a bishop officiated, was very solemnly given with a formula varying according to the festival. The Agnus Dei in the Sarum Use was said as by the Dominicans after and not before the Communion, but the prayers before the priest’s Communion were other than those with which we are familiar. The kiss of peace was given with him but there was no “Non nobis Domine, sicutiam dignum”. The words pronounced by the celebrant at the moment of his own Communion are striking and seem peculiar to the Sarum Missal. They may therefore be fittingly quoted: “Hail for evermore, Thou most holy Flesh of Christ; sweet to me before and beyond all things beside. To me a sinner may the Body of our Lord Jesus Christ be the Way and the Life.” The “Quod ore sumuspeus” and other prayers are composed of the taking of the ablutions, and the Communion and Postcommunion followed as now. But no Blessing was given and the beginning of the Gospel of St. John was recited by the priest on his way from the sanctuary to the sacristy.

2. The Sarum Breviary, like the Sarum Missal, is essentially Roman. The Psalter is distributed through the seven Canonical Hours for weekly recitation exactly as with us, though naturally the psalms (XXXI–XXXV) left over from the Sunday Matins and assigned by Pius V for the Prime of different ferials are, as in the Dominican and Carmelite Breviaries, marked to be recited only on the feast days. Nothing had place at the beginning of that Canonical Hour. Nor in the Sarum Matins do there occur the short prayers termed Absolutions. On the other hand, a Ninth Responsory always preceded the Te Deum which was followed by the so-called “Venus Sacerdotalis”, that is to say, a versicle intoned by the officiating priest and not by a cantor. At least on festival days, a Responsory was sung between the Little Chapter and Hymn of Vespers. When there were Commemorations or Memoriae as they are called in the Sarum, the specific Duties and the “Benedicamus Domino” of Vespers and the second and third Antiphon and Prayer of Our Blessed Lady closing the Divine Office (Divine Service, it was called at Sarum) is posterior to Sarum times. The Antiphons of the Sarum Offices differ considerably from those in the actual Roman Breviary; but both from the literary and from the devotional point of view the latter are in none circumstances preferable to those they have superseded. The proper psalms for the various Commons of Saints and for feast days are nearly always the same as now; but for the First Vespers of the greater solemnities the five psalms beginning with the word “Laudate” were appointed as in the Dominican Breviary. The order of the reading of Holy Scripture at Matins is practically identical with that of the Breviary of Pius V, though in the Middle Ages the First Nocturn was not as now reserved for these Lectors only. An interesting feature of the Sarum Breviary is its inclusion of Scripture Lessons. By the end of the fourteenth century the Lectors from the writings of the Fathers and from the Lectiones from the Saints were often dispropportionately long and obviously needed the drastic revision they received after the Council of Trent. The Sarum hymns are in the main those of the Roman Breviary as sung before the revision under Urban VIII and comprise by consequence the famous “Veni Redemptor” of Christmas Vespers and the “O quam glorifica” of the Assumption with one or two others in like manner now obsolete.

3. Very striking in the Sarum Use is the elaborate expenditure of the accompanying ceremonial, which contrasts vividly with the comparative simplicity of Roman practice. Three, five, seven deacons and as many subdeacons, two or more thurifers, three cross-bearers and so on are often prescribed or at least contemplated. Two or four priests vested in cope, termed Rectores Chori or Rulers of the Choir, presided over the sacred vessels and took the bread and wine at the altars, and even during the reading of the Lectors at Matins priests in their vestments offered incense at the high altar. Processions were frequent, and that preceding the High Mass on Sundays was especially magnificent. On the altar itself rarely more than two or at the most four candlesticks were placed, but
standing round or suspended from the roof were many other lights. An ornament used at Sarum, which at present survives only at Papal functions, was the ritual fan. It was made of rich materials and was waved by a deacon over the priest during his celebration of the Holy Mysteries.

(4) The churches followed the Roman ecclesiastical calendar, supplementing it, as is still done, with a multiplicity of local feasts. We note one or two variants. The feast of the Apparition of St. Michael at Mont-Saint-Michel in Normandy (16 Oct.) was kept instead of that of the same archangel in Italy (8 May); Sts. Crispin and Crispinian take as in France, the 26th, not the 16th, and the 28th, not the 25th, and Darius (25 Oct.); a feast of Relics is kept in July; that of the Most Sweet Name of Jesus on 7 August; that of St. Linus the Pope in November instead of in September, etc. The classification of festivals in Sarum Use is slightly more complicated than that which now prevails. To the cleverly drawn Book of Rules for finding out the particulars of the Office or Mass to be said, which was parti-coloured, being written in red and black, the name of "Pica" or "Pie" was given. Feasts are either double or simple, the former being subdivided into principal doubles, notable doubles, great doubles, etc. The simple feasts (among which are reckoned days within octaves) have only three lessons at Matins, though the nocturne preceding these is sometimes of three, sometimes of nine and sometimes of twelve psalms.

(5) The order of Collects, Epistles, and Gospels differs from that of our Missals in that the Sunday and Holy Days being called First, Second, etc., after Trinity, instead of being counted from Pentecost, there is some slight inversion of order. The Second Sunday of Lent had its proper Gospel (Matt., XV, 21) in lieu of that of the Transfiguration now restored from the pre-Felix Missal. For the Sunday and Holy Days before the Feast of the Lord's Ascension the Gospel assigned was not that of the Last Judgment but the entering of our Lord into Jerusalem on Palm Sunday (Matt., XXI, 1), our Gospels of the First, Second, and Third Advent Sundays becoming those of the Second, Third, and Fourth respectively. It is evident, therefore, that the selection of Sunday Gospels in the Anglican Book of Common Prayer merely perpetuates a Catholic tradition.

(6) The Sarum sequence of colours is very ill-defined. However, as in the Dominican Missal, it is expressly laid down that on solemn days the most precious vestments be used irrespective of their hue. Otherwise, the vestments were white, red, green, and yellow, with black for Masses for the Dead. In the later centuries purple or violet, and blue, seem to have been very generally adopted. Yellow vestments are prescribed for feasts of confessors. To our Blessed Lady white was allotted, but never blue, which colour, on its introduction from the Continent, was looked upon as merely a substitute for purple or violet. In Passion-tide (Good Friday included) the Sarum liturgical colour was red—a custom still observed at Milan. A striking peculiarity of the Sarum Use was the appointing of white vestments for Lent, except at the Blessing of Ashes on Ash Wednesday, when the celebrant wore a red cope. Similarly the sacred pictures and statues were veiled in white and not as with us in purple. They were thus covered not only during the two last weeks of Lent, but from its beginning until Easter Sunday morning.

(7) The sarum includes the elaborate ceremonial observance at Christmas-tide, of the feast of Deacons on St. Stephen's Day (26 Dec.), of the feast of Priests on St. John's Day (27 Dec.), and of the feast of Children or Cildermas, on Holy Innocents' Day (28 Dec.). Much also was made of the traditional re-hearsal of the events of our Blessed Lord's birth on Christmas Day itself according to St. Matthew, and on the Epiphany that according to St. Luke.

F. THOMAS BEER.
SASIMA

Sasima, a titular see in Cappadocia. Sasima is mentioned only in three non-religious documents: "Itiner. Anton.," 144; "Itiner. Hierol.," 577; Hierocles, 700, 6. This poor hamlet, hidden in an arid region, is known to all as the first see of St. Gregory of Nisianius who was appointed to it by St. Basil. The saint soon left it without having exercised any episcopal functions there. One of the reasons adduced by Eusebius of Caesarea to explain the choice of Sasima is the claim of jurisdiction over the see, which is, in fact, said by all the Greek "Notitiae episcopatum" to be subject to Cappadocia Secunda; however, the official catalogue of the Roman Curia continues to place it under Cappadocia Prima, i.e., as a suffragan of Hierapolis. The bishop of Sasima signed the profession of faith of the bishops of the province to Emperor Leo in 458. About the same time Eleusius appears as an adversary of the Council of Chaledon. Towards 1143 Clement was condemned as a Bogomile. The "Notitiae" mention the see until the following century. Sasima is the present village of Zamama, a little to the north of Yer Hisser, in the vilayet of Koniah, where a few inscriptions and rock tombs are to be found.

"SASIMA"

S. Pétriets.

SASKATCHEWAN and ALBERTA, the twin provinces of the Canadian West, so called because they were formed on the same day (1 Sept., 1883), by an Act of the Dominion Parliament, which gave them an identical constitution. The former derives its name from the important river, Kisaskatchwian, or Swift Current, now better known under the abbreviation of Saskatchewon, whose two branches drain it from west to east. The latter was called after the episcopal borough of St. Albert, nine miles from Edmonton, which was the first, in 1796, to be named by the French priest in command of the Fur trade in the region, Father Albert Lacombe, O.M.I., the veteran missionary of the Far West.

Boundaries and Area.—Saskatchewan was made up of the unorganized districts of Assiniboia, Saskatchewan, and Eastern Athabasca, while the original Territory of Alberta and the remaining half of Athabasca contributed to form the second province. Both provinces have identical southern and northern boundaries (49° and 60° N. lat.). Saskatchewan lies between 102° and 110° W. long. while the western frontier of Alberta is the summit of the Rocky Mountains as far as 54° N. lat., and the 107th meridian. The greatest length of both provinces is 760 miles. Saskatchewan is 393 miles wide in the south, and 277 in the north, thus forming an immense quadrangle of 250,650 sq. miles, of which 8318 are water. The breadth of Alberta varies from 200 miles in the south, to nearly 400 in its northern half. Its total area is estimated at 253,450 square miles.

Physical Characteristics.—Saskatchewan may be described as a vast plain, quite treeless in the south, with an average elevation of 1500 feet above the sea-level. Its northernmost part is considerably lower, since Lake Athabasca, in the extreme north-east, is only 690 feet above sea-level. The mean altitude of Alberta is 3000 feet, which likewise notably decreases in the north. The climate of both provinces is exceedingly healthful, though the cold is at times intense on the treeless prairies of Saskatchewan. A warm south-west wind, called the chinook, crosses the Rocky Mountains, and renders the winters of Alberta appreciably milder and shorter in spite of its great altitude. This immense region is traversed by the River Saskatchewan, which has its source in the Rocky Mountains, and after winding its way for some 1200 miles, empties into Lake Winnipeg. There is also in the Province of Saskatchewan proper the Beaver River which, after passing through a long chain of more or less important lakes, becomes the Churchill, and again takes course in an easterly direction until it empties itself into Hudson Bay, at the trading post of the same name. Northern Alberta is drained by still larger rivers, such as the Peace, which rises in Lake Thutage (Thutadale), British Columbia. It is first called the Finlay, and after its confluence with the Farsm, is known as the Peace, but north of Lake Athabasca it again takes the name to the Slave, only to course further on the great Canadian Northland as the Mackenzie River. South of the Peace is the Athabasca River, which flows into the lake of the same name. This fine sheet of water is common to both provinces. It has an area of 2842 square miles. The whole length of Saskatchewan on the other hand, counts such bodies of water as Cree Lake, 407 square miles; Wollaston Lake, 906 miles; Reindeer or Caribou Lake, 2437 miles, and a host of smaller ones, which lie mostly in the north. There are in either province few mountains, none of which are important.

Resources.—Saskatchewan is par excellence the wheat-growing region of Canada. Its plains are famous for their fertility. They extend from the international boundary, from Alberta to British Columbia, 5° 15' N., lat., where the northern forest, which itself contains important stretches of agricultural land, commences. The total area under cultivation (1910) was 7,558,170 acres. The crops were then poorer than usual. The previous year (1909) the yield in the various cereals had been as follows: wheat, 90,215,000 bushels; oats, 105,465,000; barley, 7,833,000; and flax, 4,448,700. The acreage under cultivation this year (1911) is considerably larger. Alberta's best farming-lands are in the northern interior (the region of which Edmonston is the centre), and this extends much further north than in Saskatchewan. The northern portion of Alberta, being rather high and of lighter soil, is better adapted to stock-raising. In addition to the above cereals the province also grows alfalfa, and all classes of roots, notably the sugar-beet, whose cultivation constitutes one of its most important industries. Lumbering is carried on around the upper waters of the North Saskatchewan and Athabasca Rivers in Alberta, while in Saskatchewan sawmills have been established at and near Prince Albert. Alberta is also rich in coal and oil. Its principal mining centres are Lethbridge, Coleman, Frank, Canmore, Edmonton, and Morinville. Oil is also found at the Little-Pennit, the first-named place, as well as in the south of the province.

Population.—Few countries have such a cosmopolitan population as the twin provinces of the Canadian West. The British Isles, the United States, Austro-Hungary, and Germany, together with Eastern Canada and the great feeders of the stream of immigration, which is there so active that statistics, which are perfectly correct one day are far below the mark a few months afterwards. The total population of Saskatchewan is now estimated at over 453,506 though five years ago it was barely 235,211. Of the present inhabitants almost one-fourth, or 104,000, are Catholics. Among the latter some 31,000 are of French origin; 28,000 came from Galicia, and follow the Rhenish rite; 26,900 are Germans; and 8000 have English for their mother-tongue. In Alberta, the present (1911) population is given as 372,919, its two chief cities, Calgary and Edmonton, being respectively the capitals of the province: the former has 43,736 inhabitants, and the latter 41,000. Regina, the capital of Saskatchewan, to-day counts about 30,210 inhabitants. The Catholics of Alberta number about 70,000, of whom perhaps 6,000 are Indians. The total native population of Saskatchewan is officially put down at 7791 by the Blue Book of the Ottawa Indian
Department, which gives the number of Catholics among them as 2939. The aboriginal races within the two provinces are the Blackfeet and cognate tribes, in the south of Alberta; the Sacochees, a small Déné division adopted by the Blackfoot confederacy; the Crees and the Siouxs. The majority of the latter is the Siouxfamily; the Siouxs proper, groups of whom have remained in Saskatchewan ever since Custer's Massacre (1876); the Saulteaux, an Algonquin tribe formerly stationed considerably to the east of its present haunts, and the Crees, who can claim as their own the great Saskatchewan district, must pass through the north-east, and the southern fringes of the great northern forest. To these may be added a few Déné tribes, who are to be found near the northern boundary of both provinces at Ile a la Crosse on Lake Athabasca, near Caribou Lake, etc. The French, and the French half-breed population of Alberta is estimated at 23,000, who have at least a score of parishes, mostly around and north of Edmonton.

Ecclesiastical Organization.—The two provinces of Saskatchewan and Alberta comprise to-day five ecclesiastical divisions: viz.; The Diocese of St. Albert, in Alberta; those of Prince Albert, and Keewatin, in the North-West Territories; the Vicariate Apostolic of Athabasca, mostly in Northern Alberta, and of Keewatin, partly in Northern Saskatchewan (separate articles are devoted to those dioceses, and to the Vicariate Apostolic of Athabasca). The Vicariate Apostolic of Keewatin was erected on 4 March, 1910, the Right Rev. Ovide Charlebeux, O.M.I., being appointed vicar Apostolic 8 August following, and consecrated Bishop of Berenice by Mgr. Langevin, Archbishop of St. Boniface on 30 Nov. of the same year. The limits of the new vicariate are very complicated. They run from the North Pole along 100° W. long., as far as 60° N. lat., then follow the watershed 56° N. lat., where they coincide with the eastern boundaries of the Athabasca vicariate, and the northern limits of the Dioceses of Prince Albert and St. Boniface as far as 91° W. long., which they then follow to Hudson Bay. The territory included is of the most desolate character; marshes and dreary wastes, which afford meagre support to a native population of 10,000 or 12,000 souls, almost all of whom are Crees, Déné, or Eskimos. Among these there are about 6000 Catholic converts. The most prosperous group is that which settled at the pioneer mission of Ile a la Crosse in 1844.

Education.—In the west as in the east of Canada the education of youth has long been a bone of contention between the secular and the religious authorities. What is now Saskatchewan and Alberta had been for five years governed from Ottawa, under the name of North-West Territories, when, in 1875, some sort of autonomy was granted them, and the Catholics settled therein were accorded the right of having their own schools, without contributing to the maintenance of any others. This equitable arrangement coming from a higher, or constitutive authority, should have been considered beyond the pale of law. Yet in 1892 it was abrogated by an ordinance of the territories, which decreed the absolute neutrality, from a denominational standpoint, of all the schools of the Far West. This act was afterwards admitted by some lawyers of note to be unconstitutional. Therefore when the new province of the anti-Catholic element in west end. The then Premier of Canada made an effort to insert in their constitution a proviso (clause xvi) whereby the school system of 1875 was reintroduced. Unfortunately he did not succeed in overcoming the opposition of one of his co-ministers supported by the clamours of the anti-Catholic element, and the result was a sort of compromise, which does not satisfy the Catholic minority, though it certainly gives it some appreciable advantages.

The present educational situation is this: conformably to the Act of 1905 there are in Saskatchewan and Alberta public and separate schools. The former are established by the majority of the rate-payers of a place, the latter may be set up by the majority of a group of rate-payers. Either kind is supported by the taxes levied on that part of the population for which it is intended, to which is added a Government grant based on the quality of the teaching and the number of days the school is open. On the petition of three resident rate-payers, a separate school district must be set up. It shall forthwith be governed by commissioners, elected by the rate-payers interested therein, and will enjoy the same rights and privileges as those of a public school district. One of these consists in the right to choose the teacher who, whether in separate or public schools, must hold a certificate of qualification. No religious instruction is allowed except during the last half-hour of the afternoon class. All the schools must be taught in English, though it is permissible for the board of any district to cause a primary course to be taught in French. This is the only concession made to the spirit of the Federal Constitution, which, as is represented in the North American Convention of 1867, declares both English and French to be the official languages of the Dominion.

By the side of real advantages the school laws in force in Saskatchewan and Alberta have regrettable drawbacks. The advantages consist in the fact that wherever they are, Catholics can have schools of their own. If they form the majority of a place, their school is termed public. They elect the commissioners best suited to their wants and aspirations, and through them the teachers. If they are in the minority, they can, with the consent of the proper authority, erect a separate school district with exactly the same rights and privileges. The drawbacks consequent on present conditions lie mostly in the text-books used, since some of the histories prescribed unfortunately contain assertions and omissions that are quite objectionable from a Catholic standpoint. A short time ago the Government of Saskatchewan authorised the use of Catholic readers for the Catholic separate schools of that province. It happens also that both in Saskatchewan and in Alberta there is a council of public instruction composed of five members, two of whom are Catholics. But neither of these advantages is granted by the constitutions. Furthermore, Catholic normal schools are a boon which is beyond the reach of the Catholic population of either province. As exemplifying the educational activities of that part of Canada, it may be stated that (1905) there were in Saskatchewan 716 schools; 873 (1906); 1101 (1907), and 1422 in 1908. Between 1 Sept., 1905, and the close of 1909, the number of school districts increased from 942 to 2001. There are in each province a number of non-denominational collegiate schools, as well as two State Universities, whose seats are at Saskatchewan and at Strathcona (Edmonton) respectively. In this connexion it may be worth while to remark that the first university in Western Canada, the University of Saskatchewan was a Catholic priest, who was also its first graduate, though his degree was conferred ad honorem.

History.—The first white man to set foot in what is now the Province of Saskatchewan, was Henry Keil, a boy in the end of the 17th century, who established himself in the present Province, and was afterwards joined by his brother Matthias. Keil was a trader. He started from Fort Nelson, and reached a point between the valley of the Saskatchewan and Lake Athabasca. This was in the summer of 1691. In the autumn of 1748, the sons of De Lavérendy, the real discoverer of the Canadian West, navigated the Saskatchewan to its mouth, where they established Fort Pukoyas. In the course of 1751 Boucher de Niverville sent ten Frenchmen from that post up the river, who erected a fort (La Jonquière) on the Bow
River, where Calgary now stands. Two years later St.-Luce de la Corne, one of the successors of De Loint, entered on the valley of the Saskatchewan, where he established (1754) Fort Pasqua, and made the first attempt on record to cultivate land within the limits of the present Saskatchewan province. Fort Pasqua was visited the same year by an English adventurer, Anthony Hendry, who crossed the whole north-west, and went as far as the country of the Blackfeet, in Alberta. Then follows the founding of Cumberland House, in 1742, and owing to the rivalry between the North-West Company (founded 1784), and the older Hudson Bay Company, various other trading posts were soon established, such as L'Abbe de la Corne (1791), Chipewyan (or Edmonton) (1798), and a few others. Until the arrival of the first missionaries, Father F. N. Blanchet and Father M. Demers in 1838, revery and lawlessness prevailed in the north-west, which were due to intoxicants furnished by the rival traders.

The religious history of the two provinces will be found under the heads of the various dioceses within their boundaries. Further events of a secular character are the explorations of Captain Palliser (1857); the Hind-Daws on surveys (1855); the journey of the Earl of Southesk to the sources of the Saskatchewan (1859); that of Lord Milton and Dr. Cheadle in 1862; and the surveying expedition of Sandford Fleming ten years later.

The Louis Riel Rebellion.—To understand the event which took place in 1885 we must go back to the troubles which agitated Manitoba in 1869-70. Half the population of that country was then made up of French half-breeds, whose native land was sold, without their consent, to the newly-formed Dominion of Canada. Prompted by the arrogance of the agents of Ottawa, and by their interference with the rights of the original settlers, now threatened with being dispossessed of their farms by parties who had at the time no jurisdiction over them, the French and some of the English rose against the intruders under the lead of Louis Riel (b. at St. Boniface, 22 Oct., 1844), a young man with a college education, and for about ten months held possession of the country, sending demands to Ottawa, the reasonableness of which was so far recognised that corresponding clauses were inserted in what was afterwards the Manitoba Act. It is a fact that they had been outdone by mere Metis, the anti-Catholic and anti-French strangers from the East wreaked vengeance, after the arrival of Wolseley's troops, on the leaders and partisans of the insurrection which had been perfectly legitimate. To escape the perils that endangered them, six of the leaders headed for the north and settled in the valley of the Saskatchewan, between Saskatoon and the forks of that river, just below Prince Albert. Unfortunately with the increase of white immigration to the prairies, difficulties similar to those which had resulted in trouble on the Red River arose among them. They vainly petitioned for the titles to their lands, which were threatened with being surveyed in such a way as to render useless the improvements they had made on them, and even jeopardized their rights to the same. They also repeatedly asked for the redress of several other grievances in which claimants had the sympathy of their clergy and the respectable part of the white population. Tired of being ignored by the Federal authorities, they next called to their assistance Louis Riel. He was then teaching school in Montana, after having been in various asylums as a result of the persecution of those who tracked him for his unflinching remonstrance put on his head by the Ontario Government.

Unfortunately his mind proved unequal to the task of leading a second agitation successfully. He gradually broke away from the control of the clergy who, conscious of the fact that the case was now quite different from that of 1869, when the proper authority had abated its rights, were striving to keep him within legal bounds, the object of his administations to him and his abettors, he tried to replace them by his own, and proclaimed himself a prophet. At the same time he raised the standard of revolt against the Canadian Government, and, 26 March, 1885, was present at the engagement of Duck Lake, in which the British troops, numbering some 4,000, followed the battles of Fish Creek (24 April), Cut Knife (2 May), and Batoche, where the Metis were finally routed (12 May) after four days' fighting with troops vastly superior in number and equipment. Perhaps the most regrettable incident of this ill-advised insurrection was the massacre of Fathers Fafard and Mandichaud, O.M.I., with a number of other clergy, at the mouth of Frog Lake, at the hands of pagan Crees. The country was laid waste and numerous missions were ruined by the same tribe of natives. Despite the testimony of the physicians, who declared his irresponsibility, Louis Riel was sentenced to death and executed at Regina, dying in the profession of the most Christian-like sentiments (16 Nov., 1885). Then the Government of Canada did what it had so long neglected. It examined the claims of the half-breeds and repressed their grievances.

Later History.—The one good result of the Saskatchewan Rebellion was the necessity to which the Ottawa Government was put of recognising the rights of the northern Metis, consisted in the fact that it drew the attention of the civilized world to the fertile plains of the Canadian West. The first transcontinental railway was completed (7 Nov., 1885). It served to bring thither large numbers of colonists of all nationalities, some of whom (the Doukhobors of Saskatchewan and the Mormons of Alberta) were scarcely of a desirable class. The new inhabitants soon clamoured for a larger share of influence in the territorial government than had previously been enjoyed by the people, and their agitation resulted in the Federal Parliament granting the territories, in the course of 1888, a legislative assembly with a correspondingly larger degree of autonomy. On 4 July of that year, a French Catholic, in the person of Joseph Royal, was appointed lieutenant-governor. The territories had then a common capital in Regina, previous to 27 March, 1882, a day when the river, at the confluence of the Battle and Saskatchewan Rivers. The total white population was (1888) 69,500.

Then, following a long agitation for still fuller provincial rights, there came (1905), the formation of the territories into the two provinces of Saskatchewan and Alberta, each with its own legislature and separate legislative assembly, together with a constitution which, among other things, determined the nature of the education which was to be imparted, as stated above. At the same time Edmonton, heretofore scarcely more than a Hudson's Bay Company trading-post by the Northern Saskatchewan, was made the capital of Alberta, while Regina continued to hold the same rank with regard to the Province of Saskatchewan.

The first lieutenant-governor of the latter was A. E. Forget, a Catholic, who had long been employed in Governmental offices. Ever since, the two provinces have smoothly pursued identical lines of self-development, and the few events worth recording have been of a purely political character.

SASSARI

A. G. MORICE.

Sassari, Archidiocese of (Turritanica), in Sardinia, Italy, situated on the River Rosello in a fertile region: a centre of the oil, fruit, wine, and tobacco industries. The city has a university founded in 1594. There is a monument to the Duke of Maurienne in the cathedral; the Church of the Most Blessed Trinity contains a beautiful picture by an unknown artist of the Quattrocento. Other noteworthy buildings are the palace of the Duke of Vallongossos, the Aragonese castle with its high tower, the Fontana del Rosello, and the thirteenth-century wall. Sassari was unknown till about the eleventh century; it developed with the decay of the ancient Torres (Turris Lybisamnis), which till then had been the principal city on the island. It was sacked by the Genoese in 1166. In 1294 it became a republic with the consent of the Genoese, who were pleased to see it thus withdrawn from the control of the Pisani. Its statutes of 1316 are remarkable for the leniency of the penalties imposed when compared with the penal laws of the Middle Ages. In 1390 it was united to the giudicatura of Arborea, of which it became the capital, but in 1420 it fell to the hands of Aragon. In the seventeenth century, it was sacked by the French. The ecclesiastical history of Sassari commences with that of Torres. In 304 the soldier Gavinus, Protus a priest, and the deacon Januarius suffered martyrdom there. Later Gavinus and Protus were reputed bishops, and said to have lived in the second and third centuries respectively. St. Gaudentius, who seems to have belonged to the beginning of the fourth century, is also venerated there. The first bishop whose date is known is Felix (404). Other bishops: Marinianus, a contemporary of St. Gregory the Great; Novellus (685), whose ordination caused a controversy between John V and the Archbishop of Cagliari; Felix (727), who took refuge at Genoa to escape the cruelty of the Saracens; almost nothing is known concerning bishops of Torres for the next three centuries, till Simon (1065). His successor, Costantino de Crasta (1073), was an archbishop. Other archbishops: Blasius (1190), representative of Innocent IV. Several orisons on several occasions to Stefano, O. P. (1238),legate of Innocent IV in Sardinia and Corsica. Trogodogadro (about 1278) which erected the episcopal palace in Sassari, to which Teodosio (1292) added the Church of St. Andrea; after this the archbishops resided habitually at Sassari. Pietro Spagnolo (1422) was a bishop of Sassari, and the bishop of the episcopate was definitively transferred to Sassari by Eugenius IV. This bishop intended to erect a seminary for the training of the clergy, but his death frustrated the plan. Angelo Leonini (1509) was at the Fifth Lateran Council; Salvatore Salepuzi (1553) was distinguished at the Council of Trent; Alfonso de Sorca (1586), highly esteemed by Clement VIII. At about the year 1500 there were united to the Archdiocese of Sassari the Sees of Sorca (Sarapafina) which is mentioned as a bishopric in 1106, and whose last bishop was Jacobo Poggi; and of Plauca (Plumum), the first known bishop of which is Jacentius (1000). The sees suffragan to Sassari are: Alghero, Ampurias and Tempio; Bisarchio, Bosa. The archdiocese contains 35 parishes, 140 secular; 41 regular priests: 112,500 inhabitants, 9 convents of religious, and 13 monasteries, 7 boys' and 5 girls' institutions.

Sassoferato, Giovanni Battista Salvi da, b. at Sassoferrato in the March of Ancona, 1609; d. at Rome, 1689, where he had passed the greater part of his life. His father, Tarquinio Salvi was his first master. At Naples, he studied under Dominichino and through him was a pupil of the Carracci. Several of his pictures are direct imitations of Perugino, Raphael, and Titian. His Madonnas, especially, are inspired by Raphael, and in their quiet sweetness rival those of Carlo Dolci. The Blessed Virgin was too frequently portrayed with a cold dignity, and reserve so austere towards the Child Jesus that it is difficult to realize her motherhood. "Consequently, men grew more fond of Sassoferrato whose Madonnas, tender, lovely, carefully painted, all the mother's heart, as men may readily forgive certain errors when they are lofty, and certain weaknesses when they are picturesque." (Burkhardt). Sassoferrato gave to his compositions a pleasing air of intimacy, and a certain naïveté, in happy contrast to the melancholy expression too frequently found in the paintings of his time. Among others the "Adoration of the Shepherds", and the "Workshop of the Carpenter Joseph with the Infant Jesus Sweeping the Shavings" (Museum of Naples) present this charming character of intimacy. His masterpiece, however, is to be found in Rome, in the Church of St. Sabina on the Aventine: "Our Lady of the Rosary with St. Dominic and St. Catherine". This was painted at the request of the Prince de Rossano, and finished in 1643, the artist receiving the sum of one hundred ducats (crowns) in payment. "The Virgin in a blue cloak and purple dress is seated in the centre with the Infant Jesus on her left knee; kneeling at the right is St. Dominic to whom she presents the rosary, whilst the Divine Child with one hand extending the rosary to St. Catherine, who kneels at the left, with the other places upon her head reverently bent, the crown of thorns. Circling the head of the Virgin is a crown of five small angels of ravishing grace and devotion" (Berthier). Besides these, there is at the Louvre, the "Assumption of the Blessed Virgin"; at the Musée des Offices, the "Infant Jesus asleep on His Mother's knees" (this last subject is also found in the Museums of Dresden and Madrid); his Portrait: "The Virgin of Sorrows"; at the Vatican there is the "Madonna with Angels"; at Turin, the "Madonna of the Rose"; at Berlin, the "Holy Family"; at Frankfurt-on-the-Main, Galerie Stadel, the "Virgin praying". Maddalenas of Sassoferrato are likewise to be found in the Museums at London, St. Petersburg, Brussels, Vienna. LANEL, History of Painting in Italy, tr. from the Italian by RUSCONI, I (London, 1647), 409; BLANC, Histoire des peintres Français les Ecoles, II (Paris, 1865), 717-21; BURKERT, L'oeuvre de Cellini, Paris (1867); BURKERT, "Giovanni Battista SALVI DA SASSOFERRATO," Gazette des Beaux Arts, LXII (1892), 111; SCHEIDT, Die Maler und Bildhauer des 16. und 17. Jahrhunderts, (Berlin, 1898), 111-12; DE BOOR, Le Cicerone, II (Paris, 1892), 810-11; BRYAN, Dictionary of Painters and Engravers, V (London, 1905); BERTHELOT, L'Église de sainte Sabine à Rome (Paris, 1910), 313-16.

GASTON SORTAIS.

Satala, a titular see in Armenia Prima, suffragan of Sabinus. Satala according to the ancient geographers was situated in a valley surrounded by mountains, a little north of the Euphrates, where the road from Trapezus to Samosata crossed the boundary of the Roman Empire. Later it was connected with Nicopolis by two highways. This site must have been occupied as early as the annexation of Lesser
Armenian under Vespasian. Trajan visited it in 115 and received the homage of the princes of the Caucasus and the Euxine. It was he who established there the Legio XV Apollinaris and began the construction of the great castra stativa (permanent camp) which it was to occupy till the fifth century. The town must have sprung up around this camp. At the time of Ptolemy it was already important. In 530 the Persians were defeated under its walls. Justinian constructed more powerful fortifications there, but these did not prevent Satala from being captured in 607–8 by the Persians. It is now Saghag, a village of 500 inhabitants, in the vilayet of Erzeroum. The remains of the camp still exist, a fragrant brick bearing the marks of the legion; there are also the ruins of an aqueduct and of Justinian's citadel; some Latin and Greek inscriptions, the latter Christian, have been discovered. The Christians were numerous in the time of Dioscorides. Le Quien, "Oriens Christianus", I, 431, mentions seven of its bishops: Evrithius, at Nicssa, 325; Elfridius, 360; Poomenius, about 378; Anatolius, 451; Epiphanius, 458; Gregory, 692; Philip, 879. The see is mentioned in the "Notitiae episcopatum" until the thirteenth century, and we know the name of the bishop, Cosmas, in 1258.

S. PÉTRIDES.

Satan. See Devil.

Satisfaction. See Penance.

Satisfaction of Christ. See Redemption.

Satoll, Francesco, theologian, cardinal, first Apostolic delegate to the United States, b. 21 July, 1839, at Marsciano near Perugia; d. 5 Jan., 1910, at Rome. He was educated at the seminary of Perugia, ordained in 1862, and, after receiving the doctorate at the Sapienza, was appointed (1864) professor in the seminary of Perugia. In 1870 he became pastor at Marsciano and in 1872 went to Montecassino, where he remained two years. Called to Rome by Leo XIII in 1880, he was appointed professor of dogmatic theology in the Propaganda (1882) in the Lateran Seminary, rector of the Greek College (1884), president of the Accademia dei Nobili Ecclesiastici (1886), and Archbishop of Lepanto (1888). As professor he had an important share in the neo-Scholastic movement inaugurated by Leo XIII. His lectures, always written with great elegance, aroused the enthusiasm of his students for the study of St. Thomas, while his writings opened the way for an extended literature in Thomistic philosophy and theology. Satoll came to the United States in 1889, was present at the centenary of the hierarchy celebrated in Baltimore, and delivered an address at the inauguration of the Catholic University of America in November. On his second visit, he attended (16 Nov., 1892) a meeting of the archbishops held in New York City, and formulated in fourteen propositions the solution of certain school problems which had been for some time under discussion. He then took up his residence at the Catholic University of America, where he gave a course of lectures on the philosophy of St. Thomas. On 24 Jan., 1893, the Apostolic Delegation in the United States was established at Washington, and Satoll was appointed first delegate. He was present on 20 Nov., 1896, with the title of Sta. Maria in Ara Coeli. Returning to Rome in October, 1896, he was appointed prefect of the Congregation of Studies and archpriest of the Lateran Basilica. He became Cardinal Bishop of Frascati 22 June, 1903. His last visit to the United States was on the occasion of the St. Louis Exposition, 1904.

Satoll's works include: "Enchiriidion Philosophiae" (Rome, 1884); Commentaries on the Buman of Theol. of St. Thomas (6 vols., Rome, 1884–85); "Prima principia juris publici eccles. de concordatis" (Rome, 1888); "Loyalty to Church and State" (Baltimore, 1895).

America, 15 Jan., 1910; Catholic University Bulletin, Feb., 1910.

EDWARD A. FAGE.

Saturninus, Saint, was, says Tillemont, one of the most illustrious martyrs France has given to the Church. We possess only his Acts, which are very old, since they were utilized by the German of Tours. He was the first Bishop of Toulouse, whether he went during the consulate of Decius and Gratus (250). Whether there were already Christians in the town or his preaching made numerous conversions, he soon had a little church. To reach it he had to pass before the capitol where there was a temple, and according to the Acts, the pagan priests ascribed to his frequent passings the silence of their oracles. One day they seized him and on his unshakable refusal to sacrifice to the idols they condemned him to be tied by the feet to a bull which dragged him through the town until he fell. Hope bore these Christian women piously gathered up the remains and buried them in a deep ditch, that they might not be profaned by the pagans. His successors, Sts. Hilary and Exuperius, gave him more honourable burial. A church was erected where the bull stopped. It still exists and is called the church of the Toulouse bull. The body of the saint was transferred at an early date and is still preserved in the Church of St. Sernin (or Saturninus), one of the most ancient and beautiful of Southern France. His feast was entered on the Hieronymian Martyrology for 29 November; his cult spread abroad. The account of his Acts was embellished with several details, and legends linked his name with the beginning of the churches of Eauze, Auch, Pamplona, and Amiens, but these are without historic foundation.

ANTOINE DESERT.

Saustra, a titular see of Lycaonia, suffragan of Iconium. Nothing is known of the history of this town, but some of its coins have been preserved and are mentioned by Strabo, XIV 664, Polybius, V, 4, 12; Hierocles, 672, 2; and the Tabula Peutingeriana. The name in this title is spelled as it occurs on the coins; but Saustra is its equivalent in pronunciation and is also found, also Sostra, in Strabo. The town was situated in an arid region on the road from Laodicea to Archelaia, that is, near the village of Souverek, in the vilayet of Koniah: according to Ramsay "Asia Minor", 343, at the ruins four hours south-west of Eekil; according to Müller, "Notes to Ptolemy", ed. Didot, 1, 858, near Deli in the plain of Askos, or Obrouk, and Sultan Khan Le Chechen. "Oriens Christianus", I, 1883 mentions the three bishops of Saustra, Aristobulus being present at the First Ecumenical Council of Constantinople, 381; and Eustathius, who was living at the time of the Council of Chalcedon, 451. The Greek "Notitiae episcopatum" mention the see till the thirteenth century.

SMITH, Dict. of Greek and Roman Geog., s. v.; RAMAY, Asia Minor (London, 1890), 343, and passim.

S. PÉTRIDES.

Saul, הָאוֹל, postulates, referring probably to the petition mentioned in 1 Kings, viii, 5, the first King of Israel, the son of Cis of the tribe of Benjamin (ix, 1, 2). Waiving critical discussion of the parallel though often divergent sources underlying 1 Kings,
suffice it to say that the narrative of the life and times of Saul is constructed from two traditional accounts each of which has its particular viewpoint. This appears especially in the divergent accounts relative to the circumstances attending the election of Saul and his fall from Divine favour. The prophet Samuel, who is counted as the last of the great Judges of Israel, was growing old and the administration of civic and religious affairs had been confided to his sons. These proved unfaithful to their trust and the people long since wished to select a king to rule over them after the manner of the other nations. Samuel resents this request, and the Lord, though affirming it to be an offence against Himself, a virtual rejection of the theocratic regime, nevertheless instructs the prophet to accede to the demands of the people. Samuel therefore invests on the Lord's authority and predicts the retributory evils that will come upon them through the exactions of the future king (1 Kings, viii). The choice of the new ruler is determined by a providential incident. Saul, in quest of his father's straye asses, happens to consult Samuel the seer. The latter, on obtaining Saul's information as to their whereabouts, the prophet assures him of their safety, and after entertaining Saul, reveals to him his mission with regard to the Chosen People and anoints him king. Fortwith Saul's heart is changed, and to the surprise of many he prophesies in the midst of the company of prophets (1 Kings, x, 10). A month after the event, Saul's envious witch at Endor seizes an opportunity and refrains from asserting his royal prerogatives, justifies his election by defeating the Ammonites and delivering Jabes Galaad. Later he engages in war with the Philistines, and being in straits, he presumes to offer the holocaust because of Samuel's unexplained delay in arriving on the scene. For this usurpation of the priestly function he is reprieved by the prophet and already the end of his kingdom is announced (1 Kings, xiii).

Illustrative of the composite character of the narrative is the fact that an entirely different motive for his rejection is given in chapter xv, viz., his failure to carry out fully the command of the Lord to utterly destroy the tribe of Amalec. Consequently upon the Lord's disfavour Samuel is directed to anoint David to be a king "after God's own heart", and though merely a shepherd boy he is taken into Saul's household. The narrative of the gradual ascension of Saul and his sons is overwhelmed by the Philistines; the valiant Jonathan and his brothers are slain in the battle, and the king, fearing lest he fall into the hands of the uncircumcised, begs his armour bearer to take his life. The latter, fearing to lay hands on the Lord's anointed, refuses, and Saul being in desperate straits ends his life by falling on his own sword. His head was cut off by the victorious Philistines and sent as a trophy to the various towns of their country, while his body and those of his sons were hung on the walls of Bethshan, but the inhabitants of Jabes Galaad hearing of these things came in the night, and removing the bodies caused them their own sharp swords and burying the ashes in the neighbouring woods (1 Kings, xxxi). Achish is mentioned as the wife of Saul (1 Kings, xiv, 50). Three of his sons perished with him (1 Kings, xxxi, 2), and another, Ishobeth, who endeavoured to continue the dynasty of his father's house, was assassinated by two captains of his own army (II Kings, v, 6). Thus was removed the last obstacle to the accession of King David.

Saul, Alexander. See Alexander Sauli, Blessed.

Saul Sainte Marie (Sanc-t-e-Mar-le-Or-men-sis), Diocese of, was erected by Decree of the Holy See on 10 September, 1604. It embraces the southern parts of the districts of Thunder Bay, Algoma, and Nipissing (i.e., between the height of land and the Lakes Superior, Huron, and Nipissing. The Recollects were the first missionaries in the Nipissing region. Father Guillaume Poullain (1622) and Jacques de la Foye (1624) spent a few months there and baptized several children on the point of death. However, Father Claude Pijart, a Jesuit, was the principal apostle of the Algonquins at Nipissing and around Georgian Bay. He devoted to their conversion nine years of indefatigable zeal (1641-50), being aided in his work by Father Charles Bayard (1642-44; 1648-50), Léonard Garae (1644-46), Joseph Poncet (1646-50), Adrien Daran (1649-50). They were the first who preached the Gospel to the tribes of the Manitoulin Islands and Georgian Bay as far as Saul Sainte Marie. As early as 1641 Fathers Garae, de la Foye and Raynal visited the country. The Jesuits established three missions in the midst of the Algonquins of this country: St-Ésprit, St-Charles and St-Pierre. Their ministry was not altogether fruitless: travelling to Lake Nipigon, in 1667, Father Allouez found some of their neophytes who had stood firm in the Faith, although they had not seen a priest for nearly twenty years. The ruin of the Algonquin missions accompanied the destruction of the Huron nation. In 1668 the Jesuits founded the mission of Saul Sainte Marie. From this centre they evangelised the adjacent country, and pushed their apostolic expeditions as far as the regions of the Nipissirimans. Well-known among the apostles of this period are Fathers Gabriel Drulellettes, Louis André, Henri Nouvel, and Pierre Baillouquet. In the beginning of the eighteenth century, the founding of Detroit caused the centre of the western missions to be transferred eastward to the Bay where Scott's Point was founded (1797). This mission resumed only in 1836, when Rev. Jean Baptiste Proulx, a diocesan priest, settled in Manitoulin Island. In 1838 another secular priest, the zealous Father Piers, founded the missions of Grand Portage, Michipicoten, etc. Hardly had the Jesuits returned to the country, when the evangelization of the savages of what is now New Ontario was entrusted to their care.

In 1844 they replaced Father Proulx at Wikwemikong, founded Garden River in 1846, and two years later erected at Rivière aux Tourtes (Pigeon River), a mission which they transferred in 1849 to Fort William. From this centre the missionaries opened consolations of religion, not only to the Indians, but also to the miners and woodcutters scattered along the shores of Lakes Huron and Superior. Among the new missionaries Fathers Chéné, Hanipaux, Duranquet, Hébert, and Baxter are to be mentioned.

In 1874 Pius IX, adding to the territory already described the districts of Parry Sound, created the Vicariate Apostolic of Northern Canada, with Mgr Jean-François Jamot as its first titular. The Catholics of the new vicariate numbered 8500. A few other districts were added in 1882, when the vicariate Apostolic became the Diocese of Peterborough. The construction of the Canadian Grand Trunk Railway opened these regions to progress and brought thither numbers of workmen and colonists. Mgr Jamot called in the Jesuits, and opened to their seal the eastern country extending from North Bay to Sudbury, and later the
country as far as Bonheur (a stretch of 800 miles). At its erection the Diocese of Sault Sainte Marie had a fixed population of 20,694 Catholics, 20,090 of whom were native Canadians, the rest being of different nationalities. There were besides 5000 Catholic Indians. To-day (1911) the Catholics number 37,875, including 24,470 French Canadians. The diocese has 50 parishes, 3 hospitals, 30 missions, and 50 missions. The school system is the same as that of the Province of Ontario (see CATHOLIC). The Daughters of the Immaculate Heart of Mary (from Buffalo) direct the Indian industrial school and the boarding-school at Wikwemikong. The Sisters of Saint Joseph, besides many other schools, have at Fort William a boarding-school for the Indians and the whites, and a hospital and boarding school at Port Arthur. The Grey Nuns (from Ottawa) have charge of the two hospitals of Sudbury and of Sault Sainte Marie, and also a few schools. The Daughters of Wisdom direct the schools of Blind River and Sturgeon Falls. Right Rev. David Joseph Scollard, the first bishop, was born in Ennismore, Ontario, 4 Nov., 1862, and was ordained priest on 2 Dec., 1887. On 1 Oct., 1890, he was consecrated co-adjutor at the cathedral of Peterborough until his appointment to the rectory of North Bay (1896), and was consecrated bishop at Peterborough on 24 Feb., 1905. He resides temporarily at North Bay. See also Sault Sainte Marie. Savannah, Diocese of (of Savannah), comprises the State of Georgia and was created as such by Pius IX, 1860. The first bishop, Rev. F. X. Garland, V. G. of Philadelphia, was consecrated 10 September, 1850; died 20 September, 1854; succeeded by Rev. Joseph B. Augustin, who was consecrated 2 August, 1857, and died 21 November, 1859. Rev. Augustus Verot, Vicar-Apostolic of Florida, was appointed to succeed Bishop Barry but resigned in 1870 and returned to Florida where he died 10 June, 1876. Rt. Rev. Ignatius Persico, then in the Diocese of Charleston, was transferred to Savannah, 11 March, 1870, and died after two years of ill health. On 27 April, 1873, Rev. William H. Gross, C.S.R., was consecrated but transferred to the Archdiocesan See of Oregon City in 1885, and was succeeded by the Rt. Rev. Thomas A. Becker, who was transferred from the Diocese of Wilmington, 16 May, 1886. He died 27 July, 1889, and was succeeded by the present cumbent Very Rev. B. J. Keiley. Bishop Keiley was born in 1847; went to school at Petersburg, Va.; entered the Confederate service in 1864; went to St. Charles College, Ellicott City, Md., for a brief period in 1868; went to Rome in 1869; was ordained priest 31 December, 1873; appointed pastor of New Castle, Delaware, 24 September, 1873; transferred to rectorship of pro-cathedral, Wilmington, Delaware, August, 1880. On the transfer of Bishop Becker to Savannah in 1886, he obtained permission from Rome to go to that diocese, where he was made pastor of Immaculate Conception Church and vicar-general 3 December, 1886. Called to Savannah, 12 July, 1896, he was made rector of the cathedral, appointed Bishop of Savannah, 19 April, 1900, and consecrated by Cardinal Gibbons, 3 June, 1900, in St. Peter's Cathedral, Richmond. The Bishop of Savannah is a corporation sole. Savaric died without leaving a heir. A majority of the secular priests are of Irish descent, with a few German and French. There is no diocesan seminary; students are sent to St. Bernard's, Rochester, Dunwoodie, N.Y., and Belmont, N. C. The present cathedral, that of St. John the Baptist, was finished during the administration of the present bishop upon the ruins of the one completed by Bishop Gross, destroyed by fire 6 February, 1898. The cornerstone of the first church of St. John the Baptist was laid on 13 July, 1860. The diocese is limited to the cities of Savannah, Macon, Augusta, Columbus, and Washington under the care of the Sisters of St. Joseph and Sisters of Mercy; day colleges for boys: in Augusta, under the Jesuit Fathers; in Savannah, under the Benedictine Fathers, and in Atlanta under the Marist Fathers. There is an orphanage for girls in Savannah, in charge of the Sisters of Mercy, and for boys, in Washington, in charge of the Sisters of St. Joseph. Hospitals, at Savannah and Atlanta, are under the Sisters of Mercy. Under certain restrictions, Mass is said in the Federal prison at Atlanta where a Catholic priest exercises the duties of chaplain under a salary from the Government. Under the administration of Bishop Keiley the entire charge of the coloured people has been given to the Fathers of the African Mission, who have established churches in Savannah, Atlanta, and one at Macon, adjoining the novitiate of the Jesuits. Diocesan collections are taken annually. The Episcopal League is widely established, St. Vincent de Paul Conferences and Holy Name Societies are local throughout the diocese, as well as Sodalities of the Sacred Heart and of the Blessed Virgin Mary. In addition to the orders mentioned there are Sisters of St. Francis for the coloured people at Savannah, and Sisters of the Poor at Savannah. The annual retreats are attended by every priest in the diocese. The statistics in May, 1911, were: priests, regular and secular, 74; churches with resident priests, 19; missions with churches, 14; stations regularly attended, 81; chapels, 14; colleges, 1; parish schools, 16; white orphanages, 2; coloured, 2; home for aged poor, 1; hospitals, 2; population, 15,583.

Jarvis Kelley.

Savarc, Bishop of Bath and Glastonbury, and cousin of the Emperor Henry VI, date of birth unknown; d. at Rome, 1205. He was archdeacon of Canterbury, 1176, and archdeacon of Northampton, 1178. In 1191, while he was on a crusade, he was elected Bishop of Bath, and the following year was ordained priest at Rome. Pope Celestine III consented to the annexation of Glastonbury Abbey to the See of Bath, and Savaric's plan was to be joint Bishop of Bath and Glastonbury. The monks of Glastonbury objected to this progression and appealed to Rome, but their appeal was disallowed in 1196. In spite of the fact that Savaric had been one of the hostages at Mains for the ransom of Richard I, the king, on his release, supported the monks, and it was not till 1199 that the bishop, after a forcible entry, was enthroned in the abbey. A second appeal of the monks to the new pope, Innocent III, was dismissed and in 1202 Savaric was again declared abbot. From that time all opposition vanished and Savaric became a considerable benefactor to Glastonbury. At Wells he instituted a daily Mass in honour of Our Lady, and left instructions for the feeding of 100 poor persons both at Wells and at Bath. Savaric also gave a charter to Wells, and persuaded King John to grant a charter from the crown to that city. Not the least of his services to Bath was his intervention to save the treasury of the abbey from being emptied for the ransom of Richard. On the death of Peter des Roches, episcopus designatus of Winchester.

SAVARY

SAVARY.—A noble French family of the seventeenth century especially devoted to trade and to the publication of works on commercial matters of lasting and widespread authority. The most illustrious member was Jacques Savary, b. at Doué in Anjou, 22 September, 1622; d. 7 October, 1690. He belonged to the younger branch of the Savary. His parents were in the commercial class and destined their son Jacques for that career. After having studied law in Paris with a procureur he entered the ranks of the haberdashers as a wholesale merchant, and in 1658 his fortune was made. His relations with the superintendent, Fouquet, enabled him to devote his abilities to the service of the crown and to collecting the revenues of crown lands was given to him. After Fouquet’s fall Savary gained the favour of the Chancellor Ségurier, and as the numerous arbitrations with which Savary was charged in all commercial questions daily increased his prestige, he was summoned in 1670 to take an active part in the commission for the revision of the laws pertaining to trade. So well did he acquit himself there that Fussort, president of this commission, named the ordinance of 1673 the “Code Savary”. On the appearance of this ordinance Fussort and several other commissioners requested Savary to publish it in book form. He submitted numerous manuscripts read by him before the Commission during the preparation of the ordinance. This book appeared in 1675 under the title, “Le parfait négociant ou Instruction générale pour ce qui regarde le commerce des marchandises de France et des pays étrangers.” (The Perfect Merchant or General Instruction regarding the mercantile trade of France and foreign countries). Numerous editions followed, and it was translated into various languages. “Les Parères, ou Avis et Conseils sur les plus importantes Matières de Commerce” was published by Savary in 1688 as a sequel to “Le parfait négociant”.

Such was the authority of Savary that during his lifetime lawyers quoted his opinion as equal in value almost to a law. After the death of Colbert (1683), the controller general of finances, Pelletier, continued his patronage of Savary, and ordered him to make an investigation of the financial affairs of the Western crown lands. His family was very numerous. He had seventeen children, eleven of whom survived him. His son Jacques Savary des Brulons (b. 1657; d. 1716) was appointed by Louvois, in 1686, inspector general of the Custom House in Paris. He undertook a personal mission for the publication of an alphabetical list of all objects subject to duty, then of all the words relating to commerce and industry. He added a repertoire of the ordinances and rules regarding commerce in France and abroad. This double work was the starting-point of his “Dictionnaire du Commerce”, which he undertook in collaboration with his brother Louis-Philémon and which he left unfinished. But Louis-Philémon Savary (b. 1654; d. 1727), at first a preacher, later canon of the Chapter of Saint-Maur, and French agent for the reigning house of Mantus, finished the dictionary and published it in 1723. This Dictionary was translated into English in 1774. At the time of his death Louis Philémon had nearly completed a supplementary volume, which appeared in 1730.

Via de Savary, prefixed to La parfait négociant (Paris, 1731); Morelli, Grand Dict. Hist., s. v.

GEORGES GOYAU.

SAVIGNY, ANBRY op, situated on the confines of Normandy and Brittany, Diocese of Coutances, France, founded by Vital de Mortain, Canon of the Collegiate Church of St. Evroul, who, resigning his prebend to embrace an eremitical life under Robert of Arbrissel in the forest of Craon (Anjou), and leaving the latter, retired to the forest of Savigny (1105), where he built a hermitage. Soon, however, the number of disciples who gathered around him necessitated the construction of adequate buildings, in which was instituted the monastic life, following the Rule of St. Benedict, and interpreted in a manner similar to the Cistercians. Rudolph, lord of Fougères, confirmed to the monastery (1112) the grants he had formerly made to Vital, and from then dates the foundation of the monastery. Once firmly established, its growth was rapid, and it soon became one of the most celebrated in France. Its founder was judged worthy of canonization, and many of his successors in the abbatial office, as well as simple religious of the Abbey, were canonized or beatified by the Church; the best known of them being St. Aymon. From the number of its foundations Savigny became the centre of the Congregation, numbering thirty-three subordinate houses, within thirty years of its own inception. In 1119 Pope Celestine II, then in Angers, took it under his immediate protection, and strongly commended it to the neighbouring nobles. Under Geoffroy, successor to Vital, Henry I., of England, established and generously endowed twenty-nine monasteries of this Congregation in his dominions. St. Bernard also held them in high esteem, and it was at his request that their monks, in the troubled times of the antipope Anacletus, declared in favour of Pope Innocent II. Serlon, third successor to Geoffroy, found it difficult to retain jurisdiction over the English monasteries, who wished to make themselves independent, and so determined to affiliate the entire Congregation to Citeaux, which was effected at the General Chapter of 1147. Several English monasteries objecting to this, were finally obliged to submit to Pope Eugene III (1148). Little by little discipline became relaxed, and commendatory Abbots being introduced (1501) it never regained its first greatness. In 1506 it was pillaged and partly burned by the Calvinists, and records of the following year mention but twenty-four monks remaining in the monastery. It continued to decline until it was reduced to a heap of ruins, and scattered its then existing members. The church, a model of Cistercian architecture, was restored in 1869, and now serves for parish purposes. Of all its former dependencies, there remains only La Grande Trappe. This, though not founded directly, was a daughter of the Abbey of Breuil-Benoit, which latter was a direct filiation of Savigny.

TIERRA, Bibliotheca patrum cisterciensium (Bonnefont, 1600-80); Morelli, Carte et Montagnes de Savigny (Paris, 1857); Tierrina, Etudes sur les épiscopat de l’order de Citeaux (Tours, 1889); Du Monestir, Neuvième Sis (Rouen, 1863); Cart. et Hist. de la France, by Lautou, Monast. XII (Paris, 1868-70); Manrique, Annales cistercienses (Lyons, 1849-50); Martigné and Durand, Thégl. de la France, vol. II (Paris, 1871); Gallia cathedral, vol. XI (Paris, 1885); Jahn, Gesch. (Vienna, 1877), ii; Dobson, Monastic encyclopaedia (London, 1882), II; Jonghein, Notice abbé sur ord. cist. (Cologne, 1864); Monis, Dict. des ord. Relig. (Paris, 1880).

EDMOND M. OBRECHT.

SAVOIR. See Jesus Christ.

Savona and Noli, Diocese of (Savonetia et Naulensi), province of Genoa, on the Gulf of Genoa, having a small but safe harbour. In addition to its maritime trade and shipbuilding, the city is engaged in manufactures of steel, glass, delph, majolica, and in the quarrying of lignite and marble. The cathedral, dating from 1589, restored in the nineteenth century, has three naves and a cupola; it contains beautiful frescoes by Coggetti. Close by the cathedral is the Sistine chapel, erected by Stius IV, whose ancestors belonged to Savona. The other churches contain paintings of great value. Among the secular buildings the most noteworthy is the Palazzo della Rovere, constructed by Sangallo; the paintings of Semini were destroyed when the palace was converted into a convent. Savona was formerly called Sabbatia or Savina. In the fourteenth century its bishops were counts of Savona, but later the count-

EDMOND M. OBRECHT.
ship passed to the marquesses of Monferrato (981) and afterwards to the marquesses of Vasto (1054); Savona was even then obliged to recognize a certain protectorate of the Republic of Genoa. From 1191 till 1215 it was a free commune. In 1238 it became subject to Genoa, but succeeded later on several occasions in gaining its independence (1238–51; 1318–1418). In 1525, the Genoese through jealousy obstructed its port. In 1745 it was bombarded by the English; the following year it was taken by the King of Sardinia, who restored it to Genoa, whose fortune it thenceforward shared. In 1809 Pius VII was imprisoned there by the French; he returned there in 1816 to crown the Madonna della Misericordia. Savona is the birthplace of Pope Sixtus IV and Julian II, as also of the poet Gabriele Chiabrera.

The See of Savona derives from that of Vadam Sabbatium, now a small village three miles from Savona. The first known bishop was Benedict (680); Bishop Bernard in 992 established the monastery on the island of Bersezzi, after the sea had been transferred to Savona; Blessed Amicus (1049) reformed the canons. Giosalonius (1085), previously Archbishop of Ferrania, founded by Marquese Boniface of Savona (1097), was selected as Archbishop of Milan, but was opposed by others and passed his days in continued turmoil; Blessed Vidone Lomello was present at the Lateran Council of 1179; Ambrogio del Cerrato (1191) induced the marques, his brother, to grant independence to the Comune of Savona; Blessed Alberto di Novara had frequent conflicts with the commune, which took possession of the property of the Church; Enrico Ponsoni (1288) made peace with the neighbouring cities. In 1327 the city adhered to the anti-papal League of V, for which it was put under interdict for several years; Antonio Viale, a soldier rather than a bishop, had trouble with the Genoese who kept him imprisoned at Noli; later, he avenged himself by having the doge, Antoniott Adorno, deposed; Vincenzo Viale (1413) was famous for his erudition; Jacopo della Rovere (1504) is said to have died because he was not made a cardinal. In the sixteenth century the Republic of Genoa destroyed, without compensation, many churches and religious places to make way for fortifications. As the cathedral, constructed by Julius II, was amongst these, the canons in 1550, of their own accord, occupied the church of the Conventuals, who were absent that day, and the latter were deprived of their church till 1589, when the new cathedral was completed. Bishop Gio. Batt. Centurione (1592) was distinguished by his zeal in introducing reforms; Francesco M. Spinola (1632) had frequent disputes with the Genoese government, but died exiled; Domenico M. Gentile (1775) restored the seminary; Vinc. M. Maggiolo (1804) entertained Pius VII for several years; Agostino M. de’ Mari (1833), a zealous pastor, instituted evangelical works. In 1820 the Diocese of Noli, the ancient Naumium, was united to Savona. That diocese had been separated from Savona in 1259 at the request of the Republic of Genoa. The first bishop was Filippo (1248); among his successors may be mentioned the pious and gifted Barnabite Paolo Andrea Borelli (1700) and Benedetto Solaro, O.P. (1778), a supporter of the Synod of Pistoia. Savona is suffragan of Genoa and contains 60 parishes with 88,000 inhabitants, 170 secular and 75 regular priests, 9 educational institutions for boys and 15 for girls.

SAVONAROLA

Church of Madonna della Misericordia, Savona

SAVONAROLA

Savonarola, Girolamo, b. at Ferrara, 21 September, 1452; d. at Florence, 23 May, 1498. The Dominican reformer came from an old family of Ferrara. Intellectually very talented he devoted himself to studies, and especially to philosophy and medicine. In 1474 while on a journey to Faenza he heard a powerful sermon on repentance by an Augustinian and resolved to renounce the world. He carried out this decision at once and entered the Dominican Order at Bologna without the knowledge of his parents. Feeling deeply the widespread depravity of the era of the Renaissance, as is evident from the poem "On the Decline of the Church", which he wrote in the first year of his monastic life, the young Dominican devoted himself with great zeal to prayer and ascetic practices. In the monastery at Bologna he was entrusted with the instruction of the novices. He here began to write philosophical treatises based on Aristotle and St. Thomas Aquinas. In 1481 or 1482 he was sent by his superior to preach in Florence. In this centre of the Renaissance he immediately opposed with great energy the pagan and often immoral life prevalent in many classes of society. He was at the court of Lorenzo de Medici. Savonarola's sermons made no impression, for his method and mode of speaking were repulsive to the Florentines; but this did not discourage his reforming zeal. He preached in the other cities of Italy during the years 1482–89. At Brescia, in 1486, he explained the Book of Revelation and from that time became more and more absorbed in Apocalyptic ideas concerning his own era, the judgment of God which threatened it, and the regeneration of the Church that was to follow. At the same time he was filled with an intense zeal for the salvation of souls, and was ready to risk all in order to combat wickedness and to spread holiness of life. In 1489 he returned to Florence which was to be the scene of his future labours and triumphs as well as of his fall.

In August, 1490, Savonarola began his sermons in the pulpit of San Marco with the interpretation of the Apocalypse. His success was complete. All Florence thronged to hear him, so that from his sermons in the cathedral he acquired a constantly growing influence over the people. In 1491 he became prior of the monastery of San Marco. He made manifest his feelings towards the ruler of Florence by failing to visit Lorenzo de Medici, although the Medici had...
always shown themselves generous patrons of the monastery. Lorenzo took no notice of this but continued his benefits, without however changing the opinion of the new prior. Savonarola began at once with the inner reform of the monastery itself. San Marco and other monasteries of Tuscany were separated from the Lombard Congregation of the Dominican Province and were reformed into independent congregations. Monastic life was reformed in this new congregation by rigid observance of the original Rule. Savonarola, who was the vicar-general of the new congregation, set the example of a strict life of self-mortification; his cell was bare; his clothes were the commonest; he ate only one meal a day; and he lived in the poorest part of the city. The lay brothers were obliged to learn a trade and the clerics were kept constantly at their studies. Many new brethren entered the monastery; from 50 the number of the monks of San Marco rose to 238, among them being members of the first families of the city.

Meanwhile Savonarola preached with burning zeal and rapidly won great influence. He was looked upon and venerated by his followers as a prophet. His sermons, however, were not free from extravagance and vagaries. Without regard to consequences or the moral, staining the reverse and pleasure-seeking life of the Florentines, so that a very large part of the inhabitants became temporarily contrite and returned to the exercise of Christian virtue. Both his sermons and his whole personality made a deep impression. He bitterly attacked Lorenzo the Magnificent as the promoter of paganized art, of frivolous living, and as the tyrant of Florence. Nevertheless, when on his death bed, Lorenzo summoned the stern preacher of morals to administer spiritual consolations to him. It is said that Savonarola demanded as a condition of absolution that Lorenzo restore its liberties to Florence; which, however, the latter refused to do. This has since been a matter of dispute. 1493 Savonarola spoke with increasing violence against the abuses in ecclesiastical life, against the immorality of a large part of the clergy, above all against the immoral life of many members of the Roman Curia, even of the wearer of the latter's gown, Alexander VI, against the wickedness of princes and courtiers. In prophetic terms he announced the approaching judgment of God and the avenger from whom he hoped the reform of Church life. By the avenger he meant Charles VIII, King of France, who had entered Italy, and was advancing southwards. Savonarola now produced its results. Lorenzo's son Pietro de Medici, who was hated both for his tyranny and his immoral life, was driven out of the city with his family.

The French king, whom Savonarola at the head of the Florentines had visited at Pisa, now entered the city. After the king's departure a new and peculiar constitution, a kind of theocratic democracy, was established at Florence, based on the political and social doctrines the Dominican monk had proclaimed. Christ was considered the King of Florence and placed the laws of its liberties. Savonarola was named the representative of all the citizens, became the governing body of the republic and the law of Christ was to be the basis of political and social life. Savonarola did not interfere directly in politics and affairs of State, but his teachings and his ideas were authoritative. The government of the city of San Marco was reorganized. Many persons brought articles of luxury, pictures, cards, ornaments, pictures of beautiful women, the writings of pagan and immoral poets, etc., to the monastery of San Marco; these articles were then publicly burned. A brotherhood founded by Savonarola for young people encouraged a pious Christian life among its members. Sundays some of this brotherhood went about from house to house and along the streets to take away dice and cards from the citizens, to exhort luxuriously dressed married and single women to lay aside frivolous ornament. Thus arose an actual police for regulating morality, which also carried on its work by the objectionable methods of spying and denunciation. The principles of the severe judge of morals were carried out in practical life in too extreme a manner. Success and popularity with the people were often recklessly passionate, more and more daring. Florence was to be the starting point of the regeneration of Italy and the Church. In this respect he was constantly looking for the interposition of Charles VIII for the inner reform of the Church, although its loose life and vague extravagant ideas of this monarch in no way fitted him to undertake such a task.

These efforts of Savonarola brought him into conflict with Alexander VI. The pope, like all Italian princes and cities, with the exception of Florence, was an opponent of the French policy. Moreover, Charles VIII had often threatened him with the calling of a reform council in opposition to him. This led Alexander VI to regard all the more dubiously the support that Florence under the influence of Savonarola gave the French king. Furthermore the Dominican preacher spoke with increasing frequency in the Curia. On 25 July, 1495, a papal Brief commanded Savonarola in virtue of holy obedience to come to Rome and defend himself on the score of the prophecies attributed to him. Savonarola excused himself on the plea of impaired health and of the dangers threatening him. By a further Brief of 8 September the Dominican was forbidden to preach, and the monastery of San Marco was restored to the Lombard Congregation. In his reply of 20 September, Savonarola sought to justify himself, and declared that, as regards his teaching, he had always submitted to the judgment of the Church. In a new papal Brief of 16 October the pope threatened the union of the monastery of San Marco with the Lombard Congregation was withdrawn, Savonarola's conduct was judged mildly, but the prohibition to preach, until his vindication at Rome, was maintained.

In the meantime Savonarola had again entered the pulpit on 11 October in order to rouse the Florentines against Pietro de Medici, and on 11 February the Signoria of Florence actually commanded the Dominican to preach again. Savonarola now resumed his sermons on 17 February and was thus unjustifiably accused of insubordination to ecclesiastical authority. In seven sermons he violently lashed the crimes of Rome thereby increasing the passionate excitement at Florence. A schism threatened and the pope was again forced to interpose. On 7 November, 1496, the Dominican monasteries of Rome and Tuscany were formed into a new congregation, the first vicar of which was Cardinal Carafa. Even then Savonarola refused obedience and again during the Lenten season of 1497 preached with uncontrolled violence against the Church in Rome. On 12 May, 1497, he was excommunicated. Under the date of 19 June he published a letter 'against the excommunications' obtained fraudulently obtained and sought to show that the judgment against him was null and void. The Florentine ambassadors at Rome probably hoped to prevent any further measures on the part of the pope, but their hopes were unfounded, especially as Savonarola became more defiant. Notwithstanding the condemnation he celebrated Mass on Christmas Day and distributed Holy Communion. Moreover, disregarding an archiepiscopal edict, he began again on 11 February, 1498, to preach at the Cathedral and to demonstrate that the sentences against him were void. Even at this juncture the pope desired to act with gentleness, if the obstinate monk would submit, but the latter remained defiant and with his adherents set
about calling a council in opposition to the pope. He drew up letters to the rulers of Christendom urging them to carry out this scheme which, on account of the feuds of the Florentines with Charles VIII., was no longer beyond possibility.

In Florence itself the opposition to Savonarola grew more powerful, and an adversary from the Franciscan Order offered to undergo the ordeal by fire in order to prove him in error. Savonarola himself did not want to take up the challenge, but some of his ardent adherents urged him to do so. He declared himself ready for it. The ordeal for both sides was to take place on 7 April, 1498, before a large public gathering. Everything was ready for the test, but it did not take place. Two people now turned against Savonarola. There were outbreaks, and the monastery of San Miniato was attacked. The papal legate and a number of the Dominican brethren, Domenico da Pescia, were taken prisoners. The papal delegates, the general of the Dominicans and the Bishop of Isernia, were sent to Florence to attend the trial. The official proceedings, which were, however, falsified by the notary, started. The captured monks were tortured: Savonarola's following in the city fell away. On 22 May, 1498, Savonarola and two other members of the order were condemned to death "on account of the enormous crimes of which they had been convicted". They were hanged on 25 May and their bodies burnt. In the beginning, from Milan was filled with repentence, and self-sacrifice for the regeneration of religious life. He was led to offend against these virtues by his fanaticism, obstinacy, and disobedience. He was not a heretic in matters of faith. The erection of his statue at the foot of Luther's monument at Worms as a reputed "foreswear of the Reformation" is entirely unfounded. Among his writings mention should be made of: "Triumphus Crucis de fidei veritate" (Florence, 1497), his chief work, an apologia for Christianity; "Compendium revelationum" (Florence, 1495); "Selveta di prediche e scrizii", ed. Villari-Casanova (Florence, 1898); "Trattato circa il Reggimento di Firenze", ed. Riani (Florence, 1848); further letters edited by Marchese in the "Archivio storico italiano", App. XIII (1850); poems edited by Riani (Florence, 1847). The "Dialogo della verità" (1497) and fifteen sermons were placed later on the Index.

J. P. KIRSCH.

SAVOY (Ital. SAVOIA; Fr. SAVOIR), a district in the south-eastern part of France that extends from the Lake Geneva to south of the River Arc, and forms to-day the French Departments of Savoie and Haute-Savoie. The House of Savoy which at the present time rules the Kingdom of Italy takes its name from this country. Savoy, the Roman Sabaudia, was inhabited in antiquity by the Celtic Allobroges who were conquered by the Romans in the first century before Christ. It was later on a great feudal principality. When in 1437 the kingdom of the Germanic Burgundians, with Worms as its capital, was destroyed by the Hunnic hordes, King Gundikar and the greater number of his people were killed. With the permission of the Roman general Étius, the remainder of the Burgundians, with Gundioc as their ruler, settled in Sabaudia, as allies of the Romans, and after the fall of the Roman power they established a new kingdom which, to the west of the fifth century, extended over the entire basin of the Rhone as far as the Rhine in the Mediterranean. In 532 Savoy was incorporated along with this Burgundian kingdom in the Frankish empire. During the supremacy of the Franks the Franks people changed from Arianism to Catholicism. In the ninth century the Empire of the Franks was divided into two parts, and the counts of Savoy fell to the Kingdom of Arles, or Lower Burgundy, which was founded in 879 by Count Boso of Vienne. Together with this territory it passed in 930 to the Kingdom of Upper Burgundy, established in 857 by the Guelph Rudolph between the Swiss Jura Alps and the Rhine; and in 974 to the House of Savoy, direct heirs, and bequeathed his land to the German Emperors Henry II and Conrad II who were related to him. After Rudolph's death Conrad II maintained his claim to the country against Odo of Champagne, the candidate whom a number of Burgundian spiritual and secular lords set up for the throne. In these struggles much aid was given the German ruler by a Burgundian noble, Count Humbert White Hands of Savoy; for these services the count was rewarded with large gifts of land. The ancestors of this Humbert came apparently from eastern Saxony, not from northern Italy. The immediate ancestors of the family are the brothers Amadeus and Humbert, who are mentioned in the second half of the tenth century. The oldest possessions of the line of Savoy were the counties of Maurienne (the upper valley of the River Arc), Savoy, the district between Arc, Savoie, and the middle course of the Rhone, and also others, with Burgundy as a chief town. In the tenth century there was added to this territory the valley of Aosta, the Tarantaise (the upper valley of the Isère), and Chablais (the district on the Rhone between Martigny and Lake Geneva). About 1050 Humbert's son Odo married Adelaide, the oldest daughter and heiress of Count Manfred of Turin, and by this marriage the House of Savoy gained large possessions in Italy, particularly the greater part of Piedmont, while at the same time the possessions east and west of the Alps were joined together. Odo's second son, Amadeus II, aided his brother-in-law, the Emperor Henry IV, while his eldest son, Conrado, fought for the Emperor in return for which Henry resigned to him the secular administration of five Italian dioceses. After the death of his mother Adelaide, Humbert II took possession of the Italian inheritance (1091). His son Amadeus III joined the Second Crusade and died in 1149 on the Island of Cyprus. He was succeeded by his son, Count Odo II, who was an adherent of Frederick I in his struggle for controled the pope, maintained a certain supremacy over his brothers. Of all the brothers only Thomas II (d. 1259) left any male heirs; his sons Thomas III and Amadeus V were the founders of the two lines of Savoy and Piedmont that were reunited in 1383.

Amadeus V (1235-1293), who inherited Savoy, obtained in 1290 the secular governorship of the city of Geneva. He accompanied Henry VII on his expedition to Italy, and was, as a reward, made a prince of the empire (1311). He was succeeded by his sons Edward (1323-29) and Aymon (1329-39). The latter's English marriage to the Queen of England and the marriage of Aymon's son Amadeus VI (1343-83), called the "Queen Count" because of the colour of his ensign at tournaments, was a famous warrior who fought over half of Europe and in 1368 battled against the Turks in Greece; he won Vaud, Oex, and parts of the dioceses.
GIROLAMO SAVONAROLA

FRA BARTOLOMMEO, MUSEUM OF ST. MARK, FLORENCE
of Ivrea and Verceil, and made a law that his territories should never be divided and that the succession should be by primogeniture. In order to form a barrier against the increasing influence of the French kings the Emperor Charles IV in 1361 separated Savoy from Arles and appointed Amadeus imperial vicar for Arles (until 1378). Amadeus VII (1353–91), the "Red Count", gained Nice, Ventimiglia, and Chiavenna.

Amadeus VIII (1391–1434), known as the antipope Felix V (q. v.), was made a duke by Emperor Sigismund in 1416; in 1422 he received the County of Geneva in fief, and in 1426 gained Verceil and feudal supremacy over Montferrat. Under his weak and ill-managed administration the power of Savoy declined. Amadeus IX the Fortunate (1465–72) left the government to his wife Yolande, sister of the French king Louis XI, who was also regent for her minor son Philip II (1372–82). French influence increased in Savoy and involved the country in the wars between France and the emperors. Philip II (1497–1504) inclined in politics more to the Austrian and Spanish side; this was also the policy of Charles III (1504–53). The latter received Asti in 1530 from his brother-in-law, the Emperor Charles V, but in 1534 lost Geneva, in 1536 Vaud and the southern shore of the Lake of Geneva as far as the Swiss cantons of Berne, Freiburg, and Valais, and in 1536 he was driven out of Savoy and Piedmont by the French king. The Truce of Nice in 1538 left the French in possession of their conquests, and Charles retained only Cuneo, Asti, and Verceil. However, his son Emmanuel Philibert (1533–80) regained nearly all his territories in 1559 by the Peace of Cateau-Cambrésis; in 1564 he concluded the Treaty of Lausanne with the Swiss Confederation, in agreement with which he recovered Chablais, but renounced his claim to Geneva and the Vaud. He acquired Tenda and Oneglia, founded the University of Turin, and replaced the feudal system by an enlightened absolutism which afterwards became a model for Europe.

Emmanuel I the Great (1580–1630), son of Emmanuel Philibert, sided in politics sometimes with Spain and the emperor, sometimes with France, according as he hoped to gain the greater advantage. In 1588 he concluded the Marquessate of Salzburg to which France also laid claim, and retained it in the Peace of Lyons (1601) as the ally of Philip of Spain. In return, however, he was obliged to concede the provinces of Gex, Bresee, and Vablony to France. During this reign Chablais, which had become almost entirely Catholic by dint of a degree of religious freedom which was regained for the Catholic Faith by the labours of St. Francis of Sales (q. v.). The ambition of Emmanuel I even led him in 1619 to aim at the imperial crown. On account of his claims to Montferrat, which in 1536 had fallen to Mantua, he took part in the War of the Mantuan Succession (1522–30). His son Victor Amadeus I (1603–37) by the treaty of peace obtained parts of Montferrat, but was obliged to yield Pinerolo and the valley of Peroea to France. In 1635 he supported the French army in the struggle with the emperor for the Duchy of Milan.

Charles Emmanuel II (1635–75), a prince fond of art and anxious for the prosperity of his people, came into possession of the lands of the counts of Geneva, a branch of the House of Savoy. Victor Amadeus II (1675–1730), son of Charles Emmanuel, refused in 1690 to bring an army to the aid of Louis XIV against the alliance of the Tyrol, England, Spain, and the Netherlands; in return the French seized Savoy and Piedmont. When in 1696 the duke withdrew from the alliance by an independent treaty he received from France not only all that had been lost but also Pinerola and Peraea. Consequently in the War of the Spanish Succession Victor Emmanuel at first was a partisan of Louis XIV, but in 1703 he joined Austria and its confederates. Upon this the French took possession once more of his centurion, theilly of Eugene of Savoy (a member of the Cen- nian branch of the family) at Turin in 1706 freed Piedmont from the enemy. In the Peace of Utrecht in 1713 the duke recovered Savoy and Nice from the French, while the emperor gave him Montferrat from the Spanish inheritance, parts of the Duchy of Milan, and the Island of Sardinia.

In 1718 he was obliged to abandon Sicily to Austria and accept in return the much less valuable island of Sardinia, but in consideration of this he was acknowledged as king by Spain. The House of Savoy now took the title of King of Sardinia from the island of that name, although the islands of Sardinia and Corsica formed its chief possessions. Henceforth the history of Savoy is in general the same as that of the Kingdom of Sardinia (q. v.). During the French Revolution Savoy was occupied by the French, and by the Treaty of Nice in 1796 was surrendered to France together with Nice.

It was restored to Sardinia by the Congress of Vienna. In the war of 1859 with Austria Lombardy fell to Piedmont, but in 1860 King Victor Emmanuel II was obliged to cede Savoy and Nice to France in return for the aid that Napoleon III, in accordance with the secret treaty of Plombières (1858), had given him in his war. Thus the former imperial and royal lands of the Italian royal family belong to-day to the French, much to the vexation of the Italians.

Joseph Lins.

SAXE.-Jean de.-For a long time two astronomers of the Middle Ages were confused under the name of Jean de Lignères. (1) Joannes Danko, or Danderow de Saxonia, composed (1297) the "Notulæ super compatum"; there is also in Paris a copy of the Canones of Jean de Lignères made by him (1232).

(2) Jean de Cournoualler, called de Saxoniae, was likewise a disciple and great admirer of Jean de Lignères, and made a number of astronomical and astrological works. In 1327 he drew up the "Canones super tabulas Alfonsi regis Castellei", of great and lasting fame; in 1331 he reviewed the "Introductio ad judicia astronomia" of Al-Kabībī (Alchabitius). In 1355 he composed a table of numerical computation on the "Canones" of Jean de Lignères, later on his own Parisian practice in the use of astronomical tables. The "Canones in tabulæs Alfonsi" were printed following the "Alfonso Tables" in 1433. The "Scriptum super Alkabiti" was published at Venice, 1483, 1491, 1502, 1503, added in Paris in 1520.

Pierre Duhem.

Saxe-Altenburg, one of the Saxon dukedoms in the east of Thuringia, situated on the west frontier of the Kingdom of Saxony. It has an area of 511 sq. miles, and consists of two parts (separated by the mountainous part of the younger branch of the Reuss family), the
Ostkreis (254 sq. miles) and the Westkreis (267 sq. miles). It contained 216,312 inhabitants in 1910; 206,508 in 1905, including 5,449 Catholics (3 per cent), 200,511 Protestants, and 131 Jews. The duchy became a separate state in 1826, when in consequence of the extinction of the Saxe-Gotha line (1821), its possessions were divided among the Saxon ducal line and the territory of Coburg. Duke Ernest II (b. 1871) has ruled since 1902. The present duchy was separated from the former Burgraviate of Altenburg, which belonged to the ancestral estates of the House of Saxe-Meissen, by the partition treaty of 1485, to which is to be traced the division of the House of Saxe to the present Saxe-Gotha line, ruling over the various Thuringian states, and the Albertine Line, ruling in the Kingdom of Saxony. Altenburg fell to the Ernestine Line. A special Duchy of Saxe-Altenburg was founded in 1803, but, on the extinction of the ruling family (1872), the territory fell to Saxe-Gotha.

The inhabitants of the territory constituting the modern duchy were prevalently Protestant from the beginning of the Reformation movement. The few Catholics in the duchy are mostly immigrants who settled there during the latter half of the nineteenth century in the Saxon-Westphalian line and constitute only 0.14 per cent of the population. Catholic services have been held in the city of Altenburg by priests from Leipzig (Kingdom of Saxony) since the third decade of the nineteenth century—in the beginning only at long intervals. Since 1890 Altenburg has had its own priest, and to-day Catholic services and religious instruction are held in seven places in the duchy, partly by priests from the Principality of Reuss and the neighbouring Prussian territories. By a Rescript of the Propaganda of 27 June, 1869, the Catholics of the duchy were placed under the Bishop of Paderborn, and by Decree of 3 June, 1871, the Bishop of Paderborn exercised his Apostolic mission in the Kingdom of Saxony. There are no legal provisions governing the relations between the Catholic Church and the State, the government usually conforming to the principles observed in the Kingdom of Saxony. The public primary schools are all Evangelical-Lutheran; there is a Catholic private school (220 pupils in 1910) in the town of Roeten, at which the State has granted a subsidy since 1909. The erection of a private Catholic elementary school in the city of Altenburg (120 Catholic children under obligation to attend school) has not yet materialized of the State funds. The Catholics are mostly poor immigrant factory hands.

SAXE-COBURG AND GOtha, one of the Saxon-Thuringian duchies, has an area of 751 sq. miles and two chief divisions, the Duchy of Coburg (216 sq. miles) and the Duchy of Gotha (541 sq. miles). These divisions are separated from each other by a portion of Saxe-Meiningen and a strip of land belonging to Prussia (Kreis Schleswig). In 1910 the territory had 257,308 inhabitants; in 1905 its population of 242,432 included 3897 Catholics (2 per cent), 237,187 Evangelicals, and 714 Jews. The two duchies were united in 1826, but each territory has still its own constitution, diet, administration, jurisdiction, and education. Only for certain specified kinds of business do the diets hold a common session. Apart from the separation of the two states, and the marked difference in the extent of their Crown lands, which greatly influences questions of taxation, racial differences also contribute to keep the states separate, the inhabitants of Saxe-Gotha being of Saxon stock and the inhabitants of Saxe-Coburg of Frankish.

The two duchies originated in the division of the ancestral estates of Duke Ernest the Pious (d. 1875), the founder of all the Saxon ducal lines (except the grand-ducal line of Saxe-Weimar-Eisenach), among his seven sons. With Duke Maximilian I, who had become a Catholic at Rome in 1807, the line of Saxe-Coburg became extinct (1821), and, after long disputes concerning the succession, the territory of Coburg fell to the House of Coburg-Saalfeld in 1826. Members of the ruling house of Coburg-Gotha ascended the thrones of several European countries during the nineteenth century; by his marriage with Queen Victoria (1840), Prince Albert became the founder of the present royal family of Great Britain; by his marriage with hereditary King of Belgium in 1831, the Belgian branch of the House of Saxe-Coburg becoming Catholic. The line of the House of Saxe-Coburg and Gotha (often called Coburg-Kohary), founded through the marriage of Prince Ferdinand with the heiress of the Hungarian princely House of Kolyary (1816), is also Catholic.

A son of this marriage, Ferdinand, was the founder (1837) of the dynasty which ruled in Portugal until 1910; a grandson, also named Ferdinand, became in 1887 hereditary Prince, and in 1909 King (Tsar) of Bulgaria. In the Duchy of Saxe-Coburg and Gotha the main line has been following the English branch; Duke Charles Edward (b. 1884), son of the Duke of Albany and grandson of the Prince Consort Albert and Queen Victoria, has reigned since 1889 (until 1905 under a guardian).

In the old Catholic days the territory of the present Duchy of Gotha belonged to the Archdiocese of Mainz, the episcopal jurisdiction being exercised by the coadjutor bishop living at Erfurt. The Reformation destroyed all Catholic life, and it was only at the end of the eighteenth century that a small Catholic community was again formed in the town of Gotha, the repressive measures being unimportant. These were taken care of by the Franciscans of the Saxon province. Though accorded paroch rights in 1807, this community had not a special priest until 1857. In 1868 all Catholics in the Duchy of Gotha were assigned to the parish of Gotha. The relations between the Catholic Church and the State were fixed in one-sided fashion by the "Regulativ für die kirchliche Verfassung der römisch-katholischen Glaubensge nossen im Herzogtum Gotha" of 23 August, 1811; regulations were therein made for the state supervision of the entire ecclesiastical life, for the establishment of the ruler's place, etc. The validity of this "Regulativ" has been maintained by the Catholic Church. On the reorganization of the German sees at the beginning of the nineteenth century the Catholics of Gotha were assigned to no diocese. At the desire of the Government of Gotha, expressed through the medium of Prussia, the Catholics of the duchy were assigned to the Diocese of Paderborn by papal Decree of 13 Dec., 1835. The publication of this Decree, however, was forbidden by the Government of Gotha, because the Bishop of Paderborn refused to recognize the validity of the "Regulativ" of 1811, and the sovereign prerogatives of the duke in ecclesiastical matters and attempts at settlement. The dispute continues to the present day, the bishop being allowed to discharge episcopal functions in the duchy only after securing the permission of the Government. The duke and diet grants a small annual subsidy (about $200) for Catholic objects. The right to build churches is reserved to the State, so that the administration of church property is controlled by the State. There are no special legal regulations concerning religious orders; the Sisters of St. Elizabeth (Grey Sisters) from Breslau have an establishment in the duchy.

The territory of the Duchy of Coburg was ecclesiastically subject to the Diocese of Würzburg until the Reformation, after the inauguration of which the few
remaining Catholics were ministered to by the Benedictines from the Monastery of Bans (on the Main). At the end of the eighteenth century a small Catholic community was again formed in Coburg. The relations between Church and State were regulated here also in a partial manner by the "Herzoglich-Coburgische Regulativ für die kirchliche Verfassung der katholischen Gemeinden" of 20 October 1812. This "Regulativ" has also failed to find recognition from the Church. At the request of the Archbishop of Bamberg, the Catholics of the Duchy of Coburg were assigned to that see; the duke refused, however, to give his consent to the Decree, pending the results of the negotiations then being conducted by Germany, pointing out that the formation of a new diocese (Frankfort Conferences), but offered no objection to the provisional assignment of priests and the provisional exercise of episcopal jurisdiction in the duchy. There has been no change in these relations to the present day. The priests take an oath to uphold the constitution. In 1868 all the Catholics of the duchy were assigned to the parish of Coburg; the parish priest has for some years received a small annual allowance from the State (about $125). No church tax may be levied. Religious orders which care for the sick are free to enter without State permission. The question of the recognition of the children of mixed marriages is left open in both parishes; until 1900, however, the principle religio sequitur secum was applied to such children. The public elementary schools of both parishes are Evangelical-Lutheran, although religious supervision has been abolished since 1863, and a complete separation of Church and State thus effected. Private Catholic elementary schools exist in Gotha (since 1857; 100 pupils in 1910) and Coburg (since 1807; 100 pupils in 1910).

HEINRICH SACHSER.

Saxe-Weimar-Eisenach, a grand duchy in Thuringia, also known in recent times as the Grand Duchy of Saxon. It has an area of 1,397 sq. miles, and consists of three non-contiguous parts: Weimar (678 sq. miles); Eisenach (465); and Neustadt (224). In 1910 the grand duchy had 417,166 inhabitants; in 1905 it had a population of 385,095, including 18,049 Catholics (5 per cent), 367,789 Protestants, and 1412 Jews. Like the other Saxon-Thuringian minor states, the grand duchy originated in the partitions among the House of Saxe-Gotha, of the last of which the family of the House of Saxe-Wettin was a branch. The House of Saxe-Wettin divided in 1485 into the Ernestine and Albertine lines. John Frederick the Magnanimous, of the former line, lost in the Wittenberg Capitulation of 1547 (see SAXONY), in addition to his electoral dignity, his estates with the exception of Thuringia. Even under the sons of John Frederick Thuringia began to be divided up into separate principalities. Since the division of 1672 the Ernestine line is represented by two main branches—the Weimar (now the grand ducal) line which rules in Saxe-Weimar-Eisenach, and the Gotha line, from which three ducal lines have issued, ruling Saxe-Coburg-Gotha, Saxe-Meiningen, and Saxe-Altenburg respectively. The Weimar line also divided into three branches—the lines of Weimar, Jena, and Eisenach; the last two lines however became extinct, so that the three duchies were reunited in 1741. The best-known ruler of the grand-duchy is Charles Augustus (1758-1828), who made Weimar the intellectual centre of Germany by attracting to his court the most famous Germans of his day; the poets Goethe, Schiller, Wieland, and Herder shed lustre on his reign. In the war between Prussia and France (1806) Charles Augustus first espoused the cause of Prussia, but to save his domains or to join the Reichs-Rat formed by Napoleon after the defeat of Prussia
at Jena (14 Oct., 1808). In consequence of the Congress of Vienna (1815) Prussia surrendered to Saxe-Weimar a territory of 16,718 square miles with 78,000 inhabitants—including Neustadt, which had previously belonged to the Kingdom of Saxony, and the Catholic Eisenach Highlands. On 31 April, 1815, Duke Charles Augustus received the title of grand duke. In the Austro-Prussian War of 1866 Saxe-Weimar supported Prussia as a member of the North German Confederation, and in 1871 became a federal state of the German Empire. William Ernest (b. 1876) has been the reigning grand duke since 1901.

Before the Reformation of the sixteenth century, the territories constituting the present grand duchy were ecclesiastically speaking, under the Benedictines and secular priests of the city of Erfurt, which remained a secular possession of the Archbishop of Mainz until 1802, when it fell to Prussia. Duke Ernest Augustus II (1748–56) of Weimar erected a chapel for his Catholic soldiers, so that they could not be deprived of the presence of the archbishop at Erfurt. Catholic Divine Service was inaugurated in 1795 for the Catholic students of the University of Jena. The spiritual care of the students was entrusted to the French priest Gabriel Henry, who had been expelled to leave France on the outbreak of the Revolution, because he refused to take the oath of the civil constitution of the clergy demanded by the French National Assembly. After the battle of Jena, Napoleon, at the request of Father Henry, proclaimed the political and religious equality of Catholics and Protestants; it was also due to Father Henry that the declaration of the various German states on joining the Rheinbund contained the article concerning the equality of Catholics and Protestants. Through Father Henry's exertions the first Catholic parish in Jena was established in 1808; it was endowed by Napoleon, and all the Catholics of the territory were assigned to it. In 1819 the seat of the parish was transferred to Weimar. In 1815 Prussia surrendered to Eisenach Highlands to the grand duchy. Until 1802 this territory, entirely Catholic, had belonged to the immediate ecclesiastical domain of Fulda; it contained nine parishes, united in the deanery of Geisa.

To-day (1911) the grand duchy contains altogether 14 Roman Catholic deaneries, 21 priests, and about 30 churches, all of which are subject to the deanery of Geisa. The Sisters of Mercy from Fulda have establishments in four places; the Sisters of St. Elisabeth (Grey Sisters) from Breslau have a house at Eisenach. Male religious orders are forbidden to open houses in the grand duchy, but the agreement of the grand ducal government, the grand duchy was placed under the ecclesiastical jurisdiction of the Diocese of Paderborn by the Bull "De salute animarum" of 16 July, 1821; the Bull "Provida solvere" of 16 Aug., 1821, placed the nine parishes of the deanery of Geisa under the Diocese of Fulda; but it was only in 1829 that the grand ducal government recognized the jurisdiction of the Bishop of Fulda over these parishes. In answer to the petition of the Bishop of Fulda (17 Dec., 1850), the whole grand duchy was placed under his jurisdiction by brief No. 134, dated 8th February, 1857. The ecclesiastical jurisdiction of the Bishop of Fulda in the grand duchy is recognized by the Government only after the receipt of an announcement of his entry into office and of a written guarantee (a bond), in which the bishop promises to observe all the grand ducal rights and powers, and promises, in the name of his Catholic subjects, fidelity, homage, and obedience. The State has regulated the conditions of the Catholic Church in a parry, in virtue of the law of 1 Oct., 1823; these conditions have not been substantially changed by the laws of 6 May, 1857, and 10 April, 1895. "For the preservation and exercise of the rights of the State, which, as regards the Catholic Church, its goods, and servants, are derived from the secularization of the North German Confederation, and as the state maintains order", there exists an "Immediatekommission für das katholische Kirchen- und Schulwesen" (Commission for the Catholic Church and Schools) immediately responsible to the Government; to this must be referred all matters in which the cognizance, agreement, confirmation, etc., of the Archbishop are expressly required. Purely dogmatic decrees and decrees relating to the domestic discipline of the Church and not affecting the State are excepted.

In the course of time custom has given rise to the state regulations that all episcopal ordinances, papal briefs etc., in so far as they affect the grand duchy, must be laid before the Government for inspection before promulgation or delivery, and that spiritual precepts may not be published without the ruler's placet, except they be of purely moral or dogmatic import. Until 1857 processions outside the church and churchyards and to places of pilgrimage were forbidden. Parochial positions and religious service are administered by the bishop with the approval of the grand duchy, in so far as the right of patronage does not pertain to the latter alone. In every parish and succursal church there is a church directorate, which consists of the pastor and two Catholic parishioners, and is entrusted with the administration of the church property, the maintenance of buildings, etc. For a long period the territorial dean (Landdechant), the pastor of Geisa, had to visit each pastor and church once annually, and forward a report of his visitation to the Immediatkommission. Should the bishop wish to make a visitation in person, he must first inform the territorial ruler of his purpose, whereupon it is decided whether or not a secular counsel shall be co-ordinated with the visitation. As regards the children of mixed marriages and change of religion the law of 10 April, 1895, decrees that the children must follow the religion of the father, even when he changes his religion. As a result, the change of religion of the father does not affect the denomination of the children who are more than twelve years old. The father can also agree to the training of the children in the religion of the mother, although not before the birth of the first child and only by means of a declaration before the courts. Persons in the same capacity who have been married for less than five years may choose their own denomination. Whoever wishes, after the completion of his eighteenth year, to leave the Catholic or Evangelical Church, must first declare his intention to the proper clergyman, who will instruct him as to the importance of the step, and draw up an attestation of the declaration. The declaration of secession must be made before the courts.

The school system is regulated by the law of 24 June, 1874, in the form published on 5 December, 1903. The public primary schools are maintained by the political community or a special school community. They are denominational—the Catholic or Evangelical according as either creed is in the majority. Only in one place (Dernbach) is there both a Catholic (170 pupils in 1910) and an Evangelical division of the public primary school. In Geisa there are Catholic and Jewish divisions in the public primary schools, thanks to the tolerance of the Catholic Church, which is not permitted in the Evangelical division. In six places, where the Catholics are in a minority (Weimar, Eisenach, Apolda, Jena, Neustadt on the Orla, and Weida), there are Catholic private primary schools, to which the State grants no subsidy. Negotiations between the Catholic primary schools and the Supreme School
Board are effected through the medium of the Imperial commission for the Catholic Church and Catholic Schools.

conflict with the Franks living on the Rhine. The Frankish king Clovis (481-511) united the various Frankish tribes, conquered Roman Gaul, and with his people accepted Christianity. The new Frankish kingdom was able to bring all German tribes except the Saxons under its rule. At that time the pope and the Emperors of the Holy Roman Empire were not yet Christian. For more than a hundred years there was almost uninterrupted warfare between Frank and Saxony. Many Anglo-Saxon Christian missionaries sought to convert the Saxons, some were killed, some driven away; the names of only a few of these men have been preserved, as St. Swithun, St. Ethelbert, the saint called Brother Ewald, St. Lebuin, etc. St. Boniface also preached without success among the Saxons. The Saxons were finally brought under Frankish supremacy by the great Frankish ruler, Charlemagne, after a bloody struggle that lasted thirty years (772-804). Charlemagne was also able to win them to Christianity, the Saxons being the last German tribe that still held persistently to belief in the Germanic gods. At different times the Saxons wars of Charlemagne have been called "religious wars" and the assertion, which cannot be proved, has been made that Pope Adrian had called upon Charlemagne to convert the Saxons by force. Charlemagne's campaigns were intended mainly to punish the Saxons for their annual marauding expeditions to the Rhine, in which they burned churches and monasteries, killed the priests, and sacrificed their prisoners on the altars. The authority built at that time which cannot be proved that Charlemagne had the conquest of the Saxon districts in view is 776. It is evident that if peace was to be permanent the overthrow of the Saxons must be accompanied by their conversion to Christianity. The necessity for this was based also on the nature of the Frankish kingdom in which politics and religion were inseparably united. At the same time it is true that various measures taken by Charlemagne, as the execution of 4500 Saxons at Verden in 782 and the hard laws issued to the subjugated, were short-sighted and cruel. The Church, however, cannot be made responsible in any case for this policy of Charlemagne's which it never approved. Although the opposition in the Saxon territories to Christian teaching had been obstinate only a few decades before, the Saxons grew accustomed to the new life. The Christian conception of life sank deep into the hearts of the people, and in little more than a hundred years the Saxons were part of the Christian, German civilization among the Slavonic tribes. The work of converting Saxony was given to St. Sturmi, who was also the first Bishop of Bremen, and his Anglo-Saxon companions. After St. Sturmi's death (779) the country of the Saxons was divided into missionary districts, and each of these placed under a Frankish bishop. Parishes were established within the old judicial districts. The Frankish king Charlemagne and his nobles large numbers of churches and monasteries were founded, and as soon as peace and quiet had been re-established in the different districts, permanent dioceses were founded. The Medieval Duchy of Saxony. — When the Frankish kingdom was divided by the Treaty of Verdun (843) the territory east of the Rhine became the East Frankish Kingdom, from which the present Germany has developed. A strong central authority was lacking during the reigns of the weak East Frankish kings of the Carolingian dynasty. Each German tribe was free to make its own laws, and the relations of the Normans from the north and of the Slavs from the east, consequently the tribes once more chose dukes as rulers. The first Saxon duke was Otto the Illustrious (800-912) of the Ludolfing line (descendants of Liudolf); Otto was able to extend his power over Thuringia. Otto's son Henry was elected King of Germany (919-936); Henry is justly called the real founder of the German Empire. His son Otto I (936-973) was the first German king to receive the title of Emperor from the pope; he was crowned by Pope John XII in 962. Otto I was followed as king and emperor by his son Otto II (973-983), who was succeeded by his son Otto III (983-1002); both the kings last mentioned vainly endeavoured to establish German authority in Italy. The line of Saxon emperors expired with Otto II (1002-1024), who was succeeded by his brother Henry. Henry I had been both King of Germany and Duke of Saxony at the same time. Mainly for the sake of his ducal possessions he had carried on a long and difficult struggle with the Slavs on the eastern boundary of his country. The Emperor Otto I was also for the greater part of his reign Duke of Saxony. Otto I fought the Slavonic territory on the right bank of the Elbe and Saale under German supremacy and Christian civilization. He divided the region he had acquired into several marches, the most important being: the North Mark, out of which in the course of time the present kingdom of Prussia developed; the Boxtel Mark, and the Mark of Meissen, from which has sprung the present Kingdom of Saxony. Each march was divided into districts, not only for military and political purposes but also for ecclesiastical: the central point of each district was a fortified castle. The first of these castles were plain buildings of wood or rubble-stone. Otto I laid the basis of the organization of the Church in this territory, that had been won for the German race and Christianity, by making the chief fortified places which he established in the different marches the seats of the bishops. The Ottomans emperors also aided much in bringing to Christianity the great Slavonic people, the Poles, who lived on the right bank of the Oder, as for a time the Polish country was under German suzerainty. Unfortunately the promising beginnings of Christian civilization among the Slavs were largely destroyed by the violence of the Slavonic rebellions in the years 950 and 1060. In 960 Otto I had transferred the ducal authority over Saxony to a Count Hermann, who had distinguished himself in the struggle with the Slavs, and the ducal title became hereditary in Count Hermann's family. This old Duchy of Saxony, to which was added the former dukedom of Saxe-Wittenberg, became the centre of the opposition of the German princes to the imperial power during the era of the Franconian or Salian emperors. With the death of Duke Magnus in 1106 the Saxon ducal family, frequently called the Brabant line, became extinct. The last Elector of Saxony (1106-55) gave the Duchy of Saxony to Count Lothair of Supplinburg, who in 1125 became King of Germany, and at his death (1137) transferred the Duchy of Saxony to his son-in-law, Duke Henry the Proud, of the princely family of the Guelphs. The hundred years of war waged by the family of Guelph against the Hohenstaufen emperors is famous in history. The son of Henry the Proud (d. 1139) was Henry the Lion (d. 1195), who extended German authority and Christianity into the present Mecklenburg and Pomernia, and re-established Christianity in the territories devastated by the Slavic revolts. Henry the Lion refused to aid the Emperor Frederick I Barbarossa in his campaign against the cities of Lombardy in 1178, subsequently in 1180 the bann of the empire was proclaimed against Henry at Würzburg, and 1181 the old Duchy of Saxony was cut up at the Diet of Geinhausen into many small portions. The greater part of it fell to the Elector of Saxony as the Duchy of Westphalia, to the Archbishop of Cologne. The Saxon bishops who had before this possessed sovereign authority in their territories, though under the suzerainty of the Duke of Saxony,
were now subject only to the imperial government; the case was the same with a large number of secular duchies and counties. The Diet of Gelnhausen is of much importance in the history of Germany. The Emperor Frederick executed here a great legal act. Yet the splitting up of the extensive country of the Saxons into a large number of principalities subject only to the imperial government was one of the causes of the existence of petty states which proved so disadvantageous to Germany in its later history. The territory of the old duchy never again bore the name of Saxony; the large western part acquired the name of Westphalia. However, as regards customs and peculiarities of speech, the present Frederick Lowenfeld at Gelnhausen is as familiar for the districts on the lower Elbe, that is, the northern part of the present Province of Saxony, Hanover, Hamburg, etc., in distinction from Upper Saxony, that is, the present Kingdom of Saxony, and Thuringia. From the era of the conversion of the Saxons up to the revolt of the sixteenth century, a rich religious life was developed in the territory included in the medieval Duchy of Saxony. Art, learning, poetry, and the writing of history reached a high degree of perfection in the many monasteries. Among the most noted places of learning were the cathedral and monastery schools of Corbie, Hildesheim, Paderborn, and Münster. This era produced architecturally fine churches of the Romanesque style that are still in existence, as the cathedrals of Goslar, Soest, and Brunswick, the chapel of St. Bartholomew at Paderborn, the collegiate churches at Quedlinburg, Königsberg, Gernrode, etc., Hildesheim, which contains much Romanesque work, has especially fine churches of this style. The cathedrals at Naumburg, Paderborn, Münster, and Osnabrück are striking examples of the Transition period. Only a few of these buildings still belong to the Catholic Church.

After the dissolution of the medieval Duchy of Saxony the name Saxony was first applied to a small part of the ancient duchy situated on the Elbe around the city of Wittenberg. This was given to Bernard of Ascania, the second son of Albert the Bear, who was the founder of the Mark Brandenburg, from which has come the present Kingdom of Prussia. Bernard's son, Albert I, added to this territory the lordship of Lauenburg, and Albert's sons divided the possessions into Saxe-Wittenberg and Saxe-Lauenburg. When in 1356 the Emperor Charles IV issued the Golden Bull, the fundamental law of the empire which settled the method of electing the German emperor, the Duchy of Wittenberg was made one of the seven electorates. The duke as elector thereby received the right to elect, in company with the other six electors, the German emperor. In this way the country, though small in area, obtained an influential position. The electoral dignity had connected with it the right of primogeniture, that is, only the oldest son could succeed as ruler; this excluded the division of the territory among several heirs and consequently the disintegration of the country. The importance of this stipulation is shown by the history of most of the German principalities which were not electorates. The Ascanian line of Saxe-Wittenberg became extinct in 1422. The Emperor Sigismund bestowed the country and electoral dignity upon Margrave Frederick the Valiant of Meissen, a member of the Wettin line. As was mentioned above, the Margrave of Meissen had been for three generations the Elector of the Catholic Church. His son and successor, Henry the Pious (d. 1541), was won over to Protestantism by the influence of his wife Catherine of Mecklenburg, and thus Saxe-Meissen was also lost to the Church. Henry's son and successor Maurice was one of the most conspicuous persons of the Reformation period. Although a zealous Protestant, ambition and desire to increase his pos-
sessions led him to join the emperor against the members of the Smalkaldean League. The Capitulation of Wittenberg gave him, as already mentioned, the electoral dignity and Saxe-Wittenberg and Saxe-Meissen together, under the authority of the Albertine line of the Wettin family. Partly from resources of state, and partly from the erroneous, Saxon possessions, but moved still more by his desire to have a Protestant head to the empire, Maurice fell away from the German Emperor. He made a treaty with France (1551) in which he gave the Dioceses of Mts, Toul, and Verdun to Lorraine to France, and secretly shared in all the private conspiracies against the emperor of whom he was appointed a faithful adherent. In 1552 he even led an imperial army against the emperor who only escaped capture by flight; and during the same year the emperor was obliged by the Treaty of Passau to grant freedom of religion to the Protestant Estates. Maurice died in 1553 at the age of thirty-two. His brother and successor Elector Augustus took the Dioceses of Merseburg, Naumburg, and Meissen for himself. The last Bishop of Merseburg, Michael Heiding, called Sidozias, died at Vienna in 1561. The emperor demanded the new bishop, but the Elector Augustus forced the election of his cousin Alexander, who was only eight years old, as administrator; when Alexander died in 1565 he administered the diocese himself. In the same manner after the death of Bishop Pfug (d. 1564), the last Catholic bishop of Naumburg, the electorate confiscated the Diocese of Naumburg and forbade the exercise of the Catholic religion. Those cathedral canons who were still Catholic were only permitted to exercise their religion for ten years more.

In 1581 John of Hugwitz, the last Bishop of Meissen, resigned his office, and in 1587 became a Protestant. The episcopal domains fell likewise to Saxony. The church of Naumburg became a cathedral. During the reigns of the Elector Augustus (d. 1586), and Christian (d. 1591), a freer form of Protestantism, called Crypto-Calvinism prevailed in the duchy. During the reign of Christian II (d. 1611) the chancellor, Crell, who had spread the doctrine, was overthrown and beheaded (1601) and a rigid Lutheranism was reintroduced, and with it a religious oath. The great religious war called the Thirty Years' War (1618–48) occurred during the reign of Elector John George (1611–56). In this struggle the elector was at first neutral, and for a long time he would not list the Magazines of Upper and Lower Lusatia as a Bohemian fief, and the condition of the Church lands that had been secularized was not altered. The Swedes, however, revenged themselves by ten years of plundering. The Treaty of Westphalia of 1648 took from Saxony forever the possibility of extending its territorial possessions. The lower course of the Elbe, and confirmed the preponderance of Prussia. In 1653 the direction of the Corpus Evangelicorum fell to Saxony, because the elector became the head of the union of the Protestant Imperial Estates. Under the following elections religious questions were not so prominent; a rigid Lutheranism remained the prevailing sect, and the practices of the church were not prohibited. About the middle of the seventeenth century Italian merchants, the first Catholics to reappear in the country, settled at Dresden, the capital, and at Leipzig, the most important commercial city; the exercise of the Catholic religion, however, was not permitted by them.

A change followed when on 1 June, 1807, the Elector Frederick Augustus I (1694–1733) returned to the Catholic faith and in consequence of this he was soon afterwards elected King of Poland. The formation of a Catholic parish and the private practice of the Catholic Faith was permitted at least in Dresden. As the return of the elector to the Church aroused the fear among Lutherans that the Catholic religion would be restored, Frederick Augustus I, the last Elector of Saxony, was deposed and exiled. He was referred to a government board, the Privy Council, the authority over the Lutheran churches and schools which, until then, had been exercised by the sovereign; the Privy Council was formed exclusively of Protestant. Even after his conversion the elector remained at the head of the Congregation of Saxony, did his Catholic successes until 1806, when the Confederation dissolved at the same time as the Holy Roman Empire. His son, Elector Frederick Augustus II (1733–63), was received into the Catholic Church on 28 November, 1712, at Bologna, Italy, while heir-apparent. With this conversion, which on account of the excited state of feeling of the Lutherans population had to be kept secret for five years, the ruling family of Saxony once more became Catholic. Before this, individual members of the Albertine line had returned to the Church, but they had died without issue, as did the last Elector of Saxe-Weissenfels, a collateral line founded in 1657, and the last Elector of Saxe-Adolphus of Saxe-Weissenfels (d. 1746). Another collateral line founded in 1557 was that of Saxe-Naumburg-Zeitz, which became extinct in 1759. Those who became Catholics of this line were Christian Augustus, cardinal and Archbishop of Gran in Hungary (d. 1725), and Maurice Adolphus, Bishop of Leitmeritz in Bohemia (d. 1759). The most zealous promoter of the Catholic Faith in Saxony was the Austrian Archduchess Maria Josepha, daughter of the Emperor Joseph I, who in 1719 married Frederick Augustus, later the second elector of that name. The first architect of the new Catholic Church, the Italian architect, Chiavi, in the Roman Baroque style; this is still the finest and most imposing church edifice in Saxony and is one of the most beautiful churches in Germany. Notwithstanding the faith of its rulers, however, Saxony remained entirely a Protestant country; the few Catholics who settled there remained without any political or civil rights.

When in 1806 Napoleon began a war with Prussia, Saxony at first allied itself to Prussia, but afterwards joined Napoleon and entered the Confederation of the Rhine. Elector Frederick Augustus III (1763–1827) took the title of King of Saxony as Frederick Augustus I.

III. THE KINGDOM OF SAXONY.—The new kingdom was an ally of France in all the Napoleonic wars of the years 1807–13. At the beginning of the great War of Liberation (1813) the king sided neither with Napoleon nor with his allied opponents, but united his troops with those of France when Napoleon threatened to treat Saxony as a hostile country. At the Battle of Leipzig (16–18 October, 1813), when Napoleon was completely defeated, the greater part of the Saxon troops deserted to the allied forces. The King of Saxony was taken as a Prussian prisoner to the Castle of Friedrichsfeld near Berlin. The Congress of Vienna (1814–15) took from Saxony the greater part of its land and gave it to Prussia, namely 7,000 square miles with about 500,000 inhabitants; this ceded territory included the former Duchy of Saxony-Meissen, the former counties of Merseburg and Naumburg, a large part of Lusatia, etc. What Prussia had obtained, with addition of some old Prussian districts, was formed into the Province of Saxony. The Kingdom of Saxony had left only an area of 873 square miles with a population at that era of 1,500,060 inhabitants; it was made a member of the German Confederation that was founded in 1815. King John (1854–73)

sided with Austria in the struggle between Prussia and Austria as to the supremacy in Germany. Consequently in the War of 1866, when Prussia was successful, the independence of Saxony was once more in danger. In 1870, the Kaiser and then the German Emperor saved Saxony from being entirely absorbed by Prussia. The kingdom, however, was obliged to join the North German Confederation of which Prussia was the head. In 1871 Saxony became one of the states of the newly-founded German Empire. King John was followed by his brother King Albert (1873-1902); Albert was succeeded by his brother George (1902-04); the son of George is King Frederick Augustus III (b. 1865). Prince Maximilian (b. 1870), a brother of the present king, became a priest in 1896, was engaged in parish work in London and Nuremberg, and since 1906 has been a professor of canon law and liturgy in the University of Freiburg in Switzerland.

The Kingdom of Saxony is the fifth state of the German Empire in area and third in population; in 1905 the average population per square mile was 772.8. Saxony is the most densely peopled state of the empire, and indeed of all Europe; the reason is the very large immigration on account of the development of manufactures. In 1910 the population amounted to 5,302,485; of whom 218,033 were Catholics; 4,250,598 Evangelical Lutherans; 14,697 Jews; and 231,165 of other denominations. The Catholic population of Saxony owes its present numbers largely to immigration during the nineteenth century. Catholicism that can be traced back to the period before the Reformation is found only in one section, the governmental department of Bautzen. Even here there is no continuous Catholic district; but there are a number of villages where the population is almost entirely Catholic, and two cities (Ostritz and Schirgiswalde) where Catholics are in the majority. It should also be mentioned that about 1.5 per cent of the inhabitants of Saxony consists of the remains of a Slavonic tribe called by the Germans Wends, and in their own language "Serboi". These Wends, who number about 120,000 persons and live in Saxony and Prussian Lusatia, are entirely surrounded by a German population; consequently owing to German influence the Wendic language, manners, and customs are gradually disappearing. Wends are found in the Kingdom of Saxony; of these about 12,000 belong to the Catholic Church; some fifty Wendic villages are entirely Catholic. There is also a large Wendic population in the city of Bautzen, where among 30,000 inhabitants 7,000 are Wends.

The Vicariate Apostolic of Saxony, and the Prefecture Apostolic of Saxony Upper Lusatia. — As regards the Catholic Church the Kingdom of Saxony is divided into two administrative districts: the Vicariate Apostolic of Saxony, and the Prefecture Apostolic of Saxony Upper Lusatia. The vicariate Apostolic includes the hereditary lands, that is, those portions of Saxony which before 1835 belonged to the Electorate of Saxony, of which the Treaty of Vienna of 1815 did not take from the country; the vicariate also includes the Duchy of Saxo-Altenburg, and the two principalities of Reuss. The Prefecture Apostolic of Lusatia includes the former Margravate of Lusatia, which in 1635 was separated from Bohemia and given to Saxony; since the Treaty of Vienna of 1815, however, this ecclesiastical district comprises only that part of Upper Lusatia that has remained Saxony, the present fifth Saxony administrative Department of Bautzen. Since the adjustment of the parishes in 1904 the Vicariate Apostolic of Saxony comprises (in the principalities of Reuss and Saxo-Altenburg), 26 parishes and 7 expositories, with, in 1909, 55 priests; Upper Lusatia comprises 16 parishes, of which 7 are Wendic, and 2 expositories, with altogether 30 priests. The clergy are educated at the Wendic seminary at Prague, the capital of Bohemia; this seminary, which was founded in 1740 by two Wends, was originally intended only for Lusatia but now is used for the whole of Saxony. Its pupils first attend the gymnasium of Bautzen, where they then proceed to the University of Innsbruck.

The Vicariate Apostolic of Saxony was established in 1763 by Pope Clement XIII; before this the confessors of the electors, who like all the priests in Saxony at that era were Jesuits, conducted the affairs of the Church under the title of superior. The most celebrated of these was Father Carlo Maurizio Vol- tor, an Italian, the confessor of the elector and King Frederick Augustus I. Father Voltor was also a noted diplomatist who had much influence at the Court of Vienna, for example, he had some share in obtaining the title of King of Prussia (1701) for the Protestant Elector of Brandenburg. The first vicar Apostolic was Father Augustin Eggis, S.J.; for some unknown reason he left Saxony after the death of the Elector Frederick Christian (1784). He was followed by Father Franz Herz, S.J., who continued to administer his office after the suppression of the Jesuits in 1773. Dr. Johann Albert Schneider (d. 1818) was appointed vicar Apostolic. In 1816 Dr. Schneider was consecrated titular Bishop of Argis, being the first Saxon vicar to be made a bishop. In the troubled times of 1813-14 he was the true friend and trusted adviser of the royal family; he also administered the last别人的Promotions in Saxony. His successor, Ignatz Bernhard Mauer- mann (d. 1845), had the title of titular Bishop of Pel- lia. In 1831 the canons of the cathedral of Bautzen elected Bishop Mauermann as cathedral dean of Bautzen. After Bishop Mauermann's death this function of the two highest officials in Saxony was dissolved, but since the death of the cathedral dean of Bautzen, Johann Kutschnik (1844), the bishop has held both offices with the exception of the years 1900-04. Bishop Mauermann was succeeded by his older brother Frans Lorens Mauermann (d. 1845) with the title of Bishop of Rama. The next bishop was Johann Dittrich (d. 1853), titular Bishop of Korykus, who in 1844 had been elected cathedral dean of Bautzen; he was followed by Ludwig Forwerk (d. 1875), titular Bishop of Leontopolis.

After the Vatican Council (1869-70) Bishop Forwerk's skill enabled him to drive out the last remnants of Old Catholicism in Saxony at the time when the proclamation of the Dogma of Infallibility led to its development in Germany. He was followed by Frans Bernert (d. 1890), titular Bishop of Azotus, who was succeeded by Dr. Ludwig Wahl (d. 1904), titular Bishop of Cocovus (Coburg). From 1890 this office was not to be exercised in his office on account of serious illness; during this period the Apostolic See appointed the prothonotary, Monsignor Karl Maas, administrator for the vicariate Apostolic, and the canon of the cathedral at Bautzen, Monsignor Georg Wuschanski, as administrator for Upper Lusatia. In 1897 Wuschanski was made Vicar Apostolic of Saxony and titular Bishop of Samos. Bishop Wuschanski died, however, by the end of 1905. In 1906 his place was filled by Dr. Alois Schäfer. Dr. Schäfer was born at Dingelsdraulic in the Eichsfeld (Prussian Province of Saxony) on 2 May, 1855, and in 1858 his parents settled at Chemnitz in the Kingdom of Saxony. In 1878 Dr. Schäfer was ordained priest, and was at first active in parish work; in 1881 he was made professor of exegesis at the lyceum at Dillingen in Bavaria; in 1885 he became professor of New Testament exegesis at the University of Münster in Westphalia; in 1890 he was a professor at the University of Breslau, and in 1903 at the University of Stras- burg. His title is: Titular Bishop of Abila, Vicar Apostolic in the Kingdom of Saxony, Administrator Ecclesiasticus in Saxony Upper Lusatia. The vicar Apostolic is appointed by the pope upon the nomina-
tion of the King of Saxony. According to the Constitution of Saxony the dean of the cathedral at Bautzen is a permanent member of the Upper House of the Saxony diet, but not the vicar Apostolic as such; he is a member of the chapter. The dean is the vicar Apostolic who has already been appointed for the hereditary possessions of Saxony. It should be said, however, that the union of a personal one is the same after as before the union.

At the time of the Reformation Lusatia belonged politically, as has already been said, to Bohemia, i.e., to Austria. Before his resignation the last Bishop of Meissen transferred in 1531, with the approval of the Holy See, the ecclesiastical administration of Lusatia to Johann Leisentritt of Juliusburg, dean of the cathedral chapter of Bautzen, as administrator episcopatus. When the Reformation entered the country Dean Leisentritt was able to keep at least a part of the population faithful to the Catholic Church. Most important of those bodies that remained Catholic were: the cathedral chapter of St. Peter's at Bautzen; the two celebrated Cistercian abbeys for women, Marienthal near Ostrits on the Neisse and Marienstern between the cities of Kamenz and Bautzen; a number of churches that had been in the control of the monasteries, and some other independent towns. The only members of the chapter of St. Peter's at Bautzen that remained Catholic were the dean, the senior, the cantor, and the scholasticus; the provost, who according to the rules of the foundation was elected from the chapter of Meissen, became a Lutheran. Ever since that time the provostship has been granted by the Saxon Government to a Protestant, generally to one of the higher state officials. This secular provost has, however, no connexion whatever with the cathedral chapter; he receives from the government ministry the revenues yielded by the lands belonging to the provostship. The cathedral chapter consists of four resident canons and eight honorary ones; when the position of dean is vacant the power of administration belongs to the cathedral canons; the dean is elected by the regular and honorary canons for four years and is confirmed by the Apostolic See. The Cathedral of St. Peter's at Bautzen is the oldest church in Lusatia, and was built 1215–21; at the end of the fifteenth century it was much altered. Since the Reformation the choir has belonged to the Catholics, and the chapter. The church is divided from the choir by a grating, belongs to the Protestant community. Another church in Bautzen retained by the Catholics is the Church of Our Lady, built in the thirteenth century, in which the services for the Catholic Wends are held. The cathedral chapter has the right of patronage for six Catholic parishes, the right of appointment for the two general rectories for Protestant parishes. The convent of Marienstern, in the Wendish district of Lusatia, was founded in the middle of the thirteenth century, and the convent of Marienthal in the German section, that was founded before 1234, have done much to preserve Catholic life in Lusatia. For hundreds of years the pastoral care of the two convents has been exercised by priests of the Cistercian monastery of Osseg in Bohemia. A pilgrimage church much visited, especially by the Wends, is at Romna. The Wends generally treati between Saxony and Austria of 13 May, 1635, by which Lusatia was transferred to Saxony, the Saxony elector was obliged to grant his special sovereign protection to the Catholic communities of Lusatia and the two convents, the emperor, as suzerain, retaining the supreme right of protection. The Catholics of Lusatia had the right to the free exercise of religion, but in agreement with the earlier legal rights of the State Church, only so far as they belonged to one of the Catholic parishes. Certain parishes of Protestant parishes were obliged to call upon the Protestant pastor of the community for all baptisms, marriages, and burials, or at least must pay for these the customary fees. This compulsion exercised upon the Catholics living in Protestant parishes was not annulled for parishes until 1833.

By a treaty of peace between Saxony and France that was signed at Posen 11 December, 1806, Saxony was made a kingdom and entered the Confederation of the Rhine. This treaty granted the Catholics of Saxony nominally, although not in reality, civil and political equality with the Lutherans. The fifth article of the treaty declared that the Roman Catholic Church services were placed on an absolute parity with the services of the Augsburg and allied confessions, and subjects belonging to both religions were to enjoy equal rights. Now for the first time the bells of the Court Church at Dresden, which had hung silent in the tower for fifty years, could be rung. The concessions to Saxony Catholics made in the convention of 1806 were confirmed by the royal edict of 16 February, 1807, and by the Constitution of the German confederation of 1815 (art. XVI). The religious administration and jurisdiction of the Church, including all matters pertaining to marriage, was defined by the Edict of 19 February, 1827, which is still in force. This edict abrogated for the hereditary territories the compulsory dependence of Catholics on Protestant pastors and created the Catholic Consistory for the administration and jurisdiction of the Church including all matters pertaining to marriage. This consistory is made up of three ecclesiastical and two secular councillors. The vicar Apostolic has the right of nomination for the appointments. A vicarial court was created as, with the exception of Rome, the highest court of appeal; it consists of the vicar Apostolic, two ecclesiastical councillors, one secular Catholic councillor, a legal assistant, and in addition for matters pertaining to marriage two Protestant councillors. At the same time the vicar Apostolic was declared to be simply a special department for Church and school matters under the supervision of the Ministry of the Interior. For the ecclesiastical administration and jurisdiction was placed in the hands of the consistory of the chapter at Bautzen, which consists of the dean, three ecclesiastical councillors and a secular justice. The vicarial court was made the court of appeal. The Constitution of 4 September, 1831, confirmed the ecclesiastical and civil jurisdiction. It was forbidden to establish new monasteries in addition to the two convents of Marienthal and Marienstern already in existence in Lusatia, or to admit into Saxony the Jesuits or other religious orders. It was not until a few years ago that a few Grey Nuns and nuns of St. Charles Borromeo were allowed to settle in Saxony, in all in thirteen places within eight cities. The authority of the State over the Church, the supreme supervision and the right of protection were assigned by the Constitution to the king as jus circus sacra. By the Law of 7 November, 1837, this authority was given to the department of the minister of education and worship, who by the Constitution must always be a Protestant. The administration and use made of the property of the Church is also under the supervision of the State. Money for the needs of the Church beyond what is obtained by the property already in the hands of the Church is obtained from a Church tax laid by the State (law of 2 August, 1878). The tax is raised as a supplementary income tax; the yearly amount of the tax is fixed by the Protestant minister of worship and education, while the Protestants can fix the amount of
their Church tax themselves. In the years succeeding 1870 there was a bitter struggle in most of the German states between Church and State called the Kulturkampf (cultural conflict); during a period of about 30 years, legislation in Saxony concerning the exercise of State supervision. This law contains the greater part of the ordinances which had been up to then in effect, and in its measure for putting the law into action follows the Austrian and Prussian laws of the decade of 1870-1880, that were imitable by the Church. Public church service can only be held in the 37 parishes and independent parishes, and chapels; mission services and religious instruction can further be held at certain periods of time in about sixty places. In addition there are 8 churches and chapels that are private property. Very few church processions are permitted. The approval of the State is necessary for the general decrees of the Church authorities when these in any way encroach upon State or municipal affairs; the State authorities are to decide whether infringement has taken place. The approval of the ministry is necessary for the founding of new churches and institutions for settling the boundaries of parishes, for establishing church service at new stations, in general for new acts of ecclesiastical administration of any kind, which in any way whatever come into contact with national affairs or the ordinary ones of civil life.

The superintendency office, whether in public or private service, permanent or subject to recall, can only be given to a German who has finished the course at a gymnasium, studied three years at a university, and has passed a theological examination for his office. Whoever has been trained at a seminary conducted by the Jesuits or a similar order is excluded. Further, the national Government can reject anyone who has been chosen for an ecclesiastical office, if it believes that he will use his influence against the State laws or ordinances. The State Government is to be notified at once of every vacancy and of every appointment of a spiritual office. As a rule change of religious minority is not permitted before the twenty-first year; before change of faith the convert must notify the pastor of the parish of his intention and may have a four weeks' period of reflection assigned to him; after the expiration of this term the convert can demand a certificate. The Government has no authority to determine for children of mixed marriages, unless the parents have made a legal agreement otherwise before the child is six years old. All the State schools are denominational; they are not established and maintained by the political communities but by special Government departments. In local communities of different faiths the religious minority, if able to do so, can form a new school commune; special religious instruction for the benefit of the religious minority is not given at the expense of the school commune of the majority where that alone exists. Up to the twelfth year Protestant religious instruction is legally permissible for Catholic children. At present a new school law is being prepared, as the School Law of 1873 contains many ordinances that are now out of date; however, the confessional character of the schools and the religious supervision of the schools by the pastor of the respective place is to be retained; but efforts have been and are still made to set aside at least the religious supervision of the schools. As regards Catholic schools there is a preparatory gymnasium in Dresden, a seminary at Bautzen, for training Catholic teachers for the primary schools, that is supported by the cathedral chapter of Bautzen, and 51 Catholic primary schools.

There are about 300 Catholic male teachers and about 20 Catholic female teachers. Special Catholic religious instruction is given at more than one hundred and thirty places where there are only Protestant schools. Only about 15,000 of the 24,000 Catholic school children attend Catholic schools; of the remaining 9000 children about 3500 have no Catholic religious instruction. The pressing necessity of new schools cannot be met at all cost, on account of the lack of money, as most of the Catholic schools have facilities in the country are poor factory hands. On account both of this lack of schools and of the equally great lack of churches, far more than 10,000 Catholics became Protestant during the years 1900 and 1910.

IV. The Prussian Province of Saxony.—The province has an area of 13,931 square miles, and in 1905 had 2,979,221 inhabitants. Of its population 230,860 (7.8 per cent) are Catholic, 2,730,098 (91 per cent) are Protestant; 9981 hold other forms of Christian faith, and 8050 are Jews. During the summer months about 15,000 to 20,000 Catholic labourers, called Sohwangärger, come into the country; they are Slavs from the Prussian Province of Posen, from Russian Poland, or Galicia. The province is divided into the three government departments of Magdeburg, Merseburg, and Erfurt. The Prussian Province of Saxony was formed in 1815 from the territory of Saxe-Merseburg, in a large part of the old Duchy of Saxe-Merseburg, and the addition of some districts already belonging to Prussia, the most important of which are the Altmark, from which the State of Prussia sprang; the former immediate principalities of the Archbishop of Magdeburg and of the Bishop of Naumburg of Prussia had received by the Peace of Westphalia (1648) at the close of the Thirty Years' War; and the Eichsfeld, with the city of Erfurt and its surroundings. Up to 1802 the Eichsfeld and Erfurt had belonged to the principality of the Archbishop of Mainz; a large part of the population had, therefore, retained the Catholic Faith during the Reformation. As regards ecclesiastical affairs the Province of Saxony had been assigned to the Diocese of Paderborn by the papal Bull "De salute animarum" of 16 July, 1821. The province contains three ecclesiastical administrative divisions: the episcopal commissionariat of Magdeburg that embraces the entire governmental department of Magdeburg and consists of four deaneries and 25 parishes; the "ecclesiastical Court" of Erfurt, which includes the governmental Department of Merseburg and the eastern half of the governmental Department of Halle; this consists of 2 deaneries (Halle and Erfurt) and 28 parishes; the episcopal commissionariat of Heiligenstadt, which embraces the western half of the governmental department of Erfurt, that is called the Upper Eichsfeld, and consists of 16 deaneries and 129 parishes.

In local communities that were the fief of Magdeburg which belonged originally to the former Archdiocese of Magdeburg and the Diocese of Halberstadt all Catholic life was not entirely destroyed during the Reformation. Besides fourteen monasteries that continued in existence, there were in Halberstadt a number of benefits in connexion with the cathedral and the collegiate Church of St. Peter and Paul. As the entire native population had become Protestant these monasteries were only maintained by the immigration of Catholics who, from the time of the Treaty of Westphalia, though in small numbers, steadily came into the country; thus there arose around the monasteries small Catholic communities. The monasteries were all suppressed during the great secularisation of the beginning of the nineteenth century, and thirteen parishes were formed, for which the State provided a fund from a part of the property of the monasteries. The other parishes included in the dioceses of Magdeburg were created after the middle of the nineteenth century, when, in consequence of the development of the manufacture of sugar, increasing numbers of Catholics came into the country; the St. Boniface Association gave the money to
found these parishes. In 1905 the governmental Department of Magdeburg contained 76,288 Catholics, that is, 6.25 per cent of the population. The Reformation of the sixteenth century had its origin in the present governmental Department of Merseburg, which includes parts of the old dioceses of Magdeburg, Halberstadt, Merseburg, Naumburg-Zeitz, and Brandenburg; in this region all Catholic life was extinguished. It was not until after the Peace of Westphalia that small Catholic communities arose, from the entrance into the district of miners, merchants, pedlars, etc.; these communities grew especially in the nineteenth century on account of the development of manufactures. The first Catholic church service to be held again in this district was established in 1710 in Halle on the Saale by the Dominicans of the Monastery of St. Andrews at Halberstadt; the first parish was also erected at Halle in 1810; the other parishes were founded by the St. Boniface Association.

In 1905 the governmental Department of Merseburg contained 47,382 Catholics, that is, 4 per cent of the population. The governmental Department of Erfurt is an almost entirely Protestant district in which, during the nineteenth century, scattered Catholics settled near districts which had preserved their faith amid the storms of the Reformation era; these people formed the Eichsfeld and a part of the population of Erfurt and its vicinity. Erfurt was founded in 742 by St. Boniface as the See of Thurigia. The first and only bishop, St. Adelhard, suffered martyrdom in 785 with St. Boniface, and the territory of the diocese was united with the Archdiocese of Magna. From the beginning, however, the archbishops of Mainz had episcopal assistants at Erfurt, who, from early in the fourteenth century, were in reality coadjutor bishops and gradually retained almost the same position as a diocesan bishop. After the suppression of the Archdiocese of Mainz (1803) the Diocese of Erfurt was assigned to the Diocese of Ratisbon, then in 1807 to Corbie, and in 1821 to Paderborn. Up to the present day there is still in existence at Erfurt an ecclesiastical board with certain episcopal powers which is called the "Ecclesiastical Court." Celebrated Catholic churches of Erfurt are the cathedral that was begun about the middle of the twelfth century upon the spot where had stood a church built by St. Boniface; and the Church of St. Severus, erected in the fourteenth century. In 1905 the governmental Department of Erfurt contained 107,190 Catholics, that is, 21.53 per cent of the population; the number of Catholics steadily declines, in 1817 it amounted to 29 per cent. Outside of Erfurt and its immediate vicinity, where the Catholics form 12 per cent of the population, the Catholics in the main live together in communities in the Upper Eichsfeld in the three counties of Heiligenstadt (91 per cent Catholic); Worbis (77 per cent Catholic), and Mühlhausen-Land (49 per cent Catholic). The soil of the Upper Eichsfeld is not productive; it does not offer, therefore, any of the conditions for industrial development, and many of its inhabitants are forced to emigrate. In the Department of Erfurt the collegiate foundation of Nordhausen has also remained Catholic from the early times; in 1811 it was made into a parish. As regards schools, the religious, and the other questions concerning the relations between Church and State, the laws of the Kingdom of Prussia are in force.

SAXONY.

SAXONY, ALBERT OF (ALBERT OF HILDEBRANDT), fourteenth century philosopher; nicknamed Albagus Parvus, Albertius, and Albertilla by the Italian Scholastics of the Renaissance. In 1351 he passed the first examination (determinat) at the University of Paris, where he figured as a member of the English Nation. In the same year he was elected procurator of the English Nation; in 1353 rector of the university; in 1354 he was elected a master of the English Nation; in 1358 he had been one of the representatives of this Nation in the concordat with the Picard Nation. In 1361 the English Nation suggested him for the suburban parish of St. Cosmas and Damian, which depended on the university. In 1368 he still belonged to the faculty of arts at the University of Paris, where he compiled his questions on Aristotle's "De Caelo et Mundo." Owing to their common surname of Albert of Saxony, Albert of Helmstädt has often been confused with Albert, son of Bernard the Rich, of Riemgrast (Diocese of Halberstadt). The latter's name occurs for the first time in connection with the masters of the English Nation at the University of Paris; in 1363 he was rector of the university; in 1365 Rudolf, Duke of Austria, sent him as ambassador to Pope Urban V. In that same year the University of Vienna was founded and through the influence of Rudolf, Albert of Riemerstorff was elected first rector. He was consequently appointed a canon of Hildesheim and (21 Oct., 1366) Bishop of Halberstadt. All the works which we possess under the name of Albert of Saxony belong to Albert of Helmstädt. Some were devoted to logic, others to physics. The study of these books is admirably calculated to inform us on the views current at the University of Paris in the middle of the fourteenth century. The treatises on logic written by Albert of Saxony are devoted to the detailed and subtle dialectic which at the end of the thirteenth century Petrus Hispanus had introduced into the teaching of the Parisian Scholasticism, but they present neither the disorder nor the multitude of empty quibbles which about the same time were introduced into the instruction at the University of Oxford and which became predominant there under the influence of William Heytesbury. Albert of Saxony's treatises on physics consist of a juxtaposition and proportion of the statements of Aristotle's "physics," "De Caelo," and "De generatione et corruptione." These contain, in a clear, precise, and concise form, an explanation of numerous ideas which exercised great influence on the development of modern science, which ideas, however, were not wholly personal to Albert of Helmstädt, many of the most important of them being derived from his master, Jean Buridan. He abandoned the old Peripatetic dynamics which ascribed the motion of projectiles to disturbed air. With Buridan he placed the cause of this motion in an impetus put into the projectile by the person who threw it; the part he assigned to this impetus is very like that which we now attribute to living force. With Buridan he considered that the heavens were not moved by intelligence, but by projectiles, by the impetus which God gave them when He created them. With Buridan he saw in the increase of impetus the reason for the acceleration in the fall of a heavy body. He further taught that the velocity of a falling weight increased in proportion either to the space traversed from the beginning of the fall or to the time elapsed, but he did not decide between these two.

The equilibrium of the earth and motion is the subject of a favourite theory of Albert. The entire terrestrial element is in equilibrium when its centre of
gravity coincides with the centre of the world. Moreover, the terrestrial mass has not everywhere the same density, so that its centre of gravity does not coincide with the centre of its figure. Thus the lightest part of the earth is more distant from the centre of gravity of the earth than the heaviest part. The erosion produced by rivers constantly draws terrestrial particles from the continents to the bottom of the sea. This erosion, and by sweeping out the valleys, has shaped the mountains, constantly displaces the centre of gravity of the terrestrial mass, and this mass is in motion to bring back the centre of gravity of the earth to the centre of its figure. Through this movement the submerged portions of the earth constantly push upwards the emerged parts, which are incessantly being eaten away and afterwards replaced by the submerged parts. At the beginning of the sixteenth century this theory of Albert's strongly attracted the attention of Leonardo da Vinci, and it was to confirm it that he devoted himself to numerous observations of fossils. Albert of Saxony, moreover, ascribed the precession of the equinoxes to the similar very slow movement of the terrestrial element.

His "Tractatus proportionum" went through eleven editions; one bears no date or indication of its origin; three were issued at Padua in 1482, 1484, and 1487; two at Venice in 1487, 1492; two in 1496; two were printed at Venice in 1502 and 1506; finally, an edition without date or printer's name was issued at Paris. The "Subtilissime quœstiones super octo libros Physicorum" were printed at Padua in 1493, at Venice in 1504 and 1518. The "Questiones in Aristotelis libros de Cælo et Mundo" were published at Pavia in 1491, at Venice in 1492 and 1497. The "Questiones in libros de generatione et corruptione", with the commentaries and questions which Gilles of Rome and Marsilius of Inghen had compiled on the same subject, were printed at Venice in 1504, 1505, and 1518. Albert's "Questiones" on the "Physica", the "De Cælo", and the "De Generatione et Corruptione", followed by the questions of Théom and of Buridan on the "De anima", were printed in Paris in 1516 and 1518. The "Questiones super libros posteriorum Aristotelis" were printed at Venice in 1497, the "Sophismata" at Paris in 1499; the "Questiones oblongorum" at Lyons in 1498; the last-named works, joined with the "Insaolubilia", were published at Paris in 1490, 1495, and at an unknown date. In 1496 was printed at Bologna the "Expositio aurea et admodum utilis artem veterem, edita per venerabilem insuperiorem fratrem Guillemum de Ochom cum questionibus Alberti nati et vivi de Saxonia". Finally, the "Logica Alberti" was edited at Venice in 1522.

**Scala Sancta.** (Holy Stairs), consisting of twenty-eight white marble steps, at Rome, near the Lateran; according to tradition the staircase leading once to the praetorium of Pilate at Jerusalem, hence sanctified by the footsteps of Our Lord during his passion. The historians of the monument relate that the Holy Stairs were brought from Jerusalem to Rome about 326 by St. Helena, mother of Constantine the Great. In the Middle Ages they were known as Scala Pilati, the Stairs of Pilate. From old plans it can be gathered that they led to a corridor of the Lateran Palace, near the Chapel of St. Sylvester, were covered with a special roof, and had at their sides other stairs for common use. When Sixtus V in 1589 destroyed the old papal palace and built the new one, he ordered the Holy Stairs to be transferred to their present site, before the Sancta Sanctorum (Holy of Holies). The latter is the old private papal chapel, dedicated to St. Lawrence, and the only remaining part of the former Lateran Palace, receiving its name from the many precious relics preserved there. The Sancta Sanctorum also contains the celebrated image of Christ, "not made by human hands", which on certain occasions used to be carried through Rome in procession. These holy treasures, which since Leo X (1513–21) have not been seen by anybody, have recently been the object of learned dissertations by Grisar and Launer.

In its new site the Scala Sancta is flanked by four other stairs, two on each side, for common use, since the Holy Stairs may only be ascended on the knees, a devotion much in favour with pilgrims and the Roman faithful, especially on Fridays and in Lent. Not a few popes are recorded to have performed this pious exercise: Pius IX, who in 1853 entrusted the Passionist Fathers with the care of the sanctuary, ascended the Holy Stairs on 19 Sept., 1870, the eve of the entrance of the Piedmontese into Rome. Pius VII on 2 Sept., 1817 granted those who ascend the stairs in the prescribed manner an indulgence of nine years for every step. Finally Pius X, on 26 Feb., 1908, granted a plenary indulgence to be gained as often as the stairs are devoutly ascended after consecration and communion. Imitations of the Scala Sancta have been erected in various places, as in Lourdes and in some convents of nuns, and indulgences are attached to them by special concessions.

Scaliger, or, as he was known in Latin, Julius Caesar Scaliger, was a French mathematician, astronomer, and historian. He was born in France as a physician to Antonio de la Rovere, Bishop of Agen, and became a French citizen under the name of Jules César de l'Escale de Bordoni. He took part in the discussion concerning Cicero-nianism and began his career as a humanist by a violent work against Erasmianism, "Oratio pro Cicero contra Erasmum" (Paris, 1531). He defended the absolute perfection of Cicero's style and denounced Erasmus as a mere proof corrector, a parasite, and a pervert. Erasmus kept silence. In 1536 Scaliger issued a still more violent discourse. The two discourses were combined: "Adversus D. Erasmum orationes due eloquentiae romanæ vindices cum suctoris opuscula." (Toulouse, 1581). He wrote a major work in a calmer tone in "De causis linguæ latinae libri XIII" (Lyons, 1540; Geneva, 1580), in which he analyzed the correct style of Cicero and indicated 634 mistakes of Valla and his predecessors. He was the first to attempt a systematic treatise on poetry: "Poetica libri octo" (Lyons, 1540; Basel, 1547; Heidelberg, 1907). The general principles of this work are derived from Aristotle whom he calls "imperator noster; omnium bonarum artium dictator perpetuus". Like Aristotle he makes imitation the basis of all poetry. He spoiled his work by exaggerations; not only does he place Virgil above Homer but he places the Homeric epics below the "Hero and Leander" of Musaeus, a poet of the Byzantine period; it is true that Scaliger identifies him with the legendary Musaeus, a disciple of Orpheus (Poetae, V, 2). He declared that Seneca was not surpassed in grandeur by any of the Greek tragedians. This last opinion was not without its consequences; it explains the excessive liking of Shakespeare, Corneille, and many of their contemporaries for the tragedies of Seneca.

Scaliger is also the author of the following works: "De comicis dimensionibus" (Lyons, 1539); "Exotericarum exercitationum de subtilitate ad H. Cardanum" (Paris, 1537; Basel, 1560); "Poemata" (Geneva, 1574; Heidelberg, 1600); "Epistola et Oratones" (Leyden, 1600). He translated into Latin Aristotle's "Natural History" (Toulouse, 1619), the "Insonнии" of Hippocrates, and wrote commentaries on the treatises on plants of Theophrastus and Aristotle. As a physician he was much interested in botany; he demonstrated the necessity of abandoning the classification of plants based on their properties and of establishing one based on their distinctive characteristics. He was violent, vain, and given to exaggeration. His faults spoiled pleasing natural gifts and wide learning.

Scalig., theologian, better known by his religious name, Andrea di Castellana, from his place of origin in Apulia. He entered the Order of the Conventual Franciscans in the Province of St. Nicholas (Bari), of which he was later appointed provincial. His experience as a missionary in Moldavia, Walachia, and Transylvania, as Prefect Apostolic of Hungary, and as visitor general of the Franciscan missions in Russia led him to the composition of a work which was approved by the general of the order in 1642, and is dedicated to Cardinal Barberini. Missionarius apostolici a Sacra Congregazione de Propaganda Fide constructus quodam debeat inter homines. In the fourth volume, he laid down the principles of Christianity, quoting the Bible and the works of the Fathers. In 1644, he was appointed to the See of Mantua and died in 1647.

Scammon, Ellakim Parker, educator, b. at Whitefield, Maine, U. S. A., 27 Dec., 1816; d. at New York, 7 Dec., 1894. Having received an appointment to the U. S. Military Academy at West Point he made the usual course there and graduated (1837) fifth in a class of fifty-two. He remained at the academy as a tutor in mathematics, having among his pupils the future Generals Grant, Rosecrans, Newton, and other famous army officers. During the Seminole war he saw active service and was one of the General Scott's scouts. In the Mexican War (1846-47), his bravery at Vera Cruz winning him promotion. Just before starting from New York for the war in 1846 he became a convert. From 1847 to 1854 he was attached to the topographical corps surveying the Upper Lakes. In 1856 he left the army. Later he taught mathematics at St. Mary's College and at the Polytechnic College, Cincinnati, Ohio. He took an active part as a volunteer in the Civil War, receiving the commission of brigadier-general on 15 Oct., 1862. He was U. S. Consul at Prince Edward Island from 1866 to 1871, and from 1875 until his retirement (1889), was professor of mathematics at Seton Hall College, South Orange, New Jersey.

Scandal. —This article will treat: I. The Notion of Scandal; II. Its Divisions; III. Its Malice; IV. Cases in Which the Sin of Scandal Occurs.

I. Notion of Scandal. —According to St. Thomas (II-II, Q. lìii, a. 1) scandal is a word or action in which occasions another's spiritual ruin. It is a word or action, that is, an external act—for an internal act can have no influence on the conduct of another—or the omission of an external act, because to omit what one should do is equivalent to doing what is forbidden; it must be evil in itself, or in appearance; this is the interpretation of the words of
St. Thomas: minus rectum. It is not the physical cause of a neighbour's sin, but only the moral cause, or occasion; further, this moral causality may be understood in a strict sense, as when one orders, requests (this is more direct than the term usually is), is indutively scandalous, which some call co-operation in a broad sense), or in a large sense, as when a person without being directly concerned in the sin nevertheless exercises a certain influence on the sin of his neighbour, e.g. by committing a sin in his presence (this is sometimes a species of mediate influence). For scandal to exist it is therefore essential and sufficient, with regard to the nature of the act and the circumstances under which it takes place, that it be of a nature to induce sin in another; consequently it is not necessary that the neighbour should actually fall into sin; and on the other hand, for scandal strictly so-called, it is not enough that a neighbour takes occasion to do evil from a word or action which is not a subject of scandal and exercises no influence on his action; it must be a cause of spiritual ruin, that is of sin, consequently that is not scandal which merely dissuades the neighbour from a more perfect act, as for instance the practice of the sacraments, the more frequent use of the sacraments, etc. Still less can that be considered scandal, which only arouses comment, indignation, horror, etc., for instance blasphemy committed in the presence of a priest or of a religious; it is true that the act arouses indignation, but it is not done, even if only with a view to scandal, of the more frequent use of the sacraments, etc. The act must be scandalous, but this way of speaking is inaccurate, and in strictly theological terminology it is not the sin of scandal. Hence scandal is in itself an evil act, at least in appearance, and as such it exercises on the will of another an influence more or less great which induces to sin. Furthermore, when the action from which another takes occasion of sin is not bad, either in itself or in appearance, it may violate charity (see below), but strictly speaking it is not the sin of scandal. However, some authorities understanding the word scandal in a wider sense include in it this case.

II. Divisions. — (1) Scandal is divided into active and passive. Active scandal is that which has been defined above; passive scandal is the sin which another commits in consequence of active scandal. Passive scandal is called scandal given (scandalum datum), when the act of the scandaliser is of a nature to occasion it; and scandal received (acceptatum), when the act of another scandalises is due solely to ignorance or weakness — this is scandal of the weak (infirmorum), or to malice and evil inclinations — this is pharisaical scandal, which was that of the Pharisees with regard to the words and actions of Christ. (2) Active scandal is direct when he who commits the intention of inducing another to sin; such is the sin of one who solicits another to the crime of adultery, theft, etc. If one prevails upon another to commit the sin not only because of an advantage or pleasure believed to accrue therefrom but chiefly because of the sin itself, because it is an offence to God or the ruin of a person, etc., then the direct action of diabolical scandal. On the other hand scandal is only indirect when without the intention to cause another to fall into sin we say a word or perform a deed which is for him an occasion of sin. III. Malacc. — (1) That active scandal is a mortal sin Christ Himself has taught (Matt. xviii, 6 sqq.) and reason makes evident. If charity obliges us to assist our neighbour's temporal and spiritual necessities (see Alms; Correction) it obliges us still more strongly not to be to him a cause of sin or spiritual ruin. Hence it follows that every sin of scandal is contrary to charity. Moreover (2) direct scandal is obviously contrary to the virtue against which another is induced to sin; in fact every virtue forbids not only its violation by ourselves but also that we should desire its violation by another. (3) Indirect scandal is also contrary to charity (see above); but is it also opposed to the virtue violated by another? St. Alphonsus answers in the affirmative; others, and this seems the true opinion, deny this. In fact no one has hitherto proved that the sin of scandal is contrary to charity, and those who admit it are not consistent with themselves, for they should also maintain, which no one does, that anyone who is indirectly the cause of an injustice by another is also bound to restitution; what is true of justice should hold good for the other virtues.
action we perform; but we must avoid scandalizing the weak if we can do so easily. The application of these principles depends on concrete circumstances, which vary with each case; hence the following rules may be given: (1) To prevent scandalizing another we must never transgress the negative precepts of the natural law, nor its positive precepts in cases where they truly bind; thus it is not permitted to lie to prevent a mortal sin, neither can one neglect receiving baptism to avoid the blasphemies of one's parents. (2) It is not permitted to pass over any precept whatever in order to prevent pharisaical scandal, but we may and even should, in special cases and for one or two occasions, pass over a precept whether Divine or human, to avoid scandalizing the weak. (3) We should, to avoid scandal, forego good or in different works which are not of precept, if we can do so without great inconvenience. (4) Finally, to prevent the scandal of the weak we are sometimes obliged to sacrifice some temporal good of less importance, but we are not bound to do this when the goods are of greater importance.

The monastic formule of profession of the West from the ninth century make no mention of the investment with the scapular. It was only gradually that it became one of the important parts of the monastic habit. Later, like the analubus, it was solemnly presented during the clothing, and the symbolism of the scapular was emphasized in the formula used during this ceremony. Especially the analubus but also the scapular was often called simply cruze (cros) and, in account of its function, it was introduced accordingly. It was thus natural to term the scapular jugum Christi (the yoke of Christ); it was also called scutum (shield), as it was laid over the head, which it originally covered and protected with one portion (from which the hood afterwards developed). (Cf. “S. Dorothae doctrina,” II, 176, 177; Goar, loc. cit.; “Vetus discipl. monast.”, Paris, 1726, formule professionis; Gianius, “Annales ord. Servorum,” 2nd ed., I, Lucca, 1719, 499 sqq., 409 sqq.). In the rules of the religious it is expressly prescribed under penalties that even at night the scapular must be worn, e. g. in the case of the Servites and Carmelites (Mon. Ord. Servorum B. M. V., I, xxi; “Const. s. Bona. junte 1257”; “Mon. hist. Carmel. Const.”, 1324, in Zimmerman, 31: “Statuimus quod frateres in tunica et scapularis dominari supracincti, sub penam gravis culpa!”). For night the Carmelites have now a special smaller scapular which, however, is still much smaller than the so-called great scapular of the Third Order of St. Francis; it measures about twenty inches in length and ten in width. In the Constitutions of the Carmelite Order of 1369 (Cod. Vatic. lat. 3991 fol. 33 v.) it is appointed that each convent shall have a “scapularia” (i.e., a sort of band). In addition: “habeat etiam cum rauba sua parvum scapularium cum tunica ad jacendum” (cf. Wessels, “Analecta Ord. Carmel.”, Rome, 1911, p. 122). Perhaps the smaller scapular for the night is here hinted at or foreshadowed. Perhaps even the small scapular of the confraternity (that for the
I, the Scapular of the Third Orders.—To the first orders have been gradually added the second and third orders and the oblates, who receive the proper habit from the first orders. Early in the Middle Ages numerous lay persons had already joined the Benedictine Order as oblates; these often received from the first order the entire monastic habit, which they wore either constantly in the world or at least during Divine Service. It was regarded as a great grace and privilege to be able to die in a monastic habit, which was frequently given to the dying or placed on the deceased before burial. In the revised statutes of the Oblates of the Benedictine Order, confirmed in 1891 and 1904, it is stated in conclusion: “The Oblates may be buried in the black habit of the order, with scapular and girdle, and the condition provided for in the council of this pious wish” (Beringer, “Die Ablass”, 13th ed., 817; French tr. “Les indulgences”, 3rd. ed., II, 516). In the first Rule of the Third Order of St. Francis of 1221 (also in that of 1269), the investment is fairly exactly described, but there is no mention of a scapular (cf. Sabatier, “Opuscoli de codicilario”, I, Paris, 1903, “Regula antiqua fratrum et sororum de penitentia”, pp. 17 sq., “De modo vestitum”, “Serenic Fastes textus originales”; III, Quaracchi, 1897, pp. 81 sq., “De forma habiti et qualitate indumentorum”). The first Rule of the Third Order of St. Dominie in the first half of the thirteenth century prescribed likewise a formal and complete investment. Here also there is no mention of the scapular. As in the case of the other third orders this made its appearance later, until finally it became usual to wear the scapular under one’s ordinary clothing instead of the full habit (cf. “Bull. di San Domenico”, Rome, 1888, pp. 26 sqq. Concerning the investment of the Oblates, Mantellate, and Bizzocco, see also Giani, “Annales”, 2nd. ed., I, Lucca, 1719, pp. 195, 405 sqq., 626; 2nd. ed., II, Lucca, 1721, pp. 319, 392, 414, 420, 442; “Bullar. di Carmelo”, II, Rome, 1719, 1721, 1775, 1782; III, Rome, 1786, p. 611; Linas, “Bullar. B. M. V. de Mercede”, Barcelona, 1696, p. 15; cp. Potthast, “Regest. Pont. 1.”, (1825 sqq.). By the decree of the Sacred Congregation of Bishops and Regulars of 20 December, 1816, it was declared that the Bizzocco, who lived in the houses of relatives (and thus quite within the way of the ordinary habit), that the religious promise to take the monastic habit, but without surplice, souto, scapulare, and patientia (i.e. without veil, pectoral, and scapular). Later, the wearing of the special habit of an order became unusual, and the constant wearing of such was regarded as a privilege. Gradually, however, the most distinctive article of the monastic habit, the scapular, was given, and is in an ever smaller form. It has thus come to pass that the third orders for the laity, such as those of the Franciscans, Servites and Dominicans, wear to-day as their special badge and habit a “large” scapular, consisting essentially of a plate of wooden cloth about four and a half inches long and two and three-eight inches broad in the case of the Franciscan scapular; much longer and broader in the case of the Carmelite—although no particular length or breadth is prescribed) connected with each other by two strings or bands. The best known scapular is that of the Third Order of St. Francis, or, as it is simply called, the Scapular of St. Francis; it is brown, grey, or black in colour, and has (at least since 1806) one that is a segment of the image of St. Francis and on the other the that of the little church of Portiuncula. For these large scalopars the same general rules hold good as described in detail below in the case of the small scalopars. It is especially necessary that persons and others desire to obtain the indulgences and privileges of the third orders shall wear the scalopars constantly. However, the Congregation of Indulgences expressly declared on 30 April, 1885, that the wearing of the scalopars of smaller form and of the same size as those of the confraternities entitled one to gain the indulgences of the third order (cf. Cons. Leonis XIII, “Misericors Dei Filius”, 30 May, 1883; “Acta S. Sed.”, XV, 513 sqq.; Beringer, “Les indulgences”, 3rd. ed., II, 499 sqq.). III, THE SMALL SCAPULAR.—Like the large scalopars the first and oldest small scalopars originated to a certain extent in the real monastic scalopar which was worn by persons of either sex who devoted themselves to the Servites for instance; many of those who were in a position to do so attached themselves to the third order with vows, but in the case of many others either this was impossible or the idea of doing so had as yet not occurred to them. In this manner, the confraternity of the Servite Order, the Confraternity of the Servi B. Maria Virginis (cf. Giani, “Annales”, I, 2nd ed., Lucca, 1719, p. 162; 1st ed., Florence, 1618, p. 58). Similarly originated the Confraternity of Our Lady of Mount Carmel; that this existed in 1260 is proved by the still extant “Libro degli ordinamenti de la compagnia di Santa Maria del Carmine scritto nel 1260” (edited by Giulio Picini at Bologna, 1867, in “Scelta di Curiosità letterarie”). The members of these confraternities were called the confratres and conserores of the respective orders; they had special rules and participated in the spiritual goods of the order to which they belonged. It is probable also that many of those who could not be promoted to the third order or who were special benefactors of the first order received the habit of the order or a large scalopar similar to that of the oblates, which they might wear when desired and when seemed to be needed. It was only later and gradually that the idea developed of giving to everyone connected with the order the real scalopar of the order in miniature as their badge to be always worn day and night over or under their ordinary clothing. It was now that these confraternities developed into scapular confraternities in the modern sense. On account of the scalopars the faithful resorted ever more to these confraternities, especially after they had heard of the wonderful graces which members had received through the scalopars, and above all when the story of the apparition of the Blessed Virgin and the martyrdom of St. Catherine of Siena was known. Many members of the Scallop Carmel faithfulness until death became known. Consequently, the four oldest small scalopars are likewise the badges of four confraternities, attached respectively to the Carmelites, Servites, Trinitarians, and Mercedarians. Later on the Franciscans gave the members of their third order the large scalopar as its badge, and to their principal confraternity the Scallop Franciscan, likewise assigned to their third order the large scalopar as its badge, and to their principal confraternity the Scallop Franciscan, which was founded also a Franciscan confraternity, the members of which were given as their badge, not a small scalopar, but a girdle. The Dominicans likewise assigned to their third order the large scalopar as its badge, and to their principal confraternity the Scallop Franciscan, which was founded also a Franciscan confraternity, the members of which were given as their badge, not a small scalopar, but a girdle.
the nineteenth century, and gave to its members a small scapular of St. Benedict. An attempt was later made to give the oblates of the Benedictines a larger scapular which could be worn constantly. However, the regulation which was already quoted from the new statutes of the Benedictines Oblates still remains in force.

In the course of time other orders received the faculty of blessing small scapulairs and investing the faithful, although not always connected with a confraternity. Thus originated the Blue Scapular of the Theatines in the seventeenth century, in connexion with which a confraternity was not founded until the nineteenth century. The Fathers of the Precious Blood have a white scapular. The Capuchins have the Scapular of St. Joseph, but without a corresponding confraternity. Similarly the Camillians have the Confraternity and Scapular of Our Lady the Help of the Sick, and the Augustinians the Confraternity and Scapular of the Mother of Good Counsel, in which cases the scapular and confraternity are not inseparably united; finally the Capuchins have the Scapular of St. Joseph, but without a corresponding confraternity. The Lazarists have the Red, and the Passionists the Black Scapular of the Passion. Under Leo XIII originated in Rome the Scapular Confraternity of St. Michael the Archangel, which is attached not so much to an order as to the church in which it exists. Although approved by Leo XIII in 1900, those approved by the Scapular of the Sacred Heart, the Scapular of the Sacred Hearts of Jesus and Mary (both without a corresponding confraternity), and the Scapular of the Immaculate Heart of Mary, which originated in 1877. These complete the list of the seventeen known scapulairs.

The history of the origin of the first four small scapulairs is still to a great extent obscure. It is probable that the revival of the religious life in the sixteenth century (the Counter-Reformation) gave the chief impetus to the development of the scapulairs, as to other institutions and practices (e.g., confraternities and novenas). To assign an exact date to the origin of the first small scapular is still impossible; it appears, however, that the Carmelite scapular antedated all the others, as a prototype well worthy of imitation, and had its origin in the above-mentioned year 1224 prescribed for wearing at night. At the end of the sixteenth century the scapular was certainly widespread, as is clear from the information given by the Carmelite Joseph Falcone in "La Cronica Carmelitana," a book which was published at Piacenza in 1595 (cf. Weseli, "Analecta Ord. Carm.," Rome, 1911, pp. 139 sq.). Before entering into further details concerning the individual scapulairs, we must give the general rules and regulations which apply to all the small scapulairs.

IV. GENERAL ECCLESIASTICAL REGULATIONS CONCERNING THE SMALL SCAPULARS.—The small scapulairs consist essentially of two quadrilateral segments of woollen cloth (not more than two inches wide by two inches long), connected with each other by two strings or bands in such a manner that, when the bands rest on the shoulders, the front segment rests before the breast, while the other hangs down an equal distance at the back. The two segments of cloth need not necessarily be equally large; various scapulairs having the segment before the breast of the above dimensions while the segment at the back is much smaller. The material of these two essential parts of the scapular must be of woven wool; the strings or bands may be of any material, and of any one colour. The colour of the segments of woollen cloth depends on the cloister in which they are worn, which it to a certain extent represents, or on the mystery in honour of which it is worn. Here, however, it must be remarked that the so-called Brown Scapular of the Carmelites may be black, and that the bands of the Red Scapular of the Passion must be of red wool. On either or both of the woolen segments may be sewn or embroidered becoming symbols (emblems or insignia) of a different material. It is only in the case of the Red Scapular that the images are expressly prescribed.

Several scapulairs may be attached to the same pair of strings or bands; each scapular must of course be complete, and must not be more than one and a half inches wide. In many cases the five best-known of the early scapulairs are attached to the same pair of bands; this combination is known as the "fivefold scapular". The five are: the Scapular of the Most Blessed Trinity, that of the Carmelites, of the Sacred Hearts of Jesus and Mary, and the Red Scapular of the Passion. When the scapulars are thus joined together, the bands must be of red wool, as required by the Red Scapular; it is customary to wear the Red Scapular uppermost and that of the Most Blessed Trinity underneath, so that the images especially prescribed in the case of the Red, and the red and blue crosses on the Scapular of the Blessed Trinity, may be visible.

Only at the original reception of any scapular is either the blessing or the investment with such by an authorized priest necessary. When a person needs a new scapular, he can put on an unused one. If the scapular is worn in connection with a confraternity, the blessing and enrolment must take place on the same occasion as the blessing and investment. To share in the indulgences and privileges of a scapular, one must wear it constantly; it may be worn over or under one's clothing and may be left aside for a short time, if necessary. Should one have ceased wearing the scapular for a long period (even through indifference), one gains none of the indulgences, during this time, but, by simply resuming the scapular, one again participates in the indulgences, privileges, etc. Every scapular, which is not merely an object of private devotion (for there are also such) but is also provided with an indulgence, must be approved by the ecclesiastical authorities, and the formula of blessing must be sanctioned by the Congregation of Rites. In this article we speak only of scapulairs approved by the Church.

V. THE SCAPULAR MEDALS.—Since 1910 and the regulation of the Holy Office of 16 December of that year (Acta Apost. Sedis, III, 22 sq.) it is permitted to wear, instead of one or more of the small scapulairs, a single medal of metal. This medal must have on one side a representation of Jesus Christ with His Most Sacred Heart and on the other an image of the Mother of God. All persons who have been validly invested with a blessed woollen scapular may replace such by this medal. The medal must be blessed by a priest possessing the faculty to bless and invest with the scapular or scapulairs, which the medal is to replace. The faculties to bless these medals are subject to the same conditions and limitations as the faculties to bless and invest with the corresponding scapulairs. If the medal is to be worn instead of a number of different scapulairs, it must receive the blessing that would be attached to each of them, i.e., as many blessings as the number of scapulairs it replaces. For each blessing a sign of the Cross suffices. This medal must also be worn constantly, either about the neck or in some other seemly manner, and with it may be gained all the indulgences and privileges of the small scapulairs without exception. Only the small (not the large) scapulairs may be validly replaced by such medals.

VI. THE INDIVIDUAL SMALL SCAPULARS.—A. The Scapular of the Most Blessed Trinity.—The small white scapular, provided with the blue and red cross, is the badge of the members of the Confraternity of
the Most Blessed Trinity. To Innocent III, who sanctioned the Order of the Trinitarians on 28 January, 1198, an angel is said to have appeared, wearing a white garment and on his breast a cross, of which the transverse shaft was blue and the longitudinal shaft red. The Trinitarians were accordingly assigned this as their habit. When later the habit was prescribed especially to members joining closely with their order in confraternities, the Trinitarians gave them as their outward badge the scapular described above. The red and blue cross is essential only on the front segment of woollen cloth which hangs before the breast. Each person who joins the Congregation of the Blessed Virgin must be invested with this scapular and must constantly wear it. The indulgences of this confraternity were last approved by a Decree of the Congregation of Indulgences of 13 August, 1899. The General of the Trinitarians may communicate to other priests the faculty of receiving into the confraternity and of blessing and investing with the scapular (Beringer, "Die Ablässe", 13th ed., 584 sqq.; French tr., 3rd ed., II, 107; cf. Baro Bonav., "Annales Ord. SS. Trinit.").

B. The Scapular of Our Lady of Ransom (B. Mariae Mercedis captivorum). Like the Trinitarians, the Fathers of the Order of Our Lady of Mercy for the Ransom of Prisoners give the faithful a special scapular on their entering the confraternity erected by them. The order was founded by St. Peter Nolasco (d. 1256). The scapular is of white cloth, and bears on the front part, which hangs over the breast, the picture of Our Lady of Ransom. The other part consists simply of a smaller segment of white cloth. The summary of indulgences of the confraternity was last approved by the Congregation of Indulgences on 30 July, 1898 (Reser, auth., S. C. Indulg., pp. 483 sqq., n. 38). The General of the order assigns to the members the faculty of receiving into the confraternity and of blessing and investing with the scapular. In the "Bullar. Ord. B. M. V. de Mercede" (Barcelona, 1896), p. 16, mention is made of a Constitution of Urban IV issued at Viterbo on 25 March, 1265, granting to all persons who wore the scapular of the order (habitum nostrum) in the world many graces and indulgences. We do no more than record this circumstance exactly as it is related in the "Bullarium". However, the encyclical could not have been issued from Viterbo on 25 March, 1265, for Urban IV had already died on 14 April, 1264, before this privilege was given.

C. The Scapular of Our Lady of Mount Carmel is the best known, most celebrated, and most widespread of the small scapulars. It is spoken of as "the Scapular", and the "feast of the Scapular" is that of Our Lady of Mount Carmel on 16 July. It is probably the oldest scapular and served as the prototype of the others. According to a pious tradition the Blessed Virgin appeared to St. Simon Stock (q. v.) at Cambridge, England, on Sunday, 16 July, 1251. In answer to his appeal for help for his oppressed order, she appeared to him with a scapular in her hand and said: "Take, beloved son, this scapular of thy order as a badge of my confraternity and for thee and all Carmelites a special sign of grace; whoever dies in this garment, will not suffer everlasting fire. It is the sign of salvation, a safeguard in dangers, a pledge of peace and of the covenant". This scapular, however, appears for the first time in 1642, when the words of the Blessed Virgin were written in a circular of St. Simon Stock, which he is said to have dictated to his companion, secretary, and confessor, Peter Swanyngton. Although it has now been sufficiently shown that this testimony cannot be supported by historical documents, cf. B. Zimmerman, "Mon. hist. Carmelit." I, Lerins, 1907, pp. 323 sqq.; Louis Saltet in "Bulletin de litt. eccl.", 1911, pp. 24 sqq., 85 sqq.), still its general content remains a reliable pious tradition; in other words, it is credible that St. Simon Stock was assured in a supernatural manner of the special protection of the Blessed Virgin for his whole order and for all who should wear the Carmelite habit; that the Blessed Virgin also promised him to grant special graces to those who should wear her habit in holy fidelity this habit in her honour throughout life, so that they should be preserved from hell. And, even though there is here no direct reference to the members of the scapular confraternity, indirectly the promise is extended to all who from devotion to the Blessed Virgin should wear her habit or badge, like true Christians, until death, and be thus as it were affiliated to the Carmelite Order.

Heresofore no authenticated testimony has been discovered proving that the small scapular was known from the second half of the thirteenth century and was given to the members of the Confraternity of Our Lady of Mt. Carmel. On the contrary there are many reasons for the view that the small scapular, as we now know it and in the form it has certainly had since the sixteenth century, is of much later origin. Zimmerman (Mon. hist. Carmelit., loc. cit.) and Saltet (loc. cit.) give very reasonable grounds for this view: the scapular was very widespread in European countries at the end of the sixteenth century, as is evident from "La cronica Carmelitana" of the Carmelite Joseph Falcone (Piacenza, 1583). In 1600 appeared at Palermo the "Giardino Carmelitano" of the Carmelite Egidio Lemindelica da Sciacca (the approval is dated 1592). Towards the end the author gives, after the formula of benediction for the Fratelli and Sorelle della Compagnia della Madonna del Carmine (who receive the complete habit of the order), the formula for the blessing of the scapular for the Domenitri della Compagnia to other Carmelites (p. 230 sqq.). This is the earliest form of benediction for the small scapular with which we are acquainted. It is noteworthy that the formula for the sisters contains no reference to the scapular, while in that for the brothers there is a special blessing for the scapular (ibid., pp. 228 sqq.).

Nevertheless, even should we admit that the small scapular of Our Lady of Mount Carmel originated even as late as the beginning of the sixteenth century, yet the above promise, which is designated the first privilege of the Carmelite Scapular, remains unimpaired. For this privilege is not so much a promise that all those who out of true veneration and love for the Blessed Virgin constantly wear the scapular in a spirit of fidelity and confiding faith, after they have been placed by the Church itself with this habit or badge under the special protection of the Mother of God, shall enjoy this special protection in the matter and crisis which most concern them for time and eternity. Whoever, therefore, even though he be now a sinner, wears the badge of the Mother of God throughout life as her faithful servant, not presumptuously relying on the scapular as on a miraculous amulet, but truly relying on the power and goodness of Mary, may securely hope that Mary will through her powerful and motherly intercession procure for him all the necessary graces for true conversion and for perseverance in good. Such is the meaning and importance of the first privilege of the Carmelite Scapular. As the Church here expressed in the word: "Whoever wears the scapular until death, will be preserved from hell!". The second privilege of the scapular, otherwise known as the Sabbatine privilege, may be briefly defined as meaning that Mary's motherly assistance for her servants in the Scapular Confraternity will continue until death, and will find effect especially on Saturday (the day consecrated to her honour), provided that
the members fulfill faithfully the not easy conditions necessary for obtaining this privilege (see Sabbatine Privilege).

As regards the external form of the scapular, it should consist of two segments of brown woollen cloth: black, however, is also admissible. This scapular usually bears on one side the image of our Lady of Mount Carmel, but it need not be the image prescribed. The authentic list of indulgences, privileges, and indulgences of the Scapular Confraternity of Mount Carmel was last approved on 4 July, 1908, by the Congregation of Indulgences. It is noteworthy that this summary says nothing of the above-mentioned first privilege, and it says of the Sabbatine privilege is explained in the article on that subject. Concerning the often miraculous protection which Mary on account of this her badge has granted to pious members of the Scapular Confraternity in great peril of soul and body, there exist many records and reliable reports (some of recent times) to which it is impossible to refuse credence. Like the rosary, this scapular has become the badge of the devout Catholic and the true servant of Mary (cf. op. cit.; Beringer, "Les indulgences", 3rd ed., II, 244 sqq.).

II. The Black Scapular of the Seven Dolours of Mary.—Shortly after Alexander IV had sanctioned the Servite Order in 1255, many of the faithful of either sex associated themselves with the order in ecclesiastical confraternities in honour of the Seven Dolours of Mary. The members of this Confraternity of the Seven Dolours of Mary also wore in later times a scapular, which, like the habit of the order, had to be of black cloth. In other respects nothing is prescribed concerning this scapular, although it usually bears on the front portion (over the breast) an image of the Mother of Sorrows. This scapular must likewise be worn constantly, if one wishes to obtain indulgences. The summary of indulgences was last approved by the Congregation of Indulgences on 7 March, 1888. Priests may obtain from the General of the Servites the faculty to receive the faithful into the confraternity and to bless and invest with the scapular (cf. Beringer, "Die Ablässe", 13th ed., pp. 630 sqq.; "Les indulgences"). 3ed ed., II, 277). For the history of the scapular consult especially Giani, "Annales Ord. Servorum B. Marie Virginis", III (2nd ed.), 25.

E. The Blue Scapular of the Immaculate Conception.—The Venerable Ursula Benincasa, foundress of the Confraternity of the Same Name, had received a vision of the Virgin Mary who directed her to have a scapular. The Confraternity was approved by the Congregation of Indulgences on 15 May, 1877. The Superior-General of the Passionists communicates to other priests the faculty to bless and invest with the scapular ("Rescr. auth. S. C. Indulg."). Ratisbon, 1955, pp. 571 sqq., n. 56).

F. The Red Scapular of the Passion.—Its origin to an apparition which Jesus Christ vouchsafed to a Sister of Charity of St. Vincent de Paul in 1846. Jesus Christ showed the sister a scapular, such as is worn, and promised to all who should wear it on every Friday a great increase of faith, hope, and charity. The apparition having been several times repeated, and finally in the following year reported to Pius IX, the latter sanctioned the scapular by a Vescipt 9 May, 1847, and granted the Priests of the Mission (the Lazarists) the faculty of blessing the scapular and investing the faithful with it. His Holiness Bénédict XIV (pp. 574 sqq.) has also issued an encyclical on the same (p. 57).

The Holy Cross and the Scapular are the implements of the Passion, and about it are the words: "Holy Passion
of Our Lord Jesus Christ, save us." On the other
are represented the Hearts of Jesus and Mary, and
above them is the inscription: "Sacred
Hearts of Jesus and Mary, protect us." These
images also are essential to the scapular (Acta S. Sedis,
XXX, 748; Hilgers, "Goldenes Büchlein," 2nd ed.,
p. 192 sqq.; French tr., "Livre d'or," Paris, 1911,
pp. 184 sqq.).
I. The Scapular of the Blessed Virgin Mary under the
title of "Help of the Sick." — In the Church of St.
Magdalene at Rome, belonging to the Clerks Regular
of St. Camillus, a picture of the Blessed Virgin is
specially venerated under the title of Help of the Sick.
This picture is said to have been painted by the
French painter Bassan in Fiesole, and before it Pope St. Pius V is said to have
prayed for the victory of the Christian fleet during
the battle of Lepanto. This picture suggested to a
brother of the Order of St. Camillus, Ferdinando
Vicari, the idea of founding a confraternity under the
invocation of the Mother of God for the poor sick.
He succeeded in his plan, the confraternity being
canonically erected in the above-mentioned church
on 15 June, 1860. At their reception, the members
are given a scapular of black woolen cloth; the port
ion over the breast is a copy of the above picture of
the Virgin, and the back bears the name of St. Joseph
and Camillus, the two other patrons of the sick
and of the confraternity. On the small segment at the back is
sewn a little red cotton cloth; although this receives a separate and special blessing for the sick, it does not constitute an essential portion of the scapular. The
scapular is the badge of the confraternity, which
received indulgences from Pius IX and Leo XIII
in 1860 and 1888; these were last ratified by a
Decree of the Congregation of Indulgences, 21 July,
1883. (Cf. the manual of the archconfraternity,
Rome, 1883; Seberger, "Key to the Spiritual
Treasures," 1897, p. 214.)
J. The Scapular of the Immaculate Heart of
Mary.—This scapular originated with the Sons of
the Immaculate Heart of Mary in 1877, and was
sanctioned and endowed with indulgences by Pius
IX on 11 May of that year. The scapular was later approval by the Congregation of Rites in 1907,
and its form was finally decreed by Pope Pius XII
in 1943. The scapular usually consists of a woolen cloth that is represented the burning heart of
Mary, out of which grows a lily; the heart is inclosed by a wreath of roses and pierced with a
sword.
K. The Scapular of St. Michael the Archangel.—
While this scapular originated under Pius IX, who
gave it his blessing, it was first formally approved
under Leo XIII. In 1878 a confraternity in honour
of St. Michael the Archangel was founded in the
Church of St. Eustachius at Rome, and in the follow
year in the Church of San demás可谓在 Pescheria
(Santi Angeli in foro Fiscum). In 1880 Leo XIII
raised it to the rank of an archconfraternity, which
was expressly called the Archconfraternity of the
Scapular of St. Michael. At first (1878) the confraternity received indulgences from Leo XIII for
seven years; the summary of indulgences of the
Pious Association of St. Michael was last approved for every five years: of the confraternity grant 23, March, 1903. The scapular is so associated with the confraternity that each member is invested with it. The formula for blessing and investing with the scapular, given in the Rituale Romanum, was first approved by the Congregation of Rites on 23 August, 1863. In outward form this scapular is different from the others, inasmuch as the two seg
ments of cloth have the form of a small shield; one is made of blue, and the other of black
and, of the bands likewise one is blue and the other black. Both portions of the scapular bear the well-known representation of the Archangel St.
Michael slaying the dragon, and the inscription 
"Quis ut Deus" ("Libretto di aggregazione alla pia
Unione di S. Michele Arcangelo in S. Angelo a
O. The Scapular of the Most Sacred Heart of Jesus.—The constant wearing of a small picture of the Heart of Jesus was already recommended by Blessed Margaret Mary Alacoque, who herself made and distributed them. They were made of a small piece of cloth or cotton on which was a picture either embroidered or sewed in red a picture of the Heart of Jesus. This badge was especially employed during the plague at Marseilles as a protection against the pest. During the terror of the French Revolution it also served as a safeguard for the pious faithful. Although this badge is often called a scapular, it is not really such; consequently the conditions governing scapulars do not apply to it. It was only in 1872 that an indulgence was granted by Pius IX for the wearing of this badge (Hilgers, "Goldenes Büchlein", 2nd ed., Ratisbon, 1911, pp. 182 sqq.; "Livre d'or", Paris, 1911, pp. 155 sqq.). A real scapular of the Sacred Heart was first introduced in France in 1786, when it was approved by Decree of the Congregation of Rites and a special formula for blessing and investing with it appointed 4 April, 1900. This scapular consists of two segments of white woollen cloth, connected by a central band, the two segments being sewed under the left arm, the one segment bears the usual representation of the Sacred Heart, while the other bears that of the Blessed Virgin under the title of Mother of Mercy. By a Brief of 10 July, Leo XIII granted many indulgences for the pious wearing of this scapular (Hilgers, "Livre d'or", Paris, 1911, pp. 158 sqq.; "Acta S. Sedis", XXXII, 630).

P. The Scapular of the Sacred Hearts of Jesus and Mary.—This is very similar to the Red Scapular of the Passion. Like the Scapular of the Heart of Jesus, it was approved, at the request of the Archbishop of Marseilles, by a Decree of the Congregation of Rites, 4 April, 1910. The two segments of cloth are of white wool; one bears the image of the Heart of Jesus with the well-known emblems and also the Heart of Mary pierced with a sword, underneath being the implements of the Passion; the other segment has a small cross of red material. Indulgences were granted for the wearing of this scapular in 1901, and increased by Pius X in 1906 (Hilgers, "Livre d'or du Cœur de Jésus", 170 sqq.). The scapular owes its origin and spread to the Congregation of the Daughters of the Sacred Heart, founded at Antwerp in 1873 (Acta S. Sedis, XXXII, 634 sqq.).

Q. The Scapular of St. Dominic.—On 23 November, 1903, this scapular was endowed by Pius X with an indulgence of 300 days in favour of all the faithful who wear it, as often as they devoutly kiss it. The scapular is thereby also approved. It is made of white wool, but the bands, as in the case of so many other scapulars, may be of another material. No image is prescribed for the scapular, but the scapular given in the house of the Dominican General at Rome has on one side the picture of St. Dominic kneeling before the crucifix and on the other that of B. Regina, the hands of the Mother of God. The General of the Dominicans communicates to other priests the faculty of blessing and investing with the scapular ("The Booklet of the Faculties", Rome, 1909; cf. Beringer, "Die Ablässe", 432; "Les indulgences", II, 711).

Finally, to complete this article, we must mention the Scapular of the Holy Face. It bears on a piece of white cloth the well-known Roman picture connected with St. Veronica. This scapular is worn by the members of the Archconfraternity of the Holy Face. The members can, however, wear the picture on a medal or cross, in place of the scapular. The wearing of this picture is subject to one of the pious practices of the archconfraternity, without any special indulgences (Beringer, "Les Indulgences", II, 150; Hilgers, "Manuel des Indulgences", p. 317).

JOSEPH HILGERS.

SCARAMELLI, Giovanni Battista, ascetical writer, b. at Rome, 24 Nov., 1857; d. at Marseilles, 11 Jan., 1912. He entered the Society of Jesus 21 Sept., 1706. He devoted himself to preaching for fifteen years, and long fulfilled the duties of the sacred ministry. He wrote the following works: (1) "Vita di Suor Maria Crocifissa Satellito Monaca Francescanzen nel monastero di monte Nuovo"; Venice, 1750; 5th ed., revised and corrected, Rome, 1819; (2) "Discorso del spirito per il retto regolamento delle azione proprie ed altrui. Operette utili specialmente ai Direttori delle anime", Venice, 1753; 7th ed., Rome, 1866; Sp. tr., Madrid, 1804; Ger. tr., Mains, 1861; (3) "Direttorio ascetico in cui s'insega il modo di condurre l'Anima in vita e morte, per un via della perfezione cristiana, indirizzato ai direttori delle anime", Naples, 1752, still reprinted; tr. and ed. Eyre, "The Directorium Ascesticum", with preface by Cardinal Manning, Dublin and London, 1870-71; revised ed., London, 1879-81; Lat. tr., Brixen, 1770; Louvain, 1848; Ger. tr., Augsburg, 1773; Sp., Madrid, 1806; Fr., Paris, 1854; still reprinted. In this work the author devotes four treatises to the study of (a) the means and helps necessary to attain Christian perfection; (b) the obstacles which hinder us and the way to surmount them; (c) the virtues to be acquired (cardinal virtues, virtues of religion, those opposed to the capital sins); (d) the theological virtues and especially charity, which is the essence of Christian perfection. His manner of dividing his subject and his method are frankly traditional and intellectual; his unoriginal, but, as it were, classic, doctrines are proved by reason and authority, while the study of scruples at the end of the second treatise retains all its value after the researches of modern psychologists.

(4) "Il direttorio mistico indirizzato a' direttori di quelle anime che Idido conduce per la via della salvezza" (Venice, 1766); 2nd ed., 1764; Louvain, 1857; Sp., Madrid, 1817; Ger., Ratisbon and Mains, 1855-56; Fr., Paris, 1865; Polich, Warsaw, 1888; Italian abridgment in the form of dialogues by Santoni, Rome, 1776; new abridgment, Rome, 1895). This work completes the method of the ascetical direction in the case of a person familiar in the preceding work. Here likewise the doctrine is intellectual and strongly opposed to the purely sentimental forms of mysticism such as Quietism.

(5) "La dottrina di S. Giovanni della Croce compresa con metodo chiaro in tre brevi trattati nel primo dei quali si contiene la 'Regola de' Notti oscure', nel secondo 'l'Esercizio di Amore' e la 'Fiamma di Amor vivo'" (Lucca, 1860).

HENRY OLLION.

SCARAMPI, Pietro Francesco, Oratorian, papal envoy, b. of a noble and ancient family in the Duchy of Monferrato, Piedmont, 1596; d. at Rome, 14 Oct., 1656. He was destined by his parents for the military career, but during a visit to the Roman Court he felt called to the religious state. After much prayer and with the advice of his confessor, he entered the Oratorian Order, one of the houses of the Oratorians, in Turin, 1636. At the request of Fr. Luke Wadding, the agent at Rome for the Irish Confederates, Urban VIII, by Brief dated 18 April, 1643, sent Fr. Scarampi to assist
at the Supreme Council of the Confederation. At the same time the pope addressed letters to the archbishops and bishops of Ireland and also to the members of the Supreme Council, telling them that in order to show his great love and admiration for the Irish people he had decided to send to their aid Fr. Scarrampi, a man of noble birth and eminent for his virtues and great administrative abilities. He had them to place full confidence in him as his representative and give him all help in the fulfilment of his duties. He was received by the Irish Catholics as an angel from heaven. Wherever he went he was met by the bishops, clergy, and nobility. He was received with military honours and firing of cannon. On his arrival in Kilkenny he immediately saw that so great a danger that threatened the existence of the Confederation was dis- sension amongst its members. He made an earnest appeal to the Council to avoid all dissension and to make no compromise with the enemies of their religion and country. Richard Belling, Secretary of the Council, addressed to Fr. Scarrampi a statement of the reasons in favour of a cessation of hostilities. Fr. Scarrampi immediately gave a noble answer showing why the war should be continued, and that the English desired the cessation of hostilities solely to relieve their present necessities. The bishops and the Supreme Council thanked the pope for having sent their aid a person of such exemplary life and excellent abilities of mind, and rejoiced at his immediate acceptance amongst them. The author of "Contemporary History of Affairs in Ireland" says that Fr. Scarrampi was a "very apt and understanding man, and was received with much honour. This man in a short time became so learned in the petegrees of the respective Irish families of Ireland, that it proved his wit and diligence, and adice so well disposed, that he was admitted with the proceedings of both ancient and recent Irish, that to an ince, he knew whoe best and worst behaved himself in the whole kingdom."

The Supreme Council decided to supplicate the pope to raise Fr. Scarrampi to the dignity of archbishop and Apostolic nuncio, and the bishops of Ireland entreated him to accept the Archbishopsric of Tuam, which was vacant at the time. He declined all honours and refused to walk under the canopy prepared for him in Waterford. He was present with the Confederate forces at the siege of Dunecannon, and when the fort was taken on the eve of St. Patrick, he ordered it a chapel to be immediately erected in honour of the saint and celebrated the first Mass. On 5 May 1645, he was recalled to Rome by Innocent X. In taking leave of the General Assembly, he thanked all the members for their kindness to him, and again urged them to be firmly united. The president of the Assembly, after referring to all the fatigues that Fr. Scarrampi had endured for the Irish cause, said "that as long as the name of the Catholic religion remained in Ireland, so long would the name of Scarrampi be affectionately remembered and cherished." After receiving the Apostolic nuncio, Rinuccini, he set out on his journey to Rome. He was followed to the ship by the bishops, clergy, and laity, many comparing his departure to that of St. Paul from Miletus. All were in tears. He was accompanied by five Irish youths destined for the priesthood, whom he wished to educate and support at his own expense at Rome. Among these youths was Oliver Plunket, the martyr Arch- bishop of Armagh. On his arrival at Rome he was thanked and praised by the pope for the great work he had done in Ireland. When the plague then raged in Rome in 1656, he asked to be allowed to attend the sick in the lazaretto. He caught the sickness and died. By special permission he was buried in the Basilica of SS. Nereus and Achilleus on the Appian Way, in the titular church of Cardinal Baronius. In the lazaretto he wrote a letter to Oliver Plunket. Benedict XIV commanded the Master of the Sacred Palace to make known to the Fathers of the Oratory that the title of Venerable was to be given to Fr. Scarrampi when writing about him and on his pictures.

**SCARISBRICK, Edward (Neville). See Neville, Edmund.**

_**Scarlatti, Alessandro**, b. in Sicily, either at Trapani or at Palermo, in 1659; d. at Naples 24 Oct., 1725; buried there in the musicians' chapel of the Church of Montesanto. On his tombstone he is described as "maestro di cappella a Capo di Bove." He is said to have taken the title of Scarlatti he deserves in that he originated the classical style of the eighteenth century, and gave a high development to concerted instrumental music. The scenes of his activity were alternately Rome and Naples. His first opera (1679), "Gli Equivoci nel Sembiante," is very celebrated. His son, Alessandro Giuseppe di Potenza, was a composer of some note. His nephew, Pietro Francesco, was also a composer of some note. At S. Maria Maggiore. In 1708 or 1709 he returned to Naples and lived there for ten years. He lived in Rome from 1718 until 1721, then proceeding to Naples, where he died in 1725. His fertility of production is astonishing. He wrote more than a hundred operas (of which less than half are extant). It is said that he composed two hundred Masses, which is questionable, as but few survived him; he left several Oratorios, the best of which are "Agar ed Ismaele", "La Vergine addolorata", and "S. Filippo Neri"; many motets and innumerable chamber-cantatas and serenatas. Moreover he shows great capacity in his compositions for the organ, the cembalo, and other instruments. Not all his religious music is for liturgical use; but many of his compositions, although in his days the Palestinian-style was fast declining, are written in severe and noble polyphony. We may quote here his mass for Cardinal Ottoboni (edited by Prokez), his "Missa ad usum Cappellae Pontificiae" (recently found by Giulio Bas in the library of the Academy of S. Cecilia at Rome, and published by L. Schwann at Düsseldorf), his famous "Tu es Petrus", performed in Paris by the Roman singers at the coronation of Napoleon I (printed by Ricordi of Milan)."
His great distinction in the musical world was to have laid the foundation for the new style, afterwards brought to perfection by the most famous composers, not only of the Neapolitan school, which was in great part formed by his influence (Leo, Durante, Pergolesi), but also of Germany (Haydn, Mozart, and Beethoven). Doménico Alessandro's eldest son was born at Naples 26 Oct., 1695 (in the baptismal register he is called Giuseppe Domenico), and died in 1757. The esteem in which Alessandro was held, may be seen from the fact that Doménico's godfather was the Duke of Addaloni, and his godmother the Princess of Colobrano. Doménico made himself famous by his great skill on the harpsichord. Ricordi of Milan has published his works for the clavicembalo, in six volumes, under the supervision of Alessandro Longo (1900). The manuscripts of these are chiefly in the library of S. Marco at Venice. The compositions are not of equal merit. His genius often seems to forecast the style of the next century. For a few years (1715-1719) he was choirmaster in S. Peter's Rome; during four years (1721-1725) he was engaged at the Court of Lisbon; for twenty-five years he was at Madrid (1729-1754), but spent the last years of his life again in Naples, where he died. Of Francesco, brother of Alessandro, we know that in 1664 he became a violinist in the royal chapel at Naples, that fifteen years later his oratorio, "Agnus occisus ab origine mundi", was sung in Rome, and that in 1720 he gave a concert in London, where Domenico was staying at the same time. Giuseppe Scarlatti was either grandson or nephew of Alessandro (expete can have the two meanings). Born at Naples 1712, he died in Vienna, 1777, where he was considered a distinguished composer. He left several operas.

A. Walter.

Scarron, Paul, French poet and dramatist, b. in Paris, 4 July, 1610; d. 7 October, 1660. His father was a judge and one of his uncles was Bishop of Grenoble. After graduating from the Sorbonne, he received tonsure at the age of nineteen and soon after became attached to the house of Charles de Beaumanoir, Bishop of Le Mans, whom he accompanied to Rome in 1635. A year later he was made a canon in Saint Julian's Cathedral without being in holy orders, a benefice he resigned in January, 1652, when he married Françoise d'Anbigné, later Madame de Maintenon. He was then a cripple and for the remainder of his life was confined to bed, being nursed by his young wife, who was a saintly, pious, and patient woman. In a distorted body, he preserved the acuteness of his mind, and pursued his literary career. His comedies "Jodelet, ou le maître valet" (1645); "Les trois Dorothées" (1646); "L'héritier ridicule" (1649); "Don Japhet d'Armenie" (1652); "L'Ecolier de Salamanque" (1654); "Le garçon de soi-même" (1655); "Le marquis ridicule" (1656) contained quite a number of amusing scenes and odd characters that Molière borrowed. He achieved a lasting reputation by his burlesque productions, "Le Typhon" (1644), and "Le Virgile travesti" (1648-1652), in which he displayed all the resources of his humour. The "Roman comique" (1649-1657), whose realistic presentation of customs and manners was imitated by later writers, kept him from being a master-piece. There is no certainty about the name of the person whose Scarron's remains were taken, but it is now believed that he was buried in the church of Saint-Gervais.

History of Scepticism.—The great religions of the East are for the most part Eastern sceptical. They treat life as one vast illusion, destined some time or other to give place to a state of nescience, or to be absorbed in the life of the Absolute. But their Scepticism is a tone of mind rather than a reasoned philosophical doctrine based upon a critical examination of the human mind or upon a study of the history of human speculation. If we wish for the latter we must seek it among the philosophies of ancient Greece. Among the Greeks the earliest form of philosophical speculation was directed towards an explanation of natural phenomena, and the contradictory theories which were soon evolved by the prolific genius of the Greek mind, in its abstractive modes, Heraclitus, Parmenides, Democritus, Empedocles, Anaxagoras, though differing on other points, one and all came to the conclusion that the senses, whence they had derived the data upon which their theories were built, could not be trusted. Accordingly Protagoras and the Sophists distinguished "appearances" from "reality"; but, finding that no two philosophers could agree as to the nature of the latter, they pronounced reality unknowable. The thorough-going Scepticism which resulted is apparent in the three famous propositions of Gorgias: "Nothing exists"; "If anything did exist it could not be known"; "If it was known, the knowledge of it would be incommunicable."

The first step towards the refutation of this Scepticism was the Socratic doctrine of the concept. There can be no science of the particular, said Socrates. Hence, those devices by which Sceptics try to split the question must clear up our general notions of things and come to some agreement in regard to definitions. Plato, adopting this attitude, but still holding to the view that the senses can give only δίκη (opinion) and not ἀληθίνον (true knowledge), worked out an intellectual theology of the universe. Aristotle, who rejected Plato's theory, and proposed a very different one in its place, with the result that another-epidemic
of Scepticism succeeded. But Aristotle did more than this. He propounded the doctrine of intuition or self-evident truth. All things cannot be proved, he said; yet an infinite regress is impossible. Hence there must be somewhere self-evident principles, which are no mere assumptions, but which underlie the structure of human knowledge and are presupposed in all the doctrines of the philosophers (1005 b. 10; 1006 a). This doctrine, later on, was to prove one of the chief forces that checked the destructive onslaught of the Sceptics; for, even if Aristotle's dictum cannot be proved, it none the less states a fact which to many is itself self-evident. It was the Stoics who first took "evidence" as the ultimate criterion of truth. Peripatetics, they thought, are valid when they are characterized by ἐνδοκρεία, i.e. when their objects are manifest, clear, or obvious. Similarly conceptions and judgments are valid when we are conscious that in them there is σαρκαζήμος an apprehension of reality. Contemporaneously, however, with Zeno, the founder of Stoicism, lived Pyrrho the Sceptic (d. about 270 B. C.), who, though he admitted that we can know "appearance", denied that we can know anything of the reality that underlies it. οὐδέποτε παλικροῦ—nothing is more one thing than another. Contradictory statements, therefore, may both be true. Put positively, this is, of course, false. The Stoics argued, is useless for practical life; and this argument bore fruit. Arcesilaus, founder of the Middle Academy (third century B. C.), though rejecting the Stoic criterion and affirming that nothing could be known for certain, nevertheless admitted that some criterion did exist whereby to direct our actions in practice, and with this in view suggested that we should assent to what is reasonable (τὸ ἐφισόμενον). For "the reasonable" Carneades, who founded the Third Academy (second century B. C.), substituted "the probable" : propositions which after careful examination are not contradictory, neither external nor internal, are ἴδια (probable) καὶ ἀνερρητικά (secure) καὶ ἀρκετομένα (thoroughly tested) ( Sextus Empiricus "Adv. Math.", VII, 166). A subsequent attempt to reconcile conflicting doctrines having proved futile, however, the Academy lapsed into Pyrrhonism. Empedocles urges us that the theme of arguments or "Sceptics under ten heads, which later in the second century A. D. were reduced by Sextus Empiricus to five: (1) human judgments and human theories are contradictory; (2) all proof involves an infinite regress; (3) perceptual data are relative both to the perceiver and to one another; (4) axioms, or self-evident truths, are really circular; (5) syllogistic reasoning involves a διάλογος (a vicious circle), for the major premise can be proved only by complete induction, and the possibility of complete induction supposes the truth of the conclusion (Sextus Emp., "Hyp. Pyrrh.", I, 164; II, 194; Diogenes Laertius, IX, 86).

From Scepticism the neo-Platonists sought refuge in the immediacy of a mystic experience; Augustus and Anselm in faith which in supernatural matters must precede both experience and knowledge (cf. Augustine, De vera relig. xxiv, xxv; De util. cred. i); Anselm, "De fin. Tim.", II; St. Thomas and the Scholastics in a rational, coherent, and systematic theory of the ultimate nature of things, based on self-evident truths but consistent also with the facts of experience, and consistent too with the truth of revelation, which thus serves to confirm what we have already seen by the light of nature. But with the Renaissance, characterized as it was by an indiscriminate enthusiasm for all forms of Greek thought, it was only natural that the Scepticism of the Greeks should be revived. In this movement Montaigne (d. 1592), Charron (d. 1603), Sanches (d. 1632), Pascal (d. 1662), Sorbière (d. 1670), Le Vayer (d. 1672), Hирnham (d. 1679), Foucher (d. 1696), Bayle (d. 1706), Huet (d. 1721), all took part. Its aim was to discredit reason on the old grounds of contradiction and of the impossibility of proving anything. Huet, Bishop of Avranches, and others sought to argue from the bankruptcy of reason to the necessity and sufficiency of faith. But for the most part, faith, understood in the Catholic sense of belief in a system of revealed and rational interpretation, so far from being exempt from the attacks of the Sceptics, was rather (as it still is) the chief object against which their efforts were directed. Faith, as they understood it, was blind and unreasoning. The diversity of doctrine introduced by Protestantism had rendered all other faith, in its view, contradictory than philosophy and natural belief.

In Hume Scepticism finds a new argument derived from the psychology of Locke. A critical examination of human cognition, it was said, reveals the fact that the data of knowledge consist merely of impressions—distinct, successive, discrete. These the mind connects in various ways, and these ways of connecting things become habitual. Thus the principle of causality, the propositions of arithmetic, geometry, and algebra, physical laws, etc., in short all forms of synthesis and relation, are subjective in origin. They are "habitual necessity" but a psychological feeling arising from the force of habit. We undoubtedly believe in real things and real causes; but this is merely because we have grown accustomed so to group and connect our mental impressions. The arguments of Pyrrho and other Sceptics are unanswerable, their Scepticism reasonable and well-founded; but in practical life it is too much trouble to think otherwise than we do think, and we could not get on if we did. Kant's answer to Hume was embodied in a philosophy as eminently subjective as that of Hume himself. Consequently it failed, and resulted only in further speculation, if not actually professed. And nowadays physical science, which in Kant's time alone held its own against the inroads of Scepticism, is as thoroughly permeated with it as the rest of our beliefs. One instance must suffice—that of Mr. A. J. Balfour, who in his "Defence of Physical Dualism" seeks to uphold religious belief on the equivocal ground that it is no less certain than scientific theory and method. There is, he says, (1) no satisfactory means of inferring the general from the particular (c. ii), (2) no empirical proof of the law of causality (c. iii), (3) no adequate guarantee of the uniformity of nature in the past (c. iv), (4) again, of the popular philosophic arguments which are "put forward as final and conclusive grounds of belief" (p. 138), the argument from general consent is not ultimate; that from success in practice, though it gives us ground for confidence in the future, cannot be conclusive, since it is empirical in character; whilst the argument from common sense which affirms that the intellect, when working normally, is trustworthy, involves a vicious circle, since normal workings can be distinguished from abnormal only on the ground that they lead to truth (c. vii). Similarly the "deliverances of consciousness," to which Scottish Intuitionists appeal, are of no avail because it is impossible to determine what deliverances of consciousness are original and what are not. Returning to the question of science, Mr. Balfour finds that it contradicts common sense in that (e. g.) it declares the natural world to be made up of uncoloured particles, and, while thus discrediting the trustworthiness of observation, provides no criterion whereby to distinguish observations which are trustworthy from those which are not. Its method, too, is inconclusive, for there may always be other hypotheses which would explain the facts equally well (c. xii). Lastly the evolution of tends
wholly to discredit its validity, for our beliefs are largely determined by non-rational causes, and, even when evidence is their motive, what we regard as evidence is settled by circumstances altogether beyond our control (c. xiii).

CRITICAL EXAMINATION OF SCEPTICISM.—A reply to the presentations of the Sceptic enumerated above, might take the following line:

(1) The Sceptic fails to distinguish between practical moral certainty which excludes all reasonable grounds for doubt, and absolute certainty which excludes all possible grounds for doubt. The latter can have no place in the world. The intellect is adequate, obvious, and conclusive, and when all difficulties and objections can be completely solved. In mathematics this is sometimes possible, though not always; but in other matters "practical certainty" as a rule is all we can get. And this is sufficient, since "practical certainty" is certainty for reasonable beings.

(2) Axiomatic, or self-evident, truth must be insisted on. The truth of an axiom can never be proved, yet must become manifest, even to those who for the time being doubt it, when its meaning and its application are clearly understood.

(3) Perceptual judgments refer qualities (not sensations) to things, but they do not declare what is the name of these qualities, and hence do not contradict scientific theory.

(4) Perception is trustworthy in that it reveals to us the general character and behaviour of things—both of ourselves and of external objects. We do not often mistake a spade for a table-knife or a turkey for a hippopotamus. The senses do not pretend to be accurate in detail (unless assisted by instruments) or in abnormal circumstances.

(5) The "normal" working of our faculties can be determined independently of any question as to the truth of their deliverances. The work of our faculties is "normal", (1) when they are free from the influence of subjective factors, other than those which belong to their proper nature (i.e. free from disease, impediment, the influence of prejudice, expectancy, desire, etc.), and (2) when they are exercised upon their own proper objects. In the case of the senses this means upon objects we meet with day by day under ordinary circumstances. If the circumstances are extraordinary, our senses are still trustworthy, however, provided the circumstances be taken into account.

(6) Alleged contradictions inherent in philosophical terms are due to ambiguity, misunderstanding, the lack of precise definition, or the influence of a false philosophy. For instance, the contradictions which Mr. Bradley points out (Appearance and Reality, bk. I) in terms such as time, space, substance and accident, causality, self, are not to be found in those terms as defined by the Scholastics.

(7) Contradictions between different philosophical theories may be (a) accounted for, and (b) eliminated. (a) They arise from ambiguity, variety of definition, misconception, misinterpretation, careless inference, groundless assumption, unverified hypothesis, and the neglect of relevant facts. Yet (b) all error contains an element of truth, and contradictions suppose a common principle already granted anterior to their divergence; and these underlying principles and elements of truth contained in all theories can be distinguished from the errors in which they are wrapped up.

(8) Beliefs arising from non-rational or from unknown grounds should either be re-established on rational grounds or discarded. All beliefs should be either fully grounded by evidence in external reality, or (2) meditated by inference from known truth, or (3) on the ground of adequate testimony.
Schaefflarn. Formerly a Premonstratensian, now a Benedictine, abbey, situated on the Isar not far from Munich in Upper Bavaria. It was founded in 762 by Bishop Waltrich and Thomas of Moyonyus. Waltrich was the first abbot; later (774–804) was Bishop of Passau. In 955 the monastery was destroyed by the Hungarians who were then making marauding incursions into Germany. In 1140 it was re-founded by Bishop Otto of Freising as a Premonstratensian monastery under a provost. Little is known of the inner life of the monastery. In 1527 it was destroyed by fire. In 1598 the provost was raised to an abbey, which continued to exist until 1803, when it was secularized. The church was made a parish church, the monastery buildings were frequently changed hands. In 1845 they were brought by the Congregation of the English Ladies who established here a boarding school for girls. In 1865 Schäftlarn was bought by King Louis I of Bavaria for 92,000 gulden and in 1866 it was given to the Bene- dictines. At first the monastery was put under a provost, but it was raised to an abbey, 3 May, 1910. It has now thirteen fathers who conduct an educational institution for boys with a pro-gymnasium. The interior of the monastery church built 1733–64, is one of the best productions of the Munich school of architecture of the eighteenth century; the exterior is unimportant. The monastery buildings, erected during the period 1705–21, are simple.
wish. That the mission might be ready for the official appeal which would come sooner or later he repeatedly urged the general of the Society to send a good astronomer, and in 1606 Father Sabbatino de Urnis, a Neapolitan, arrived.

Father Ricci had been dead but a few months when because of the mistake of an hour by the Board of Mathematics in the announcement of an eclipse, the Government decided to request the aid of the missionaries for its tangled astronomy. At the beginning of 1611 an imperial decree entrusted the missionaries with the correction of the calendar and requested them to translate books containing the rules of European astronomy. Father de Urnis at once undertook this task, assisted by two Christian doctors, Paul Siu Koang and Leon Li-ngo-ten, but the work was scarcely begun when it was halted by the intrigues of the native mandarins. Then the persecution of Kio Shin forced Father Sabbatino and his companion, Father Diego Tantoya, to withdraw to Macao, where both ended their days. Nevertheless these same neophytes, who had saved the mission from total ruin, succeeded not only in securing other missionaries from Peking but in having confided to them anew the duties of official correctors of the calendar. This mandate was renewed by an imperial decree of 27 Sept., 1629. The great Christian mandarin Paul Siu again resumed the high office which the persecution had deprived him and received by the same decree the direction of the reform with full power for its execution. The fathers were certain of obtaining through him all the means necessary for the success of the undertaking. The first missionary to resume the work was unable to devote to its remarkable abilities for any length of time. This was Father John Terentius, or to call him by his true name, Andrea. Having been on Lake Geneva in 1576, he embraced the religious life in Rome at the age of thirty-five being then in possession of an enviable renown as physician, botanist, and mathematician. The Academia dei Lincei (founded at Rome by Prince Frederico Cesi) had admitted him among its earliest members; here he had as colleague Galilei, whose discoveries he followed with sympathy. In his first letters from China, which he had entered secretly in 1621, we find Father Terentius endeavouring to obtain from the Florentine astronomer through the mediation of mutual friends, "a calculation of the eclipses, especially solar, according to the new observations", for he says, "this is supremely necessary to us for the correction of the [Chinese] calendar. And if there is any means by which we may escape expulsion from the empire it is this". This learned missionary died prematurely on 13 May, 1630, and Father Schall was summoned to Peking to replace him. Father James Rho, a native of Milan, who had also come from Europe to China in 1618, and who since 1624 had been working in the Christian settlements, was also called to the capital to assist Father Schall in his scientific undertaking.

The task imposed on the two missionaries was very difficult; they had not only to convince the Chinese of the errors of their calendar, but also to make them
understand the causes of these errors, and to demonstrate to them the reliability of the principles on which they themselves based their corrections. To do this they had to establish at the Board of Mathematics a complete course in astronomy, and they had to begin by introducing Chinese astronomic textbooks comprising not only astronomy properly so-called but also even the most elementary foundations of the science, such as arithmetic, geometry, and other parts of mathematics. In 1634 they had composed as many as one hundred and thirty-seven of these works, of which they printed a hundred. The foreign reformers were not altogether without objection, especially from the Eunuchs. These became particularly violent on the death of Paul Siyu (1633, when he was Colao or prime minister). Happily, Emperor Ts'ung-cheng, who judged very intelligently of the methods in dispute by the results of the prediction of celestial phenomena, continued to support the fathers in the kindest manner. In 1638 Father Schall lost his deserving fellow-worker, Father Rho, but by that time the reform had already been accomplished in principle; it had become law and needed only to be put into practice.

All the provinces of China were soon informed of the important commission of reforming the calendar which had been entrusted to the missionaries. The news created a great sensation which benefited the whole mission. The honour paid to the missionaries of being allowed to spread the truth about the universe, and the fact that many mandarins felt it necessary to offer public congratulations to those working within their territory. Everywhere the preaching of the Gospel was allowed unprecedented liberty. Father Schall profited by this, interrupting from time to time his scientific labours for the apostolate, not only in Peking but also in the neighbouring provinces. Thus he founded a new Christian congregation at Ho-Kien, capital of one of the prefectures of Chi-li. However, his zeal was especially exercised at the court itself. Christianity, which hitherto had won but few souls in the imperial palace, now took an important place there through the conversion of ten eunuchs, among whom were the sovereign's most qualified servants. This class had always been most opposed to the preaching of the missionaries. This happy progress of evangelization was disturbed and for a time stopped by the invasion of the Tartars, who had overthrown the throne of the Ming dynasty, brought about the accession of the Manchu dynasty of the T'sings, which still reigns. In the provinces laid waste by the insurrection prior to the foreign conquest several missionaries were massacred by the rebel leaders. At Peking Father Schall assisted the last of the Ming in his useless resistance by casting cannon for him. Nevertheless the Tatars regarded him favourably. Shun-chi, the first of the T'sings to reign at Peking, was only eight or eleven years old when he was proclaimed emperor (1643). The regent who governed in his name for six years confirmed all Schall's power regarding the calendar. The year 1651 was still kinder to the missionary; not only did he summon him to familiar interviews in his palace, but, in spite of the most sacred rules of Chinese etiquette, he used unexpectedly to visit him in his house, remaining in his modest room a long time and questioning him on all kinds of subjects.

The imperial favour became a source of serious embarrassment to Father Schall and his fellow-workers. Prior to Shun-chi the "new rules" established by the Jesuits for the making of the Chinese calendar became compulsory for the official astronomers, but the correctors themselves had no authority to insure application of them. Shun-chi wished to alter this, impelled no doubt by his affection for Father Schall, but also because he had recognized the inefficiency of the native direction of the Board of Mathematics. He therefore appointed Father Schall president of this Board, at the same time conferring on him high rank as a mandarin to correspond with this important office. The missionary thought he must accept the office, which was more onerous than honourable; the success of the reform which was theoretically accomplished, required it. But the rank of mandarin accorded ill with religious humility. Schall did all in his power to avoid it; from 1634, when it was conferred on him for the first time, until 1657, he made five appeals to the emperor or to the Supreme Tribunal of Rites. After a few explanations to his brethren in the mission (16 Dec., 1648) he declared that he had refused it eight times, that he had pleaded on his knees before the Tribunal of Rites to be delivered from it, and that he only finally accepted it at the command of his regular superior and renouncing most of the advantages whether honorary or financial which were connected with the rank. Nevertheless this acceptance, notwithstanding the reservations made, was the occasion of other conscientious scruples concerning which the sentiments of the Jesuits in China were divided for several years. First of all, was the mandarin as exercised by a missionary a violation of the canon law which forbade priests to hold civil offices?

A more serious question arose regarding the content of the Chinese calendar. The latter, as it was drawn up by the Board of Mathematics and submitted to the Court, was not only astronomical information of a purely scientific nature, but the Chinese likewise sought and found there indications concerning lucky and unlucky days, that is those which should be chosen or avoided for certain actions, and much superstition was mixed with this part. When the calendar was seen to contain the same things after Father Schall became president, uneasiness was felt among the missionaries. Everybody did not know how the publication was made. No one supposed that Father Schall had the slightest share in the superstitious; they were in fact the exclusive work of a section of the Board of Mathematics which worked independently of Father Schall. Furthermore, the definitive and official publication of the calendar was not within the father's province. That was reserved to the Li-pou (Bureau of Rites), to which Father Schall merely transmitted his astrological calculations, by overcoming the opposition of those who were expressly distinguished in the calendar itself by the words, "according to the new rule". Nevertheless, even when they were aware of these explanations, which Father Schall hastened to give, several learned and zealous missionaries considered that his responsibility was too greatly involved and, consequently, since his office did not permit him to suppress the superstitious of the calendar, he was bound in conscience to resign. Five theologians of the Roman College to whom the question was submitted with incomplete information decided in this sense on 3 Aug., 1665. However, fresh explanations given by Father Schall and the approval of other very competent missionaries eventually placed the case in a different light, and a new and better informed commission at Rome concluded (31 Jan., 1664) that there was no valid reason for Father Schall's resignation of the presidency of the Board of Mathematics. The preamble of the decision repeated and adopted the arguments of Father Verbiest: "The father president of the board", it stated, "does not concur positively in the insertion of the superstitious matters which have been noted in the calendar; he does not concur therein, either himself, for he does not sign these additions or set his seal on them, nor through his pupils (in the Board of Mathematics), for the latter only make the insertion, without the father taking any share therein. With regard to the distribution of the
calendar, which he makes in virtue of his office, it bears directly only on the notification of astronomical observations. If the calendar also contains things which savour of superstition it may be said that they are published under the head of information and are included by the calendars. The calendar, in 1657, shows the days on which such things are done according to the customs of the empire, or that they are the days having the conditions which popular superstition considers favourable for certain acts; and Father Schall is passive under the abuse which is following the directions, which he was forced to make by serious reasons and even necessity.

To remove the last scruples concerning this burning question, Father Oliva, General of the Society of Jesus, appealed to the pope. Alexander VII, having taken account of the whole affair, declared the Jesuit oracle (3 April, 1664) that he authorized the Jesuits of China, "even professed, to exercise the office and dignity of mandarin and imperial mathematician". The decision set at rest not only Father Schall's conscience, but also those of the missionaries who might be called to the same duties. In fact, except for a show of respect caused by the peremptory order of which we shall speak later, the presidency of the astronomical bureau remained with the mission till the nineteenth century. It was always the best human protection both for liberty of preaching and freedom to practice Christianity throughout the Chinese empire. Every in Father Schall's time, and his behavior was clearly marked by the rapid increase in the number of neophytes: in 1617 they were only 13,000; in 1650, 150,000, and from 1650 to the end of 1664 they grew to at least 254,980. The missionaries who furnished these statistics at the very period did not hesitate to give the correction of the calendar as the indirect cause of the progress of evangelization, although the extraordinary tokens of kindness which Father Schall received from the young emperor contributed a great deal. One of the most valuable of these tokens, especially from the Chinese standpoint, was the diploma, dated 2 April, 1655, by which Shun-chi expressed his lively satisfaction with the services rendered in the revision of the calendar and the direction of the Board of Mathematics, and conferred on Father Schall the title of Tung hiuen kiao shi, "most profound doctor". This diploma, written in Tatar and Chinese, the text being engraved with dragons and other figures. The order was to order some of which should be engraved on a marble tablet. The tablet, which was recovered at Peking in 1890 by M. Deveria, who presented it to the Jesuit missionaries of southeast Chili, measures eighty-eight by fifty-one inches. Father Schall appreciated still more the gift of a new house and a church for the building of which the emperor gave a thousand crowns. This was the first public church opened in the capital since the coming of the missionaries; it was dedicated in 1650.

Some years later Shun-chi gave Father Schall and the mission a still greater gift, an imperial declaration promulgating, without his last years at the end of the Lord of Heaven, that is the Christian religion, and permitting it to be preached and adopted everywhere. This declaration, made in 1657, was also engraved in Tatar and Chinese on a large marble plate and placed before the church. All his goodwill towards Christianity and the welcome which the young emperor accorded to the discreet preaching of Father Schall, had inspired the latter with the hope that one day he would request baptism, but Shun-chi died (1662) before giving him this joy, aged at most twenty-four years. The child who was proclaimed his successor became the famous Kang-hi and favoured the Christian missionaries, but with more love than respect, his minority the government was in the hands of four regents who were enemies of Christianity. At the denunciation of a Mohammedan self-styled astronoemer, Yang-kao-sien, Father Schall and the other missionaries residing at Peking were loaded with chains and thrown into prison in November, 1664. They were accused of high treason but chiefly of the propagation of an evil religion.

The principal charge against Father Schall was that he had shown to the deceased emperor images of the Passion of Jesus Christ. Brought before various tribunals the aged missionary, who had just been stricken with paralysis, could only reply to his judges through his companion, Father Verbiest. The first asked him why he had secured the presidency of the Board of Mathematics in order that he might use the authority accruing from this high office for the propagation of the Christian Faith; Father Verbiest replied for him: "John Adam took the presidency of the Board of Mathematics because he was on several occasions urged to do so by the emperor. On a stone table, erected before the church, the emperor publicly attested that he raised John Adam, against the latter's wishes, to that dignity." Another complaint of the accuser—that Father Schall had badly determined the day on which a little imperial prince was to be buried—was set aside by the regents themselves for, on investigation, they found that the priest had never meddled with the determination of lucky or unlucky days. Finally, on 15 April, 1665, sentence of death was passed against Father Schall; he was condemned to be cut in pieces and burnt. A violent earthquake was felt at Peking, a thick darkness covered the city, a meteor of strange aspect appeared in the heavens, and fire reduced to ashes the part of the imperial palace where the sentence was delivered. The missionaries as well as the Christians could not but see Divine intervention in these events, while the superstitious Tatars and Chinese were terrified. In consequence the death sentence was revoked (2 May) and Father Schall was authorized to return to his church with his fellow missionaries. The venerable old man survived these trials a year, dying at the age of seventy-five, having consecrated forty-five years to the Chinese missions. Peace was not entirely restored to the Christian communities until 1669, when the young emperor assumed the reins of government. One of Kang-hi's first acts was to have the sentence against Father Schall declared void and iniquitous by the Tribunals. The Tiniots, according to the story, in his honour, the prince himself composing for his tomb an extremely eulogistic epitaph.

Father Schall worthily ended as a confessior for the Faith, almost as a martyr, a long life filled not only with great services to religion, but also marked by every virtue. All witnesses testify to this, and Father Schall might treat with contempt an infamous accusation directed against his memory nearly a century after his death. In 1758 was published for the first time, and afterwards reissued in several works against the Jesuit, a story according to which Father Schall exposed to the danger of being punished as a criminal and was even ordered to leave the country and become a missionary and removed from obedience to his superiors, in the house given him by the emperor with a woman whom he treated as his wife and who bore him two children; finally, having led a pleasant life with his family for some time, he ended his days in obscurity. This is reported by Marcel Angelica, secretary to Mgr de Tournon during his legation in China (1705-1710), who died at Rome in 1749. The narrative gives no inkling of the source of this strange story. Its value may readily be judged by the manner in which it contradicts what has been related of the last days of Father Schall according to contemporaneous witnesses and even official Chinese documents.

Prior to Angelica no one ever formulated or insinuated such an accusation against the celebrated missionary. If what it presumes were true it could
not have been concealed; Yang-koang-sien and other enemies would have exploited it. In particular Navarrete, author of the "Tratados históricos", in which are collected so many more or less false stories concerning our missionaries (including Father Schall), could not have failed to learn of this posthumous odium if his stay at Peking in 1665 and to recount it at length. At any rate such complete disregard of the duties of a priest would not have escaped his fellow-religious (of whom there were always some at Peking), and they would have continued to honour him, as they did, to the end as one of their most venerable brethren. These reasons and others which could be adduced are so clear that there is not the slightest doubt concerning the falseness of Angelita's story. It may be asked, however, how the latter, whose work had hitherto been protected from being a calumniator of the lowest class, could invent and publish such a villainous tale. The fact is that Schall's life might have furnished a foundation on which Angelita's imagination, inflamed against the Jesuits, worked and finally reared this story, but it furnished not the scanty proof. Several contemporaries of Father Schall, Jesuits and others, including Chien-lung, mention the name of a Chinese Christian, a servant of Father Schall's, who seems to have made use of the priest's goodness for the benefit of his own ambition. Puontein-hia (thus was he called) obtained for himself a mendicancy of the fifth rank; for his son John he secured even more, for Paul Schall regularly purchased him as his grandson, and the Emperor Shun-chi granted many weighty favours to this "adopted grandson" of the missionary whom he loved. Father Gabiani in a relation (written between 1666 and 1667, and published in 1671) states that the "arrogance" of the Chinese "have prejudiced many persons against his master. Father Schall himself, when at the point of death (21 July, 1665), made a public confession to his brethren of his "excessive indulgence towards this servant, of the scandal he had caused in adopting as his grandson the son of Puon," finally of irregular gifts made to both, contrary to his vow of poverty. The avowal of these human weaknesses, doubtless exaggerated by the humility of the dying missionary, does not lessen our esteem for him. Hence the conclusion may be drawn that the source of Angelita's story was probably this fact of the adoption, proved by the circumstances of his death, fact, doubtless learned by Tournon's secretary during his stay in China, forty years after the death of Father Schall, had perhaps been distorted when it reached him, or rather his prejudice against the Jesuits caused him to regard it as something quite different from what it really was; perhaps he added to it false and calumnating circumstances. It finally should be added that he wrote his relation many years after his return from China, when his mind was perhaps enfeebled by age and under the influence of a more passionately prejudiced man than himself, the ex-Capuchin Norbert. Joseph Brucker.

Schaumburg-Lippe, a German principality, surrounded by the Prussian province of Westphalia, Hanover, and an enclave of the Prussian province of Hesse-Nassau (the Prussian County of Schaumburg). Schaumburg-Lippe has an area of about 131 square miles and (1910) 46,650 inhabitants. As regards population it is the smallest state of the German Confederation; in area it is larger than Reuss-Greiz, Lippe, and Bremen. In 1797, 44,992 inhabitants 43,888 were Lutherans, 653 Catholics, and 246 Jews. Thus the Catholics are 1-5 per cent of the population. The principality of Schaumburg-Lippe has sprung from the old County of Schaumburg, in early days also called Schauenburg, which was situated on the middle course of the Weser, and was given as a fief by the German Emperor Conrad (1024-39) to Adolph of Szentseleben. Adolph built the castle of Schaumburg on the Nettelberg, which is on the southern slope of the Weser Mountains, east of Rinteln. The descendants of Adolph of Schaumburg, among other things, acquired the County of Holstein and the Duchy of Schleswig also.

In the year 1619 the Schaumburg family were made counts of the empire; however, soon after this, in

Schaumburg, Johann Friedrich, German historian, b. at Luxemburg, 23 July, 1683; d. at Heidelberg, 6 March, 1739. He studied at the University of Louvain and when twenty-two years of age was a lawyer, but before long he turned his attention exclusively to literature and became a priest. The Prince-Abbot of Fulda commissioned Schannat to write the history of the abbey and appointed him historiographer and librarian. At a later date he received similar commissions from Franz Georg von Schönborn, Archbishop of Trier and Bishop of Worms. In 1735 the Archbishop of Prague, Count Moris von Manderscheid, sent Schannat to Italy to collect material for a history of the councils. He made researches with especial success in the Ambrosian Library at Milan and the Vatican Library at Rome. His chief works are: Viandemie literarie" (1723-24); "Corpus traditionum Fuldensium" (1724); "Fuldischer Lehrhof" (1728); "Dictaeus Fuldensis" (1732); "Historia episcopatus Wormatianae" (1734); "Histoire abrégée de la maison Palatine" (1740). More important than these, however, is the "Concilia Germaniae", edited from material left by Schannat, and continued by the Jesuit Joseph Heimach (11 fol. volumes). At a later date the "Eliasa illustrata" (1825-55) was actually published.

La Barre de Braymarchais, Eloge historique de l'Abbé Schannat en Schaumburg, Histoire abrégée de la maison Palatine; ALLWITHE, V (Casem, 1891), 42-43.

Klemens Löfler.

Schuufelin, Hans Leonard (known also as Scheufelin, Schaufelein, and Scheyflein), a German wood engraver, pupil of Dürr, b. at Nuremberg in 1490; d. there in 1549. His best work was executed as an engraver, but he was besides a man of some repute, and his pictures, to be studied in Nuremberg, Munich, Casel, and Ulm, are worthy of attention and show clearly the Dürr influence and the Dürr sense of beauty. His drawing of drapery is particularly good. His etchings and engravings are marked with a curious rebus on his name, composed of his initials joined to a shov. He was the author of the illustrations to the "Theuerdank" of the Emperor Maximilian, and prepared two important engravings for Ulrich Findter's "Speculum Passions." A series of his paintings in Munich represent scenes in connexion with Christ and His Mother, and the fact that he is said to have produced is in Nördlingen, a city of which he was made a magistrate in 1516 and in which he attained considerable prominence.

G. C. Williamson.
1640, the male line became extinct by the death of Count Otto V. At the division of the inheritance the Countess Elisabeth, aunt of Count Otto V, Elisabeth, Countess of Lippe. Elisabeth gave it to her brother Count Philip of Lippe, the younger brother of Count Simon VII, ruler of the County of Lippe. The Margrave of Hesse-Cassel and the Duke of Brunswick-Lüneburg also laid claim to parts of the County of Schaumburg and an adjournment was made which was confirmed in the Treaty of Westphalia. On account of this agreement the county was divided, one part going to Hesse-Cassel, another to Brunswick, while what was left, including the Barony of Büchberg, came to Count Philip who now called himself Count of Lippe-Büchberg. The first ruler of the new County of Schaumburg-Lippe was Count Philip Ernest (d. 1787). Thus the territory of the present principality of Schaumburg-Lippe has never had any constitutional connexion with the present principality of Lippe. The two countries have not arisen by partition of another principality.

The districts of the old County of Schaumburg that fell to Hesse-Cassel, among which were the castle and the district of Schaumburg, became Prussian territory when the Electorate of Hesse-Cassel was suppressed (1806), and since then these districts, under the name of Schaumburg-Lippe, have formed an exclave of the Prussian province of Hesse-Nassau. Since 1905 Rinteln has been called the Prussian County of Schaumburg. George William of Schaumburg-Lippe (d. 1800) joined the Confederation of the Rhine in 1806, and received the hereditary title of prince. After the dissolution of the Confederation of the Rhine he joined the German Confederation (1815). At the outbreak of the Prusso-Austrian War (1866) Prince Adolph George (d. 1893) at first agreed to the demand of Austria for the mobilizing of the forces of the Confederation against Prussia, but after the Prussian victories he withdrew from the German Confederation and joined Prussia and the North German Confederation. In 1871 the little country became a state of the German Empire. Prince Adolph (b. 1883) succeeded as ruler in 1911, in which year he was still unmarried. At the time of the great religious revolt of the sixteenth century the territory of the old County of Schaumburg had been joined in ecclesiastical matters, to the Diocese of Münster (founded by Charlemagne about 800). The Reformation was introduced into the country between 1560 and 1570, after the death of Adolph III, Archbishop of Cologne (d. 1556) and of his brother Anthony (d. 1558), who were the last to belong to the Schaumburg dynasty. The reigning Count Otto IV, brother of these two, was won over to the new doctrine after his marriage with Elisabeth Ursula, daughter of Duke Ernst of Brunswick-Lüneburg (called the "Confessor" on account of his zealous adherence to and championship of Protestantism).

The childless Count Ernst (d. 1622) was succeeded by a Catholic Count, Jobst Herrmann, who also died without children (1636). Jobst, indeed, attempted to bring his probable successor, the later Count Otto V, in the Catholic Faith, but Otto's mother, Elisabeth, had him educated in the Reformed doctrines. Upon the death of Otto V the male heirs of the Schaumburg line were extinct. What remained of the country after the partition, the present principality of Schaumburg-Lippe, came under the House of Lippe, which had also adopted the Reformed teachings, so that since then the name of the government family has been Lippe, as of the Protestants, and the national Church is the Lutherans. However, the ruler of the country has by law supreme ecclesiastical power over the State Church. Parishes of the Reformed Church were formed only in the capital, Büchberg, and Stadthagen. Catholic services were re-established at Büchberg about 1720 for a Catholic countess and her servants. Originally the Catholic pastoral care was exercised from Minden by Franciscans of Bielefeld; between 1840 and 1850 the mission parish of Stadthagen was created, to which was added in 1883 the mission parish of Stadthagen. In consequence of the country's entrance into the Confederation of the Rhine the few Catholics received equal civil rights with the Protestants. By a rescript of 3 July, 1809, the Sovereign settled the relations of the principality to the Catholics, and granted Catholic permission to hold public church services. Since 1846 episcopal jurisdiction has been exercised by the Bishop of Osnabrück in his capacity as Primate of the Northern Mission.

The political status of the Catholic Church was revised by the State law of 18 March, 1911. The Catholic Parishes are no longer dependent on the State, but are composed of the aggregate of all the Catholics residing in the district. Their boundaries are fixed by the bishop with the approval of the ministry after the opinions of the interested parties have been consulted. The ministry exercises the State's right of supreme supervision. The parishioners are bound to send all persons, who must, however, before making the appointment, ascertain that the ministry has no objection to this cleric. If within thirty days no objection be raised against the candidate the acquiescence of the ministry is assumed. Every parish is bound to establish and maintain the buildings necessary for masses, etc. To meet these obligations every self-supporting member of the parish who has resided there at least three months is bound to pay the church tax. The State gives nothing for Catholic Church purposes. The necessary expenses are met by the bishop. Orders and congregations are not allowed in the country. The primary schools are all Lutheran. Religious instruction is not given to the Catholic minority in the public primary schools, although this is legally permissible. There are private Catholic primary schools at Büchberg and Stadthagen; these do not, however, receive any aid from the State.

The Catholic school at Büchberg, founded 1848, numbers (1911) 20 pupils; the one in Stadthagen, founded 1877, numbers (1911) 27 pupils.

HERMANN SACHER.
the most prominent representatives of Thomism. He was the author of the following works: "Die Lehre von der Wirksamkeit der Sakramente ex opero operato in ihrer Entwicklung innerhalb der Scholastik und ihrer Bedeutung für die christliche Heilslehre dargestellt" (Munich, 1866); "Das Dogma von der Gnade und die theologische Frage der Gegenwart. Eine Kritik der Kuhn'schen Theologie" (Mainz, 1865); "Neue Untersuchungen über das Dogma von der Gnade und das Wesen des christlichen Glaubens" (Mainz, 1867) (these last two works belong to the controversy with Scholastik). He carried on with Johannes von Kuhn, q. v.; "Das Dogma von der Menschenwerdung Gottes, im Geiste hesil. Thomas dargestellt" (Freiburg, 1870); "Die päpstliche Usurphierbarkeit aus dem Wesen der Kirche bewiesen. Eine Erklärung der ersten dogmatischen Bestimmung des vatikanischen Concili über die Kirche Christi" (Freiburg, 1870); "Divus Thomas Doctor angelicus contra Liberalismum invictus veritatis catholice assessor" (Rome, 1874); "Introduc. in s. theologiam dogmaticam ad mentem D. Thomae Aquinatis", a posthumous work ed. by Thomas Schwab (Mainz, 1883); "Die Bedeutung der Dogmengeschichte vom Katholischen Standpunkt aus erörtert", ed. Thomas Esser (Ratisbon, 1884).

**Friedrich Laucht.**

Schedel, Hartmann, German Humanist and historian, b. at Nuremberg, 13 February, 1440; d. there on 28 November, 1514. He matriculated at Leipzig in 1456, received the degree of baccalaureus in 1457, and of magister in 1460. He then chose jurisprudence as his professional study, but at the same time zealously pursued humanism. He was called under Peter Ludor, whom he followed to Padua in 1463. He there took up the study of medicine in which he obtained a doctorate in 1466. In 1472 he became a physician at Nördlingen; in 1477, at Amberg; in 1481, at Nuremberg where he lived until his death. He was closely connected with scholars and artists and his large and varied learning won for him the esteem and admiration of other students. His chief work is a chronicle of the world, "Liber chronicarum", which contributed much to the spread of historical knowledge. It was first published in 1493 at Nuremberg, a German translation by Georg Alt appearing in the same year. The different views and the point of view are entirely medieval. The work is a compilation following earlier chronicles closely and generally, even verbally; it depends particularly on the "Supplementum chronicarum" issued at Venice in 1483 by Brother Jacobus Philippus Foresta of Bergamo. The thoughtful, conservative, and rigidly orthodox Schedel does not often express his own opinion. The book owes its popularity in part to the great number of fine woodcuts executed by the two artists, Michael Wolgemuth and William Pleydenwurf. Schedel's activity in tracing out, collecting, and copying MSS. produced results of much value. More important in this connection is the acquisition of Jacob Fugger in 1552, and was afterwards obtained by Duke Albert V of Bavaria (1550-1579) for the ducaal, now royal library at Munich, where it now is.

**Klemens Löfler.**

Scheben, Matthias Joseph, theological writer of acknowledged merits, b. at Mecklenburg near Bonn, 1 March, 1855; d. at Cologne, 21 July, 1888. He studied at the Gregorian University at Rome under Pasaglia and Perrone (1852-59), was ordained on 19 June, 1858, and appointed Hegemon and dean of the episcopal seminary of Cologne (1860-1875). Scheben was a mystic. His mind revolved in speculating on Divine grace, the hypostatic union, the beatific vision, the all-prevading presence of God; he had a firm belief in visions granted to himself and others, and his piety was so intense that many of his visions were attuned to his; his pupils were overawed by the steady flow of his long abstruse sentences which brought scanty light to their intellects; his colleagues and his friends but rarely disturbed the peace of the workroom where his spirit brooded over a chaos of literary matters. The list of Scheben's works opens with three treatises dealing with grace: (1) "Natur und gnade" (Mainz, 1861); (2) a new edition of "Quid est homo", a book by Ant. Casini, S.J. (d. 1755); (3) "Die Herrlichkeiten der göttlichen gnade" (Freiburg, 1863; eighth ed, by A. M. Weiss, 1908; translated in "Handbuch der Dogmatik" (seven parts, Freiburg, 1873-87). The author did not finish this classic work on the personal value of grace, he died whilst working on "Graces". The following treatises were supplied in German by Dr. Atzberger (Freiburg, 1898), in English, by Wilhelm and Scannell, who, whilst strictly adhering to Scheben's thought, reduced the bulky work to two handy volumes entitled: "A Manual of Catholic Theology based on Scheben's Dogmatik" (2nd ed., 1910). He founded and edited (1867-88) the Cologne "Pastoralblatt", and edited for thirteen years "Das ökumenische Concil vom Jahre 1899", later (after 1872) entitled, "Periodische Blätter zur wissenschaftlichen Besprechung der großen religiösen Fragen der Gegenwart". Kultur, II (1889), 120-32; Hettens. Prof. Dr. M. J. Scheben, Leben u. Wirken eines kath. Gelehrten im Dienste d. Kirche (Faulborn, 1992); Hutter, Nomenclator. III; Joseph Wilhelm.

Scheffler, Johannes. See Angelus Silesius.

Scheffmacher, John James, Jesuit theologian, b. at Kientzheim, Alsace, 27 April, 1668; d. at Strasbourg, 18 August, 1733. He was one of the greatest theologians of his time, an orator of power and influence and the author of valuable works on controversy. By his preaching and writing, he laboured for many years for the conversion of the Lutherans and brought a great number of them back to the Church. In 1715 while teaching theology in the Catholic University of Strasbourg, he was appointed to the chair of Apologetics, founded in the cathedral of that city by Louis XIV; he was rector of the university (1728-31). His best-known writings are in the form of letters, written forthwith with clear arguments those points of Catholic doctrine which long experience had taught him presented the greatest difficulties to Protestants. These letters have been collected in two separate volumes and published under the title: "Lettres d'un Docteur Allemand", 14th ed. (Strasbourg, 1780) and "Iugend im Thologien", 13th ed. (Strasbourg, 1750). Another well-known work of the author is "Controverskatechismus" (Cologne, 1723) which was later published under the title, "Licht in den Finsternissen". The oldest known French edition of this work entitled "Catechisme de Controverses" is dated 1751, though it is not certain whether the book was originally published in French or in German. There is an English translation entitled, "A Controversial
Scheiner, CHRISTOPHER, German astronomer, b. at Wald, near Mindelheim, in Swabia, 25 July, 1575; d. at Niesse, in Silesia, 18 July, 1650. He entered the Society of Jesus in 1595, and after studying mathematics at Ingolstadt, became professor in that branch at Dillingen. In 1610 he was recalled to Ingolstadt where he taught for a short time; and he then engaged in scientific research. He had already invented his well-known pantograph or copying instrument, and he now constructed a telescope, with which, aided by one of his students, he began to observe the sun. He made use of a helioscope composed of coloured glasses in the beginning, but afterwards conceived the idea of projecting the sun's image on a screen in order to study its surface. Kepler had independently suggested the method, but Scheiner was the first to apply it in practice. It was thus that in March, 1611, he discovered the existence of sun-spots, a phenomenon so contrary to the philosophy of his time that his superiors did not wish him to publish it under his own name for fear of ridicule. He therefore communicated the discovery to his friend Welser in Augsburg, who, in 1612, published his letters under an assumed name. In subsequent letters he described the rotation of the spots and the appearance of the facula. In the meantime Galileo claimed to have observed the spots before him. This led to further correspondence and a long dispute followed regarding the priority of discovery. It appears, however, that they were first noticed by Fabricius shortly before either, and although Galileo may have observed them before Scheiner, the latter made his discovery quite independently and also published it before him. Scheiner's special claim, that he was the first to make continuous observations of scientific value, cannot be disputed. Apart from his letters, he continued his systematic study of the sun for nearly sixteen years before beginning the publication of his great work, the "Rosa Ursina" (Braccian, 1626–30). This is a standard treatise on the subject and besides his numerous observations, contains a detailed account of his methods and apparatus. One of his most valuable discoveries was also a demonstration of the rotational elements of the sun. In 1616 the Archduke Maximilian of Tyrol, attracted by his growing fame, invited him to Innsbruck, where, besides carrying on his astronomical researches, he made important studies on the eye, showing that the retina is the seat of vision. He likewise devised the optical experiment which bears his name. He became rector of the college of his order at Niesse in 1623, and later professor of mathematics at Rome. His last years, devoted to study and to the ministry, were spent at Niesse. Scheiner was one of the leading astronomers of his age, possessed of an uncommon degree of the true scientific spirit. Though not endowed with the deep insight into the truths of nature of his great contemporary Galileo, he was nevertheless ingenious in devising methods and a skilled and painstaking observer. He insisted particularly on the need of accurate data as a basis for subsequent theory. He discovered and published the phenomenon of the solar spots, and attributed the phenomenon to refraction; "Oculus h. e. Fundamentum opticum" (Innsbruck, 1619); "Pantographice seu ars delineandi" (Rome, 1631).
Dean of St. Paul's, London. He also published numerous other works.

HUNER, NOMINATOR IV (Innsbruck, 1910), 550.

R. MAERE.

Schenkel, MAURUS VON, a Benedictine theologian and canonist, b. at Auerbach in Bavaria, 4 January, 1749; d. at Amberg, 14 June, 1816. After studying the humanities at the Jesuit college in Amberg (1760-1765), he entered the Benedictine monastery of Früfeneng (Bavaria) near Ratibon, took vows on 2 Oct. 1768, and was ordained priest on 27 Sept., 1772. From 1772-7 he held various offices in his monastery; in 1777 he was at first headonom at Puch, then pastor at Gelgenbach; from 1778-83 he taught dogmatics, moral and pastoral theology and canon law at the Benedictine monastery of Weltensburg; in 1783 he became librarian at Früfeneng where he at the same time taught canon law till 1785, then moral theology till 1790, when with his abbot's consent he accepted a position as professor of canon law, moral, and pastoral theology at the lyceum of Amberg. With his professorship he was connected the regency of the seminary and, after declining an offer to succeed his confrere, Bede Aschenbrenner, as professor of canon law at the University of Ingolstadt in 1793; he was also appointed rector of the school at Amberg in 1794. Upon his urgent request he was relieved of the rectorship in 1796 and, after refusing another offer as professor at Aachen, in 1798; he was appointed on the title of spiritual councillor of the king. Owing to ill-health he resigned the regency of the seminary and after 1808 he taught only canon law and pastoral theology. He was highly esteemed as a theologian and canonist, and his works were used as texts in many educational institutions of Germany and Austria. His chief works are (1) "Juris ecclesiastici statum Germaniae maxime et Bavariae accommodandi syntagma" (Ratibon, 1785). When interpolated editions of this work were published (Cologne, 1787, and Bonn, 1789), he re-edited it under the title "Institutiones juris eccles. etc." (2 vols., Ingolstadt, 1790-1), but it was again reprinted without his consent (Bonn, 1793, and Cologne, 1794). The latest (11th) edition was prepared by Engelmann (Ratibon, 1853). (2) "Ethica christiana universalis" (3 vols., Ingolstadt, 1800-1, 5th ed., Cran, 1800). (3) "Theologiae pastoralis systema" (Ingolstadt, 1815-25).

Linden, Die Schriftsteller des Benedictiner-Ordens in Bayern, 1750-1890, I. (Ratibon, 1888), 250-2; HEIDENreich, Memorien der Schenkens (Ratibon, 1859); FELDBERG, Gekelterter Benzen II, 277-282.

MICHAEL OTT.

Schenute (Schenndti, Schedndti, Syncheutus), a Coptic abbot. The years 332-33-34 and 350 are mentioned as the date of his birth, and the years 451-52 and 466 as the date of his death, all authors agreeing that he lived about 118 years. He was born at Schena-Lolet in the district of Akhim, and died in his monastery, which still exists under the name of Deir-el-Abiad (Weizan) near the Nile, about 20 miles W. of Atripe. In 371, he became a monk at this large double monastery, which was then ruled by his uncle Bgl, whom he succeeded as abbot in 388. St. Cyril of Alexandria, whom he accompanied to the Council of Ephesus in 431, appointed him archimandrite during that council. The Copts honour him as a saint and as the Father of the Coptic Church.

The monastic rule of Pachomius underwent various modifications and was made more severe under the abacy of Bgl and Schenute. Perhaps the most important modification was the introduction of vows into the monastic life. But most monks had a solemn profession in the church, that they would faithfully observe the rule of the monastery. The formula of this vow, as prescribed by Schenute, was published by Leipoldt (loc. cit. below, p. 107), and by Lecleor in "Dict. d'Archéologie chrétien." s. v. Cénobites. It is as follows: "I vow [nunyavt] before God in His holy place as the word of my tongue is my witness: I shall never sully my body in any way; I shall not steal; I shall not take false oaths; I shall not lie; I shall not do evil secretly. If I transgress what I have sworn [nunyavt] I shall not enter the kingdom of heaven, for I know that God before whom I pronounce the formula of this pledge [nahy] will thrust me body and soul into hell. For I shall have transgressed the monastic pledge [nahy] which I have pronounced" (op. cit.). It is the first monastic vow of which we have any knowledge. Another modification of the rule of Pachomius was a combination of the cenobitic with the anchorite life. Schenute was the most influential monastic head and perhaps the most famous in Egypt during his time. His biographer and successor as Abbot of Atripe, states that at one time he ruled over 2200 monks and 1800 nuns. But Schenute was too self-conscious, passionate, and tyrannical, his rule too severe, and his enforcement of it too violent, to make his influence permanent and lasting. Outside of Egypt he remained unknown; neither Latin nor Greek writers make any mention of him. Philosophy he considered useless, and his whole knowledge of theology consisted in the repetition of the current ecclesiastical formulas. Extremely austere with himself, he required the same austerity of his disciples, and rigidly enforced an absolute subjection to authority. His literary works, written in the Sahidic language, consist chiefly of letters to monks and nuns, spiritual exhortations, and some very forcible sermons. They are being edited with a Latin translation by Leipoldt, in "Corpus Scriptorum Christianorum Orientalium" (Paris 1897-), and with a French translation, by Amélineau in the same publication (Paris, 1907-).

His life, written in Sahidic by Bisn, his disciple and successor, has been transmitted in the Greek and Syrian versions, and was edited by Leipoldt, loc. cit. above. See also LEIPOLDT, Schenudes von Airisa und die Entstehung des Romanen "In Kirchchristlichen Liebe zu unterrichten" in: New series, X. I (Paris, 1903); AMÉLINEAU, Les moines Egyptiens: Vie de Schenudes (Paris, 1889); LADUGUE, Blinde sur le célibatisme Pachomien (Louvain, 1889); DEGEN, BEYVDOUT, Les origines du schématisme égyptien, Sensul le prophétie en Renne de l'histoire des religions VII (Paris, 1883), 491-588; LECLEOR in Dict. d'Archéologie Chrét. (Paris, 1910), s. v. Cénobites; Bibliothèque Habgagnesique Orientales (Bruxelles, 1910), 253-57; RETBROU, The date of the death of the Egyptian St. Shenute, in Journal of Theological Studies, IX (London, 1908), 601-03.

MICHAEL OTT.

Scherer, GEORG, pulpit orator and controversialist, b. at Schwaz, in the Tyrol, 1540, according to Duhr; d. at Linz, 30 Nov., 1605; entered the Society of Jesus in 1559. Even before his ordination he was famed for his preaching powers. For over forty years he laboured in the Archduchy of Austria. To Scherer, in part, it owes the retention of the Faith. In 1577 he was Court preacher to the Archduke Matthias; he retained the post until 1600. In 1590 he was appointed Rector of the Jesuit College at Vienna; the sternness of his character scarcely fitted him for the office, and he was transferred to the College at Linz. He died of apoplexy. The story of his being struck blind in the pulpit, after having exclaimed: "If the Catholic Church is not the True Church, may I become blind," is a pure invention (cf. Guirhemy).

Scherer was a man of boundless energy and rugged strength of character. The name was genuinely popular orator and writer. He vigorously opposed the 'Tübingen professors' who mediated a union with the Greek Schismatics, refuted Lutheran divines like Osiander and Heerbrand, and roused his countrymen against the Turks. Believing like his confreres that the right to put witches to death, he maintained, however, that they were possessed, the principal weapons used against them should be spiritual ones, e.g. exorcism, prayer. Scherer's severe attitude towards witchcraft did not meet the approval of his general, Acquaviva. His eloquence and zeal made many converts, amongst
them the future Cardinal Kheesel. His works were collected and published by the Premonstratensians of Bruck, Moravia (1599–1600), and again issued at Munich (1613–1614). Noteworthy are his "29 Predigten von Notis, Merk und Kennzeichen der wahren und falschen Religion."

SCHIERER-BOCCHER, THEODOR, Count von, a Swiss Catholic journalist and politician; b. at Dornach in the canton of Solothurn, 12 May, 1816; d. at Solothurn, 6 Feb., 1886. Theodore Scherer belonged to a distinguished family of the City of Solothurn. He attended the gymnasium of this city, took the philosophical course at the lyceum of the same place, and then entered the University of Paris, 1836, and of cor-respondence with conservative tendencies. From 1838 he was also a member of the great council of the canton. His political activity in this body brought him into conflict with the Government and obliged him in 1841 to live abroad for some time in Alsace and Paris. At the close of 1841 he was called to Lucerne where he founded and edited the "Staatszeitung der katholischen Schweiz," which became the chief organ of the Catholic-Conservative party. In 1843 he returned to Solothurn and served out a term of imprisonment to which he had been condemned on account of the events of 1841. In 1845 he was made secretary to Michael Kettler, Minister of Luzern, Later president of the Sonderbund. Scherer himself had a share also in the founding of the Sonderbund. After the unfortunate ending of the war of the Sonderbund he returned to private life at Solothurn, where he devoted himself to labours on behalf of Catholic interests. One of his chief subjects of work, being a contributor to numerous Catholic journals of Switzerland and Germany. During a visit to Rome in 1852 he was made a Roman count by Pius IX. From 1855 he lived in the small castle of Hüningen near Lucerne. In 1868 he married Marie Louise von Boccher, and after that used the double name Scherer-Boccher. In 1844 Scherer founded the Academy of St. Charles Borromeo, an association of the Catholic scholars of Switzerland, and edited as the organ of the association a journal called "Katholische Annalen" (Lucerne, 1847); the war of the "Sonderbund" put an end to this periodical and to the academy also. In 1857 he was one of the founders of the Swiss Pius Association (Piauerind), and from the time the society was established until his death he was the president of the central organization; he was also the head of the Society for Home Missions, founded in 1865. He was in touch with the Catholic Church in Germany and spoke repeatedly at the German—Catholic congresses. 

SCHIERER-BOCCHER issued thirty-five separate publications, large and small, containing apologetic, biographical, or historical matter. The most noteworthy of these were: "Revolution und Restauration der Staatswissenschaft" (Augsburg and Lucerne, 1842, 2nd ed., 1845); "Die fünfschjährige Feinde der Revolution gegen die katholische Schweiz 1830–45" (Lucerne, 1846); "Das Verhältniss zwischen Kirche und Staat" (Ratisbon, 1846, 2nd ed., 1854); "Die Reformbewegung unserer Zeit und das Christentum" (Augsburg, 1847); "Die heilige Vater der Begrachtungen über die Mission und die Verbindungen des Papstthums" (Munich, 1850), French tr., "Le Saint-Père. Considérations sur la mission et les mérites de la Papauté" (Paris, 1853); "Heidenthum und Christenthum betrachtet in den Monumenten des alten und neuen Romes" (Schaffhausen, 1850, 2nd ed., 1850); "Lebensbilder aus der Geschichte der katholischen Kirche in der Schweiz" (Schaffhausen, 1854). He was also one of the editors of the "Archiv für schweizerische Reformationsgeschichte" (3 vols., Fribourg, 1890–95).

SCHNEIDER, MATTHAEUS, bishop, cardinal, and statesman, b. at Mühlbach in the Canton of Valais, Switzerland, about 1500. After his studies at the Jesuits at Fribourg in Switzerland. After this he returned to Solothurn and devoted himself to journalism, founding the newspaper "Die Schildwache am Jura" (1836–41), in which he defended the freedom of the Church and the rights of the people. In addition to this he established in 1839 a bureau of cor-respondence with conservative tendencies. From 1838 he was also a member of the great council of the canton. His political activity in this body brought him into conflict with the Government and obliged him in 1841 to live abroad for some time in Alsace and Paris. At the close of 1841 he was called to Lucerne where he founded and edited the "Staatszeitung der katholischen Schweiz," which became the chief organ of the Catholic-Conservative party. In 1843 he returned to Solothurn and served out a term of imprisonment to which he had been condemned on account of the events of 1841. ALBERT BüCHI.

Schism.—I. General Ideas, Moral Character, and Penal Sanctions.—Schism (from the Greek ἕλπις, rent, division) is, in the language of theology and canon law, the rupture of ecclesiastical union and unity, i. e. either the act by which one of the faithful severs as far as in him lies the ties which bind him to the social organization of the Church and make him a member of the mystical body of Christ, or the state of dissociation or separation which is the result of that act. It is a theological and legal term which occurs in the books of the New Testament. By this name St. Paul characterizes and condemns the parties formed in the community of Corinth (I Cor., i, 12): "I beseech you, brethren", he writes, "that there be no schisms among you; but that you be perfect in the same mind, and in the same judgment" (ibid., i, 10).

The union of the faithful, he says elsewhere, should manifest itself in mutual understanding and convergent action similar to the harmonious co-operation of our members which God hath tempered "that there might be no schism in the body" (I Cor., xii, 25). Thus understood, schism is a genus which embraces two distinct species: heresy theological schism and schism pure and simple. The first has its source in heresy or joined with it, the second, which most theologians designate absolutely as schism, is the rupture of the bond of subordination without an accompanying persistent error, directly opposed to a definite dogma. This distinction was drawn by St. Jerome and St. Augustine. "Between heresy and schism," explains St. Jerome, "there is this difference: that heresy perverts dogmas, while schism, by rebellion against the bishop, separates from the Church. Nevertheless there is no schism which does not trump up a heresy to justify it" (ibid., Tit., lii, 10). And St. Augustine: "By false doctrines concerning God heretics wound faith, by iniquitous dissensions schismatics deviate from fraternal charity, although they believe what we believe" (De fide et symbolo, ix). But as St. Jerome remarks, practically and historically, heresy and schism nearly always go hand in hand; schism leads almost invariably to denial of the papal primacy.

Schism, therefore, is usually mixed, in which case, considered from a moral standpoint, its perversity is chiefly due to the heresy which forms part of it. In its other aspect and as being purely schism it is contradictory and disobedience to the former, because it severs the ties of fraternal charity, to the latter, because the schismatic rebels against the Divinely constituted hierarchy. However, not every disobedience is a schism; in order to possess this character it must include besides the transgression of the command of the Church, denial of ecclesiastical and divine authority. And on the other hand, schism does not necessarily imply adhesion, either public or private, to a dissenting group or a distinct sect, much less the creation of such a group. Anyone becomes a schismatic who, though desiring to remain a Christian, rebels against legitimate authority, without going as far as the rejection of Christianity as a whole, which constitutes the crime of apostasy.

III.—34

Formerly a man was rightly considered a schismatic when he disregarded the authority of his own bishop; hence the words of St. Jerome quoted above. Before him St. Cyprian had said: "It must be understood that the bishop is in the Church and the Church in the bishop and he is not in the Church who is not with the bishop" (Epist., lvii, 8). Longer before him, Ignatius of Antioch laid down this principle: "Where the bishop is there is the community, even as where Christ is there is the Catholic Church" (Smyrn., vii, 2). Now through the centralizing evolution which emphasizes the preponderant role of the sovereign pontiff in the constitution of unity, the mere fact of rebelling against the bishop of the diocese is often a step toward schism; it is not a schism in him who remains, or claims to remain, subject to the Holy See. In the material sense of the word there is schism, that is rupture of the social body, if there exist two or more claimants of the papacy, each of whom has on his side certain appearances of right and consequently more or less numerous partisans. But under these circumstances good faith may, at least for a time, prevent a formal schism; this begins when the legitimacy of one of the pontiffs becomes so evident as to render it inexcusable. Schism is regarded by the Church as a most serious fault, and is punished with the penalties inflicted on heresy, because heresy usually accompanies it. These are: excommunication incurred ius facti and reserved to the sovereign pontiff (cf. " Apostolic Sede", i, 2); this is followed by the loss of all ordinary jurisdiction and incapacity to receive any ecclesiastical benefices or dignities whatsoever. To communicate in sacris with schismatics, e. g., to receive the sacraments at the hands of their ministers, to assist at Divine Offices in their temples, is strictly forbidden to the faithful.

Hence the distinction of "active" or "passive" schism. By the former they understand detaching oneself deliberately from the body of the Church, freely renouncing the right to form a part of it. They call passive schism the condition of those whom the Church herself rejects from her bosom by excommunication, inasmuch as they undergo this separation whether they will or no, having deserved it. Hence, this article will deal directly only with active schism, which is schism properly so-called. It is nevertheless clear that so-called passive schism not only does not exclude the other, but often supposes it in fact and in view. From this it follows that the Church must understand the attitude of Protestants who claim to hold the Church they abandoned responsible for their separation. It is proved by all the historical monuments and especially by the writings of Luther and Calvin that, prior to the anathema pronounced against them at the Council of Trent, the leaders of the Reformation had proclaimed and repeated that the Roman Church was "the Babylon of the Apocalypse, the synagogue of Satan, the society of Antichrist"; that they must therefore depart from it and that they did so in order to re-enter the way of salvation. And in this they suited the action to the word. Thus the schism which was well contemplated by them before it was solemnly established by the authority which they rejected and transformed by that authority into a just penal sanction.

II. Schism in the Light of Scripture and Tradition.—As schism in its definition and full sense is the practical denial of ecclesiastical unity, the former requires a clear definition of the latter, and to prove the necessity of the latter is to establish the intrinsic malice of the former. Indeed the texts of Scripture and Tradition show these aspects of the same truth to be so closely united that passage from the former to the latter is constant and spontaneous. The Church built on Peter as on an unshakable foundation the indestructible edifice of His Church He thereby
indicated its essential unity and especially the hierarchical unity (Matt., xvi, 18). He expressed the same thought when He referred to the faithful as a Kingdom and a flock: "Other sheep I have, that are not of this fold: them also I must bring, and they shall hear my voice, and there shall be one fold and one shepherd" (John, x, 16). Unity of faith and worship is more explicitly indicated by the words outlining the solemn mission of the Apostles: "Going therefore, teach ye all nations; baptizing them in the name of the Father, and of the Son, and of the Holy Ghost" (Matt., xxviii, 19). These various forms of unity are the object of the prayer after the Last Supper, when Christ prays for His own and asks "that they may be one" as the Father and the Son are one (John, xvii, 21, 22). Those who violate the laws of unity shall become strangers to Christ and his spiritual family: "And if he will not hear the Church, let him be to thee as the heathen and publican" (Matt., xviii, 17).

In faithful imitation of his Master's teaching St. Paul often refers to the unity of the Church, describing it as one edifice, one body, a bond between the members of the human body (I Cor., xi, 24), and the same unity between the members of the human body (I Cor., xii, 13). He enumerates its various aspects and sources: "For in one Spirit were we all baptized into one body, and in one Spirit have we all been made to drink" (I Cor., xii, 13). He sums it up in the following formula: "One body and one spirit; one Lord, one faith, one baptism" (Eph., iv, 4-5). Finally he arrives at the logical conclusion when he anathematizes doctrinal novelties and the authors of them (Gal., i, 9), likewise when he writes to Titus: "A man that is a heretic after the first and second admonition, avoid" (Tit., iii, 10); and again when he so energetically condemns the dissensions of the community of Corinth: "There are contentions among you...every one of you saith: I am indeed of Paul; and I am of Apollo; and of Cephas; and I of Christ. Is Christ divided? Was Paul then crucified for you? Or were you baptized in the name of Paul?" (I Cor., i, 11-13). "Now, I beseech you, brethren, by the name of our Lord Jesus Christ, that you all speak the same thing, and that there be no schisms among you; but that you be perfectly joined in the same mind, and in the same judgment" (I Cor., i, 10). St. Luke says in his account of the primitive church mentions its unanimity of belief, obedience, and worship: "They were persevering in the doctrine of the apostles, and in the communication of the breaking of bread, and in prayers" (Acts, ii, 42). All the first Epistle of St. John is directed against contemporary innovators and schismatics; and the author regards them as so foreign to the Church that in contrast to its members "the Children of God", he calls them "the children of the devil" (I John, iii, 10); the children "of the world" (iv, 5), even Antichrist (ii, 22; iv, 3).

The unity is found in all the evidences of Tradition, beginning with the oldest. Before the end of the first century St. Clement writing to the Church of Corinth in order to restore peace and harmony strongly inculcates the necessity of submission to the "hegumenos" (I Cor., i, 3), "the guides of our souls" (ii, 1), and to the "presbyters" (xvii, 6; liv, 2; livi, 1). It is, says he, a "grave sin" to disregard their authority as the Corinthians are doing (xliv, 3, 4; xvi, 6); it is a duty to honour them (i, 3; xxi, 6). There must be no division in the body of Christ, xiv, 6. The fundamental reason of all this is the Divinely instituted hierarchical order. The work of Christ is entrusted to the Church, sent by Christ as He was sent by God (xiii, 1, 2). It was they who established the "episcopi and deacons" (xiii, 4) and decided that others should succeed them in their ministry (xliv, 2). He thus explains the gravity of the sin and the severity of the reproaches addressed to the fomentors of the troubles: "Why should there be among you disputations, quarrels, divisions, schisms, and heresies? Have you not one Father? Have you not one Spirit? Have you not one body? Is it not the same God, one and the same Christ? Is it not the same spirit of grace that has been poured out upon us? Have we not a common vocation in Christ? Wherefore, divide and separate the members of Christ, be at war with your own body, be so foolish as to forswear yourselves? for all the members of the Body of Christ are of one and the same Ghost". St. Ignatius insists no less forcibly on the necessity of unity and the danger of schism. He is the first author in whom we find episcopal unity clearly outlined, and he beseeches the faithful to range themselves about the "presbyters" and the deacons and especially through them and with them about the bishop: "It is fitting that you be of one mind with the bishop, as you are, because your venerable presbyterium is attached to the bishop as the strings to the lyre" (Eph., vi, 1); "you must not take advantage of the age of your bishop, but, being mindful of the power of his divinity, believe him in every manner of respect, as do the holy priests" (Martyr. 1). The bishop is the centre and pivot of the Church: "Where he is, there is the community be" (Smyrn., xi, 1). The duties of the faithful towards the hierarchy are summed up in one: to be united to it in sentiments, faith, and obedience. They must be submissive to the bishop and the "presbyters" and the deacons ("Eph., ii, 2; v, 3; xx, 2; "Magn." ii, iii, 1; vi, i, 2; xii, 2; "Trall., ii, i, 2; xii, 2; Philad., vii, 1; Smyrn., viii, i; "Polyc., vi, 1." Jesus Christ being the word of the Father and the bishop being in the doctrine of Christ (σῶς άκοούσα σε) it is fitting to adhere to the doctrine of the bishop (Eph., ii, 2; iv, 1): "Those who belong to God and Jesus Christ ally themselves with the bishop. Brethren, be not deceived; whatsoever follows a schismatic shall not inherit the Kingdom of Heaven" (Philad., iii, 2, 3). Finally, as the bishop is the doctrinal and disciplinary centre so he is the liturgical centre: "Let that Eucharist be lawful which is consecrated by the bishop or one appointed by him. It is forbidden to baptize or celebrate the agape without the bishop; what approves is what is pleasing to God, in order that all that is done may be holy and valid" (Smyrn., viii, 2). Towards the end of the chapter St. Irenaeus lauds in glowing terms the unity of that universal Church "which has but one heart and one soul, whose faith is in keeping" and which seems "as the sole sun illuminating the whole world" (Adv. haeres., i, 10). He condemns all doctrinal division, basing his arguments on the teaching authority of the Church in general and of the Roman Church in particular. The doctrine of salvation, preached by the Apostles, is preserved in the Churches founded by them; but since it would take too long to question all the Apostolic Churches it is sufficient to turn to that of Rome: "For if the entire Church of the world, should be in agreement with this Roman Church, because of its superior pre-eminence; and in it all the faithful have preserved the Apostolic tradition" (iii, 2, 3). It is therefore of the utmost necessity to adhere to this Church because where the Church is, there is the Spirit of God, and where the Spirit of God is there is the Church, there is all grace and the spirit is truth (iii, 24). But to adhere to this Church is to submit to the hierarchy, its living and infallible magistracy: "The priests of the Church are to be obeyed, those who are the successors of the Apostles and who with the episcopal succession have been named" (ii, 3, 3). He who leaves the successors of the Apostles and assemble in any separated place must be regarded with suspicion or as heretics, as men of evil doctrine, or
as schismatics. Those who rend the unity of the Church receive the Divine chastisement awarded to Jeroboam; they must all be avoided” (iv, 26).

At the beginning of the third century Clement of Alexandria describes the Church as the city of the Logos whose foundation must be sought because it is the assembly of all the faithful having a common Saviour (“Strom.” iv, 20; vii, 1; “Pedag.” i, 6; iii, 12). Origen is more explicit; for him also the Church is the city of God (Contra Cels., iii, 30), and he adds: “Let no one be deceived; outside this abode, that is outside the Church, no one is saved. If anyone leaves it he is in immediate danger of his death” (De Resurrectione Jesu Nave, Hom., iii, 5). In Africa, Tertullian likewise condemns all separation from the existing Church. His “De prescripturibus suo” is famous, and the fundamental thesis of the work, inferred by its very title, is summed up in the priority of truth and the relative novelty of error (principalitate veritatis et posterioritate mendacii), thus implying the prohibition to withdraw from the guidance of the living magisterium: “If the Lord Jesus sent His Apostles to preach we conclude that we must not receive other preachers than those appointed by Him. What they have preached, in other words, can only be established by the Churches founded by the Apostles themselves, to which they preached the Gospel by word and writing” (De praescr., xx).

But the great African champion of ecclesiastical unity was St. Cyprian, against the schismatic Church of Carthage. He conceived this unity as resting on the effective authority of the bishops, their mutual union, and the pre-eminence of the Roman pontiff: “God is one, Christ is one, one is the Church, and one the chair founded on Peter by the word of the Lord (Epist. lxxvi.) “This unity we should keep as a work in the Church should be upheld and defended, in order to show that the episcopate itself is one and undivided” (De eccles. unit., v). “Know that the bishop is in the Church and the Church in the bishop, and that if anyone is not with the bishop he is not in the Church. . . . The Catholic Church is one, formed of the harmonious union of pastors who mutually support one another” (Epist. lxxvi, 6). To unity of faith must be joined liturgical unity: “A second altar and a new priesthood cannot be set up besides the one altar and the one priesthood” (Epist. ii, 24). Cyprian saw no legitimate reason for schisms; for them who would be so misled by the spirit of discord as to believe that it is permitted to rend, or who would dare rend the Divine unity, the garment of the Lord, the Church of Jesus Christ? (De ecc., unit., viii). “The spouse of Christ is chaste and incorruptible. Whoever leaves the Church to follow an adulteress renounces the promises of the Church. He that abandons the Church of Christ will not receive the rewards of Christ. He becomes a stranger, an ungodly man, an enemy. God cannot be a Father to him to whom the Church is not a mother. As well might one be saved out of the ark of Noah as out of the Church. He who does not respect its unity will not respect the law of God; he is without faith in the Father and the Son, without life, without salvation” (op. cit., viii).

From the fourth century the doctrine of the unity of the Church was so clearly and universally admitted that it became the rule of all theologians. The lengthy polemics of Optatus of Milevis (“De schism. Don.” P. L., XI), and of St. Augustine (especially in “De unit. ecc.” P. L., XLIII) against the Donatists accuse these sectaries of being separated from the ancient and primitive trunk of Christianity. And to this was added as a portion of the universal Church St. Augustine replied: “If you are in communion with the Christian world, send letters to the Apostolic Churches and show us their replies” (Ep., xiv, 3). These letters (litterae formatae) then constituted one of the authentic marks and elements of visible unity. Concerning this unity the various forms of which he explains, St. Augustine agrees with St. Cyril in maintaining that outside of it there can be no salvation. “Salus extra ecclesiam non est” (De bapt., iv, 24), and he adds in confirmation of this that outside the Church the means of salvation, baptism, and even martyrdom will avail nothing, the Holy Ghost not being communicated. During the same century the extreme importance of this truth was emphasised as a factor of unity. Jesus Christ, says St. Optatus, desired to attach unity to a definite centre; to this end He made “Peter the head of all the Apostles; to him He first gave the episcopal see of Rome, in which role see unity should be preserved for all, he is therefore a sinner and a schismatic who would erect another see in opposition to it” (De schism. Don., ii, 2); “Solicitude for assuring unity caused blessed Peter to be preferred before all the Apostles and to receive alone the keys of the Kingdom of Heaven that he might admit others” (vii, 3). Patristic writers of the fourth and fifth centuries give to Peter alone the power of the keys “to make him alone the foundation and beginning of unity” (ad unum idem ut unitatem fundaret ex unum Epist., iii, 11).

Most contemporary writers in the Latin Church, Hilary, Victorinus, St. Ambrose, the Ambrosiaster, St. Jerome, speak in like manner and quite as explicitly. All regard Peter as the foundation of the Church, the Prince of the Apostles who was made perpetual head in order to cut short any attempt at schism. “Where Peter is,” concludes St. Ambrose, “there is the Church; where the Church is there is no death but eternal life” (In Ps., xi, 30). And St. Augustine: “That union which the Church enjoys with the chair of Peter” (Epist., vii, 2). Both declare, like St. Optatus, that to be out of the Roman communion is to be out of the Church, but they lay especial emphasis on the jurisdictional and teaching authority of the centre of unity. Their texts are classics: “We must have recourse to your clemency, beseeching you not to let the head of all the Roman world, the Roman Church, and the most holy Apostolic Faith be disturbed; for thence all derive the rights of the Catholic communion” (Ambrose, “Ep.” xi, 4). “I who follow no guide but Christ am a Christian, what transactions in foreign churches that is with the chair of Peter. I know that on this rock the Church is built. Whosoever partakes of the Lamb outside this house commits a sacrilege. Whosoever does not gather with you, scatters: in other words whosoever is not with Christ is with Antichrist” (Jerome, “Epist.” vii, 2).

The East also saw in Peter and the episcopal see founded by him the keystone of unity. Didymus calls Peter “the corypheus, the head, who was first among the Apostles, through whom the others received the keys” (De Trinit., i, 27, 30; ii, 10, 18). Epiphanius also regards him as “the corypheus of the Apostles, the firm stone on which rests the unshakable faith” (Anchor.” ix, 34; “Hæres.” ix, 7, 8) and St. Chrysostom speaks unceasingly of the privileges conferred on Peter by Christ. Moreover the Greeks recognized in the Roman Church a pre-eminence and consequently an incomparable role unifying both the East and the West, and it was therefore to intervene in the disputes of the particular Churches, as is proved by the cases of Athanasius, Marcellus of Ancyra, and Chrysostom. In this sense St. Gregory Nazianzen calls ancient Rome “the president of the universe, τὸν ἐπισκόπον τῶν ἄλλων” (“hymnus de vita sua”), and it is also understood why even the Eusebians were willing that the case of Athanasius, after they had passed on it, should be
submitted to the pope's judgment (Athan., "Apol. contra Arian", 20).

III. Attempts to Legitimize Schism.—The foregoing texts are sufficient to establish the gravity of schism from the standpoint of the economy of salvation and morals. In the connexion it may be of interest to quote the appreciation of Bayle, a writer above suspicion of partiality and a tolerant judge: "I know not," he writes, "a more grievous crime than that of tearing the mystical body of Jesus Christ, His church which He purchased with His own blood, that mother which bore both to connect and nourish us with the milk of understanding, who leads us to eternal life" (Supplement to Philosophical Comment, preface).

Various motives have been brought forward in justification of Schism: (1) Some have claimed the introduction into the Church of abuses, dogmatic and liturgical novelties, superstitions, with which they are permitted, even bound, not to ally themselves. Without entering into the foundation for these charges it should be noted that the authors cited above do not mention or admit a single exception. If we accept their statements separation from the Church is necessarily an evil, an injurious and blameworthy act, a breach of faith, and this independent of all contingent circumstances. Moreover the doctrines of the Fathers exclude a priori any such act at justification; to use their words, it is forbidden for individuals or particular or national Churches to constitute themselves judges of the universal Church; or more of having against one carries its own condemnation. St. Augustine summed up all his controversy with the Donatists in the maxim: "The whole world unhappily, that which wrong, that separate themselves from the whole world in whatsoever portion of the whole world. (quapropter securum est hic facere orbem terrarum bonum, non esse qui dividunt ab orbe terrarum, in quacumque parte orbis terrarum). Here Bayle may be quoted again: "Protestants bring forward only questionable reasons; they offer nothing convincing, no demonstration; they prove and object, but there are replies to their proofs and objections; they answer and are answered endlessly; is it worth while to make a schism?" (Dict. crit., art. Nihilius).

(2) Other schisms have pleaded the division of the articles of the Creed into fundamental and non-fundamental. Under Fundamental Articles (q.v.) it is often said this distinction was made prior to the sixteenth century, and repugnant to the very conception of Divine faith, is condemned by Scripture, and, for want of a clear line of demarcation, authorizes the most monstrous divergences. The indispensable unity of faith extends to all the truths revealed by God and transmitted by the Apostles. Tradition repeats, though in different forms, all that Irenaeus wrote: "The Church spread everywhere throughout the world received from the Apostles and their disciples faith in one God" (here follow the words of the Creed), then the writer continues: "Depository of this preaching and this faith, the Church who multiplies throughout the world, watches them as diligently as though she dwelt in one house. She believes unanimously in these things as though she had but one heart and soul; she preaches them, teaches them, and bears witness to them as though she had but one mouth. Though there are in the world as many churches as there are languages and different species, the Church who has received the Gospel and identical current of tradition. Neither the Churches founded in Gaul, nor those among the Iberians, nor those in the countries of the Celts, nor those in the East, nor those of Egypt, nor those of Lybia, nor those in the centre of the world present any different faith or preaching; but it is the faith which is created by God, is one and the same throughout the world, so a single light, a single preaching of the truth, illuminates everywhere and enlightens all men who wish to attain to the knowledge of truth" (Adv. Haer., i, 10). It has been shown above how the Bishop of Lyons declared that the continuators of the Apostolic ministry were the "presbyters of the Church", and that a man was a Christian and a Catholic only on condition of obeying them without reserve.

(3) The theory of the happy medium or via media, advocated by the Anglicans, especially by the Oxford leaders of the early nineteenth century as a means of averting the difficulties of the system of fundamental articles, is no more acceptable to Newman than the system of Schism. He demonstrated and extolled it to the best of his talent in his "Via Media", but he soon recognized its weakness, and abandoned and rejected it even before his conversion to Catholicism. According to this theory, in order to safeguard unity and avoid schism it is sufficient to abide by Scripture as interpreted by each individual under the direction or with the assistance of tradition. At any rate the Church should not be regarded as infallible, but only as a trustworthy witness with regard to the true sense of the inspired text when she testifies to an interpretation received from the Apostolic line of teaching. It seems absurd to separate out the illusory and almost contradictory character which such a rule ascribes to the living teaching authority; obviously, it does not meet the conditions for unity of belief which requires conformity with Scripture and, no less, with the living authority of the Church, which exactly, implies ability to distinguish between the infallible teaching authority—both to that which interprets the Scriptures and to that which preserves and transmits under any other form the deposit of Revelation.

St. Irenaeus is most explicit on all these points: according to him, the Church is preserved equally by Scripture and tradition (Adv. Haer., iii, 2), but the authentic guardian of both is the Church, i.e. the bishops as successors of the Apostles: "Apostolic tradition is manifested throughout the world, and everywhere in the Church it is within the reach of those who desire to know the truth, for we can enumerate the bishops established by the Apostles, as well as their successors down to our own times" (op. cit., iii). To these guardians and to them alone we should have recourse with confidence: "The truth which it is easy to know through the Church must not be sought elsewhere; in the Church we find, as in a rich merchant, the whole treasure; and in its fulness all that concerns the truth: from her whosoever desires it shall receive the draught of life. She herself is the gate of life; all the others are thieves and robbers" (iii, 4). Such is the authority of the living tradition that, in default of Scripture, recourse must be had to tradition alone. "What would have become of us if the Apostles had not left us the Scriptures? Would we not have to rely on that tradition which they confided to those to whom they committed the government of the Churches? This is what is done by many barbarian peoples who believe in Christ and who bear the law of salvation written in their hearts by the Holy Spirit without ink or paper and who faithfully preserve the ancient tradition" (iii, 4). It is plain that with the assistance of the Holy Ghost the teaching authority of the Church is preserved from error: "Where the Church is, there is the Spirit of God; and where the Spirit of God is there is the Church, with the Church there is the Spirit; the Spirit is truth" (iii, 24). That is why obedience must be rendered to the presbyers who are in the Church, and who having succeeded the Apostles, together with the episcopal succession have received by the will of the Father a certain charisma of truth" (iii, 25). This is the principle from which arises the stress laid on the assertions and the restrictions of the Oxford School. The same conclusion may be drawn from Tertullian's
delegation of the impossibility of solving a difficulty or terminating a dispute by Scripture alone (De praep. xix), and from Origen's words: "Since among many who boast of a doctrine in conformity with that of Christ some do not agree with their predecessors, let all adhere to the ecclesiastical doctrine transmitted from the Apostles by way of succession and preserved in the Church till the present time: we have no truth in which to believe but that which does not deviate from the ecclesiastical and Apostolic tradition." (Comm. Hebr. ii. 2.)

IV. Principal Schisms.—In this world the Church is militant and as such is exposed to conflict and trial. Human conditions being what they are partial or local schisms are bound to occur: "I hear," says St. Paul, "that... there are schisms among you; and I am not a little troubled. For you are also full of jealousy and strife among you." (I Cor. xi, 18-19). In the full and primitive sense of the word every serious rupture of unity and consequently every heresy is a schism. This article, however, will pass over the long series of heresies and treat only those defections of the Church which amounted to schism and bore the specific name of schisms, because most frequently, and at least in the beginning of each such sectarian division, doctrinal error was only an accessory. They are treated in chronological order and the most important only briefly, these being the subjects of special studies in the Encyclopaedia.

(1) Mention has already been made of the "schisms" of the nascent Church of Corinth, when it was said among its members: "I am of Paul; and I am of Apollo; and I of Cephas; and I of Christ." To them St. Paul's energetic intervention put an end. (2) According to Hegesippus, the most advanced section of the Judaizers or Ebionites at Jerusalem followed the bishop Thebutis as against St. Simeon, and after the death of St. James, a.d. 63, separated from the Church. (3) There were numerous local schisms in the third and fourth centuries. At Rome, Pope Callistus (217-229) was opposed by a party who took up the mission with which he applied the penitential discipline. Hippolytus placed himself as bishop at the head of these malcontents and the schism was prolonged under the two successors of Callistus, Urban I (222-30) and Pontianus (230-35). There is no doubt that Hippolytus had returned to the old Church of Alexandria (cf. d'Alès, "La théol. de s. Hippolyt e," Paris, 1906 introduction). (4) In 251 when Cornelius was elected to the See of Rome a minority set up Novatian as an antipope, the pretex against being the pardon which Cornelius promised to those who after apostatizing should repent. Through a spirit of contradiction Novatian went so far as to refuse forgiveness even to the dying and the severity was extended to other categories of grave sins. The Novatians sought to form a Church of saints. In the East they called themselves caesarii, pure. Largely under the influence of this party they established a second and third order, to which those who deserted Catholicism to join their ranks. The sect developed greatly in the Eastern countries, where it subsisted until about the seventeenth century, being recruited not only by the defection of Catholics, but also by the accession of Montanists.

(5) During the same period the Church of Carthage was also a prey to intestinal divisions. St. Cyprian upheld in reasonable measure the traditional principles regarding penance and did not accord to the letters of confessors called tibelli paces the importance desired by some. One of the principal adversaries was the priest Donatus. Fortunatus became the bishop of the party; but the schism was short-lived and took the name of the deacon Felicissimus who played an important part in it. (6) With the dawn of the fourth century Egypt was the scene of the schism of Meletius, Bishop of Lyopolis, in the Thebaid. Its causes are not known with certainty; some ancient authors ascribe it to rigorist tendencies regarding penance, while others say it was occasioned by usurpation of power by Arius, prefect of the provinces of Egypt, referring to the whole of the schism, but did not succeed in completely eradicating it; there were still vestiges of it in the fifth century. (7) Somewhat later the schism of Antioch, originating in troubles due to Arius, provoked particular complications. When the bishop, Eustathius, was deposed in 330 a small section of his flock remained faithful to him, but the majority followed the Arians. The first bishop created by them was succeeded (361) by Meletius of Sebaste in Armenia, who by force of circumstances became the leader of a second orthodox party. In fact Meletius did not fundamentally depart from the Faith of Nicaea, and he was soon rejected by the Arians: on the other hand he was not recognized by the Eustathians, who saw in him the choice of the heretics and also took him to task for some merely terminological differences. The schism of Paulinus of Nicaea, in 355, was followed by that of St. Basil (d. 392), Eustathian bishops, were recognized in the West as the true pastors, while in the East the Meletian bishops were regarded as legitimate.

(8) After the banishment of Pope Liberius in 355, the deacon Felix was chosen to replace him and he adhered to the schism of the Eunomians in the East.

The schism, quenched for a time by the death of Felix, was revived at the death of Liberius and the rivalry brought about bloody encounters. It was several years after the victory of Damasus before peace was completely restored. (9) The same period witnessed the schism of the Luciferians. Lucifer, Bishop of Calaris, or Cagliari, was displeased with Athanasius and his friends who at the Synod of Alexandria (362) had pardoned the repentant Semi-Arians. He himself had been blamed by Eusebius of Vercelli because of his haste in ordaining Paulinus, Bishop of the Eustathians, at Antioch. For these two reasons he separated from the communion of the Catholic bishops. For some time the schism won adherents in Sardinia, where it had originated, and in Spain, where Gregory, Bishop of Elvira, was its chief abettor. (10) But the most important of the fourth-century schisms was that of the Donatists. These were those who, while maintaining their obstinacy and fanaticism as for the efforts and the writings rather uselessly multiplied against them by St. Augustine and St. Optatus of Milevis. (11) The schism of Acacius belongs to the end of the fifth century. It is connected with the promulgation by the emperor Zeno of the edict known as the Formula of Acacius. Issued with the intention of putting an end to the Christological disputes, this document did not satisfy either Catholics or Monophysites. Pope Felix II excommunicated its two real authors, Peter Mongus, Bishop of Alexandria, and Acacius of Constantinople. A break between the East and the West lasted thirty-five years. At the instance of the general Vitalian, protector of the orthodox, Zeno's successor Anastasius promised satisfaction to the adherents of the Council of Chalcedon and the conviction of a general council, but he showed so little good will in the matter that union was only restored by Justin I in 519. The reconciliation was without official sanction in a profession of Faith to which the Greek bishops subscribed, and which, as it was sent by Pope Hormisdas, is known in history as the Formula of Hormisdas.

(12) In the sixth century the schism of Aquileia was caused by the short reign of Pope Vigilius to the condemnation of the Three Chapters (553). The ecclesiastical provinces of Milan and Aquileia refused to accept this condemnation as valid and separated
for a time from the Apostolic See. The Lombard invasion of Italy (568) favoured the resistance, but from 570 the Milanese returned by degrees to the communion of Rome; the portion of Aquilea subject to the Byzantines returned in 607, after which date the schism had but a few churches. It died out completely under Sergius I, about the end of the eighth century, and a schism through the schism of Photius, which, though it was transitory, prepared the way by nourishing a spirit of defiance towards Rome for the final defection of Constantinople. (14) This took place less than two centuries later under Michael Cerularius (q. v.) who at one stroke (1053) closed all the churches of the schismatic land except a few, and appointed by members of district assemblies; that of bishops to electors named by the assemblies of departaments; and canonical institution devolved upon the metropolitan and the bishops of the province. All benefices without cure of souls were suppressed. A later ordinance made obedience to these articles a condition of admission to any ecclesiastical office. A large number of bishops and priests, in all, according to some sources, about a sixth of the clergy, and according to other documents nearly a third, were weak enough to take the oath. Thenceforth the schism was divided into two, the schism of the bishops and the non-jurors, and the schism was carried to the utmost extreme when intruders under the name of bishops claimed to occupy the departmental sees, during the lifetime and even in defiance of the rights of the real titulars. The condemnation of the Civil Constitution by Pius VI in 1791 opened the eyes of some, but others persisted until their "Constitutional Church" declined shamefully and disappeared irrevocably in the Revolutionary turmoil.

(15) The schism of Anacletus in the twelfth century, the case of Felix V in the fifteenth, was due to the existence of an antipope side by side with the legitimate. The schism in the Church clergy was generally so humanitarian. (1130) Innocent II had been regularly elected, but a powerful and a whole faction set up in opposition to him Cardinal Peter of the Pierleoni family. Innocent was compelled to flee, leaving Rome in the hands of his adversaries. He found refuge in France, St. Bernard ardently defended his cause as did also St. Norbert. Within a year nearly all Europe had declared in his favour, only Scotland, Southern Italy, and Sicily constituting the other party. The emperor Lothaire brought Innocent II back to Rome, but, supported by Roger of Sicily, the antipope retained possession of the Leonine City, where he died in 1138. His successor Victor IV, two months after his election, sought and obtained pardon and reconciliation from the legitimate pontiff. The case of Felix V was more simple. Felix V was the name taken by Amadeus of Savoy, elected by the Council of Basle, when it went into open revolt against Pope Urban II. He refused to disband and thus closed the communication (1439). The antipope was not accepted in Savoy and Switzerland. He lasted for a short time with the pseudo-council which had created him. Both submitted in 1449 to Nicholas V, who had succeeded Eugenius IV. (16) The Great Schism is the subject of a historical article (Schism, Western); see also Constantinople, Council of; Pisa, Council of.

(17) Everyone knows the shameful origins of the schism of Henry VIII, which was the prelude to the introduction of Protestantism into England. The volupitous marriage was opposed by the pope in his projects of divorce and remarriage, and he separated from the pope. He succeeded so well that in 1531 the general assembly of the clergy and the Parliament proclaimed him head of the national Church. Warham, Archbishop of Canterbury, had at first caused the adoption of a restrictive clause: "as far as Divine law permits". But this important reservation was not respected, for the rupture with the Roman Court followed almost immediately. In 1534 the Act of Supremacy was voted according to the terms of which the king became the sole head of the Church of England and was to enjoy all the prerogatives, if not the title and authority of the pope. Refusal to recognize the new organization was punished with death. Various changes followed: suppression of convents, destruction of relics and of numerous pictures and statues. But dogma was not again attacked under Henry VIII, who pursued with equal severity both attachment to the pope and the doctrines of the Reformers. (18) In the article Jansenius and Jansenism are described the formation and vicissitudes of the schism of Utrecht, the unhappy consequence of Jansenism, but which never spread beyond a handful of fanatics. Subsequent schisms belong to the end of the eighteenth and the nineteenth century.

(19) The first was caused in France by the Civil Constitution of the clergy of 1790. By this law the national Constituent Assembly aimed at imposing on the Church a new organization which essentially modified its condition as regulated by public ecclesiastical law. The 134 bishops of the kingdom were divided into 83, according to the territorial division into departaments; the choice of curial lances depended on members of district assemblies; that of bishops to electors named by the assemblies of departaments; and canonical institution devolved upon the metropolitan and the bishops of the province. All benefices without cure of souls were suppressed. A later ordinance made obedience to these articles a condition of admission to any ecclesiastical office. A large number of bishops and priests, in all, according to some sources, about a sixth of the clergy, and according to other documents nearly a third, were weak enough to take the oath. Thenceforth the schism was divided into two, the schism of the bishops and the non-jurors, and the schism was carried to the utmost extreme when intruders under the name of bishops claimed to occupy the departmental sees, during the lifetime and even in defiance of the rights of the real titulars. The condemnation of the Civil Constitution by Pius VI in 1791 opened the eyes of some, but others persisted until their "Constitutional Church" declined shamefully and disappeared irrevocably in the Revolutionary turmoil.

(20) A schism of another nature and of less importance was that of the so-called Petite Eglise or the Non-Communians, formed at the beginning of the nineteenth century by groups who were dissatisfied with the Concordat and the concordatist clergy. In the provinces of the west of France the party acquired a certain stability from 1801 to 1815; at the latter date it had become a distinct sect. It languished on till about 1830, and eventually became extinct for lack of priests to perpetuate it. In Belgium some of its members call themselves Stevenists, thus abusing the name of a reputable ecclesiastical, Corneille Stevens, who was capitular vicar-general of the Diocese of Namur until 1802, who afterwards wrote against the Organic Articles, but accepted the Concordat and taught the same doctrine in 1820, as he had lived, in submission to the Holy See.

(21) In 1831 the Abbé Chatel founded the French Catholic Church, a small group which never acquired importance. The founder, who at first claimed to retain all the dogmas, had himself consecrated bishop of Fabre Paladret, and other self-styled bishop of the "Constitutional" type; he soon rejected the infallibility of the teaching Church, celibacy of priests, and abstinence. He recognized no rule of faith except individual evidence and he officiated in French. The sect was already on the point of being slain by ridicule when its meeting-places were closed by the Government in 1842.

(22) About the same time Germany was the scene of a somewhat similar schism. When in 1844 the Holy Coat was exposed at Trier for the veneration of the faithful, a suspended priest, Johannes Ronge, seized the occasion to publish a violent pamphlet against Bishop Daniel Tietz. Both the author and the jurists ranged themselves on his side. Almost simultaneously John Czeraki, a dismissed vicar, founded in the Province of Posen, a "Christian Catholic community". He had imitators. In 1845 the "German Catholics", as these schismatics called themselves, held a synod at Leipsig at which they rejected among other
things the primacy of the pope, auricular confession, ecclesiastical celibacy, the veneration of the saints, and suppressed the Canon in their Eucharistic Liturgy which they called the "German liturgy". They gained recruits in small numbers until 1848, but after that date they declined, being on bad terms with the Governments which had at first encouraged them, but which bore them ill-will because of their political agitations.

(23) While this sect was declining another sprang up in antagonism to the Vatican Council. The opponents of the recently-defined doctrine of infallibility, the Old Catholics, at first contended themselves with a simple protest at the Congress of Mainz in 1833, then pretended to constitute a separate Church. Two years later they chose as bishop the Professor Reinkens of Breslau, who was recognized as bishop by Prussia, Baden, and Hesse. Thanks to official assistance the rebels succeeded in gaining possession of a number of Catholic churches and soon, like the German Catholics and schismatics in general, they introduced disciplinary and doctrinal novelties, they successfully abandoned the precept of confession (1874), ecclesiastical celibacy (1878), the Roman liturgy, which was replaced (1880) by a German liturgy, etc. In Switzerland also the opposition to the Vatican council, and the creation of a separate community, which also enjoyed government favour. An Old Catholic faculty was founded at Berne for the teaching of theology, and E. Herzog, a professor of this faculty, was elected bishop of the party in 1878. A congress assembled in 1890, at which most of the dissident groups, Jansenists, Old Catholics, etc., had representatives, resolved to unite all these diverse elements in the foundation of one Church. As a matter of fact, they are all on the road to free-thinking and Rationalism. In England a recent attempt at schism under the leadership of Herbert Beale and Arthur Howard, two Nottingham priests, and Arnold Mathew, has failed to assume proportions worthy of serious notice.

Schism, Eastern.—From the time of Diotrepos (III John, i, 9-10) there have been continual schisms, of which the greater number were in the East. Arianism produced a huge schism; the Nestorian and Monophysites, whose remains still linger, were both extreme. However, the Eastern Schism always means that some deplorable quarrel of which the final result is the separation of the vast majority of Eastern Christians from union with the Catholic Church, the schism that produced the separated, so-called "Orthodox" Church.

Remote Preparations of the Schism.—The great Eastern Schism must not be conceived as the result of only one definite quarrel. It is not true that after centuries of perfect peace, suddenly on account of one dispute, nearly half of Christendom fell away. Such an event would be unparalleled in history, at any rate, unless there were some great heresy, and in this quarrel there was no heresy at first, nor has there ever been a hopeless disagreement about the Faith. It is a case, perhaps the only prominent case, of a pure schism, of a breach of intercommunion caused by anger and bad feeling, not by a rival theology. It would be inconceivable in that hundreds of bishops would suddenly break away from union with their chief, if all had gone smoothly before. The great schism is rather the result of a very gradual process. Its remote causes must be sought centuries before there was any suspicion of their final effect. There was a series of temporary schisms that loosened the bond and prepared the way. The two great breaches, those of Photius and Michael Cerularius, which are remembered as the origin of the present state of things, were both healed up afterwards. Strictly speaking, the present schism dates from the Eastern repudiation of the Council of Florence (in 1472). So although the names of Photius and Cerularius are justly associated with this disaster, inasmuch as their quarrels are the chief elements in the story, we must imagine that they were the sole, the first, or the last authors of the schism. If we group the story around their names we must explain the earlier causes that prepared for them, and note that there were temporary reunions later.

The first cause of all was the gradual estrangement of East and West. To a great extent this estrangement was inevitable. The East and West grouped themselves around different centres—at any rate as immediate centres—used different rites and spoke different languages. We must distinguish the position of the pope as visible head of all Christendom from his place as Patriarch of the West. The position, sometimes now advanced by anti-papal controversialists, that all bishops are equal in jurisdiction, was utterly unknown in the early Church. From the very beginning we find a graduated hierarchy of metropolitans, exarchs, and patriarchs. We find, too, that from the beginning the idea that the bishop of the see of a metropolitan, or the see of a Patriarch, is the diocese of the founder of his see, that, therefore, the successor of an Apostle has special rights and privileges. This graduated hierarchy is important as explaining the pope's position. He was not the one immediate superior of each bishop; he was the chief of an elaborate organization, as it were the apex of a carefully graduated pyramid. The consciousness of the early Christian probably would have been that the heads of Christendom were the patriarchs; then further he knew quite well that the chief patriarch sat at Rome. However, the immediate head of each part of the Church was in the see of a Patriarch. After Chalcedon (451) we must count five patriarchates: Rome, Constantinople, Alexandria, Antioch, and Jerusalem.

The difference between the East and West then was in the first place that the pope in the West was not only supreme pontiff, but also the local patriarch. He represented to Eastern Christians a remote and foreign authority, the last court of appeal, for very serious questions, after their own patriarchs had been found incapable of settling them; but to his own Latins in the West he was the immediate head, the authority immediately over their metropolitans, the final court of appeal to their bishops. All Latins in the West went direct to Rome. Rome was the Mother Church in many senses, it was by missionaries sent out from Rome that the local Western Churches had been founded. The loyalty of the Eastern Christians on the other hand went first to his own patriarch, so there was always a danger of divided allegiance—if the patriarch had a quarrel with the pope—such as would have been inconceivable in the West. Indeed, the falling away of so many hundreds of Eastern bishops, of so many millions of simple Christians, is explained sufficiently by the schism of the patriarchs. If the four Eastern patriarchs agreed upon any course it was practically a foregone conclusion that their metropolitans and bishops would follow them, and that the priests and people would follow the bishops. So the very organisation of the Church in some sort already prepared the ground for a contrast (which might become a rivalry) between the West with its four of Eastern with its one see and the Eastern patriarchs with their subjects on the other.

Further points that should be noticed are the differences of rite and language. The question of rite follows that of patriarchate; it made the distinction obvious to the simplest Christian. A Syrian, Greek or Egyptian layman would, perhaps, not understand
much about canon law as affecting patriarchs; he could not fail to notice that a travelling Latin bishop or priest celebrated the Holy Mysteries in a way that was very strange, and that stamped him as a (perhaps suspicious) foreigner. In the other hand, the Roman Rite was first affecting, then supplanting, all others, and in the East the Byzantine Rite was gradually obtaining the same position. So we have the germ of two unities, Eastern and Western. Undoubtedly both sides knew that other rites were equally legitimate ways of celebrating the same mysteries, but the difference was to a certain extent increased when the Byzantine bishops found they might use their own liturgy at home, while the Western bishops were compelled to use the Roman Rite. We see that this point was an important one from the number of accusations against purely ritual matters brought by Cerularius when he looked for grounds of quarrel.

Even the detail of language was an element of separation. It is true that the East was never entirely hellenized as the West was latinized. Nevertheless, Greek did become to a great extent the international language in the East. In the Eastern councils all the bishops talk Greek. So again we have the same two unities, this time in language—a practically Greek Eastern and a partly Latin Western. In the latter language we can conceive this detail as a cause of estrangement, but it is undoubtedly true that many misunderstandings arose and grew, simply because people could not understand each other. For during the time when these disputes arose, hardly anyone knew a foreign language. It was not till the 8th century at least, that Clement and Leontius attempted grammars and dictionaries arose. St. Gregory I (d. 604) had been a priest at Constantinople, but he does not seem to have learned Greek; Pope Vigilius (540–55) spent eight unhappy years there and yet never knew the language. Photius was the profoundest scholar of his age, yet he knew no Latin. When Leo IX (1046–54) wrote in Latin to Peter III of Antioch, Peter had to send the letter to Constantinople to find out what it was about. Such cases occur continually and confuse all the relations between East and West. At councils the papal legates addressed the assembled fathers in Latin and no one understood them; the council deliberated in Greek and the legates wondered what was going on. So there arose suspicion on both sides. Interpreters had to be called in; could their versions be trusted? The Latins especially were profoundly suspicious of Greek craft in this matter. Legates were asked to sign documents did not understand; the very men by whom they were sent out told that there was nothing really compromising in them. And so little made so much difference. The famous case, long afterwards, of the Decree of Florence and the forms κατά δε τοῦ θεοῦ, quemadmodum, shows how much confusion the use of two languages may cause.

These causes then combined to produce two halves of Christendom, an Eastern and a Western half, each distinguished in various ways from the other. They are certainly not sufficient to account for a separation of those halves; only we notice that already there was a consciousness of two entities, the first marking of a division, through which rivalry, jealousy, hatred might easily cut a separation.

II. Causes of Estrangement.—The rivalry and hatred arose from several causes. Undoubtedly the first, the root of all the quarrel, was the advance of the See of Constantinople. We have seen that four Eastern patriarchates were in some extent contrasted to the one great Western unity. Had there remained four such unities in the East, nothing further need have followed. What accentuated the contrast and made it a rivalry was the gradual assumption of authority over the other three by the patriarch at Constantinople. It was Constantinople bound to be something greater than the rest, a kind of Eastern pope, as nearly as possible equal to his Western prototype, that was the real source of all the trouble. On the one hand, union under Constantinople really made a kind of rival Church that could be opposed to Rome; on the other hand, through all the career of advancement of the Byzantine bishops they found only one real hindrance, the persistent opposition of the pope. The emperor was their friend and chief ally always. It was, indeed, the emperor's policy of centralization that was responsible for the scheme of making the See of Constantinople a centre. The other patriarchs were also hindered, but not as much. Weakened by the endless Monophysite quarrels, having lost most of their flocks, then reduced to an abject state by the Muslim conquest, the bishops of Alexandria and Antioch could not prevent the growth of Constantinople. Indeed, eventually, they accepted their degradation willingly and came to be idle ornaments of the new patriarch's Court. Jerusalem too was hampered by schisms and Moelens and was itself a new patriarchate, having only the rights of the last see of the five.

On the other hand, at every step in the advancement of Constantinople there was always the contention of Rome. When the new see got its titular honour at the First Council of Constantinople (381, can. 3), Rome refused to accept the canon (she was not represented at the council); when Chalcedon in 451 turned this into a real patriarchate (can. 28) the West and Rome hoped to be able to claim what had been done. When, in the same year, by their quick advancement, the successors of the little suffragan bishops who had once obeyed Heraclius assumed the insolent title "ocumenical patriarch", it was again a pope of Old Rome who sternly rebuked their arrogance. We can understand that jealousy and hatred of Rome rankled in the minds of the new patriarchs, that they were willing to throw off altogether an authority which was in their way at every step. That the rest of the East joined them in their rebellion was the natural result of the authority they had succeeded in usurping over the other Eastern bishops. So we arrive at the essential consideration in this question. The Eastern Schism was not a movement arising in all the East; it was not a quarrel between two large bodies; it was essentially the rebellion of one see, Constantinople, which by the emperor's favour had already acquired such influence that it was able to make unhappily to drag the other patriarchs into schism with it.

We have already seen that the suffragans of the patriarchs would naturally follow their chiefs. If then Constantinople had stood alone her schism would have mattered comparatively little. What made the situation so serious was that the rest of the East eventually sided with her. That followed from her all too successful assumption of the place of chief see in the East. So the advance of Constantinople was doubly the cause of the great schism. It brought her into conflict with Rome and made the Byzantine patriarch almost inevitably the enemy of the pope; at the same time it gave with such enmity meant that of all the East. This being so, we must remember how entirely unwarrantable, novel, and unnatural the advance of Constantinople was. The see was not Apostolic, had no glorious traditions, no reason whatever for its usurpation of the first place in the East, but an accident of secular politics. The first historical Bishop of Byzantium was Metrophanes (315–25); he was not even a metropolitan, he was the lowest in rank a diocesan bishop could be, a suffragan of Heraclea. That is all his successors ever would have been, they would have had no power to influence anyone, had not Constantine chosen his city for his capital. All through their progress they made no pretence of founding their claims on anything but the fact that they were now bishops of the political
capital. It was as the emperor's bishops, as functionaries of the imperial Court, that they rose to the second place in Christendom. The legend of St. An- drew founding their see and a laity under their care, was now abandoned by all scholars. The claim of Constantinople was always frankly the purely Erastian one that as Caesar could establish his capital where he liked, so could he, the civil governor, give ecclesiasti- cal rank in the hierarchy to any see he liked. The 26th of October was the birthday of their city, and the word which Constantinople has become the New Rome, therefore its bishop is to have like honour to that of the patriarch of Old Rome and to be second after him. It only needed a shade more insolence to claim that the emperor could transfer all papal rights to the bishop of the city where he held his court.

Let it be always remembered that the rise of Constantinople, its jealousy of Rome, its unhappy influence over all the East is a pure piece of Erastianism, a shameless surrender of the things of God to Caesar. And nothing can be less stable than to establish ecclesiasti- cal rights on the basis of secular politics. The great schism, away from the foundation of Byzantine ambition. There is now no emperor and no Court to justify the eccumenical patriarch's position. If we were to apply logically the principle on which he rests, he would sink back to the lowest place and the patri- archs of Christendom would reign at Paris, London, New York, while the principle of the superiority of Apostolic sees remains untouched by political changes. Apart from the Divi- nine origin of the papacy, the advance of Constantinople was a gross violation of the rights of the Apostolic Sees of Alexandria and Antioch. We need not wonder that the popes, although their first place was not questioned, resented this disturbance of ancient rights by the ambition of the imperial bishops.

Long before Photius there had been schisms be- tween Constantinople and Rome, all of them healed up in time, but naturally all tending to weaken the sense of essential unity. From the beginning of the See of Constantinople to the great schism in 867 the list of these temporary breaches of communion is a formidable one. There were fifty-five years of schism (343-98) during the Arian troubles, eleven because of St. John Chrysostom's deposition (404-15), thirty- five years because of the banishment schism (484-519), forty-one years because of Monothelite schism (640-81), forty years because of Iconoclasm. So of these 544 years (323-867) no less than 203 were spent by Constantinople in a state of schism. We notice too that in every one of these quarrels Constantinople was on the wrong side: by the consent of the Orthodox, too, lost its place in the Councils of the church. And already we see that the influence of the emperor (who naturally al- ways supported his court patriarch) in most cases dragged a great number of other Eastern bishops into the same schism.

111. Photius and Cerularius.—It was natural that the heads of the see, which are immediately responsible for the present state of things, should be local quarrels of Constantinople. Neither was in any sense a general grievance of the East. There was neither time any reason why other bishops should join with Con- stantinople in the quarrel against Rome, except that already they had learned to look to the imperial city for orders. The quarrel of Photius was a gross dis- avowal of lawful church order. Ignatius was the right- ful bishop without any question; he had reigned peaceably for eleven years. Then he refused Com- munion to a man guilty of open incest (857). But that man was the regent Bardas, so the emperor professed to depose Ignatius and intruded Photius into his see. Pope Nicholas I had no quarrel against the Eastern Church; he had no quarrel against the Byzantine see. He stood out for the rights of the law- ful bishop. Both Ignatius and Photius had formally appealed to him. It was only when Photius found that he had lost his case that he and the Government preferred schism to submission (867). It is even doubtful how it was that there was any general Eastern schism at all. In the council that restored Ignatius (869) the other patriarchs declared that they had at once accepted the pope's former verdict.

But Photius had formed an anti-Roman party which was never afterwards dissolved. The effect of this quarrel, though it was not the first, was so marked, that it was patched up when Ignatius died, and again when Photius fell, to gather to a head all the old jealousy of Rome at Constantinople. We see this throughout the Photian Schism. The mere question of that usurper's pretended rights does not account for the outburst of enmity against the pope, against everything Western and Latin that we notice in gov- ernment documents, in Photius's letters, in the Acts of his synod in 879, in all the attitude of his party. It is rather the ranour of centuries bursting out on a poor pretext; this fierce resentment against Roman interference comes from men who know of old that the Easterns were the Romans. Moreover, Photius gave the Byzantines a new and powerful weapon. The cry of heresy was raised often enough at all times; it never failed to arouse popular indignation. But it had not yet occurred to any one to accuse all the West of being steeped in per- versity and Photian heresy. It had been the old practice of representing the use of papal authority in isolated cases. This new idea carried the war into the enemy's camp with a vengeance. Photius's six charges are silly enough, so silly that one wonders that so great a scholar did not think of something cleverer, at least more convincing. Rather, they changed the position of the Eastern advantage. When Photius calls the Latins "liars, fighters against God, forerunners of Anti- christ", it is no longer a question merely of abusing one's ecclesiastical superiors. He now assumes a more effective part; he is the champion of orthodoxy, indignant against heretics.

After Photius, John Bekkos says there was "perfect peace" between East and West. But the peace was only on the surface. Photius's cause did not die. It remained latent in the party he left, the party that still hated the West, that was ready to break the union again at the first pretext, that remembered and was ready to revenge any slight against Latinia. Certainly from the time of Photius hatred and scorn of Latins was an inheritance of the mass of the Byzantine clergy. How deeply rooted and far- spread it was, is shown by the absolutely gratuitous outburst 150 years later under Michael Cerularius (1043-58). For this time there was not even the shadow of a pretext. No one had disputed Ceru- larious's right as patriarch; the pope had not interfered with him in any way at all. And suddenly in 1053 he sends off a declaration of war, then shuts up the Latin churches at Constantinople, hurla a string of accusations, and goes in every possible way to show that he wants a schism, apparently for the mere pleasure of not being in communion with the West. He got his wish. After a series of wanton aggressions, unparalleled in church history, after he had begun by striking the pope's name from his diplomas, the Ro- man legates excommunicated him (16 July, 1054). But still there was no idea of a general excommunication of the Byzantine Church, still less of all the East. The legates carefully provided against that in their Bull. They acknowledged that the emperor (Constantine IX, who was excessively annoyed at the whole quarrel), the Senate, and the majority of the inhabi- tants of the city were "most pious and orthodox". They excommunicated Cerularius, Leo of Achtida, and their adherents.

This quarrel, too, need no more have produced a permanent state of schism than the excommunication of
any other contumacious bishop. The real tragedy is that gradually all the other Eastern patriarchs took sides with Cerularius, obeyed him by striking the pope’s name from their diplomas, and chose of their own accord to share his schism. At first they do not seem to have wanted to do so. John III of Antioch certainly refused to go into schism at Cerularius’s bidding, but inadvertently the event they were only too anxious to prevent, of looking to Constantinople for orders proved too strong. The emperor (not Constantine IX, but his successor) was on the side of his patriarch and they had learned too well to consider the emperor as their over-lord in spiritual matters too. Again, it was the usurped authority of Constantinople, the Erastianism of that city, that turned them to a great schism. We see, too, how well Photius’s idea of calling Latins heretics had been learned. Cerularius had a list, a longer and even more futile one, of such accusations. His points were different from those of Photius; he had forgotten the Filioque, and had discovered a new heresy in our use of arsenic bread. But the actual accusations mattered little at any time, the idea that had been found so useful was that of declaring that we are impossible because we are heretics. It was offensive and it gave the schismatic leaders the chance of assuming a most effective pose, as defending the true Faith of the Orient, and the actual occasion of its outburst. But the reason of both sides was that the tendency was mainly jealousy caused by the rise of the See of Constantinople. That progress is over long ago. The last three centuries Constantinople has lost nearly all the broad lands she once acquired. There is nothing the modern Orthodox Christian resents more than any assumption of authority by the ecumenical patriarch outside his diminished patriarchate. The Byzantine sees have long been the playing-thing of the Turk, were that he sold to the highest bidder. Certainly now this pitiful dignity is no longer a reason for the schism of nearly 100,000,000 Christians. Still less are the immediate causes of the breach active. The question of the respective rights of Ignatius and Photius leaves even the Orthodox cold after eleven centuries; and Cerularius’s ambitions and insolence may well be buried with him. Nothing then remains of the original causes. The question is simply the term in which Latins are involved. It is not a heresy, but a schism. The Decree of Florence made every possible concession to their feelings. There is no real reason why they should not sign that Decree now. They deny papal infallibility and the Immaculate Conception, they rebelled against purgatory, condemned by the words of institution, the procession of the Holy Ghost, and each case misrepresenting the dogma to which they object. It is not difficult to show that on all these points their own Fathers are with those of the Latin Church, which asks them only to return to the old teaching of their own Church with the new.

That is the right attitude towards the Orthodox always. They have a horror of being latinised, of betraying the old Faith. One must always insist that there is no idea of latinizing them, that the old Faith is not incompatible with, but rather demands union with the chief see which their Fathers obeyed. Not a bishop need be moved, hardly a feast (except that of St. Photius on 8 Feb.) altered. All that is asked of them is to come back to where their fathers stood, to treat Rome as Athonasius, Basil, Chrysostom treated her. It is not Latin, it is they who have left the Faith of their Fathers. There is no humiliation in retracing one’s
steps when one has wandered down a mistaken road because of long-forgotten personal quarrels. They too must see how disastrous to the common cause is the scandal of the division. They too must wish to put an end to so crying an evil. And if they really wish it the way need not be difficult. For, indeed, after nine centuries of schism we may realize on both sides that it is not only the greatest but also the most disastrous evil that can befall the Church. For details of the schism see Greek Church: Photius; Michael Cerularius; Florence, Council of; also Fortescue, The Orthodox Eastern Church (London, 1907) and the works there quoted.

ADRIAN FORTESCUE.

SCHISM, WESTERN.—This schism of the fourteenth and fifteenth centuries differs in all points from the Eastern Schism. The latter was a real revolt against the supreme authority of the Church, fomented by the ambition of the patriarchs of Constantinople, favoured by the Greek emperors, supported by the Byzantine clergy and people, and lasting nine centuries. The Western Schism was only a temporary misunderstanding, even though it compelled the Church for forty years to seek its true head; it was fed by politics and passion, and was terminated by the assembling of the councils of Pisa and Constance. This revolt of the cardinals in Rome is not so far as the other will be examined in its origin, its developments, the means employed to end it, and its ending in 1417 by the election of an undoubted pope. From a legal and apologetic standpoint what did the early doctors think of it? What is the reasoned opinion of modern theologians and canonists? Was the real pope to be found at Avignon or at Rome?

(1) Pope Gregory XI had left Avignon to return to Italy and had re-established the pontifical see in the Eternal City, where he died on 27 March, 1378. At once attention was directed to the choice of his successor. The question was most serious. Cardinals, priests, bishops, and the Romans in general were interested in it, because the election to be made by the Conclave depended the residence of the future pope at Avignon or at Rome. Since the beginning of the century the pontiffs had fixed their abode beyond the Alps; the Romans, whose interests and claims had been consistently neglected, wanted to see a native Italian pope. The name of Bartolommeo Prignano, Archbishop of Bari, was mentioned from the first. This prelate had been Vice-Chancellor of the Roman Church, and was regarded as the enemy of vice, simony, and display. His morals were exemplary and his integrity unimpeachable. He was regarded as the best man for the post. The sixteen cardinals present at Rome met in conclave on 7 April, and on the following day chose Prignano. During the election disturbance reigned in the city. The people of Rome and the vicinities, turbulent and easily roused, had, under the sway of circumstances, long declared their preference against antipapacies, and endeavoured to influence the decision of the cardinals. Were these facts, regrettable in themselves, sufficient to rob the members of the Conclave of the necessary freedom of mind and to prevent the election from being valid? This is the question which has been asked since the end of the fourteenth century. On its solution depends our opinion of the legitimacy of the popes of Rome and Avignon. It seems certain that the cardinals then took every means to obviate all possible doubts. On the evening of the same day thirteen of them proceeded to the Archdiocese of Bari with the formally expressed intention of selecting a legitimate pope. During the following days all the members of the Sacred College offered their respectful homage to the new pope, who had taken the name of Urban VI, and asked of him countless favours. They then enthroned him, first at the Vatican Palace, and later at St. John Lateran; finally on 19 April they solemnly crowned him at St. Peter's. On the very next day the Sacred College gave formal notification of Urban's succession to the seven French cardinals in Avignon; the latter recognized and congratulated the choice of their colleagues. The Roman cardinals then wrote to the head of the empire and the other Catholic sovereigns. Cardinal Robert of Geneva, the future Clement VII of Avignon, wrote in the same spirit to his relative, Pope Urban IV, and the Cardinale of Clamiers, Pedro de Luna of Aragon, the future Benedict XIII, likewise wrote to several bishops of Spain.

Thus far, therefore, there was not a single objection to or dissatisfaction with the selection of Bartolommeo Prignano, not a protest nor a fear manifested for the future. Unfortunately Pope Urban did not realize the hopes to which his election had given rise. He showed himself whimsical, haughty, suspicious, and sometimes choleric in his relations with the cardinals who had elected him. Too obvious roughness and blamable extravagances seemed to show that his unexpected election had altered his character. St. Catherine of Siena, with supernatural courage, did not hesitate to make him some very well-founded remarks in this respect, nor did she hesitate when there was question of blaming against him the revolution against the pope whom they had previously elected. Some historians state that Urban openly attacked the failings, real or supposed, of members of the Sacred College, and that he energetically refused to restore the pontifical see to Avignon. Hence, they add, the growing opposition. However that may be, none of those unpleasant sensations which arose subsequently to the election could logically weaken the validity of the choice made on 8 April. The cardinals elected Prignano, not because they were swayed by fear, though naturally they were somewhat fearful of the mischances that might grow out of delay. Urban was pope before his errors; he was still pope after his errors. The positions of King Henry IV or the vices of Louis XV did not prevent these monarchs from being and remaining true descendants of St. Louis and lawful kings of France. Unhappily such was not so, in 1378, the reasoning of the Roman cardinals. Their dissatisfaction continued to increase until it culminated in the unhealthy heat of Rome, they withdrew in May to Anagni, and in July to Fondo, under the protection of Queen Joanna of Naples and two hundred Gascon lances of Bernardon de la Salle. They then began a silent campaign against their choice of April, and prepared a new choice.

On 20 September thirteen members of the Sacred College precipitated matters by going into conclave at Fondo and choosing as pope Robert of Geneva, who took the name of Clement VII. Some months later the new pontiff, driven from the Kingdom of Naples, took up his residence at Avignon; the schism was complete.

Clement VII was related to or allied with the principal royal families of Europe; he was influential, intellectual, and skilful in politics. Christendom was quickly divided into two almost equal parties. Everywhere the faithful faced the anxious problem: where is the true pope? The saints themselves were divided: St. Catherine of Siena, St. Catherine of Sweden, Bl. Peter of Aragon, Bl. Ursulina of Parma, Philippe d'Alençon, and Gerard de Groote were in the camp of Urban; St. Vincent Ferrer, Bl. Peter of Luxemburg, and many others supported Clement. The century's most famous doctors of law were consulted and most of them decided for Rome. Theologians were divided. Germans like Henry of Hesse or Langenste (Ep. brevis; Ep. Concordiae) inclined towards Urban; Pierre d'Ailly, his friend Philippe de Malsarres, and his pupil Jean Gerson and Nicholas of
Clément, and with them the whole School of Paris, defended the interests of Clement. The conflict of rival passions and the novelty of the situation rendered understanding difficult and unanimity impossible. As a general thing scholars adopted the opinion of their country. The popes in the greater number of the Italian and German states, England, and Flanders supported the pope of Rome. On the other hand France, Spain, Scotland, and all the nations in the orbit of France were for the pope of Avignon. Nevertheless Charles V had first suggested his neutrality to the cardinals of Rome, and offered himself as a presiding of a general council, but he was not heard. Unfortunately the rival popes launched excommunication against each other; they created numerous cardinals to make up for the defections and sent them throughout Christendom to defend their cause, spread their influence, and win adherents. While these grave and burning discussions were being spread abroad, Boniface IX had succeeded Urban VI at Rome and Benedict XIII had been elected pope at the death of Clement of Avignon. "There are two masters in the vessel who are fencing with and contradicting each other," said Jean Petit at the Council of Pisa, who was present at several ecclesiastical sessions in France and elsewhere without definite result. The evil continued without remedy or truce. The King of France and his uncle began to weary of supporting such a pope as Benedict, who acted only according to his humour and who caused the failure of every plan for union. Moreover, his exactations and the fiscal severity of his agents weighed heavily on the bishops, abbots, and lesser clergy of France. Charles VI released his people from obedience to Benedict (1398), and forbade his subjects, under severe penalties, to submit to this pope. Every bull or letter of the pope was to be sent to the king; no account was to be taken of privileges granted by the pope; in future every dispensation was to be asked of the ordinaries.

This therefore was a schism within a schism, a law of separation. The Chancellor of France, who was already vicereign during the illness of Charles VI, thereby became even vice-pope. Not without the connivance of the public power, Geoffroy Bocicaut, brother of the illustrious marshal, laid siege to Avignon, and a more or less strict blockade deprived the pontiff of all communication with those who remained faithful to him. When restored to liberty in 1403 Benedict had not become more conciliating, less obstinate or less arrogant. He assembled in Paris in 1406, met with only partial success. Innocent VII had already succeeded Boniface of Rome, and, after a reign of two years, was replaced by Gregory XII. The latter, although of temperate character, seems not to have realised the hopes which Christendom, immeasurably wearied of these endless divisions, had placed in him. The council which assembled at Pisa added a third claimant to the papal throne instead of two (1409). After many conferences, projects, discussions (oftentimes violent), interventions of the civil powers, catastrophes of all kinds, the Council of Constance (1414) was convened. Suspicious John XXIII, received the abdication of the gentle and timid Gregory XII, and finally dismissed the obstinate Benedict XIII. On 11 November, 1417, the assembly elected Odo Colonna, who took the name of Martin V. Thus ended the great schism of the West.

(2) From this brief summary it will be readily concluded that this schism did not at all resemble that of the East, that it was something unique, and that it has remained so in history. It was not a schism properly so called, being in reality a deplorable misunderstanding concerning a question of fact, an honest error from which lasted forty years. In the West there was no revolt against papal authority in general, no scorn of the sovereign power of which St. Peter was the representative. Faith in the necessary unity never wavered a particle; no one wished voluntarily to separate from the head of the Church. Now this intention alone is the characteristic mark of the schismatic spirit (Summa, II-II, Q. xxxix, a. 1). On the contrary everyone took sides in the hope of being the greater number of the Italian and German states, England, and Flanders supported the pope of Rome. On the other hand France, Spain, Scotland, and all the nations in the orbit of France were for the pope of Avignon. Nevertheless Charles V had first suggested his neutrality to the cardinals of Rome, and offered himself as a presiding of a general council, but he was not heard. Unfortunately the rival popes launched excommunication against each other; they created numerous cardinals to make up for the defections and sent them throughout Christendom to defend their cause, spread their influence, and win adherents. While these grave and burning discussions were being spread abroad, Boniface IX had succeeded Urban VI at Rome and Benedict XIII had been elected pope at the death of Clement of Avignon. "There are two masters in the vessel who are fencing with and contradicting each other," said Jean Petit at the Council of Pisa, who was present at several ecclesiastical sessions in France and elsewhere without definite result. The evil continued without remedy or truce. The King of France and his uncle began to weary of supporting such a pope as Benedict, who acted only according to his humour and who caused the failure of every plan for union. Moreover, his exactations and the fiscal severity of his agents weighed heavily on the bishops, abbots, and lesser clergy of France. Charles VI released his people from obedience to Benedict (1398), and forbade his subjects, under severe penalties, to submit to this pope. Every bull or letter of the pope was to be sent to the king; no account was to be taken of privileges granted by the pope; in future every dispensation was to be asked of the ordinaries.

This therefore was a schism within a schism, a law of separation. The Chancellor of France, who was already vicereign during the illness of Charles VI, thereby became even vice-pope. Not without the connivance of the public power, Geoffroy Bocicaut, brother of the illustrious marshal, laid siege to Avignon, and a more or less strict blockade deprived the pontiff of all communication with those who remained faithful to him. When restored to liberty in 1403 Benedict had not become more conciliating, less obstinate or less arrogant. He assembled in Paris in 1406, met with only partial success. Innocent VII had already succeeded Boniface of Rome, and, after a reign of two years, was replaced by Gregory XII. The latter, although of temperate character, seems not to have realised the hopes which Christendom, immeasurably wearied of these endless divisions, had placed in him. Suspicious John XXIII, received the abdication of the gentle and timid Gregory XII, and finally dismissed the obstinate Benedict XIII. On 11 November, 1417, the assembly elected Odo Colonna, who took the name of Martin V. Thus ended the great schism of the West.
adds in 1412, can only result from stubborn opposition either to the unity of the Church, or to an article of faith. This is the pure doctrine of the Angelic Doctor (cf. Tachackert, "Peter von Allii", appendix 32, 33).

(3) Most modern doctors uphold the same idea. It is due to the Canon J. Didiot, deacon of the city of Lille: "If after the election of a pope and before his death or resignation a new election takes place, it is null and schismatic; the one elected is not in the Apostolic Succession. This was seen at the beginning of what is called, somewhat incorrectly, the Great Schism of the West, which is only an apparent schism, with a theological standpoint. If elections take place simultaneously or nearly so, one according to laws previously passed and the other contrary to them, the apostolicity belongs to the pope legally chosen and not to the other, and though there be doubts, discussions, and cruel divisions on this point, as at the time of the so-called Western Schism, it is no less true, no less real that the apostolicity exists objectively in the true pope. What does it matter, in this objective relation, that it is not manifest to all and is not recognized by all till long after? A treasure is bequeathed to me, but I do not know whether the last hand withdrew from the true Roman pontiff considered as such, but each obeyed the one he regarded as the true pope. They submitted to him, not absolutely, but on condition that he was the true pope. Although there were several obediences, nevertheless there was no schism properly so-called (De la Paix, I, 40).

(4) To contemporaries this problem was, as has been sufficiently shown, almost insoluble. Are our lights fuller and more brilliant than theirs? After six centuries we are able to judge more disinterestedly and impartially, and apparently the time is at hand for the formation of a decision, if not definitive, at least better informed and more just. In our opinion the question made rapid strides towards the end of the nineteenth century. Cardinal Hergenröther, Bliesmeyer, Hefele, Hischisch, Kraus, Buck, Funk, and the learned Pastor in Germany, Marion, Chenon, de Beaufort, and Delbrueck, France, Kirsch in Sweden, Paris, and after Rinaldi, in Italy, Albers in Holland (to mention only the most competent or illustrious) have openly declared in favour of the popes of Rome. Noel Valois, who assumes authority on the question, at first considered the rival popes as doubtful, and believed "that the solution of this great problem was beyond the present age" (I, 8). Six years later he concluded his authoritative study and reviewed the facts related in his four large volumes. The following is his last conclusion, much more explicit and decided than his earlier judgment: "A tradition that has been established in favour of the pope of Rome in the historical investigation tends to confirm". Does not this book itself (IV, 503), though the author hesitates to decide, bring to the support of the Roman thesis new arguments, which in the opinion of some critics are quite convincing? A final and quite recent argument comes from Rome. In 1904 the "Hierarchia Catholica", basing its arguments on the date of the Liber Pontificalis, compiled a new and corrected list of sovereign pontiffs. Ten names have disappeared from this list of legitimate popes, neither the popes of Avignon nor those of Pisa being ranked in the true lineage of St. Peter. If this deliberate omission is not purely accidental, it is a very strong presumption in favour of the legitimacy of the Roman popes Urban VI, Boniface IX, Innocent VII, and Gregory XII. Moreover, the names of the popes of Avignon, Clement VII and Benedict XIII, were again taken by later popes (in the sixteenth and eighteenth centuries) who were legitimate. We have already quoted much, having had to rely on ancient and contemporary testimonies, on those of the fourteenth and fifteenth centuries, on those of the sixteenth and even the twentieth, but we shall transcribe two texts borrowed from writers who with regard to the Church are at opposite poles. The first is Gregorovius, whom no one will suspect of exaggerated respect for the papacy. Concerning the schismatic divisions of the period he writes: "The spiritual kingdom would have been at an end but for the organization of the spiritual kingdom was so wonderful, the ideal of the papacy so indestructible, that this, the most serious of schisms, served only to demonstrate its indivisibility" (Gesch. der Stadt Rom im Mittelalter, VI, 620). From a widely different standpoint, de Maistre holds the same view: "The source of contemporaries is for us an historical treasure. It serves to prove how immovable is the throne of St. Peter. What human organization would have withstood this trial?" (Du Pepe, IV, conclusion).

SCHLEGEL

541

SCHLEGEL

Friedrich von, poet, writer on aesthetics, and literary historian, the "Messias" of the Romantic School, b. at Hanover, 10 March, 1772; d. at Dresden, 12 January, 1829. Of the two brothers Schlegel, who are regarded as the real founders of the Romantic School, it is Schiller who is the more important. The outpatient life of the "Messias" of the Romantic School, as Rahel named...
him, in its variety, is typical of the Romanticists. Destined at first for commercial life, he turned to higher studies in his sixteenth year, proceeded after a rapid preparation to the University of Göttingen, and there studied first jurisprudence and then philology. At Leipzig he devoted himself to the study of art and the history of ancient literature. After a short residence in Dresden, where he visited the art collections, he settled with his brother in Jena, but later moved to Berlin, where he formed a friendship with his later wife, Dorothea Veit (née Mendelssohn), according to the principles which he himself had embraced in his notorious "Lucinde" (Berlin, 1799). In 1800 he returned to Jena to qualify as tutor, but in 1802 proceeded to Dresden and thence to Paris, where he delivered lectures on philosophy and edited the journal "Europa". In 1804 he married Dorothea, who had separated from her husband, and became a Protestant; both became Catholics in 1808 at Cologne, and henceforth began for the restless and poverty-stricken Schlegel a period of peace. Recommended from Cologne, he secured a position as secretary in the court and state chancellery at Vienna, and in 1809 accompanied the Ninth of June, who went to war, issuing fiery proclamations against Napoleon and editing the army newspaper. In 1811 while at Vienna he began his lectures—on modern history. He was full of bitterness against Napoleon and enthusiastically in favour of the medieval imperial idea. In the following year he delivered his famous lectures on the history of ancient and modern literature.

From 1815 to 1818 Schlegel resided at Frankfort as counsellor of the Austrian legation to the federal diet. He then accompanied Metternich to Italy, visiting Rome at the request of Louis William, but on his return to Vienna, he edited the journal "Concordia" (1820–3), wherein he championed the idea of a Christian state. After preparing the edition of all his works (10 vols., 1822–5), he again delivered lectures on the philosophy of life and the philosophy of history, continuing at Dresden in 1825 on the philosophy of speech and words. Here a stroke of apoplexy brought him to an early death. Schlegel essayed all three branches of poetry, but without much success. In 1805–6 he published a "Poetisches Tagebuch", which in addition to small lyrical pieces contains the epic "Roland". Three years later appeared his "Gedichte" (Berlin, 1809), which are models of metrical art and noble language, but sacrifice freshness to artificiality. The romance "Lucinde" he later condemned. His tragedy "Alarkos" possesses no enduring worth, although Goethe had it produced at Weimar. Schlegel's importance lies in his numerous literary critical writings, and in his successful efforts to unite similarly minded friends (Tieck, Novalis, Schleiermacher) into an association, the "School of Romanticism" (1798). To establish and spread the principles of the new school, Schlegel founded with his brother August Wilhelm the journal "Athenaeum" (1798); this was given up after two years, but not until it had attained its object. It proclaimed the programme for the many-sided stratifics of Romanticism.

Of the works of Schlegel two still maintain their high importance: "Ueber die Sprache und Weisheit der Indier" (Heidelberg, 1808; tr. into French, Paris, 1815); and "Die Götter der griechischen Mythologie" (1815, tr. into French, Paris, 1829). While these two works may be surpassed in many particulars, they yet contain in embryo the modern achievements in both domains. P. Baumgarten, the latest author of a universal literature, thus regarded Friedrich von Schlegel as his guide and mentor, to whom he owed his inspiration. The following works have been translated into English: "Philosophy of History" (London, 1869); "Lectures on Modern History" (London, 1849); "Esthetic and Miscellaneous Works" (London, 1875).

Hart, Die romantische Schule (2nd ed., Berlin, 1906); Gossler, Grundriss, VI, 17–27, contains the literature until 1868; Mendelssohn, "Von der Freundschaft der Schiller u. die Geburts Schlegel" (1804); Glaux, Friedrich von Schlegel Revisions (1900); Saller, "Illustrierte Gesch, der deutschen Lit., part XXXVI, pp. 427–460.

N. Scheid.

Schleswig, formerly a duchy and diocese of northwestern Germany, now a part of the Prussian Province of Schleswig-Holstein. In the early Middle Ages the southern part of the peninsula of Jutland was a bone of contention between the Germans and the Danes. When in the fifth century the greater part of the Germanic population left the Danes for the Egyptians in order to seek a new home in Britain, the Danes or Jutes pushed their way into the country and the part of the Germanic population that had remained behind amalgamated with the new masters. The Frisians were the only ones to retain their national peculiarities after losing their national independence. About the beginning of the ninth century Charlemagne laid claim to the southernmost part of the peninsula; he formed the territory on the Eider into a Mark as a protection against the Slavs. As early as his reign Christian missions began to gain a foothold in the region. The first preacher of the Christian faith was the priest Anthearanuas, who was a pupil of Willehad, the first Bishop of Bremen. Atrebeanus founded a mission station among the heathen Dithmarschians, but suffered the death of a martyr during the Saxon revolt in 780. During the reign of Louis the Pious, Archbishop Ebo of Reims, the emperor's confidential friend, re-established Christianity without gaining his mission; but in 850 Ebo's companion, Ansgar the Apostle of the North, erected the first church in the little town of Schleswig; this was soon followed in 860 by the building of the church at Ripen. These successues of the mission of the Carolingian period were destroyed during the heathen reaction that followed. Under the vigorous administration of the German king, Henry I, the Mark on the Eider was re-established in 934, and soon after this Unni, Archbishop of Hamburg, once more took in hand the bringing of the north to Christianity. Christian communities increased, especially after the Danish King Harald Bluetooth (d. 986) had accepted Christianity, and the dioceses of Schleswig, Ripen, and Aarhus were founded at the request of Archbishop Adalag of Bremen. These dioceses were made suffragans of Bremen. The first Bishop of Schleswig was Hored, who was present in 948 at the German synod of Ingelheim. The Diocese of Schleswig was by custom the residence of the later Duchy of Schleswig, as the northwestern part belonged to the Diocese of Ripen, and the Islands of Alsen, Arö, and Fehmarn to the Diocese of Flensburg.

During the reign of King Harold Blue Tooth, Christianity became the dominating religion of Denmark and Schleswig. Paganism, however, regained the supremacy when Harold's son Sven with the Forked
Beard, who had been a viking, returned home in 985 and overthrew his father. Christians were ill-treated, the Diocese of Aarhus was suppressed, and the other two bishops were driven away. Yet in the last years of his life even with the Forked Beard turned to Christianity, and his son Canute the Great, who by the end of his life had gained possession of almost the whole of the Duchy of Holstein, established Christianity at last in his territories. In 1035 his son-in-law the German King Conrad II gave him the Mark of Schleswig as compensation for the alliance he had maintained with Germany for many years. The Mark included the territory between the Elbe, the Kiel canal, and the Baltic Sea. The Mark was granted at Kieler Förde, at the site of the present city of Kiel, and the name of the Mark was derived from the name of the city.

In 1035 or 1036 a separate Danish archdiocese was erected at Lund for all these bishoprics, and, notwithstanding the protests of the Archbishop of Lund, Schleswig was a suffragan of Lund. Before long the political union with Denmark was weakened again. From the time that the whole of Schleswig belonged to Denmark it was ruled by royal governors; these governors were generally princes of the royal house who grew steadily more independent of the crown. In 1115 it was decided to have the county of Holstein be able to gain the viceroyalty of Schleswig in fief from the Danish King Niels, and was also made duke of this territory. Thus a basis was laid for a more independent position of the province within the Kingdom of Denmark. Under Knut's successors Schleswig was often united with Denmark, as Waldemar I and II, dukes of Schleswig, were also kings of Denmark. These kings, however, sought to keep Schleswig as their personal domain, separate from the administration of Denmark. In 1231 Abel, the youngest son of Waldemar II, was granted the dukedom of Holstein as an independent ducal line that ruled the duchy for over a hundred and fifty years.

Both politically and ecclesiastically the two centuries following the reign of Knut Laward form the most prosperous period of the province. Of the bishops, Alberus (1006–1141), in particular, was very active in his office, and laboured among the Frisians who had been conquered by Knut. The diocese received large grants of land from Waldemar I, possessions that were scattered through all parts of the dukedom; in 1157 the diocese was released from all payment of clerical taxes to the crown. Many monasteries arose that did much for the intellectual and material development of the country; nearly thirty monasteries can be proved to have existed in the period before the Reformation. The most important of these were the Cistercian abbeys of Lüne, Buderus, Gudshon, and Schleswig, the convent of St. John for Benedictine nuns at Schleswig, the Franciscan monasteries at Hadersleben, Tondern, and Schleswig, and the Dominican monastery at Schleswig.

In the course of time many of these monasteries had obtained large landed possessions. When in 1050 Duke Eric II died and left a minor son Waldemar V, King Christopher II of Denmark wished to become the guardian and thus gain control of the duchy. However, the powerful Count Gerhard III of Holstein of the Schauenburg line, who was an uncle of Waldemar, and also the latter's guardian, opposed the king. Gerhard gained control of the government, and the death of Gerhard and the Hadersleben line in 1083, another division was made, the possessions of the Hadersleben line being divided between King Frederick II and Duke Adolf of Holstein-Gottorp (1851). After this there were two lines: the royal, which was called Schleswig-Holstein-Plütschau after the seat of the administration for the duchies, and from which in the course of time branches sprung; second, a ducal line called the Gottorp line which,
 besides sharing in the two dukedoms, also owned the former Diocese of Lübeck. Duke Frederick III of Gottorp, who ruled from 1616 to 1659, put an end to the subdivisions of the Gottorp line by introducing primogeniture. During the eighteenth century the two ruling dynasties were generally hostile to each other because of the enmity between Denmark and Sweden, the enemy of Denmark. Thus the duchies became involved in the Thirty Years' War and the two wars of the North. In the Treaty of Roeskilde that closed the first war of the North, the Gottorp dynasty received, through the intervention of the papacy, sovereignty over the property of Denmark's suzerainty over its share of the duchies. However, in the Treaty of Stockholm that in 1720 closed the second war of the North, which had not been fortunate for Sweden, the Gottorp line was obliged to concede its share of Schleswig to Denmark and only retained its possessions in Holstein. The whole of Schleswig was now obliged to recognize the Danish king as its ruler. In the treaties of 1767 and 1773 the Gottorp dynasty, which had gained the throne of Russia in the person of Peter III, was obliged to renounce its possessions in Holstein also, in return for which it received Oldenburg. In this way Denmark became the sole ruler of Schleswig-Holstein.

The union of the two duchies with the German Empire grew continually weaker, especially as after the dissolution of the German Empire in 1806 the duchies had no protection against the policy of their ruler; this policy, which was to stamp a Danish character upon them, was not affected by the fact that the Congress of Vienna made Holstein a part of the German Empire. The Danes showed plainly more and more their determination to separate the two duchies, which by right should never have been divided, and to gain at least Schleswig as a part of the Danish nation, because the population of Schleswig was largely Danish in speech. The people, however, accepted all the measures of the Danish government very composedly, as the male line of the royal dynasty would soon be extinct and the female line was, by the Salic law of succession, not capable of succeeding in the duchies, although it could in Denmark. The duchies were satisfied even with the constitution granted in 1834, although it was not one in common for both duchies and did not preserve any essential right of the people. King Christian, however, in 1846 published a letter in which he declared the Danish right of succession to be also vested in the duchies, and his successor Frederik VI (1848–63) was forced by popular opinion at Copenhagen, soon after he came to the throne, to promise the incorporation of Schleswig into the Danish kingdom. These two events were followed by a revolt of the people of the duchies. On 24 March, 1848, a temporary provincial government was established at Kiel, which declared that it assumed for the time being the name of the ruler, the Danish king, the maintenance of the rights of both duchies, as the ruler had been forced by mob-rule to take a hostile position to the duchies. When, upon this, Denmark sent troops into Schleswig-Holstein, not only did the population of that country take up the arms, but also national movement in Germany in favour of their endangered countrymen in the North. Volunteers from all parts of Germany went to the aid of the people of Schleswig-Holstein. King Frederick William IV of Prussia sent an army into the duchies and even the Dies of the German Confederation was carried away by the emotional enthusiasm spread. Schleswig was made a member of the German Confederation and gave to Prussia the direction of the war against Denmark. The Prussian troops and those of the confederation won, it is true, several brilliant victories, especially the carrying of the fortifications of Dyppe; but not only was the lack of a German fleet and the threatened interference of Russia and Great Britain led Prussia to consent to a truce, which was followed by a treaty in 1850 that was also accepted by the German Confederation. Contrary to the general promise that the rights of the duchies should be respected, they were again given to Denmark. After this the five Great Powers declared at a conference held at London in 1851 that in the duchy King Christian was indivisible in all its parts, that the separate position of the duchies should be maintained within this kingdom, and that should the male line of the Danish dynasty become extinct the succession was to fall to the House of Glücksburg. In this way the right of succession was preserved for the Glücksburgs, and it was thrown aside, and the Augustenburg line, that had branched off from the Danish royal house in the sixteenth century, was excluded from the succession to Schleswig Holstein. Consequently the German Confederation and Frederik, Crown prince of Augustenburg, protested against the London protocol, while Prussia and Austria recognized it.

After the duchies were handed over to Denmark there was an energetic attempt, especially in Schleswig, to make these provinces entirely Danish in character. All connexion with Holstein was set aside, a custom-house was erected on the Eider, Danish preachers, teachers, and editors of books and newspapers were brought into Danish garrisons, and lastly Danish was made the language of the Church and schools. When the male line of the Danish royal family became extinct at the death of Frederik VII (15 November, 1863), according to the regulations of the London protocol Christian of Glücksburg succeeded as Christian IX. Immediately after his accession Christian announced a constitution which included the unconditional incorporation of Schleswig into Denmark. The proclamation of this Constitution of November was followed by unresisted and unopposed manifestations of disapproval, and the demand was made for the complete separation of the duchies from Denmark. Holstein was occupied by the troops of the German Confederation; even Prussia and Austria took up the part of the duchies. These powers called upon Denmark to withdraw the Constitution of November, and when these demands were rejected they sent Prussian and Austrian troops under the command of the Prussian Field Marshal Wrangel into Schleswig in Feb., 1864. After the fortifications of Düpplitz, the island of Alsasse, and the entire peninsula of Jutland had been gained by the Germans the Danes saw the conclusion of the Peace of Vienna (October, 1864) King Christian pronounced all rights over Schleswig and Holstein in favour of the Emperor of Austria and the King of Prussia, and recognised in advance whatever disposition the two monarchs should make of these provinces. The possession in common of the duchies only increased the strain of the relations existing between Prussia and Austria. Austria desired to form a new state of the German Confederation under the government of the Duke of Augustenburg, while Prussia, on the contrary, preferred to keep the region for itself and only permitted there was also a national movement in Germany in favour of their en-dangered countrymen in the North. Volunteers from all parts of Germany went to the aid of the people of Schleswig-Holstein. King Frederick William IV of Prussia sent an army into the duchies and even the Dies of the German Confederation was carried away by the emotional enthusiasm spread. Schleswig was made a member of the German Confederation and gave to Prussia the direction of the war against Denmark. The Prussian troops and those of the confederation won, it is true, several brilliant victories, especially the carrying of the fortifications of Düpplitz, but not only was the lack of a German fleet and the threatened interference of Russia and Great
Schlör, Aloisius, ascetical writer, b. at Vienna, 17 June, 1805; d. at Graz, 2 Nov., 1862.

He completed his studies at Vienna he was ordained priest on 22 Aug., 1823, and placed as chaplain at Altlerchenfeld. In 1831 he was prefect of studies at the seminary of Vienna and at the same time took advanced studies in theology, earning the degree of Doctor in 1835. Two years later he was appointed spiritual director of the Frintenauer and chaplain at the Court and confessor to Emperor Ferdinand. He resigned his position in 1837, laboured as chaplain for the Germans at Verona, was then adopted into the Diocese of Seekau and made spiritual director at the priests' seminary in Graz. Here he spent the rest of his days, doing much for the reformation of the clergy in Austria, especially by the reintroduction of spiritual retreats and by his writings. The principal of these are: "Warum bin ich Katholik?", published between 1834 and 1837; "Jesu mein Verlangen, a much-valued prayer-book (1835, 7th ed., 1902); "Philanthropie des Glaubens, oder das kirchliche Leben in Verona in der neuesten Zeit", 1839; "Geistestungen des hl. Ignatius" (1840); "Clerici orantes et meditantes" (1841, 1883); "Der geistliche Wegweiser" (1842), to which is added an instruction showing how a priest can obtain a licentiate in the Institute of the Eucharist" (1844, 1902); "Betrachtungen for Priester und Kleriker" (3 vols., 1847, 1900). His sermons were published in 1851, and a special edition of his Lenten Sermons was issued in 1905.

Joseph LINS.

Schlosser, John Frederick Henry, jurist, b. at Frankfurt-on-the-Main, 30 December, 1780; d. there, 22 January, 1851. He studied jurisprudence at various universities, among others at Jena, where he entered into familiar relations with Schiller and Goethe. After receiving the degree of Doctor of Jurisprudence (1807) he remained for a time in Jena, later being appointed, by Primate Prince Dalberg, counsellor of the municipal court (1806), counsellor for the high schools and studies, and director of the grand-ducal lyceum (1812). On the dissolution of the Grand duchy of Frankfurt, Schlosser resigned his office, and in 1815 was appointed bishop of the newly founded See of Mainz. In this capacity he remained for the rest of his life. From 1816 to 1826 he was parish priest at Oberstädten in Württemberg. In the latter year he was appointed vicar of the Cathedral of Augsburg, where he died of cholera in his eighty-seventh year. In 1841 he began the publication of a complete edition in twenty-four volumes of his scattered writings. In the introduction he tells his readers how they were written. They were not composed for an unknown public, but for a mercenary spirit, but for children, among whom the...
author daily moved, and were not at first meant for publication. To enforce his lessons in religious instruction, he sought to illustrate them by examples taken from Christian antiquity, from legends and other sources. Usually a story or a chapter was read to the children after school hours as a reward. The condition that they should write it down at home. He thus became familiar with the range of thought and the speech of children, and was careful to speak their language rather than that of books. He was able to observe with his own eyes what it was that impressed the minds and hearts of children both of tender and of riper years. Their manner of repeating the stories also helped him.

He was the pioneer writer of books for children, and his great merits are firmly acknowledged by both Catholic and Protestant writers on pedagogics. His stories have been translated into twenty-four languages, and to this day he is regarded in Germany as the prince of story-writers for the young. He is the greatest educator Bavaria produced in the eighteenth century, and ranks, both as to theory and practice, with the most celebrated of modern educators. Canon Schmid was the ideal of a mild, charitable, unselshy man, of childlike simplicity of character, a devout Catholic priest, whose virtues are mirrored in his writings. On 8 September, 1901, Thannhausen unveiled the statue of the celebrated story-writer and educator.

Erinnerungen (Memoirs), published by WESER (Augsburg, 1853-7); Letters and Discourses of Chr. von Schmid, ed. Schmid, ed. (Munich, 1899); Monatschrift für katholische Lehrerinnen (1905, no. 1 and 2).

B. GULDNER.

Schmidt, FRIEDRICH VON, b. at Frickenhofen, 1825; d. at Vienna, 1891. After studying at the technical high school at Stuttgart, he became, in 1845, one of the guild of workmen employed in building the Cologne cathedral, on which he worked for fifteen years. Most of the working drawings for the towers were made by Schmidt and Statz. In 1848 he attained to the rank of master-workman and in 1856 passed the state examination as architect. After becoming a Catholic in 1858, he went to Milan as professor of architecture and began the restoration of the cathedral of San Ambrogio. On account of the confusion caused by the war of 1859 he went to Vienna, where he was a professor at the academy and cathedral architect from 1862; in 1865 he received the title of chief architect, and in 1888 was ennobled by the emperor. Next to Pensié is he the most important modern Gothic architect. In this style he built at Vienna the Church of St. Lazarus, the church of the White Tanners, that of the Brigittines. He also built the Classical gymnasium with a Gothic façade and the memorial building erected on the site of the amphitheatre that had been destroyed by fire. The last mentioned building was in Venetian Gothic. A large number of small ecclesiastical and secular buildings in Austria and Germany were designed by him. His last work was the restoration of the cathedral at Finkirchen in Hungary. His chief fame however he gained by his restoration of the Cathedral of St. Stephen at Vienna. He took down the spire and worked on its rebuilding up to 1872. His design for the town-hall was not successful one. The projecting middle section has a fine central tower that rises free to a height of 328 ft. and is flanked by four smaller towers. This section harmoniously combines height with broad horizontal members. A large court and six smaller ones are enclosed by the extensive building, the wings of which end in pavilions. Nothing in the building shows the regularity of a set pattern; the architect, rather, made skilful use of individual Renaissance motifs. When he began in Vienna his manner was rather stiff, but he worked his way up to artistic freedom. In building the parish church at Finshof he had been commissioned to set a façade with two towers in front of an octagonal central structure with a high cupola and a corona of chapels. His motto was to unite German force with Italian freedom. He modified the tendency to height in the German Gothic by horizontal members and introduced many modifications into the old standard of the style in order to attain a more agreeable general effect. In this way he always remained unfettered and original in his style and replaced in part what was lacking in decorative details or in the means of producing the same. He was teacher and model to many younger architects. A bronze statue of him has been placed before the town-hall, at Venice. His son Heinrich was overseer at the building of the cathedral of Frankfort and afterwards professor of medieval architecture at Munich.

SCHOENBERG.

Schneemann, GERARD, b. at Wesel, Lower Rhine, 12 Feb., 1829; d. at Kerkrade, Holland, 20 Nov., 1885. After studying law for three years, he entered the seminary at Münster where he was ordained sub-deacon in 1850. He became a member of the Society of Jesus, 24 Nov., 1851, and was ordained priest on 22 Dec., 1856. For some years he taught philosophy at Bonn and Aachen, and subsequently lectured on church history and canon law in the Jesuit scholasticate at Maria Lasch. His first notable publication was "Studien über die Hehneriusfrage" (Freiburg, 1864) in which he refuted the theories of Dollinger. Between the years 1865 and 1870, he contributed a number of timely and important dissertations to "Die Encyclopädie Papst Pius IX" and "Das 6.umenische Concil", two series of papers that appeared published at Freiburg under the general title of "Stimmen aus Maria-Lasch". In 1874 the "Stimmen" became a regular monthly review and for six years was edited by Father Schneemann. He was moreover the chief promoter in the collaboration and publication of the "Acta et decreta sacrorum conciliorum recentiorum", commonly called "Collogiae Laxenii", and did much preparing the documents of the Vatican Council for the seventh and last volume. His work "Controversiarium de divina gratie liberique arbitrii concordia initia et progressus" (Freiburg, 1881), was the occasion of a renewed controversy on the nature of grace and free will.

Schoenberg, MATTHIAS VON, author, b. at Eningen, in the Diocese of Constance, 9 Nov., 1732; d. at Munich, 20 Apr., 1792. Of his early life little is known; he entered the Society of Jesus on 15 Sept., 1750. From 1766 to 1772 he was in charge of Eleemosyna Aurea, an institution founded for the
purpose of spreading among the faithful instructive books written in a style that should prove attractive and intelligible even to the unlettered. Shortly after the suppression of the Society he was chosen by the Elector of Bavaria as his ecclesiastical counsellor. An untiring champion of Christian morals and the Catholic religion, Schoemberg, besides compiling prayer-books and editing educational works, wrote several treatises on the fundamental truths of religion, and many devotional and meditative books and brochures designed to quicken the devotion of the people to the Blessed Virgin and the Sacred Heart. So successful was he in his apostolic labors that many of his writings—Sommervogel mentions nearly forty in all—ran through five and six editions. The following are perhaps his best known works: "Die Zierde der Jugend"; "Der höfliche Schüller", "Die Religionsgründe in ihren ordentlichen Zusammenhange"; "Der Sanktflüthe Christ"; "Wahrheitsgründe des katholischen Hauptgrundsätzen für die Unfehlbarkeit der Kirche".

SOMMERVOGEL, Bibl. de la C. de J., VII, 841; HUNTER, Nomenclator, III, 243.

JAMES A. CARRILL.

SCHÖFFER, Peter, publisher and printer, b. at Gernheim on the Rhine about 1425; d. at Mainz in 1503. As a cleric in minor orders, he was in Paris in 1451 working as a manuscript copier. In 1455 he appeared as a witness at Mainz for Johannes Fust against Gutenberg. Later he married Fust's daughter, Christine, and he was a partner of Fust in the publishing business until 1456, from that date up to 1503 printing independently. Schöffer may have become an experienced printer as an assistant of Fust and perhaps of Gutenberg, but he had no share whatever in the invention or in the improvement of typography, as has been claimed for him and his contemporaries; this is certain, notwithstanding the splendid impressions of the Psalters bearing his name and published in 1457 and 1459, the technical preparation of which has been ascribed to Gutenberg. The evident deterioration of books issued at the end of the century proves that Schöffer made no technical improvement in the art of printing. The work of Schöffer's press shows all the technical excellence of his predecessors, but no advance. He did much for the development of the art of printing by establishing commercial relations beyond the borders of Germany. But the management of his press was always conservative, and he published almost exclusively works on civil law, canon law, and theology. He neither made improvements nor did he adopt the improvements of his contemporaries, such as reducing the size of his books, issuing popular books, etc. At the time of Schöffer's death many printers of Germany and Italy had long surpassed both his publications and his press. Schöffer's son John Schöffer, 1503-3, was a capable printer and exerted himself to improve the work produced by his press, but was unable to place himself in the front rank of printers of the time. A second son of Schöffer's, Peter the younger, was a capable die-cutter and printer, and engaged in his trade at Mainz, 1509-29; at Worms, 1512-29; at Strasbourg, 1530-39; and at Venice, 1541-42. His son Ivo took up his quarters at Mainz, 1531-55, there carried on the printing business of his grandfather.

VAN DER LUNDE, Gesch. der Brüd., der Buchdruckkunst (Berlin, 1886); HARTWIG, Festschrift zum 500 jähr. Geburtst. von J. Gutenberg (Mainz, 1900).

HENRICH WILHELM WALLAU.

Schola Cantorum, a place for the teaching and practice of ecclesiastical chant, or a body of singers bound together for the purpose of singing the music in church. In the primitive Church the singing was done by the clergy, but, in order to set them free from this and enable them to give their attention more to what strictly pertained to their office, trained singers for the musical part of the liturgy were introduced. Pope Hilary (d. 468) is sometimes credited with having inaugurated the first schola cantorum, but it was Gregory the Great, as we are told in his life by John the Deacon, who established the school on a firm basis and endowed it. The house in which the schola was lodged was rebuilt in 844 by Pope Adrian II, who had himself been trained in it, as well as also the popes Sergius I, Gregory II, Sylvester III, and Paul I. This Roman school furnished the choir at most of the papal functions and was governed by an official called prior schola cantorum or simply cantor. From Cardinal Thomas's preface to the twelfth-century Vatican antiphonary, we learn that, amongst his other duties, he had to point out to each individual, the day before, what responsory he was to sing in the night office. From Rome the institution spread to other parts of the Church. Pepin, the father of Charlemagne, first introduced Roman chanters into France, placing them at Lyons. Charlemagne encouraged the work, and through his influence several other schools were established in his empire. That of Metz became one of the most famous; other well-known ones were at Hirschau Corbie, and St. Gall. In England the diffusion of the Roman chant was due chiefly to St. Benet, Bishop of St. Wilfrid. Several of the cathedrals (e.g. York, Sarum, Hereford, and Worcester) and many of the abbeys (e.g. Glastonbury and Malmesbury) had important schola cantorum attached to them. The Protestant Reformation put an end to the English schools, while abroad they seem to have died out. The paid singers being replaced by the churches, though perhaps the matrise or cathedral choir-school of to-day may be regarded as their legitimate successor. In monasteries at the present day the name schola cantorum is often applied to certain selected monks whose duty it is to chant the more elaborate portions of the liturgical music, such as the graduals and alleluias at Mass, the rest of the community joining only in the simpler parts. The official in charge of such a schola is usually called the "precentor". In recent times the chief schools of ecclesiastical chant have been at Ratisbon, Mechlin, Einsiedeln, Beuron, and, greatest of all, Solesmes. In these the study of the MSS., and the work of restoring the traditional chant of the Church have been pursued with much success. The schola of Solesmes was commenced by Dom Guéranger and has been ably carried on by his successors, DD. Pothier and Mocquereau. The latter is precentor at Solesmes (now in the Isle of Wight, England), while the papal commission entrusted with the work of preparing the official Vatican edition of the Chant is presided over by Abbot Pothier. (See GUERANGER, PROSPER LUCY PAS- CUAL; SOLESMES."

G. CYPRIAN ALSTON.
Scholasticism, Saint. See Benedict of Nursia, Saint.

Scholasticism is a term used to designate both a method and a system. It is applied to theology as well as to philosophy. Scholastic theology is distinguished from Patristic theology on the one hand, and from positive theology on the other (see Theology). The schoolmen themselves distinguished between theologia speculativa and theologia positiva. Applied to philosophy, the word "Scholastic" is often used, also, to designate a chronological division intervening between the end of the Patristic era in the fifth century and the beginning of the modern era, about 1450. It will, therefore, make for clearness and order if we consider: I. The origin of the word "Scholastic"; II. The history of the period called Scholastic in the history of philosophy; III. The Scholastic method in philosophy, with incidental reference to the Scholastic method in theology; and IV. The contents of the Scholastic system. The revival of Scholasticism in recent times has been already treated under the head Neo-Scholasticism. The name "Scholastic".—There are in Greek literature a few instances of the use of the word σχολαστικός to designate a professional philosopher. Historically, however, the word, as now used, is to be traced, not to Greek usage, but to early Christian institutions. In the Christian church, especially after the beginning of the sixth century, it was customary to call the head of the school magister scholae, capiscula, or scholasticus. As time went on, the last of these appellations was used exclusively. The curriculum of those schools included among the seven liberal arts, dialectic, which was at that time the only branch of philosophy studied systematically. The head of the school generally taught dialectic, and out of his teaching grew both the manner of philosophizing and the system of philosophy that prevailed during all the Middle Ages. Consequently, the name "Scholastic" was used and is still used to designate the method and system that grew out of the academic curriculum of the schools, or, more definitely, out of the dialectical teaching of the masters of the schools (scholasti). It does not matter that, historically, the Golden Age of Scholastic philosophy, namely, the thirteenth century, falls within a period when the schools, the curriculum of which was given liberal character, had given way to another organization of studies, the studia generalia, or universities. The name, once given, continued, as it almost always does, to designate the method and system which had by this time passed into a new phase of development. Academically, the philosophers of the thirteenth century are known as magistri, or masters; historically, however, they are Scholastics, and continue to be so designated until the end of the medieval period. And, even after the close of the Middle Ages, a philosopher or theologian who adopts the method or the system of the medieval Scholastics is said to be a Scholastic.

II. THE SCHOLASTIC PERIOD.—The period extending from the beginning of Christian speculation to the time of St. Augustine, inclusive, is known as the Patristic era in philosophy and theology. In general, that era inclined to Platonism and underestimated the importance of Aristotle. The Fathers strove to interpret Platonism in the context of Christian philosophy. They brought reason to the aid of Revelation. They leaned, however, toward the doctrine of the mysteries, and, in ultimate resort, relied more on spiritual intuition than on dialectical proof for the establishment and explanation of the most truths of Christian belief. The end of the Patristic era in the fifth century and the beginning of the Scholastic era in the ninth there intervene a number of intercalary thinkers, as they may be called, like Claudianus Mamertus, Boethius, Cassiodorus, St. Isidore of Seville, Venerable Bede, etc., who helped to hand down to the new generation the traditions of the Patristic age and to continue and develop the Scholastic era that followed. With the Carolingian revival of learning in the ninth century began a period of educational activity which resulted in a new phase of Christian thought known as Scholasticism. The first masters of the schools in the ninth century, Alcuin, Rabanus, etc., were not, indeed, more original than Boethius or Cassiodorus, the first original thinker in the Scholastic era was John the Scot (see Erigena, John Scottus). Nevertheless they inaugurated the Scholastic movement, because they endeavored to bring the Patristic (principally the Augustinian) tradition into touch with the new life of European Christianity. They did not abandon Platonism. They knew little of Aristotle except as a logician. But by the emphasis they laid on dialectical reasoning, they gave a new direction to Christian tradition in philosophy. In the curriculum of the schools in which they taught, philosophy was represented by dialectic. On the texts of dialectic which they used, commentaries and glosses, into which, little by little, they admitted problems of psychology, metaphysics, cosmology, and ethics. So that the Scholastic movement as a whole may be said to have sprung from the discussions of the dialecticians. The conclusions were influenced by this origin. There resulted a species of Christian Rationalism which more than any other trait characterizes Scholastic philosophy in every successive stage of its development and marks it off very definitely from the Patristic philosophy, which, as has been said, was ultimately intellectual and mystic. With Roscelin, who appeared about the middle of the eleventh century, the note of Rationalism is very distinctly sounded, and the first rumbling is heard of the inevitable reaction, the voice of Christian mysticism uttering its note of warning, and condemning the excess into which Rationalism had fallen. In the eleventh and twelfth centuries, therefore, Scholasticism passed through its period of storm and stress. On the one side were the advocates of reason, Roscelin, Abelard, Peter Lombard; on the other were the champions of mysticism, St. Anselm, St. Peter Damian, St. Bernard, and the Victorines. A third party, that of Arnauld and the followers of Raymond de Penafort, held the line as far as first, and only gradually brought their method within the lines of orthodoxy and harmonized it with Christian reverence for the mysteries of Faith. Like all conservative reactionists, the mystics at first condemned the use as well as the abuse of reason; they did not reach an intelligent compromise with the dialecticians until the end of the twelfth century. In the final outcome of the struggle, it was Rationalism that, having modified its unreasonable claims, triumphed in the Christian schools, without, however, driving the mystics from the field.

At this time, John of Salisbury, Eclectics, like the members of the School of Chartres, gave to the Scholastic movement a broader spirit of toleration, imparted, so to speak, a sort of Humanism to philosophy, so that, when we come to the eve of the thirteenth century, Scholasticism has made two very decided steps in advance. The search of spiritual truth and the application of dialectic to theology are accepted without protest, so long as they are kept within the bounds of moderation. Second, there is a willingness on the part of the Schoolmen to go outside the lines of strict ecclesiastical tradition and learn, not only from Aristotle, who was the master of philosophy now for the first time a metaphysician and a psychologist, but also from the Arabsians and the Jews, whose works had begun to penetrate in Latin translations into the schools of
Christian Europe. The taking of Constantinople in 1204, the introduction of Arabian, Jewish, and Greek works into the Christian schools, the rise of the mendicant orders—these are the events which led to the extraordinary intellectual activity of the thirteenth century, which centered in the University of Paris. At first there was considerable confusion, and it seemed as if the battles won in the twelfth century by the scholastics should be lost. The translations of Aristotle made from the Arabic and accompanied by Arabic commentaries were tinged with Pantheism, Fatalism, and other Neoplatonic errors. Even in the Christian schools there were declared Pantheists, like David of Dinant, and outspoken Averroists, like Siger of Brabant; we cannot fairly prejudge the cause of Aristotelianism.

These developments were suppressed by the most stringent disciplinary measures during the first few decades of the thirteenth century. While they were still a source of danger, men like William of Auvergne and Alexander the Great hesitated between the traditional Augustinianism of the Christian schools and the new Aristotelianism, which came from a suspected source. Besides, Augustinianism and Platonism accorded with piety, while Aristotelianism was found to lack the element of mysticism. In time, however, the scholastics were able to extricate Aristotle free from the errors attributed to him by the Arabs, and, above all, the commanding genius of Albertus Magnus and his still more illustrious disciple, St. Thomas Aquinas, who appeared at the critical moment, calmly surveyed the difficulties of the situation, and met them fearlessly, won the victory for the new philosophy, and continued successfully the traditions established in the preceding century. Their contemporary, St. Bonaventure, showed that the new learning was not incompatable with mysticism drawn from Christian sources, and Roger Bacon demonstrated by his unsuccessful attempts to develop the natural sciences the possibilities of another kind which were latent in Aristotelianism.

With Duns Scotus, a genius of the first order, but not of the constructive type, begins the critical phase of Scholasticism. Even before he came, and the Dominican currents had set out in divergent directions. It was his keen and unrelenting search for the weak points in Thomistic philosophy that irritated and wounded susceptibilities among the followers of St. Thomas, and brought about the spirit of partisanship which did so much to dissipate the energy of Scholasticism in the fourteenth century. The recrudescence of Averroism in the schools, the excessive cultivation of formalism and subtlety, the growth of artificial and even barbarous terminology, and the neglect of the study of nature and of history contributed to the same result. Ockham's Nominalism and Durandus's attempt to "simplify," Scholastic philosophy did not have the effect which their authors intended. "The glory and power of scholasticism faded into the warmth and brightness of mysticism," and Gerson, Thomas à Kempis, and Eckhart are more representative of what the Christian Church was actually thinking in the fourteenth and fifteenth centuries than are the Thomists, Scotists, and Ockhamists of that period, who flittered away much valuable time in the discussion of highly technical questions which arose within the schools and possess little interest except for advocates of Scholastic subtlety. After the schism of 1393, which ushered in the modern era, was in full progress, the great Italian, Spanish, and Portuguese commentators inaugurated an age of more healthy Scholasticism, and the great Jesuit teachers, Toletus, Vas-
era, in which the same principles were, so to speak, in solution, and not crystallized in definite expression. It is the trait which differentiates Scholasticism from the Schools. As long as it lasted Scholasticism lasted, and as soon as the opposite conviction became established, the conviction, namely, that what is true in theology may be false in philosophy, Scholasticism ceased to exist. It is, therefore, a matter of constant surprise to those who know Scholasticism to find it misrepresented on this vital point.

B. Scholastic Rationalism.—Scholasticism sprang from the study of dialectic in the schools. The most decisive battle of Scholasticism was that which it waged in the twelfth century against the mystics, who condemned the use of dialectic. The distinctive mark of Scholasticism in the age of its highest development is its use of the dialectical method. It is, therefore, a matter, once more, for surprise, to find Scholasticism accused of undue subservience to authority and of the neglect of reason. Rationalism is a word which has various meanings. It is sometimes used to designate a system which, refusing to acknowledge the authority of revelation, tests all truth by the standard of reason. In this sense, the Scholastics were not Rationalists. The Rationalism of Scholasticism consists in the conviction that reason is to be used in the elucidation of spiritual truths and in the detection of the dogmas of faith. It is opposed to mysticism, which distrusted reason and placed emphasis on intuition and contemplation. In this milder meaning of the term, all the Scholastics were convinced Rationalists, the only difference being that some, like Abelard and Roscelin, were too ardent in their advocacy of the use of reason, and went so far as to maintain that reason can prove even the supernatural mysteries of faith, while others, like St. Thomas, moderated the claims of reason, set limits to its power of proving spiritual truth, and maintained that the mysteries of faith could not be discovered and cannot be proved by unaided reason.

The whole Scholastic movement, therefore, is a Rationalistic movement in the second sense of the term Rationalism. The Scholastics used their reason; they applied dialectic to the study of nature, of human nature and of supernatural truth. Far from paying too much attention to reason, they paid too little—some modern critics think they went too far in the application of reason to the discussion of the dogmas of Faith. They acknowledged the authority of revelation, as all Christian philosophers are obliged to do. They admitted the force of human reason when the contents of divine revelation were verified. But in theology, the authority of revelation did not coerce their reason, and in philosophy and in natural science they taught very emphatically that the argument from authority is the weakest of all arguments. They did not subordinate reason to authority in any unworthy sense of that phrase. It was an opponent of the Scholastic movement who styled philosophy "the handmaid of theology", a designation which, however, some of the Schoolmen accepted to mean that to philosophy belongs the honourable task of carrying the light which is to guide the faithful of theology. One need not go so far as to say, with Barthélemy Saint-Hilaire, that "Scholasticism, in its general result, is the first revolt of the modern spirit against authority." Nevertheless, one is compelled by the facts of history to admit that there is more truth in the description than in the superficial judgment of the historian who describes Scholasticism as the subordination of reason to authority.

C. Details of Scholastic Method.—The Scholastic manner of treating the problems of philosophy and theology is apparent from a glance at the body of literature which the Schoolmen produced. The immense amount of commentary on Aristotle, on Peter Lombard, on Boethius, on Pseudo-Dionysius, and on other authors indicates the activity which characterizes the Scholastic period. The use of texts dates from the very beginning of the Scholastic era in philosophy and theology, and was continued down into modern times. The mature teacher, however, very often embodied the results of his own speculations in a Summa, which, in time, became a text in the hands of his successors. The *Questiones disputatae* were special treatises on the more difficult or the more important topics, and, as the name implied, followed the method of debate prevalent in the schools, generally called disputatio or determination. The *Quodlibeta* were miscellaneous, generally in the form of a *Summula*. As soon as a teacher had attained a widespread renown, began to come to him, not only from the academic world in which he lived, but from all classes of persons and from every part of Christendom. The division of topics in theology was determined by the arrangement in Peter Lombard's "Boole of Sentences" (see *SUMMULAE, SUMMULES*), and in philosophy it adhered closely to the order of treatises in Aristotle's works. There is a good deal of divergence among the principal Scholastics in the details of arrangement, as well as in the relative values of the *questiones disputatae*, "pacts," "summulae," etc. All, however, adopt the manner of treatment by which thesis, objections, and solutions of objections stand out distinctly in the discussion of each problem. We find traces of this in Gerbert's little treatise "De rationali et ratione uti" in the tenth century, and it is still more definitely adopted in Abelard's "Sic et non". It had its root in Aristotelian method, but was determined more immediately by the dialectical activity of the early schools, from which, as was said, Scholasticism sprang.

Much has been said both in praise and in blame of Scholastic terminology in philosophy and theology. It is rather generally acknowledged that whatever precision there is in the modern languages of Western Europe is due largely to the dialectic disquisitions of the Scholastics. On the other hand, ridicule has been poured on the stiffness, the awkwardness, and the lack of variety in the Scholastic style. The study of the question, it should be remembered that the Scholastics of the thirteenth century—and it was not they but their successors who were guilty of the grossest sins of style—were confronted with a terminological problem unique in the history of thought. They were suddenly and unexpectedly thrown on the defensive. A whole new literature, the works of Aristotle. They spoke a language, Latin, on which the terminology of Aristotle in metaphysics, psychology etc., had made no impression. Consequently, they were obliged to create all at once Latin words and phrases to express the terminology of Aristotle, a terminology remarkable for its extent, its variety, and its technical complexity. They did it honestly and humbly, by translating Aristotle's phrases literally; so that many a strange-sounding Latin phrase in the writings of the Schoolmen would be very good Aristotelian Greek, if rendered word for word into that language. The Latin of the best of the Scholastics may be lacking in elegance and distinction; but no one will deny the merits of its rigorous severity of phrase and its logical soundness of construction. Though wanting the grace of what is called the fine style, grace which have the power of pleasing but do not facilitate the work of the learner in philosophy, the style of the thirteenth-century masters possesses the fundamental qualities, clearness, conciseness, and richness of technical phrase.

IV. The Contents of the Scholastic System.—
In logic the Scholastics adopted all the details of the Aristotelian system, which was known to the Latin world from the time of Boethius. Their indirect, immediate, and fundamental contributions to the system of logic were in the matter of teaching and in the technical of the science. Their underlying theory of knowledge is also Aristotelian. It may be described by saying that it is a system of Moderate Realism and Moderate Intellectualism. The Realism consists in teaching that a kind of a belief, namely the infimga, is a mediately universal which correspond to our universal ideas. The Moderate Intellectualism is summed up in the two principles: (1) all our knowledge is derived from sense-knowledge; and (2) intellectual knowledge differs from sense-knowledge, not only in degree but also in kind. In this way, Scholasticism avoids Innatism, according to which all our ideas, or some of our ideas, are born with the soul and have no origin in the world outside us. At the same time, it avoids Sensism, according to which our so-called intellectual knowledge is only sense-knowledge of a higher or finer sort. The Scholastics, moreover, took a firm stand against the doctrine of Subjectivism. In their discussion of the value of knowledge they held that there is an external world which is real and independent of our thoughts. In that world are the forms which make things to be what they are. The same forms received into the mind in the process of knowledge are not to be the object but to know the object. This presence of things in the mind by means of forms is true representation, or rather presentation. For it is the objective thing that we are first aware of, not its representation in us.

The Scholastic outlook on the world of nature is Aristotelian. The Schoolmen adopt the doctrine of matter and form, which they apply not only to living things but also to inorganic nature. Since the form, or entelechy, is always striving for its own realization or actualization, the view of nature which this doctrine leads to is teleological. Instead, however, of ascribing purpose in a vague, unsatisfactory manner to nature itself, the Scholastics attributed design to the intelligent, provident author of nature. The principle of finality thus acquired a more precise meaning, and at the same time the danger of a Pantheistic interpretation was avoided. On the question of the origin of the soul men were divided among themselves, some, like the Franciscan teachers, maintaining that all created beings are material, others, like St. Thomas, holding the existence of "separate forms", such as the angels, in whom there is potency but no matter. Again, on the question of the distinction of the substantial forms of agreement. St. Thomas held that in each individual matter substance, organic or inorganic, there is but one substantial form, which conveys being, substantiality and, in the case of man, life, sensation, and reason. Others, on the contrary, believed that in one substance, man, for instance, there are simultaneously several forms, one of which conveys existence, another substantiality, another life, and another reason. Finally, there was a divergence of views as to what is the principle of individuation, by which several individuals of the same species are differentiated from one another. St. Thomas taught that the principle of individuation is matter with its determined dimensions, materia signata.

In regard to the nature of man, the first Scholastics were Augustinians. Their definition of the soul is what may be called the spiritual, as opposed to the biological, definition. They held that the soul is the principle of all activity that the exercise of the senses is a process from the soul through the body, not a process of the whole organism, that is, of the body animated by the soul. The Scholastics of the thirteenth century frankly adopted the Aristotelian definition of the soul as the principle of life, not of thought merely. Therefore, they maintained, man is a compound of body and soul, each of which is an incomplete substantial principle, the unitive being, consequently, substantial. For them there is no need of an intermediary "body of light" such as St. Augustine imagined to exist. All the vital activities of the individual human being are ascribed ultimately to the soul, as to its active principle, although they may have some immanent principles, namely, the faculties, the senses, the vegetative and muscular powers. But while the soul is in this way concerned with all the vital functions, being, in fact, the source of them, and the body enters as a passive principle into all the activities of the soul, exception must be made in the case of the material parts. They are, like all the other activities, activities of the individual. The soul is the active principle of them. But the body contributes to them, not in the same intrinsic manner in which it contributes to seeing, hearing, digesting, etc., but only in an extrinsic manner, by supplying the materials out of which the intellect manufactures ideas. This extrinsic dependence explains the phenomena of fatigue, etc. At the same time it leaves the soul so independent intrinsically that the latter is truly said to be immaterial.

From the immateriality of the soul follows its immortality. Setting aside the possibility of annihilation, a possibility to which all creatures, even the angels, are subject, the human soul is naturally immortal, and its immortality, St. Thomas believes, can be proved from its immateriality. Duns Scotus, however, whose notion of the strict requirements of a demonstration was influenced by his training in mathematics, denies the conclusive force of the argument from immateriality, and calls attention to Aristotle's hesitation or obscurity on this point. Aristotle, as interpreted by the Arabians, was, undoubtedly, opposed to immortality. It was, however, one of St. Thomas's greatest achievements in philosophy that, especially in his opusculum "De unitate intellectus", he refuted the Arabian interpretation of Aristotle, showed that the active intellect is part of the individual soul, and thus removed the uncertainty which, for the Aristotelians, hung around the notions of immateriality and immortality. From the immateriality and immortality, the Scholastics draw the conclusion that the soul is not only spiritual, but also that it originated by an act of creation. It was created at the moment in which it was united with the body: creando infunditur, et infundendo creatur is the Scholastic phrase.

Scholastic metaphysics added to the Aristotelian system a full discussion of the nature of personality, restated in more definite terms the traditional arguments for the existence of God, and developed the doctrine of the providential government of the universe. The exigencies of theological discussion occasioned also a minute analysis of the nature of accident in general and of quantity in particular. The application of the resulting principles to the explanation of the mystery of the Eucharist, as contained in St. Thomas's works on the subject, is one of the most successful of all the Scholastic attempts to render faith reasonable by means of dialectical discussion. Indeed, it may be said, in general, that the peculiar excellence of the Scholastics as systematic thinkers consisted in their ability to take hold of the profoundest metaphysical distinctions, such as matter and form, potency and actuality, substance and accident, and apply them to every department of thought. They were no mere apriorists; they recognized in principle and in practice that scientific method begins with the observation of facts. Nevertheless, they excelled most of all in the talent which is peculiarly metaphysical, the power to grasp abstract general principles and apply them consistently and systematically.

So far as the ethics of Scholasticism is not distinctly
Christian, seeking to expand and justify Divine law and the Christian standard of morals, it is Aristotelian. This is clear from the adoption and application of the doctrine of virtue as the golden mean between two extremes. Fundamentally, the definition is eudemonistic. It rests on the conviction that the supreme good of man is happiness, that happiness is the realization, or complete actualization, of one's nature, and that virtue is an essential means to that end. But what is vague and unsatisfactory in Aristotelian Eudemonism is made definite and safe in the Scholastic system, which determines the meaning of happiness and realization according to the Divine purpose in creation and the dignity to which man is destined as a child of God.

In the field of the problems of political philosophy the philosophers of the thirteenth century, while not discarding the theological views of St. Augustine contained in "The City of God", laid a new foundation for the study of political philosophy by introducing into the researches of the Aristotelian school the criterion of the rule of law. By giving to human beings a nature which requires the co-operation of other human beings for its welfare, God ordained man for society, and thus it is His will that princes should govern with a view to the public welfare. The end for which the state exists is, then, the common good, not individual, but common interests. All this is to make life better and happier is included in the Divine charter from which kings and rulers derive their authority. The Scholastic treatises on this subject and the commentaries on the "Politics" of Aristotle prepared the way for the medieval and modern discussions of political problems. In this department of thought, as in many others, the Schoolmen did at least one service which posterity should appreciate: they strove to express in clear systematic form what was present in the consciousness of Christendom in their day.

The contents of Scholastic philosophy are best learned from the original sources. Many of the works of the early Schoolmen are to be found in P. L. The works of the later Scholastics are accessible in standard editions of their opera omnia. Of Blumr and von Hertz's series, Texte zur Geschichte der Phil. des M.A., (Münster, 1891 sqq.), seven volumes have appeared, and the eighth is in course of publication (1911). The principal tenets of Scholasticism are explained in Rickaby, Scholasticism (London, 1898); Freiberger, The Revival of Scholasticism, etc., (Oxford, 1899); Bawin, Scholasticism Old and New, tr. Cropsey (Dublin, 1907). The Stumpfert Series (London, 1888 sqq.), comprising Borden, Johnson, Carter, Lorch, M. E. Carter, Psychologische Rickaby, First Principles; Idee, General Metaphysics; Joseph Rickaby, Moral Philosophy; Walker, Theories of Knowledge, and the Catholic University Series of textbooks (vol. 1, Washington, D. C., 1911) are popular expositions of the Scholastic system in its relation to modern thought.

WILLIAM TURNER.

Schollner, Herman, theologian and historian, b. at Freising in Bavaria, 15 January, 1722; d. at Welchenberg, 16 July, 1795. He entered the Benedictine abbey of Oberlatsch in 1738; studied philosophy at Erfurt and Salzburg, and was director of the house of studies of the Bavarian Benedictines from 1752 to 1757; professor of dogmatic theology at Salzburg from 1759 to 1766. He travelled to Vienna in the interests of his monastery in 1770; became prior of his monastery in 1772; taught dogmatic theology at Ingolstadt from 1776 to 1780; and became provost at Welchenberg in 1780. From 1780 to 1790 he was a member of the Bavarian Academy of Sciences. He is the author of about fifty theological and historical treatises. As member of the Bavarian Academy he wrote "Monumenta Niderlandae" and "Monumenta Oberlandae," Elizabethianus et Oesterhofensis," which form volumes XI and XII of "Monumenta Germaniae Historica" (Bonn, 1780). Other important works of his are: "De magistratu ecclesiasticorum origine et creatione" (Stuttgart, 1757); "De disciplina arcani antiquitate et usu" (Tegernsee, 1755); "Ecclesiae orientalis et occidentalis concordia in transsubstantiatione" (Bonn, 1780); "De benedictinorum temporibus" (Ratisbon, 1757); "Historia theologica ab apostolica saeculi secundi" (Salzburg, 1761); "Preslectiones theologicae ad usum studii congressiones Benedictinum-Bavariae in XII tomos divisae" (Augsburg, 1769), and numerous contributions to the "Abhandlungen der bayr. Akad. der Wissenschaften".

MICHAEL OTT.

Scholfs, Charles Mathieu, b. of Catholic parents at Maastricht, Holland, 28 March, 1849; d. at Delft, 17 March, 1897. At the age of eighteen he was sent to the polytechnic school at Delft, where he obtained the degree of civil engineer after a brilliant examination. A few months later he was appointed a teacher at the Royal Military Academy of Breda, where he published a highly-appreciated textbook on surveying—"Leerboek over landmeten en waterpassen" (Breda, 1879). In 1874 he submitted to the Royal Academy of Amsterdam a treatise on the errors in a plane and in space, and shortly afterwards another on the interpolation formula of the Beutheche, both treatises testifying to an uncommon degree of mathematical intuition. As early as 1878 he was offered the professorship of geodesy and surveying at the polytechnic school at Delft. In 1880 he was elected a member of the Royal Academy of Sciences, of which he published a series of important investigations connected with geodesy: on the calculation of distance and azimuth from longitude and latitude—"Berekening van afstand en azimuth uit lengte en breedte"; concerning the connexion of triangular nets of higher and lower order—"Over de aansluiting van een driehoekennet van lagere orde aan 3 punten van een net van hogere orde"; on cartographical projections—"Studien van kaart-projectieën"; on the use of Mercator's projection in equatorial triangulation, etc.

Scholfs however did not confine his interests to geodesy. In connexion with the theory of probability he possesses from his boyhood and three communications on the Law of Errors, while of his works on pure mathematics, his researches on a semi-convergent series and on errors in logarithmic tables may be mentioned. His activity in civil engineering is well illustrated by the prominent part he took in the publication of the text-book on hydraulic engineering—"Waterbouwkunde", and a detailed investigation into bending moments and shearing stresses in railway bridges. Important national services were rendered by Scholfs by a conscientious preparation and supervision of the new geographical survey of Holland, which had been undertaken in 1886 by order of the Government. Scholfs, who had held the office of Inspector and Levelling Committee since 1881, threw himself into the work with characteristic ardour. He devised an elaborate plan of proceeding and conducted the operations without allowing the smallest detail to
escape him. At the time of his premature death (1812) the greater part of the primary triangulation had been finished.

Unequaled as a teacher he commanded the highest admiration by the masterly way in which he exposed and discussed the most intricate problems, and many scientists of recognized authority were known to take their places on the benches among his pupils. His treatises and calculations recommended themselves by their extreme simplicity, at the same time being classic for their completeness and elegance. In his social intercourse he was amiable and engaging, and in return was universally esteemed and honoured. His energy was remarkable, and the unflinching resolution with which he undertook a task, which failing health compelled him to commence with frustration, cannot be contemplated without admiration. Naturally of a reserved disposition, his habits were simple and his manners unassuming, nor was he ever known to show the slightest vanity or self-esteem on account of the numerous distinctions which were showered upon him; love of truth was his only passion. Three things he always cherished and treasured in the midst of his restless activity: the love of his country, his family, and his religion. He died of consumption at the age of 48.

To him are due the writer from personal reminiscences and from the following articles: "Van de Sander Barathus. In Memoriam, Charles Mathias Schulte, Verhagen Ken. der Academie, te haren, Nieuwland, Tijdschrift voor de Wetenschappen, Dr. Ch. M. Schols in Tijdschrift voor K. en Landesakademie, XIII, i."

J. STEIN.

Schols, John Martin Augustine, an erudite German Orientalist and exegete, b. at Kapedesdorf, near Breslau, 8 Feb., 1794; d. at Bonn, 20 Oct., 1852. He studied in the Catholic gymnasium and the University of Breslau. In 1817 he took the degree of Doctor of Theology at the University of Freiburg, and then went to Paris, where he studied Persian and Arabic under Silvestre de Sacy, and collated numerous codices (Greek, Latin, Arabic, and Syriac) of the New Testament. From Paris he went to London, and thence passing through France and Switzerland reached Italy, the principal libraries of which he visited in quest of Biblical information. In the autumn of 1821, upon his return from a journey through Egypt, Palestine, and Syria, and having been ordained at Breslau (Oct., 1821), Schols became professor of exegesis at the University of Bonn, a post which he held during Life and until his death, during which time he was an experienced lecturer. At the beginning of his work, he found time to publish several important works. The principal among these are: "Novum Testamentum Graecum" (2 vols., Leipzig, 1830), a critical edition of the original text, full of erudition but marred by a defective classification of authorities and by numerous critical inaccuracies; "De virtutibus et vitis utriusque Cod. N. T. familias" (Leipzig, 1845), a sort of supplement to the preceding work; "Einleitung in die Schriften des A. u. N. T." (Cologne and Leipzig, 1845), a treatise in the field of systematic theology, interesting only of the Old Test.; "Handbuch des bibl. Archäologie" (Bonn, 1834). To these works may be added Schols' own account of his travels: "Reise in die Gegend, etc." (Leipzig, 1832); "Bibelkritische Reise, etc." (Leipzig, 1835); his essays on the Holy Scriptures (Bonn, 1835); his "Cursus critez," containing a valuable description of Cod. K "Cyprians" (Heidelberg, 1830); "De fontibus historie V. Test." (Bonn, 1830); and his discourse on the harmony of Divine revelation with science (Bonn, 1845). Schols was also a contributor to the learned periodicals published at Bonn.

SCHOLZ, E. GIGOT.

Schoenborn, the name of a German noble family, manorial, vassal, which were linked with the Church.

1) Johann Philipp von Schönborn, Archbishop of Mainz and Bishop of Würzburg and Worms, b. at Eschbach in the Westerwald, 6 August, 1605; d. at Würzburg, 12 February, 1673. When sixteen years old he became a cleric (an expectant for a canonicate) at the cathedral of Würzburg, and in 1655 at that of Mainz. He became cathedral dean of Würzburg in 1829, and of Worms in 1830. In 1833 he was made provost of Kronberg and of St. Burkard at Würzburg. On 16 August, 1642, he became Bishop of Würzburg (deacon, 1642; priest, 1645); on 18 November, 1647, he was made Archbishop of Mainz (deacon, 1647; priest, 1649). His foreign policy was mainly directed towards the maintenance of peace, but this policy did not always meet with approval and often failed in its object. On the other hand his administration of all domestic affairs was excellent, and as a ruler he was not below the best of his era. His contemporaries gave him the honourable titles of "The Wise", "The German Solomon", and "The Cato of Germany". He succeeded in repairing the injuries inflicted upon his domains by the Thirty Years' War, settled the disputes as to territory with the neighbouring rulers, reorganized the higher civil service, and improved the administration of justice. To compensate for the scarcity of priests and to raise the standard of the secular clergy, he called to Mainz and Würzburg the Barathomites, an institute founded by Bartholomew Holzhauer (Institutum clericorum secundum in communi sanctum). In 1654 he transferred to them the administration of the ecclesiastical seminary at Würzburg, and in 1660 also that of the gymnasium founded by him at Münsterberg. In 1662 he established a seminary for priests at Mainz. Aedred by the Jesuit Spee, he suppressed the trial of witches in his domains, and thus contributed, as far as lay power, to the abolition of this miserable delusion. He surrounded at his court by a large number of distinguished men, statesmen, diplomats, scholars, and pious ecclesiastics. (2) Lothar Franz von Schönborn, nephew of the above, was Archbishop of Mainz (1656-1729) and Bishop of Bamberg (1656-1689); (3) Damian Hiro Pilipp von Schönborn was Bishop of Würzburg (1740-1793) and of Speyer (1719-1743) and of Constance (1740), and was also a cardinal. He did much for the Diocese of Speyer, and was conspicuous for his culture, learning, and piety; (4) Franz Georg von Schönborn was Bishop of Trier (1729-1746) and of Worms (1739-1746). Both Frederick I, Father of the above, and his grandson, his nephew, praised him as an excellent ruler. (5) Johann Philipp Franz von Schönborn was Bishop of Würzburg (1719-1729). (6) Friedrich Karl von Schönborn was Bishop of Bamberg and Würzburg (1729-1450). The last three prelates were brothers, and nephews of Johann Franz. (7) Francis von Schönborn was Bishop of Prague (24 Jan., 1844; d. 25 June, 1898. He became Bishop of Prague in 1888, and was created cardinal in 1889.

Weitere, Johann Philipp von Schönborn (Heidelberg, 1880); Manfred, Johann Pilip von Schönborn, 1880; Hovri, Histor.-gen. Atlas, I (Gotth., 1858), 133.

KLEMENS LÖFFLER.

Schongauer, Martin (also known as SckÖß), German painter and engraver, b. at Colmar between 1445 and 1450; d. probably in 1491, it is believed at Breisach. He was the son of Caspar Schongauer, a goldsmith, who had come from Bavaria, and settled at Colmar about 1445, and who lived until about 1481. He had four brothers, Ludwig, a painter, Caspar, George, and Paul, goldsmiths. By some authors, Martin is said to have been the youngest son, by others, the eldest of the family. He matriculated at the University of Leipzig in 1465, purchased a house in 1477, and founded a Mass for his parents and himself in 1493. Three are almost
the only facts we know concerning him, and all other information about him is derived from dates on his drawings or engravings. His masterpiece is known as the "Virgin in the Garden of Roses", and is in the Church of St. Martin at Colmar. He has been described as a pupil of Rogier van der Weyden on the authority of a letter written to Vasari, but although Rogier van der Weyden's influence is to be recognized in Schongauer's work, it seems very doubtful whether he ever entered that painter's studio. Several of his paintings are dated, but with the exception of the one in Colmar, we have no absolute evidence that any one of them is his work, and no documents have yet been discovered enabling us to verify his paintings. We are very much in the same position with regard to his engravings. They bear the signature of his initials, but there is nothing in the statements of his contemporaries to say with absolute certainty that the engravings signed M.S. are his work. There is, however, very little doubt in the matter, and they are always accepted as being his work. He is not to be regarded as a great draughtsman, but in actual technique of line engraving he is unsurpassed in his period, and is practically the equal of Dürrer. About a hundred plates attributed to him are in existence, and there is an almost perfect collection of his prints in Berlin, a collection almost equal to it existing in London.

The standard work upon him is Walz, Bibliographie des Oeuvres et Articles concernant Martin Schongauer (Colmar, 1893); Neumann in Neumann's Archives (1887), 139.

GEORGE CHARLES WILLIAMSON.

SCHÖNINGH.—The publishing house of Ferdinand Schöningh at Paderborn was founded by Ferdinand Friedrich Joseph Schöningh, who was born at Meppen in Hanover 16 March, 1815, and died at Paderborn, 18 Aug., 1883. He was the son of Dr. Schöningh, an official of the law courts. Educated at the gymnasium of his native town, he was active in the book trade since 1831. He served an apprenticeship in Münster and Sest, and on 12 May, 1847, he opened under great difficulties a book and art store at Paderborn that soon developed into a prosperous business. Schöningh never lost sight of a higher aim, the establishment of a publishing house; selling his store in 1875 and perceiving the need of Catholic newspapers and periodical literature, he founded in 1848 the weekly "Westfälisches Kirchenblatt", and in 1849 the "Westfälische Volksblatt", which was intended to instruct the people in the political and social questions of the day and to give them the Christian view on these subjects. On 1 April, 1910, a publishing house was formed, the initial publication of which was the first year-book of the Diocese of Paderborn (1849). Schöningh's ability and power for hard work gradually built up his business, especially as regards the publication of scientific works. The reputation of the publishing house was established and maintained in the interest and learning by the publication of such works as the textbooks and exercise-books of Ferdinand Schults, which passed through many editions and were translated into numerous languages; the "Bibliothek der ältesten deutschen Literatur-Denkämter" (Helfand, Beowulf, etc.), edited by Moritz Heyne, a university professor; and excellent theological works, as that on dogmatics by Oswald, the explanation of the Catechism by Deharse, etc. The house remained loyal to the "Wissenschaftler" learning and constantly increased its publications in these directions. Among the periodicals published under its supervision are: "Chrysoleus" (from 1880); "Blätter für kirchliche Wissenschaft und Praxis" (from 1867); "Gymnasium" (from 1883). Schöningh did not think much to encourage the "Wissenschaftler" poets whose works he issued were those of Brill, Luise Hensel, and especially of F. W. Weber. Weber's poems published by Schöningh include: "Dreizehnnder", "Goliath", "Gedichte". Schöningh died suddenly from apoplexy. His stanch Catholic opinions, sincere and honest character, and joy in what he produced cannot be forgotten in the Catholic intellectual life of Germany.

Up to the time of the death of the founder, the house had published 673 works in 905 volumes, embracing the most varied branches of knowledge and literature. The firm was carried on in the same spirit by Schöningh's son, Ferdinand (b. 7 March, 1850), who since 1885 has had charge of the publishing department, and Joseph (b. 12 June, 1860), who since 1891 has been the business manager. In the course of time four branches were established, namely: in 1886, the Neue publishing house at Münster; in 1887 one at Osnabrück, combined with a store for learned antiquarian works; in 1891 one at Mainz; and in 1902 one at Würzburg. The house has ever since its establishment given special attention to works in the three main divisions of learning. In the departments of scientific and practical theology they publish the periodicals: "Theologie und Glaube"; "Jahrbuch für Philosophie und spekulative Theologie"; "Fürsorge und Erziehungswissenschaft"; "Chrysoleus". For the entire field of scientific and practical pedagogics the house issued the following periodicals: "Monatschrift für katholische Lehrerinnen" and "Zeitschrift für christliche Erziehungswissenschaft"; it also gives attention to linguistics and to literature, and issued numerous works in all the other departments of learning. Among the more extensive compilations published were the "Wissenschaftler" "Wissenschaftler" Handbuch"; 41 volumes of this work have already been issued, and of these 34 are theological and philosophical works written by distinguished German scholars, as B. Funk (Church history), Göpfert (moral theology), Heiner (canon law), Pohle (philosophy), Pruner (pastoral theology), etc. Other publications are those of the Görres Society: "Studien zur Geschichte und Kultur des Altersamts", "Quellen und Forschungen zur Geschichte der päpstlichen Hof- und Finanzverwaltung", "Publikationen der Sektion für Rechts- und Sozialwissenschaft". Still other works are: "Sammlung der bisher publizierten pädagogischen Schriften aus alter und neuer Zeit", "Sammlung der kommentierten und der Textausgaben deutscher und ausländischer Klassiker für den Schulgebrauch".

HERMANN MÜLLER.

SCHOOLS.—The Christian Church, by virtue of her Divine charter, "Going, teach ye all nations", is essentially a teaching organization. Teaching is included in her task of saving souls. Primarily she was instituted to dispense the means of salvation, and to teach the truths which are necessary to salvation. These truths are moral, and moral, and her catechumenal schools (see Catechism) were instituted for the purpose of teaching them. Truths which
are not of their nature spiritual, truths of science, of history, matters of culture, in a word, profane learning—these do not belong intrinsically to the programme of the Church's teaching. Nevertheless, they enter into the same forces of world life. They are, namely, the Christian youth cannot attain a knowledge of them without incurring grave danger to faith or morals. They enter also into the Church's task by reason of a pedagogical principle which she has always recognized in practice. Religion being the supreme principle in all education, as it is in life, if the so-called secular branches of knowledge are taught without reference to religion, the Church feels that an educational mistake is being made, that the "one thing necessary" is being excluded, to the detriment of education itself. Therefore she assumes the task of teaching the secular branches in such a way that religion is the centralizing, unifying, and vitalizing force in the educational process. Whenever there is positive and immediate danger of loss of faith, the Church cannot allow her children to run the risk of perversion; whenever religion is left out of the curriculum, she tries to supply the defect. In both cases she introduced the "internal" schools which are called Catholic and which, in the vices of historical development or from the particular circumstances of their foundation, scope, or maintenance, are specifically known as catechetical schools, monastic schools, cathedral schools, chantry schools, guild schools, and others.

II. Catechetical Schools. These flourished about the middle of the second century of the Christian era. They were brought into existence by the conflict of Christianity with pagan philosophy. They were, consequently, academies of higher learning. Out of them grew the first great schools of theological controversy and also the schools for the special training of the clergy, although there were, almost from the beginning, schools attached to the household of the bishops (episcopal schools) where clerics were trained. We have reason to believe that in some instances, as in the catechetical school of Protagenes at Edessa (about 180), not only the higher branches but also the elementary branches were taught in the catechetical schools. Schools of this type became more numerous as time went on. In the Council of Vaison (529) the priests of Gaul are commanded to take boys into their homes, to teach them to read the Holy Scriptures and to instruct them in the Law of God. From these sprang the parochial schools of medieval and modern times.

As the conflict between Christianity and pagan philosophy gave rise to the catechetical schools, the more general struggle between Christian and pagan standards of life gave rise to other provisions on the part of the Church for safeguarding the faith of Christian children. In the first centuries great stress was laid on the importance of home education, and this task was committed in a special manner to Christian mothers. It is sufficient to mention the Christian mothers Melania, Aspasia, Anastasius, Monica, and Paula, mothers of saints and scholars, to show how successfully the homestead under the direction of the Christian mother was made to counteract the influence of pagan schools. There were also private schools for Christian youth, taught by Christians, for instance the school at Imla, taught by Cassian.

111. Monastic Schools. Monasticism as an institution was a protest against the corrupt pagan standards of living which had begun to influence not only the public life of Christians but also their private and domestic life. Even in the fourth century, St. John Chrysostom testifies to the decline of fervour in the Christian family, and contends that it is no longer possible for children to obtain proper religious and moral training in their own homes. It was part of the purpose of monasticism to meet this need and to supply not only to the members of the religious orders but also to children committed to the care of the cloister the moral, religious, and intellectual culture which could not be obtained elsewhere without lowering the moral standard. The monastic schools, though instituted primarily for the education of clerical candidates, did not decline to admit secular scholars, especially after the State schools of the empire had fallen into decay. There were parochial schools also, which, while they aimed at fostering vocations to the religious profession, as it is in life, the so-called secular branches of knowledge are taught without reference to religion, the Church feels that an educational mistake is being made, that the "one thing necessary" is being excluded, to the detriment of education itself. Therefore she assumes the task of teaching the secular branches in such a way that religion is the centralizing, unifying, and vitalizing force in the educational process. Whenever there is positive and immediate danger of loss of faith, the Church cannot allow her children to run the risk of perversion; whenever religion is left out of the curriculum, she tries to supply the defect. In both cases she introduced the "internal" schools which are called Catholic and which, in the vices of historical development or from the particular circumstances of their foundation, scope, or maintenance, are specifically known as catechetical schools, monastic schools, cathedral schools, chantry schools, guild schools, and others.

The explicit enactment of the Council of Vaison (529) in this matter is important because it refers to a similar custom already prevailing in Italy. It remains true, however, that although the episcopal and presbyteral (parochial) schools thus contributed to the education of the laity, the chief portion of the burden of lay education in the early Middle Ages was borne by the monasteries. The earliest monastic legislation does not clearly define the organization of the "internal" and "external" schools. Nevertheless, it recognizes the existence in the monastery of children who were to be educated, not for the cloister, but for the world. In Ireland, as Archbishop Healy says, the monks, "taught the children of the rich and poor alike" ("Ireland's Ancient Schools and Scholars", 105), and Ireland went not only for England and the Continent, to receive an education. On the Continent also the education of the laity, "gentle and simple", fell to the lot of the monks. It is difficult to say when the distinction between the "internal" school (schola clausa) and the "external" school (schola externa) was first introduced. We find it in St. Gall, Fulda, and Reichenau in the ninth and tenth centuries. In the internal school the pupils were novices, future members of the order, some of whom were offered up (oblati) by their parents at a tender age. In the external school were the children of the neighbouring villages and the sons of the nobility; many of the references to this class of pupils in the monastic code lay stress on the obligation to treat them with equal justice, not taking account of their rank in life. There was a similar custom in regard to the reception of young girls in the convents, as speaking from several places of the Pseudo-Arethas and of Arles and his successors. At Arles, moreover, according to Muteau (see bibliography) open schools (écoles ouvertes) were held by the nuns for the benefit of the entire neighbourhood. The curriculum of studies in the monastic schools comprised the trivium and quadrivium, that is to say, grammar, rhetoric, dialectic, arithmetic, geometry, astronomy, and the theory of music. Besides, the monks cultivated the science and art of healing; they devoted attention to agriculture, building, and the decorative arts. They took pains to transcribe the Classics as well as the distinctly ecclesiastical works that had come to them; and in doing this they developed the art of penmanship, that of illumination to a high degree of perfection. They were annalists also, noting down year by year the important events not only in the life of their own community but also in the Church at large and in the political world. Finally, by example and precept they dignified manual labour, which in pagan Rome had despised as fit only for slaves.

The head of the monastic school was called magister scholae, capicula, proscholus, etc. By the end of the ninth century, however, the usual name for the head of the school was scholasticus. His assistants were called seniores. The method of teaching was influenced largely by the scarcity of books and the need of handing down without diminution the heritage of the past. The master dictated (legere was the word used to signify the act of teaching), and the pupils wrote...
not only the text but also the master's explanation or commentary. Of the many textbooks in use the most popular was the work by Marci anus Capella (about 420) entitled "De Mysteriis Scholasticis," or "Philo logie". That the instruction given to the laity in the monastic schools was entirely gratuitous is evident from the decree of Bishop Theodulf of Orleans in the eighth century, and from other documents. When, at Tours, the external school was frequented by a number of small boys, whose parents gave the monastery put the poorer students in a position of apparent inferiority, the bishop of that see, Amalric, gave a generous donation to the monks to be used in the maintenance of poor students. The Carolingian revival of education affected not only the internal schools but also the external schools, and, during the reign of Charles's successor, bishops and popes by a number of decrees showed their interest in the maintenance not only of schools of sacred science, but also in schools "for the study of letters". The external school had by this time become a recognized institution, which the sons of the farmers in the neighbourhood of the monastery frequented not by privilege but by a right freely acknowledged. We know that before the end of the ninth century both boys and girls attended the schools attached to the parish churches in the Diocese of Soissons. As time went on the establishment and maintenance of schools by the parish clergy matter of express canonical enactment. No document could be more explicit than the Decree of the Third Council of Lateran (1179): "That every cathedral church have a teacher (magistrum) who is to teach poor scholars and others, and that no one receive a fee for permission to teach." (Manus, XXII, 234).

IV. Cathedral Schools.—The cathedral schools sprang from the episcopal schools which, as has been said, existed from a very early time for the training of clerics. Chrodegang, Bishop of Mobs, 742-68, is said to be the founder of medieval cathedral schools, but only in the sense that he organized the clergy of his cathedral church into a community, and ordained that they undertake the conduct and management of the school attached to their church. The bishop himself was to have control of the school and under him was to be the immediate superior of the school (magister scholas). In the cities and towns where there was no cathedral church the parish church were organized after the manner of the cathedral clergy, and conducted a "canonicate" school. In both institutions there came to be distinguished (1) the elementary school (schola minor) where reading, writing, rhetoric, etc. were taught; and (2) the higher school (schola major) in which the curriculum consisted either of the trivium alone (grammar, rhetoric, and diale ctics), or of the full programme, namely the seven liberal arts, Scripture, and what we now call pastoral theology. The method employed in the cathedral schools was identical with that of the monastic schools.

V. The Chantry Schools.—The chantry schools were similar in character to the cathedral and canonical schools. Indeed, they may be said to be a specific kind of canonicate schools. The chantry was a foundation with endowment, the proceeds of which went to one or more priests carrying the obligation of singing Mass at stated times, or daily, for the soul of the founder, or for the souls of persons named by him. It was part of the duty of the incumbents of a chantry foundation to "teach gratis the poor who asked it humbly for the love of God." (See "Catholic University Bulletin," IX, 3 sq.).

VI. Old Schools and New Schools, the last beginning with the thirteenth century, shared the work of education with the cloister, cathedral, and chantry schools. The guilds and hospitals were ecclesiastical foundations, were guided by clerics, and engaged in the work of education under the direction of the Church. The city schools at first met with opposition from the teachers in the monastic and cathedral foundations, although they also were under the control of secular canonists. "Teaching of Education" (see bibliography) mentions a decree of Alexander III which prohibits any abbot from preventing any magister or scholasticus from taking charge of a school in the city or suburb "since knowledge is a gift of God and talent is free". Towards the end of the fourteenth century, the school of the cathedral teacher became so important that communities of clerics were founded for the express purpose of devoting their lives to the duties of elementary education. The best known of these communities is that of "The Brothers of the Common Life" founded by Gerard Groot (1374-84) at Dendermonde. It soon extended to the universities of Agnetenberg, and other towns in Holland and North Germany. To this community belonged Thomas & Kempis, the author of "The Imitation of Christ." That these various provisions for the education not only of the clergy but also of the laity—monastic schools, cathedral schools, canonate schools, and schools of the minor orders and of the guilds, met the educational needs of the time, were adequate as far as the circumstances of the times would allow, is the verdict of all historians who view without prejudice the educational career of the Catholic Church. Ravertin (see bibliography) has gone over the whole question of primary education in medieval times; Leach has told part of the story (see bibliography) as far as pre-Reformation England is concerned. It is impossible to give more than a summary statement of the facts which these writers have accumulated. Those facts, however, justify the assertion that, far from opposing or neglecting the education of the masses, the Catholic Church in medieval times provided generously for their instruction in the elementary branches, as well as in the department of higher studies, whenever and wherever the political, social, and economic conditions were not so adverse as to thwart her educational efforts.

Both the particular and the general councils of the Church, imperial capitularies, and episcopal and papal decrees show that bishops and popes, while concerned primarily for the education of future clergy, also sought to establish education in the sacred sciences, were also at pains to encourage and promote the education of the laity. For instance, the Council of Cloveshoe, held by Cuthbert, Archbishop of Canterbury in 749, prescribes that abbesses as well as abbots provide for the education of all their householders (juvenes). A Carolingian canon (of 802) enjoins "that every church should have a son to study letters, and that the child should remain at school with all diligence until he became well instructed in learning". Theodulf of Orleans in 797 decrees that gratuitous instruction be given by the priests in every town and village of his diocese, and there cannot be the least doubt that this instruction of the laity is meant. The Council of Châlon-sur-Soone in 813 legislates in a similar spirit that not only "schools of Sacred Scripture" but also "schools of letters" be established. The Council of Rome, held in 853, directs the bishops of the Universal Church to establish "in every episcopal residence its universitas episcopica", among the populations subject to them, and in all places where there is such need" masters and teachers to teach "literary studies and the seven liberal arts".

These and similar documents lay stress on the obligation which rests on the parents and godparents to see to the education of children committed to their care. By the middle of the ninth century the distinction between external and internal monastic schools being clearly recognized, and parish schools having become a regular diocesan institution, the testimonies in favour of popular education under the auspices of the Church
become clearer. In the tenth century, in spite of the disturbed conditions in the political world, learning flourished in the great monasteries, such as that of St. Gall (Switzerland), St. Maximin (Trier), and in the cathedrals of Salzburg. The greatest teachers of that time, Bruno of Cologne and Gerbert of Aurillac (Pope Sylvester II), taught not only the sacred but also the profane sciences. In the eleventh century the school of Chartres, that of Ste-Geneviève at Paris, and the numerous schools of rich towns and dioceses showed that even in the higher branches of learning, in spite of the fact that the teachers were invariably clerics, the laymen were welcomed and were not denied education of the secondary kind. That, as historians have pointed out, the references to popular and elementary education in the local councils of the Church have not always been preserved, is explained by the fact that elementary Church schools were now an established fact. Ecclesiastical authority intervened only whenever some abuse called for remedial legislation. Thus, the decree of the Third Council of Lateran already referred to (p. III) aimed at abolishing the abuse of abundant fees charged in the municipal schools. There were, naturally, details of arrangement to be determined, such as salary of teachers and supervision or personal instruction on the part of the pastor. These were provided in decrees, such as that of the Diocesan Synod of St. Omer in 1183 and that of Engelbert II, Archbishop of Cologne, in 1272.

The history of education in England before the Reformation is the story of the efforts made in monastic, cathedral, chantry, and parish schools for the education of the laity as well as of the clergy. In the narrative of the suppression and confiscation of these schools (see bibliography) it gives abundant documentary evidence to justify his assertion that “Grammar schools, instead of being comparatively modern, post-Reformation inventions, are among our most ancient institutions, some of them far older than the Lord Mayor of London or the House of Commons” (p. 5). He estimates the number of grammar schools before the reign of Edward VI to have been “close on two hundred”, and these he considers to be merely “the survivors of a much larger host which have been lost in the storms of the past, and drowned in the sea of destruction” (ibid.). They were maintained by the gifts of the canons and Dean of the cathedral churches, monasteries, collegiate churches, hospitals, guilds, and chantries, but also independent schools, in one of which “an old man was paid thirteen shillings and fourpence by the Mayor, to teach young children their A B C” (p. 7). Linlithgow, a school known to bear the name of Grant’s “History of the Burgh Schools of Scotland”. “Our earliest records,” says that writer, “prove not only that schools existed, but that they were therein found in connection with the Church” (p. 2). He quotes documents for the foundation of schools in 1100, 1160, and cites in many instances papal approval and confirmation of educational establishments in the twelfth century. He is convinced that these institutions were intended not merely for clerics but also for young laymen (ibid., p. 12), and he concludes his summary by admitting that “The scattered jottings collected in this chapter show our obligation to the ancient Church for having so diligently promoted our national education—an education as universal as the reach of all classes” (ibid., p. 72).

The educational institutions founded and supported by the Church in France, Germany, Italy, and other parts of Europe before the Reformation have, in part, been mentioned in the general account of monastic and cathedral schools. Spright (see bibliography) has produced documentary evidence to show the extent to which laywomen were educated in the convent schools of the ninth and the following centuries; he has also shown that daughters of noble families were, as a rule, educated by private teachers who, for the most part, were the clergy. “The association so frequently made that, during the Middle Ages, learning was considered out of place in a layman, that even elementary knowledge of letters was a prerogative of the clergy, is not sustained by a careful examination of historical records. It is true that the great majority of the popular literature of the Middle Ages in which the student learned was as well versed in the art of warfare and in the usages of polite society, affects to despise learning and to regard it as a monkish or ecclesiastical accomplishment. But, as Léon Maître (see bibliography) asserts, “such ignorance was by no means systematic; it arose from the conditions of the time.” The twelfth-century writer, “is not an exclusive privilege of the clergy, for many laymen are instructed in literature. A prince, whenever he can succeed in escaping from the tumult of public affairs and from [the conclusion of] constant warfare, ought to devote himself to the study of books” (L. C. III, col. 149). The number of distinguished laymen and laywomen, emperors, kings, nobles, queens and princesses who, during the medieval era, attained prominence as scholars shows that the advice was not disregarded. The calumnies recently reaffirmed that “the Church was not the mother, but rather the stepmother, of learning” is easily asserted, but is not so easily proved.

The destruction of this vast and varied system of ecclesiastical legislation is a fact of general history. The schools, as a rule, disappeared with the institutions to which they were already closely connected with the cathedral churches, monasteries, collegiate churches, hospitals, guilds, and chantries, but also independent schools, in one of which “an old man was paid thirteen shillings and fourpence by the Mayor, to teach young children their A B C” (p. 7). Linlithgow, a school known to bear the name of Grant’s “History of the Burgh Schools of Scotland”. “Our earliest records,” says that writer, “prove not only that schools existed, but that they were therein found in connection with the Church” (p. 2). He quotes documents for the foundation of schools in 1100, 1160, and cites in many instances papal approval and confirmation of educational establishments in the twelfth century. He is convinced that these institutions were intended not merely for clerics but also for young laymen (ibid., p. 12), and he concludes his summary by admitting that “The scattered jottings collected in this chapter show our obligation to the ancient Church for having so diligently promoted our national education—an education as universal as the reach of all classes” (ibid., p. 72).

VII. The fundamental principles of canon law bearing on these questions may be stated as follows: (1) The Church, being a perfect society, has the right
to establish schools, which, although they may be permitted by the civil law merely as private institutions, are, of their nature, public; (2) by natural law, the obligation lies primarily with the parents of a child to provide for his education, and not with the State. This is part of the purpose and aim of the family as an institution. If no provision is made by any other institution, the parents must provide education either by their own effort or that of others whom they employ; (3) when the parents neglect their duty in the matter of education, the State upon the representation of the ecclesiastical authorities, the State cannot approve schools which exclude religion from the curriculum, both because religion is the most important subject in education, and because she contends that even secular education is not possible in its best form unless religion is taught. The Church, sometimes, tolerates schools in which religion is not taught, and permits Catholic children to attend them, when the circumstances are such as to leave no alternative, and when due precautions are taken to supply by other means the religious training which such schools do not give. She reserves the right to judge whether this be the case, and, if her judgment is unfavourable, claims the right to forbid attendance (see Letter of Gregory XVI to Irish Bishops, 16 Jan., 1831). (3) In all schools, whether established by the Church or the State, or even by a group of families (so long as there are pupils received from different families) the State has the right to see that the laws of public health, public order, and public morality are observed, and if in any school doctrines were taught subversive of public peace or otherwise opposed to the interests of the general public, the State has the right to intervene "in the interest of the good of the general public". (4) State monopoly of education has been considered by the Church to be nothing short of a tyrannical usurpation. In principle it overrides the fundamental right of the parents, denies the right of the Church even to open and maintain schools for the teaching of religion alone, and in its natural effect on public opinion, tends to place religion below considerations of merely worldly welfare. (5) The Church does not deny the right of the State to levy taxes for the support of the State schools, although, as we shall see, this leads to injustice in the manner of its application in some countries. The principle is that the abuse of the principle. Similarly, the Church does not deny the right of the State to decree compulsory education so long as such decrees do not abrogate other and more fundamental rights. It should always be remembered, however, that compulsion on the part of the State is not the dominant and prominent right, but must be justified by considerations of public good. (6) Finally, the right of the Church in the matter of religious teaching extends not only to the subject of religion itself but to such matters as the character of the teacher, the spirit and tone of the teaching in such subjects, and the content of the textbooks used. She recognizes that de-Christianized teaching and de-Christianized textbooks have inevitably the effect of lessening in the minds of pupils the esteem which they teach them to have for religion. In a word her rights are bounded, not by the subject of religion, but by the spiritual interests of the children committed to her care, as well as by the physical interests of the State. This is the purpose and aim of the family as an institution. If no provision is made by any other institution, the parents must provide education either by their own effort or that of others whom they employ; (3) when the parents neglect their duty in the matter of education, the State must not yield so readily to the demands of the State. All through the sixteenth and seventeenth centuries councils (Cologne, 1536 and 1560; Salzburg, 1590; Breslau, 1592; Augsburg, 1610) withstood the encroachments of civil authority on the parochial schools and, as a rule, a modus vivendi was reached satisfactory to the bishops. By the end of the eighteenth century, however, the notion of State jurisdiction in educational matters was firmly established. For the most part the foundation of private schools was the solution. These were recognized by German law as belonging to the jurisdiction of the Church. The Church, however, in the nineteenth century, the "institutes of public Christian instruction" began to be the ordinary solution of the problem. In these there were children of various denominations, each denomination having, in theory, the right to care for the religious instruction of its members. On several occasions the bishops of Germany or of central Germany, as was the case at Wittenberg, 1848, the Bavarian bishops (1850) against the restrictions of the rights of the Church. At the present time the simultaneous schools are obligatory in a few provinces and optional (facultatis) in others, while in Bavaria, the Rhine Provinces and elsewhere, "confessional", i.e. denominational, schools are the rule, and simultaneous, or mixed, schools, the exception. Throughout the empire the supreme control of all elementary schools is vested in the government, the local ecclesiastical authorities being granted a greater or less amount of supervision and control according to the different circumstances in different localities. The teacher of religion for Catholics is of course always a Catholic, almost always a priest, and is a regularly qualified and salaried teacher, like the instructor in other branches. The statute of the bishops towards the contemporary educational system in Germany is set forth in the decree of the Council of 1853.

B. In Austria.—Until the beginning of the nineteenth century the conditions were similar to those existing in Germany. The legislation of Joseph II had been distinctly hostile to religious influence in the schools. However, the enactments of 1808, 1868, 1855, etc. give a measure of authority and control to the local clergy which make the conditions in Austria to be as a rule more favourable than in the German Empire. The question of language has of course complicated matters in many provinces of Austria, and local conditions, the personality of the government official, etc. have much to do with the educational status at any given time. The decrees of the Council of Vienna (1855) contain the views of the hierarchy of Austria in regard to the present condition of religious education in that country. The letter of the Archbishop of Vienna to the Papal Nuncio (22 Oct., 1868) is also an important edification for the detail of the status of 1855 (AUTO-HUNGARIAN MONARCHY, p. 130).

C. In France.—The Napoleonic decree of 1808 established in principle and in fact the most rigorous State monopoly in education. It met at once with a vigorous protest on the part of the Catholic bishops, who demanded the right of inspection in the homes of the parents in whom, they contended, the right to educate is primarily vested. In 1833 and 1850 (La loi Failoux) "free schools" were recognized. No
special concession was made to the Church, but permission was granted to individuals to open schools. From 1833 to 1850 members of religious orders or priests could teach in out of the public schools. In 1850 they were free, as citizens, to open schools of their own, both primary and secondary. In 1886 a blow was struck at free primary education by authorization given to mayors and school inspectors to oppose the opening of any private school on hygienic or moral grounds. In 1899 came another attack in the form of an order of the Council of State, depriving communes and departments of the right to grant appropriations for private schools. Finally in 1904 it was declared that "teaching of every grade and every kind" is forbidden in France to the members of the congregations. This resulted in the closing of 16,904 "congregational" schools. Since that time the bishops have tried to reorganize Catholic education by establishing private schools in which the teachers are either laymen and laywomen or secularized members of the congregations. Instruction in religion in the State schools was optional with the parents of the children by the people. The Government in 1882 religious instruction in the primary schools of the State was absolutely forbidden, and in 1886 religious and clergymen were forbidden to teach in those schools. In place of denominational religion there was introduced first a species of "denominational necrothology" (enseignement critique). Within the present decade the tendency of this teaching has been plainly seen in the introduction of textbooks which are both anti-clerical and anti-religious, with the result that bishops are at present under indictment in France for daring to warn the people of their dioceses against the use of such books in the schools supported by the people.

D. In Belgium.—See Belgium; also pamphlet by Cardinal Dechamps, "Le Nouveau projet de loi sur l'enseignement primaire" (Mechlin, 1879).

E. In England.—Until the beginning of the nineteenth century there was no government system of primary schools in England nor were any primary schools in receipt of State aid. It was not until 1833 that government grants were made, and then the schools that benefited were either schools of the National and British Foreign Society, or, in any case, schools in which the Bible was read in the regular instruction. The civil disabilities under which Catholics suffered, and the restriction of grants in practice to Bible-reading schools excluded Catholic private schools from State aid until 1848. In 1856 and 1858 the conditions under which grants were given were made more favourable. The Act of 1851 to 1863 the Board of Education in England was Forster's Elementary Education Act of 1870. This Act, while it did not abolish the voluntary or denominational schools, established the Board of schools. These were to be supported from the rates or taxes, and governed by the powers of the Board, which in the main are those of the local board of education. The Board helped to build the Board-schooLs and, in places where the boards were judged culpably negligent, compelled them to build. In 1876 and 1880 supplementary enactments were passed, called School Attendance Acts, which compel the attendance at either voluntary or Board-schools of all children under ten. The religious difficulty was met at first by leaving the matter of religious instruction to the discretion of the local board. Later the "Conscience" clause and the "Cowper-Temple" clause were added, in order to satisfy the Anglicans and the Nonconformists. These clauses set aside a special hour for religious instruction, attendance at which was to be entirely voluntary, and forbade the use of "any catechism or religious formulary distinctive of any particular denomination". Catholics were able to accept these conditions in some localities. Meantime various enactments, for example in 1891 and 1897, were passed, which lessened the burden of the voluntary schools. The Bill of 1902, which became law in 1903, took the responsibility of the school boards for the education of the poor out of the town and county councils, and compelled these to take over and maintain the voluntary schools. This brought England in line with Scot land, where a similar law was in force since 1872. The Nonconformists, however, objected because in localities where they were in the minority the religious instruction given in the schools would be denominational, that is Anglican. To meet this objection Mr. Birrell's Bill of 1906 was framed. But, after various vicissitudes, the Bill was finally defeated, and never became law. It would have had the effect of wiping the voluntary schools out of existence and abolishing the Church of England in the schools. Mr. Birrell's Bill would, of course, have been acceptable to the Nonconformists, but is bitterly opposed by both Catholics and Anglicans. In 1870 the number of Catholic schools in England and Wales was 354, providing for the education of 105,503 children; while in 1906 the number of schools had increased to 1,471 and the attendance had reached 284,746. This increase is largely due to the zeal of the Catholic School Committee, now known as the Catholic Education Council.

F. In Ireland.—The primary education of Catholics in Ireland is provided for by (1) schools under the Anglican religious denomination, (2) schools under the Roman Catholic religious denomination, and (3) National Schools, endowed by the State, of which in 1901 there were 8569, with an attendance of 602,209. These were established by the Act of 1831 and are governed by Act and subsequent statutes, authorizing being vested in the National Commissioners of Education. The majority of the National Schools are taught by lay teachers. Many of the girls' schools are, however, taught by nuns, and boys' schools by Christian Brothers (of the Congregation of St. John Baptist de La Salle), Presentation, Marymaids, Patrician, and Francisca Brothers. The Act of 1831 aimed at separating the Christian religion in religion. It provides that it is at all practicable there is a National School for Catholics and one for Protestants in the same locality. Where the attendance is "mixed" there is a separate hour for religious instruction, attendance at which is voluntary. In Catholic sections when the bishop of the diocese, or, when the bishop is absent, the manager is almost invariably the parish priest. The manager is the local school authority; he appoints the teachers (subject to the approval of the commissioners), removes them, and conducts all the necessary correspondence with the commissioners. His powers and duties are those of a school board. He is, if a priest, responsible to his bishop. By enactment of the Maynooth Synod of 1900 he may not dismiss a teacher without submitting the case to the bishop of the diocese in which the school is situated. Of the seven training colleges for primary teachers, five are under the management of the Catholic bishops. The number of teachers trained in these colleges is now more than double the number of untrained teachers. Religious instruction in the primary schools is given at a stated hour by the regular teachers of the school: this is supplemented by the local clergy, who have access within reasonable limits to the classroom for the purpose of religious instruction. That these conditions are, on the whole, acceptable to the bishops is clear from the pastoral address issued in 1900 from the National Synod of Maynooth. It should be added, however, that it is due to
the vigilance and devotion of the Irish clergy that they have gradually evolved from the original National system which was "thoroughly dangerous", a system which at the present time is "a help rather than a hindrance to the Church".

G. In the United States.—"The greatest religious fact in the United States to-day," writes Archbishop Spalding, "is the Catholic School system, maintained without any aid by the people who love it". The vastness of the system may be gauged by the fact that it comprises over 20,000 teachers, over 1,000,000 pupils, represents $100,000,000 worth of property; and costs over $15,000,000 annually. This system grew up with the Church, its beginning was not a hundred years before the building of the first school. The oldest schools in the present territory of the United States are the Catholic schools founded about 1800 in the Spanish colonies. The French colonies, too, had their schools as a regular part of the civil and religious scheme of colonisation and civilisation. Catholic educational work in the Thirteen Colonies dates from the arrival of the Catholic colony in Maryland. The first regularly established school in Maryland dates from 1640. As the condition changed from that of a missionary country to that of a country regularly provisioned with a fixed population, the schools came to be recognised as a function of organised parish work. In the Spanish and French school, the school, like the Church, looked to the State for support. In the English colonies there was also State support of denominational education, but whether the Catholic could or could not secure a share of the public funds depended on local conditions. When the States adopted their constitutions, they did not introduce any change in this respect. It was "the gradual rise of dissentient religious bodies in the colonies and States due to the influx of emigrants and other causes, that brought about important changes which led to the elaboration of a "nonsectarian system of schools" (Burns, "The Catholic School System in the United States", p. 359). We know that in many instances Catholic in the West and even in Massachusetts and New York obtained funds from the State for the support of their schools, as the Episcopalians and Presbyterians did for theirs.

The unsuccessful attempt of Father Richard of Detroit in 1868 to obtain for the Catholic schools of that city a share of the public funds, was followed in 1830 by a more successful plan at Lowell, Mass. At that time the population of Lowell included many Irish Catholics. In 1833 a meeting was held of the Catholic Sabbath School to establish a separate school for the Irish population, and the following year the sum of fifty dollars annually was appropriated for that purpose. In 1855 there were two Catholic schools at Lowell; both were recognised as part of the school system of the town, and both were supported out of the public funds. After sixteen years of successful trial the arrangement was discontinued in 1852, owing to the wave of bigotry known as the Know-Nothing Movement that swept over New England. In New York, Father Robert J. Gaugh in 1886, St. Peter's School applied for and received State aid. A similar arrangement was made for St. Patrick's School in 1816. In 1824 this support was withdrawn by the State, owing to the activity of the Public School Society. To this society was committed the entire school fund for distribution, and, as we learn from the New York Catholic, it bequest was not large enough to meet the expenses of the public schools not strictly non-sectarian but offensively Protestant. In 1840 the School Controversy in New York was precipitated by the petition of the Catholics to be allowed a share of the public funds for their schools. The petition was rejected by the Common Council; but the fight was not, on that account, continued. With remarkable zeal, eloquence, and erudition, Bishop Hughes, supported not only by all his Catholic people, but also by some of the non-Catholic congregations of the city, urged the claims of religious education. He laid stress on the contention that Catholics have a right to "a fair and just proportion of the funds appropriated for the common schools, provided the Catholics will do with it what is done in the common schools". He claimed no special privilege, but contended for the "constitutional rights" of his people. He was opposed, not only by the Public School Society, but also by representatives of the Methodist, Episcopal, and Presbyterians. At the beginning of the movement, the Catholics met the legislature; but there also sectarian hatred was injected into the discussion and bigotry gained the day. The controversy, however, had one good result: it showed the imminent danger to faith and morals existing in the public school system as influenced by the so-called non-sectarian of that day, and, as a consequence Catholics set to work to build up, at a tremendous cost, a system of parochial schools unsupervised by the State.

In theory it is still maintained that injustice is being done to Catholics. If the "secular branches" are taken in the common school and not in the Catholic schools, the schools should be compensated for doing that portion of the task which the State has assumed. On the other hand, there are many Catholics who are convinced that if State aid were accepted it could be done only at the cost of independence, that State aid would be the price of admitting State supervision to the extent of partial de-Catholicization. There have, nevertheless, been individual instances in which a compromise has been reached, e.g. Savannah, Georgia; St. Augustine, Florida; Poughkeepsie, New York; and Faribault and Stillwater, Minnesota. The last-mentioned instance gave rise to the celebrated Controversy of the Catholic and the Civilian in the United States. The Faribault plan consisted in setting aside a certain time for religious instruction, to be given gratis by the Catholic teachers, and a time for secular instruction, to be given also by Catholic teachers. The secular instruction was to be paid for by the State, and in respect to that portion of its work the school was to be under State supervision; it was, in fact, to be recognized as a "public school". The question was finally carried to the Congregation of the Propaganda, which rendered its decision on 21 April, 1892, to the effect that "considering the peculiar circumstances of the American nation and the agreement by which the plan was inaugurated, it may be tolerated". In the discussion of the Faribault plan certain fundamental questions were touched, as for instance in Dr. Bouquillon's "Education, to whom does it belong?" (Baltimore, 1891), "A Rejoinder to the Civilian Catholics" (Baltimore, 1892), "A rejoinder to Critics" (Baltimore, 1892), Holland, S.J., "The Parents First" (New York, 1891), Conway, S.J., "The State Last" (New York, 1892), Brandi, S.J., in "Civiltà Cattolica", 2 Jan., 1892, tr. as a pamphlet (New York, 1892). It should be added that, owing to some local difficulty the agreement was later discontinued, and the school was to-day in a few places in Minnesota.

The attitude of the hierarchy of the United States towards the problem of elementary education has been consistent from the beginning. At first Bishop Carroll, in the days immediately following the Revolution, entertained the idea that Catholic schools at once should compete with their non-Catholic fellow-citizens in building up a system of education that would be mutually satisfactory from the religious point of view. Soon, however, he realized that that hope was futile. After the First Catholic Synod he addressed (1892) a pastoral letter to the Catholics of the country, in which he emphasized the necessity of a "pious and Catholic edu-
education of the young to insure their growing up in the faith", and expressed the hope that the graduates of the newly-founded College of Georgetown would, on returning to their homes, be able "to instruct and guide others in local schools". Thus the plan of organizing separate Catholic schools was inaugurated. The First Plenary Council of Baltimore (1829) declared it "an absolute necessity that schools should be established, in which the young shall be taught the principles of faith and morality, while being instructed in letters" ("Decreta", n. 33). The Second Council (1832) renewed this enactment and entered into the details of organization (see "Decreta", n. 38). The Third Plenary Council of Balti-
more, in 1850, gave very careful consideration to the subject of elementary schools and decreed in explicit terms the obligation of establishing a parochial school in every parish within two years of the promulgation of the decree, except where the bishop, on account of serious difficulties in the way ("ob graviorebus diffi-
cultatibus") judges that a delay may be granted ("Acta et Decreta", 199, no. 1).

IX. Parochial Schools and Public Schools.—The establishment and maintenance of parochial schools does not imply the condemnation of public schools, or opposition of any kind to the purpose for which these are established and conducted, but it does make it more evident why Catholic schools should be established, not on account of the difficulties which they may encounter, but on account of the advantages which they offer to the Catholic child. The Catholic schools are aiming successfully at the sublime ideals as the public schools. Since that time the calumny has been repeated that parochial schools lead to sectionalism, and are opposed to national patriotism. Catholics can only answer that this is not true, and point to facts to justify their reply. Our schools teach every moral that is taught in the public schools, and, in addition, teach religion and religious morality. The exclusion of religion from the public schools is, we think, historically, the result of sectarian division and sectarian prejudice. In recent times theorists have sought to justify the omission on pedagogical grounds, and have suggested various substitutes for religion as a basis of morality. We criticise the theories, and point to the educational results in justification of our contention. If the exclusion of religion and the substitution for it of inadequate and futile moral education lead to disastrous results, the Catholics who call attention to this fact, public schools, are really doing it a service. Meantime they feel that the tendency in the educational policy of the public school system is more and more towards secularization. In the matter of morality they feel that experiments more and more dangerous are being tried in the public schools, and, if they proceed, they may do something after all, they have a right, as taxpayers, to do. Meantime also they are developing their own system of education without giving up the contention that, in justice, they have a right to compensation for the secular education and the education in citizenship which they give in their schools. Conflicts between the educational authority of the State and the Catholic clergy have arisen in a few instances. The clergy have always recognized the right of officials of the Department of Health, etc., to interfere in the matters in which they have competence. Where they have retained full autonomy, and have been left for the sake of other forms of recognition, they have naturally avoided all friction with State educational authority. By way of exception, we have the celebrated Ohio Compulsory Education case, in which Father Patrick F. Quigley, of Toledo, Ohio, resisted unsuccessfully the enactment of the State of Ohio (1890) compelling all principals and teachers in all schools to make quarterly reports to State officers. The still more famous Wisconsin Bible Case involved the question of the right of the District Board of Edgerton, Wisconsin, to have the King James Version of the Bible read in the public schools which were attended by Catholic pupils. The Supreme Court of Wisconsin decided in favor of the Catholics.

X. Principles embodied in the Parochial Schools.—The sacrifice which Catholics are making in maintaining their system of primary schools is justified, in their estimation, by the following principles: (1) The spiritual interests of the child, while not exclusive of others, such as learning, health, skill, ability to make a living, are supreme. When there is doubt as to which of two things the soul of a Catholic child no consideration of economy has weight. (2) Next to religion, morality is the most important matter in the life of a child. Catholics maintain that morality is best taught when based on religion. Catholic educational theorists, especially, are convinced that the immature mind of the child cannot grasp principles of morality except they are presented by way of religious authority and religious feeling. (3) Considering the nature of the child-mind, the whole curriculum of the school is best presented when it is organized and unified, not fragmentary and split as is the secular system. (4) Denominational education, as far as it does to the heart as well as to the head, offers the best principle of mental and spiritual unification and organization. The exclusion of religion from the schools is a pedagogical mistake.

XI. Organization and Statistics.—The parochial school system is distinguished by its organization. The supreme educational authority is the bishop, who governs and administers the schools of his diocese through the assistance of a school board and, very often, a dio-
cean (clerical) inspector of schools. The immediate authority is vested in the pastor, whose task it is to provide building, salaries, etc. The teachers are almost universally religious. The principal of the school is appointed usually by the religious community to which he or she belongs. The great majority of the schools are mixed, that is, schools for boys and girls. The only exceptions, apparently, are those in which the boys are taught by brothers and the girls taught by sisters. There is no nationalized national central au-
thority in Catholic educational matters. However, the parochial school section of the Catholic Educational Association has already done much towards unifying and systematizing our parochial schools. The training of teachers is, as a rule, provided for by the different religious communities engaged in the work of
teaching. There are no diocesan institutions for the training of the teachers for the whole diocese. During the summer of 1911 a regular session of the Catholic University of America was held for the benefit of the teaching sisterhoods. Of the three hundred who attended, a large percentage took up professional pedagogical subjects. Similar institutes were held at Chicago, Milwaukee, and elsewhere. In the autumn of 1911 the Sisters of Charity College was founded at Brookland, D. C., under the auspices of the Catholic University of America, and of the twenty-nine students who attended the first session all took professional courses in education. The number of parochial schools in the United States in 1911 was, according to the "Catholic Directory," 49,722, with a total of pupils 1,270,131. These figures do not include orphan asylums, which numbered 285 and took care of 51,938 orphans. Neither do they include the non-parochial academies, convent boarding schools, and day schools, nor the colleges for boys, many of which have a number of primary pupils in attendance.

I. For history of schools (catechetical, monastic, etc.) Drane, Christian Schools and Scholars (2 vols., London, 1887); Brother Anthony of Swartern (1890); Willett, Das Erziehungswesen der Freimaurer (Breslau, 1892) 2d ed.; Verkuyten, De latere scholen en de Ursulinen (Rotterdam, 1905) 2d ed.; De Graaf, Gesch. des Gelehrtenschulwesens in Deutschland (1842, 2d ed.); Leontovitch, Die Schulen und der Unterricht (Zurich, 1890) 2d ed.; Van de Walle, De Latere (Rotterdam, 1892) 2d ed.; Van Soest, Gesch. des Gelehrtenschulwesens in Deutschland (Stuttgart, 1895); Ravyk, De geestelijke en tot de Politie (Paris, 1888) 2d ed.; Laprion, De latere (Rotterdam, 1892) 2d ed.; Mayer, De latere (Rotterdam, 1892) 2d ed.; De la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la Salle, De latere (Rotterdam, 1892) 2d ed.; de la S
by the voluntary contributions of the faithful—church collections, concerts, bazaars etc.—and the gratuitous labours of the religious. The classes in the Catholic primary schools are graded in a system somewhat similar to that in the Government schools. In the public schools, not only in Detroit but in the rest of the State, the Catholic school authorities have been able to issue special Catholic school readers and periodical school papers. As an offset to the Government scholarships, which unlike those in England are tenable only at the Government high schools, the Catholics have founded scholarships in Catholic secondary schools for their primary school children. Technical instruction is usually included in the curriculum of the larger schools, but is more systematically organized in Catholic institutions for orphans and industrial work.

**WILFRID RYAN.**

**IN CANADA.—** Canada is a self-governing dominion of the British Empire consisting of nine provinces and some territories, dependencies and incorporated territories. The population is partly French in origin and language, partly British. It will be necessary, in order to be accurate, to speak of each province separately.

A. Province of Ontario.—The beginnings of Catholic education in Ontario may be said to date back to the year 1813, in which the Jesuit Joseph Le Caron, making a journey of exploration in the countries of the Algonquin and Huron tribes, decided on the foundation of missions in their midst. Writing to the Court of France, he said: "We must first make men of these Indians, then Christians. During the years 1822–26, his first efforts were assisted by the arrival of Fathers Guillaume Poulin, Nicholas Viel, and de La Roche d’Aillon, of his order, and the Jesuit Fathers Brebeuf and de La Noue. Their work was facilitated by the aid of interpreters who were good Christians and valiant auxiliaries. By 1638 the Jesuit Fathers, now ten in number, had established two residences on the banks of Georgian Bay. These outposts speedily became centres of Christian and Catholic civilization. Until 1650 the missionaries, with their devoted lay brothers and coadjutors from France, were the only Catholic teachers of Ontario. Their first lessons of catechism, of book-knowledge, of the religious life, gave them the greatest promotions, and often at the peril of their lives, much owed more to their unlimited zeal than to any generosity on the part of their pupils. In 1649 the Huron and Algonquin neophytes were exterminated by the ferocious Iroquois, who burnt or destroyed seven flourishing missions, which had been directed by no fewer than sixty missionaries and helpers, many of whom perished with their flocks. The surviving heroes of the Gospel found a new field of action among the Outasouas, who inhabited the present County of Bruce, the islands of Georgian Bay, and Great Manitoulin Island. The work that had been done in Hurontario and Algonquinnia was now renewed on behalf of the Western tribes. Nothing that human zeal could accomplish was spared to make of them civilized people and fervent Catholics. When Antoine de La Mothe Cadillac founded the important post of Detroit (1701), he was accompanied by the joyful companions of the Jesuit Fathers Le Caron, Lyon, and the Rev. Father Lhalle, who became rector of the pioneers of Essex. The Iroquoit tribe, belonging to the large family of the Algonquins, settled in the farthest eastern end of the province in the present Counties of Stormont, Glengarry, and Prescott, received at an early age the salutary teachings of Catholic doctrine and the benefit of Catholic education.

After the War of American Independence, a great number of settlers, fitted up by the British flag, took refuge in the Province of Ontario. The first immigrants established themselves at Indian Point, in the vicinity of Kingston, in 1784. Later on, other loyalists took up homesteads at Toronto and Niagara. The Jewish families who had followed de La Mothe Cadillac and the Iroquois to Detroit, had settled around Seneca Lake, in the counties of Seneca, Cayuga, and Oneida. For the next 20 years the province was unbounded in Catholic growth. The French, and their descendants rapidly invaded both the Counties of Essex and Kent, where the French population now almost forms a majority. In 1786 and 1802 Scotch emigrants settled in large numbers in the Counties of Glengarry and Prescott. From 1816 to 1824 British garrisons and furtrading stations on the French River, Lake Carleton, Lanark and Peterborough. The construction of the Rideau Canal caused a large number of workmen to take up their residence in the province. An entire colony of Scotch Catholics, expelled from the United States after the War of Independence, on account of their attachment to the British Crown, settled in Canada near Niagara, in the Counties of Lincoln and Welland. A vigorous stream of immigration from Germany in 1835 overflowed the western end of the province, in the present Counties of Bruce, Huron, and Perth. Meanwhile French Canadians poured into the Counties of Russell, Grey, and Bruce, and from the United States the French Canadians of various occupations ascended the Ottawa River, exploring the regions now known as New Ontario, Algoma, Nipissing, and Thunder Bay. They are now in a majority in these three counties, and have churches, priests, and schools of their own. This Catholic immigration was abundant and sudden, incited the ardent zeal of Mgr Plessis, Bishop of Quebec, to send missionaries to Upper Canada. Priests from the seminary of Quebec, others from the foreign missionary organization of Paris, and a small number of priests who had immigrated with their Scotch or Irish countrymen ministered to the spiritual wants of these courageous colonists. They joyfully accepted their share of the great poverty of these pioneers. They thought more of preserving the Faith of administering the sacraments, and of reforming abuses than of founding schools. Not that they considered schools as of little importance, but because, from lack of resources and teachers, the establishment of schools was an impossibility. From 1830, however, Toronto had its Catholic school; then Kingston, in 1837, and Picton, in 1840, were likewise provided for. The hierarchy of the Catholic Church, ever anxious to encourage the education of its people, decided in 1841 that a bishop's seminary was soon established in the province. This was the signal for the opening of educational establishments at divers points. Ottawa had its Catholic schools in 1844; Brantford in 1850; Goderich and Peterborough in 1852; Hamilton, Oshawa, and Barrie in 1855; Perth and Alexandria in 1856; Orillia in 1856; Berlin, Dundas, and St. Thomas in 1858; Belleville in 1860, and so on. The venerable Bishops A. McDonell, R. Gaulin, Power, Guiges, O.M.I., de Charbonel, Pinsonnault, Jamot, Farrell, and Phelan; Fathers J. Ryan, Proulx, Grand, Maloney, Carayon, Grattan, Bissey, Jeffrey, Bilroy, Lawler, Faure, the Jesuit Fathers de la Croix and of Esqu Gabon; Fathers Tilmon, Dandurand, Tabaret, Soulier, Manrodt, and the Basilian Fathers—these were the pioneers and defenders of Catholic education in Ontario. They found very able helpers in the various religious communities of women, and in the Institute of the Sisters of Charity. Many of the emigrated Catholics, who were sincerely Christian persons among the laity also devoted themselves to the cause of Catholic education in the province. Among the earliest and most remarkable may be mentioned, at Toronto, J. Harvey and J. Seyers; at Ottawa, Dr. Riel, Friollet, and Goode; at Dunmore, Mise Sweeney; at Brantford, J. d’Astore; at Oakland, Capt. Fitzgerald.

The Catholic schools have become numerous and powerful. Their organization, from the points of view
of studies, discipline, and regular attendance of pupils, is better than that of all other institutions of the same class in the province. Many years have already elapsed since in the cities, villages, and other parts of the country, long opened up to colonization, the old square-timber school-houses were replaced by splendid buildings of brick or stone. The architecture of these buildings is beautiful and substantial; the system of ventilation, lighting, and heating are excellent; the installation of suitable school furniture and accessories is almost complete. This progress is very evident, even in centres of colonization. The school trustees make it a point of honour to put up school buildings which are not only handsome but which state nothing to be desired in ventilation, lighting, and heating. The Catholic schools of Ontario are called separate schools. They do separate, in fact, for school purposes, the Catholic minority from the Protestant majority. They make it possible for Catholics to withdraw their children from the public or common schools, which are by law Protestant. Nevertheless, there are some public schools which are really Catholic; these exist in localities exclusively or almost exclusively Catholic. Such schools are found especially in the Counties of Russell, Prescott, Algoma, Nipissing, Kent, and Renfrew. Separate schools were granted in 1841 to the Province of Upper Canada, and in 1842 to the Province of Lower Canada. The United Provinces of Upper and Lower Canada were united. Wishing to secure for their co-religionists in Lower Canada exemption from the obligation of sending their children to the Catholic schools (common schools in that province), and of paying taxes for the support of said schools, the Protestants of Ontario and Quebec proposed to establish a system of dissent or separate schools. What they claimed for the Protestants of Lower Canada they had to bind themselves in strict justice to grant to the Catholics of Upper Canada.

The principle of separate schools, Catholics in Ontario, and Protestants in Quebec, received the royal sanction on 18 September, 1841. This fundamental law had been discussed by a committee of the Legislative Assembly in which Lower Canada was represented by fifteen members and Upper Canada by eight. This law authorized dissidents from the common schools, on giving notice to the clerk of the district council, to pay their school taxes for the support of separate schools, and to receive a share of the government grants for education in proportion to their number. The same law authorized the election by the people of trustees for the administration of separate schools. The government, by the Education Act, provided for the election of examiners composed of an equal number of Catholics and Protestants. The Catholics of Ontario obtained the privilege of establishing a separate board for the examination of candidates wishing to teach in their schools; a clause in this fundamental law exempted the Brothers of the Christian Schools from submitting to examination by this board. From 1841 to 1863, at almost every session of the Legislature, the Ontario Protestants proposed amendments to the act establishing separate schools. These amendments tended, for the most part, to render the existence of separate schools in Ontario precarious so that they would die out of themselves. The desired privileges for the Protestants of Lower Canada had been obtained; it was well known that these privileges would always be respected by the Catholic majority of Quebec; now, they thought, it would be safe to deliver the attacks of unenlightened fanaticism against the schools of Upper Canada. At times, it might, the cry was raised for a single school system for the whole of Upper Canada—a common, public, or national school system. While constantly professing motives of the purest justice and common interest, the Protestant Province of Upper Canada has continually sullied its reputation for fairness by setting an example of fanaticism, narrow-mindedness, and intolerance towards Catholic schools, whilst Lower Canada, a Catholic province has been a model of perfect justice and toleration.

On 27 February, 1863, a Catholic deputy, R. W. Scott, presented for the fourth time a new law to govern the separate schools. This law was adopted, thanks to the generous aid given by the French Canadian deputies, to whom he addressed a resolution. The Upper Canadian majority voted against the bill, but all the members from Quebec and twenty-one members from Upper Canada, among them several Protestants, were in its favour and carried the measure.

If Ontario now possesses a system of Catholic separate schools, it is largely due to the French Canadians of Lower Canada, whose wishes in the matter were enforced by their representatives, Catholic and Protestant. This law, enacted in 1863, was maintained at the time of the Confederation in 1867; it still governs to-day the Catholic separate schools of Ontario. Yet it is far from giving to the Catholics of that province the same rights enjoyed by the Protestant minority of Quebec. It recognizes the Catholic separate schools for primary education only. Secondary or superior education in Ontario is Protestant. The Catholics have their academies, convents, colleges, and universities, but they are supported by the voluntary contributions of Catholics who have also to contribute, on the same footing as Protestants, to the support of the government high schools, collegiate institutes, and universities. It refuses to separate schools the right to a share of the taxes paid by public-utility companies, such as railway, tramway and telephone companies, banks, etc. It withholds from the trustees of separate schools the right of expropriation in order to secure more fitting localities for their schools. It refuses to the Protestant father of a Catholic family the right to pay his taxes towards the support of Catholic schools.

It allows Catholics the option of paying their taxes to support the public schools. As the rate of taxation for separate schools is generally higher than that for public schools, owing to the large number of children in families of the Catholic minority, and to the abstention of large business concerns from contributing the least support to the separate schools, it follows that many Catholics, more or less sincere, avoid the higher rate and pay their taxes towards the support of the public, or Protestant, schools. The separate schools are administered, as by a court of final jurisdiction, by the Education Department of the Province of Upper Canada, in which Catholics are not represented.

The law governing the separate schools nevertheless gives to Catholics the following rights: (1) to pay their taxes for primary schools in which religious instruction is given, and of which the teachers, instructors and textbooks are Catholic; (2) to administer these schools by a board of trustees elected by the Catholic proprietors and residents of the different school sections; (3) to fix the rate of school-taxation; (4) to have these school-taxes collected by the tax-collector of the city or township; (5) to negotiate loans so far as this is legal; (6) to engage teachers. The board of trustees has likewise the right to impose the teaching in French or German of reading, spelling and literature, as provided for by the regulations of the Education Department, page 9, article 15, year 1877. The French Canadians, availing the Latin right for the French language taught in 250 schools, frequented almost entirely by their children. The Government has named three French Canadian inspectors for these schools, called bilingual. The teachers of these schools are trained in two bilingual training-schools, one at St. Denis and the other at Ottawa. The former is supported by the Government, and directed by Catholic principals.
The certificates issued by these schools give the right to teach in the bilingual schools for five years only. The Government makes a yearly grant to both Catholic and public schools, the amount being calculated upon the value of the schoolhouse, the excellence of its furnishings, the certificates and salaries of the teachers, and the attendance of the children. The statistics for 1909, taken from the Report of the Minister of Education, are as follows:

Number of Catholic separate schools: 487
Number of pupils in attendance: 55,034
Average daily attendance: 34,553
Percentage of attendance: 62.78

Percentage of attendance in the public schools: 59.81
Number of teachers: 1,089
Amount spent for teachers' salaries: $161,317
Amount spent for teachers' salaries: 404,890
Average cost per pupil: 14.90

Total expenditures for 1909 for elementary public and separate schools: $8,141,423

The Catholic colleges for boys are: in the Diocese of Toronto, that of the Basilians Fathers, founded in 1852, 15 professors, 230 students; in the Diocese of London, Basilians Fathers, founded 1857, 37 professors, 114 students; Diocese of Hamilton, Fathers of the Resurrection, founded 1857, 11 professors, 100 students; Diocese of Kingston, secular clergy, founded 1837, 4 professors, 85 students. The Brothers of the Christian Schools conduct an academy with 14 teachers and 297 pupils. The Ursuline Sisters, 1 college for girls, 202 pupils; Sisters of Mary, 1 academy for girls; Sisters of St. Joseph, 1, 140 pupils; Sisters of Loreto, 4 professors, 490 pupils; Grey Nuns of the Cross, 2, 35 teachers, 555 pupils; Christian Brothers, 1, 14 teachers, 297 pupils. Other convent schools are those of the Sisters of St. Joseph (seven schools, 74 teachers, 975 pupils); Sisters of Loreto (two schools, 30 teachers, 280 pupils); Grey Nuns of the Cross (one school, 6 teachers, 259 pupils); Sisters of the Holy Names of Jesus and Mary (one school, founded in 1864); Sisters of the Congregation of Notre Dame (one school, 29 teachers, 380 pupils). There are three industrial schools under the care of religious institutes: the Brothers of the Christian Schools (3 teachers, 95 pupils); Daughters of the Immaculate Heart of Mary (10 teachers, 110 pupils); Sisters of St. Joseph (10 teachers, 65 pupils). The nine orphanages under the care of religious are: 2 under the Grey Nuns of the Cross, with 385 orphans; 5 under the Sisters of St. Joseph, with 582 orphans; 1 under the School Sisters of Notre Dame, with 54 orphans; 1 under the Sisters of Providence, with 85 orphans.

The appended table of religious institutes engaged in teaching in Ontario at the present time (1911) is necessarily incomplete, reliable figures being unobtainable in many cases. In such cases the figures have been omitted altogether, as approximate figures are liable to be misleading.

Trembles, near Montreal, and took upon himself the charge of recruiting teachers for the country districts. In investigating the history of the schools in pioneer days we invariably find as their founder or benefactor a bishop, a priest, a religious congregation,
or a layman, himself a school-teacher or assisted by a teacher who travelled from one district to another.

The education of the girls was as carefully attended to as that of the boys. The Ursulines built schools at Quebec and Three Rivers. The religious of the Hôpital Général de Québec erected a boarding school, while the nuns of Notre-Dame de la Visitation, founded by the Venerable Marguerite Bourgeoys, multiplied convents at Montreal, Quebec, Three Rivers, and in the country districts, where the children of the colonists came to be trained in all things essential to the development of a strong Christian character. Noix says: "The school prevail in Canada so great a gentleness in the manners of all classes of society and so much charm in the intercourse of life, it is owing in great measure to the zeal of Marguerite Bourgeoys". Twelve houses were opened by the Congregation of Notre Dame during the period of French rule.

(b) Special Schools.—Specializing in teaching was not unknown at this epoch when existence itself was a struggle. There were schools of mathematics and hydrography at Montreal at the Jesuit and the Charon Brothers'; art and trade schools at the seminary at Quebec, art and trade schools at St. Joschim, art and trade schools at Chambly.

(c) Secondary Schools.—While defending the colony from the incursions of the Indians and fighting to retain their right of possession, the French not only established primary and special schools but founded and endowed secondary schools. The classical college of the Jesuits was established at a time when the population of the entire country was but a few hundred souls, and the Petit Séminaire of Quebec opened its doors on October, 1688.

(2) British Rule (1763-1910).—In 1763 60,000 French Catholic colonists passed by right of conquest under British rule. Catholic schools were greatly impeded. The Church, through her teaching communities and secular clergy, organized schools in the most important villages; but, unfortunately, a great number of parishes were without pastors. In 1801 the Legislature passed a law entitled "An Act to establish Free Schools", which provided for the establishment of a permanent corporation known as the Royal Institute. Thus the monopoly was given to the Church of England to establish and support English Protestant schools for a population almost entirely made up of French Catholic majorities. But in the midst of a mischievous people, the schools of the Royal Institute were patronized by the English colonists only. Twenty-four years after its foundation the Royal Institute had only 37 schools with 1048 pupils. On the other hand, parochial schools increased. At Montreal, the Sulpicians and the Ladies of the Congregation of Notre Dame opened free schools. A Catholic educational society was founded at Quebec to teach poor children and train teachers for country districts. Many other societies were formed in different parts of Canada for a similar purpose. The parishes were few that could not boast of fairly good schools. Private or independent schools increased more rapidly than the parochial schools. In 1824 the Legislature passed the Parochial School Act authorizing the pastors and churchwardens to appropriate a fourth part of the revenue of the parochial corporation for the support of the school without other restrictions. Of the 221 parishes in 1835 there were less than 14,700 children in these schools which were supported at the cost of much sacrifice by a poor and scattered population. Many other attempts were made to organize Catholic schools until, finally, in 1841, a law was passed wherein were centered the parochial schools. The provisions of the Educational Act as it existed in the Province of Quebec were virtually the same as those of 1846. The law, considerably augmented by that of 1849, gave a great impetus to public instruction. In 1849 there were 1817 schools and 68,904 pupils. Owing to the influence of Dr. Meilleur, Superintendent of Catholic Schools of Quebec, education made rapid progress. Chaveau, his successor, continued to work with the same zeal. He established three primary and primary normal schools in Lower Canada—two for Catholics, who were in a great majority, the third for Protestants. In Ontario, there was but one normal school, for the Protestant majority, who neglected to do justice to the Catholic minority, while Quebec gave to Protestants, who were in the minority, a separate normal school.

The school organization of the Province of Quebec is now under the control of the Department of Public Instruction. The president, who is elected for life, is non-partisan in politics and bears the title of Superintendent of Education. He is assisted by a French and an English secretary, who are charged with the administration of the affairs of their respective nationalities and co-religionists. The Council of Public Instruction is composed of highly esteemed members, chosen from the two religious denominations; they frame laws and rules relating to public instruction which are afterwards submitted to the sanction of the government. The Council of Public Instruction is divided into Catholic and Protestant sections. The Catholic committee includes as ex officio members the archbishops, bishops or administrators of dioceses and Apostolic vicariates of the Province of Quebec, and a number of Catholic laymen. The Protestant committee is composed of Protestant members equal in number to the laymen of the Catholic committee. Apart from these two committees, there are other members who do not form part of the Council of Public Instruction, but who have, in their respective committees, the same power as the members of the councils; they are known as ex officio members, which sit independently, unite, under the presidency of the superintendent of education, when there are matters to discuss that interest both religious denominations. All questions relating exclusively to Catholics or to Protestants are decided by their respective religious committees.

The Province of Quebec is divided into school municipalities for the support of one or more schools. These municipalities are subdivided into school districts, and are entrusted to the commissioners or trustees elected by the taxpayers. In large cities, like Quebec and Montreal, the commissioners are named by the Government on the suggestion of the superintendent of education, the bishop of the diocese, and the city itself. The commissioners are the local directors and real supervisors of the school; they have charge of the administration; they name the teachers; dispose of school property, purchase ground and build schoolhouses, impose and collect the school taxes and fees. Taxpayers who do not profess the same religious belief as the majority of the inhabitants in the municipality where they reside, have a right to a school commission of their own, composed of three members chosen from among their co-religionists. These members, called school trustees, represent the dissenting minority; they have the same privileges as the commissioners.

The administration of public schools is controlled by Catholic school inspectors for Catholic schools, and Protestant for non-Catholic schools. These inspectors are responsible to the superintendent of education. There are also two general inspectors charged respectively with Catholic and Protestant normal schools. The first inspectors were named in 1862. At present (1911) thirty-nine Catholic inspectors, under the supervision of a general inspector, visit the 9000 Catholic schools of the Province. The school revenues are obtained from government grants and local taxation. The operation of this law ex-
Schools exhibit striking proof of the good faith and fairness of the Catholics, who constitute the great majority: they organise their schools, but never take advantage of their numbers to force Protestants to send their children to Catholic schools. All persons wishing to teach in public schools under the administration of school commissioners and trustees must obtain diplomas from a normal school or from the Central Board of Examiners. Nevertheless, ministers of religion and members of religious communities of both sexes are exempt from these examinations. Members of teaching orders, after completing their course of studies, make a novitiate of two, three, or four years before receiving their "obedience." This period of normal training exempts them from the examinations imposed on lay teachers by the Central Board of Examiners. Primary teaching comprises three degrees: the elementary course (4 years), the intermediate course (2 years), and the superior course (2 years). Schools of the first degree are called primary elementary; those of the second, model, or primary intermediate; those of the third, academic or primary superior. In the following table of statistics of elementary education in the Province of Quebec for the year 1900–10, those schools which are subject to the provincial or municipal Government are classed as "State"; the others, as "Independent".

The teaching congregations direct a large number of schools, independent or under the control of different school commissions. The Christian Brothers have 63 houses in Canada, 51 in the United States, and about 23,000 pupils. The following are the other teaching congregations of men: Clerks of St. Viator, Brothers of Charity, Marist Brothers, Brothers of the Sacred Heart, Brothers of Christian Instruction, Brothers of St. Gabriel, Brothers of the Cross of Jesus (Diocese of Rimouski). Among the teaching congregations of women are: the Ursulines, with houses in the Dioceses of Quebec, Chicoutimi, Sherbrooke, and Rimouski. There are also Ursulines in the Diocese of Three Rivers; this house was founded by Mgr. J.-C. de St-Vallier, second Bishop of Quebec. The Congregation of Notre Dame, founded at Montreal, 30 April, 1657, by Venerable Marguerite Bourgeois (1620-1700), possesses 131 houses in Canada and the United States. It numbers 1510 professed sisters, 240 novices, 45 postulants. The Sisters teach 34,000 pupils in 21 dioceses. The Grey Nuns of Montreal, Ottawa, Quebec, and St. Hyacinthe teach a great number of children. The Sisters of the Holy Names of Jesus and Mary have their mother-house at Montreal and houses both in Canada and in the United States; professed religious, 1257; novices, 110; postulants, 81; establishments, 74; parochial schools, 32; pupils, 2423. The Congregation of the Sacred Heart, the Sisters of Providence, Sisters of the Good Shepherd, Sisters of the Immaculate Heart of Mary, Sisters of the Holy Cross and Seven Dolors (544 religious, 14,577 pupils in Canada and the United States), Sisters of St. Anne (63 establishments in the United States and Canada, 19,190 pupils), Sisters of the Assumption of the Blessed Virgin, Nicolet (414 religious, 49 establishments), Sisters of the Presentation of the Blessed Virgin, Religious of Jesus and Mary, Sisters of St. Joseph (Quebec), Daughters of Wisdom, Sisters of St. Mary, Franciscans of Mary (Quebec), Sisters of Our Lady of Perpetual Help, Sisters of the Holy Heart of Mary, Sisters of Our Lady of Good Counsel (Chicoutimi), Daughters of Jesus, Sisters of Charity of St. Louis, Religious of St. Francis of Assisi. Many of these brother-houses in the Province of Quebec; they direct a great number of establishments and send missionaries to the other provinces of the Dominion and to the United States.

There are thirteen art and trade schools in the principal centres of the Province of Quebec. In the school year 1909–10 there were 56 professors, 2632 boys. Besides the Agricultural Institute at Oka, affiliated to Laval University, and which is included in the scheme of superior education, there is an agricultural school in conjunction with the College of St. Anne de L'Pocatière, in the district of Quebec. There is a manual training and agricultural school for girls, under the direction of the Ursulines, at Roberval, Lake St. John district; another at St. Pascal, under the direction of the Sisters of the Congregation of Notre Dame. Normal schools were founded in 1856. There are now ten; two for boys and eight for girls. Three normal schools for girls are soon to be opened, so that the diocese of the Province of Quebec will have its own normal school. The pupils number 660; the professors, 110. There is one Catholic school for the blind (boys and girls), the Nazareth Institute, directed by the Grey Nuns; fifty-five pupils follow the regular course, under the direction of five professors; many excel in music and in other subjects. The Catholic Deaf and Dumb Institute, for boys, is directed by the Clerks of St. Viator. The total number of pupils is 135, of whom 89 are instructed by the oral method, 46 by the written and manual alphabet. The work of teaching is carried on by 31 professors. The Catholic Deaf and Dumb Institute for girls is directed by the Sisters of Providence; 71 sisters teach 142 pupils. The two methods are in use, but the oral method is employed in instructing almost all the pupils. Former pupils, numbering 115, are engaged in manual labour in these asylums, receiving a good wage. The night-schools, numbering 129, have taught 2546 Catholic pupils. There are a certain number of industrial schools: The Brothers of Charity direct a reform school (30 religious, 118 boarders). The Sisters of the Good Shepherd also have two houses, one at Montreal, the other at St. Hyacinthe. Each of these congregations is charged with the instruction of orphans; among the institutions may be mentioned the Orphan Asylum of Montfort, 305 children; Huberdeau, 220. The Fathers of the Society of Mary and the Daughters of Wisdom have charge of these orphans. All the principal cities have their kindergartens, which are not mentioned in the official reports. They are due to private initiative and are organized by religious communities. There are 21 classical colleges at Quebec, 18 of which are affiliated with Laval University. They were founded by bishops, priests, or zealous laymen who understood the needs of the different phases of the national and religious existence. Therein were fostered vocations to the priesthood and the liberal professions. These classical colleges have given Canada eminent men, both in Church and State, who, in the dark hours of their history, have preserved the Ladino tradition and are still flourishing, thanks to the generosity of their founders and former pupils. They receive but $12,643 from the Provincial Legislature. The accompanying table of the Catholic colleges of the Province of Quebec exhibits the dates of their respective foundations as well as the number of pupils and professors in each.
English is the mother tongue of only a little more than 1 per cent of all the pupils attending these twenty-one institutions, the language of the remainder being French. The Classical course, including two years of philosophy, covers a period of eight years. It includes the study of Greek and Latin, to which educators, in certain countries, are coming back after having tried to abolish it. The study of the dead languages does not diminish the student's ardour for the two official languages of the country, French and English. Mount St. Louis, directed by the Christian Brothers, has a modern secondary course without Greek or Latin. They prepare young men principally for the polytechnical schools. The classical colleges affiliated with Laval University have the universities, and are examined. In 1910 a new school was opened for the études commerciales, and about twenty-six pupils have followed the courses. In 1911 the Legislature organized two technical schools: one at Montreal, the other at Quebec.

In 1908 the Sisters of the Congregation of Notre Dame opened a college for young women. It is affiliated with Laval University, and embraces English, French, and commercial sections. The regular course, leading to the degrees of B. L., B. S., B. A., includes two, three, or four years' study according to the anterior preparation of the student. About seventy-five follow the regular course. A large number attend the public lectures. The final examinations of the year are submitted to university professors.

C. Province of Nova Scotia.—Catholicism was introduced in the Province of Nova Scotia by the French who were the first settlers of the country; but the first mention which we have of Catholic school education dates only from thirty years later, when the Recollects opened at Port-Royal a seminary for the instruction of French and Indian children. This Catholic teaching was evidently continued, since we find a Capuchin Father writing, in 1659, in Emmanuelli's Journal: "The Bishop of Acadia, who has expelled from Port-Royal Madame de Brice d'Aluxerne, superintendess of the School for the Abenakis". About 1680 the vicar-general, Petit, says in a letter to his superior, Mgr. Vallier, that he has with him a man who teaches the boys of Port-Royal. Mgr Vallier himself first sends a Sister of the Congregation of Notre Dame to teach the Indian and French girls of Port-Royal, and a few years after, in 1686, he sends for Geoffroy, a Sulpician, "to continue the instruction of young women who are to be found after". In fact Geoffroy improved the school teaching and supervising. He also laid the foundation for the future coming of the Sisters of the Cross, who came in 1701, after the capture of Port-Royal by the English, and the cession of Acadia to France in 1697. After the final taking of Acadia by the English, that Catholic schools were abolished, as we find Father Burke writing: "There is a great desire to establish a Catholic School [in Halifax]. The need is pressing. We would succeed if we could have repealed an infamous law forbidding Catholic Schools". Through the zeal of the Catholics, and the difficulty of acquiring education was not altogether neglected. In the western part of Nova Scotia, for example, we find a French priest, the Abbé Sigogne, urging his flock to send their children to school, organizing Sunday schools; thanks to his labours for the cause of education, there were in 1851, in the district of Clare alone, 17 schools attended by 422 pupils.

In 1864 the Law of Common Schools was passed in the Provincial Legislature of Nova Scotia. Since then there have been very few separate schools properly so called. Under this law the province is divided into districts called school boards, which are governed by a board of three trustees elected by the rate-payers of the section. It is the duty of the trustees to engage teachers and to pay them out of the funds derived partly from taxes directly imposed upon the inhabitants of the sections and partly from government grants. According to law, the teaching of the Catholic is prohibited during regular school hours; but the trustees may instruct teachers to give lessons in Catholic doctrine during one half-hour after class every day. Inspectors are appointed by the Council of Public Instruction to visit the schools and report upon them to the superintendent of education. Some of these schools are under the direction of religious teaching communities as follows: In the Diocese of Halifax the Sisters of Charity have charge of nine such schools, four in the city of Halifax and five in the Acadian parishes of Meteghan, Church Point, Eal Brook, and West Pubnicos, and the English-speaking parish of Prospect. In the Diocese of Antigonish the Sisters of the Congregation of Notre Dame conduct seven of these schools, with 37 religious and 2281 pupils; the Sisters of Charity, 5 schools; the Daughters of Jesus, 2.

Besides these schools organised under the law, the Ladies of the Sacred Heart of Jesus have a convent school at Halifax with 48 religious and 600 pupils; the Sisters of Charity, a separate school at Amherst and convents at Rockingham, Meteghan, and Church Point; the Sisters of the Congregation, at New Glasgow and Pictou; and the Filles de Jésus at Arichat and Cheticamp. These several schools are supported by the Catholics of their respective towns. There are also three Catholic colleges for boys in the Province: St. Francis Xavier (English), at Antigonish, with 15 professors and 200 pupils; St. Anne, at Church Point, with 18 professors and 180 pupils (French and English), and St. Mary, at Halifax, with 7 professors and 80 pupils.

D. Province of New Brunswick.—As had been the case in Nova Scotia, the first Catholic schools in New Brunswick were opened by Catholic missionaries; and when the regrettable deportation took place, the whole Catholic population of New Brunswick would have been put to death if it had not been for the intervention of the British government. The whole Catholic population of New Brunswick was put to work in the mines, and the Catholics were allowed at least to read their prayers and also the exercises relating to the Holy Sacrifice of the Mass. One can easily understand how these poor exiles returned to their country and more particularly to New Brunswick. Their first care was undoubtedly to assure their very existence, as a great number of those who escaped deportation died of hunger and
cold in the forest and on the desert banks of the gulf. Next, they asked for missionaries and for persons capable of teaching reading and writing to their children. For lack of priests they held weekly religious services in the schools, which were conducted by the schools of prayer for Mass, and it was imperative to teach their children the truths of religion as contained in the short catechism. Fifty years and more passed before it became possible for them—such was their extreme poverty and so precarious the chances of their existence—to proceed in the service of any school teacher. However, at the close of the Napoleonic Wars, adventurers, sailors, deserters, or tourists came from France, who knew how to read and write, and their services were eagerly accepted. The old residents still remember M. Grenet, who taught at Barachois, M. Gabriel Albert, who taught at Bransfield, M. Jean Lemontier, who taught at Memramcook, M. Alexandre Théodore, who taught at Petit-Codiac (Ruisseau du Renard) and in neighbouring parishes.

Then came the Abbé Antoine Gagnon, parish priest of Barachois, of Grande Digue, of Shediac (Canaille), etc., who founded in 1910 at Grande Digue. This school remained open for two years (1833 to 1835), with three teachers, Messrs. Des Varens, Grandchamp, and Gosselin. When the land and possessions of this property were afterwards sold, the proceeds were placed in the hands of Mgr. Seraphim, in New York, to educate the Acadians in the event of another college being built in the diocese for any other similar purpose. During the first years that followed the return of the Acadians, after their dispersion, teachers boarded with the scholars’ parents in turn, and received from $3 to $5 per scholar, which made it only the prosperous centers could hire their services. In those days the Acadians received from the British Protestant authorities the fulness of their political and civil rights without molestation or annoyance in things religious or relating to the French language. The thinly populated country did not as yet complain of the burden of its school laws.

The first act to be found in the Statutes of New Brunswick concerning education is dated 1806 and relates to the founding of a public grammar school for the City of Saint John. It is therein enacted that the rector of Trinity Church shall be one of the trustees of said school, and at the same time president of the Board of Administration. A somewhat paltry grant was awarded to this establishment. In the same manner, other grammar schools were authorised for different locations in New Brunswick. The first law establishing public parish schools dates from 1833. The Government pays $720 to the Sisters who teach the children of the parish school, and the programme of studies prescribed by the Department of Education. The citizens of the convent schools receive their education for a nominal payment. The majority pay nothing. Generally speaking, the expense of educating the children is borne by the respective parishes in which the convent schools are situated, and, under the control of the boards of school trustees, of each parish. These trustees possess great executive authority. They divide the parishes into school districts, engage and dismiss teachers, and give them such certificates as entitle them to their grants from the Government, the maximum of which is $110 for each French teacher, and the justices of the peace are entrusted with the duty of making school reports to the Government. No certificate of competence was exacted beyond the approval of the parochial syndics, and no examination as to aptitude was held. It was not until many years afterwards (towards 1850) that the Board of Education, with its hierarchy and inspectors, was definitely organised. These latter, until the events of 1871, always showed kindness and liberality towards Catholic teaching and the French tongue. The Catholic teachers received from the board their gradual increases. Bishop Provencher, Prefete, and English alike. In 1871 a law was passed by the Provincial Legislature establishing “Neutral Schools”, in which the French language was ignored; but it was taught in the French schools and was afterwards recognised officially. The French and the English Catholics protested energetically against this unjust measure. Petitions were signed and sent to Ottawa requesting the repeal of this law, which was injurious to the Catholic teachers and to the French of the population of the Province. Some turbulent and stormy years passed over; certain defenders of the minority were imprisoned, and finally a modus vivendi was adopted to the effect that the school remain neutral from 9 a.m. till 3:30 p.m. The books may be approved by the Government. The use of the French language was recognised, and a set of books was chosen to that end.

After the regular school hours the Catechism was permitted to be taught. Nowadays all the schools of New Brunswick are under the control of the law, even those exclusively attended by Catholic children. The number of Catholic children is about 23,000; the teachers, male and female, number about 600. About eighteen convents under the direction of various religious congregations are scattered through the principal centres of the province. There are three colleges: one at Chatham (English) founded in 1915 by the Sisters of the Sacred Heart, containing 90 pupils; one at Caraquet, French and English, founded in 1899 by the Ursuline Sisters, containing 150 pupils; one at Memramcook (the Université du Collège Saint-Joseph), French and English, founded in 1894, directed by the Fathers of the Missionary Society of St. Mary, containing 220 pupils. With the exception of a few convents these institutions are not under state control.

E. Prince Edward Island.—The system of public schools in this province is not denominational. There are therefore no primary Catholic schools, except seven convents under the direction of the Sisters of the Congregation of Notre Dame. All the schools have been under the immediate control of the State since 1877 and are strictly neutral, or non-sectarian. Besides the convents, which teach about one thousand girls, there is a Catholic college for boys, which accommodates about one hundred and fifty. Nearly all the pupils of this college are boarders, and their education costs about $150 each, while, of the thousand girls in the convents, there are barely one hundred boarders, whose education costs about $60. The Government pays $720 to the Sisters who teach the children of the convent school, and the programme of studies prescribed by the Department of Education. The other 900 girls who attend the convent schools receive their education for a nominal payment. The majority pay nothing. Generally speaking, the expense of the schools is borne by the respective parishes in which the convents are situated, and the children living in the vicinity of the convents are educated gratuitously. Until 1850 there were very few schools among the Acadians. In each parish there were two men who taught reading, writing, and arithmetic.

F. Manitoba.—The first French schools in this province were established in 1814, by the Rev. Norbert Provencher, afterwards Bishop Provencher, and the Rev. Nicholas Dumoulin. Bishop Provencher opened his first school at St. Boniface, and Father Dumoulin opened his at Pembina. As the population increased, the schools multiplied. In 1835, notwithstanding that the population was very limited, there were already five schools. After many efforts Bishop Provencher succeeded in founding a school at Red River for young girls, and the first teacher was Angélique Nolin (Métis). In 1844 the Grey Nuns of Montreal, at the earnest request of Bishop Provencher, came to the West. Of those who arrived first were Sisters Lagarde, Lafarce, Valade, Coutlée. The first convent founded by them was at St. Boniface, and the second at St. François-Xavier. In 1835 Bishop Provencher got an English teacher for his boys’ school. This school in time,

came St. Boniface’s College. At Pembina Father Dumoulin was occupied in preparing young men for the priesthood, and these boys had six years in Latin. The primary schools increased rapidly. Every place where a spire indicated a house of worship a school sprang up. Soon, unfortunately, a crisis came, and the Catholics were severely tried.

At the present time (1912), in virtue of the British North America Act, as modified by the profession of faith of 5000 Catholics under the clear-sighted direction of Bishop Taché, demanded a formal law covering the rights already acquired. In 1890, the Catholics were, unfortunately, the victims of a legal persecution which embittered the last years of Bishop Taché. The Protestant majority of that province should have treated the Catholic minority with as much generosity as the Catholic majority, in the Province of Quebec, treated the Protestant minority. Such, however, was not the case. The schools were secularized, and the teaching of French was discontinued. Protestations were made, and the grievances were laid before the provincial government. There was a conference, but the clear-sightedness of Bishop Taché, vigorously defended the rights of the Catholics, but no justice was done him. The compromise of 1896 was voted: this pact embodied the principle of the “neutral schools” system, and, although diminishing the bad effects of the law, it desired to be styled, by Leo XIII, a law “defective, imperfect, insufficient” (manca est, non idonea, non apta). It is thus that the Catholics of Winnipeg and of Brandon are obliged to pay double school tax. The public school is a school to which Catholic parents cannot send their children. They are obliged to open Catholic schools at their own expense, while paying their share of taxes to the Protestant schools. Nevertheless, in those places where Catholics are grouped in parishes, in the country or at St. Boniface, in the municipalities having a Catholic majority, they can elect Catholic trustees who, in this way, they can secure the government grant for the schools attended by Catholic children. Thanks to the vigilance of the valiant Archbishop Langevin of St. Boniface, two Catholic inspectors have been appointed for the Catholic schools. These inspectors, in 150 cases, out of the 7000 pupils, is to be remarked, however, that its with difficulty that religious teaching is tolerated during class hours. Besides, the schoolbooks are not Catholic, and Catholic interests are not sufficiently safeguarded. There is one Catholic normal (French and English) school at St. Boniface, and another (English and Polish) at Winnipeg.

The teaching congregations are numerous. The Institute of Mary, from Paris, has schools at Winnipeg and St. Boniface. The Clerics of St. Viator have an orphanage for boys at Makinak. The Fathers of the Cross of Jesus, from France, have two schools in the French parishes at St. John Baptist, at St. Pierre Joly. The Sisters of the Holy Names of Jesus and Mary, of Montreal, have six convents or schools in the French parishes, St. John Baptist, St. Agathe, St. Pierre, St. Boniface. St. Mary’s Academy, Winnipeg, is for English-speaking girls. The Sisters of the Child Jesus in Montreal, four convents in the French parishes of Notre Dame de Lourdes, St. Claude, St. Leo, and St. Alphonse. The Benedictine Sisters, from Duluth, Minnesota, have two schools at Winnipeg, one English and German, the other English and Polish. The Franciscan Missionary Sisters of Mary from Rome have two schools among French and English-speaking whites at St. Lawrence and a school for the Indians at Pine Creek. We must not forget to mention the Little Servants of Mary Immaculate of the Ruthenian Rite, the Daughters of the Cross, and the Oblate Missionaries of the Sacred Heart of Mary Immaculate who are entirely consecrated to the education of youth. The Classical College of St. Boniface, founded by Bishop Provancher, at first destined for the Oblate Brothers of the Christian Schools, afterwards by the Oblate Fathers. In 1885 it was confided to the Jesuit Fathers, who have organized a course of studies to the satisfaction of the two principal nationalities whose children, to the number of 300, attend the college. A provision is made for an English section, with a regular Classical course having Latin and Greek for its basis. Each year its students succeed admirably in competition with those of other colleges in the university examinations. The non-Catholic colleges are St. John’s (Anglican), Manitoba College (Presbyterian), and the Wesley College (Methodist). There are 300 pupils attending St. Boniface College.

In 1909 Archbishop Langevin founded a petit séminaire which he confided to secular priests. The Rev. Father Joubert was the first director. There are at present 54 candidates preparing for the priesthood. A glance at the numerous nationalities represented in the city emphasized the reality of the cosmopolitan character of the vast regions of the great West. At the same time it gives a faint idea of the episcopal solicitude in providing for each nationality missionaries of their own blood and language. In this seminary there are 30 French-speaking, 10 Ruthenians, 6 Irish, and 8 Germans. In 1905 the Holy Family Juniorate was founded by the Oblate Fathers at St. Boniface.

G. Saskatchewan and Alberta.—The work begun by Bishop Provancher has kept pace with the increase of the population. The Gray Nuns became missionaries among the Indians. They founded a settlement at Alberta and a school at Cross Island. Their first attempt in establishing a school was at St. Ann, but in this they were unsuccessful.

In 1870 the Federal Parliament voted a law of administration for the Territories. However, it was not until 1875 that the territorial form of government under the North-west Territories Act. According to that Act the people could establish “such schools as they think fit”. The principle of separate schools was therein recognized. It would be too long to give the history of the school legislation of these territories up to the constitution of the two provinces of Saskatchewan and Alberta in 1905. At all events the new constitution should have safeguarded one essential, giving to Catholics the right to organize everywhere separate schools truly Catholic and the right to their share of the government grant. Unfortunately such was not the case. Notwithstanding the agreement of 1870, and notwithstanding the British North America Act, which the Parliament of Canada cannot modify, the system of neutral schools was imposed on the Catholics. It is not the half-hour of religious teaching that makes a school really Catholic: it is essential that there should be Catholic books, explained by Catholic teachers, in a Catholic atmosphere. But nothing of all this was granted. However, the government is equitably administered in those districts where the Catholics are in a majority. Thirty-one such districts appear in the last Report of the Minister of Education of the Province of the Northwest Territories (page 14). These schools are public schools in which religion may be taught at stated hours. The right, therefore, to organize separate schools for Catholics is limited to the districts where they are in the minority (there are twelve Catholic separate-school districts in the same Province of Saskatchewan).
It would be somewhat difficult to determine the number of pupils attending the schools in the Catholic public-school districts or in the Catholic separate-school districts. The Diocese of Prince Albert, which comprises all that part of the Province of Saskatchewan, has 54 academies and schools attended by Catholic children. (These schools are not really Catholic. They are neutral schools attended by Catholic children and endowed with a government grant.) These children number in all about 3000. The southern part of the province is in the new Diocese of Regina. The first Bishop of Regina was consecrated on 5 November, 1911. There are a great number of Catholic schools in that flourishing part which is found in the Archdiocese of St. Boniface. The Sisters of Notre Dame of the Cross of Mauriniens, France, have here two schools, one at Fort Garry, and the other at St. Hubert. The Sisters of St. Joseph of St. Hycastha have a school for Indians at Lake Croche. The Sisters of Notre Dame of the Missions, from Lyons, direct three convents: a boarding-school for English-speaking girls, at Regina, and two other girls' schools in the French-speaking centres at Lebret and at Weyburn, in the Diocese of Qu'Appelle. The Heart of Mary Immaculate direct a school for Indians at Fort Pelley. The industrial school at Qu'Appelle has 242 Indians, under the Sisters of Charity.

The Diocese of St. Albert comprises all the northern part of the Province of Alberta and a part of the Province of Manitoba. It has an industrial school, 14 convents, 8 boarding-schools for Indians. The pupils in the schools of the Catholic school districts number about 3700. We find here again the Sisters whose mother-house is in Quebec: Sisters of the Assumption, Gray Nuns of Montreal, Sisters of Niolet, Gray Sisters of Niolet, etc. There are also the Poor Sisters of the Russian Rite. The petit séminaire of St. Albert was founded by Bishop Grandin in 1900. Father Cullerier, O.M.I., was its first director, but the Oblate Fathers have now given up the institution and the missionaries of Chavagnes, or Sons of Mary Immaculate, direct it at present (1911). There are 33 pupils in attendance. The Oblate Fathers have opened a juniorate at Strathcona, where they have 14 pupils.

H. British Columbia.—This province entered the Confederation in 1871. In it there is not one Catholic school in receipt of a government grant. The dioceses of this province are all in the education. The Archdiocese of Vancouver has eight industrial schools for Indians, with an attendance of 513 pupils; four academies for young girls; seven parochial schools, with a total attendance of 729 girls. New Westminster possesses an excellent institution of learning, St. Louis College, under the direction of the Oblate Fathers. In the Diocese of Victoria, which comprises Vancouver and the adjacent inland, there are two academies for young girls, with an attendance of 342; nine parochial schools, with 450 pupils; two industrial schools, 110 pupils (boarders). The dioceses of each priest number 50 pupils. Among the Catholic educational institutions there are nine directed by the Sisters of St. Anne, whose mother-house is at Lachine, near Montreal, viz:—

1. New Westminster, 6 religious, 192 pupils
2. Prince George, 50
3. Kamloops, 4
4. industrial School, 3
5. Cowichan, 3
6. Cowichan City, 2
7. Kootenay Island, 7
8. Leda Smith, 1

I. Territories.—In the vast regions of the West outside of the provinces regularly constituted, there are large territories where missionaries are engaged in God's work, under the guidance of vicars-Apostolic; and wherever a church is built, a school adjoins it. There are six convents in the Vicariate of Athabaska.

The Gray Nuns have a boarding-school for Indians at Lake Laplange in the Vicariate of Keewatin. At Cross Lake, 4 Oblate Sisters of Mary Immaculate carry on a boarding-school for Indians, in which there are 20 pupils. In the Vicariate of Mackenzie there are, at Great Slave Lake, 7 Gray Nuns at the head of a school of 45 pupils. At Providence 13 sisters give instruction to 75 pupils. At Yukon there are 9 schools, and at Dawson 3 Sisters of St. Anne from Lachine, near Montreal, teaching 65 pupils.

J. Newfoundland.—Although the Province of Newfoundland does not form part of any of our Catholic Conferences, it should be mentioned here. In each parish there is a school under the care of the parochial clergy and supported by a government grant. The principal teaching congregations are Irish Christian Brothers, Sisters of Mercy, and Presentation Nuns.

SCHOOLS

struction more widely diffused in England in Catholic times than in the first half of the nineteenth century. "The chief of the population of the nation to Grammar Schools, and used them was much larger than now" (Leach, p. 97). Rashdall similarly concludes that "at least in the later Middle Age the smallest towns and even the larger villages possessed Schools where a boy might learn to read and acquire the first rudiments of ecclesiastical Latin: with an except in very remote and thinly populated regions he would never have had to go very far from home to find a regular Grammar School ("The Universities of Europe in the Middle Ages", II, 602). The Reformation, with the confiscation and plunder of the monasteries and chantries, involved the destruction of most of the educational institutions of the nation. The evil consequences are testified by Ascham, Latimer, Cranmer, and Harrison Watson.

However, the old appreciation of the value of education in a short time resurfaced itself. The ecclesiastical control of all schools, now in the hands of these latter monks, was strengthened by new legislation. The religious instruction given in the schools was that of the Established Church, and the scholars were required to participate in the prayers and church services. The steady pressure of this machinery on the minds of the young was bound to be fatal to the old regime. Elizabeth's reign saw the majority of Catholics were practically compelled to send their children to the nearest grammar school, if the children were to receive any education at all. For the better-off families the chaplain or priest maintained in hiding commonly also acted as tutor. But as time went on the situation grew worse. Then, in order to some degree to provide priests and also to furnish some means of Catholic education for at least the children of the nobility and gentry who clung to the old Faith, there were founded the English seminaries and colleges on the Continent. First among these was the English College at Douai, started in 1568 by Allen, afterwards cardinal. Its primary object was the training of priests for the English mission, but it also accepted lay students. Within a few years it contained over 150 pupils. Before the year 1700 it had sent back to England over 300 priests, more than a third of whom suffered death for the Catholic Faith (see above 1669). And within this period, when, as we shall see, it gave birth to the two Colleges of Ussand and Old Hall, Irish and Scotich colleges were also established at Douai for a similar purpose. In 1578 was founded the English College at Rome. It was designed to provide places for sixty ecclesiastical students, but, it is said, a very short time after its foundation the Jesuits, who managed it till the suppression of the Society in 1773. There were also founded English colleges at Valladolid in 1589, and at Seville in 1592, by Father Parsons, and at Madrid in 1612 by Father Crewe. The English College at Lisbon was started in 1622 by William Newman, a secular priest. All these colleges sent many to England, especially during their first decades, but as time went on, perhaps through their remoteness and the Anglo-Spanish Wars, they failed to keep up the intimate connexion with England which was always retained between the mother-country and Douai and St. Omer. The three Spanish colleges were merged into the single foundation at Valladolid in 1767.

The most important college founded beyond the sea of which the primary object was the education of lay students, was the Jesuit school begun at St. Omer by Father Parsons in 1692. It had an eventful career of 200 years on the continent of Europe, and then coming back to England settled at St. Beuno's, what it became the progenitor of the great majority of the Jesuit schools scattered throughout the British Empire today. Starting with twenty-three boys, it had by 1693, according to the spies of the English Government, "a hundred and forty gentlemen's sons of great worship". In 1652 there were over 200 pupils, the number of the chief of the population of the nation to Grammar Schools, and used them was much larger than now" (Leach, p. 97). Rashdall similarly concludes that "at least in the later Middle Age the smallest towns and even the larger villages possessed Schools where a boy might learn to read and acquire the first rudiments of ecclesiastical Latin: with an except in very remote and thinly populated regions he would never have had to go very far from home to find a regular Grammar School ("The Universities of Europe in the Middle Ages", II, 602). The Reformation, with the confiscation and plunder of the monasteries and chantries, involved the destruction of most of the educational institutions of the nation. The evil consequences are testified by Ascham, Latimer, Cranmer, and Harrison Watson.

However, the old appreciation of the value of education in a short time resurfaced itself. The ecclesiastical control of all schools, now in the hands of these latter monks, was strengthened by new legislation. The religious instruction given in the schools was that of the Established Church, and the scholars were required to participate in the prayers and church services. The steady pressure of this machinery on the minds of the young was bound to be fatal to the old regime. Elizabeth's reign saw the majority of Catholics were practically compelled to send their children to the nearest grammar school, if the children were to receive any education at all. For the better-off families the chaplain or priest maintained in hiding commonly also acted as tutor. But as time went on the situation grew worse. Then, in order to some degree to provide priests and also to furnish some means of Catholic education for at least the children of the nobility and gentry who clung to the old Faith, there were founded the English seminaries and colleges on the Continent. First among these was the English College at Douai, started in 1568 by Allen, afterwards cardinal. Its primary object was the training of priests for the English mission, but it also accepted lay students. Within a few years it contained over 150 pupils. Before the year 1700 it had sent back to England over 300 priests, more than a third of whom suffered death for the Catholic Faith (see above 1669). And within this period, when, as we shall see, it gave birth to the two Colleges of Ussand and Old Hall, Irish and Scotich colleges were also established at Douai for a similar purpose. In 1578 was founded the English College at Rome. It was designed to provide places for sixty ecclesiastical students, but, it is said, a very short time after its foundation the Jesuits, who managed it till the suppression of the Society in 1773. There were also founded English colleges at Valladolid in 1589, and at Seville in 1592, by Father Parsons, and at Madrid in 1612 by Father Crewe. The English College at Lisbon was started in 1622 by William Newman, a secular priest. All these colleges sent many to England, especially during their first decades, but as time went on, perhaps through their remoteness and the Anglo-Spanish Wars, they failed to keep up the intimate connexion with England which was always retained between the mother-country and Douai and St. Omer. The three Spanish colleges were merged into the single foundation at Valladolid in 1767.

The most important college founded beyond the sea of which the primary object was the education of lay students, was the Jesuit school begun at St. Omer by Father Parsons in 1692. It had an eventful career of 200 years on the continent of Europe, and then coming back to England settled at St. Beuno's, what it became the progenitor of the great majority of the Jesuit schools scattered throughout the British Empire today. Starting with twenty-three boys, it had by 1693, according to the spies of the English Govern-
was the timidity of the Catholic gentry at the time that a deputation of them waited on the bishop to dissuade him from so daring a measure—fortunately in vain. Within six years the numbers of the school rose to a hundred boarders, and for a century it was the chief centre where the Midland clergy received their education. In the year following the American war, and in 1776 the first English Catholic Relief Bill repealing the most galling of the penal laws was passed. In 1783 the College of Douai was seized by the agents of the French Republic. After temporary imprisonment the professors and students came to England and were located at first to Old Hall, Ware, and then in part to Crook Hall, the future Usknew, near Durham. There were differences of opinion among the English ecclesiastical authorities, some urging the continuance of the Douai community as a single college in the South of England, others advocating the claims of the North. Each side had its adherents in the present century, but there was an agreement, it proved a solid gain to the Catholic Church in England. For the outcome was the starting of the two large colleges, St. Cuthbert's at Ushaw and St. Edmund's at Ware, both destined to have honourable and fruitful careers and be sources of much strength to the faith. Each of them provides to-day for a community of over 300 students complete courses of humanities, philosophy, and theology, and educates lay as well as ecclesiastical pupils. About the same date English Benedictine communities, compelled to return from Lorraine and from Douai, for a time resided at Acton Burwell, but separated later to found Abbey last convent school in Yorks County, the Benedictines. In 1815, two schools which continue to do increasingly valuable work for English Catholic education. At the same time was begun, largely through the influence of certain laymen of the Cisalpine Club, but acting in co-operation with Bishop Talbot, Ossant College, in the Midlands. After a successful history of three-quarters of a century as a mixed school, it was converted into a purely ecclesiastical college, with courses of philosophy and theology. It trains the Midland clergy as well as a considerable number from other dioceses to-day. The College, formerly at St. Omer, but subsequently transferred to Bruges in 1762, and thence to Liège in 1773, migrated to Stonyhurst, in Lancashire. In addition to the large educational institution into which it developed at Stonyhurst this college became the parent stock of a prolific family. Starting with twelve boys, its numbers rose to over two hundred and twenty. The first offshoot was Clongowes Wood College, Ireland, in 1814, which speedily rivalled the parent school in point of numbers, and was itself the mother-house from which successful colleges were started at Dublin, Limerick, Galway, and Tuam. Later, Luton College was founded several flourishing Jesuit schools in Australia. In Great Britain itself from the Stonyhurst root there originated during the nineteenth century, eight other secondary schools, all designed for the education of Catholic laymen: in 1841 Mount St. Mary's College in Liverpool, a boarding-school in Derbyshire, near Manchester, 200 pupils in the name of St. Francis Xavier's College, a day-school at Liverpool, which has reached a roll of 400; in 1862, Beaumont College, near Windsor, also exceeding 230 pupils; subsequently large day-colleges, at Preston, 1884, at Wimbledon and at Stamford Hill, North London, in the nineteenth century, St. Benedict's, London, in 1859, Sidcup's day-college, Glasgow, which has exceeded 300 pupils, was founded in 1859; and a Jesuit day-college has been opened at Leeds early in the present century. Meantime at Stonyhurst itself in addition to the school, which now numbers some 350 lay students, there has been erected St. Mary's Hall, which is a house of philosophical studies and training college for the members of the society. It has been approved by the government as a recognised training college for secondary school teachers, and has some 60 Jesuit students. The Jesuit theological College of St. Beuno in North Wales was founded from Stonyhurst in 1848.

Other secondary schools of note are St. Bede's, Manchester and St. Cuthbert's, Newcastle-on-Tyne, managed by the secular clergy; the Oratory School, started by Cardinal Newman at Edgbaston; Ratcliffe College, conducted by the Rosminian Fathers; a Benedictine College at Ramsgate, and St. George's College, Weybridge, besides general successful schools managed by the brothers. Exact statistics in regard to secondary schools are impossible, owing to the indefiniteness of this term, which in England includes a wide variety of types and grades, from something just above the elementary school to Eton or Harrow. However, if we take the "Report of the 1910 Annual Census of English Colleges" for our guide, we find this list includes thirty-three Catholic secondary schools for boys. All these are under the management of priests or religious. There are also in the country some Catholic preparatory schools for small boys and some small private institutions conducted by laity, but these above indicated form substantially the present machinery of Catholic secondary education of boys.

Catholic girls' secondary education is similarly in the hands of religious. Old English foundations returning from abroad after the French Revolution, like the Catholic colleges, or new teaching congregations, opened convent schools for primary and secondary and have multiplied rapidly. The total number of Catholic girls' schools which may be fairly classed as secondary is, for the same reason, very difficult to determine. Over one hundred and forty are advertised in the "Catholic Directory", but many of them are very small institutions.

Relations of Catholic Secondary Education with the Government.—All Catholic secondary schools in England are voluntary institutions. They were founded independently of the Government. Until recent years none of them received any state support, and they were subject to no form of state inspection. Indeed secondary education, as such, did not receive any systematic support from the state in England prior to 1902; but a large number of non-Catholic schools possessed considerable endowments, many going back to Catholic times. During part of the past century, secondary schools, by fulfilling certain conditions, could earn grants from the Government Department of Education; and a few Catholic schools derived some small funds from this source. But in the Act of 1902, the government adopted a completely new attitude towards secondary education. It empowered local authorities, i.e., counties, boroughs, and urban councils, to build new secondary schools and to take over by voluntary agreement existing secondary schools, and to maintain them out of local rates assisted by imperial grants. On the other hand, voluntary schools which fulfil certain regulations are enabled to share in this state aid. This Act is fraught with important consequences as it marks an important stage in the history of primary education that the state contribution will largely increase, and unless Catholic day-schools can secure their fair share of it they will be unable to sustain the competition. Practically the grants are obtainable only by day-schools. The conditions in regard to staff qualifications and equipment, with liability to inspection, are stringent, but a well-managed school can already secure a good
subsidy. One of our most successful Catholic schools in 1910 thus earned between £2000 and £3000. But the supply is now correspondingly costly. Eleven Catholic schools for boys, including four Jesuit day-schools, are at present approved by the Board of Education and recognised as grant-earning. Another important point is that intending elementary teachers must in the future spend at least three years in a "recognised" secondary school. The necessity of a secondary of such "recognised" Catholic schools is therefore obvious. Unfortunately the government regulations at present seriously hamper the increase of such secondary denominational schools.

Of Catholic girls' secondary schools, thirty-four are already "recognised", of which eleven belong to the Sisters of Charity. Of the remaining schools, eight are Catholic training colleges for female secondary teachers, recognised and approved by Government. One is in Liverpool, conducted by the Sisters of Notre Dame; another in London, under the Sisters of the Holy Child Jesus. There is so far one Catholic training college for male secondary teachers—that at Stonyhurst.

Catholic Primary Education.—Whilst a tolerable supply of secondary schools existed in England during the eighteenth century, the primary education of the nation was in a most wretched condition. Previous to 1830 Government took no interest in the education of the poor. The exception was that a few of the clergy and a few philanthropic laymen, the chief agencies working for the building and maintenance of schools for the poor in the early part of the nineteenth century were two voluntary societies, one an Anglican, the other a Dissenting organisation. The first government help to primary education was a grant in 1833, a grant of £20,000. To-day it exceeds £16,000,000. As the best available method of distribution, the grant was handed over to the two societies to be spent in building schools and for other educational purposes. It was then made annual and increased from time to time. In 1839 a further allowance was given towards the establishment of training colleges for the preparation of teachers. These colleges soon multiplied. Government inspectors were appointed, but the power of accepting or approving them was conceded to the two voluntary societies. The system was in fact frankly denominational. But during the period although out of £200,000 had been distributed, Catholics had not received a penny of this public money.

However, during the previous sixty years, in spite of their general poverty and of the penal laws before 1829, the handful of Catholics in the country had managed to cope for the elementary education. As early as 1764 the Catholics of London formed a small "Society for the Instruction of the Children of Catholic indigent Parents", though how much this was able to accomplish we cannot tell. At least ten Catholic primary schools existed in England prior to 1800; and probably not many more. But with the cessation of the persecution and the beginning of the immigration from Ireland, Catholic elementary schools began to multiply. By 1829 these had risen probably to about 60 or 70. Thenceforward progress was more rapid. In 1831, though excluded from the government grant given since 1833, there were in England 311 Catholic schools built for the poor and mainly by the pennies of the poor. From 1851 the Catholic schools received some small share of the public grants, and by 1870 the number had risen to 353.

In that year Forster's Act, the first great English education measure, was passed. It was enacted that where local authorities had made provision for schools for the elementary education in their district there should be in every school district throughout the country. These might be either voluntary schools, or Board-schools. The latter were to be provided and managed by local school boards elected for this object. They were to be built out of the local rates, and maintained out of the rates and grants from the imperial exchequer. They were to be denominational or secular in character and not exceeding in size more than 400 children. Religious instruction of any definitely denominational kind might retain Bible lessons and give some Christian religious instruction of an undogmatic or colourless quality (Cowper Temple Clause). Along with these Board-schools, or in place of them, were sanctioned the "recognised" secondary schools. These could be built by private bodies at their own expense. Ordinary religious bodies were religious organizations. For the maintenance of these schools the proprietors could obtain in aid of their own contributions the imperial grants, provided they fulfilled certain conditions of educational efficiency and admitted government inspection. Each voluntary school, whether a Board-school or a private body, was represented by a small committee of managers representing the trust or body who owned the school. The school was allowed to retain the religious character of the denomination to which it belonged, to appoint teachers of their creed, and to give religious instruction according to their tenets subject to a "time-table conscience clause" facilitating the absence from the religious lesson of any children whose parents objected to their attending it.

As all previous work in elementary education was due to the voluntary or denominational bodies, nearly all existing primary schools were voluntary schools. The number of Board-schools was small and demand the Catholic schools, the like the Anglicans, disapproving of the secular Board-schools for their children, set themselves to the building and maintenance of additional voluntary schools. By the year 1901 the total number of primary schools had risen to a little over 20,000. Of these, 5,575 were Board-schools, and 14,275 were voluntary schools, but as the Board-schools were stronger in the towns and larger in size, of the total attendance of 5,000,000 children nearly half went to the Board-schools. Of the voluntary schools the Catholic schools now owned 1056, with an attendance of nearly 400,000 children—a significant increase from the 383 schools of 1870. The state contributed to education, which had been £20,000 in 1833, and £9,014,721 in 1870, had reached £16,000,000 in 1901. But though the supporters of the voluntary schools made heroic efforts, the burden of the struggle was becoming intolerable, especially for a poorer section of the community. The cost both of building and upkeep kept constantly rising, owing to the higher standard forced by the competition of the Board-schools, which drew unlimitedly from the public rates which the supporters of the voluntary schools were compelled to pay in addition to the yearly voluntary contributions to their own schools. Moreover, by legislation of 1876 and 1880 attendance of children at school was made compulsory. The important statute was enacted: "It shall be the duty of the parent of every child to cause such child to receive efficient elementary instruction". This increased the number of school children and entailed the further statute that elementary education should be provided gratuitously for the indigent, and ultimately resulted in legislation by which primary education was made free or gratuitous for all. The annual cost of education per child in England was: in 1890, 21s. 7d.; in 1890, 25s. 4d.; in 1890, for voluntary schools, 34s. 7s. 4d.; for board schools, 42s.; in 1902, for voluntary schools, 46s. 4d., for board schools, 60s. 9d.

Such was the state of things which necessitated the Education Act of 1902. This Act abolished the school boards, transferring their functions to the general local authorities, and put into each educational district a Board to be called the Education Committee. It equalized the condition of Board-schools and voluntary schools—henceforward termed provided and non-provided schools—in regard to maintenance by public funds, whether from local rates or imperial grants, both schools being of equally public
character in regard to secular instruction. It enacted that the local authority must maintain and control all secular instruction in the public elementary schools of its district; but whereas the local authority must provide all non-provided (i.e. voluntary) schools the building and equipment is to be at the expense of the denominational body which volunteers to set up the school. The school thus is, and remains, their property. Each school is managed by a committee of six members who have the appointment and dismissal of the teachers. The local authority has the nomination of all the six managers of the provided schools, but of only two in the case of non-provided schools. The trust body which owns the school has the right of nominating four of the six. It is on this slender clause the main value of the Act from the Catholic standpoint hinges, for it is this clause which retains the efficient control of the school for religious purposes in the hands of the denomination which built it. In the provided school religious instruction is on much the same footing as in the former Board-schools; that is, some Bible lessons and religious instruction on non-denominational lines may be given if the local authority chooses. In the non-provided school religious instruction may be given in accordance with the trust-deeds, that is with the tenets of the proprietors of the school. This is to be under the control of the managers and subject to a two-four weeks' conscience clause, and not at the charge of public moneys.

For the sake of clearness, then, the present position of the Catholic elementary school in England in 1912 is this: The cost of the school building and its equipment must be found by the Catholic congregation, whilst the State through the local authority provides all working expenses for all secular instruction. Each Catholic school when first built is vested in the hands of Catholic ecclesiastical authorities by carefully drawn-up trust-deeds. The committee of managers usually includes the priest in charge of the mission with three of the chief Catholic laymen of the parish. To these are added the two members appointed by the local authority. The right of opening new schools where needed is also secured by the Act of 1902. On the whole, therefore, the condition of Catholic schools under this Act is fairly satisfactory. The Board of Education may, however, exert unpleasant pressure by exerting the over-riding authority under the Act of 1902. Still, though burdensome, if tolerable, the sacrifice in the long run ought to make for the good of the children. More objectionable have been attempts of certain bigoted local authorities to discriminate against the non-provided schools in the scale of salaries and some other matters. But were judicial decisions tend to prevent this injustice. The chief anxiety at present is the precariousness of the situation. Three Education Bills in succession have been before Parliament which sought to transfer the entire control of the school from the managers appointed by the local authority to the non-provided school and under the plea of abolishing religious tests for teachers aimed at rendering all schools liable to accept teachers of any religion or of none. Up to the present, each of these measures has been defeated, and largely by the resolutions of the Catholic majority.

Permanence of Catholic Teachers.—The method of training teachers in England for primary schools during the last century has usually included some years of apprenticeship as monitors or pupil-teachers in the primary school during which the candidate for the teaching profession continued his or her studies, receiving at the same time a small stipend from the State. At the end of this apprenticeship the young man or woman either began with the lowest grade of assistant-teacher and worked up by concomitant pri-

vate study to pass examinations leading up to a first-class certificate; or the more fortunate candidates obtained scholarships, which secured them two years in a training college approved and assisted by the Government. In recent years the Board of Education has been assured that all future teachers of primary schools shall have gone through the last three or four years of their school course in a secondary school, and shall subsequently have the advantage of a two or three years' course of training college. The preparation of Catholic teachers has followed the lines on that of other teachers belonging to the voluntary division of the system. At present there are in England five recognised Catholic residential training colleges for female primary teachers. All are managed by religious. The largest, that conducted by the Sisters of Notre Dame at Liverpool, was opened in 1836. In 1909 there were in residence at all the five training colleges 507 women students. There is one residential Catholic primary training college for men under diocesan authorities in London. There were 114 students there in 1909. The State contributes scholarships or bursaries of £150 each per annum for each female student at these colleges and £53 for each male student at these colleges. Though the ordinary course is two years, it may be prolonged to three or even four years in the case of very promising students. As at present the total number of Catholic elementary teachers is about 8000, to staff near 1100 schools and teach about 400,000 children, and as the insistence on training constantly increases, there is need of increased provision in this respect. One source of anxiety lies in the efforts of the Board of Education in recent years to compel the voluntary training-colleges, if in receipt of any grant, to admit students of all denominations. In the case of residential training colleges, this would obviously be fatal to their Catholic character. The attempt has been therefore vigorously resisted and, so far, successfully. A more serious difficulty in regard to the formation of Catholic elementary teachers for the future, as before hinted, seems to lie in the paucity of recognised Catholic secondary schools which Catholic boys and girls looking forward to a teaching career can attend, as such attendance for three or four years is now to become a permanent regulation of the Board of Education. Moreover the many valuable scholarships open to these and other pupils from primary schools have in Catholic secondary schools, provided these be recognized.

Special Classes of Schools.—The Catholic education of certain other classes of children is also provided for by charitable institutions, which are primarily due to voluntary effort, and conducted by religious congregations or other charitable organisations, and frequently receive considerable state aid, subject to certain conditions. Thus there are in Great Britain: Catholic certified poor-law schools, for boys, 13; for girls, 28; reformatory schools, for boys, 5; for girls, 2; industrial schools, for boys, 14; for girls, 12.

The chief organizations for the safeguarding of Catholic educational interests are the Catholic school associations and the central Catholic Education Council of Great Britain. There are sixteen of the former. The bishop or some Catholic layman of position is usually the chairman, and the committee includes some of the most influential Catholic laymen of the diocese. The Catholic Education Council was founded by the bishops of Great Britain in 1905. It took over the functions of the old Catholic School Committee, which originated in 1847, and also those of the Catholic Secondary Education Council, begun in 1904. The Council consists of ninety-five members nominated in certain proportions by the bishops, diocesan school associations, and the Conference of Catholic colleges. The object of this Council is to look after and defend the general interests of Catholic
education both primary and secondary, and the Council is recognized by the Government as representing the Catholics of England in matters of Catholic education. In the first place, the history presented by the history of Catholic education in Great Britain is that, in a country where the conception of true freedom and the sense of equity prevails throughout the mass of the nation, even a small minority with a clearly just claim, however unpopular at the start, will triumph in the long run, if it insists with resolution and perseverance in its just demands.

MICHAEL MAHER.

In Ireland.—The history of Catholic education in Ireland in the period from the Reformation to the Revolution is that of a story of an heroic struggle more than a record of a school system in any true sense, and it must be gleaned from all sorts of out-of-the-way sources, for the historian of the Catholic schools of that period has not yet arisen. From the Reformation to the Treaty of Limerick (1554-1651) records are very scanty, and though, in spite of the troubled state of the times, many Catholic schools managed to survive and to do good work, there was no such thing as an organized system of schools, nor would anything of the kind have been possible. Throughout the eighteenth century Catholic schools were repressed by the penal laws, one object of which was, according to Lecky, "to reduce the Catholics to a condition of the most extreme and brutal ignorance". The same author says: "The legislation on the subject of Catholic education may be briefly described, for it amounted simply to universal, unqualified and unlimited proscription". Keeping a school, or teaching in any way, even as usher or private tutor, was a penal offence, and a reward of £10 was offered for the discovery of a Popish schoolmaster. Notwithstanding the severity of these laws, the managers of the Charter Schools, when seeking aid from Parliament in 1768, found it necessary to complain of the great number of schools "under the tuition of Popish masters" that were to be found in many parts of the country.

Protestantizing Schemes.—The Government and the ascendancy party, while prohibiting Catholic education, made several very ambitious though futile attempts to give a Protestant education to the children of the poor Irish Catholics through the agency of protestantizing schools. These schemes may be mentioned here since they were meant for Catholics, though fortunately little used by them. An Act of Parliament of the reign of Henry VIII (1537) prescribed the erection of schools in every parish, but an Act of Elizabeth was passed in 1570 for the establishment of diocesan free schools. Some schools were founded, and in the course of time the number was increased, but they never realized the function indicated by their name of free schools; they became known as endowed schools by the children of well-to-do Protestants. A scheme of Royal free schools was initiated by James I (1608) in connection with the plantation of Ulster. Their story differs little from that of the other protestantizing schools, but their endowments have not altogether disappeared, and they were divided between Catholics and Protestants under a scheme made by the Educational Society. Finally, passing over other more or less partial schemes, the Charter schools, founded in response to an appeal made by Boulton, the Protestant primate (1730), demand a brief notice. Under the charter granted in 1733, a system of schools was begun which, by means of stringent regulations, the commission of fraud and terror, took Catholic children from their parents and homes and deported them to most distant parts of the country. These schools became the object of shameful cruelty without a parallel in the history of public, or probably even in that of private, education in any land. Yet they were powerfully supported and re-

enduced, and in the year 1748 the Act of repeal was at last passed. Their downfall was brought about by the indulgent exposure of their callous inhumanity by John Howard, the philanthropist, who took occasion to investi-

gate their condition while he was engaged in an inquiry into the state of the prisons.

All these schools were avowedly protestantizing, and as they were the only schools which could be openly established in the country in the eighteenth century, at any rate till towards its close, the education of Irish Catholics was confined to what could be done by the efforts of priests in their own districts, and by those schools which were considered to be the school of a system of an heroic struggle more than a record of a school system in any true sense, and it must be gleaned from all sorts of out-of-the-way sources, for the historian of the Catholic schools of that period has not yet arisen. From the Reformation to the Treaty of Limerick (1554-1651) records are very scanty, and though, in spite of the troubled state of the times, many Catholic schools managed to survive and to do good work, there was no such thing as an organized system of schools, nor would anything of the kind have been possible. Throughout the eighteenth century Catholic schools were repressed by the penal laws, one object of which was, according to Lecky, "to reduce the Catholics to a condition of the most extreme and brutal ignorance". The same author says: "The legislation on the subject of Catholic education may be briefly described, for it amounted simply to universal, unqualified and unlimited proscription". Keeping a school, or teaching in any way, even as usher or private tutor, was a penal offence, and a reward of £10 was offered for the discovery of a Popish schoolmaster. Notwithstanding the severity of these laws, the managers of the Charter Schools, when seeking aid from Parliament in 1768, found it necessary to complain of the great number of schools "under the tuition of Popish masters" that were to be found in many parts of the country.

Protestantizing Schemes.—The Government and the ascendancy party, while prohibiting Catholic education, made several very ambitious though futile attempts to give a Protestant education to the children of the poor Irish Catholics through the agency of protestantizing schools. These schemes may be mentioned here since they were meant for Catholics, though fortunately little used by them. An Act of Parliament of the reign of Henry VIII (1537) prescribed the erection of schools in every parish, but an Act of Elizabeth was passed in 1570 for the establishment of diocesan free schools. Some schools were founded, and in the course of time the number was increased, but they never realized the function indicated by their name of free schools; they became known as endowed schools by the children of well-to-do Protestants. A scheme of Royal free schools was initiated by James I (1608) in connec-

Education for the purpose of placing the various Protestant sects had the effect at last of uniting Catholics in opposition to the system. Apparently it is at last in a good measure in a state of plenitude; only two were Catholics; one rule after another was made of such a character as to leave no doubt of the very serious danger that these new government schools would prove to be simply another proselytizing agency, as was, indeed, the avowed policy of the Protestant archbishops. Whately, in his outburst of prolong and bitter Catholic opposition the schools were at length made tolerable, though they retain their fundamental undenominationalism to the present day.

Outline of System.—The National Education system is now governed by a body of twenty commissioners appointed by the Crown, of whom ten, including the resident commissioner, are Catholics. All the other higher offices, even inspectorships, are divided equally between Catholics and Protestants, offices being in some instances duplicated in order to preserve the balance. The form of local control of the schools that has been adopted gives to Catholics such measures for securing as the power. The immediate management is committed to individuals appointed by the Board, and in the large majority of cases these are the local clergy, amongst Catholics usually the parish priest. Of a total of 8401 National Schools, 5819 are under Catholic management, and of these under Department direction 156 under Catholic managers. These managers have the sole right of appointing and dismissing the teachers, but an arrangement made for Catholic schools, and sanctioned by the Synod of Maynooth, provides that in the exercise of this right the approval of the bishop shall be sought. This arrangement has been accepted by the teachers as an ample protection against the danger of arbitrary dismissal. The managers have, moreover, general authority over the schools and the teachers, but the commissioners themselves, through their inspectors, control the standard and the efficiency of the teaching, and enforce the regulations of their code. The undenominationalism of the system makes itself felt chiefly in two ways: first, in the prohibition of religious emblems even in purely Catholic schools, and, secondly, in the refusal of the commissioners to sanction the use even in Catholic schools of readers or other aids which might be considered open to objection if the schools had mixed attendance of Catholics and Protestants.

Provision of Schools.—School buildings may be vested in the commissioners, or in trustees, or they may be held by the managers as owners. If a school is vested in trustees, the trustees are responsiblable by Catholics, that body provide the entire cost of erection, equipment, and maintenance. If the school is vested in trustees, the commissioners make a grant of two-thirds of the cost of building and equipment, leaving the remaining third, and the entire cost of subsequent maintenance, to be met by local contributions or by rates, on which the municipality is responsible. If the unencumbered ownership of the school is retained by the manager, no contribution is made, but loans may be obtained in certain circumstances.

Catholic Schools.—The schools of the Irish Christian Brothers have refused to enter the National system, but it has been accepted by those of other brotherhoods, and by convent schools generally. The number of convent and monastery National schools is 395, and the average number of children on the rolls, 111,506. Of the 8401 National schools 4391 are exclusively Catholic as regards teachers and pupils, 1542 are similarly Protestant, and the attendance is mixed in 2461 schools, in which the Catholic pupils are 69.7 per cent of the whole. The number of pupils in exclusively Catholic schools is 373,613, and the Catholics in the schools in which the attendance is mixed, number 131,657. There are, therefore, altogether 505,270 Catholic pupils in the National schools out of a total roll of 794,528.

Training of Teachers.—The supply of trained teachers is maintained by seven training colleges, of which one, for men and women, directly managed by the commissioners, is forbidden to Catholics, another, also for men and women, is Episcopalian Protestant, and two for men and three for women are Catholic. The Catholic training colleges are under the immediate management of the bishops of the dioceses in which they are situated, two under the Archbishop of Dublin, and one each under the Bishops of Down and Connor, Limerick, and Waterford. The students in these colleges, all of which are residential, are known as King's scholars, and the colleges are supported by capitation maintenance grants paid by the commissioners.

Technical Instruction.—Technical instruction is carried on by local committees under the Department of Agriculture and Technical Instruction for Ireland, established by Act of Parliament in 1879, and has, in addition to the sums voted for special institutions such as the Royal College of Science, an annual income of £197,000, of which £62,000 must be devoted to technical instruction, £10,000 to the development of fisheries, and the balance to agricultural instruction and development. The technical schools established under this system are undenominational, but as they are almost exclusively evening schools and are confined to technical subjects of instruction, or preparatory work connected therewith, they are freely attended by Catholics.

SECONDARY SCHOOLS AND COLLEGES.—Speaking generally, all schools of secondary standard, and colleges under university rank in Ireland, are purely denominational. In the department of secondary education Catholics received no assistance from the State until 1878, when an Act of Parliament established the Commissioners of Intermediate Education to encourage and promote secondary education by distributing grants to schools of all denominations on the basis of an annual general examination in the subjects of secular instruction, and giving exhibitions and prizes to the most successful candidates. A further Act of Parliament, in 1890, conferred the powers of the commissioners and enabled them to give grants on the basis of an examination, which, however, must be retained. The system of inspection established under this Act has not yet got beyond the tentative stage, and cannot be really effective as long as the annual examination continues to be the basis of the distribution of grants.

Outline of System.—The commissioners are twelve in number, six Catholics and six Protestants, and as their powers are strictly limited to subjects of secular education, the denominationalism of the schools is in no way impaired. The diocesan colleges, with few exceptions, accept the system and compete for their share of the grants. The great colleges and the smaller schools of the religious orders are all within the system, as are also nearly all the convent secondary schools. The Christian Brothers, though refusing to enter the National system of primary schools, have freely entered the Intermediate system, and have added secondary departments to their schools, in which they accept the programme of the Intermediate Board, and submit to the examinations and inspection. The official statistics published by the Board take no account of the religious-denomination
of schools or pupils, but they give sufficiently detailed information about each school to make it possible to arrive at fairly exact figures. Of 344 schools, 218 are Catholics: 128 for boys, 84 for girls, and 6 mixed. The school roll shows that Catholics number approximately 8,780 boys out of a total of 12,067 and 4,000 girls out of 6,428. These rolls contain the names only of those pupils who are within the limits of school age, and the total number of pupils in the schools is probably 25 per cent greater.

Finance.—The Intermediate Education Act (1878) gave the commissioners, from the funds realised by the disestablishment of the Protestant Church, £1,000,000, the interest of which was at first their sole financial help. By increasing the income of the Board by the addition of the residue of specified excise and customs duties after certain fixed charges had been met. The amount received from this source was subject to fluctuation, but for several years it showed a downward tendency, and in 1911 the Government substituted for it a fixed annual sum of £46,000, which brings the income of the Commissioners up to £80,000 a year. The Government further admitted, in 1911, the claim of Irish Intermediate education to an annual parliamentary vote, and if this is made proportional to the corresponding vote in England it should more than double the income of the Board.

Prominent Schools.—The following list gives the names of the larger and more important Catholic schools in Ireland and of the authorities conducting them.

Borns.—Diocesan Colleges conducted by the secular clergy, under the immediate control of the bishop: St. Finian's College, Mullingar; St. Mel's College, Longford; St. Macarten's College, Monaghan; St. Columb's College, Derry; St. Malachi's College, Belfast; St. Colman's College, Newry; St. Patrick's College, Cavan; St. Eunan's College, Letterkenny; Holy Cross College, Enniskillen; St. Peter's College, Westport; St. Patrick's College, and St. Mary's College, Carlow; St. Kieran's College, Kilkenny; St. Colman's College, Fermoy; St. Finbarr's Seminary, Cork; St. Patrick's College, Thurles; St. Brendan's College, Killarney; St. Flannan's College, Ennis; St. Munchin's College, Limerick; St. John's College, Waterford; St. Turlough's College, Tuam; Diocesan College, Ballaghaderreen; St. Joseph's College, Ballina; Summerhill College, Sligo; St. Muredach's College, Ballina.

Conducted by Religious Orders.—Cistercians, Mount Mellows Seminary, attached to the Abbey of St. Mary's, Roscrea. Congregation of the Holy Ghost: Blackrock College, Dublin; Rockwell College, Cashel; St. Mary's College, Rathmines, Dublin. Congregation of the Mission (Vincents): St. Vincent's College, Castleknock, Dublin; St. Patrick's Training College, for National Schools, (now) Drumcondra, a Dublin Dominicans, College of St. Thomas, Newbridge; Society of Jesus, Clongowes Wood College, Sallins; Belvedere College, Dublin; Sacred Heart College, and Mungret College, Limerick; College of St. Ignatius, Galway. Society of Mary (Marians), St. Mary's College, Dundalk; Catholic University School, Dublin; Christian Brothers, O'Connell Schools, North Richmond Street, and several other large schools in Dublin; Christian Brothers' College, and Our Lady's Mount, Cork; Christian Schools in Belfast, Limerick; and many other centres. Presentation Brothers, Presentation Monastery, and Presentation Convent, and other schools: De La Salle Brothers, Training College for National Teachers (men), Waterford.

Girls.—The Dominican College, Eccles Street, and the Loreto College, St. Stephen's Green, Dublin, besides remarkable success in the examinations of the Intermediate Board, won for themselves an undoubted eminence, even in competition with men's colleges in the late Royal University, and have opened schools in connection with the National Universities. St. Mary's, Muckross Park; Sion Hill, Blackrock, Dublin; Training College for National Teachers (women), Belfast; Training College for Secondary Teachers, Dublin, and many other schools. Loreto Nuns, Loreto Abbey, Rathfarnham; schools in Balbriggan, Bray, Dalkey, Gorey, Clonmel, Navan, Mullingar, Letterkenny, Kilkenny, and other schools.

Sisters of the Sacred Heart of Jesus: Laurel Hill Convent, Limerick. St. Mary's Convent, Newtownbarr; Sisters of St. Louis, Monaghan, Carrickmacross, and Kilkimah. Ursulines: Convents of Blackrock, and St. Angela's, Cork; Sligo, Thurles, and Waterford, where, in addition to the school, the Local Government conduct a secondary school teachers. Brigittines: Convents of Tullow, Mountrath, Abbeyfeale, and Gorebridg. Sisters of Mercy: in addition to a large number of elementary schools in various parts of Ireland, higher schools in Dundalk, Quernstown, Macroom, and St. Marie's of the Isle, Cork, and in Limerick a Training College for National Teachers (women). Sisters of the Sacred Heart of Mary: Lisburn; Sisters of the Sacred Heart: Mount Anville, Dublin.

Schools of handicrafts have been established in connection with many of the convents. Among the more important of these are, for fine needlework, those at Blackrock, Cork, Dundalk, Ardagh, Kilbeggan, Longford, Eniskillen, Queenstown, St. Lelia's School, Limerick, Newcastle West, Roseberry, Dungarvan, Stradbally, Claremorris, Westport, Castlebar, Sligo, Roscommon, and Boyle; Poor Clares, Ballyjamesduff and Kenmare. Presentation Thurlers, Carrick-on-Suir and Youghal; Sisters of Charity of St. Paul, Kilkimah; Sisters of Charity, Benada Abbey, Co. Mayo, and Foxford. Many of these schools, and some others have also hosiery, shirtmaking, and similar industries, and some, as Foxford, Loughglynn, St. Lelia's, Limerick, Dunrhum, and Rosebery, are centres of much needed industrial life in their particular localities.

Seminaries.—The education of students for the secular priesthood is carried on chiefly in Maynooth, which is a national seminary, though many students are sent to the Irish Colleges in Rome and Paris, and a large proportion of the students of Dublin, Cashel, Roscrea, and Osra, and receive their whole education in the local seminaries. With these exceptions, however, the local seminaries confine themselves to the secondary school programme, and send their students to Maynooth or the Continent for their studies in philosophy and theology. Each religious order which makes a foundation attached to the Church has its own seminary. The candidates for the foreign missions are educated in All Hallows College, and in the seminaries situated in Carlow, Kilkenny, Thurles, and Waterford. (See also IRELAND; CHRISTIAN BROTHERS OF IRELAND; ALL HALLOWS COLLEGE; MAYNOOTH COLLEGE.)

In Scotland.—Catholic education in Scotland during penal times fared much as in England. By 1670 the Catholic population had dwindled to some 14,000 communicants, of whom about 2000 survived in the Lowlands (Leslie's report to Propaganda).
Scotch colleges which sent many missionaries back to suffer for their faith had been founded at Rome, Douai, Paris, and Valladolid. However, in the crushed condition of the country candidates for the priesthood became scarce. Small Catholic schools and the Catholic primary schools during the seventeenth and eighteenth centuries and struggled on for a while. Thus in 1675 two small schools existed at Glengarry and in the Island of Barra. Early in the eighteenth century a small seminary was begun at Scalain in Glenlivet to be subsequently transferred to the vicinity of Glenlivet. Aquhorthies. Others were started at Samalaman and Lismore. The first really important Catholic college in Scotland since the Reformation was that at Blair, in 1829, when the two surviving "little seminaries" at Aquhorthies and Lismore were united to form the new college, desiring to have an honourable and fruitful career as the future Alma Mater of a considerable proportion of the Scottish priesthood. Since Catholic Emancipation there has been a large immigration from Ireland and a rapid growth within the Scottish community, so that the numbers were divided into small Catholic population of 518,000 in Scotland in 1910, with 554 priests and 238 missions. The story of the progress of Catholic education during the past century has been much the same in Scotland as in England. As each little Catholic congregation formed, it started a school. In some cases the run of the church from the very beginning, the increasing demand for liberty and equality for dissenters, they share common control and responsibility for certain purposes—an arrangement possessing some distinct advantages. In regard to secondary education, the better higher grade schools help towards this in Scotland; and there are twelve such Catholic higher grade schools with religious basis. Owing to the difficulty already alluded to of defining secondary schools, it is not easy to give accurate statistics. One Catholic school for boys, the Jesuit College in Glasgow, is on the list of secondary schools recognised by the Government. The Marist Brothers also conduct a boarding college at Dumfries, St. Mungo's Academy, in Glasgow, and a host of the training of male teachers. There are two ecclesiastical colleges, Blair and St. Peter's, New Kilpatrick; and in addition to those recognized as higher grade schools, there are probably about half a dozen academies and convent boarding schools giving secondary education. There is one large training college for female teachers, managed by the Notre Dame Sisters, in Glasgow.

To the United States.—Out of a Catholic population of approximately 14,347,027, nearly one-half of the Catholic children attending elementary schools in the United States were being educated under the parish school system in the year 1910. Catholic schools are practically impossible in most country districts, and it has been estimated that from one-fourth to one-third of the number of Catholic children of school age live in country districts. In towns and cities, therefore, where there is much speaking, to build and maintain Catholic schools, it may be said that all but about one-fourth to one-sixth of the Catholic population attending school is being educated in the parish schools. The number of pupils in the parish schools is also steadily increasing. This result has been achieved by a process of gradual growth, the root of it all being the firm determination of the Catholic mind to make religion a vital element in the education of the Catholic child. This determination has characterized the attitude of American Catholics in respect to education from the very beginning, and it has been shared alike by the clergy and the laity. The earliest Catholic colonists implanted the principle of religious training in the virgin Catholic soil, and every decade that has passed since then has added but a new growth or a fresh aid, grants for drawing, etc., about £170,000. The inclusion of rent (on the basis of assessment) in the approved expenditure is permitted in Scottish voluntary schools. This amounted in 1908 to £26,000, or an average of £194 per school. The total expenditure of Catholic primary schools in 1910 was £208,624, which worked out at a cost per child of £2. 13s. 5d.; while the cost to the State of each child in the public schools amounted to £3. 14s. 15d. Moreover the public schools drew about twenty-three shillings per child from rates not available to the voluntary schools. Still on the whole, though the Catholic Church is subject to certain financial disadvantages, it has secured freedom, and when worked in a liberal spirit the Scottish system has proved tolerable, indeed with certain further amendments helping to raise Catholic teachers' salaries to those of the public schools it would be even fair.
vigour to the educational mustard seed. A school appears to have been founded by the Jesuits in Maryland not very long after the arrival of the first colonists. There is some uncertainty as to the exact date and its first location. But even before the founding of the Calverta, Catholic schools existed in New Mexico and Florida. By the year 1629, many schools for the natives of New Mexico had been established by the Franciscans, and this was eight years before the first school in the thirteen eastern colonies. The first school was probably the present State Lunatic Asylum at the United States were thus founded by Catholic missionaries. It is probable that the earliest of these mission schools in New Mexico were inaugurated soon after the effective occupation of the region by Don Juan de Onate in 1598. In Florida, school work among the natives appears to have begun about the same time, as a classical school existed at St. Augustine as early as 1606. The Jesuits established a series of flourishing schools for the natives of Lower California, early in the eighteenth century; and the Franciscans, during its last quarter, developed the singularly successful mission schools in Upper California. All of these schools for the natives had an industrial character. In New Orleans, a parish school was opened in 1722, four years after the founding of the city; and five years later a band of Ursuline Sisters established a convent and school there for the education of girls. There is evidence also of the existence of Catholic schools in the period when the United States were colonies to America, and so rapid was the growth of these colonies that their members, within a few years, outnumbered those of the teaching communities previously established in the country. Most of these new bodies, too, became independent of the parent organizations. The greater number of the teaching communities now in the United States trace their American origin to the little pioneer bands that crossed the ocean to take charge of schools for the children of the Irish and German immigrants.

Towards the year 1800 the period of greatest growth in the history of the schools may be said to have ended, and the period of development begun. All through the eastern half of the country, the Catholic school system was by this time solidly established. In the Far Western and South-western States, the work of educational growth and expansion still went on, with the opening of the country there to settlement; and Louis, Kansas, Mackinaw, Detroit, and Vincennes. A college was opened by the Jesuits in Maryland in 1677, and another in the city of New York, about 1684, under the administration of Governor Dongan; and, when they founded Catholic missions in Pennsylvania, schools were opened in connexion with them without the more important parishes as a matter of course.

The era of religious freedom ushered in by the Revolution resulted in the multiplication of Catholic educational institutions of every kind. Colleges were founded at Georgetown and Mount St. Mary's, and plans were framed for the development of Catholic education on a larger and more systematic scale. Fathers Bading and Nerinckx in Kentucky, and Father Richard at Detroit, were energetic and far-seersing educational pioneers. Religious teachers for the schools also began to appear. Alice Lalor opened a school at Galveston, 1790, which became the house of the Visitation Sisters in the United States. Mother Seton established her community at Emmitsburg in 1809; Father Nerinckx founded the Sisterhood of Loretto in Kentucky two years later, and about the same time Father David organized the Sisters of Charity of Kentucky. From this time until about the year 1840 there was a slow but solid Catholic educational growth throughout the eastern half of the country, with the steady increase of the Catholic population. Bishop Kenrick at Philadelphia, Bishop Dubois at New York, Bishop Benedict Fenwick at Boston, Bishop England at Charleston, Bishop Dubois, and Bishop Edward Fenwick, Rose, and Bruté in the west, were unremitting in their labours in behalf of Catholic education in their respective dioceses.

About the year 1840 a new period of school growth began, with the impiring of the great streams of immigration from Germany and Ireland. During the years 1840-60 twice as many dioceses were organized as the number existing at the beginning of this period, and the heads appointed for these new sees were as profoundly convinced of the necessity of Catholic schools as had been the great bishops of the earlier period. "The school alongside the church" was everywhere accepted as the educational maxim. The laity were of one mind with the clergy in the matter, and the building of schools went everywhere hand in hand with the building of churches. The immigrants were poor, but they gave unstintedly of their limited means for the erection and equipment of both. The first school buildings were often of the most makeshift character; but they were gradually replaced by larger and more comfortable churches. The result was that the two hundred parish schools existing in the country in the year 1840 were multiplied several times over before the beginning of the Civil War. The problem of providing teachers for the new schools was generally solved by an appeal to the existing religious communities. Not a few of these sent communities to America, and so rapid was the growth of these colonies that their members, within a few years, outnumbered those of the teaching communities previously established in the country. Most of these new bodies, too, became independent of the parent organizations. The greater number of the teaching communities now in the United States trace their American origin to the little pioneer bands that crossed the ocean to take charge of schools for the children of the Irish and German immigrants.

Towards the year 1860 the period of greatest growth in the history of the schools may be said to have ended, and the period of development begun. About the year 1840 a new period of school growth began, with the impuring of the great streams of immigration from Germany and Ireland. During the years 1840-60 twice as many dioceses were organized as the number existing at the beginning of this period, and the heads appointed for these new sees were as profoundly convinced of the necessity of Catholic schools as had been the great bishops of the earlier period. "The school alongside the church" was everywhere accepted as the educational maxim. The laity were of one mind with the clergy in the matter, and the building of schools went everywhere hand in hand with the building of churches. The immi
matter, and it was left to the conscience and judgment of the bishop to decide in each case. This "Instruction" led up to the educational legislation of the Third Plenary Council of Baltimore in 1884. The need was generally felt by Catholics for more precise and specific legislation in reference to the schools, both parochial and secular. In some parishes, exclusion from the sacraments for parents to send their children to the public schools; in others, it appeared to be made a matter of little or no account. The legislation enacted by the Council fully answered the general expectation. It defined the obligations imposed upon the moral and religious morals of the parents in the matter of the religious education of their children. It provided for the case in which children were practically compelled by circumstances to attend the public schools. At the same time, it sought to give more specific application to its own legislation as well as that of previous Councils by the following decree:

"(1) Near each church, a parochial school if it does not yet exist, is to be erected within two years from the promulgation of this Council, and is to be maintained in perpetuum, unless the bishop, on account of grave difficulties, judge that a postponement be allowed.

(2) A priest who, by his grave negligence, prevents the erection of a school within this time or its maintenance, or who, after repeated admonitions of the bishop, does not attend to the matter, deserves removal from that church.

(3) A mission or a parish which so neglects to assist a priest in erecting or maintaining a school, that by reason of this supreme negligence the school is rendered impossible, should be reprimanded by the bishop and, by the most efficacious and prudent means possible, induced to contribute the necessary support.

(4) All Catholic parents are bound to send their children to a Catholic school. Unless either at home or in other Catholic schools they may sufficiently and evidently provide for the Christian education of their children, or unless it be lawful to send them to other schools on account of a sufficient cause, approved by the bishop, and with opportune cautions and remedies. As to what is a Catholic school, it is left to the judgment of the Ordinary to define."

Other decrees of the Council dealt with the question of the improvement of the schools. The more important of these will be referred to in the course of this article.

SCHOOLS IN THE UNITED STATES. — The total number of parish schools in the United States, according to the "Catholic Directory" of 1910, was 48,485, with an attendance of 1,237,251. The total number of pupils in Catholic educational institutions of all kinds the same year, including colleges, academies, industrial, reformatory, and eleeemoenary schools, was 1,450,488.

Teachers. — On the basis of an average of forty pupils to a teacher, the above figures imply that there are about 31,000 teachers engaged in the parish schools of the United States. Fully nine-tenths of these belong to religious institutes. The proportion of laity teachers to religious varies greatly with locality. In certain districts the lay teachers are very numerous; in most of the dioceses, however, they constitute but a small fraction of the whole number. The number of male teachers is also relatively small, amounting to not more than one-fiftieth of the total. The religious teachers are divided among two hundred and seventy teaching houses, including dependent convents as well as congregations or orders. There are eleven teaching brotherhoods. Many of the religious organizations have less than one hundred members, others have several thousand. The largest, the School Sisters of Notre Dame, has nearly four thousand. The work of some is limited to a single diocese, while others have schools and branch establishments scattered through a large number of states. As a rule, the teaching orders have extended their work wherever opportunity offered, regardless of state or diocesan boundaries. The result of this has been to make parish school education remarkably homogeneous, as compared with the public school system.

Many of these teaching bodies, although at present entirely independent of each other, have sprung from a common parent organization. Thus, there are twenty-four independent establishments of the Benedictine Sisters, twenty of the Dominicans, twenty-two of the Franciscans, twenty-two of the Sisters of St. Joseph, forty-six of the Sisters of Mercy, sixteen of the Ursulines, and two of the Vincentians. The mother-houses or central establishments of these communities are generally located in the United States. Religious communities in Canada have responded generously to the demand for teachers in the States, especially in New England, where the French-Canadian immigration has been so large, and eighteen of the Canadian teaching congregations now have branch establishments in this country. Eleven communities look to mother-houses in France. Besides these, seven communities have their mother-houses in Belgium, six in Germany, four in Italy, and one each in Holland, Switzerland, and England.

Candidates for admission to the religious life are required to spend at least one year in the novitiate. In the case of the teaching orders, the novitiate may be regarded as a normal school in which pedagogical training goes hand in hand with instruction in the principles of the religious life. Before entrance into the novitiate, the candidate has to pass through a preliminary course of instruction in the secular branches, and this course covers not less than two years. The rules of all the teaching orders thus provide for a normal training lasting for at least three years. Previous to the time of the Third Plenary Council of Baltimore, however, owing to the demand for teachers, this course was frequently abbreviated, and sometimes even omitted altogether. The consequence was that teachers were often insufficiently trained for their work, and the instruction in the schools suffered accordingly. The legislation of the Third Plenary Council went far toward remedying this evil, by providing that regular normal schools should be established by the communities where they did not already exist, and that candidates should be allowed to remain in these schools until they had satisfactorily completed the prescribed work.

"In order that there may always be a sufficient number of Catholic teachers, each thoroughly equipped for the holy and sublime work of education of youth, we would have the bishops concerned confer with the superiors of congregations dedicated to the work of teaching in the schools, either on their own authority or, if need be, invoking the authority of the Sacred Congregation, for the establishment of normal schools where they do not yet exist and there is need for them. These are to be in suitable establishments, in which the young may be trained by skilful and capable teachers, during a sufficient period of time, and with a truly religious diligence, in the various studies and sciences, in method and pedagogy, and other branches pertaining to a sound training for teaching."
SCHOOLS

SCHOOLS

... who wish to employ themselves in teaching in the parochial schools in the future, and, if they find them worthy, to grant a testimonial or diploma of merit. Without this no priest may lawfully engage any teacher for his school, unless they have taught before the celebration of the Council. The diploma will be valid for five years. After this period, another and final examination will be required.

"Besides this board for the examination of teachers for the whole diocese, the bishops, in accordance with the diversity of place or language, shall appoint several school boards, composed of one or several priests, to examine the schools in cities or rural districts. The duty of these boards shall be to visit and examine each school separately, or even more, and to transmit to the president of the diocesan board, for the information and guidance of the bishop, an accurate account of the state of the schools".

Only lay teachers and religious belonging to a diocesan community were named as being bound by this legislation, but indirectly it affected all Catholic teachers. Owing to the lack of teachers, it was frequently found difficult to enforce the requirement of a diocesan diploma, to be gained by a formal examination. It may be said, however, that the legislation of the Council had the desired effect. All the religious communities which have well organized schools and candidates, unless they come with superior qualifications, are usually required to complete the full curriculum. Summer normal schools are also conducted at the leading mother-houses, the courses lasting for a month or six weeks. In many dioceses, too, summer institutes are held, the religious and lay teachers of the diocese being assembled for the purpose during a week or two at some convenient place.

Curriculum.—The curriculum of the parochial school comprises eight elementary grades. There is a class in catechism daily, and Bible history is also taught several times a week. In the singing-class, devotional hymns are used, and the school-sessions are opened and closed by prayers or brief devotional exercises. Outside of these religious instructions and practices, it may be said that the curriculum of the Catholic parish school does not differ much from the curriculum of the corresponding public school, except that there is a stronger tendency in the latter to emphasize the importance of those branches that are commonly designated as "the Three Rs". Distinctively Catholic textbooks are employed quite generally, especially in the lower grades. Textbooks in common use in the public schools are, however, frequently employed in the teaching of the other subjects. In the matter of uniformity, some dioceses have gone much farther than others. In some, a common curriculum, with fixed recitation-periods, is prescribed for the schools, together with an authorized series of textbooks; in others, a common curriculum is prescribed, but the selection of textbooks and the fixing of recitation-periods is left to the pastors and principals; in many others, again, the diocesan authorities have not imposed any official standards of uniformity in these respects, except in the matter of religious instruction.

Organizations and Administration.—Three elements of authority are concerned in the conduct of the parish school, the pastor, the superiors of the teachers, and the bishop. The pastor has, besides the financial responsibility, immediate supervision over the school with respect to the faithful and efficient fulfillment of its work, and occupies by right the position of the school. Practically, however, he shares the responsibility of this position with the religious superior in charge of the school. The supervision of the work of the school, in most instances, is really left largely to the immediate religious superior. The higher religious superiors, having control of the supply of teachers and of the teachers' training as well as a supervision of the teaching in a large number of schools, enjoy a practical power over their schools that is comparable in some respects with that of the bishop. The bishop, nevertheless, possesses the supreme control over all the schools of his diocese, subject only to the regulations of the Council and of higher authority. It is chiefly from the bishops that movements look the development of the schools have come. And the trend of Catholic development is strongly towards an increase of the exercise of the episcopal authority over the schools.

Bishop Neumann of Philadelphia in 1852 attempted a diocesan organisation of Catholic schools, by instituting a "Central Board of Education", to be composed of a "Central Board of Education", to be composed of men of the diocese, whose duties were to examine the schools in each of the parishes in Philadelphia, and to be presided over by the bishop. But the project appears to have been in advance of the times. In 1879 Bishop Joseph Dwenger of Fort Wayne, Indiana, organized a school board, consisting of eleven members and a secretary, all being priests. The board was to have control of studies and textbooks in the schools of the diocese, to examine teachers, and to gather statistical information about the schools. The effect was seen to be so wholesome that the Fort Wayne plan was adopted by the Fourth Provincial Council of Cincinnati in 1882. The Indiana plan was adopted by the dependent local school boards in the larger places. When the Third Plenary Council of Baltimore met, two years later, it practically adopted the Cincinnati plan for all the dioceses. Although the Council speaks only of a central "board of examination" and would appear, therefore, to limit the functions of the board to the examination and approval of teachers, it was expected, nevertheless, that more ample powers would be conferred on these boards by the bishops, and this in fact was done. Bishop Gilmour's "Constitution and By-Laws for the Government of the Parochial Schools" in the Archdiocese of New York, in 1857, may be taken as typical of diocesan legislation in this regard. According to this "Constitution" the central board was to be made up of seven members, who were to be examiners of teachers as well as inspectors of schools in their respective districts. The board was vested with full control over the parish schools, under the control of the bishops. The schools were to be instituted, to consist of three, five, or seven members, who were to visit and examine each school within their respective localities at least once a year.

The board system represented an important advance in the work of Catholic school organization, and it was carried everywhere by the American school laws. It was evident, however, that the system was still far from perfect. The men selected to serve on the boards, while devoted to the interests of the schools, were too busily engaged with other duties to give more than a small share of their time to the work. Besides this, few of them had had any formal pedagogical training. There was need, it was seen, of an executive officer of the central Board who should be specially qualified for the work of inspection and supervision, and who should devote his entire time to this task. The New York school board took the lead in the matter, and in the year 1888 appointed the Rev. William J. Desman as inspector of schools. He was succeeded in the office the following year by the Rev. Michael J. Considine, who served in this capacity until the year 1900. The title of inspector was changed to that of superintendent. The Diocese of Omaha adopted the plan in 1881. The Rev. John A. Harrigan, who was appointed superintendent of schools for the Archdiocese of Philadelphia in 1894. Soon he added a new and important feature to the system; this was the appointment, for each teaching order in the diocese, of a community inspector of schools, the idea being that the recommendations of the superintendent in regard to the teachers and...
teaching would be more easily made as well as more effectively carried out through the co-operation of competent and well-qualified persons, the Catholic teaching bodies. The system of diocesan organization, as thus developed, consisted of a central board, with a superintendent of schools, and a board of community inspectors acting in conjunction with the superintendent in the inspection of schools and in the carrying out of the regulations of the board. In this form, the system has been adopted in dioceses, and is gradually replacing the older or simple "board" system. Sixteen dioceses have at present introduced the "superintendent" system, while thirty-seven still adhere to the original "board" plan.

Financial Support.—Catholic parish schools are either "free" or "pay" schools. The latter are supported by the tuition fees of the pupils, paid to the head of the school. Free schools are usually supported by the parish treasury, although here and there schools are found whose expenses have been provided for, in whole or in part, by the endowment of some generous individual. The general tendency is towards free schools, and even where tuition fees are relied on, it is usually necessary for the parish to provide for part of the school's expense. Teachers generally receive from $200 to $300 per year if members of a household, and from $250 to $350 if members of a brotherhood. In several dioceses the salaries are higher than this, and within recent years a movement for the increase of teachers' salaries has been gaining ground. Lay teachers employed in the parish schools receive but little more than religious. Generally speaking, Catholic teachers' salaries are less than one-half as much as the salaries of corresponding teachers in the public schools, and the actual cost of schooling under the Catholic system is only about one-third of what it is under the public school system. It has been estimated that the average annual per capita cost of parochial school education in the United States is $10. This would mean that the education of the 1,327,251 pupils in the parish schools during the year 1909–10 cost approximately, for that year, $9,988,006. The education of the same pupils in the public schools the same year would, according to the Reports of the states, amount to approximately $30,511,019; and if the average interest on the necessary property investment added was the total would be upwards of $34,000,000 (American Eccles. Review, XLIV, 530). This is, therefore, about the amount of money that the Catholic school system saves annually to the State.

Catholic Schools and the State.—Catholic schools are thus, in general, entirely supported by the voluntary contributions of Catholics. For a considerable period after the Revolution, however, Catholic schools in many places were, along with the schools of other denominations, supported from the public funds. This was the case in Lowell, Massachusetts, from 1835 to 1852. In the City of New York, it was also the case until the year 1824. The efforts of Bishop Hughes, in 1840 and subsequently, to restore this condition, were without the hoped-for success. Gradually, State after State framed laws forbidding the payment of public funds to denominational schools and many States even embodied such provisions in their constitutions. Several plans for avoiding the legal barriers that were thus raised against the attainment of their rights in the matter of the education of their children have been proposed and acted upon by the Catholic church, the most prominent of their fair-minded non-Catholic fellow-citizens. One of the most celebrated of these was the "Poughkeepsie Plan", which was accepted by the public school board of Poughkeepsie, New York, in 1873. Under this plan, the school board rented the Catholic school buildings for a nominal sum, and accepted the two Catholic schools of the place as public schools under the common regulations framed for the public schools. Thus continued, the Catholic school, and the continued as before and receiving their salaries from the board. The board agreed likewise to keep the school buildings in repair. The plan proved to be mutually satisfactory, and was continued for many years. Substantially the same arrangement was made in several other places in the State of New York. The arrangement was discontinued at Poughkeepsie in 1899, only when the superintendent of public instruction intervened, and rendered a decision adverse to its constitutionality. At Lima, in the same state, a similar decision was rendered by the superintendent in 1902, and the appeal against this to the courts resulted finally in a judgment of the court of the State, which sustained the action of the superintendent.

The famous "Faribault Plan" was an arrangement substantially the same as that at Poughkeepsie which Archbishop Ireland effected with the school boards of Faribault and Stillwater, in Minnesota, in 1891. There was considerable opposition on the part of Catholics, however, to such arrangements, one of the chief reasons being that religious instructions, under the agreement, had to be given outside of the regular school hours. An appeal to Rome in the Faribault case resulted in "To the Bishops of the United States," April, 1892, which authorized the continuance of the arrangement under the specific circumstances. The controversy among Catholics had the effect of concentrating public attention upon the matter, and of arousing simmering anti-Catholic prejudice. The Faribault Plan is still in operation in some places; and in various parts of the country, especially in the west, where Catholic settlements are numerous, there are Catholic schools which derive their support from the public school boards. But such arrangements are purely local. In certain states, recent legal decisions authorize the attendance of pupils from the parish schools at the manual training classes in the public schools. In connexion with these practical plans for the settlement of the "school question" there has been frequent discussion among Catholic educators and apologists as to the right of the State to compel to attend Catholic schools.

Dr. Breckinridge, in the Catholic University, Washington, issued a pamphlet in which he maintained that the State has the right to educate, in the strict and proper sense of the term, although he conceded to it the right to establish and maintain public schools. This was the view more generally held by American Catholic educators. In the year 1891 the Rev. Thomas Aquilson, D.D., prominent in this movement, wrote an article in the Catholic University, Washington, issued a pamphlet in which he maintained that the State has the right to educate, in the sense that it has the right of "establishing schools, appointing teachers, prescribing methods and programme of study"; and that "education belongs to men taken individually and collectively in legitimate association, to the family, to the state, to the church, to all four together, and not to any one of these four factors separately". These views aroused a storm of controversy which lasted for several years, and engaged the attention not only of Catholics in the United States but of the whole Catholic world. The efforts of Cardinal Satolli to settle the question by means of a series of fourteen propositions which he submitted to the board of archbishops at their meeting in New York, in the autumn of 1892, were futile; and the agitation subsided only when Pope Leo XIII addressed a letter to the American hierarchy through Cardinal Gibbons in May, 1893, in which, while appealing for the cessation of the controversy, he declared that the decrees of the Baltimore Councils were to be steadfastly observed in determining the attitude to be maintained by Catholics in respect both to parish and public schools.
Schools of Foreign Nationalities.—One of the most difficult problems that has confronted the Church in the United States has been the education of the children of the immigrants arriving from foreign countries and speaking a foreign language. The children of these immigrants were poor, and yet, if their descendants were to be saved to the Faith, it was imperative that Catholic schools and teachers should be provided for them, as well as churches. The missionary priests who came to minister to the immigrants were, as a rule, keenly alive to the importance of the Catholic school, and, acting in conjunction with the American school authorities, they, to a great extent, overcame the difficulties that stood in the way and built up flourishing systems of schools. The chief difficulty, besides poverty of material resources, was that of securing competent teachers. Lay teachers were commonly employed at first. Little by little, however, religious orders were introduced, colonies of religious teachers being brought from abroad for this purpose, and even new religious communities founded here. Some of these communities grew rapidly, and they have furnished a constantly increasing supply of teachers for these schools.

The Polish schools have the largest aggregate attendance. They are scattered all over the country, but are especially numerous in the large industrial centres. There were, in 1910, 293 Polish parishes with schools, having an attendance of 98,126 and with 1707 teachers, the great majority of whom being religious. Next in number come the French schools, most of which belong to the French-Canadians, and are located in New England. These schools in 1910 numbered 161, with 1490 teachers, and a total attendance of 63,045. The Italians, although they compare in numerical strength with the Poles and French, are far behind them in the matter of provision for Catholic education. There were but 48 Italian schools in 1910, with 271 teachers, and an attendance of 13,838. Bohemian schools, the same year, had an attendance of 8978; Slovak schools, 7419; and Lithuanian schools, 2104, with a corresponding number of teachers of these nationalities.

There were formerly many German schools in the United States, but schools in German parishes now generally employ English as the medium of instruction, although German is taught also as one of the regular classes. In the case of the nationalities mentioned above, English is always a part of the curriculum of schools, and often it is the chief medium of instruction. In Italian schools, very little time is given to the study of Italian, and the same is true in many of the French-Canadian schools. In schools of the Slavic peoples, more time is given, as a rule, to the parental mother-tongue, and it is used conjointly with English as a medium of instruction.

In Polish schools, from one-third to one-half of the time is most commonly devoted to the study or the use of the Polish language. Many of the States have attached to their child-labour laws the condition that a child, even though of employment-age, shall attend the school for the advancement of English. Legislation has had an influence in the steadily growing predominance of the English language in the schools of the foreign nationalities, but the effect is due in the main to the American life and atmosphere.

Orthography.—Catholic industrial schools in the United States number 117, with an attendance of probably 15,000. Many of these schools are reformatory in character, but a large number are high-grade industrial schools in charge of the teaching orders. There are also manual training classes in many schools, especially in schools for girls.

Negroes and Indians.—There are probably near 150,000 Catholic negroes in the United States, and for these there exist 119 Catholic schools, with an attendance of about 5000. Various religious communities are in charge, conscious among which are two congregations of coloured Sisters, the Oblate Sisters of Providence, founded at Baltimore in 1829, which now has a membership of 146, and the Sisters of the Holy Family, New Orleans, of which was founded in 1842, and has a membership of 112. A collection is taken up annually in all the churches of the United States for the mission work among the Negroes and Indians, and many of the schools derive their support from this source.

The number of Catholic Indians is approximately 100,000. There are 63 Catholic Indian schools, with nearly 5000 pupils. About 6000 Catholic Indian pupils are being educated in the government schools. 55 of the Catholic schools are boarding institutions. Many of these are of an industrial character, the policy of Catholics in respect to the education of the Indians having always been to give prominence to training in the manual and industrial arts. The success of this policy has been often testified to by government inspectors of Indian schools as well as by distinguished American statesmen. Limited support is accorded to these schools by the Federal Government. The policy inaugurated by President Grant in 1870, about 80,000 Catholic Indians passed from Catholic to Protestant control. Through the efforts of the Bureau of Catholic Indian Missions, established some years later, together with the active efforts of members of the hierarchy, a new policy was inaugurated by the Government, under which it entered into contracts with the Catholic authorities concerned to provide for the support of Catholic Indian schools. Catholic schools multiplied rapidly in consequence until, in 1898, a policy was entered upon which involved the entire discontinuance of appropriations for denominational schools. In the year 1900 appropriations ceased. To keep up the schools, an organization known as the Society for the Preservation of the Faith among Indian Children was founded, and with the contributions from this society, together with the annual collection taken up for the purpose, and the donations of generous benefactors, many of the Catholic schools were kept alive. In 1904, under the administration of President Roosevelt, through the work of the Catholic Indian Bureau, a considerable allowance was made to certain Catholic schools by the Government from the Indian funds, in annual grants by Catholic Indians. This policy has been continued up to the present, and in 1908 the appropriations made to Catholic schools in this way reached the sum of $111,586.90. Prominent among the agencies which have successfully laboured in behalf of Catholic Indian education has been the community of Sisters of the Blessed Sacrament for Indians and Coloured People, which was founded by Mother Katherine Drexel in 1889. These nuns now number 143.

Orphanages.—The number of Catholic orphanages in the United States in 1910 was 268: 45,943 children were reared for the above-mentioned puzzle. These are found in every diocese, and which are in charge of religious communities, generally of Sisters. They are usually supported by the parishes or by the voluntary contributions of the faithful. A limited number are endowed. (See also EDUCATION OF THE DEAF AND DUMB: EDUCATION IN THE SECONDARY SCHOOLS.)

There are two classes of Catholic secondary schools in the United States, those which are intended to prepare pupils for a higher education, and those which are closely connected with the parish schools and aim at least the greatest number of their pupils in the service life. The former are found in cities or near institutions for boys and in academies for girls. The latter are sometimes an integral part of the parish school system, or, again,
they may be without direct connexion with the parish schools, although intended to complete and round off their work. A report made to the Catholic Educational Association in 1908 showed the existence of 85 Catholic colleges for boys, having pupils in collegiate as well as secondary courses. The number of students pursuing collegiate courses was 4232, the number in the secondary or high school departments was 10,137. There is a growing sentiment among Catholic college men in favour of at least a wider separation of the high school department from the college proper.

In the "Catholic Directory" for 1910, 709 institutions are classed as academies for girls, with an attendance approximating 90,000. The larger number of high schools have no collegiate departments, and are to be regarded as normal schools. Sometimes, too, they are academies, in fact, high school departments which are generally denominated the "academic course", with the exception of Trinity College, Washington; and nearly all have also elementary schools divided into the "primary" and the "preparatory" departments. Probably about one-half of the above total attendance is in these elementary departments. The greater part of the remaining half is in the academic or high school departments. Many of the larger institutions have developed collegiate departments that compare favourably with those of the best equipped colleges for boys. The number of these colleges for girls as well as the number of their collegiate students is at present growing rapidly. The curriculum in the larger institutions thus consists of three main divisions, the elementary department, the academic or high school department, and the collegiate department, the latter two courses each four years. The smaller institutions have, as a rule, only the elementary and high school courses, although their high school or "academic" department is sometimes made to include a year or two of collegiate work. Besides these departments, the academies generally have well-graded and thorough courses in art and music, both vocal and instrumental, leading to corresponding honours or diplomas. The ideals of culture represented by these latter features are, in fact, a distinguishing feature of the work of the Catholic academy, and constitute one of its strongest appeals for popular favour and support.

Within the last quarter of a century many Catholic secondary schools or high schools have been developed in close connexion with the parish schools. Most often these high schools are directly attached to single parish schools. In some cases, however, they are "central" high schools, affiliated with a number of inferior schools. In these cases, the academy and the preparatory departments of colleges for boys, with a total attendance of 7902 boys of high school standing and 6160 girls. About one-half of these schools have four full high school grades, and 215 of them have courses in Latin. The total number of high school teachers was 1006; 157 of the schools derived their support from tuition-fees, 184 from parish revenues, and 5 are uncapped. The reports of the committee revealed the existence of a wide-spread movement for the development of facilities for secondary education in connexion with the parish school system. The movement springs from a popular demand, and is based on the fundamental idea of Catholic education. It is evident that the further progress of this movement is destined to have a highly important influence upon the parish schools as well as the colleges.

Schools, Apostolic.—Where the Church is normally organized the recruitment of the secular clergy is provided for by means of ecclesiastical seminaries. The little, or junior, seminaries commemorate the work, the theological seminaries complete it. Missionary countries are dependent for a supply of clergy on foreign missionary colleges and on apostolic schools. The object of apostolic schools is to cultivate vocations for the foreign missions. Apostolic schools, as distinct from junior ecclesiastical seminaries, owe their origin to Father Alberic de Foresta, S.J. (b. 1818; d. 1876). That zealous priest found in existence many works of zeal for the spread of the Gospel—"The Apostleship of Prayer," "The Society for the Propagation of the Faith." "The Holy Childhood"—but, excellent as these associations are, Father Foresta felt they were doomed to be inefficient unless there could be a supply of apostolic men to preach the Gospel and to administer the sacraments. Taught by experience in the guidance of souls, he felt convinced that many pious youths, prevented by want of means or other circumstances from entering the ranks of the secular clergy, possessed a true vocation to the ecclesiastical state. He felt a desire to cultivate such vocations, and to utilize them for the advantage of the foreign missions. He knew that the Church in her legislation (Council of Trent, Sect. XXIII, cap. xviii, de Ref.) had expressed a wish that the children of the poor should be admitted to the sacred ministry and should receive a gratuitous and exclusively ecclesiastical education to prepare them for it. He therefore formed the design of opening a school where youths who gave promise of an ecclesiastical vocation, and who were disposed to go and labour on foreign missions might be educated.

With the approval of his superiors, Father de Foresta opened the first apostolic school at Avignon in 1885. The conditions of admission were of two kinds: those which regarded the pupils and those which regarded their parents. As regards the former the conditions were: (a) the academies pupils should be at least twelve years of age; (b) possess a good elementary education; (c) have good health; (d) present a certificate of good conduct and piety from his parish priest; (e) have a sincere desire to serve God either as a priest in a missionary country, or as a
religious in an order devoted to the foreign missions. As regards parents the conditions were: (a) that they should give their consent to their son's entering the school and a written agreement not to oppose his vocation nor require his return home during the school vacations; (b) that they should engage to receive him back if the superiors of the school judged it advisable for him to devote himself to a secular calling. The course of studies in the apostolic school comprised a thorough training in the Latin and Greek classics, in modern languages, and in mathematics, so as to prepare the pupil to take up philosophy and theology and engage him in the novitiate of a religious order. The residence of the scholars was near one of the colleges of the Society of Jesus. The pupils attended classes along with the students of the college, and thus had the advantage of emulation and competition with others while living under ecclesiastical discipline in their own house. For the material support of the school Father Foresta depended partly on the voluntary fees paid by the parents of the pupils, according to their means, and partly, or rather chiefly, on the charitable contributions of the faithful, who had come to understand that it is the greatest work of piety to assist the faithful to build a church.

The good work commenced by Alberic de Foresta in 1865 prospered. In 1868 similar apostolic schools were established at Amiens and Turin; in 1869 one was opened at Poitiers, in 1871 at Turnhout in Belgium and at New Orleans, in 1872 at Bordeaux, in 1874 at Tournai, in 1877 at Dole and at Monaco, and in 1879 at Boulogne-sur-Mer. Pius IX, in a Brief dated 12 April, 1867, blessed the work of the apostolic schools, and in Briefs dated 30 June, 1870, and 15 May, 1877, repeated his approval and bestowed indulgences on them and on those who promoted Anti clericalism in France since 1880 has been an obstacle to the work. But like the Apostles, who when persecuted in one city fled to another, the superiors of these schools have not abandoned their pious enterprise. The apostolic school of Avignon has been several times transferred from one place to another, and is now located at Eremo Lanzo, in the neighbourhood of Turin, where it has about 72 pupils. The school at Bordeaux has been transferred to Vitoria in Spain, where it carries on its work with fifty pupils. The Amiens apostolic school has been transferred to Lille and to England, where they have been established, in the Diocese of Turnhout, Belgium. The school at Poitiers still exists. In 1881 the number of students in the schools founded by Father de Foresta amounted to between four hundred and five hundred, and they had already given about five hundred missionaries to the Church. While the schools of Avignon, Amiens, Turnhout, Poitiers, and Bordeaux had been opened only for thirty years in existence they had already educated about one thousand missionaries. The Bordeaux school has been transferred to Vitoria in Spain, where it carries on its work with fifty pupils. The Amiens apostolic school has been transferred to Littlehampton in England, where they have been established, in the Diocese of Turnhout, Belgium. The school at Poitiers still exists. In 1881 the number of students in the schools founded by Father de Foresta amounted to between four hundred and five hundred, and they had already given about five hundred missionaries to the Church. While the schools of Avignon, Amiens, Turnhout, Poitiers, and Bordeaux had been opened only for thirty years in existence they had already educated about one thousand missionaries. The Bordeaux school has been transferred to Vitoria in Spain, where it carries on its work with fifty priests, secular and regular.

Besides the apostolic schools on the Continent, the Jesuit Fathers possess a flourishing apostolic school at Mungret, near Limerick, in Ireland. The Mungret apostolic school owes its origin to the Rev. William Ronan, S.J. In the course of his missionary work throughout Ireland Father Ronan had met many boys who gave signs of an ecclesiastical vocation, but a lack of means made it impossible for them to attain the object of their aspirations. Father Ronan was eventually appointed rector of the Jesuit college at Limerick, and he then conceived the idea of opening an apostolic school in connexion with that establishment. On 24 September, 1880, a community was made, and two years later the Jesuit Fathers acquired possession of the government agricultural college, built on the site of the famous monastic school of Mungret, which dated from the days of St. Patrick and had been confiscated at the Reformation. There, under the title of Mungret College, the apostolic school was established, and a new department opened for lay students. Father Ronan, as the first rector, visited the United States in 1884 and had an opportunity of explaining to several members of the American hierarchy the object of his apostolic school. He obtained permission to appeal to the faithful for means to enlarge the school buildings and to found bursaries. His appeals met with a liberal response. On his return to Ireland he established the Mungret College and founded several bursaries for the education of students. In 1911 the number of apostolic scholars in the college was seventy-three.

The course of studies extends over a period of about seven years, and on leaving the school the scholars are qualified to enter a theological seminary, or the novitiate of a religious order. The scholars attend the classes of the Jesuit college at Mungret. The efficiency of the teaching is attested by the success which the pupils have obtained in the intermediate examinations, and in those of the (late) Royal University of Ireland. In 1894 and sixty-three former pupils given in the "Mungret Apostolic Record", 1910, there are to be found one M.A., sixty B.A.'s, and nine who in their higher theological studies obtained the degree of Doctor of Theology. In 1910 the number of pupils who left the school to go on to higher ecclesiastical studies was twelve. The average yearly number since 1886 has been eight. The Mungret students are permitted vacations at their homes and are at full liberty to study for the secular mission in a foreign missionary country, or to enter a religious order having charge of foreign missions. The list of past pupils above referred to shows how liberal liberty is exercised; out of one hundred and sixty three pupils, forty-nine entered the Society of Jesus, seven became Redemptorists, 4 Vincentians, 2 Passionists, 2 Dominicans, 1* a Discalced Carmelite; all the others, 98 in number, entered the ranks of the secular clergy. The Mungret apostolic scholars are to be found in India, China, the Philippine Islands, Africa, Australia, and America. In the United States a Union of Mungret Apostolic Alumni was formed in 1910. Means for the support of the school are derived partly from payments made by the parents of the pupils, and partly from endowed benefactions, interest of which is paid to the bene-
with 60 pupils; Vienna, 50 pupils; Perryville, Missouri, 48 pupils; Germantown, Pennsylvania, with 70 pupils. Of these the schools at Dax and at Wernhoutsburg may be taken as types. In 1864 there was founded at the birthplace of St. Vincent de Paul an establishment representing the various charitable works instituted by the saint. Out of that establishment a number of boys have entered the apostolic state. Some of the boys manifested a desire to enter the ecclesiastical state, and in 1871 an apostolic school was commenced with nine pupils. In a few years the number increased to 40, and in 1911 it amounted to 112, consisting of boys from various departments of France, two Spaniards, two Portuguese, two Greeks, and two Algerians. The pupils present themselves of their own accord with the consent of their parents. An essential condition of admission is the desire to prepare for the ecclesiastical state. The pupils are free to choose to study for the foreign missions, or to return to their own dioceses. At the close of each year those who give no solid promise of an ecclesiastical vocation are dismissed. In the higher classes only those are retained who manifest a vocation for the Congregation of the Mission. About one in three of the pupils enters the congregation. The others become priests in their native dioceses or enter the world. The course of studies, comprising the classics, modern languages, and mathematics, is similar to that followed in the Catholic secondary schools of France, and ends with rhetoric, after which the pupils who have remained up to the highest class enter the novitiate of the Congregation of the Mission. The resources of the school are derived to a great extent from payments made by the parents of the pupils, but chiefly from allocations granted by the superior general of the Congregation of the Mission. The past pupils of the school are to be found present in the various departments to which the Congregation in China, Persia, Abyssinia, and Madagascar. The school at Wernhoutsburg was founded in 1882, and in object and organization resembles that at the Berceau de St.-Vincent near Dax. The number of students in 1911 was 150. Besides instruction in the classics and mathematics there are courses in French, Dutch, German, and English. From twelve to fifteen students annually enter the novitiates of the Congregation. The pension payable by the students is 300 francs (about $60) a year. Those who have no vocation for the Congregation of the Mission complete their studies in the school, pay a pension of 500 francs ($100).

The Salesian Fathers, founded by Ven. Giovanni Melchior Bosco, possess several flourishing apostolic schools, such as those at Tournai in Belgium, at Nyon in Switzerland, at Le Catel in Guernsey. The object of the Salesian apostolic schools is to foster the ecclesiastical vocations of boys who, on account of poverty, are unable to enter the diocesan seminaries. The conditions of admission are good conduct and a desire and aptitude for the priesthood. The course of studies prepares them to enter a diocesan seminary, a foreign missionary college, or a religious order, in the choice of which they are left full liberty. The most important of the Salesian schools is that at 63 Boulevard Leopold, Tournai, Belgium, founded in 1895. The number of pupils in 1911 is 170, of whom 60 entered in 1910. The establishment has received encouragement from the cardinals of Mechlin, College priests from the cardinals in France, from more than fifty archbishops and bishops. The Salesian school in Guernsey has seventy pupils. There is also a preparatory Salesian school at Surrey House, Surrey Lane, Battersea, London.

The Fathers of the Holy Ghost have an apostolic school at Grange-over-Sands in the Diocese of Liverpool and an apostolic college with 60 students at Cornwalls, Archdiocese of Philadelphia, United States. The Fathers of St. Joseph's Missionary College, Mill Hill, London, have an apostolic school (St. Peter's) at Freshfield, Liverpool, founded in 1884, where youths between the ages of fifteen and twenty are admitted to study the humanities in preparation for entrance at St. Joseph's College. The chief conditions of admission are, a sound English education, recommendation from a priest, and a small nominal pension. The work of the Mill Hill Missionary Fathers in Uganda, Madras, Punjab, and the Philippine Islands is the fruit of the education begun at the Freshfield school. Other congregations have similar apostolic schools. The Cleres de Saint Joseph have one at Suse in the North of Italy. The number of pupils in 1910 was eighty, and the establishment has already given more than three hundred missionaries, including priests and brothers, to the Church. The Missionaries of the Sacred Heart have established, for the recruitment of their own order, an organization called "La petite œuvre du Sacré Cœur pour l'encouragement des vocations sacrédotal et apostoliques". The number of pupils in its various establishments, one of which is at Fribourg in Switzerland, is about six hundred. This institute outnumbers the missions of the other than three hundred priests and two bishops. The congregation of the White Fathers (Pères Blanches) have one hundred and sixty students in their various apostolic schools preparing for missionary work in North Africa. The Lyons Society of African Missions have a preparatory school at Cork in Ireland, and in their various schools they have a total of three hundred students. The Company of Mary have an apostolic school at Romey, Hants, whither it was recently transferred from Belgium, while the Fathers of St.-Édme-de-Pontigny have an apostolic school at Hitchin, recently transferred from Mont-Saint-Michel in Normandy. The Franciscans, the Dominicans, the Passionists, the Oblates of Mary Immaculate, and the Redemptorists also have apostolic schools for the recruitment of their own orders.

It has been impossible to obtain complete statistics of all existing apostolic schools. The following figures give the status of the apostolic schools on January 1, 1911: Jesuit, Eremo di Lanzo (transferred from Avignon), 72 pupils; Vitoria (transferred from Bordeaux), 50 pupils; Turnhout, Belgium; Pottières, Thieu, 82 pupils; Mungerst, Ireland, 73 pupils; Vincentian, Dax, 112 pupils; Wernhoutsburg, 150 pupils; Insep, Ester, 60 pupils; Villers-Cotter, 48 pupils; Germantown, Pennsylvania, 70 pupils; Salesian, Tournai, 170 pupils; Guernsey, 70 pupils; St. Joseph's, Mill Hill, St. Peter's, Freshfield, 47 pupils; Petits Cleres de Saint-Joseph, Suse, Italy, 80 pupils; Fathers of the Holy Ghost, Cornwells, Pennsylvania, 12 pupils; Missionaries of the Sacred Heart, in various schools and colleges, 600 pupils; White Fathers, in various schools and colleges, 160 pupils; Society of the African Missions, in various schools and colleges, 300 pupils. This account of the apostolic schools shows how the Holy Spirit is at work in the church, calling and preparing vessels of election to preach the name of God to Gentiles. The work of apostolic schools is, according to the words of Pius IX, "salutary and useful" (salutare et utile). "It is", wrote Monseigneur de Séguir, "one of the most beautiful flowers which the garden of the Church presents at the present day to the eyes of God and men". The graduates of these schools, and those who contribute to their education have a share in the work and are partakers in the reward of apostles.

De Charlourens, Albert de, Portraits, S.J. fondateur des écoles apostoliques, sa vie, et son œuvre (Paris, 1861); Deluine, Pour repousser nos ennemis (Paris, 1897); L'Ecole apostolique de...

This same article has been mentioned in this article has derived much information from letters received from the superiors of the apostolic schools at Eremo di Lasso, Vitoria, Dax, Wernbouchy, Tournay, Thalou and St. Joseph's Missionary College, Mill Hill.

PATRICK BOLLE.

Schools, Clerics Regular of the Pious, called also Piastas, Scopoli, Escolapios, Poor Clerks of the Mother of God, and the Pauline Congregation, a religious order founded in Rome in 1597 by St. Joseph Calasanctius (q.v.). As a member of the Confraternity of Christian Doctrine he went about the country instructing the people, and his experience convinced him of the necessity of providing the children of the poor with religious instruction at an early age. Antonio Brendoni, pastor of Santa Dorotea in Trastevere, placed two rooms at his disposal and assisted him in the work, in which they were afterwards joined by two other parish priests. It was not long before the reputation of the school increased the attendance to such an extent that Calasanctius removed it to a building within the city, where he took up his residence with his companions. When two years later the school was again removed, this time to the Vestri Palace in the vicinity of Sant' Andrea della Valle, community life was inaugurated among the associates, and Clement VIII showed his approval of the work by ordering the payment of a yearly allowance of 200 scudi for rent of the house. Criticism ensued which led to an inspection of the schools by Cardinals Antoniani and Baronius, which resulted satisfactorily, the approval of the work of St. Ignatius V was even more pronounced than that of his predecessor. In 1612 the growth of the schools necessitated the purchase of the Torres Palace, and on 25 March, 1617 Calasanctius and his companions received the religious habit, the saint changing his name to Joseph of the Mother of God, thus inaugurating the profession of a religious life which was to be the salvation of the religious life. The most noted of his early companions were Gaspare Dragone, who joined the saint at the age of 95 and died a saintly death in 1628 at the age of 120; Bernardino Pannicola, later Bishop of Ravella; Juan Garcia, afterwards general of the order; the third Philip Cholet; Emmanuel de Vitoria; Vivandi de Colle, Melchior Albacchi, etc.

The congregation was made a religious order 18 Nov., 1621 by a Brief of Gregory XV, under the name of "Congregatio Paulina Clericorum regularium pauperum Matris Dei scholorum piarum". The Constitutions were approved 51 Jan., 1622, when the new order was given the privileges of the mendicant orders and Calasanctius was named general, his four assistants being Pietro Casani, Viviano Vivani, Francesco Castelli, and Paolo Ottonelli. On 7 May of the same year the novitiate of St. Onofrio was opened. In 1656 Alexander VII resigned the privilege of solemn vows granted by Gregory XV, and added to the simple vows an oath of perseverance in the congregation. This was again altered by Clement IX in 1669, who restored the Piastas to the conditions of regulars. But petitions from members who hesitated to bind themselves by solemn vows led Clement X in 1670 to issue a bull which empowered the general in the Piastas to dispense from solemn vows laymen or clerics in minor orders, while ordained clerics in possession of a sufficient patrony or a benefice were restored to the jurisdiction of their bishops. The Piastas are exempt from episcopal jurisdiction and subject only to the general, who is elected every six years and has four assistants. In virtue of a Brief of Alexander VIII (1690) they ceased to be disclosed. Their habit is closed in front with three leathern buttons, and they wear a short mantle. The order spread rapidly even during the founder's lifetime and at present it has nine provinces (Italy, Austria, Bohemia, Moravia, Hungary, Poland, Spain, Chile, and Central America), 121 houses with 2100 members and about 40,000 pupils. The Piastas have won widespread respect for their high standard of education. Their first care is to provide free education for poor children, but they also receive pupils from the middle classes and the nobility, and since 1700 they have taught besides the elementary branches the liberal arts and sciences. At the time of the suppression of the Jesuits in Poland and Lithuania (1773-1777), the government of the Roman Catholic Church in the Duchy of Warsaw and Lithuania formally commissioned them to teach the higher studies. The course consists of nine classes, the plan of studies is uniform, as are also the textbooks, which to a great extent are compiled by members of the order. Like the Jesuits they devote special attention to the acting of Latin dramas by the students. A member of the order, Francis Hermann Czeck (d. 1847), was very successful in his work of teaching the deaf and dumb. Among the writers and learned men of the order are the general Pietro Francesco of the Immaculate Conception, author of the Polygraphia (L'Ingrandimento della voce [Lanciano, 1702]; La Bibliotheca sacra (Paris, 1724)); Philip of St. James, who edited the chief Sentences of the "Maxima Sanctorum Patrum Bibliotheca" (Lyons, 1719); Arnold Zeglicki, whose "Bibliotheca gnomico hist.-symb.-pollica" was published at Warsaw in 1742; Alexis a S. Andrea Alexi (d. 1761), moral theologian; Antonius a S. Justo, author of "Schola pia Aristotelico-Thomistica" (Saratoga, 1745); Gottfried a S. Elisabetha Uhlich (d. 1794), professor of heraldry and numismatics; Augustine Odonbrina, who was actively associated with Leibniz; Adrian Rauch, historian; Josef Fengler (d. 1802), Bishop of Raas; Remigius Dettler, professor of physics at the University of Vienna; Franz Lang, rector of the same university; the general Giovanni Inghirami (d. 1851), astronomer; Johann N. Ehrlich (d. 1864), professor of theology at the University of Prague; A. Leonetti, author of a biography of Alexander VI (Bologna, 1890); Filippo Cecchi; Karl Feyerer, mathe- matician; Gianfanco Evrenti, poet; Wilhelm von Eschenbach, author of the order led lives of eminent sanctity. In his Life of St. Joseph Calasanctius, Tosetti gives a list of 54 who between 1615 and 1756 died edifying deaths, among them Petrus Casani (d. 1647), the first novice master of the order; the fourth superior general, Carlo Chiaies; Antonio da Petras (d. 1672); the lay-brother Philip Boeio (d. 1662); Antonio Muscia (d. 1665); and Eusebius Amoretti (d. 1685).

BLANCHE M. KELLY.
Westfalen und war ihm nicht thut” (The condition of the peasant class in Westphalia and what it needs). In this pamphlet he proposed the founding of an independent peasant union. In the same year the first two societies were formed and the examinations of the peasant unions were formed in nearly all the districts of Westphalia, so that by the end of the sixties there were nearly 10,000 members. Schorlemer worked both by speech and in writing for the development of this great undertaking. In 1863 he was made a member of the Prussian agricultural board. In 1867, he was the temporary president of the central agricultural union, and in 1867 he was made the manager of the same. As such he founded the agricultural schools at Ledinghausen and Herford. In 1870 he was also the manager of the provincial agricultural union of Westphalia.

His parliamentary career began in 1870. In the years 1870-72 Schorlemer was a member of the lower house of the Prussian Diet; in 1870-79 and 1890 a member of the imperial Reichstag. He belonged to the centre party, and during the Kulturkampf was an indefatigable champion of the Church. He was considered one of the best speakers of the parliament; possessing both acuteness and racy humour, “ruthless but honourable”, as Bismarck said; he fought unwearyingly the opponents of the Church in the Kulturkampf. In 1893 he came into conflict with the Centre because he demanded a better presentation of agriculture in the German Diet.

His permanent reputation, however, rests upon his organization of the peasants. In 1871 the various peasant unions were dissolved, and on 30 Nov., 1871 one peasant union, the Westphalian Peasant Union, as it exists at present, was founded. Its purpose is the moral, intellectual, and economic improvement of the peasant class, on a foundation of Christian principles. In 1890 the union had 20,500 members, in 1905 25,000, and now has over 30,000. The activities of the association extend in all directions; among its branches are: loan and savings banks, testing stations for agricultural machinery and implements, department of building, department of forestry, insurance against liability, association for the purchase and sale of articles necessary in agriculture, boards of arbitration and amicable adjustment of difficulties, legal bureau, etc. The association is not only a blessing to the society, but also for the whole of Germany; for it has been the model for the formation of a number of other peasant associations.

Many honours were conferred upon the founder of this organization. Among other marks of distinction he was made in 1884 a member of the council of state, and in 1881 a member for life of the upper house of the Prussian Diet. The Emperor William II had a very high regard for him. The pope appointed him privy chamberlain and commander of the orders of Gregory and Sylvester. In 1902 the peasant union of Westphalia erected a monument to him in front of the parliament building of the Münster Abbey. Schorlemer, as even non-Catholic newspapers admitted, was a nobleman in the true sense of the word, a harmonious and thorough man; one who successfully combined an ideal conception of life with practical aims; his motto was “Love and justice.”

KLEMMENS LÖPPNER

Schott, Garpar, German physicist, b. 2 Feb., 1698, at Königshofen; d. 12 or 22 May, 1668, at Augsburg. He entered the Society of Jesus 20 Oct., 1627, and after a second period of probation in France was sent to Sicily to complete his studies. While there he taught moral theology and mathematics in the college of his order at Palermo. He also studied for a time at Rome under the well-known P. Kircher. He finally returned to his native land after an absence of some thirty years, and spent the remainder of his life at Augsburg engaged in the teaching of science and in literary work. He was the first professor of natural history and of philosophy in Augsburg. He was professor of mathematics and physics, and in 1666 was appointed head of the school.

His most interesting work is the “Magia universalis naturae et artis” 4 vols., Würzburg, 1657-1659, which contains a collection of mathematical problems and a large number of physical experiments, notably in optics and acoustics. His "Mechanica lyrica et Geomechanica," Würzburg, 1657, contains the first description of von Guericke's air-pump. He also published "Pantometria Kircherianum," Würzburg, 1660; "Physica curiosa," Würzburg, 1662, a supplement to the "Magia universalis;" "Anatomia physico-hydrostatica fontium et fluminum," Würzburg, 1663, and a "Cursus chronologicus," which passed through several editions.

He also edited the "Itinerarium exactissimum" of Kircher and the "Amussis Ferrandinae" of Curtz.

H. M. BROCK

Schottenkloster (Scotch Monasteries), a name applied to the monastic foundations of Irish and Scotch missionaries on the European continent, particularly to the Scotch Benedictine monasteries in Germany, which in the beginning of the thirteenth century were combined into one congregation whose abbot-general was the Abbath of the monastery of St. James at Ratibon. The first Schottenkloster of which we have any knowledge was Säckingen in Baden, founded by the Irish missionary, St. Fridolin, towards the end of the fifth century. The same missionary tradition states that the first monastery of the Irish in France was Fontaine-les-Dijon. A century later St. Columbanus arrived on the continent with twelve companions and founded Annegray, Luxeuil, and Fontaine in France, Bobbio in Italy. During the seventh century the disciples of Columbanus and other Irish and Scotch missionaries founded a long list of monasteries in what is now France, Germany, Belgium, and Switzerland. The best known are: St. Gall in Switzerland, Disibodenberg in the Rhine Palatinate, St. Paul's at Besançon, Luxeuil and Cusance in the Diocese of Besançon, Besançon in the Diocese of Langres, Remiremont and Moïans in the Diocese of Toul, Possies in the Diocese of Liège, Mont-Saint-Michel at Peronne, Ebbersmunster in Lower Alsace, St. Martin at Cologne. The rule of St. Columbanus, which was originally followed in most of these monasteries, was soon superseded by that of St. Benedict. Later Irish missionaries founded Honan in Baden (about 721), Murbach in Upper Alsace (about 727), Altomünster in Upper Bavaria (about 749), while other Irish and Scotch monks restored St-Michel in Thiersche (940), Walcourt near Namur (945), and, at Cologne, the Monasteries of St. Clement (about 983), St. Martin (about 980), St. Symphorian (about 980), and St. Peter (Paris). In the twelfth century, a number of Schottenkloster, intended for Scotch and Irish monks exclusively, sprang up in Germany. About 1072, three Scotch monks, Marian, John, and Candid, took
up their abode at the little Church of Weih-St-Peter at Rattebin. Their number soon increased and a larger monastery was built for them (about 1500) by Burgrave Otto of Rattebin and his brother Engelbert. This became the mother-abbey of a series of other Schottenkloster. It founded the Abbeys of St. Jacob at Wurzburg (about 1134), St. Agudius at Nuremberg (1140), St. Jacob at Constance (1142), Our Blessed Lady at Vienna (1158), St. Niclaus at Amberg (1162), Holy Cross at Echstätt (1194), and the Priories of Kelheim (1231). These, together with the Abbey of St. Jacob at Erfurt (1036), and the Priory of Weih-St-Peter at Rattebin, formed the famous congregation of the German Schottenkloster which was erected by Innocent III in 1215, with the Abbot of St. Jacob at Rattebin as abbots-general. In the fourteenth and fifteenth centuries most of these monasteries were on the decline, partly for want of Scotch or Irish monks, partly on account of great laxity of discipline and financial difficulties. In consequence, the abbeys of Nuremberg and Vienna were withdrawn from the congregation and repeopled by German monks in 1418. The Abbey of St. Jacob Wurzburg was left without any monks after the death of Abbot Philip in 1497. It was then repeopled by German monks and in 1506 joined the congregation of Burford. In 1565, however, it was restored to the Scotch congregation and continued to be occupied by Scotch monks until its suppression in 1803. The Abbey of Constance began to decline in the first half of the fifteenth century and was suppressed in 1530. That of Memmingen also disappeared during the early period of the Protestant Reformation. The Abbey of Holy Cross at Echstätt seems to have ceased early in the fourteenth century. In consequence of the Protestant Reformation in Scotland many Scotch Benedictines left their country and took refuge in the Schottenkloster of Germany during the sixteenth century. The Scotch monasteries in Rattebin, Erfurt, and Wurzburg again began to flourish temporarily, but all endeavours to regain the monasteries of Nuremberg, Vienna, and Constance for monks of Scotch nationality were useless. In 1592 Abbot Placidus Fleming of Rattebin reorganised the Scotch congregation which now comprised the Scotch monks of Rattebin, Erfurt, and Wurzburg, the only remaining Schottenkloster in Germany. He also erected a seminary in connexion with the monastery at Rattebin. But the forced secularisation of monasteries in 1803 put an end to the Scotch abbey of Erfurt and Wurzburg, leaving St. Jacob's at Rattebin as the only surviving Schottenkloster in Germany. Though since 1827 this monastery was again permitted to accept novices, the number of its monks dwindled down to two capuchins in 1862. There being now no hope of any increase, Pius IX suppressed this last Schottenkloster in his brief of 2 September, 1862. Its revenues were distributed among the diocesan seminaries of Rattebin and the Scotch College at Rome.

M. OTT.

Schrader, Clement, Jesuit theologian, b. at Itzum, in Hanover, Nov, 1820; d. at Portiers 23 Feb., 1875. He studied at the German College at Rome (1840-48) and entered the Society of Jesus on 17 May, 1848. For a time he filled the post of prefect of studies in the German College; subsequently he lectured in the Roman College on dogmatic theology, and later on joined the theological faculty of Vienna. In 1867 he became a member of the theological commission appointed to prepare the preliminaries for the Vatican Council. On his refusal to take the oath of fidelity to the Constitution of 1867 he was, not long after the council had been prorogued, deprived of his professorship by the Austrian Government. The remainder of his life was devoted to the teaching of theology in the Catholic University of Potsdam where he succumbed to an attack of pneumonia. Schrader's thorough grasp of scholastic theology is evidenced by the many works that bear his name. Chief among these are: "De Deo Creatori"; "De Trippol Ordinatis"; "Augustine, the Man of God", dealing with various theological questions, e. g. predestination, actual grace, faith, human society; "De unitate Romana" (according to Hurter, by far his ablest work). He assisted Passaglia in several of his works, notably in the latter's monumental treatise on the Immaculata in Vatikanischen Archiven, and was also active in the conduct of a periodical published at Vienna (1864-67), and entitled "Der Papst und die modernen Ideen". The Syllabus of Pius IX is given in a German translation and a number of counter propositions added with a view to bringing out in clearer light the chief significance of the errors condemned in the Syllabus.

HURTER, Nomenclator, III, 1845; SCHRADER, Bdm. de la C. de J., VII, 912.

J. A. CAHILL.

SCHRANK (SCHRAMM), Dominik, a Benedictine theologian and canonist, b. at Bamberg, 24 October, 1722; d. in the monastery of Bens near Bamberg, 21 September, 1797. He took vows at Bens, 13 November, 1743, and, after being ordained priest, 18 August, 1748, taught at his monastery first, mathematics (1757), then canon law (1760), then philosophy (1762) and, soon after, theology. In 1782 he reluctantly accepted the position of prior in the monastery of Michelbech at Bamberg, whence he returned to Bens in 1787. His chief works are: "Compendium dogmatique dogmatis, scholasticorum et theologorum methodo scientifica propositum", 3 vols. (Augsburg, 1788; 3d edition, Turin, 1837-9); "Institutio theologiarum mysticarum", 2 vols. (Augsburg, 1774; 3d edition, Paris, 1868), his best work; Analyse operum SS. b. a. et scriptorum ecclesiastorum" 4 vols., 1794-98; "Philosophia antiqua et moderna" 4 vols., 1789; "Institutio juris ecclesiasticorum publici et privati", 3 vols. (Augsburg, 1774-5; 2d ed., 1782); "Epitome canonum ecclesiasticorum ex cancelliis Germaniae collecta" (Augsburg, 1774); and a newly-edited edition of the "Summa Conciliarum" of Carinus continued up to Pius VI, 4 vols. (Augsburg, 1778).

LINDNER, Die Schriftsteller des Benediktiner-Ordens in Bayern 1768-1890 (Ratisbon, 1890) II, 213-4; HURTER, Nomenclator Literarius, III, 346-1.

M. OTT.

SCHRANK, Franz Paulus von, naturalist, b. at Varn- bache near Scharding in the Inn, 21 August, 1747; d. at Munich, 22 December, 1835. At the age of nine he commenced his studies at the Jesuit College at Passau, and at fifteen entered the Society of Jesus. The first year of his novitiate was spent at Vienna, and the second at the college in Oedenburg, Hungary, where Father Suhu, a former missionary in Brazil, interested him in the study of nature. His higher studies were made successively at Rome, Toulouse, and Vienna. He strength having been impaired by excessive exertion during his botanical expedition, he was, in 1769, appointed instructor at the college at Lins. After the suppression of his order, he moved to Vienna where he
was ordained priest in December, 1774, and gained his doctorate of theology in 1776. Having returned to his native place, he published his first studies in natural history; "Beiträge zur Naturgeschichte" (1776). In the same year he was called to the chair of mathematics and physics at the lyceum at Amberg and afterwards to the chair of botany at Burghausen. Here he found an opportunity of studying agriculture. In 1784, he became professor of agriculture, mining, forestry, botany, and zoology at the University of Ingolstadt (later removed to Landshut). In 1809 the Munich Academy of Sciences elected him a member on the condition of his undertaking the direction of the newly-established botanical garden. To this task he devoted the rest of his life. Possessed of comprehensive knowledge and keen judgment, he was highly esteemed and received many public marks of honour and distinction.

Acting several times as rector during the years of his professorship at Ingolstadt and Landshut, he had on many occasions to defend the interests of the university during the French and Austrian occupations. Schrank's activity as a writer is really astonishing. We know of more than forty original works and about two hundred dissertations and shorter studies from his pen. His excellent descriptions of floras are distinguished by originality, clear presentation, and logical classification. The following works are especially worthy of note: "Bayerische Flora" (Munich, 1789); "Primitiae flore salisburgensis" (Frankfurt, 1792); and above all, "Flora monacensis" (Munich, 1811-1820), with four hundred coloured plates by Joh. Nepomucene Mayrhofer. Not less valuable are the fruits of his scientific travels partly undertaken under the auspices and at the expense of the Munich Academy of Sciences. Among these are to be mentioned: Fr. von Paula Schrank and R. C. Moll, "Naturhistorische Briefe über Oesterreich, Salzburg, Passau, und Bergtagegden" (Salzburg, 1785), and "Reise nach den südlichen Gebirgen von Bayern, etc., im Jahr 1788" (Munich, 1793). In these expeditions Schrank took Linnaeus's travels for the study of natural history as his model. Among his physiological works must be mentioned his study: "Von den Nebengefassern der Pflanzen und ihrem Nutzen" (Halle, 1784), in which he attributes to the hairs of plants the function of absorbing moisture; and some essays in the "Münchner Denkschriften" for 1809-1810 on the movement of infusoria, and on "Priestley's green matter", etc. His extensive correspondence, as director of the botanical garden, with all countries of Europe and the East and West Indies redounded to the benefit of this institution, which under his administration became one of the richest in Germany. To this botanical garden he dedicated a work in two folio volumes with 100 coloured plates: "Planta rariores horti academici Monacensis descriptae et iconibus illustratae" (1819). His numerous detached studies of plants of natural history may be found in "Münchner Denkschriften", "Zeitschrift der Regensburger botanischen Gesellschaft", "Hoppe's botanisches Tabebuch", etc. In the last days of his life the indefatigable veteran wrote two Scriptural works: "Eikkiop, a physico-theological explanation of the six days of creation (Augsburg, 1828, 16 pp., 8°)" and a voluminous "Commentarius literarius in Genesim" (Salzburg, 1829, 796 pp., 8°). The last effort of Schrank's works fills nine volumes in the "Bibliothèque des écrivains de la compagnie de Jésus" (1859).

Schraudolph, Johann, historical painter, b. at Oberstdorf in the Allgaeu, 1808; d. 31 May, 1870. As pupil and assistant of Heinrich Heße he painted five scenes from the life of St. Boniface in the basilica at Munich; St. Boniface preaching; his consecration as bishop; the cutting down of Thor's oak; the anointing of Pepin; and the burial of St. Boniface. In these frescoes Schraudolph justified the confidence placed in him by his master who had already tested his work in the Church of All Saints where Schraudolph had painted scenes from the history of Moses, figures of David, Saul, etc. Some of his devotional pictures became very popular: the Virgin with the Child Jesus; St. Agnes; Christ and the Friends of children; a eucharistic service, etc. His carefully-executed sketches for the life of St. Boniface were greatly admired by fellow artists. On the recommendation of Heße he received an important commission from Louis I, namely the painting of the frescoes for the cathedral of Speyer. Although he had already travelled once through Italy under the guidance of J. Ant. Förster and had made numerous copies of the old masters, yet he considered it necessary to make a new journey to Rome and Overbeck for the sake of this, the great work of his life. Unfortunately in his studies he lost most strength on grace and tenderness than upon force and depth. Consequently the lack of the two last mentioned qualities is perceptible in his frescoes for the austere and stately imperial cathedral, while correctness, harmony, and a devout spirit are unmistakably present in the large compositions. He made sure of the unity of the series by keeping his assistants (his brother Claudius, Hellwege, Andr. Mayer, etc.) in strict subordination to himself, by retaining for himself the designing of all the compositions for the cupola, the three choirs, and most of those for the nave, by drawing the most important parts and painting the most difficult pictures himself. The complete conception of all the frescoes is: the Divine plan of salvation with special reference to the Blessed Virgin and the other patron saints of the cathedral, the deacon Stephen, Pope St. Stephen, and St. Bernard. After the completion of this undertaking Schraudolph enjoyed the unchanging favour of the king, who frequently inspected the numerous oil-paintings produced in Schraudolph's studio, and at times bought them for himself or the Pinakothek.

Fuettner, Gesch. der deutschen Malerei, 1880; lesen, etc., frescoes in the cathedral of Speyer in the Deutsches Kunstblatt, no. 15 (Leipzig, 1883); Stübenhoff, Beschreibung der Münchner Hofwerke (Munich, 1878); Förster, Gesch. der Münchener Kunstanstalt (Munich, 1888).
work as a schoolmaster in order to avoid consecration. His "First Mass in F" was finished on 22 July, 1817, and performed by the Lichtenthal choir under the direction of Holzer. Competent critics have pronounced this mass as perhaps the most wonderful first work by any composer, save in the case of Beethoven's "Mass in G". Schubert conducted the second performance at the Augustinian church on 26 October, his brother, Ferdinand, presiding at the organ. During the same year he produced a symphony and a "Salve Regina" as well as some songs and instrumental pieces. His famous "Erl King" dates from November, 1815, as does his "Mass in G"; wonderful for a boy of eighteen. His compositions for 1816 include a "Salve Regina", a "Stabat Mater", a "Tantum Ergo", and a "Magnificat", as also two symphonies, and some delightful songs, including the "Wanderer". He conducted the music at high mass at the Allerheiligenfelder church on Easter Sunday, 1820, and in the same year produced an Easter cantata and an opera, Haydn's activity from 1821 to 1824 was enormous, "Rosamunde", and his "Mass in A flat" being of permanent value. His glorious "Ave Maria" dates from 1825, apropos of which he writes that at the time he was filled with devotion to the Blessed Virgin. The three Shakespearean songs of 1826 are still of interest. In 1827 he was gratified with a eulogy from the dying Beethoven, whom he visited in his last illness, and whose remains he followed to the grave. He subsequently wrote an opera, a number of songs, and the second part of the "Winterreise". Early in June, 1827, he was elected a member of the musical society of Vienna, and in 1828, produced his marvellous "Symphony in C", his "Mass in E flat", an oratorio, a hymn to the Holy Ghost, a string quartet, a "Tantum Ergo" in E flat, and a lovely "Benedictus", whose première in public was on 3 November, 1828, when he went to hear his brother's new "Requiem"; he died a fortnight later, and his obsequies were celebrated in the little Chapel of St. Joseph in Margarethen. On 21 November, the body was interred at Währing, close to the grave of Beethoven, and on 23 December his solemn month's mind was celebrated in the Augustinian Church, when a "Requiem" by Hüttenbrenner was performed. The corpse was re-interred in the central cemetery, Vienna, on 23 September, 1888. Schubert produced a phenomenal amount of music, his songs alone numbering about six hundred and three. His compositions came into prominence owing to their advocacy by Liszt, Schumann, and Mendelssohn, but he was in advance of his time and it was not until thirty years after his death that his wonderful genius was fully appreciated. Essaying all forms of composition, he was successful in all, and he may be regarded as second only to Beethoven and Mozart. In particular, his unfinished symphony, his "Rosamunde" Entr'acte, his "Mass in E flat", and about a dozen of his songs are immortal masterpieces.

Schwann, Theodor, German physiologist and founder of the theory of the cellular structure of animal organisms; b. at Neuses, 7 December, 1810; d. at Cologne, 11 January, 1882. He studied medicine at Bonn. His last years were spent in the celebrated physician John Müller and also at Würzburg, and at Berlin where he obtained his degree in 1834. His dissertation for the doctorate on the breathing of the embryo of the hen in the egg, "De necessitate eris atmosphæricæ ad evolutionem pulli in ovo incubato," attracted the attention of the medical world. After graduation he acted as assistant in the anatomical museum at Berlin; in 1839 he became professor of anatomy at the Catholic University of Louvain; in 1848 professor of physiology and comparative anatomy at Liège and in 1880 retired from teaching. Schwann proved that animal cells are in morphological and physiological accordance with those of plants, and that all animal tissues proceed fairly from cells and are partly composed of them. He established this theory in his chief work: "Mikroskopische Untersuchungen über die Übereinstimmung in der Struktur und dem Wachstum der Thiere und Pflanzen" (Berlin, 1839). Before this John Purkinje (1787-1869) had pointed out the analogy between the nuclei of the animal cell and of the plant cell, still Schwann deserves the credit of having developed and established this theory. Kölliker's cellular physiology and Virchow's cellular pathology are based on Schwann's theory. Schwann

Schwann, Joseph, a theological writer, b. at Dorsten, in Westphalia, 2 April, 1824; d. at Münster, 6 June, 1892. After receiving his early education at Dorsten and Recklinghausen, he studied philosophy and theology at Münster (1843-7), and upon his ordination to the priesthood, 29 May, 1847, continued his studies for two years at the universities of Bonn and Tübingen. Hereupon he became director of the von Galen institute at Münster under the direction of Bade, upon whose advice in 1868 he was appointed professor-in-ordinary of moral theology, history of dogmatics, and symbolism, at the same time being lecturer in dogmatics from 1850 to 1853. In 1869 he succeeded Berlage, whom he succeeded as professor of dogmatic theology in 1881. Leo XIII honoured him with the title of domestic prelate in 1890. His chief work is "Dogmengeschichte", the pioneer Catholic work of its kind, covering the entire history of dogmatics (4 vols., I, Münster, 1862; 2nd ed., Freiburg, 1892; II, Münster, 1869; 2nd ed., Freiburg, 1885; III, Freiburg, 1882; IV, Freiburg, 1890). His larger works in the field of moral theology are: "Die theologische Lehre über die Verträge mit Berücksichtigung der Civilgesetze, besonders der preussischen, allgemein deutschen und französischen" (Münster, 1873, 2nd ed., 1872); "Die Gerechtigkeit und die damit verwandten sittlichen Tugenden und Pflichten des gesellschaftlichen Lebens" (Freiburg, 1873); "Spezielle Moraltheologie" (Freiburg, 1878-1885). Smaller works are: "Das göttliche Vorherwissen und seine neuesten Gegner" (Münster, 1855); "De controversia, qua de valesi baptismi hierarchorum inter S. Stephani Papam et S. Cypriam agitata sit, commentatio historicog-dogmatica" (Münster, 1860); "De operibus supererogatorios et consilii evangelici in genera" (Münster, 1868); "Die euchristische Opferhandlung" (Freiburg, 1869); "Über die scientia media und ihre Verwendung für die Lehre von der Gnade und Freiheit" in "Tübingen theol. Quartalschrift", XXXII (1850), 394-459, and numerous other contributions to theological magazines.

W. H. Grattan-Flood.
also discovered the cells of the nails and feathers, what are called the Tomes fibres of the teeth, the nuclei of the smooth and striped muscle-fibres, and the envelope of the nerve-fibres (Schwann's envelope). Moreover, in 1836 he discovered that peptin was the substance that produced albuminous digestion in the stomach; in 1844 he produced the first artificial gastric fistula, and called attention to the importance of the gut in digestion. He discovered the spore-like nature of yeast at the same time as Cagniard Laboul, although independently of the latter, and proved that the Yeast-cells take the material necessary for reproduction and development from the substance capable of fermentation. In a separate treatise he proved the weakness of the theory of spontaneous generation. Besides the works already mentioned Schwann wrote a number of papers for medical journals and for the reports of the Belgian Academy. Biographisches Lexikon der hervorragenden Ärzte, V, 315; Berliner klinische Wochenschrift (1862), 68, neurology.

LEOPOLD SENFELDER.

Schwanzthaler, Ludwig von, founder of the modern Romantic school of sculpture, b. at Munich in 1802; d. there, 1848. He received a thorough classical education but even as a boy was fond of modelling in wax; then, led by patriotism, he took to the painting of battle scenes and with Pocci he drew up the scheme of a procession of Romantic knights proceeding to a tournament. King Maximilian I commissioned him to design mythological reliefs for an erpeng, which was never wholly carried out and was later melted down. A few wax models that have been preserved are very fine. Schwanzthaler made a great many reliefs, taken from the stories of the Greek gods and heroes, for the salons of the Glyptothek at Munich. Before they were actually executed he visited Thorwaldsen at Rome. At a later date he spent a considerable length of time at Rome, where he was honoured by a large number of commissions from King Louis I of Bavaria. He prepared the models of the twenty-five statues of artists of the Pinkakothek and made the drawings for the Greek poets intended for the new palace. He modelled a "Triumphal Procession of Bacchus" on a frieze 143 feet long for the palace of Duke Maximilian. This was followed by the large reliefs at Ratisbon for the princes of Thurn and Taxis. He carried out in a free manner one of Rauch's designs, the victorious "Germania", on one of the pediments of the Walhalla near Ratisbon. A design of his own, the "Battle of Arminius", is executed on the other pediment. Entirely his own composition also is the "Bavaria" as protectress of the arts on the pediment of the exhibition hall. The colossal statue of Bavaria, 62 feet high, above the Hall of Fame at Munich greatly added to his reputation. He constantly received commissions from near and far for monuments in honour of rulers, generals, and artists. The impatience of those who gave him commissions, especially the insistence on haste of King Louis and of the architect Kienze, led Schwanzthaler into the error of overproduction and perfumecness. On the other hand he exhibited an astonishing inventive faculty which seemed never to repeat itself, which showed freshness and animation in the presentation, and a grasp of monumental size and classic beauty in the general conception of works that usually were arranged in cycles. It must be acknowledged that the execution of the details was frequently faulty. He exhibited great skill in the treatment of medieval and modern dress. Consequent to his natural inclination he was constantly obliged to treat antique subjects, but he brought to his task a classically-trained mind and taste.

LOHR, Gesch. der Plastik (Leipzig, 1871), II, a carefully-concise Judgment; FASCER, Gesch. der Münchener Kunst (Munich, 1888); von Reker, Gesch. der neueren Kunst, II (1864).

G. GIEPMANN.

Schwartz, Peter George. See Nigir, Peter George.

Schwartz (Schwartz), Berthold, a German friar, reputed the inventor of gunpowder and firearms. There has been much difference of opinion regarding the bearer of this name and his share in the discovery attributed to him. He was a Franciscan, and is said to have been born in Freiburg in the first half of the thirteenth century. He took the name of Berthold in religion, to which was appended the adjective Schwarz (black), either on account of the colour of his habit or because he was looked on as being addicted to the black art. It was in the course of his studies in alchemy that he discovered the explosive properties of gunpowder which he applied to firearms. A monument was erected to him in his birthplace in 1853. The history of the invention of gunpowder is wrapped in obscurity, and the Chinese and Arabs are said to have been familiar with burning mixtures, and as early as A.D. 660 Greek fire was brought to Constantinople. Roger Bacon (1246–94) mentions the explosive properties of saltpetre mixtures in his "De secretis operibus artis et nature", c. 6, though he does not lay claim to the discovery. The first to attribute it and its subsequent application to the friar of Freiburg seems to have been Felix Hemmeln (1389–1464) of Zurich in his "De nobilitate et rusticate dialogus" (c. 1450). He states somewhat vaguely that the discovery was made within 200 years of the time of his writing. This would apparently make Berthold a contemporary of Bacon. Many later writers, however, place him in the fourteenth century, and while some give 1354, the date inscribed upon his monument, as the time of his discovery, others simply give him credit for the invention of firearms and notably of brass cannon. For a critical study of the question cf. Hansjacob, who concludes that Berthold lived in the thirteenth century, and suggests the possibility of Bacon having learned the discovery from him. While it is perhaps impossible to determine with certainty whether he was the first to make the discovery of gunpowder, it is commonly admitted that the invention of firearms is due to him.

HANSJACOB, Der Schwaerte Berthold, Der Bruder des Schuistors u. der Feuerwaen (Freiburg, 1891).

HENRY M. BROCK.
Schwarzburg, two small principalities of Central Germany, Schwarzburg-Rudolstadt and Schwarzburg-Sondershausen, which, however, have been connected by personal union since 1908. The State of Schwarzburg-Sondershausen has an area of 363 square miles, and in 1910 had 100,712 inhabitants. The territory of the state consists of two non-contiguous districts, the Upper Barony in Thuringia and the Lower Barony south of the Harz Mountains. The Upper Barony (capital, Rudolstadt) has an area of 160 square miles, and the Lower Barony (capital, Frankenhausen) an area of 83 square miles. The Upper Barony includes the exclave of Leutengberg lying to the east. As regards religion, in 1905, of 96,535 inhabitants 95,641 were Lutherans, 994 Catholics, and 82 Jews. Consequently the Catholics number only one per cent of the population; in 1871 they numbered only one-tenth per cent. The principality of Schwarzburg-Sondershausen has an area of about 333 square miles, and in 1910 had 89,984 inhabitants. The territory of this state also consists of two main districts called the Lower Barony situated south of the Harz, and the Upper Barony in Thuringia south of the Prussian city of Erfurt. The Lower Barony (capital, Sondershausen) is in area about 200 square miles, while the Upper Barony (capital, Arnstadt) has an area of about 132 square miles. In 1905 of the 85,102 inhabitants of Schwarzburg-Sondershausen 83,535, or 98 per cent, were Lutherans, 825 Catholics, and 195 Jews. The Catholics, therefore, number nearly two per cent of the population; in 1871 they were only three-tenths per cent.

The Schwarzburg principalities are a part of the region occupied by the old tribe of the Thuringians, who in the sixth century succumbed to the united attack of the German tribes of the Franks and Saxons. In the ninth and tenth centuries several counts became independent rulers in different parts of the Thuringian territory. Among these were the counts of Keverenberg (Käfernburg), from whom sprang the princely house of Schwarzburg, which takes its name from a castle on the small Thuringian river called Schwarza. Gundar (Günter), a son of the Frankish king Lothair IV, is regarded as the founder of the family. The first count mentioned in a document is Sisao III (1009-60). In the course of time several lines of the ruling house of Schwarzburg arose, and the senior and cadet lines of Blankenburg. In 1548 Günther XL, who was also called Günther with the Heavy Jaw, again united all the lands of Schwarzburg under his rule. The territories were again divided by various partitions and treaties, and finally two domains and lines of Schwarzburg-Rudolstadt and Schwarzburg-Arnstadt (or Schwarzburg-Sondershausen). In 1710 Emperor Joseph I raised Louis Frederick I of Schwarzburg-Rudolstadt to the rank of a hereditary prince of the empire. In 1718 this princely title was abolished, and in 1822 the title of succession was made with Schwarzburg-Sondershausen. In 1807 Louis Frederick II joined the Confederation of the Rhine; in 1815 Prince Frederick Günther joined the German Confederation. In the war of 1866 between Prussia and Austria the government voted against the Austrian proposal for the mobilisation of the forces of the confederation against Prussia. Ruler and people joined the North German Confederation. Since 1871 the principality has been one of the confederated states of the German Empire. Prince Günther Victor (b. 1852) has been the ruler since 1859. In Schwarzburg-Arnstadt the sons of Christian Günther I founded, without prejudice to the unity of the original territory, three lines, those of Sondershausen, Arnstadt, and Ebeleben. However, the latter two lines became extinct (Arnstadt in 1869, and Ebeleben in 1881). After the death of Anthony Günther I of the Sondershausen line his two sons divided the government between them and founded the lines of Sondershausen and Arnstadt. In 1897 Prince Frederick Eduard of Schwarzburg-Sondershausen became a prince of the empire, and his territory declared an independent principality of the empire; the same rank and independence of territory was conferred upon the ruler of Schwarzburg-Arnstadt in 1709. Before this they had been under the suzerainty of the Prince-elector of Saxony, who owned the Arnstadt territory. Schwarzburg-Arnstadt became extinct in 1716. The Prince of Schwarzburg-Sondershausen became the sole ruler of the territory, which took the name of Schwarzburg-Sondershausen. The law of primogeniture had been introduced in Sondershausen in 1713, and a treaty of succession had been made with Rudolstadt. In 1806 Prince Günther Frederick Charles secretly supported Prussia in the war between Prussia and France. Napoleon, on this account, sent a French army into the territory of Schwarzburg, which plundered and devastated the country. In 1807 the prince joined the Confederation of the Rhine, and in 1815 entered the German Confederation. In 1866, in the war between Prussia and Austria, both prince and people were opposed to the mobilisation of the forces of the confederation against Prussia. They declared themselves on the side of Prussia, and the county joined the North German Confederation. In 1871 the principality together with the other confederated states of the German Empire. With the death of Prince Charles Günther in 1909 the Sondershausen line became extinct. In virtue of the treaty of succession of 1713 the sovereignty went to Prince Günther Victor of Schwarzburg-Rudolstadt, who since then has called himself Prince of Schwarzburg. The two principalities have not at the present time lost their constitutional independence by this personal union; however, a closer union of the two states is frequently urged. The marriage of Prince Günther Victor of Schwarzburg being without issue, Prince Sisao of Leutenberg has been recognised as a member of the ruling house of equal rank, and was made Prince of Schwarzburg in 1896. Prince Sisao is the son of Prince Frederick Günther, who died in 1867, by his morganatic marriage with the Countess von Reina, and the sovereignty of both states devolved upon him when Prince Günther Victor died.

Before the great religious schism of the sixteenth century the Schwarzburg domains belonged, in ecclesiastical matters, to the Archdiocese of Mainz. The permanent representative of the archbishop in Thuringia was an Augustinian Hermit. In 1525 the territories of Schwarzburg and Arnstadt were converted to the Reformation. The Reformation found early entrance into Schwarzburg. In the Upper Barony it was definitively introduced by Count Henry HXXII (1531-38), who was called the "Reformer". At his death the Upper Barony fell to Count Günther XL (1538-52). At first under different prelates, and in 1552 by the Count, the house of Schwarzburg was secularised. Venerable architectural monuments still give proof of the flourishing conditions of Catholic life in the era. Although a large number of Catholic edifices were destroyed during the Peasants' War in 1525. Celebrated memorials of this period are the ruins of the Benedictine Abbey of Paulinam (intended both for
Schwarzenberg, FRIEDRICH, PRINCE OF, cardinal and Prince-Archbishop of Prague, b. at Vienna, April 1809; d. at Prague, March 1883. On the death of Prince Joseph John Schwarzenberg and his spouse Pauline (née Princess Arenberg), he was baptized in his father’s palace in Vienna. When Napoleon advanced upon Vienna, the mother fled with her one-month-old child to Krummau in Bohemia. In the summer of the following year she accompanied her husband and eldest daughter to Paris to be present at the marriage festivities of Napoleon and Archduchess Marie-Louise. During the celebration she and her daughter were burned to death; a golden necklace, on which were engraved the names of her ten children (including that of Friedrich), alone made it possible to identify the charred mass as her remains. Her sister-in-law Eleanor henceforth acted as mother to the children and was always called by Frits his “Engelstenta.” When he was five years old, Frits was placed under the care of the learned and able Father Lorenz Greiff, who left the secondary school course in the Schotten gymnasium, he applied himself to juridical studies with great success. Reluctantly he now revealed to his father his desire to consecrate his life to the service of God in the priesthood, as this was for him the surest way to heaven. The father gave his consent with some hesitation.

Frits began his theological studies at Saksburg, where his numerous relatives in Vienna would prove too great a distraction. Archbishop Gruber was his spiritual father, and one cannot perceive their correspondence without emotion. Able professors, among whom Joseph Ődmar von Rieger, were, under the enthusiastic guidance of the young student. Frits was to make his last year’s theology at Vienna, where he to reside in the clerical seminary. The rector, Franz Zennner, a strict disciplinarian, acted almost harshly towards Schwarzenberg. Besides the university lectures he received private lessons in philosophy from Günther, who later exercised a constant guiding influence over his pupil. On entering the clerical state, Friedrich had promised his father to accept none of the higher orders before his twenty-fourth year. On the completion of his theological studies, the question arose of how the remaining two years were to be passed. Friedrich was seised with a desire to travel, which his father was anxious to gratify. However, Bishop Gruber insisted that he must study for the doctorate, while Zennner demanded that the candidate for the doctorship must continue
to reside in the seminary. Schwarzenberg's refusal to comply was followed by a breach which the young man, however, endeavoured to remedy. He successfully passed the examinations for the doctorate. Finally, in 1833, he was ordained by Gruber. The young priest was appointed curate in the cathedral parish; he derived great satisfaction from the performance of his pastoral duties. But clouds now threatened him; he had to hurry to his dying father, to whom he administered the last sacraments. In June, 1835, the fatherly archbishop died in Friedrich's arms, after receiving extreme unction from him.

On 23 September, 1835, the metropolitan chapter requested that Schwarzenberg be made archbishop, though he was not yet thirty years old, and they needed a papal dispensation. Anxious and sore of heart, he accepted the staff of St. Rupert with courage and determination. In the archdiocese the Protestant people of the Zillertal were the chief cause of trouble; they remained there, notwithstanding every effort to induce them to withdraw and in spite of the patent of emigration of Archbishop Firmian (1731). An imperial resolution of 1837 ordered their return to the national Church or their emigration. Schwarzenberg was greatly pained to see hundreds of those Zillertaler leave their native land and that nothing untiring to induce them by affectionate persuasion at least to leave their children behind, promising to educate and support them; but in vain.

Among the institutions founded or favored by the cardinal, the Musaeum, the Cathedral Musical Society, the Art Society, the girls' seminary (Borromäum), the convent of the Sisters of Mercy of St. Vincent de Paul at Schwarzenbach for the nursing of the sick and the education of the young. The foundation at Schwarzenbach bore magnificent fruit, but impoverished him. It was only fitting that a marble memorial of him was erected there in 1910.

On 29 March, 1848, he issued an exhortation to the clergy, urging them to correct the mistaken views and unfounded anxieties of their flock, to keep the pulpit free from political declarations and allusions, and to cultivate good feelings with the secular authorities. Schwarzenberg was no friend of politics, even church politics. However, for more than forty years he was the leading churchman in Austria, and during those years arose a host of new institutions, tendencies, and conditions, profoundly affecting Church and State in the Hapsburg empire. These conditions entailed a huge amount of work for him. Although the Council of Trent had commanded provincial councils to be held every three years, the custom had fallen into disuse. In Salzburg the last provincial synod had been held in 1573. 8 and Schwarzenberg, after so long an intermission, convened a synod which sat from 31 August to 12 September, 1848. In the address to the imperial parliament, the synod laid down what the Catholic Church must needs demand from the civil power in order to secure the liberty and independence which rightfully belonged to her, and which could not be denied her without inconsistency and injustice in view of the free development of civil rights. The bishops at this synod assured the cardinal, subjecting some fundamental principles of state education to severe criticism.

Of fundamental importance for the Church in Austria was the meeting of bishops at Vienna in 1849. The Reichstag which sat at Kremsier in February deemed the relations of Church and State in a very unfriendly spirit. However, the cardinal's brother, Felix, was already prime minister, and by the appointment of Rauscher, the archbishop's teacher, as Bishop of Sekkau, Schwarzenberg greatly strengthened the influence of the bishops. The cardinal succeeded without much difficulty in convening the bishops of Austria; the bishops of Puglia and Lombardo-Venetian territory, in which peace had not yet been restored, were not invited. On 29 April twenty-nine bishops and four episcopal proxies met in the palace of the prince-archbishop, and between this date and 20 June held sixty sessions. The cardinal conducted the sessions with the greatest tact. Among the theologians were Kutscher and Fessler. The assembly laid the results of their deliberations before the Government in seven memorials: on marriage; on the religious, school, and educational funds; on benefices and church property; on education, on ecclesiastical jurisdiction, and on ecclesiastical territory; on religious services; on monasticism; on ecclesiastical jurisdiction. In the decrees, which include 207 paragraphs, the bishops lay down "a common line of action for their future aims and action". This first assembly of the bishops of Austria laid the foundation for the revival of the Church in Austria; it marks the beginning of an Austrian episcopate, whereas before there had been only individual bishops. To urge the carrying out of the memorials, and to represent the bishops permanently, a standing committee of five was appointed under the presidency of the cardinal. It existed until the Sixties.

About this time the cardinal was named Archbishop of Prague. In spite of his earnest protests both at Rome and at Vienna, the appointment was confirmed, and the cardinal made his solemn entry into Prague on 15 August, 1850. He had not yet familiarised himself with his new duties when Pius IX ordered him and the Prince of Gran to undertake the visitation of all monasteries in Austria which were not subject to the superior-general of an order; these monasteries were 380 in number. He had no share in the settling of the concordat, but did his utmost to carry it out. For this object a meeting of the bishops was held at Vienna from 21 April to 17 June, 1856. Sixty-six prelates—German, Hungarian, Italian, and Slav—were present, representing the Latin, Greek, and Armenian Rites. Memorials were again addressed to the Government concerning the schools, marriage, ecclesiastical property, the filling of vacant benefices, monasteries and the right of patronage. The Primate of Prague thereupon organised an ecclesiastical matrimonial court, held a provincial and two diocesan councils, and promoted the sciences, the growth of the orders, the societies, and the arts. That the concordat was carelessly executed is false. As his adviser in questions of canon law the cardinal chose Professor Friedrich von Schulte, likewise appointing him, although he was a layman, counsel of the spiritual matrimonial court in all three instances and titular consistorial counsel. Schwarzenberg showed himself a zealous friend of his teacher, Günther von Schönbergs, and his repeated intercession at Rome to prevent the condemnation of his writings. The first serious delay in the execution of the provisions of the concordat occurred when the administration of church property, benefices, and foundations were to be turned over to church officials. The cardinal thought that the question of the manner

Schwarzenberg may be mentioned: the Musaeum, the Cathedral Musical Society, the Art Society, the boys' seminary (Borromäum), the convent of the Sisters of Mercy of St. Vincent de Paul at Schwarzenbach for the nursing of the sick and the education of the young. The foundation at Schwarzenbach bore magnificent fruit, but impoverished him. It was only fitting that a marble memorial of him was erected there in 1910.
of transfer had been agreed upon, and furnished printed instructions on the administration of property to the church officials and to the patrons. The minister of state, Schmerling, stopped the transfer of the church property, and so the property was not transferred. With his three suffragans, Schwarzenberg protested to the emperor, the minister of state, and the governor (19 March, 1832). However, the only effect of this protest was the assertion of principle.

The year 1836, so unfortunate in the history of Austria, was especially unfortunate for Schwarzenberg. On 25 May, while on his tour of visitation, he fell ill of smallpox. The German war seemed already unavoidable, and, when the manifesto of 15 June announced its outbreak, the cardinal, who regarded it as his duty to remain at Prague, ordered public prayers for the reconciliation of the Church and the nation. The consequences of the misfortune on the Bohemian fields of battle was the change in the relations between Church and State. On 25 May, 1838, the decrees of the Reichstag concerning marriage, schools, and interconfessional relations were confirmed by the papal nuncio; Pius IX then condemned the decrees; the bishops had on 3 June issued a general instruction to the clergy, and on 24 June issued a collective pastoral. Both these last-mentioned decrees were condemned by the imperial courts as breaches of the public peace and confiscated. It was expected that the legal protest pending against Bishop Rudiger of Lissa would be extended to the bishops of Bohemia. In February, 1839, Schwarzenberg received the following instruction from the Holy See: "If the bishops or ecclesiastics are summoned before lay judges, let them in every possible case plead their causes through an attorney, and never any person to condenm them on their own accord before such judges." The cardinal regretted this, since he hoped that his ill-treatment might awaken many slumbering Catholics. The conflict about the concordat was not yet over, and a new conflict was threatening which in the name of freedom endangered the liberties of the Church, when Pius IX convened the Council of the Vatican (3 December, 1869–18 July, 1870). On the question of the infallibility of the pope, Schwarzenberg supported the minority.

The vote left by the annulment of the concordat, Stetteldorf in 1874 sought to fill up by four new interconfessional laws, dealing with the regulation of the external legal relations of the Catholic Church, the taxes providing for the so-called Religionsspond, the legal relations of the monasteries, and the recognition of new religious corporations. During the deliberations of the Portuguese bishops and finally of the so-called reformers, and was subsequently instrumental in spreading it throughout Silesia. Irreconcilable differences having revealed themselves between his views and the opinions of Luther, he removed in 1539 from Silesia to Strasburg. With his banishment from this city in 1539, he passed a period of forced changes of residence which marked the later part of his life. His wanderings were due to persecution exercised against him, mainly by Lutheran preachers who condemned his writings in a meeting held at Schmalkalden in 1540. The followers of the Schwenckfeldian teaching never ceased to emphasise that the property, had not yet passed. As soon as Schwarzenberg heard that the monastery law was to be discussed in the House of Peers in the middle of January, 1876, he convened a meeting of the bishops of the House of Peers; the eight bishops assembled in the Schwarzenberg palace. To the deliberations were also admitted Abbot Helferstorfer, Leo Thun, and His Excellency Falkenhayn. The result of the meeting was the "Declaration" signed by all the Austrian bishops that entreat the certain hope that a law of such content and so harmful in its effects shall never be passed. Shortly after the Hoffman law was passed, they made the solemn declaration: such laws shall not be enacted and protest against the imputation that the Church could ever tolerate and ratify a religious order whose vocation and activity would merit the mistrustful and suspicious regulations expressed in the draft of the law. The bill was passed, but did not receive the sanction of the emperor. In 1882 the division of the University of Karl Ferdinand into a German and a Czechia was effected, but Cardinal Schwarzenberg would not agree to the division of the theological faculty, holding that it was the vocation of the priest to work for the reconciliation and union of the various races in Bohemia. After his death this separation could not be prevented.

Among the many institutions, etc., introduced by Schwarzenberg we may mention: the priestly exercises, pastoral conferences, provincial synods (two), diocesan synods, the hereditary of St. Adalbert for the support of poor priests, diocesan relief funds; establishments of the Jesuits, Redemptorists, Notre-Dame, Grey Sisters, Sisters of St. Borromeus, and Sisters of St. Vincent; popular missions; the Forty Hours' Adoration; the canonization of St. Agnes of Bohemia; the jubilee of Methodius; the jubilee of the Diocese of Prague; the papal jubilees; the Katholikumverein; the Bonifaciusverein; the Confessorverein of St. Michael; the Prokopius fund for the publication of good books; perpetual adoration; vestment societies; the cathedral building society. At the first episcopal meeting in Austria and at all the succeeding conferences, Schwarzenberg had always presided. At the meeting of 1848 he accepted the presidency, as president, but reserved the right of joining in the debates. At the eighth session the cardinal was unable to appear on account of ill-health; on the next day Schwarzenberg again presided, although very feeble, but hurried from this session to what was destined to be his deathbed. His remains lie in the cathedral at Prague.

In 1521 he became a close adherent of the new faith, especially of the so-called reformers, and was subsequently instrumental in spreading it throughout Silesia. Irreconcilable differences having revealed themselves between his views and the opinions of Luther, he removed in 1539 from Silesia to Strasburg. With his banishment from this city in 1539, he passed a period of forced changes of residence which marked the later part of his life. His wanderings were due to persecution exercised against him, mainly by Lutheran preachers who condemned his writings in a meeting held at Schmalkalden in 1540. The followers of the Schwenckfeldian teaching never ceased to emphasise that the
as useless; it is considered legitimate for adults, but unnecessary. The presence of Jesus Christ in the Eucharist is denied. The sacramental words “This is My Body; this is My Blood” mean “My Body is this (bread); My Blood is this (wine)” — i.e., as bread and wine nourish and strengthen the body, so the Body and Blood of Christ are spiritual food and drink for the soul. Two distinct natures are indeed admitted in the incarnate Christ; but the human element in Him is said to be essentially different from the nature of an ordinary man. It was derived from the very beginning from the Divine substance, and was deified by the sufferings, death, and Resurrection of the Saviour.

The numerous works of Schwenckfeld have only incompletely been published. A critical edition is in course of publication under the direction of Hartmann, Schützer, and Johnson: Corpus Schwenckfeldianorum, I (Leipzig, 1907); Kadelbach, Ausführliche Gesch. Schwenckfeld's, i. der Schwenckfelder (Leipzig, 1881); Knebel, The Schwenckfelders in Pennsylvania (Laconia, 1864); Loewenherz, Schwenckfeld's Participation in the Eucharistic Controversy of the 16th Century (Philadelphia, 1900).

N. A. WEBER.

Schwind, Moritz von, b. at Vienna, 1804; d. at Munich, 1871. A painter possessing an inexhaustible wealth of ideas, specially gifted for incisive individualization, and perfectly familiar with the entire range of tones and the power of expression by chiaroscuro, and painter of small details, understanding how to make small pictures harmonious both in colour and composition. He was by nature inclined to the Romantic school of thought and feeling, and this tendency much developed in the studio of Ludwig Schnorr von Carolsfeld, was still more so by his Catholic education. After a journey to Rome, the painting of frescoes at Carlshurte, and a short stay at Frankfort, he emigrated in 1847 to Munich where Cornelius gained great influence over him. The spirit of his art is that of the minnesingers, of Eichendorff, and of Bretano. The material upon which he worked was nature and life, especially child-life, lyrically and poetically conceived, drawing and painting in water-colours being the mediums in which he best expressed his thoughts. Among his fellow artists Richter and Steineck stand probably in the closest relation to him. He set a high value on religious painting, and though he thought it less suited to his talents, he did not neglect it altogether. In the castle on the Wartburg he painted fine frescoes of the works of mercy and the life of St. Elizabeth, which recall the early Renaissance; he also painted there the history of the Thuringian rulers and the Stämperkrieg. The work for the altar of the Church of Our Lady at Munich is splendid in tone and the coloured cartoons for painted windows which were execuited in Nuremberg and London are also greatly esteemed. At Carlsruhe he adorned the academy of art with entertaining frescoes characterizing art. The easel-picture “Ritter Kurts Search for a Wife” had gained the commission for him, for the delightful humour of his popular creations is not spoiled by flippancy. Other excellent easel-pictures are in the Schack gallery at Munich. In his oil-paintings, however, the harmonious combination of the parts with the whole and of the colour with the drawing are often lacking. In the frescoes the professional water-colour painter is evident. As a water-colour painter he attained his greatest triumphs in the cyclas of the Seven Ravens, and in that of the legend of Melusine.

G. GERTMANN.

Science and the Church.—The words “science” and “Church” are here understood in the following sense: Science is not taken in the restricted meaning of natural sciences, but in the general one given to the word by Aristotle and St. Thomas Aquinas. Aristotle defines science as a sure and evident knowledge obtained from demonstrations. This is identical with St. Thomas’s definition of community of knowledge of things from their causes. In this sense science comprises the entire curriculum of university studies. Church, in connexion with science, theoretically means any Church that claims authority in matters of doctrine and teaching; practically, however, only the Catholic Church, and there too merely on account of her universality and her claim of power to exercise this authority. The relation between the two is here treated under the two heads Science and Church.

Synopsis.—A. SCIENCE. I. Points of Contact between Science and Faith. (1) Philosophy; (2) History; (3) Law; (4) Medicine; (5) Sciences. II. Legitimate Freedom: (1) Research and teaching; (2) Limitations (logical, physical, ethical). III. Unforeseen Freedom: (1) Does not exist; (2) Licences; (3) Consequences (Atheism, Subjectivism, Anarchism). E. CHURCH. I. Opposite Views: (1) Leo XIII; (2) Vichow; (3) History. II. The teaching body and the ecclesia discessa: (1) Distinction; (2) Premises of faith; (3) Contents of faith; (4) Dangers against faith. III. The holders of the teaching office: (1) Infallible magisterium; (2) Other tribunals; (3) Galilei. IV. Science of Faith: (1) Factual case; (2) Theology; (3) Agreement. IV. Objections (metaphysical doubt). V. Conlicts: (1) Faith no obstacle; (2) Dignity of science; (3) Historical testimony; (4) Vatican Council. A. SCIENCE. Science is considered from three points of view: contact with faith, legitimate freedom, unlimited freedom.

I. Points of Contact between Science and Faith.—These are mainly confined to philosophical and historical sciences. They do not occur in theology, as it is the very science of faith itself. The points of contact of the various sciences with faith may be grouped as follows:—(1) In the philosophical sciences—real existence of God and His intimate, personal, personality, eternity, infinity; God, the final end of man and of all created things; freedom of the human will, the natural law. (2) In the historical and linguistic sciences—historical unity of the human race and of the original language; the history of the Patriarchs, of the Israelites, and of their Messianic belief; the history of Christ and His Church; the authenticity of the Sacred Books; the history of dogmas, of schisms, of heresies, of hagiography. (3) In the science of ethics and law—the origin of right and duty (the realistic Positivism of Comte and the subjective Positivism of John Stuart Mill); the authority of the sacred documents (Rousseau’s “Contrat social” and Kant’s “Critique of Pure Reason”); the matrimonial contract, its unity and permanency; the natural rights and duties of parents and children; personal property; freedom of religion (separation of religion and state, toleration).
as the case is thus put theoretically, there is no difference of opinion. Yet in practice, it is almost hopeless to reconcile conflicting sentiments. When, in 1901, a vacant chair at the University of Strasbourg was to be filled by a Catholic historian,成员国 published a protest, in which he exclaimed: "A sense of degradation is pervading German university circles". On that occasion he coined the shibboleth "voraussetzunglos", and claimed that scientific research must be "without presuppositions". The same cry was raised by Harnack (1895) when he demanded "unfettered freedom for every Christian historian". The demand was formulated a little more precisely by the congress of academicians in Jena (1908). Their claim for science was "freedom from every view foreign to scientific methods".

In the latter formula the claim has a legitimate meaning, viz., that unscientific views should not influence the results of science. In the meaning of Mommsen and Harnack, however, the claim is illogical in a double sense. First, there can be no "science without presuppositions". Every scientist must accept certain truths dictated by sound reason, among which the truth of his own existence and that of the human mind. In this field there is more freedom than has ever been claimed. Compared to its field, the progress of science appears small, so much so, that the greatest progress seems to consist in the knowledge of how little we know. This was the conclusion arrived at by Socrates, Newton, Humboldt, and so many others. The very important lesson is this: the deeper the microscope descends into the secrets of nature and the higher the telescopic power reaches into the heavens, the vaster appears the ocean of undiscovered truths. This ought to be kept in mind, when the progress of science is loudly proclaimed. There has never been a general progress of all sciences; it was always progress in some branches, often at the cost of others. In our own days natural, medical, and historical sciences advance rapidly in comparison with past ages; at the same time the philosophical sciences fall as rapidly behind the early ages. The science of law is especially subject to this fate. The rise of the theological sciences reached their height in the early part of the Middle Ages, others towards the beginning of the seventeenth century. (b) By teaching is here understood every diffusion of knowledge, by word or print, in school or museum, in public or private. Progress and the freedom necessary for it are as much to be desired in teaching as in research.

There is a doctrinal freedom, a pedagogical freedom, and a professional freedom. Doctrinal freedom regards the doctrine itself which is taught; pedagogical freedom, the manner in which science is diffused among scholars, general public, and the public of the persons who do the teaching. Science claims freedom of teaching in all these respects.

(2) It has to be seen whether there are limitations to research and teaching and what these limitations are. All things in this world may be considered from a triple point of view: from the logical, the physical, and the ethical. Applied to science we discover limitations in all three. (a) Logically science is limited by truth, which belongs to its very essence. Knowledge of things cannot be had from their causes, unless the knowledge be true. False knowledge cannot be derived from the causes of things; it has its origin in sources beyond human capacity. Scientists may choose between truth and freedom (a choice not at all imaginary), it must under all circumstances decide for truth, under penalty of self-annihilation. As long
ner of truths, such as the existence of God, the possibility of miracles, and others. In fact, one science borrows its presuppositions from the results of other sciences, a division of labour which is necessitated by the limitations of everything human. Hence, the cry for "science without presuppositions" is doubly illogical, unless by presupposition is meant an hypothesis that can be proved to be false or foreign to the particular problem in question. The freedom of science therefore has its limitations from the point of view of logic.

(b) From the physical point of view science requires material means. Buildings, endowments, and libraries are necessary to all branches of science, in research as well as in teaching. Sciences require extraordinary means, such as laboratories, museums, and instruments. Material requirements have always imposed limitations upon scientific research and teaching. On the other hand, the appeals of science for freedom from the burden have been generously answered. Between the twelfth and the fourteenth centuries about forty universities were founded in Europe, partly by private initiative, partly by princes or popes, in most cases by the combined efforts of both together with the members of the university. Among the self-originating universities, the University of Paris holds a unique position. At Oxford, Cambridge, with the help of princes, universities were erected at Palencia, Naples, Salamanca, Seville, and Sienna. Of the universities founded by popes we mention only Rome, Pisa, Ferrara, Toulouse, Valla
dolid, Heidelberg, Cologne, and Erfurt. Most of the old universities, like Coimbra, Florence, Prague, Vienna, Cracow, Alcalá, Upsala, Louvain, Leipzig, Rostock, Tübingen, and many others, owe their origin to the combined efforts of princes and popes. The foundations consisted mainly of charters giving civil rights and authorizing scientific degrees, in most cases also of material contributions and endowments. To many of the sponsor-charges, and especially benefactors, were applied by the popes without other obligation than that of teaching science. Naturally the founders retained a certain authority and influence over the schools. On the whole, the old universities enjoyed everywhere the same freedom which they have in England up to this day. After the Reformation the governments of continental Europe made the universities of their own territories, State institutions, paying the professors as Government employees, sometimes prescribing textbooks, methods of teaching, and even doctrines. Although in the nineteenth century, the results were often unfortunate, they still keep the monopoly of establishing universities and of appointing the professors. Their influence on the progress of science is unimpeachable; how far this may benefit science, need not be decided in this place. With the growing influence of the State that the Church has been diminished, in most universities to total extinction. In the few European universities in which the faculty of Catholic theology is still allowed to exist, the supervision of the Church over her own science is almost reduced to a mere veto. The necessity of exempting the professors from the oath against the Modernistic heresy is an illustration of the case. Owing to the freedom of teaching in the United States of America there are, besides the public universities of the different states, a number of institutions founded by private endowment. In the face of the strong aid which anti-Christian and atheistic tendencies receive through the influence of universities, the private endowed Bohemian schools that maintained the truth of Revelation cannot be too much recommended.

(c) The limitations of science from the ethical point of view are twofold. The direct action of science on ethics is readily understood; the reaction of ethics upon science is just as certain. And both action and reaction create limitations for science. The activity of man is guided by two criteria, facility, understanding and will. From the understanding it derives light, from the will firmness. Naturally the understanding precedes the will, and hence the influence of science upon ethics. This influence becomes an important factor in the welfare of the human race for the reason that it is not confined to the scientist who is the originator of researches, but that it is carried to the various forms of teaching by word and writing. If one is to judge aright in this matter, two general principles must be kept in view. First, ethics is more important for mankind than science. Those who believe in revelation know that the Commandments are the criteria of all things, human and divine. St. Augustine (iii, xxv, 35-46); and those who see only as far as the light of natural reason enables them to see know from history that the happiness of peoples and nations consists rather in moral rectitude than in scientific progress. The conclusion is that if there should ever be a conflict between science and ethics, ethics should prevail. Now, there can be no such conflict except in two cases: when scientific research leads into error, and when the teaching of science, even if true, is applied against sound educational maxims. To see that these exceptions are not imaginary, one need only look at a glance at Paris, Oxford, Cambridge, and and, under A. All of them indicate actual conflicts. Unpedagogical teaching is sadly illustrated by the recent movement in Germany towards premature and even public instruction on sexual relations, which provoked a reaction on the part of the civil authorities.

So much about the direct action of science on ethics. The case ought not to be reversible, in other words, ethics should not influence science, except in the way of stimulating research and teaching. However, not only individuals but whole schools of scientists have been subject to that human frailty expressed in the adage, "the power of reason is a glorious thing, and faith, under A. All of them indicate actual conflicts. Unpedagogical teaching is sadly illustrated by the recent movement in Germany towards premature and even public instruction on sexual relations, which provoked a reaction on the part of the civil authorities.

themselves that the claims of Christ are unfounded. For, besides those who either reject His claims through inherited or acquired prejudices, or treat them with indifference, a large number of men try to strengthen their anti-Christian position by scientific arguments. And it is said that Christianity is proved from the miracles to which He appealed as testimonials of His Fattier, they formulate the axiom: "Miracles are impossible". Seeing, however, the inconsistency of the formula as long as there is a Maker of the world, they are driven to the next postulate: "The Creator". From thence the existence of the Creator can be proved from the existence of the world, and convincingly so by a number of arguments, they require new axioms. First they treat the origin of matter as too remote for its cause to be ascertained, and plead that: "Matter is eternal". For a similar reason the origin of life is explained by the arbitrary postulate of "spontaneous generation". Then the wisdom and order displayed in the starry heavens and in the flora and fauna of the earth must be disposed of. To say in plain words "All order in the world is casual" would be offensive to common sense. The axiom is then vested in more scientific formulae of the order "From eternity the earth has passed through an infinite number of forms, and only the fittest was able to survive".

The substructure of anti-Christian science has still one weak point: the human soul is not from eternity and its spiritual faculties point to a spiritual maker. The fabrication of axioms, once begun, has to be concluded: "The human soul is not essentially different from the vital principle of the animal". This conclusion recommends itself especially strongly against what the will dreads: the animal is not immortal, and hence neither is the human soul; consequently whatever judgment may follow, it will have no effect. The end of the fabrication is bitter. Man is a highly developed orang-outang. There is still one stumbling-block in the Sacred Scriptures, old and new. The Old Testament narrates the creation of man, his fall, the promise of a Redeemer; it contains prophecies of a Messiah which seem to be fulfilled in Christ and His Church. The New Testament proves the fulfilment of the promises, and presents a superhuman Being, who offered His life for the exaltation of sin and attested His Divinity by His own Resurrection; it gives the constitution and early history of His Church, and promises her existence to the end of the world. This would not be allowed to stand in the face of anti-Christian science. A few postulates more or less will do no harm to science as it stands. The Hebrew literature is put on a par with that of Persia or China, the history of Paradise is relegated to the realm of legends, the authenticity of the books is denied, contradictions in the accounts are pointed out, and the obvious sense is distorted. The axioms used for the annihilation of the Sacred Scriptures have the advantage of plausibility over those used against the Creator. They are draped in a mass of erudition taken from the linguistic and the historical sciences. We have not seen all of them yet. The greatest obstacle to anti-Christian science is the Church, which claims Divine origin, authority to teach infallible truth, maintains the inspiration of Scripture, and is confident of her own existence to the end of the world. With her, science cannot play as with philosophy or literature. Living ecclesiastics do not have to cede their sceptre over all the peoples of the world. She has all the weapons of science at her disposal, and members devoted to her, heart and soul. To grant her equal rights on scientific grounds would be disastrous to the "science without presuppositions". The mere creation of new axioms would not seem to be efficient against a living organization. The axioms have to be proclaimed loudly, and kept alive, and finally enforced by organized opposition, even in some cases by government power. Books and journals and lecture halls announce the one text, sung in every key, the great axiom: that the Church is essentially unscientific as resting on unwarranted presuppositions, and that her scientists can never be true men of science. The modern modernists cry that Christianity is unscientific and prove, and in the eyes of Jewish and Catholic historian in Strasbourg (1901) re-echoed loudly from most German universities. And yet, there was question of only a fifth Catholic among seventy-two professors; and this at a university in Alsace-Lorraine, a territory almost entirely Catholic. Similar proportions prevail in most universities. All the anti-Christian science mentioned above are entirely arbitrary and false. Not one of them can be supported by solid reasons; on the contrary, every one of them has been proved to be false. Thus anti-Christian science has surrounded itself by a number of boundary stakes driven into scientific ground, and has thus limited its own freedom of progress; the "science without presuppositions" is entangled in its own axioms, for no other reason than its aversion to Christ. On the other hand, the scientist who accepts the teaching of Christ need not fall back on a sort of arbitrary postulate. If he is a philosopher, he steers from the premises dictated by reason. In the world around him he recognizes the natural revelation of a Creator, and by logical deductions concludes from the contingency of things created to the Being Uncreated. The same reasoning makes him understand the spirituality and immortality of the soul. From both results combined he concludes further to moral obligations and the existence of a natural law. Thus prepared he can start into any scientific research without the necessity of erecting boundary stakes for the purpose of justifying his prejudices. If he wants to go further and put his faith upon a scientific basis, he may take the books, called the Sacred Scriptures, as a starting-point, apply methodical criticism to their authenticity, and find them just as reliable as any other historical record. Their contents, prophecies, and miracles convince him of the Divinity of Christ, and from the testimony of Christ he accepts the entire supernatural Revelation. He has constructed the science of his faith without any other than scientific premises. Thus the science of the Christian is the only one that gives freedom of research and progress; its boundaries are none but the pale of truth. Anti-Christian science, on the contrary, is the slave of its own prejudices.

III. Unlimited Freedom.—The demand for unlimited freedom in science is unreasonable and unjust, because it leads to licence and rebellion. (1) There is no unlimited freedom in the world, and liberty overstepping its boundaries always leads to evil. Man himself is neither absolutely free, nor would he desire unbounded freedom. Freedom is not the greatest boon nor the final end of man; it is given to him as a means to reach his end. Within his own mind, man feels bound to truth. Around himself, he sees all nature bound to laws and even dreads disturbances in their regular course. In all his activity he gets along best by remaining within the bounds of his capacities. Those judgments are the best which are formed in accordance with the rules of logic. Those machines and instruments are the finest which are allowed the smallest amount of freedom. Social intercourse is easiest within the rules of propriety. Widening these domains in more than one sense is disastrous. A ship notions are free only where certainty cannot be reached; scientific theories are free as long as they rest on probabilities. The freest of all in their thinking are the ignorant. In short, the more freedom of opinion, the less science. Similarly, a railway train with freedom in more than one sense is disastrous. A ship under the control of the helm is doomed. A nation that depreciates its code of law, that relaxes the administration of justice, that sets aside the strict rules
of property, that does not protect its own industry, that gives no guarantee for personal and public property and safety is on the decline. Unlimited freedom leads to barbarism, and its nearest approach is found in the wilds of Australia.

(2) The cry of anti-Christian science is for license. The boundaries enumerated in the preceding paragraph circumscribe the logical, the physical, and the ethical realm of man. Wherever he steps outside, he falls into error, into misfortune, into licence. Now, to which realm does science belong? Aristotle's definition fixes it in the logical realm. And what becomes of the freedom of sciences? Within man, the logical realm is the intellectual faculty, and without, it is the truth and morality. Each thing is free. Freedom is in the will, not in the understanding. Truth is eternal and absolute. It follows that the cry for unbound freedom of science has no place in the logical realm; evidently, it is not meant for the physical; so it must belong to the ethical realm; it is not a cry for truth, it is a cry with a purpose. What the purpose is can be inferred from what has been said under II. It may be summed up in the statement that it is rebellion against both supernatural and natural revelation. The former position is the primary but could not consistently be held without the latter, because it is not a "two-sided" world. If dog" pleases to reveal Himself in any way whatever, man is obliged to accept the revelation, and no arbitrary axiom will dispense him from the duty. Against natural revelation Paulsen and Wundt appeal to the postulate of "closed natural causality", meaning by "closed" the exclusion of the Creator. Supernatural revelation was styled by Kant "a dogmatic constraint", which, he says, may have an educational value for minors by filling them with pious fears. Wundt follows him by calling Catholicism the religion of constraint, and Paulsen praises Kant as "the defender of science". All these reservations rest on the supposition that in science there is no place for a Creator, no place for a Redeemer. Many attempts have been made to put the axiom on a scientific basis; but it remains an assumed premise, an "unwavering conviction", as Harnack calls it.

(3) That the expressions "license" and "rebellion" are calculated expressions is unavoidable, when one considers an anti-Christian science. (a) Anti-Christian science leads to Atheism. When science repudiates the claim of Christ as Son of God, it necessarily repudiates the Father who sent Him, and the Holy Ghost who proceeds from both. The logical inference does not find favour with the partisans of the "free science". Yet the laws were being discussed in the German Reichstag. Chancellor Caprivi had the courage to say: "The point in question is Christianity or Atheism... the essential in man is his relation to God." The outcry on the "liberal" side of the House showed that the Chancellor had not made a fool of himself. Since the repudiation of the Creator is clearly an abuse of freedom and an infringement of the natural law, science has, by all means, to save appearances by scientifically sounding words. First it calls the two great divisions of spirit Monism and Dualism. German scientists have even formed the "Monists' Union", claiming that there is no real distinction between the world and God. When their system emphasizes the world it is Materialism; when it accentuates the Divinity it is Pantheism. Monism is only a gentler name for both. The plain word "atheism" seems to be too offensive. English Naturalists regard certain "anti-Christian" sounding words, like Deism and Agnosticism. Toland, Tindal, Bolingbroke, Shaftesbury, of the eighteenth century, took satisfaction in removing the Deity so far away from the world that he could have no influence on it. Yet "Deity" still had too religious an odour and implied a gross inconsistency. To Huxley and other scientists of the nineteenth century the well-sounding name "agnosticism" appeared more dignified. In the face of natural law, however, which binds man to know and to serve his Creator, pleading ignorance of God is as much a rebellion against Him as shutting Him out of the world.

All these and other tactful terms and phrases cover the same crude Atheism and stand, without exception, proclaimed on a collection of arbitrary postulates. Dualism, on the contrary, is no process of postulates, except those dictated by common sense. Sound reason beholds in creation, as in a mirror, its Maker, and is thus able to refer natural phenomena to their ultimate cause. While science requires the knowledge of intermediate causes only, the knowledge of its beginning by the Creator is free. Thus, in the highest degree, or wisdom, as St. Thomas Aquinas calls it. This is why logical coherence and consistency are always and exclusively found in the dualistic doctrine. It is vain to hope that the abyss between the logical philosophy of Dualists and the "unwavering convictions" of Monists may be bridged over by discussions. This was well illustrated when Father Wasmann lectured in Berlin (1907) on the theory of Evolution and was opposed by Plate and ten other speakers. The result of the discussion was, that each, Plate and Wasmann, put his respective views in plain, the one was axiomatic, the other is free. This idealism developed into Subjectivism in the widest sense of the word, viz., into the complete emancipation of the human mind and will from God. The idol is the human ego. The consequences are that truth and justice lose their eternal character and become relative and conventional; man changes his anti-Christian science. (b) Anti-Christian science can be an intellectual or a religious conviction. The intellectual convictions areMonadology, Materialism, Ethics and the like, in which the opposite science is the whole truth. The religious convictions are Aweism, Deism, Agnosticism, making science the highest tribunal without appeal. Religion, which forms the principal part of justice, becomes likewise a matter of subjective inclination. Harnack calls submission to the doctrine of others treason against personal religion, and Nietzsche defends his idol by calling Christianity the immortal shame of mankind. The axiom is pronounced in more dignified form by Pfeiderer (1907). "In the science of history", he says, "the appearance on earth of a superhuman being cannot be considered". Perhaps in the most general way it is formulated by Paulsen (1918): "Switching off the supernatural from the natural and historical world". Yet, all these subjective axioms are only more or less scientific forms of the plain Straussian postulate (1835): "We are no longer Christians".
