dien zur Ph. u. Rel.”, Professor of the Uni-
versity of Würzburg: Sailer, Johann Michael.
TABLES OF ABBREVIATIONS.

tr. translation or translated. By itself it means "English translation", or "translated into English by". Where a translation is into any other language, the language is stated.

tr., tract. tractate.

v. see (Lat. vide).

Ven. Venerable.

II.—ABBREVIATIONS OF TITLES.

Acta SS. Acta Sanctorum (Bollandists).

Hast., Dict. of the Bible Hastings (ed.), A Dictionary of the Bible.
Kirchenlex. Wetzer and Welte, Kirchenlexicon.
P. G. Migne (ed.), Patres Graeci.
Vig., Dict. de la Bible Vigouroux (ed.), Dictionnaire de la Bible.

NOTA I.—Large Roman numerals standing alone indicate volumes. Small Roman numerals standing alone indicate chapters. Arabic numerals standing alone indicate pages. In other cases the divisions are explicitly stated. Thus "Rashdall, Universities of Europe, I, ix" refers the reader to the ninth chapter of the first volume of that work; "I, p. ix" would indicate the ninth page of the prefix of the same volume.

NOTA II.—Where St. Thomas (Aquinas) is cited without the name of any particular work the reference is always to "Summa Theologica" (not to "Summa Philosophiae"). The divisions of the "Summa Theol." are indicated by a system which may best be understood by the following example: "I-II, Q. vi, a. 7, ad 2um" refers the reader to the seventh article of the sixth question in the first part of the second part, in the response to the second objection.

NOTA III.—The abbreviations employed for the various books of the Bible are obvious. Ecclesiasticus is indicated by Eccles., to distinguish it from Ecclesiastes (Eccles.). It should also be noted that I and II Kings in D. V. correspond to I and II Samuel in A. V. and I and II Par. to I and II Chronicles. Where, in the spelling of a proper name, there is a marked difference between the D. V. and the A. V., the form found in the latter is added, in parentheses.

THE
CATHOLIC ENCYCLOPEDIA

R

Revelation.—I. MEANING OF REVELATION.—
Revelation may be defined as the communication of some truth by God to a rational creature through means which are beyond the ordinary course of nature. The truths revealed may be such as are otherwise inaccessible to the human mind—mysteries, which even when revealed, the intellect of man is incapable of fully penetrating. But Revelation is not restricted to these. God may see fit to employ supernatural means to affirm truths, the discovery of which is not perf se beyond the powers of reason. The essence of Revelation lies in the fact that it is not direct speech of God to man. The mode of communication, however, may be mediate. Revelation does not cease to be such if God’s message is delivered to us by a prophet, who alone is the recipient of the immediate communication. Such is the account of Revelation given in the Constitution “De Fide Catholica” of the Vatican Council. The Decree “Lamentabili” (3 July, 1907), by its condemnation of a contrary proposition, declares that the dogmas which the Church professes as revealed are “truths which have come down to us from heaven” (seriates e celo dedicata) and not “an interpretation of religious facts which the human mind has acquired by its own strenuous efforts” (prop., 22). It will be seen that Revelation as thus explained differs clearly from: (1) inspiration such as is bestowed by God on the author of a sacred book; for this, while involving a special illumination of the mind in virtue of which the recipient conceives such thoughts as God desires him to commit to writing, does not necessarily suppose a supernatural communication of these truths; (2) from the illustrations which God may bestow from time to time upon any of the faithful to bring home to the mind the import of some truth of religion hitherto obscurely grasped; and (3) from the Divine assistance by which the pope when acting as the supreme teacher of the Church, is preserved from all error as to faith or morals. The function of this assistance is purely negative; it need not carry with it any positive gift of light to the mind. Much of the confusion in which the discussion of Revelation in non-Catholic works is involved arises from the neglect to distinguish it from one or other of these.

During the past century the Church has been called on to reject as erroneous several views of Revelation irreconcilable with Catholic belief. Three of these may here be noted. (1) The view of Anton Guenther (1783–1863). This writer denied that Revelation could include mysteries strictly so-called, inasmuch as the human intellect is capable of penetrating to the full all revealed truth. He taught, further, that the meaning to be attached to revealed doctrine is undergoing constant change as human knowledge grows and man’s mind develops; so that the dogmatic formulae which are now true will gradually cease to be so. His writings were put on the Index in 1857, and his erroneous propositions definitively condemned in the decrees of the Vatican Council. (2) the Modernist view (Loisy, Tyrrell). According to this school, there is no such thing as Revelation in the sense of a direct communication from God to man. The human soul reaching up towards the unknowable God is ever endeavouring to interpret its sentiments in intellectual formulae. The formulae it thus frames are our ecclesiastical dogmas. These can but symbolize the Unknowable; they can give us no real knowledge regarding it. Such an error is manifestly subversive of all belief, and was explicitly condemned by the Decree “Lamentabili” and the Encyclical “Pascendi” (8 Sept., 1907). (3) With the view just mentioned is closely connected the Pragmatist view of M. Leroy (“Dogme et Critique”, Paris, 2nd ed. 1907). Like the Modernists, he sees in revealed dogmas simply the results of spiritual experience, but holds their value to lie not in the fact that they symbolize the Unknowable, but that they have practical value in pointing the way by which we may best enjoy experience of the Divine. This view was condemned in the same documents as the last mentioned.

II. POSSIBILITY OF REVELATION.—The possibility of Revelation as above explained has been strenuously denied from various points of view during the last century. For this reason the Church held it necessary to issue special decrees on the subject in the Vatican Council. Its antagonists may be divided into two classes according to the different standpoints from which they direct their attack, viz.: (1) Rationalists (under this class we include both Deist and Agnostic writers). Those who adopt this standpoint rely in the main on two fundamental objections: they either urge that the miraculous is impossible, and that Revelation involves miraculous interposition on the part of the Deity; or they appeal to the autonomy of reason, which it is maintained can only accept as truths the results of its own activities. (2) Immanentists. To this class may be assigned all those whose objections are based on Kantian and Hegelian doctrines as to the subjective character of all our knowledge. The views of these writers frequently involve a purely pantheistic doctrine. But even those who repudiate pantheism, in place of the personal God, Ruler, and Judge of the world, whom Christianity teaches, substitute the vague notion of the “Spirit” immanent in all men, and regard all religious creeds as the attempts of the human soul to find expression for its inward experience. Hence no religion, whether pagan or Christian, is wholly false; but none can claim to be a message from God free from any admixture of error. (Cf. Sabatier, “Esquisse”, etc., Bk. I cap. ii.) Here too the autonomy of reason is invoked as fatal to the doctrine of Revelation properly so called. In the face of these objections, it is evident that the question of the possibility of Revelation is at present one of the most vital portions of Christian apologetic.

XIII.—1
If the existence of a personal God be once established, the physical possibility at least of Revelation is undeniable. God, who has endowed man with means to communicate his thoughts to his fellows, cannot be disteet of the power to communicate His own thoughts to us. [Martinesu, it is true, denies that we reason infallibly by it to authenticate a divine revelation concerning the past or the future (Seat of Authority in Religion, p. 311); but such an assertion is arbitrary and extravagant in the extreme.] However, numerous difficulties have been urged on grounds other than that of physical possibility. 1. In essentials it deems the value of the principles to distinguish three aspects of Revelation, viz: as it makes known to us (1) truths of the natural law, (2) mysteries of the faith, (3) positive precepts, e.g. regarding Divine worship.  
(1) The revelation of truths of the natural law is certainly not inconsistent with God's wisdom. God so created man as to bestow on him endowments amply sufficient for him to attain his last end. Had it been otherwise, the creation would have been imperfect. If over and above this He decreed to make the attainment of beatitude yet easier for man by placing within his reach a far simpler and far more certain method of knowing the laws on which his fate depended, this is an argument for the Divine generosity; it does not disprove the Divine wisdom. To assume, with certain Rationalists, that exceptional intervention can only be explained on the ground that God was unable to embrace His ultimate design in His original scheme is a mere petit princi- pe. Further, the doctrine of original sin supplies an additional reason for such a revelation of the natural law. That doctrine teaches us that man by the abuse of his free will has rendered his attainment of salvation difficult. Though his intellectual faculties are only partially vitiated, yet his grasp of truth is weakened: his recognition of the moral law is constantly clouded by doubts and questionings. Revelation gives to his mind the certainty he had lost, and so far repairs the evils consequent on the catastrophe which had befallen him.  
(2) Still more difficulty has been felt regarding mysteries. It is freely asserted that a mystery is something repugnant to reason, and therefore something intrinsically impossible. This objection rests on a mere misunderstanding of what is signified by a mystery. In theological terminology a conception involves a mystery when it is such that the natural faculties and the mind are unable to coalesce. This does not imply anything contrary to reason. A conception is only contrary to reason when the mind can recognize that its elements are mutually exclusive, and therefore involve a contradiction in terms. A more subtle objection is that urged by J. Caird, to the effect that every truth that can be partially communicated to the mind by analogies is ultimately capable of being fully grasped by the understanding. "Of all such representations, unless they are purely illogical, it must hold good that implicitly and in undeveloped form they contain rational notions that in the actual thought only a minute experience of the human intellect may ultimately free from its sensuous veil. . . . Nothing that is absolutely ineradicable to reason can be made known to faith." (Philosophy of Religion, p. 71.) The objection rests on a wholly exaggerated view regarding the powers of the human intellect. The cognitive faculty of any nature is proportionate to the scale of the universe. The finite intellect can only penetrate a finite object; it is incapable of comprehending the Infinite. The finite types through which the Infinite is made known to it can never under any circumstances lead to more than analogical knowledge. It is further frequently urged that the revelation of what the mind cannot understand would be an act of violence to the intel- lect; and that this faculty can only accept those truths whose intrinsic reasonableness it recognizes. This assertion, based on the alleged autonomy of reason, can only be met with denial. The function of the intellect is to recognize and admit any truth which is adequately presented to it, whether that truth be warranted by internal or external criteria of truth. The reason is not deprived of its legitimate activity because the criteria are external. It finds ample scope in weighing the arguments for the credibility of the fact asserted. The existence of mysteries in the Christian religion was expressly taught by the Vatican Council (De Fide Cath., cap. ii, can. iii). "If any one shall say that it is impossible or that it is inexpedient that man should be instructed regarding God and the worship to be paid to Him by Divine revelation,—let him be anathema." It can hardly be questioned that the "autonomy of reason" furnishes the main source of the difficulties at present felt against Revelation in the Christian sense. It seems desirable to indicate very briefly the various ways in which that principle is understood. It is explained by M. Blondel, an eminent member of the faculty of Louvain, as a principle by which nothing can enter into a man which does not proceed from him, and which does not correspond in some manner to an interior need of expansion; and that neither in the sphere of historic facts nor of traditional doctrine, nor of commands imposed by authority, can any truth rank as valid for a man or any precept as obligatory, unless it be in some way autonomous and autochthonous" (Lettre sur les exigences, etc., p. 601). Although M. Blondel has in his own case reconciled this principle with the acceptance of Catholic belief, yet it may readily be seen that it affords an easy ground for the denial not merely of the possibility of external revelation, but also of the possibility of revelation in itself. The origin of this erroneous doctrine is to be found in the fact that within the sphere of the natural speculative reason, truths which are received purely on external authority, and which are in no way connected with principles already admitted, can scarcely be said to form part of our knowledge. Science asks for the inner reason of things and can make no use of truths save in so far as it can reach the principles from which they flow. The extension of this to religious truths is an error directly traceable to the assumption of the eighteenth-century philosophers that the truths about which human intellect can attain unaided. The principle is, however, sometimes applied with a less extensive signification. It may be understood to involve no more than that reason cannot be compelled to admit any religious doctrine or any moral obligation merely because they possess external guaranties of truth; they must entirely satisfy their own innate sense of truth's inherent or inherent and thus be justified their validity on intrinsic grounds. Thus Prof. J. Caird writes: "Neither moral nor religious ideas can be simply transferred to the human spirit in the form of fact, nor can they be verified by any evidence outside of or lower than themselves" (Fundamental Ideas of Christianity, p. 51). A somewhat different statement again is implied in the canon of the Vatican Council
in which the right of the intellect to claim absolute independence (autonomy) is denied. "If anyone shall say that human reason is independent in such wise that faith cannot be commanded it by God—let him be anathema!" (De Fide Cath., cap. iii, can. 1). This canon is directed against the position maintained as nearly as not by all rationalists and the Deists, that human reason is amply sufficient without exterior assistance to attain to absolute truth in all matters of religion (cf. Vacant, "Etudes Théologiques", I, 572; II, 387).

III. Necessity of Revelation.—Can it be said that Revelation is necessary to man? There can be no doubt that it is necessary if we consider that God destines man to attain a supernatural beatitude which surpasses the exigencies of his natural endowments. In that case God must needs reveal alike the existence of that supernatural end and the means by which we are to attain it. But is Revelation necessary even in order that man should observe the precepts of the natural law? If our race be viewed in its present condition as history displays it, the answer can only be that it is, morally speaking, impossible for men unassisted by Revelation, to attain by their natural powers such a knowledge of the law as is necessary for a proper ordering of life. In other words, Revelation is morally necessary. Absolute necessity we do not assert. Man, Catholic theology teaches, possesses the requisite faculties to discover the natural law. Luther indeed asserted that man's intellect had become hopelessly obscured by original sin, so that even natural truth was beyond his reach. And the Traditionalists of the nineteenth century (Bautin, Bonnetty, etc.) also fell into error, teaching that man was incapable of arriving at moral and religious truth apart from Revelation. The Church, on the contrary, recognizes the capacity of human reason, and grants that man, and man in the extraordinary condition in which he has lived, who had freed themselves from prevalent errors, and who had attained to such a knowledge of the natural law as would suffice to guide them to the attainment of beatitude. But she teaches nevertheless that this can only be the case as regards a few, and that for the bulk of mankind Revelation is necessary. That this is so may be shown both from the facts of history and from the nature of the case. As regards the testimony of history, it is notorious that even the most civilised of pagan races have fallen into the grossest errors regarding the natural law; and from the testimony of reason, we find that the schools of philosophy would not have enabled them to do so; for many of these denied even such fundamental principles of the natural law as the personality of God and the freedom of the will. Again, by the very nature of the case, the difficulties involved in the attainment of the requisite knowledge are insuperable. For men to be able to attain such a knowledge of the natural law as will enable them to order their lives rightly, the truths of that law must be so plain that the mass of men can discover them without long delay, and possess a certainty of them which will be alike free from uncertainty and secure from serious error. No reasonable man will maintain that in the case of the greater part of mankind this is possible. Even the most vital truths are called in question and are met by serious objections. The separation of truth from error is in work involving time and labour. For this the majority of mankind have neither information nor opportunity. Apart from the security which Revelation gives they would reject an obligation both irksome and uncertain. It results that a revelation even of the natural law is for man in his present state a moral necessity.

IV. Revelation.—The fact that Revelation is not merely possible but morally necessary is in itself a strong argument for the existence of a revelation, and imposes on all men the strict obligation of examining the credentials of a religion which presents itself with prima facie marks of truth. On the other hand if God has conferred a revelation on men, it stands to reason that He must have attached to it plain and evident signs by which the unlettered could recognise His message for what it is, and to distinguish it from all false claimants.

The criteria of Revelation are either external or internal: (1) External criteria consist in certain signs attached to the revelation as a divine testimony to its truth, e.g. miracles. (2) Internal criteria are the tests which are found in the revelation itself, in the manner in which it was presented to the world, and in the effects which it produces on the soul. These are distinguished into negative and positive criteria. (a) The immunity of the alleged revelation from any teaching, speculative or moral, which is manifestly erroneous or self-contradictory, the absence of all fraud on the part of those who deliver it to the world, provide negative internal criteria. (b) Positive internal criteria are of various kinds. One such is found in the beneficent effects of the doctrine and in its power to meet even the highest demands of the moral frame of the human character. In the internal conviction felt by the soul as to the truth of the doctrine (Suarez, "De Fide", IV, sect. 5, n. 9.) In the last century there was in certain schools of thought a manifest tendency to deny the value of all external criteria. This was largely due to the Rationalist polemic against miracles. It is a few non-Catholic divines anxious to make terms with the enemy adopted this attitude. They allowed that miracles are useless as a foundation for faith, and that they form on the contrary one of the chief difficulties which lie in faith's path. Faith, they admitted, must be presupposed before a miracle be accepted. Have not the criteria held by the criterion of faith to lie in inward experience—in the testimony of the Spirit. Thus Schleiermacher says: "We renounce altogether any attempt to demonstrate the truth and the necessity of the Christian religion. On the contrary we assume that every Christian before he commences inquiries of this kind is already convinced that no other form of religion but the Christian can harmonise with his piety" (Glaubenslehre, n. 11). The Traditionalists by denying the power of human reason to test the grounds of faith were driven to fall back on the same criteria. Its evidence, its truthfulness, its internal sense (cf. Lamsaer, "De Fide", cap. i, can. 2 and 10) have emerged. Certainly the schools of philosophy would not have enabled them to do so; for many of these denied even such fundamental principles of the natural law as the personality of God and the freedom of the will. Again, by the very nature of the case, the difficulties involved in the attainment of the requisite knowledge are insuperable. For men to be able to attain such a knowledge of the natural law as will enable them to order their lives rightly, the truths of that law must be so plain that the mass of men can discover them without long delay, and possess a certainty of them which will be alike free from uncertainty and secure from serious error. No reasonable man will maintain that in the case of the greater part of mankind this is possible. Even the most vital truths are called in question and are met by serious objections. The separation of truth from error is in work involving time and labour. For this the majority of mankind have neither information nor opportunity. Apart from the security which Revelation gives they would reject an obligation both irksome and uncertain. It results that a revelation even of the natural law is for man in his present state a moral necessity.
Revelation

Church to be the sole guardian of God’s Revelation. These qualities indeed appertain in so transcendent a degree to the teaching of the Church, that the argument must needs carry conviction to an earnest and truth-seeking mind. Another criterion which at first sight may appear to this class of minds not to be mention here. It is based upon the theory of Immanence and has of recent years been strenuously advocated by certain of the less extreme members of the Modernist School. These writers urge that the vital needs of the soul imperatively demand, as their necessary complement, Divine supernatural grace, and even the supreme magisterium of the Church. To these needs the Catholic religion alone corresponds. And this correspondence with our vital needs is, they hold, the one sure criterion of truth. The theory is altogether inconsistent with Catholic dogma. It supposes that the Christian Revelation and the gift of grace are not free gifts from God, but something of which the nature of man is absolutely exigent, and without which it would be incomplete. It is a return to the errors of Baus. (Denz. 1021, etc.)

While the Church, as we have said, is far from understanding the criteria, she has always regarded external criteria as the most easily recognizable and the most decisive. Hence the Vatican Council teaches: “In order that the obedience of our faith might be agreeable to reason, God has willed that to the internal aids of the Holy Spirit, there should be joined the external proofs of His Revelation, viz. His works (facta divina), especially miracles and prophecy, which inasmuch as they manifestly display the omnipotence and the omniscience of God are most certain signs of a Divine Revelation and are suited to the understanding of all” (De Fide Cath., cap. iii). As an instance of a work evidently Divine and yet other than miracle or prophecy, the council instances the Catholic Church, which, “by reason of the marvellous manner of its propagation, its surprising sanctity, its inexhaustible fruitfulness in all good works, its catholic unity and its invincible stability, is a mighty and perpetual motive of credibility and an irrefragable testimony to its own divine legation” (l. c.). The truth of the teaching of the council regarding external criteria is plain to any unprejudiced mind. Granted the presence of the negative criteria, external guarantees establish the Divine origin of the Revelation which nothing else can do. The Church, as so to say, a seal affixed by the hand of God Himself, and authenticating the work as His. (For a fuller treatment of their apologetic value, and for a discussion of objections, see MIRACLES; APOLOGISTS.)

V. THE CHRISTIAN REVELATION.—It remains here to distinguish the Christian Revelation or “deposit of faith” from what are termed private revelations. This distinction is of importance: for while the Church recognizes that God has spoken to His servants in every age, and still continues thus to favour chosen souls, she is careful to distinguish these revelations from the Revelation which is the deposit of the faith, and to place her charge, and which she proposes to all her members for their acceptance. That Revelation was given in its entirety to Our Lord and His Apostles. After the death of the last of the twelve it could receive no increment. It was, as the Church calls it, a deposit—“the faith once delivered to the saints” (Jude, 3)—for which the Church was to “contend” but to which she could add nothing. Thus, whenever there has been question of defining a doctrine, whether at Nicea, at Trent, or at the Vatican, the sole point of debate has been as to whether the doctrine is found in Scripture or in Apostolic tradition. The Council of Trent (sess. 15), as with the earlier Councils, in founding the Revelation by the less instructed of anti-Catholic writers, merely preserves the supreme pontiff from error in defining the faith; it does not enable him to add jot or tittle to it. All subsequent revelations conferred by God are known as private revelations, for the reason that they are not directed to the whole Church but are for the good of individual members only. They are not necessary to the Christian faith; but that will depend on the evidence in each particular case. The Church does not propose to us as part of her message. It is true that in certain cases she has given her approbation to certain private revelations. This, however, only signifies that there are two kinds of truths: (1) that which is contained in the Catholic Faith or to the moral law, and (2) that there are sufficient indications of their truth to justify the faithful in accepting them without being guilty of superstition or of imprudence.

It may however be further asked, whether the Christian Revelation does not receive increment through the development of doctrine. During the last half of the nineteenth century the question of doctrinal development was widely debated. Owing to Guenther’s erroneous teaching that the doctrines of the faith assume a new sense as human science progresses, the Vatican Council declared once for all that the Church’s teaching was immutable (De Fide Cath., cap. iv, can. iii). On the other hand it explicitly recognizes that there is a legitimate mode of development, and cites to that effect (op. cit., cap. iv) the words of Vincent of Lirina: “Let understanding science and wisdom (regarding the Church’s teaching) increase in each and in all, in the individual and in the whole Church, as ages and centuries advance: but let it be solely in its own order, retaining, that is, the same dogma, the same sense, the same import” (Comment. 28). Two of the most eminent theological writers of the period, Cardinal Franzelin and Cardinal Newman, have on very different lines dealt with the progress and nature of this development. Cardinal Franzelin in his “De Divina Tradizione et Scriptura” (pt. XXII—VI) has principally in view the Hegelian theories of Guenther. He consequently lays the chief stress on the identity at all points of the intellectual datum, and explains development almost exclusively as a process of logical deduction. Cardinal Newman wrote his “Essay on the Development of Christian Doctrine” in the course of the two years (1843—45) immediately preceding his resignation as Archbishop of Westminster, as nothing else could be done on to deal with different adversaries, viz., the Protestants who justified their separation from the main body of Christians on the ground that Rome had corrupted primitive teaching by a series of additions. In that work he examines in detail the difference between a corruption and development. He shows how a true and fertile idea is endowed with a vital and assimilative energy of its own, in virtue of which, without undergoing the least substantive change, it attains to an ever more perfect expression, as the course of time brings it into contact with new aspects of truth or forces it into collision with new errors: the whole system of ideas is summed up by the whole Christian church. He proceeds to deal with different adversaries, viz., the Protestants who justified their separation from the main body of Christians on the ground that Rome had corrupted primitive teaching by a series of additions. In that work he examines in detail the difference between a corruption and development. He shows how a true and fertile idea is endowed with a vital and assimilative energy of its own, in virtue of which, without undergoing the least substantive change, it attains to an ever more perfect expression, as the course of time brings it into contact with new aspects of truth or forces it into collision with new errors: the whole system of ideas is summed up by the whole Christian church. Revelation, Book of. See Apocalypse.

Revelations, Private.—There are two kinds of revelations: (1) universal revelations, which are contained in the Bible or in the depository of Apostolic tradition transmitted by the Church. These ended with the passing of the Apostolic and must be believed (2) particular revelations, which are constantly occurring among Christians (see Contemplation). When the Church approves private revelations, she declares only that there is nothing in them contrary to faith or good morals, and that they may be read without danger or even profit; no obligations are placed on the faithful to believe them. Speaking of such revelations as (e. g.) those of St. Hildegard (approved in part by Eugenius III), St. Bridget (by Boniface IX), and St. Catherine of Siena (by Gregory XI) Benedict XIV says: "It is not obligatory, nor even possible to give them the assent of Catholic faith, but only of human faith, in conformity with the dictates of prudence, which presents them to us as probable and worthy of pious belief" (De canon., III, lii, 15; II, xxii, 11).

Illusions connected with private revelations have been explained in the article Contemplation. Some of the contents of the books' supposed authorship of an historical scene (e. g., of the life or death of Christ) is often only approximately accurate, although the visionary may be unaware of this fact, and he may be misled, if he believes in its absolute historical fidelity. This error is quite natural, being based on the assumption that, if the vision comes from God, all its details (the landscape, dress, words, actions, etc.) should be a faithful reproduction of the historic past. This assumption is justified, but for accuracy in secondary details it is not necessary; the main point is that the fact, event, or communication revealed be such that may be objected that the Bible contains historical books, and that thus God may sometimes wish to reveal certain facts in religious history to us exactly. That doubtless is true, when there is question of facts which are necessary or useful as a basis for religion, in which case the revelation is accompanied by proofs that guarantee its accuracy. A vision need not guarantee its accuracy in every detail. One should thus beware of concluding without examination that revelations are to be rejected; the prudent course is neither to believe nor to deny them unless there is sufficient reason for so doing. Much less should one suspect that the saints have been always deceived. On the contrary, such deception is rare, and as a rule in unimportant matters.

There are cases in which we can be certain that a revelation is Divine. (1) God can give this certainty to the person who receives the revelation (at least during it), by granting an insight and an evidence so compelling as to exclude all possibility of doubt. We can find an analogy in the natural order: our senses are subject to many false beliefs, but we perceive clearly that we have not been deceived. (2) At times others can be equally certain of the revelation thus vouchsafed. For instance, the Prophets of the Old Testament gave indubitable signs of their mission; otherwise they would not have been believed. There were always false prophets, whose pretensions were the same as this people, but, inasmuch as the faithful were counselled by Holy Writ to distinguish the false from the true, it was possible so to distinguish. One incontrovertible proof is the working of a miracle, if it be wrought for this purpose and circumstances show this to be so. A prophecy realised is usually convincing, when it is precise and cannot be the result of chance or of a conjecture of the evil spirit.

Besides these rather rare means of forming an opinion, there is another, but longer and more intricate method: to discuss the reasons for and against. Practically, this examination will often give only a probability more or less great. But it may be said that the revelation can be regarded as Divine in its broad outlines, but doubtful in minor details. Concerning the revelations of Marie de Agreda and Anne Catherine Emmerich, for example, contradictory opinions have been expressed: some believe unhesitatingly everything they contain, and are annoyed when anyone does not share their confidence; others, give the revelations no credence whatsoever (generally on a priori grounds); finally there are many who are sympathetic, but do not know what to reply when asked what degree of credibility is to be attributed to the writings of these two seeresses. The truth seems to lie between the two extreme opinions indicated first. If there is question of a particular fact related in these books and not mentioned elsewhere, we cannot be certain that it is true, especially in minor details. In particular instances, these visionaries have been mistaken: thus Marie de Agreda teaches, like her contemporaries, the existence of crystal heavens, and declares that one must believe everything she says, although such an obligation exists only in the case of the Holy Scriptures. In 1771 Clement XIV forbade the continuation of her process of beatification "on account of the erroneous and heretical errors otherwise given expression to false or unlikely opinions: she regards the writings of the pseudo-Dionysius as due to the Areopagite, and says strange things about the terrestrial Paradise, which, according to her, exists on an inaccessible mountain towards Tibet. If there be question of the general statement of facts given in these works, we can admit with probability that many of them are true. For these two visionaries led lives that were regarded as very holy. Competent authorities have judged their ecstasies divine. It is therefore prudent to admit that they received a spiritual assistance from God, procuring them not absolutely, but in the main, from error.

In judging of revelations or visions we may proceed in this manner: (a) get detailed information about the person who believes himself thus favoured; (b) also get information about the fact of the revelation and the circumstances attending it. To prove that a revelation is Divine (at least in its general outline) the method of explanation is sometimes employed. It consists in proving that neither the demon nor the ecstatic's own ideas have interfered (at least on important points) with God's action, and that no one has retroactively the revelation after its occurrence. This method differs from preceding one only in the information obtained, but it is not so convenient.

To judge revelations or visions, we must be acquainted with the character of the person favoured with them.
from a triple point of view: natural, ascetical, and mystical. (For those who have been beatified or canonized, this inquiry has been already made by the Church.) Our inquiry into the visionary’s characteristics and revelations should serve (1) to determine if the natural qualities or defects, from a physical, intellectual, and especially moral standpoint? If the information is favourable (if the person is of sound judgment, calm imagination; if his acts are dictated by reason and not by enthusiasm, etc.), many causes of illusion and there is no need for them. However, if the uncertainty or suspicion is still possible. (2) How has the person been educated? Can the knowledge of the visionary have been derived from books or from conversations with theologians? (3) What are the virtues exhibited before and after the vision? Has he made progress in holiness and especially in humility? The tree can be judged by its fruits. (4) What extraordinary graces of union with God have been received? The greater they are the greater the probability in favour of the revelation, at least in the main. (5) Has the person had other revelations that have been judged Divine? If he has made any predictions that have been clearly realized? (6) Has he been subjected to heavy trials? It is almost impossible for extraordinary favours to be conferred without heavy crosses; for both are marks of God’s friendship, and each is a preparation for the other. (7) Does he practice the following rules: fear, doctrine, practice, and prayer. (8) Do desire to be a revelation? Our information concerning a revelation considered in itself or concerning the circumstances that accompanied it might be secured as follows: (1) Is there an authentic account, in which nothing has been added, suppressed, or corrected? (2) Does the person agree with the predictions of the Church or with the recognized facts of history or natural science? (3) Does it teach nothing contrary to good morals, and is it unaccompanied by any indecent action? The commandments of God are addressed to everyone without exception. More than once the demon has persuaded false visionaries that they were chosen souls, and that God loved them so much as to dispense them from the burdensome restrictions imposed on ordinary mortals. On the contrary, the effect of Divine visitations is to remove us more and more from the life of sense, and make us more rigorous to ourselves. (4) Is this the obtaining of eternal salvation? In Spiritism we find the spirits evoked treat only of trifles. They reply to idle questions, or descend to providing amusement for an assembly (e.g., by moving furniture about); deceased relatives or the great philosophers are interrogated and their replies are worthless commonplace. A revelation is also suspect if its aim is to decide a disputed question in theology, history, astronomy, etc. Eternal salvation is the only thing of importance in the eyes of God. “In all other matters”, says St. John of the Cross, “he wishes men to have recourse to human reason with the aid of revelation.” (Mystica, II. xxi.) A revelation is suspect if it is commonplace, telling only what is to be found in every book. It is then probable that the visionary is unconsciously repeating what he has learnt by reading. (5) After examining all the circumstances accompanying the vision (the attitudes, acts, words, etc.), do we find that dignify and seriousness which become the Divine Majesty? The spirits evoked by Spiritists often speak in a trivial manner. Spiritists try to explain this by pretending that the spirits are not demons, but the souls of the departed who have retained all their vices; absurd or unbecoming replies are given by deceased persons who act as illiberal libertines, depraved persons. But if that be so, communications with these degraded beings is evidently dangerous. In Protestant “revivals” assembled crowds bewail their sins, but in a strange, exaggerated way, as if frenzied or intoxicated.

It must be admitted that they are inspired by a good principle: a very ardent sentiment of the love of God and of repentance. But to this is added another element that cannot be regarded as Divine: a neurotic enthusiasm, a condition of extraordinary abasement develops so far as to produce convulsions or repugnant contortions. Sometimes a kind of unknown language is spoken, but it consists in reality of a succession of meaningless sounds. (6) What sentiments of peace, joy, and contentment are experienced after or during the visions? Here is the rule formulated by St. Catherine of Sienna and St. Ignatius: “With persons of good will [it is only of such that we are here treating] the action of the good spirit [God or His Angels] is characterized by the production of peace, joy, security, courage; except perhaps at the first moment.” The Bible often mentions this disturbance at the first moment of the revelation; the Blessed Virgin experienced it when the Angel Gabriel appeared to her. The action of the demon produces quite the contrary effect: “With persons of good will he will produce, except perhaps at the first moment, disturbance, discouragement, perturbation, gloom.” In a word the action of Satan encounters a mysterious resistance of the soul. (7) It often happens that the revelation inspires an exterior work—for instance, the establishment of a new devotion, the foundation of a new religious congregation, the constitution of a congregation, etc. the building of a church or the creation of a pilgrimage, the reformation of the lax spirit in a certain body, the preaching of a new spirituality, etc. In these cases the value of the proposed work must be carefully examined: is it good in itself, useful, filling a need, not injurious to other works, etc.? (8) Has the vision been subject to the tests of time and discussion? (9) If any work has been begun as a result of the revelation, has it produced great spiritual fruit? Have the sovereign pontiffs and the bishops believed this to be so; and have they assisted the progress of the work? This is very well illustrated in the cases of the Scapular of Mount Carmel, the devotion to the Sacred Heart, the miraculous medal. These are the signs that enable us to judge with probability if a revelation is Divine. In the case of certain persons very closely united to God, the slow study of these signs has been sometimes aided or replaced by a sense of religiousness that has taken what is known as the infused gift of the discernment of spirits.

As regards the rules of conduct, the two principal have been explained in the article on Contemplation, namely (1) if the revelation leads solely to the love of God and the service of God; let us regard it as Divine; (2) at the beginning, the visionary should do his best to repulse the revelation quietly. He should not desire to receive it, otherwise he will be exposing himself to the risk of being deceived. Here are some further rules: (a) the director must be content to proceed slowly, to explain the meaning, and to treat the person gently. If he were to be harsh or distrustful, he would intimidate the soul he is directing, and incline it to conceal important details from him; (b) he must be very careful to urge the soul to make progress in the way of sanctity. He will point out that the only value of the visions is in the spiritual fruit that they produce; (c) he will pray fervently, and have the subject he is directing pray, that the necessary light may be granted. God cannot fail to make known the true path to those who ask Him humbly. If on the contrary a person confided solely in his natural prudence, he would expose himself to punishment for his self-sufficiency; (d) the visionary should be perfectly calm and patient if his superiors do not allow him to carry out the enterprises that he deems inspired by Heaven or revealed. One who, when confronted with this opposition, becomes im-
REVOLUTION

BEVILLE

patient or discouraged, shows that he has very little confidence in the power of God and is but little convinced of the justice of the cause. If God does not interpose to help through the instrumentality of the Blessed sacrament to succeed, He can make the obstacles suddenly disappear at the time appointed by Him. A very striking example of this Divine delay is to be found in the life of St. Juliana, the Cistercian princess of Mont-Cornillon, near Liège (1192–1258). It is to her that the institution of the feast of the Blessed sacrament is due. All her life was passed in awaiting the hour of God, which she was never to see, for it came only more than the century after the beginning of the revelations.

As regards inspirations ordinarily, those who have not the gift of tranquillity or a complete union, must beware of the idea that they hear supernatural words; unless the evidence is irresistible, they should attribute them to the activity of their own imaginations. But they may at least experience inspirations or impulses more or less strong, which seem to point out to them how to act in difficult circumstances. This is a minor form of revelation. The same line of conduct should be followed as in the latter case. We must not accept them blindly and against the dictates of reason, but weigh the reasons for and against, consult a prudent director, and decide only after applying the rules for the discernment of spirits. The degree of reality or of supernatural character laid down in St. Juliana's case does not apply to simple sudden and illuminating views of faith, which enable one to understand in a higher manner not novelties, but the truths admitted by the Church. Such enlightenment cannot have any evil result. It is on the contrary a very precious grace, which should be carefully welcomed and utilized.

REVOLUTION.

Beville, Stephen. See Sandhurst, Bishop of.

Revocation, the act of recalling or annulling, the reversal of an act, the recalling of a grant, or the making void of some deed previously existing. This term is of wide application in canon law. Grants, laws, contracts, sentences, jurisdiction, appointments and interdicts are revocated by the grantor, his successor, or superior according to the prescriptions of law. Revocation without just cause is illicit, though often valid. Laws and customs are revoked when, owing to change of circumstances, they cease to be just and reasonable. Concordats (q. v.) are revocable when they redound to the serious injury of the Church. Minor and ecclesiastical institutions may have sentences in certain civil trials set aside (Ression demarche), and contracts by which ecclesiastical property is alienated are sometimes rescindable. A judge may revoke his own interdictory sentence but not a definitive judicial sentence. Many appointments are revocable at will; others require a judicial trial or other formalities. (See Benefice; Facultates; Canonical Indults; Pontifical; Jurisdiction, Ecclesiastical.)

Andrew B. Mehan.

Revolution, English, of 1688.—James II, having reached the climax of his power after the successful suppression of Monmouth's rebellion in 1685, then had the Tory reaction in his favour, complete control over Parliament and the town corporations, a regular army in England, a thoroughly Catholic army in process of formation in Ireland, and a large revenue granted by Parliament for life. His policy was to govern England as absolute monarch and to restore Catholics to their full civil and religious rights. Unfortunately, both prudence and statesmanship were lacking, with the result that in three years the king lost his throne. The history of the Revolution resolves itself into a catalogue of various ill-judged measures which alienated the support of the Established Church, and finally the nation as a whole. The execution of Monmouth (July, 1685) made the Revolution possible, for it led to the Whig party accepting William of Orange as the natural champion of Protestantism against the attempts of James. Thus the opposition gained a centre round which it consolidated. In 1688, James was deposed and William of Orange, who landed at Torbay on November 5, 1688, was recognized as King. What the Catholics as a body desired was freedom of worship and the repeal of the penal laws; but a small section of them, desirous of political power, aimed chiefly at the repeal of the Test Act of 1673 and the Act of 1678 which excluded Catholics from both houses of Parliament. Unfortunately James fell under the influence of this section, which was directed by the unprincipled Earl of Sunderland, and he decided on a policy of repeal of the Test Act. Circumstances had caused this question to be closely bound up with that of the army. For James, who placed his chief reliance on his Catholic army, had increased the starting army to 30,000, 13,000 of whom were officered by Catholics, were encamped on Hounslow Heath to the great indignation of London which regarded the camp as a menace to its liberties and a centre of disorder. Parliament demanded that the army should be reduced to normal dimensions and the Catholic officers dismissed; but James, realizing that the test would not be repealed, prorogued Parliament and proceeded to exercise the "dispensing with penal laws" power. By this he claimed that it was the prerogative of the crown to dispense with the execution of the penal laws in individual cases and to suspend the operation of any law altogether. To obtain the sanction of the Law Courts for this doctrine, a test case, known as Halsey's case, was brought to decide whether the king could allow a Catholic to hold office in the army without complying with the Test Act. After James had replaced some of the judges by more compliant lawyers, he obtained a decision that "it was of the king's prerogative to dispense with penal laws in particular instances". He acted on the decision by appointing Catholics to various positions, Lord Tyrconnel becoming Lord Lieutenant of Ireland, Lord Arundel Lord Privy Seal, and Lord Balloy becoming Lord Chancellor. The Tory minister Lord Rochester, who was regarded as the chief mainstay of the Established Church. The Church of England, which was rendered uneasy by the dismissal of Rochester, was further alienated by the king's action in appointing a Court of High Commission, which suspended the laws without the requisite indult for refusing to inhibit one of his clergy from preaching anti-Catholic sermons. The feeling was intensified by the liberty which Catholics enjoyed in London during 1686. Public chapels were opened, including one in the Royal Palace, the Jesuits founded a large school in the Savoy, and Catholic ecclesiastics appeared openly at Court.

At this juncture James, desiring to counterbalance the loss of Anglican support, offered toleration to the dissenters, who at the beginning of his reign had been severely persecuted. The influence of William Penn induced the king to issue on 4 April, 1687, the Declaration of Indulgence, which was granted to all, Catholic and Protestant alike. He also replaced Tory churchmen by Whig dissenters on the municipal corporations and the commission of Parliament, hoped to secure a new House of Commons which would repeal both the penal laws and the Test. But
he underestimated two difficulties, the hatred of the dissenters for “popery” and their distrust of royal absolutism. His action in promoting Catholics to the Privy Council, the judicial bench, and the office of Lord lieutenant, sheriff, and magistrate, wounded these susceptibilities, while he further offended the Anglicans by attempting to restore to Catholics some of their traditional rights. At the university, the English Catholics obtained some footing both at Christ Church and University College, Oxford, and in March 1688, James gave the presidency of Magdalen College to Bonaventure Giffard, the Catholic Vicar Apostolic of the Midland District. This restoration of Magdalen as a Catholic college created the greatest excitement among the owners of ancient abbey lands. The presence of the papal nuncio, Mr. d'Adda, at Court and the public position granted to the four Catholic bishops, who had recently been appointed as vicars Apostolic, served to increase both the dislike of the dissenters to support a king whose acts, while of doubtful legality, were also subversive of Protestant interests, and likewise the difficulty of the Anglicans in practising passive obedience in face of such provocation. Surrounded by these complications, James issued his second Declaration of Indulgence on 10 June, 1688, and declared that it should be read in all the churches. This strained Anglican obedience to the breaking point. The Archbishop of Canterbury and six of his suffragans presented a petition questioning the dispensing power. The seven bishops were sent to the Tower, prosecuted, tried, and acquitted. This trial proved to be the immediate occasion of the Revolution, for, as Halifax said, “it hath brought all Protestants together and bound them up into a knot that cannot easily be untied”. While the bishops were in the Tower, another epoch-marking event occurred—the birth of a heir to the crown (10 June, 1688). Hitherto to the hopes of the king’s successors had been fixed on the succession of his Protestant daughter Mary, wife of William of Orange, the Protestant leader. The birth of Prince James now opened up the prospect of a Catholic dynasty just at a moment when the ancient anti-Catholic bigotry had been aroused by events in England and France. For besides the ill-advised acts of James, the persecution of the Hugenots by Louis XIV, consequent on the Revocation of the Edict of Nantes in 1685, revived old religious animosities. England was flooded with French Protestant refugees bearing everywhere the tale of the wickedness of the Catholic kings of France.

Unfortunately for James his whole foreign policy had been one of subservience to France, and at this moment of crisis the power of France was a menace to all Europe. Even Catholic Austria and Spain supported the threatened Protestant states, and the pope himself exhorted Louis XIV in a succession of wrongs, joined the universal resistance to France and was allied with William of Orange and other Protestant sovereigns against Louis and his single supporter, James. William had long watched the situation in England, and during 1687 had received communications from the opposition in which it was agreed that, whenever revolutionary action should become advisable, it should be carried out under William’s guidance. As early as the autumn of 1687 the papal secretary of state was aware of the plot to dethrone James and make Mary queen, and a French agent disseminated the first hints of the intrigue. The Duke of Norfolk then in Rome also learned it, and sent intelligence to the king before 18 Dec., 1687 (letter of d’Estrees to Louvois, cited by Ranke, II, 424). But James, though early informed, was reluctant to believe that his son-in-law would head an insurrection against him. On the day the seven bishops were acquitted seven English statesmen sent a letter to William inviting him to rescue the religion and liberties of England. But William was threatened by the danger on the Belgian frontier, and could not take action. Louis XIV made a last effort to save James, and warned the Dutch States General that he would regard any attack on England as a declaration of war against France. This was keenly resented by James, who regarded it as a slight upon English independence, and he repudiated the charge that he had made a secret treaty with France. Thereupon Louis left him to his fate, removed the French troops from Flanders to begin a campaign against the empire, and thus William was free to move. When it was clear that James, his son-in-law, was going to be deposed, the decretals granted one after another he tried to undo his work and win back the Tory churchmen to his cause. But he did not remove the Catholic officers or suggest the restriction of the dispensing power. In October Sunderland was dismissed from office, but William was already on the sea, and, though driven back by a storm, he re-embarked and landed at Torbay on 5 Nov., 1688. James at first prepared to resist. The army was sent to intercept William, but by the characteristic treachery of Churchill, disaffection was spread, and the king, not knowing where his soldiers were or what his friends would do, was forced to escape. At Sheerness he was stopped and sent back to London, where he might have proved an embarrasing prisoner had not his escape been connived at. On 25 Dec., 1688, he left England to take refuge with Louis XIV; the latter received him generously and granted him both palace and pension. On his first departure the mob had risen in London against the Catholics, and attacked chapels and houses, plundering and carrying off the contents. Even the ambassadors’ houses were not spared, and the Spanish and Sardinian embassy chapels were destroyed. Bishop Giffard (4 June, 1688) had committed to the Tower. Father Petre had escaped, and the Nuncio disguised himself as a servant at the house of the envoy from Savoy, till he was enabled to obtain from William a passport. So far as the English Catholics were concerned, the result of the Revolution was that their restoration to freedom of worship and liberation from the penal laws was delayed for a century and more.

So completely had James lost the confidence of the nation that William experienced no opposition and the Revolution ran its course in an almost regular manner. The Convention Parliament met on 22 Jan., 1689, declared that James, “having, by his treason and abdication of himself out of the kingdom, had abdicated the government, and that the throne was thereby vacant”, and “that experience had shown it to be inconsistent with the safety and welfare of this Protestant kingdom to be governed by a Popish Prince”. The crown was offered to William and Mary, who accepted the Declaration of Right, which laid down the principles of the constitution with regard to the dispensing power, the liberties of Parliament, and other matters. After their proclamation as king and queen, the Declaration was ratified by the Bill of Rights, and the work of the Revolution was complete. English Catholics have indeed had good cause to lament the failure of the king’s well-meant, if unwise, attempts to restore their liberty, and to regret that he did not act on the wise advice of Pope Innocent XI and Cardinal Howard to proceed by slow degrees and obtain first the plenitude of the Revolution, and then go on to restore their full civil rights. But on the other hand we can now realise that the Revolution had the advantage of finally closing the long struggle between king and Parliament that had lasted for nearly a century, and of establishing general principles of religious toleration in which Catholics were bound sooner or later to be included.
REVOLUTION

EDWIN BURTON.

Revolution, French.—The last thirty years have given us a new version of the history of the French Revolution, the most diverse and hostile schools having contributed to it. The philosopher, Taine, drew attention to the affinity between the revolutionary and what he calls the classic spirit, that is, the spirit of abstraction which gave rise to Cartesianism and produced certain masterpieces of French literature. Moreover he admirably demonstrated the mechanism of the local revolutionary committees and showed how a daring Jacobin minority was able to enforce its will as that of "the people." Following up this line of research M. Augustin Cochin has quite recently succeeded the deputies, and the so-called indem- nity in which the revolutionary doctrine was developed and in which were formed men quite prepared to put this doctrine into execution. The influence of freemasonry in the French Revolution proclaimed by Louis Blanc and by freemasonry itself is proved by the researches of M. Cochin. Sorel has brought out the connexion between the diplomacy of the Revolution and that of the old regime. His works prove that the Revolution did not mark a break in the continuity of the foreign policy of France. The radically inclined historical school, founded and led by M. Aulard, has published numerous useful documents as well as the review, "La Revolution Francaise." Two years since, a schism occurred in this school, M. Mathiez undertaking in opposition to M. Aulard the defence of Robespierre, in consequence of which he founded a new review, "Les Annales Revolutionnaires," founded under Catholic auspices, to publish a series of texts bearing on revolutionary history. Lastly the works of Abbé Sicard have revealed in the clergy who remained faithful to Rome various tendencies, some legitimist, others more favourable to the new political forms, a new side of the history of the French clergy being thus developed. Such are the most recent additions to the history of the French Revolution. This article, however, will emphasize more especially the relations between the Revolution and the Church (see FRANCE).

Meeting of the Estates.—The starting point of the French Revolution was the convocation of the States General by Louis XVI. They comprised three orders, nobility, clergy, and the third estate, the last named being permitted to have as many members as the two other orders together. The electoral regulation of 24 January, 1789, assured the parochial clergy a large majority in the meetings of the bailiffages which were to elect clerical representatives to the States General. While chapters were to send to these meetings only a single delegate for ten canons, and each convent only one of its members, all the curés were permitted to vote. The number of the "third estate" of the States General was 300, among whom were 44 prelates, 206 curés, 50 canons and commendatory abbeys, and some monks. The clergy advocated almost as forcibly as did the Third Estate the establishment of a constitutional government based on the separation of the powers, the periodical convocation of the States General, their supremacy in financial matters, the responsibility of ministers, and the regular guarantee of individual liberty. Thus the concord and great reforms tending to the establishment of liberty by "orders" should disappear and where every member was to have a vote. Scarcely a fourth of the clergy had formally advocated this reform, but from the opening of the Estates it was evident that the parochial clergy desired individual voting which would give the majority of the Third Estate a voice in the direction of the Third Estate, the advocates of reform, an effectual preponderance.

As early as 23 May, 1789, at the curés at the house of the Archbishop of Bordeaux were of the opinion that the power of the deputies should be verified in the general assembly of the Estates, and on 17 June the members of the Third Estate proclaimed themselves the "National Assembly," the majority of the clergy decided (19 June) to join them. As the higher clergy and the nobility still held out, the king caused the hall where the meetings of the Third Estate were held to be closed (20 June), whereupon the clergy and the nobility repaired to the Jeu de Paume and an oath was taken not to disband till they had provided France with a constitution. After Mirabeau's thundering speech (23 June) addressed to the Marquis de Dreuët-Breza, master-of-ceremonies to Louis XVI, the king himself (27 June) invited the nobility to join the Third Estate. Louis XVI's dismissal of the reform minister, Necker, and the concentration of the royal army about Paris, brought about the insurrection of 14 July, and the capture of the Bastille. M. Funck-Brentano has destroyed the legends which rapidly arose in connexion with the celebrated fortress. There was no rising en masse of the people of Paris, and the number of the besiegers was but a thousand at most; only seven prisoners were found at the Bastille, four of whom were forgers, one a young man guilty of monstrous crimes and who for the sake of his family was kept at the Bastille that he might escape the death-penalty, and two insane prisoners. But in the public opinion the Bastille symbolised royal absolutism and the capture of this fortress was regarded as the overthrow of the whole regime, and foreign nations attached great importance to the event. Louis XVIII was induced before this agitation; Necker was recalled; Bastille became Mayor of Paris; Lafayette, commander of the national militia; the tricolour was adopted, and Louis XVI consented to recognize the title of "National Constituent Assembly." Te Deums and processions celebrated the taking of the Bastille; in the pulpit the Abbé Fauquet preached the harmony of religion and liberty. As a result of the establishment of the "vote by order" the political privileges of the clergy may be considered to have ceased to exist.

During the night of 4 August, 1789, at the instance of the Viscomte de Noailles, the Assembly voted with extraordinary enthusiasm the abolition of all privileges and feudal rights and the equality of all Frenchmen. A blow was thereby struck at the wealth of the clergy, but the churchmen were the first to give an example of sacrifice. Plurality of benefices and annates was abolished and the redemption of tithes was agreed upon, but not for all. The general state of the clergy becoming uneasy, demanded another discussion of the vote which had carried the redemption. The result was the abolition, pure and simple, of tithes without redemption. In the course of the discussion Buixot declared that the property of the clergy...
belonged to the nation. Louis XVI's conscience began to be alarmed. He temporized for weeks, then merely published the decrees as general principles, reserving the right to approve or reject the measures which the Assembly would take to enforce them.

**Declaration of the Rights of Man. Catholicism Ceases to be the Religion of the State.**—Before giving France a constitution the Assembly judged it necessary to breathe a new spirit into the Rights of Man and of the Citizen**, which should form a preamble to the Constitution. Camus's suggestion that to the declaration of the rights of man should be added a declaration of his duties, was rejected. The Declaration of Rights mentions in its preamble that it is made in the presence and under the auspices of the Supreme Being, but out of three of the articles proposed by the clergy, guaranteeing the respect due to religion and public worship, two were rejected after speeches by the Protestant, Rabaut Saint-Etienne, and Mirabeau, and the only article relating to religion was worded as follows: "No one shall be disturbed for his opinions, even religious, provided that manifestation does not disturb the public order established by law." In fact it was the wish of the Assembly that Catholicism should cease to be the religion of the State and that liberty of worship should be established. It subsequently declared Protestants eligible to sit in the Dec. 1789. They were to be treated as Frenchmen the heirs of Protestant refugees (10 July and 9 Dec., 1790), and took measures in favour of the Jews (28 January, 20 July, 16 Aug., 1790). But it soon became evident in the discussions relating to the Civil Constitution of the clergy that the Assembly desired that the Catholic Church, to which the majority of the French people belonged, should be subject to the State and really organized by the State.

The rumours that Louis XVI sought to fly to Mops and place himself under the protection of the army of Bouillé in order to organize a counter-revolutionary movement and his refusal to promulgate the Declaration of the Rights of Man, brought about an uprising in Paris. The mob set out to Versailles, and amid insults brought back the king and queen to Paris (6 Oct., 1789). Thenceforth the Assembly sat at this, first at the archbishop's residence, and then at the Tuileries. At this moment the idea of taking possession of the goods of the clergy in order to meet financial exigencies began to appear in a number of journals and pamphlets. The plan of confiscating this property, which had been suggested as early as 8 August by the financier de Tocqueville (24 Sept.), by the economist, Dupont de Nemours, and on 10 October was supported in the name of the Committee of Finances in a report which caused scandal by Talleyrand, Bishop of Autun, who under the old regime had been one of the two "general agents" charged with defending the financial interests of the French clergy. On 12 October Mirabeau requested the Assembly to decree (1) that the ownership of the church property belonged to the nation that it might provide for the support of the priests; (2) that the salary of each curé should not be less than 1200 livres. The plan was discussed from 13 October to 2 November. It was opposed by Boisgelin, la Luzerne, Bons, Dillon, the Abbé de Montesquiou, and the Abbé Maury, who contended that the clergy being a moral person could be an owner, disputed the estimates placed upon the wealth of the clergy, and suggested that their possessions should simply serve as a guarantee for a loan of 400,000,000 livres to the nation. The advocates of confiscation maintained that the clergy no longer existed as an order, that the property was like an escheated succession, and that the State had the right to claim it, that moreover the Royal Government had never expressly recognized the clergy as a proprietor, that in 1749 Louis XV had forbidden the clergy to receive anything without the authority of the State, and that he had lastly taken the measures which the Assembly would take to enforce them.

Finally, on 2 November, 1789, the Assembly decided that the clergy be "delisted" and "the property of the dispossessed" of the nation. The results of this vote were not long in following. The first was Treilhard's motion (17 December), demanding in the name of the ecclesiastical committee of the Assembly, the closing of useless convents, and decreeing that the State should permit the religious to release themselves from their monastic vows.

The discussion of this project began in February, 1790, after the Assembly by the creation of assemblies of departments, districts, and commons, had proceeded to the administrative reorganization of France. The discussion was again very violent. On 13 February, 1790, the Assembly submitted to the nation the radical suggestions of Barnave and Thouret, decreed as a "constitutional article" that not only should the law no longer recognize monastic vows, but that religious orders and congregations were and should remain suppressed in France, and that no others should be created. The Assembly also planned a partial suppression of monastic orders the Assembly voted for their total suppression. The proposal of Cassali (17 February) calling for the dissolution of the Constituent Assembly, and the right-of-earffort's made by the higher clergy to prevent Catholics from purchasing the confiscated goods of the Church provoked reprisals. On 17 March, 1790, the Assembly decided that the 400,000,000 livres worth of alienated ecclesiastical properties should be sold to municipalities which in turn should sell them to private buyers. On 14 April it decided that the maintenance of Catholic worship should be provided for without recourse to the revenues of former ecclesiastical property and that a sufficient sum, fixed at more than 133,000,000 livres for the first year, should be entered in the budget for the allowances to be made to the clergy; on 17 April it proceeded to deal with the less wealthy clergy. In the papers issued by the Government paying interest at 5 per cent, and which were to be accepted as money in payment for the ecclesiastical property, thenceforth called national property; finally, on 9 July, it was decreed that all this property should be paid up for.

**Civil Constitution of the Clergy.**—On 6 February, 1790, the Assembly charged its ecclesiastical committee, appointed 20 Aug., 1789, and composed of fifteen members to prepare the reorganization of the clergy. Fifteen new members were added to the committee on 7 February. The "constituents" were disciples of the eighteenth-century philosopbes who subordinated religion to the State; moreover, to understand their standpoint it is well to bear in mind that many of them were jurists imbued with Gallican and Josephist ideas. Finally Taine has proved that in many respects their religious policy merely followed in the footsteps of the old regime, while the old regime protected the Catholic Church and made it the church exclusively recognized, the constituents planned to enslave it after having stripped it of its privileges. Furthermore they did not take into account that there were mixed matters that can only be regulated by agreement with ecclesiastical authority. They were especially incensed against the clergy after the consistorial address in which Pius VI (22 March, 1790) reproved some of the measures already taken by the Constituent Assembly, and by the news re-
ceived from the West and South where the just dissatisfaction of Catholic conceptions had provoked disturbances; in particular the election of the Protestant Raspot Saint-Étienne to the presidency of the National Assembly brought about commotions at Avignon which were blamed by the pope for these disturbances the Civil Constitution of the Clergy was developed. On 29 May, 1790, it was laid before the Assembly. Bonal, Bishop of Clermont, and some members of the Right requested that the project should be submitted to a national council or to the pope. But the Assembly proceeded; it discussed the Civil Constitution of the Clergy from 1 June to 12 July, 1790, on which date it was passed.

This Constitution comprised four titles. Title I, Ecclesiastical Offices: Diocesan boundaries were to agree with those of departments, 57 episcopal sees being thus suppressed. The title of archbishop was abolished; out of 83 remaining bishoprics 10 were called metropolitan bishoprics and given jurisdicction over the neighbouring dioceses. No section of French territory should recognize the authority of a bishop living abroad, or of his delegates, and this, adds the constitution, "with an undivided and absolute unity of faith and the communion which shall be maintained with the head of the Universal Church". Canonries, prebends, and priories were abolished. There should no longer be any sacerdotal posts especially devoted to fulfilling the conditions of Mass foundments. All monasteries were abolished.

Title II, Appointment to Benefices: Bishops should be appointed by the Electoral Assembly of the department; they should be invested and consecrated by the metropolitan and take an oath of fidelity to the nation, the King, the Law, and the Constitution; they should not seek any confirmation from the pope. Parish priests should be elected by the electoral assemblies of the districts. Thus all citizens, even Protestants, Jews, and nominal Catholics, might name titulars to ecclesiastical offices, and the first obligation of priests and bishops was to take an oath of fidelity to the Constitution which denied to the Holy See any effective power over the Church.

Title III, Salary of Ministers of Religion: The Constitution fixed the salary of the Bishop of Paris at 51,000 livres (about $10,200), that of bishops of towns whose population exceeded 50,000 souls at 20,000 livres (about $4000), that of other bishops at 12,000 livres (about $2400), and that of curates ranging from 6000 (about $1200) to 1200 livres (about $240). For the lower clergy this was a betterment of their material condition, especially as the real value of these sums was two and one-half times the present amount. Title IV, dealing with residence, made very severe conditions regarding the absences of bishops and priests.

At the festival of the Federation (14 July, 1790) Talleyrand and three hundred priests officiating at the altar of the nation erected on the Champ-de-Mars wore the tri-coloured girdle above their priestly vestments, a sight which characterizes the beginning of the Revolution. Deputations were present from the towns of France, and there was inaugurated a sort of cult of the Fatherland, the remote origin of all the "Revolutionary culte". On 10 July, 1790, in a confidential Brief to Louis XVI, Pius VI expressed the alarm with which the project under discussion filled him. He commissioned two ecclesiasties who were ministers of Louis XVI, Champion de Cisé and Lefranc de Pomégnan, to urge the king not to sign the Civil Constitution of the Clergy. On 28 July, in a letter to the pope, Louis XVI replied that he would not "offer his death in his soul", to promulgate the Constitution, that he would reserve the right to broach as soon as possible the matter of some concession, but that if he refused, his life and the lives of his family would be endangered. The pope replied (17 August) that he still held the same opinion of the Constitution, but that he would make no public declaration on the subject until he consulted with the Sacred College. On 24 August the king promulgated the Constitution, for which the pope inflicted a brief of excommunication on 22 September.

M. Mathies claims to have proved that the hesitancy of Pius VI was due to temporal rather than to spiritual considerations, to his serious fears about the affairs of Avignon and the Comtat Venaissin, where certain popular parties were clamouring for French troops, but the truth is that Pius VI, who had made known his opinion of the Constitution to two French prelates, was awaiting some manifestation on the part of the French episcopate. Indeed the bishops spoke before the pope had spoken publicly. At the end of October, 1790, they published an "Exposition des principes sur la constitution civile du clergé", compiled by Boisgelin, Archbishop of Aix, in which they rejected the Constitution and called upon the faithful to do the same. This publication marks the beginning of a violent conflict between the episcopate and the Constitution. A decree of 22 November, 1790, a supposititious decree, stipulated that all bishops and priests should within a week, under penalty of losing their offices, take the oath to the Constitution, that all who refused and who nevertheless continued to discharge their priestly functions should be prosecuted as public enemies of the state. The king, much disturbed by this decree, eventually sanctioned it (26 December, 1790) in order to avoid a rising.

Hitherto a large section of the lesser clergy had shown a certain amount of sympathy for the Revolution, but when it was seen that the episcopal members of the Assembly refused to take the oath, thus sacrificing their sees, a number of the priests showed this disinterested example. It may be said that from the end of 1790 the higher clergy and the truly orthodox elements of the lower clergy were united against the revolutionary measures. Thenceforth there were two classes, the non-juring or refractory priests, who were faithful to Rome and refused the oath, and the jurors, sworn, or Constitutional priests, who had consented to take the oath. M. de la Gorce has recently sought to estimate the exact proportion of the priests who took the oath. Out of 128 bishops there were only four, Talleyrand of Autun, Brienne of Eure, Jareme of Orange, and Viviers; three coadjutors or bishops in portibus Gobel, Coadjutor Bishop of Bâle; Martial de Brienne, Coadjutor of Sens; and Dubourg-Miraudet, Bishop of Babylon. In the important towns most of the priests refused to take the oath. Statistics for the small boroughs and the country are more difficult to obtain. The national archives preserve the complete dockets of 42 departments which were sent to the Constituent Assembly by the civil authorities. This shows that in these 42 departments of 23,063 priests called upon to swear, 13,118 took the oath. Of the other 10,000 there would be out of the 6789 priests, 157 priests, or 7% of the total, in 57 jurisdictions against 43 to 44 non-jurors. M. de la Gorce gives serious reasons for contesting these statistics, which were compiled by zealous bureaucrats anxious to please the central administrators. He asserts on the other hand that the schism had little hold in fifteen departments and concludes that in 1791 the number of priests faithful to Rome was 55 out of 100; this is a small enough majority, but one which M. de la Gorce considers authentic.

On 5 February, 1791, the Constituent Assembly forbade every non-juring priest to preach in public. In March the elections to provide for the vacant episcopal sees and presbyteries grew in the Church of France; young and ambitious priests, better known for their political than for their religious zeal, were candidates, and in many places
owing to the opposition of good Catholics those elected had much difficulty in taking possession of their churches. At this juncture, seeing the Constitutional Church was set up in France against the legal Church of France and of St. Firs VI, he declared it to the bishops and one to Louis XVI, to inquire if there remained any means to prevent schism; and, finally, on 13 April, 1791, he issued a solemn condemnation of the Civil Constitution in a solemn Brief to the clergy and the people. On 2 May, 1791, the annexation of the Constitutions of the clergy of the French troops marked the rupture of diplomatic relations between France and the Holy See. From May, 1791, there was no longer an ambassador from France at Rome or a nuncio at Paris. The Brief of Pius VI encouraged the resistance of the Catholics. The French troops by force of arms expelled the French crowds of the faithful. Then mobs gathered and beat and outraged nuns and other pious women. On 7 May, 1791, the Assembly decided that the non-juring priests as prêtres habitués might continue to say Mass in parochial churches or conduct their services in other churches on condition that they would respect the laws and not stir up revolt against the Civil Constitution. The Constitutional priests became more and more unpopular with good Catholics; Sciout's works go to show that the "departmental directories" had to spend their time in organizing popular committees to support the Constitutional priests in their parishes against the opposition of good Catholics, or to prosecute the non-juring priests who heroically persisted in remaining at their posts. Finally on 9 June, 1791, the Assembly forbade the publication of all Bulls or Decrees of the Court of Rome, at least until they had been submitted to the Executive body and their publication authorised. Thus Revolutionary France not only broke with Rome, but wished to place a barrier between Rome and the Catholics of France.

The king's tormenting conscience was the chief reason for his attempted flight (20-21 June, 1791). Before fleeing he had addressed to the Assembly a declaration of his dissatisfaction with the Civil Constitution of the Clergy, and once more protested against the moral violence which had compelled him to accept such a document. Haltet at Varennes, Louis XVI was brought back on 26 June, and was summoned to sign his functional renunciation of the Civil Constitution, to which he took the oath 13 Sept., 1791. On 30 Sept., 1791, the Constituent Assembly dissolved, to make way for the Legislative Assembly, in which none of the members of the Constituent Assembly could sit. The Constituent Assembly had passed 880 laws and 330 decrees under the old administration. Its chief error from a social standpoint, which Anatole Leroy-Beaulieu calls a capital one, was to pass the Chapelier Decree (15 June, 1791), which forbade working people to band together and form associations "for their so-called common interest," and their hatred for certain abuses of the old corporations, the Constituents did not understand that the world of labour should be organized. They were responsible for the economic anarchy which reigned during the nineteenth century, and the present syndicate movement as well as the efforts of the social Catholics in conformity with the Encyclical "Rerum novarum" marks a deep and decisive reaction against the work of the Constituent Assembly.

The Legislative Assembly.—When the Constituent Assembly disbanded (30 Sept., 1791), France was in a state of religious question. More than 200,000 priests went out of the Church, the factitious creation of the law; the old Church was ruined, demolished, hunted down, and the general amnesty decreed by the Constituent Assembly before disbanding could do nothing towards restoring peace in the country, where that Assembly's bungling work had unsetled the consciences of individuals. The parties in the Legislative Assembly were soon irreconcilable. The Feuillants, and the Right saw no salvation in the Constituent; the Girondins on the Left, and the Montagnards on the Extreme Left, made ready for the Republic. There were men who, like the poet André Chénier, dreamed of a complete separation of Church and State. "The priests," he wrote in a letter to the "Ministre de l'Intérieur" (9 October, 1791), "who dare to tell the Estates when no one is concerned about them, and they will always trouble them while anyone is concerned about them as at present." But the majority of the members of the Legislative Assembly had sat in the departmental or district assemblies; they had fought against the non-juring priests and brought violent passions and a hostile spirit to the Legislative Assembly. A report from Gensonné and Gallois to the Legislative Assembly (9 October, 1791) on the condition of the provinces of the West denounced the non-juring priests as exciting the populace to rebellion and called for measures against them. It accused them of complicity with the émigrés bishops. At Avignon the Revolutionary Lécuyer, having been slain in a church, some citizens reputed to be partisans of the pope were thrown into the ancient papal castle and strangled (16-17 Oct., 1791). Calvados was also the scene of several violent disturbances. And on 16 November, 1792, the Assembly, instead of repairing the tremendous errors of the Constituent Assembly, took up the question of the non-juring priests. On 29 November, on the proposal of François de Neufchâteau, it decided that if within eight days they did not take the civil oath they should be deprived of all salary, that they should be under the surveillance of the authorities, that if troubles arose where they resided they should be sent away, that they should be imprisoned for a year if they persisted in remaining and for two years if they were convicted of having provoked disobedience to the king. Finally it forbade the non-juring priests the legal exercise of worship. It also requested from the departmental directories lists of the jurors and non-jurors, that it might, as it said, "stamp out the rebellion which disguises itself under a pretended dissidence in the exercise of the Catholic religion." Thus its decree ended in a threat. But the non-juring decree was far from being annulled by Louis XVI and the Assembly. On 9 Dec., 1791, the king made his veto known officially. Parties began to form. On one side were the king and the Catholics faithful to Rome, on the other the Assembly and the priests who had taken the oath. The legislative power was on one side, the executive power on the other. On 3 March, 1792, the Assembly accused the ministers of Louis XVI; the king replaced them by a Girondin ministry headed by Dumouriez, with Roland, Servan, and Claviére among its members. They had a double policy: abroad, war with Austria, and at home, measures against the non-juring priests. Louis XVI, surrounded by dangers, was also accused of duplicity; his secret negotiations with foreign courts made it possible for his enemies to say that he had already predisposed against France.

A papal Brief of 19 March, 1792, renewed the condemnation of the Civil Constitution and visited with major excommunication all juring priests who after sixty days should not have retracted, and all Catholics who remained faithful to these priests. The Assembly replied by the Decree of 27 May, 1792, declaring that all non-juring priests might be deported by the directory of their departments. B. de la Place, a member who desired the priests should return after expulsion they would be liable to ten years' imprisonment. Louis vetoed this decree. Thus arose a struggle not only between Louis XVI and the Assembly, but between the king and his ministry. On 3 June, 1792,
the Assembly decreed the formation of a camp near Paris of 20,000 volunteers to guard the king. At the ministerial council Roland read an insulting letter to Louis, in which he called upon him to sanction the decrees of November and May against the non-juring priests. He was dismissed, whereupon the populace of Paris invaded the Tuileries (25 July, 1792), and for several hours the king and his family were the objects of all manner of outrages. After the public manifesto of the Duke of Brunswick in the name of the powers in coalition against France (25 July, 1792) and the Assembly’s declaration of the 14th September that it had petitioned the King for the deposition of the king, who was accused of being in communication with foreign rulers. On 10 August, Santerre, Westermann, and Fournier l’Américain at the head of the national guard attacked the Tuileries defended by 800 Swiss. Louis refused to defend himself, and with his family sought refuge in the Legislative Assembly. The Assembly passed a decree which suspended the king’s powers, drew up a plan of education for the dauphin, and convoked a national convention. Louis XVI was imprisoned in the Temple by order of the insurrectionary Commune of Paris.

The news spread through France caused by the threatened danger from without; arrests of non-juring priests multiplied. In an effort to make them give way. The Assembly decided (15 August) that the oath should consist only in the promise to uphold with all one’s might liberty, equality, and the execution of the law, or to die at one’s post. But the non-juring priests remained firm and refused, even this second oath. On 26 August the Assembly decreed that within fifteen days they should be expelled from the kingdom, that those who remained or returned to France should be deported to Guians, or be executed in ten years if they should so be sentenced. Then extended this threat to the priests, who, having no publicly recognized priestly duties, had hitherto been dispensed from the oath, declaring that they also might be expelled if they were convicted of having provoked disturbances. This was the signal for a real civil war. The peasants armed in La Vendée, Deux Sèvres, Loire Inférieure, Maine and Loire, Ille and Vilaine. This news and that of the invasion of Champagne by the Prussian army caused hidden influences to arouse the popular societies; hence the September massacres. In the provinces of La Force, the peasants joined the Abbé de Saint-Simon and before the end of the year, at least 1500 women, priests and soldiers fell under the axe or the club. The celebrated tribunal, Danton, cannot be entirely acquitted of complicity in these massacres. The Legislative Assembly terminated its career by two new measures against the Church: it deprived priests of the right to register births, etc., and authorized divorce. Seizing the civic state was not in the minds of the Constituents, but was the result of the blocking of the Civil Constitution of the Clergy. The Legislative Assembly was induced to enact it because the Catholics faithful to Rome were accused to Congress, as priests for the registering of births, baptisms, and deaths.

The Convention; The Republic; The Reign of Terror.—The opening of the National Convention (21 Sept., 1792) took place the day following Dumourier’s victory at Valmy over the Prussian troops. The constitutional bishop, Grégoire, proclaimed the new Constitution as much as the State as the assembly by fifteen constitutional bishops and twenty-eight constitutional priests. But the time was at hand when the constitutional clergy in turn was to be under suspicion, the majority of the Convention being hostile to Christianity itself. As early as 1792, Congress enjoined that the salaries of the priests be suppressed and that henceforth no religion should be subsidised by the State, but the motion was rejected for the time being. Henceforth the Convention enacted all manner of arbitrary political measures: it undertook the trial of Louis XVI, and on 2 January, 1793, “hurled a king’s head at Europe”. But from a religious standpoint it was more timid; it feared to disturb the Alliance of Savoy between France and Spain, and the movement of annexing to France. From 10 to 15 March, 1793, formidable insurrections broke out in La Vendée, Anjou, and a part of Brittany. At the same time Dumouries, having been defeated at Neerwinden, sought to turn his army against the Convention, and Louis himself went out to the Assembly, for the deposition of the king, who was accused of being in communication with foreign rulers. On 10 August, Santerre, Westermann, and Fournier l’Américain at the head of the national guard attacked the Tuileries defended by 800 Swiss. Louis refused to defend himself, and with his family sought refuge in the Legislative Assembly. The Assembly passed a decree which suspended the king’s powers, drew up a plan of education for the dauphin, and convoked a national convention. Louis XVI was imprisoned in the Temple by order of the insurrectionary Commune of Paris.

Increasingly severe measures were taken chiefly against the non-juring clergy. On 18 Feb., 1793, the Convention voted a prise of one hundred livres to whomsoever should denounce a priest liable to deportation and who remained in France despite the law. On 1 March they were sentenced to perpetual banishment and their property confiscated. On 18 March it was decreed that any émigré, or person arrested on French soil and not released within twenty-four hours. On 23 April it was enacted that all ecclesiastics, priests or monks, who had not taken the oath prescribed by the Decree of 15 August, 1792, should be transported to Guiana; even the priests who had taken the oath should be treated likewise if six citizens should denounce them for lack of citizenship. But despite all these measures the non-juring priests remained faithful to Rome. The pope had maintained in France an official internuncio, the Abbé de Salamon, who kept himself in hiding and performed his duties at the risk of his life, gave the name of “the prisoner in prison” to those committed orders. The proconsuls of the Convention, Frémon and Barras at Marseilles and Toulon, Tallien at Bordeaux, Carrier at Nantes, perpetuated abominable massacres. In Paris the Revolutionary Tribunal, carrying out the proposals of the public accuser, Fouquier-Tinville, inaugurated the Reign of Terror. The proscription of the Girondins by the Montagnards (2 June, 1793), marked a progress in demagogy. The assassination of the bloodthirsty demagogue, Marat, by Charlotte Corday (13 July, 1793) gave rise to extravagant manifestations in honour of Marat, who was the principle of the whole subsequent course of the Convention. News came of insurrections in Caen, Marseilles, Lyons, and Toulon; at the same time the Spaniards were in Roussillon, the Piedmontese in Savoy, the Austrians in Valentien, and the Vendean defeated Kleber at Torou (Sept., 1793). The era of Convention decreed a rising en masse; the heroic resistance of Valenciennes and Mains gave Carnot time to organise new armies. At the same time the Convention passed the Law of Suspects (17 Sept., 1793), which authorised the imprisonment of almost anyone and as a consequence of which 30,000 were imprisoned. Informating became a trade in France. Queen Marie Antoinette was beheaded 16 October, 1793, fourteen Carmelites who were executed 17 July, 1794, were declared Venerable by Leo XIII in 1902.

From a religious point of view a new feature arose this period—the constitutional clergy, accused of sympathy with the Girondins, came to be suspected by the Convention, which took steps to suppress it. But conflicts arose between the constitutional priests and the civil authorities with regard to the decree of the Convention which did not permit priests to ask those intending to marry if they were baptized, had been to confession, or were divorced. The constitutional clergy therefore refused to act. It required them to give apostate priests the nuptial blessing. Despite the example of the constitutional
bishop, Thomas Lindet, a member of the Convention, who won the applause of the Assembly by announcing his marriage, despite the scandal given by Gobel, Bishop of Paris, in appointing a married priest to a post in Paris, the majority of constitutional bishops resolved to the marriage of the priests. The conflict between them and the Convention became notorious when, on 19 July, 1793, a decree of the Convention decided that the bishops who directly or indirectly offered any obstacle to the marriage of priests should be deposed and replaced. In October the bishops of Public Safety had the constitutionality of the priests themselves should be deposed if they were found wanting in citizenship. The measures taken by the Convention to substitute the Revolutionary calendar for the old Christian calendar, and the decrees ordering the municipalities to seize and melt down the bells and treasures of the churches, proved that certain currents prevailing tending to the dechristianization of France. On the one hand the rest of décadi, every tenth day, replaced the Sunday rest; on the other the Convention commissioned Leonard Bourdon (19 Sept., 1793) to collect a compilation of the servile acts of Republican influence, to replace the lives of the “church fathers” in the schools. The “minisentatives”, sent to the provinces, closed churches, hunted down citizens suspected of religious practices, endeavoured to constrain priests to marry, and threatened with deportation for lack of citizenship priests who refused to abandon their posts. Persecution of the Convention. At the same time Mathies on the other hand considers that Robespierre did not condemn the dechristianisation in principle; that he knew the common hostility to the Committee of Public Safety of Moderates such as Thuriot and enthusiasts like Hébert; and that on the information of Basire and Hébert he suspected both parties of having furthered the fanatical measures of dechristianisation only to discredit the Convention abroad and thus more easily to plot with the powers hostile to France. Robespierre’s true intentions are still an historical problem. On 6 April, 1794, he commissioned Couthon to propose in the name of the Committee of Public Safety that a feast be instituted in honour of the Supreme Being, and on 7 May Robespierre himself outlined in a long speech the plan of the new religion. He explained that from the religious and Republican standpoint the idea of a Supreme Being was necessary, since every nation and every religion should dispense with a priesthood, and that priests were to religion what charlatans were to medicine, and that the true priest of the Supreme Being was Nature. The Convention desired to have this speech translated into all languages and adopted a decree of which the first article was “The French people recognise the existence of a Supreme Being and the immortality of the soul”. The same decree states that freedom of worship is maintained but adds that in the case of disturbances caused by the exercise of a religion those who “excite them by fantastic preaching and orgies” shall be punished according to the rigour of the law. Thus the condition of the Catholic Church remained equally precarious and the first festival of the Supreme Being was celebrated throughout France on 8 June, 1794, with aggressive splendour. Whereas the Ezagüés wished simply to destroy Catholicism, and in the temples of Reason political rather than moral doctrines were taught, Robespierre desired that the civic religion should have a moral code which he based on the two dogmas of God and the immortality of the soul. He was of the opinion that the idea of God had a moral value, that public morals and respect for the law were essential.
that of Fleurus (July, 1794), reassured the patriots of the Convention; those of Cholet, Mans, and Savenay marked the checking of the Vendean insurrection. Lyons and Tornico were restored, and the victory of Fleurus (26 June, 1794) gave Belgium to France. While danger from abroad was decreasing, Robespierre made the mistake of putting to vote in June the terrible law of 22 Prairial, which still further shortened the summary procedure of the Revolutionary tribunal and allowed sentences of death almost without trial even on the members of the Convention. The Convention took fright and the next day struck out this last clause. Montagnards like Tallien, Billau- Varenne, and Collet d’Herbois, threatened by Robes- pierre, joined with such Moderates as Bissy of Angouléme and Mailleux, but brought about a coup d'état of 9 Thermidor (27 July, 1794). Robes- pierre and his partisans were executed, and the Thermidorian reaction began. The Commune of Paris was suppressed, the Jacobin Club closed, the Revolutionary tribunal disappeared after having sent to the scaffold the public acuser Fouquier-Tinville and the Terrorist, Carrier, the author of the négades (drownings) of Nantes. The death of Robespierre was the signal for a change of policy which proved of advantage to the Church; many imprisoned priests were released and many émigré priests returned. While a law had been enacted to return to the Catholicism was repealed, but the application of them was greatly relaxed. The religious policy of the Convention became indecisive and changeable. On 21 December, 1794, a speech of the constitutional bishop, Grégoire, claiming effective liberty of worship, aroused violent murmurings in the Convention, but was applauded by the people; and when in Feb., 1795, the generals and commissaries of the Convention in their negotiations with the Vendéans promised them the restoration of their religious liberties, the Convention returned to the idea supported by Grégoire, and at the suggestion of the Protestant, Bissy d'Anglas, it passed the Law of 3 Vendéès (21 Feb., 1795), which marked the enfranchisement of the Catholic Church. This law enacted that the republic should pay salaries to the ministers of no religion, and that no churches should be reopened, but it declared that the excommunication should not necessarily follow. Immediately the constitutional bishops issued an Encyclical for the re-establishment of Catholic worship, but their credit was shaken. The confidence of the faithful was given instead to the non-juring priests who were returning in droves. The deputies were soon moved that in April, 1795, the Convention or- dered them to depart within a month under pain of death. This was a fresh outbreak of anti-Catholicism. With the fluctuation which thenceforth charac- terised it the Convention soon made a counter-move- ment. On 20 May, 1795, the assembly hall was invaded by the Jacobins and the ultra-royalist. These violences of the Extremists gave some in- fluence to the Moderates, and on 30 May, at the suggestion of the Catholic, Languaïns, the Convention decreed that (Law of 11 Prairial) the churches not confiscated should be placed at the disposal of citi- zens for the exercise of their religion, but that every priest who wished to officiate in these churches should previously take an oath of submission to the laws; those who refused might legally hold services in private houses. This oath of submission to the laws was much less serious than the oaths formerly pre- scribed by the Revolutionary authority, and the Abbé Sicard has shown how Emery, Superior General of St. Sulpice, Bausset, Bishop of Alais and other ecclesiastics were inclined to a policy of pacification and to think that such an oath might be taken. While it seemed to be favouring a more tolerant policy the Convention met with diplomatic successes, the reward of the military victories: the treaties of Paris with Tuscany, of the Hague with the Bata- line of the Republic, of Basle and of Mailleux, the treaty of the Alps, the Rhine, and the Meuse. But the policy of religious pacification was not lasting. Certain periods of the history of the Convention justify M. Champion's theory that certain religious measures taken by the Revolution- ariots were forced upon them by circumstances. The peace of Vincennes, the Treaty of the fleet, the Treaty with the Barons at Quiberon, aroused fresh as- pects of the oath of submission to the laws. The 19th of July was a very severe decree against deported priests who should be found on French territory; they were to be sentenced to perpetual banishment. Thus at the time when the Convention was disbanding, churches were separated from the State. In theory worship was free; the Law of 29 Sept., 1795 (7 Vendémiaire), on the religious policy, though still far from satisfactory to the clergy, was nevertheless an improvement on the laws of the Terror, but anarchy and the spirit of persecution still troubled the whole country. Nevertheless France owes to the Convention a number of institutions, the École Impériale, the École Polytechnique, the Conservatory of Arts and Crafts, the Bureau of Longitudes, the Institute of France, and the adoption of the decimal system of weights and measures. The vast projects drawn up with regard to primary, secondary, and higher education met with almost no results.

The Directory.—In virtue of the so-called "Constitution of the year III," promulgated by the Convention 23 Sept., 1795, a Directory of five members (27 Oct., 1795) became the executive, and the Coun- cils of Five Hundred and of the Ancients, the legisla- tive power. At this time the public treasuries were empty, which was one reason why the people came by degrees to feel the necessity of a strong restorative power. The Directors Carnot, Barras, Letourneur, Rewbell, La Revellière-Lépeaux were averse to Chris- tianity, and in the separation of Church and State wished that even the Constitutional episcopate, though they could not deny its attachment to the new regime, should become extinct by degrees, and when the constitutional bishops died they sought to prevent the election of successors, and multiplied proceedings against them. The decree of 16 April, 1798, which made death the penalty for provoking any attempt to overthrow the Republican government was a threat held perpetually over the heads of the non-juring priests. That the Directors really wished to throw difficulties in the way of all kinds of religion, despite theoretical declarations abo- ard freedom of worship, proved by the Law of 11 April, 1798, which forbade the use of bells and all sorts of public convocation for the exercise of religion, under penalty of a year in prison, and, in case of a second offence, of deportation. The Directory having ascertained that despite police interference some non- juring bishops were officiating publicly in Paris, and that before the end of 1796 more than thirty churches or oratories had been opened to non-juring priests in Paris, laid before the Five Hundred a plan which, after twenty days, allowed the expulsion from French soil, without admission to the oath prescribed by the Law of Vendémiaire, all priests who had not taken the Constitutional Oath prescribed in 1790 or the Oath of Liberty and Equality prescribed in 1792; those who after such time should be found in France would be put to death. But amid the discussions to which this project gave rise, the revolutionary Social-
ist conspiracy of Beauf é was discovered, which showed that danger lay on the Left; and on 25 Aug, 1798, the dreadful project which had only been passed with much difficulty by the Five Hundred was rejected by the Ancients.

The Directory began to feel that its policy of religious persecution was no longer followed by the Consul and also by the Consulat. In 1799, Bonaparte, who had become one of the Five Directors, violent discussions which took place from 26 June to 18 July, in which Royer-Collard distinguished himself, brought, to the vote the proposal of the deputy Dubreuil for the abolition of all laws against non-juring priests passed since 1791. The Directors, alarmed by what they considered a reactionary movement, commissioned General Augereau to effect the coup d'état of 18 Fructidor (4 Sept., 1797; the elections of 49 departments were quashed, two Directors, Carnot and Barthélémy, proscribed, 53 deputies deported, and the clergy and non-juring priests restored to their vigour. Organised hunting for these priests took place throughout France; the Directory cast hundreds of them on the unhealthy shore of Sinnamary, Guiana, where they died. At the same time the Directory commissioned Berthier to make the attack on the Papal States and the Pope, from which Bonaparte had refrained. The Roman Republic was proclaimed in 1798 and Pius VI was taken prisoner to Valence (see Pius VI). An especially odious persecution was renewed in France against the ancient Christian customs; it was known as the déchristianisation. Officers and municipal officials were called upon to overwhelm with vexations the partisans of Sunday and to restore the observance of déoctad. The rest of that day became compulsory not only for administrations and schools, but also for business and industry. Marriages could only be celebrated on déoctad at the chief town of each canton.

Another religious venture of this period was that of the Theophilanthropists, who wished to create a spirituallist church without dogmas, miracles, priesthood or sacraments, a sort of vague religiosity, similar to the ethical societies of the United States. Contrary to what was imagined, this society was soon dissolved, and its director, Mathieu, who had been separated from the ligue by Jean-Baptiste M. Mathieu has proved that Theophilianthropy was not founded by the director, la Révellière-Lépeaux. It was the private initiative of a former Gironde, the librarian Chemin Dupont, which gave rise to this cult; Vaudeville Haury, instructor of the blind and former Terrorist, and the physiocrate, Dupont de Nemours, collaborated with him. During its early existence, the new Church was persecuted by the agents of Cochon, Minister of Police, who was the tool of Carnot, and it was only for a short time, after the coup d'état of 18 Fructidor, that the Theophilanthropists benefited by the protection of the Révellière. In proportion to the efforts of the Directory for the culte décadéaire, the Theophilanthropists suffered and were persecuted; in Paris, they were sometimes treated even worse than the Catholic priest being at times permitted to occupy the buildings connected with certain churches which the Theophilanthropists were driven out. On a curious memoir written after 18 Fructidor entitled "Des circonstances actuelles qui peuvent terminer la Révolution et des principes qui doivent fonder la République en France", the famous Madame de Stuel, who was a Protestant, declared herself against Theophilanthropy; like many Protestants, she hoped that Protestantism would become the State religion of the Republic. Through its clumsy and odious religious policy the Directory exposed itself to serious difficulties. Disturbed by the anti-religious writings in France, the Belgian provinces revolted; 6,000 Belgian priests were proscribed. Brittany, Anjou, and Maine again revolted, winning over Normandy. Abroad the prestige of the French armies was upheld by Napoleon in Italy, but they were hated on the Continent, and in 1797 they were expelled from most of Italy. Bonaparte's return and the coup d'état of 18 Brumaire (10 November, 1799) were necessary to strengthen the glory of the French armies and to restore peace to the country and to consciences (see NAPOLEON).

GEORGES GYOT.
REX

Glorioso Martyrum, the hymn at Lauds in the Common of Martyrs (Commune plurimorum Martyrum) in the Roman Breviary. It comprises three strophes of four verses in Classical iambic dimeter, the verses rhyming in couplets, together with a fourth concluding strophe (or doxology) in unrhymed verses varying for the sake of accent. The first stanza will serve to illustrate the metric and rhymic scheme:

Rex gloriosae Martyrum,
Corona confitentium,
Qui respuestas terrea
Perducis ad celestia.

The hymn is of uncertain date and unknown authorship, Mone (Lateinische Hymnen des Mittelalters, III, 143, no. 732) assigning it to the sixth century and Daniel (Thesaurus Hymnologicus, IV, 139) to the ninth or tenth century. The Roman Breviary text is a revision, in the interest of Classical prosody, of an older form (given by Daniel, I, 248). The corrections are: terrea instead of terreia in the line "Qui respuestas terrea"; parescens for parendo in the line "Parendo confessoribus"; inter Martyres for in Martyribus in the line "Tu vince in Martyribus"; Larigitor indulgentia for the line "Do-nando indulgentiam". A non-prosodic correction is intende for appone in the line "Appone nostris vocibus". Daniel (IV, 139) gives the Roman Breviary text, but mistakenly includes the uncorrected line "Parendo confessoribus". He places after the hymn an elaboration of it in thirty-two lines, found written on leaves added to a Nuremberg book and intended to accommodate the hymn to Protestant doctrine. This elaborated form uses only lines 1, 2, 4, 5, 6, 8, 9 of the original. Two of the added strophes may be quoted here to illustrate the possible reason (but also a curious misconception of Catholic doctrine in the apparent assumption of the lines) for the modification of the original hymn:

Velut infausta vasa
Ictus inter lapides
Videntur sancti martyres,
Sed fide durant fortiter.

Non fidunt suis meritis,
Sed sola tua gratia
Agnoscut se perserare
In tantis cruciatibus.

Of the thirteen translations of the original hymn into English, nine are by Catholics. To the list given in Julian, Dictionary of Hymnology, 988, should be added the versions of Bagshawe, Breviary Hymns (London, 1900), 86; Donahue, Early Christian Hymns (New York, 1908), 70. For many MS. references and readings, see Blume, Analecta Humnica, I (Leipzig, 1890), 129—26; Illemer, Der Curseus s. Benedicti Nuntiius (Leipzig, 1909), 67.

H. T. HENRY.

Semperterne Domine, the Roman Breviary hymn for Matins of Sundays and weekdays during the Paschal Time (from Low Sunday to Ascension Thursday). Cardinal Thomasius ("Opera omnia," II, Rome, 1747, 370) gives its primitive form in eight strophes, and Vasquez (op. cit. infra, III, 95) agrees with the conjecture, and present-day hymnologists confirm the hypothesis. The hymn is especially interesting for several reasons. In his "De arte metricis" (xxv) the Ven. Bede selects it from amongst "Alii Ambrosiani non pauci" to illustrate the difference between the metre of Classical iambics and the accentual rhythms imitating them. Ordinarily brief in his comment, he nevertheless refers to it in full (P. L., XXII, 174). "... fashioned exquisitely after the model of iambic metre" and quotes the first strophe:

XIII.—2

REYNOLDS

Sterne Domine, Rerum Creator omnium, Qui eras ante secula.
Semper cum patre filius.

Pimont (op. cit., III, 97) points out that, in its original text, it is amongst all the hymns, the one especially which must be given the highest accent for prosodical quantity, and that the (unknown) author gives no greater heed to the laws of elision than to quantity "qui eras," "mundi in primordio," "plasmasti hominem," "tue imagini," etc. The second strophe illustrates this well:

Qui mundi in primordio
Adam plasmasti hominem,
Qui tue imagini
Vultum dedit simili.

Following the law of binary movement, (the alternation of arsis and thesis), the accent is made to shorten long syllables and to lengthen short ones, in such wise that the verses, while using the external form of iambic dimeters, are purely rhythmic. Under Urban VIII, the correctors of the hymns omitted the fourth stanza and, in their zeal to turn the rhythm into Classical iambic dimeter, altered every line except one. Hymnologists, Catholic and non-Catholic, are usually sanguine in their judgment of the work of the correctors; but in this instance, Pimont, who thinks the hymn needed no alteration at their hands, nevertheless hastens to add that "never, perhaps, were they better inspired". And it is only just to say that, as found now in the Roman Breviary, the hymn is no less vigorous than elegant.

H. T. HENRY.

Rey, ANTHONY, educator and Mexican War chaplain, b. at Lyons, 19 March, 1807; d. near Cerro, Mexico, 19 Jan., 1847. He studied at the Jesuit college of Fribourg, entered the novitiate of that Society, 12 Nov., 1827, and was taught at Fribourg and Sion in Valais. In 1840 he was sent to the United States, appointed professor of philosophy in Georgetown College, and in 1843 transferred to St. Joseph's Church in Philadelphia. He became assistant to the Jesuit provincial of Maryland, pastor of Trinity Church, Georgetown, and vice-president of the college (1845). Appointed chaplain of the U. S. Army in 1846, he ministered to the wounded and dying at the siege of Monterrey amid the greatest dangers; after the capture of the city, he remained with the army at Monterey and preached to the rancheros of the neighbourhood. Against the advice of the U. S. officers, he set out for Monterey, preaching to a congregation of Americans and Mexicans at Cerro. It is conjectured that he was killed by a band under the leader Canales, as his body was discovered, pierced with lances, a few days later. He left letters dating from November, 1846, which were written in the "Woodstock Letters" (XVII, 149—50, 152—55, 157—59).

Dr. Backer-Sommervogel, Bibliothèque, IV, 1899; Appleton's Cyclopaedia of American Biography (New York, 1888), s. v.

REYNOLDS (GREENE), THOMAS, VENERABLE. See RYE, BARThOLOMEW, VENERABLE.
REYNOLDS (RAINOLDS, RAINOLDS, RAINOLDS, RAINOLDS) William, b. at Pinhorn near Exeter, about 1544; d. at Antwerp, 24 August, 1594, the second son of Richard Rainolds, and elder brother of John Rainolds, one of the chief Antwerp printers. He was known as "the authorised Version" of the Bible. Educated at Winchester School, he became fellow of New College, Oxford (1560-1572). He was converted partly by the controversy between Jewel and Harding, and partly by the personal influence of Dr. Allen. In 1575 Martin Martin in translating the Reims Testament. Some years before his death he had left the college to become chaplain to the Beguines at Antwerp. He translated several of the writings of Allen and Harding into Latin and wrote a "Refutation" of Whitaker's attack on the Reims version (Paris, 1585); "De justa reipublicae christiana reges impio et heresicii autho- ritate" (Paris, 1590), under the name of Rosseus; a treatise on the Blessed Sacrament (Antwerp, 1593); "Calvino-Turcianum" (Antwerp, 1597).

RHEIMS. See REIMS.

Rheims, Prefecture Apostolic of (Rostrom), in Switzerland, includes in general the district occupied by the Catholics belonging to the Rheto-Romano race in the canton of the Grisons (Graubünden). The prefecture is bounded on the north by the Prättigau, on the south by Lombardy, on the west by the Tyrol, on the east by the cantons of Tessin ( Ticino), Uri, and Glarus. During the sixteenth century the greater part of the inhabitants of the Grisons became Calvinists. In 1621 Paul V., at the entreaty of Bishop John Flugi of Coire (Chur) and Archduke Leopold of Austria, sent thither Capuchin missionaries from Brixen in the Tyrol; the first superior was P. Ignatius of Cenigio, who resided in Bressanone (1621-45) and conducted it under the title of prefect Apostolic. The best known of the missionaries is St. Fidelis of Sigmaringen, who was martyred. After the death of P. Ignatius the mission was carried on by the Capuchins of Brixen, represented in the mission by a sub-prefect. For a long time after the suppression of the religious orders by Napoleon, the mission was without an administrator; upon the restoration of the order, Capuchins from various provinces were sent into the mission. At present it is under the care of Capuchins of the Roman province. It has 22 parishes, in three of which the mission now in hand is to speak Italian; 82 churches and chapels; 40 schools for boys and girls; 7200 Catholics; 25 Capuchins. The prefect Apostolic lives at Sagens.

RHESENA, titular see in Syria Secunda, suffra- gan of Apamea. Rhephathes is mentioned in ancient times only by Josephus (Bel. Jud., VII, 5, 1), who says that in that vicinity there was a river which flowed six days and cessed on the seventh, probably an intermittent spring now called Feneqou or Deir Rafaanish, a village of the vilayet of Alep in the valley of the Orontes. The ancient name was preserved. At the time of Ptolemy (V, 14, 12), the Third Legion (Gallica) was stationed there. Hierocles (Synecodemus, 712, 8) and Georgius Cyprius, 870 (Oelser, "Georgii Cyprii descriptio orbis romani", 44) mention it among the towns of Syria Secunda. The crusaders passed through it at the end of 1099; it was taken by Baldwin of Flanders in 1144; Ibelin at Constantiopolis ("Historien der croisades"), passim; Rey in "Bulletin de la Société des antiquaires de France" (Paris, 1888, 268). The only bishops of Rhephathes known are (Le Quien, "Orients christianus", II, 921): Basil, present at the Council of Nicea, 325; Geron- timus at Philippopolis, 354; Basil at Constantinople (either 381 or 382); Lambadius at Chalcodon, 451; Zoilus about 518; Nonnus, 536. The see is, as late as the tenth century in the "Notitia episcopatum" of Antioch (Veilhè, "Echos d'Orient", X, 94). The see is, D. C. Gr., and Rom. geogr., a. v.; Müller, notes on Ptolemy, ed. Diodor, I, 973.

S. PÉTRIDES.

Rheinberger, Joseph Gabriel, composer and organist, b. at Vaduz, in the Principality of Liechtenstein, Bavaria, 17 March, 1839; d. at Munich, 25 Nov., 1901. When seven years old, he already served as organist in his parish church. At the age of eight composed a mass for three voices. After enjoying for a short time the instruction of Choirmaster Schmutzer in Feldkirch, he attended the conservatory at Munich from 1851 to 1854, and finished his musical education with a course under Franz Lachner. In 1859 he was appointed to the theory of music and organ at the conservatory, a position which he held until a few months before his death. Besides his duties as teacher he acted successively as organist at the Court Church of St. Michael, conductor of the Munich Oratorio Society, and instructor of the solo artists at the royal opera. In 1867 he received the title of royal professor, and became inspector of the newly established royal school for music, now called the Royal Academy of Music. In 1877 he was promoted to the rank of royal court conductor, which position carried with it the direction of the music in the royal chapel. Honoured by his prince with the title of nobility and accorded the honorary degree of Doctor of Philosophy by the Munich University, Rheinberger for more than forty years wielded, as teacher of many of the most gifted young musicians of Europe and America, per- forming a service more influence than that of any other in his profession. As a composer he was remarkable for his power of invention, masterful technique, and a bold, solid style. Among his two hundred compositions are oratorios (notably "Christoforus" and "Monfort"); two operas; cantatas for solo, chorus, and orchest- ra; The Star of Bethlehem; "Klärchen auf Eberstein" etc.; smaller works for chorus and orchestra; symphonies ("Wallenstein"), overtures, and chamber music for various combinations of instruments. Most important of all his instrumental works are his twenty sonatas for organ, his most notable productions made since Mendelssohn. Rheinberger wrote many works to liturgical texts, namely, twelve masses (one for double chorus, three for four voices a cappella, three for women's voices and organ, two for men's voices, and one with orchestra), a requiem, Siobat Mater, and a large number of motets, and smaller pieces. Rheinberger's masses rank high as works of art, but some of them are defective in the treatment of the text. Joseph Renner, Jr., has recently remedied most of these defects, and made the masses available for liturgical purposes.

RHEIS, Joseph Rheinberger (Rathien, 1901); Renner, Rheinberger's Museum in Kirchen-musikalisches Jahrbuch (Ratis- bon, 1909).

JESPE OTTEN.

Rhesena, titular see in Osohemo, suffragan of Edessa. Rhesena (numerous variations of the name
RHO

appear in ancient authors) was an important town at the northern extremity of Mesopotamia near the sources of the Chaboros (now Khabour), on the way from Carchemish to Nicephorium about eighty miles from Nisibis and forty from Dara. Near by Gordian III fought the Persians in 243. Its coins show that it was under the sovereignty of Rome by St. Cyril, and received many letters from his successor St. Isaac. His successor Zeno defended Eutyches at the Second Council of Ephesus (451). Other bishops were: Alphius, the Massalian heretic; Ptolemy, about 460, Gregory, 610. Of the other bishops on the list one did not belong to Rhinocolura; the other three are Cretan heretics.

Rhiythymna, a titular see of Crete, suffragan of Gortyna, mentioned by Ptolemy, III, 15, Pliny, IV, 69, and Stephen of Byzantium. Nothing is known of its ancient history but some of its inhabitants are more extant. It still bears the name of Rhythymnon (Turkish, Reemio, It. and Fr. Retimo). It is a small port on the north side of the island thirty-seven miles south-west of Candia; it has about 10,000 inhabitants (half Greeks, half Mussulmans), and some Catholics who have a church and school. Rhithymna exports oil and soap. During the occupation of Crete by the Venetians it became a Latin diocese. According to Corner (Creta sacra, II, 138 sq.), this see is identical with Calamona. For a list of twenty-four bishops (1257 to 1592) see Eubel (Hier. cath. med. vi, I, 161; II, 128; III, 161). Three other bishops are mentioned by Corner from 1611 to 1705. The Turks who had already conquered Crete in 1572, captured it again in 1646. At present the Greeks have a bishop there who bears the combined titles of Rhythymnon and Alupopotamos. The date of the foundation of the see is unknown. It is not mentioned in the Middle Ages in any of the Greek "Notitiae episcopatuum".

Rhinocolura, titular see in Augustamnica Prima, suffragan of Pelusium. Rhinocolura or Rhinocorura was a maritime town so situated on the boundary of Egypt and Palestine that ancient geographers attributed it sometimes to one country and sometimes to the other. Its history is unknown. Diodorus Siculus (I, 60, 5) relates that it must have been defended by Actiactis, King of Ethiopia, who established there convicts whose noses had been cut off; this novel legend was intended to give a Greek meaning to the name. Strabo (XVI, 781) says that it was formerly the great emporium of the merchandise of India and Arabia, which was unloaded at Leuce Come, on the eastern shore of the Red Sea, whence it was transported via Petra to Rhinocolura. It is identified usually with the present fortified village El Arish, which has 4,000 inhabitants, excluding the garrison, situated half a mile from the sea, and has some ruins of the Roman period. It was taken by the French in 1799, who signed there in 1800 the treaty by which they evacuated Egypt. To-day it and its vicinity are occupied by Egypt, after having been for a long period claimed by Turkey. The village is near a stream which bears its name (Wadi el-Arish), and receives its waters from central Sinai; it does not flow in winter, but is torrential after heavy rain. It is the "nahal Mihrayim", or stream of Egypt, frequently mentioned in the Bible (Gen., xv, 18, etc.), as marking on the south-west the frontier of the Pharaohs. Instead of the ordinary true name of the Hebrew name, the Septuagint in Is., xxvii, 12, renders it by "Parochopeo"; see St. Jerome (In Isaiah, XXVII, 12 in P. L., XXIV, 313).

Le Quen (Oriens Christianus, II, 541) gives a list of thirteen bishops of Rhinocolura: the first does not belong to it. A Coptic manuscript also wrongly names a bishop said to have assisted in 325 at the Council of Nice. The first authentic titular known is St. Melas, who suffered exile under Valens and is mentioned on 16 January in the Roman Martyrology. He was succeeded by his brother Solomon. Polibius was the disciple of St. Epiphanius of Cyprus, whose life he wrote. Hermogenes assisted at the Council of Ephesus (431), of Severus, and of St. Cyril. The "Notititia dignitatum" (ed. Boecking, I, 400) represents it as under the jurisdiction of the governor or Dux of Carchemish. Hierocles (Synecodemus, 714, 3) also locates it in this province but under the name of Theodosiopolis; it had in fact obtained the favour of Theodosius the Great and taken his name in 395. It was fortified by Justinian. In 1393 it was nearly destroyed by Tamerlane's troops. To-day under the name of Ras-el-Ain, it is the capital of a casa in the vilayet of Diarbekir and has only 1,500 inhabitants. Le Quen (Oriens Christianus, II, 979) mentions nine bishops of Rhessaena: Antiochus, present at the Council of Nicaea (325); Euemus, who (about 420) forced the Persians to raise the siege of the town; John, at the Council of Antioch (444); Olympus at Chalcedon (451); Andrew (about 450); Peter, exiled with Severian (518); Ancholius, his successor, a Monophysite; Daniel (530); Sebastianus (about 620). Cornutus, Bishop of Rhissaena, in St. Gregory the Great possesses it. The see is again mentioned in the tenth century in a Greek "Notitiae episcopatuum" of the Patriarchate of Antioch (Vainéh, in "Echos d'Orient", X, 94). Le Quen (ibid., 1329 and 1513) mentions two Jacobite bishops: Socias, author of a hymn and of homilies, and Theodosius (1035). About a dozen others are known.

Diodot, I, 688; Pauly, Real. Beitr., Dict. of the Bible, s. v.; Amélineau, Geographie de l'Egypte e l'Age du cerf, 404; Ritter, Brückwede, XVI, 145; XVI, 90, 41.

S. Pétrasdes.

Rhinocholura, Rhythymna, Rhythymnon, Rithymna, a metropolis of Cretan chieftains, situated on the Euxine, it is one of the ancient archdioceses, finally a metropolitan; the dates of the changes are uncertain. With the decrease of the Christian element the suffragan has become a simple exarchate. To-day there are no more than 400 Greeks among the 2000 inhabitants of Rizih, as the Turks call the town. It is the capital of the Sanjak of Lazi in the Vilayet of Trebisond, and exports oranges and lemons. Le Quen (Oriens Christianus, I, 517) mentions three bishops; Nectarius, present at the Council of Nice, 767; John, at the Council of Constantinople, 877; and Josaphat (metropolitan) in 1055.

Smith, Dict. of Greek and Roman Geog., s. v.; Moller, Notes on Ptolemy, ed. Diodot, I, 688.

S. Pétrasdes.

Rho, Giacomo, missionary, b. at Milan, 1593; d. at Peking 27 April, 1638. He was the son of a noble and learned jurist, and at the age of twenty entered the Society of Jesus. While poor success attended his early studies, he was later very proficient in
mathematics. After his ordination at Rome by Cardinal Bellarmine, he sailed in 1671 for the Far East with forty-four companions. After a brief stay at Goa he proceeded to Macao; where, during the siege of that city by the Dutch, he taught the inhabitants the use of artillery and thus brought about its deliverance. This service opened China to him. He rapidly acquired the knowledge of the native language and was summoned in 1631 by the emperor to Peking for the reform of the Chinese calendar. With Father Schall he worked to the end of his life at this difficult task. When he died, amidst circumstances exceptionally favourable to the Catholic mission, numerous Chinese officials attended his funeral. He left works relative to the correction of the Chinese calendar, to astronomical and theological questions.

N. A. WEBER.

Rhode Island. — The State of Rhode Island and Providence Plantations, one of the thirteen original colonies, is in extent of territory (land area, 1054 square miles), the smallest state in the American union. It includes the Island of Rhode Island, Block Island, and the islands adjacent to Narragansett Bay, bounded on the north and east by Massachusetts, on the south by the Atlantic Ocean, and on the west by Connecticut. The population, according to the United States Census of 1910, numbers 542,674. Providence, the capital, situated at the head of Narragansett Bay, and having a population of 224,528, is the industrial centre of an extremely wealthy manufacturing state, which has long since ranked as a chief manufacturing state, although the agricultural interests in certain sections are still considerable. That agriculture in Rhode Island has not kept pace with manufactures is illustrated by instances of rural population. Two country towns have from the inhabitants that lived in 1783, as few as others, but a few more than at that date; one town, less than in 1783; two less than in 1790, and another, less than in 1830. Coal exists and has been mined, but it is of graphic nature. Granite of high grade is extensively quarried. The value of stone quarried in 1902 was $7,334,623; the value of all other minerals produced, $39,998. The power supplied by the rivers gave early impetus to manufacturing. Rhode Islanders were the first in this country to apply the factory system to cotton manufacturing. At present the products of manufacturing are general, including cotton, woolen, and rubber goods, jewelry, silverware, machinery and tools. In 1905 there were 161 manufacturing establishments with a total capitalization of $215,901,375; employing 97,318 workers with a payroll of $43,112,837, and an output of the value of $302,109,585. The total assets of banks and trust companies in June, 1909, were $252,015,122. The bonded State debt, 1 Jan., 1910, was $4,500,000 with a sinking fund of $654,999. The direct foreign commerce is small, imports in 1908 being $1,499,116 and exports, $21,281. The population of Rhode Island in 1708 was 7181. In 1774 it had increased to 59,707, subsequently decreasing until in 1782 it was 52,391. Thereafter until 1840 the average annual increase was 973, and from 1840 to 1860, 3288. During the latter period Rhode Island experienced an out-migration of people, many of whom, as a result, never returned. Thereafter the immigration from Ireland, followed by a large influx from Canada. For the last twenty-five years, the increase from European countries, especially Italy, has been great. According to the State census of 1905, the number of foreign-born in Rhode Island is as follows: born in Canada, 38,115; in British America, 32,629; in England, 24,431; in Italy, 18,014; in Sweden, 7,201; in Scotland, 5649; in Portugal, 5293; in Russia, 4505; in Germany, 4463; in Poland, 4104. This classification does not distinguish the Jews, who are rapidly increasing, and who in 1905 numbered 14,570. Rhode Island. — A. Political. — It is probable that Verazano, sailing under the French flag, visited Rhode Island waters in 1524. A Dutch navigator, Adrian Block, in 1614 explored Narragansett Bay and gave to Block Island the name it bears. The sentence of banishment of Roger Williams from Plymouth Colony was passed in 1636, and in the following year he settled on the site of Providence, acquiring land by purchase from the Indians. One cause of Williams's banishment was his protest against the interference of civil authorities in religious matters. In November, 1637, William Coddington was notified to leave of Massachusetts to erected thereon the town of Warwick. With the help of Solomon Gorton on the site of Portsmouth, in the northerly part of the island of Rhode Island, which was then called Aquidneck. Disagreements arising at Portsmouth, Coddington, with a minority of his townsmen, in 1639 moved southward on the island and began the settlement of Newport. Samuel Jenison, another refugee from Massachusetts, in 1638 came first to Portsmouth, and later to Providence, creating discord at both places by denying all power in the magistrates. Gorton finally, in 1643, purchased from the Indians a tract of land in what is now the town of Warwick, and settled there. The four towns, Providence, Warwick, Portsmouth, and Newport, lying in a broken line about thirty miles in length, for many years constituted the municipal divisions of the colony. In 1644 Roger Williams secured from the English Parliament the first charter, which was accepted by an assembly of delegates from the four towns; and a charter of rights, and a bill of rights, which gave the government to be "held by the common consent of all the free inhabitants," were enacted thereunder. In 1663 was granted the charter of Charles II, the most liberal of all the colonial charters. It ordained that no person should be in any way molested on account of religion; that the inhabitants, comparatively, with power to enact all laws necessary for the government of the colony, such laws being not repugnant to but agreeable as near as might be to the laws of England, "considering the nature and constitution of the place and people there." The separate existence of the little colony was long precarious. Coddington in 1651 secured for himself a commission as governor of the islands of Rhode Island and Conanicut, but his authority was vigorously assailed, and his commission finally revoked. The Puritans in Massachusetts were no friends of the people of Rhode Island, and portions of the meagre territory were claimed by Massachusetts and Connecticut. Rhode Island, like the other colonies was threatened both in England and in America by those who favoured direct control by the English Government. Under the regime of Andros, Colonial Governor at Boston, the charter was suspended for two years; and had the recommendations of the English commissioner, Lord Bellomont, been adopted, the charter government would have been abolished. In 1710 the colony first issued "bills of credit," paper money, which continued increasing.
in volume and with great depreciation in value, until after the close of the Revolution, causing and inciting bitter partisan and sectional strife, and at times leading to the use of civil war. The volume of this currency defended it on the ground of necessity, lack of specie, and the demand for some medium to pay the expenses of successive wars. In 1787 the State owed £150,047, English money, on interest-bearing notes, which in 1789 the Assembly voted to retire by paying them in paper money then being at the ratio of twelve to one. By the early part of the eighteenth century the people were extensively engaged in ship-building, and it is said that in the wars in America between Great Britain and France, Rhode Island fitted out more ships for service than any other colony.

The ordinary measure of self-government granted to the colonists by the charter fostered in them a spirit of loyalty toward the mother country, substantially and energetically manifested on every occasion; but which, nevertheless, when the danger from the foreign foe was no longer imminent, was supplemented by a feeling of jealous apprehension of the encroachments on what the colonists had now learned to regard as their natural rights. Rhode Island heartily joined the other colonies in making the Revolution her cause. In 1768 the Assembly ratified the Massachusetts remonstrance against the British ship of war "Gaspee." A strong loyalist party in the colony for social and commercial reasons was anxious to avoid an open breach with the mother country, but the enthusiasm with which the news of Lexington was received showed that the majority of the people welcomed the impending struggle. On 4 May, 1776, the Rhode Island Assembly by formal act renounced its allegiance to Great Britain, and in the following July voted its approval of the Declaration of Independence. The colony bore its burden, too, of the actual conflict. From 1776 until 1779, the British occupied Newport as their headquarters, ruining the commerce and degrading the city more than the preceding war. The evident strategic importance of the possession of Newport by the British, and the possibility of the place's becoming the centre of a protracted and disastrous war, created great alarm not only in the colony but throughout New England. Two attempts were made to destroy the enemy, the second with the co-operation of the French fleet, but both failed. The levies of men and money were promptly met by the people of the colony in spite of the widespread privation and actual suffering. At last the British headquarters were shifted to the south, and the French allies occupied Newport until the end of the war.

The same consideration, the instinct for local self-government, which prompted Rhode Island to resist the mother country, made her slow to join with the other colonies in establishing a strong centralized government. "We have not seen our way clear to do it consistent with our idea of the principles upon which we are all embarked together," wrote the Assembly to the President of Congress. The proposed federal organisation seemed scarcely less objectionable than the former British rule. Rhode Island took no part in the Convention of 1787, and long refused even to authorize the reception of the ratification of the Constitution to a state convention. Eight times the motion to submit was lost in the Assembly, and it was only when it became evident that the other states did not regard Rhode Island's condition of single independence as an "eligible" one, and were quite ready to act in support of their opinion even to the extent of parcelling her territory among themselves, that the Constitution was submitted to a convention and ratified by the delegates on 29 May, 1790. Admitted to the Union, Rhode Island did not follow the example of most of the other states in framing a constitution adapted to the new national life, but continued under the old charter. This fact underlies her political history for the next forty years. The charter of 1741, though subject to its time, was bound to become oppressive. First, it fixed the representation of the several towns without providing for a readjustment to accord with the relative changes therein. Hence, the natural and social forces, necessarily operating in the course of two hundred years to enlarge some communities and to reduce others, failed to find a check in the political expression. Again, the charter had conferred the franchise upon the "freemen" of the towns, leaving to the Assembly the task of defining the term. From early colonial days the qualification had fluctuated until in 1796 it was fixed at the ownership of real estate to the value of £124, or £7 annual rental (the eldest sons of freeholders being also eligible). Agitation for a constitution began as soon as Rhode Island had entered the Union, and continued for many years with little result. It came to a head ultimately in 1841 in the Dorr Rebellion, the name given because of the refusal of the House of Representatives to raise a vote on the amendment to the charter. Returning later, he was indicted for treason, convicted and sentenced to imprisonment for life. He was pardoned and set at liberty within a year. His work was not a failure, however, for in 1842 a constitution was adopted incorporating his proposed reforms. A personal property qualification was instituted, practically equivalent to the real estate qualification; and neither was required, except in voting upon any proposition to impose a tax or to expend money, or for the election of the City Council of Providence. The personal property qualification was not available, however, to town and city citizens, and this discrimination persisted until 1888, when it was abolished by constitutional amendment. Each town and city was entitled to one member in the Senate; and the membership of the Lower House, limited to seventy-two, was apportioned among the towns and cities on the basis of population, with the proviso that no town or city should have more than one member. Under this amendment the City of Providence has twenty-five representatives whereas its population warrants forty-one. In the same year, the veto power was for the first time bestowed upon the governor. Notwithstanding these approaches toward a republican form of government, there is a strong demand for a thorough revision of the Constitution. According to an opinion of the Supreme Court a constitutional convention is out of the question, inasmuch as the Constitution itself contains no provision therefor (In re The Constitutional Convention, XIV R. 1, 440), and the only hope of reform seems to be in the slow and difficult process of amendment.

B. Religious.—The earliest settlers in this state were criticised by their enemies for lack of religion. Cotton Mather described them as a "colliuvies" of
everything but Roman Catholics and real Christians. In Providence Roger Williams was made pastor of the first church, the beginning of the present First Baptist Church. In 1739 there were thirty-three churches in the colony; twelve Baptist, ten Quaker, six Congregational or Presbyterian, and five Episcopalian. It is said that in 1690 there was not one Congregational church, and for a time the number must have been small. In 1828 there were probably less than 1000 Catholics in the state. In that year Bishop Fenwick of Boston assigned Rev. Robert Woodley to a "parish" which included all of Rhode Island and territory to the east in Massachusetts. This was erected in 1829. Father Woodley in 1828 acquired in Newport a lot and building which was used for a church and school. In 1830 Rev. John Corry was assigned to Taunton and Providence, and built a church in Taunton in that year. The first Catholic church in Providence was built in 1837 on the site of the present cathedral. At that time Father Corry was placed in charge of Providence alone. From 1844 to 1846, the mission of Rev. James Fitton included Woonsocket, Pawtucket, Crompton, and Newport, a series of districts extending the length of the state. In 1846, Newport was made a parish by itself. Woodville was not appropriated to the same church in 1847; Warren in 1851; Pascoag in 1851; East Greenwich in 1853; Georgiaville in 1855. These parishes were not confined to the limits of the towns or villages named, but included the surrounding territory. In 1844 the Diocese of Hartford was created, including Rhode Island and Connecticut, with the episcopal residence at Providence. At this time there were only six priests in the two states. In 1872 the Diocese of Hartford was divided and the Diocese of Providence created, including all Rhode Island, and in Massachusetts, the counties of Bristol, Berkshire, and Norfolk. Also the towns of Mattapoisett, Marion, and Wareham in the County of Plymouth. In 1904 the Diocese of Fall River was created, leaving the Diocese of Providence coextensive with the state. After 1840, and especially following the famine in Ireland, the Irish increased with great rapidity and long formed the bulk of the Catholic population. The growth of cotton manufactures after the Civil War drew great numbers of Canadian Catholics. In more recent years Italians have settled in Rhode Island in great numbers, and many Polish Catholics. Included in the Catholic population are: French, 40,000 Italians, 10,000 Portuguese, 8000 Poles, and 1000 Armenians and Syrians. According to a special general report on the census of religious bodies of the United States, 76.5 per cent. of the population of the City of Providence are Catholics. There are 190 priests in the diocese, including about 47 Canadian and French priests, 8 Italian, and 5 Polish priests. Thirty parishes support parochial schools. Under Catholic auspices are two orphan asylums, one infant asylum, two hospitals, one home for the aged poor, one industrial school, one house for working boys, and two houses for working girls.

The first Catholic governor of the State was James H. Higgins, a Democrat, who was elected for two terms, 1907, 1908. He was succeeded by Aram J. Pothier, a Catholic, and a Republican.

The State census of 1905 gives the following statistics of religious denominations:

<table>
<thead>
<tr>
<th>Religion</th>
<th>Members</th>
<th>Churches</th>
</tr>
</thead>
<tbody>
<tr>
<td>Catholic</td>
<td>200,000</td>
<td>76</td>
</tr>

<tr>
<td>Free Baptist</td>
<td>3,306</td>
<td>30</td>
</tr>
</tbody>
</table>

The value of property owned by certain denominations is stated as: Episcopal, $1,957,518; Congregational, $1,417,089; Baptist, $1,124,348; Methodist Episcopal, $624,900; Unitarian, $250,000; Universalist, $250,000; Free Baptist, $242,000.

Education.—Provision was made for a public school in Newport in 1642, and at Pawtuxet the public school was not inaugurated until 1682. The number of pupils enrolled in public schools in 1907 was 74,065, and the number of teachers employed, 2198. The State maintains an agricultural college, a normal school, a school for the deaf, a home and school for dependent children not criminal or vicious, and makes provision for teaching the blind. Schools are supported mainly by the towns wherein they are located. The State appropriates annually $120,000, to be used only for teachers' salaries, and to be divided among the towns and cities in proportion to school population, but no town may receive its allotment unless it has a public school. Another appropriation is paid to towns maintaining graded high schools. This appropriation in 1910 was $28,500. The total amount expended on public schools in 1907, exclusive of permanent improvements, was $1,500,000; the number of school buildings was 328; and the valuation of school property, $6,550,172. The number of parochial school pupils in 1907 was 16,254; the total attendance of Catholic parochial schools and academies in 1910 was 17,440. These schools cost about $1,500,000, and their annual maintenance about $250,000. The amount expended per pupil in the public schools in 1907 was stated as $3.14. Allowing ten months for the school year, on the basis of that cost, the 18,254 parochial school pupils, if attending the public schools, would have cost the State and towns $510,575. Providence is the seat of Brown University, a Baptist institution founded in 1764. The corporation consists of a Board of Trustees and a Board of Fellows. A majority of the trustees must be Baptists and the rest of the trustees must be chosen from three other prescribed Protestant denominations. A majority of the fellows, or 'professors,' must be Baptists; "the rest indifferent of any or all denominations." It is provided that the places of professors, tutors and all officers, the president alone excepted, shall be free and open to all denominations of Protestants. The total enrollment of the university for the academic year 1905-10 was 907, including the graduate department and the Women's College.

Legislation Affecting Religion.—In 1657 the Assembly denied the demand of the commissioners of the United Colonies that Quakers should be banished from Rhode Island, and later passed a law that military service should not be exacted from those who held religious belief forbade the bearing of arms. The Charter of 1663 guaranteed freedom of conscience, and the colonial laws prohibited compulsory support of any form of worship. In 1683, Charles II wrote to the Assembly declaring that all men of civil conversation, obedient to magistrates, should not be condemned, and that "if any good men" should be admitted as freemen, with liberty to choose and be chosen to office, council and military. On this communication it was voted that all those who should take an oath of allegiance to Charles II and were of competent estate, should be admitted as freemen; but none should vote or hold office until admitted by vote of the assembly. In the volume of laws printed in 1710, appeared a
provision that all men professing Christianity, obedient to the magistrates, and of civil conversation, though of differing judgments in religious matters, Roman Catholics alone excepted, should have liberty to choose and be chosen to office, both civil and religious, and that the date of the original enactment of this exception is not known. It was repealed in 1783. The State Constitution of 1842 guarantees freedom of conscience, and provides that no man’s civil capacity shall be increased or diminished on account of his religious belief.

The Sunday law of Rhode Island, following the original English statute (Charles II, c. VII, § 1) differs from the law of most other states in that it forbids simply the exercise of one’s ordinary calling upon the Lord’s day; excepting of course works of charity and necessity. Hence a release given on Sunday has been held good (Allen v. Gardiner, VII, R. I. 22); and probably many contracts not in pursuance of one’s ordinary calling would be sustained though made on Sunday. A characteristic exception exists in favour of Jews and Sabbatarians, who are permitted with certain restrictions, to pursue their ordinary trade or business on the first day of the week, forButcher, and fowling, except on one’s own property, and all games, sports, plays, and recreations on Sunday are forbidden. The penalty for the first violation of the statute is $5, and $10 for subsequent violations.

Service of civil process on Sunday is void.

MARRIAGE AND DIVORCE.—Marriage between grandparent and grandchild, or uncle and niece, and between persons more closely related by blood, is void; as is marriage with a step-parent, with the child or grandchild of one’s husband or wife, with the husband or wife of one’s child or grandchild, and with the parent or grandparent of one’s wife or husband. The statute contains no express requirement regarding the age of the parties contracting marriage, but it is a defence to an indictment for bigamy that the prior marriage was contracted when the man was under fourteen years of age, and the woman under twelve. Marriages among Jews are valid in law if they are valid under the Jewish religion. Marriages may be performed by licensed clergymen and by the judges of the Supreme and Superior Courts. Before marriage, parties must obtain a licence by personal application from the town clerk, or city clerk, or registrar; and a non-resident woman must obtain such licence at least five days previous to the marriage. A certificate of marriage presented to the clergyman or judge officiating, who must make return of the marriage. Two witnesses are required to the marriage ceremony. Failure to observe the licence regulations will not invalidate the marriage provided either of the contracting parties are males they have been convicted of bigamy; but the non-compliance is punished by fine or imprisonment. Causes for divorce include adultery, extreme cruelty, willful desertion for five years, or for a shorter time in the discretion of the Court, continued drunkenness, excessive use of opium, morphine, or chloral, neglect of husband to pay necessary expenses of the family, any other gross misbehaviour and wickedness repugnant to the marriage covenant. If the parties have been separated for ten years, the Court may in its discretion decree a divorce. Under the law of Rhode Island marriage is regarded as a status, pertaining to the citizen, which the State may regulate or alter. Hence a Court having power to dissolve the parties to a marriage as a bona fide domiciled citizen of the State, may dissolve the marriage although the other party is beyond the jurisdiction; and such dissolution will be recognised by other states by virtue of the comity provision of the Federal Constitution (In re: Morton v. Diter, 155 U. S. 616).

LIQUOR LAWS, CORRECTIONS, ETC.—A Constitutional amendment prohibiting the manufacture and sale of intoxicating liquor was adopted in 1886, and re-
peaked in 1889. At present Rhode Island is a local op-
ion state, the question of licence or no-licence being
submitted annually to the voters of the several
ports and towns. The licensing boards may in their discretion
refuse any application. The number of licences in any
town may not exceed the proportion of one licence to
each 500 inhabitants. The owners of the greater part of
the land, however, will not allow any location of a saloon
may bear its licence. No licence can be granted for a
location within two hundred feet, measured on the
street, of any public or parochial school. Maximum
and minimum licence fees are fixed by statute, and the
exact sum is determined by the licensing boards. For
retail licences the minimum fee is $300, and the maximum

In the City of Cranston are located the ‘State
institutions’, so-called, including the State prison,
the county jail, the State workhouse, a reformatory
school for girls, and another for boys. The probation sys-
tem is extensively employed, and in the case of juvenile
offenders, especially, the State makes every effort
to prevent their becoming hardened criminals. Prob-
ation officers have the power of bail over persons
committed to them. In proper cases, probation offi-
cers may provide for the maintenance of girls and
women apart from their families. Capital punish-
ment has been abolished in the State, except in cases where
a life convict commits murder.

Wills disposing of personal property may be made
by persons eighteen years of age or over; wills dis-
posing of real property, by persons twenty-one years of
age or over. Probate clergies are required to notify
the parties interested in any wills that are in their
hands, and the testators are required to make them to them by will. If a gift for charity is made
by will to a corporation and the acceptance thereof would be ultra vires, the corporation may at once receive the gift, and may retain it on condition of securing the
acceptance of the gift for Masses or religious services.
Masses are for the benefit of the living, and Masses
are for the benefit of the dead. Cemeteries are generally owned by corporations especi-
ally chartered, by churches and families.

Albert B. West.

Rhodes, Alexander de, missionary and author,
born at Avignon, 15 March, 1591; d. at Ispahan,
Persia, 5 Nov., 1660. He entered the novitiate of the
Society of Jesus at Rome, 24 April, 1612, with the
intention of devoting his life to the conversion of the
infidels. He was assigned to the missions of the East,
and in 1624 commenced his missionary labours in
the East Indies, and in 1624 commenced his missionary labours in
China. In 1627 he returned to Tongking where, within the
scope of three years, he converted 6000 persons, including
several ministers. When in 1630 persecution forced him
from the country, he continued the work of evangeli-
ation in Persia. He was later recalled to Rome where he obtained permission
from his superiors to undertake missionary work in
Persia. Amidst the numerous activities of a
missionary career, he found time for literary productions:
"Tuturinemas historiae libri duo" (Lyons, 1692);
Rhodesia, a British possession in South Africa, bounded on the north and north-west by the Congo Free State and German East Africa; on the east by German East Africa, Nyassaland, and Portuguese East Africa; on the south by the Transvaal and Bechuanaland; and on the west by Bechuanaland and Portuguese East Africa. Cecil John Rhodes, the founder of the colony, whom the colony owes its name, desired to promote the expansion of the British Empire in South Africa. The Dutch South African Republic and Germany were contemplating annexations in the neighbourhood of the Zambesi River. To thwart these enemies of the empire, under the aid of the British Parliament the task to which Mr. Rhodes and his colleagues set themselves. Early in 1888 Lobengula, King of Matabeleland, entered into a treaty with Great Britain and on 30 October of the same year he granted to Rhodes's agents the complete and exclusive charge of all mails and mining rights in his dominions. On 28 October, 1889, the British South Africa Company was formed under a royal charter. The company, on Lobengula's advice, first decided to open Mashonaland, which lies north and west of Matabeleland and south of the Zambesi. In September, 1890, an expeditionary column occupied that country and, in the next four years, much was accomplished. In 1893 the company, who questioned the right of the Matabele to make annual raids among their neighbours the Mashonas, came to blows with King Lobengula. Five weeks of active operations and the death of the king, who, probably by self-administered poison, brought the war of Southern Rhodesia under the绝对 control of the company.

After the war, the settlement and opening up of the country was carried on under the direction of Mr. Rhodes, who, on the ruins of Lobengula's royal kraal at Bulawayo, built Government House, and in the vicinity, laid out the streets and avenues of what was intended to become a great city. At one time Bulawayo had a population of some 7,000 white inhabitants and seemed to be fulfilling the dreams of its founder when its progress and that of the whole country was cut short by the cattle pest, the native rebellion of 1896, and by years of stagnation and unagricotry consians, who established in the Island of Rhodes; it has in addition jurisdiction over a score of neighbouring islands, of which the principal are Carpathos, Leros, and Calymnos. There are in all 560 Catholiishes, while the island, the capital of the archipelago, contains 30,000 inhabitants. The Franciscans have three priors; the Brothers of the Christian Schools have established there a scholasticate for the Orient as well as a school; the Franciscan Sisters of Gemona have a girls' school. The most striking feature of the city, in addition to a series of medieval towers and fortifications, is the Street of the Knights, which still preserves its old houses. The history of St. John's dates from the date of the erection of each house or palace; several of the mosques are former churches.

There are in all 560 Catholiishes, while the island, the capital of the archipelago, contains 30,000 inhabitants. The Franciscans have three priors; the Brothers of the Christian Schools have established there a scholasticate for the Orient as well as a school; the Franciscan Sisters of Gemona have a girls' school. The most striking feature of the city, in addition to a series of medieval towers and fortifications, is the Street of the Knights, which still preserves its old houses. The history of St. John's dates from the date of the erection of each house or palace; several of the mosques are former churches.
duty to foster an enterprise doomed to failure and disaster. Events seemed to justify his prognostications, for the mission, owing to fever and the hardships of travel, seemed to be losing more workers than it made converts. In 1893, however, the power of Lobengula was broken and mission stations began to grow up in the neighbourhood of Salisbury, the capital, and of Bulawayo. In Matabeleland there are two mission stations, one at Bulawayo and the second at Empandeni, some thirty miles away. This last station owns a property of about one hundred square miles most of which formed the original grant of Lobengula and the title to which was confirmed by the company. The principal station among the Masurucu tribes is Makaranga at Umsawuwa, twenty miles from Salisbury (founded in 1892). There are other stations of more recent date at Salisbury, Drifonento, Hamsa’s Kraal, and Mtongdo, near Victoria, all under the charge of the Jesuit Fathers.

The Missionaries of Marianhill, recently separated from the Trappists, have two missions in Mashonaland at Machekte and St. Tras Hill. The Makaranga who are thus being evangelized from seven mission stations are the descendants of the predominant tribe who received the faith from the Ven. Father Gonçalo de Silveira in 1581. Among the Botongwa, who owe a somewhat different allegiance to King Lewanika in North-western Rhodesia, there are two Jesuit mission stations on the Chikuni and Ngerere Rivers. These stations are under the jurisdiction of the Jesuit Prefect Apostolic of the Zambes, resident in Bulawayo. There are 35 priests, 30 lay brothers, and 93 men in charge of the missions. The Catholic native population is about 3,000. For the missions of North-eastern Rhodesia see Nyassa, Vicariate Apostolic Op.

The land of the mission stations in Rhodesia is usually a grant from the Government made on condition of doing missionary work and is therefore inalienable without a special order in Council. Native schools, in some cases, are in receipt of a small grant from the Government. The Jesuit Fathers have one school for white boys (120) at Bulawayo, while the Sisters of the Third Order of St. Dominic have three: at Bulawayo (210), Salisbury (130), and Gwelo (40). These schools are unloaded and conducted from the Government. Hence Catholics, who were first in the field, have a very considerable share in the education of the country. New Government schools have been built recently in Salisbury, Bulawayo, and Gwelo and other places in order to meet the growing demand for education, and they have, so far, succeeded well in filling their school-rooms without taking many pupils from the schools managed by Catholics.

The chief source of information about the Zambes Mission is the Zambes Mission Record, issued quarterly (Romshampton, England); HENSMAN, A History of Rhodesia (London, 1900); HORN, Southern Rhodesia (London, 1899); HALL, Prehistoric Rhodesia (London, 1910); MICHELSON, Life of C. J. Rhodes (3 vols., London, 1910).

James Kendal.

Rhodiopolis, titolar see of Lycia, sufragran of Myra, called Rhodia by Ptolemy (V, 3) and Stephanus Byzantius; Rhodiapolis on its coins and inscriptions; Rhodiopolis by Pliny (V, 28), who locates it in the mountains to the north of Corydalla. Its history is unknown. Its ruins may be seen on a hill in the heart of a forest at Eski Hisar, village of Koniah. They consist of the remains of an aqueduct, a small theatre, a temple of Escalapius, sarcophagi, and churches. Only one bishop is known, Nicholas, present in 518 at a Council of Constantinople. The "Notitiae episcopatum" continue to mention the see as late as the twelfth or thirteenth century.

S. Pêtrides.

Rhymed Bible.—The rhymed versions of the Bible are almost entirely collections of the psalms. The oldest English rhymed psalter is a pre-Reformation translation of the Vulgate psalms, generally assigned to the reign of Henry II and still preserved in the Corpus Christi College, Cambridge. The Bodleian Library, Oxford, has another Catholic rhyming psalter of much the same structure chronologically to the time of Edward II. Thomas Brampton did the Seven Penitential Psalms, from the Vulgate, into ryming verse in 1414; the MS. is in the Cottonian collection, British Museum. These and other pre-Reformation rhyming psalters tell a story of popular use of the vernacular Scripture in England.
which they ignore who say that the singing of psalms in English began with the Reformation. Sir Thomas Wyt (d. 1521) is said to have done the whole psalter. We have seen that the Psalter of David, commonly called the VII Penitential Psalms, Drawn into English metre". Henry Howard, Earl of Surrey (d. 1547), translated Ps. Iv, lxixii, xxviii into English verse. Miles Coverdale (d. 1567) translated several psalms in "Geastely psalms" and by 1544 was out of the "Scripture". The old Version of the Anglican Church, printed at the end of the Prayer Book (1562) contains thirty-seven rhyming psalms translated by Thomas Sterndol, fifty-eight by John Hopkins, twenty-eight by Thomas Norton, and the remainder by Robert Books of Psalter, William Whittingham (Ps. cxix of 700 lines) and others. Sterndol's psalms had been previously published (1549). Robert Crowley (1549) did the entire psalter into verse. The Seven Penitential Psalms were translated by many; William Honey (1553) entitles his translation, with quaint Elizabethan conceit, "Seven Soes of a Sorrowful Soul for Sinne". During the reign of Edward VI, Sir Thomas Smith translated ninety-two of the psalms into English verse, while imprisoned in the Tower. A chaplain to Queen Mary, calling himself the "simple and unlearned Syl William Fornberg" did a poetical version of the Fifty-first (1551). Matthew Parker (1557), later Archbishop of Canterbury, completed a metrical psalter. The Scoth had their Psalms Scotch from 1564. One of the most renowned of Scotch versifiers of the Psalms was Robert Pont (1575). Zachary Boyd, another Scothman, published the Psalms in verse early in the seventeenth century. Of English rhyming versifications of the Psalms, the most charming are those of Sir Philip Sidney (d. 1586) together with his sister, Countess of Pembroke. This complete psalter was not published till 1623. The rich variety of the versification is worthy of note; almost all the usual varieties of lyric metres of that lyric age are called into requisition and handled with elegance.

The stately and elegant style of Lord Bacon is distinctive of his poetical paraphrases of several psalms. Richard Verstegan, a Cathoike, published a rhyming version of the Seven Penitential Psalms (1587) and the collection of invocations (1573) containing a metrical version of other parts of the Bible together with "a Paraphrase upon the Psalms of David, set to new Tunes for Private Devotion, and a Thorow Base for Voices and Instruments"; his work is touching in its simplicity and union. The translation of the versification of the metrical psalms is mostly rhyming versions and are numerous: New England Psalms Book (Boston, 1773); Psalm Book of the Reformed Dutch Church in North America (New York, 1792); The Bay Psalm Book (Cambridge, 1640). Noteworthy also, among the popular and more recent rhymed psalters are: Brady and Tate (post laureate), "A New Version of the Psalms of David" (Boston, 1780); James Merick, "The Psalms in English Verse" (Reading, England, 1785); I. Watts, "The Psalms of David" (27th ed., Boston, 1777; 1. J. Barrett, "A Course of Psalms" (Lambeth, 1823); Abraham Cole, "A New Rendering of the Hebrew Psalms into English Verse" (New York, 1885; David S. Wrangham, "Lyra Regis" (Leeds, 1885; Arthur Trevor Jebb, "A Book of Psalms" (London, 1888). Such are the chief rhyming English psalters. Other parts of the Bible have also been put into rhyming English verse: Christopher Tye's "The Ancient Psalms translated into English Metre" (1553); Zachary Boyd's "St. Matthew" (early seventeenth cent.); Thomas Prince's "Canticles, parts of Isaiss and Revelations" in New England Psalm Book (1758); Henry Ainsworth, "Solomon's Song of Songs" (1642); John Mason Good's "Song of Songs" (London, 1803); C. C. Prier's "Acts of the Apostles" (New York, 1845). The French have had rhyming psalters since 1658. "Les Quaince Chants псalter of Clement Marot (1840). Some Italian rhymed versions of the Bible are: Abbatte Francesco Rassano, "Il Libro di Ghiobbe" (Nisa, 1781); Stefano Egido Petroni, "Proverbi de Salomone" (London, 1815); Abbatte Pietro Rossi, "Lamentazioni de Geremia" (Nisa, 1781); Abbatte Santei Pasquali, "Canti Francese" (Nisa, 1781); Evasio Leone, "Il Cantico de' Canticci" (Venice, 1793); Francesco Campana, "Libro di Giuditta" (Nisa, 1782).

RALDON DUMO.

Rhythmic Office—I. Description, Development, and Division.—By rhythmic office is meant a liturgical horary prayer, the canonical hours of the priest, or an office of the Breviary, in which not only the hymns are regulated by a certain rhythm, but where, with the exception of the psalms and lessons, practically all the other parts show a rhythm, or rhyme; such parts for instance as the antiphons to each psalm, to the Magnificat, Invitatorium, and Benedictus, likewise the responses and versicles to the prayers, and after each of the nine lessons; quite often also the benedictions before the lessons, and the antiphons to the minor hours (Prime, Terce, Sext, and None).

The old technical term for such an office was Historia, with or without an additional "rhythma" or ritim, an expression that frequently caused misunderstanding on the part of later writers. The reason for the name lay in the fact that originally the antiphons or the responses, and sometimes the two together, served to amplify or comment upon the history of a saint, of which there was a brief sketch in the readings of the second nocturn. Gradually this name was transferred to offices in which no word was said about a "history", and thus we find the expression "Historia ss. Trinitatis". The structure of the ordinary office of the Breviary in which antiphons, psalms, hymns, lessons, and responses followed one another in fixed order, was the natural form for the rhythmic office. It was not necessary to compose invocations, antiphons, or hymns, sequences, or other kinds of poetry, but of creating a text in poetic form in the place of a text in prose form, where the scheme existed, definitely arranged in all its parts. A development therefore which could eventually serve as a basis for the division of the rhythmic-office into distinct hours is of itself limited to a narrow field, namely the external form of the parts of the office as they appear in poetic garb. Here we find in historical order the following characters: (1) a metrical, of hexameters intermixed with prose or rhymed prose; (2) a rhythmic, in the broadest sense, which will be explained below; (3) a form embellished by specific rhythm and rhyme. Consequently one may distinguish three classes of rhythmic offices: (1) metrical offices, in hexameters or distichs; (2) offices in rhymed prose, i. e., offices with very free and irregular rhythm, or with dissimilar assonant long lines; (3) rhymed offices with regular rhythm and harmonious artistic structure. The second class represents a state of transition, wherefore the groups may be called those of the first epoch, the groups of the transition period, and those of the third epoch, in the same way as with the sequences, although with the latter the characteristic differences are much more pronounced. If one desires a general name for all three, the expression "Rhymed Office" as suggested by "Historia ritim" would be quite appropriate for the pars major et potior, which includes the best and most artistic offices; this designation: "gereimtes Officium"
(Reimnificium) has been adopted in Germany through the "Analecta Hymnica". The term does not give absolute satisfaction, because the first and oldest offices are without rhyme, and cannot very well be called rhymed offices. In the Middle Ages the word "rhythmic" was used as the general term for any kind of poetry to be distinguished from prose, no matter whether there was regular rhythm in those poems or not. And for that reason it is practical to preserve in the name "rhythmic offices" all those which are other than pure prose, a designation corresponding to the "Historia rhythmata".

Apart from the preface of the Middle Ages for the poetic form, the Vitae metrica of the saints were the point of departure and motive for the rhythmic offices. These Vitae were frequently composed in hexameters or distichs. From them various couples of hexameters or a distich were taken to be used as antiphon or response respectively. In case the hexameters of the Vitae metrica did not prove suitable enough, the lacking parts of the office were supplemented by simple prose or by means of verses in rhymed prose, i.e., by text lines of different length in which there was very little of rhythm, but simply a sort of assonance; and the verses of the Vesper service mixture of hexameters, rhymed stanzas, stanzas in pure prose, and again in rhymed prose. An example of an old metrical office, intermixed with Prose Responses, is that of St. Lambert (Anal. Hymn., XXVI, no. 79), where all the antiphons are borrowed from the Vitae metrica. The greatest variety exists in the structure of the stanzas, how a smooth and refined language matches the rich contents full of deep ideas, and how the individual parts are joined together in a complete and most striking picture of the saint or of the mystery to be celebrated. A prominent example is the Office of the Trinity by Archbishop Pecham of Canterbury. The first Vespers begins with the antiphon:

1. Sedenti super solium
   Congratulans trisagium
   Seraphici clamoribus
   Cum patre laudat filium
   Indifferens principium
   Reciprocis amoribus.

2. Sequamur per suspirium,
   Quod geritur et gaudium
   In sanctis celis choris;
   Levesmus cordis studium
   In trinum lucis radium
   Splendoris et amoribus.

It is interesting to compare with the preceding the antiphons to the first nocturn, which have quite a different structure; the third of them exhibits the profound thought:

Leventur cordis ostia:
   Memoria Gigerint
   Nato intelligentic
   Voluntas Procedit.

again the first response to the third nocturn:

Candor lucis, puerorum spectaculum
   Patris splendor, puerlustrans seculum,
   Nubis levias intrans umbraculum
   In Egypti venit ergastulum.

The last respond:

Mei mandementem et butyrum,
on which follows as second response the beautiful picture of the Trinity in the following form:

A Veterani facie manavitis ardens fluvius:
   Antiquus est ingenitus, et facies est Filius,
   Ardorsus Spiritus, duorum amor medius.
   Sic olim multiforme
   Prophetae luxit Trinitas,
   Quam post pandit Ecclesia
   In carne fulgens veritas.

II. HISTORY AND SIGNIFICANCE.—It cannot be definitely stated which of the three old abbeys: Prüm, Landeveen, or Saint-Amand can claim priority in composing a rhyming office. There is no doubt, however, that Saint-Amand and the monasteries in Hainault, Flanders, and Brabant, was the real starting-point of this style of poetry, as long ago as the
ninth century. The pioneer in music, the Monk Hucbald of Saint-Amand, composed at least two, probably four, rhythmic offices; and the larger number of the older offices were used liturgically in those monasteries and cities which had some connexion with Saint-Amand. From thence this new branch of hynmody found its way to France, in the tenth and eleventh, and particularly in the twelfth and thirteenth centuries, showed fine, if not the finest results, both in quality and quantity. Worthy of especial mention as poets of this order are: the Abbots Odo (827–42) and Odilo (964–1049) of Cluny, Bishop Paulin of Chartres (1076–28), the Benedictine Monk Odoarunus of Sens (d. 1045), Pope Leo IX (d. 1054); Bishop Stephen of Tournay (1192–1203); Archdeacon Rainald of St. Maurice in Angers (d. about 1074); Bishop Richard de Gerberoy of Amiens (1204–10); Prior Arnaud du Pré of Toulouse (d. 1306), and the General of the Dominican Order, Martialis Auribeili, who in 1456 wrote a rhymed office for the purpose of glorifying St. Vincent Ferrer. The most eminent poet and composer of offices belongs to Germany by birth, but more so to France by reason of his activity; he is Julian von Speyer, director of the orchestra of the Frankish royal court, afterwards Frankish Father and choirmaster of the Paris Cathedral, where about 1240 he composed words and music for the two well-known offices in honour of St. Francis of Assisi and of St. Anthony of Padua (Anal. Hymn., V, nos. 61 and 42). These two productions, the musical value of which has in many ways been overstated, served as a prototype for a goodly number of successive offices in honour of saints of the Franciscan Order as well as of others. In Germany the rhymed offices were just as popular as in France. As early as in the ninth century an office, in honour of St. Chrysanthus and Daria, had its origin probably in Prum, perhaps already in the Paris Cathedral (Anal. Hymn., XXV, no. 73); perhaps not much later through Abbots Guderstein of Landévennec a similar poem in honour of St. Winwaloeus (Anal. Hymn., XVIII, no. 100). As hailing from Germany two other composers of rhythmic offices in the earlier period have become known: Abbot Berno of Reichenaus (d. 1048) and Abbot Udalschale of Maischach at Augsburg (d. 1150).

The other German poets whose names can be given belong to a period as late as the fifteenth century, as e.g. Provost Lippold of Steinberg and Bishop Johann Homburg of Eichstaett, formerly in the early part of the sixteenth century, poets of English style, so few remains of those offices which originated there have been lost. Brilliant among the English poets is Archbishop Peckham whose office of the Trinity has been discussed above. Next to him are worthy of especial mention Cardinal Adam of Canterbury (d. 1158) and Cardinal John Heywai of Lincoln, who about 1370 composed a rhymed office in honour of the Holy Name of Jesus, and of the Visitation of Our Lady. Italy seems to have a relatively small representation; Rome itself, i.e. the Roman Breviary, as we know, did not favour innovations, and composers were reluctant to adopt rhythmic offices. The famous Archbishop Alfons of Sabiano (1058–85) is presumably the oldest Italian poet of this kind. Besides him we can name only Abbots Reinaldus de Colle di Mezzo (twelfth century), and the General of the Dominicans, Raymundus de Vinez from Capua (fourteenth century). In Sicily and in Spain, the rhymed offices composed by the Dominicans are numerous, but with the exception of the Franciscan Fra Gil de Zamora, who about the middle of the fifteenth century composed an office in honour of the Blessed Virgin (Anal. Hymn., XVII, no. 8) it has been impossible to cite by name from those two countries any composer of offices of such importance as in the Offices of St. Francis and St. Anthony. Scandinavia also comes to the fore with rhymed offices, in a most dignified manner. Special attention should be called to Bishop Brynolphus of Skara (1278–1317), Archbishop Birgerus Gregorii of Upsala (d. 1383), Bishop Nicolaus of Linköping (1374–91), and Johannes Benechini of Oeland (about 1440). The number of offices where the composer's name is known is insignificantly small. No less than seven hundred anonymous rhythmic offices have been brought to light during the last twenty years through the "Analecta Hymnica". It is true not all of them are works of art; particularly during the fifteenth century many offices with tasteless rhyming and shallow contents reflect the general decadence of hymnody. Many, however, belong to the best products of religious lyric poetry. For six centuries in all countries of the West, men of different ranks and stations in life, among them the highest dignitaries of the Church, took part in this style of poetry, which enjoyed absolute popularity in all dioceses. Hence one may surmise the significance of the rhythmic offices with reference to the history of civilization, their importance in history and development of liturgy, and above all their influence on other poetry and literature.

Clemens Blume.

Ribadeneya (or Ribadeneyra and among Spaniards often Ribadeneira), Pedro de, b. at Toledo, of a noble Castilian family, 1 Nov., 1526 (Astrain, I, 206); d. 22 Sept., 1611. His father, Alvaro Ortiz de Cisneros, was the son of Pedro Gonzales Cedillo and grand-daughter of Fernando de Carranza. Ortiz de Cisneros whom Ferdinand IV had honoured with the governorship of Toledo and important missions. His mother, of the illustrious house of Villalobos, was still more distinguished for her looks than for her birth. Already the mother of three daughters, she promised to consecrate her fourth child to the Blessed Virgin if it should be a son. Thus vowed to Mary before his birth, Ribadeneya received in baptism the name of Pedro which had been borne by his paternal grandfather and that of Ribadeneya in memory of his maternal grandmother, of one of the first families of Galicia. In the capacity of page he followed Cardinal Alexander Farnese to Italy, and at Rome, great hardships and a habitually confined himself to the very meagre fare he wrote to St. Ignatius (Epp. mixte, V, 649): "Quanto al nostro magnare or-
dinariamente é, a dismari un poco de menestra et un poco de carne, et con questo è finito\]". He was ordered in November, 1549, to go to Palermo, to profess rhetoric at the new college which the Society had just opened in that city. He filled this chair for two years and a half, devoting all his leisure time to visiting and nursing the sick in the hospitals. Meanwhile St. Ignatius was negotiating the creation of the German College which was to give Germany a chosen clergy as remarkable for virtue and orthodoxy as for learning: his efforts were soon successful, and during the autumn of 1552 he called on the tolerant and wealthy nobles of the young province of the island of Sicily. Ribadeneira amply fulfilled the expectations of his master and delivered the inaugural address amid the applause of an august assembly of prelates and Roman nobles. He was ordained priest 8 December, 1553 (Epit. mixte, 111, 179); during the twenty-one years which followed he constantly filled the most important posts in the government of his order. From 1556 to 1560 he devoted his activity to securing the official recognition of the Society of Jesus in the Low Countries. At the same time he was charged by his general with the duty of promulgating and defending the Society in the Belgian houses of the Constitutions, which St. Ignatius had just completed at the cost of much labour.

But these diplomatic and administrative missions did not exhaust Ribadeneira's zeal. He still applied himself ardently to preaching. In December, 1555, he reached at Louvain with wonderful success, similarly in January, 1556, at Brussels. On 25 November of the same year he left Belgium and reached Rome 3 February, 1557, setting out again, 17 October for Flanders. His sojourn in the Low Countries was interrupted for five months (November, 1558, to March, 1559); this period he spent in Louvain. He was summoned to Rome to give evidence of the sickness of Mary Tudor, Queen of England, which ended in her death. In the summer of 1559 he was once more with his general, Laines, whose right hand he truly was. On 3 November, 1560, he made his solemn profession, and from then until the death of St. Francis Borgia (1572) he continued to reside in Italy, filling in turn the posts of provincial of Tuscany, of commissary-general of the Society in Sicily, visitor of Lombardy, and assistant for Spain and Portugal. The accession of Father Everard Mercurian as general of the order brought a great change in Ribadeneira's position. His mission at Louvain being completed, he was ordered to Spain, preferably to Toledo, his native town, to recuperate. This was a dreadful blow to the poor invalid, a remedy worse than the disease. He obeyed, but had been scarcely a year in his native land when he began to importune his general by letter to permit him to return to Italy. These solicitations continued for several years. At the same time his superiors saw that he was as sick in mind as in body, and that his religious spirit was somewhat shaken. Not only was he lax in his religious observances, but he did not hesitate to criticize the persons and affairs of the Society, so much so that he was strongly suspected of being the author of the memoirs then circulated through Spain against the Jesuits (Astrain, III, 106-10). This, however, was a mistake, and his innocence was recognized in 1578. He it was who took upon himself the task of refuting the calumnies which mischief-makers, apparently Jesuits, had been spreading about certain institutions of the Society, nor did he show less ardour and filial piety in making known the life of St. Ignatius Loyola and promoting his canonization.

Outside of the Society of Jesus, Ribadeneira is chiefly known for his literary works. From the day of his arrival in Spain to the end of his life his career was that of a brilliant writer. His compatriots regard him as a master of Castilian and rank him among the classic authors of their tongue. All lines were familiar to him, but he preferred history and ascetical literature. His chief claim to glory is his Life of St. Ignatius Loyola, in which he speaks as an eye-witness, admirably supported by documents. Perhaps the work abounds too much in detail, but is destined to obscure the grand aspect of the saint's character and genius (Analecta Bolland., XXIII, 513). It appeared for the first time in Latin in Naples in 1572 (ibid., XXI, 230). The first Spanish edition, revised and considerably augmented by the author, dates from 1583. Of the many editions of this work, all of them revised by the author; that of 1594 seems to contain the final text. It was soon translated into most of the European languages. Among his other works must be mentioned his "Historia eclesiastica del Cisma, del reino de Inglaterra", and the "Florea sanctorum", which has been very popular in many countries. Some unpublished works of his deserve publication, notably his History of the persecution of the Society of Jesus and his History of the Spanish Assistance.

RIBAS, ANDREAS PEREZ DE, pioneer missionary, historian of north-western Mexico; b. at Cordova, Spain, 1578; d. in Mexico, 26 March, 1655. He joined the Society of Jesus in 1602, coming at once to America, and finishing his novitiate in Mexico in 1604. In the same year he was sent to undertake the Christianization of the Sinaloans, of whom the former were friendly and anxious for teachers, while the latter had just been brought to submission after a hard campaign. He succeeded so well that within a year he had both tribes gathered into regular towns, each with a well-built church, while all of the Ahome and a large part of the Susaqui had been baptized. The two tribes together numbered about 10,000 souls. In 1613, being then superior of the Sinaloa district, he was instrumental in procuring the submission of a hostile mountain tribe. In 1617, in company with other Jesuit missionaries, whom he had brought from Sonora, he began the conversion of the powerful and largely hostile Yaqui tribe (q. v.) of Sonora, estimated at 30,000 souls, with such success that within a few years most of them had been gathered into orderly towns in Sonora. In 1620 he was recalled to Mexico to assist in the college, being ultimately appointed provincial, which post he held for several years. After a visit to Rome in 1643 to take part in the election of a general of the order, he devoted himself chiefly to study and writing until his death.

He left numerous works, religious and historical, most of which are still in manuscript, but his reputation as an historian rests secure upon his history of the Jesuit missions of Mexico published at Madrid in 1645, one year after its completion, under the title: "Historia de los Triunfos de Nuestra Santa Fe entre gentes las mas barbaram", consecuados por los soldados de la milicia de la Compania de Jesus en las armas de la Provincia de Nueva-Espana". Of this work Bancroft says: "It is a complete history of Jesuit work in Nueva Vizcaya, practically the only history the country had from 1590 to 1644, written not only by a contemporary author but by a prominent actor in the events narrated, who had access to all the volumes his failure to publish, and comparatively few of which documents have been preserved. In short, Ribas wrote under the most
favourable circumstances and made good use of his opportunities."

AMES, "Histoire de la Compagnie de Jésus" (Mexico, 1841); BANCROFT, Hist. North Mexican States and Texas, I (San Francisco, 1880); BERNALD y BONAL, Biblioteca Hispano-Americanica Estadunidense, III (Ameecanea, 1883).

James Mooney.

Ribeirão Preto, DIOCESE OF (DE RIBEIRÃO PRETO), suffragan see of the Archdiocese of São Paulo, Brazil, established 7 June, 1908, with a Catholic population of 500,000 souls. The first and present bishop, Rt. Rev. Alberto José Gonçalves, was born 20 July, 1858, elevated 5 December, 1905, and consecrated 20 April, 1909. The district and jurisdiction of Ribeirão Preto is at present the most important one of the State of São Paulo, both on account of the richness of its soil and the great number of agricultural, industrial, and commercial establishments therein. Its principal product is coffee, the shipments of which are so considerable as to necessitate the constant running of an extraordinary number of trains.

The seat of the diocese is the city of Ribeirão Preto, situated on the shores of Ribeirão Preto and Ribeirão Retiro, 264 miles from the capital of the state. The municipality, created by law of 1 April, 1858, is divided into parishes: Ribeirão Preto, Ribeirão Retiro, Morro do Cipó, and Repúblicas. It is, like most of the interior towns of São Paulo, of modern construction. The city is lighted by electric light and has excellent sewer and water-supply systems. The streets are well laid, straight, and intersecting at right angles, are paved, and the buildings are of modern design. The city is nearing completion, will be one of the finest buildings of its kind in Brazil. It is well provided with schools and colleges, prominent among which are those maintained by the Church.

Julian Moreno-Lacaille.

Ribera, JoSEPE DE, called also Spagnolotto, L'Espagnolot (the little Spaniard), painter, b. at Jativa, 12 Jan., 1618; d. at Naples, 1656. Fantastic accounts have been given of his early history; his father was said to be a noble, captain of the fortress of Naples, etc. All this is pure romance. A pupil of Riballa, the author of many beautiful pictures in the churches of Valencia, the young man desired to know Italy. He was a very determined character. At eighteen, alone and without resources, he begged in the streets of Rome in order to live, and performed the same servile offices in other cities. Correggio aroused his admiration, and he set out for Naples in search of the artist, but the latter had just died (1609). Ribera was then only twenty. For fifteen years the artist is entirely lost sight of; it is thought that he travelled in upper Italy. He is again found at Naples in 1626, at which time he was married, living like a nobleman, keeping his carriage and a train of followers, received by viceroys, the accomplished host of all travelling artists, and very proud of his title of Roman Academician. Velasques paid him a visit on each of his journeys (1630,1649). A sorrow clouded the end of his life: his daughter was smitten by Juan of Austria. His father seems to have died of grief, but the story of his suicide is a fiction.

Ribera's name is synonymous with a terrifying art of wild-beast fighters and executioners. Not that he did not paint charming figures. No artist of his time, excepting Rubens or Guido Reni, was more sensitive to a certain ideal of Correggio-like grace. But Ribera did not love either ugliness or beauty for themselves, seeking them in turn only to arouse emotion. His fixed idea, which recurs in every form in his art, is the pursuit and cultivation of sensation. In fact the whole of Ribera's work must be understood as that of a man who made the pathetic the condition of art and the reason of the beautiful. It is the nega-tion of the art of the Renaissance, the reaction of asceticism and the Catholic Reformation on the voluptuous paganism of the sixteenth century. Hence the preference for the popular types, the weather-beaten and wrinkled beggar, and especially the old man. This "aging" of art about 1600 is a sign of the heroic youth. Heroic youth, proud and bold, called for a long time. The anchorites and wasted ceno-bites, the parchment-like St. Jerome's, these singular methods of depicting the mystical life seem Ribera's personal creation; to show the ruins of the human body, the drama of a long existence written in furrows and wrinkles, all engraved by a pencil which sometimes seems to crackle like the husk of the dry acid which bites and makes dark shadows, was one of the artist's most cherished formulas.

No one demonstrates so well the profound change which took place in men's minds after the Reformation and the Council of Trent. Thenceforward concern for character and accent forestalled every other consideration. Leanness, weariness, and abasement became the pictorial signs of the spiritual life. A sombre energy breathes in these figures of Apostles, prophets, saints, and philosophers. Search for character became that of ugliness and monotony, which is nothing so personal as the artist himself, as his own deformity. Paintings like the portrait of "Camaras," the blind sculptor, the "Bearded Woman" (Prado, 1630), and the "Club Foot" of the Louvre (1651) inaugurate curiosities which had happily been foreign to the spirit of the Renaissance. They show a lewdness of pleasure in humiliating the powerful and famous. Art, which formerly used to glorify life, now violently emphasized its vices and defects. The artist seized upon the most ghastly aspects even of antiquity. Cato of Utica, howling and distending his wound, Ixion on his wheel, Sisyphus beneath his rock. This satirical terrorism won for Ribera his just reputation; and it must be admitted that he had depraved and perverted qualities. The sight of blood and torture as the source of pleasure is more pagan than the joy of life and the laughing sensuality of the Renaissance. At times Ribera's art seems a dangerous return to the delights of the amphitheatre. His "Apollo and Marsyas" (Naples), his "Duel" or "Match of Women" (Prado) recall the programme of some spectacle manager of the decadence. In nothing is Ribera more "Latin" than in this sanguinary tradition of the games of the circus.

However, it would be unjust to judge only this facet of his art. In the liveliness of his execution, in his skill of mingling philosophic and humorous ideas, he shows himself to be of the masters of Spanish genius. It is impossible to imagine a more novel and striking idea. No one has spoken a language more simple and direct. In this class of subjects Rubens usually avoids the effect of an oratorical turn, by the splendor of his discourse, the lyric brilliancy of the colouring. Ribera's point of view is scarcely less powerful with much less artifice. It is less transformed and developed. The action is collected in fewer persons. The gestures are less redundant, with a more spontaneous quality. The tone is more sober and at the same time stronger. Everything seems more severe and of a more concentrated violence. The art also, while perhaps not the most elevated of all, is at least one of the most original and convincing. Few artists have given us, if not serene enjoyment, more serious thoughts. The "St. Lawrence" of the Vaticano is scarcely less beautiful than the "St. Bartholomew." Moreover it must not be thought that these ideas
of violence exhaust Ribera's art. They are complemented by sweet ideas, and in his work horrible pictures alternate with tender ones. There is a type of young woman or a tranquil and almost a child-like delicate beauty with candid oval features and rather thin arms, with streaming hair and an air of ignorance, a type of paradoxical grace, which is found in his "Rapture of St. Magdalene" (Madrid, Academy of S. Fernando), or the "St. Agnes" of the Dresden Museum. This virginal figure is truly the "eternal feminine" of a country which more than any other dreamed of love and sought to deify its object, summarizing in it the most irreconcilable desires and virtues. No painter has endowed the subject of the Immaculate Conception with such grandeur as Ribera in his fresco in the Utrecht Salamanca. Even a certain familiar turn of imagination, a certain intimate and domestic piety, a sweetness, an amicable and popular cordiality which would seem unknown to this savage spirit were not foreign to him. In more than one instance he reminds us of Murillo. He painted several "Holy Families", "Housekeeping in the Carpenter Shop" (Gallery of the Duke of Norfolk). All that is inspired by tender reverie about cradles and chaste alcoes, all the distracting delights in which modern religion rejoices and which sometimes result in affectation, are found in more than one gem of this painter, who is regarded by many as a composer of studies, and unadorned, throughout his work scenes of carnage are succeeded by scenes of love, atrocious visions by visions of beauty. They complete each other or rather the impression they convey is heightened by contrast. And under both forms the artist incessantly sought one object, namely, to obtain the maximum of emotion; his art expresses the most intense nervous life. This is the genius of antithesis. It forms the very basis of Ribera's art, the condition of his ideas, and even dictates the customary processes of his chiaroscuro. For Ribera's chiaroscuro, scarcely less personal than that of Rembrandt, is, no less than the latter's, inseparable from a certain manner of feeling. Less supple than the latter, less enveloping, less penetrating, less permeable by the light, twilight, and penumbras, it proceeds more roughly by clearer oppositions and sharp intersections of light and shadow. Contrary to Rembrandt, Ribera does not decompose or discolor his palette; he does not dissolve under the influence of shadows, and nothing is so peculiar to him as certain superexalted notes of furious red. Nevertheless, compared to Caravaggio, his art is more coherent, more elementary, more natural. The canvas assumes a vulcanized, carbonized appearance. Large wan shapes stand out from the asphalt of the background, and the shadows about them deepen and accumulate a kind of obscure tragic capacity. There is always the same twofold rhythm, the same pathetic formula of a dramatized universe regarded as a duel between sorrow and joy, day and night. This striking formula, infinitely less subtle than that of Rembrandt, nevertheless had an immense success. For all the schools of the south Caravaggio's chiaroscuro perfected by Ribera had the force of law, such as it is found throughout the Neapolitan school, in Stanzioni, Salvator Rosa, Luca Giordano. In modern times Bonnat and Ribot painted as though they knew no master but Ribera. Rest came to this violent nature towards the end of his life; from the idea of contrast he rose to that of harmony and beauty. The last work for which he was known, the "Adoration of the Shepherds" (1650), both in the Louvre, are painted in a silvery tone which seems to overshadow the light of Velasquez. His hand had not lost its vigour, its care for truth; he always displayed the same impecable and, as it were, inextinguishable realism. The objects of still life in the "Adoration of the Shepherds" have not been equalled by any specialist, but these works are marked by a new serenity. This impassioned genius leaves us under a tranquil and almost a child-like gentle beauty, should it rather be called a reflection?—of the Olympian genius of the author of "The Maids of Honour".

Ribera was long the only Spanish painter who enjoyed a European fame; this he owed to the fact that he had lived in Naples and has often been classed among the English painters. Balzac has at last denied the glory which was formerly his. He is regarded more or less as a despot, at any rate as the least national of Spanish painters. But in the seventeenth century Naples was still Spanish, and by living there a man did not cease to be a Spanish subject. By withdrawing the centre of the school to Naples, Ribera did Spain a great service. Spanish art, hitherto little known, almost lost at Valencia and Seville, thanks to Ribera was put into wider circulation. Through the authority of a master recognized even at Rome the school felt emboldened and encouraged. It is true that his art, although more Spanish than any other, is also somewhat less specialized; it is cosmopolitan. Like Seneca and Lucian, who came from Cordova, and St. Augustine, who came from Carthage, Ribera has expressed in a universal language the ideal of the country where life has most savour.

LOUIS GILLET.

Ribaucus Anglicus, Archdeacon of Bologna, was an English priest who was rector of the law school at the University of Bologna in 1226, and who, by new methods of explaining legal proceedings, became recognized as the pioneer of scientific judicial procedure in the twelfth century. His long-lost work "Ordo Judicarius" was discovered in MS. by Wunderlich in Douai; and published by Witt in 1851. A more correct MS. was subsequently discovered at Basel and by Sir Travers Twiss, who, on evidence which seems insufficient, followed P a n c i o l e r i in identifying him with the celebrated Bishop Richard Poor (died 1237). Probably he graduated in Paris, as a Papal Bull of 1218 refers to Ribaucus Anglicus. He is known to have been a man of no little learning, and a man of integrity, and was put at the head of the university. He also wrote glosses on the papal decretals, and distinctions on the Decree of Gratian. He must be distinguished from his contemporary, Ribaucus Anglicanus, a physician.

RICHARD, Nicholas, theologian, writer and preacher; b. at Genoa, 1585; d. at Rome, 30 May, 1636. Physically he was unprepossessing, even slightly deformed. His physical deficiencies, however, were abundantly compensated for by mentality of the highest order. His natural taste for study was encouraged by his parents who sent him to Spain to pursue his studies in the Pincian Academy. While a student at this "Club English" in the Campus Martius, he was invested with its habit in the Convent of St. Paul, where he studied philosophy and theology. So brilliant was his record that after completing his studies he was made a professor of Thomistic theology at Pisa. While discharging his academic duties, he acquired a reputation as a preacher second only to

his fame as a theologian. As a preacher Philip III of Spain named him "The Marvel", a sobriquet by which he was known in Spain and at Rome till the end of his life. On his removal to Rome in 1621, he acquired the confidence of Urban VIII. He was made regent of studies and professor of theology at the College of the Minerva. In 1629 Urban VIII appointed him one of the accusers of Archbishop Pietro Friscia in the trial of Niccolò Ridolfi, recently elected Master General of the Dominicans. Shortly after this the same pontiff appointed him pontifical preacher. These two offices he discharged with distinction. His extant works number twenty. Besides several volumes of sermons for Advent, Lent, and special occasions, in his writings he treated of Scripture, theology, and history. One of his best known works is the "History of the Council of Trent" (Rome, 1627). His commentaries treat of all the books of Scripture, and are notable for their originality, clearness, and profound learning. Two other commentaries treat of the Lord's Prayer and the Canticle of Canticles.

John B. O'Connor.

Ricci, LORENZO, General of the Society of Jesus, b. at Florence, 2 Aug., 1603; d. at the Castle of Sant' Angelo, Rome, 21 Feb., 1773. He belonged to one of the most ancient and illustrious families of Tuscany. He had two brothers, one of whom subsequently became canon of the cathedral and the other was raised by Francis I, Grand Duke of Tuscany, to the dignity of first syndic of the Grand duchy. Sent when very young to Prato to pursue his studies under the direction of the Society of Jesus in the celebrated Cisognini college, he entered the society when he was scarcely fifteen, 16 Dec., 1718, at the novitiate of St. Andrew at Rome. Having made the usual course of philosophical and theological studies and twice defended with success public theses, he was successively charged with teaching belles lettres and philosophy at Siena, and philosophy and theology at the Roman College, from which he was promoted to the foremost office of his order. Meanwhile he was admitted to the profession of the four vows, 15 Aug., 1736. About 1731 his edifying and regular life, his discretion, gentleness, and simplicity caused him to be appointed to the important office of spiritual father, the duties of which he discharged to the satisfaction of all. In 1755 Father Luigi Centurione, who appreciated his eminent qualities, chose him as the minister of the society. When, in the mass of pamphlets aimed against the Jesuits, the Portuguese episcopate brought the reinforcement of pastoral letters, a number of bishops wrote to the pope letters which were very eulogistic of the Society of Jesus and its Institute, and Clement XIII hastened to send a copy to Father Ricci. It was a brilliant apologia for the order. Cordara and many of his brethren considered it expedient to publish this correspondence in full with the sole title: "Judicium Ecclesiae universae de statu presenti Societatis Jesu" (op. cit., 20). Timoni, who fancied that no one would dare any thing against the Jesuits of Portugal, was of a contrary opinion, and the general was won over to his way of thinking. Disaster followed disaster, and Ricci experienced the most serious material difficulties in assisting the members who were expelled from every country. At his instance, and perhaps even with his collaboration, the Jesuits of the Institute, and its members (Masson, "Le cardinal de Bernis depuis son ministère", 80). But even the pontiff's intervention could not stay the devastating torrent. After the suppression of the Jesuits in Naples and the Duchy of Parma, the ambassadors of France, Spain, and Portugal went (Jan., 1769).

After the suppression of the Jesuits in Naples and the Duchy of Parma, the ambassadors of France, Spain, and Portugal went (Jan., 1769).
to request officially of the pope the total suppression of the society. This was the death-blow of Clement XIII, who died some days later (2 Feb., 1769) of an apoplectic attack. His successor, the conventional Ganganelli, little resembled him. Whatever may have been his sympathies for the order prior to his elevation to the sovereign pontificate, and his intent, had he possessed his power to secure for him the cardinal's hat, it is indisputable that once he became pope he assumed at least in appearance a hostile attitude. "Se palam Jesuitas infimes prebere atque sua quidem, ut ne generalem quidem prepositum in conspectu admittat," (Cardara, 45). There is no necessity of repeating in detail the history of the pontificate of Clement XIV (18 May, 1769—22 Sept., 1774), which was absorbed by his measures to bring about the suppression of the Society of Jesus (see Clement XIV). Despite the excesses and outrageous injustices which the Jesuit houses had to undergo even at Rome, the general did not give up hope of a speedy deliverance, as is testified by the letter he wrote to Cardara the day after the feast of St. Ignatius, 1773 (Cardara, loc. cit., 53). Although the Brief of abolition had been signed by the pope ten days previously, Father Ricci was suddenly notified on the evening of the 23rd that he was assigned to the English College as residence, until 23 Sept., 1773, when he was removed to the Castle of Sant' Angelo, where he was held in strict captivity for the remaining two years of his life. The surveillance was so severe that he did not learn of the death of his secretary Cornelli, imprisoned with him and in his vicinity, until six months after the event. To satisfy the hatred of his enemies his trial and that of his companions was hastened, but the judge ended by recognizing "nunquam objectos sibi reos his innocentiore; Riccium etiam ut hominem versus sanctum diiuardat" (Cardara, op. cit., 62); and Cardinal de Bernis dared to write (5 July): "There are not, perhaps, sufficient proofs for judges, but there are enough for upright and reasonable men" (Masson, op. cit., 324).

Justice required that the ex-general be at once set at liberty, but nothing was done, apparently through fear lest the matters should gather about their old head, to reconstruct their society at the centre of Catholicism. At the end of August, 1775, Ricci sent an appeal to the new pope, Pius VI, to obtain his release. But while his claims were being considered by the circle of the Sovereign Pontiff, dissension among the sovereign learned men on the tribunal of the supreme Judge. Five days previously, when about to receive Holy Viaticum, he made this double protest: (1) "I declare and protest that the suppressed Society of Jesus has not given any cause for its suppression; this I declare and protest with all that moral certainty that a superior well-informed in this order can have. (2) I declare and protest that I have not given any cause, even the slightest, for my imprisonment; this I declare and protest with that supreme certainty and evidence that each one has of his own actions. I make this second protest only because it is necessary for the reputation of the suppressed Society of Jesus, of which I was the general." (Murr, "Journal zur Kunstgeschichte", IX, 281.) To do honour to his memory the pope caused the celebration of elaborate funeral services in the church of St. John of the Fiorentines near the Castle of Sant' Angelo. As is customary with prelates the body was placed in a bed of state. The funeral was carried in the evening to the Church of the Gesù, where it was buried in the vault reserved for the burial of his predecessors in the government of the order.

These memoirs carry much weight, inasmuch as Cordara speaks with severity of his former brothers in arms, and of the Society of Jesus. CAMBON, Documents inédits concernant la Compagnie de Jésus, XIV, Le Père Ricci, 2 vols. (Paris, 1857), a most valuable collection of documents, but the author does not know the history of the Jesuits in China. RAVENAZ, Cœlum regalum regum (Geneva, 1782), a valuable historical and critical document (Paris, 1854); BARONIO, Osservazioni sopra l'istoria del pontificato di Clemente XIV a cura del P. A. Theiner (2 ed., Monas, 1864), useful for documents.

FRANCIS VAN ORTROY.

Ricci, Matteo, founder of the Catholic missions of China, b. at Macerata in the Papal States, 6 Oct., 1552; d. at Peking, 11 May, 1610. Ricci made his classical studies in his native town, studied law at Rome for two years, and on 15 Aug., 1571, entered the Society of Jesus at the Roman College, where he made his novitiate, and philosophical and theological studies. While there he also devoted his attention to mathematics, cosmology, and astronomy under the direction of the celebrated Father Christopher Clavius. In 1577 he was sent to the Jesuit mission in FARTHES, and three years later he returned to Pisa, and was assigned to Lisbon, 24 March, 1578. Arriving at Goa, the capital of the Portuguese Indies, on 13 Sept. of this year, he was employed there and at Cochín in teaching and the ministry until the end of Lent, 1582, when Father Alessandro Valignani (who had been his novicemaster at Rome but who since August, 1578, had been in charge of all the Jesuit missions in the East Indies) summoned him to Macao to prepare to enter China. Father Ricci arrived at Macao on 7 August, 1582.

Beginning of the Mission.—In the sixteenth century nothing remained of the Christian communities that had existed in China by the end of the seventh century and by the Catholic monks in the thirteenth and fourteenth (see CHINA). Moreover it is doubtful whether the native Chinese population was ever seriously affected by this ancient evangelization. For those desiring to resume the work everything therefore remained to be done, and the obstacles were greater than formerly. After the death of St. Francis Xavier (27 November, 1552) many fruitless attempts had been made. The first missionary to whom Chinese barriers were temporarily lowered was the Jesuit, Melchior Nufiez Barreto, who twice went as far as Canton, where he spent a month each time (1555). A Dominican, Father Clavero, was also admitted to Canton for a month, but he also had to refrain from "forming a Christian Christianity." Still others, Jesuits, Augustinians, and Francisceans in 1568, 1575, 1579, and 1582 touched on Chinese soil, only to be forced, sometimes with ill treatment, to withdraw. To Father Valignani it was due the credit of having seen what prevented all these undertakings from having lasting results. The attempts had hitherto been made haphazard, with men insufficiently prepared and incapable of profiting from favourable circumstances had they encountered them. Father Valignani substituted the methodical attack of a previous careful selection of the missionaries who, the field once open, would implant Christianity there. To this end he first summoned to Macao Father Michele de Ruggieri, who had also come to India from Italy in 1578. Only twenty years had elapsed since the Portuguese had supplanted the Jesuit colony at the ports of China, and the Chinese, attracted by opportunities for gain, were flocking thither. Ruggieri reached Macao in July, 1579, and, following the given orders applied himself wholly to the study of the Mandarin language, that is, Chinese as it is spoken throughout the empire and the educated. His progress, though very slow, permitted him to labour with more fruit than his
predecessors in two sojourns at Canton (1580–81) allowed him by an unwonted complacency of the mandarins. Finally, after many untoward events, he was authorized (10 Sept., 1583) to take up his residence with Father Ricci at Chao-k’ing, the admiral’s house at Canton.

**Method of the Missionaries.**—The exercise of great prudence alone enabled the missionaries to remain in the region which they had had such difficulty in entering. Omitting all mention at first of their intention to preach the Gospel, they declared to the mandarins and their friends concerning their object “that they were religious who had left their country in the distant West because of the renown of the good government of China, where they desired to remain till their death, serving God, the Lord of Heaven”. Had they immediately declared their intention to preach a new religion, they would never have been received; this would have clashed with Chinese pride, which would not admit that China had anything to learn from foreigners, and it would have especially alarmed their politics, which beheld national danger in every innovation. However, the missionaries never hid their Faith nor the fact that they were Christian priests. As soon as they were established at Chao-k’ing they placed in a conspicuous part of their house a picture of the Blessed Virgin with the Infant Jesus in her arms. Visitors seldom failed to inquire the meaning of this, to judge by it, by asking them, novel representation, and the missionaries profited thereby to give them a first idea of Christianity. The missionaries assumed the initiative in speaking of their religion as soon as they had sufficiently overcome Chinese antipathy and distrust to see their instructions desired, or at least to be certain of making them favorable to their explanations. They achieved this result by appealing to the curiosity of the Chinese, by making them feel, without saying so, that the foreigners had something new and interesting to teach; to this end they made use of the European things they had brought with them. Such were large and small clocks, mathematical and astronomical instruments, prisms revealing the various colours, musical instruments, oil paintings and prints, cosmographical, geographical, and architectural works with diagrams, maps, and views of towns and buildings, large volumes, ingeniously printed and splendidly bound, etc. The Chinese, who had hitherto fancied that outside of their country only barbarian existed, were astounded. Rumours of the wonders displayed by the religious from the West soon spread on all sides, and henceforth their house was always filled, especially with mandarins and the educated. It followed, says Father Ricci, that “all came by degrees to have with regard to our countries, our people, and especially of our educated men, an idea vastly different from that which they had hitherto entertained”. This impression was intensified by the explanations of the missionaries concerning their little mission in reply to the numerous questions of their visitors.

One of the articles which most aroused their curiosity was a map of the world. The Chinese had already had maps, called by their geographers “descriptions of the world”, but almost the entire space was filled by the fifteen provinces of China, around which were painted a bit of sea and a few islands on which were inscribed the names of countries of which they had heard—all together was a picture of a small Chinese province. Naturally the learned men of Chao-k’ing immediately protested when Father Ricci pointed out the various parts of the world on the European map and when they saw how small a part China played. But after the missionaries had explained its construction and the method by which the geographers of the West assign to each country its actual position and boundaries, the wisest of them surrendered to the evidence, and, beginning with the Governor of Chao-k’ing, all urged the missionary to make a copy of his map with the names and inscriptions in Chinese.

Ricci drew a larger map of the world on which he wrote more detailed inscriptions, suited to the needs of the Chinese; when the work was completed the governor had it printed, giving all the copies as presents to his friends in the province and at a distance. Father Ricci does not hesitate to say: “This was the most useful work that could be done at that time to dispose China to give credence to the teaching of our holy Faith. . . . Their conception of the greatness of their country and of the insignificance of all other lands made them so proud that the whole world seemed to them savage and barbarous compared with themselves; it was scarcely to be expected that they, while entertaining this idea, would heed foreign masters.” But now numbers were eager to learn of European affairs from the missionaries, who profited by these dispositions to introduce religion more frequently with their visitations.

Their beautiful Bibles and the paintings and prints depicting religious subjects, monuments, churches, etc., gave them an opportunity of speaking of “the good customs in the countries of the Christians, of the falseness of idolatry, of the conformity of the law of God with natural reason and similar teachings found in the writings of the ancients in China”. This last instance shows that Father Ricci already knew how to draw from his Chinese studies testimony favourable to the religion which he was to preach.

It was soon evident to the missionaries that their remarks regarding religion were no less interesting to many of their visitors than their Western curiosities and learning, and, to satisfy those who wished to learn more, they distributed leaflets containing a Chinese translation of the Ten Commandments, an abbreviation of the moral code much appreciated by the Chinese. Next the missionaries, with the assistance of some educated Chinese, composed a small catechism in which the chief points of Christian doctrine were explained in a dialogue between a pagan and a European priest. This work, printed about 1584, was also well received, the highest mandarins of the province considering themselves honor bound to have it distributed hundreds and thousands of copies and thus “the good odour of our Faith began to be spread throughout China”. Having begun their direct apostolate in
this manner, they furthered it not a little by their example, regular life, their disinterestedness, their charity, and their patience under persecutions which often destroyed the fruits of their labours.

Development of the Missions.—Father Ricci played the chief part in these early attempts to make Christianity known to the Chinese. In 1607 Father Testas, who had been at soprano of 2550 by Father Valignani to interest the Holy See more particularly in the missions. Left alone with a young priest, a pupil rather than an assistant, Ricci was expelled from Chao-king in 1659 by a viceroy of Canton who had found the house of the missionaries suited to his own needs; but the mission had been enough to establish itself, and a first attempt to be extinguished by the ruin of its first home. Thenceforward in whatever town Ricci sought a new field of apostolate he was preceded by his reputation and he found powerful friends to protect him. He first went to Shao-chow, also in the province of Canton, where he dispensed with the services of interpreters and adopted the costume of the educated Chinese. In 1615 he made an attempt on Nan-king, the capital in the south of China, and, though unsuccessful, it furnished him with an opportunity of forming a Christian Church at Nanchang, capital of Kiangsi, which was so famous for this learned and learnedly educated men. In 1658 he made a bold but equally fruitless attempt to establish himself at Peking. Forced to return to Nan-king on 6 Feb., 1599, he found Providential compensation there; the situation had changed completely since the preceding year, and the highest mandarins were desirous of seeing the holy doctor from the West take up his abode in their city. Although his visit was rewarded with much success in this wider field, he constantly longed to repair his repulse at Peking. He felt that the mission was not secure in the provinces until it was established and approved at the capital. On 15 May, 1600, the mission was again set out for Peking and, when all human hope of success was lost, he entered on 24 January, 1601, summoned by Emperor Wan-li.

Last Labours.—Ricci's last nine years were spent at Peking, strengthening his work with the same wisdom and tenacity of purpose which had conducted it so far. The imperial good will was gained by gifts of European curiosities, especially the map of the world, from which the Asiatic ruler learned for the first time the true situation of his empire and the existence of so many other different kingdoms and powers. The mandarins acquired Father Ricci to speak of it for him in his palace. At Peking, as at Nan-king and elsewhere, the interest of the most intelligent Chinese was aroused chiefly by the revelations which the European teacher made to them in the domain of the sciences, even those in which they considered themselves most proficient. Mathematics and astronomy, for example, had from time immemorial formed a part of the institutions of the Chinese Government, but, when they listened to Father Ricci, even the men who knew most had to acknowledge how small and how mingled with errors was their knowledge. But this recognition of their ignorance and their esteem for European learning, of which they had just got a glimpse, impelled very few Chinese to make serious efforts to acquire this knowledge, their attachment to tradition or the routine of national teaching being too deep-rooted. However, the Chinese, who have made no attempt at reform in this matter, did not wish to deprive the country of all the advantages of European discoveries. To procure them recourse had to be had to the missionaries, and thus the Chinese mission from Ricci's time until the end of the eighteenth century found the services performed with the assistance of European learning. Father Ricci made use of profane science only to prepare the ground and open the way to the apostolate properly so called. With this object in view he employed other means, which made a deep impression on the majority of the educated class, and especially on those who held public offices. He composed under various forms adapted to the Chinese taste little moral treatises, e.g., that called by the Chinese "Tien-chu-shih-i" (The True Doctrine of God). This was a little catechism, which Ricci developed into a number of examples, comparisons, and extracts from the scriptures and from Christian philosophers and doctors. Not unreasonably proud of their rich moral literature, the Chinese were greatly surprised to see a stranger succeed so well; they could not refrain from praising his exalted doctrine, and the respect which they soon acquired for the Christian writings did much to dissipate their distrust of strangers and to render them kindly disposed towards the Christian religion.

But the book through which Ricci exercised the widest and most fortunate influence was his "Tien-chu-shih-i" (The True Doctrine of God). This was a little catechism which had been delivered from day to day, corrected and improved as occasion offered, until it finally contained all the matter suggested by long years of experience in the apostolate. The truths which must be admitted as the necessary preliminary to faith—the existence and unity of God, the creation, the immortality of the soul, reward or punishment in a future life—are here demonstrated by the best arguments from reason, while the errors most widespread in China, especially the worship of idols and the belief in the transmigration of souls, are successfully refuted. To the testimony furnished by the medieval philosophers, Ricci added numerous proofs from the ancient Chinese books which did much to win credit for his work. A masterpiece of apologetics and controversy, the "Tien-chu-shih-i", rightfully became the manual of the missionaries and did most efficacious missionary work. Before its author's death it had been reprinted at least four times, and twice by the pagans. It led countless numbers to Christianity, and aroused esteem for our religion in those readers whom it did not convert. The perusal of it induced Emperor Kang-hi to issue his edict of 1692 granting liberty to the Gospel. Though he persecuted the Christians, ordered the "Tien-chu-shih-i" to be placed in his library with his collection of the most notable productions of the Chinese language. Even to the present time missionaries have experienced its beneficial influence, which was not confined to China, being felt also in Japan, Tong-kings, and other countries tributary to Chinese literature.

Besides the works intended especially for the infidels and the catechumens whose initiation was in progress, Father Ricci wrote others for the new Christians. As founder of the mission he had to invent formulas capable of expressing clearly and unequivocally our dogmas and rites in a language which had hitherto never been put to such use (except for the Nestorian use, with which Ricci was not acquainted). It was a delicate and difficult task, but it had been accomplished, and at the present time the direction of the mission was for Father Ricci, particularly during his last years. While advancing gradually on the capital Ricci did not abandon the territory already conquered; he trained in his methods the fellow-workers who joined him and contributed not a little to the rapidity of his work, the Chinese king's order. Thus in 1601 the mission included besides Peking, the three residences of Nan-king, Nan-ch'ang,
Shao-chow, to which was added in 1608 that of Shang-hai. In each of these there were two or three missionaries with "brothers", Chinese Christians from Macao who had been received into the Society of Jesus and who served the mission as catechists. Although as yet the number of Christians was not very great (2008 were listed in the Jesuit "China List"), this "omnipotence" has said well that considering the obstacles to the entrance of Christianity into China the result was "a very great miracle of Divine Omnipotence". To preserve and increase the success already obtained, it was necessary that the means which had already proved efficacious should continue to be adapted, and that the missionaries, without neglecting the essential duties of the Christian apostolate, had to adapt their methods to the special conditions of the country, and avoid unnecessary attacks on traditional customs and habits. The application of this undeniable sound policy was often difficult. In answer to the doubts of his fellow-workers Father Ricci outlined rules, which received the approval of Father Valignano; these insured the unity and fruitful efficacy of the apostolic work throughout the mission.

**Question of the Divine Names and the Chinese Rites.**

Negotiations between the missionaries and the civil officials of China had to do with the rites or ceremonies, in use from time immemorial, to do honour to ancestors or deceased relatives and the particular tokens of respect which the educated felt bound to pay to their master, Confucius. Ricci's solution of this problem caused a long and heated controversy in which the Holy See finally decided against him. The discussion also dealt with the use of the Chinese terms T'ien (heaven) and Shang-ti (Sovereign Lord) to designate God; here also the custom established by Father Ricci had to be corrected. The following is a short historical survey of the controversy without having the issue simplified or complicated and embittered by passion. With regard to the designations for God, Ricci always preferred and employed from the first, the term T'ien chu (Lord of Heaven) for the God of Christians; as has been seen, he used it in the title of his catechism. But in studying the most ancient Chinese books he considered it established that they said of T'ien (heaven) and Shang-ti (Sovereign Lord) what we say of the true God, that is, they described under these two names a sovereign lord of spirits and men who knows all that takes place in the world, the source of all power and might, the regulator and defender of the moral law, rewarding those who observe and punishing those who violate it. Hence he concluded that, in the most revered monuments of China, T'ien and Shang-ti designate nothing else than the true God whom he himself preached. Ricci maintained this opinion in several passages of his "T'ien-chu-heh"; it will be readily understood of what assistance it was to destroy Chinese prejudices against the Christian religion. It is true that, in drawing this conclusion, Ricci had to contradict the common interpretation of modern scholars who found in Confucianism a sought for justification of the materialistic, materialist, and materialist tendency in the interpretation of the terms Ti and Shang-ti. Nevertheless, this interpretation had not been fully adopted and confirmed by illustrious modern Sinologists, amongst whom it suffices to mention James Legge ("The Notions of the Chinese concerning God and Spirits", 1852; "A Letter to Prof. Max Müller concerning the Interpretation of the Chinese terms Ti and Shang-ti", 1880). Therefore it was not without serious grounds that the founder of the Chinese mission and his successors believed themselves justified in employing the terms T'ien and Shang-ti as well as T'ien-chu to designate the true God. However, there were objections to this practice even among the Jesuits, the earliest arising shortly after the death of Father Ricci and being formulated by the Japanese Jesuits. In the course of this discussion many of the writings for and against, which did not circulate beyond the circle of the missionaries only a part were found working in China declared himself against the use of the name Shang-ti. This was Father Nicholas Longobardi, Ricci's successor as superior general of the mission, who, however, did not depart in anything from the line laid down by the founder of the mission. But the question to be discussed for some years, the superior ordered the missionaries to abide simply by the custom of Father Ricci; later this custom together with the rites was submitted to the judgment of the Holy See. In 1704 and 1715 Clement XI, without pronouncing as to the meaning of T'ien and Shang-ti in the ancient Chinese books, forbade, as being open to misconstruction, the use of these names to indicate the true God, and permitted only the T'ien-chu. Regarding the rites and ceremonies in honour of ancestors and Confucius, Father Ricci was also of the opinion that a breach in the evangelisation of China had to do with the rites or ceremonies, in use from time immemorial, to do honour to ancestors or deceased relatives and the particular tokens of respect which the educated felt bound to pay to their master, Confucius.

Regarding the rite of sacrificing to the ancestors and Confucius, Father Ricci was also of the opinion that a breach in the evangelisation of China had to do with the rites or ceremonies, in use from time immemorial, to do honour to ancestors or deceased relatives and the particular tokens of respect which the educated felt bound to pay to their master, Confucius. The question was of the utmost importance for the progress of the apostolate. To honour their ancestors and deceased parents by traditional prostrations and sacrifices was in the eyes of the Chinese the gravest duty of filial piety, and one who neglected it was treated by all his relatives as an unworthy member of his family and nation. Similar ceremonies in honour of Confucius were an indispensable obligation for the scholars, so that they could not receive any literary degree nor claim any public function without having performed them. The emperor was inviolable; Kiang-hi, the emperor who showed most goodwill towards the Christians, always refused to set aside their favour. In modern times the Chinese Government showed no more favour to the ministers of France, who, in the name of the treaties guaranteeing the liberty of Catholicism in China, claimed for the Christians who had passed the examinations, the titles and advantages of the corresponding degrees without the necessity of going through the ceremonies; the Court of Peking invariably replied that this was a question of national tradition on which it was impossible to make inroads. After having carefully studied what the Chinese classical books said regarding these rites, and after having observed for a long time the practice of them and questioned numerous scholars of every rank with whom he was associated during his eighteen years of apostolate, Ricci was convinced that these rites had no religious significance, either in their institution or in their practice by the enlightened classes. The Chinese, he said, recognised no divinity in Confucius any more than in their deceased ancestors; they prayed to neither; they made no requests of him and expected no answer from him. In fact they only did for them what they did for the living to whom they wished to show great respect. "The honour they pay to their parents consists in serving them dead as they did living. They do not for this reason think that the dead come to eat their offerings [the flesh, fruit, etc.] or need them. They declare that they act in this manner because they know no other way of showing their love and gratitude to their ancestors. . . . Likewise what they do [especially the educated], they do to thank Confucius for the excellent doctrine which he transmitted to them in his books, without which they could not have obtained their degrees and mandarinate. Thus in all this there is nothing suggestive of idolatry, and perhaps it may even be said that there is no super-
tion. The "perhaps" added to the last part of this conclusion shows the conscientiousness with which the founder acted in this matter. That the vulgar and indeed even most of the Chinese pagans mingled superstition with their national rites Ricci never did; neither did he overlook the fact that the Chinese, like infidels in general, mixed superstition with their most legitimate actions. In such cases superstition is only an accident which does not corrupt the substance of the just action itself, and Ricci thought this applied also to the rites. Consequently, he allowed the Chinese Christians to continue the practice of them, avoiding everything suggestive of superstition, and he gave them rules to assist them to discriminate. He believed, however, that this tolerance, though licit, should be limited by the necessity of the case; whenever the Chinese Christian community should enjoy sufficient liberty, its customs, notably its manner of honouring the dead, must be brought into conformity with the customs of the rest of the Christian world. These principles of Father Ricci, controlled by his fellow-workers during his lifetime and after his death, served for fifty years as the rule for all the missionaries.

In 1631 the first mission of the Dominicans was founded at Fu-kien by two Spanish religious; in 1633 two Franciscans, also Spanish, came to establish a mission of their order. The new missionaries were soon alarmed by the attacks on the purity of religion which they thought they discerned in the community of their predecessors. Without taking sufficient time perhaps to become acquainted with Chinese matters and to learn exactly what was done in the Jesuit missions they sent a denunciation to the bishops of the Philippines. The bishops referred it to Pope Urban VIII (1635), and soon the public was informed. As early as 1635 a controversy began in the Philippines between the Jesuits in defence of their brethren on the one side and the Dominicans and Franciscans on the other. In 1643 one of the chief accusers, the Dominican, Jean-Baptiste Morales, went to Rome to submit to the Holy See a series of "questions" or "doubts" which he said were controverted between the Jesuit missionaries and their rivals. Ten of these questions concerned the participation of Christians in the rites in honour of Confucius and the dead. Morales's petition tended to show that the cases on which he requested the decision of the Holy See were really authorized by the Society of Jesus; as soon as the Jesuits learned of this they declared that these cases were imaginary and that they had never allowed the Christians to take part in the rites as set forth by Morales. In declaring the ceremonies illicit in its Decree of 12 Sept., 1645 (approved by Innocent X), the Congregation of the Propaganda gave the only possible reply to the questions referred to it.

In 1651 Father Martin Martini (author of the "Novus Atlas Sinensis") was sent from China to Rome by his brethren to give a true account of the Jesuits' power and to set forth the Chinese rites. This delegate reached the Eternal City in 1654, and in 1655 submitted four questions to the Sacred Congregation of the Holy Office. This supreme tribunal, in its Decree of 23 March, 1656, approved by Pope Alexander VII, sanctioned the practice of Ricci and his associates as set forth by Father Martini, declaring that the ceremonies in honour of Confucius and ancestors appeared to constitute "a purely civil and political cult." Did this decree annul that of 1645? Concerning this question, laid before the Holy Office by the Dominican, Father John Bolaños, the reply was that it was impossible to decide both decrees should remain "in their full force" and should be observed "according to the questions, circumstances, and everything contained in the proposed doubts".

Meanwhile an understanding was reached by the hitherto divided missionaries. This reconciliation was hastened by the persecution of 1655 which assembled for nearly five years in the same house at Canton nineteen Jesuits, three Dominicans, and one Franciscan (see also Ch. II). The only possible exception of the Franciscan Antonio de Santa Maria, who was very zealous but extremely uncompromising) subscribed to forty-two articles, the result of the deliberations, of which the forty-first was as follows: "As to the ceremonies by which the Chinese honour their master Confucius and the dead, the replies of the Sacred Congregation of the Inquisition approved by our Holy Father Alexander VII, in 1656, must be followed absolutely because they are based on a very probable opinion, to which it is impossible to offset any evidence to the contrary, and, this probability assumed, the doors of salvation would not be closed to the Chinese who would stray from the Christian religion if they were forbidden to do what they may do licitly and in good faith and which they cannot forego without serious injury." After the subscription, however, a new courteous discussion of this article in writing took place between Father Ricci and Father Navarrete, superior of the Dominicans, and the most learned of the Jesuits at Canton. Navarrete finally appeared satisfied and on 29 Sept., 1669, submitted his written acceptance of the article to the superior of the Jesuits. However, on 19 Dec. of the same year he secretly left Canton for Macao whence he went to Europe. There, and especially at Rome where he was in 1673, he sought from now on only to overthrow what had been attempted in the conferences of Canton. He published the Tratados historicos, politicos, etnicos, y religiosos de la monarquia de China (I, Madrid, 1673; of vol. II, printed in 1679 and incomplete, only two copies are known). This work is filled with impassioned accusations against the Jesuit missionaries regarding their methods of apostolate and especially their toleration of the rites. Nevertheless, Navarrete did not succeed in invalidating the practice of the rites in question, this being reserved for Charles Maigrot, a member of the new Société des Missions Etrangères. Maigrot went to China in 1683. He was Vicar Apostolic of Fu-kien, before being as yet a bishop, when, on 26 March, 1693, he addressed to the missionaries of his vicariate a mandate prescribing the names T'ien and Sheng-ti; forbidding that Christians be allowed to participate in or assist at "sacrifices or solemn obligations" in honour of Confucius or the dead; prescribing modifications of the inscriptions on the ancestral tablets; censoring and forbidding certain, according to him, too favourable references to the ancient Chinese philosophers; and, last but not least, declaring that the exposition made by Father Martini was not true and that consequently the approval which the latter had received from Rome was not to be relied on.

By order of Innocent XII, the Holy Office resumed in 1697 the study of the question on the documents furnished by the procurators of Mgr Maigrot and on those showing the opposite side brought by the representatives of the Jesuit missionaries. It is worthy of note that at this period a number of the missionaries who, according to the Sovereign Pontiffs, were expelled from China, nearly all the Franciscans, and some Dominicans, were converted to the practice of Ricci and the Jesuit missionaries. The difficulty of grasping the truth amid such different representations of facts and
contradictory interpretations of texts prevented the Congregation from reaching a decision until towards the end of 1704 under the pontificate of Clement XI. Long before then, the pope had chosen and sent to the Far East a legate to secure the execution of the Apostolic decrees and to regulate all other questions of the critical situation. The prelate was Charles-Thomas-Maillard de Tournon (b. at Turin) whom Clement XI had consecrated with his own hands on 27 Dec., 1701, and on whom he conferred the title of Patriarch of Antioch. Leaving Europe on 9 Feb., 1703, Mgr de Tournon stayed for a time in India (see Macao), and on 24 March, 1704, he arrived in Macao on 2 April, 1705, and Peking on 4 December of the same year. Emperor K'ang-hi accorded him a warm welcome and treated him with much honour until he learned, perhaps through the impudence of the legate himself, that one of the objects of his embassy, if not the chief, was to abolish the rites amongst the Christians. Mgr de Tournon was already aware that the decision against the rites had been given since 20 Nov., 1704, but not yet published in Europe, as the pope wished that it should be published first in China. Forced to leave Peking, the legate had returned to Macao. He now learned that the emperor had ordered all missionaries, under penalty of expulsion, to come to him for a piao or diploma granting permission to preach the Gospel. This diploma was to be granted only to those who promised not to oppose the national rites. On the receipt of this news the legate felt that he could no longer proceed in the nomenclature of the Roman decisions. By a mandate of 15 January, 1707, he required all missionaries under pain of excommunication to reply to Chinese authority, if it questioned them, that "several things" in Chinese doctrine and customs did not agree with Catholic teaching, and that these would specify the "intercourse to Confucian ancestors" and "the use of ancestral tablets", moreover that Shang-ti and T'ien were not "the true God of the Christians". When the emperor learned of this Decree he ordered Mgr de Tournon to be brought to Macao and forbade him to leave there before the return of the envoys whom he himself sent to the pope to explain his objections to the interdiction of the rites. While still subject to this restraint, the legate died in 1710.

Meanwhile Mgr Maigret and several other missionaries having refused to ask for the piao had been expelled from China. But the majority (i.e. all the Jesuits and Franciscans) refused to agree that they could not legally be styled religious, having at their head the Bishop of Peking, a Franciscan, and the Bishop of Ascalon, Vicar Apostolic of Kiang-si, an Augustinian) considered that, to prevent the total ruin of the mission, they might postpone obedience to the legate until the pope should have annulled his will. Clement XI, replied by publishing (March, 1709) the answers of the Holy Office, which he had already approved on 20 November, 1704, and then by causing the same Congregation to issue (25 Sept., 1710) a new Decree which approved the acts of the legate and ordered the observance of the mandate of Man-king, ordered the Franciscans in Peking, Beijing, and of Ricci, as of his fellow-workers and successors, was but an error in judgment. The Holy See expressly forbade it to be said that they approved idolatry; it would indeed be an odious calumny to accuse such a man as Ricci, and so many other holy and zealous missionaries, of having approved and permitted to their neophytes practices which they knew to be superstitions and contrary to the purity of religion. Despite this error, Matteo Ricci remains a splendid type of missionary and founder, unsurpassed for his zealous intrepidity, the intelligence of the methods applied to each situation, and the unwavering tenacity with which he pursued the projects he undertook. To him belongs the glory not only of opening up a vast empire to the Gospel, but of simultaneously making the first breach in that distrust of strangers which excluded China from the general progress of the world. The establishment of the Catholic mission in the heart of this country also had its economic consequences: it laid the foundation of a better understanding between the Far East and the West, which grew with the progress of the mission. It is superfluous to detail the results from the standpoint of the material interests of the Christian community in China. For the direct cause which owed to Father Ricci the exact scientific knowledge received in Europe concerning China, its true geographical situation, its ancient civilization, its vast
and curious literature, its social organization is different from what existed elsewhere. The method instituted by Ricci necessitated a fundamental study of this new world, and if the missionaries who have since followed him have rendered scarcely less service to science than to religion, credit is due to the Jesuit. [Matteo Ricci]. Della entrata della Compagnia di Gesù e cristianità nella Cina (MS. of Father Ricci, extant in the archives of the Jesuits).—cited the foregoing artistic health. The Memoir of Father Ricci, a somewhat free tr. of this work is given in Tav. di S. Francesco, the Roman Catholic periodical of the Society of Jesus. friend, Rice applied to the Holy See for approbation and a constitution for his society. In 1820 Pius VII formally confirmed the new congregation of "Fratres Monachi" by the Brief "Ad pastoralis dignitatis festigium". This was the first confirmation by the Church of a congregation of religious men in Ireland. Its institution was based on the monastic foundations, and the individual members were bound to observe the rule of the Church, and to assign them to his children during his own lifetime and even to have his sons brought up among the people they were destined to govern. To Richard I, King of England, b. at Oxford, 6 Sept., 1157; d. at Chalus, France, 6 April, 1199; was known to the minstrels of a later age, rather than to his contemporaries, as "Coeur-de-Lion". He was the second son of Henry II, but it was part of his father's policy, holding, as he did, continental possessions in France and Germany, to strengthen his power by returning his children to the kingdom of France from which he had been expelled by his father. The King was a weak point in the old King's management of his sons, that, while dazzling them with brilliant prospects, he invested them with very little of the substance of power. In 1173 the young Henry, who, following a German usage, had already been crowned king in the lifetime of his father, broke out into open revolt, being instigated thereto by his father-in-law, Louis VII, King of France. Under the influence of their mother Eleanor, who bitterly resented her husband's infidelities, Geoffrey and Richard in 1175 also threw in their lot with the rebel. All the other barons gathered round them and the situation grew so threatening, that Henry II thought it well to propitiate heaven by doing penance at the tomb of the martyred Archbishop St. Thomas (11 July, 1174). By a remarkable coincidence, on the very next day, Richard, on a visit to Westminster Abbey, met and overWilliam, King of Scotland, disposed of Henry's most formidable opponent. Returning with a large force to France, the King swept all before him, and though Richard for a while held out alone he was compelled by 21 Sept. to sue for forgiveness at his father's feet.

Richard, a Friar Minor and preacher, appearing in history between 1428 and 1431, whose origin and nationality are unknown. He is sometimes called the different Bernardine of Siena and of St. Francis of Assisi; yet the old chroniclers of the Franciscans, but probably only because, like the former, he promoted the veneration of the Holy Name of Jesus and, like the latter, announced the end of the world as near. In 1428 Richard came from the Holy Land to France, preached at Troyes, next year in Paris during the summer (1429), and thence he set out for England, eleven in England, and one in Sydney, Australia, while applications for foundations had been received from the Archbishop of Baltimore and from bishops in Canada, Newfoundland, and other places.

had so far prevented the realization of this pious design. Now that he was more free the young King seemed to have been conscientiously in earnest in putting the recovery of the Holy Land before everything else. Though the expedients by which he set to work to get the necessary fresh troops which he could lay hands were alike unscrupulous and impolitic, there is something which commands respect in the energy which he threw into the task. He sold sheriffsdoms, justiceships, church lands, and appointments of all kinds, both lay and secular, practically to the highest bidder. He was not ungenerous in providing for his brothers John and Geoffrey, and he showed a certain prudence in exacting a promise from them to remain out of England for three years, in order to leave a free hand to the new Chancellor William of Longchamp, who was to govern England in his absence. Unfortunately he took with him many of the men, e.g. Archbishop Baldwin, Hubert Walter, and Ranulf Glanvill, whose statesmanship and experience would have been most useful in governing England, and left behind many restless spirits like John himself and Longchamp, whose energy might have been serviceable against the infidels.

Already on 11 Dec., 1189, Richard was ready to cross to Calais. He met Philip Augustus, who was also to start on the Crusade, and the two Kings swore to defend each other’s dominions as they would their own. The story of the negotiations of the Crusade has also been told in minute detail (see vol. IV, p. 549). It was September, 1190, before Richard reached Marseilles; he pushed on to Messina and waited for the spring. There miserable quarrels occurred with Philip, whose sister he now refused to marry, and this trouble was complicated by an interference in the affairs of Sicily, which the Emperor Henry VI watched with a jealous eye, and which later on was to cost Richard dear. Setting sail in March, he was driven to Cyprus, where he quarrelled with Isaac Comnenus, seized the island, and married Berengaria of Navarre. He at last reached Acre in June and after prodigies of valour captured it. Philip then returned to France but Richard made two desperate efforts to reach Jerusalem, the first of which might have succeeded had he known the panic and weakness of the foe. Saladin was a worthy opponent, but terrible acts of cruelty as well as of chivalry took place, notably when Richard took the Saracen prisoners in a fit of pique.

In July, 1192, further effort seemed hopeless, and the King of England’s presence was badly needed at home to secure his own dominions from the treacherous intrigues of John. Hardening back Richard was wrecked in the Adriatic, and falling eventually into the hands of Leopold of Austria, he was sold to the Emperor Henry VI, who kept him prisoner for over a year and extorted a portentous ransom which England was raked to pay. Recent investigation has shown that the motives of Henry’s conduct were less vindictive than political. Richard was induced to surrender England to the Emperor (as John was later to make over England to the Holy See), and then Henry conferred the kingdom upon his captive as a fief at the Diet of Mainz, in Feb.,, 1194 (see Bloch, “Forschungen,” Appendix IV). Despite the intrigues of King Philip and John, Richard had loyal friends in England. Hubert Walter had now reached home and worked energetically with the Justices to raise the ransom, while Eleanor the Queen Mother obtained from the Holy See an excommunication against his captors. England responded nobly to the appeal for money and Richard reached home in March, 1194. He had now returned to his native land, and after spending less than two months there quitted it for his foreign dominions never to return. Still, in Hubert Walter, who was now both Archbishop of Canterbury and Justiciar, he left it a capable governor. Hubert tried to wring unconditional supplies and service from the impoverished barons and clergy, but failed in at least one such demand before the resolute opposition of St. Hugh of Lincoln. Richard’s diplomatic struggles and his campaigns against the wily King of France were very costly but fairly successful. He would probably have triumphed in the end, but a bolt from a crook-bow while he was besieging the castle of Chalus inflicted a mortal injury. He died, after receiving the last sacraments of sincere repentance. In spite of his greed, his lack of principle, and, on occasions, his ferocious savagery, Richard had many good instincts. He thoroughly respected a man of fearless integrity like St. Hugh of Lincoln, and Bishop Stubbs says of him with justice that he was perhaps the most sincerely religious prince of his family. “He heard Mass daily, and on three occasions did penance in a very remarkable way, simply on the impulse of his own distressed conscience. He never showed the brutal profanity of John.”

Richard and all other standard histories of England deal fully with the reign and personal character of Richard. DAVY, A History of England in Six Volumes, II (2nd ed., London, 1909), also, The Political History of England, 1176-1216 (1st ed., 1860), may be specially recommended. The Preface contributed by Bishop Stubbs to his editions of various Chronicles in the R. S. may also be very valuable, notably the entries on Richard (London, 1869-71); Ralph de Diceto (1875); and Bernard of Pater-Noster (1867). Besides the above mentioned notes on Richard in the same series the two extremely important volumes of Richard’s Chronicles of the Reign of Richard I (London, 1864-65), also edited by Stubbs; the Monna Vida S. Hagociris, compiled by Didron, 1864; and Randalph de Coggeshall Chronicum Anglicanum, ed. Stevenson, 1875. See also NOGARET, England under the Angevin Kings (London, 1899); LECAIXE AND LATIMIS, Histoire du France (Paris, 1902); KESSEL, Der Richard Liederwerde deutsche Ge- genmacht (Freiburg, 1886); BLOCH, Geschichte der Politik, Band I (Hamburg, 1866), and Band II, Reichsstaatswesen, Heft 36. HERRFTHURSTON.

Richard, CHARLES-LOUIS, theologian and publicist; b. at Blainville-sur-l’Eau, in Lorraine, April, 1711; d. at Mons, Belgium, 16 Aug., 1794. His family, though of noble descent, was poor, and he received his education in the schools of his native town.

At the age of sixteen he entered the Order of St. Dominic, and, after his religious profession, was sent to study theology in Paris, where he received the Doctorate at the Sorbonne. He next applied himself to preaching and the defence of religion against d’Alembert, Voltaire, and their confederates. The outbreak of the Revolution forced him to seek refuge in Belgium, during the occupation of that country by the French, in 1794, old age prevented him from fleeing, and, though he eluded his pursuers for some time, he was at last detected, tried by court martial, and shot, as the author of Parallèle des Juifs qui ont crucifié Jésus-Christ, avec les Français qui ont exécuté leur roi! (Mons, 1794). Among his works may be mentioned “Biblio- thèque sacrée, ou dictionnaire universelle des sciences ecclésiastiques” (5 vols., Paris, 1760) and “Supplément” (Paris, 1765), the last and enlarged edition being that of Paris, 1821-27, 29 vols., and “Analyses des conciles généraux et particuliers” (5 vols., Paris, 1772-77).

Richard de Bury, bishop and bibliophile, b. near Bury St. Edmund’s, Suffolk, England, 24 Jan., 1296; d. at Auckland, Durham, England, 24 April, 1345. He was the son of Sir Richard Aungerville, but was
named after his birthplace. He studied at Oxford, and became a Benedictine. Having been appointed tutor to Prince Edward, son of Edward II and Isabella of France, he was exposed to some danger during the stormy scene that led to the deposition of the king. On the accession of his pupil to the throne (1327), de Bury eventually rose to be Bishop of Durham (1333), High Chancellor (1334), and Treasurer of England (1336). He was sent on two embassies to John XXII at Avignon, and on one of his visits, probably in 1330, he made the acquaintance of the poet Petrarch. He continued to enjoy the favour of the king, and in his later years took a prominent part in the diplomatic negotiations with Scotland and France. He died at his manor of Auckland, and was buried in the cathedral of Durham. He founded Durham College at Oxford, and according to tradition bequeathed to its library most of the books which he had spent his life in collecting. There they remained until the dissolution of the College by Henry VIII. They were then scattered, some going to Balliol College, others to the university (Duke Humphrey's) library, and still others passing into the possession of Dr. George Owen, the purchaser of the site whereon the dissolved college had stood. These books were of course all in manuscript, for the art of printing had not yet been discovered.

Bale mentions three of de Bury's works, namely: "Philobiblon"; "Epistola Familiaris"; and "Orationes ad Principes". It is by the "Philobiblon" that he is principally remembered. It was first printed at Coligny in 1473, then at Spires in 1483, in Paris in 1500, and at Oxford in 1588-90. Subsequent editions were made in Germany in 1610, 1614, 1674, and 1703, and in Paris in 1588. It was translated into English in 1532 by J. B. Inglis, and of this translation a reprint was made at Albany, New York, in 1881. The standard Latin text—the result of a collation of 28 manuscripts and of the printed editions—was established by Ernest C. Thomas and edited by him, with English translation, in 1888. A reprint of Thomas's translation appeared in the "Past and Present" Library in 1905.

Bishop Richard had a threefold object in writing the "Philobiblon"; he wished to inculcate on the clergy the pursuit of learning and the cherishing of books as its receptacles; to vindicate to his contemporaries and to posterity his own action in devoting so much time, attention, and money to the acquisition of books; and to give directions for the management of the library which he proposed to establish at Durham College, Oxford. The work is important for its sidelights on the state of learning and manners and on the habits of the clergy in fourteenth-century England. He is the true type of the bookish bishop in possession of a library in each of his residences. Conspicuous in his legacy are Greek and Hebrew grammars. He did not despise the novelties of the moderns, but he preferred the well-tested labours of the ancients, and, while he did not neglect the poets, he had but little use for law-books. He kept copyists, scribes, binders, correctors, and illuminators, and he was particularly careful to restore defaced or battered texts. His directions for the lending and care of the books intended for his college at Oxford are minute, and evince considerable practical forethought. His humility and simple faith are shown in the concluding chapter, in which he acknowledges his sins and asks the future students of his college to pray for the repose of his soul.

Richard de la Vergue, FRANCOIS-MARIE-BENJAMIN, Archbishop of Paris, b. at Nantes, 1 March, 1819; d. in Paris, 28 January, 1908. Educated at the Seminary of Saint-Sulpice he became in 1849 secretary to Bishop Jacquet at Nantes, then, from 1850 to 1869, vicar-general. In 1871 he became Bishop of Belley where he began the reorganisation of the Curé d'Art. On 7 May, 1875, he became cousin of Cardinal Guibert, Archbishop of Paris, whom he succeeded 8 July, 1886, becoming cardinal with the title of Santa Maria in Via, 24 May, 1889. He devoted much energy to the completion of the Basilica of the Sacred Heart at Montmartre, which he consecrated. Politically, Cardinal Richard was attached by ties of esteem and sympathy to the Monarchist Catholics. In 1892, when Leo XIII recommended the rallying of Catholics to the Republic (see FRANCE, The Third Republic and the Church in France), the cardinal created the "Union of Christian France" ("Union de la France Chrétienne") to unite all Catholics on the sole basis of the defence of religion. The Monarchists opposed this "rallying" (Ralliement) with the policy which this union represented, and at last, at the pope's desire, the union was dissolved. On many occasions Cardinal Richard spoke in defence of the religious congregations, and Leo XIII addressed to him a letter (27 December, 1900) on the relations who were menaced by the then projected Law of Associations. In the domain of hagiography he earned distinction by his "Vie de la bienheureuse Françoise d'Amboise" (1865) and "Saints de l'église de Bretagne" (1872).

GEORGES GOTAY.

Richard de Wyche, SAINT, bishop and confessor, b. about 1197 at Droitwich, Worcestershire, from which his surname is derived; d. 3 April, 1253, at Dover. He was the second son of Richard and Alice de Wyche. His father died while he was still young and the family property fell into a state of partial partition. His elder brother offered to resign the inheritance to him, but Richard refused the offer, although he undertook the management of the estate and soon restored it to a good condition. He went to Oxford, where he and two companions lived in such poverty that they had only one tunic and hooded gown between them, in which they attended lectures by turns. He then went to Paris and on his return proceeded Master of Arts. At Bologna he studied canon law, in which he acquired a great reputation and was elected Chancellor of the University of Oxford.

His learning and sanctity were so famed that Edmund Rich, Archbishop of Canterbury, and Robert Grosseteste, Bishop of Lincoln, both offered him the post of chancellor of their respective dioceses. Richard accepted the archbishop's offer and thenceforward...
became St. Edmund's intimate friend and follower. He approved the archbishop's action in opposing the king on the question of the vacant sees, accompanied him in his exile to Pontigny, was present at Soissey when he died, and in his will left a model in life and a supply of material for his biography and, after attending the translation of his relics to Pontigny in 1249, wrote an account of the incident in a letter published by Matthew Paris (Historia major, V. VI). Retiring to the house of the Dominicans at Paris, Richard studied theology, became a priest, and, after founding a chapel in honour of St. Edmund, returned to England where he became Vicar of Deal and Rector of Charing. Soon afterwards he was induced by Boniface of Savoy, the new Archbishop of Canterbury, to resume his former office of chancellor.

In 1244 Ralph Neville, Bishop of Chichester, died; the election of Robert Passelewe, Archdeacon of Chichester, to the vacant see, was quashed by Boniface on a synod of his suffragans, held 3 June, 1244, and on his recommendation the chapter elected Richard, their choice being immediately confirmed by the archbishop. Richard was introduced, as Robert Passelewe was a favourite, and he refused to surrender to Richard the temporalities of his see. The Saint took his case to Innocent IV, who consecrated him in person at Lyons, 5 March, 1245, and sent him back to England. But Henry was immovable. Thus homeless and poor, and without the dependence of either the charity of his clergy, one of whom, Simon of Tarring, shared with him the little he possessed. At length, in 1248, Henry was induced by the threats of the pope to deliver up the temporalities. As bishop, Richard lived in great austerity, giving away most of his revenues as alms. He compiled a number of statutes which regulated in great detail the lives of the clergy, the celebration of Divine service, the administration of the sacraments, church privileges, and other matters. Every priest in the diocese was bound to obtain a copy of these statutes and bring it to the diocesan synod (Wilkins, "Concilia", I, 688–93); in this way the standard of life among the clergy was raised considerably. For the better maintenance of his cathedral Richard instituted a yearly collection to be made in every parish of the diocese on Easter or Whit Sunday. The mendicant orders, particularly the Dominicans, received special arrangement from him.

In 1250 Richard was named as one of the collectors of the subsidy for the crusades (Bliss, "Calendar of Papal Letters", I, 283) and two years later the king appointed him to preach the crusade in London. He made strenuous efforts to rouse enthusiasm for the crusade in the Diocese of Chichester and Canterbury, and while journeying to Dover, where he was to consecrate a new church dedicated to St. Edmund, he was taken ill. Upon reaching Dover, he went to a hospital called "Maison Dieu", performed the consecration ceremony on 2 April, but died the next morning. His body was taken back to Chichester and buried in the cathedral. He was immediately canonized by Urban IV in the Franciscan church at Viterbo, 1262, and on 20 Feb. a papal licence for the translation of his relics to a new shrine was given; but the unsettled state of the country prevented this until 16 June, 1276, when the translation was performed by Archbishop Kilwardby in the presence of Edward. This shrine, which stood in the forecourt behind the high altar, was rifled and destroyed at the Reformation. The much-restored altar tomb in the south transept now commonly assigned to St. Richard has no evidence to support its claim, and no relics are known to exist. The feast is celebrated on 3 April. The most exact version of St. Richard's will, which has been frequently printed, is that given by Blasius in "Sussex Archæological Collections", I, 164–92, with a translation and valuable notes. His life was written by his confessor Ralph Bocking shortly after his canonization and another short life, compiled in the fifteenth century, was printed by Capgrave. Both these are included in the notice of St. Richard in the Bollandist "Acta Sanctorum".

Richard Fetherston, Blessed, priest and martyr, d. at Smithfield, 30 July, 1540. He was chaplain to Catharine of Aragon and schoolmaster to her daughter, Princess Mary, afterwards queen. He is called sacra theologiae Doctore by Pits (De illustriss. Anglie scriptoribus), who was one of the theologians who attempted to defend Queen Catharine's cause in the divorce proceedings before the legates Wolsey and Campeggio, and is said to have written a treatise "Contra divertion Henrici et Catharine, Liber unus". No copy of this work is known to exist. He was burned in the session of Convocation which began in April, 1530, and was one of the first to refuse to sign the Act declaring Henry's marriage with Catharine to be illegal ab initio, through the pope's inability to grant a dispensation in such a case. In 1534 he was called upon to take the Oath of Supremacy and, on refusing to do so, was committed to the Tower, 13 Dec., 1534. He seems to have remained in prison till 30 July, 1540, when he was hanged, drawn, and quartered at Smithfield, together with the Catholic theologians, Thomas Abel and Edward Powell, who like himself had been councillors to Queen Catharine in the divorce proceedings, and three heretics, Barnes, Garret, and Jerome, condemned for teaching Zwinglianism. All six were drawn through the streets upon three hurdles, a Catholic and a heretic on each hurdle. The Protestants were burned, and the three Catholics executed in the usual manner, their limbs being fixed over the gates of the city and their heads being placed upon pikes. Richard was beatified by Leo XIII, 29 Dec., 1886.

Richard Kirkman, Blessed. See William Lacy, Blessed.

Richard Cirencester, chronicler, d. about 1400. He was the compiler of a chronicle from 447 to 1066, entitled "Speculum Historiale de Gestis Regum Angliae". The work, which is in four books, is of little historical value, but one of the most accurate versions of the accounts of the reigns of the kings of England to Westminster Abbey. Nothing is known of Richard's life except that he was a monk of Westminster, who made a pilgrimage to Jerusalem in 1391, was still at Westminster in 1397, and that he lay sick in the innfirmery in 1400. Two other works are attributed to him: "De Officis", and "Super Symbolum Magnum et Minus", but neither is now extant. In the eighteenth century his name was used by Charles Bertram as the pretended author of his forgery "Richardus Copernicus de situ Britanniae", which deceived Stukeley and many subsequent antiquaries and historians, includ-
ing Lingard, and which was only finally exposed by Woodward in 1866–67. This spurious chronicle, however, still appears under Richard's name in Giles, "Six English Chronicles" (London, 1872).

Richard of Cornwall (Richard Rufus, Rute, Rosio, Rowse).—The dates of his birth and death are unknown, but he was still living in 1259. He was an Oxford Franciscan, possibly a Master of Arts of that university, who had studied for a time in Paris (1258), and then returned to Oxford. He was chosen with a symmetry of hands to go to Rome to speak the minister-general of Elias. In 1250 he was lecturing at Oxford on the "Sentences," till he was driven away by the riots, when he returned to Paris and continued lecturing there, gaining the title Philosophus Admirabilis; but according to Roger Bacon his teaching was very miscueish, and produced no results for the next forty years. He was again at Oxford in 1258 as regent-master of the friars. Several works, all still in MS., are attributed to him. These are: "Commentaries on the Master of the Sentences," a work formerly at Assisi; "Commentary on Bonaventure's third book of Sentences" (Assisi); and a similar commentary (in the fourth part of Seraphicus) "in illustri anglice scriptorius" denies his identity with Richard Rufus on the ground that Rufus was born at Cirencester in Gloucestershire, and not in Cornwall.

Richard of Middletown (a Media Villa), flourished at the end of the thirteenth century, but the dates of his birth and death and most incidents of his life are unknown. Middleton Stoney in Oxfordshire and Middleton Cheyne in Northamptonshire have both been suggested as his native place, and he has also been claimed as a Scoteman. He probably studied first at Oxford, but in 1253 he was at the University of Paris, and graduated B.A. in that year. He entered the Franciscan order in 1278 he had been appointed by the general of his order to examine the doctrines of Peter Olivi, and the same work was again engaging his attention in 1283. In 1286 he was sent with two other Franciscans to Naples to undertake the education of two of the sons of Charles II, Ludwig, afterwards a Franciscan, and Robert. After the defeat of Charles by Peter of Arragon the two princes were carried as hostages to Barcelona and Richard accompanied them, sharing their captivity till their release in 1285. The rest of his life lies in obscurity. A few points of interest at the present day lies in the fact that medieval scholastic though he was, he knew and studied the phenomena of hypnotism, and left the results of his investigations in his "Quodlibeta" (Paris, 1519, fol. 90–8) where he treats of what would now be termed auto-suggestion and adduces some instances of telepathy, and also includes "Petri Lombardi," written between 1281 and 1285, and first printed at Venice, 1489; "Questiones Quodlibetales" in MS. at Oxford and elsewhere; "Quodlibeta tria" printed with the Sentences at Venice, 1509; "De gradibus formarum" in MS. at Munich; and "Questiones disputatae" in MS. Other works which have been attributed to him are: "Super epistolam Pauli," "Super evangelia," "Super distinctiones decreti," "De ordine judiciorum," "De clavis sacramentorum potestate," "Contra Patrem Ioannem Olivium," a poem, "De conceptione immaculata Virginis Mariae"; three MS. sermons now in the Bibliothèque Nationale (MS. 14947, nos. 47, 69, 98), and a sermon on the Ascension, the MS. of which is at Erlangen, is said to have been given to him as a treatise on the rule of St. Francis; the "Quadragessimale" which was written by Francis of Assi; the completion of the "Summa" of Alexander of Hales, and an "Expositio super Ape Mariae," probably by Richard of Saxony. His death is assigned by some to 1307 and by others to 1308. He was allowed by Parkinson to some earlier date on the ground that he was one of the "Four Masters," the expositors of the Rule of St. Francis.

Richard of St. Victor, theologian, native of Scotland, but the date and place of his birth are unknown; d. 1173 and was commemorated on 10 March in the necrology of the abbey. He was professed at the monastery of St. Victor under the first Abbot Gilduin (d. 1153) and was a disciple of the great mystic Hugo whose principles and methods he adopted and elaborated. His career was strictly monastic, and his relations with the outer world were few and slight. He was sub-prior of the monastery in 1159, and subsequently became prior. During his tenure of the latter office, serious trouble arose in the community of St. Victor. A letter of excommunication was addressed by the pope to "Richard, the prior" and the community in 1170. Richard does not appear to have taken any active part in these proceedings, but the disturbed condition of his surroundings may well have accentuated his desire for the interior solace of mystical contemplation. Excommunicated in 1172. In 1165, St. Victor had been visited by St. Thomas of Canterbury, after his flight from Northampton; and Richard was doubtless one of the auditors of the discourse delivered by the archbishop on that occasion. A letter to Alexander III, dealing with the affairs of the archbishop, and signed by Richard is extant and published by Migne. Like his master, Hugo, Richard may probably have had some acquaintance and intercourse with St. Bernard, who is thought to have been the Bernard to whom the treatise "De tribus approbatis personas in Trinitate," is addressed. Few other than his knowledge in theology extended far beyond the confines of his monastery, and copies of his writings were eagerly sought by other religious houses. Exclusively a theologian, unlike Hugo, he appears to have had no interest in philosophy, and took no part in the acute philosophical controversies of his time; but, like all the School of St. Victor, he held the doctrines of Peter Lombard in all essentials. His didactic and constructive methods in theology which had been introduced by Abelard. Nevertheless, he regarded merely secular learning with much suspicion, holding it to be worthless as an end in itself, and only an occasion of worldly pride and self-seeking when divorced from the knowledge of Divine things. Such learning he calls, in the antithetical style which char-
acturizes all his writing, "Sapientia insipida et doctrina indocta"; and the professor of such learning is "Cap- tator fame, neglector conscientiae". Such worldly-minded persons should stimulate the student of sacred things to greater efforts in his own higher sphere—"When we consider how much the philosophy of this world have laboured, and should be rewarded to be inferior to them"; "We should seek always to comprehend by reason what we hold by faith."

His works fall into the three classes of dogmatic, mystical, and exegetical. In the first, the most important is the treatise in six books on the Trinity, with the argument on the attributes of the Three Persons, and the treatise on the Incarnate Word. But greater interest now belongs to his mystical theology, which is mainly contained in the two books on mystical contemplation, entitled respectively "Benjamin Minor" and "Benjamin Major", and the allegorical treatise on the Tabernacle. He carries on the mystical doctrine of Hugo, in a somewhat more detailed scheme, in which the successive stages of contemplation are described. These are six in number, divided equally among the three powers of the soul—the imagination, the reason, and the intelligence, and ascending from the first to the last seven degrees of vision, the rapture in which the soul is carried "beyond itself" into the Divine Presence, by the three final stages of "Dilatio, sublevatio, alienatio". This schematic arrangement of contemplative soul-states is substantially adopted by Gerson in his systematic treatise on mystical theology, while, however, making the important reservation that the distinction between reason and intelligence is to be understood as functional and not real. Much use is made in the mystical treatises of the allegorical interpretation of Scripture for which the Victorine school had a special affection. The title of "Benjamin Major" and "Messor" refers to Ps. Ixxv. 1. "Benjamin impius excessus", and "Racael" represents the reason, "Lia represents charity; the tabernacle is the type of the state of perfection, in which the soul is the dwelling-place of God. In like manner, the mystical or devotional point of view predominates in the exegetical treatises, though the critical and doctrinal exposition of the text also excites attention. The four books entitled "Tractatus exceptionum", and attributed to Richard, deal with matters of secular learning. Eight titles of works attributed to him by Trithemius (De Script. Ecol.) refer probably to MSS. fragments of his known works. A. 1531 is mentioned by Morin, as attributed to a "Ricardus Secundus a Sancto Victore", and may probably be identical with the treatise "De potestate solvendi et ligandi" above mentioned. Nothing is otherwise known of a second Richard of St. Victor. Fifteen other MSS. are said to exist of works attributed to Richard which have appeared in none of the published editions, and are probably spurious. Eight editions of his works have been published: Venice, 1506 (incomplete) and 1592; Paris, 1518 and 1550; Lyons, 1534; Cologne, 1621; Rouen, 1650, by the Canons of St. Victor; and by Meteor. A. B. SHARPE.

Richardson (alias Anderson), William, Venerable, last martyr under Queen Elizabeth; b. according to the charter, at Vales in Yorkshire (now presumably Wales, near Sheffield), but, according to the Valladolid diary, a Lancashire man; executed at Tyburn, 17 Feb., 1603. He arrived at Reims 16 July, 1592, and on 21 Aug. following was sent to Valladolid, where he arrived 23 Dec. Thence, 1 Oct., 1594, he was sent to Seville where he was ordained. According to one account he was arrested at Clement's Inn on 12 Feb., but another says he had been kept a close prisioner; Nigellus had been appointed to him at the Old Bailey on the 15 Feb., under stat. 27 Eliz. c. 2, for being a priest and coming into the realm. He was betrayed by one of his trusted friends to the Lord Chief Justice, who expedited his trial and execution with unseemly haste, and seems to have acted more as Roman Catholic judge than as a judge. At his execution he showed great courage and constancy, dying most cheerfully, to the edification of all beholders. One of his last utterances was a prayer for the queen.

don, 1870), 392, 393, 303, 301, 302.

John B. Wainwright.

Richard Thirskeld, Blessed, martyr; b. at Conis- ciffe, Durham, England; d. at York, 29 May, 1583. From Queen's College, Oxford, where he was in 1584—
5, he went to Reims, where he was ordained priest, 18 April, 1579, and the very same day was sentenced to the rapture in which the soul is carried "beyond itself" into the Divine Presence, by the three final stages of "Dilatio, sublevatio, alienatio". This schematic arrangement of contemplative soul-states is substantially adopted by Gerson in his more systematic treatise on mystical theology, while, however, making the important reservation that the distinction between reason and intelligence is to be understood as functional and not real. Much use is made in the mystical treatises of the allegorical interpretation of Scripture for which the Victorine school had a special affection. The title "Benjamin Major" and "Messor" refer to Ps. Ixxv. 1. "Benjamin impius excessus", and "Racael" represents the reason, "Lia represents charity; the tabernacle is the type of the state of perfection, in which the soul is the dwelling-place of God. In like manner, the mystical or devotional point of view predominates in the exegetical treatises, though the critical and doctrinal exposition of the text also excites attention. The four books entitled "Tractatus exceptionum", and attributed to Richard, deal with matters of secular learning. Eight titles of works attributed to him by Trithemius (De Script. Ecol.) refer probably to MSS. fragments of his known works. Nothing is otherwise known of a second Richard of St. Victor. Fifteen other MSS. are said to exist of works attributed to Richard which have appeared in none of the published editions, and are probably spurious. Eight editions of his works have been published: Venice, 1506 (incomplete) and 1592; Paris, 1518 and 1550; Lyons, 1534; Cologne, 1621; Rouen, 1650, by the Canons of St. Victor; and by Meteor.

Richard Whiting, Blessed, last Abbot of Glastonbury and martyr, parentage and date of birth unknown, executed 15 Nov., 1539: was probably educated in the claustral school at Glastonbury, whence he proceeded to Cambridge, graduating as M.A. in 1483 and D.D. in 1505. If, as is probable, he was already a monk when he went to Cambridge he must have received the habit from John Selwood, Abbot of Glastonbury from 1456 to 1493. He was ordained deacon in 1500 and priest in 1501, and held for some years the office of chamberlain of his monastery. In February, 1526, Richard Bere, Abbot of Glastonbury, died, and the community, after deciding to elect his successor per formam apostolicae, submitted the selection in the hands of some one person of note, agreed to request Cardinal Wolsey to make the choice of an abbot for them. After obtaining the king's permission to act and giving a fortnight's inquiry to the circumstances of the case Wolsey on 3 March, 1526, nominated Richard Whiting as the vacant post. The first ten years of Whiting's rule were prosperous and peaceful, and he appears in the State papers as a careful overseer of his abbey alike in spirituals and temporals. Then, in August, 1535, came the first "visitation" of Glastonbury by Dr. Layton, who, however, found all in good order. In spite of this, however, the Abbot's jurisdiction (i.e. the whole of Somersetshire, Glouces-
but then and more than once during the next few years he was assured that there was no intention of supplanting him.

By January, 1539, Glastonbury was the only monastery left in Somerset, and on 19 September in that year the royal commissioners, Layton, Pollard, and Meyle, arrived there without warning. Whiting happened to be at his manor of Sharpham. Thither the commissioners followed and examined him according to certain articles drawn up by Cromwell, which apparently dealt with the question of the succession to the throne. The abbot was then taken back to Glastonbury and thence sent up to London to the Tower that Cromwell might examine him for himself, but the precise charge on which he was arrested, and subsequently executed, remains uncertain though it is usually referred to as one of treason. On 2 October, the commissioners wrote to Cromwell that they had now come to the knowledge of "divers and sundry treasons committed by the Abbot of Glastonbury" and enclosed a "book" of evidences thereof with the accusers' names, which however is no longer forthcoming. In Cromwell's MS., "Remembrances," for the same month, are the entries: "Item, Certain persons to be sent to the Tower for the further examination of the Abbot of Glaston... Item, The Abbot of Glaston to (be) tried at Glaston and also executed there with his complices." 2nd Item, Council to give evidence against the Abbot of Glaston. Rich. Pollard, Lewis Forstew (Forstell), Thos. Moyle. Marillac, the French Ambassador, on 25 October wrote: "The abbot of Glastonbury... has lately been put in the Tower, because, in taking the Abbey treasures, valued at 200,000 crowns, they found a written book of arguments in behalf of queen Katherine." If the charge was high treason, which apparently most probable, then, as a member of the House of Peers, Whiting should have been attainted by an Act of Parliament passed for the purpose, but his execution was an accomplished fact before Parliament even met. In fact it seems clear that his doom was deliberately wrapped in obscurity by Cromwell and Henry, for Marillac, writing to Francis I on 30 November, after mentioning the execution of the Abbots of Reading and Glastonbury, adds: "could learn no particulars of what they were charged with, but we saw that it was by the means of letters of quizzus; which makes things more perplexing than ever. Whatever the charge, however, Whiting was sent back to Somerset in the care of Pollard and reached Wells on 14 November. Here some sort of trial apparently took place, and next day, Saturday, 15 November, he was taken to Glastonbury with two of his monks, Dom John Thorne and Dom Roger James, where all three were fixed upon hurdles and dragged by horses to the top of Tor Hill which overlooks the town. Here they were hanged, drawn and quartered, Abbot Whiting's head being fastened over the gate of the now deserted abbey and his limbs exposed at Castle Bath, Ilchester and Bridgwater. Richard Whiting was beheaded by Pope Leo XIII in his decree of 13 May, 1895. His watch and seal are still preserved in the museum at Glastonbury.

RICHIELIEU

Richelieu, Armand-Jean Du Plessis, Cardinal, Duke de, French statesman, b. in Paris, 5 September, 1585; d. there 4 December, 1642. At first he intended to follow a military career, but when, in 1605, his brother Alfred resigned the Bishopric of Luçon and retired to the Grande Chartreuse, Richelieu obtained the see from Henry IV and withdrew to the country to take up his theological studies under the direction of Bishop Cospàn of Aire. He was consecrated bishop on 17 April, 1607; he was not yet twenty-two years old, although the Brief of Paul V dated 19 December, 1606, announcing his appointment contains the statement: "in vigesimo tertio statis anno tantum constitutus". Mgr Lacroix, the historian of Richelieu's youth, believes that in a journey made to Rome at the end of 1606, Richelieu deceived the pope as to his age, but the incident is still obscure. In his diocese, Richelieu showed great zeal for the conversion of Protestants and appointed the Oratorians and the Capuchins to give missions in all the parishes. Richelieu represented the clergy of Poitou in the States General of 1614, when his political career began. There he was the mouth-piece of the Church, and in a celebrated discourse demanded that bishops and prelates be summoned to the royal councils, that the distribution of ecclesiastical benefices to the laity be forbidden, that the Church be exempt from taxation, that Protestants who usurped churches or had their congregations interred in them be punished, and that the Decrees of the Council of Trent be promulgated throughout France. He ended by assuring the young king Louis XIII that the desire of the clergy was to have the royal power so assured that it might be "comme un ferme rocher qui brise tout ce qui le heurte" (as a firm rock which crushes all that opposes it).

Richelieu was named secretary of state on 30 November, 1618, but after the assassination of Concini, favourite of Marie de' Medici, he was forced to leave the ministry and follow the queen mother to Blois. To escape the political intrigues which pursued him he retired in June, 1617, to the priory of Coussay and, during this time of leisure caused by his disgrace, published in October, 1617 (date confirmed by Mgr Lacroix), his "Les principes du point de la foi de l'église catholique, défendus contre l'écrit adressé au Roi par les quatre ministres de Charenton"; it was upon reading this book a half century later that Jacques de Coras, a Protestant pastor of Tonneins, was converted to Catholicism. Richelieu continued to be represented

G. ROGER HUDLESTON.
to the king as an enemy to his power; the Capuchin, Leclerc de Tremblay, never succeeded in completely clearing him in Louis XIII's opinion. To disarm suspicion Richelieu asked the king to name a place of exile, and at his order went in 1618 to Avignon, where he died two years later. 

Richelieu's mission was to France in 1619. Richelieu was chosen by his minister Luvnes to negotiate for peace between Louis XIII and his mother. By the Treaty of 3 November, 1622, he was created cardinal by Gregory XV. On 19 April, 1624, he re-entered the Council of Ministers, and on 12 August, 1624, was made his president. Richelieu's policy was based on two principal ideas: the domestic unification of France and opposition to the House of Austria. At home he had to contend with constant conspiracies in which Maria de' Medici, Queen Anne of Austria, Gaston d'Orléans (the king's brother), and the highest nobles of the court were involved. 

On 17 March, 1625, the Edict of Marillac (1623), which decreed the persecution of the Huguenots (1632), Cinq-Mars and de la Chou (1642) intimidated the enemies of the cardinal. He had also to contend with the Protestants who were forming a state within the state (see Huguenots). The capitulation of La Rochelle and the peace of Alais (28 June, 1628) annihilated Protestantism as a political party. 

Richelieu's foreign policy (see Leclerc de TREMBLAY) was characterized by his fearlessness in making alliances with the foreign Protestants. At various times the Protestants of the Grisons, Sweden, the Protestant Princes of Germany, and Bernhard of Saxe-Weimar were his allies. The favourable treaties signed by Mazarin (c.1657) were the result of Richelieu's policy of Protestant alliances, a policy which was severely censured by a number of Catholics. At the end of 1625, when Richelieu was preparing to give back Valletine to the Protestant Grisons, the partisans of Spain called him "Cardinal of the Huguenots", and two pamphlets, attributed to the Jesuits Eudemon Joannes and Jean Keller, appeared against him; these he had burned. Hostilities, however, increased until finally the king's confessor opposed the foreign policy of the cardinal. This was a very important episode, and on it the recent researches of Father de la Forêt, a member of the School of the Jesuits, have cast new light. 

Father Causin, author of "La Cour Sainte", the Jesuit whom Richelieu, on 23 March, 1636, had made the king's confessor, tried to use against the cardinal the influence of Mlle de La Fayette, a lady for whom the king had entertained a certain regard and who had become a nun. On 8 December, 1637, in a solemn interview Causin recalled to the king his duties towards his wife, Anne of Austria, to whom he was too indifferent; asked him to allow his mother, Maria de' Medici, to return to France; and pointed out the dangers to Catholicism which might arise through Richelieu's alliance with the Protestants of France.

After this interview Causin gave Communion to the king and addressed him a very beautiful sermon, enthralling him to obey his directions. Richelieu was anxious that the king's confessor should occupy himself solely with "giving absolutions", consequently, on 10 December, 1637, Causin was dismissed and exiled to Rennes, and his successor, Father Jacques Sirmond, celebrated for his historical knowledge, was forced to promise that, if he saw "anything censurable in the conduct of the State", he would report it to the cardinal and not attempt to influence the king's conscience. However, Father Causin's fears concerning Richelieu's foreign policy were not shared by all of his confrères. Father Lallemant, for instance, affirmed that it was rash to blame the king's political alliance with the Protestant princes—an alliance which had been made only after an unsuccessful attempt to form one with Bavaria and the Catholic princes of Germany.

That Richelieu was possessed of religious sentiments cannot be contested. It was he who in February, 1622, persuaded the king to appoint a year after he consecrated the Kingdom of France to the Virgin Mary; in the ministry he surrounded himself with priests and religious; as general he employed Cardinal de la Valette; as admiral, Sourdif, Archbishop of Bordeaux; as diplomat, Bérulle; as chief advisor he had Leclerc de Tremblay, who himself designated Mazarin his successor. He had a high idea of the sacerdotal dignity, was continually protesting against the encroachments of the parlements on the jurisdiction of the Church, and advised the king to choose as bishops only those who should "have passed after their studies a considerable time in the seminaries, the places established for the study of the ecclesiastical functions". He wished to compel the bishops to reside in their dioceses, to establish seminaries there, and to visit their parishes. He aided the efforts of St. Vincent de Paul to induce the bishops to encourage "exempts or ordinands" retreats, during which the young clerics might prepare themselves for the priesthood. Richelieu foresaw the perils to which the Jesuits Jansenius exposed the Church. Saint-Cyrus' doctrines on the constitution of the Church, his views on the organization of the 'great Christian Republic', his liaison with Jansenius in 1655 (see Langevin), his pamphlet against France under the name of "Mara gallica", and the manner in which he opposed the annulment of the marriage of Gaston d'Orléans, drew upon him the cardinal's suspicion. In having him arrested 14 May, 1638, Richelieu declared that "had Luther and Calvin been confined before they had begun to dogmatize, the states would have been spared many troubles". Two months later Richelieu forced the request of Port Royal to be allowed to dispatch seamen to Paris, others to Ferté-Milon. Saint-Cyrus remained in the dungeon of Vincennes until the cardinal's death. With the co-operation of the Benedictines Grégoire Tarielle, Richelieu devoted himself seriously to the reform of the Benedictines. Named coadjutor to the Abbot of Cluny in 1627, and Abbot of Cluny in 1629, he called to this monastery the Reformed Benedictines of Saint-Vannes. He proposed in 1632 to create a single order of Saint-Maur and Saint-Maur into one body, of which he was to have been superior. Only half of this project was accomplished, however, when in 1636 he succeeded in uniting the Order of Cluny with the Congregation of Saint-Maur. From 1632 Richelieu was proteus of the Sorbonne, and in virtue of this office he headed the Association of Doctors of the Sorbonne. He had the Sorbonne entirely rebuilt between 1626 and 1629, and between 1635 and 1642 built the church of the Sorbonne, in which he is now buried.

On the question of the relations between the temporal and the spiritual power, Richelieu defended the doctrine of Duvalier, the theologian Duvalier, who admitted at the same time the supreme power of the pope and the supreme power of the king and the divine right of both. In the discussions between Rome and the Gallicans he most frequently acted as mediator. When in 1629 a book by the Jesuit Sancarel appeared in Paris, denying the right of the pope to depose kings for wrongdoing, heresy, or incapacity, it was burned in the Place de Grève; Father Coton and the three superiors of the Jesuit houses summoned before the Parlement were forced to repudiate the work. The enemies of the Jesuits wished to depose him, a new disturbance on the occasion of the publication of the "Somme théologique des vérités apostoliques capitales de la religion chrétienne", by Father Garasse, but Richelieu
TRIPLE PORTRAIT OF CARDINAL RICHELIEU

RICHER

opposed the continued agitation. It was, however, renewed at the end of 1626, owing to a thesis of the Dominican Tétoret, which maintained that the Decrees formed part of the Scripture. Richelieu again strove to allay feeling, and in a discourse (while still affirming that the king held his kingdom from God alone) caught that "the king can make any law by faith unless this article has been so declared by the Church in her ecumenical councils". Subsequently, Richelieu gave satisfaction to the pope when on 7 December, 1629, he obtained a retraction from the Gallican Edmond Richer, syndic of the theological faculty, who submitted to this book "Instruction contre les malheureux qui contestent l'vote du prince" to the judgment of the pope. Nine years later, however, Richelieu's struggles against the resistance offered by the French clergy to taxes led him to assume an attitude more deliberately Gallician. Contrary to the theories which he had maintained in his discourse of 1614 he considered, now that he was minister, that the needs of the State constituted a case of force majeure, which should oblige the clergy to submit to all the fiscal exigencies of the civil power. As early as 1626 the assembly of the clergy, tired of the incessant demands of the Government for money, had decreed that no deputy could vote supplies with the assent of the bishop of the diocese; Richelieu, contesting this principle, declared that the needs of the State were actual, while those of the Church were chimerical and arbitrary.

In 1638 the struggle between the State and the clergy on the subject of taxes became critical, and Richelieu, to uphold his claims, enlisted the aid of the brothers Pierre and Jacques Dupuy, who about the middle of 1638 published "Les libertés de l'eglise gallicaine". This book established the independence of the Gallican Church in opposition to Rome only to reduce it to servile submission to the temporal power. The Archbishop of Sens, in an appeal to the Pope, complained that bishops assembled at the house of Cardinal de la Rochefoucauld, and denounced to their colleagues this "work of the devil". Richelieu then exaggerated his fiscal exigencies in regard to the clergy; an edict of 16 April, 1639, stipulated that ecclesiastics and communities were incapable of possessing landed property in France, that the king could compel them to surrender their possessions and unite them to his domains, but that he would allow them to retain what they had in consideration of certain indemnities which should be calculated in going back to the year 1520. In January 1639, after the murder of an equerry, Massard d'Ébroyes, the French Ambassador, Estrées declared the rights of the people violated. Richelieu refused to receive the nuncio (October, 1639); a decree of the royal council, 22 December, restrained the powers of the pontifical Briefs, and even the canonist Marca proposed to break the Concordat and to hold a national synod, that at which Richelieu was to have been made patriarch. Precisely at this date Richelieu had a whole series of grievances against Rome: Urban VIII had refused successively to name him Legate of the Holy See in France, Legate of Avignon, and coadjutor to the Bishop of Trier; he had rejected the plea to France, and had opposed the annulment of the marriage of Gaston d'Orléans. But Richelieu, however furious he was, did not wish to carry things to extremes. After a certain number of polemics on the subject of the taxes to be levied on the clergy, the ecclesiastical assembly of Mantes in 1641 accorded to the clergy of that archdiocese, which was valued at two million and a half millions, and Richelieu, to restore quiet, accepted the dedication of Marca's book "La concorde du sacerdoce et de l'empire", in which certain exceptions were taken to Dupuy's book. At the same time the sending of Massar as envoy to France by the Emperor, in a note presentation to him of the cardinal's hat put an end to the differences between Richelieu and the Holy See.

XIII.—4

Upon the whole, Richelieu's policy was to preserve a just mean between the parliamentary Gallicans and the Ultramontanes. "In such matters", he wrote in his political testament, "one must believe neither the people of the palace, who ordinarily measure the power of the king by the shape of his crown, which, because of its round, has no end, nor those who, in the excesses of an indiscernible zeal, declare themselves only as partisans of Rome". One may believe that Pierre de Marca's book was inspired by him and reproduces his ideas. According to this book the liberties of the Gallican Church have two foundations: (1) the recognition of the primacy and the sovereign authority of the Church of Rome, to the right to make general laws, to judge without appeal, and to be judged neither by bishops nor by councils; (2) the sovereign right of kings which knows no superior in temporal affairs. It is to be noted that Marca does not give the superiority of a council over the pope as the foundation of his doctrine. (For Richelieu's work in Canada see article CANADA.) In 1636 Richelieu founded the Académie Française. He had great literary pretensions, and had held several mediocre plays of his own composition produced in a theatre belonging to him. With a stubborness incontestable, he did not want on 25 June 1637 Richelieu's "Testament politique" was authentic; the researches of M. Hanotaux have proved its authenticity, and given the proper value to admirable chapters such as the chapter entitled "Le conseil du Prince", into which Richelieu, says M. Hanotaux, "has put all his soul and his genius". (For Richelieu's "Mémoires" see HARLAY, FAMILY OF: (2) Achille de Harlay.)

Besides the works indicated in the articles LE CLERC DU TREMBLAY and MARCA, DE ELIZABETH the following may be consulted: Histoire et fragmented politiques du cardinal de Richelieu, ed. HANOTAUX (Paris, 1890); Lettres, instructions diplomatiques et diplomatiques de M. le cardinal de Richelieu, 4 vols. (Paris, 1833-77); Mémoires du cardinal de Richelieu, ed. HORACE DE BAUCAU, 4 (Paris, 1900); LAIR, LAVALLOIS, BRUEL, GABRIEL DE ROYER and LECLERCQ, Études et mémoires du cardinal de Richelieu préparées pour la société de l'histoire de France (3 fasc., Paris, 1925-6); HANOTAUX, Hist. du cardinal de Richelieu (2 tomes in 3 vols. Paris, 1893-95), extends to 1684; CAISET, L'administration en France sous le mi-

RICHÉR.

Richer, a monk of Saint-Rémi (flourished about 950-1000), was the son of a knight belonging to the Court of Louis IV d'Outre-Mer (reigned 936-54). Richer inherited from his father a love of war and politics. At Saint-Rémi he was a pupil of Gerbert's; besides Latin he studied philosophy, medicine, and mathematics. Nothing more than these facts is known with certainty concerning his life. The great Gerbert commissioned him to write a history of France. The only MS. of his "Historia rerum in Francia IV" was discovered by Perts (1833) at Bamberg and then published. Richer selected the date 882, with which Hlnemar's annals closed, for the starting-point of his history. In his work he depends upon Flogado (d. 956), on his eagerness for rhetorical ornaments, and by Richer for the light of the age; the work is not very accurate. Notwithstanding this, in Wattenbach's opinion, the work has great value: "he is our sole informant for the very important period in which the sovereignty passed from the Carolingians to the Capetians". He gives a large amount of important information concerning his era. His statements concern both the events of the larger history as well as of the destinies of his church and school at Reims.

GEORGES GOTAY.
we receive also welcome information relating to various matters regarding the history of culture. In politics he defended the rights of the Carolovians. King Henry I of Germany was to him only the King of Saxony. In ecclesiastical matters Richer held to the views of his master Gerbert. Richer's views were in line with his expression of the conception of a French nationality.

FRANZ KAMPELS.

Richmond, Diocese of (Richmondensis), suffragan of Baltimore, established 11 July, 1820, comprises the State of Virginia, except the Counties of Accomac and Northampton (Diocese of Wilmington); and Bland, Buchanan, Carroll, Craig (partly), Dickenson, Floyd, Giles, Grayson, Lee, Montgomery, Pulaski, Russell, Scott, Smyth, Tazewell, Washington, Wise, and Wythe (Diocese of Wheeling); and in the State of West Virginia, the Counties of Berkeley, Grant, Hampshire, Hardy, Jefferson, Mineral, Morgan, and Pendleton. It embraces 31,518 square miles in Virginia and 3200 square miles in West Virginia. Originally it included also the territory of the present Diocese of Wheeling, created 23 July, 1850.

Colonial Period.—In the summer of 1526 a Spanish Catholic settlement was made in Virginia on the very spot (according to Eciça, the pilot-in-chief of Florida) where, in 1607, eighty-one years later, the English founded the settlement of Jamestown. Lucas Vázquez de Ayllón, one of the judges of the island of San Domingo, received from the King of Spain, 12 June, 1523, a patent empowering him to explore the coast for 800 leagues, establish a settlement within three years and Christianize the natives. In June, 1526, Ayllón sailed from Puerto de La Plata, San Domingo, with three vessels, 600 persons of both sexes, horses, and supplies. The Dominicans Antonio de Montesinos and Antonio de Cervantes, with Brother Peter de Estrada, accompanied the expedition. Entering the Capes at the Chesapeake, and ascending a river (the James) he landed at Guanape, which he named St. Michael. Buildings were constructed and the Holy Sacrifice offered in a chapel, the second place of Catholic worship on American soil. Ayllón died of fever, 18 Oct., 1526. The rebellion of the settlers and hostility of the Indians caused Francisco Gomes, the next in command, to abandon the settlement in the spring of 1527, when he set sail for San Domingo in two vessels, one of which founderd. Of the party only 150 reached their destination.

A second expedition sent by Menendez, the Governor of Florida and nominal Governor of Virginia, settled on the Potomahumock River at a point called Axazan, 10 Sept., 1570. It consisted of Father Segura, Vicc-Provincial of the Jesuits, and Luis de Quiros, six Jesuit brothers, and a few friendly Indians. A log building served as chapel and home. Through the treachery of Don Luis de Velasco, an Indian pilot of Spanish name, Father Quiros and Brothers Solis and Angel, a Jesuit missionary, were slain by the Indians, 14 Feb., 1571. Four days later were martyred Father Segura, Brothers Linares, Redondo, Gabriel, Gomez, and Sancho Zevalles. Menendez, several months later, sailed for Axazan, where he had eight of the murderers hanged; they being converted before death by Father John Roell. Attempts to found Catholic settlements in Virginia were made by Lord Baltimore in 1629, and Captain George Brent in 1687. In the spring of 1834 Father John Altham, a Jesuit companion of Father Andrew White, the Maryland missionary, laboured amongst some of the Virginia tribes on the south side of the Potomac. Stringent laws were soon enacted in Virginia against Catholics. In 1857 Fathers Edmonds and Raymond were arrested at Norfolk for exercising their priestly functions. During the last quarter of the eighteenth century the few Catholic settlers at Aquia Creek, near the Potomac, were attended by Father John Carroll and other Jesuit missionaries from Maryland.

American Period.—Rev. Jean Dubois, afterwards Bishop of New York, accompanied by a few French priests and with letters of introduction from Lafayette to several prominent Virginia families, came to Norfolk in August, 1791, where he laboured a few months, and probably left the priests who came with him. Proceeding to Richmond towards the end of the year, he offered in the House of Delegates, by invitation of the General Assembly, the first Mass ever said in the Capital City. His successors at Richmond, with interruptions, were the Rev. T. C. Monterguy, Xavier Michel, John McElroy, John Baxter, John Mahoney, James Walsh, Thomas Hore, and Fathers Horner and Schreiber.

Tradition tells us that at an early date, probably at the time of the Declaration of Independence, Alexandria had a log chapel with an unknown resident priest. Rev. John Thayer of Boston (see Boston, ARCHDIOCESE OF) was stationed there in 1794. Rev. Francis Neale, who in 1796 constructed at Alexandria a brick church, erected fourteen years later a more suitable church where Fathers Kohlmann, Enoch, and Benedict Joseph Fenwick, afterwards second Bishop of Boston, frequently officiated. About 1796 Rev. James Bushe began the erection of a church at Norfolk. His successors were the Very Rev. Leonard Neale, afterwards Archbishop of Baltimore (see Baltimore, ARCHDIOCESE OF), Revs. Michael Lacy, Christopher Delaney, Joseph Stokes, Samuel Cooper, J. Van Horsihan, and A. L. Hyniker.

Bishops of Richmond.—(1) Right Rev. Patrick Kelly, D.D., consecrated first Bishop of Richmond, 24 Aug,
1820, came to reside at Norfolk, where the Catholics were much more numerous than at Richmond, 19 Jan., 1821. The erection of Virginia into a diocese had been premature and was accordingly opposed by the Archbishop of Baltimore. Because of factions and various other difficulties, Bishop Kelly soon petitioned to have Bishop John Carroll reinstated. His action was followed by the appointment of the Rev. J. Melrose in Virginia in July, 1822, having been transferred to the See of Waterford and Lismore, where he died, 8 Oct., 1829. Archbishop Maréchal of Baltimore was appointed administrator of the diocese.

Rev. Timothy O'Brien, who came as pastor to Richmond in 1829, did more for the Church during his sixteen years' labour than any other missionary, excepting the Bishops of the See. In 1834 he built St. Peter's Church, afterwards the cathedral, and founded St. Joseph's Female Academy and Orphan Asylum, bringing as teachers three Sisters of Charity.

(2) The Right Rev. Richard Vincent Whelan, D.D., consecrated 21 March, 1841, established the same year, on the outskirts of Richmond, St. Vincent's Seminary and College, discontinued in 1846. Leaving Rev. Timothy O'Brien at St. Peter's, Richmond, the Bishop took up his residence at the seminary, and acted as president. In 1842 Bishop Whelan dedicated St. John's Church, Norfolk, St. Patrick's Church, Lynchburg, and the following year that of St. Francis at Petersburg. In 1846 he built a church at Wheeling, and, two years later, founded at Norfolk St. Vincent's Female Orphan Asylum. Wheeling was made a separate see, 25 July, 1850, and to it was transferred Bishop Whelan.

(3) Right Rev. John McGill, D.D., consecrated 10 Nov., 1850, was present in Rome in 1854 when the Dogma of the Immaculate Conception was proclaimed. By pen and voice he opposed Know-nothingism. In 1856 Bishop McGill convened the First Diocesan Synod. In 1857, the same year that Bishop Whelan placed in charge Matthew O'Keefe of Norfolk and Rev. Francis Devlin of Portsmouth won renown; the latter dying a martyr to priestly duty. In 1856 St. Vincent's Hospital, Norfolk, was founded. Alexandria, formerly in the Baltimore archdiocese as part of the District of Columbia, but ceded back to Virginia, was annexed to the Richmond diocese, 15 Aug., 1858. In 1860 the bishop transferred St. Mary's German Church, Richmond, to the Benedictines. During the Civil War Bishop McGill wrote two learned works, "The True Church Indicated to the Inquirer", and "Our Faith, the Pictorial History of the Catholic Church". The bishop established at Richmond the Sisters of the Visitatie, and at Alexandria the Sisters of the Holy Cross. He also took part in the Vatican Council. Bishop McGill died at Richmond, 14 January, 1872.

(4) Right Rev. James Gibbons, D.D. (afterwards archbishop and cardinal), consecrated titular Bishop of Adramyttum to organize North Carolina into a vicariate, 16 Aug., 1868, was appointed Bishop of Richmond, 30 July, 1872. He established at Richmond the Little Sisters of the Poor, and St. Peter's Boys' Academy. Erecting new parishes, churches, and schools, making constant diocesan visits, frequently preaching to large congregations of both Catholics and non-Catholics, Bishop Gibbons, during his short rule of five years, accomplished in the diocese a vast amount of religious good. Made coadjutor Bishop of Baltimore, 29 May, 1877, he succeeded Augustus Van Dyver, D.D., in that office, 1890.

(6) Right Rev. Augustine Van De Vyver, D.D., consecrated, 20 Oct., 1889, began an able and vigorous rule. On 3 June, 1903, he publicly received the Most Venerable Order of St. Diomede for Bishop van Dyver. On the following day laid the cornerstone of the new Sacred Heart Cathedral, one of the most artistic edifices in the country, designed by Joseph McGuire, architect, of New York. A handsome bishop's house and a pastoral residence adjoin the cathedral. The latter was solemnly opened to the public by Mgr. Falconio on 29 Nov., 1906. The event was the most imposing Catholic ceremony in the history of the diocese. Besides Cardinal Gibbons, and the Apostolic Delegate, there were present 18 archbishops and bishops. Bishop Van De Vyver convened a quasi-synod, 12 Nov., 1907, which approved the decrees of the Second Synod and enacted new and needed legislation. In 1907 the Knights of Columbus held at the Jamestown Exposition their national convention and jubilee celebration, participated in by the Apostolic Delegate, and several archbishops and bishops; while the following year the St. Vincent de Paul Society held a similar celebration in Richmond. In June, 1909, St. Peter's Church was given a handsome new residence and the adjoining home of the McGinly Union and the Knights of Columbus were completed, at a total cost of about $50,000. In the following autumn St. Peter's Church (the old cathedral) celebrated the diamond jubilee of its existence. With it, either as bishops or as priests, are indelibly linked the names of Cardinal Gibbons, Archbishops Keane and Janssens, and Bishops Van De Vyver, Whelan, McGill, Becker, Kelley, and O'Connell of San Francisco. Most Rev. John J. Kain, deceased Archbishop of St. Louis, had been also a priest of the diocese. The same year the Bishop introduced into the diocese the Fathers of the Holy Ghost; additional Benedictine and Josephite Fathers and Xaverian Brothers; the Christian Brothers; additional Sisters of Charity; the Benedictine and Franciscan Sisters; Sisters of Charity of Nazareth, of the Blessed Sacrament and of the Perpetual Adoration. Under his regime have been founded 12 new parishes, 32 churches, 3 colleges, 4 industrial schools, 2 orphan asylums, 1 infant asylum (coloured), and many parochial schools.

Notable Benefactors.—Mr. and Mrs. Thomas Fortune Ryan, of New York, the former donating the latter furnishing, the imposing Sacred Heart Cathedral (nearly $500,000), together with other notable benefactions. Mrs. Ryan has built churches, schools, and religious houses in various parts of the state. Other generous benefactors were Right Rev. Bernard McQuaid, D.D., Joseph Gallego, John P. Matthews, William S. Caldwell, Mark Downey, and John Pope.

Statistica.—(1911): Secular priests, 50; Benedictines, 10; Josephites, 6; Holy Ghost Fathers, 2; Brothers, Xaverian, 35; Christian, 12; Sisters of Charity, 60; of St. Benedict, 50; Visitatie Nuns, 25; Sisters of Charity of Nazareth, Kentucky, 20; of the Holy Cross, 20; Little Sisters of the Poor, 18; Sisters of the Blessed Sacrament, 18; of St. Francis, 12; of Perpetual Adoration, 10; parishioners with resident priests, 35; missions with churches, 48; colleges, 3 (1 coloured), academies, 8; parochial schools, 26; industrial schools, 4; orphan asylums, 4; infirmaries, 4; coloured); young people attending Catholic institutions, 7500; home for aged, 1 (infanies, 200); Catholic Hospital, 1 (yearly patients, 3000).

Catholic Societies.—Priests' Clerical Fund Association; Eucharistic League; Holy Name; St. Vincent de Paul; League of Good Shepherd boys' and girls' sodalities; tabernacle, altar, and sanctuary societies; women's benevolent and beneficial; fraternal and
social, such as Knights of Columbus, Hibernians, and flourishing local societies. Of parishes there are one each of Germans, Italians, and Bohemians, and 4 for the coloured people. Catholic population, 41,000.

The causes of growth are principally natural increase and conversions, there being little Catholic immigration into the diocese.

F. Joseph Magrì.

Richter, Henry Joseph. See Grand Rapids, Diocese of.

Ricolto da Monte di Croce (Pernini), b. at Florence about 1243; d. there 31 October, 1320. After studying in various great European schools, he became a Dominican, 1267; was a professor in several convents of Tuscany (1272-88), made a pilgrimage to the Holy Land (1288), and then traveled for many years among various countries. He was regarded as a guide-book for missionaries, and is headquarters at Bagdad. He returned to Florence before 1302, and was chosen to high offices in his order. His “Itinerarium” (written about 1288-91; published in the original Latin at Leipzig, 1884; in Italian at Florence, 1793; in French at Paris, 1877) was regarded as a guide-book for missionaries, and is an interesting description of the Oriental countries visited by him. The “Epistolae de Perditione Acconis” are five letters in the form of lamentations over the fall of Ptolemais (written about 1292, published at Paris, 1884). Ricolto’s best known work is the “Contra Legem Sarracorum,” written at Bagdad, which has been very popular as a polemical source against Mohammedanism, and has been often edited (first published at Seville, 1500). The “Christian Fidei Confessio facta Sarracensibus” (printed at Basle, 1543) is attributed to Ricolto, and was probably written about the same time as the above mentioned work. Another work is “Contra Judaeorum” (MS. at Florence); “Libellus contra nationes orientales” (MS. at Florence and Paris); “Contra Sarraecos et Acoranum” (MS. at Paris); “De variis religionibus” (MS. at Turin). Very probably the last three works were written after his return to Europe. Ricolto is also known to have written two theological works—a defence of the doctrines of St. Thomas (in collaboration with John of Pistoia, about 1285) and a commentary on the “Libri sententiarum” (before 1283). Ricolto began a translation of the Koran about 1293, but it is not known whether the work was completed. Mandonnini in Revu Chol. Biblique (1893), 44-61, 182-202, 584-607; Eichard-Quitter, Script. Riel, Louis. See Saskatchewan and Alberta.

Riemenschneider, Tillmann, one of the most important of Frankish sculptors, b. at Osterode am Harz in or after 1460; d. at Würzburg, 1531. In 1483 he was admitted into the Guild of St. Luke at Würzburg, where he worked until his death. In the tombstone of his Ritter von Grunbach he still adheres to the Gothic style, but in his works for the Marienkapelle at Würzburg he adopts the Renaissance style, while retaining reminiscences of earlier art. For the south entrance he carved, besides an announcement and a representation of Christ as a gardener, the afterwards renowned statues of Adam and Eve, the heads of which are of special importance. There also he showed his gift of depicting character in the more than life-size figures of the Baptist and the Twelve Apostles for the baptismal font. Elsewhere indeed we seek in vain for the merits of rounded sculpture. He had a special talent for the noble representation of female saints (cf. for example, Sta. Dorothea and Magaretta in the same chapel, and the Madonna in the Münterskirche). A small Madonna (now in the National Gallery of Berlin) on the capital of a column (he was also a master of architecture) is perfect both in expression and drapery. Besides other works for the above-mentioned churches and a relief with the “Vierzehn Nothelfer” for the church of St. Burkhard), he carved for the cathedral of Würzburg a tabernacle reaching to the ceiling, two episcopal thrones, and a colossal cross—all recognized as excellent works by those familiar with the peculiar style of the master. Riemenschneider’s masterpiece is the tomb of Emperor Henry II in the Cathedral of Bamberg; the recumbent forms of the emperor and his spouse are ideal, while the sides of the tomb are adorned with fine reliefs. The figures instinct with life, the drapery, and the expression of sentiment, are all of equal beauty. Among his representations of the “Lament over Christ”, those of Hedingfeld and Malsbrunn, in spite of some defects, are notable works; resembling the former, but still more pleasing to the eye, is a sculpture in the university collection. The defects in many of his works are probably to be referred for the most part to his numerous apprentices. There are a great number of other works by him in various places, e. g. a beautiful group of the Crucifixion in the Darmstadt Museum, another at Volkach am Main representing Our Lady surrounded by a rosary with scenes from her life in relief and being crowned by angels playing music—the picture is suspended from the roof.

There is a second Meister Tillmann Riemenschneider, who carved the Virgin’s altar in Cröglingen. This bears close resemblance to the works of the younger “Master Dill” that recently many believed it should be referred to him; in that case, however, he would have executed one of his best works as a very young man.

G. Gietmann.

Rienzi, Cola di (i.e., Nicola, son of Lorenzo), a popular tribute and extraordinary historical figure. His father was an inquisitor at Rome in the vicinity of the Trastevere; though it was believed that he was really the son of the Emperor Henry VII. His childhood and youth were passed at Anagni, with some relatives to whom he was sent on the death of his mother. Though he was thus brought up in the country, he succeeded in acquiring a knowledge of letters and of Latin, and devoted himself to a study of the history of ancient Rome in the Latin authors, Livy, Valerius Maximus, Cicero, Seneca, Boethius, and the poets. When his father died he returned to Rome and practised as a notary. The sight of the remains of the former greatness of Rome only increased his admiration for the city and the men described in his favourite authors. Contemplating the condition in which Rome then was in the absence of the popes, torn by the factions of the nobles who plundered on all sides and shed innocent blood, he conceived a desire of restoring the justice and splendour of former days. His plans became more definite and settled when his brother was slain in a brawl between the Orsini and the Colonna. Thenceforth he thought only
of the means of breaking the power of the barons. To accomplish this he had first to win the favour of the populace by upholding the cause of the oppressed.

In consequence of this and on account of the eloquence with which he spoke in Latin, he was sent to Avignon in 1343 to Clement VI, by the captain of the people, to ask him to return to Rome and grant the great jubilee every five years. Cola explained to the pope the miserable condition of Rome. Clement was much impressed, and appointed him to the office of notary (secretary) of the Camera Capitolina, in which position he could gain a better knowledge of the misfortunes of the city. Cola then by his public discourses and private conversations prepared the people; a conspiracy was formed, and on 19 May, 1347, the Roman Empire with an Italian emperor. In August, 1347, two hundred deputies of the Italian cities assembled at his request. Italy was declared free, and all those who had arrogated a lordship to themselves were declared fallen from power; the right of the people to elect the emperor was asserted. Louis the Bavarian and Charles of Bohemia were called upon to justify their usurpation of the imperial seat. The emperor flattered himself secretly with the hope of becoming emperor; but his high opinion of himself proved his ruin. He was a dreamer rather than a man of action; he lacked many qualities for the exercise of good government, especially foresight and the elements of political prudence. He had formed a most puerile conception of the empire he hoped to rule. He asked for Asiatic luxury, to pay for which he had to impose new taxes; thereupon the enthusiasm of the people, weary of serving a theatrical emperor, vanished. The barons perceived this, and forgetting for the moment their mutual discord, joined together against their common enemy. In vain the bell summoned the people to arms in the Campidoglio. No one stirred. Cola had driven out the barons, but he had not thought of reducing them to inaction; on the contrary he had rendered them more hostile by his many foolish and humiliating acts. Lacking all military knowledge he could offer no serious resistance to their attacks. The discontent of the people increased; the Bishop of Orvieto, the other Rector of Rome, who had already protested against what had occurred at the convention of the Italian deputies, abandoned the city; the pope repudiated Cola in a Bull. Thus deserted, and not believing himself safe, he took refuge in the Castle of S. Angelo, and three days later (18 Dec., 1347) the barons returned in triumph to restore things to their former condition.

Cola fortunately succeeded in escaping. He sought refuge with the Spiritual Franciscans living in the hermitages of Monte Maierella. But the plague of 1348, the presence of bands of adventurers and the jubilees of 1350 had increased the mysticism of the people and still more of the Spirituals. One of the latter, Fra Angelo, told Rienzi that it was now the proper moment to think of the common weal, to co-operate in the restoration of the empire and in the purification of the Church: all of which had been predicted by Joachim of Flora, the celebrated Calabrian abbot, and that he ought to give his assistance. Cola betook himself thence to Charles IV at Prague (1350), who imprisoned him, either as a madman or as a heretic. After two years Cola was sent at the request of the pope to Avignon, where through the intervention of Petrarch, his admirer, though now disillusioned, he was treated better. When Innocent VI sent Cardinal Albornoz into Italy (at the beginning of 1353) he allowed Cola di Rienzi to accompany him. The Romans, who had fallen back into their former state of anarchy, invited him also to return, and Albornoz consented to appoint him senator (sindaco) of Rome. On 1 Aug., 1354, Rienzi entered Rome in triumph. But the new government did not last long. His luxury and revelry, followed by the inevitable taxation, above all the unjust killing of several persons (among whom was Fra Moralese, a brigand, in the service of Cola), provoked the people to fury. On 8 Oct., 1354, the cry of “Death to Rienzi the traitor!” rose in the city. Cola attempted to flee, but was recognized and slain, and his corpse dragged through the streets of the city. Cola represented, one might say, the death agony of the Guelf (papal-nationalist) idea and the rise of the classical (imperial and aesthetic) idea of the Renaissance.

U. BENIGNI.
Rieti, Diocese of (Reatina), Central Italy, immediately subject to the Holy See. The city is situated in the valley of the River Velino, which, on reaching the plain, is divided into two channels. The upper channel, which is narrower, is called the Velino, but in the valley of the city it grows shallower and imperils the city, so that even in ancient days it was necessary to construct canals and outlets, like that of Marius Curtius Denu-tatus (272 a. c.), which, repaired and enlarged by Clement VIII, has produced the magnificent waterfall of the Velino near Terni. The city, which was founded by the Sabines, was taken by the Romans in 496 B.C., became later a Roman municipium and prefecture. After the Longobard invasion it was the seat of a "gastaldo", dependent on the Duchy of Spoleto. It was presented to the Holy See by Otto I in 962; in 1143, after a long siege, it was destroyed by King Roger of Naples. It was besieged again in 1138 by Otto of Brunswick when forcing his way into the Kingdom of Naples. In the thirteenth century the popes took refuge there on several occasions, and in 1288 it witnessed the coronation of Charles II of Naples; later an Apostolic delegate resided at Rieti. In 1660, by the disloyalty of a delegate, it was occupied by the Italian troops without resistance. Rieti was the birthplace of Blessed Colomba (1501); in the sixth century it contained an Abbey of St. Stephen; the body of St. Baldovino, Cistercian, founder of the monastery of Sts. Matthew and Pastor (twelfth century) is interred in the cathedral. Near Rieti is Greccio, where St. Francis set up the first Christmas crib. The cathedral is in Lombard style, with a crypt dating from the fourth or fifth century. It should be remarked that in medieval documents there is frequent confusion between Restitutus (Rieti), Areitusinus (Aresso), and Teutonicus (Chianciano). The first known Bishop of Rieti is Ursus (499); St. Gregory mentions Probus and Albinus (sixth century). The names of many bishops in the Longobard period are known. Later we meet with Dodonus (1187), who repaired the damage done by King Roger; Benedict, who in 1184 officiated at the marriage of Queen Constance of Naples and Henry VI; Rainaldo, a Franciscan (1249), restorer of discipline, which work was continued by Tommaso (1252); Pietro Guerra (1278), who had Andrea Pisano erect the episcopal palace with materials taken from the ancient amphitheatre of Verspanien; Lodovico Teodanori (1300), murdered while engaged in works on account of his severity; his successor was cruelly punished by Boniface IX; Angelo Capranica (1450), later a cardinal; Cardinal Pompeo Colonna (1508), who for rebellion against Julius II and Clement VII was twice deprived of his cardinalatial dignity; Seipione Colonna (1520), his nephew, took part in the revolt against Clement VII, and was killed in an encounter with Amico of Ascoli, Abbot of Farfa; Marianus Victorius (1572, for a few days), a distinguished writer and patrologist; Giorgio Bolognetti (1639), restored the episcopal palace and was distinguished for his charity; Gabriele Ferretti (1656—72), later a cardinal, a man of great charity. At present the diocese contains 60 parishes, 142,100 inhabitants, 250 secular priests, 7 religious houses with 63 priests, 15 houses of nuns; 2 educational establishments for boys, and 4 for girls.

U. BENIGNI.

Rievaulx (Rievall), Abbey of.—Thurston, Archbishop of York, was very anxious to have a monastery of the newly founded and fervent order of Cistercians in his diocese; and so, at his invitation, St. Bernard of Clairvaux sent a colony of monks under the leadership of Abbot William, to make the desired foundation. After some delay Walter Espec became their founder and chief benefactor, presenting them with a suitable estate, situated in a wild and lonely spot, in the valley of the rivulet Rie (from whence the abbey derived its name), and surrounded by precipitous hills, in Blakemore, near Helmele. The monastery was founded in 1131, and began the foundation of the first of their order in Yorkshire. The church and abbey, as is the case with all monasteries of the order, were dedicated to the Blessed Virgin Mary. At first their land being crude and uncultivated, they suffered much until, after a number of years, their first benefactor again came to their assistance and, later on, many others, till at last their land was cultivated. Their land, also, through their incessant labours, eventually became productive, so that, with more adequate means of subsistence, they were able to devote their energies to the completion of church and monastic buildings, though these were finished only after a great lapse of time, on account of their isolation and the fact that the monastery was never wealthy. The constructions were carried on section by section, permanent edifices succeeding those that were temporary after long intervals. The final buildings, however, as attested by the magnificent, though melancholy, ruins yet remaining, were completed on a grand scale.

Within a very few years after its foundation the community numbered three hundred members, and was by far the most celebrated monastery in England; many others sprang from it, the most important of which was being Mellerstain, near Edinburgh. Rievaulx was built in Scotland. Rievaulx early became a brilliant centre of learning and holiness; chief amongst its lights shone St. Aedred, its third abbot (1147—67), who from his sweetness of character and depth of learning was called Bernardo proba par. He had been, before his entrance into the Cistercian, a most dear friend and companion of St. Dunstan, King of Scotland. History gives us but scant details of the later life at Rievaulx. At the time of its suppression and confiscation by Henry VIII the abbey, Rowland Blyton, with twenty-three religious composed its community. The estates of this ancient abbey are now in the possession of the Duncombe family.

EDMOND M. OBERCRUT.

Riefel, Caspar, historian, b. at Budesheim, Bingen, Germany, 19 Jan., 1807; d. at Mainz, 15 Dec., 1866. He studied under Klee at Mainz and under Professor of Church History followed in 1837. The publication of the first volumes of his Church history in 1841 aroused a storm of indignation among Protestants, to whom his accurate though not flattering account of the Reformation was distasteful. The Hessian Government hastened to pension the fearless teacher (19 Nov., 1842). This measure caused intense indignation among the dissident Catholic clergy, who denounced the Protestant atmosphere of the university. Riefel retired to Mainz, where Bishop von Ketteler appointed him in 1851 professor of Church history in his newly organized ecclesiastical seminary. Death put a premature end to the teaching of this Catholic scholar, who contributed largely to the restoration of a truly ecclesiastical spirit among the German clergy. He wrote: "Geschichtliche Darstellung des Verhältnisses zwischen Kirche und Staat", Mainz, 1836; "Predigten auf alle Sonn- und Festtage des
RUINS OF THE NAVE AND TRANSEPT OF RIEVAULX ABBEY CHURCH
Right is a moral or legal authority, and, as such, is distinct from merely physical superiority or pre-eminence; the thief who steals something without being detected enjoys the physical control of the object, but no right to it; on the contrary, his act is an injustice, a violation of right, and he is bound to return the stolen object to its owner. Right is a moral or legal authority, because it emanates from the law which assigns to one the dominion over the thing and imposes on others the obligation to respect this dominion. To the right of one person corresponds an obligation on the part of others, so that right and obligation condition each other. If I have the right to demand one hundred dollars from you under the obligation to give them to me; without this obligation, right would be illusory. One may even say that the right of one person consists in the fact that, on his account, others are bound to perform or omit something.

The clause, "to possess, claim, and use, anything as one's own," defines more closely the object of right. Justice assigns to each person his own (suum cuique). When anyone asserts that a thing is his own, it is his private property, or belongs to him, he means that this object stands in a special relation to him, that it is the first place desired for, and the person can dispose of it according to his will, regardless of others. By a thing is here meant not merely a material object, but everything that can be useful to man, including actions, omissions, etc. The connexion of a certain thing with a certain person, in virtue of which the person may declare the thing his own, can originate only on the basis of concrete facts. It is an evident demand of human reason in general that one may give or leave one's own to anyone; but what constitutes one's own is determined by facts. Many things are physically connected with the human person by conception or birth—his limbs, bodily and mental qualities, health, etc. From these facts, by the Creator of Nature, we recognize that, from the first moment of his being, his faculties and members are granted a person primarily for his own use, and so that they may enable him to support himself and develop and fulfill the tasks appointed by the Creator for this life. These things (i.e., his qualities, etc.) are his own from the first moment of his existence, and whoever injures them or deprives him of them violates his right. However, many other things are connected with the human person, not physically, but only morally. In other words, in virtue of a certain fact, everyone receives things that are specially destined for the use of one person, and must be recognized as such by all. Persons who build a house for themselves, make an implement, catch game in the unreserved forest, or fish in the open sea, become the owners of these things in virtue of occupation of their labour; they can claim these things as their own, and no one can forcibly appropriate or injure these things without a violation of their rights. Whoever has lawfully purchased a thing, or been presented with it by another, may regard such thing as his own, since by the purchase or presentation he succeeds to the place of the other person and possesses his rights. As a right gives rise to a certain connexion between person and person with respect to a thing, we may distinguish in right four elements: the holder, the object, the title, and the terminus of the right. The holder of the right is the person who possesses the right, the terminus is the person who has the obligation corresponding to the right, the object is the thing to which the right refers, and the title is the fact on the ground of which a person may regard and claim the thing as his own. Strictly speaking, this fact alone is not the title of the right, which originates, indeed, in the fact, but taken in connexion with the principle that one must assign to each his own property; however, since this principle may be presupposed as self-
evident, it is customary to regard the simple fact as the title of the right.

The right of which we have hitherto been speaking is individual right, to which the obligation of commutative justice corresponds. Commutative justice regulates the relations of the members of human society to one another, and aims at securing that the member renders to his fellow-members what is equally theirs. In addition to this commutative justice, there is also a legal and distributive justice; these virtues regulate the relations between the complete societies (State and Church) and their members. From the properties of the members of society, the State as resting on a Divine ordinance; only in the State can man support himself and develop according to his nature. But, if the Divine Creator of Nature has willed the existence of the State, He must also will the means necessary for its maintenance and the attainment of its objects. This can be found only in the right of the State to demand from its members what is necessary for the general good. It must be authorized to make laws, to punish violations of such, and in general to arrange everything for the public welfare, while, on their side, the members must be under the obligation to respect all the rights of the members, and is also under the obligation of distributing public goods and services. To these duties of the general body or its leaders corresponds a right of the members; they can demand that the leaders observe the claims of distributive justice, and failure to do this on the part of the authorities is a violation of the right of the members.

On the basis of the above notions of right, its object can be more exactly determined. Three species of right and justice have been distinguished. The object of the distributive right corresponding to justice has as its object the securing for the members of human society in their intercourse with one another freedom and independence in the use of their own possessions. For the object of right can only be the good for the attainment of which we recognise right as necessary, and which it affects of its very nature, and this good is the freedom and independence of every member of society in the use of his own. If man is to fulfil freely the tasks imposed upon him by God, he must possess the means necessary for this purpose, and be at liberty to utilize such independently of others. He must have a sphere of free activity, in which he is safe from the interference of others; this object is attained by the right which protects each in the free use of his own from the encroachments of others. Hence the proverb: "A willing person suffers no injustice" and "No one is compelled to make use of his rights". For the object of the corresponding task is to make use of his is the liberty of the possessor of the right in the use of his own, and this right is not attained if each is bound always to make use of and insist upon his rights. The object of the right which corresponds to legal justice is the good of the community; of this right we may not say that each one is bound as a right"; since the community—or, more correctly, its leaders—must make use of public rights, whenever and wherever the good of the community requires it. Finally, the right corresponding to the object of distributive justice is the defence of the members against the community or its leaders; they must not be laden with public burdens beyond their powers, and must receive as much of the public goods as become the conditions of their moral and spiritual services. Although, in accordnace with the above, each of the three kinds of rights has its own immediate object, all three tend in common towards one remote object, which, according to St. Thomas (Cont. Gent., III, xxxiv), is nothing else than to secure that peace be maintained and ordered for the procuring for each the peaceful possession of his own.

Right (or more precisely speaking, the obligation corresponding to right) is enforceable at least in general—that is, whoever has a right with respect to some other person is authorised to employ physical force to secure the fulfillment of this obligation, if the other person will not voluntarily fulfill it. This enforceable character of the obligation arises necessarily from the object of right. As already said, this object is to secure for every member of society a sphere of free activity and for society the means necessary for the development and improvement of that right. This is evidently indispensable for social life; but it would not be sufficiently attained if it were left to each one's discretion whether he should fulfill his obligations or not. In a large community there are always many who would allow themselves to be guided, not by right or justice, but by the caprice of selfishness. It is therefore lawful to disregard the rights of their fellowmen, if they were not forcibly confined to their proper sphere of right; consequently, the obligation corresponding to a right must be enforceable in favour of the possessor of the right. But in a regulated community the power of compulsion must be vested in the public authority, unless, if each member is free by nature to become whenever his right was infringed, there would soon arise a general conflict of all against all, and order and safety would be entirely subverted. Only in cases of necessity, where an unjust attack on one's life or property has to be warded off and recourse to the authorities is impossible, has the individual the right of meeting violence with violence.

While right or the obligation corresponding to it is enforceable, we must beware of referring the essence of right to this enforcibility or even to the authority to enforce it, as is done by many jurists since the time of Kant. For example is only a secondary characteristic of right and does not pertain to all rights; although, for example, under a real monarchy the subjects possess some rights with respect to the ruler, they can usually exercise no compulsion towards him, since he is irresponsible, and is subject to no higher authority which can enforce forcible measures against him. Rights are divided, according to the title on which they rest, into natural and positive rights, and the latter are subdivided into Divine and human rights. By natural rights are meant all those which we acquire by our very birth, e.g. the right to live, to integrity of limbs, etc. All other rights are called acquired rights, although many of them are acquired, independently of any positive law, in virtue of free acts, e.g. the right of the husband and wife in virtue of the marriage contract, the right to ownerless goods through occupation, the right to a house through purchase or hire. On the other hand, the right may be given by positive law; according as the law is Divine or human, and the latter civil or ecclesiastical, we distinguish between Divine or human, civil or ecclesiastical rights. To civil rights belong citizenship in a state, active or passive franchise, etc.
RIMINI

57

RIMINI, Dioecesis of (Ariminum), suffragan of Ravenna. Rimini is situated near the coast between the rivers Marecchia (the ancient Ariminus) and Ausa (Auruna). Coast navigation and fishing are the principal industries. The thirteenth-century cathedral (San Francesco) was originally Gothic, but was transformed by order of Sigismondo Malatesta (1345–55) according to the designs of Leone Battista Alberti and never completed; the cupola is lacking, also the upper part of the façade; in the cathedral are the tombs of Sigismondo and his wife Isotta. The plastic decorations of the main nave and some of the chapels, a glorification of Sigismondo and his wife, were made by Agostino di Duccio, and breathe the pagan spirit of the Renaissance. On the southern side are the tombs of illustrious humanists, among them that of the philosopher Gemistus Pletho, whose remains were brought back by Sigismondo from his wars in the Balkans. There is a remarkable fresco of Piero della Francesca. In San Giuliano is the great picture of Paul Veronese representing the martyrdom of that saint, also pictures of Bittino da Faenza (1357) dealing with some episodes of the saint's life. Among the profane edifices are the Arch of Augustus (27 B.C.), the remains of an amphitheatre, and the five-arched bridge of Augustus over the Marecchia. The town hall has a small but valuable gallery (Perin del Vaga, Ghirlandajo, Bellini, Benedetto Coda, Tintoretto, Agostino di Duccio); the Gamba lunga Library (1677) has valuable manuscripts. There is an archaeological museum and a bronze statue of Paul V; the castle of Sigismondo Malatesta is now used as a prison.

Ariminum was built by the Umbri. In the sixth century B.C. it was taken by the Gauls; after their last defeat (283) it returned to the Umbri and became in 283 a Latin colony, very helpful to the Romans during the late Gallic wars. Rimini was reached by the Via

KLEEMENS LÜFFLER.

Rimini, Council of.—The second Formula of Sirmium (357) stated the doctrine of the Anomoæans, or extreme Arians. Against this the Semi-Arian bishops, assembled at Ancyra, the episcopal city of their leader Basilis, issued a counter-formula, asserting that the Son is in all things like the Father, afterwards approved by the Third Synod of Sirmium (381). This formula, though silent on the term "homoousios", consecrated by the Council of Nicaea, was signed by a few orthodox bishops, and probably by Pope Liberius, being, in fact, capable of an orthodox interpretation. The Emperor Constantius cherished at that time the hope of restoring peace between the orthodox and the Semi-Arians by convoking a general council. Failing to convene one either at Nicaea or at Nicomedia, he was persuaded by Patrophilus, Bishop of Scythopolis, and Narcissus, Bishop of Neronias, to hold two synods, one for the East at Seleucia, in Isauria, the other for the West at Rimini, a proceeding justified by the Roman synod, and approved by expense. Before the convocation of the councils, Ursacius and Valens had Marcus, Bishop of Arethusa, designated to draft a formula (the Fourth of Sirmium) to be submitted to the two synods. It declared that the Son was born of the Father before all ages (agreeing so far with the second Formula); but it added that, when God is spoken of, the word "oikoumena", "essence", should be avoided, not being found in Scripture and being a cause of scandal to the faithful; by this step they intended to exclude the similarity of essence.

The Council of Rimini was opened early in July, 359, with over four hundred bishops. About eighty Semi-Arians, including Ursacius, Germanius, and Auxentius, withdrew from the orthodox bishops, the most eminent of whom was Restitutus of Carthage; Liberius, Eusebius, Dionysius, and others were still in exile. The two parties sent separate deputations to the emperor, the orthodox asserting clearly their firm attachment to the faith of Nicaea, while the Arian minority adhered to the imperial formula. But the inexperienced representatives of the orthodox majority allowed themselves to be deceived, and not only entered into communion with the heretical delegates, but even subscribed, at Nice in Thrace, a formula to the effect merely that the Son is like the Father according to the Scriptures (the words "in all things" being omitted). On their return to Rimini, they met with the unanimous protests of their colleagues. But the threats of the consuls Taurus, the remonstrances of the Semi-Arians against hindering peace between East and West for a word not contained in Scripture, their privations and their homesickness—all combined to weaken the constancy of the orthodox bishops. And the last twenty were induced to subscribe when Ursacius had an addition made to the formula of Nice, declaring that the Son is not a creature like other creatures. Pope Liberius, having regained his liberty, rejected this formula, which was then put into writing in a manuscript. They were then on the point of giving up the formula of Nicaea to the pope, and were led by the hasty manner of its adoption and the lack of approbation by the Holy See, it could have no authority. In any case, the council was a sudden defeat of orthodoxy, and St. Jerome could say: "The whole world groaned in astonishment to find itself Arian!"
Flamminia, and here began the Via Emilia that led to Piacenza. Augustus did much for the city and Galla Placidia built the church of San Stefano. When the Goths conquered Rimini in 493, Odoacer besieged in Ravenna, had to capitulate. During the Gothic wars Rimini was taken and retaken many times. In its vicinity Narses overthrew (553) the Alamanni. Under Byzantine dominion it belonged to the Pentapolis. In 728 it was taken with many other cities by the Lombard King Liutprand but returned to the Byzantines about 735. King Pepin gave it to the Holy See, but during the wars of the popes and the Italian cities against the emperors, Rimini sided with the latter. In the thirteenth century it suffered from the discords of the Gambacari and Ansedi families. In 1265 Malatesta I da Verucchio was named "Signore" of the city, and, despite interruptions, his family held authority until 1528. Among his successors were: Malatesta II (1312–17); Pandolfo I, his brother (d. 1326), named by Louis the Bavarian imperial vicar in Romagna; Ferrantino, son of Malatesta II (1335), opposed by his cousin Ramberto and by Cardinal Berardo del Piggetto (1331), legate of John XXII. Malatesta III, Guastafangia (1363), lord also of Pesaro; Malatesta IV l'Ungaro (1373); Galeotto, uncle of the former (1385), lord also of Fano (from 1340), Pesaro, and Cesena (1378); his son Carlo (1428), the noblest seign of the family, laboured for the cessation of the Western Schism, and was the counsellor, protector, and ambassador of Gregory XII, and patron of scholars; Galeotto Roberto (1432), his brother Sigismondo Pandolfo (1468) had the military and intellectual qualities of Carlo Malatesta but not his character. He was tyrannous and perfidious, in constant rebellion against the popes, a good soldier, poet, philosopher, and lover of the fine arts, but a monster of domestic and public vice; in 1463 he submitted to Pius II, who left him Rimini; Robert, his son (1482), under Paul II nearly lost his state and under Sixtus IV became the commanding officer of the pontifical army against Alfonso of Naples, by whom he was defeated in the battle of Campo Morto (1482); Pandolfo V, his son (1500), lost Rimini to Cesare Borgia (1500–3), after whose overthrow it fell to Venice (1503–9), but was retaken by Julius II and incorporated with the territory of the Holy See. After the death of Leo X Pandolfo returned for several months, and with his son Sigismondo held tyrannous rule. Adriano VI gave Rimini to the papal legate, the pope's vicar. In 1527 Sigismondo managed to regain the city, but the following year the Malatesta dominion passed away forever. Rimini was thenceforth a papal city, subject to the legate at Forli. In 1845 a band of adventurers commanded by Ribbotti entered the city and proclaimed a constitution which was soon abolished. In 1860 Rimini and the Romagna were incorporated with the Kingdom of Italy.

Rimini was probably named from Ravenna. Among its traditional martyrs are: St. Innocentia and companions; Sts. Justinus, Facundinus, and companions; Sts. Theodorus and Marinus. The see was probably established before the peace of Constantine. Among the bishops were: Stennius, at Rome in 312; Ambrose, one of the bishops at Arles under St. Gaudentius the famous Council of Rimini was held (359); he was later put to death by the Arians for having excommunicated the priest Marcianus; Stephanus attended at Constantinople (551); the election of Castor (591) caused much trouble to the see, Gregory I, who had to act in his stead; Agnellus (743) was governor of the city subject to the Archbishop of Ravenna; Delto acted frequently as legate for John VIII; Blessed Arduino (d. in 1009); Uberto II is mentioned with praise by St. Peter Damian; Opizo was one of the successors of the Antipope Clement III (Guiberto, 1075); Ranieri II de' Uberti (1143) consecrated the chapel of the Blessed Virgin of St. Colomba; Alberigo (1153) made peace between Rimini and Cesena; Bonaventura Trissino founded the hospital of Santo Spirito; under Benno (1230) some poor ladies founded a hospital for the lepers, and themselves cared for the afflicted. At the end of the thirteenth century the Armenians received at Rimini a church and a hospital. From 1407 Gregory XII resided at Rimini. Giovanni Rosa united the eleven hospitals of Rimini into one. Under Giulio Parisini (1549) the seminary was opened (1568). Giambattista Castelli (1568) promoted the Tridentine reforms and was succeeded by Andrea Minucci who was severely tried during the French Revolution; under him the Malatesta church (San Francesco) became the cathedral. The diocese has 124 churches, 125,400 inhabitants, 326 priests, 10 houses of religious with 56 priests, 24 houses of religious women, who care for the hospitals, orphanages, and other charitable institutions, or communal and private schools. There are also 1 school for boys and 3 for girls.

Mandocci, Ricordi storico del popolo di Rimini (1892); Recordelli, Storia di Rimini (1862); Panico, La storia di Rimini (1890); Trieste, Rimini: Studi sulle leggi e le arti a la cura delle Malatesta (Pisa, 1892).

U. BENIGNI.

Rimouski, Diocese of (Sancti Germani de Rimouski), suffragan of Quebec, comprises the presidio of Bonaventure (Islanda), Rimouski and the greater part of Temiscouata, and forms the eastern extremity of the province of Quebec. At the extreme point of the Gaspé peninsula (formerly called Honguedo), Jacques Cartier landed on his first voyage of discovery (1534) and planted a cross with the royal arms of France. The Souriquois or Micmacs occupied the shores of Baie des Chaleurs, and their successive missionaries, Recollets, Capuchins, Jesuits, amongst them Father Labrosse, and Spiritans (or priests of the seminary of the Holy Ghost), including the celebrated Pierre Maillard, ministered to that region of the Rimouski diocese. The first Mass was celebrated near the city of Rimouski, at a place since called Pointe-au-Père, by the Jesuit Henri Nouvel, in 1663, on his way to the Papinachois and Montagnais of Tadoussac, on the north shore. The first settler at Rimouski was German Lepage (1669), whose patronymic the churchers use as a title of the parish church and cloister. The seigniory had been conceded to his son René in 1668. The latest statistics give 120 churches and chapels, with 148 priests. Two wooden churches were built at Rimouski, in 1712 and 1757 respectively; the first stone church, 1824, was replaced by the present
cathedral in 1854. Before the creation of the see, Rimouski was successively visited by Bishops Hubert (1791), Denaut (1798), Plessis (1806-14, 22), Panet (1810-26), Signay (1833-38-43), Turgeon (1849), and Baillargeon (1855-60-65). The see was created and its first titularominated on 15 January, 1867, and acquired the jurisdiction of a diocese the same day, according to the law of the country.

The first bishop, Jean-Pierre-François Laforce-Langevin, was b. at Quebec, 22 Sept., 1821, and ordained on 12 Sept., 1844. As director of the Quebec seminary he was one of the joint founders of Laval University (1852). He subsequently filled the offices of parish priest of Ste Claire and Beaulieu, and of principal of Laval Normal School. He was consecrated 1 May, 1867, resigned 1891, and died 1892. He completed the organization of a classical college previously founded by the Abbés C. Tanguay and G. Potvin and adopted it as the seminary of the diocese. He introduced the Sisters of the Congregation of Notre-Dame (Montreal) and sanctioned the foundation (1879) of the Sisters of the Most Holy Rosary, a flourishing institute largely due to the zeal of Vice- General Langevin, his brother. Bishop Langevin did not long live and was succeeded in 1876 by Bishop Blais, b. St-Vallier, P. Q., 1842, educated at the college of Ste Anne de la Pocatière, graduated in Rome Doctor of Canon Law, and taught the same branch at Laval University. He was consecrated bishop 18 May 1890, and took possession of the see in 1891. Bishop Blais created many new parishes in the diocese, and founded a normal school under the management of the Ursulines. The clergy, exclusively French-Canadian, study classics and philosophy at the diocesan seminary, and theology principally at Laval University, in some cases at the Propaganda, Rome. (For further information, consult the diocesan institutions, etc., see CANADA, and QUEBEC, PROVINCE etc.)

There are no cities besides Rimouski, but all the larger rural parishes have fine churches and convent schools; the only domestic mission is that of the Miamacs at Rastigouche, under the care of the Capuchins. Besides a Priests' Aid Society, there are several benevolent and mutual aid societies for the laity. The religious orders of men are the Capuchins, Eudists, and Brothers of the Cross of Jesus; those of women are the Ursulines, Sisters of Charity, of the Good Shepherd (teaching), of the Holy Rosary, of the Sisters of the Sacred Hearts of Jesus. Books for the clergy are given every year; conferences to discuss theological cases take place every three months. Nearly all the secular clergy (110 out of 137) belong to the Eucharistic League. Out of a total Catholic population of 118,746, only 3995 are not French Canadians. The Indians number 610. The Protestant element amounts to 8798. There is no friction between these different elements and no difficult racial problem to solve, the parishes containing an English-speaking element as well as the Micmacs being instructed in their native tongues.

L. A. R. Lévesque (Quebec, 1879): Le Canada scolastique (Montreal, 1911).

LIONEL LINDSAY.

Rings.—I. IN GENERAL.—Although the surviving ancient rings, proved by their devices, provenance, etc., to be of Christian origin, are fairly numerous (See Pontifical in "Arch. Journ."); XXVI, 141, and XXVIII, 275), we cannot identify them with any liturgical use. Christians no doubt, just like other people, wore rings in accordance with their station in life, for rings are mentioned without reprobation in the New Testament (Luke, xv, 22, and James, ii., 2). Moreover, St. Clement of Alexandria (Paedagogus, ii., 8) speaks of a ring on his little finger, and that it should bear some religious emblem—a dove, or a fish, or an anchor—though, on the other hand, Tertullian, St. Cyprian, and the Apostolic Constitutions (I, ii) protest against the ostentation of Christians in decking themselves with rings and gems. In any case the Acts of Sts. Perpetua and Felicitas (c. xxi), about the beginning of the third century, inform us of how the martyr Saturnus took a ring from the finger of a pagan, a soldier who was looking on, and gave it back to him as a keepsake, covered with his own blood.

Knowing, as we do, that in the pagan days of Rome every flammeo Dialis (i.e., a priest specially consecrated to the worship of Jupiter) had, like the senators, the privilege of wearing a gold ring, it would not be surprising to find evidence in the fourth century that rings were worn by Christian bishops. But the various passages that have been appealed to, to prove this, are either not authentic or else are inconclusive. St. Augustine indeed speaks of his sealing a letter with a ring (Ep. cxxvii, in P. L., XXXIII, 277), but on the other hand his contemporary Possidius expressly states that Augustine himself wore no ring (P. L., XXXII, 63), whence we are led to conclude that the possession of a signet does not prove the use of a ring as part of the episcopal insignia. However, in a Decree of Pope Boniface IV (a. n. 610) we hear of monks raised to the episcopal dignity as anulo pontificiali suburbatis, while at the Fourth Council of Toledo, in 633, we are told that if a bishop has been consecrated from his own consecration, he is to receive back stolen, ring, and crosier (oratum, anulum et baculum). St. Isidore of Seville at about the same period couples the ring with the crosier and declares that the former is confessed as "an emblem of the pontifical dignity or of the sealing of secrete" (P. L., LXXXIII, 783). From this time forth it may be assumed that the ring was strictly speaking an episcopal ornament conferred in the rite of consecration, and that it was commonly regarded as emblematic of the betrothal of the bishop to his Church. In the eighth and ninth centuries in MSS. we find of the Gregorian Sacramentary and in a few early Pontificals (e.g., that attributed to Archbishop Egbert of York) we meet with various forms for the delivery of the ring. The Gregorian form, which survives in substance to the present day, runs in these terms:—Receive the ring, that is to say the seal of faith, whereby thou, being thyself adorned with spotless faith, mayst keep unsullied the troth which thou hast pledged to the spouse of God, His holy Church.

These two ideas—namely of the seal, indicative of discretion, and of conjugal fidelity—dominate the symbolic attaching to the ring in nearly all its liturgical uses. The latter idea was pressed so far in the case of bishops that we find ecclesiastical decrees enacting that "a bishop deserting the Church to which he was consecrated and transferring himself to another is to be held guilty of adultery and is to be visited with the same penalties as a man who, forsaking his own wife, is living with another woman" (Du Saussay, "Panoplia episcopalia", 250). It was perhaps this idea of espousals which helped
to establish the rule, of which we hear already in the ninth century, that the episcopal ring was to be placed on the fourth finger (i.e., that next the little finger) of the right hand. As the pontifical ring had to be worn on occasion over the glove, it is a common thing to find medieval specimens large in size and proportionately heavy in execution. The inconvenience of the looseness thus resulting was often met by placing another smaller ring just above it as a keeper (see Lacy, “Exeter Pontifical”, 3). As the pictures of the medieval and Renaissance periods show, it was frequently quite usual for bishops to wear other rings along with the episcopal ring; indeed the existing “Ceremoniale episcoporum” (Bk. II, viii, nn. 10–11) assumes that this is still likely to be the case. Custom prescribes that a layman or a cleric of inferior grade on being presented to a bishop should kiss his hand. Out of respect his episcopal ring, but it is a popular misapprehension to suppose that any indulgence is attached to the act. Episcopal rings, both at an earlier and later period, were sometimes used as receptacles for relics. St. Hugh of Lincoln had such a ring which must have been of considerable capacity. (On investiture by ring and staff see Invenitores, Conflict op.)

Besides bishops, many other ecclesiastics are privileged to wear rings. The pope of course is the first of bishops, but he does not habitually wear the signet ring distinctive of the papacy and known as “the Ring of the Fisherman” (see below in this article), but usually a simple cameo, while his more magnificent pontifical rings are reserved for solemn ecclesiastical functions. Cardinals also wear rings independently of their grade in the ecclesiastical hierarchy. The ring belonging to the cardinalitial dignity is conferred by the pope himself in the consistory in which the new cardinal is named to a particular “title”. It is of small value and is set with a sapphire, while it bears on the inner side of the bezel the arms of the pope conferring it. In practice the cardinal is not required to wear habitually the ring thus presented, and he commonly prefers to use one of his own. The privilege of wearing a ring has belonged to cardinal-priests since the time of Innocent III or earlier (see Sägmüller, “Thätigkeit und Stellung der Cardinäle”, 163). Abbots in the earlier Middle Ages were permitted to wear rings only by special privilege. A letter of Peter of Blois in the twelfth century (P. L., CCVII, 283) shows that at that date the wearing of a ring by an abbot was apt to be looked upon as a piece of ostentation, but in the later Pontificates the blessing and delivery of a ring formed part of the ordinary ritual for the consecration of an abbot, and this is still the case at the present day. On the other hand, there is no such ceremony indicated in the blessing of an abbes, though certain abbesses have received, or assumed, the privilege of wearing a ring of office. The ring is also regularly worn by certain other minor prelates, for example prothonotaries, but the privilege cannot be said to belong to canons as such (B. de Montault, “Le costume, etc.”, I, 170) without special indulgents. In any case such rings cannot ordinarily be worn by these minor prelates during the celebration of Mass. The same restriction, it need hardly be said, applies to the ring which is conferred as part of the insignia of the doctorate either of theology or of canon law.

The plain rings worn by certain orders of nuns and conferred upon them in the course of their solemn profession, according to the ritual provided in the Roman Pontifical, appear to find some justification in ancient tradition. St. Ambrose (P. L., XVII, 701, 735) speaks as though it were a received custom for virgins consecrated to God to wear a ring in memory of their betrothal to their heavenly Spouse. This delivery of a ring to professed nuns is also mentioned by several medieval Pontificals, from the twelfth century onwards. Wedding rings, or more strictly, rings given in the betrothal ceremony, seem to have been tolerated among Christians under the Roman Empire from a quite early period. The use of such rings was of course of older date than Christendom, and there is not much to suggest that the giving of the ring was at first incorporated in any ritual or invested with any precise religious significance. But it is highly probable that, if the acceptance and the wearing of a betrothal ring was tolerated among Christians, such rings would have been adorned with Christian emblems. Certain extant specimens, more particularly a gold ring found near Arles, belonging apparently to the fourth or fifth century, and bearing the inscription, Tecta viva Deus cum marvi secus [seu], may almost certainly be assumed to be Christian betrothal rings. In the coronation ceremony, also, it has long been the custom to deliver both to the sovereign and to the queen consort a ring previously blessed. Perhaps the earliest example of the use of such a ring is in the case of Judith, the stepmother of Alfred the Great. It is however in this instance a little difficult to determine whether the ring was bestowed upon the queen in virtue of her dignity as queen consort or of her nuptials to Ethelwulf.

Rings have also occasionally been used for other religious purposes. At an early date the small keys which contained filigrees from the chains of St. Peter seem to have been welded to a band of metal and worn upon the finger as reliquaries. In more modern times rings have been constructed with ten small knobs or protuberances, and used for saying the rosary.

HERBERT THURSTON.

II. THE RING OF THE FISHERMAN.—The earliest mention of the Fisherman’s ring worn by the popes is in a letter of Clement IV written in 1265 to his nephew, Peter Grossi. The writer states that popes were then accustomed to seal their private letters with “the seal of the Fisherman”, whereas public documents, he adds, were distinguished by the
leaden "bulls" attached (see BULLS AND BRIEFS). From the fifteenth century, however, the Fisherman's ring has been used to seal the class of papal official documents known as Briefs. The Fisherman's ring is placed by the cardinal cameron to the finger of a newly elected pope. It is made of gold, with a representation of St. Peter in a boat, fishing, and the name of the reigning pope around it.

MAURICE M. HABRETT.

Rinuccini, Giovanni Battista, b. at Rome, 1592; d. at Fermo, 1653, was the son of a Florentine patrician, his mother being a sister of Cardinal Ottavio. Educated at Universities of Bologna, Perugia and Pisa, in due course he was ordained priest, having at the age of twenty-two obtained his doctor's degree from the University of Pisa. Returning to Rome he won distinction as an advocate in the ecclesiastical courts, and in 1625 became Archbishop of Fermo. For the twenty years following, his life was the uneventful one of a hard-working chief pastor, and then, in 1645, he was sent as papal nuncio to Ireland. Maddened by oppression, the Irish Catholics had taken arms, had set up a legislative assembly with an executive government, and had bound themselves by oath not to cease fighting until they had secured the possession of their lands and religious liberty. But the difficulties were great. The Anglo-Irish and old Irish disagreed, their generals were incompetent or quarrelled with each other, supplies were hard to get, and the Marquis of Ormond managed to sow discord among the members of the Supreme Council at Killkenny. In these circumstances the Catholics sought for foreign aid from Spain and the pope; and the latter sent them Rinuccini with a good supply of arms, ammunition, and money. He arrived in Ireland, in the end of 1645, after having narrowly escaped capture at sea by an English vessel. Acting on his instructions from the pope, he encouraged the Irish Catholics not to strive for national independence, but rather to aid the king against the revolted Puritans, provided there was a repeal of the penal laws in existence. Finding, however, that Ormond, acting for the king, would grant no toleration to the Catholics, Rinuccini wished to fight both the Royalists and the Puritans. The Anglo-Irish, satisfied with even the barest toleration, desired negotiations with Ormond and peace at any price, while the Old Irish were for continuing the war until the Plantation of Ulster was undone, and complete toleration secured to effect an union between the discordant elements, Rinuccini lost courage; and when Ormond surrendered Dublin to the Puritans, the Catholics became utterly helpless from dispersion, he left Ireland, in 1649, and retired to his diocese, where he died.

E. A. D'ALTON.

RIO, ALEXIS-FRANCOIS, French writer on art, b. on the Island of Art, Department of Morbihan, 20 May 1797; d. 17 June, 1874. He was educated at the college of Vannes, where he received his first appointment as instructor, which occupation however proved to be distasteful. He proceeded to Paris, but was temporarily disappointed in his hope of obtaining there a chair of history. His enthusiastic championship of the liberty of the Greeks and of the Constitution of the Government, which appointed him censor of the public press. His refusal of this appointment won him great popularity and the life-long friendship of Montalembert. In 1828 he published his first work, "Essai sur l'histoire de l'esprit humain dans l'antiquite", which brought him the favour of the minister de la Ferronay and a secrétaire in the Ministry of Foreign Affairs. This position he held for several years, and, becoming, for Christian, what Winckelmann had been for ancient art, he spent the greater portion of the period 1830-40 in travels through Italy, Germany, and England. In Munich he became acquainted with the spokesmen of the contemporary Catholicism—Boisserée, Baudier, Drolling, Groisse, and Rumohr—and also with Schelling. Schelling gave him insight into the aesthetic ideal; Rumohr directed him to Italy, where the realization of this ideal in art could be seen. In 1835 the first volume of his "Art chrétien" appeared under the misleading title, "De la poésie chrétienne en France de l'art". This work, which was received with enthusiasm by the French, especially in Italy, was a complete failure in France. Discouraged, he renounced art study and wrote a history of the persecutions of the English Catholics, a work which was never printed. As the result of his intercourse with the Pre-Raphaelites of England, where he lived for three years and married, and especially of Montalembert's encouragement, he visited again, in company with his wife, all the important galleries of Europe, although he had meanwhile become lame and had to draw himself through the museums on crutches. Prominent men like Gladstone, Mannsoni, and Thiers became interested in him, and he published in four volumes under the title "L'art chrétien" (1861-7). This work is not a history of all Christian art, but of Italian painting from Cimabue to the death of Raphael. Without any strict method or criticism, he expresses preference for the art of the fifteenth century, not without many an inexact and even unjust judgment on the art of later ages; but, in spite, or rather on account of this partiality, he has contributed greatly towards restoring to honour the forgotten and despised art of the Middle Ages. Rio describes the more notable incidents of his life in the two works, "Histoire d'un college breton sous l'Empire, la petite chouannerie" (1842) and "Epilogue à l'art chrétien" (2 vols., Paris, 1872). He also published the following works: "Shakespeare" (1864), in which he claims the great dramatist as a Catholic; "Michel-Ange et Raphael" (1867); "L'idéal antique et l'idéal chrétien" (1873).

B. KLEINSCHMIDT.

RIOBAMBA, DIOCESE OF (BOLIVARIENSIS), suffragan of Quito, Ecuador, erected by Pius IX, 5 Jan., 1883. The city, which has a population of 18,000, is situated 9309 feet above sea-level, 85 miles E.N.E. of Guaya- quil. Its streets are wide and its abode houses generally but one story high on account of the frequent earthquakes. Formerly the city was situated about 18 miles further west near the village of Cajaamba and contained 40,000 inhabitants, but it was completely destroyed on 4 Feb., 1797, by an earthquake. Old Riobamba was the capital of the Kingdom of Parau before the conquest; it was completely de-stroyed by Rumishahu during his retreat in 1533 after his defeat by Benalcázar. The cathedral and the Redemptorist church in the new city are very beautiful. Velasco the historian and the poet Larenza and Orozco were natives of Riobamba. It was here that the first national Ecuadorian convention was held in 1830. The diocese, comprising the civil Provinces of Chimbacoria and Bolivar (having an area of 4250 square miles), has 63 priests, 48 churches and chapels, and about 200,000 inhabitants. The present bishop, Mgr Andrés Machado, S.J., was born at Quito, Ecuador, 16 Oct., 1856, and appointed 12 Nov., 1907, in succession to Mgr. Echagüe (b. at Yumbichico, in the Archdiocese of Quito, 8 Sept., 1852, appointed on 13 Nov., 1884, d. 1907).

A. A. MAcERLEAN.

Rio Negro, Prefecture Apostolic of, in Brazil, bounded on the south by a line running westwards from the confluence of the Rio Negro and Rio Branco along the watershed of the Rio Negro to Colombia, separating the new prefecture from those of Tefé and Upper Solimões, and the See of Amazonas (from which it was separated by a Decree of the Sacred Congregation of the Council of 19 Oct., 1917), and hence the birthday of the Congregation of the Sisters of the Holy Family, founded by the late Most Rev. Bishop You. The white population is small, and confined to the few villages along the banks of the Rio Negro. As early as 1655 a Jesuit Father, Francisco Gonzales, established a mission among the natives of the Upper Rio Negro, and traces of the work of the Jesuit missionaries still exist in the scattered villages. Two years later a Carmelite, Father Theodosius, evangelized the Tucumacos. The Franciscans laboured among the Indians from 1670 and had seven stations on the Rio Iupés (Grariana Indians), five on the Rio Tikité (Tocumen Indians), and one on the Rio Papuri (Musco Indians), but on the fall of the empire most of the missions were abandoned, though some of them were re-established later.

A. A. MacErlane.

Biordan, Patrick William. See San Francisco, Archdiocese of.

Ripalda, Juan Martinez de, theologian, b. at Pamplona, Navarre, 1584; d. at Madrid, 26 April, 1643. He entered the Society of Jesus at Pamplona in 1609. In the triennial report of 1642 he says of himself that he was not physically strong, that he had studied religion, arts, and theology, that he had taught grammar one year, arts four, theology nineteen, and had been professed. According to Southwell, he taught philosophy at Monforte, theology at Salamanca, and was called from there to the Imperial College of Madrid, where, by royal decree, he taught moral theology. Later he was named censor to the Inquisition and confessor of de Olivaras, the favourite of Philip IV, whom he followed when he was exiled from Madrid. Southwell does not speak of his eloquence, saying that he was a good religious, noted for his innocence. Mentally he qualifies him as subtle in argument, sound in opinion, keen-edged and clear in expression, and well-versed in St. Augustine and St. Thomas. According to Drews, no Jesuit ever occupied this chair in the University of Salamanca, more honourable than he, and Hurter places him, with Lugo, first among the contemporary theologians of Spain, and perhaps of all Europe. Among the numerous theological opinions which characterize him the following are worth citing: (1) He thinks that the creation of an intrinsically supernatural substance is possible, in other words, that a creature is possible to which supernatural grace, with the accompanying gifts and intuitive vision, is due. (2) He holds that, by a positive decree of God, supernatural grace is conferred, in the existing providence, for every good act whatsoever; so that every good act is supernatural, or at least that every nature good act is accompanied by another which is supernatural. (3) He maintains that, precluding from the extrinsic Divine law, and taking into account only the nature of things, the supernatural faith which is called lato would be sufficient for justification, that faith, which contains the principal truths of the supernatural order, having the same nature of created things, though assent is not produced without grace. (4) He affirms that in the promissory revelations the formal object of faith is God's faithfulness to His promises, the constancy of His will, and the efficacy of omnipotence. (5) He asserts that all the propositions of the old dynamics were condemned for doctrine according to the sense in which he (Baius) held them. (6) He maintains that the Divine maternity of the Blessed Virgin Mary is of itself a sanctifying form. The following are his works: "De ente supernaturali disputationes in universam theologiam", three vols., I (Bordeaux, 1634), II (Lyons, 1645), III, written "Adversus Bananos" (Cologne, 1648); rare editions like that of Lyons, 1665, have been published of the first two works. It is a classical work, dealing with questions which are not included in ordinary theological treatises. His third volume was attacked in an anonymous work, "P. Joannis Martinez...Vulpes capta per thelogos...Academie Lovaniens", which Reusch says was the work of Sinnich, Ex-priest of biretta litterae, and praised by the Jesuit Ignatius de Salamanca, 1635, praised by the Calvinist Voet. "Tractatus theologici et scholastici de virtutibus, fide, spe et charitate" (Lyons, 1652), a posthumous work and very rare. Two new editions of all his works have been issued: Vives (8 vols., Paris, 1871-3), Palmed (4 vols., Paris, Rome, Propaganda Fide, 1870-1). "Discurso sobre la elección de sucesor del pontificado en vida del pontifice" (Seville). Uriarte says this work was published in Aragon, perhaps in Huesca, with the anagram of Martin Jiménez de Palazalda, written by order of the Count of Olivaras. The following are his manuscripts: "Sermone De Salamancense"; "De predestinatione"; "De angis et auxilii"; "De voluntate Dei"—preserved in the University of Salamanca; "Discurso acerca de la ley de desafio y parecer sobre el desafio de Medina Sidonia á Juan de Braganza", preserved in the Biblioteca Nacional.

A. Antonio Pérez Goyena.

Ripasanto, Diocese of (Ripanensis), in Ascoli Piceno, Central Italy. The city is situated on five hills, not far from the site of ancient Cupra Maritima. The modern name comes from Ripa trans Asnonem, "the other bank of the Asone". A castle was erected there in the early Middle Ages, and enlarged later by the bishops of Fermo, who had several conflicts with the people. In 1571 St. Pius V made it an episcopal see, naming it as its first bishop Cardinal della Cava of Sasso and including in its jurisdiction the dioceses of Fermo, Ascoli, and Teramo. Noteworthy bishops were: Cardinal Filippo Segna (1575); Gaspare Silingardi (1582), afterwards Bishop of Modena, employed by Alfonso II of Ferrara on various missions to Rome and to Spain, effected a revival of religious life in Ripasontano; Gian Francesco Gentili (1845); historian of Sanseverino and Ripasontano; Alessandro Spedalieri (1860-67), not recognized by the Government. The cathedral is the work of Gaspare Guerra and has a beautiful marble altar with a triptych by Crivelli; the church of the Madonna del Carmine possesses pictures by the Raphael School. The diocese, at first directly subject to the Holy See, has been suffragan of Fermo since 1689.

U. Benigni.

Ripon, Marquess of, George Frederick Samuel Robinson, K.G., P.C., G.C.S.I., F.R.S., Earl de Grey, Earl of Ripon, Viscount Goderich, Baron Grantchester, and Baroness Grey of Ridlington, 10 Downing Street, London, 24 Oct., 1827; d. 9 July, 1909. He was the second son of Frederick John Robinson, Viscount Goderich, afterwards Earl of Ripon, and Lady Sarah Albina Louisa, daughter of Robert, fourth Earl of Buckinghamshire; and he was born during his father's brief tenure of the office of prime minister. Before entering public life
he married (8 April, 1851) his cousin Henrietta Ann Theodosia, elder daughter of Captain Henry Vyner, and by her had two children. Frederick Oliver, who succeeded to his honours, and Mary Sarah, who died in infancy. Inheriting the principles which were common to the great Whig families, Lord Ripon remained through his long public life one of the most generally respected and esteemed of his contemporaries, even those who most severely criticised his administrative ability—and in his time he held very many of the great offices of state—recognised the integrity and disinterestedness of his aims. He entered the House of Commons as member for Hull in 1852, and after representing Rudolphstone (1853–57), and for the West Riding of Yorkshire (1857–59), he succeeded his father as Earl of Ripon and Viscount Goderich on 28 Jan., 1859, taking his seat in the House of Lords.

In the following November he succeeded his uncle as Earl de Grey and Baron Grantham. In the same year he first took office, and was a member of every Liberal administration for the next half-century. The offices he held were: under-secretary of State for war (1859–61); under-secretary of State for India (1861–83); secretary of State for war (1863–66), and under Lord Palmerston; secretary of State for India (1866) under Earl Russell. In Mr. Gladstone's first cabinet he was lord president of the council (1868–73) and during this period acted as chairman of the joint commission for drawing up the Treaty of Washington, which settled the Alabama claims (1876). For this great public service he was created Marquess of Ripon.

He was condemned to death by the Act of Attainder. 25 Henry VIII, c. 12, together with Elizabeth Burton, Edward Boecking, Hugh Rich, warden of the Observant friary at Richmond, John Dering, B.D. (Oxon.), Beneficent of Christ Church, Canterbury, Henry Gold, M.A. (Oxon.), parson of St. Mary, Aldermanbury, London, and vicar of Hayes, Middlesex, and Richard Master of Aldington, Kent, who was pardoned; but by some straggling reference Master's name is included and Risby's omitted in the catalogue of proteremissi. Father Thomas Bourcher, who took the Franciscan habit at Greenwich about 1557, says that Fathers Risby and Rich were twice offered their lives, if they would accept the king's supremacy.

J. B. WAINEWRIGHT.

Rishanger, William, chronicler, b. at Rishangles, Suffolk, about 1250; d. after 1312. He became a Benedictine at St. Albans' Abbey, Hertfordshire, in 1271, and there revived the custom of composing chronicles which had languished since the time of Matthew Paris. His chief work is the history of the Barons' Wars, "Narratio de bellis apud Lewes et Evesham", covering the period from 1238 to 1267, including a reference which shows he was still engaged on it on 3 May, 1312. Apart from its historical matter which is derived from Matthew Paris and his contemporaries, it is interesting for the evidence it affords of the extreme veneration in which Simon de Montfort was held at that time. He also wrote an earlier chronicle about Edward I., "Musti recordatio brevis de gestis domini Edwardi". It is possible, though not very probable, that he wrote the earlier part of a chronicle, "Willelmi Rishanger, monachi S. Albani, Chronicarum". Four other works attributed to him by Bale are not authentic.

EDWIN BURTON.

Risbyton, Edward, b. in Lancashire, 1550; d. at Saint-Méen, Lorraine, 29 Dec., 1585. He was probably a younger son of John Risbyth of Donnhall and Dorothy Southworth. He studied at Oxford from 1568 to 1572, when he proceeded B.A. probably from Brasenose College. During the next year he was converted and went to Douai to study for the priesthood. He was the first Englishman to matriculate at Douai, and is said to have taken his M.A. degree there. While a student he drew up and published a chart of ecclesiastical history, and was one of the two sent to Reims in November, 1576, to see if the college could be removed there. After his ordination at Cambrai (6 April, 1576) he was sent to Rome. In 1580 he returned to England, visiting Reims on the way, but was soon arrested. He was tried and condemned to death with Blessed Edmund Campion and others on 20 November, 1581, but was not executed, being left in prison, first in King's Bench, then in the Tower. On 21 January he was exiled with several others, being sent under escort and in irons, whence he made his way to Reims, arriving on 3 March. Shortly afterwards, at the suggestion of Father Persons, he completed Sander's imperfect "Origin and Growth of the Anglican Schism". With the intention of taking his doctorate in divinity he proceeded to the University of Pont-a-Mousson in Lorraine, but the plague broke out, and though he
went to Sainte-Ménehould to escape the infection, he died of it and was buried there. Dodd in error ascribes his death to 1586, in which mistake he has been followed by the writer in the "Dictionary of National Biography," and others. After his death the book on the schism was published in Latin. Fath in his later, and subsequent editions included two tracts attributed to Rishton, the one a diary of an anonymous priest in the Tower (1580–5), which was probably the work of Father John Hart, S.J.; the other a list of martyrs with later additions by Persons. Recent publication of the chrism book in Latin makes it certain that Rishton not only wrote the diary, and his only other known works are a tract on the difference between Catholicism and Protestantism (Douai, 1575) and "Profession of his faith made manifest and confirmed by twenty-one reasons.

EDWIN BURTON.

Rites of Caecilia, Saint, b. at Roos Porena in the Diocese of Spoleto, 386; d. at the Augustinian convent of Caecilia, 456. Feast, 22 May. Represented as holding roses, or roses and lilies, and sometimes with a woman in her forefront. According to the "Life" (Acta SS., May, V, 224) written at the time of her beatification by the Augustinian, Jacob Careucci, from two older biographies, she was the daughter of parents advanced in years and distinguished for charity which merited them the surname of "Peacemakers of Jesus Christ." Caecilia's great desire was to become a nun, but, in obedience to the will of her parents, she, at the age of twelve, married a man extremely cruel and ill-tempered. For eighteen years she was a model wife and mother. When her husband was murdered she tried in vain to dissuade her twin sons from avenging their father. She appealed to Heaven to prevent such a crime on their part, and they were taken away by death, reconciled to God. She applied for admission to the Augustinian convent at Caecilia, but, being a widow, was refused. By continued entreaty, and, as is related, by Divine intervention, she gained admission, received the habit of the order and in due time her profession. As a religious she was an example for all, excelled in mortification, and was widely known for the efficacy of her prayers. Urban VIII, in 1637, permitted her Mass and Office. On account of the many miracles reported to have been wrought at her intercession, she received in Spain the title of La Santa de los imposibles. She was solemnly canonized 24 May, 1900.

FRANCIS MERSHMAN.

Rites.—I. NAME AND DEFINITION.—Ritus in classical Latin means, primarily, the form and manner of any religious observance, so Livy, I, 7: "Sacri diis aliis albano ritu, greeco Hereuli ut ab Evandro institutae erant (Romulus) facti"; then, in general, any custom or usage. In English the word "rite" ordinarily means the ceremonies, prayers, and functions of any religious body, whether pagan, Jewish, Moslem, or Christian. But here we must distinguish two uses of the word. We speak of any one such religious function as a rite—the rite of the blessing of palms, the coronation rite, etc. In a slightly different sense we call the whole complex of the services of any Church or group of Churches a rite—thus we speak of the Roman Rite, Byzantine Rite, and various other rites. In this sense these terms are considered equivalent to liturgy (q. v.), which, however, in the older and more proper use of the word is the Eucharistic Service, or Mass; hence for a whole series of religious functions "rite" is preferable.

Christian rite, in this sense, comprises the manner of performing all services for the worship of God and the sanctification of men. This includes therefore: (1) the administration of sacraments, among which the service of the Holy Eucharist, as being also the Sacrifice, is the most important element of all; (2) the series of psalms, lessons, prayers, etc., divided into separate units, called "hours," to make up together the Divine Office; (3) all other religious and ecclesiastical functions, called sacraments. This general term includes blessings of persons (such as a coronation, the blessing of an abbot, various ceremonies performed for catechumens, the reconciliation of public penitents), marriages, anointings (as the Sacrament, etc.), blessings of things (the consecration of a church, altar, chalice, etc.), and a number of devotions and ceremonies, e. g. processions and the taking of vows. Sacraments, the Divine Office, and sacraments (in a wide sense) make up the rite of any Christian religion. In the case of Protestants these three elements must be modified to suit their theological opinions.

II. DIFFERENCE OF RITE.—The Catholic Church has never maintained a principle of uniformity in rite. Just as there are different local laws in various parts of the Church, whereas certain fundamental laws are obeyed by all, so Catholics in different places have their own local or national rites; they say prayers and perform ceremonies that have evolved to suit people of the various countries, and are only different expressions of the same fundamental truths. The essential elements of the functions are obviously the same everywhere, and are observed by all Catholic rites in obedience to the command of Christ and the Apostles, thus: in every rite baptism is administered with water and the invocation of the Holy Trinity; the Holy Eucharist is celebrated with bread and wine, over which the words of institution are recited. In amplification of these essential elements, in the accompanying prayers and practical or symbolic ceremonies, various customs have produced the changes which make the different rites. If any rite did not contain one of the essential notes of the service it would be invalid in that point, if its prayers or ceremonies expressed false doctrine it would be heretical. Such rites would not be tolerated in the Catholic Church. But, supposing uniformity in essentials and in faith, the authority of the Church has never insisted on uniformity of rite; Rome has never required that the fact that one people should express the same truths by different ceremonies. The Roman Rite is the most venerable, the most archaic, and immeasurably the most important of all, but our fellow-Catholics in the East have the same right to their traditional liturgies as we have to ours. Nor can we doubt that other rites too have many beautiful prayers and ceremonies, which add to the richness of Catholic liturgical inheritance. To lose these would be a misfortune second only to the loss of the Roman Rite. Leo XIII in his Encyclical, "Praeclassa" (20 June, 1894), expressed the traditional attitude of the papacy when he wrote of his reverence for the venerable rites of the Eastern Church: he permitted the schismatics, whom he invited to reunion, that there was no jealousy of these things at Rome; that for
all Eastern customs "we shall provide without narrowness."

At the time of the Schism, Photius and Cerularius hurled against Latin rites and customs every conceivable absurd accusation. The Latin fast on Saturday, Lenten fare, law of celibacy, confirmation by episcopal consecration, and, especially, the use of unleavened bread for the Holy Eucharist were their accusations against the West. Latin theologians replied that both were right and suitable, each for the people who used them, that there was no need for uniformity in rite if there was unity in faith, that one is not justified by proving the other, by defending their customs without attacking those of the East. But the Byzantine patriarch was breaking the unity of the Church, denying the primacy, and plunging the East into schism. In 1054, when Cerularius's schism had begun, a Latin bishop, Dominicus of Gradus and Aquileia, wrote concerning it to Peter III of Antioch. He discussed the question Cerularius had raised, the use of asynymes at Mass, and carefully explained that in using this bread, Latins did not intend to disparage the Eastern custom of consecrating leavened bread, for there is a symbolic reason for either practice. "Because we know that the institution of fermented bread is used and lawfully observed by the most holy and orthodox Fathers of the Eastern Churches, we faithfully approve of both customs and confirm both by a spiritual explanation" (Will, "Acta et scripta qua de controversiis ecclesiae græcae et latinæ sec. XI composita exst, Playfair, 1861, 207). These words represent very well the attitude of the papacy towards other rites at all times. Three points, however, may seem opposed to this and therefore require some explanation: the supplanting of the old Gallican Rite by that of Rome almost throughout the Western Empire, the introduction of Uniat rites, the suppression of the later medieval rites.

The existence of the Gallican Rite was a unique anomaly. The natural principle that rite follows patriarchate has been sanctioned by universal tradition with this one exception. Since the first organization of patriarchates there has been an ideal of uniformity throughout each. The close bond that joined bishops and metropolitan to their patriarch involved the use of his liturgy, just as the priests of a diocese follow the rite of their bishop. Before the arbitrary imposition of the Byzantine Rite on all Orthodox Christians, no patriarch would have tolerated a foreign liturgy in his domain. All Egypt used the Alexandrine Rite, all Syria that of Antioch-Jerusalem, all Asia Minor, Greece, and the Balkan lands, that of Constantinople. But in the vast Western lands that make up the Roman patriarchate, north of the Alps and in Spain, various local rites developed, all bearing a strong resemblance to each other, yet different from that of Rome itself. These form the Gallican family of liturgies. Abbot Cabrol, Dom Cagin, and other writers of their school think that the Gallican Rite was really the original Roman Rite before Rome modified it ("Paléographie musicale", V, 322, Cabrol, Les origines liturgiques, Paris, 1906). Most writers, however, maintain with Mgr Duchesne ("Origines du culte chrétien", Paris, 1896, 84-88), that the Gallican Rite is Eastern, Antiochene in origin. Certainly it has numerous Antiochene peculiarities (see GALICAN RITE), and when it existed, the complete rite in the seventh centuries (in Germanus of Paris, etc.), it was different from that in use at Rome at the time. Non-Roman liturgies were used at Milan, Aquileia, even at Gubbio at the gates of the Roman province (Innocent I's letter to Deccentius of Aquinum; Ep. xxv, in P. L., XX, 581-83). Innocent (405-17) naturally preferred the use of the rite foreign to Umbria; occasionally other popes showed some desire for uniformity in their patriarchate, but the great majority regarded the old state of things with perfect indifference. When other bishops asked them how ceremonies were performed at Rome they sent descriptions (so Pope Vigilius to Profluturus of Braga in 588, Affid, "Regesta Rom. Pont.", n. 907), but they otherwise contented to allow different uses. St. Gregory I (690-749) showed no anxiety to make the new English Church conform to Rome, but told St. Augustine to take whatever rites he thought most suitable from Rome or Gaul (Ep. x, 64, in P. L., LXXVII, 1188-7). Thus for centuries the popes alone among patriarchs did not enforce their own rite even throughout their patriarchate. The gradual romanization and subsequent disappearance of Gallican rites were (beginning in the eighth and ninth centuries), the work not of the popes but of local bishops and kings who naturally wished to conform to the use of the Apostolic See. The Gallican Rites varied everywhere (Charles the Great gives this as his reason for adopting the Roman Use; see Hauck, "Kirchengesch. Deutschlands", II, 107 sq.), and the inevitable desire for at least local uniformity arose. The bishops' frequent visits to Rome brought them in contact with more dignified rites, more direct by the highest chief at the tomb of the Apostles, and they were naturally influenced by it in their return home. The local bishops in synods ordered conformity to Rome. The romanizing movement in the West came from below. In the Frankish kingdom Charles the Great, as part of his scheme of unifying, sent to Adrian I copies of the Roman books, commanding their use throughout his domain. In the history of the substitution of the Roman Rite for the Gallican the popes appear as spectators, except perhaps in Spain and much later in Milan. The final result was the application in the West of the Roman rites; as the pope was undoubtedly Patriarch of the West it was inevitable, that sooner or later the West should conform to his rite. The places, however, that really cared for their old local rites (Milan, Toledo) retain them even now.

It is true that the changes made in some Uniat rites by the Roman correctors have not always corresponded to the best liturgical tradition. There are, as Mgr Duchesne says, "corrections inspired by zeal that was not always according to knowledge" (Origines du culte, 2nd ed., 89), but they are much fewer than is generally supposed and have never been more than the idea that general prejudice that Uniat rites are mere mutilated hybrids, the strongest impression from the study of them is how little has been changed. Where there is no suspicion of false doctrine, as in the Byzantine Rite, the only change made was the restoration of the name of the pope where the schismatics had erased it. Although the question of the procession of the Holy Ghost has been so fruitful a source of dispute between Rome and Constantinople the Filioque clause was certainly not contained in the original creed, nor did the Roman authorities insist on its addition. So it is not contrary to the teaching of the Catholics to keep their traditional form unchanged, though they believe the Catholic doctrine. The Filioque is only sung by those Byzantine Uniates who wish it themselves, as the Ruthenians. Other rites were altered in places, not to romanize but only to eradicate passages submitted to the former as foreign. Some other Uniates came from Nestorian, Monophysite, or Monothelite sects, whose rites had been used for centuries by heretics. Hence, when bodies of these people wished to return to the Catholic Church their services were keenly studied at Rome for possible here. In most cases corrections were absolutely necessary. The Newman Liturgy, for instance, did not contain the words of institution, which had to be
added to the Liturgy of the converted Chaldees. The Monophysite Jacobites, Coptics, and Armenians have in the Trisagion the fateful clause: "who wast crucified for us", which has been the watchword of Monophysitism ever since Peter the Dyer of Antioch has added it (470-88). If only because of its associations this has been left out in a Catholic Liturgy.

In some instances, however, the contrivers were over scrupulous. In the Gregorian Armenian Liturgy the words said by the deacon at the expulsion of the catechumens, long before the Consecration: "The body of the Lord and the blood of the Saviour are set forth (or before us)" (Brightman, "Eastern Liturgies", 430) were in the Unionite Rite changed to "are about to be before us". The Uniates also omit the words sung by the Gregorian choir before the Anaphora: "Christ has been manifested amongst us (has appeared in the midst of us)" (ibid., 434), and further change the cherubic hymn because of its anticipation of the Consecration. These misplacements are really harmless when understood, yet any reviser would be shocked by such strong cases. In many other ways also the Armenian Rite shows evidence of Roman influence. It has unleavened bread, our confession and Junius psalm at the beginning of Mass, etc. If before the tsanepd, the last of which, etc. But so little is this the effect of union with Rome that the schismatical Armenians have all these points too. They date from the time of the Crusades, when the Armenians, vehemently opposed to the Orthodox, made many advances towards Catholics. So also the strong romanizing of the Maronite Liturgy was entirely the work of the Maronites themselves, when, surrounded by enemies in the East, they too turned towards the great Western Church, sought her communion, and eagerly copied her practices. One can hardly expect the pope to prevent other Churches from imitating Roman customs. Yet, in the case of Uniates, does even this A Byzantine Uniat priest who uses unleavened bread in his Liturgy incurs excommunication. The only case in which an ancient Eastern rite has been willfully romanized is that of the Uniat Malabar Christians, where it was not Roman authority but the misguided zeal of Alexius de Meneses, Archbishop of Goa, and his Portuguese advisers at the Synod of Diamper (1599) which spoiled the old Malabar Rite.

The Western medieval rites are in no case (except the Ambrosian and Mozarabic Rites), really independent of Rome. They are merely the Roman Rite with additions and modifications, most of which are to its disadvantage. They are late, exuberant, and inferior variants, whose ornate additions and long interpolated tropes, sequences, and farce destroy the dignified simplicity of the old liturgy. In 1570 the revisers appointed by the Council of Trent restored with scrupulous care and, even in the light of later studies, brilliant success the pure Roman Missal, which Pius V ordered should alone be used wherever the Roman Rite is followed. It was a return to an older and purer form. The medieval rites have no doubt a certain archaeological interest; but where the Roman Rite is used it is best to use it in its pure form. This too only means a return to the principle that rite should follow patriarchy. The reform was made very prudently, Pius V allowing any rite that could prove an existence of two centuries to remain (Bull "Quo primum", 19 July, 1570). But in the Missal, thus saving any dioceses (e.g. Lyons) and religious orders (Dominicans, Carthusians, Carmelites), therefore keep their special uses, and the independent Ambrosian and Mozarabic Rites, whose loss would have been a real misfortune (see Liturgy, Mass, Liturgy of the) still remain.

Rome then by no means imposed uniformity of rite. Catholics are united in faith and discipline, but in their manner of performing the sacred functions there is room for variety based on essential unity, as there was in the first centuries. There are cases (e.g. the Georgian Church) where union with Rome has saved the ancient use, while the schismatics have been forced to adopt centralizing policy of their authorities (in this case Russia). The ruthless destruction of ancient rites in favour of uniformity has been the work not of Rome but of the schismatical patriarchies of Constantinople. Since the eleventh century, Constantinople has attempted to impose the one centre of the Orthodox Church has driven out the far more venerable and ancient Liturgies of Antioch and Alexandria and has compelled all the Orthodox to use its own late derived rite. The Greek Liturgy of St. Mark has ceased to exist; that of St. James has been revived for one or two days in the year at Zakynthos and Jerusalem only (see Antiochene Liturgy). The Orthodox all the world over must follow the Rite of Constantinople. In this unjustifiable centralization we have a defiance of the old principle, since Antioch, Jerusalem, Alexandria, Cyprus, in no way belong to the Byzantine Patriarchate. Those who advocate this principle for itself, even for the sake of uniformity mistreat the real offender, the ecumenical patriarch. III. THE OLD RITES.—Catholic and Schismatical.—A complete table of the old rites with an account of their mutual relations will be found in the article Liturgy. Here it need only be added that there is a Uniat body using each of the Eastern rites. There is no ancient rite that is not represented within the Catholic Church. That rite, liturgical language, and religious body connote three totally different ideas has been explained at length in the article Greek Rites. The rite a bishop ordains follows is not that of all other members of the same religion. Within certain broad limits a member of any Eastern sect might use any rite, for the two categories of rite and religion cross each other continually. They represent quite different classifications: for instance, liturgically all Armenians belong to one class, theologically a Uniat Armenian belongs to the same class as Latins, Chaldeans, Maronites, and has nothing to do with his Gregorian (Monophysite) fellow-countrymen (see Eastern Churches). Among Catholics the rite forms a group; each rite is used by a branch of the Church that is thereby a special, though not separate, entity. So within the Catholic Church are various liturgies, each characteristic in each case is the rite they use. Rite is the only basis of this classification. Not all Armenian Catholics or Byzantine Uniates obey the same patriarch or local authority; yet they are "Churches," individual provinces of the same great Church, because each is bound together by their own rites. In the West there is the vast Latin Church, in the East the Byzantine, Chaldean, Coptic, Syrian, Maronite, Armenian, and Malabar Uniat Churches. It is of course possible to subdivide and to speak of the national Churches (of Italy, France, Spain, etc.) under one of these main bodies (see Latin Church). In modern times rite takes the place of the old classification in patriarchates and provinces. IV. PROTESTANT RITES.—The Reformation in the sixteenth century produced a new and numerous series of rites, which are in no sense continuations of the old developments, but new developments. They are the descendents of the earliest rites, nor can they be classified in the table of genus and species that includes all the old liturgies of Christendom. The old rites are unconscious and natural developments of earlier ones and go back to the original fluid rite of the first centuries (see Liturgy)... The Protestant rites are deliberate compositions made...
by the various Reformers to suit their theological positions, as new services were necessary for their prayer-meetings. No old liturgy could be used by people with their ideas. The old rites contain the plainest statements about the Real Presence, the Eucharistic Sacrifice, prayers to saints, and for the dead, which are denied by Protestants. The Reformation occurred in the West, where the Roman Rite in its various local forms had been used for centuries. No Reformed sect could use the Roman Mass and still deny its principle. The Reformation, therefore, is a new order. On the whole it is surprising that they changed as much as they did. It would have been possible to arrange an imitation of the Roman Mass that would have been much more like it than anything they produced. The fragments of all kinds of rites, Eastern, Roman, Mozarabic, etc., which with their new prayers arranged into services that are hopeless liturgical tangles. This is specially true of the Anglican Prayer-books. In some cases, for instance, the placing of the Gloria after the Communion in Edward VI's second Prayer-book, there seems to be no object except a love of change. The first Lutheran services kept most of the old order. The Calvinist arrangements had from the first no connexion with any earlier rite. The use of the vulgar tongue was a great principle with the Reformers. Luther and Zwingli at first compromised with Latin, but soon the old language disappeared in all Protestant services. Luther in 1523 published a tract, "Of the order of the service in the parish" ("Von ordnung gottis dienstes ynn der gemeine" in Clemen, "Quellenbuch zur prakt. Theologie", I, 24–6), in which he insists on preaching, rejecting "uneven and part of the Mass," the Offertory and the idea of sacrifice, invocation of saints, and ceremonies, and denounces private Masses (Winkelmessen), Masses for the dead, and the idea of the priest as a mediator. Later in the same year he issued a "Formula misse et communiones pro ecclesia Vittebergensi" (ibid., 26–34), in which he omits the preparatory prayers, Offertory, all the Canon to the Last Oration, from Unde et memores to the Pater, the emblem of the Lord's Prayer, fraction, Iesu missae est. The Preface is shortened, the Sanctus is to be sung after the words of institution which are to be said aloud, and meanwhile the elevation may be made as often as the congregation will allow. Its sudden omission (ibid., IV, 30). At the end he adds a new ceremony, a blessing from Num., vi, 24–6. Latin remained in this service.

Karlostadt began to hold vernacular services at Wittenberg since 1521. In 1524 Kaspar Kant published a German service on the lines of Luther's "Formulae dienstes" (Lohi, "Sçichri türsich, in Formulære", III, Nordlingen, 1842, 37 sq.); so also Thomas Müntzer, the Anabaptist, in 1525 at Alstedt (Smed, "Die evang. deutschen Messen", 1896, 99 sq.). A number of compromises began at this time among the Protestants, services partly Latin and partly vernacular ("Eucharistiegebet", IV, 404–9). Vernacular hymns took the place of the old Proper (Introit, etc.). At last in 1526 Luther issued an entirely new German service, "Deutsche Messe und ordnung Gottis dienstes" (Clemen, op. cit., 34–43), to be used on Sundays, whereas the "Formula misse", in Latin, might be kept for week-days. In the "Deutsche Messe" a spiritual song or German prayer replaces the Introit. The text is that of Kaslson in Greek three times only. There is no Gloria. Then come the Collects, Epistle, a German hymn, Gospel, Creed, Sermon, Paraphrase of the Lord's Prayer, words of institution with the account of the Last Supper from I Cor., xi, 20–9. Elevation of the Host is kept by Luther himself (op. cit. of Karlstäd and most of his colleagues), Communion, during which the Sanctus or a hymn is sung, Collects, the blessing from Num., vi, 24–6. Except the Kyrie, all is in German; asyndic bread is still used but declared indifferent; Communion is given under both kinds, though Luther preferred the unmixed chalice. This service remained for a long time the basis of the Lutheran Communion function, but the local branches of the sect from the beginning used great freedom in modifying it. The Pietistic movement in the eighteenth century, with its scorn for forms and still more the present Rationalism, have left very little of Lutheran services. A well-known fragment is "Action oder Bruch (=Bruch des nachtmals" (ibid., 47–50). This is a complete breach with the Mass an entirely new service. On Maundy Thursday the men and women are to receive communion, on Good Friday those of "middle age", on Easter Sunday only the old (die altersleute). These are the only occasions on which the service is to be held. The arrangement is as follows: pastor facing the people, reading of I Cor., xi, 20–9, Gloria in Excelsis, "The Lord be with you" and its answer, reading of John, vj, 47–63, Apostles' Creed, an address to the people, Lord's Prayer, extempore prayer, words of institution, Communion (under both kinds in wooden vessels), Ps. 116, a short prayer of thanksgiving; the pastor says: "Go in peace". On other Sundays there is to be no Communion at all, but a service consisting of prayer, Our Father, sermon, general confession, absolution, prayer, blessing. Equally radical was the Calvinist sect. In 1556 through Farel's influence, the Church of Geneva. Three times a year only was there to be a commemorative Supper in the baldest form; on other Sundays the sermon was to suffice. In 1542 Calvin issued "La forme des prières célébriatiques" (Clemen, op. cit., 51–8), a supplement to which describes "La mani ère de célébrer la cène" (ibid., 51–68). This rite to be celebrated four times in the year, at the reading of I Cor., xi, an excommunication of various kinds of sinners, and long exhortation. "This being done, the ministers distribute the bread and the cup to the people, taking care that they approach reverently and in good order" (ibid., 60). Meanwhile a psalm is sung on the lesson read from the Bible, a thanksgiving follows (ibid., 55), and a final blessing. Except for their occurrence in the reading of I Cor., xi, the words of institution are not said; there is no kind of Commu-
RITES

The union form. It is hardly possible to speak of a rite at all in the Calvinist body.

The other ritual functions kept by Protestants (baptism, confirmation as an introduction to Communion, marriage, funerals, appointment of ministers) went through much the same development. The first Reformers expunged and modified the old rites; then gradually more and more was changed until little of the old Protestant rite can be traced in present practices. The prayers, addresses to the people in various combinations make up these functions. The Calvinists have always been more radical than the Lutherans. The development and multiple forms of these services may be seen in Rietelsel, "Lehrbuch der Liturgik". If, as in the Lutheran service-books, the litanies of the Confession and the Creed are omitted, the service is substantially the same as in the English Church. The Anglican service-books differ from the Catholic liturgies of those used by any Protestant body. But this is saying very little. The Non-jurors in the eighteenth century produced a number of curious liturgies which in many ways go back to Catholic principles, but have the fault common to them all of being conscious and artificial arrangements of elements selected from the old rites, instead of natural developments (Overtorn, "The Non-jurors", London, 1902, ch. vi). The Irvingites have a very successful service-book of this type. Many Methodists use the Anglican book; the other later Protestant services have characteristics of the movements of hymns, readings, extempore prayers, and a sermon that can hardly be called rites in any sense.

V. LITURGICAL LANGUAGE.—The language of any Church or rite, as distinct from the vulgar tongue, is that used in the official services and may or may not be the common language. For instance the Rumanian Church uses liturgically the ordinary language of the country, while Latin is used by the Latin Church for her Liturgy without regard to the mother tongue of the clergy or congregation. There are many cases of an intermediate state between these extremes, in which the liturgical language is an older form of the vulgar tongue, and in some cases, the former is used also, understood by people who have not studied it specially. Language is not rite. Theoretically any rite may exist in any language. Thus the Armenian, Coptic, and East Syrian Rites are celebrated always in one language, the Byzantine Rite is used in a great number of tongues, and in other rites one language sometimes enormously preponderates but is not used exclusively. This is determined by church discipline. The Roman Liturgy is generally celebrated in Latin. The reason why a liturgical language began to be used and is still retained must be distinguished in liturgical science from certain theological or mystic considerations by which its use may be explained or justified. Each liturgical language was first chosen because it was the natural language of the people. But languages change and the Faith spreads into countries where other tongues are spoken. Then either the author who wrote the rite made no provision for the extreme Protestant, or else the prayers into the new language, or the conservative instinct, always strong in religion, retains for the liturgy an older language no longer used in common life. The Jews showed this instinct, when, though Hebrew was a dead language after the Captivity, they continued to use it in their prayers in the time of Christ, and still retain it in their services. The Moslem, also conservative, reads the Koran in classical Arabic, whether he be Turk, Persian, or Afghan. The translation of the church service is complicated by the difficulty of determining when the language in which it is written, as Latin in the West and Hellenistic Greek in the East, had ceased to be the vulgar tongue. Though the Byzantine services were translated into the common language of the Slavonic people that they might be understood, this form of the language (Church-Slavonic) is no longer spoken, but is gradually becoming as unintelligible as the original Greek. Protestants made a great point of using languages "understood of the people", yet the language of Luther's Bible and the Anglican Prayer-book is already archaic.

History.—When Christianity appeared Hellenistic Greek was the common language spoken around the Mediterranean, and the Slavonic, Coptic, and Syriac, Minor, and Italy in Greek. When the parent rites were finally written down in the fourth and fifth centuries Eastern liturgical language had slightly changed. The Greek of these liturgies (Apost. Const. VIII, St. James, St. Mark, the Byzantine Liturgy) was that of the Fathers of the time, strongly
coloured by the Septuagint and the New Testament. These liturgies remained in this form and have never been recast in any modern Greek dialect. Like the text of the Bible, that of a liturgy once fixed becomes sacred. The formulae used Sunday after Sunday are hallowed by too sacred associations to be changed as long as more or less the same language is used. The Greek, Slavic, and Japanese liturgical forms are stereotyped. In the East and West, however, there existed different principles in this matter. Whereas in the West there was a limited and prayer-book influence and no vulgar slang. The East was never hellenised as the West was Latinised. Great nations, primarily Egypt and Syria, kept their own languages and literatures asthey found it was easier. The Chalcedonian principle of a uniform liturgical language was broken in the West and people were accustomed to hear the church service in different languages in different places. This uniformity once broken never became an ideal to Eastern Christians and the way was opened for an indefinite multiplication of liturgical tongues.

In the fourth and fifth centuries the Rites of Antioch and Alexandria were used in Greece in the great towns where people spoke Greek, in Coptic or Syriac among peasants in the country. The Rite of Asia Minor and Constantineople was always in Greek, because here there was no rival tongue. The Faith was preached in Armenia (from Ctesiphon) the Armenians in taking over the Ctesarean Rite translated it of course into their own language. And the great Nestorian Church in East Syria, evolving her own literature in Syriac, naturally used that language for her church services too. This diversity of tongues was by no means parallel to diversity of sect or religion. People who agreed entirely in faith, who were separated by no schism, nevertheless said their prayers in different languages. Melchites in Syria clung entirely to the Orthodox faith of Constantineople and used the Byzantine Rite, yet used it in Arabic. The idea of translating the Liturgy continued later. After the Schism of the eleventh century, the Orthodox Church, unlike Rome, insisted on uniformity of rite among her members. All the Orthodox use the Byzantine Rite, yet have no idea of one language. When the Slavs were converted the Byzantine Rite was put into Old Slavonic for them; when Arabic became the only language spoken in Egypt and Syria, it became the language of the Liturgy in those countries. For a long time all the people north of Constantineople used Old Slavonic in church, although the dialects they spoke gradually drifted away from it. Only the Georgians, who are Slavs in no sense at all, used their own language. In the seventeenth century as part of the growth of Rumanian national feeling came a great insistence on the fact that they were not Slavs either. They wished to be counted among Western, Latin races, so they translated their liturgical books into liturgy in their own language. Thus these represent the old classical liturgical languages in the East.

The Monophysite Churches have kept the old tongues even when no longer spoken; thus they use Coptic in Egypt, Syriac in Syria, Armenian in Armenia. The Nestorians and their daughter-Church in India (Malabar) also use Syriac. The Orthodox have four or five chief liturgical languages: Greek, Arabic, Church-Slavonic, and Rumanian. Georgian has almost died out. Later Russian missions have very much increased the number. They have translated the same Byzantine Rite into German, Estonian, and Lettish for the Baltic provinces, Finnish and Tartar for converts in Finland and Siberia, Esquimaux, a North American and Polynesian, and Japanese. Here a general principle of liturgical language can be established for Eastern Churches, though the Nestorians and Monophysites have evolved something like the Roman principle and kept their old languages in the liturgy, in spite of change in common talk. The Orthodox services are short, however, for there is no liturgy that would be learned by the people, for since these older versions were made language has gone on developing. In the case of converts of a totally different race, such as Chinese or Red Indians, there is an obvious line to cross at once and there is no difficulty about translating what would otherwise be totally unintelligible to them. At home the spoken language gradually drifts away from the form stereotyped in the Liturgy, and it is difficult to determine when the Liturgy ceases to be understood. In more modern times with the growth of new sects the conservative instinct of the old Churches has grown. The Church-Slavonic texts are jealously kept unchanged, though in all cases they have become archaic and difficult to follow by uneducated people. Lately the question of liturgical language has become one of the chief difficulties in Macedonia. Especially since the Bulgarian Schism the Phanar at Constantinople insists on Greek in church as a sign of Hellenism, while the people clamour for Old-Slavonic or Rumanian.

In the West the whole situation is different. Greek was first used at Rome, too. About the third century the services were translated into the vulgar tongue, Latin (see Mass, LITURGY OF THE), which has remained ever since. There was no universal language for many centuries. As the Western barbarians became civilized they accepted a Latin culture in everything, having no literatures of their own. Latin was the language of all educated people, so it was used in church, as it was for books or even letter-writing. The Romance people drifted from Latin to Italian, Spanish, French, etc., so gradually that no one can say when Latin became a dead language. The vulgar tongue was used by peasants and ignorant people only; but all books were written, lectures given, and solemn speeches made in Latin. Even Dante (d. 1321) thought it necessary to write in Latin. He did it because his theology for Italy (On the Trinity) had to be read as the pontifical. So for centuries the Latin language was that, not of the Catholic Church, but of the Roman patriarchate. When people at last realized that it was dead, it was too late to change it. Around it had gathered the associations of Western Christendom; the music of the Roman Rite was composed and sung only to a Latin text; and it is even now the official tongue of the Roman Court. The ideal of uniformity in rite extended to language also, so when the rebels of the sixteenth century threw over the old language, sacred from its long use, as they threw over the old rites and old laws, the Catholic Church, conservative in all these things, would not give way to them. As a bond of union among the many nations who make up the Latin patriarchate, she retains the old Latin tongue with one or two small exceptions. Along the Eastern coast of the Adriatic Sea the Roman Mass has been used (with slight Hellenic letters) since the eleventh century, and the Roman Mass is said in Greek on rare occasions at Rome.

It is a question how far one may speak of a special liturgical Latin language. The writers of our Collects, hymns, Prefaces, etc., wrote simply in the language of their time. The style of the various elements of the Mass and Divine Office varies greatly sc-
ccording to the time at which they were written. We have texts from the fourth or fifth to the twentieth century. Liturgical Latin then is simply late Christian Latin of various periods. On the other hand the Liturgy had an influence on the style of Christian Latin writers second only to that of the Bible. First we notice St. Jerome's (per omnia secundum seculorum) manner, Greek constructions (per Dominum nostrum meaning "for the sake of", ἄνδρα and words (Eucharistia, ἱλασία, epicureus), expressions borrowed from Biblical metaphors (pastor, liber praedestinationis, crucifigere cornem, lux, via, Agnus Dei), and words in a new Christian sense (amitiatis, componiceto, or Error). St. Jerome in his De Virginitate also helped to form liturgical style. His constructions and phrases occur repeatedly in the non-Biblical parts of the Mass and Office. The style of the fifth and sixth centuries (St. Leo I, Celestine I, Gregory I) forms perhaps the main stock of our services. The medieval Scholiast (St. Thomas Aquinas) and their technical terminology have influenced much of the later parts, and the Latin of the Renaissance is an important element that in many cases overlays the ruder forms of earlier times. Of this Renaissance Latin many of the Breviary lessons and psalms; a combination of the hymns with the improved forms drawn up by order of Urban VIII (1623–44) will convince any one how disastrous its influence was. The tendency to write inflated phrases has not yet stopped: almost any modern Collect compared with the old ones in the "Gelasian Sacramentary" will show how much we have lost of style in our liturgical prayers.

Use of Latin.—The principle of using Latin in church is in no way fundamental. It is a question of discipline that evolved differently in East and West, and may not be defended as either primitive or universal. The authority of the Church could change the language at its discretion without Violating any important principle. The idea of a universal tongue may seem attractive, but is contradicted by the fact that the Catholic Church uses eight or nine different liturgical languages. Latin preponderates as the result of the greater influence of the Roman patriarchate and its rites, caused by the spread of Western Europeans into new lands and the unhappy schism of so many Easterns (see Fortescue, "Orthodox Eastern Church", 431). Uniformity of rite or liturgical language has never been a Catholic ideal, nor was Latin chosen deliberately as a sacred language there because the language would have been Hebrew or Greek. The objections of Protestants to a Latin Liturgy can be answered easily enough. An argument often made from 1 Cor., xiv, 4–18, is of no value. The whole passage treats of quite another thing, prophesying in tongues, and hence unknown even to the speaker (see 14: "For if I pray in a tongue, my spirit prayeth, but my understanding is without fruit").

The other argument, from practical convenience, from the loss to the people who do not understand what is being said, has some value. The Church has never set up a mysterious unintelligible language as an ideal. There is no principle of sectarian mysteries from which the layman is shut out. In spite of the use of Latin the people have means of understanding the service. That they might do so still better if everything were in the vulgar tongue may be admitted, but in making this change the loss would be greater than the gain.

By changing the language of the Liturgy we should lose the principle of uniformity in the Roman patriarchate. According to the ancient principle that rite follows patriarchate, the Western rite should be that of the Western patriarchate, the Roman Bishop, who uses the local rite of the city of Rome. There is a further advantage in using it in his language, so

the use of Latin in the West came about naturally and is retained through conservative instinct. It is not so in the East. There is a great practical advantage to travellers, whether priests or laymen, in finding their rite exactly the same everywhere. An English priest in Poland or Portugal could not say his Mass unless he and the server had a common language. The use of Latin all over the Roman patriarchate is a very obvious and splendid witness of unity. Every Catholic traveller in a country of which he does not know the language has felt the comfort of finding that in church at least everything is familiar and knows that in a Catholic church of his own rite he is at home anywhere. Moreover, the change of liturgical language would be a break with the past. It is a witness of antiquity of which a Catholic may well be proud that in Mass to-day we are still used to the very words that Anselm, Gregory, Leo sang in their cathedrals. A change of language would also abolish Latin chant. plainsong, as venerable a relic of antiquity as any part of the ritual, is composed for the Latin text only, supposes always the Latin syllables and the Latin accent, and becomes a caricature when it is forced into another language with different rules of accent. The loss of antiquity and universal use always made proportionately (since there are the Eastern Uniat rites) but valid for the Roman patriarchate may well outweigh the practical convenience of using the chaos of modern languages in the liturgy. There is also an aesthetic advantage in Latin. The splendid dignity of the short phrases with liturgical accent and terse style redolent of the great Latin Fathers, the strange beauty of the old Latin hymns, the sonorous majesty of the Vulgate, all these things that make the Roman Rite so dignified, so characteristic of the old Imperial City were the Prince of the Apostles set up his throne, would be lost altogether without exacting the true Latin translations. The impossibility of understanding Latin is not so great. It is not a secret, unknown tongue, and till quite lately every educated person understood it. It is still taught in every school. The Church does not clothe her prayers in a secret language, but rather takes it for granted that people understand Latin. If Catholics learned enough Latin to follow the very easy style of the Church language all difficulty would be solved. For those who cannot take even this trouble there is the obvious solution of a translation. The Mass in English is one of such ideas. The sincere, ignorant may follow in that the prayers that lack of education prevents their understanding without it.

The liturgical languages used by Catholics are:

1. Latin in the Roman, Milanese, and Mosarabic Rites (except in partes of Dalmatia).
2. Greek in the Byzantine Rite (not exclusively).
4. Coptic in the Coptic Rite.
5. Armenian by all the Churches of that rite.
6. Arabic by the Melchites (Byzantine Rite).
7. Slavonic by Slavs of the Byzantine Rite and (in Glagolitic letters) in the Roman Rite in Dalmatia.
8. Georgian (Byzantine Rite).
9. Rumanian (Byzantine Rite).

VI. LITURGICAL SCIENCE.—A. Rubrics. The most obvious and necessary study for ecclesiastical persons is that of the laws that regulate the performance of doctrinal functions. The study of church law is a branch of canon law. The rules for the celebration of the Holy Mysteries, administration of sacraments, etc., are part of the positive law of the Church, just as much as the laws about benefices, church property, or fasting, and oblige those whom they concern under pain of sin. As it is therefore the duty of persons in Holy orders to know them,
RITES

they are studied in all colleges and seminaries as part of the training of future priests, and candidates are examined before ordination. Benedictine rubrics of its special nature and complication liturgical science in this sense is generally treated apart from the rest of canon law and is joined to similar practical matters (such as preaching, visiting the sick, etc.) to make up the science of pastoral theology. The sources from which rubrics are primarily drawn are the rubrics of the liturgical books (the Missal, Breviary, and Ritual). There are also treatises which explain and arrange these rubrics, adding to them from later decrees of the S. Congregation of Rites. Of these Martinucci has not yet been displaced as the most complete and authoritative, Baldeschi has long been a favourite and has been translated into English. De Herdt is the standard book, quite sound and clear as far as it goes but incomplete, Le Vavasseur is perhaps the most practical for general purposes.

B. History.—The development of the various rites, their spread and mutual influence, the origin of each ceremony, etc., form a part of church history whose importance is becoming more and more realized. For practical purposes all a priest need know are the present rules that affect the services he has to perform, as in general the present laws of the Church are all we have to obey. But just as the student of the Bible knows the text of the old testament, even if abrogated since, as he studies the history of earlier times and remote provinces of the Church, because it is from these that he must build up his conception of her continuous life, so the liturgical student will not be content with knowing only what affects him now, but is prompted to examine the past, to inquire into the origin of the present rites and study other rites too as expressions of the life of the Church in other lands. The history of the liturgies that deeply affect the life of Christians in many ways, that are the foundation of many other objects of study (architecture, art, music, etc.) is no inconsiderable element of church history. In a sense this study is comparatively new and not yet sufficiently organized, though to some extent it has always accompanied the practical study of liturgy. The great medieval liturgists were not content with describing the rites of their own time. They suggested historical reasons for the ceremonies and added the results of comparisons with those of their own Churches. Benedict XIV's treatise on the Mass discusses the origin of each element of the Latin liturgy. This and other books of seventeenth- and eighteenth-century liturgiologists are still standard works. So also in lectures and writings, our first sense it has always been the custom to add historical notes on the origin of the ceremonies and prayers. But the interest in the history of liturgy for its own sake and the systematic study of early documents is a comparatively new thing. In this science England led the way and still takes the foremost place. It followed the Oxford Movement as part of the revived interest in the early Church among Anglicans. W. Palmer (Origines liturgicae) and J. M. Neale in his various works are among those who gave the first impulse to this movement. The Catholic Daniel Rock ("Hierurgia" and "The Church of our Fathers") further advanced it. It has now a large school of followers. F. C. Brightman's edition of "Eastern Liturgies" is the standard one everywhere. The monumental editions of the "Gelasian Sacramentary" by H. A. Wilson and the "Leonine Sacramentary" by C. L. Feltese, the various essays and discussions by E. Huber, C. H. Arneke, keep up the English standard. In France Dom Guéranger (L'Année liturgique) and his school of Benedictines opened a new epoch. Mgr Duchesne supplied a long-felt want with his "Origines du culte chrétien"; Dom Cabrol and Dom Leclercq ("Mon. ecl. lit.", etc., especially the monumental "Dict. d'arch. chrét. et de liturgie") have advanced to the fullest place among Roman authors. Besides from Germany we have the works of H. Daniel (Codex lit. eccl. universae), Probst, Thalhofer, Gihr, and a school of living students (Drews, Rieschel, Baunstark, Buchwald, Rauschen). In Italy good work is being done by Semeris, Bonaccorsi, and others. Nevertheless the study of liturgy hardly yet takes the place it deserves in the education of churchmen. Besides the practical instruction that forms a part of pastoral theology, lectures on liturgical history would form a valuable element of the course of church history. As part of such a course other rites would be considered and compared. There is a fund of deeper mystery in the study of liturgy to be drawn from the comparison with others, Gallican or Eastern. Such instruction in liturgiology should include some notion of ecclesiology in general, the history and comparison of church planning and architecture, of vestments and church music. The root of all these things in different countries is the liturgies they serve and adorn.

Dogmatic Value.—The dogmatic and apologetic value of liturgical science is a very important consideration to the theologian. It must, of course, be used reasonably. No Church intends to commit herself officially to every statement and implication contained in any of the documents of the Church, even if abrogated, even if she does not agree with them. The Church is committed to everything said by her Fathers. For instance, the Collect for St. Julian Falconieri (19 June) in the Roman Rite refers to the story of her miraculous communion before her death, told at length in the sixth lesson of her Office, but the truth of that story is not part of the Catholic Faith. Liturgies give us arguments from tradition even more valuable than those from the Fathers, for these statements have been made by thousands of priests day after day for centuries. A consensus of liturgies is, therefore, both in space and time a greater witness of agreement than a consensus of Fathers, for as a general principle it is obvious that people in their prayers say only what they believe. This is the meaning of the well-known axiom: Lex orandi lex credendi. The prayers for the dead, the passages in which God is asked to accept this Sacrifice, the statements of the Real Presence in the oldest liturgies are unimpeachable. The Council of Trent defined the crisis of these points. The Bull of Pius IX on the Immaculate Conception ("Ineffabilis Deus", 8 Dec., 1854) contains a classical example of this argument from liturgy. Indeed there are few articles of faith that cannot be established or at least confirmed from liturgies. The Byzantine Office for St. Peter and St. Paul (20 June) contains plain statements about Roman primacy. The study of liturgy from this point of view is part of dogmatic theology. Of late years especially dogmatic theologians have given much attention to it. Christian Pesch, S.J., in his "Preskeleiones theologiae dogmaticae" (9 vols., Freiburg i. Br.) quotes the liturgical texts for the theses as part of the argument from tradition. There are then these three aspects under which liturgiology should be considered by a Catholic theologian, as an element of canon law, church history, and dogmatic theology. The history of its study would take long to tell. There have been liturgiologists through all the centuries of Christian history. Briefly the state of this science at various periods is this:

Liturgiologists in the Ante-Nicene period, such as Justus Martyr, composed or wrote down descriptions of ceremonies performed, but made no examination of the sources of rites. It was only when the scientific study of the subject began. St. Ambrose's "Liber de Mysteriis" (P. L., XVI, 405-26), the anonymous (pseudo-Ambrose) "De Sacramentis" (P. L., XVI, 435-82), various treatises by St. Jerome (e. g., "Contra Vigilantium" in P. L., XXIII, 354-
RITES

367) and St. Augustine, St. Cyril of Jerusalem's "Catechetical Instructions" (P. L., XXXIII, 331-157), and "the Second Letter of St. Irenaeus to the Friso" (in the "Corpus script. eccl. Latin." of Vienna: "Itiner. hierosolymitana", 35-101) represent in various degrees the beginning of an examination of liturgical texts. From the sixth to the eighth centuries we have valuable texts (the Sacramentaries and Ordines) and a list of the "Deus corporis et, silent" (in the official in P. L., LXXXIII). The Carolingian revival of the eighth and ninth centuries began the long line of medieval liturgiologists. Alcuin (P. L., C-CI), Amalarius of Metz (P. L., XCIX, CY), Agobard (P. L., CIV), Flosus of Lyones (P. L., CXIX, 18-72), Roffredus (Carolingii, 11), and Frid Strabo (P. L., CXIV, 918-66) form at this time a galaxy of liturgical scholars of the first importance. In the eleventh century Berno of Constance ("Micrologus" in P. L., CL, 974-1022), in the twelfth Rupert of Deuts ("De divinis officii" in P. L., CLXX, 9-334), Honorius of Autun ("Gamtania" and "De Sacramentis" in P. L., CLXXII), John Beleth ("Rationale div. officii," in P. L., CCII, 9-106), and Beroldus of Milan (ed. Magistretii, Milan, 1894) carry on the tradition. In the thirteenth century William Durandus of Mende ("Rationale div. officii," and Durandus) is the most famous of all the medieval liturgiologists. There is a long list of liturgical texts of the sixteenth century. The discussions of the Reformation period called people's attention again to liturgies, either as defences of the old Faith or as sources for the compilation of reformed services.

Renaudet, Liturgiarius orientalis collectio (Frankfort, 1847); Morin, Liturgia eucharisticus ecclesiaeici (Antwerp, 1749-66); Assemani, Codex liturgicus eccl. universae (Rome, 1749-66); Daniel, Codex liturgicus eccl. universae (Leipzig, 1847); Daniel, Codex liturgicus eccl. universae (Leipzig, 1883); Nillius, Codex liturgicus eccl. universae (Hanover, 1869); Hammond, Liturgia, Eastern and Western (Oxford, 1878); Brightman, Eastern Liturgies (Oxford, 1896); Caspar, Introduction aus studia liturgicae (Paris, 1897); Hurst's, Lehre des Gottesdiensts by (Berlin, 1800); Cleemans, Quellenbuch zur praktischen Theologie 1: Liturgik (Leipzig, 1890); and Liturgia, Eastern and Western, are reprinted in the Anciant and Modern Library of Theological Literature (London); Proctor and Parke, A New History of the Church of England Prayer Book, A History of the Book of Common Prayer (London, 1890).

ADRIAN FORSTER.

BENEDICTINE RITE.—The only important rite peculiar to the Benedictine Order is the Benedictine Breviary (Breviarium Monasticum). St. Benedict devotes thirteen chapters (vii-xii) of his rule to the celebration of the canonical hours for monastics, and the Benedictine Breviary is the outcome of this regulation. It is used not only by the so-called Black Benedictines, but also by the Cistercians, Olivetans, and all those orders that have the Rule of St. Benedict as their basis. The Benedictines are not at liberty to substitute the Roman for the Monastic Breviary; by using the Roman Breviary they would not satisfy their obligation of saying the Divine Office. Each congregation of Benedictines has its own ecclesiastical calendar.

MICHAEL OTT.

CARMELEE RITE.—The rite in use among the Carmelites since about the middle of the twelfth century is known by the name of the Rite of the Holy Sepulchre, the Carmelite Rule, which was written at the year 1210, of the friars of Mount Carmel to follow the approved customs of the Church, which in this instance meant the Patriarchal Church of Jerusalem: "Hi qui litteras noverunt et legere psalmos, per singulas horas eos dicant qui ex institutione sanctorum patrum et ecleasie approbatis Missae studuerunt ad horas praemunant deputati." This Rite of the Holy Sepulchre belonged to the Gallican family of the Roman Rite; it appears to have descended directly from the Parisian Rite, but to have undergone some modifications pointing to other sources. For, in the Sanctorale we find influences of the Gallican, in the proses traces of a Russian source, while the lessons and prayers on Holy Saturday are purely Roman. The fact is that most of the clerics who accompanied the Crusaders were of French nationality; some even belonged to the Chapter of Paris, as is proved by documentary evidence. Local influence, too, plays an important part. The Temple itself, the Holy Sepulchre, the vicinity of the Mount of Olives, of Bethany, of Bethlehem, gave rise to magnificent ceremonies, connecting the principal events of the ecclesiastical year with the very localities where the various episodes of the work of Redemption has taken place. The rite is known to us by means of some manuscripts, one (Bauhau 659 of A. D. 1100) in the Vatican library, another at Barletta, described by Kohler (Revue de l'Orient Latin, XVIII, 1900-01, pp. 383-500) and by him ascribed to about 1240. The hermits on Mount Carmel were bound by rule only to assemble once a day for the celebration of Mass, the Divine Office being recited privately. Lay brothers who were able to read might recite the Office, while others repeated the Lord's Prayer a certain number of times, according to the length and solemnity of the various offices. It may be presumed that on settling in England (from about A. D. 1240) the Carmelites conformed to the habit of the other mendicant orders with respect to the choral recitation or chant of the Office, and there is documentary evidence that on Mount Carmel itself the choral recitation was in force at least in 1254. The General Chapter of 1259 passed a resolution according to liturgical matters, but, owing to the loss of the acts, their nature is unfortunately not known. Subsequent chapters very frequently dealt with the rite, chiefly adding new feasts, changing old established customs, or revising rubrics. An Ordinal, belonging
to the second half of the thirteenth century, is preserved at Trinity College, Dublin, while portions of an Epistolarium of about 1270 are at the Magliabecchiana at Florence (D6, 1787). The entire Ordinal was rearranged and revised in 1312 by Master Sibert de Bek, and rendered obligatory by the Concilium Generalissimum, is only known in superseding the old one. Manuscripts of it are preserved at Lambeth (London), Florence, and elsewhere. It remained in force until 1532, when a committee was appointed for its revision; their work was approved in 1539, but published only in 1544 after the then General, Nicholas Audax, had introduced some further changes. The reform of the Roman liturgical books under St. Pius V called for a corresponding reform of the Carmelite Rite, which was taken in hand in 1580, the Breviaire appearing in 1584 and the Missal in 1587. At the same time the Holy See withdrew the right hitherto exercised by the chapters and the generals of altering the liturgy of the order, and placed all such matters in the hands of the Sacred Congregation of Rites. The publication of the Reformed Breviaire of 1584 caused the newly established Discalced Carmelites to abandon the ancient rite; for all such a rite was not in the Rite of Rome. Besides the various manuscripts of the Ordinal already mentioned, we have examined a large number of manuscript missals and breviaries preserved in public and private libraries in the United Kingdom, France, Italy, Spain, and other countries. We have seen most of the early prints of the Missal enumerated by Weale, as well as some not mentioned by him, and the breviaries of 1480, 1490, 1504, 1516 (Hore), 1542, 1558, 1575, and 1579. Roughly speaking, the ancient Carmelite Rite may be said to stand about half way between the Carthusian and the Dominican rites. It shows signs of the influence of the Benedictine liturgy. In the great festivals, as in the Carthusian, the Vespers, the Lauds, and the Matins rite are observed, the antiphons of which are used. The Vespers antiphons are often used also at Matins. The Divine Office also presents some noteworthy features. The first thing to attract attention is the use of three colours, in the sparing use of altar candles (one at low Mass, none on the altar itself at high Mass but only acolytes' torches, even these being extinguished during part of the Mass, four torches and one candle in choir for Tenebrae); incense, likewise, is used rarely and with noteworthy restrictions; the blessing at the end of the Mass is only permitted where the custom of the country requires it; passing before the tabernacle, the brethren are directed to make a profound inclination, not a genuflexion. Many other features might be quoted to show that the whole rite is of remarkable antiquity, and according to the earliest Ordinal Communion is given under one species, the days of general Communion being seven, later on ten or twelve a year with leave for more frequent Communion under certain conditions. Extreme Unction was administered on the eyes, ears, nostrils, mouth, both hands (the palms; with no distinction between priests and others) and the feet superius. The Ordinal of 1312 on the contrary orders the hands to be anointed externius, but also without distinction for the priest; it moreover adds another anointing on the breast (superius messe in tabulis e lubrico).

In the Mass there are some peculiarities. the altar remains covered until the priest and ministers are ready to begin, when the acolytes then roll back the cover; likewise before the end of the Mass they cover the altar again. On great feasts the Introit is said three times, i.e., it is repeated both before and after the Gloria Patri; besides the Epistle and Gospel there is a lesson or prophecy to be recited by an acolyte. At the Lasabo the priest leaves the altar for the piscina where he says that psalm, or else Veni Creator Spiritus or Deus misereatur. Likewise after the first ablation he goes to the piscina to wash his face. During the Canonical Hours a fan is kept to keep the flies away, a custom still in use in Sicily and elsewhere. At the word frequent in the form of consecration, the priest, according to the Ordinal of 1312 and later rubrics, makes a movement as if breaking the host. Great care is taken that the smoke of the thurible and of the torches do not interfere with the clear vision of the host when lifted up for the adoration of the faithful; the chalice, of course, is kept in the hands of the priest who does not genuflect but bows reverently. After the Pater Noster the choir sings the psalm Deus veneratur gentes for the restoration of the Holy Land. The prayers for communion are identical with those of the Sarum Rite and other similar uses, viz. Domine, noster pater, Domine noster Salvator, and Sion in the Roman Rite, and Salve salus mundi. The Domine non sum dignus was introduced only in 1568. The Mass ended with Dominus vobiscum, Ite missa est (or its equivalent) and Placeat. The chapter of 1324 ordered the Salve regina to be said at the end of each canonical hour as well as at the end of the Mass. The Last Gospel, which in both ordinals serves for the priest's thanksgiving, appears in the Missal of 1490 as an integral part of the Mass. On Sundays and feasts there was, besides the festival Mass after Terce or Sext, an early Mass (matutina) without any rubrics, the custom of the congregation of the Office. From Easter till Advent the Sunday Mass was therefore celebrated early in the morning, the high Mass being that of the Resurrection of our Lord; similarly on these Sundays the ninth less Mess was taken from one of the Easter days; these customs had been introduced soon after the conquest of the Holy Land. A solemn commemoration of the Resurrection was held on the last Sunday before Advent; in all other respects the Carmelite Liturgy reflects more especially the devotion of the order towards the Blessed Virgin.

The Divine Office also presents some noteworthy features. The first thing to notice is the custom in certain feasts and the Vespers during Lent have a responsory usually taken from Matins. Compline has various hymns according to the season, and also special antiphons for the Canticle. The lessons at Matins follow a somewhat different plan from those of the Roman Office. The singing of the genealogies of Christ after Matins on Christmas and the Epiphany gave rise to beautiful ceremonies. After Tenebrae in Holy Week (sung at midnight) we notice the chant of the Tropi; all the Holy Week services present interesting archaic features. Other points to be mentioned are the use of the antiphons from Trinity to Advent and the verses after the psalm on Trinity, the feasts of St. Paul, and St. Laurence. The hymns are those of the Roman Office; the process appear to be a uniform collection which remained practically unchanged from the thirteenth century to 1544, when all but four or five were abolished. The Ordinal prescribes only four processions in the course of the year, viz. on Candlemas, Palm Sunday, the Assumption, and the Dedication.

The calendar of saints in the two oldest recensions of the Ordinal, exhibits some feasts proper to the Holy Land, namely some of the early bishops of Jerusalem, the Patriarchs Abraham, Isaac, and Jacob, and Lazarus. The only special features were the feasts of St. Anne, probably due to the fact that the Carmelites occupied for a short time a convent dedicated to her in Jerusalem (vacated by Benedictine nuns at the capture of that city in 1187), and the feast of the Nativity of Our Lady. The feast of the Lady of the Nativity of Our Country; and sanctifications B. V.; the Corpus Christi procession, however, dates only from the end of the fifteenth
century. In 1312 the second part of the Consecration, which till then had been very short, was introduced. The revisions of St. Albert and St. Angerel date respectively from the beginning and the end of the fifteenth century, but were transferred in 1503 from the canonical Office to the Little Office of Our Lady. The feast of the "Three Maries" dates from 1542, those of the Visitation of Our Lady and of the Presentation from 1571. Certain parts of the order were first introduced towards the end of the fourteenth century viz. the Commemoration (Scapular Feast) of 16 July appears first about 1386; St. Eligius, prophet, and St. Cyril of Constantinople in 1399; St. Albert in 1411; St. Angerel in 1436; Our Lady of the Present from 1440; the Feast of the order at Brussels in 1490, a number of territorial feasts were introduced into the order, such as St. Joseph, the Ten Thousand Martyrs, the Division of the Apostles. The rapit of St. Elis (17 June) is first to be found in the second half of the fifteenth century in England and Germany; the feast of the Prophet (20 July) dates at the earliest from 1551. Some general chapters, especially those of 1478 and 1564, added whole lists of saints, partly of real or supposed saints of the order, partly of martyrs whose bodies were preserved in various churches belonging to the order, particularly in San Martino a Monti in Rome. The revision of 1584 reduced the Sancitorale to the smallest possible dimensions, but many feasts then suppressed were afterwards reintroduced.

A word must be added about the singing. The Ordinal of 1312 allows fausbourdon, at least on solemn occasions; organs and organists are mentioned with ever-increasing frequency from the first years of the fifteenth century, the earliest notice being that of Mathias Johannis de Luca, who in 1410 was elected organist at Florence; the organ itself was a gift of Johannes Domini Bonnani, surnamed Clerichinus, who died at an advanced age on 24 Oct., 1416.

Benedict Zimmermann, Le Rituale di Molentur. De Rebus in Chrusi de anu. 30, 9-5; IX ini Ordo Ordinis de Notre-Dame du Mon Cornal (Paris, 1819), being the thirteenth volume of Bibliographia liturgica; Wassenaer, Ritus Ordinis in Analecta Ordinis Carmelitarum (Rome, 1899); Walser, Der Psalm in der Predigt (Leipzig, 1896). The following is the Ordinal, now in Dublin but of English origin, written about 1565 and before the publication of the Constitution of Boniface VIII. "Cum sancto C. Glorioso, in sancta Maria, in sancta B. Maria, sancta Magdalene, sancta Agatha, sancta Barbara, sancta Maria de Nepomuceno" has not yet been printed.

Cistercian Rite.—This rite is to be found in the liturgical books of the order. The collection, composed of fifteen books, was made by the General Chapter of Citeaux, most probably in 1134; they are now included in the Missal, Breviary, Ritual, and canons. When Pius V ordered the entire Church to conform to the Roman Missal and Breviary, he exempted the Cistercians from this law, because their rite had been more than 400 years in existence. Under Claude Vauisin, General of the Cistercians (in the middle of the seventeenth century), several reforms were made in the liturgical books of the order, and were approved by Alexander VII, Clement IX, and Clement XIII. These approbations were confirmed by Pius IX on 7 Feb., 1871, for the Cistercians of the Common as well as for those of the Strict Observance. The Breviary is quite different from the Roman, as it follows exactly the prescriptive of the Rule of St. Benedict, with minor additions. St. Benedict wished the entire Psalter recited each week; twelve psalms are to be said at Matins when there are but two Nocturns; when there is a third Nocturn, it is to be composed of three divisions of a canticum, there being in this law of the Breviary, there being twelve psalms, of which the divisions of psalms are appointed for Prime, the Little Hours, and Compline. In this latter hour the "Nunc dimittis" is never said), and always four psalms for Vespers. Many minor divisions and directions are given in St. Benedict’s Rule.

In the old missal, before the reform of Claude Vauisin, there were wide divergences between the Cistercian and Roman rites. The preface "Judicium" was not said, but in its stead was recited the "Veni Creator"; the "Indulgentiam" was followed by the "Pater" and the "Ave", and the "Oramus te Domine" was omitted in kissing the altar. After the "Pax Domini a semper vobiscum", the "Agnus Dei" was repeated thrice, and the Presentation from 1 was followed by the "Sacrosancta committern corporis", said by the priest while placing the small fragment of the Sacred Host in the chalice; then the "Domine Jesu Christe, Fili Dei Vivi" was said, but the "Corpus Tuum" and "Quod ore sumpsit" were omitted. The priest wore the "Placenta" on his head and then "Mellitus et precibus istorum et omnium sanctorum Suorum miseratur nostri Omnipotens Dominus. Amen", while kissing the altar; with the sign of the Cross the Mass was ended. Outside of some minor exceptions in the wording and conclusions of various prayers, the other parts of the Mass were the same as in the Roman Rite. Also in some Masses of the year the ordo was different; for instance, on Palm Sunday the Passion was only said at the high Mass, at the other Masses a special gospel only being said. However, since the time of Claude Vauisin the differences from the Roman Mass are rare.

In the calendar there are relatively few feasts of saints or other modern feasts, as none were introduced except those especially prescribed by Rome for the Cistercian Order; this was done in order to adhere as closely as possible to the spirit of St. Benedict in preserving the weekly recitation of the Psalter. The divisions of the feasts are: major or minor feast of sermon; major or minor feast of two Masses; feast of twelve lessons and Mass; feast of three lessons and Mass; feast of commemoration and Mass; then merely a commemoration; and finally the feria.

The differences in the ritual are very small. As regards the last sacraments, Extreme Unction is given before the Holy Viaticum, and in Extreme Unction the word "Peccati" is used instead of the "Deliquisti" in the Roman Ritual. In the Sacrament of Penance a shorter form of absolution may be used in ordinary confessions.

Cistercian Ceremonies.—These were for a long time the only ceremonies observed in the Cistercian Order. They were the only ceremonies observed in the Cistercian Order. They were the only ceremonies observed in the Cistercian Order.

Dominican Rite, a name denoting the distinctive ceremonies embodied in the privileged liturgical books of the Order of Preachers. (a) Origin and development.—The question of a special unified rite for the order received no official attention in the time of St. Dominic; each province sharing in the general liturgical diversities prevalent throughout the Church at the time of the order’s confirmation (1216). Hence, each province and often each convent had certain peculiarities in the text and in the ceremonies of the Holy Sacrifice and the recitation of the Office. The successors of St. Dominic were quick to recognize the importance of conformity, not only by the conservatives but among themselves in an effort to eliminate the embarrassing distinctions. They maintained that the safety of a basic principle of community life—unity of prayer and worship—was endangered by this conformity with different diocesan customs. This belief was impressed upon the faithful by the conviction that these liturgical diversities occasioned at the general chapters of the order where brothers from every province were assembled.

The first indication of an effort to regulate liturgical conditions was manifested by Jordan of Saxony, the
successor of St. Dominic. In the Constitutions (1228) ascribed to him are found several rubrics for the recitation of the Office. These insist more on the attention with which the Office should be said than on the question of the liturgical books. However, it is said that Jordan took it as his task to revise the books and compiled one Office for universal use. Though this is doubtful, it is certain that his efforts were of little practical value, for the Chapters of Bologna (1240) and Paris (1241) allowed each convent to conform to the local rites. The first systematic attempt at reform was made under the direction of John the Teuton, the fourth master general of the order. At his suggestion the Chapter of Bologna (1244) asked the delegates to bring to the next chapter (Cologne, 1245) their special rubrics for the recitation of the Office, their Missals, Graduals, and Antiphonaries, "pro concordando officio". To bring some kind of order out of chaos a commission was appointed consisting of four members, one each from the Provinces of France, England, Lombardy, and Germany, to carry out the revision at Angers. They brought the result of their labours to the Chapter of Paris (1245). A papal Bull, a responds, ordered its exclusive use by the whole Order. This same chapter approved the "Lectionary" which had been entrusted to Humbert of Romans for revision. The work of the commission was again approved by the Chapters of Montepulciano (1247) and Paris (1248). But, after the death of Jordan, and with the dissolution of the commission, the rubrics fell back on all sides, especially with their interpretation of the rubrics. They had been hurried in their work, and had left too much latitude for local customs. The question was reopened and the Chapter of London (1250) asked the commission to reassemble at Metz and revise their work in the light of the criticisms that had been made; the result of this revision was approved at the Chapters of Metz (1251) and Bologna (1252) and its use made obligatory for the whole order. It was also ordained that one copy of the liturgical books should be placed at Paris and one at Bologna, from which the books for the other convents should be faithfully copied. However, it was recognized that these books were not entirely perfect, and that there was room for further revision. Though this work was done under the direction of John the Teuton, the brunt of the revision fell to the lot of Humbert of Romans, then provincial of the Paris Province. In 1254, a responds was issued by the Chapter of Buda (1254) and was asked to direct his attention to the question of the order's liturgical books. He subjected each of them to a thorough revision, and after two years submitted his work to the Chapter of Paris (1256). This and several subsequent chapters endorsed the work, effecting legislation against corruption, constitutionally recognized the authorship of Humbert, and thus once and for all settled a common rite for the Order of Preachers throughout the world.

(b) Preservation. Clement IV, through the general of the order, Humbert of Romans, issued a Bull in 1267 in which he lauded the ability and zeal of Humbert and forbade the making of any changes without the proper authorization. Subsequent papal regulation went much further towards preserving the integrity of the rite. Innocent XI and Clement XII prohibited the printing of the books without the permission of the master general and also ordained that no member of the order should presume to use in his fulfilment of the choral obligation any book not bearing the seal of the general and a reprint of the pontifical Decrees. Another force preservative of the special Dominican Rite was the Liturgy, or the Missal. The Missal of the universal Church but excepting those rites which had been approved for two hundred years. This exception gave to the Order of Friars Preachers the privilege of maintaining its old rite, a privilege which the chapters of the order sanctioned and which the members of the order gratefully accepted. It must not be thought that the rite has come down through the ages absolutely without change. Some slight corruptions crept in despite the rigid legislation to the contrary. The opening to the public of the permission of the Roman Pontiffs and many new editions of the liturgical books have been printed. Changes in the text, when they have been made, have always been effected with the idea of eliminating arbitrary mutilations and restoring the books to a perfect conformity with the old exemplars at Paris and Bologna. Such were the reforms of the Chapters of Salamanca (1551), Rome (1777), and Ghent (1871). Several times movements have been started with the idea of conforming with the Roman Rite; but these have always been defeated, and the order still stands in possession of the rite conceded to it by Pope Clement in 1267.

(c) Sources of the rite.—To determine the sources of the Dominican Rite is to come face to face with the hase and uncertainty that seems to shroud most liturgical history. The thirteenth century knew no unified Roman Rite. While the basis of the usages of the North-western Rite was a Gregorian Sacramentary sent by Adrian IV to Charlemagne, each little locality had its own peculiar distinctions. At the time of the unification of the Dominican Rite most of the convents of the order were embraced within the territory in which the old Gallican Rite had obtained its claim to be called the Gallican-Roman Rite then prevailed. Jordan of Saxony, the pioneer in liturgical reform within the order, greatly admired the Rite of the Church of Paris and frequently assisted at the recitations of the Office at Notre-Dame. Humbert of Romans, who played so important a part in the work of unification, was the provincial of the French Province. These facts justify the opinion that the basis of the Dominican Rite was the typical Gallican Rite of the thirteenth century. But documentary evidence that the rite was adapted from any one locality is lacking. The chronicles of the order state merely that the rite is neither the pure Roman nor the pure Gallican, but based on the Roman usage of the thirteenth century, with additions from the Rites of Paris and other places in which the order existed. Just from where these additions were obtained and exactly what they were cannot be determined, except in a general way from an examination of other liturgies.

Two points must be emphasized here: (1) the Dominican Rite is not an arbitrary elaboration of the Roman Rite made against the spirit of the Church or to give the order an air of exclusiveness, nor can it be said to be more gallicanized then any use of the Gallican-Roman Rite of that period. It was an honest and sincere attempt to harmonize and simplify the widely divergent usages of the early half of the thirteenth century. (2) The Dominican Rite, formulated by Humbert, saw no radical development after its confirmation by Clement IV. When Pius X revised his reform, the Dominican Rite remained fixed and stable for over three hundred years, while a constant liturgical change had been taking place in other communities. Furthermore, the comparative simplicity of the Dominican Rite, as manifested in the different liturgical books, gives evidence of its antiquity.

(d) Liturgical books.—The rite compiled by Humbert contained fourteen books: (1) the Ordinary, which was a sort of an index to the Divine Office, the Psalms, Lessons, Antiphons, and Chapters being indicated by their first words. (2) The Martyrology, an amplified calendar of martyrs and other saints. (3) The Collectarium, or for the Mass, the Ordinarium, or for the Mass, the Common or the Mass. (4) The homodidanian, which contained the texts and the notes for the prayers, chapters, and blessings. (5) The Processional, containing the hymns (text and music) for the processions. (6) The Psalterium, con-
taining merely the Psalter. (6) The Lectionary, which contained the Sunday homilies, the lessons from Sacred Scripture and the lives of the saints. (7) The Order of Mass, and the Offici: (11) The Book of Gospels. (12) The Pulpitary, which contained the musical notation for the Gloria Patri, the Invitatory, Litanies, Tracts, and the Alleluia. (13) The Missal for a private Mass. (14) The Breviary, a compilation from all the books used in the choral recitation of the Office, very much reduced in size for the convenience of travellers.

By a process of elimination and synthesis undergone also by the books of the Roman Rite many of the books of Humbert have become superfluous while several others have been formed. These add nothing to the original text, but merely provide for the convenience of the reader and are consistent with the recitation of the Office. The collection of the liturgical books now contains: (1) Martyrology; (2) Collectarion; (3) Processional; (4) Antiphonary; (5) Gradual; (6) Missal for the conventual Mass; (7) Missal for the private Mass; (8) Breviary; (9) Vesperal; (10) Divine Office; (11) Ceremonial. The contents of these books follow closely the books of the same name issued by Humbert and which have just been described. The new ones are: (1) the Horae Diurnae; (2) the Vespertal (with notes), adaptations from the Breviary and the Antiphonary respectively. (3) the Collectarion, which is a compilation from all the rubrics scattered throughout the other books. With the exception of the Breviary, these books are similar in arrangement to the correspondingly named books of the Roman Rite. The Dominican Breviary is divided into two parts: Part I, Advent to Trinity; Part II, Trinity to Advent.

(c) Distinctive marks of the Dominican Rite,—Only the most striking differences between the Dominican Rite and the Roman Rite need be mentioned here. The most important is the manner of celebrating a low Mass. The celebrant in the Dominicans keeps his head uncovered during the beginning of Mass, and prepares the chalice as soon as he reaches the altar. The Psalm "Judica me Deus" is not said and the Confitore, much shorter than the Roman, contains the name of St. Dominic. The Gloria and the Credo are begun at the centre of the altar. Further, there is a simultaneous oblation of the Host and the chalice and only one prayer, the "Susipe Sancta Trinitas". The Canon of the Mass is the same as the Canon of the Roman Rite, but after it are several noticeable differences. The Dominican celebrant says the "Agnus Dei" immediately after the "Pax Domini" and then recites three prayers, "Hec sacrosancta commixtio", "Domine Jesu Christe", and "Corpus et sanguis"; then follows the Communion, the priest receiving the Host from his left hand. No prayers are said at the consummation of the Precious Blood, the first prayer after the "Corpus et sanguis" being the Communion. These are the most noticeable differences in the celebration of a low Mass.

In a solemn Mass the chalice is prepared just after the celebrant has read the Gospel, seated at the Epistle side of the sanctuary. The chalice is brought from a side altar or the place and the celebrant is seated by a sub-deacon, who pours the wine and water into it and replaces it on the altar.

The Dominican Breviary differs but slightly from the Roman. The Offices are celebrated as of seven classes: of the season (de tempor). of saints (de sanctis), of vigils, of octave, votive Offices, Office of the Blessed Virgin, and Office of the Dead. In point of dignity the feasts are classified as "totum duplex", "duplex", "simplex", "of three lessons", and "of four lessons". Each class is equivalent to the Roman greater double. A "totum duplex" with an ordinary octave (a simple or a solemn octave) is equal to the second-class double of the Roman Rite, and a "totum duplex" with a most solemn octave is like the Roman first-class double. A "simplex" is equivalent to the lesser double and the "simplex" to the semi-double. There is no difference in the ordering of the canonical hours, except that all during Paschal time the Dominicans Matins provide for only three psalms and three lessons instead of the customary nine psalms and nine lessons. The Office of the Blessed Virgin must be said on all days on which feasts of the first class or "totum duplex" are not celebrated. The Gradual psalms must be said on all Saturdays on which is said the votive Office of the Blessed Virgin. The Office of the Dead must be said once a week except during the week following Easter and the week following Pentecost. Other minor points of difference are the manner of making the commemorations, the text of the hymns, the Antiphons, the lessons of the common Offices and the insertions of special feasts of the order. There is no great distinction between the musical notation of the Dominican Gradual, Vesperal, and Antiphonary and the corresponding books of the new Vatican edition. The Dominican chant has been faithfully copied from the MSS. of the thirteenth century, which were in turn derived indirectly from the Gregorian Sacramentary.

One is not surprised therefore at the remarkable similarity between the chant of the two rites. For a more detailed study of the Dominican Rite reference may be had to the order's liturgical books.

IGNATIUS SMITH.

FRANCISCAN RITE.—The Franciscans, unlike the Dominicans, Carmelites, and other orders, have never had a peculiar rite properly so called, but, conformably to the mind of St. Francis of Assisi, have always followed the Roman Rite for the celebration of Mass. However, the Friars Minor and the Capuchins wear the amice, instead of the biretta, over the head, and Mass is celebrated at the centre of the altar. Offeries are said during the celebration by the sub-deacon, who pours the wine and water into the chalice and replaces it on the altar. They also observe their own peculiar form of the father's blessing, the blessing being said only in the churches of the First Order, but also in the churches and chapels of the Second Order, and Third Order Regular (if aggregated to the First Order) and Secular, as well as those religious institutes which have had some connexion with the parent body. It may also be used by secular priests
RITES

or clerics who are members of the Third Order. The order has also its own ritual and ceremonial for its receipts, professions, etc.

Ceremon. Romano-Seraph. (Quaracchi, 1808); Ritu. Romano-Seraph. (Quaracchi, 1910); Promissorium Seraph. (Quaracchi, 1910).

FERDINAND HECKMANN.

Franciscan Minor Capuchin Rite.—The Franciscan Minor Capuchin uses the Roman Rite, except that in the Constitutions the name of their founder, St. Francis, is added after the name of the Apostles, and in the suffrages they make commemorations of St. Francis and all saints of their order. The use of incense in the conventual mass on certain solemnities, even though the Mass is said and not sung, is another liturgical custom (recently sanctioned by the Holy See) due to the manner of life of the Capuchins. Generally speaking, the Capuchins do not have sung Masses except in parochial churches, and except in these churches they may not have organs without the minster general’s permission. By a Decree of the Sacred Congregation of Rites, 14 May, 1890, the minister general, when celebrating Mass at the time of the devotional visitation and on solemnities, has the privileges of a domestic prelate of His Holiness. In regard to the Divine Office, the Capuchins do not sing it according to note but recite it in monotone. In the larger communities they generally recite Matins and Lauds at midnight, except on the last days of Holy Week, when Tenebrae is chanted on the preceding evening, and during the octaves of Corpus Christi and the Immaculate Conception of the Blessed Virgin Mary, when matins are recited also on the preceding evening with the Blessed Sacrament exposed. Every day after Complin they add extra-liturgical commemoration of the Immaculate Conception, St. Francis, and St. Anthony of Padua. On the feast of St. Francis after second Vespers they observe the service called the “Transitus” of St. Francis, and on all Saturdays, except feasts of first and second class and certain privileged feasts and octaves, all Masses said in their churches are votive in honour of the Immaculate Conception, excepting only the conventual Mass. They follow the universal calendar, with the addition of feasts proper to their order. These additional feasts include all canonized saints of the whole Franciscan order, all beatified, and the more notable beatitudes of the order; and every year the 5th of October is observed as a commemoration of the departed members of the order in the same way as the 2nd of November is observed in the universal Church. Owing to the great number of feasts, the Capuchins had the privilege of transferring the greater feasts, when necessary, to days marked semi-double. According to the ancient Constitutions of the Order, the Capuchins were not allowed to use vestments of rich texture, not even of silk, but by Decree of the Sacred Congregation of Rites, 17 December, 1888, they must now conform to the general laws of the Church in this matter. They are, however, still obliged to maintain severe simplicity in their churches, especially when non-parochial.

FATHER CUTHBERT.

Premonstratensian Rite.—The Norbertine rite differs from the Roman in the celebration of the Sacrifice of the Mass, in the Divine Office, and in the adoration of the Blessed Sacrament.

Sacrifice of the Mass.—The Missal is proper to the order and is not arranged like the Roman Missal. The canon is identical, with the exception of a slight variation as to the time of making the sign of the cross with the paten at the “Liberam nos.” The music for the Prayers etc., differs, though not considerably, from that of the Roman Missal. Two alleluias are said after the “Ite missa est,” even after Easter; for the whole of the remaining Passion time one alleluia is said. The rite for the celebration of feasts gives the following grades: three classes of triplies, two of doubles, celestes, nine lessons, three lessons. No feasts are celebrated during privileged octaves. There are so many feasts lower than double that usually no privilege is needed for votive Masses. The rubrics regulating the variation of the time of the year are given in the “Ordination seu liber ceremoniarum canonici ordinis Premonstratensiae.” Rubrics for the special liturgical functions are found in the Missal, the Breviary, the Diurnal, the Processional, the Gradual, and the Antiphonary.

Divine Office.—The Office is taken from the Roman Breviary in its calendar, the manner of reciting it, arrangement of matter. Some saints on the Roman calendar are omitted. The feasts peculiar to the Norbertines are: St. Godfried, C., 16 Jan.; St. Evermodus, B. C., 17 Feb.; Bl. Frederick, Abbots, 3 Mar.; St. Ludolph, B. M., 29 Mar.; Bl. Herman Joseph, C., 7 Apr.; St. Isidrid, B. C., 15 June; Sts. Adrian and James, M.M., 9 July; Bl. Hrosnota, M., 19 July; Bl. Gertrude, V., 13 Aug.; Bl. Bronislaw, V., 30 Aug.; St. Gilbert, Abbots, 24 Oct.; Sts. Siardus, Abbots, 17 Nov. The feast of St. Norbert, founder of the order, is taken from the Roman calendar, is permanently transferred to 11 July, so that its solemn rite may not be interfered with by the feasts of Pentecost and Corpus Christi. Other feasts are the Triumph of St. Norbert over the sacramentarian heresy of Tanchellin, on the third Sunday after Pentecost, and the Translation of St. Norbert commemorating the translation of his body from Magdeburg to Prague, on the fourth Sunday after Easter. Besides the daily recitation of the canonical hours the Norbertines are obliged to say the Little Office of the Blessed Virgin, except on privileged feasts. In their choir this is said immediately after the Divine Office. (3) Administration of the Sacrament of Penance.—The form of absolution is not altogether in harmony with that of the Roman Ritual. The following is the Norbertine formula: “Dominus nositer Jesus Christus te absolvat, et ego auitoritate ipsius, mini licent indicissimo concors, ab eo in primis, vicio excommunicationis ... in quan tum possem et indigas,” etc.

The liturgical books of the Norbertines were reprinted by order of the general chapter, held at Prémontré, in 1738, and presided over by Claude H. Lums, abbot-general. The new edition was approved and the Breviary was issued after the General Chapter of Prague, in 1890. In 1902 a committee was appointed to revise the Gradual, Antiphonary, etc. This committee received much encouragement in its work by the Motu Proprio of Pius X on church music. The General Chapter of Tepl, Austria, in 1908, decided to edit the musical books of the order as prepared, in accordance with ancient MSS. by this committee.

G. RYBROOK.

Servite Rite.—The Order of Servites (see Servants of Mary) cannot be said to possess a separate or exclusive rite similar to the Dominicans and others, but follows the Roman Ritual, as provided in its constitutions, with very slight variations. Devotion towards the Mother of Sorrows being the principal distinctive characteristic of the order, there are special prayers and processions attaching to the solemn celebration of the five major Marian feasts, namely, the Annunciation, Visitation, Assumption, Presentation, and Nativity of our Blessed Lady. The feast of the Seven Dolours of the Blessed Virgin Mary, celebrated always on the Third Sunday of September, has a privileged octave which is enriched with a plenary indulgence ad instant Por-
tiuncula; that is, as often as a visit is made to a church of the order. In common with all friars theervite
priests wear an amice on the head instead of a biretta
while proceeding to and from the altar. The Mass
is begun with the first part of the Angelical Salutation,
and in the Confeiteor the words Septem beatit patribus nostris are inserted. At the conclusion of Mass the
Salve Regina and the oration Omnipotens sempiterni
Dei. In the recitation of the Office each canonical hour is begun with the Ave Maria down to the words ventris tui, Jesus.
The custom of reciting daily, immediately before Vespers,
a special prayer called Vigilia, composed of the three
psalms and three antiphons of the first nocturn of the
Office of the Blessed Virgin, followed by three lesser
antiphons, comes down from the thirteenth century, when they were offered in thanksgiving for
a special favour bestowed upon the order by Pope
Alexander IV (13 May, 1259). The Salve Regina
is daily chanted in choir whether or not it is the antiphon proper to the season.
F. J. GRIFFIN.

Rites, Congregation of. See Roman Congregations.

Rites in the United States.—Since immigration from the
eastern portion of Europe and from Asia and
Africa set in with such volume, the peoples who
belonged to the various national churches which had
entered the unity of the Church (follow the various Eastern rites arrived in the
United States in large numbers, bringing with
them their priests and their forms of worship.
As they grew in number and financial strength, they
erected churches in the various cities and towns
throughout the country. Rome used to be considered
the city where the various rites of the Church throughout
the world could be seen grouped together, but in the
United States they may be observed to a greater
advantage than even in Rome. In Rome the various
rites are kept alive for the purpose of educating the
various national clergy who study there, and for
proclaiming the unity of the Church, but there is no
body of laymen who follow those rites; in the United
States, on the contrary, it is the number and pressure of
the laity which have caused the establishment and
support of the churches of the various rites. There is
consequently no better field for studying the various
rites of the Church than in the chief cities of the
United States, and such study has the advantage to
the exact observer of affording an opportunity of
comparing the dissident churches of those rites with
those which belong to Catholic unity. The chief
rites which have become established are these: (1) Armenian, (2) Greek or Byzantine, and (3) Syro-Maronite. There are also a handful of adherents of the Coptic, Syrian, and Chaldean rites, which will also be noticed, and there are occasionally
priests of the various Latin rites.

I. The Armenian Rite.—This rite alone, of all
the rites in the Church, is confined to one people, one
language, and one alphabet. It is, if anything, more
exclusive than Judaism of old. Other rites are more
widely extended in every way: the Roman Rite is
spread throughout Latin, Teutonic, and Slavic
people, and it even has two languages, the Latin and
the Ancient Slavonic, and two alphabets, the Roman
and the Glagolitic, in which its ritual is written; the
Greek or Byzantine Rite extends among Greek,
Slavic, Latin, and Syrian peoples, and its services are
celebrated in Greek, Slavonic, Rumanian, and Arabic
with service-books in the Greek, Cyrillic, Latin, and
Arabic scripts. But the most exclusive of all the
Catholic or Gregorian, is confined exclusively to
persons of the Armenian race, and employs the ancient
Armenian language and alphabet. The history and
origin of the race have been given in the article
Armenian, but a word may be said of the language (Hayk, as it is called), and its use in the liturgy. The major-
ity of the Armenians were converted to Christianity
by St. Gregory the Illuminator, a man of noble
family, who was the Bishop of Armenia (see GREGORY THE ILLUMINATOR). So thoroughly
has his work effected that Armenia alone of the ancient
nations converted to Christianity has preserved no
pagan literature antedating the Christian literature
of the people; pagan works, if they ever existed, seem
ever to have perished in the turmoil of the Armenians for
Christian thought and expression. The memory of
St. Gregory is so revered that the Armenians who are
opposed to union with the Holy See take pride in
calling themselves "Gregorians," implying that they keep the faith taught by St. Gregory. Hence it is
usual to call the dissidents "Gregorians," in order to
differentiate them from the Roman Church. The
language of the Christian liturgy in Armenia was
Syriac, but later they discarded it for their own tongue,
and translated all the services into Armenian, which
was at first written in Syriac or Persian letters.
About 400 St. Mesrob invented the present Armenian alphabet (except two final letters which were added
in the year 1200), and their language, both ancient
and modern, has been written in that alphabet ever
since. Mesrob also translated the New Testament
into Armenian and revised the entire liturgy. The
Armenians in their church life have led almost as
independent a life as the Gallican people in the
Christian empire. At first they were in full communion
with the Universal Church. They were bitterly opposed to
Nestorianism, and, when in 451 the Council of
Chalcedon condemned the doctrine of Eutyches, they
seceded, holding the opinion that such a definition was
sanctioning Nestorianism, and have since remained
separated from and hostile to the Greek Church of
Constantinople. In 1054 the Greeks seceded in turn
from unity with the Roman Church, and nearly three
centuries later the Armenians became reconciled with
Rome, but the union lasted only a brief period.
Breaking away from unity with Rome, they formed a
national church which agrees neither with the Greek
nor the Roman Church; a minority, recruited by
conversion to union with the Holy See in the seventeenth
century, remained united Armenian Catholics.

The Mass and the whole liturgy of the Armenian
Church is said in Armenia, and is considerably from the modern tongue. The
language is a product of the Iranian branch of the Indo-
Aryan family of languages, and probably found
earliest written expression in the cuneiform
inscriptions; it is like the Semitic languages impure.
Armenian possesses twelve regular declensions and eight irregular
declensions of nouns and five conjugations of
verbs, while there are many difficulties in the way of
postpositions and the like. It abounds in consonants
guttural sounds; the words of the Lord's Prayer
in Armenian will suffice as an example: "Hair mier,
vor herhins ies surp isgits anun ko, ieghast
arkautun ko, iegitsin garrk ko, vorbes herhins ies herhri, zhats mier hanaboszt dur mier aissor, iev tog
mier ezbardis mier, vorbes iem tog ezmink merotos bardbasanetz, iev mi danir zmzeri porsurtun, alliperga i chare." The language is written from left to right,
like Greek, Latin, or English, but in an alphabet of
thirty-eight peculiar letters which are dissimilar in
form to anything in the Greek or Latin alphabet, and
are arranged in a most perplexing order. For instance,
the Armenian alphabet starts off with a, p, k, t, c, etc., and ends up with the letter I. It may also
be noted that the rite itself differs, having five
sonantal values of most of the ordinary sounds in
Christian names; thus George becomes Kevork;
Sergius, Sarkis; Jacob, Hagop; Joseph, Hovsep;
Gregory, Krikori; Peter, Bedros, and so on. The
usual claus addition of the word "son" (Ian) to most
Armenian family names, something like the use of
mac in the Greek languages, renders usual Armenian name easy of identification (e.g., Azarian, Hagopian, Rubian, Zohrabian, etc.).

The book containing the regulations for the administration of the sacraments, analogous to the Greek Euchologion or the Roman Ritual, is called the "Maahdota," after the name of its compiler St. Macarius of Jerusalem. Upon the death of St. Macarius, his friend, the Archimandrite Sarge Zohrabian, was appointed to his place and compiled the five great liturgical books used in the Armenian Church: (1) the Breviary (Zhamakir) or Book of Hours; (2) The Directory (Tzatsak) or Calendar, containing the fixed festivals of the year; (3) The Liturgy (Patarasagakir) or Missal, arranged and enriched also by James the Simeon, who compiled the Book of Hymns (Dagararan), arranged for the principal great feasts of the year; (5) The Ritual or "Maahdota," mentioned above. A peculiarity about the Armenian Church is that the majority of great feasts falling upon weekdays are celebrated on the Sunday immediately following. The great festivals of the Christian year are divided by the Armenians into five classes: (1) Easter; (2) feasts which fall on Sunday, such as Palm Sunday, Pentecost, etc.; (3) feasts which are observed on the days on which they occur: the Nativity, Epiphany, Circumcision, Presentation, and Annunciation of the Virgin, which are celebrated on the following Sunday: Transfiguration, Immaculate Conception, Nativity B. V. M., Assumption, Holy Cross, feasts of the Apostles, etc.; (5) other feasts, which are not observed at all unless they can be transferred to Sunday. The Gregorian Armenians observe the Nativity, Epiphany, and Baptism of Our Lord on the same day (6 January), but the Catholic Armenians observe Christmas on 25 December and the Epiphany on 6 January, and they observe many of the other feasts of Our Lord on the days on which they actually fall. The principal feasts are: (1) Lent; (2) the Fast of Nineveh in March, the Fast of Maahdota—in reality a remnant of the ancient Lenten fast, now commemorated only in name by our Septuagesima, Sexagesima, and Quinquagesima Sundays; (3) the week following Pentecost. The days of abstinence are the Wednesdays and Fridays throughout the year with certain exceptions (e.g., during the week after the Nativity, Easter, and the Assumption). In the Armenian Church Saturday is observed as the Sabbath, commemorating the Old Law and the creation of man, and Sunday as the Lord's Day of Resurrection and rejoicing, commemorating the New Law and the redemption of man. Many of the days of the week are not observed in the Catholic Church, or saints not commemorated in other lands, but the Armenian Catholics in Galicia and Transylvania use the Gregorian (not the Julian) Calendar, and have many Roman saints' days and feasts added to their ancient ecclesiastical year.

In the actual arrangement of the church building for worship the Armenian Rite differs both from the Greek and the Latin. While the Armenian Church was in communion with Rome, it seems to have united many Roman practices in its ritual with those that were in accord with the Greek or Byzantine forms. The church building may be divided into the sanctuary and church proper (choir and nave). The sanctuary is a platform raised above the general level of the church and reached by four or more steps. The altar is always erected in the middle of it, and it is again a few steps higher than the level of the sanctuary. It is a square and of ashlar masonry. It is always a double altar—screen or iconostasis, like that of the Greek churches, but it has long since disappeared. Still they do not use the open altar like the Latin Church. Two curtains are hung before the sanctuary: a large double curtain hangs before its entrance, except in church, to conceal the chancel rail, and is so drawn as to conceal the altar, the priest, and the deacons at certain parts of the Mass; the second and smaller curtain is used merely to separate the priest from the deacons and to cover the altar after service. Each curtain opens on both sides, and ordinarily is drawn back from the middle. The second curtain is not much used. The use of these curtains is ascribed to the year 340, when they were required by a canon formulated by Bishop Macarius of Jerusalem. Upon the reading of the Bible and compiled the Book of Gospels, a cross upon which the image of Our Lord is painted or engraved in low relief, and two or more candles, which are lighted as in the Roman use. The Blessed Sacrament is usually reserved in a tabernacle on the altar, and a small lamp kept burning there at all times. In the altar upon which he is exposed within a low iron railing, the singers and priests stand in lines while singing or reciting the Office. In the East, the worshipper, upon entering the nave of the church, usually takes off his shoes, just as the Mohammedans do, for the Armenian founds this practice upon Ex., iii, 5; this custom is not followed in the United States, nor do the Armenians there sit cross-legged upon the floor in their churches, as they do in Asia.

The administration of the sacraments is marked by some ceremonies unlike those of the Roman or Greek Churches, and by some which are a composite element of both. Holy Baptism, for instance, meets the child carried in the arms of the nurse at the church door, and, while reciting Psalms lii and xxx, takes two threads (one white and the other red) and twists them into a cord, which he afterwards blesses. Usually the godfather goes to confession before the baptism, in order that he may fulfill his duties in the state of grace. The exorcisms and renunciations then take place, and the recital of the Nicene Creed and the answers to the responses follow. The baptismal water is blessed, the anointing with oil performed, the prayers for the catechumen to be baptized are said before the priest hands over the child to the priest. The priest takes the child and holds it in the font so that the body is in the water, but the head is out, and the baptism takes place in this manner: "N., the servant of God coming into the state of a catechumen and thence to that of baptism, is now baptized by me, in the name of the Father here he pours a handful of water on the head of the child, and of the Son [here he pours water as before], and of the Holy Ghost [here he pours a third handful]." After this the priest dips the child thrice under the water, saying on each occasion: "Thou art redeemed by the blood of Christ from the bondage of sin, by receiving the liberty of salvation and becoming a co-heir with Christ and a temple of the Holy Ghost. Amen." Then the child is washed and clothed again, generally with a new and beautiful robe, and the priest when washing the child says: "Ye that were baptized in Christ, have put on Christ, Alleluia. And ye that have been illuminated by God the Father, may the Holy Ghost rejoice in you. Alleluia." Then the passage of the Gospel of St. Matthew relating the baptism of Christ in the Jordan is read, and the rite thus completed.

The Sacrament of Confirmation is conferred by the priest immediately after baptism, although the Catholic Armenians sometimes reserve it for the bishop. The holy chrism is applied by the priest to the forehead, eyes, ears, nose, mouth, palms, heart, spine, and feet, each time with a reference to the seal of the Spirit. Finally, the priest lays his hands upon the man or woman and says: "Missal, child's forehead saying: "Pescos to thee, saved through God." When the confirmation is thus finished, the priest binds the child's forehead with the red and white string which he twisted at the beginning of the baptism, and fastens it at the end with a wooden cross. Then the priest gives the child a green and one white, to the godfather and has the child brought up to the altar where Communion is given.
to it by a small drop of the Sacred Blood, or, if it be not at the time of Mass, by taking the Blessed Sacrament from the Tabernacle and signing the mouth of the child with it in the form of the cross, saying in either case: "The plenitude of the Holy Ghost"; if the candidate be an adult, full Communion is administered, and there the confirmation is effected. The ceremony of baptism and the Sacrament of Penance is: "May the merciful God have mercy upon you and grant you the pardon of all your sins, both confessed and forgotten; and I by virtue of my order of priesthood and in the power granted by the Divine Command: Whosoever sins you remit on earth they are remitted in heaven; through that same word I absolve you from all participation in sin, by thought, word and deed, in the name of the Father, and of the Son, and of the Holy Ghost. And I again restore you to the sacraments of the Holy Church; whatsoever good you shall do, shall be counted to you for merit and for glory in the life to come. May the shedding of the blood of the Son of God, which He shed upon the cross and which delivered human nature from hell, deliver you from your sins. Amen." As a rule Armenians are expected to make their confession and communion on at least five times in the year: the so-called Dogmas, or appoints, of the Mass, Epiphany, Easter, Transfiguration, Assumption, and Exaltation of the Holy Cross. The first two festivals are obligatory, and, if an Armenian neglects his duty, he incurs excommunication. The Sacrament of Extreme Unction (or "Unction with Oil", as it is called) is supposed to be administered by a priest in the ancient form, but practically it is performed by a single priest on most occasions. The eyes, ears, nose, lips, hands, feet, and heart of the sick man are anointed, with this form: "I anoint thine eyes with holy oil, so that whatever sin thou mayst have committed, it shall not be found in thine eyes; and thy ears may be saved from the anointing of this oil, through the grace of our Lord Jesus Christ," and with a similar reference to the other members anointed.

The Divine Liturgy or Mass is of course the chief rite among the Armenians, whether Catholic or Gregorian, and it is celebrated with a form and ceremonial which partakes in a measure both of the Roman and Byzantine rites. As we have said, the curtains are used instead of the altar-rail or iconostasis of those rites, and the vestments are also peculiar. The Armenians, like the Latins, use unleavened bread; but this is in a wafer or in the form of a thin round wafer; the chalice is the altar incensed. Then the Introit of the day is sung, then the prayers corresponding to those of the first, second, and third antiphons of the Byzantine Rite, while the proper psalms are sung by the choir. Then the deacon intones "Preachum" (let us attend), and elevates the books of the gospels, which is incensed as he brings it to the altar, making the Little Entrance. The choir then sings the Trisagion (Holy God, Holy and Mighty, Holy and Immortal, have mercy on us) thrice. The Gregorians interpolate after "Holy and Immortal" some words descriptive of the feast, such as "the sun is manifest for us," or "who didst rise from the dead?", but this addition has been condemned at Rome as being a relic of the Patripassian heresy. During the Trisagion the Keshots is jingled in accompaniment. Then the Greek Ektenia or Litany is sung, and at its conclusion the reader reads the Prophecy, then the Exordium, and the Alleluia, and the Qui tollis. After this the Epistle is read, and there follows the gospel, which is the antiphon of the day read. At the end of each the choir responds Alleluia. Then the deacon announces "Orthos" (stand up) and, taking the Gospels, reads or intones the gospel of the day. Immediately afterwards, the Armenian form of the Nicene Creed is said or sung. It differs from the creed as read in the Roman Rite by the Greek Churches in that it has, "consubstantial with
the Father by whom all things were made in Heaven and in Earth, visible and invisible: who for us men and our salvation came down from Heaven, was incarnate and was made man and perfectly begotten through the Holy Ghost of the most Holy Virgin Mary; he assumed from her body, soul, and mind, and all that is human and godly, and is the Son of God; who in the person of his only-begotten Son, spake in the law, in the Prophets and the Holy Gospel, who descended into the Jordan, who preached him who was sent, and who dwelt in the Saints, and after concluding in the ordinary form adds the sentence: "The Lord have mercy upon us." Then, by the Council of Nices: "Those who say there was a time when the Son of God was not, or when the Holy Ghost was not: or that they were created out of nothing; or that the Son of God and the Holy Ghost are of another substance or that they are mutable; the Catholic and Apostolic church condemns." Then the Confession of St. Gregory is intoned aloud, and the Little Ektene sung. The kiss of peace is here given to the clergy. The deacon at its close dismisses the catechumens, and the choir sings the Hymn of the Great Entrance, when the bread and wine are solemnly brought to the altar. The Bishop and the celebrant receive the vessels to be before us. The Heavenly Powers invisible sing and proclaim with uninterrupted voice, Holy, Holy, Holy, Lord God of Hosts."

Here the curtains are drawn, and the priest takes off his crown (or the bishop his mitre). The priest incenses the holy gifts and again washes his hands, repeating Psalm cxvi as before. After the Salutations is sung, the catechumens are dismissed, and the Anaphora or Canon begins. The Preface is said secretly, only the concluding part being intoned to which the choir responds with the Sanctus. The preface follows with a collection of the Old and the New Law, not found in either Greek or Roman Rite: "Holy, Holy, Holy; Thou art in truth most Holy; who is there who can dare to describe by words thy bounties which flow down upon us without measure? For Thou didst protect and console our forefathers, when they had fallen in sin, by means of the prophets, the Law, the priesthood, and the offering of bullocks, showing forth that which was to come. And when at length He came, Thou didst tear in pieces the register of our sins, and didst bestow on us Thine Only Begotten Son, the debtor and the giver of our freedom: and by your death and Resurrection, and by the descent of the Holy Ghost, Eternal God, Eternal Father, the Priest and the Oblation for He is the distributor and is always distributed amongst us, without being exhausted. Being made man truly and not apparently, and by union without confusion, He was incarnate in the womb of the Virgin Mary, Mother of God, and journeyed through all the passions of human life, sin only excepted, and of His own free will walked to the cross, whereby He gave life to the world and wrought salvation for us." Then follow the actual words of consecration, which are intoned aloud. Then follow the Offering and the Exposition of the holy Host. In the Catholic form; the Gregorian is: "whereby Thou wilt make the bread when blessed truly the body of our Lord and Saviour Jesus Christ;" and the Catholic form: "whereby Thou hast made the bread when blessed truly the Body of our Lord and Saviour Jesus Christ." As there is actually no blessing or consecration after the Epiclesis the Catholic form represents the correct belief. Then come the prayers for the living and the dead, and an intoning by the deacons of the Commemoration of the Saints, in which nearly all the Armenian saints are mentioned. Then the deacon intones aloud the Ascription of Praise of the Father, the Son, and the Holy Ghost. Then the Song of the Divine Litany, the Office of the Sacrament of the Altar. After this comes a long Ektene or Litany, and then the Our Father is sung by the choir. The celebrant then elevates the consecrated Host, saying "Holy things for Holy Persons," and when the choir responds, he continues: "Let us taste in holiness the holy and honourable Body and Blood of our Lord and Saviour Jesus Christ who came down from heaven and is now distributed among us." Then the choir sings antiphons in honour of the sacrifice of the Body and Blood of Christ, which have been drawn. The priest kisses the sacred Victim, saying "I confess and I believe that Thou art Christ, the Son of God, who has borne the sins of the world." The Host is divided into three parts, one of which is placed in the chalice. The choir sing the communion antiphon as announcing the blessing of the Holy Spirit among the people. Then the communicants receive the Communion first, and then the choir and people. The little curtain is withdrawn when the Communion is given, and the great curtains are drawn back when the people come up for Communion.

After Communion, the priest puts on his crown (or the bishop his mitre), and the great curtains are again drawn. Thanksgiving prayers are said behind them, after which the great curtains are withdrawn once more, and the priest holding the book of gospels says the great prayer of peace, and blesses the people. Then the deacon proclaims "Orthi" (stand up) and the faithful receive the Resurrection and are always irrevocable, being the Gospel of St. John, I, sqq.: "In the beginning was the Word, etc.;" the only exception is from Easter to the eve of Pentecost, when they use the Gospel of St. John, xxi, 15-20: "So when they had dined, etc." Then the prayer for peace and the "Kyrie Eleison" (three times) are said, and the final benediction is given, and the priest retires from the altar. Whilst Psalm cxxxiv is recited or sung by the people, the blessed bread is distributed. The Catholic Armenians confine this latter rite to high festivals only. The chief editions of the Gregorian Armenian Missal are those with a commentary of the Old and the New Law, not found in either Greek or Roman Rite: "Holy, Holy, Holy; Thou art in truth most Holy; who is there who can dare to describe by words thy bounties which flow down upon us without measure? For Thou didst protect and console our forefathers, when they had fallen in sin, by means of the prophets, the Law, the priesthood, and the offering of bullocks, showing forth that which was to come. And when at length He came, Thou didst tear in pieces the register of our sins, and didst bestow on us Thine Only Begotten Son, the debtor and the giver of our freedom: and by your death and Resurrection, and by the descent of the Holy Ghost, Eternal God, Eternal Father, the Priest and the Oblation for He is the distributor and is always distributed amongst us, without being exhausted. Being made man truly and not apparently, and by union without confusion, He was incarnate in the womb of the Virgin Mary, Mother of God, and journeyed through all the passions of human life, sin only excepted, and of His own free will walked to the cross, whereby He gave life to the world and wrought salvation for us." Then follow the actual words of consecration, which are intoned aloud. Then follow the Offering and the Exposure of the holy Host. In the Catholic form; the Gregorian is: "whereby Thou wilt make the bread when blessed truly the body of our Lord and Saviour Jesus Christ;" and the Catholic form: "whereby Thou hast made the bread when blessed truly the Body of our Lord and Saviour Jesus Christ." As there is actually no blessing or consecration after the Epiclesis the Catholic form represents the correct belief. Then come the prayers for the living and the dead, and an intoning by the deacons of the Commemoration of the Saints, in which nearly all the Armenian saints are mentioned. Then the deacon intones aloud the Ascription of Praise of the Father, the Son, and the Holy Ghost. Then the Song of the Divine Litany, the Office of the Sacrament of the Altar. After this comes a long Ektene or Litany, and then the Our Father is sung by the choir. The celebrant then elevates the consecrated Host, saying "Holy things for Holy Persons," and when the choir responds, he continues: "Let us taste in holiness the holy and honourable Body and Blood of our Lord and Saviour Jesus Christ who came down from heaven and is now distributed among us." Then the choir sings antiphons in honour of the sacrifice of the Body and Blood of Christ, which have been drawn. The priest kisses the sacred Victim, saying "I confess and I believe that Thou art Christ, the Son of God, who has borne the sins of the world." The Host is divided into three parts, one of which is placed in the chalice. The choir sing the communion antiphon as announcing the blessing of the Holy Spirit among the people. Then the communicants receive the Communion first, and then the choir and people. The little curtain is withdrawn when the Communion is given, and the great curtains are drawn back when the people come up for Communion.

Armenian Catholics.—Armenians had come to the United States in small numbers prior to 1895. In that and the following year the Turkish massacres took place throughout Armenia and Asia Minor, and large numbers of Armenians emigrated to America. Among them were many Armenian Catholics, although these were not sufficiently numerous to organize in any religious and cultural activities like their Gregorian brethren. In 1898 Mgr Stephan Azarian (Stephen X), then Catholic Patriarch of Cilicia of the Armenians, who resided in Constantinople, entered into negotiations with Cardinal Ledochowski, Prefect of the Congregation of the Propaganda, and through him obtained the consent of Archbishop Corrigan of New York and Archbishop Williams of Boston for priests of the Armenian Rite to labour in their respective provinces for the Armenian Catholics who had come to this country. He sent as the first Armenian missionary the Very Reverend Archpriest Matius Mghnaghlazian, who had attended the Propaganda and the Armenian College, and arrived in the United States on Ascension Day, 11 May, 1899. He at first went to Boston where he assembled a small congregation of Armenian Catholics, and later proceeded to New York to look after the spiritual welfare of the Catholic Armenians in Manhattan and Brooklyn. He also established a mission station in Worcester, Massachusetts. In New York and Brooklyn the Catholics of the Armenian Rite are divided into those who speak Armenian and those who, coming from places outside of the historic Armenia, speak the Arabic language. At present this mission is stationed at St. Stephen's Church in East Twenty-Eighth Street, since large numbers of Armenians live in that vicinity, but has another congregation under...
his charge in Brooklyn. All these Catholic Armenians are too poor to build any church or chapel of their own, and use the basement portion of the Latin churches. Towards the end of 1906 another Armenian priest, Rev. Manuel Barsegian, commenced mission work in Paterson, New Jersey, and now attends mission stations throughout New England and New York. On June 9, 1906 Rev. Hovsep (Joseph) Keosassian settled in Lawrence, Massachusetts, and established a chapel in St. Mary's Church. He also ministers to the spiritual wants of the Armenian Catholics at Boston, Cambridge, East Watertown, Newton, Lynn, Chelsea, and Halifax, Massachusetts, Westfield, and Central Falls, Rhode Island; New Britain and Bridgeport, in Connecticut; Jersey City, and Jersey, New Jersey; and Philadelphia and Chicago. The number of Catholic Armenians in the United States is very small, being estimated at about 2000 to 2500 all told. So many of them reside among the other Armenians and frequent their churches, that there may be more who do not profess themselves Catholics, and purely Armenian churches would doubtless bring to light many whom the mission priests on their rounds do not reach.

Gregorian Armenians.—Inasmuch as Armenia was converted to the faith of St. Gregory the Illuminator, the Armenians who are not in union with the Holy See claim to have preserved the usage of the Church of the East, and therefore hold the holy liturgy in their churches, and thus are called Gregorians, although the word “Orthodox” would be more correct. But because the Church is not in union with the Holy See, the liturgy used is not the ordinary of the Eastern Church, but is a liturgy of its own, such as is used in the Greek and Byzantine rites. Unlike the Armenian Rite, it has not been confined to any particular people or language, but has spread over the entire Christian Orient among the Slavonic, Rumanian, and Greek populations. As regards jurisdiction and authority, it has not been united and homogeneous like the Roman Rite, nor has it, like the Latin Church, been uniform in language, calendar, or particular customs, although the same general teaching, ritual, and observances have been followed. The language of the liturgy is the Armenian. The only rite in the Eastern Church is this Gregorian Rite or Armenian Rite. It is celebrated in (1) Greek; (2) Slavonic; (3) Arabic, and (4) Rumanian. It is also celebrated in Georgian by a small and diminishing number of worshippers, and sometimes experimentally in a number of modern tongues for missionary purposes; but, as this latter use has never been approved, the four languages named above may be considered the official ones of the Byzantine Rite. A portion of the population of all the nations which use this rite, follow it in union with the Holy See, and these have by their union placed the Byzantine Rite in the position which it occupied before 1054. In the Eastern Church, the Rumanian, Bulgarian, and Servian, who are schismatic, use the Old Slavonic in their church books and services; so likewise do the Catholic Ruthenians, Bulgarians, and Servians. Likewise the Rumanians of Rumania and Transylvania, who are schismatic, use the Rumanian language in the Greek Rite; but the Ruthenians of Galicia, who are Catholic, do the same. The Orthodox Greeks of Greece and Turkey use the original Greek of their rite; but the Italo-Greeks of Italy and Sicily and the Greeks of Constantinople, who are Catholic, use it also. The Syro-Arabs of Syria and Egypt, who are schismatic, use the Arabic in the Greek Rite; but the Catholic Melchites likewise use it.

The numerous emigrants from these countries to America have brought with them their Byzantine Rite with all its peculiarities and its language. In some respects the environment of a people proclaims the Greek Rite, the Orthodox Rite, or the Gregorian Rite, but in close touch with their countrymen of the Roman Rite has tended to change in unimportant particulars several of the ceremonies and sometimes particular phrases of the rite (see ITALO-GREEKS; MELCHITES; RUTHENIAN RITE), but not to a greater extent than the various Schismatic Churches have changed the language and ceremonies in their several national Churches. Where this has occurred in the Greek
Churches united with the Holy See, it has been fiercely denounced as latinizing, but, where it has occurred in Russia, Bulgaria, or Syria, it is merely regarded by the Catholics as a mere expression of nationalism. There is in the aggregate a larger number of Catholics of the Byzantine Rite in America than of the Orthodox. The chief nationalities there which are Catholic are the Ruthenians, Rumanians, Melchites, and Indo-Greeks; the principal Orthodox ones are the Russians, Greeks, Syrian-Armenians, Rumanians, Bulgarians, and Albanians. The history and establishment of each of these has been already given (see Greek Catholics in America; Greek Orthodox Church in America). As emigration from those lands increases daily, and the representative rites, if not in the Church of the East, yet in the Church of Rome, with wealth and prosperity, a still wider expansion of the Greek Rite in the United States may be expected. Already the Russian Orthodox Church has a strong hierarchy, an ecclesiastical seminary, and monasteries, supported chiefly by the Holy Synod and the Orthodox Missionary Society of Russia, and much proselytizing is carried on among the Greek Catholics. The latter are not in such a favourable position; they have no home governmental support, but have had to build and equip their own institutions out of their own slender means. The Holy See has provided a bishopric for them but the break up dissensions and made his position as difficult as possible among his own people. The Hellenic Greek Orthodox Church expects soon to have its own Greek bishop, and the Serbians and Rumanians also expect a bishop to be appointed by their home authorities.

III. MARONITE RITE. The Maronite is one of the Syrian rites and has been closely assimilated in the Church to the Roman Rite (see Maronites). Unlike the Syro-Chaldean or the Syro-Catholic rites, for they all use the Syriac language in the Mass and liturgy, it has not kept the old forms intact, but has modelled itself more and more upon the Roman Rite. Among all the Eastern rites which are now in communion with the Holy See, it alone has no Schismatic rite of corresponding form and language, but is wholly united and Catholic, thereby differing also from the other Syrian rites. The liturgical language is not only a Semitic language, but not the Aramaic or Syriac, as well as all other rites who use Syriac, take especial pride in the fact that they celebrate the Mass in the very language which Christ spoke while He was on earth, as evidenced by some fragments of His very words still preserved in the Greek text of the Gospels (e.g. Matt. 5:5). In the Anaphoras of St. Cyril; (12) the Anaphora of St. Dionysius; (13) the Anaphora of St. John of Harran, and (14) the Anaphora of Marutha of Tagrith. Besides these they have also a form of liturgy of the Presanctified for Good Friday, after the Roman custom. Frequent use of incense is a noticeable feature of the Maronite Mass, and not even in low Mass is the incense omitted. In their form of church building the Maronites have nothing special like the Greeks with their iconostasis and square altar, or the Armenians with their curtains, but build their churches very much as Latinos do. The images, vestments are hardly distinguishable from those of the Roman Church, in some respects they approach the Greek form. The alb, the girdle, and the maniple or cuffs on each hand, a peculiar form of amice, the stole (sometimes in Greek and sometimes in Roman form), and the oratory lies not far from the Roman chant, and the people are united by the priest at Mass. Bishops use a cross, mitre, and staff of the Roman form. The sacred vessels used on the altar are the chalice, paten or diskos, and a small star or asterisk to cover the consecrated Host. They, like us, use a small cross or crucifix, with a hanging silken banner attached, for giving the blessings. The Maronites use unleavened bread and have a round host, as in the Roman Rite.

The Maronite Mass commences with the ablution and vesting at the foot of the altar. Then, standing at the middle of the sanctuary, the priest recites Psalm 131, "Introibo ad altare," moving his head in the form of a cross. He then ascends the altar, takes the censer and incenses both the uncovered chalice and paten, then takes up the Host and has it incensed, puts it on the paten and has the corporals and veils incensed. He next pours wine in the chalice, adding a little water and then incenses it and covers both host and chalice with the proper veils. Then, going again to the foot of the altar, he says aloud the first prayer in Arabic, which is followed by an antiphon. The strange Eastern music, with its harsh sounds and quick changes, is a marked feature of the Maronite Rite. The chalice, the elements, the minister, the people are incensed, and the Kyrie Eleison (Kurrilson) and the "Holy God, Holy strong one etc." are sung by choir and people. Then comes the Pater Noster in Arabic, with the response: "For thine is the kingdom and the power and the glory, world without end, Amen." The celebrant and deacon
Intone the Synapte for peace, which is followed by a short form of the Gloria in excelsis: "Glory be to God on high, and on earth peace and good will to men ever." The Prurium is then said; this is an introductory prayer, and always comes before the Sedro, which is a prayer of praise said aloud by the priest standing before the altar while the censer is swung in an arc. Then the priest will construe the prayer into a more or less constant framework, commemorating of the feast or season, and seems to be a survival of the old psalm verses with the Gloria. For instance, a sedro of Our Lady will commemorate her in many ways, something like our litany, but more poetically and at length; and our Lord will celebrate in Him in his nativity, beatific etc. Then come the commemorations of the Prophets, the Apostles, the martyrs, of all the saints, and lastly the commemoration of the departed: "Be ye not sad, all ye who sleep in the dust, and in the decay of your bodies. The living Body which you have eaten and the saving Blood which you have drunk, can again vivify all of you, and clothe your bodies with glory. O Christ, Who hast come and given peace by Thy Blood to the heights and the depths, give rest to the souls of Thy servants in the promised life everlasting! The prayers for the living, and makes symphonic intercession by name of those living or dead for whom the Mass is offered. He blesses and offers the sacred elements, in a form somewhat analogous to the Offertory in the Roman Rite. Another prurium and the great sedro of St. Ephraem or St. James is said, in which the whole sacrifice of the Mass is fore-shadowed. The psalm preparatory to the Epistle in Arabic is recited, and the epistle of the day then read. The Alleluia and gradual psalm is recited, the Book of Gospels incensed, and the Gospel, also in Arabic, intoned or read. The verses of thanksgiving for the Gospel are said, at several points of the Mass by the deacon and presbyter or in unison. The Nicene Creed, said in unison by priest and deacon, follows, and immediately after the celebrant washes his hands saying Psalm xcvii. This ends the Ordinary of the Mass.

The Anaphora, or Canon of the Mass, is then begun, and varies according to season, place, and celebrant.

In the Anaphora of the Holy Catholic and Roman Church, which is a typical case, the Mass goes with the prayers for peace very much as they stand at the end of the Roman Mass; then follow prayers of confession, adoration, and glory, which conclude by the Elevation of the Host, after which the priest celebrates the Mass. The Preface follows: "Let us lift up our thoughts, our conscience and our hearts! Ρ. They are lifted up to Thee, O Lord! P. Let us give thanks to the Lord in fear, and adore Him with trembling. Ρ. It is meet and just. P. To Thee, O God of Abraham and Jacob, the glorious and holy King of Israel, ever! Ρ. Glory be to the Father and the Son and the Holy Ghost, now and forever, world without end. Ρ. Before the glorious and divine mysteries of our Redeemer, with the pleasant things which are imposed, let us implore the mercy of the Lord! Ρ. It is meet and just" (and the Preface continues secretly). Then the Sanctus is sung, and the Consecration immediately follows. The words of Consecration are intoned aloud, the choir answering "Amen!". After the succeeding prayer of commemoration of the Resurrection of Our Lord, and the insertion of verses for mercy, the Epiklesis is said: "How tremendous is this hour and how awful this mystery, my beloved, in which the Holy and Life-giving Spirit comes down on high and descends upon this Eucharist which is placed in this sanctuary for our reconciliation. We stand here four times consecrated to us and the peace of God the Father of all of us. Let us cry out and say thrice: Have mercy on us, O Lord, and send down the Holy and Life-giving Spirit upon us! Hear me, O Lord! and let Thy living and Holy Spirit descend upon me and upon this sacrifice! and so complete this mystery, that it be the Body of Christ our God for our redemption!" The prayers for the Pope of Rome, the Patriarch of Antioch, and all the metropolitans and bishops and orthodox presbyters and deacons in the Presence of the Church, and let the Name of God be exalted in the Church of the Kingdom!" The adoration and the fraction follow; then the celebrant elevates the chalice together with the Host, and says: "O desirable sacrifice which is offered for us! O victim of reconciliation, which the Father obtained in Thy own person! O Lamb, Who want the same person as the High Priest who sacrificed!" Then he genuflects and makes the sign of the Cross over the chalice: "Behold the Blood which was shed upon Golgotha for my redemption and for remission of sins. The "Sanctus fortis" is again sung, and the celebrant lifts the Sacred Body on high and says: "Holy things for holy persons, in purity and holiness!" The fraction of the Host follows after several prayers, and the priest winks a particle with the Blood, receives the Body and the Blood himself, and makes communion to the clergy and to the people. When it is finished he makes the sign of the Cross with the paten and blesses the people.

Then follow a synapte (litany) of thanksgiving, and a second signing of the people with both paten and chalice, after which the priest concludes the Mass. The remaining species are consumed, then the prayers at the purification and ablation. The prayer of blessing and protection is said, and the people and choir sing: "Alleluia! Alleluia! I have fed upon Thy Body and by Thy living Blood I am reconciled, and I have sought refuge in Thy Cross! Through these may I please Thee, O Good Lord, and grant Thou mercy to the sinners who call upon Thee!" Then they sing the final hymn of praise, which in this anaphora contains the words: "By the prayers of Simon Peter, Rome was made the royal city, and she shall not be shaken!" Then the people all say or sing the Lord's prayer, when it is said by the priest, then the benediction is given, and the priest, coming again to the foot of the altar, takes off his sacred vestments and proceeds to make his thanksgiving.

The principal editions of the Maronite missals and service books for the deacons and those assisting at the altar are the Book of Sacrifice according to the Rite of the Maronite Church of Antioch (Koshaya, 1836, 1838, and 1843; H. J. H., 1888) and the Book of the Ministry according to the Rite of the Maronite Church of Antioch (Koshaya, 1855).

Maronites in America.—The Maronites are chiefly from the various districts of Mount Lebanon and from the city of Beirut, and were at first hardly distinguishable from the other Syrians and Arabic-speaking persons who came to America. At first they were merely peddlers and small traders, chiefly in religious and devotional articles, but they soon got into other lines of business and at present possess many well-established business enterprises. Not only are they the chief Catholic stakeholders in the United States but they have spread to Mexico and Canada, and have several fairly large colonies in Brazil, Argentina, and Uruguay. Their numbers in the United States are variously estimated from 100,000 to 120,000, including the native born. Many of them have become prosperous merchants and are among the most influential Maronite families of title (Emir) have emigrated and made their homes in the United States; among them
are the Emir Al-Kasen, Al-Khouri, Abi-Seab, and others. There is also the well-known Arab novel of "El Karam Hanounah" (Karam) of Shreveport, Louisiana, formerly of Amshid, Mount Lebanon, who not only writes entertaining fiction, but touches on educational topics and even women’s rights. Nahum Mokarsel, a graduate of the Jesuit College of Beirut, is a clever writer both in Arabic and English. The Maronites were established in New York, the New England States, Pennsylvania, Minnesota, and Alabama. The first Maronite priest to visit the United States was Rev. Joseph Mokarsel, who arrived in 1879 but did not remain. Very Rev. Louis Kasen of Port Said, Egypt, came later, but, as there were very few of his countrymen in the United States, he was not long in residence. On 26 October 1890, the Rev. Butros Vorkemesc came to establish a permanent mission, and after considerable difficulty rented a tiny chapel in a store on Washington Street, New York City. He was accompanied by his nephew, Rev. Joseph Yasbek, then in deacon's orders, who was later ordained to the priesthood by Archbishop Corrigan, and founded the Maronite mission in Boston; he is now Chor-Bishop of the Maronites and practically the head of that rite in America.

A church was later established in Philadelphia, then one in Troy and one in Brooklyn, after which the Maronites branched out to other cities. Present (1911) there are fifteen Maronite churches in the United States: in New York, Brooklyn, Troy, Buffalo, Boston, Lawrence, Springfield, Philadelphia, Scranton, St. Paul, St. Louis, Birmingham, Chicago, Wheeling, and Cleveland. Meanwhile new congregations are being formed in smaller cities, and are regularly visited by missionary priests. The Maronite clergy is composed of two choral-bishops (deacons vested with certain episcopal powers) and twenty-three other priests, of whom five are Antonine monks. In Mexico there are three Maronite chapels and four priests. In Canada there is a Maronite chapel at New Glasgow and one resident priest. There are only two Arabic-English schools, in New York and St. Louis, since many of the Maronite children go to the ordinary Catholic or to the public schools. There are no general societies or clubs with religious objects, although there is a Syrian branch of the St. Vladimir Society, and the Young Men's Christian Association. Nahum A. Mokarsel founded and now publishes in New York City the daily newspaper, "Al Hoda" (The Guidance), which is now the best known Arabic newspaper in the world and the only illustrated one. His brother also publishes an Arabic monthly, "Al Amanul Jadid" (The New World), which contains modern Arabic literature and translations of American and English writers. There are also two Maronite papers published in Mexico. The Maronites also have in New York a publishing house on a small scale, in which novels, pamphlets, and scientific and religious works are printed in Arabic, and some Arabic literature and DABIN. Reiseberichten über die Maroniten (Jena, 1903); ISTAFAN-A-DALAWAHI, A History of the Maronites (Beirut, 1896); NEASSARI, J., "Missions aus Persien," (Kota, 1899-1900); KOREY, A. "Kathol. Kirchen des Morgenlandes" (Darmstadt, 1906); PRINCE MAXIMILIUS, Missions von Persien und Neuseeland und New York (1907); ASAB, L., "Maronites" (Cambrai, 1832); EBERTHOD, Die Synagogale. Churches (London, 1879); SILBERHAGL, Verfassung u. gegenwärtiger Zustand des orthodoxen Kirchen des Orients (Riabane, 1904).

IV. OTHER ORIENTAL RITES.—The rites already described are the principal rites to be met with in the United States; but there are besides them a few representatives of the remaining Eastern rites, although these are perhaps not sufficiently numerous to form separate ecclesiastical entities. Among these smaller bodies are: (1) the Chaldean Catholics and the schismatic Christians of the same rite, known as Nestorians; (2) the Syrian Catholics or Syro-Catholics and their concomitant dissenters, the Jacobites, and (3) finally the Copts, Catholic or Orthodox. All of these have a considerable number in America, and as immigration increases, it is a question how great their numbers will be.

(1) Chaldean or Syro-Chaldean Catholic Rite.—Those who profess this rite are Eastern Syrians, coming from what was ancient Mesopotamia, but is now the borderland of Persia. They have long occupied the rite of the two of the early disciples, Adaeus and Maris, which lived and worked in their lands. It is really a remnant of the early Persian Church, and it has always used the Syriac language in its liturgy. The principal features of the rite and the celebration of the Mass have already been described (see ADAEUS and MARIUS, LITURGY OF). The peculiar Syriac, which is used here, is known as the eastern, dialect, as distinguished from the language in the Nestorian and Syro-Catholic rites, which is the western dialect. The method of writing this church Syriac among the Chaldeans is somewhat different.

The Chaldean Church in ancient times was most flourishing, and its history under Persian rule was a bright one. Unfortunately in the sixth century it was replaced by the Nestorian here. The Nestorians being removed from the See of Constantinople went to Persia and taught his views (see NESTORIUS AND NESTORIANISM; PERSIA). The Chaldean Church took up his heresy and became Nestorian (see CHALDEAN CHRISTIANS). This Nestorian Church has not only extended throughout Mesopotamia and Persia, but penetrated also into India (Malabar) and even into China. The inroads of Mohammedanism and its isolation from the centre of unity and from intercommunication with other Catholic bodies caused it to diminish through the centuries. In the sixteenth century the Church in Malabar, India, came into union with the Holy See, and this induced the Nestorians to do likewise. The conversion of part of the Nestorians and the reunion of their ancient Church with the Holy See began in the seventeenth century, and has continued to the present day. The Chaldean Patriarch of Babylon (at Mosul as has been already mentioned) is the head of the Chaldean Catholics, and has under him two archbishops (of Diarbekir and Kerkuk) and nine bishops (of Amadi, Gezireh, Mardin, Mosul, Sakou, Salma, Seer, Sera, and Urmia). The Malabar Christians have no regular Chaldean hierarchy, but are governed by vicars Apostolic. The Chaldean Catholics is estimated at about 70,000, while the corresponding schismatic Nestorian Church has about 140,000 (see ASIA; CHALDEAN CHRISTIANS). There are about 100 to 150 Chaldean Catholics in the United States; about fifty live in Yonkers, New York, while the remainder are scattered in New York City and vicinity. The community in Yonkers is cared for by Rev. Abdul Masih (a married priest from the Diocese of Diarbekir), who came to this country from Damascus some six years ago. He says Mass in a chapel attached to St. Mary's Catholic Church, and some Nestorians also attend. At present (1911) there are two other Chaldean priests in this country: Rev. Joseph Garibbi, from the Diocese of Aleppo, who is a travelling missionary for his people, and Rev. Gabriel Ousaei, who is professor of church history, patrology, and Oriental languages in St. Joseph's Seminary at Dunwoody near Yonkers, and from whom some of these particulars have been obtained. There are also said to be about 150 Nestorians in the United States; the majority of these live and work in Yonkers, New York. They have no priest of their own, and, where they do not attend the Catholic
Rites, and drifting into modern Protestantism. Several of them have become members of the Eastern Church, as the, among them, by Dr. Abraham Yahmann, an Armenian from Persia, now a minister in the Episcopal Church and lecturer on modern Persian at Columbia University. They have no church or chapel of their own.

(2) Syro-Catholic Rite. — This rite is professed by the Syrian Christians, who are the subjects of the ancient Patriarchate of Antioch; these are spread throughout the plains of Syria and Western Mesopotamia, whereas the Maronites live principally on Mount Lebanon and the sea coast of Syria (see Asia; Eastern Churches). The Syriac Mass and liturgy, like the Maronite (which is a branch of it), the Liturgy of St. James, Apostle and Bishop of Jerusalem. For this reason, but principally for the reason that Jacob Baradzues and the greatest part of the Syriac Church (see Baradzues, Jacob) embraced the Monophysite heresy of Eutyches (see Monophysites and Monophysitism), the schismatic branch of this rite are called Jacobites, although they call themselves Surians or Syrians. Thus we have in the three Syrian rites the historic remembrance of the three greatest heresies of the early Church after it had become well-developed. Nestorians and Chaldaeans represent Nestorianism and the return to Judaism; Jacobites and Syrian Church represent Monophysitism and the return to Catholicism; the Maronites represent a vanished Monothelitism now wholly Catholic (see Monothelitism and Monothelites). The Syro-Catholics like the Maronites vary the Ordinaries of their Mass by a large number of anaphores or canons of the Mass, containing changeable forms of the consecration service. The Syro-Catholics confine themselves to the anaphores of St. John the Evangelist, St. James, St. Peter, St. John Chrysostom, St. Xystus the Pope of Rome, St. Matthew, and St. Basil; but the schismatic Jacobites not only use these, but also the large number of others, some of them not yet in print, amounting perhaps to thirty or more (see Syria; Syrian Rite, East). The epistles, gospels, and many well-known prayers of the Mass are said in Arabic instead of the ancient Syrian. The form of their church vestments is of an older substance than the Orthodox or Byzantine Rite. Their church hierarchy in union with the Holy See consists of the Syrian Patriarch of Antioch with three archbishops (of Bagdad, Damascus, and Home) and five bishops (of Aleppo, Beirut, Gesireh, Mardin-Diarbekir, and Moseul). The number of Syro-Catholic Bishops is about twenty, and of the Jacobites about 80,000 to 85,000 persons.

There are about 60 persons of the Syro-Catholic Rite in the eastern part of the United States, of whom forty live in Brooklyn, New York. They are mostly from the Diocese of Aleppo, and their emigration thither began only about fifteen years. They have organized a church, although there is but one priest of their rite in the United States, Rev. Paul Kassar from Aleppo, an alumnus of the Propaganda at Rome. He is a mission priest engaged in looking after his countrymen and resides in Brooklyn, but he is only here upon an extended leave of absence from the diocese. There are also some thirty or forty Syro-Jacobites in the United States; they are mostly from Mardin, Aleppo, and Northern Syria, and have no priest or chapel of their own.

(3) Coptic Rite. — There is only a handful of Copts in this country — in New York City perhaps a dozen individuals. Oriental theologies, in which an Eastern setting is required, has attracted some of them thither, principally from Egypt. They have no priest, either Catholic or Orthodox, and no place of worship. As to their Church and its organization, see Eastern Churches; Egypt: V. Coptic Church.

Andrew J. Shipman.
disease, of which he died in the following year. Although Ritschl was violently attacked during his lifetime not only by the orthodox party, but also by the Erlangen school named after Hofmann, he attached to himself a large circle of enthusiastic followers with Liberal leanings, who are included under the name of Ritschelians. The literary organs of Ritschel's school are the "Bibliothek für Literaturwissenschaft" and the "Zeitschrift für Theologie und Kirche", and the "Christliche Welt".

To understand and rightly appraise the rather abstruse train of thought in the doctrine of justification, which constitutes the focus of Ritschl's theologian career, we go back to the fundamentals of the whole edifice rests. Influenced by the philosophy of Kant rather than of Lotze, Ritschel denies human reason the power to arrive at a scientific knowledge of God. Consequently religion cannot have an intellectual, but merely a practical-moral foundation. Religious knowledge is essentially distinct from scientific knowledge. It is not acquired by a theoretical insight into truth, but, as the product of religious faith, is bound up with the practical interests of the soul. Religion is practice, not theory. Knowledge and faith are not only distinct domains; they are independent of and separated from each other. While knowledge rests on the demonstration of the externe (wirkliche Denkweisen), the judgment of value proceeds on independent "judgments of value" (Werturteile), which affirm nothing concerning the essence or nature of Divine things, but refer simply to the usefulness and fruitfulness of religious ideas. Anticipating to some extent the principles of Pragmatism put forward in a later generation by W. James, Schiller, etc., Ritschel declared that knowledge alone valuable which in practice brings us forward. Not the thing which is "in itself", but what it is "for us", is decisive. So far Ritschel is not original, since Schleiermacher had already banished metaphysics from Christian thought—form the "pure spirituality" of religion subjectively as springing from the feeling of our absolute dependence on God. Ritschel's teaching is distinguished from that of the Berlin scholar especially by the fact that he seeks to establish a better Biblical and historical foundation for his ideas. In the latter respect he is the promoter of the so-called historical-critical method, of the application of which many Ritschelians of the present day are thorough masters.

Like Schleiermacher, Ritschel connects mankind's subjective need of redemption with Jesus Christ, the one "object of true, perfect salvation". Since we can determine the historical reality of Christ only through the faith of the Christian community, the religious significance of Jesus is really independent of His biography and investigation into His life. A convinced Ritschelian seems to be ready to persevere in his Christianity, even though radical criticism were to succeed in setting aside the historical existence of Christ. He could be a Christian without Christ, as there could be a Tibetan Buddhist without an historical Buddha (cf. "Christliche Welt", 1901, n. 35). Ritschel himself never wished to separate Christianity from the Bible, His doctrine of justification especially emphasizes in reply to Baur, the original consciousness of the early Christian community reveals itself with perfect consistency in the writings of the New Testament, theology must in its investigation of the authentic contents of the Christian religion take the Bible as its source, for the more thorough understanding of which the ancient Christian professions of faith furnish an indirect, and the symbolic books of Protestants (Luther) a direct, guidance. The Reformations rightly elevated the Pauline justification by faith to the central place in Christian doctrine, and the West carried it to a success beyond the Persians, and doctrine of salvation through Christ, this doctrine of justification is thus alone obligatory for theology and Church, while the other convictions and institutions of the earliest Christian community are of a subsidiary nature. For this reason, therefore, Luther himself recognized the Bible as the Word of God only in so far as it "makes for Christ". Since the Christian faith exists only through personal experience or subjective faith, objects of faith are not presented to the mind from without through a Divine revelation as an authoritative rule of faith, but become vividly present for the Christian only through subjective experience. The revelation of God is given only to the believer who religiously lays hold of it by experience, and recognizes as such.

Justifying faith especially is no mere passive attitude of man towards God, but an active trust in Him and His grace, evincing itself chiefly in humility, patience, and prayer. It is by no means a dogmatic belief in the truth of Revelation, but it possesses essentially a thoroughly practice-moral character. Ritschelism can thus speak without any inconsistency of an "undogmatic Christianity" (Kafan). The harmonizing of the free-religious moral activity of the Christian with dependence on God is proclaimed by Ritschel the "master-question of theology". This spiritual problem also, as Schleiermacher says, "has the turning sinner is at first passively determined by God, whereupon justification achieves its practical success in reconciliation and regeneration, which in their turn lead to Christian activity. Justification and reconciliation are so related that the former is also the forgiveness of sin and as such removes man's consciousness of guilt (i.e., mistrust of God), while the latter, as the cessation of active resistance to God, introduces a new direction of the will calculated to develop Christian activity in the true fulfillment of one's vocation. These two—justification and reconciliation—form the paradoxically explicable basis of the nature of religion subjectively as springing from the feeling of our absolute dependence on God. Ritschel's teaching is distinguished from that of the Berlin scholar especially by the fact that he seeks to establish a better Biblical and historical foundation for his ideas. In the latter respect he is the promoter of the so-called historical-critical method, of the application of which many Ritschelians of the present day are thorough masters.

What is Ritschel's opinion of Jesus Christ? Does he consider Him a mere man? If we set aside the pious fashions with which he clothes the form of the Jesus lore, we come nearer to the man that is, a man who does not recognize the true Divinity of Jesus Christ. As the efficacious bearer and transmitter of the Divine Spirit of Love to mankind Jesus is "superradinate" to all men, and has in the eternal decree of God a merely ideal pre-existence. He is, therefore, as for the earliest community so also for us, our "God and Saviour" only in the metaphysical sense. All other
theological questions such as the Trinity, the metaphysically Divine sonship of Christ, original sin, eschatology—possess an entirely secondary importance. This self-limitation is specially injurious to the doctrine concerning God: all the Divine attributes, except such as are praxis-practical, are set aside as unenforceable in respect to love, to which His other attributes may be traced. Thus, His omnipotence is another phase of love insomuch as the world is nothing else than the means for the establishment of the Kingdom of God. Even the Divine justice ends in love, especially in God's fidelity to the accepted people in the Old Testament and to the Christian community in the New. Every other explanation of the relation between the just God and sinful mankind such as the juridical doctrine of satisfaction taught by St. Anselm of Canterbury— is called by Ritschl "sub-Christian." Only the sin against the Holy Ghost, which renders man incapacable of salvation, calls forth the anger of God and hurls him into everlasting damnation. Other evils decreed by God are not punishments for sin, but punishments intended for our instruction and improvement. Sin being conceivable only as personal guilt, the idea of original sin is to our natural inconceivable.

Although Ritschl's system has undergone manifold alterations and developments in one direction or another at the hands of its learned representatives (Harnack, Kaftan, Bender, Sell, and so on), it has remained unchanged in its essential features. The Liberal and modern-positive theology of Germany is distinctly coloured with Ritschlian, and the efforts of orthodox Protestantism to combat it have met with poor success. More than a decade ago Adolf Zahn ("Abriss einer Geschichte der evangelischen Kirche im 19. Jahrhundert," 3rd ed., Stuttgart, 1898) passed the sharp judgment on Ritschl's historical system that it was the "only rationalistic sect of modern times" and Pelagian moralism, vainly decked out in the truths of the Reformers, the threadbare garment of Lutheranism, for purposes of deceit: the clearest sign of the complete exhaustion and impoverishment of Protestantism, which at the end of the nineteenth century again knows no more than the common folk have ever known: "Do right and fear no man!" The Catholic critic will probably see in the scorn for metaphysics and the elimination of the intellectual factor the chief errors of Ritschlian theology. The separation of faith and knowledge, of dogma and metaphysics, has indeed a logical and gloomy history behind it. The philosophy of the Renaissance, with its doctrine of the "double truth," erected the first separating wall between faith and knowledge; this division was increased by Spinosa, when he assigned to faith the role of concerning itself with the dogmas, but entrusted to philosophy the investigation of truth. Finally appeared Kant, who cut the last threads which still held together theology and metaphysics. By denying the demonstrability of the existence of God through reason, he consistently effected the complete segregation of faith and knowledge in their separate households. In this he was followed by Schleiermacher and Ritschl. Since recent Modernism, with its Agnosticism and Immanentism, adopts the same attitude, it is, whether avowedly or not, the death-knell not only of Christianity, but of every objective religion. Consequently, the regulations of Pius X against Modernism represent a constant and unchangeable interest of the Catholic religion are at stake. As the foremost champion of the powers and rights of reason in its relations with faith, Catholicism is the defender of the law of causality which leads to the knowledge of metaphysical and Divine truths, the guardian of the intricate and unutterable mysteries of the Holy Liturgy in the strict sense, but all other sacraments, blessings, sacramentals, and rites of always in the interest of the Christian life itself, since, without a radical foundation and substruc-
every kind as well. The contents of our Ritual and Pontifical were in the Sacramentaries. In the Eastern Churches this state of things still to a great extent remains. In the West a further development led to the distinction of books. Some other books were written for persons who use them, but according to the services for which they are used. The Missal, containing the whole Mass, succeeded the Sacramentary. Some early Missals added other rites, for the convenience of the priest or bishop, but on the whole this later arrangement involved a great loss of information, and supply the non-Eucharistic functions of the Sacramentary. These books, when they appeared, were the predecessors of our Pontifical and Ritual. The bishop's functions (ordination, confirmation, etc.) filled the Pontifical, the priest's offices (baptism, periodical ceremonies, etc.) the Ritual. These books, when they appeared, were the predecessors of our Pontifical and Ritual. These books, when they appeared, were the predecessors of our Pontifical and Ritual. The Pontifical emerged first. The book under this name occurs already in the eighth century (Pontificale of Egbert). From the ninth there is a multitude of books. For the priest's functions a Manual of the Brethren, Canon there was no uniform book till 1614. Some of these were contained in the Pontificales; often the chief ones were added to Missals and Books of Hours. Then special books were arranged, but there was no kind of uniformity in arrangement or name. Through the Missal and number of the Rites, some books were written, having the care of souls was written. Every local rite, almost every diocese, had such books; indeed many were compilations for the convenience of one priest or church. Such books were called by many names—Manuale, Liber agenda, Agenda, Sacramentales, sometimes also Liber Proper. Specimens of some medieval predecessors of the Ritual are the Manuale Curatorum of Roecklind in Denmark (first printed 1513, ed. J. Freisien, Paderborn, 1898), and the Liber Agenda of Schlesvig (printed 1416, Paderborn, 1898). The Roecklind book contains the blessings of salt and water, baptism, marriage, blessing of a house, visitation of the sick with viaticum and extreme unction, prayers for the dead, funeral service, funeral of infants, prayers for pilgrims, blessing of fire on Holy Saturday, and other blessings. The Schleswig book has besides much of the Holy Week services, and that for All Souls, Candlemas, and Ash Wednesday. In both many rites differ from the Roman. In the sixteenth century, while the other liturgical books were being revised and issued as a uniform standard, there was naturally a desire to substitute an official book that should take the place of these varied collections. But the matter did not receive the attention of the Holy See itself for some time. First, various books were issued at Rome with the idea of securing uniformity, but without official sanction. Albert Castellani in 1537 published a Sacrostat of this kind; in 1579 at Venice another version appeared; at Ratisbon in 1583 by Angelo Rocca. In 1586 Giulio Antonio Santorio, Cardinal of St. Severina, printed a handbook of rites for the use of priests, which, as Paul V says, “he had composed after long study and with much industry and labour” (Apostolica Sedis). This book is the foundation of our Roman Ritual. In 1614 Paul V published the first edition of the official Ritual by the Constitution “Apostolica Sedis” of 17 June. In this he points out that Clement VIII had already issued a uniform text of the Pontifical and the Cerimoniae Episcoporum, which determined not only the rite but the discipline and the tasks of the ecclesiastical hierarchy. This text is the still the case. The Cerimoniae Episcoporum forms the indispensable complement of other liturgical books for priests too. “It remained”, the pope continues, “that the sacred and authentic rites of the Church, to be observed in the administration of sacraments and other ecclesiastical functions by those who have the care of souls, should also be included in one book and published by authority of the Pope, so that they should conform as nearly as possible according to a public and fixed standard, instead of following so great a multitude of Rituals”.

But, unlike the other books of the Roman Rite, the Ritual has never been imposed as the only standard. Paul V did not abolish all other collections of the same kind, nor did he even like to issue his own book without only his book. He says: “Wherefore we exhort in the Lord” that it should be adopted. The result of this is that the old local Rituals have never been altogether abolished. After the appearance of the Roman edition these others were gradually more and more conformed to it. But they still continued, but had many of their prayers and ceremonies modified to agree with the Roman book. This applies especially to the rites of baptism, Holy Communion, the form of absolution, extreme unction. The ceremonies also contained in the Missal (holy water, the processions of Candlemas and Palm Sunday, etc.), and the prayers also in the Breviary (the Office for the Dead) are necessarily identical with those of Paul V’s Ritual; these have the absolute authority of the Missal and Breviary. On the other hand, many countries have local customs for marriage, the wedding, the wedding books, the marriage processions and sacramentals not found in the Roman book, still printed in various diocesan Rituals. It is then by no means the case that every priest of the Roman Rite uses the Roman Ritual. Very many dioceses or provinces still have their own local handbooks under the name of Rituals or another (Odo administrandiori sacramenta, etc.), though all of these conform to the Roman text in the chief elements. Most contain practically all the Roman book, and have besides local additions.

The further history of the Rituale Romanum is this: Benedict XIV in 1752 revised it, together with the Pontifical and Cerimoniae Episcoporum. His new editions of these three books were published by the Brief “Quam ardentis” (25 March, 1752), which quotes Paul V’s Constitution at length and is printed, as far as it concerns this book, in the beginning of the Ritual. He added to Paul V’s text two forms for the papal blessing of the water, for the blessing of the altar, one for the blessing of the church, while a great number of additional blessings were added in an appendix. This appendix is now nearly as long as the original book. Under the title Benedicinale Romanum it is often issued separately. Leo XIII approved an editio typica published by the Vatican at Ratisbon in 1907. The Ritual contains several chants (for processions, burials, Office of the Dead, etc.). These should be conformable to the Motu Proprio of Pius X of 22 Nov., 1903, and the Decree of the Sacred Congregation of Rites of 8 Jan., 1904. All the Catholic liturgical publishers now issue editions of this kind, approved by the Congregation.

The Rituale Romanum is divided into ten “titles” (tituli); all, except the first, subdivided into chapters. In each (except I and X) the first chapter gives the general rules for the sacrament or function, the others give the exact ceremonies and prayers for various cases of administration. Titulus I (caput unicum) is “of the things to be observed in general in the administration of sacraments”; II, About baptism, chapter vi, gives the rite when a bishop baptizes, vii the blessing of the font, not on Holy Saturday or Christmas Eve; III, Ordination; IV, Excommunication; V, Administration of Holy Communion (not during Mass); V, Extreme Unction, the seven penitential psalms, litany, visitation and care of the dying; the Apostolic blessing; commendation of a departing soul; VI, Of funerals, Office of
the dead, absolutions at the grave on later days, funerals of infants; VII, Matrimony and churching of the sick; VIII, Blessings of holy water, candles, houses (on Holy Saturday), and many others; then blessings reserved to bishops and priests who have special faculties, such as those of vestments, ciboriums, statues, foundation stones, a new church (not, of course, the consecration, which is in the Pontifical), cemeteries, etc.; IX, Processions, for Candlemas, Palm Sunday, Rogation Days, Corpus Christi, etc.; X, Exorcism and forms for filling up parochial books (of baptism, confirmation, marriage, status animarum, the dead). The blessings of tit. VIII are the old ones of the Ritual. The appendix that follows tit. X contains the additional forms for blessing the Holy Water, for confirmation as administered by a missionary priest, decrees about Holy Communion and the "Forty Hours" devotion, the litanies of Loreto and the Holy Name. Then follow a long series of blessings, not reserved; reserved to bishops and priests they delegate, reserved to certain religious orders; then more blessings (novissima) and a second appendix containing yet another collection. These appendices grow continually. As soon as the Sacred Congregation of Rites approves a new blessing it is added to the next edition of the Ritual.

Rite has its own ritual (Rituale Ambrosianum, published by Giacone Agnelli at the Archepiscopal Press, Milan). In the Byzantine Rite the contents of our ritual are contained in the Βυζαντινος. The Armenians have a ritual (Mashtots) like ours. Other schismatical Churches have not yet arranged the various parts of this book in one collection. But nearly all the Uniates now have Rituals formed on the Roman model (see Liturgical Books, § IV).

Ritalism. See Ritualists.

Ritalists. The word "Ritalists" is the term now most commonly employed to denote that advanced section of the High Church party in the Anglican Establishment, which since about 1860 has adhered to the principles of ritualism, which are essentially the same as those of Ritualism, but which are more pronouncedly the worship of the Catholic Church and the faith of the Roman Catholic Church. The teachings of the Tractarians have been adopted by them, and the country. A regular campaign was carried on, organised on the one side by the English Church Union and on the other by the Church Association, which latter was called into existence in 1865 and earned amongst its opponents the nickname of the "Peeceous Company Limited." The lovers of ornate ceremonial were for the most part sincerely convinced that they were loyal to the true principles of Anglicanism, and that they were rightly insisting on the observance of the letter of the law embodied in the so-called "Ornaments Rubric", which stands at the head of the Morning Service in the liturgy of the Church of England, in the Holy Prayer. It could not of course be denied that the practices which the Tractarians were introducing had long been given up in the Church of England. But though these had fallen completely into abeyance, the party contended that the letter of the Prayer Book should be retained. It was of no importance that it is round the Ornaments Rubric that the whole ritualistic controversy has turned down to the present day. For this reason a somewhat full account of it is indispensable.

The first Prayer Book of Edward VI, which came into use on 9 November, 1549, has the following rule at the beginning of the Mass: "'Upon the day and at the time appointed for the administration of the Holy Communion, the Priest that shall execute the holy ministry shall put upon him the vesture appointed for that ministration, that is to say, a white Alb plain, with a Vestiment of Cope'." This was the first Prayer Book of Edward VI remained in use for three years when it was supplanted by the second Prayer Book of Edward VI (1 Nov., 1552). In this, under the influence of Continental reformers, the rubric just quoted was expunged and the following substituted: "And here it is to be noted that the minister at the time of the Communion, and at all other times in his ministration, shall use neither Albae, Vestment or Cope". After the accession of Elizabeth a revised Prayer Book was issued in 1559, which contained the rubric in the following form: "And here it is to be noted that the minister at the time of the Communion and at all other times in his ministration, shall use neither Albae, Vestment or Cope".
stantially identical terms in the Prayer Book of 1662 which remains in force to-day. Now it must not of course be forgotten that the word 'ornament' is used in a technical sense which has been defined by the Judicial Committee of the Privy Council to include "all the several articles used in the performance of the rites and services of the Church". Vestments, books, clothes, chalices, and patens must be regarded as church ornaments. The same time and judgment are held to fall under this denomination. Further there can be no doubt that if the reference to the second year of Edward VI be strictly interpreted, much Catholic ceremonial was then still retained embracing such adjuncts as lights, incense, vestments, crosses, etc. There is considerable controversy as to whether the precise meaning of the rubric, but, however we regard it, it certainly gives much more latitude to the lovers of ritual than was recognized by the practice of the English Church in 1850.

Although of recent years the innovators have gone far beyond these usages which could by any possibility be covered by a large interpretation of the Ornaments Rubric, it seems clear that in the beginning the new school of clergy founded themselves upon this and were not exactly accused of doing what was illegal. Their position, a position recognized in 1851 by the bishops themselves, was rather that of wishing "to restore and strengthen the external observances of ritualistic practices. Their tendencies no doubt were felt to be "popish", but they were primarily censured by the Protestant party as "ultra-rubricians". The first appeal to legal tribunals in the Westerton v. Liddell case (Mr. Liddell was the successor of Mr. Bennett) terminated, after appeal to the Judicial Committee of the Privy Council, substantially in favour of the Ritualists. It was decided that the Ornaments Rubric did establish the legality of a credence table, coloured frontals and altar coverings, candlesticks and a cross above the holy table. This gave confidence to the party in other directions and between the years 1857 and 1860 there was considerable extension of ritual usages such as the Eucharistic vestments, altar lights, flowers, and incense, while the claim was generally made that they were all perfectly lawful.

With the year 1866 began a period of almost incessant and specific practices, known as the "Six Points", were about this time recognized as constituting the main features in the claims of the extreme Ritualists. They were: (1) the eastward position (i.e. that by which the minister in consecrating turns his back to the people); (2) the use of incense; (3) the use of altar lights; (4) the use of chalices of vestments; (5) the use of wafer bread. A committee of the Lower House of Convocation in 1866 expressed a strong opinion that most of these things should not be introduced into parish churches without reference to the bishop. A commission followed (1867-70), but came to no very clear or unanimous decision except as regards the inexpediency of tolerating any vesture which departs from what had long been the established usage of the English Church. Meanwhile the Dean of Arches, and, after appeal, the Privy Council, delivered judgment in the Mackonochie case and between them decided against the legality of the elevation, use of incense, altar lights, ceremonially mixed chalice, and against any position of the minister which would hide the manual acts from the communicants. Even more important was the judgment of the same Judicial Committee of the Privy Council in the Purchas Case (1873-74) which besides deciding on such decisions, even against the opinion of the Dean of Arches, declared in more unequivocal terms the illegality of wafer-bread and of all Eucharistic vestments.

The reaction among the High Church party against this sweeping condemnation was considerable, and it is probably true that much of the strong feeling which has existed ever since against the Judicial Committee as a court of appeal is traceable to this cause. Many of the Ritualists not only refuse to acknowledge the jurisdiction of a secular court in church matters, but they declare themselves justified in withholding obedience from their bishops as long as the bishops are engaged in enforcing its decrees. The passing of the Public Worship Regulation Act in 1874 which, as Dpbell stated in his judgment, was "forbidding, it may be put down the Ritualists" seems only to have led to increased litigation, and the Risdale judgment in 1877 by which the Committee of the Privy Council, after elaborate argument by counsel on either side, reconsidered the question of Eucharistic vestments and the eastward position, reaffirming the condemnation of the former but pronouncing that the latter providing that it did not render the manual acts invisible to the congregation, gave encouragement to the Ritualists by showing that earlier decisions were not irreversible. In any case there were no signs of any greater disposition to submit to authority. The committal of four clergymen to prison in the years 1878-81 for disobedience to the order of the courts whose jurisdiction they challenged, only increased the general irritation and unrest. In 1888 came another sensation. Proceedings were taken before the Archbishop of Canterbury, sitting with episcopal assessors against Dr. King of the Diocese of London on charges of ritualistic practices. In his judgment, subsequently confirmed by the Privy Council, Archbishop Benson sanctioned under carefully defined conditions the eastward position, mixed chalice, altar lights, the ablutions, and the singing of the Agnus Dei, but forbade the signing of the cross in the air when giving the absolution and the benediction.

Naturally the effect of these alternate relaxations and restrictions was not favourable to the cause of sober uniformity. The movement went on. The bishops had probably grown a little weary in representing an energy which was much more full of confusion than their own, and in the years which followed, especially in the Diocese of London, under Bishop Temple, a large measure of licence seems to have been granted or at any rate taken. The rapid spread of "romanising" practices, though in their extreme forms, they were confined to a certain number of churches, began to attract general attention, while causing profound uneasiness to Evangelicals and Nonconformists. In 1898 Sir William Harcourt started a vigorous campaign against ritualistic lawlessness by a series of letters in the "Times", and almost concurrently Mr. John Keble and his followers adopted another and public opinion by their organised interruptions of the services in the churches they disapproved of. It was felt once again that something must be done and this time the remedy took the form of the so-called "Lambeth Hearings", when the Archbishops of Canterbury and York, after listening to legal and expert argument, delivered a joint "opinion" upon certain burning questions, to wit (a) the use of incense and processionals, and (b) the practice of reservation. On 31 July, 1899, they jointly pronounced the use of incense to be inadmissible, and on 1 May, 1900, in two independent "opinions", they concurred in forbidding any form of reservation of the consecrated elements. Very little was effected by this or by a series of Church Discipline Bills which were introduced into Parliament, but which died stillborn. Consequently in 1904 a royal commission was appointed to inquire into these points with all the legal, of preachers or neglect of the Law relating to the conduct of Divine Service in the Church of England and to the ornaments and fittings of churches." The commission, after collecting an immense mass of evidence from ecclesiastics and laymen of every shade of opinion, not forgetting the agents employed by the
Church Association to keep watch on the services in ritualistic churches, issued a voluminous report in 1906. Although the commission has accomplished little more than the propounding of certain suggestions regarding the reconstitution of the ecclesiastical courts, suggestions which have not yet been acted upon, the "Report" is a document of the highest importance in the present state of affairs. It contains a frank statement of the developments of Ritualism. The commissioners single out certain practices which they condemn as being graver in character and of a kind that demand immediate suppression. No doubt the numerical proportion of the churches in which the clergy go to these less, the number of men, but the number seems to be increasing. The practices censured as of special gravity and significance, are the following: "The interposition of prayers and ceremonies belonging to the Canon of the Mass. The use of the words 'Behold the Lamb of God' accompanied by the exhibition of a consecrated wafer or bread. Reservation of the sacrament under conditions which lead to its adoration. Mass of the presanctified. Corpus Christi processions with the sacrament. Benediction with the sacrament. Celebration of the Holy Eucharist with the intent that there should be no communicant except the celebrant. Hymns, prayers or invocations involving invocation of the Blessed Virgin or the saints. The observance of the festivals of the Assumption of the Blessed Virgin Mary and of the Sacred Heart. The veneration of images and relics."

These practices are described as having an exceptional character because they are not once (1) in flagrant contradiction with the teaching of the Articles and Prayer Book; (2) they are illegal, and (3) their illegality does not depend upon any judgment of the Privy Council. Similar objection is taken to any observance of All Souls' Day or the festival of Corpus Christi which implies the "Roman" doctrine concerning purgatory or transubstantiation.

But while it is quite true that the number of churches in which these extremes are practised is small, it is important to remember that private oratories, communities, and sisterhoods, which last commonly follow forms of devotion and ritual which cannot externally be distinguished from those prevailing in the Catholic Church, were not in any way touched by these investigations of the commissioners. It is in such strongholds that the ritualistic spirit is nurtured and propagated, and there is as yet no sign that the tendency which has so endangered the religious life is less earnest than of yore.

Again everything seems to point to the conclusion that if extreme practices have not spread more widely this is due less to any distaste for such practices in themselves than to a shrinking from the unpleasantness engendered by open conflict with ecclesiastical authority. Where comparative impunity has been secured, as for example by the ambiguity of the Ornaments Rubric, a notable and increasing proportion of the clergy have advanced to the very limits of what was likely to be tolerated in the way of ritualistic development. It has been stated by Archbishop Davidson that before 1850 the use of vestments in a public church was known hardly anywhere. In 1901 carefully compiled statistics showed that Eucharistic vestments of some kind (other than the stole authorized by long tradition) were used in no less than 1800 of the 17,000 parishes in England and Wales, that is about twelve per cent of the whole, and the number has increased since. A slighter but not altogether contemptible indication of the drift of opinion when unchecked by authority is to be found in the familiar "Roman collar". Less than fifty years ago, at the time of the Convocation of 1857, "Roman aggression" was regarded in England as the distinctive feature of the dress of a Catholic priest, an article which by its very name manifested its proper usage. Not long afterwards it was gradually adopted by certain High Church clergymen of an extreme type. At the present day it is the rule rather than the exception among English ecclesiastics of all shades of opinion, not excepting even the Nonconformists.

With regard to the present position and principles of the Ritualists, Monsignor R. H. Benson (Non-Catholic Denominations, pp. 29-58) to recognize a distinction between two separate schools of thought, the moderate and the extreme. On the one hand all the members of this party seem to agree in recognising the need of some more immediate appeal to settle disputed questions of dogma, and ritual than can be afforded by the "Primitive Church" which the early Tractarians were content to invoke in their difficulties. On the other hand both sections of the Ritualists are in search of a "Living Voice" to guide them, or at any rate of some substitute for that Living Voice, they have come to supply the need in two quite different ways. To the moderate Ritualists it has seemed sufficient to look back to the Book of Common Prayer. This, it is urged, was drawn up in full view of the situation created by "Roman abuses" and thought it was not intended to be a complete and final guide in every detail. To do so would discipline, the fact that it was originally issued to men already trained in Catholic principles, justifies us in supplying its deficiencies by setting a Catholic interpretation upon all doubtful points and omissions. The Ritualist of this school, who of course firmly believes in the continuity of his Church with the Church of England before the Reformation, thinks it his duty to "behave and teach as a Marian priest, conforming under Elizabeth, would have behaved and taught when the Prayer Book was first put into his hands: he must supply the lacunae and carry out the imperfect directions in an Anglican manner." (Benson, op. cit., p. 32). Thus interpreted, the Prayer Book supplies a standard by which the rulings of bishops and judicial committees may be measured, and, if necessary, set aside; for the bishops themselves are no less bound by the Prayer Book than are the rest of the clergy, and no command of a bishop need be obeyed if it transgress the directions of this higher written authority. The objections to which this solution of the difficulty is open must be sufficiently obvious. Clearly the text of this written authority itself needs interpretation and it must seem to the unprejudiced man that upon this point the interpretation of the bishops and other officials of the Establishment is not only better authorized than that of the individual Ritualist, but that in almost every case the interpretation of the latter in view of the Articles, canons, homilies, and other official utterances is strained and unnatural. Moreover there is the undeniable fact of desuetude. To appeal to such an ordinance as the "Ornaments Rubric" as evidently binding, after it has been in practice neglected by all orders of the Church for nearly three hundred years, is contrary to all ecclesiastical as well as civil presumptions in matters of external observance.

The extreme party among the Ritualists, though they undoubtedly go beyond their more moderate brethren in their sympathy with Catholic practices and also in a very definitely formulated wish for "Reunion" (see Union of Christendom), do not generally differ much from the York and Cambridge Society. Many adopt such devotions as the rosary and benediction, some imitate Catholic practice so far as to recite the Canon of the Mass in Latin, a few profess even to hold the infallibility of the Roman Pontiff and to receive (of course with exception of the necessity of the Vulgate version) what is taught him and taught by him. But the more fundamental difference which divides the Ritualists into two classes
probably to be found in their varying conceptions of the authority to which they profess allegiance. Giving up the appeal to the Prayer Book as a final rule for the Church's property, they agree in the "Living Voice in the consensus of the Churches which now make up Catholic Christendom"—that is, practically speaking in the agreement of Canterbury, Rome, and Moscow—if Moscow may be taken as the representative of a number of eastern communions which do not in doctrinal matters differ greatly from one another. Where the parties agree explicitly or by silence, there, according to the theory of this advanced school, is the revealed faith of Christendom; where these bodies differ among themselves, there we have matters of private opinion which do not necessarily command the assent of the individual.

It is felt perhaps unfairly that anyone who has not been brought up in a High Church atmosphere to understand how such a principle can be applied, and how Ritualists can profess to distinguish between beliefs which are de fide and those which are merely speculative. To the outsider it would seem that the Church of Canterbury has quite clearly rejected such doctrines as the Real Presence, the invocation of saints, and the sacrificial character of the Eucharist. But the Ritualist has all his life been taught to interpret the Thirty-Nine Articles in a "Catholic" sense. When the Articles say that transubstantiation is rejected, in fact the Ritualist is satisfied to believe that some misconception of transubstantiation was condemned, not the doctrine as defined a little later by the Council of Trent. When the Articles speak of "the sacrifices of Masses—for the quick and the dead" as "blasphemous fables and dangerous superstition," he understands that this repudiation was only directed against certain popular "Romish errors" about the multiplication of the effects of such Masses, not against the idea of a propitiatory sacrifice in itself. Again the statement that "the Romish doctrine concerning ... Invocation of Saints is a fond thing vainly invented" for him amounts to no more than a rejection of certain abuses of extreme Romanisers who went perilously near to idolatry. In this way the Church of England is exonerated from the apparent repudiation of these Catholic beliefs, and the presumption stands that she accepts all Catholic doctrine and artifices and rejects only the manifestly repugnant. Hence as Rome and Moscow and Canterbury (in the manner just explained) profess the three beliefs above specified, such beliefs are to be regarded as part of the revealed faith of Christendom. On the other hand such points as papal infallibility, indulgences, and the procession of the Virgin, which are generally rejected by one or more of the three great branches of the Catholic Church, have not the authority of the Living Voice behind them. They may be true, but it cannot be shown that they form part of the Revelation, the acceptance of which is obligatory upon all good Christians.

The most fundamental views are connected many other of the strange anomalies in the modern Ritualist position. To begin with, those who so think, feel bound to no particular reverence for the Church of their baptism or for the bishops that represent her. By her negative attitude to so many points of Catholic doctrine she has paralleled with the truth. She has by God's Providence retained the bare essentials of Catholicity and preserved the canonical succession of her bishops. Hence English Catholics are bound to be in communion with her and to receive the sacraments from her ministers, but they are free to criticize and up to a certain point to dissent. On the one hand the Ritualist believes that each Anglican bishop possesses jurisdiction, and that this jurisdiction, particularly in the matter of confessions, is conferred upon every clergyman in virtue of his ordination. Further the same jurisdiction inherent in the canonically appointed bishop of the diocese requires that English Catholics should be in communion with him, and renders it gravely sinful for them to hear Mass in the churches of the Established Church. This is one of the things that the Ritualist is prone to designate the Churches professing obedience to Rome. This participation in alien services is a schismatical act in England, while on the other hand on the Continent, an "English Catholic" is bound to respect the jurisdiction of the local ordinary by hearing Mass according to the Roman Rite, and it becomes a schismatical act to attend the services of any English Church.

The weak points in this theory of the extreme Ritualist party do not need insisting upon. Apart from the difficulty of reconciling this view of the supposed "Catholic" teaching of the Established Church with the hard facts of history and with the wording of the Articles, apart also from the circumstance that nothing was ever heard of any such theory until about twenty-five years ago, there is a logical contradiction about the whole assumption which it seems impossible to evade. The most fundamental doctrine of all in this Ritualist view is (for all the others are dependent on it) precisely the principle that the Living Voice is constituted by the consensus of the Churches, but this is itself a doctrine which Rome and Moscow explicitly reject and which the Church of England at best professes only negatively and imperfectly. Therefore by this principle the Church of England in the first instance is condemned in the second, and the principle falls to the ground or at any rate becomes a matter of opinion which binds no man in conscience.

The real strength of Ritualism and the secret of the steady advance, which even in its extreme forms it still continues to make, lies in its sacramental doctrine and in the true devotion which so many cases follow as a consequence from this more spiritual teaching. The revival of the celibate and ascetic ideal, more particularly in the communities of men and women living under religious vows and consecrated to prayer and works of charity, tends strongly in the same direction. It is the Ritualist clergy who more than any other body in the English Church have thrown themselves heart and soul into the effort to spiritualize the lives of the poor in the slums and to introduce a higher standard into the missionary work among the heathen. Whatever there may be of the pietistic element in the asceticism of the Ritualists, the entire sincerity, the real self-denial, and the apostolic spirit of a large proportion of both the clergy and laity belonging to this party form the greatest asset of which Anglicanism now disposes. (For these aspects of Ritualism which touch upon Anglican Orders and Canonization, see Anglican Orders and Union of Christendom.)

For a concise Catholic view of Ritualism at the present day, more particularly in its relations to the other parties in the Church of England, see WILKINSON, Non-Catholic Denominations (London, 1910). An excellent historical sketch of the movement may be found in TERRAULT-DANOIS, La renaisssance catholique en Angleterre au XIXe siècle (Paris, 1901-5), especially in the third volume. The most important Anglican account is probably FARRER-CODD, History of the English Church in the Nineteenth Century (London, 1910), especially Part I, also provided by HOLLAND in the Schaff-Herzog Encyclopedia of the Christian Religion (New York, 1907). The best materials for the history of the movement may be found in the Blue Books issued by the various royal commissions more especially the Report and the four accompanying volumes of minutes of evidence printed for the royal commission on ecclesiastical discipline in 1905. The letters and other documents published in such complete biographies as those of Pope Joan, Wilberforce, Archbishop Tait, Bishop Wilkinson, Archbishop Exell, Lord Shaftesbury, Countess of Shaftesbury are very useful. See also SPENCER JONES, England and the Holy See (London, 1902); MALLOCK, Doctrine and Doctrinal Disturbance (London, 1904); MACCOLL, The Church of England in the Rubric (London, 1906); MOTTLE, Aspects of Anglicanism (London, 1908); DOLLING, Ten Years in a Portsmouth Slum (London, 1898); JOHNSTON, Labour, Leisure and Salvation (London, 1875); ROSEO, The Bishop of Lincoln's Case (London, 1891); THEATRE, The Church of England, the Catholic Movement (London, 1890); TOMPSON, Historical Grounds of the Lambeth Judgments (London, 1892), and in general The Treasury Magazine and the now extinct Church Review. HERBERT THURSTON.
RIZAL

Rizal, José MERCADO, Filipino hero, physician, poet, novelist, and sculptor; b. at Calamba, Province of La Laguna, Luzon, 19 June, 1861; d. at Manila, 30 December, 1896. On his father's side he was descended from Lam-co, who came from China to settle in the Philippines in the latter part of the seventeenth century. His mother was of Filipino-Chinese-Spanish origin. Rizal studied at the Jesuit College of the Ateneo, Manila, where he received the degree of Bachelor of Arts with highest honours before he had completed his sixteenth year. He continued his studies in Manila for four years and then proceeded to Spain, where he devoted himself to philosophy, literature, and medicine, with ophthalmology as a specialty. In Madrid he became a Freemason, and thus became associated with men like Zorilla, Sagasta, Castelar, and Balaguer, prominent in Spanish politics. Here and in France he began to imbibe the political ideas, which later cost him his life. In 1885, Rizal, as a medical student in the University of Heidelberg became acquainted with Virchow and Blumenrett. In Berlin was published his novel "Noli me tangere" (1886) characterized, perhaps too extravagantly, by W. D. Howells as "a great novel" written by one "born with a gift so far beyond that of any or all of the authors of our roaring literary successes". Several editions of the work were published in Manila and in London, and a French translation ("Bibliothèque sociologique", num. 25, Paris, 1899), and two abbreviated English translations of little value: "An Eagle's Flight" (New York, 1900), and "Friars and Filipinos" (New York, 1902). The book satirizes the friars in the Philippines as well as in Spain. Rizal's satirical spirit entered the fiction of his country's transient ancestry of domestic origin. The friars were the land-lords of a large hacienda occupied by his father; there was vexatious litigation, and a few years later, by Weyler's order, soldiers destroyed the buildings on the land, and various members of the family were exiled to other parts of the Islands.

Rizal returned to the Philippines in 1887. After a stay of about six months he set out again for Europe, passing through Japan and the United States. In London he prepared his annotated edition of Morga's "Sucesos de las Islas Filipinas" which he completed in Paris (1890). In Belgium he published (Ghent, 1891; Manila, 1900) "El Filibusterismo", a sequel to "Noli me tangere". Its animus may be judged from its dedication to three Filipino priests who were executed for complicity in the Cavite outbreak of 1872. In 1891 he arrived in Hong-Kong, where he practised medicine. The following year he went to Spain before his arrival a case was filed against him for "anti-religious and anti-patriotic propaganda". On 7 July the governor-general ordered Rizal's deportation to Mindanao. The reasons given were the finding in his baggage of a package of leaflets, "sati-rising the friars and tending to de-catholicize and de-nationalize the people"; and the "publication of 'El Filibusterismo' dedicated to the memory of three traitors—condemned and executed by competent authority—and whom he haile as martyrs". Rizal spent four years in peaceful exile in Dapitan, Mindanao, when he volunteered his services to the governor to go to Cuba as a surgeon in the Spanish Army. The offer was accepted. When he arrived in Spain, he was arrested and brought back to Manila, where he was charged with founding unlawful associations and promoting rebellion, and sentenced to be shot. Rizal had given up the practice of his profession some years before. But not long he gladly admitted the imprisonments of the Jesuit Fathers, his former professors, and he wrote a retraction of his errors and of Masonry in particular. On the morning of his execution he assisted at two Masses with great fervour, received Holy Communion and was married to an illegitimate girl from Hong-Kong with whom he had cohabited in Dapitan. Almost the last words he spoke were to the Jesuit who accompanied him: "My great pride, Father, has brought me here." 30 December, the day of his execution, has been made a national holiday by the American Government and $50,000 appropriated for a monument to his memory; a new province, adjacent to Manila, is called Rizal; the two centavo postage stamp and two peso bill—the denominations in most common use—bear his picture. Whether he was unjustly executed or not, is disputed; his plea in his own defense is undoubtedly a strong one (cf. Retana). The year of his death was a year of great uprising in the Islands and feeling ran high. Whatever may be said about his sentence, its fulfillment was a political mistake. Rizal, it is said, did not favour separation from Spain, nor the expulsion of the friars. Nor did he wish to accomplish his ends—reforms in the Philippines—by revolution, but by education, education, and good education, by the education of his countrymen and their formation to habits of industry.

Besides the works mentioned above, Rizal wrote a number of poems and essays in Spanish of literary merit, some translations and short papers in German, French, English, and in his native dialect, Tagalog.
A complete list of his writings is given in Retana, "Vida y escritos del Dr. Rial" (Madrid, 1807); Craio, The Story of José Rial (Manila, 1900); El Dr. Rial y su obra en La Juventud (Barcelona, Jan. Feb., 1897); Plt, La muerte cristiana del Dr. Rial (Manila, 1910); Craio, Los errores de Retana (Manila, 1910).

PHILIP M. FINEGAN.

Robber Council of Ephesus. See Ephesus.

Robbia, ANDREA DELLA, nephew, pupil, assistant, and sharer of Luca's secrets, b. at Florence, 1431; d. 1528. It is often difficult to distinguish between his works and Luca's. His, undoubtedly, are the medallions of infants for the Foundling Hospital, Florence, and the noble Annunciation over the inner entrance; the Meeting of St. Francis and St. Dominic in the loggia of the Palazzo; the Disrobing Madonna of the Architecta; the Virgin adoring the Divine Child in the Crib and other pieces in the Bargello; the fine St. Francis at Assisi; the Madonna della Quercia at Viterbo; the high altar (marble) of S. Maria delle Grazie at Arezzo; and the rich and variegated decorations of the vaulted ceiling, porch of Pistoia Cathedral, and many other works.

Andrea had several sons, of whom Giovanni, Girolamo, Luca the Younger, and Ambrogio are the best known. Giovanni executed the famous reliquaries for the Ospedale del Ceppo, Pistoia; and Girolamo worked much in France, where he died. The Delia Robbia school gradually lost power and inspiration, the later works being often overcrowded with figures and full of conflicting colour.

See bibl. of ROBBIA, LUCA DI SIMONE DELLA. M. L. HANDLEY.

Robbia, LUCA DI SIMONE DELLA, sculptor, b. at Florence, 1400; d. 1481. He is believed to have studied design with a goldsmith, and then to have worked in marble and bronze under Ghiberti. He was early invited to execute sculptures for the Cathedral of S. Maria del Fiore and the Campanile. The latter—representing Philosophy Arithmetic, Grammar, Orpheus, and Tubalcaín (1437)—are all somewhat Gothic in character. For the organ-galler of the cathedral he made fame panels of the Cantorie, groups of boys singing and playing upon musical instruments (1431–8), now in the Museo del Duomo. For the north sacristy he made a bronze door; figures of angels bearing candles and a fine glazed earthenware effigy of Christ rising from the tomb over the entrance are also of his execution. Above the entrance to the south sacristy he made the Ascension (1446). From this time on, Luca seems to have worked almost entirely in his new ware. The medium was not unknown, but by dint of experimenting he brought his material to great perfection. The colours are brilliant, fresh, and beautiful in quality, the blue especially being quite inimitable. The stanniferous glaze, or enamel, contained various minerals and was Luca's own secret; in the firing, it became exceedingly hard, durable, and bright. Luca's design is generally an architectural setting with a very few figures, or half figures, and rich borders of fruits and flowers. He excels in simplicity and loveliness of composition. His madonnas have great charm, dignity, and grace. In the earlier productions colour is used only for the background, for the stems and leaves of lilies, and the eyes; an occasional touch of gold is added in coronal or lettering. Later Luca used colour more freely. The Della Robbia earthenwares are so fresh and beautiful and so decorative that even in Luca's time they were immediately in great request. They are seen at their best in Florence. A few of the principal ones are: the crucifix at S. Miniato and the ceiling of the chapel in which it is found; the medallions of the vault (corners of the Ghost; corners, the Virtues) in the chapel of Cardinal Jacopo of Portugal, also at S. Miniato; the decorations of the Pazzi chapel at Sta. Croce; the armorial bearings of the Arti at Or San Michele; the Madonna of S. Pierino; the exquisite street lunette of Our Lady and Angels in the Via dell' Agnolo; the tomb of Bishop Benozzo Federighi at Sta. Maria di Strozzi; the Bargello, the Madonna of the Roses, the Madonna of the Apple, and a number of equally fine reliefs. Of his works outside Florence may be mentioned: the Madonna at Urbino; the tabernacle at Impruneta, the vault panels of S. Giobbe, Venice (sometimes said to be by the school only); medallions of Justice and Temperance, Museum of Cluny, Paris; arms of René d'Anjou, London, South Kensington Museum, and other works in Naples, Sicily, and elsewhere. The admirable and much disputed group of the Visitation at S. Giovanni Forcivitas, Pistoia, is attributed both to Luca and to Andrea.

Robert, SAINT, founder of the Abbey of Chaise-Dieu in Auvergne, b. at Aurillac, Auvergne, about 1000; d. in Auvergne, 1067. On his father's side he belonged to the family of the Counts of Aurillac, who had given birth to St. Landry. He studied at Brioude near the basilica of St-Julien, in a school open to the nobility of Auvergne by the canons of that city. Having entered their community, and being ordained a priest, Robert distinguished himself by his piety, charity, apostolic zeal, eloquent discourses, and the gift of miracles. For about forty years he remained at Cluny in order to live under the rule of his compatriot saint, Abbé Odilo. Brought back by force to Brioude, he started anew for Rome in order to consult the pope on his project. Benedict IX encouraged him to return with a large sum to the wooded plateau south-east of Auvergne. Here he built a hermitage under the name of Chaise-Dieu (Casa Dei). The renown of his virtues having brought him numerous disciples, he was obliged to build a monastery, which he placed under the rule of Saint Benedict (1030). Leo IX erected the Abbey of Chaise-Dieu, which became one of the most flourishing in Christendom. At the death of Robert it numbered 300 monks and had sent multitudes all through the centre of France. Robert also founded a community of women at Lavadieu near Brioude. Through the elevation of Pierre Roger, monk of Chaise-Dieu, to the Roman pontificate, under the name of Clement VI, the abbey reached the height of its glory. The body of Saint Robert, preserved therein, was burned by the Huguenots during the religious wars. His work was destroyed by the French Revolution, but there remain
for the admiration of tourists, the vast church, cloister, tomb of Clement VI, and Clementine Tower. The feast-day of St. Robert is 24 April.

Robert Johnson (Richardson), Blessed. See Thomas Ford, Blessed.

Robert of Arbrissel, itinerant preacher, founder of Fontevraud, b. c. 1047 at Arbrissel (now Arbrissel) near Rhétiers, Brittany; d. at Orsan, probably 1117. Robert studied in Paris during the pontificate of Gregory VII, perhaps under Alexander I, and displayed considerable theological knowledge. The date and place of his ordination are unknown. In 1089 he was recalled to his native Diocese of Rennes by Bishop Sylvester de la Guerche, who desired to reform his flock. As archpriest, Robert devoted himself to the suppression of simony, lay investiture, clerical marriage, irregular marriages, and to the healing of feuds. This reforming zeal aroused such enmity that upon Sylvester's death in 1093, Robert was compelled to leave the diocese. He went to Angers and there commenced ascetic practices which he continued throughout his life. In 1095 he was called to the court of King Louis VI of France (the Fat, or Laval), living a life of severest penance in the company of Bernard, afterwards founder of the Congregation of Tiron, Vitalis, founder of Savigny, and others of considerable note. His piety, eloquence, and strong personality attracted many followers, for whom in 1096 he founded the monastery of Canons Regular of La Roë, becoming himself the first abbot. In the same year Urban II summoned him to Angers and appointed him a "preacher (seminiserbus, cf. Acts 17, 18) second only to himself with orders to travel everywhere in the performance of this duty" (Vita Baldrici).

There is no evidence that Robert assisted Urban to preach the Crusade, for his theme was the abandonment of the world and especially poverty. Living in the utmost destitution, he addressed himself to the poor and would have his followers known only as the "poor of Christ," while the ideal he put forward was: "In nakedness to follow Christ naked upon the Cross." His eloquence, heightened by his strikingly ascetic appearance, drew crowds everywhere. Those who desired to embrace the monastic state under his leadership he sent to La Roë, but the Canons objected to the number and diversity of the postulants, and between 1097 and 1100 Robert formally resigned his abbacy, and founded Fontevraud (q. v.). His disciples were of every age and condition, including even lepers and convicted prostitutes. Robert continued his missionary journeys over the whole of Western France till the end of his life, but little is known of the period. At the Council of Poitiers, Nov., 1100, he supported the papal legates in excommunicating Philip of France on account of his lawless union with Bertrade de Montfort; in 1110 he attended the Council of Nantes. Knowledge of his approaching death caused him to take steps to ensure the permanence of his foundation at Fontevraud. He imposed a vow of stability on his monks and summoned a Chapter (September, 1110) to settle the form of government. From Hautebruère, a priory founded by the penitent Bertrade, he went to Orsan, another priory of Fontevraud, where he died. The "Vita Andreæ" gives a detailed account of his last year.

Robert was never canonised. The accusation made against him by Geoffrey of Vendôme of extreme indiscretion in his choice of exceptional ascetic practices (see P. L., CLVII, 182) was the source of much controversy during the seventeenth and eighteenth centuries. Other evidence of eccentric actions on Robert's part and scandals among his mixed followers may have led to give rise to these stories. The hagiographers did everything in their power to discredit the reports on their founder. The accusers of Robert were Marbotius of Rennes and Geoffrey of Vendôme were without sufficient cause declared to be forgeries and the MS. letter of Peter of Saumur was made away with, probably at the instigation of Jeanne Baptiste de Bourbon, Abbess of Fontevraud. This means that King Henry IV applied to Innocent X for the beatification of Robert, her request being supported by Louis XIV and Henrietta of England. Both this attempt and one made about the middle of the nineteenth century failed, but Robert is usually given the title of "Blessed." The original translation of the Rule of Fontevraud no longer exists; the only surviving writing of Robert is his letter of exhortation to Ermenegarde of Brittany (ed. Petigny in "Bib. de l'école des Chartes," 1854, V, iii).

Robert of Courcy-Durasson, de Curisius, Curibus, etc., cardinal, b. at Aviron (now Airon) in Normandy; d. at Domietta, 1218. After having studied at Oxford, Paris, and Rome, he became in 1211 Chancellor of the University of Paris; in 1212 he was made Cardinal of St. Stephen on the Celian Hill; in 1213 he was appointed legate a latere to preach the crusade, and in 1215 was placed at the head of an embassy to inquire into the errors prevalent at the University of Paris. He took an active part in the campaign against heresy in France, and accompanied the army of the Crusaders into Egypt as legate of Honorius III. He died during the siege of Damietta. He is the author of several works, including a "Summa" devoted to questions of canon law and ethics and dealing at length with the question of usury. His interference in the affairs of the University of Paris, in the midst of the confusion arising from the introduction of the Arabian translations of Aristotle, resulted in the proscription (1216) of the metaphysical as well as the natural theologians, and the condemnation of the Pantheists, David of Dinant, and Amaury of Bene, but permits the use, as texts, of Aristotle's "Ethics" and logical treatises. The development also contains several enactments relating to academic discipline.

Robert of Geneva, antipope under the name of Clement VII, b. at Geneva, 1342; d. at Avignon, 16 Sept., 1394. He was the son of Count Amadeus III. Appointed prothonotary Apostolic in 1359, he became Bishop of Thérouanne in 1361, Archbishop of Cambrai in 1368, and cardinal 30 May, 1371. As papal legate in Upper Italy (1376–78), in order to put down a rebellion in the Pontifical States, he is said to have authorized the massacre of 4000 persons at Cesena, and was consequently called "the executioner of Cesena." Elected to the papacy at Fondi, 20 Sept., 1378, by the French cardinals in opposition to Urban VI, he was the first antipope of the Great Schism. France, Scotland, Castile, Aragon, Navarre, Portugal, Savoy, some minor German princedoms, and Norway acknowledged his authority. Unable to maintain himself in Italy he took up his residence at Avignon, where he became completely dependent.
on the French Court. He created excellent cardinals, but donated the larger part of the Pontifical States to Louis II of Anjou, resorted to simony and extortion to meet the financial needs of his court, and seems never to have sincerely desired the termination of the Schism.

N. A. WEBBER.

Robert of Jumièges, Archbishop of Canterbury (1051–2). Robert Champart was a Norman monk of St. Ouen at Rouen and was prior of that house when in 1037 he was elected Abbot of Jumièges. As abbot he began to build the fine Norman abbey-church, and at this time he was able to be of service to St. Edward the Confessor, then an exile. When Edward returned to England in 1042 Robert accompanied him and was made Bishop of London in 1044. In this capacity he became the head of the Norman party in opposition to the Saxon party under Godwin, and exerted supreme influence over the king. In 1051 Robert was appointed Archbishop of Canterbury and went to Rome (now removed the appointment, being very unpopular among the English clergy who resented the intrusion of a foreigner into the metropolitan see. For a time he was successful in opposing Godwin even to the extent of instigating his exile, but when Godwin returned in 1052 Robert fled to Rome and was refused by the Witenagemot). The pope reinstated him in his see, but he could not regain possession of it, and William of Normandy made his continued exclusion one of his pretexts for invading England. The last years of his life were spent at Jumièges, but the precise date of his death has not been ascertained, though Robert de Torigni states it as 26 May, 1055. The valuable liturgical MS. of the "Missal of Robert of Jumièges", now at Rouen, was given by him, when Bishop of London, to the abbey at Jumièges.

Robert of Melun (De Meldunu; Meldunensis; Meldunus), an English philosopher and theologian, b. in England about 1100; d. at Hereford, 1167. He gets his surname from Melun, near Paris, where, after having studied under Hugh of St. Victor and probably Abelard, he taught philosophy and theology. Among his pupils were John of Salisbury and Thomas Becket. Through the influence of the latter he was made Bishop of Hereford in 1163. Judging from the tributes paid him by John of Salisbury in the "Metoilogus" (P. L., CXCV), Robert must have enjoyed great renown as a teacher. On the question of Universals, which agitated the schools in those days, he opposed the nominalism of Roscelin and seemed to favour a doctrine of moderate realism. His principal work, "Summa Theologica" or "Summa Sententiarum" is still in MS., except portions which have been published by Du Boulay in his "Historia Univers. Parisi" ii, 536 sqq. "Questiones de Divina Pagina" and "Questiones de Epistolis Pauli", both of which are kept in the Bibliothèque Nationale. Those who have examined the "Summa" pronounce it to be of great value in tracing the history of scholastic doctrines.

For materials for the History of Thomas Becket see BRIT. SS. contains valuable data; Dr. WOLF, Hist. of Medial Phil. tr. GIFFORD (New York, 1909), 210; HABEY, Hist. de la phil. scol. (Paris, 1878), 390 sqq. WILLIAM TURNER.

Robert of Molesme, Saint, b. about the year 1029, at Champagne, France, of noble parents who bore the name of Thierry and Remougardo; d. at Molesme, 17 April, 1111. When fifteen years of age, he commenced his novitiate in the Abbey of Montier-la-Celle, or St. Pierre-la-Celle, situated near Troyes, of which he became later prior. In 1083 he succeeded Hunault II as Abbot of St. Michael de Tonnerre, in the Diocese of Langres. About this time a band of seven anchorites who lived in the forest of Collan, in the same diocese, sought to have Robert for their chief, but the monks, despite their constant resistance to his authority, insisted on keeping their abbot who enjoyed so great a reputation, and was the ornament of their house. Their intrigues determined Robert to resign his charge in 1071, and seek refuge in the Abbey of Montier-la-Celle. There for several years he was placed over the priory of St. Ayoul de Provins, which depended on Montier-la-Celle. Meantime two of the hermits of Collan went to Rome and besought Gregory VII to give them the prior of Provins for their supe-
prior. The pope granted their request, and in 1074 Robert initiated the hermits of Collan in the monastic life. As the location at Collan was found unsuitable, Robert founded a monastery at Molesme in the valley of Langres at the close of 1075. To Molesme as a guest came the distinguished canon and theologian, Abbot Honorius (d. 1117) of Burgundy, in 1082, placed himself under the direction of Robert, before founding the celebrated order of the Chartreux. At this time the primitive discipline was still in its full vigour, and the religious lived by the labour of their hands. Soon, however, the monastery became wealthy through a number of donations, and with wealth, desires, the vigilance of the abbot, came laxity of discipline. Robert endeavoured to restore the primitive strictness, but the monks showed so much resistance that he abdicated, and left the care of his community to his prior, Alberic, who retired in 1093. In the following year he returned with Robert to Molesme. On 29 Nov., 1095, Urban II confirmed the institute of Molesme. In 1098 Robert, still unable to reform his rebellious monks, obtained from Hugues, Archbishop of Lyons and Legate of the Holy See, authority to found a new order on new lines. Twenty-one religious left Molesme and set out joyfully for a desolate called Citeaux, where the Abbey of Citeaux (q.v.) was founded 21 March, 1098.

Left to themselves, the monks of Molesme appealed to the pope, and Robert was restored to Molesme, which thereafter became an ardent centre of monastic life. Robert died 17 April, 1111, and was buried with great pomp in the church of the abbey. Pope Honorius III by Letters Apostolic in 1223 authorised his veneration in the church of Molesme, and soon after the veneration of St. Robert was extended to the whole Church by a pontifical Decree. The feast was fixed at first on 17 April, but later it was transferred to 29 April. The Abbey of Molesme existed up to the French Revolution. The remains of the holy founder are preserved in the parish church.

F. M. GILDS.

Robert of Newminster, Saint, b. in the district of Craven, Yorkshire, probably at the village of Gargrave; d. 7 June, 1159. He studied at the University of Paris, where he is said to have composed a commentary on the Psalms; became priest parochial at Gargrave, and later a Benedictine at Whitby, from where he was expelled by his superior, he journeyed to the Cistercian monastery of Fountains. About 1138 he headed the first colony sent out from Fountains and established the Abbey of Newminster near the castle of Ralph de Merlay, at Morpeth in Northumberland. During his abbacy three colonies of monks were sent out; monasteries were founded: Pipewell (1143), Roche (1147) and Sawley (1148).  

Gargrave's life tells that an accusation of misconduct was brought against him by his own monks and that he went abroad (1147–8), to defend himself before St. Bernard, but doubt has been cast upon the truth of this story, which may have arisen from a desire to associate the English saint personally with the greatest of the Cistercians. His tomb in the church of Newminster became an object of pilgrimage; his feast is kept on 7 June.

R. H. D. WEBSTER.

Robert Pultus (PULLEN, PULLAN, PULLY), cardinal, English philosopher and theologian, of the twelfth century, b. in England about 1059; d. 1147–50. He seems to have studied in Paris in the first decades of the twelfth century. In 1153 he began to teach at Oxford, being among the first of the celebrated teachers in the schools which were afterwards organized into the University of Oxford. After the death of Henry II he returned to Paris; whence he moved to Rome, where he was appointed cardinal and Chancellor of the Apostolic See. He suffered always on the side of orthodoxy and against the encroachments of the rationalistic tendency represented by Abelard. This we know from the biography of St. Bernard written by William of St. Thierry, and from his letters. Robert wrote a compendium of theology, entitled "Sententiarium Theologicum Libri Octo," which, for a time, held its place in the schools of Western Europe as the official text book in theology. It was, however, supplanted by the "Libri Sententiarum" of Peter the Lombard, compared with whom Robert seems to have been more inclined to strict interpretation of ecclesiastical tradition than to yield to the growing demands of the dialectical method in theology and philosophy. The Lombard, however, finally gained recognition and decided the fate of scholastic theology in the thirteenth century. Robert's "Summa" was first published by the Benedictine Dom Mathieu (Paris, 1655). It is reprinted in Migne (P. L., CLXXXVII, col. 506); its date is 1155; and the Abbey of Citeaux (q.v.) was founded 21 March, 1098.

Left to themselves, the monks of Molesme appealed to the pope, and Robert was restored to Molesme, which thereafter became an ardent centre of monastic life. Robert died 17 April, 1111, and was buried with great pomp in the church of the abbey. Pope Honorius III by Letters Apostolic in 1223 authorised his veneration in the church of Molesme, and soon after the veneration of St. Robert was extended to the whole Church by a pontifical Decree. The feast was fixed at first on 17 April, but later it was transferred to 29 April. The Abbey of Molesme existed up to the French Revolution. The remains of the holy founder are preserved in the parish church.

Robert Pultus (PULLEN, PULLAN, PULLY), cardinal, English philosopher and theologian, of the twelfth century, b. in England about 1059; d. 1147–50. He seems to have studied in Paris in the first
1609, in which month he was taken to Newgate and would have been executed but for the intercession of de la Broderie, the French ambassador, whose petition to King Henry VIII. induced Robert to visit Spain and Douai, but returned to England within a year, knowing that his death was certain if he were again captured. This event took place on 2 December, 1610; the pursuivants arriving just as he was concluding Mass, took him to Newgate in his vestments. On 5 December he was tried and found guilty of endeavouring to forbad priests to minister in England, and on 10 December was hanged, drawn, and quartered at Tyburn. The body of Roberts was recovered and taken to St. Gregory's, Douai, but disappeared during the French Revolution. Two fingers are still preserved at Downside and Eton College, which believe that the body of Robert exist. At Pentington is a unique contemporary engraving of the martyrdom which has been reproduced in the "Downside Review" (XXIV, 286). The introduction of the cause of beatification was approved by Leo XIII in his Decree of 4 December, 1886.

G. R. HUDLESTON.

Robertson, James Burton, historian, b. in London 15 Nov, 1800; d. at Dublin 14 Feb., 1877, son of Thomas Robertson, a landed proprietor in Grenada, West Indies, where he spent his boyhood. In 1809 his father brought him to England, and placed him at St. Edmund's College, Old Hall (1810), where he remained nine years. In 1819 he began his legal studies, and in 1825 was called to the bar, but did not practise. For a time he studied philosophy and theology in France under the influence of his friends Lamennais and Gerbert. In 1833 he published his translation of Frederick Schlegel's Philosophy of History, which came to a large market. From 1837 to 1854 he lived in Germany or Belgium. During this time he translated Möhler's "Symbolism," adding an introduction and a life of Möhler. This work considerably influenced some of the Oxford Tractarians. In 1855 Dr. Newman nominated Robertson as professor of geography and modern history in the Catholic University of Ireland. In this capacity he published two series of lectures (1859 and 1864), as well as "Lectures on Edmund Burke" (1866), and a translation of Dr. Hergenrath's "Anti Janus" (1870) to which he prefixed a history of Gallicanism. He also wrote a poem, "The Prophet English," and contributed several articles to the "Dublin Review." His services to literature obtained for him a pension from the Government in 1869, and the degree of Doctor of Philosophy from Pius IX (1875). He is buried in Clonskeagh cemetery. Tablet (24 Feb., 1877); Gallow in Bibl. Dict. Eng. Cath., The Educandum, II, no. 8 (1895).

EDWIN BURTON.

Robinson, Christopher, Venerable, martyr, b. at Woodside, near Westward, Cumberland, date unknown. He was ordained at the English College at Reims in 1589, and was ordained priest and sent on the mission in 1592. Two years later he was a witness of the condemnation and execution of the venerable martyr John Boote (q. v.) at Durham, and wrote a very graphic account of this, which has been printed from a seventeenth-century transcript in the first volume of the "Catholic Record Society's Publications" (London, 1905), pp. 85-92. His labours seem to have been mainly in Cumberland and Westmoreland; but nothing is known about them. Eventually he was arrested and imprisoned at Carlisle, where Bishop Robinson, who may have been a being condemned, under 27 Ellis, c. 2, for being a priest and coming into the realm, suffered the last penalty with such cheerful constancy that his death was the occasion of much regret. CHALLONER, Missionary Priests, I, no. 114; GALLOW, Bibl. Dict. Eng. Cath., s. v.; WILSON in Victoria History of Cumberland, II (London, 1905), 87.

JOHN B. WAINEWRIGHT.

Robinson, John, Venerable. See Wilcox, Robert, Venerable.

Robinson, William Callyhan, jurist and educator, b. 26 July, 1834, at Norwich, Conn.; d. 6 Nov., 1911, at Washington, D.C. After preparatory studies at Norwich Academy, Williston Seminary, and Wesleyan University, he entered Dartmouth College from which he graduated in 1854. Further studies in the Theological Seminary of the Protestant Episcopal Church, was graduated in 1857, and ordained to the Episcopal Ministry, in which he served first at Pittston, Pa. (1857-58), and then at Scranton, Pa. (1859-62). He was received into the Catholic Church in 1863, was admitted to the Bar in 1864, and has been lecturer and professor in law in Pennsylvania and Washington (1869-95). For two years (1880-91) he was judge of the Court City and later (1874-86) judge of the Court of Common Pleas at New Haven, Conn. In 1874 also he served as member of the Legislature. From Dartmouth College he received (1870) the degree of L.L.D., and from Yale University in 1881 the degree of M.A. He married, 2 July, 1857, Anna Elizabeth Haviland and, 31 March, 1891, Ultima Marie Smith. His thorough knowledge of law made him eminent as a teacher and enabled him to render important service to the Church. In 1895 he was appointed professor in the Catholic University of America, where he organized the School of Social Sciences and remained as Dean of the School of Law until his death. Besides articles contributed to various periodicals, he wrote: "Life of E. B. Kelly" (1855); "Notes of Elementary Law" (1876); "Elementary Law" (Boston, 1876); "Elements of Jurisprudence" (Boston, 1878); "Davis Rerum" (1880), and "Paaides" (Boston, 1880); "Forensic Oratory" (Boston, 1893); "Elements of American Jurisprudence" (Boston, 1900). Catholic University Bulletin (Dec., 1911); Catholic Educational Review (Dec., 1911).

E. A. FAB.

Rocaberti, Juan Tomás de, theologian, b. of a noble family at Perelada, in Catalonia, c. 1624; d. at Madrid, 13 June, 1699. Educated at Gerona he entered the Dominican convent there, receiving the habit in 1640. His success in theological studies at the convent of Valencia secured for him the chair of theology in the university. In 1668 he was chosen provincial of Aragon, and in 1670 the General Chapter elected him general of the order. He became endeared to all who came in contact with him. No one, perhaps, held him in greater esteem than Clement X. The celebrated Dominican, Count de Comillas, presented to him his "Theologia mentis et cordis". He obtained the canonization of Sts. Louis Bertrand and Rose of Lima, the solemn beatification of Pius V, and the annual celebration in the order of the feast of Bl. Albert the Great and others. In 1676 he was appointed Bishop of Valencia, and then governor of that province. In 1695 he was made inquisitor-general of Spain.

Rocaberti is best known as an active apostle of the papacy against Gallicans and Protestants. His first work in this sense was "De Romani pontificis auctoritate" (3 vols., Valencia, 1691-94). His most important work is the "Bibliotheca Maxima Ponti-
ROCAMADOUR

ROCH

100

ficia," (21 vols., Rome, 1887-99). In this monumental work the author collected and published in admirable order and in their entirety, all the important works dealing with the primacy of the Holy See from an orthodox point of view, beginning with Abra-

ham Basilius and ending with Zacharias Boverius. An excellent summary is given in Hurter's "Nomenclator", 2nd ed. (2 vols., Rome, 1894), see "Bibliografia de las Ordenes Religiosas, de los Hospitales y del Templo de san Juan de Jerusalén" (Paris, 1933).

Rocamadour, communal chief town of the canton of Gramat, district of Gourdon, Department of Lot, in the province of Cahors and the ancient province of Quercy. This village by the wonderful beauty of its situation merits the attention of artists and excites the curiosity of archaeologists; but its reputation is due especially to its celebrated sanctuary of the Blessed Virgin which for centuries has attracted pilgrims from every country, among them kings, bishops, and nobles.

A curious legend purporting to explain the origin of this pilgrimage has given rise to controversies between critical and traditional schools, especially in recent times. According to the latter, Rocamadour is indebted for its name to the founder of the ancient sanctuary, St. Amour, who was no other than Zachaeus of the Gospel, husband of St. Veronica, who wiped the Saviour's face on the way to Calvary. Driven forth from Palestine by persecution, Amour and Veronica embarked in a frail skiff and, guided by an angel, landed on the coast of Aquitaine, where they met Bishop St. Martial, another disciple of Christ who was preaching the Gospel in the south-west of Gaul. After journeying to Rome, where he witnessed the martyrdoms of Sts. Peter and Paul, Amadour, having returned to France, on the death of his spouse, withdrew to a wild spot in Quercy where he built a chapel in honour of the Blessed Virgin, near which he died a little later. This marvellous account, like most other similar legends, unfortunately does not make its first appearance till long after the age in which the chief actors are deemed to have lived. The name of Amadour occurs in no document previous to the compilation of his Acts, which on careful examination and on an application of the rules of the cursus to the text cannot be judged older than the tenth century. It is now well established that St. Martial, Amadour's contemporary in the legend, lived in the third not the first century, and Rome has never included him among the members of the Apostolic College. The mention, therefore, of St. Martial in the Acts of St. Amadour would alone suffice, even if other proof were wanting, to prove them a forgery. The untrustworthiness of the legend has led some recent authors to suggest that Amadour was the own hermit of possibly St. Amator, Bishop of Auxerre, but this is mere hypothesis, without any historical basis. Although the origin of the sanctuary of Rocamadour, lost in antiquity, is thus first set down along with fabulous traditions which cannot bear the light of sound criticism, yet it is undisputed that this spot, hallowed by the prayers of innumerable multitudes of pilgrims, is worthy of our veneration. After the religious manifestations of the Middle Ages, Rocamadour, as a result of war and revolution, had become a ruin. Recently, owing to the zeal and activity of the bishops of Cahors, it seems to have revived and pilgrims are beginning to crowd there again.

De Cinty, "Hist. et miracles de N. D. de Roc-Amadour au pays de Quercy" (Tulle, 1866); Cailliau, "Roc-Amadour" (Paris, 1934); Leblanc, "Le Journal de Marie ou la guide du pèlerin de Roc-Amadour" (Paris, 1836); Servois, "Notices et extraits du recueil des miracles de Roc-Amadour" (Paris, 1827); Lieutaud, "La Vida de S. Amadour, texte provençal du XII e siècle" (Cahors, 1788); Boissevain, "Social Amadour et Sainte Veronique" (Paris, 1888); Leblanc, "Le Journal de Marie ou la guide du pèlerin de Roc-Amadour" (Paris, 1836); Enard, "Lettre pastorale sur l'hist. de Roc-Amadour" (Cahors, 1899); Ruyssen, "L'archéologie archéologique", (Paris, 1904), an excellent work containing the definitive history of Roc-Amadour; Ales, "Les miracles de N. D. de Roc-Amadour au pays de Quercy", texte et traduction de mesdames archéologues nationales (Paris, 1907), corroborating the work of Ruyssen.

León Clugnet.

ROCCA, ANGELO, founder of the Angelica Library at Rome, b. at Rocca, now Arecevia, near Ancona, 1545; d. at Rome, 8 April, 1620. He was received at the age of seven into the Augustinian monastery at Camerino (hence also called Camers, Camerinus), studied at Perugia, Rome, Venice, and in 1577 graduated as doctor in theology from Padua. He became secretary to the superior-general of the Augustinians in 1579, was placed at the head of the Vatican printing-office in 1585, and entrusted with the superintendence of the projected editions of the Bible and the writings of the Fathers. In 1595 he was appointed sacristan in the papal chapel, and in 1605 became titular Bishop of Tagaste in Numidia. The public library of the Augustinians at Rome, formerly established in 23 October, 1614, perpetuates his name. It is mainly to his efforts that we owe the edition of the Vulgate published during the pontificate of Clement VIII. He also edited the works of Elio Colonna (Venice, 1581), of Augustinus Triphanius (Rome, 1582), and wrote: "Bibliotheca theologica et scripturalis epimetheus" (Rome, 1594); "De Sacrosancto Christi corpore romanis pontificibus iter conscientius preferendo commentarius" (Rome, 1598); "De canonisationis sanctorum commentarius" (Rome, 1601); "De canonicis" (Rome, 1612). An incomplete collection of his works was published in 1719 and 1745 at Rome: "Thesaurus pontificum sacrarumque antiquitatum neumon rituum praxim et ceremoniarum".

N. A. WEBER.

ROCH, SAINT, b. at Montpellier towards 1295; d. 1327. His father was governor of that city. At his birth St. Roch is said to have been found miraculously marked on the breast with a red cross. Deprived of his parents when about twenty years old, he distributed his fortune among the poor, handed over to his uncle the government of Montpellier, and, in the disguise of a mendicant pilgrim, set out for Italy, but stopped at Aquapendente, which was stricken by the plague, and devoted himself to the plague-stricken, curing them with the sign of the cross. He next visited Cesena and other neighbouring cities and then...
ROCHESTER

Rome. Everywhere the terrible scourge disappeared before his miraculous power. He visited Mantua, Modena, Parma, and other cities with the same results. At Fiesco, he himself was stricken with the plague. He withdrew to a hut in the neighbouring forest, where his wants were supplied by a gentleman named Goatham, who by a miracle learned the place of his retreat. After his recovery Roch returned to France. Arriving at Montpellier and refusing to disclose his identity, he was taken for a spy in the disguise of a pilgrim, and nearly perished by order of the governor. But a noble uncle, some writers say, — who five years later he died. The miraculous cross on his breast as well as a document found in his possession now served for his identification. He was accordingly given a public funeral, and numerous miracles attest his sanctity.

In 1414, during the Council of Constance, the plague having broken out in that city, the Fathers of the Council ordered public prayers and processions in honour of the saint, and immediately the plague ceased. His relics, according to Wadding, were carried furtively to Venice in 1485, where they are still preserved. It is commonly held that he belonged to the Third Order of St. Francis; but it cannot be proved. Wadding leaves it an open question. Urban VIII approved the ecclesiastical office to be recited on his feast (16 August). Paul III instituted a confraternity, under the invocation of the saint, to have charge of the church and hospital erected during the pontificate of Alexander VII. The confraternity increased so rapidly that Paul IV raised it to an archconfraternity, with powers to aggregate similar confraternities of St. Roch. It was given a cardinalproctor, and a prelate of high rank was to be its immediate superior (see Reg. et Const. Societatis S. Rocco). Various favours have been bestowed on it by Pius IV (C. Regimini, 7 March, 1561), by Gregory XIII (C. dated 5 January, 1577), by Gregory XIV (C. Paternar. pont., 7 March, 1591), and by other pontiffs. It still flourishes.

JEAN-BAPTISTE ROCHEBAN

ROCHEBEAU, Jean-Baptiste de Vimeur, Count de, marshal, b. at Vendôme, France, 1 July, 1725; d. at Troué, 10 May, 1807. At the age of sixteen he entered the army and in 1745 became an aid to Louis Philippe, Duke of Orleans, subsequently commanding a regiment. He served with distinction in several important battles, notably those of Minorca, Crevély, and Minden, and was wounded at the battle of Laffleid. When the French monarch resolved to despatch a military force to aid the American patriots in the American Revolution, Rochambeau was created a lieutenant-general and placed in command of a body of troops which numbered some 6000 men. It was the smallness of this force that made Rochambeau at first averse to taking part in the American War, but his sympathy with the colonial cause compelled him finally to assent. When he arrived at Newport, Rhode Island July 780, and joined the American army under Washington, on the Hudson a few miles above the city of New York. Rochambeau performed the double duties of a diplomat and general in an alien army with rare distinction amidst somewhat trying circumstances, and we are able to write of him as the man who was unrivalled in military skill; he was a good general, but unaccountably cooled between Washington and himself, which, fortunately, was of but passing import (see the correspondence and diary of Count Axel Fersen). After the first meeting with the American general he marched with his force to the Virginia peninsula, and rendered heroic assistance at Yorktown in the capture of the English forces under Lord Cornwallis, which concluded the hostilities. When Cornwallis surrendered, 19 Oct., 1781, Rochambeau was presented with one of the captured cannon. After the surrender he embarked for France amid ardent protestations of gratitude and admiration from the captives and the men of the American army. In 1793 he received the decoration of Saint-Éprit and obtained the baton of a marshal of France in 1791. Early in 1792 he was placed in command of the army of the North, and conducted a force against the Austrians, but resigned the same year and narrowly escaped the guillotine when the Jacobian revolutionary power had obtained supreme control in Paris. When the fury of the revolution had spent itself, Rochambeau was reinstated in the regard of his countrymen. He was granted a pension by Napoleon Bonaparte in 1804, and was decorated with the Cross of Grand Officer of the Legion of Honour. The last years of the distinguished military leader’s life were passed in the dictation of his memoirs, which appeared in two volumes in Paris in 1809, and which throw many personal and brilliant sidelights on the events of two of the most historically impressive revolutions, and the exceptional men therein concerned.

JARVIS KEELEY.

ROCHESTER, Ancient See of (Roffa; Roffensis), the oldest and smallest of all the suffragan sees of Canterbury, was founded by St. Augustine, Apostle of England, who in 604 consecrated St. Justus as its first bishop. It consisted roughly of the western part of Kent, separated from the rest of the county by the Medway. Though the diocesan boundaries did not follow the river very closely. The cathedral, founded by King Ethelbert and dedicated to St. Andrew from whose monastery at Rome St. Augustine and St. Justus had come, was served by a college of secular priests and endowed with lands near the city called Priestfield. It suffered much from the Mercians (676) and the Danes, but the city retained its importance, and after the Norman Conquest a new cathedral was begun by the Norman bishop Gundulf. This energetic prelate replaced the secular chaplains by Benedictine monks, translated the relics of St. Chad, instituted a silver shrine which became a place of pilgrimage, obtained several royal grants of land, and proved an untiring benefactor to his cathedral city. Gundulf had built the nave and western front

JEAN-BAPTISTE ROCHEBAN
before his death; the western transept was added between 1179 and 1200, and the eastern transept during the reign of Henry III. The cathedral is small, being only 306 feet long, but its nave is the oldest in England and it has a fine Norman crypt. Besides the shrine of St. Paulinus, the cathedral contained the relics of St. Ethemar, the first Saxon to be consecrated to the episcopate, and St. William of Perth, who was held in popular veneration. In 1130 the cathedral was consecrated by the Archbishop of Canterbury assisted by thirteen bishops in the presence of Henry I, but the occasion was marred by a great fire which nearly destroyed the whole city. The fire damaged the new cathedral. After the burial of St. William of Perth in 1201 the offerings at his tomb were so great, that by their means the choir was rebuilt and the central tower was added (1343), thus completing the cathedral. From the foundation of the see the archbishops of Canterbury had enjoyed the privilege of nominating the bishop, but Archbishop Theobald transferred the right to the Benedictine monks of the cathedral who exercised it for the first time in 1148.

The following is the list of bishops with the date of their accession; but the succession from Tatnoth (844) to Siward (1058) is obscure, and may be modified by fresh research:

- St. Justus, 604
- Romanus, 624
- Vacancy, 625
- St. Paulinus, 633
- St. Ethemar, 644
- Damarius, 655
- Vacancy, 664
-utta, 666-9
- Cwichelm, 676
- Gebmund, 678
- Tobias, 685-706
- Edwino, 727
- Dunno, 741
- Eardulf, 747
- Deora, 765-72
- Wasmund I, 781-5
- Beornmod, 803-5
- Tatnoth, 844
- Besundun (possibly identical with Wurmund II)
- Wurmund II, 845-62
- Cuthwulf, 860-8
- Swithwulf (date unknown)
- Celmund, 897-904
- Cynenfrith (date unknown)
- Burhric, 933 or 934
- Boorhtsige (doubtful name)
- Daniel, 951-5
- Aelstane, c. 964
- Godwine I, 978-95
- Godwine II (date unknown)
- Siward, 1058
- Arnost, 1076
- Gundulf, 1077

THE CATHEDRAL, ROCHESTER, ENGLAND

- Thomas Brown, 1435
- William Wells, 1437
- John Acock, 1472
- John Russell, 1476
- Edmund Audley, 1480
- Thomas Savin, 1492
- Richard Fitz James, 1496

The canonical line was maintained in 1554 by Maurice

Bl. John Fisher, 1504
(Cardinol
- Scholastic bishop:
- John Hely, 1535
- Richard Heath, 1539
- Henry Holbeach, 1543
- Nicholas Ridley, 1547
- John Poyntet, 1550
- John Ferrabesi, 1561
- Vacancy, 1552

restored by the appointment of Griffith, the last Catholic bishop of Rochester, who died in 1558.

The diocese was so small, consisting merely of part of Kent, that it needed only one archdeacon (Rochester) to supervise the 97 parishes. It was also the poorest diocese in England. The cathedral was dedicated to St. Andrew the Apostle.

The arms of the see are red, and the salitgules an Escalop shell, or.

EDWIN BURTON.

ROCHESTER, DioCESE OF, on its establishment by separation from the See of Buffalo, 24 January, 1868, comprised the counties of Monroe, Livingston, Wayne, Ontario, Seneca, Cayuga, Yates, and Tompkins in the state of New York. In 1898, after the death of Bishop Ryan of Buffalo, the boundary line of this diocese was somewhat changed, the counties of Steuben, Schuyler, Chemung, and Tioga being detached from the See of Buffalo and added to that of Rochester.

Bishops: (1) Rev. Bernard J. McQuaid, who became a pioneer and leader in Catholic education and the founder of a model seminary and bishop of Rochester in St. Patrick's Cathedral, New York City, on 12 July, 1888. Four days later he took possession of his small and poor diocese, containing only sixty churches administered by thirty-eight priests, seven of whom were Redemptorist Fathers. When he died, 15 August, 1894, after forty years spent in a laborious episcopate, his diocese was richly furnished with churches, schools, seminaries, charitable institutions, answering the manifold needs of the Catholic population, then estimated at 121,000. (2) Rev. Thomas F. Hickey was consecrated in St. Patrick's Cathedral, Rochester, 24 May, 1905, having been appointed coadjutor to Bishop McQuaid.

Churches: The steady growth of the Catholic population in the Diocese of Rochester, due mainly to immigration of Irish, German, French, Polish,
Italian, Lithuanian, and Ruthenian Catholics, taxed the resources at the disposal of Bishop McQuaid, who was anxious throughout his entire episcopate to supply the people with churches and priests of their own nationality and language, whenever they were available to support them. The parishes were not allowed to become unwieldy, but were increased in number to meet the needs and convenience of the faithful. The problem of spiritual ministration to Catholic dwelling at watering-places in the diocese in the summer found a good solution in the erection of a school.

CATHOLIC EDUCATION.—(a) Elementary.—The common schools in the Diocese of Rochester at the time of its creation professed to be non-sectarian. Bishop McQuaid felt that they were very dangerous to the Catholic child which really finds its church in the school. He sought a remedy in a vigorous agitation for the rights of Catholic parents, contributing to the support of the public school system by their taxes, to receive public money for the maintenance of schools, in which their children could be educated with that amount and description of religious instruction in conformity with their consciences as was expedient, necessary. The failure of the State to remedy the injustice was met with the firm command of the bishop which was put into execution as soon as possible throughout the diocese: "Build school-houses then for the religious education of your children as the best protest against a system of education from which religion has been excluded by law." At Rochester in 1868, there were 2056 children in the parochial schools of the five German churches, and 441 children in the schools attached to the Churches of St. Patrick and St. Mary. Both of these had a select or pay school and a free, parochial, or poor school, admitting invidious distinctions very distasteful to the new bishop. Outside of Rochester schools were attached to a few churches of the diocese, but with a very small attendance. These were the humble beginnings of the admirable parochial school system, which embraces to-day practically all the Catholic children of the school age in the diocese. Not all the Catholic schools were brought to their present high degree of efficiency at once; it took many years and persistent effort to accomplish this work. The brothers gradually yielded their places to the sisters, who now teach all the children in the Catholic schools, both boys and girls. Bishop McQuaid spared no pains in developing good teachers in his own order of the Sisters of St. Joseph, for whom a normal training school was established. Occasional "teachers' institutes" organized for the benefit of these sisterhoods in Rochester prepared the way for the annual conferences held by the parochial teachers in the episcopal city since 1904, at which the various orders meet to discuss educational problems and to perfect in every possible way the parochial school system. As early as 1855 the Ladies of the Sacred Heart transferred their convent in Buffalo to Rochester as a center for their school. About the same time the Sisters of St. Joseph in Canandaigua opened St. Mary's academy for young ladies, now Nazareth Academy attached to the mother-house of the order in Rochester. Advanced courses were also introduced in 1855 into the Catholic school without leading the normal life of Bishop McQuaid's family converted the old Cathedral Hall into a high school, classical and commercial, open to both girls and boys.

Ecclesiastical.—(a) Preparatory.—Believing that it was hard for a boy to become a worthy priest without gaining the normal life of Bishop McQuaid, when in the world, Bishop McQuaid planned his preparatory ecclesiastical seminary as a free day-school and conducted the students living at home under the care of their parents, or in a boarding-school approved by the superiors. Within two years after the erection of the diocese, this plan was realized. On his return from the Vatican Council in 1870, St. Andrew's Preparatory Seminary was opened in a small building to the rear of the episcopal residence. It has already given nearly 175 priests to the diocese of Rochester. The rule has been made to adopt no one in this diocese who has not spent at least two years in St. Andrew's Seminary. Through the generosity of Mgr. H. De Regge and others, Bishop McQuaid received a new building in 1880 and to enlarge it in 1889; and in 1904 the younger priests of the diocese furnished him with funds to erect a fire-proof structure with fitting accommodations for the work of the school.

(b) Theological.—For many years the ecclesiastical students of the Diocese of Rochester were sent mainly to the provincial seminary at Troy or to Rome and Innsbruck in Europe for their theological education. In 1879 Bishop McQuaid put aside a small legacy bequeathed him as a nucleus of a fund for the erection of a suitable building, but though the fund grew slowly, the bishop would not lay the first stone until nearly all the money needed for the work was in hand, nor would he open the seminary for students until the buildings were completed and paid for, and at least four professors were engaged. In April, 1887, he was able to purchase a site on the bank of the Genesee River going only three miles from the cathedral. Four years later he began the erection of the buildings. In two years they were completed, and in September, 1893, the seminary was opened with 39 students. Applications for admission soon came from various parts of the United States and Canada. Four years after its establishment, it became evident that more room was necessary. A fund for an additional building was begun, and in 1900 the Hall of Philosophy and Science was erected with accommodations for class-rooms, library, and living rooms. In the following year Bishop McQuaid received a recognition for these labors from Leo XIII in a Brief granting to himself and his successors the power of conferring degrees in Philosophy and Theology. The Hall of Philosophy was begun in 1907 and solemnly dedicated 20 August, 1908. The priests of the diocese founded the ninth jubilee of the Bishop McQuaid's jubilee. An infirmary for sick students was in process of construction when Bishop McQuaid died.

CHARITIES.—Though Catholic education was the primary concern of Bishop McQuaid in his diocese, ample provision for its charities was not lacking. (1) As early as 1845 the R. C. A. Society of Rochester, already in existence some years, was incorporated, having for its object the support of the orphan girls in St. Patrick's Female Orphan Asylum at Rochester and the support of the orphan boys sent to the Boys' Asylum, either at Lancaster, New York, or at Lime Hill near Buffalo. In 1884 St. Mary's Boys' Orphan Asylum was also established in Rochester under the care of the Sisters of St. Joseph, to whom also the Girls' Orphan Asylum was confided in 1870 on the resignation of the Sisters of Charity hitherto in charge. When the Auburn Orphan Asylum, incorporated in 1853, was transferred to Rochester in 1874, all this work was again centralized in the episcopal city. Here also special provision had been made for the German Catholic orphans since 1866, when St. Joseph's Orphan Asylum was erected and placed under the care of the Sisters of Notre-Dame. (2) In 1873 a short-lived attempt was made to support the work of the Orphan Asylum by giving the boys of suitable age an opportunity of acquiring a practical knowledge of farming or of a useful trade. A similar institution for girls flourished
under Mother Hieronymo for some twenty years under the name of The Home of Industry which then was changed into a home for the aged. The location did not prove desirable for such an institution, and $65,000 having been raised by a bazaar, Bishop McQuaid was enabled to erect St. Anne's Home for the Aged, admitting men as well as women. To meet the special needs of the class of the destitute, the Catholic inmates of public eleemosynary and penal institutions in the diocese, appealed strongly to Bishop McQuaid, who at once became their champion in the endeavour to have their religious rights respected according to the guarantee of the Constitution of the State of New York. His agitation in this cause was crowned with success, and the State supports to-day chaplains at the State Industrial School, Industry, at the State Reformatory, Elmira, at the Craig Colony (state hospital for epileptics), Sonyea, at the Soldiers' and Sailors' Home, Bath, while the county maintains a chaplain in Rochester for its public institutions of this kind. (4) The Catholic sick have one of the largest and best equipped hospitals in Rochester at their disposal in St. Mary's Hospital, established by the Sisters of Charity under Mother Hieronymo in 1857. The Sisters of Mercy have charge of St. James Hospital in Hornell, and of late years the Sisters of St. Joseph have also opened a hospital in Elmira.

Statistics.—Priests, 163 (6 Redemptorists); churches with resident priests, 94; missions with churches, 36; chapels, 18; parishes with parochial schools, 54 with 20,189 pupils; academies for young ladies, 2 with 470 pupils (Nazareth, 352; Sacred Heart, 118); theological seminary for secular clergy, 1 with 234 students (for the Diocese of Rochester); preparatory seminary, 1 with 80 students; orphan asylums, 3 with 438 orphans (St. Patrick's, Girls', 115; St. Joseph's Boys', 22; St. Joseph's, Home for the Aged, 1 with 115 inmates (men, 25); hospitals, 3 with 3115 inmates during year (St. Mary's, Rochester, 2216; St. Joseph's, Elmira, 463; St. James, Hornell, 436); Catholics, 142,263.

Rochet, an over-tunic usually made of fine white linen (cambic; fine cotton material is also allowed), and reaching to the knees. While bearing a general resemblance to the surplice, it is distinguished from that vestment by the shape of the sleeves; in the surplice these are at least fairly wide, while in the rochet they are always tight-fitting. The rochet is decorated with lace or embroidered borders—broader at the hem and narrower on the sleeves. To make the vestment entirely of tulle or lace is inconvenient, as is the inordinate use of plaits; in both cases, the vestment becomes too effeminate. The rochet is not a vestment pertaining to all clergics, like the surplice; it is distinctive of prelates, and may be worn by other ecclesiastics only when (as, e.g., in the case of cathedral chapters) the usus rochetti has been granted them by a special papal indulgence. That the rochet possesses no particular colour is clear both from the Decree of Urban VII prefixed to the Roman Missal, and from an express decree of the Congregation of Rites (10 Jan., 1652), which declares that, in the administration of the sacraments, the rochet may not be used as a vestis sacra; in the administration of the sacraments, as well as at the conferring of the tonsure and the minor orders, use should be made of the surplice (cf. the decisions of 31 May, 1817; 17 Sept., 1722; 16 April, 1831). However, as the rochet may be used by the properly privileged persons as choir-dress, it may be included among the liturgical vestments in the broad sense, like the biretta or the cappa magna. Prelates who do not belong to a religious order, should wear the rochet over the soutane during Mass, as far as this is convenient.

The origin of the rochet may be traced from the clerical (non-liturgical) alba or camisia, that is, the clerical linen tunic of everyday life. It was thus not originally distinctive of the higher ecclesiastics alone. This camisia appears first in Rome as a privileged vestment; that this was the case in the Christian capital as early as the ninth century is established by the St. Gall catalogue of vestments. Outside of Rome the rochet remained to a great extent a vestment common to all clergics until the fourteenth century (and even longer); according to various German synodal statutes of the thirteenth and fourteenth centuries (Trier, Passau, Cambrai, etc.), it was worn even by sacristans. The Fourth Lateran Council prescribed its use for bishops who did not belong to a religious order, both in the church and on all public appearances. The name rochet (from the medieval roccus) was scarcely in use before the thirteenth century. It is first met outside of Rome, where, until the fifteenth century, the vestment was called camisia, alba romana, or succa (subita). These names gradually yielded to rochet in Rome also. Originally, the rochet reached, like the liturgical alb, to the feet, and, even in the fifteenth century still reached to the shins. It was not reduced to its present length until the seventeenth century.

JOSEPH BRAUN.

Rochette, Désiré Raulin, usually known as Raulin-Rochette, a French archaeologist, b. at St.-Amand (Cher), 9 March, 1759; d. in Paris, 3 June, 1854. His father was a physician. He made his classical studies in the lyceum of Bourges, and then took up postgraduate work in the Ecole Normale Supérieure in Paris. In 1810, he obtained a chair of grammar in the lyceum Louis-le-Grand, and in the same year, married the daughter of the celebrated sculptor Houdon. Three years later, he was awarded a prize by the Institute for his "Mémoire sur les Colonies Grecques". In 1815, he became lecturer at the Ecole Normale, and succeeded Guizot in the chair of modern history at the Sorbonne. It has been often said that he owed his rapid advancement only to favouritism, because of his devotion to the ruling power; this is not entirely true. He was a real scholar whose deep knowledge of archaeology was admired even by his political enemies. He was elected...
to the Academy of Inscriptions and Belles-Lettres in 1816, and two years later, made a keeper of medals and antiques. His appointment to the position of censor (1820) aroused the hostility of his students, who prevented him from delivering his lectures and caused the course to be suspended. In 1824 he was transferred to the chair of archeology. He entered the Academy of Fine Arts in 1838, and was made its perpetual secretary in 1839. Besides his memoirs for the Institute and numerous contributions to the "Journal des Savants," he wrote many books, the chief of which are: "Histoire critique de l'établissement des monnaies grecques" (Paris, 1815); "Quelques grecques du Boëthius Cimmières" (Paris, 1822); "lettres sur la Suisse" (Paris, 1828); "Mémoires inédits d'antiquité figurée grecque, étrusque et Romaine" (Paris, 1828); "Poméi" (Paris, 1828); "Cours d'archéologie" (Paris, 1828); "Peintures antiques inédites" (Paris, 1836).

LOUIS N. DELAMARRE.

ROCKHAMPTON, Diocese of, in Queensland, Australia. In 1862 Father Dubug visited the infant settlement on the banks of the Fitzroy River and celebrated the first Mass there. Father Scully came from Brisbane to attend to the spiritual needs of the little congregation and in 1863 Dean Murlay was appointed first resident pastor of Rockhampton, his diocesan extending its jurisdiction south to Maryborough. He built the first Catholic church in Rockhampton, a wooden edifice still standing, and for many years was the only priest to look after the Catholics scattered over the vast territory. A foundation of the Sisters of Mercy from All-Hallows Convent, Brisbane, was established in 1873, and in 1884, the Rev. Dr. Cani, native of the papal states, who had had a distinguished scholastic career at Rome, and formed pro-vicar Apostolic of North Queensland, was appointed first bishop of the new diocese. Bishop Cani, who was then administering the Diocese of Brisbane, was consecrated by Archbishop Vaughan in St. Mary's Cathedral, Sydney, 21 May, 1882, and was installed in his temporary cathedral at Rockhampton on 11 June following.

In the new diocese there were about 10,000 Catholics, 8 or 7 priests, 8 Catholic schools, and 1 orphanage. Bishop Cani added to the small number of priests, purchased sites for new churches, and acquired 3000 acres of fertile land near Rockhampton for a central orphanage which he had built and placed under the care of the Sisters of Mercy. His great work was the erection of St. Joseph's Cathedral, a magnificent stone edifice which he did not live to dedicate. After a strenuous episcopate of sixteen years Dr. Cani died, 3 March, 1898. His great virtues were recognized even by those outside the Church. Humility and simplicity of life, love of the poor and orphans were his special characteristics. He was succeeded in Rockhampton by Right Rev. Dr. Higgins, a native of Co. Meath, Ireland, and now
Bishop of Ballarat. Dr. Higgins studied in Maynooth, was subsequently President of the Diocesan Seminary, and in 1869, as then bishop to the Cardinal Archbishop of Sydney with the title of titular Bishop of Antilibia. He had zealously laboured in the Archdiocese of Sydney for over ten years, when appointed to Rockhampton. He traversed his new diocese from end to end, gauged its wants, attracted priests to his aid, placed students for the minor in various ecclesiastical academies, introduced new religious teaching orders, built and dedicated churches, convents, and schools in several centres, bringing the blessings of religion and Christian education to the children of the back-blocks.

On 15 October, 1899, the beautiful new cathedral was dedicated by the Cardinal Archbishop of Sydney assisted by several other distinguished Australian prelates in the presence of a great concourse of people. The remains of Dr. Cani were transferred thither. Dr. Higgins visited Rome and Ireland in 1904, and returned with renewed energy to carry on his great work. On the death of Dr. Moore, Bishop of Ballarat, Victoria, he was translated to that important See, where he has ever since laboured with characteristic zeal and devotedness. The present Bishop of Rockhampton is Right Rev. Dr. James Duhig, born at Broadford, Co. Limerick, Ireland, 1871. Dr. Duhig emigrated from Ireland with his family at the age of thirteen, studied with the Christian Brothers at Brisbane and at the Irish College, Rome, was ordained priest, 19 Sept., 1896, and, returning to Queensland in the following year, was appointed to a curacy in the parish of Ipswich. In 1906 he was appointed administrator of St. Stephen’s Cathedral, Brisbane, and received the briefs of his appointment to the See of Rockhampton. At present (1911) there are in the Diocese of Rockhampton: about 28,000 Catholics; 19 missions or districts; 30 priests (4 of whom belong to the Mariat Congregation, who have 1 house in the diocese); 12 Christian Brothers; 150 nuns; and 26 Catholic schools, attended by about 5000 children.

J. DUHIG.

Rococo Style.—This style received its name in the nineteenth century from French émigrés, who used the word to designate in whimsical fashion the shellwork style (style rocaille), then regarded as Old Frankish, as opposed to the succeeding more simple styles. Essentially, it is the same kind of art and decoration as flourished in France during the regency following Louis XIV’s death, and so named in fashion for about forty years (1715-50). It might be termed the climax or degeneration of the Baroque, which, coupled with French grace, began towards the end of the reign of Louis XIV to convert grotesques into curves, lines, and bands (Jean Bérain, 1639-1711). As its effect was less pronounced on architectural construction than elsewhere, it is not so much a real style as a new kind of decoration, which culminates in the resolution of architectural forms of the interiors (pilasters and architraves) by arbitrary ornamentation after the fashion of an unregulated, enervated Baroque, while also influencing the arrangement of space, the construction of the façades, the portals, the forms of the doors and windows. The Rococo style was readily received in Germany, where it was still further perverted into the arbitrary, unsymmetrical, and unnatural, and remained in favour until 1770 (or even longer); it found no welcome in England, especially at the Hotel Soufflot in Paris and many French and German artists (Cuvilliés, Neumann, Knobelsdorff, etc.) effected the dignified equipment of the Amalienburg near Munich, and the castles of Würzburg, Potsdam, Charlottenburg, Brühl, Bruchsal, Schönbrunn, etc. In France the style remained some-
what more reserved, since the ornaments were mostly of wood, or, after the fashion of wood-carving, a less robust and naturalistic and less exuberant in the mixture of natural with artificial forms of all kinds (e.g. plant motives, stalactitic representations, grotesques, masks, implements of various professions, badges, paintings, precious stones). As elements of the picturesque retained, to a greater extent than Germany, the unity of the whole scheme of decoration and the symmetry of its parts.

This style needs not only decorators, goldsmiths, and other technicians, but also painters. The French painters of this period reflect most truly the moral depression dating from the time of Louis XIV, even in the most celebrated among them, confining themselves to social portraits of high society and depicting "pallant festivals", with their informal, frivolous, theatrically or modishly garbed society.

The "beautiful sensuality" is effected by masterly technique, especially in the colouring, and to a great extent by quite immoral licences or mythological nudes as in loose or indecent romances. As for Watteau (1684–1721), the very titles of his works—e.g. Conversation, Breakfast in the Open Air, Rural Pleasures, Italian or French Comedians, Embarkment for the Island of Cythera—indicate the spirit and tendency of his art. Add thereto the figures in fashionable costume slim in head, throat, and feet, in unaffected pose, represented amid enchanting, rural scenery, painted in the finest colours, and we have a picture of the high society of the period which beheld Louis XV and the Pompadour. François Boucher (1703–70) is the most celebrated painter of riper Rococo. For the church Rococo may be, generally speaking, compared with worldly church music. Its lack of simplicity, earnestness, and repose is evident, while its ornate artificiality, unnaturalness, and triviality have a distracting effect. Its softness and pettiness likewise do not become the house of God. However, shorn of its most grievous outgrowths, it may have been less distracting during its proper epoch, since it then harmonised with the spirit of the age. A development of Baroque, it will be found a congruous decoration for Baroque churches. In general it makes a vast difference whether the style is used with moderation in the finer and more ingenious form of the French masters, or is carried to extremes with the consistency of the German. The French artists seem ever to have regarded the beauty of the whole composition as the chief object, while the German laid most stress on the bold vigour of the lines; thus, the lack of symmetry was never so exaggerated in the works of the former. In the church Rococo may at times have the charm of prettiness and may please by its ingenious technic, provided the objects be small and subordinate a credence table with cruets and plate, a vase, a choir desk, lamps, key and lock, raimings or balustrade, do not too boldly challenge the eye, and fulfill all the requirements of mere beauty of form. Rococo is indeed really empty, solely a pleasing play of the fancy. In the sacristy (or presbytery etc.) and antechambers it is more suitable than in the church itself—at least so far as its employment in conspicuous places is concerned.

The Rococo style accords very ill with the solemn office of the monstrance, the tabernacle, and the altar, and even of the pulpit, nay, not even of the textile. "The Belgian pulpits, in spite or perhaps on account of their artistic character, has the same effect as have outspoken Rococo creations. The purpose of the confessional and the baptistery would also seem to demand more earnest forms. In the case of the larger objects, the amount of space on which Rococo seems petty, or, if this pettiness be avoided, resembles Baroque. The fantasies of this style agree ill with the lofty and broad walls of the church. However, everything must be decided according to the object and circumstances; the stalls in the cathedral of Mains elicited not only our approval but also our admiration, while the celebrated privilege altar of Vierzehnheiligen repels us both by its forms and its plastic decoration. There are certain Rococo chalices (like that at the monastery of Einsiedeln) which are, as one might say, decked out in choice festive array; there are others, which are more or less misshapen owing to their bulging out or curves of figures. Chandeliers and lamps may also be disfigured by obtrusive shellwork or want of all symmetry, or may amid great decorativeness be kept within reasonable limits. The material and technic are also of consequence in Rococo. Woven materials, wood-carvings, and works in plaster of Paris are evidently less obtrusive than works in other materials, when they employ the sportive Rococo. Iron (especially in raimings) and bronze lose their coldness and hardness, when animated by the Rococo style; in the case of the latter, gilding may be used with advantage. Gilding and painting belong to the repisas which means through which this style, under certain circumstances, enchants the eye and fancy. All things considered, we may say of the Rococo style— as has not unreasonably been said of the Baroque and of the Renaissance—that it is very apt to introduce a worldly spirit into the church, even if we overlook the figural accessories, which are frequently in no way conducive to sentiments of devotion, and are incompatible with the sobriety and greatness of the architecture and with the seriousness of sacred functions."

G. GIEZMANN.

Rodes, Diocese of (Ruthein), was united to the Diocese of Cahors by the Concordat of 1802, and again became an episcopal see by the Concordat of 1817 and Bull of 1822, having jurisdiction over: (1) the ancient Diocese of Rodes with the exception of the deanery of Saint Antonin, incorporated with the Diocese of Montauban; (2) the ancient Diocese of Vabres; (3) a few scattered communes of the Diocese of Cahors. The Diocese of Rodes corresponds exactly to the Department of Aveyron (formerly Rouergue). It was suffragan of Bourges until 1676, then of Albi, and has again been suffragan of Albi since 1522. Modern traditions uphold the tradition of Saint Martial, the founder of the church of Rodes and the sanctuary of the Blessed Virgin at Caignac, for according to Cardinal Bourret, the church of Rodes honoured St. Martial as early as the sixth century (see Limoges). There were bishops of Rodes before 675, as Sidonius Apollinaris mentions that the
Gotha left it at that date without bishops. Amantius, who ruled about the end of the fifth century, is the first bishop mentioned. Among others are: S. Quintianus, who assisted at the Councils of Agde (506) and Orleans (511), afterwards Bishop of Clermont; S. Dalmatius (524–80); S. Gausbert (tenth century), probably a Bishop of Cahors; Jean de Cardillac (1371–9); Patriarch of Alexandria, who fought against English rule; Blessed Francis d’Estaing (1501–29), ambassador of Louis XII to Julius II; Louis Avelly (1664–9) who wrote the life of St. Vincent of Paul; Joseph Bouret (1871–95), made Cardinal in 1893. The Benedictine Abbey of Vabres, founded in 862 by Raymond I, Count of Toulouse, was raised to episcopal rank in 1317, and its diocesan territory was taken from the southeastern portion of the Diocese of Rodez. Some scholars hold that within the limits of the modern Diocese of Rodez there existed in Merovingian times the See of Arceitum which, according to Mgr Duchesne, was in the neighbourhood of Alais.

During the Middle Ages the Bishop of Rodez held temporal dominion over that portion of the town known as the Cité, while in the eleventh century the Bourg became the County of Rodez. The cathedral of Rodez (thirteenth and fourteenth centuries) is a beautiful Gothic building, famous for its belfry (1510–26) and unique roof-beam. It was spared during the Revolution for dedication to Marat. The town of Milhau adopted Calvinism in 1534, and in 1573 and 1620 was the scene of two large assemblies of Protestant prelates. In 1629 Milhau and Saint-Afrique, another Protestant stronghold, were taken and dismantled by Louis XIII. In 1628 a pest at Villefranche carried off 8000 inhabitants within six months; Father Ambrose, a Franciscan, and the chief of police Jean de Pomayrol saved the lives of many little children by causing them to be sucked by goats. The Cistercian Abbeys of Silbanès, Beaulieu, Lescieux, Bonneval, and Bonnecombe were model-farms during the Middle Ages. Attacked by brigands in the Rouergue country on his way to Santiago di Compostella, Adalard, Vicar of Flanders, erected in 1031 a monastery known as the Domerie d’Aubrac, a special order of priests, knights, lay brothers, ladies, and lay sisters for the care and protection of travellers. At Milhau, Rodez, Nasac, and Bosouls, hospitals, styled “Commanderies”, of this order of Aubrac adopted the rule of St. Augustine in 1162.

The Diocese of Rodez is famous also through the Abbey of Conques and the cult of Sainte Foy. Some Christians, flying from the Saracens about 730, sought a refuge in the Vallée de l’Aveyron, one of the most beautiful spots of the Pyrenees, and built an oratory there. In 790 the hermit Dedon made this his abode and aided by Louis the Pious, then King of Aquitaine, founded an abbey, which Louis named Conques. In 888 Pepin, King of Aquitaine, gave the monastery of Fitzes to Conques. Between 977 and 1014 the body of the body of the youthful martyr Ste-Foy from the monastery of Sainte Foy to Conques, where it became the object of a great pilgrimage. Abbot Odorlic built the abbey church between 1030 and 1060; on the stonework over the doorway is carved the most artistic representation in France of the Last Judgment. Abbot Becog (1069–1118) enriched Conques with a superb reliquary of beaten gold and cloisonnés enamels of a kind extremely rare in France. Pascal II gave him permission for the name of Ste-Foy to be inserted in the Canon of the Mass after the names of the Roman virgins. At this time Conques, with Agen and Chaillac in Alas, was the centre of the cult of Ste. Foy which soon spread to England, Spain, and America where many towns bear the name of Santa Fe. The statue of Ste-Foy seated, which dated from the tenth century, was originally a small wooden one covered with gold leaf. In time, gems, enamels, and precious stones were added in such quantities that it is a living treatise on the history of the goldsmiths art in France between the eleventh and sixteenth centuries. It was known during the Middle Ages as “Majesté de Sainte Foy”. The shrine enclosing the relics of the Saint, which in 1580 was hidden in the masonry connecting the pillars of the choir, was found in 1875, repaired, transferred to the cathedral of Rodez for a novena, and brought back to Conques, a distance of 25 miles, on the shoulders of the clergy.

Among Saints specially honoured in the Diocese of Rodez and Vabres are: S. Antonius of Pamiers, Apostle of the Rouergue (date uncertain); S. Gratian and S. Anan tus, martyrs (fourth century); S. Nasmatius, deacon and confessor (end of fifth century); S. Tarascia, grand-daughter of Clothaire I and of Ste-Régenduina, who retired to the Rouergue to lead an ascetic life (sixth century); S. Africanus, wrongly styled Bishop of Comminges; S. Hilarius of the Rouergue (sixth century); S. Hilarianus, martyred by the Saracens in the time of Charles Magn (eighth and ninth century); S. George, a monk in the Diocese of Vabres, afterwards Bishop of Lodève (877); S. Gausbert, founder and first abbot of the monastery of Montalvy in the modern Diocese of St. Flour (eleventh century). Among natives of the diocese are: Cardinal Bernard of Milhau, Abbot of St. Victor’s at Marseilles in 1063, and legate of Gregory VII; Theodatus de Goson (c. 1385) and John of La Valetta (1494–1568), grand masters of the order of St. John of Jerusalem; the former is famous for his victory over the dragon of Rhodes, the latter for his heroic defence of Malta; Fraesinou (1765–1841), preacher and minister of worship under the Restoration; Bonald (1754–1840) and Laroniguerie (1750–1837), philosophers; Affre (1718–1848), born at St. Rome de Tarn and slain at the Barracades as Archbishop of Paris. The chief shrines of the diocese are: Notre Dame de Ceignac, an ancient shrine rebuilt and enlarged in 1455, which over 15,000 pilgrims visit annually; Notre Dame du Saint Voule at Coupie, another ancient shrine; Notre Dame des Trois Pierres at Villefranche, a pilgrimage dating from 1505.

Before the application of the Associations’ Law in 1901, there were in the Diocese of Rodez, Capuchina,
RODRIGUES, Alonso, b. at Valladolid, Spain, 1526; d. at Seville 21 February, 1616. When twenty years of age he entered the Society of Jesus, and after completing his studies taught moral theology for twelve years at the College of Monterey, and subsequently filled the posts of master of novices for twelve more years, and of spiritual father at Cordova for eleven years. As master of novices he had under his charge Francis Suáres, the celebrated theologian. Alonso's characteristics in these offices were care, diligence, and charity. He was a religious of great piety and candour, hating all pride and ostentation. It was said of him that all who were personally acquainted with him, that his character and virtues were accurately depicted in "The Practice of Christian and Religious Perfection," published at Seville, 1609. This work is based on the material which he collected for his spiritual exhortations to his brethren, and published at the request of his superiors. Although the book thus written was primarily intended for the use of his religious brethren, yet he destined it also for the profit and edification of other religious and of laymen in the world. Of set purpose it avoids the loftier flights of mystical and all abstruse speculation. It is a book of practical exhortations on all the chief duties by which to make up the perfect Christian life, whether lived in the cloister or in the world. It became popular at once, and it is as much used to-day by all classes of Christians as it was when it first became known. More than twenty-five editions of the original Spanish have been issued, besides a French translation. The English translations have appeared in French in seven different languages, twenty in Italian, at least ten in German, and eight in Latin. An English translation from the French by Fr. Antony Hoskins, S.J., was printed at St. Omer in 1612. The best known English translation, often reprinted, is that which first appeared in London, 1697, from the French of Abbé Regnier des Marais. P. O. Shea issued in New York an edition adapted to general use in 1878. The book has been translated into nearly all the European languages and into many of those of the East. No other work of the author was published. Gilmour Shea left a translation of the work which has been entered in the Intellectual Preservation at the Library of Congress. Cordara, Historia Societatis Jesu: Pars Sexta, I (Rome, 1750), 427, 431; De Otteley, Mémoires de la C. de J., Assistance d'Espagne (Métabois, 1802), 321; a sketch in the edition of The Practice of Christian and Religious Perfection (Dublin, 1861); Sommervogel, Bibl. de la C. de J., VI (Paris, 1896), 535; F. Slater.

RODRIGUES, Joao (GiraM, Girao, Giron, Roiz), missionary and author, b. at Alcochete in the Diocese of Lisbon in 1558; d. in Japan in 1633. He entered the Society of Jesus on 15 December, 1566, and in 1583 began his missionary labours in Japan. His work was facilitated by his winning the esteem of the Emperor Taicosa. He studied the Japanese language ardently, and is particularly known for his efforts to make it accessible to the Western nations. He was one of the pioneers among the Jesuit missionaries who in the 17th century prepared the first linguistic productions of the Jesuit missionaries. Published at Nagasaki in 1604 under the title "Arte da lingoa de Japan", it appeared in 1624 in an abridged form at Macao: "Arte breve da lingoa japoa"; from the manuscript of this abridgement preserved in the National Library in Paris, the Japanese Society prepared a facsimile edition in 1891: "Éléments de la grammaire japonaise par le P. Rodrigues" (Paris, 1825). Rodriguez compiled also a Japanese-Portuguese dictionary (Nagasaki, 1803), later adapted to the French by Pagès (Paris, 1862), and to English by Pagès, in Norwich, 1810; and in Paris, 1829, 364-371; Gannet, in Buchberger's Handlexikon, s. v. N. A. Weber.

ROE, Bartholomew (Venerable Alban), English Benedictine martyr, b. in Suffolk, 1583; executed at
Tyburn, 21 Jan., 1641. Educated in Suffolk and at Cambridge, he became converted through a visit to a Catholic priest at St. Albans which unsettled his religious views. He was admitted as a convict into the English College at Douai, entered the English Benedictine monastery at St. Omer where he was professed in 1612, and, after ordination, went on the mission in 1615. From 1618 to 1623 he was imprisoned in the New Prison, Maiden Lane, whence he was banished and went to the English Benedictine house at Douai but returned to England after four months. He was again arrested in 1625, and was imprisoned for two months at St. Omer, then imprisoned at Douai, where he was frequently liberated on parole, and finally in Newgate. He was condemned a few days before his execution under the statute 27 Eliz. c. 2, for being a priest. With him suffered Thomas Greene, aged eighty, who on the mission had taken the name of Reynolds. He was probably descended from the Greenes of Great Milton, Oxfordshire, and the Reynolds of Old Stratford, Warwickshire, and was ordained deacon at Reims in 1590, and priest at Seville. He had lived under sentence of death for fourteen years, and was executed without fresh trial. They were drawn on the same hurdle, where they heard each other's confessions. It is said, by some, that there was a gibbet amidst great demonstrations of popular sympathy.

John B. Waitewright.

Roermond, Diocese of (Rurkiemundensis), in Holland, suffragan of Utrecht. It includes the Province of Limburg, and in 1900 had 332,259 inhabitants, among whom were 325,000 Catholics. The diocese has a cathedral chapter with 9 canons, 14 deansers, 17 vicars, 18 secular priests, and 12 religious priests. It has 26 parishes and 102 churches. It has an ecclesiastical seminary at Roermond, a preparatory seminary for boys at Rolduc, about 70 Catholic primary schools, 2 Catholic preparatory gymnasia, 1 training college for male teachers, 24 schools for philosophical, theological, and classical studies, 35 higher schools for girls, about 60 charitable institutions, 45 houses of religious (men) with about 2400 members, and 130 convents with 3900 sisters. Among the orders and congregations of men in the diocese are: Jesuits, the Society of the Divine Word of St. Mary, Brothers of the Immaculate Conception, Redemptorists, Maristes, Reformed Cistercians, Dominicans, Benedictines, Oblates of Mary Immaculate, Brothers of Mercy, Poor Brothers of St. Francis, Conventuals, Calced Carmelites, Missionaries of Africa, Priests of the Sacred Heart of Jesus, Brothers of the Seven Sorrows of the Blessed Virgin Mary, Brothers of St. Francis, Brothers of St. Joseph, the Society of Mary, the Congregation of the Sacred Heart of Jesus, the Congregation of the Divine Spirit, and the Congregation of Missions. Among the female orders and congregations are: Benedictines, Brigitines, Ursulines, Sisters of St. Charles Borromeo, Sisters of St. Albert, Sisters of the Child Jesus, Sisters of St. Francis, Sisters of the Divine Providence, Sisters of Mercy etc.

The Diocese of Roermond was established in 1559, during the reign of Philip II, when after long and difficult negotiations with the papacy the dioceses of the Netherlands were reorganized. By these negotiations all jurisdiction of foreign bishops, e. g. that of the English College, ceased, and the way the Diocese of Roermond, the boundaries of which were settled in 1651, became a suffragan of Mechlin. The reorganization of the dioceses, however, met with violent opposition, partly from bishops whose abbeys were incorporated in the new bishoprics. Much difficulty was also caused by the rapid growth of Calvinism in the Netherlands. In Roermond the first bishop, Linndanus, who was consecrated in 1563, could not enter upon his duties until 1569; notwithstanding his zeal and charitableness he was obliged to retire on account of the revolutionary movement; he died Bishop of Ghent. The episcopal seat remained vacant until 1591; at a later period also, on account of the political turmoil, the see was repeatedly vacant. In 1801 the diocese was suppressed; the last bishop, Johann Baptist Baron van Velde de Melroy, died in 1824.

When in 1630 the Duchy of Limburg became once more a part of the Netherlands, Gregory XVI separated (2 June, 1840) that part of Limburg which had been incorporated in the Diocese of Louvain in 1802, and added to this territory several new parishes which had formerly belonged to the Diocese of Aachen, and formed thus the Vicariate Apostolic of Roermond, over which the parish priest of Roermond, Johann August Paredis, was placed as vicar Apostolic and titular Bishop of Hirene. In 1841 a seminary for priests was established in the former Carthusian monastery of Roermond, where the celebrated Dionysius the Carthusian had been a monk. Upon the re-establishment of the Diocese of Louvain the Vicariate-Apostolic of Roermond was raised to a bishopric and made a suffragan of Utrecht. The first bishop of the new diocese was Paredis. In 1858 a cathedral chapter was formed; in 1867 a synod was held, the first since 1654; in 1876 the administration of the church property was transferred to civil law, to the bishop. During the Kulturkampf in Germany a number of ecclesiastical dignitaries driven out of Prussia found a hospitable welcome and opportunities for further usefulness in the Diocese of Roermond; among these churchmen were Melchers of Cologne, Brinkmann of Münster, and Martin of Paderborn. In 1886-1896 Paredis was succeeded by Jozef Drehmann (1856-1900), on whose death the present bishop, Joseph Hubertus Drehmann, was appointed.

Gallia Christiana, V, 371 sqq.; Neerlandia catholica seu Quaestiones Urgentissimae Historiae et consilia (Utrecht, 1889), 353-355; Almens, Geschiedenis van het hertief der hierarchie in de Nederlanden (Nymwegen, 1893-4); Meerdink, Roermond, in de Middeleeuwen; Onze Pius Almanak, Jaarboek voor de Katholieken van Nederland (Alkmaar, 1910), 333 sqq.

Joseph Lins.

Rogation Days, days of prayer, and formerly also of fasting, instituted by the Church to appease God's anger at man's transgressions, to avert plagues, tempests, famines and other calamities, and to obtain a good and bountiful harvest, known in England as "Gang Days" and "Cross Week", and in Germany as Bittage, Bitwöche, Kreuzwoche. The Rogation Days were highly esteemed in England and King Alfred's laws considered a theft committed at these days equal to one committed on Sunday or a higher Church Holy Day. Their celebration continued even to the thirteenth year of Elizabeth, 1571, when one of the ministers of the Established Church inveighed against the Rogation processions, or Gang Days, of Cross Week. The ceremonial may be found in the Council of Ostrava (1819), 1, 64; Heele, Concilienbeschrie, III, 564.

The Rogation Days are the 25th of April, called Major, and the three days before and after the feast of the Ascension, called Minor. The Major Rogation, which has no connexion with the feast of St. Mark (fixed for this date much later) seems to be of very early date and to have been introduced to counteract the ancient Robigalia, on which the heathens held processions and supplications to their gods. St. Gregory the Great (d. 604) regulated the already existing custom. The Minor Rogations were introduced by St. Mamertus, Bishop of Vienne, and were afterwards ordered by the Fifth Council of Orleans, which was held in 511, and then approved by Leo III (795-
This is asserted by St. Gregory of Tours in "Hist. Franc.", II, 34, by St. Avitus of Vienne in his "Hom. de Rogat.", (P. L., LVIII, 503), by Ado of Vienne (P. L., CXXXIII, 102), and by the Roman Martyrology. Sassi, in "Archiepiscopi Modiolanensis", ascribes their introduction at an earlier date to St. Lazarus. This is also held by the Roldandt Henschen in "Lettres SS.", II, Feb., 52, and the liturgical celebration now consists in the procession and the Rogation Mass. For 25 April the Roman Missal gives the rubric: "If the feast of St. Mark is transferred, the procession is not transferred. In the rare case of 25 April being Easter Sunday (1886, 1943), the procession is held not on Sunday but on the Thursday following.

The order to be observed in the procession of the Major and Minor Rogation is given in the Roman Ritual, title X, ch. iv. After the antiphon "Exurge Domine", the Litany of the Saints is chanted and each verse and response is said twice. After the verse "Sancto Maria" the procession begins to move. If necessary, the litany may be repeated, or some of the Penitential or Gradual Psalms added. For the Minor Rogations the "Ceremoniale Episcoporum", book II, ch. xxxii, notes: "Eadem servetur sed aliquid remissius". If the procession is held, the Rogation Mass is said and no notice is taken of whatever feast may occur, unless only one Mass is said, for then a commemoration is made of the feast. An exception is made in favour of the patron or titular of the church, of whom the Mass is said with a commemoration of the Rogation. The colour used in the procession and the Mass is violet. The Roman Breviary gives the instruction: "All persons bound to observe the Office on that day, and who are not present at the procession, are bound to recite the Litany, nor can it be anticipated".

ROGER.

It has been presumed that Robert Bacon, Q.P., was Roger's brother; more probably he was his uncle. Roger made his higher studies at Oxford and Paris, and was later professor at Oxford (Franciscan school). He was greatly influenced by his Oxonian masters and friends Richard Fitzsacar and Edmund Rich, but especially by Robert Grosseteste and Adam Marsh, both professors at the Franciscan school, and at Paris by the Franciscan Petrus Peregrinus de Maricourt (see Schund in "Archiv. Francisc. Histor.", IV, 1911, pp. 436 sqq.). They created in him a predilection for positive sciences, languages, and physics; and to the last-mentioned he owed his entrance about 1240 (1231? 1237?) into the Franciscans, either at Oxford or Paris. He continued his learned work; illness, however, compelled him to give it up for two years. When he was able to recommend his studies, his superiors imposed other duties on him, and forbade him to publish any work without the Office of the higher superiors "under pain of losing the book and of fasting several days with only bread and water".

This prohibition has induced modern writers to pass severe judgment upon Roger's superiors being jealous of Roger's abilities; even serious scholars say they can hardly understand how Bacon conceived the idea of joining the Franciscan Order. Such criticism forget that when Bacon entered the order the Franciscans numbered many men of ability, in no way inferior to the most famous scholars of other religious orders.

ROGER.

Roger, Bishop of Worcester, d. at Tours, 9 August, 1179. A younger son of Robert, Earl of Gloucester, he was educated with the future king, Henry II; afterwards ordained priest, and consecrated Bishop of Worcester by St. Thomas of Canterbury, 23 Aug., 1163. He adhered loyally to St. Thomas, and though one of the bishops sent to the pope to carry the king's appeal to the archbishop, he took no active part in the embassy, nor did he join the appeal made by the bishops against the archbishop in 1166, thus arousing the enmity of the king. When St. Thomas desired Roger to join him in his exile, Roger went without leave (1167), Henry having refused him permission. He boldly re-entered the kingdom when the queen met at Falaise in 1170, and a reconciliation followed. After the martyrdom of St. Thomas, England was threatened with an interdict, but Roger interceded with the pope and was thereafter highly esteemed in England and at Rome. Alexander III, who frequently employed him as delegate in ecclesiastical causes, spoke of him and Bartholomew, Bishop of Exeter, as "the two great lights of the English Church".

We need not wonder then that Roger's immediate superiors put the prohibition into execution, especially as Bacon was not always very correct in doctrine; and although on the one hand it is wrong to consider him as a necromancer and astrologer, an enemy of speculative philosophy, an author full of heresies and suspected views, still we cannot deny that some of his expressions are impudent and inaccurate. The judgments he passes on other scholars of his day are sometimes too hard, so it is not surprising that his friends were few. The above-mentioned prohibition was rescinded in Roger's favour unexpectedly in 1260.
Some years before, while still at Oxford, he had made the acquaintance of Cardinal Guy le Gros de Fouques, whom Urban IV had sent to England to settle the disputes between many belligerent barons; others believe that the cardinal met Roger at Paris, in 1257 or 1258 (see "Archiv. Francisc. Hist." IV, 442).

After a conference about some current abuses, especially about ecclesiastical studies, the cardinal asked Roger to present his ideas in writing. Roger delayed in executing the cardinal’s request, but once he had finished Clemen IV and reiterated his desire, Bacon excused himself because the prohibition of his superiors stood in the way. Then the pope in a letter from Viterbo (22 June, 1266) commanded him to send his work immediately, notwithstanding the prohibition of superiors or any general constitution whatsoever, but to keep the commission a secret (see letter published by Martene-Durand, "Thesaurus novae academorum" II, Paris, 1717, 358, Clement IV, ep. n. 317 a; Wadding, "Annales", ad an. 1266, n. 14, IL 294; IV, 265; Sbarales, "Bullarium Franciscanum" III, 89 n. 8f, 22 June, 1266).

We may suppose that the pope, as Bacon says, from the first had wished the matter kept secret; otherwise we can hardly understand why Bacon did not get permission of his superiors; for the prohibition of Narbonne was not absolute; it only forbade him to publish works outside the order "unless they were examined thoroughly by the minister general of the order together with his deponents in the provincial chapter". The removal of the prohibitive constitution did not at once remove all obstacles; the secrecy of the matter rather produced new embarrassments, as Bacon frankly declares. The first impediment was the contrary will of his superiors: "As Your Holiness", he was to the pope, "did not write to them excuse me, and I could not make known to them Your secret, because You had commanded me to keep the matter a secret, they did not let me alone but charged me with other labours; but it was impossible for me to obey because of Your commandment." Another difficulty was the lack of money necessary to obtain pamphlet and to pay copyists. As the superiors knew nothing of his commission, Bacon had to devise means to obtain money. Accordingly he ingeniously reminded the pope of this oversight, "As a monk", he says, "I for myself cannot borrow, not having wherewith to return; my parents who before were rich, now in the troubles of war have run into poverty; others, who were able refused to spend money; so deeply embarrassed, I urged my friends and poor people to expend all they had, to supply their goods, and promising them to write to You and induce Your Holiness to fully reimburse the sum spent by them (60 pounds)" ("Opus Tertium", III, p. 16).

Finally, Bacon was able to execute the pope’s desire; in the beginning of 1267 he sent by his pupil John of Paris (Lonchamps) the "Opus Majus", where he puts together in general lines all his leading ideas and proposals; the same friend was instructed to present to the pope a burning-mirror and several drawings of Bacon appertaining to physics, and to give all explanations required by His Holiness. The same year (1267) he finished his "Opus Minus", a recapitulation of the main thoughts of the "Opus Majus", to facilitate the pope’s reading or to submit to him an epitome of the first work if it should be lost. With the same object, and because in the first two works some ideas were but hastily treated, he was induced to compose a third work, the "Opus Tertium"; in this, sent to the pope before his death (1268), he treated in a still more extensive manner the whole material he had spoken of in his preceding works. Unfortunately his friend Clement IV died too soon, without having been able to put into practice the counsels given by Bacon.

About the rest of Roger’s life we are not well informed. The "Chronicae XXIV Generalium Ordinis Minorum" says that "the Minister General Jerome of Ascoli (afterwards Pope Nicholas IV) on the advice of many brethren considered the doctrine of the English brother Roger Bacon, Doctor of Divinity, which contains many suspect innovations, by reason of which Roger was imprisoned" (see the "Chronica" printed in "Analaetca Franciscana", III, 360). The assertion of modern writers, that Bacon was imprisoned for six years, and that even though he had proved his orthodoxy by the work "De nullaitate magiae" has no foundation in ancient sources.

Some authors connect the fact of imprisonment related in the "Chronicles" with the proscription of 219 theses by Stephen Tempier, Bishop of Paris, which took place 7 March, 1277 (Aristotle, "Institutionum Universitatis Parisiensis", I, 543, 560). Indeed it was not very difficult to find some "suspect innovation" in Bacon’s writings, especially with regard to the physical sciences. As F. Mandonnet, O.P., proves, one of his incriminated books or pamphlets was his "Speculum Astronomiae", written in 1277, hitherto falsely ascribed to Blaesius of Parma, a Great (Opera Omnia, ed. Vives, Paris, X, 629 sq.; cf. Mandonnet, "Roger Bacon et le Speculum Astronomiae" (1277) in "Revue Néo-Scolastique", XVII, Louvain, 1910, 313-35). Such and other questions are not yet ripe for judgment; but it is hoped that the Baconian studies and investigations will clear up more and more what is still obscure in Roger’s life.

The writings attributed to Bacon by some authors amount to about eighty; many (e.g. "Epistola de magnoeto", composed by Petrus Peregrinus de Maricourt) are spurious, while many are only treaties republished separately under new titles. Other writings or parts of writings certainly composed by him were put in circulation under the name of other scholars, and his claim to their authorship can be established only from internal reasons of style and doctrine. Other treatises still lie in the dust of the great European libraries, especially of England, France, and Italy. Much remains to be done before we can expect an edition of the "Opera Omnia" of Roger Bacon. For the present the following statements may suffice. Before Bacon entered the order, he had written many treatises; the majority of the objects he taught in the school, for his pupils only, or for friends who had requested him to do so, as he confesses in his letter of dedication of the "Opus Majus" sent to the pope: "Multa in alio statuto conscripsam propter juvenum rudimenta" (the letter was discovered in the Vat. lat. 1251, by Ch. de Teano, O.S.B., and first published by him in the "English Historical Review", 1897, under the title "An unpublished fragment of a work by Roger Bacon", 494 sq.; for the words above cited, see p. 500). To this period seem to belong some commentaries on the writings of Aristotle and perhaps the little treatise "De mirabili potestate artis et naturae et de nullitate magiae" (Paris, 1542; Oxford, 1604; London, 1859). The same work was printed under the title "Epistola de secretis operibus artis et naturae" (Hamburg, 1608, 1813). After joining the order, or more exactly from about the years 1256-57, he did not compose works of any great importance and extent, but only occasional essays requested by friends, as he says in the above-mentioned letter, "now about this science, now about another one", and more transitoria (see "Eng. Hist. Rev.", 1897, 500). In the earlier part of his life he probably composed ab initio the "Opus Majus" (see letter to Clement IV in "Bull. Frans." III, 89); for it is cited in another work, "Computus naturalium", assigned to 1263 by Charles ("Roger Bacon. Sa vie, etc.", Paris, 1861, p. 78; cf. pp. 334 sqq.).

The most important of all his writings are the "Opus Majus", the "Opus Minus", and the "Ter-
ium". The "Opus Majus" deals in seven parts with (1) the obstacles to real wisdom and truth, viz. errors and their sources; (2) the relation between theology and philosophy, taken in its widest sense as comprising all sciences not strictly philosophical: here he proves that all human learning is founded on sacred science, especially on Holy Scripture; (3) the necessity of studying zealously the Biblical languages, as without them it is impossible to bring out the treasure hidden in Holy Writ; (4) mathematics and their relation and application to the sacred sciences, particularly Holy Scripture; here he seizes an original idea; (5) the place of Biblical astronomy (for these parts really belong to the "Opus Majus"); (5) optics or perspective; (6) the experimental sciences; (7) moral philosophy or ethics. The "Opus Majus" was first edited by Samuel Jebb, London, 1730, afterwards at Venice, 1750, by the Franciscan Fathers. As both editions were incomplete, it was edited recently by J. H. Bridges, Oxford, 1900 ("The 'Opus Majus' of Roger Bacon, edited with introduction and analytical table," in 2 vols.). The first three parts of it were republished the same year by this author in a supplementary volume. It is a pity Rogeri Baconis. It is to be regretted that this edition is not so critical and accurate as it might have been. As already noted, Bacon's letter of dedication to the pope was found and published first by Dom Gasquet; indeed the dedication and introduction is wanting in the hitherto extant editions of the "Opus Majus", whereas the "Opus Minus" and "Opus Tertium" are accompanied with a preface by Bacon (see "Acta Ord. Min." Quaracchi, 1898, where the letter is reprinted).

Of the "Opus Minus", the relation of which to the "Opus Majus" has been mentioned, much has been lost. Originally it had nine parts, one of which must have been a treatise on alchemy, both speculative and practical; there was another entitled "The seven sins in the study of theology". All fragments hitherto found have been published by J. S. Brewer, "Fr. R. Bacon opp. quedam hactenus inedita", vol. I (the only one) containing: (1) "Opus Tertium"; (2) "Opus Minus"; (3) "Compendium Philos." The appendix adds "De secretis artis et naturae operibus et de nullitate magiae", London, 1859 (Rerum Britann. med. av. Script.). The aim of the "Opus Tertium" is clearly pointed out by Bacon himself, and the principles which of truth and of its difficulty have induced me to compose the Second Writing as a complement facilitating the understanding of the First Work, so on account of them I have written this Third Work to give understanding and completeness to both works; for many things are here added for the sake of wisdom which are not found in the other writings ("Opus Tertium", I, ed. Brewer, 6). Consequently this work must be considered, in the author's own opinion, as the most perfect of all the compositions sent to the pope; therefore it is a real misfortune that half of it is lost. The parts we possess, the authentic historical parts known in 1859 were published by Brewer (see above). One fragment dealing with natural sciences and moral philosophy has been edited for the first time by Duhem ("Un fragment inédit de l'Opus Ter- tum de Roger Bacon précédé d'une étude sur ce fragment", Quaracchi, 1908); another (Quarta pars communis) was published by H. Bade ("Compend. Jahrb. f. Philos. u. spezialis. Theol.", XXV, 1911, pp. 277-320). Bacon often speaks of his "Scriptum principale". Was this a work quite different from the others we know? In many texts the expression only means the "Opus Majus"; it becomes evident only to the "Opus Minus" and "Opus Tertium". But there are some other sentences where the expression seems to denote a work quite different from the three just mentioned, viz. one which Bacon had the intention of writing and for which these works as well as his praembulio were only the preparation.

If we may conclude from some of his expressions we can reconstruct the plan of this grand encyclopaedia: it was conceived as comprising four volumes, the last of which would contain a general survey of the sciences he speaks of (and logic; the second with mathematics (arithmetic and geometry), astronomy, and music; the third with natural sciences, perspective, astrology, the laws of gravity, alchemy, agriculture, medicine, and the experimental sciences; the fourth with metaphysics and moral philosophy (see Duhem in "Dict. des Sciences", v. Bade-Bacon; Brewer, pp. 1 sq.; Charles, 370 sq., and particularly Bridges, I, xiii sq.). It is even possible that some treatises, the connection of which with the three works ("Opus Majus", "Opus Minus", "Opus Tertium") or others is not evident, were part of the "Scriptum principale"; see Bridges, II, 465 sq., to which is added "Tractatus Fr. Rogeri Bacon de multiplicatione specierum", which seems to have belonged originally to a work of greater extent. Here may be mentioned some writings hitherto unknown, now for the first time published by Robert Steele ("Opera hactenus inedita de Apollinis per Rogeri ordinis fratrum minorum. De vicissi contractis in studio theologiae, omnia quae supersunt num primum edidit R. St.", London, 1905; Fasc. II: Liber primus communium naturalium Fratris Rogeri, partes et II", Oxford, 1906). Another writing of Bacon, "Compendium studii philosophi", was composed during the pontificate of Gregory X who succeeded Clement IV (1271-76), as Bacon speaks of this last-named pope as the "predecessor istius Papae" (chap. iii). It has been published, as far as it is extant, by Brewer in the above-mentioned work. He repeats there the argument touched upon in his former works, as for instance the causes of human ignorance, necessity of learning foreign languages, especially Hebrew, Arabic, and Greek; as a specimen are given the elements of Greek grammar.

About the same time (1277) Bacon wrote the fatal "Speculum Astronomiae" mentioned above. And two years before his death he composed his "compendium studii theologiae" in our days published for the first time in "British Society of Francis- can Studies", III, Aberdeen, 1911, where he set forth as in a last scientific confession of faith the ideas and metaphysical views which lay at the foundation of his life; he had nothing to revoke, nothing to change. Other works and pamphlets cannot be attributed with certainty to any definite period of his life. To this category belong the "Epistola de laude Scripturum", published in part by Henry Wharton in the appendix (nuncius) of "Jacobi Usserii Armachani Historia Dogmatica de Scripturis et sacris vernaculae" (London, 1869), 420 sq. In addition there is both a Greek and a Hebrew grammar, the last of which is known only in some fragments: The Greek grammar of Roger Bacon and a fragment of this Hebrew grammar were published by J. L. Heiberg in "Byzantinische Zeitschrift", IX, 1900, 479-91. The above-mentioned edition of the two grammars cannot be considered very reliable (see the introduction by Heiberg, ibid., XII, 1903, 343-47). Here we may add Bacon's "Speculum Alchemiae", Nuremberg, 1614 (Libellus do alchimia cui titulus: Spec. Alchem.), it was translated into French by Jacques Girard de Tournus, under the title: Miroir d'ali- cuilie", Lyons, 1567. Some of the chemical and alchemical part which was printed in 1620 together in one volume containing: (1) "Breve Breviarium de dono Dei"; (2) "Verb. abbreviaturum de Leone viridi"; (3)
meaning (sensus spiritualis); for when the literal sense is wrong, the spiritual sense cannot be right, since it is necessarily based upon the literal sense. The reasons of this false exposition are the corruption of the sacred text and ignorance of the Biblical language. For the literal meaning of Holy Writ without this knowledge, as the Latin versions are full of Greek and Hebrew idioms.

The seventh sin is the radically false method of preaching; instead of breaking to the faithful the Bread of Life by expounding the commandments of God, and unfolding the duties, the preachers content themselves with divisions of the arbor Porphyriana, with the jingle of words and quibbles. They are even ignorant of the rules of elocution, and often prelates who during their course of study were not instructed in preaching, when obliged to speak in church, beg the copy-books of the younger men, which are full of bombast and ridiculous diversions, serving only to "stimulate the hearers to all curiosity of mind, but do not elevate the affection towards good" ("Opus Tertium", Brewer, 309 sq.). Exceptions are very few, as for instance Friar Bertholdus Alemanus who also, has most affect

Another sin is the preference for the "liberSententiarum" and the disregard of other theological matters, especially Holy Scriptures; he complains: "The one who explains the 'Book of the Sentences' is honoured by all, whereas the lector of Holy Scripture is neglected; for to the expounder of the Sentences there is given the authority of custom, of learned or of his own will, and if he belongs to an order, a companion and a special room; whilst the lector of Holy Scripture is denied all this and must beg the hour for his lecture to be given at the pleasure of the expounder of the Sentences. Elsewhere the lector of the Sentences holds disputations and is called master, whereas the lec

Though having eliminated "the four general causes of all human ignorance", one must be convinced that all science has its source in revelation both oral and written. Holy Scripture especially is an inexhaustible fountain of truth from which all human philosophers, even the most learned, draw immediately or mediately, therefore no science, whether profane or sacred, can be true if contrary to Holy Writ (see "English Hist. Rev.", 1897, 508 sq.; "Opus Tertium", XXIV, Brewer, 87 sq.). This conviction having taken root, we must consider the means of attaining to wisdom. Among those which lead to the summit are to be mentioned in the first place the languages, Latin, Greek, Hebrew, and Arabic. Latin does not suffice, as there are many useful works written in other languages and not yet translated, or badly translated, into Latin. Even in the best versions of scientific works as those of Arias philosophers, or of the Scriptures, as also in the Liturgy, there are still some foreign expressions retained purposely or by necessity, it being impossible to express in Latin all nuances of foreign texts. It

"Secretum secretorum naturae de laude lapidis philosophorum"; (4) 'Tractatus trium verborum'; (5) "Alchemia major". But it is possible that some of these and several other treatises attributed to Bacon are parts of works already mentioned, as are essays "De situ et de regiis", "De situ et de regionibus", "De situ et de regionibus", "De situ et de regionibus", "De situ et de regionibus", "De situ et de regionibus", "De locis sacris", "Descripciones locorum mundi", "Summa grammatical" (see Golubovich, "Bibliotheca bio-bibliografica della Terra Santa e dell'Oriente Francescane", Quaratì, 1906, i, 208 sq.).

If we now examine Bacon's scientific systems and leading principles, his aims and inclinations, so to say, we find the burden not only of the writings sent to the pope, but also of all his writings was: ecclesiastic study must be reformed. All his ideas and principles must be considered in the light of this thesis. He openly exposes the "sins" of his time in the study of theology, which are seven, as he had proved, in the "Opus Majus". Though this part has been lost, we can reconstruct his arrangement with the aid of the "Opus Minus" and "Opus Tertium". The first sin is the preponderance of (speculative) philosophy. Theology is a Divine science, hence it must be based on Divine principles and treat questions touching Divine matters exclusively, and strive in philosophy to avoid cavils and distinctions. The second sin is ignorance of the sciences most suitable and necessary to theologians; they study only Latin grammar, logic, natural philosophy (very superficially!) and a part of metaphysics: four sciences very unimportant, scientific sile. Other sciences more necessary, foreign (oriental) languages, mathematics, alchemy, chemistry, physics, experimental sciences, and moral philosophy, they neglect. A third sin is the defective knowledge of the four sciences which they cultivate: their ideas are full of errors and misconceptions, because they have no means to get the real understanding of the authors from whom they draw all their knowledge, since their writings abound in Greek, Hebrew, and Arabic expressions. Even the greatest and most highly-esteemèd theologians show in their works to what an extent the evil has spread.

Another sin is the preference for the "liber Sententiarum" and the disregard of other theological matters, especially Holy Scriptures; he complains: "The one who explains the 'Book of the Sentences' is honoured by all, whereas the lector of Holy Scripture is neglected; for to the expounder of the Sentences there is given the authority of custom, of learned or of his own will, and if he belongs to an order, a companion and a special room; whilst the lector of Holy Scripture is denied all this and must beg the hour for his lecture to be given at the pleasure of the expounder of the Sentences. Elsewhere the lector of the Sentences holds disputations and is called master, whereas the lec

Such a method, he continues, is inexplicable and very injurious to the Sacred Text which contains the word of God, and the exposition of which would offer many occasions to speak about the matter not in the "sensum Sacrosententiarum", but even in the "sensum Scripturum". More disastrous is the fifth sin: the text of Holy Writ is horribly corrupted, especially in the "exemplar Parisiense", that is to say in the Biblical text used at the University of Paris and spread by its students over the whole world. Confusion has been increased by many religious who, in their zeal to correct the Sacred Text, in default of a sound method, have in reality only augmented the divergences; as every one presumes to change anything "he does not understand, a thing he would not dare to do with the books of the classical poets", and "it is not necessary to correct corruption in foreign tongues". The worst of all sins is the consequence of the foregoing: the falsity or doubtfulness of the literal sense (sensus literalis) and consequently of the spiritual
would be very interesting to review all the other reasons adduced by Bacon proving the advantage or even necessity of foreign languages for ecclesiastical, social, and political purposes, or to follow his investigations into the physiological conditions of language or into what might have been the original one spoken by man. He distinguishes three degrees of knowledge; theologians are not obliged to reach the second degree, which would enable them to translate a foreign text into their own language, or the third one which is still more difficult of attainment and which would enable them to speak this language as their own. Nevertheless the difficulties of reaching the second degree are not insurmountable as is commonly supposed; it depends only on the method followed by the master, and as there are very few scholars who follow a sound method, it is not to be wondered at that perfect knowledge of foreign languages is so rarely found among theologians (see "Opus Tertium", XX, Brewer, 64 sq.; "Compendium Studii phil.", VI, Brewer, 453 sq.). On this point, and in general of Roger's attitude towards Biblical studies, see the present author's article "De Fr. Roger Bacon ejusque sententia de rebus biblicis" in "Archivum Franciscanum Historiae" and "Philosophia" (vol. 1, 1890). Besides the languages there are other means, e.g., mathematics, optics, the experimental sciences, and moral philosophy, the study of which is absolutely necessary for every priest, as Bacon shows at length. He takes special pains in applying these sciences to Holy Scripture and the dogmas of faith. These are pages so wonderful and evincing by their train of thought and the drawings inserted here and there such a knowledge of the subject matter, that we can easily understand modern scholars saying that Bacon was born out of due time, or, with regard to the asserted impressions, that he belonged to the class of men who were crushed by the wheel of their time as they endeavoured to set it going more quickly. It is in these treatises (and other works of the same kind) that Bacon speaks of the reflection of light, mirrors, and burning-mirrors, of the diameters of the celestial bodies and their distances from one another, of their movements in the heavens; that he explains the laws of ebb and flow, proves the Julian Calendar to be wrong; he explains the composition and effects of gunpowder, discusses and affirms the possibility of steam-vessels and aerostats, of microscopes and telescopes, and some other inventions made many centuries later. Subsequent generations have esteemed only the external portions of his works, with their subtileties and fruitless quarrels, to the neglect of matters much more useful or necessary and the exaltation of philosophy over theology. From being hostile to true philosophy, he bestows a lavish praise on it. None could delineate more clearly and concisely than he what ought to be the relation between theology and philosophy, what profit they yield and what services they render to each other, how true philosophy is the best apologetic of Christian faith (see especially "Opus Majus", II and VII; "Compend. studi. phil."). Bacon is sometimes not very correct in his expressions; there may even be some ideas that are dangerous or open to suspicion (e.g., his conviction that a real influence upon the human mind and liberty and on human fate is exerted by the celestial bodies). But there is no real error in matters of faith, and Bacon repeatedly asks his reader not to consider his philosophy compartmented, his chemistry with alchemy, his astronomy with astrology; and certainly he submitted with all willingness his writings to the judgment of the Church. It is moving to note the reverence he displayed for the pope. Likewise he shows always the highest veneration towards the Fathers of the Church, and his criticism often becomes violent when he blames the most eminent of his contemporaries, he never
speaks or writes any word of disregard of the Fathers or ancient Doctors of the Church, even when not approving their opinion; he esteemed them highly and had a great respect for Winifride, their erroneous accounts of him. He was no way surpassed by any of his great rivals. Bacon was a faithful scholar of open character who frankly uttered what he thought, who was not afraid to blame whatsoever and whosoever he believed to deserve censure, a scholar who was in advance of his time. He was led to go by his own path, and the difficulties and enabled him to acquire a knowledge so far surpassing the average science of his age, that he must be reckoned among the most eminent scholars of all times.

Of the vast Baconian bibliography we can mention only the most important books and articles in so far as we have made use of them. Besides those already cited we must mention: BALE, Scriptur. Historia Britannica, Catalogue (1617); Anon, Ov. Index Britannicaris, quos --- collegit Joan. Baleani, ed. FOULIS and BATEMAN (Oxford, 1602-); WOOD, Hist. ant. uniq. Univers. Oxon. (1 Oxford, 1874); IDEM, Alphabetum Oxoniense (London, 1721), new ed. by BLEW (4 vols., London, 1813-20); WHARTON, Anglia sacra (4 vols., Oxford, 1687); ANTONIO, Dic. tom. tom. 3, 400 sqq.; VERNEUTHAUS, gratia, et latina Vulgata, IV (Oxford, 1703) (LITTELTON, Comment. in Scriptur. Britannicis, ed. HALL (Oxford, 1799); O'SULLIVAN, Index Novarum, I; II (Leipzig, 1732); Wadding-Fontenelle, Annales Ord., IV, V; Wadding, Scriptores O. M. (Rome, 1650, 1806, 1869); TURRIA, LeCONS, ed. HAYMANN (3 vols., 1748); SCHURRER, Supplement. ad SS. O. M. (Rome, 1806); BODMER, De l'histoire des Universités d'Italie et d'Espagne, (1792, 2 vols.); IDEM, Quota notabilitatis virorum hodiernorum Christianorum med. avi (Paris, 1895); of the criticism of this book by SOUT in Bibl. de l'École des Chartes, LIV (1899), 739; EQUITI, Droit des étrangers, en France (Paris, 1898); Mitte, Droit des étrangers, en France (Paris, 1898); BACON in Revue des questions hist., I (1891), 119-42; IDEM, La faculté de théol., de sciences et de lettres à Paris, I (1894-95); FLORKIN, La faculté de théol., de sciences et de lettres à Paris, II (1895-96).---

Rogers, James, Blessed. See Richard Whitting, Blessed.

Rogers of Hoveden, chronicler, was probably a native of Hoveden, or, as it is now called, Howden, in Yorkshire. From the fact that his chronicle ends rather abruptly in 1201 it is inferred that he must have died or been stricken with some mortal disease in that year. He was certainly a man of importance in his day. He was a king's clerk (clericus regis) in the time of Henry II, and seems to have been attached to the court as early as 1173, while he was also despatched on confidential missions, as for example to the chiefs of Galloway in 1174. In 1189 he served as an itinerant justice in the north, but he probably retired from public life after the death of Henry II, and it has been suggested that he became parish priest of his native village, Howden, devoting the rest of his life to the compilation of his chronicle. Like most other historical writings of that date the portion of his work contained in most manuscripts is only a fragment of some narrative which to him had more convenient access or which he considered specially worthy of confidence. His authority from 732 down to 1154 was an abstract, still extant in manuscript, Historia Saxonum vel Anglorum post obtitum Henrici II. From 1154 to 1195 he seems to have gone much more freely, basing his narrative upon the well-known "Gesta Henrici," commonly attributed to Benedict of Peterborough. But from 1192 to 1201 his work is all his own, and of the highest value. Hoveden had a great appreciation of the importance of documentary evidence, and we should be very ill informed regarding the political history of the last quarter of the twelfth century if it were not for the state papers, etc., which Hoveden inserts and of which, no doubt, his earlier connexion with the chancery and its officials enabled him to obtain copies. As a chronicler, he was impartial and accurate. His profoundly religious character made him something credulous, but there is no reason, as even his editor, Bishop Stubbs, admits, to regard him on that account as an untrustworthy authority.

Rogers of Wendover, a Benedictine monk, date of birth unknown; d. 1236, the first of the great chroniclers of St. Albans Abbey. He seems to have been a native of Howden in Buckinghamshire and must.
have enjoyed some little consideration among his brethren as he was appointed prior of the cell of Belvoir, but from this office he was deposed and retired to St. Albans, where he probably wrote his chronicle, known as the "Flores Historiarum", extending from the year 1135. From a copy of the original and valuable authority, but the whole material has been worked over and in a sense re-edited with editions by Matthew Paris (q. v.) in his "Chronica Majora." Wendover is less prejudiced than Paris, but he is also less picturesque, and whereas Paris in his generalisations and inferences, especially in the case of the records of the modern historian, Wendover is content to discharge the functions of a simple chronicler. The "Flores Historiarum" was edited for the English Historical Society in 1841 by H. O. Cox in five volumes, beginning with the year 447, when Wendover for the first time turns directly to the history of Britain. But in 1886-1889 the more valuable part of the work (from 1154 to 1235) was re-edited by H. G. Hewlett as part of the Rolls Series in three volumes.

HERBERT THURSTON.

ROH, FREDRICK, b. at Conthey (Gutheis) in the canton of Valais (French Switzerland), 14 August, 1811; d. at Bonn, 17 May, 1872. Up to his thirteenth year he spoke only French, so that he had to learn German from a German priest in the vicinity before he was able to begin his gymnasial studies in the boarding-school kept by the Jesuits at Brig in Switzerland. Later he became a day-pupil at the gymnasium kept by the Jesuits at Sitten. While he here resolved to enter the Society of Jesus (1829); strange to say the external means of bringing him to this decision was the reading of Pascal's pamphlet "Monita Secreta." He taught the lower gymnasial classes at the lyceum at Fribourg. During these years of study Roh showed two characteristic qualities: the talent of imparting knowledge in a clear and convincing manner, and an unusual gift for oratory. These abilities determined his future work to be that of a teacher and a preacher. He was first (1842-5) professor of dogmatics at Fribourg, then at the academy at Le Mans, which had just been established. At the same time he preached and aided as opportunity occurred in missions. These labours were interrupted by the breaking out of the war of the Swiss Sonderbund, during which he was military chaplain; but after its unfortunate end he was obliged to flee into Piedmont, from there to Lins and Gries, finally finding a safe refuge at Rappoltsweiler in Alsace as tutor in the family of his countryman and friend Siegwart-Müller, also expropriated. Here he stayed until 1849. A professorship of dogmatics at Louvain only lasted a year. When the missions for the common people were opened in Germany in 1854-5, he returned to Germany; as he himself confessed, "Francois God, I now come into my element." Both friend and foe acknowledge that the success of these missions was largely due to Roh, and his powerful and homely eloquence received the highest praise. He was an extemporaneous speaker; the writing of sermons and addresses was, as he himself confessed, "simply impossible" to him; yet, thoroughly trained in philosophy and theology, he could also write when necessary, as several articles from him in the "Stimmen aus Maria-Laach" prove. His pamphlet "Das alte Lied: der Zweck heiligt die Mittel, im Texte verbohrt", published in 1844, has given him a certain reputation until the present day, as Father Roh declared he would give a thousand gulden to the person who could show to the faculty of law of Bonn or Heidelberg a book written by a Jesuit which taught the principle that the end justifies the means. The prize is still unclaimed. Some of his sermons have also been preserved; they were printed against his will from stenographic notes. Father Roh's greatest strength lay in his power of speech; he was a most powerful and effective preacher of the German tongue that the Jesuits have had in this century.

ROH, FREDRICK, Bp. of Peter Roh, B. J., reprint of the biography in Stimmen aus Maria-Laach (1859).

R. N. SCHIEDE.

ROHBAKER, RENÉ FRANÇOIS, ecclesiastical historian, b. at Langatte (Langed) in the present Diocese of Metz, 27 September, 1778; d. in Paris, 17 January, 1856. He studied for several months at Sarrebourg and Phalsbourg (Pfalzburg) and at the age of seventeen had come to the classical studies. He taught for three years at the college of Phalsbourg; entered in 1810 the ecclesiastical seminary at Nancy, and was ordained priest in 1812. Appointed assistant priest at Innes, he was transferred after six months to Lunéville. A mission which he preached in 1821 at Flavigny led to the organization of a diocesan mission band. Several years later he became a member of the Congregation of St. Peter founded by Félicité and Jean de la Mennais, and from 1827 to 1835 directed the philosophical and theological studies of young ecclesiastics who wished to become the assistants of the two brethren in their religious undertakings. When Félicité de la Mennais himself turned to the active mission, Rohbacher separated from him and became professor of Church history at the ecclesiastical seminary of Nancy. Later he retired to Paris where he spent the last years of his life. His principal work is his monumental "Histoire Universelle de l'Église Catholique" (Nancy, 1842-49; 2nd ed., Paris, 1849-53). Several other editions were subsequently published and continuations added by Chantrel and Guillaume. Written from an apologetic point of view, the work contributed enormously to the exaltation of Gallicanism in the Church of France. Though at times uncriticai and devoid of literary grace, it is of considerable usefulness to the student of history. It was translated into German and partially recast by Hülakamp.
Rump, and numerous other writers. (For the other works of Rohrbach, see Hurter, "Nomenclator Lit.", III [Innsbruck, 1895], 1069-71.)

Bolleus, C. G., De Usum Comitiatis et Gravoletihiniae, ed. by Guillaume XII (Paris, 1880), 122-33; McCaffert, Hist. of the Cath. Ch. in the XIX Century, II (Dublin, 1906), I, 60, II, 448, 475.

N. A. Weber.

_Rojas y Zorrilla, Francisco de_. Spanish dramatic poet, b. at Toledo, 4 Oct., 1607; d. 1680. Authentic information regarding the events of his life is rather fragmentary, but he probably studied at the Universities of Toledo and Salamanca, and for a time followed a military career. When only twenty-five he was well known as a poet, for he is highly spoken of in Montalbán’s “Para todos” (1632), a fact which shows that he enjoyed popularity, when Lope de Vega, Tirso de Molina, and Calderon were in the height of their fame. The announcement published in 1638 of the assassination of Francisco de Rojas did not refer to the poet, for the first and second parts of his comedies, published by himself at Madrid, bear the dates of 1640 and 1645 respectively. A third part was promised but it never appeared. He was given the mantle of the Order of St. Louis in 1644. The writings of Rojas consist of plays and _autos sacramentales_ written alone and in collaboration with Calderon, Coello, Velez, Montalbán, and others. No complete edition of his plays is available, but Meسنer gives a very good selection with biographical notes. Among the best of them are “Del Rey abajo ninguno,” “Entre bobos y el juego,” “Donde hay agrario no hay celos,” and “Casarse por vengarse,” the last of which is claimed to have been the basis of Le Sage’s novel, “_Gil Blas de Santillane_.”

VENTURA FUENTES.

_Rokewode, John Gage_, b. 13 Sept., 1786; d. at Cloughton Hall, Lancashire, 14 Oct., 1842. He was the fourth son of Sir Thomas Gage of Hengrave, and took the name Rokewode in 1838 when he succeeded to the Rokewode estates. He was educated at Stonyhurst, and having studied law under Charles Butler he was called to the bar, but never practised, preferring to devote himself to antiquarian pursuits. He was an eldaily fellow of the Society of Antiquaries, 1818, and was director from 1829 till 1842. He also became a fellow of the Royal Society. In 1822 he published “The History and Antiquities of Hengrave in Suffolk” and in 1838 “The History and Antiquities of Suffolk.” His edition of Jocelin de Brakelond’s chronicle published by the Camden Society in 1840 furnished Carlyle with much of his materials for “Past and Present” (1843). Many papers by him appeared in “Archæologia,” many of these being republished as separate pamphlets, including the description of the Bénédictions of St. Ethelwold and of Robert of Jumièges; he also printed the genealogy of the Rokewode family with charts relating thereto in “Collectanea Topographica et Genealogica,” II. He contributed to the “Orthodox Journal” and the “Catholic Gentleman’s Magazine.” Many of his MSS. were sold after his death with his valuable library. The Society of Antiquaries possesses a bust of him by R. C. Lucas. He died suddenly while out shooting.

_Rolduc_ (Roda DUCH, also Roda, Closterorda or Hertogenrade), in S. E. Limburg, Netherlands. It became an Augustinian abbey in 1104 under Ven. Alibertus, a priest, son of Ammicrus, a nobleman of Antoing, Flanders. Alibertus is said to have been guided by a vision towards this chosen spot, which was in the domain of Count Adelbert of Saffenberg, who, before Bishop Othert of Liége, turned over the property destined for abbey and church in 1108. Alibertus was the first abbot (1104-11). Later he went to France where he founded the Abbey of Clairfontaine. Desiring once more to see Rolduc, he died on the way, at Sechtem, near Bonn, 19 Sep., 1122 (Acta SS.). Thirty-eight abbes succeeded Alibertus, the last one being Peter Joseph Chaineux (1779-1800). The abbey acquired many possessions in the Netherlands, and became the last resting-place of the Dukes of Limburg. It possesses the famous “Catalogus Librorum,” made a. d. 1230, containing one hundred and forty theological and eighty-six philosophical and classical works. The beautiful crypt, built by Alibertus, was blessed 13 Dec., 1106, and in 1108 the church was dedicated to the Blessed Virgin and St. Gabriel. In 1122 Pope Calixtus II confirmed by a Bull, preserved in the archives of Rolduc, the donation of the property. The church, completed in 1299, was then solemnly dedicated by Philip, Bishop of Ratzeburg. Dr. R. Corten completed the restoration of the church in 1939, and transferred the relics of Ven. Alibertus into a richly sculptured sarcophagus in the crypt, 1997. The church possesses a particle of the Holy Cross, five inches long, reputed to be authentic and miraculous (Archives of Rolduc, by Abbot Mathias Amezaga); also the body of St. Daphne, virgin and martyr, brought over from the Catacombs of Prætestatus in 1847. Rolduc became the see of Liége in 1831, under Right Rev. Cornelius Van Bommel, and the little seminary of Roermond, and academy in 1841. The present institution has an attendance of 420 pupils.

_Rolfus, Hermann_, Catholic educationist, b. at Freiburg, 24 May, 1821; d. at Buhl near Offenburg, 27 October, 1896. After attending the gymnasm at Freiburg, he studied theology and philology at the university there from 1840 to 1843, and was ordained priest on 31 August, 1844. After he had served for brief periods at various places, he was appointed curate at Thiengen in 1851, curate-in-charge at Reislingen in 1855, parish priest at the last named place in 1861, parish priest at Reute near Freiburg in 1867, at Sabaech in 1875, and at Buhl in 1892. In 1867 the theological faculty at Freiburg gave him the degree of...
Doctor of Theology. Rolfs did much for practical Catholic pedagogy, especially in southern Germany, by the work which he edited in conjunction with Adolf Päster, "Real-Encyclopädie des Erziehungs- und Unterrichtswesens nach katholischen Prinzipien" (4 vols., Mainz 1872-74, 2nd ed. of the first volume ("Erwachungsbund") 1884) was issued by Rolfs alone; a new edition is in course of preparation. Another influential publication was the "Dümlandes ca. 1867. Of his other works we follow up, in the following way: "Der Grund des katholischen Glaubens" (Mains, 1885); "Leitfaden der allgemeinen Weltgeschichte" (Freiburg, 1870; 4th ed., 1896); "Die Glaubens- und Sittenlehre der katholischen Kirche" (Einsiedeln, 1875; frequently re-edited), jointly with F. J. Brandt; "Kirchengeschichtliches in chronologischer Reihenfolge von der Zeit des letzten Vatikanischen Concils bis auf unsere Tage" (2 vols., Mainz, 1877-82; 3rd vol. by Sickinger, 1882); "Geschichte des Reiches Gottes auf Erden" (Freiburg, 1878-80; 3rd ed., 1894-95); "Katholischer Haushalt ochismus" (Einsiedeln, 1881-92). In addition to the works mentioned Rolfs has written a large number of pedagogic, political, apologetic, and polemical brochures, ascetic treatises, and works for the young.

Keller, Pestschrift zum fünfzigjährigen Priesterjubiläum des h. E. P. Dr. Hermann Rolfs (Mainz, 1882), with portrait; KNIEF in Bd. d. Biograph., V (Heidelberg, 1890), 570 sq.

FRIEDRICH LAUCHERT.

Rolle de Hampole, Richard, solitary and writer, b. at Thornton, Yorkshire, about 1300; d. at Hampole, 29 Sept., 1349. The date 1290, sometimes assigned for his birth-year, is too early, as a work written after 1296 he alludes to himself as "juven
culus" and "puer", words applicable to a man of under thirty, but not to one over that age. He showed such promise as a school-boy, while living with his father William Rolle, that Thomas de Neville, Archdeacon of Durham, undertook to defray the cost of his education at Oxford. At the age of nineteen he left the university to devote himself to a life of perfection, not desiring to enter any religious order, but with the intention of becoming a hermit. At first he dwelt in a wood near his home, but fearing his family would put him under restraint, he fled from Thornton and wandered about till he was recognized by John de Dalton, who had been a fellow student at Oxford, and who now provided him with a cell and the necessaries for a hermit's life. At Dalton he made great progress in the spiritual life as described by himself in his treatise "De incendio amoris". He spent from three to four years in the purgation and contemplation, and then in the contemplation, passing through three phases which he describes as color, canor, dulcor. They appeared successively, but once attained they remained with him continually, though he did not feel them all alike or all at the same time. Sometimes the color prevailed; sometimes the canor, but the dulcor accompanied both. The condition which insured his success was, "that I did not think anything like it or anything so holy could be received in this life." After this he wandered from place to place, at one time visiting the anchorese, Dame Margaret Kyrkby, at Anderby, and obtaining from God her cure. Finally he settled at Hampole near the Carlisle castle, where he spent the rest of his life. After his death his tomb was celebrated for miracles, and preparations for his canonization, including the composition of a mass and office in his honour, were made; but the cause was never prosecuted. His writings were extremely prolific, and of the fourteenth and fifteenth centuries, and of many MSS. copies of his works are still extant in English libraries. His writings show he was much influenced by the teaching of St. Edmund of Canterbury in the "Speculum Ecclesiae". The Lollards, realizing the power of his influence, tampered with his writings, interpolating passages favouring their errors. To defeat this trickery, the monks at Hampole (1292-74) printed a genuine copy of his works at their house. His chief works are "De emendatione vitae" and "De incendio amore", both written in Latin, of which English versions by Richard Misyen (1343-54) have been published by the Early English Text Society, 1896; "Contemplationes of the drede and love of God after the ancient adoration", both printed by Wynkyn de Worde in 1506; and "The Prick of Conscience", a poem printed for the philological Society in 1863. This was his most popular work and MSS. of it are very common. They have been collated by Andrese (Berlin, 1885) and Bulbring (Transactions of Philological Society, 1899-1900). Ten prose treatises found in the Thornton MS. in Lincoln Cathedral Library were published by the Early English Text Society, 1866. "The Form of Perfect Living", "Meditations on the Passion", and many shorter pieces were edited by Horstman (London, 1896). Rolle translated many parts of Scripture, and on the publication of the Psalms he has been printed. His English paraphrase of the Psalms and Canticles was published in 1854 (Clarendon Press, Oxford). This work of translation is noteworthy in face of the persistent though discredited Protestant tradition ascribing all the credit of translating the Scriptures into English to Wyclif. Latin versions of Rolle's works are neither numerous. They were collected into one edition (Paris, 1618) and again reprinted in the "Bibliotheca Patrum Maxima" (Lyons, 1677). Modernized English versions of the Meditations on the Passion have been published by Mgr. Benson in "A Book of the Life of Jesus" (London, 1890) and by the present writer (C. T. S. London, 1906).

EDWIN BURTON.

Rollin, Charles, b. in Paris, 1661; d. there, 1741.

The son of a cutler, intended to follow his father's trade, he was remarkable for the piety with which he served Mass and which secured for him a collegiate scholarship. He studied theology and received the measures, but not Holy Orders. He was assistant professor, and then professor of rhetoric at the Collège de Plessis; of Latin eloquence at the Collège Royal (1688), and at the age of thirty-three was appointed rector of the university. In 1696 he became principal of the Collège Beauvais, from which post he was dismissed in 1722 because of his opposition to the Bull "Unigenitus". He was a member of the Academy of Inscriptions from 1701. His works were written during his retirement. He was nearly sixty when he began the "Traité des Études", sixty-seven when he undertook his "Histoire Ancienne", seventy-seven when he became a member of the Academy, and eighty-one when death prevented him from finishing. The "Traité des Études" (in 12, 1726-31) explains the method of teaching and studying belles-lettres; it contains ideas which seem hackneyed, but which then were fairly new, e.g. the necessity of studying national history and of mastering the sources of classical science. The "Histoire Ancienne" (1730-38) consists of twelve volumes in 12°.
Ralph de Diceto, Walter of Coventry, and others, all edited by Bishop Stubbs; the works of Giralduis Cambrensis by Brewer, and the "Materials for the History of St. Thomas Beckett" by Canon Robertson. But the task of Rollin was limited to the ordinary English Chroniclers. Legal records and tractates, such as the "Year Books", the "Black Book of the Admiralty", and Bracton's great work "De Legibus et Consuetudinibus Angliae"; materials of a more or less legendary character relating to Ireland and Scotland, such as Whitley Stokes's edition of "the Tripartite Life of St. Patrick", or the Icelandic Sagas edited by Vigfusson and Dæsent; rhymed chronicles like those of Robert of Gloucester and Robert of Brunne in English, and that of Pierre de Languid in French; even quasi-philosophical works like those of Pater Roger Bacon and Alexander Neckam, together with folkloric materials like the three volumes of "Leechdoms, Wortcunning and Starcraft" of Anglo-Saxon times, have all been included in the Series. It need hardly be said that hagiographical documents, dealing for example with the lives of Dunstan, St. Edward the Confessor, St. Hugh of Lincoln, St. Thomas Beckett, and St. Wilfrid and other northern saints, occupy a prominent place in the collection. The vast bulk of the texts thus edited are in Latin, and these are printed without translation. Those in old French, Anglo-Saxon, Irish, Gaelic, Welsh, old Norse, etc. always have a translation annexed.

The progress of the Rolls Series may best be traced in the Annual Reports of the Deputy Keeper of the Public Records, but there is no central account. The "住户 of English History" (New York, 1900); POTTIARD, "Bibliotheca Historica" (Berlin, 1896).

HERBERT THURSTON.

Rolph, Thomas, surgeon, b. 1800; d. at Portsmouth, 17 Feb., 1858. He was a younger son of Dr. Thomas Rolph and Frances his wife, and brother of the Rev. Thomas Rolph, the Catholic clergyman. He studied medicine, and was admitted as a surgeon, he began to practice in Crutchfield, where he came into conflict with the Anglican rector of St. Olave, Hart Street, on the subject of tithes, a dispute which led him to petition the House of Commons on the subject and to publish two pamphlets: "Address to the Rev. H. B. Owen, D.D." (1827). He also took a prominent part in Catholic affairs. In 1832 he went to the West Indies, the United States, and Canada, where his brother John had become chairman of committees in the Upper Canada House of Assembly. For a time Thomas Rolph settled in Canada, acting as Government emigration agent, but he returned to England in 1839 and published a series of works on emigration: "Comparative advantages between the United States and Canada for British Settlers" (1842). "Emigrants' Manual" (1843); "Emigration and Colonization" (1844). In his earlier life he had published two pamphlets on the proceedings of the Religious Tract Society, and one against phrenology. He was also a constant contributor to the "Truth-teller", a Catholic magazine published by William Eusebius Andrews. He spent his last years at Portsmouth where he died of apoplexy.

EDWIN BUNTON.

Roman Catechism.—This catechism differs from other summaries of Christian doctrine for the instruction of the people in two points: it is primarily intended for priests having care of souls (ad parochos), and it enjoys an authority equalled by no other catechism. The need of a popular authoritative manual arose from a lack of systematic knowledge among pre-Reformation clergy and the concomitant neglect of religious instruction among the faithful.
The Reformers had not been slow in taking advantage of the situation; their popular tracts and catechisms were flooding every country and leading thousands of souls away from the Church. The Fathers of Trent, therefore, wishing to apply a salutary remedy to this great evil, decided to prepare a new and popular statement of the doctrine of the Church. The Council of Trent (1562-1563) appointed a commission of theologians to prepare such a catechism. The work was completed by the Jesuits in 1570, and was approved by the Council in 1571. The authority of conciliar definitions or other primary symbols of faith; for, although decreed by the Council, it was only published a year after the Fathers had dispersed, and it consequently lacks a formal conciliar approbation. During the heated controversy between the Jesuits and the Molinists, the Jesuits refused to accept the authority of the Catechism as decisive. Yet it possesses high authority as an exposition of Catholic doctrine. It was composed by order of a council, issued and approved by the pope; its use has been prescribed by numerous councils throughout the whole Church; and, in a letter to the French bishops (8 Sept., 1699), recommended the study of the Roman Catechism to all seminarians, and the reigning pontiff, Pius X, has signified his desire that preachers should expound it to the faithful.

The earliest editions of the Roman Catechism are: “Rome apud Paulum Manutium,” 1566; “Venetiis, apud Dominicum de Farris,” 1567; “Coloniae,” 1567 (by Henricus Aquaeana); “Parisii, in scריסus Jac. Kerver,” 1569; “Venetiis, apud Aldum,” 1675; Ingolstadii, 1577 (Sartorius). In 1596 appeared at Antwerp “Cat. Romanus . . . questionibus disquisitis, brevibusque, portentosisque Fabrici, Leodiensi.” (This editor, A. Le Fèvre, died in 1581. He probably made this division of the Roman Catechism into questions and answers in 1570). George Eder, in 1589, arranged the Catechism for the use of schools. He distributed the main doctrines into sections and subsections, and added periphrastic tables of contents. This useful work bears the title: “Methodus Catechismi Catholici.” The first known English translation is by Jeremy Donovan, a professor at Maynooth, published by Richard Coyne, Capel Street, Dublin, and by Keating & Brown, London, and printed for the translator by Pocks & Son, Oxford, 1823; the first American edition appeared in the same year. Donovan’s translation was reprinted at Rome by the Propaganda Press, in two volumes (1839); it is dedicated to Cardinal Fransoni, and signed: “Jeremias Donovan, aesculapius, cubillassius Gregorii XVI. P. M.” There is another English translation by R. A. Buckley (London, 1852), which is more elegant than Donovan’s and claims to be more correct but is spoiled by the doctrinal notes of the Anglican translator. The first German translation, by Paul Hoffeus, is dated Dillingen, 1598.

J. WILHELM.

Roman Catholic, a qualification of the name Catholic commonly used in English-speaking countries by those unwilling to recognize the claims of the One True Church. Out of condescension for these dissenters, the members of that Church are wont to use in official documents to be styled “Roman Catholics” as if the term Catholic represented a genus of which those who owned allegiance to the pope formed a particular species. It is in fact a prevalent conception among Anglocens to regard the whole Catholic Church as made up of three principal branches, the Roman Catholic, the Anglican, and the Greek Catholic. As the erroneousness of this point of view has been sufficiently explained in the articles Church and Catholic, it is only needful here to consider the history of the composite term with which we are now concerned. In the “Oxford English Dictionary,” Catholic is defined as “the highest existing quality of English philology, the following explanation is given under the heading “Roman Catholic.” “The use of this composite term in place of the simple Latin, Roman, or Romish, which had acquired an invidious sense, appears to have arisen in the early years of the seventeenth century. For conciliatory reasons employed in the negotiations connected with the Spanish Match (1618-1624) and appears in formal
documents relating to this printed by Rushworth (I, 85–89). After that date it was generally adopted as a non-controversial term and has long been the recognised legal and official designation, though it is used by some in a more restricted sense. In Germany, “Roman Catholic” is also used.” (New Oxford Dict., VIII, 766). Of the illustrative quotations which follow, the earliest in date is one of 1605 from the “European Speculum” of Edwin Sandys: “Some Roman Catholiques will not say grace when a Protestant is present;” while a passage from Dury’s “Syllabus” (1658) contrasts “Roman Catholiques” with “good, true Catholiques indeed.”

Although the account thus given in the Oxford Dictionary is in substance correct, it cannot be considered satisfactory. To begin with the word is distinctly older than is here suggested. When about the year 1550 certain English Catholics, under stress of grievous persecution, defended the lawfulness of attending Protestant services to escape the fines imposed on recusants, the Jesuit Father Persons published, under the pseudonym of Howlet, a clear exposition of the “Reasons why Catholiques refuse to go to Church.” This was answered in 1601 by a writer of the name of Burgham, who published a “Check or Reproof of M. Howlet.” The term “Roman Catholic” is repeatedly used. For example he speaks of “you Romane Catholickes that sue for toleration” (p. 140) and of “the parlialemd person or striped which you Romane Catholickes are brought into General Assembly.” Again, “A Deliberat Answe,” printed in 1588, though adopting by preference the forms “Roman Catholike” or “Popish Catholike,” also writes of those “who wander with the Roman Catholiques in the uncertain hypotheses of Popish devises” (p. 86). A study of these and other early examples in their context shows plainly enough that the qualification “Roman Catholic” or “Roman Catholike” was introduced by Protestant divines who highly resented the Roman claim to any monopoly of the term Catholic. In Germany, Luther had omitted the word Catholic from the Creed, but this was not the case in England. Even men of such Calvinistic leanings as Philpot (he was burned under Mary in 1555), and John Foxe, the martyrologist, not to speak of churchmen like Newell and Fulke, insisted on the right of the Reformers to call themselves Catholics and professed to regard themselves as the only true Catholic Church.

Philpot represents himself as answering his Catholic examiner: “I am, master doctor, of the unfeigned Catholic Church and will live and die therein, and if you can prove your Church to be the true Catholic Church, I will be one of the same” (Philpot, “Works,” 2nd Ed., 1623). It would be easy to quote many similar passages. The term “Roman Catholic” or “Roman Catholic” undoubtedly originated with the Protestant divines who shared this feeling and who were unwilling to concede the name Catholic to their opponents without qualification. Indeed, it is clear from many of the complaints of the “Protestant Catholikes” that the name which he applies to his antagonists. Thus he says “We Protestant Catholiques are not departed from the true Catholique religion” (p. 33) and he refers more than once to “Our Protestant Catholique Church,” (p. 74)

On the other hand, it is evident that the Catholics of the reign of Elizabeth and James I were by no means willing to admit any other designation for themselves than the unqualified name Catholic. Father Southwell’s “Humble Supplication to her Majesty” (1619), though criticised by some as an act of submission, does not suggest that the word Catholic was ever used in any other sense. What is more surprising, the same may be said of various addresses to the Crown drafted under the inspiration of the “Appellant’ clergy, who were suspected by their opponents of subservience to the government and of minimising in matters of dogma.

This feature is very conspicuous, to take a single example, in the “Protestation of allegiance” drawn up by thirteen commissioners, 31 Jan., 1603, in which they renounce all thought of “restoring the Catholic religion by the sword,” profess their willingness “to persuade all Catholiques to do the same” and conclude by declaring themselves ready on the one hand to “spend their blood in the defence of her Majesty” but on the other “rather their lives than infringe the lawful authority of Christ’s Catholic Church.” (Tierney - Dodd, III, p. cxv).

We find similar language used in Ireland in the negotiations carried on by Tyrone in behalf of his Catholic countrymen. Certain apparent exceptions to this uniformity of practice can be readily explained. To begin with we do find that Catholics not infrequently use the inverted form of the name “Roman Catholic” and speak of the “Catholic Roman faith” or religion. An early example is to be found in a little controversia tract of 1575 called “A Notable Discourse” where we read for example that the heretics of old “preached the Gospel in the Papists.” In the meantime the Antiscriptorium jeered at the “verye eloquent in detracting and rayling against the Catholique Romane Church” (p. 64). But this was simply a translation of the phraseology common both in Latin and in the Romance languages “Ecclesia Catholica Romana, or in French ‘l’Eglise catholique.” It was felt that the inverted form contained no hint of the Protestant contenion that the old religion was a spurious variety of true Catholicism or at best the Roman species of a wider genus. Again, when we find Father Persons (e.g. in his Three Conversions, III, 406) using the term “Roman Catholic,” the context shows that he is only adopting the name for the moment as conveniently embodying the contention of his adversaries.

Once more in a very striking passage in the examination of one James Clayton in 1591 (see Cal. State Papers, Dom. Eliz., add., vol. XXXII, p. 322) we read that the deponent was “persuaded to conforme himself to the Romaine Catholique faith.” But there is nothing to show that those were the actual words of the recusant himself, or that, if they were, they were not simply dictated by a desire to conciliate his examiners. The “Oxford Dictionary” is “the usual Roman Catholic title” and the term is not used as the official style of the adherents of the Popacy in England to the negotiations for the Spanish Match (1618–24). In the various treaties etc., drafted in connexion with this proposal, the religion of the Spanish princess is almost always spoken of as “Roman Catholic.” Indeed in some few instances the word Catholic alone is used. This feature does not seem to occur in any of the negotiations of earlier date which touched upon religion, e.g. those connected with the proposed d’Alençon marriage in Elizabeth’s reign, while in Acts of Parliament, proclamations, etc., before the Spanish Match, Catholics are described as Papists, Recusants, and their religion as papish, Romanish, or Romanist. Indeed long after this period, the use of the term Roman Catholic continued to be a mark of condescension, and language of much more uncomplimentary character was usually preferred. e.g. those connected with the proposed d’Alençon marriage in Elizabeth’s reign, while in Acts of Parliament, proclamations, etc., before the Spanish Match, Catholics are described as Papists, Recusants, and their religion as papish, Romanish, or Romanist. Indeed long after this period, the use of the term Roman Catholic continued to be a mark of condescension, and language of much more uncomplimentary character was usually preferred. Thus the “Humble Remonstrance, Acknowledgement, Protestation and Petition of the Roman Catholic Clergy of Ireland” in 1621 begins by saying that “we, your Majesty’s faithful subjects, the Roman Catholic clergy of Ireland.” The same practice seems to have obtained in Maryland; see for example the Consultation entitled “Objections
answered touching Maryland”, drafted by Father R. Blount, S.J., in 1832 (B. Johnston, “Foundation of Maryland”, etc., 1883, 29), and was passed 22 Sep., 1830, and 19 Dec., 1839, etc. (in Baldwin, “Maryland Civil Law”, 1840, vol. i. Naturally the co-operation of the bishops and their own wholeheartedness of purpose were to be in the first place. The Church is a community not only of believers but of men, and the greater as Catholic Emancipation became a question of practical politics, and by that time it would appear that many Catholics themselves used the qualified form not only when addressing the outside public but in their domestic discussions. A short-lived association, organized in 1794 with the fullest approval of the vicars Apostolic, to counteract the unorthodox tendencies of the Cisalpine Club, was officially known as the “Roman Catholic Meeting” (Ward, “Dawn of Cath. Revival in England”, II, 65). So, too, a meeting of the Irish bishops under the presidency of Dr. Troy at Dublin in 1821 passed resolutions approving of an Emancipation Bill then before a Parliament, in which they uniformly referred to members of their own communion as “Roman Catholics”. Further, such a representative Catholic as Charles Butler in his “Historical Memoir” (see e. g. vol. IV, 1821, pp. 185, 190, etc.) used the term “Roman-catholic” [sic] and seems to find this expression as natural as the unqualified form.

With the strong Catholic revival in the middle of the nineteenth century and the support derived from the uncompromising.seal of many earnest converts, such for example as Faver and Manning, an inflexible adherence to the name Catholic without qualification once more became the order of the day. The government, however, would not modify the official designation or suffer it to be set aside in addresses presented to the Sovereign on public occasions. In two particular instances during the archiepiscopate of Cardinal Vaughan this point was raised and became the subject of correspondence between the cardinal and the Home Secretary. In 1897 at the Diamond Jubilee of the accession of Queen Victoria, and again in 1901 when Edward VII succeeded to the throne, the Catholic episcopate desired to present addresses, but on each occasion it was intimated to the cardinal that the only permissible style would be “the Roman Catholic Arch Bishop and Bishops in England”. Even the form “the Cardinal Archbishop and Bishops of the Catholic and Roman Church in England” was not approved. Instead, the addresses were presented, but in 1901 the requirements of the Home Secretary as to the use of the name “Roman Catholics” were complied with, though the cardinal reserved to himself the right of expressing subsequently on some public occasion the sense in which he used the words (see Sneath-Coix, “Life of Cardinal Vaughan”, II, 231-41). Accordingly, at the Newcastle Conference of the Catholic Truth Society (Aug., 1901) the cardinal explained clearly to his audience that “the term Roman Catholic has two meanings; a meaning that we repudiate and a meaning that we accept.” The term, as understood in the time of the penal laws, denoted the unity of the Church, and “insists that the central point of Catholicity is Roman, the Roman See of St. Peter.”

It is noteworthy that the representative Anglican divine, Bishop Andrews, in his “Torture or Torto” (1660) rigidly defined English Catholics as a contradiction in terms. “What,” he asks, “is the object of adding ‘Roman’? The only purpose that such an adjunct can serve is to distinguish your Catholic Church from another Catholic Church which is not Roman” (p. 368). It is this very common line of argument which imposes upon Catholics the necessity of making no compromise in the matter of their own name. The adherence of the Holy See did not begin in the sixteenth century to call themselves “Catholics” for controversial purposes. It is the traditional name handed down to us continuously from the time of St. Augustine. We use this name ourselves and ask those outside the Church to use it. At bottom reference to its significance simply because it is our customary name, just as we talk of the Russian Church as “the Orthodox Church”, not because we recognize its orthodoxy but because its members so style themselves, or again just as we speak of “the Reformation” because it is the term established by custom, though we are far from owning that it was a reformation in either faith or morals. The dog-in-the-manger policy of so many Anglicans who cannot take the name of Catholics for themselves, because popular usage has never sanctioned it as such, but who on the other hand will not concede it to the members of their Church, is essentially brought out in the course of a correspondence on this subject in the London “Saturday Review” (Dec., 1908 to March, 1909) arising out of a review of some of the earlier volumes of The Catholic Encyclopedia.

The historical facts summarised in this article are given in an extended form in a paper contributed by the present writer to The Monthly (Sept., 1911). See also The Times, 1, 401, 402, and Sneath-Coix, “Life of Cardinal Vaughan”, cited above.

HERBERT THURSTON.

Roman Catholic Relief Bill.—In England.— With the ascension of Queen Elizabeth (1558) commences the series of events, known as the Penal Laws, under which the profession and practice of the Catholic religion were subjected to severe penalties and disabilities. By laws passed in the reign of Elizabeth herself, any English subject receiving Holy Orders of the Church of Rome and coming to England was guilty of high treason, and any one who aided or sheltered him was guilty of capital felony. It was likewise made treason to be reconciled to the Church of Rome, and to procure others to be reconciled. Papists were totally disabled from giving their children any education in their own religion. They were confined to their home under a schoolmaster who did not attend the parish church, and was not licenced by the bishop of the diocese, the parents were liable to forfeit ten pounds a month, and the schoolmaster himself forty shillings a day. Should the children be sent to Catholic seminaries beyond the seas, their parents were liable to forfeit one hundred pounds, and the children themselves were disabled from inheriting, purchasing, or enjoying any species of property. Saying Mass was punished by a forfeiture of 200 marks; hearing it by one of 100 marks. The statutes of recusancy punished nonconformity with the Established Church by a fine of twenty pounds and a year’s imprisonment. Under such penalties the number of such non-conformity were limited to Popish recusants. A Papist, convicted of abstaining himself from church, became a Popish recusant convict, and besides the monthly fine of twenty pounds was disabled from holding any office or employment, from keeping arms or land, from maintaining actions or suits at law or in equity, from being an executor or a guardian, from presenting to an advow-

although there was less and less disposition to put them in force, there was over the danger which upon occasion grew more acute. In 1767 a priest named Malony was tried at Croydon for his priesthood, and condemned to perpetual imprisonment, which, at the end of two or three years, was commuted, "by the mercy of the Government," to banishment. In 1768 the Reverend James Webb was tried in the Court of King's Bench for the same offense, but was acquitted by the Chief Justice, Lord Mansfield, ruling that there was no evidence sufficient to convict. In 1769 and on other occasions, seemingly as late as 1771, Dr. James Talbot, coadjutor to Bishop Challoner, was tried for his life at the Old Bailey, on the charge of his association with the Pope and with the Papists, and was acquitted on similar grounds. Such instances were not solitary. In 1780, Mr. Charles Butler found that one firm of lawyers had defended more than twenty priests under prosecutions of this nature. In 1778 a Catholic committee was formed to promote the cause of relief for their co-religionists, and though several times elected fresh, continued to exist until 1791, with a short interval after the Gordon Riots. It was always uniformly aristocratic in composition, and until 1787 included no representation of the hierarchy and then but three co-opted members. In the same year, 1778, was passed the first Act for Catholic Relief (13 George III. c. 51), by which the disabilities imposed, which besides a declaration of loyalty to the reigning sovereign, contained an abjuration of the Pretender, and of certain doctrines attributed to Catholics, as that excommunicated princes may lawfully be murdered, that no faith should be kept with heretics, and that the pope has temporal as well as spiritual jurisdiction in this realm. Those taking this oath were exempted from some of the most galling provisions of the Act of William III passed in 1700. The section as to taking and prosecuting priests were repealed, as also the penalty of perpetual imprisonment for keeping a school. Catholics were also enabled to inherit and purchase land, nor was a Protestant heir any longer empowered to enter and enjoy the estate of his Catholic kinsman. The passing of this act was the occasion of the Gordon Riots (1780) in which the violence of the mob was specially directed against Lord Mansfield who had balked various prosecutions under the statutes now repealed.

In 1791 there followed another Act (31 George III, c. 32) far more extensive and far-reaching. By it there was again an oath to be taken, in character much like that of 1778, but including an engagement to support the Protestant succession and the Act of Settlement (12 and 13 William III). No Catholic taking the oath was henceforward to be prosecuted for being a Papist, or for being educated in the Popish religion, or for hearing Mass or saying it, or for being a priest or deacon, or for entering into, or belonging to, any society, brotherhood, or community in the Church of Rome, or for assisting at, or performing any Catholic rites or ceremonies. Catholics were no longer to be summoned to take the Oath of Supremacy, or to be removed from London; the legislation of George I, requiring them to register their estates and wills, was absolutely repealed; while the professions of counsellor and barrister at law, attorney, solicitor, and notary were opened to them. It was however provided that all their assemblies for religious worship should be certified at Quarter Sessions; that no person should officiate at such assembly until his name had been recorded by the Clerk of the Peace, and that no assembly should be locked or barred during the meeting; and that the building in which it was held, should not have a steeple or bell. The Relief Act of 1791 undoubtedly marked a great step in the removal of Catholic grievances, but the English statesmen felt,
along with the Catholic body, that much more was required. Pitt and his rival, Fox, were alike pledged to a full measure of Catholic Emancipation, but they were at a severe loss to account for the obstinacy of King George III, who insisted that to agree to any such measure would be a violation of his coronation oath. There were also at this period considerable dissensions within the Catholic ranks. These concerned first the question of Veto on the appointment of bishops in Ireland, who were to be either freemen or tradesmen, and not only to take their oaths of allegiance to the English Government, and belongs chiefly to the history of Emancipation in that country. There was another cause of disension, more properly English, which was connected with the adulation of the supposed Catholic doctrines contained in the oath imposed upon those who wished to participate in the benefits conferred by the Act of 1791, as previously by that of 1778. The lay members of the Catholic committee who had framed this disclaimer were accused by the vicars Apostolic, who then administered the Church in England, of tampering with matters of ecclesiastical discipline; and although the bishops had their way in the matter of the oath, the feud survived, and was proclaimed to the world by the formation in 1792 of the Cisalpine Club (q.v.), the members whereof were pledged "to resist any ecclesiastical interference which may militate against the freedom of the English Catholic body." Such internal dissension, no doubt, did much to retard the course of Emancipation. Its final triumph was not due more than aught to the pressure which the Catholic body in Ireland was able to put upon the Government, for it was acknowledged by the Duke of Wellington and Sir Robert Peel themselves, who earned the Bill that their action was due to the necessity of pacifying Ireland, which had found so powerful a leader in Daniel O'Connell (q.v.), and of thus averting the danger of a civil war. It would take too much space to go into details regarding the provisions of the Act of Emancipation. Its general effect was to open public life to Catholics taking the prescribed oath, to enable them to sit in Parliament, to vote at elections (as previously they could not in England or Scotland, though they could in Ireland) to fill all offices of State with a few exceptions, viz.: A Catholic cannot succeed to the throne, and a sovereign who becomes a Catholic thereby forfeits the crown, and a Catholic cannot hold the office of Regent. It is uncertain whether the English Chancellorship and the Irish Viceregency are barred to Catholics or not. Like the previous Relief Acts, that of 1829 still retained the "test oath" of William III, thus being imposed upon those who desire to enjoy its benefits. It likewise added something in the way of penal legislation by a clause prohibiting religious orders of men to receive new members, and subjecting those who should disobey to banishment as misdemeanants. This prohibition is still upon the statute book, and within the present century an attempt has been made to give it effect. Finally, in 1871 (34 and 35 Victoria, c. 48) the invidious Roman Catholic Oath was abolished, as also the still more objectionable declaration against Transubstantiation.

THE IRISH PARLIAMENT soon enacted that all candidates for office should take the Oath of Supremacy; and by the Act of Uniformity the Protestant liturgy was abolished in all churches. For a time, however, these Acts were but mildly enforced. But when the pope excommunicated the queen, and the Spanish king made war on her, and both, in attempting to dethrone her, found that the Irish Catholics were ready to be their instruments and allies, the latter, regarded as rebels by the English, and foreign and her ministers, were persecuted and hunted down. Their chiefs were outlawed, their churches laid in ruins, their clergy driven to exile or death. The expectations of a harassed people and an outlawed creed—that better times had come with the advent of the situation—were falsified by the repeated proceedings against priests, by the Plantation of Ulster, and, later, by the attempted confiscations of Strafford. Charles II had special reasons for being grateful to large masses of Irish Catholics, who fought his battles at home and supported him abroad; yet at the Restoration he left them to their fate, and confirmed the gigantic scheme of confiscation which had been carried out by Cromwell. He was not indeed much attached to any religion, and disliked religious persecution; and more than once during his reign he tried to interpose between the Catholics and the Acts of Uniformity and Supremacy. But the military and aggressive views of the English Parliament would have no Catholic in any office, civil or military, and none in the corporations; and Charles was too politic to strain unduly the allegiance of these intolerant legislators. Had James II been equally politic he would have gradually allayed Protestant prejudice; and perhaps there would have been no long-drawn-out penal code, and no wearisome struggle for emancipation. But he insisted on Catholic predominance, and soon picked a quarrel with his Protestant subjects which resulted in the loss of his crown.

The war which followed in Ireland was terminated by the Treaty of Limerick, and had its terms been kept, the position of the Catholics would have been at least tolerable. Granted such privileges as they had enjoyed in the reign of Charles II, with an Oath of Allegiance substituted for the Oath of Supremacy, they might, with a promise to legislate further, have kept the penal enactments in force, they could practice their religion without hindrance, sit in Parliament and vote for its members, engage in trade and in the learned professions, and fill all civil and military offices; and they were protected in the possession of the lands they held. But when the Act of Union, which made them a rallying-cry for bigotry, was in favour of them, and even more generic terms. But the forces of intolerance on both sides of the Channel were too strong. A small minority of Protestants in Ireland, pampered by privileges and possessing confiscated lands, thought that they only chance of security was to trample upon the Catholics supplanting them. Sustained and encouraged by England, in defiance of the solemn obligations of public faith, they tore the Treaty of Limerick into tatters, refused to ratify its concessions, and elaborated a penal code which every fair-minded Englishman now blushes to recall. For more than a quarter of a century the work of outlawry and proscription was continued by an exclusively Protestant Parliament at Dublin; and when the work was completed the position of the vast majority of Irishmen was that of slaves. An Irish Judge declared in 1760 that the law did not recognize the existence of an Irish Catholic, and, assuredly the penal code had placed him effectually beyond its pale. It branded Catholics with proscription and inferiority, struck at every form of Catholic activity, and checked every symptom of Catholic enterprise. It excluded them from Parli-
ment, from the corporations, from the learned professions, from civil and military offices, from being executors, or administrators, or guardians of property, from holding land under lease, or from owning a horse worth £5. They were deprived of arms and of the franchise, denied education at home and punished if they sought it abroad, forbidden to observe Catholic Holy Days, to make pilgrimages, or to continue any other old customs and burial places of their dead. For the clergy there was no mercy, nothing but prison, exile, or death.

After the Catholics had vainly protested against the Bill "To Prevent the Further Growth of Popery" of 1704, their protests ceased. The more energetic of them who were free spirited and in the same spirit, the peasantry steeped in poverty and ignorance, the clergy and gentry sunk in servitude, and all of them afraid even to complain of their condition lest the anger of their tyrants might be provoked. At last the tide turned. The Irish Parliament became less-bigoted, and after 1760 or thereabouts no more penal laws were passed. Indeed the work of crushing and debasing the Catholics had been so well done that they were paupers and slaves, and to crush them still further would give the Protestants no additional security. Some Catholics had made money in it, and it was not Protestant interest; and these and their friends in Parliament would naturally favour toleration; the fact that the Catholics had so long been peaceable, and had given no support to the Pretenders showed that they no longer clung to the Stuarts; and this greatly strengthened their position both in England and Ireland. The growth of a strong sentiment of nationality among Irish Protestants also helped their cause. Claiming powers which it did not possess, the British Parliament asserted and exercised the right to legislate for Ireland, treated the Irish Parliament with disdain, and in the interests of English manufacturers imposed ruinous commercial restrictions on Irish trade. Dissatisfied with their English friends, the Irish Protestants turned to their own Catholic countrymen, and the more Catholics and Protestants came together, the better for the cause of religious toleration. This turn of affairs inspired the Catholics with hope and courage, and three of them, Dr. Curry, a Dublin physician, Mr. Wyse of Waterford, and Mr. Charles O'Connor, formed, in 1759, a Catholic Association, which was to meet at Dublin, correspond with representative Catholics in the country, and watch over Catholic interests. But such was the condition of political parties, of the gentry and clergy held aloof, and the new association was chiefly manned by Dublin merchants. Under its auspices a loyal address was presented to the viceroy, and another to George III on his accession to the throne, and the Catholics rejoiced that both addresses were graciously received.

These friendlier dispositions, however, were slow to develop into legislative enactments, and not until 1771 did the first instalment of emancipation come. By the Act of that year Catholics were allowed to reclaim and hold under lease for sixty-one years fifty acres of bog, but it should not be within a mile of any city or market town. Three years later an oath of allegiance was substituted for that of supremacy. A further concession was granted in 1778 when Catholics were allowed to hold leases of land for 999 years, and might inherit land in the same way as Protestants, the preamble of the Act declaring that the law was necessary to reward the long-continued peaceable behaviour, and for the purpose of allowing them to enjoy "the blessings of our free constitution". Distrust of them, however, continued, and though they subscribed money to equip the volunteers, they would not be admitted within the ranks. Nor was the Irish Parliament of 1782 willing to do more than to repeal the law compelling bishops to quit the kingdom, and binding those who had assisted at Mass to give the celebrant's name. Further, Catholics were no longer prohibited from owning a horse worth £5, and Catholic schools might be opened with the consent of the Protestant bishop of the diocese. These small concessions were not supplemented by others for ten years.

Dissensions and jealousies were largely responsible for this slow progress. Between the Catholic landed gentry and the Catholic merchants there was little in common except their religion. The timidity and submission to authority of the former, and the bolder and more venturesome quality of the latter, widened the breach between them and in 1763 the Catholic Association fell to pieces. After ten years of inactivity a Catholic committee was formed partly out of the debris of the defunct association. Its chairman was the Earl of Kenmare, and again it was sought to have all Catholics act together. But Kenmare was not the man to reconcile divergent views and methods, to form a homogeneous party out of discordant elements, and then with such a party to adopt a vigorous policy. His manner was cold, his tone one of patronage and superiority; he disliked agitation as savouring of vulgarity and sedition, and preferred easy-going, well-bred, respectuous, slavish protestations of loyalty, and secret intrigue; and when an overwhelming majority of the Catholic Committee favoured manlier measures, he and sixty-eight others who sympathised with him seceded from its ranks. This was in 1791. The committee then chose for its leader John Keogh, a Dublin merchant of great ability, strong, manly, fearless, prudent but firm, a man who favoured bolder measures and a decisive tone. Instead of begging for small concessions he demanded the repeal of the whole penal code, a demand considered so extravagant that it had few friends in Parliament. When that assembly was made independent it had not been reformed; and Grattan had foolishly allowed the volunteers to lay aside their swords before the battle of reform had been won.

Unrepresentative and corrupt, Parliament continued to be dominated by pensioners and placemen, and under the influence of Nisbet and Porter two Irishmen and two bigots, it refused to advance further on the path of concession. Even Charlemont and Flood would not join emancipation with parliamentary reform, and while willing to safeguard Catholic liberty and property would give Catholics no part in the government. This state of things was intolerable, and exclusion could not be indefinitely maintained. The French Revolution was in progress, and a young and powerful republic had arisen preaching the rights of man, the iniquity of class distinctions and religious persecution, and proclaiming its readiness to aid all nations who were oppressed and desired to be free. These attractive doctrines rapidly seised on men's minds, and Ireland did not escape the contagion. The Ulster Presbyterians celebrated with enthusiasm the fall of the Bastille, and in 1791 founded the Society of United Irishmen, having as second chief plank in its programme parliamentary reform and Catholic Emancipation. The Catholics and Dissenters, so long divided by religious antagonism, were coming together, and if they made a united demand for equal rights for all Irishmen, without distinction of creed, the ascendancy of the Episcopal Protestants, who were but a tenth of the population, was not so long necessary to restrain the long-continued peaceable behaviour, and for the purpose of allowing them to enjoy "the blessings of our free constitution". Distrust of them, however, continued, and though they subscribed money to equip the volunteers, they would not be admitted within the ranks. Nor was the Irish Parliament of
without the necessity of obtaining the permission of a Protestant bishop.

Such grudging concessions irritated rather than appeased in the existing tempest of the Catholic body. To consider their position and take measures for the future, a Congress was convened, and nominated by the different parishes in Ireland, and in December, 1792, a Catholic convention commenced its sittings in Dublin. By the Protestant bigote it was derisively called the Back Lane Parliament, and every effort was made to discredit its proceedings and identify it with sedition. Fitzgibbon excited the fears of the Protestant landlords by declaring that the repeal of the penal code would involve the repeal of the Act of Settlement, and invalidate the titles by which they held their lands. The Catholic convention, however, went on unheeding, and turning with contempt from the Dublin Parliament sent delegates with a petition to London. The relations between Catholics and Dissenters were then so friendly that Keogh became a United Irishman, and a Protestant barrister named Theobald Wolfe Tone, the ablest of the United Irishmen, became secretary to the Catholic Committee. And when the Catholic delegates on their way to London passed through Edinburgh, Pitt obtained the direction that they should be met by Presbyterians amid thunders of applause. Had the Prime Minister, Pitt, advised the king to receive the Catholics coldly, he would certainly have earned the goodwill of a small clique in Ireland, to whom their own interests were everything and the interests of England little. But he would have intensified disaffection among nine-tenths of the Irish people, and this at a time when the French had headed their king, hurled back the Prussian attack at Valmy, conquered Belgium, and, maddened with enthusiasm for liberty and with hatred of monarchy, were about to declare war on England. The king graciously received Pitt and Dunmail, the House Secretary, warned the Irish junta that the time for concessions had come, and that if rebellion broke out in Ireland, Protestant ascendancy would not be supported by British arms. And then these Protestants, whom Fitzgibbon and the viceroy painted as ready to die rather than yield quietly, gave way; and in 1793 a bill was passed giving the Catholics the parliamentary and municipal franchise, and admitting them to the university and to office. They were still excluded from Parliament and from the higher offices, and from being king's counsel, but in all other regards the class of the people they were equal to the English. In the Commons Foster spoke and voted against the Bill. In the Lords, though not opposing it, Fitzgibbon spoiled the effect of the concession by a bitter speech, and by having an Act passed declaring the Catholic convention illegal, and prohibiting all such conventions, Catholic or otherwise, in the future.

Relief from so many disabilities left the Catholics almost free. Few of them were affected by exclusion from the higher offices, fewer still by exclusion from the inner Bar; and Liberal Protestants would always be found ready to voice Catholic interests in Parliament if they owed their seats to Catholic votes. Besides the Catholic College was established. It was never doubted that these last relics of the penal code would soon disappear. Meanwhile what was needed was a sympathetic and impartial administration of the law. But with Fitzgibbon the guiding spirit of Irish government this was impossible. The grandee of a Catholic who opposed the Orange Order was anathematized every occasion to cover them and their religion with insults. Autocratic and overbearing, he commanded rather than persuaded, and since he became attorney-general in 1783, his influence in Irish government was immense. His action on the regency question in 1789 procured him the special favour of the king and of Pitt, and he became a peer and Lord Chancellor. It was one of the anomalies of the Irish constitution that a change of measures did not involve a change of men, and hence the viceroy and the chief secretary, who had opposed all concessions to Catholics, were retained in office, and Fitzgibbon was still left as if he were the only other concessions and to nullify what had been done. For a brief period, however, it seemed as if men as well as measures were to be changed. At the end of 1794 a section of the English Whigs joined Pitt's administration. The Duke of Portland became Home Secretary, with Irish affairs in his department, and Sir Louis Fitzgerald became Lord Lieutenant. He came to Ireland early in 1795. His sympathy with the Catholics was well known; he was the friend of Grattan and the Ponsonby, the champions of Emancipation, and in coming to Ireland he believed he had the full sanction of Pitt to popularize Irish Government and finally settle the Catholic question. At once he dismissed Cooke, the Under Secretary, a determined foe of concession and reform, and also John Berosford who, with his relatives filled so many offices that he was called the "king" of Ireland. Fitzgibbon and Foster he seldom consulted. Further, when Grattan at the opening of Parliament introduced an Emancipation Bill, Pitt turned back and Fitzwilliam was recalled. Why he was thus repudiated, after being allowed to go so far, has never been satisfactorily explained. It may be because Pitt changed his mind, and meditating a union wished to leave the Catholic question open. It may be because of the dismissal of Berosford, who had powerful friends. It may be that Fitzwilliam, misunderstanding Pitt, went further than he wished him to go; and it seems evident that he managed the rejection badly and irritated interests he ought to have appeased. Lastly, it is certain that Fitzgibbon poisoned the king's mind by pointing out that to admit Catholics to Parliament would be to violate his coronation oath.

However the change be explained, it was certainly complete. The new viceroy was instructed to conciliate the Catholic clergy by establishing a seminary for the education of Irish priests, and he established Maynooth College. But all further concessions to Catholics and every attempt to reform Parliament he was firmly to oppose. He was to encourage the disaffection of the Protestants who had been appeased and he was to rekindle the dying fires of sectarian hate. And all this he did. Berosford and Cooke were restored to office, Foster favoured more than ever, Fitzgibbon made Earl of Clare, Grattan and Ponsonby regarded with suspicion, and the corrupt majority in Parliament petted and caressed. The religious factions of the "Defenders" and the "Peep o' Day Boys" in Ulster became embittered with a change of names. The Defenders became United Irishmen, and these, despairing of Parliament, became republicans and revolutionists, and after Fitzwilliam's recall were largely recruited by Catholics. Their proceedings became intolerable. Fitzgibbon, while the Irish society recently formed in Ulster, with William of Orange as its patron saint, and intolerance of Catholicism as the chief article in its creed. These rival societies spread to the other provinces, and while every outrage done by Catholics was punished by Government, those committed by Orangemen were seldom punished. Insur-rection Parliament passed an Arms Act, an Insurrection Act, an Indemnity Act, and a suspension of the Habeas Corpus Act, and these placed the Catholics beyond the protection of law. An undisciplined soldiery recruited from the Orangemen were let loose among them; destruction of Catholic property, free quarters, flogging, picketing, half-hanging, outrages
on women followed, until at last Catholic patience was exhausted. Grattan and his friends, vainly protestating, withdrew from Parliament, and Clare and Foster had then a free hand. They were joined by Viscount Castlereagh, and under their management the rebellion of 1798 broke out with all its attendant horrors.

When it was suppressed Pitt's policy of a legislative union gradually unfolded itself, and Foster and Clare, who had so long acted together, had reached the parting of the ways. The latter, with Castlereagh, was ready to go on and support the proposed union; but Foster drew back, and in the union debates his voice and influence were the most potent on the opposition side. His defection was considered a serious blow by Pitt, who was mainly offered by others to lead the incurruptible amidst corruption; Grattan and his friends returned to Parliament; and the opposition became so formidable that Castlereagh was defeated in 1799, and had to postpone the question of a union to the following year. During this interval, with the aid of Cornwallis who succeeded Camden as viscount in 1798, he left nothing undone to ensure success, and threats and terrors, bribery and corruption were freely employed. Cornwallis was strongly in favour of emancipation as part of the union arrangement, and Castlereagh was not averse; and Pitt would probably have agreed with them had not Clare warned him in England to poison his mind. That bitter anti-Catholic boasted of his success; and when Pitt in 1799 brought forward his union resolutions in the British Parliament, he would only promise that at some future time something might be done for the Catholics, dependent, however, on their good conduct, and on the temper of the times.

But something more than this was required. The anti-Unionists were making overtures to the Catholics, knowing that the county members elected by Catholic votes could be decisively influenced by Catholic voters. In these circumstances Castlereagh was authorized to assure the leading Irish Catholics that Pitt and his colleagues only waited for a favourable opportunity to bring forward emancipation, but that this should remain a secret, lest Protestant prejudice be excited and Protestant support lost. These assurances obtained Catholic support for the union, and Pitt brought all of the Catholic leaders into the channel of the Government; and many of them opposed it to the last. Many more would have been on the same side had they not been repelled by the bigotry of Foster, who stubbornly refused to advocate emancipation, and in doing so failed to make the fight against the union a national struggle. As for the uneducated Catholics, they did not understand political questions, and viewed the union contest with indifference. The gentry had no sympathy with a Parliament from which they were excluded, nor the clergy for one which encouraged the atrocities of the recent rebellion. Gratitude for the establishment of Maynooth College and the power, in the person of the bishop of Dublin, to support the Government; and Pitt's assurances that concessions would come in the United Parliament inclined them still more. From the first, indeed, Dr. Moylan, Bishop of Cork, was a Unionist, as was Dr. Troy, Archbishop of Dublin. In 1798 the latter favoured a union provided there was no clause against future union and recognition of laws in Ireland; and he induced nine of his brother bishops to concede to the Government a veto on episcopal appointments in return for a provision for the clergy. The bent of his mind was to support authority, even when authority and tyranny were identified, and through the terrible weeks of the rebellion his friendly relations with Dublin Castle were unbroken. He was foremost in every negotiation between the Government and the Catholics, and he and some of his colleagues went so far in advocating the union, that Grattan angrily described them as a "band of prostituted men engaged in the service of Government". This language is unduly severe, for they were clearly not actuated by mercenary motives; but they certainly advanced the cause of the union.

Remembering this, and the assurances given by Castlereagh, they looked for an early measure of emancipation, and when in 1801 the United Parliament first opened its doors, they were not disappointed. The omission of all reference to emancipation in the King's Speech disappointed them; but when Pitt resigned and was succeeded by Addington, an aggressive anti-Catholic, they saw that they had been shamefully betrayed. In Parliament Pitt explained that he and his colleagues wished to supplement the benefits of the Union and confid that, having encountered insurmountable obstacles, they resigned, feeling that they could no longer hold office consistently with their duty and their honour. Cornwallis, on his own behalf and on behalf of the retiring ministers, assured the Irish Catholic leaders, and in language which was free from every shade of ambiguity, that the blame rested with George III, whose stubborn bigotry nothing could overcome. He promised that Pitt would do everything to establish the Catholic cause in public favour, and would never again take office unless emancipation were conceded; and he expected the Catholics to be patient and loyal, knowing that with Pitt was gone the best hope of the triumph of their cause was near. Cornwallis noted with satisfaction that this advice was well received by Dr. Troy and his friends. But those who knew Pitt better had no faith in his sincerity, and their estimate of him was proved to be correct, when he again became Prime Minister in 1804, no longer the friend of the Catholics but their opponent.

The fact was that he had played them false throughout. He knew that the king was violently opposed to them; that he had assented to the Union in the hope that it would "shut the door to any further measures with respect to the Roman Catholics"; that he believed that to assent to such measures would be a violation of his coronation oath. Had Pitt been sincere he would have endeavoured to change the king's views, and failing to persuade he would have resigned office, and opposed his successor. And if he had acted thus the king must have yielded, for no government in the history of Ireland was ever so long deprived of what it could have lived. Pitt's real reason for resigning in 1801 was, that the nation wanted peace, and he was too proud to make terms with Napoleon. He supported Addington's measures; nor did he lift a finger on behalf of the Catholics; and when the Treaty of Amiens was broken and the great struggle with France was being renewed, he brushed Addington aside with disdain. In 1801 the king had one of his fits of insanity, and when he recovered complained that Pitt's agitation of the Catholic question was the chief cause of his illness; in consequence of which, when Pitt returned to power, in 1804, he had been continually opposed to agitate the question during the lifetime of the king.

In the meantime, one bitter enemy of the Catholics disappeared, in 1802, with the death of Lord Clare. Hating Ireland and Catholicism to the last, he strove in the British House of Lords to arouse anti-Irish prejudice by representing Ireland as filled with disorder and hatred, and he denounced all the Government atrocities of 1798, and advocated for Ireland perpetual martial law. Once he had declared that he would have the Irish as tame as cats; and a Dublin mob retorted by groaning and hooting before his house as he lay dying, by creating disorder at his funeral, and at the grave-side there was deposited all the dead cats upon his coffin. Pitt himself died in 1806, after having opposed the Catholic claims in the preceding year. A brief period of hope supervened when the "Ministry of all the Talents" took office; but
nope was soon dissipated by the death of Fox, and by the dismissal of Grenville and his colleagues. They had brought into Parliament a bill assimilating the English laws to those of the Irish by allowing the Catholics in England to get commissions in the army. But the king not only insisted on having the measure dropped, but also that ministers should pledge themselves against all such concessions in the future; and when they indignantly refused he dismissed them. The Duke of Portland then became premier, with Mr. Pitt as his leader, and the Catholic Bill was dropped.

Grattan was then in Parliament. He had entered it in 1805 with reluctance, partly at the request of Lord Fitzwilliam, chiefly in the hope of being able to serve the Catholics. He supported the petition presented by Fox; he presented Catholic petitions himself in 1808 and 1810; and he supported Parnell's motion for a commutation of tithes; but each time he was defeated, and it was plain that the Catholic cause was not advancing. The Catholic Committee, brakes of a legislature by the power of the House of Commons, was dead. But its members were few, its meetings irregularly held, its spirit one of diffidence and fear, its activity confined to preparing petitions to Parliament. Nor were its leaders the stamp of men to conduct a popular movement to success. Keogh was old, and age and the memory of the events he had passed through were adverse to enthusiasm for a second effort. Lord Fingall was suave and conciliatory, and not without courage, but was unable to grapple with great difficulties and powerful opponents. Lords Gormanston and Trimbleston were out of touch with the people; Lord French, Mr. Hussey, and Mr. Clinch were men of little ability; Mr. Scully was a clever lawyer who had written a book on the penal laws; and Dr. Dromgoole was a lawyer with a taste for theology and Church history, a Catholic bigot ill-suited to soften Protestant prejudice or win Protestant support. As for Dr. Troy, he was still the curiously ecclesiastic, and neither Pitt's treachery nor the contempt with which the Catholics were treated could weaken his attachment to Dublin Castle. He still favoured the Veto, but an event which occurred in 1808 showed that he was no longer supported by his brethren of the episcopacy. An English bishop, Dr. Milner, who had been as keen as any Irish bishop, thought it right to declare to Grattan in their name that they were willing to concede the Veto; and Lord Fingall took a similar liberty with the Catholic Committee. The former, as having exceeded his powers, was promptly repudiated by the Irish bishops, the latter by the Catholic Committee, and this repudiation of the Veto was hailed with enthusiasm throughout Ireland.

By this time it was clear that the old method of presenting loyal petitions was out of date, that the time had come for more vigorous action, for a united nation to demand its rights. For this a leader was required. It was found in Daniel O'Connell. Called to the Bar in 1809, he had already acquired a lucrative practice, and had given valuable assistance in the work of the Catholic Committee. Having seen the horrors of the French Revolution and those of 1798, he abhorred revolution and rebellion, and believed that Catholic grievances might be redressed by peaceful agitation, unstained either by violence or crime. And nature itself seemed to have destined him for an agitator. Capable of extreme endurance, mental and physical, he had great courage, great resource, great perseverance, a readiness in debate, an eloquent speech, and a power of invective rare enough in a single man. He spoke with a voice of singular volume and sweetness, and under the influence of his words his audience were sad or gay, vengeful or forgiving, determined or depressed; and when he cowed the Orange lawyer, or ridiculed the chief secretary or viceroy, the exultation of the Catholics knew no bounds. From 1810 his position was that of leader; and the fight for emancipation was the fight made by O'Connell. It was an uphill fight. Anxious to attract the Catholic masses, and at the same time not to infringe on the Convention Act, he had drawn up the constitution of the Catholic Committee in 1806 with great care; but it went down before a viceroyal proclamation, and the same fate befell its successor. The Catholic Bishop, the fact that the viceroy of the time was advised by the Orangemen, and governed by coercive acts. O'Connell's difficulties were increased by the continued agitation of the Veto. In opposing it he was aided by the bishops and the clergy; but Dr. Troy and Lord Fingall, aided by the English Catholics, procured the recall of Rome in their favour. It was sent by Quinototti, Prefect of the Propaganda, in 1814, while Pius VII was a prisoner of Napoleon. When the pope returned to Rome he disavowed it, though not at once; and the agitation of the question for years weakened all Catholic efforts for emancipation. In 1817 Grattan supported by Catholic and Castlereagh, passed through its second reading a Catholic Relief Bill, which however was lost in Committee. Nothing daunted, he continued his efforts. To allay the groundless fears of unreasoning bigotry he conceded the Veto, and yet each year the motion was brought in. By 1820 the ward was rejected. In 1820 the great Irishman, Plunket, took the matter in hand, and in 1821 succeeded in passing a Bill through the House of Commons. Even the concession of the Veto could not buy off the hostility of the House of Lords, who threw out the bill; and it seemed as if emancipation would never come.

The visit of George IV to Ireland in 1821 brought a brief period of hope. The king had once been the declared friend of the Catholics, and if he had opposed them since he became regent, in 1810, it might be because he disliked opposing his father's views while his father lived. The Catholics by public resolution in 1812 blamed the witchery of his mistress, and the regent was known to be very wroth with what came to be called "The Witchery Resolution". But the Catholics in a forgiving mood felt sure that their resolution was forgotten; that the king was returning and for good; that no more opinions; and that his visit meant friendship and concession. Thus disposed, they welcomed him with enthusiasm. The king before leaving Ireland expressed his gratitude to his subjects, and counselled the different classes to cultivate moderation and forbearance. But he had no scheme of reform or emancipation, and no message of hope for the Catholics, and to the end of his reign continued to oppose their claims. Depression settled down heavily on the whole Catholic body. Agitation ceased, outrages commenced, coercion followed and continued; and in 1825, while the Catholics were apathetic and averse, not only the real but also the imaginary aggressors, O'Connell founded the Catholic Association. His chief assistant was a young barrister named Sheil. They were old friends, but had quarrelled about the Veto, and now composed their quarrels and became friends again. To evade the Convention Act the new association, specially formed to obtain emancipation "by legal and constitutional means", was merely a club, its members paying a subscription, its meetings open to the Press. At first its progress was slow, and not infrequently it was difficult to get a sufficient number together to form a quorum. But it gradually made headway. Dr. Doyle, Bishop of Kildare, joined it at an early stage, as did Dr. Murray, Cosidior Archbishop of Dublin, and many hundreds of the clergy. Subsidiary clubs arose throughout the country, the members paying

XIII.—9
a penny a month, the “Catholic Rent.” They met under the presidency of the priests, and discussed all public questions, transmitted the rent to the central association, and lauded the return active and assistance. The Government became so alarmed at the strength of an organisation which had 30,000 collectors and hundreds of thousands of members, that it was suppressed in 1825. At the same time a Catholic Relief Bill passed the House of Commons, but successful in the Lords, and all that Parliament got from Parliament was the act suppressing the Association, or the Algerine Act, as it was often called.

It was easily evaded. Its provisions did not affect any religious society, nor any formed for purposes of charity, science, agriculture, or commerce, and for these purposes the Catholic Association, changing its name into the New Catholic Association and remodelling its constitution, continued its work. It was to build churches, obtain cemeteries, defend Catholic interests, take a census of the different religious, and for these the “New Catholic Rent” was subscribed, and meetings were held in Dublin, where Catholic grievances were discussed. Aggregate meetings nominally independent of the association, but really organized by it, were also held in different parishes, and larger assemblies took the form of county and provincial meetings. Attended by the local gentry, by the less friendly priests, by sometimes by O’Connell and Sheil, the boldness and eloquence of speech used gave courage to the Catholics and struck terror into their foes. Nor was this all. The Relief Act of 1793 had conferred the franchise on the forty-shilling freeholders, and landlords, to increase their own political influence, had largely created such freeholders. These freeholders living in constant poverty, frequently in arrears of rent, always dependent on the forbearance of their landlords, had hitherto been driven to the polls like cattle to vote for their landlords’ nominee. A new spirit appeared at the General Election of 1826. Relying on these freeholders, the Catholic Association nominated Mr. Stewart against Lord Beresford for Waterford. The threats employed by a powerful family were met on the other side by appeals to religion, to conscience, to the sacredness of the voter’s oath. The electoral party craved of the Government to blow for country and creed; and O’Connell reminded them that a Beresford had caused the recall of Lord Fitzwilliam, that another flogged Catholics to death in 1798, and that wherever the enemies of Ireland were gathered together a Beresford was in their midst. There was soon danger of the Catholic nominee; and Monsignor Louth, and Westmeath followed the lead of Waterford.

The next year Canning became premier. His consistent advocacy of the Catholic claims brought him the enmity of the king and exclusion from office for many years. When he joined Lord Liverpool’s government in 1823, he insisted that emancipation should be an open question in the Cabinet, and on the Catholic Relief Bill of 1825 the strange spectacle was seen of Peel, the home secretary, voting on one side while Canning, the foreign secretary, was on the opposite side. As premier the latter was powerless in consequence of the hostility of the king, but had he lived he might probably have forced the king’s hand. He died, however, in August, 1827, and by his death the Catholics lost one of their stoutest champions. His successor, Goderich, held office only for a few months, and then, early in 1828, the Duke of Wellington became premier, with Peel as his leading Minister in the House of Commons. These two were declared enemies of reform and emancipation, and instead of being willing to concede they would have wished to put down the Catholic Association by force. But such an undertaking was one from which even the strongest Government might have recoiled. The forty-shilling freeholders, effectually protected by the “New Rent” which was specially levied for their benefit, laughed at the return active and assistance. The Catholic forces organised into parish and county Liberal Clubs, and in correspondence with the Catholic Association at Dublin as head club, sought out and published every local grievance; Catholic churchwardens in each parish collected subscriptions to send to Dublin, getting in return advice in all their difficulties and legal assistance whenever it was necessary.

So disciplined were the Catholic masses that 800,000 of them petitioned Parliament for the repeal of the Test and Corporation Acts, which were refused. Four times between 1829 and 1830 meetings were held on the same day to petition for emancipation, and a million and a half Catholic signatures were obtained. Foreign writers came to Ireland to see for themselves, and published in foreign papers and reviews what they saw, and in France, Germany, and Italy England was held up to public odium because of her treatment of Ireland. Across the Atlantic the Irish element was already strong, and all over America meetings were held to demand justice for Ireland. At these meetings money was subscribed liberally and sent to be used to swerve the offers of the Catholic Association, and languages of men were turned towards England. Yet Wellington and Peel were still unyielding, and in the session of 1828 the latter opposed Sir Francis Burdett’s motion in favour of emancipation, and Wellington helped to defeat it in the Lords. The Catholic Association answered these unfriendly acts by a resolution to oppose all Government candidates; and when Mr. Vesey Fitz Gerald, on being promoted to the Cabinet, sought re-election for Clare, a Catholic Association candidate was nominated against him. As no Catholic could sit in Parliament if elected, it was at first resolved to nominate Major Macnamara, a popular Protestant landlord of Clare; but after some hesitation he declined the contest. Then was remembered what John Keogh had once said: “John Bull thinks that to grant emancipation would rekindle the fires of Smithfield. But he is jealous of a subject’s conscience as a man on his oaths; if a Catholic is so disposed as to swear, he is barred from taking his seat on account of objectionable oaths he will have such oaths modified, so that the constituency shall not be put outside the constitution.” In all this there was wisdom, and O’Connell himself determined to stand for Parliament and insist on his address to the Irish people being read.

The historic contest opened in July. Dr. Doyle sent O’Connell a letter of recommendation praying that the God of truth and justice might prosper him; Father Tom Maguire, a noted polemic, came all the way from Leitrim to lend his aid; Jack Lawless came from Ulster; O’Gorman, Mahon, and Steele from Clare itself worked with a will; the eloquent Sheil came from Dublin; above all the priests of Clare strained every nerve; and with the aid of all these O’Connell had a noted triumph. The gentry and the larger freeholders were all with Fitz Gerald; the forty-shilling freeholders were with O’Connell, and influenced by the priests bade defiance to their landlords; and the enthusiasm displayed was not more remarkable than the discipline and self-restraint. During the six days of the polling, 30,000 from all parts of Clare bivouacked in the streets of Ennis, and yet there was no outbreak of drunkenness, nothing to call for the interference of soldiers or police. Even the blindest could see that a crisis had come. The Orangemen became restive and aggressive. In compliment to the reigning family they formed clubs, modelled on the Liberal clubs of the Catholics, and in language of menace
proclaimed their determination to resist the Catholic claims even by force. The Catholics were equally defiant, and all the efforts of O’Connell on the one side and the Anglicans and Orangemen on the other, were scarcely sufficient to prevent Catholics and Orangemen from coming to blows. Anglesey privately warned the prime minister that even the soldiers were not to be relied on, and were cheering for O’Connell; and Dr. Curtis, an old friend of the Duke of Wellington, implied that he would not obey him. His reply was that if the Catholics ceased to agitate, and if a period of quiet supervened, something might be done; and when Anglesey advised the Catholics to continue their agitation he was instantly removed from office. Excitement grew, party passions were further inflamed, men’s minds were constantly agitated by hopes and fears; and as the gloomy days of winter passed and a new year was ushered in, the conviction was general that peace could not be maintained, and that there must be concession or civil war.

At last Wellington and Peel surrendered. The former worked on the fears of the king and compelled him to yield; the latter managed the House of Commons with consummate ability, and in March a Catholic Relief Bill was introduced, and in the following month passed into law. Under its provisions Catholics were admitted to Parliament and to the three universities, but they were not made eligible for all the other offices, civil and military, such as those of Lord Lieutenant of Ireland, Commander-in-chief of the Army, and Lord Chancellor both in England and Ireland; priests were forbidden to wear vestments outside their churches, and bishops to solemnize marriages but they were allowed to leave the kingdom, and other religious orders were to be rendered incapable of receiving charitable bequests. Further, the franchise being raised to ten pounds, the forty-shilling freeholders was disfranchised; and the Act not being retrospective, O’Connell on coming to take his seat was tendered the old oath, which he refused and then had to seek re-election for Clare. These concessions to bigotry—they were said to be made especially to placate the king—helped to spoil the healing effect of the measure.

The provisions regarding priests and bishops were immediately rescinded, and were evaded by the episcopate of the country to which the college belongs and appointed by the pope. He is assisted by a vice-rector and a spiritual director. Discipline is maintained by means of the camera system in which the students are divided into groups each in charge of a prefect who is responsible for the observance of rule. Each camera occupies its own section of the college building, has its own quarters for recreation, and goes its own way about the city on the daily walk prescribed by the regulations. Meals and chapel exercises are in common for all students of the college. The college has at its head a head chaplain, and consists of a broad cincture; outside the college, the low-crowned three-cornered clerical hat and a cloak or soprana are added.

The scholastic year begins in the first week of November and ends about the middle of July. In most of the courses the lecture system is used and is held at stated times formal examination are held in accordance with scholastic methods. The course of studies, whether leading to a degree or not, is prescribed and extends, generally speaking, through six years, two of which are devoted to philosophy and four to theology. To philosophy in the strict sense are courses in mathematics, languages, and natural sciences. Theology includes, besides dogmatic and moral theology, courses in liturgy, archery, Church history, canon law and Scripture. An oral examination is held in the middle of the year and a written examination (concursus) at the close. The usual degrees (baccalaureate, licentiates, and doctorate) are conferred in philosophy, theology, and canon law; since 1909 degrees in Sacred Scripture are conferred upon students who fulfill the requirements of the Biblical Institute. Each college spends the summer vacation at its villae or country house located near the city and generally in or near one of the numerous towns on the slopes of the neighbouring hills. Student life in the "villas" is quite similar to the routine of the academic year in regard to discipline and religious exercises; but a larger allowance is made for recreation and for occasional trips through the
surrounding country. And while each student has more time for reading along lines of his own choice, he is required to go to some part of each day to the subjects explained in the class-room during the year.

What has been said outlines fairly well the work of the Roman colleges. In matters of detail some variations will be found, and these are due chiefly to natural characteristics or to the special purpose for which the establishment was established.

Almo Colleger Capranicense (Capranica).—This is the oldest Roman college, founded in 1417 by Cardinal Domenico Capranica in his own palace for 31 young clerics, who received an education suitable for the formation of good priests. Capranica himself drew up the rules and presented the college with his own library, the most valuable of which was later transferred to the Vatican. The cardinal's brother, Angelo, erected opposite his own palace a suitable house for the students. When the Constable de Bourbon laid siege to Rome in 1527 the Capranica students were among the few defenders of the Porta di S. Spirito, and all of them with their rector fell at the breach. The rector according to the university custom of those days was elected by the students and was always one of themselves. Alexander VII decided that the rector should be appointed by the protectors of the college. After the Revolution of 1848 the college was suppressed and the many college students were reduced to 13, but paying students were admitted. Those entering must have completed their seventeenth year; they attend the lectures at the Gregorian University. The college counts among its graduates many cardinals and bishops; not a few of the students have passed into the diplomatic service. The country seat is a villa at Monte Mario.

Seminario Romano.—Hardly had the Council of Trent in its 23d session decreed the establishment of diocesan seminaries, when Pius IV decided to set a good example, and on 1 Feb., 1565, the seminary was opened with 60 students. The rules were drawn up by P. Lainez, General of the Society of Jesus, and to this order Pius IV entrusted the management of the college. Up to 1773 the students attended the lectures in the Collegio Romano; the residence was changed several times before 1808, when they settled in the Palazzo della Seminaria in the Esquilino. A country seat was erected for the students in a portion of the baths of Caravalla. Each year, at Pentecost, a student delivered a discourse on the Holy Ghost in the papal chapel. In 1773 the seminary was installed in the Palazzo del Seminario at the Lateran. In 1798 the number of students, generally about 100, was reduced to 9. Pius VII restored the seminary which continued to occupy the Collegio Romano until 1824, when Leo XII gave back this building to the Jesuits and transferred the seminary to S. Apollinare, formerly occupied by the Collegio Germanico; the seminary, however, retained its own schools comprising a classical course, and a faculty of science and theology, to which in 1858 a course of canon law was added. The direction of the seminary and, as a rule, the chairs were reserved to the secular clergy. After the departure of the Jesuits in 1848 the seminary again removed to the Collegio Romano. In the seminary there are 30 free places for students belonging to Rome; the remaining students, who may be from other dioceses, pay a small pension. The Collegio Cerasoli with four bursaries for students of the College of Propaganda is a continuation of the seminary. The students take part in the ceremonies in the church of the Seminario Pio. Their cassock is violet. The seminary possesses an excellent library. At the present time, by order of Pius X, a new building for the seminary is in process of construction near the Lateran Basilica. The schools of the seminary are attended by students from other colleges and religious communities. Gregory XV, Clement IX, Innocent XIII, and Clement XIV were educated at the Collegio Romano.

Seminario Pio, also situated in the Palazzo di S. Apollinare, was founded in 1853 by Pius IX for the dioceses of the Pontifical States. Each diocese is entitled to send a student who has completed his humanities; Siringoglia may send two; the number of pupils is limited to 62. All must spend nine years in the study of philosophy, theology, canon law, and literature; they are supported by the revenues of the seminary and are distinguished by their violet cassock. The seminary has a villa outside the Porta Portese. The students bind themselves by oath to return to their dioceses on the completion of their studies.

Seminario Vaticano, founded by Urban VIII for the convenience of the clergy serving in the Vatican Basilica (St. Peter's). Its government was entrusted to the Vatican Chapter which appointed the rector. Shortly afterward a course of grammar and, somewhat later, courses of philosophy and theology were added. Paying students were also admitted. In 1730 the seminary was transferred from the Piazza Rusticucci to its present location behind the apse of St. Peter's. From 1797 till 1805 it remained closed; on its reopening only 6 free students could be received, but the number rose to 30 or 40. After the events of 1848 the seminary was dissolved, but in 1858 it was restored, the former courses and granting it a country residence in the Sabine hills. In 1897 it was authorized to confer degrees. In 1905 Pius X suppressed the faculties of philosophy and theology, the students of the former subject going to S. Apollinare, and of the latter to the Gregorian. They wear a purple cassock with the pontifical coat-of-arms on the end of their cassock.

Seminario dei SS. Pietro e Paolo, established in 1867 by Pietro Avanzani, a secular priest, to prepare young secular priests for the foreign missions. Pius IX approved it in 1874 and had a college erected, but this was later pulled down and since then the seminary has changed its location several times; at present it is in the Armenian College. The students follow the courses at the Propaganda; at home they have lectures on foreign languages, including Chinese. They number 12. The college is located at Montopoli in the Sabine hills. On finishing their studies the students go to the Vicariato Apostolico of Southern Shen-si or to Lower California.

Seminario Lombardo dei SS. Ambrogio e Carlo, founded in 1854 chiefly through the generosity of Cardinal Borromeo of the Jesuit Order, was installed in the Palazzo del Seminario at S. Carlo al Corso. Owing to the insufficiency of its revenues it remained closed from 1869 to 1878. Leo XIII allowed the other bishops of Upper Italy as well as of Modena, Parma, and Piacenza to send their subjects who, numbering over 60, pay for their maintenance and follow the lectures at the Gregorian University; not a few of these students are already priests when they enter the seminary. They may be known by their black cassocks with red borders. Since 1888 the seminary has had its own residence in the Prati di Castello.

Collegio Germanico-Ungarico, after the Collegio Capranica, the oldest college in Rome. The initiative towards its foundation was taken by Cardinal Giovanni Morone and St. Ignatius of Loyola, and by the energetic labour of the saint the plan was carried into effect. Julius III gave this college its site and promised his aid, but for a long time the college had to struggle against financial difficulties. The first students were received in November, 1552. The administration was confided to a committee of six cardinal protectors, who decided that the college should wear a red cassock, in consequence of which they have since been popularly known as the gomber

Roman 132
cottis (boiled lobsters). During the first year the higher courses were given in the college itself; but in the autumn of 1553 St. Ignatius succeeded in establishing the Society in Italy. To the Collegio Romano of his Society. He also drew up the first rules for the college, which served as models for similar institutions. During the pontificate of Paul IV the financial conditions became such that the students had to be distributed among the various colleges of the Society in Italy. To secure the college on a firmer basis it was decided to admit paying boarders regardless of their nationality, and without the obligation of embracing the ecclesiastical state; German clerics to the number of 20 or more were received free and formed a separate body. In a short time 200 indeed was given to music under P. Lauretano, and his institution of European nobility, were received. This state of affairs lasted till 1573. Under Pius V, who had placed 20 of his nephews in the college, there was some idea of suppressing the camera of the poverti tedeschi. Gregory XIII, however, may be considered the real founder of the college. He transferred the secular department to the Seminario Romano, and endowed the college with the Abbey of S. Saba all' Aventino and all its possessions, both on the Via Portuense and on the Lake of Bracciano; moreover he incorporated with it the Abbey of Fonte Avellana in the Marches, S. Cristina, and St. Maria della Pace. The rector, P. Lauretano, drew up another set of regulations.

The college had already changed its location five times. In 1574 Gregory XIII assigned it the Palace of S. Apollinare and in 1575 gave it charge of the services in the adjoining church. The splendour and majesty of the functions as well as the music executed by the students under the direction of the Spanish Ludovico da Vittoria and other celebrated masters (Stabile, Orgas, Carissimi, Pittoni, and others) constantly drew large crowds to the church. Too much attention was paid to studies under P. Lauretano, so that regulations had to be made at various times to prevent the students from suffering. The courses were still given in the Collegio Romano; but when Bellarmine terminated his lectures on controversy, a chair for this important branch of learning was established in the College. The new chair was what later a chair of canon law. As a special mark of his favour, Gregory XIII ordered that each year on the Feast of All Saints a student of the college should deliver a panegyric in presence of the pope. Meanwhile in 1578 the College Ungherese had been founded through the efforts of another Jesuit, P. Sanvitò, who obtained for it the church and convent of S. Stefano Rotondo on the Caelian Hill, and of S. Stefano behind the Basilica of St. Peter, the former belonging to the Hungarian Pauline monks, and the latter to the Hungarian pilgrims' hospice. In 1580 the union of the two colleges was decreed, a step which at first gave rise to difficulties. The students generally numbered about 100, sometimes, however, there were 54, at other times as many as 150. During the seventeenth century several changes occurred, in particular the new form of oath exacted from all the students of foreign colleges. Mention must be made of the work of P. Galeone, the business manager who succeeded in consolidating the finances of the college so as to raise the revenue to 25,000 scudi per annum. A country residence was acquired at Parioli. In the eighteenth century the college became gradually more aristocratic. Benedict XIV permitted the college to open its doors to the public, with the exception of the new church of S. Apollinare in 1742, on the completion of which a new Palace of S. Apollinare was erected. At the suppression of the Society (1773) the direction was entrusted to secular priests; lectures were delivered in the college itself, and the professors were Dominicans. Discipline and studies declined rapidly. Moreover, Joseph II sequestered the property situated in Lombardy and forbade his subjects to attend the college. The buildings, however, were increased by the addition of the palace opposite to S. Apollinare.

On the proclamation of the Roman Republic the property of the foreign national colleges was declared escheated to the Government and was sold for an absurdly small sum. On that occasion the library and the precious archives of sacred music possessed by the college were scattered. In 1789 the rector, P. VII restored whatever remained unsold and ordered the rest to be re-purchased as far as possible. In the first years the revenues were employed to pay off the debts contracted in this repurchase. In 1824 the palace of S. Apollinare as well as the villa at Parioli was reunited to the Seminario Romano. The institute received in 1818 and lived in the professed house of the Jesuits at the Gessi, and there the college remained till 1851. From that time the administration was entrusted to the general of the Jesuits, who appointed the rector and other fathers in charge of the college. In 1845 the estate of S. Partore near Zagarolo was acquired. In 1851 the residence was transferred to the Palazzo Borromeo in the Via del Seminario where it remained till 1886. In 1873 when the Collegio Romano was taken away from the Jesuits, the Collegio Germanico found a home in the Gregorian University. Having more extensive quarters, the Collegio Germanico was transferred to the Hotel Costanzo in the Via S. Nicola da Tolentino. The college receives German students from the old German Empire and from Hungary; places are free, but there are some students who pay (cf. Steinhuber, "Geschichte des Collegium Germanicum-Hungaricum in Rom," Freiburg, 1886; Hettinger, "Aus Welt und Kirche," 1, Freiburg, 1897).

**Collegio Triggentino di S. Maria dell' Antima.**

In 1599 Theodoric of Niem founded a hospice for German pilgrims. A confraternity in aid of this confraternity was called the "Societas Germanicum-Hungaricum in Rom". In 1690 the papal bull of the first stone of the beautiful church was laid, near the Church of S. Maria della Pace. In 1856 this *pia opera* was reorganized; a college of chaplains to officiate in the church was established; the chaplains were to remain only at the church and at the same time were to continue their studies. They devote themselves chiefly to canon law with a view to employing their knowledge in the service of their respective dioceses; and they receive living and tuition gratis. Other priests also are admitted who come to Rome at their own expense for the purpose of study. At present there are 8 chaplains and about 10 other priests residing there. The college continues to assist poor Germans who come to Rome, either to visit the holy places or in search of occupation.

**Collegio Triggentino del Campo Santo,** established in 1576 to receive priests belonging to the German Empire or German provinces of Austria, who remain there for two or, at the most, three years pursuing their studies and officiating in the Church of S. Maria della Pietà near St. Peter's. The revenues of the Campo Santo and the chaplaincies that have been founded help to pay the expenses of the chaplains. Other priests may be received as boarders. As a rule, the chaplains devote themselves to the study of Christian archaeology or Church history; they publish a quarterly review, the "Römische Quartalschrift für christliche Archäologie und Kirchengeschichte". The site of the Campo Santo is the largest garden of the days of Charlemagne and was then called the Schola Francorum. In the course of time the German residents in Rome were buried in the church of the Schola, then called S. Salvatore in Turri. In 1454 a confraternity was established, and in addition the guilds of German bakers and cobblers had their quarters there. In 1576 owing to the altered conditions of modern
times the institute was put to its present purpose (cf. de Waal, "Der Campo Santo der Deutschen zu Rom"; Freiburg, 1897).

The Pontificio Greco (The Greek Pontifical College) is also a foundation of Gregory XIII, who established it to receive young Greeks belonging to any nation in which the Greek Rite was used, and consequently for Greek refugees in Italy as well as the Ruthenians and Malchites of Egypt and Syria. These young men had to study the sacred sciences, in order to spread later sacred and profane learning among their fellow-countrymen and facilitate the reunion of the schismatical Churches. The construction of the College and Church of S. Atanasio, joined by a bridge over the Via dei Greci, was begun at the end of the year 1591, and was finished about the year 1594, and until the completion of the college were housed elsewhere. Gregory XIII endowed the college. The direction was entrusted to five cardinal protectors; the rector was selected at first either from the secular clergy or from the regulars. Under Sixtus V, but for the energetic resistance of Cardinal di S. Severina, this promising college would have been suppressed. Gregory XIV on the suggestion of the learned Pietro Arendius, a former student of the college, entrusted the direction to the Jesuits (1591), who introduced a new method of government and a new disciplinary system. In a short time the number of students increased to 56; some paying students were admitted as boarders. Studies were pursued in the college itself; some of the professors were Jesuits, some secular priests, and some laymen.

In 1602 when Cardinal Giustiniani became cardinal protector, so many changes were introduced that the Jesuits withdrew from the care of the college which was entrusted first to the Somaschines and then to the Dominicans; but in 1622, at the request of the students, the Jesuits returned. Urban VIII ordered all the alumni to bind themselves by oath to remain in the Greek Rite, and this applied to those who entered the college surreptitiously; the regulation, however, was frequently disregarded in the eighteenth century. After 1773 secular priests took charge. The college was closed during the Revolution and not reopened till 1849; in the meantime the Greeks were admitted to the College of the Propaganda, which was entrusted first to secular priests, then to the Resurrectionists (1886), and finally to the Jesuits (1889). In 1897 Leo XIII reorganised the college. Owing to the generosity of the Emperor of Austria and to the Ruthenian episcopacy a college was provided especially for Ruthenians, while the Ruthenians were sent to the College of the Propaganda. The direction of the College of S. Atanasio was entrusted to the Benedictines, who adopted the Greek Rite. The students perform the sacred functions of their rite with the greatest possible splendour in the Church of S. Atanasio. Formerly the Latin Rite also was celebrated in the church, but Leo XIII reserved it entirely for the Greek Rite. The students are all maintained gratuitously out of the revenues of the college. They number about 30 to 35 and follow courses in the Propaganda, besides having lectures at home in Greek language and literature. They wear a blue cassock with a red sash, and an Oriental cloak with large sleeves (cf. De Meester, "Le Collège Pontifical Grece de Rome", Rome, 1910).

Pontificio-Rutenio College (The Ruthenian Pontifical College), was founded, as said above, in 1897, and the Church of SS. Sergio and Bacco was assigned to it. It was first the college of the Jesuits but some years later it was entrusted to the Ruthenian Basilian monks. There are about 20 students, who are supported partly by the Ruthenian bishops and partly by paying a small fee. They follow the lectures at the Propaganda, and wear a blue cassock and soprano (cloak) with a yellow sash.

Collegio Inglese (Venerabile Collegium Anglicum).—See English College, THE, IN ROME.

Collegio Buda is united to the English College andcontended for convictions and learning to prepare for the priesthood. It was founded in 1852 by Pius IX; and increased under Leo XIII. Cardinal Howard bequeathed to the two colleges his valuable library. The country seat of the two colleges is at Monte Porzio.

Collegio Scozzese (The Scots College), established in 1600 by Clement VIII for the education of Scottish priests for the preservation of Catholicism in their Fatherland; it was assigned the revenues of the old Scots hospice, which were increased by the munificence of the pope and other benefactors. In 1604 the college was transferred to its present site, and in 1649 the Countess of Hutteny constructed a church dedicated to Saint Andrew and Saint Margaret, Queen of Scotland. From 1615 till 1773 it was under the direction of the Jesuits. The students, numbering about 20, are supported partly by the revenues of the college and partly by the Scottish bishops and by their own money. They attend the Gregorian University and have a villa at Marino. They wear a purple cassock, with a crimson sash and black soprano.

Collegio Irlandese.—See Irish College, IN ROME.

Collegio Urbano di Propaganda (The Urban College).—The foundation of this college is due to the zeal of P. Ghislieri, a Theatine, and to the generosity of Mgr. G. Battia Vives, a Spaniard, custodian of the Sacred Congregation of the Propaganda, then established by Gregory XV. Urban VIII approved of the plan of erecting a college for the evangelization of the East and enlarged the palace given by Mgr. Vives; and under Alexander VII the Church of the Three Magi was added. Vives established in addition six free scholarships; foundations were made by other pontiffs and prelates, especially by Innoce XII, Clement XII, and the brothers of Urban VII, Giovanni Antonio Antonio Barbarini. The college depends on the Sacred Congregation of the Propaganda, which appoints the rector, who at first was a Theatine but for centuries has always been a secular prelate, who is the parish priest of all who live in the Palace of the Propaganda or are connected with it as workmen and as an assistant. Alexander VII imposed on all the students an oath binding them to remain under the jurisdiction of the Propaganda, not to enter a religious order without special permission, and to return after ordination to the priesthood to their dioceses or provinces; to engage in missions; or to leave Europe each year if in Europe, or every second year otherwise, a report of their apostolic work. Students are recommended by the bishops subject to the Propaganda, and the governing body select the students according to the number of vacancies, the places always being free. In 1798 the college was closed; some of the students were received by the Lazarists at Montecito. This lasted till 1809 when all that remained of the college was suppressed. In 1814 some of the Propaganda students were again received by the Lazarists, and in 1817 the college was reopened. From 1836 till 1848 it was under the direction of the Jesuits. The number of students is about 120. From the foundation of the college there have been courses of classics, philosophy, and theology, in which academic degrees are granted. The classical course lasts four years; the course of philosophy, including physics, and chemistry, and the history of philosophy, takes another four years; the course of theology, four years. On the feast of the Epiphany the school holds a solemn academy in various languages. The college possesses a valuable library. In addition to the many ecclesiastical dignitaries among the past students there were four martyrs: the Belgian Jacques Poelch (1645); Pietro Cery (1650, in Ethiopia); the Armenian Melchior
Taebas (1716, at Constantinople); Nicholas Bosco- vich (1731).

Collegio dei Maroniti (The Maronite College) was founded in 1783 by Gregory XIII, had its first site near the Church of S. Maria della Fabbrica near the Piazza di Trevi. It was richly endowed by Sixtus V and Cardinal Antonio Caraffa, and also by other popes, and was entrusted to the Jesuits; the pupils attended the Gregorian University. During the Revolution of 1798 the College was suppressed, and the Maronites who wished to study at Rome went to the Collegio Urbano. In 1893 Mgr. Khayat, the Maronite Patriarch, obtained the restoration of the college from Leo XIII. The Holy See gave part of the funds, the remainder was collected in France, and in 1894 the college was inaugurated at Paris. In 1904 it took possession of its own residence, and is now under the charge of Maronite secular priests. The students numbered 8 at the beginning, there are now 19; the greatest number that can be received is 24.

Collegio Belga (The Belgian College), established in 1844 through the initiative of Mgr Aerts, aided by the nuncio to Belgium, then Mgr. Pecchi, and by the Belgian bishops. At first it was located in the home of Mgr Aerts, rector of the Belgian National Church of S. Guglielmo. In 1845 the ancient monastery of Gioachino ed Anna at the Quattro Fontane was purchased. The Belgian college has since grown to 120 students and proposes the present. The students, 20 and more in number, attend the Gregorian; their dress is distinguished by two red stripes at the ends of the sash.

Collegio degli Stati Uniti dell' America del Nord. See American College, Rome, in Rome.

Collegio Polacco (The Polish College).—In 1853, St. Philip Neri, and in about 1600, King John Casimir had begun the foundation of a college for Poles, but their institute was short-lived. In 1866 a college was finally opened due to the efforts of the Congregation of the Resurrection, which raised the first funds to which Princess Odesschioli, Pius IX, and others contributed later. In 1878 the college was transferred to its present location, the former Marchese of Velzio's church, which was dedicated to St. John Cantius. The students, some of whom pay a small pension, number 30 and are distinguished by their green sashes; they attend the lectures in the Gregorian. The college is under the care of the Resurrectionists and possesses a villa at Albano.

Collegio Russico (The Russian College), established in 1863 by Pius IX to prepare priests for Dalmatia, Croatia, Bosnia, and Slavonia, and was located in the Ilyrian hospice near the Church of S. Girolamo degli Schiavoni; but after a few years no more students were received. In 1900, Leo XIII reorganized the Illyrian hospice and decided to form a college of priests of the above-mentioned provinces, who would attend to the services in the church and at the same time pursue ecclesiastical studies.

Seminario Francescano (The French Seminary).—The French bishops at the Council of La Rochelle (1863) petitioned Pius IX to approve of their plan of founding a French Seminary in Rome for the special purpose of training a body of priests strongly attached to the Holy See and prepared to counteract the influence of Gallican ideas. The seminary was opened the same year with 12 students under the direction of P. Lavigerie. The Congregation approved it, which order still directs it; while the students attend the lectures at the Gregorian. The students are in part priests who wish to perfect their knowledge, and partly seminarians preparing for the priesthood. The seminary is located in the Via del Seminario; its first site was the old Irish College near the Trajan Forum. In 1886 Pius IX assigned to the seminary the Church of S. Chiara with the adjoining Poor Clare convent, founded in 1560 by St. Charles Borromeo on the ruins of the Baths of Agrippa. The church was rebuilt on the plan of Notre-Dame. In 1883 the monastery was entirely remodelled to suit its present purpose. Leo XIII declared it a pontifical seminary in 1902. The students pay a pension, though in some cases it is paid from the funds of their diocese; students not belonging to France are also admitted. The seminarians generally number between 100 and 120 (cf. Eschbach, "Le séminaire pontifical français de Rome", Rome, 1903).

Collegio di Cappellani di S. Luigi dei Francesi.—This is another French institution. The church dating from 1496 served as a parish for the French residents at Rome. In 1844 it took possession of Cardinal Bonnechose the parish was suppressed and the revenue applied to create chaplaincies for young students, French priests, who wished to specialize at Rome in canon law, archaeology, or ecclesiastical history. Until 1906 the chaplains published the "Annales di S. Luigi dei Francesi", devoted specially to history. After the decease of Mgr Cadene, they undertook the continuation of the "Annales Ecclesiasticae" containing the Acts of the Holy See as well as moral and canonical dissertations.

Collegio Boemo (The Bohemian College), established in 1844 partly in the ruins of the ancient Bohemian hospice founded by Emperor Charles IV, and with contributions of Leo XIII and the Bohemian bishops. The site was transferred several times, but in 1888 the old monastery of S. Francesco Romana in the Via Sistina was purchased. The rector is always one of the professors in the Propaganda, which the students attend. They number from 24 to 28 and are distinguished by their black sashes with two yellow stripes at the extremities. They have a villa at Trevi in Umbria.

Collegio Armeno (The Armenian College).—Gregory XIII in 1578 had decreed the erection of a college for the Armenians (Bull "Romana Ecclesia"), but the plan fell through. When the Collegio Urbano of the Propaganda was founded later there were always some places for students of this nation. Finally, in 1866, Gregory's proposal was carried into effect thanks to the exarch of Armenia and of Leo XIII. The college was granted the Church of S. Nicola da Tolentino in the street of that name. The president is an Armenian prelate; the students number from 20 to 25 attend the lectures at the Propaganda, and wear red sashes and lace-bordered Oriental capes.

Collegio Spagnuolo (The Spanish College), founded in 1892 through the initiative of Leo XIII and the generosity of the episcopacy, the royal family, and other benefactors in Spain. Installed at first in the national hospice of S. Maria in Monserrato, it was transferred later to the Palazzo Altemps near S. Apol- linaire. The students number 70, are for the most part supported by their bishops; they attend the Gregorian, and are distinguished by a peléine and a sky-blue sash. The direction is entrusted to the pious Spanish Congregation of the Operari Dicessani.

Collegio Canadese (The Canadian College).—Cardinal Howard took the first steps towards the erection of this institute. The Canadian Congregation of St. Sulpice undertook to defray the expenses. The building was soon erected (1887) in the Via delle Quattro Fontane, and in 1888 the first pupils were received. The college has since grown to 120 students. Some of the students are priests and follow the lectures in the Propaganda, and those who have already completed their studies in Canada are privileged to receive a degree after two years in Rome. The Sulpicians are in charge of the college.

Pontificio Collegio Portoghese (The Portuguese Pontifical College), founded in 1901 by Leo XIII; its direction is entrusted to Italian secular
priests, and the students attend the lectures at S. Apollinarese.

**COLLEGGIO APOSTOLICO LEONIANO** owes its origin to P. Valentini, a Lazarist, who, aided by a pious lady, received in a private house the students who could not gain admittance to the other colleges. This college and the revenue left by the lady were taken over later by the Congregation of the Prati di Castello. The direction was committed to the Jesuits. The students, mainly of the southern provinces that have no special college at Rome, attend the lectures in the Gregorian University.

**Roman Congregations,** THE.—Certain departments have been organized by the Holy See at various times in order to assist in the transaction of those affairs which canonical discipline and the individual interests of the faithful bring to Rome. Of these the most important are, without doubt, the Roman Congregations (Sacra Cardinalium Congregations), as is evident from the mere consideration of the dignity of their membership, consisting, as it does, of cardinals who are officially the chief collaborators of the sovereign pontiff in his administration of the affairs of the Universal Church. Nevertheless it should be noted that cardinals have not always participated in the administration of ecclesiastical affairs in the same way. A research on the various usages that have obtained in this connexion would lead us too far from our present subject, but is taken up under Cardinal; Consistory, Papal.

The Roman Congregations originated in the necessity, felt from the beginning, of studying the questions submitted for pontifical decision, in order to sift the legal questions arising and to establish matters of fact. Only in this work, at first entrusted to friars and chaplains, was afterwards divided between the pensientiarii and the auditores, according as questions of the internal or the external forum (i.e., jurisdiction) were to be considered. Thereafter, cardinals in greater or less number were associated with them. Often, however, they were not merely entrusted with the procedure of the case, but were given the authority to decide it. As, on the other hand, the increased numbers of cases to be passed upon occupied a great number of persons, while the proper administration of justice required that those persons should be of the most experienced, it appeared to be advisable, if not necessary, to give them a further division into distinct groups. This division would evidently facilitate the selection of wise and experienced men in all branches of ecclesiastical affairs. Hence also a natural division into executive cases, assigned to the offices (officium); judicial cases, reserved to the tribunals, and adiutus cases, committed to the Roman Congregations.

Sixtus V was the first to distribute this administrative business among different congregations of cardinals; and in his Constitution "Immensa" (22 Jan., 1588) he generalized the idea, already conceived and partly reduced to practice by some of his predecessors, of committing one or another case or a group of cases to the examination, or to the decision, of several cardinals. By a judicious division of administrative matters, he established that permanent organization of these departments of the Curia, which has been handed on to his successors, such great a blessing to the Church. The congregations first established by Sixtus V were officially designated as: (1) for Holy Inquisition; (2) for the Signature of Grace; (3) for the erection of churches and consistorial provisions; (4) for the abundance of supplies and prosperity of the Church's temporal dominions; (5) for sacred rites and ceremonies; (6) for equipping the fleets and maintaining it for the defence of the Church's dominions; (7) for an index of forbidden books; (8) for the consultation and interpretation of the council of Trent; (9) for relieving the ills of the States of the Church; (10) for the University of the Roman study (or school); (11) for regulations of religious orders; (12) for regulations of bishops and other prelates; (13) for taking care of roads, bridges, and waters; (14) for the Venetian printeries; (15) for regulars of the Church's temporal dominions. —From this it will be seen that, while the chief end of the Congregations of Cardinals was to assist the sovereign pontiff in the administration of the affairs of the Church, some of these congregations were created to assist in the administration of the temporal dominions of the Holy See. The number of these varied according to circumstances and the requirements of the moment. In the time of Cardinal De Luca there were about nineteen of them, as he himself tells us in his admirable work "Relatio Romaniae Curiae forensis", without counting other congregations of a lower order, consisting of prelates, as were, for example, the "Congregatio baronum et montium" and the "Congregatio computorum".

Other congregations were added by different popes, until the present organization was established by Pius X in his Constitution "Sacrosanctum Concilium" of June 20, 1908, according to which there are thirteen congregations, counting that of the Propaganda as only one. As, however, the last-named congregation is divided into two parts: Congregation of the Propaganda for Affairs of the Latin Rite, and Congregation of the Propaganda for Affairs of the Oriental Rites, it may well be considered as two congregations; so that the total number of the congregations is fourteen. Sixtus V granted ordinary jurisdiction to each of the congregations which he instituted within the limits of the cases assigned to it, reserving to himself and to his successors the right of interfering in cases of special importance, such as the Congregation of the Holy Inquisition and that of the Signature of Grace. As time went on, the congregations of cardinals, which at first dealt exclusively with administrative matters, came to pass upon the legal points of the cases submitted to them, until the congregations overshadowed the ecclesiastical tribunals and even the Roman Rota in fact almost took their places. In time the transaction of business was impeded by the cumulation of jurisdictions, different congregations exercising jurisdiction rendering decisions, and enacting laws in the same matters. Pius X resolved to reduce the conflicts to a minimum and to establish precisely and to provide otherwise for the better exercise of its functions. It would not be possible to relate here all the changes effected in this connexion. The reader seeking detailed information may consult the commentaries that have already appeared on the Constitution "Sacrosanctum Concilium" (see General Bibliography at the end of this article). Mention will be made here of only the chief among those innovations which, besides the principal one of the demarcation of competency, are to be found in the following provisions.

All decisions of the sacred congregations require pontifical approval, unless special powers have been given previously by the pope. The officials of the congregations are divided into two classes: minor officers who are to be chosen by competitive examination and named by a letter of the cardinal prefect, and major officers, freely selected by the pope, who are named by him as great as the State. There is to be henceforth no cumulation of offices in the hands of one individual, not only to satisfy the requirements of distributive justice, but also because the tenure of several offices by the same person often results in detriment to the service. Wherefore, it is forbidden for an officer of one of the congregations to serve in any way as an agent, or as a
Like all the other congregations, the Holy Office has officials of the second order. The first of these is the protonotary apostolic, who is the highest officer of the Curia; next comes the commissary, always a Dominican. Sometimes, as an exception, these two officials are invested with the episcopal character. Among the other officials who complete the personnel of the Holy Office are a vice-commissary, a first associate (sediis), and a second associate, all Dominicans, also a somnator, a fiscal advocate, an advocatus reversi and some notaries.

It may appear strange that so many positions in this congregation are filled by Dominicans. The reason is to be found in the great solicitude of Pius V for the Holy Office, which solicitude led him to restructure all these functions, introducing especially the Province of Lombardy, to which he himself had belonged, and in whose members he reposed great confidence. It is to be observed that, whereas the assessor now takes precedence of the commissary, the contrary order obtained in former times, even in the days of Cardinal De Luca (Relatio curiae forensis disc., 14, n. 6), for the commissary had the faculties of a true judge in ordinary, while the assessor was merely an assessor or consultor, as in other tribunals. According to Simier (La curie romaine, ch. i, n. 1) this change occurred towards the end of the eighteenth century, and was due to the fact that the officials already mentioned, the Holy Office, like most other congregations, has a number of consuls, chosen from among the most esteemed and learned prelates and religious. Some are ex officio consultors by virtue of a right anciently granted; these are called natural consultors (consultori nativi). They are the Master General of the Order of Preachers, the Master of the Sacred Palace (of the same order by a privilege granted by Pius V), and a religious of the Order of Friars Minor added by Sixtus V, himself a Friar Minor.

This congregation also has certain officials peculiar to itself, required by the nature of its attributes. They are the qualiﬁers (qualiﬁcatores), explained by the function of these ofﬁcials, theologians whose duty it is to propose to the cardinals the particular note or censure by which objectionable propositions are to be condemned, since all such propositions do not affect the question, indifferent in Church and discipline, condemned by the Holy Office not in a general, but in a speciﬁc way, being termed heretical, erroneous, temerarious, false, injurious, calumnious, scandalous, or qualiﬁed by the ancient special phrase praemunire aurius offensae, "offensive to pious ears". Since the promulgation of the reestablishment of the Congregation, giving a new organization to the Curia, while all that has been referred to in regard to the internal status of this congregation has remained, a new division, to deal with indulgences, has been added to the Holy Office. For this division a congresso has been established. Although no mention is made in the basic constitution of a congresso (congresso) for the main part of this congregation, the Holy Office itself, the fact that it is said in the "norme peculiaris" that the Holy Office shall retain its former methods of procedure insures to it a kind of congress analogous to that of the other congregations and consisting of the assessor, the commissary, the first associate, and a few other officers. Its duties are to examine the various cases, and to decide which of them must be submitted to the congregation of the consultors and which others may be disposed of without further proceedings, as is the case in matters of religiously established precedents. The Decree often makes it clear that the case has been determined in this way, as when use is made of the formula: "D. N. Pius V, per facultates R. P. D. Assessori S. Off. impertitas ..." The congresso of the new division consists of the cardinal, secretary, the assessor, the commissary, and the surrogate for indulgences.
The Congregation of the Holy Office defends Catholic teaching in matters of faith and morals: "Rex S. Congregationis..." doctrine par la plus morum fundamenta..." Whence it follows, and is explicitly affirmed in the "Sapiens consilio," that the Holy Office deals with all matters which, directly or indirectly, concern faith and morals; it judges heresy, and the offenses that lead to suspicion of heresy; it applies the canonical procedures for acquittal or condemnation, acquittal, or condemnation, whether with the intelligence, it follows that to be cited before this tribunal is no recommendation, and to leave it, even by the door of acquittal, will never be a title to glory. We should bless that mystery which protects him who appears before the tribunal and whose trial precedes without his acquittal, he too should be the judge in heretical and kindred cases. From the fact that the purpose of this congregation is to defend the Faith, it follows that dispensation from the impediments of disparity of worship and of mixed religion (which by their nature imperil faith, and which, by Divine law itself, is granted only upon guarantees given by the non-Catholic party) pertains to the Holy Office. The same is true of the Pauline privilege. And as the judicial causes connected with this privilege and with impediments of disparity of worship and mixed religion must rest in the Congregation of the Holy Office, it was declared that these causes belonged to the jurisdiction of the Holy Office (see decision of the Cong. of the Consistory, January, 1910). With regard, however, to the substantial form of the celebration of mixed marriages, the pope withdrew all authority from this congregation, wishing article 11 of the Decree "Ne temere" to remain in force. The Holy Office formerly had a more ample jurisdiction, acquired by spontaneous development as time went on. Thus it dispensed from abstinence, from fasting, and from the observance of feasts (all of which now pertain to the Congregation of the Council); it dispensed from vows made in religious institutions, a function now exercised by the Congregation of Religious, and it dealt with the nomination of bishops, according to the Motu Proprio of Pius X (17 December, 1903), which business now belongs to the Congregation of the Council. It proceeded to the convalidation of mixed marriages, a matter which is now assigned to the Congregation of Rites. Grimaldi (op. cit. infra in general bibliography) gives as an example of such cases the Decree of the Holy Office in confirmation of the cult of St. Dominica in the Dominican Church at Perugia in 1507; and he adds: "Ce genre de causes est devenu ensuite l'apanage de la Congregation des Rites; mais si la vraie sainteté échappe actuellement à la juridiction de l'inquisition, ce tribunal a conservé le privilège de juger la fausse sainteté..." Pius X, in a sentence which, with the advice of theologians, he thought to be a prudent measure indeed, for the protection of the good name of individuals in a congregation which must deal with most grievous offences against the Faith. Grimaldi (op. cit.) rightly says, speaking of the secrecy of the Holy Office: "Le saint-office ayant à affirmer ces decretas non seulement contre la foi, mais encore d'autres qui ne relèvent que de trés

loin de l'intelligence, il s'ensuit qu'être cité à ce tribunal n'est pas une recommandation, et en sortir, même après acquittement, ne sera jamais un titre de gloire. Aussi doit-on bénir ce mystère qui protège celui qui comparait devant ce tribunal, et dont le procès se déroule sans qu'aucune phase n'en ait transpari dans le public." (As the Holy Office has to deal not only with offences against the Faith, but also with other crimes, the royal prerogatives of the Pope, if it is a question of enforcing the decrees, it may be that it is impossible to let the public know about it, and that the Holy Office is not expected to state its reasons for acquittal.)

For the discussion of matters before the Holy Office there are three kinds of reunions, or, as they are called, congregations. The first is the so-called congregation of the consultors at which the consultors and the greater officials of the congregation are present under the presidency of the assessor. This meeting is held on Monday of each week in the Palace of the Holy Office behind the colonnade of St. Peter's. The most important matters are discussed at this meeting, and the views of the consultors are given for the enlightenment of the cardinals of the Holy Office, who, on the following Wednesday, consider the same matters, after which the pope gives the Decree to the congregation of cardinals which used to be held at the residence of the general of the Dominicans near Santa Maria sopra Minerva, but since 1870 has been held at the Palace of the Holy Office. The third congregation is held in the presence of the pope, who approves or modifies the decisions rendered by the cardinals on the previous day. This third congregation, formerly held every Thursday, is now held only on occasion of the most exceptional cases. Instead of the congregation, the assessor refers the decisions of the cardinals to the Holy Father on Wednesday mornings, after which the pope gives the Decree. It was formerly customary, both at the congregation of cardinals and at the Thursday in the presence of the pope (coram Sanctissimo), for the consultors to wait in the antechamber in case they might be called upon by the cardinals or the Holy Father for explanations. This custom has been abolished. As regards the doctrinal value of Decrees of the Holy Office it should be observed that canonists distinguish two kinds of approbation of an act of an inferior by a superior: first, approbation in common form (in forma communis), as it is sometimes called, when the superior acts as an act of his own authority as an act of the inferior. Thus, for example, the decrees of a provincial council, although approved by the Congregation of the Council or by the Holy See, always remain provincial conciliar decrees. Secondly, specific approbation (in forma specifica), which takes the act out of the purview of one of the acts of the inferior and makes it the act of the superior who approves it. This approbation is understood when, for example, the pope approves a Decree of the Holy Office ex certa scientia, motu proprio, or plenitudine sua potestatis. Even when specifically approved by the pope, decrees of the Holy Office are not infallible. They call for a true assent, internal and sincere, but they do not impose an absolute assent, like the dogmatic definitions given by the pope as infallible teacher of the Faith. The reason is that, although an act of this congregation, when approved by the pope, is valid as an act of the sovereign pontiff, that act is not necessarily concluded with the infallible authority inherent in the Holy See, since the pope is free to make the act of an inferior his own without applying his pontifical prerogative to its performance. Similarly, when he acts of his own volition, he may teach ex cathedra or he may teach in a less decisive and solemn way. Examples of specific appro-
probation of the Decree of the Holy Office which yet lack the force of ex cathedra definitions are given by Choupin ("Valeur des decisions doctrinales de disciplinaires de l’organisation de l’Eglise," ch. iv, § 3). The disciplinary Decrees of the Holy Office have the same force as those of the other congregations, that is, they are binding upon all the faithful if they be formally universal; and they are binding only upon the parties interested if they be merely personal, e.g., judicial see, which affirms and enforces law for the parties involved. If, however, they be personal and at the same time equally universal, canonists are not fully agreed as to their force. For a discussion of this point see Choupin, op. cit., ch. iv, § 33, and the authors cited by him.

The Congregation of the Roman Curia is the ecclesiastical authority which represents the Pope as his representative in the external world. Therefore, it is necessary to determine the powers of the Curia in this regard. The Curia is composed of the Pope, the Secretary of State, and the cardinals. The Secretary of State is the head of the Curia and has the power to conduct the business of the Curia in the Pope’s absence. The cardinals have the right to participate in the decisions of the Curia.

The Congregation of the Roman Curia is the highest judicial body of the Church, and it is responsible for the administration of justice in the Church. It is composed of the Pope, the Secretary of State, and the cardinals. The Secretary of State is the head of the Curia and has the power to conduct the business of the Curia in the Pope’s absence. Congregation of the Consistory: complete authority in all that relates to a diocese as a juridical institution, including its establishment and its conservation; which results in the right of ecclesiastical, rural and kindred establishments within a diocese. On the other hand, a very high function was given to this congregation in the new organization of the Curia, namely, the power of settling any doubts in relation to the competency of the other congregations, exception taken by the Holy Office, which is the court of first instance, in matters referred to it, and who was later given three sub-secretaries—a feature in which it differs from all other congregations. Each one of these sub-secretaries is the director of one of the following sections of the congregation.

A. The first section deals with all matrimonial dispensations, except those that imply disparity of religion, which pertain to the Holy Office. With regard to these dispensations it is important to note the distinctions introduced by the Special Rules between impediments in the major degree and impediments in minor degree, and correspondingly between major and minor dispensations. Minor dispensations concern impediments of relationship or affinity of the third and the fourth degrees in the collateral line, whereas the respective impediment in the major degree is with the fourth degree with the third or of the third degree with the second. Minor dispensations are also given from impediments of affinity in the first degree, or in the second degree, whether simple or mixed—all of which are subject to the dispensations of public decorum, whether arising out of espusals or out of ratified marriage already dissolved by pontifical dispensation. Dispensations from these impediments are now granted as non-rationalis causa in S. Sede; but the minor dispensation is possible only if there are major reasons formerly required, called canonical, are now necessary for obtaining the dispensations in question. Moreover, these dispensations are supposed to be given motu proprio and with certain knowledge, from which it follows that they are not vitiated by obession or by subreation. The other impediments, and therefore the other dispensations, are considered as of the major order, and the Special Rules show that the dispensations of this order more frequently granted are those relating to the impediment of consanguinity in the second collateral degree, or the mixed second and third degree with the first; those relating to, or dispensations of the first or of the second equal collateral degree, or of the second or third with the first; finally, those relating to crime arising from adultery with a promise of future marriage.

B. The second section of the Congregation of the Sacraments alone deals exclusively with matrimonial and exercises its functions in all matters concerning that sacrament, except dispensations from impediments. Of its competency, therefore, are the concessions of sanatio in radice, the legitimation of illegitimate children, dispensations from marriage ratified and not consummated; and the impediments concerning matrimonial law, and the hearing of causes concerning the validity of marriages. In regard to the latter, however, it is to be noted that, the new Constitution on the Curia having established a complete separation between those departments which exercise judicial power and those which are administrative, and, on the other hand, the very nature of matrimonial causes making it impossible to determine them administratively, this power granted to the Congregation of the Sacraments should be interpreted reasonably, in such a way as not to be at variance with the spirit of the new Constitution. It seems, therefore, that this faculty should be held to signify only that, in special cases, in which the sovereign pontiff, for special reasons, might consider it desirable to withdraw a matrimonial cause from the Rota, and submit it to the judgment of a congregation, the Congregation of the Sacraments should be considered the competent congregation under such circumstances. It must be admitted, further, that if a matrimonial cause be brought before this congregation, the congregation may, if it please, hastily review any matrimonial cause brought before it and reject it, if found futile, at once. But if, however, the cause be found admissible, the congregation should
refer it to the Rota (unless there be a special commission of the pope to the contrary), seeing that the very nature of causes concerning the matrimonial bond, in which not private interest but public interest, and the public welfare, demands that those causes be determined judicially, and not administratively.

None of this, however, applies to dispensation from a ratified, but not consummated, marriage, because the nature of such a case requires that it be determined administratively. The marriage, as it were, is divorced by dispensation and becomes valid in itself, and the question of any grace is not involved. This does not go away with the necessity of establishing beyond doubt the non-consummation, or the existence of the requisite conditions for the dispensation, since these conditions constitute the proof that the sovereign pontiff has power, in the case of such a marriage, to undo the action validly and licitly, and therefore come within the domain of administrative power. On the other hand the congregation is always free to refer to the Rota the establishment of the fact of non-consummation.

The third section of this congregation deals with all matters concerning the other six sacraments than marriage. It has authority in all matters touching the validity of ordinations, in all matters of discipline that concern these six sacraments and also the dispensations in such matters. In the Special Rules, as examples to illustrate the competency of this congregation in making decisions on the validity of ordinations or graces reserved to it; these may be mentioned here for the guidance of those who may wish to apply to the Holy See. This section grants permission to preserve the Blessed Sacrament in churches or chapels which are not so authorized by common law; to celebrate Mass in private chapels, exercising over them due supervision; to celebrate Mass before dawn, after midday, or in the open air; to celebrate Mass on Holy Thursday, or the three Masses of Christmas, at night, in private chapels; to wear a skull-cap or a wig either while celebrating Mass or in the exposition of the Blessed Sacrament; to blind and partially blind priests to celebrate the Votive Mass of the Blessed Virgin; to celebrate Mass aboard ship; to consecrate a bishop on a day other than those established by the Pontifical, or to confer Holy orders extra temporum, that is, on other days than those appointed by law; finally, to dispense from all manner of religious duties—seven months, for instance—from the Eucharistic fast in cases of necessity.

The competency of this congregation is limited in relation both to persons and to places; its authority does not extend to places subject to Propaganda, or to members of religious orders, who for dispensations, relating even to the sacraments, must be submitted to the Congregation of Religious (an exception being made in regard to the Eucharistic fast, as stated above). As to the sacrament of marriage, however, the competency of the Congregation of the Sacraments is universal in relation to place; objectively, however, all that concerns the impediments of mixed religion or of disparity of worship and the Pauline privilege pertains exclusively to the Holy Office.

IV. CONGREGATION OF THE COUNCIL.—When the Council of Trent had brought its gigantic work to an end, the Fathers were greatly concerned for the practical application of their disciplinary decrees. The council therefore made a strong appeal to the sovereign pontiff to make provision for this important end, as is shown by the last (the twenty-fifth) session of the council, entitled De recipiendis et observandis decretis. Pius IV, in his seal for the execution of the Decrees of the Council of Trent, besides other matters taken by him to this end (see the Constitution "Benedictus Deus" of 26 January, 1563), by a Motu Proprio of 2 August, 1564, commissioned eight cardinals to supervise the execution of the Tridentine Decrees and gave them ample faculties to that end, providing, however, that cases of doubt or of difficulty, as he had already decreed in the Constitution "Benedictus Deus", should be referred to him. In this Motu Proprio, Pius IV referred to the congregation of cardinals thus created as "auctoritates, quae executio et observatione S. Concilii Tridentini", as time went on, and in view of the interpretation of frequent doubts, the congregation received from the successors of Pius IV the power also to interpret the Decrees of the Council of Trent, so that Sixtus V, in his Constitution "Immaculata" (1629) made it "ad executio et interpretatione Concilii Tridentini", a title given to it before his time. Gregory XIV afterwards conferred upon it authority to reply to questions in the name of the pope.

The number of cardinals composing the Congregation of the Council was to be fixed at eight, or to that number, which had been assigned by Pius IV, four more were soon added. The number was generally greater than the original eight, and always variable, depending upon circumstances and upon the wishes of the Holy Father. One of its cardinals has the office of prefect, it also has a conclave, and that office has always been filled by eminent men, some of them famous—to take a few examples, Fagnano, Petra, and Prospero Lambertini, afterwards Benedict XIV. A sub-secretary and other minor officials complete the personnel of the Congregation of the Council. In the meantime, and indeed until the present time, the Curia, or the Congregation of the Council, without consultors, although a special congregation created by Pius IX for the revision of provincial councils had consultors from 1849, and these consultors in course of time were employed in the transaction of the business of the Congregation of the Council. The recent Constitution, which suppressed the special congregation for the synods, endowed the Congregation of the Council with consultors, to be selected by the pope, some of whom must be conversant with matters of administration.

The competency of this congregation, extending to the interpretation and to the execution of the Decrees of the Council of Trent, which relate to almost all the branches of canon law, was very great. When the Rota ceased to exercise judicial functions, matrimonial causes were referred to the Congregation of the Council. There were also added to this congregation a Commission of Relations, for the examination of the reports of bishops on the state of their dioceses (which was commonly called "the Little Council"), and the special congregation, mentioned above, created by Pius IX, for the revision of provincial councils.

As a result, the implementation of the Decrees of the Council of Trent is no longer of the exclusive competency of the Congregation of the Council, but is shared by each congregation within the limits of its particular jurisdiction. On the other hand, the tribunals of the Curia may, upon occasion, interpret those Decrees judicially, in their application to concrete cases. The present constitution of the Congregation of the Council, although differing a good deal from what it formerly was, is nevertheless extensive. In general this congregation has the supervision of discipline of the secular clergy and of the Christian people. From which it may be seen that, while this congregation has lost jurisdiction in many matters that formerly pertained to it—the sacraments, the religious orders, matrimonial causes, and other matters—it has almost absorbed the business of the former Congregation of Bishops and Regulars—in so far as relates to bishops. It has charge of the observance of ecclesiastical precepts; consequently, fasting, abstinence, tithes, and the observance of feast days are within its jurisdiction, and to it recourse must be had for dispensations in those matters. Parish priests and canons, pious sodalities, pious unions, beneficent societies, stipends for Masses, rural banks,
diocesan tributes, ecclesiastical benefits, and kindred interests are also under its jurisdiction. In brief, it exercises jurisdiction over diocesan activities in regard to both clergy and laity, as the Congregation of the Consistory exercises authority over the diocese in relation to its constitution, its conservation, and its development.

Regulation, as in others, matters of greater importance are considered by the full congregation of the cardinals; among these matters are the interpretation of laws in doubtful cases, the granting of unusual dispensations, the revision of provincial councils, and the like. Matters of less moment are determined by the conclave. To give an idea of the magnitude of its business, it is said that in the revision of a provincial council, all the records of the council are referred to a consultant, who is required to give a written opinion upon them. This report is printed, and is distributed to at least five other consultants, if not to all of the consultants, together with the cardinals and the chief officials of the church. After the private preparation which each is bound to make, the chosen consultants, or the entire college of consultants, meet and, in as many sessions as the case may require, discuss all the Acts of the council. The written opinion above referred to, with a report of the resolution of the consultation and, if of the principal modifications and corrections and modifications, is then submitted to the full congregation of the cardinals, who, in turn, examine all the records of the matter, order the corrections to be made, and approve the council.

V. CONGREGATION OF RELIGIOUS.—Sixtus V first erected by a Brief of 17 May, 1586, and afterwards, by the Constitution "Immensa," confirmed, a congregation "super consultationibus regulorum" distinct from the congregation "super consultationibus episcoporum et aliorum regulorum" established in the same Constitution. In 1601 these two congregations were already combined in the Congregation of Bishops and Regulars, to which, in course of time, were united three other congregations whose functions were closely related. These three were: the Congregation on the State of Religious (super statu regularum), created by Innocent X on 15 August, 1652, for the reformation of regulars in Italy, and suppressed by Innocent XII on 4 August, 1698; the Congregation on Regular Discipline (super disciplina regularum), instituted by Innocent XII on 18 July, 1695, for the reformation of regulars both within and throughout the whole world; the Congregation on the State of the Regulars (super statu regularium ordinum), created by Pius IX on 17 June, 1847. The last-named and the one on regular discipline were suppressed by Pius X, by the Motu Proprio of 26 May, 1906, which united these congregations with that of Bishops and Regulars. The new Constitution of Pius X abolishes the Congregation of Regulars and Bishops and transfers that part of its business which concerns bishops to the Congregation of the Council, and that part of it which concerns regulars to a congregation (congregatio negotii religiosorum sodalium preposita) created by the new Constitution, and which, by common usage sanctioned by the legend of the official seal of the congregation, has received the name of Congregation of Religious "Regiae Congregatio." This body has the usual organisation of the Roman Congregations. It is formed of several cardinals, who are chosen by the pope, and one of whom is the prefect of the congregation; these cardinals are assisted by a secretary and a sub-secretary, who are also chosen by the pope. The three assistants who are placed over the three sections. One of these sections has to deal with matters relating to religious orders; another, with the business of religious congregations or associations of men, of whatever nature those associations may be; the third, with business relating to congregations and religious communities. This congregation also has a college of consultants.

The Constitution of Pius X clearly defines the competency of this congregation, which is to pass judgment upon all matters relating to religious persons of either sex, whether bound by solemn or by simple vows, or to those persons who, although they be not religious in the canonical sense of the word, live as religious—such as the oblates of certain communities of men or women, who, without being bound by vows, live a common life under an approved rule. The third orders, consisting of seculars, are also under this congregation. It decides in litigations between members of religious orders, or between religious and bishops, and it is the competent tribunal in cases which have to do with the way of discipline (in via disciplinare) where a religious appears either as plaintiff or as defendant. Hence it is to be inferred, and indeed is expressly stated in the Constitution, that the case can be heard without relating it to the Congregation of Regulars. In the judicial way the rights of the Holy Office being always safeguarded. Finally, all common law dispensations to regulars pertain to this congregation, excepting dispensation from the Eucharistic fast, which, as said above, concerns to the Congregation of Religious.

The Congregation of Religious is alone competent to approve new religious institutes and their constitutions, as well as to modify institutes already approved, and these being matters of grave importance, the full congregation deals with them.

VI. CONGREGATION OF PROPAGANDA.—This is the abbreviated title of this congregation officially known as Sacra Congregatio de propagandae fidei nominii populi, the chief functions of which concern the regulation of ecclesiastical affairs in what are commonly known as "missionary countries." It had its origin in a commission of cardinals established under Gregory XIII (1572-85), which became a congregation properly so called under Gregory XV (1621-
23. Before the Constitution "Sapienti consilio" (29 June, 1908) came into force, the Congregation of Propaganda had jurisdiction over several countries in which normal Catholic hierarchies of the Latin Rite were established, but the Constitution adopted, in general, the plan of leaving to Propaganda only those countries or districts (excepting for the Oriental rites mentioned below) where ecclesiastical authority is vested in vicars or prefects Apostolic. Thus, Great Britain, the United States, Canada, Holland, and the Duchy of Luxemburg were removed from the jurisdiction of Propaganda, although, as an exception to the general rule, Australia, where a normal diocesan hierarchy was already established under that jurisdiction. Besides its territorial jurisdiction, however, the congregation is invested with a personal jurisdiction over the spiritual affairs of all Catholics, in any part of the world, who belong to any of the Oriental rites. (A full account of the history, scope, methods, and work of this congregation will be found in the separate article Propaganda, Sacred Congregation of.)

VII. CONGREGATION OF THE INDEX.—There has always been felt in the Church, especially since the invention of printing, the necessity of preventing the spread of teaching that might undermine faith or morals. As early as 1501 a Constitution of Alexander VI, addressed to the four ecclesiastical provinces of Germany, contains very wise prescriptions, later confirmed and extended to the whole world by Leo X in the Fifth Council of the Lateran (1515). In keeping with these laws, catalogues of the books prohibited were published by private enterprise, and sometimes with ecclesiastical authority, not, however, the supreme authority of the Church. Among these mention should be made of the three of Louvain, 1546 (approved by the emperor and published by the Holy See); that of Frankfort, 1554, also published in Spain; that of Paris, published by the Sorbonne in 1542; that of Cologne, published by the university in 1549; that of Venice, published by Casa, the Apostolic nuncio, in 1549, and another, published in 1554 by the Inquisition; that of Florence, 1552, also published by the Inquisition; that of Milan, published in 1554 by the archbishop.

The custom of forming these indexes having been established (the catalogues being sometimes arranged alphabetically) there soon asserted itself the necessity for a general index under the supreme authority of the Church. In 1564 Paul IV created the Office to prepare such an index, which was accordingly published in 1557, and again, more accurately, in 1559. Later appeared the Tridentine Index, so called because its publication was ordered by the great council. It was approved and published by Pius IV in 1564. This index was often reprinted, always with new additions, and it is now followed, having been modified and corrected by Leo XIII who, in 1900, published it with his Constitution "O officiorum ac muneratorum," in which he abolished the old laws and established new ones for the condemnation of secondary opinions.

In 1571 Pius V created the Congregation for the Reform of the Index and for the Correction of Books (de reformando indice et corrigendis libris). In the following year Gregory XIV gave a better form to this congregation, which Sixtus V confirmed by his constitution "ex omnibus" retaining its primitive organization to the present day, the Constitution of Pius X having introduced no notable alterations. Like all the other congregations it consists of a number of cardinals, one of whom is its prefect; the master of the Sacred Palace (a Dominican) is ex officio its secretary. In 1570, by permission of Pius V, Borgia Proprio of 1570, had already announced that anyone who published a book which has a college of consultants whose office is to deliver written opinions on the books submitted to their judgment by the congregation. The Congregation of the Index censures and condemns books which it considers dangerous to faith or morals. Its jurisdiction is universal, extending to all Catholics. It may therefore grant permission for the publication of a book that has been condemned, or for the publication of corrected editions of books that have been proscribed. Its functions are naturally related to those of the Holy Office, of which it may have some reason be considered an appendix or auxiliary congregation. The Constitution of Pius X provides that notwithstanding the strict recognition of the officers of both congregations, they may communicate to each other, upon occasion, those proceedings which relate to the prohibition of books, though they may communicate nothing else. One change made by Pius X in the functions of this congregation considerably widens the scope of its activities: the traditional rule was that the Index did not condemn any book which had not been denounced to it; now, on the contrary, the congregation is charged with the work of seeking out pernicious publications, and, after mature examination, condemning and proscribing them.

The procedure of the congregation was accurately determined by an instruction of Clement VIII and by a Constitution (9 July, 1753) of Benedict XIV. The consultors or consultants selected for the examination of a book to be judged, having made their written report, if it appears that the book should be condemned, a preparatory congregation is held, which consists of the Master of the Sacred Palace, the Secretary of the Index, and six consultors, versed in the matter of which the book treats and selected by the cardinal prefect. At this meeting, the passages of the book are compiled from several copies are diligently examined, and the question whether or not they contain errors is discussed. The secretary prepares an accurate report of the views of the preparatory congregation, and then refers it to the full congregation of the cardinals, at which the cause is carefully examined and final judgment is rendered. Benedict XIV required great consideration to be shown to any distinguished Catholic writer who enjoyed a good name. Not only did this pope prescribe that the work of such a writer should not be condemned without some formula calculated to mitigate the severity of the condemnation, such as done corrigatur, or donee expurgatur ("until it be corrected," "until it be expurgated"), but, he provided that the matter should first be referred to the author himself, and his attention called to the objectionable passages. If the author then refused to deal with the congregation, or rejected the corrections that were required, the decree of condemnation was to be published. If, however, the author prepared a new edition, the decree of condemnation was not to be published, unless a great number of the copies containing the errors had been circulated, in which case, of course, the public welfare required the banishment of books. The author was always entitled to the decree; but the pope provided that it should be made clear that only the first edition was comprised in the condemnation.

VIII. CONGREGATION OF RITES.—This congregation was established by Sixtus V in his Constitution "Immensa", to which frequent reference has already been made. The organization of the Congregation of Rites does not differ from that of other Roman congregations, there being a certain number of cardinals, assisted by a secretary and a surrogate (assunto), and also by an adequate number of minor officials. Besides these, the Congregation of Rites in view of special functions to which reference will be made further on, has a larger number of prelates and consultors. The order of precedence among the consultors is determined by length of service in their office. The prelate-officials sit in the following order: first, after the secretary of the congregation, is the sacristan to His Holiness, after whom comes one of the Apostolic prothonotaries permanently attached to this office, next is the dean of the Rota, with the two oldest auditors, after these the master of the Sacred Palace, the promotor of the Faith, and the assessor, or sub-promotor. Although there are no ex-officio consultors, that is, no consultors who by reason of their office in the Curia are entitled to sit among the consultors of this congregation, there are, nevertheless, certain religious orders—the Friars Minor, the Servites, the Barnabites, the Jesuits—which have obtained from different popes the privilege of being represented by one member each in the college of consultors.

The Congregation of Rites has a double function. It is charged with the direction of the Liturgy of the Latin Church, and therefore, with the supervision of the performance of the rites prescribed by the Church for the celebration of the sacred mysteries and other ecclesiastical functions and offices, and also for the granting of dispensations, either local, temporary or perpetual, which relate to the rites or ceremonies of the Church. It is manifest that the duties of this congregation are of the highest importance: they are concerned with the solemnity of the worship offered to God, the maintenance of the Faith, and the development of devotion and of Christian sentiment among the faithful. The same congregation has another charge of no less importance; the decision of causes of beatification and canonization of servants of God, and of the venerating of their relics.

In the process of beatification and canonization the most important official is the promotor of the Faith, whose chief duty it is to diligently examine the facts; and investigations carried out by the authority of the bishops, or, at least, accepted by them as justly founded. The promotor is also charged with investigating those matters which may be left in the charge of the promotor, if he has in the heroic degree the pontiff has acquired the greatest moral certainty that human means can establish. It is true that the assistance of the Holy Ghost cannot fall the head of the Church of Jesus Christ in a matter of this kind; but the sovereign pontiff is not in that case exempt from the obligation of acting in the premises with all the circumspection that human prudence requires. And in this effort to attain human certainty the pope is greatly assisted by the promotor of the Faith, who, after a preliminary study of the cause, has to propose objections in regard to the validity of the heroic act in the possession of the testimony as well as all the objections possibly to be found in the life of the servant of God whose cause is being examined, and in the miracles alleged to have been performed by God at the intercession of that servant. These objections are presented in the three congregations, or meetings, held to consider the question of virtue, and in the other three which are held to consider the question of the miracles. The promotor of the Faith is always selected from among the Consistorial advocates, and always has the assistance of a sub-advocate who has his place in his occasional, or acting, capacity in the name of the promotor. The latter officer formerly had the power to appoint, and to remove, his assistant. Besides these two chief officials, the congregation has a specialatty for that part of its functions which concerns canonization.
meeting called *nova preparatoria* is required, to elucidate some point relating to the virtue of the servant of God or to the miracles in question. Sometimes there is even a third meeting for the same purpose. The regular third meeting is called the general consultation, and, as the records of the post-conciliar period indicate, it is held in the presence of the sovereign pontiff himself and is attended by all the cardinals who form the Congregation of Rites, the prelate-officials, and the consultants, all of whom vote—the consultants and the prelate-officials first, and then, when the consultants have withdrawn, the cardinals. The pope decides definitively; as a rule, however, he does not pronounce his judgment at once, but takes time to deliberate and to implore Divine light upon the question. Besides the above meetings, others, called ordinary and special ordinary, are held for the purpose of examining the proceedings and the possession of the fame of sanctity which is necessary for the introduction of a cause of beatification. (See also Beatification and Canonization.)

Returning to the first duty of this congregation, which is the supervision and direction of the Liturgy, it should be in keeping with its part in the condemnation of liturgical books of whatever kindertain to the Congregation of Rites (saving always the prerogatives of the Holy Office in matters of faith), as well as the approbation of new liturgical Offices and calendars, and especially the authorizations of various books and new liturgical matters. Recourse must be had, therefore, to this congregation for all faculties, indulgences, and dispensations relating to liturgical functions. Thus, for example, it is for the Congregation of Rites to grant the faculty to bless sacred vestments, the authorization to expose upon the altar the image of one who has been beatified, or to dedicate an altar to such a servant of God, the right to wear special insignia during choral offices, etc. In the performance of these functions, the Congregation of Rites is assisted by three commissions, established within its own body. The first of these is the Liturgical Commission, created for the revision of Decrees concerning rites. This work was begun and finished by Leo XIII, the congregation publishing an authentic edition of its Decrees (1898–1900). Although the work for which it was created had been done, this commission remains, and is now consulted on more important questions concerning the sacred rites. The second commission, also instituted by Leo XIII, in 1902, is the Historico-Liturgical Commission, which has the function of judging historical questions concerning the sacred rites. The third is the Commission on Sacred Music, created by Pius X, in 1904, the function of which is connected with the Motu Proprio on sacred music of 1903 and with other acts of Pius X on the same subject. (See the letter of 8 December, 1903, to Cardinal Reppighi, the Decreel 8 January, 1904, the Motu Proprio of the 28 April, 1904, on the Vatican edition of the liturgical books, and the other two Decrees of 11 and 14 August, 1905.)

IX. Congregation of Ceremonies.—It is not quite certain who created this congregation. Many attribute its establishment to Sixtus V, others to his immediate predecessor, Gregory XIII. Haine says that the latter opinion is proved to be correct by the records of the previous congregation of the sovereign pontiff himself and is attended by all the cardinals who form the Congregation of Rites, the prelate-officials, and the consultants, all of whom vote—the consultants and the prelate-officials first, and then, when the consultants have withdrawn, the cardinals. The pope decides definitively; as a rule, however, he does not pronounce his judgment at once, but takes time to deliberate and to implore Divine light upon the question. Besides the above meetings, others, called ordinary and special ordinary, are held for the purpose of examining the proceedings and the possession of the fame of sanctity which is necessary for the introduction of a cause of beatification. (See also Beatification and Canonization.)

Returning to the first duty of this congregation, which is the supervision and direction of the Liturgy, it should be in keeping with its part in the condemnation of liturgical books of whatever kindertain to the Congregation of Rites (saving always the prerogatives of the Holy Office in matters of faith), as well as the approbation of new liturgical Offices and calendars, and especially the authorizations of various books and new liturgical matters. Recourse must be had, therefore, to this congregation for all faculties, indulgences, and dispensations relating to liturgical functions. Thus, for example, it is for the Congregation of Rites to grant the faculty to bless sacred vestments, the authorization to expose upon the altar the image of one who has been beatified, or to dedicate an altar to such a servant of God, the right to wear special insignia during choral offices, etc. In the performance of these functions, the Congregation of Rites is assisted by three commissions, established within its own body. The first of these is the Liturgical Commission, created for the revision of Decrees concerning rites. This work was begun and finished by Leo XIII, the congregation publishing an authentic edition of its Decrees (1898–1900). Although the work for which it was created had been done, this commission remains, and is now consulted on more important questions concerning the sacred rites. The second commission, also instituted by Leo XIII, in 1902, is the Historico-Liturgical Commission, which has the function of judging historical questions concerning the sacred rites. The third is the Commission on Sacred Music, created by Pius X, in 1904, the function of which is connected with the Motu Proprio on sacred music of 1903 and with other acts of Pius X on the same subject. (See the letter of 8 December, 1903, to Cardinal Reppighi, the Decreel 8 January, 1904, the Motu Proprio of the 28 April, 1904, on the Vatican edition of the liturgical books, and the other two Decrees of 11 and 14 August, 1905.)

X. Congregation of Extraordinary Ecclesiastical Affairs.—In former times, when questions of exceptional interest to the Church presented themselves, and circumstances required that they should in prudence be treated with secrecy, the popes were wont to establish special congregations at cardinals for the consideration of those matters. These congregations were called congregations of State. Pius VI, following this custom, on the occasion of the revolutionary conditions of France in 1793, established a congregation of this kind, which he called the Congregation for the Affairs of France (Congregatio super negotiis ecclesiasticis regni Galliarum), a title which Pius VII, in 1805, changed to Congregation for Extraordinary Ecclesiastical Affairs (Congregatio de negotiis ecclesiasticis extraordinariae). This congregation remained in existence until 1809, when the exile of Pius VII brought it to an end. In 1814, when Pius VII returned to Rome, the needs of the Church being still exceptional, the pope re-established this congregation under the title of Extraordinary Congregation for the Ecclesiastical Affairs of the Catholic World (Congregatio extraordinariae praepositus missarum omnium). In 1827, however, the congregation was reassigned its former name of Congregation for Extraordinary Ecclesiastical Affairs, which it retains to the present time. At the head of this congregation

Lutardo, op. cit., *cap. xiv, De congregazioni del ceremoniario e dei maestri del ceremoniario.*
is the secretary of State, who presides over it not as prefect, but in virtue of his office; and although it has a secretary and a sub-secretary, the congregation nevertheless has no secretary’s office of its own, the first section of the office of the secretary of State, and the numerous duties of the president of this congregation is not fixed. It was created for extraordinary affairs, and deals only with such matters as the sovereign pontiff, through his secretary of State, may submit to its study and judgment.

XII. CONGREGATION OF STUDIES.—Sixtus V, by his Constitution “Immensa”, established a special congregation for the Roman University (Congregatio pro universitate studii romani). This establishment of learning was founded by Boniface VIII in 1303; it was later known by the name of Sapienza, and in time became extinct. In 1824, Leo XIII created a new congregation to preside over the studies not only of Rome, but of all the Pontifical States. After the events of 1870, this congregation remained intact, and acquired new importance. Consisting, like all the others, of an adequate number of cardinals, the president of the congregation is a senator of the Church, under whom are several officials, and a college of consultants. Pursuant to the provisions of the new Constitution of Pius X, the jurisdiction of this congregation is no longer limited to the Pontifical States, much less to Rome. On the contrary, the Congregation exercises its powers over the whole Catholic world; for it directs the studies of all the universities or faculties under the authority of the Church, not excepting those under religious orders or congregations. It grants the faculty of conferring academic degrees, which it may also confer itself, in those cases which are peculiarly within its own jurisdiction. It also establishes the establishment of new universities as well as changes in the conditions of universities already established, the authorization in either case being given by means of a pontifical Brief. As in other congregations, all graver matters must be referred to the full congregation of cardinals, which therefore determines the establishment of new universities, the more important changes in universities already existing, and the graver questions which may present themselves for solution in such institutions, the general catalogue of which it also maintains. The Congregation of Studies, therefore, is the most important of all the congregations.

XIII. CONGREGATION OF THE FABRIC OF ST. PETER’S.—When the ancient basilica of St. Peter was crumbling through age, Julius II conceived the grand project of building a new temple in the place of the old one, after the plans of Bramante; and on the Saturday next after Easter, 1506, he laid its foundation stone. He realised the enormous expense that must be entailed by the realisation of his project, and in order to accomplish it, took a vow of the faithful, convinced of the glory that would accrue to Jesus Christ and to His Church through the completion of so majestic a work. If in the Old Testament, God had wished a most sumptuous temple to stand in Jerusalem, it was right that in the New Testament another and noble temple should rise to the glory of His Christ, the Man God. And, to encourage the faithful to contribute to so holy a work, the popes were bountiful in the concession of privileges and indulgences in favour of the generous contributors to the great work. Clement VII, in like manner, established a college of sixty members who was charged with providing for the building of the basilica. This college having been suppressed, Clement VIII replaced it with a special congregation which he named the Congregation of the Fabric of St. Peter’s. From the time of Sixtus V, the cardinal archpriest of the basilica itself was the prefect of this congregation. Benedict XIV introduced considerable changes: he left to the congregation the constitution given it by Clement VIII, with its cardinal prefect, its numerous prelates and officials, such as the auditor and the treasurer of the Apostolic State, to which it added a special one consisting of the cardinal prefect and three other cardinals, which was to precedence in everything and to exercise and have the exclusive economical control of the basilica. The general congregation was to occupy itself thereafter only with contentious causes, since the Congregation of the Fabric still had jurisdiction in such cases, and in fact was the only competent tribunal for causes connected with the building. Pius IX, having abolished special tribunals, including that of the Fabric, saw that the general congregation was left without any province. He therefore abolished the two congregations of Benedict XIV and established a single one, consisting not of three, but of more than three, cardinals, to which he conferred the economical administration and the conservation of the basilica, adding to this charge that of the administration of many pious legacies and of Mass stipends, with authority to modify them according to circumstances. This congregation, therefore, was empowered to grant reductions of the obligations of masses and permission to defer the celebration of these Masses for a longer time than that allowed by the rule; to allow the executors of pious legacies to make adjustments for the omission of them; and to make the power more or less extensively to bishops, and so forth.

Pius X, by his new Constitution, has restricted the competency of this congregation to the administration of the property, and to the maintenance of
the basilica, a task by no means light, seeing that immense sums are expended upon it. Grimaldi (Les congregations romaines, xxii) asserts that the expense amounts to 190,000 lire (nearly $38,000 each year in Rome, 1793) of the feast, which is not in accordance with the fact that the lay employees of the basilica and those of the second class, called San Pietrini, alone amount to nearly 300 in number. Under the authority of this congregation is also the Studio del mosaico established by Sixtus V, and famous throughout the world for the perfection of its work and for the exquisite beauty of its art.

Benedetto Ojetti.

Roman Curia, strictly speaking, the ensemble of departments or ministries which assist the sovereign pontiff in the government of the Universal Church. These are the Roman Congregations, the tribunals, and the offices of Curia (Uffici di Curia). These congregations, being the highest and most extensive departments of the Pontifical Government, are treated elsewhere under Roman Congregations. This article deals in particular with the tribunals and the offices of Curia (Uffici di Curia), in addition to which some one chapter is devoted to the commissions of cardinals and the pontifical family.

I. tribunals.—According to the Constitution "Sapientibus consilio" of Pius X, the tribunals of the Curia are three: the Sacred Penitentiary, the Sacred Roman Rota, and the Apostolic Signature.

A. The Sacred Penitentiary.—The origin of this tribunal cannot be assigned with any reasonable certainty. Some authors, like Cardinal De Luca (Relatio curiae rom.; forense, diss. xii), think that the office of penitentiary dates from the primitive Church; Loga (Pref. de judicis eccl. II, 265, not.) refers it to the time of Pope Cornelius (304), who is said to have appointed penitentiaries pro lepetis. Penitentiaries are certainly more ancient in the East than in the West. The Fourth Lateran Council (1215) ordained the establishment of a penitentiary in each cathedral. The Roman Church, if not the first, was at least one of the first in the West to establish penitentiaries. According to some authorities, from the 6th century, that is from the pontificate of St. Gregory the Great, the penitentiary of the Roman Church was a cardinal priest; this was certainly the case before Gregory X (d. 1276). Gregory IX calls Cardinal Nicola de Romanis "penitentiarius felicis reconditioin Hon- orii pap. predecessoris." Prior to 1205 Giraldus Cambrensis mentions Giovanni di S. Paolo, of the title of St. Friscilla, as one who heard confessions in the palace of the pope; he was probably a cardinal of that title. The one common importance when the reservation of cases to the pope or the bishops began (see Reserved Cases). At the end of the sixth century (592) St. Gregory the Great reserved to himself the excommunication with which he threatened Archbishop John of Larena for unjustly excommunicating Adrian, Bishop of Soissons. The first unequivocally recognized case of a general papal reservation of an offence is that of Innocent II, who, at the Council of Clermont (1130), reserved to himself in every case absolution from the crime of striking a cleric. This reservation was confirmed by him in the following year at the Council of Reims, where he also reserved to himself the absolution of incendiaries and their accomplices. Thenceforth reservations increased in number, and an office became necessary to answer those who, guilty of some offence, asked of the sovereign pontiff absolution from the censure incurred, which, if reserved to the Holy See, was being unable to repair to Rome, asked to be absolved from some sin reserved to the pope by a priest of their own land, who would of course require a special delegation. In the time of Cardinal Bérenger Frédol, penitentiary from 1359 to 1373, the office of the Penitentiary was in great demand, with various inquiries coming under the direction of a cardinal penitentiary, whom Clement V called penitentiarius major [c. ii. de elect. etc. (I. 3) in Clem.]. Under Alexander IV and Urban IV, Cardinal Hugo of St-Cher (or of San Carlo) was called penitentiarius summus, or sedis apostolicae penitentiarius generalis, for the earlier history of this tribunal see the excellent work of P. Chouet, "La sacre pénitencierie apostolique" (Lyons, 1908), in which may be found the details of its original constitution. The present article deals only with the recent constitution of this tribunal.

The Sacred Penitentiary consists in the first place of the cardinal chief penitentiary (penitentiarius major) appointed by a Brief of the sovereign pontiff. Pius V, followed by Benedict XIV, decreed that this functionary should be chosen from among the cardinals, and must be a master in theology or doctor in the faculty of law (doctor in the Theol. XXXIII, 198 sqq.; Pastré, La nouvelle organisation du pape Pius X (Paris, 1906); Lyon, De reforma de la curia romana in Le canonicato cons., 33, 15, 65; Clochet in Studi (1908), 308, 604; Orsatti, De romanorum curiae, institutio (Paris, 1910); Fretti, De curia romanae jurestas, a Pio X saperem, traditacum (Rome, 1911).
St. John Lateran, St. Peter, and St. Mary Major. At St. John Lateran the office is filled by the Friars Minor. At St. Peter's it was formerly filled by Jesuits, but, at the suppression of the Society by Clement XIV, their places were given to the Minor Conventuals, who have continued to fill it; these are thirteen in number, but there are also at St. Peter's fourteen other "adjunct" penitentiaries—Carmelites, Friars Minor, Augustinians, Servites. At St. Mary Major the penitentiaries are Dominicans.

At Loreto the Jesuits served as penitentiaries until the suppression, when they were succeeded by the Minor Conventuals, who still hold the office. The minor penitentiaries may not be removed by their superiors, either from Rome or from Loreto, without the permission of the Holy See. They are authorised to hear the confessions of all the faithful, not excepting religious, who may come to receive minor penitentiaries without the permission of their religious superiors. The faculties of these penitentiaries are very ample; and care is taken, as a rule, that there may be priests of different languages among them, to hear the confessions of pilgrims or other foreigners who do not speak Latin.

The cardinal penitentiary assists the pope at the hour of death, reciting the customary prayers for the dying, etc. It is he, also, who at the beginning of a jubilee, offers to the pope the golden hammer, to give the first three knocks at the Holy Door (Porta Santa) of which door he is permitted to knock only during the Holy Year, or year of the jubilee. After the pope, the cardinal penitentiary himself knocks twice with the hammer. It is also the office of the cardinal penitentiary, at the end of the jubilee year, when the Holy Door is to be closed, to present to the pope the travel and the mortar, to begin the walling up of the door. In Holy Week, the cardinal penitentiary, surrounded by those officers who constitute the signature, or congress of the Penitentiaria, sits four times—Palm Sunday, Wednesday, Good Friday, and Holy Saturday—in the penitential cathedra, or chair, set in each of the three above-mentioned Roman basilicas, and awaits for some time those who may wish to confess to him, striking lightly upon the head with his traditional rod (also used by the minor penitentiaries) those who may kneel before him with that intention, beginning with the officers of the Sacred Penitentiaria. On the part of the faithful this ceremony is public confession of having sinned against God, and a request for forgiveness by ecclesiastical authority of sins committed.

The Sacred Penitentiaria was always provided with great powers, formerly of internal jurisdiction only, but, since 1242, of external jurisdiction also. Under the latter head its work so increased that the administration of this tribunal was greatly hampered. Several popes disapproved of this, especially Pius IV, who planned a reform both of its constitution and of its field of action, or competency. Death prevented him from carrying this into effect; it was realised by St. Pius V, who, in 1559, by his Constitution "In omnibus", reformed the organisation of the Penitentiaria, while he modified its competency by his other Constitution "Ut bonus paterfamilias", both dated 18 May of that year. The competency of the Penitentiaria was confined to matters of internal jurisdiction. Little by little, the successors of Pius V increased the faculties of this tribunal; and, as many of these new concessions were made by word of mouth (viva vocis oraculo), there arose new doubts to be solved; wherefore, to remove uncertainties Innocent XII, in 1682, formulated a new list of faculties for the Penitentiaria; but, the sovereign pontiff having delayed the solution of some doubts, and difficulties having arisen in regard to the interpretation of his Constitution, the desired end was not attained while, on the other hand, new faculties were granted to the Sacred Penitentiaria by succeeding popes. Consequently, Benedict XIV was constrained to define better the faculties of this tribunal, which that learned pontiff did by his famous Constitution, "Pastor bonus", of April, 1744, wherein he enumerated the faculties of the Sacred Penitentiaria more or less as they had been given to Pius V, though broader in some respects. It is more remarkable that he granted some powers of external jurisdiction; hence until now the Penitentiaria has had, as an exceptional faculty, the power of dispensing destitute or needy persons from public matrimonial impediments. The Constitution "Sapienti consilio" of Pius X has confined the competency of the Penitentiaria to its former scope, limiting it to internal jurisdiction. The power to dispense from matrimonial impediments in relation to external jurisdiction, for all classes of people, having been granted to the Congregations of the Sacraments, the tribunal of the Penitentiaria received jurisdiction in all internal matters, in relation to which it is empowered to grant graces of all kinds—absolutions, dispensations, commutations, ratifications in matter of impediments, condonations. This tribunal also deals with questions of conscience submitted to the judgment of the Holy See. It should be observed here that the chief penitentiary's powers of internal jurisdiction, even before the recent Constitution, held during the vacancy of the Holy See, while his power of external jurisdiction, with a few exceptions, was suspended.

As to the procedure of the Penitentiaria, it follows the rules set down in the Constitution "In apostolicis" of Benedict XIV, in all that is not at variance with the new Constitution of Pius X. It transacts its business under the greatest secrecy, and gratuitously (omnia secretum et gratis). It is in effect a tribunal of mercy, as Benedict XIV asserts in his Constitution "Pastor bonus"; wherefore it is appropriate that its seal should bear, as is the case, an image of the Virgin Mother with the Child in her arms. Recourse is had to the Penitentiaria by means of a letter (written by the party interested or by that party's confessor) exposing the case, without, however, naming the person concerned. The letter is addressed to the cardinal penitentiary, and may be written in any language. The name and address of the person to whom the answer is to be sent must be clearly given. The following is a form of letter often made to the Penitentiaria: "Your Eminence: Tisio and Caia [which must be fictitious names] wishing to be united in the bonds of holy matrimony ask Your Eminence for dispensation for the following impediments: (1) an impediment of the first degree in the confinato line, that is to say, that the wife's first husband will remain, concealed, originating in illicit relations between Tisio and the mother of Caia, after the latter's birth; (2) an impediment of crime, which is also concealed, originating in adultery between the petitioners while the first wife of Tisio still lived, with a mutual promise of marriage in case of the first wife's death. The reasons for this petition are [insert facts here]. The answer may be addressed as follows...."

Fictitious names may be given, with the request that the answer be sent to the General Delivery, or, if preferred, to the confessor of the interested party. The letter containing the petition should be addressed: "To His Eminence the Cardinal Chief Penitentiary, Palace of the Holy Office, Rome".

We give this example of petitions to the Sacred Penitentiary as the faithful are in frequent need of recourse to that tribunal. The grace that is sought and the reasons why it should be granted vary, of course, in different cases.
B. The Sacred Roman Rota.—See Rota, Sacra Romana.

C. The Apostolic Signature.—In former times, there was only one Signature, i.e. there were a few assistants who were commissioned by the sovereign pontiff to investigate the petitions addressed to the Holy See, and to report concerning them. These functionaries were usually called "pontifici." Vitale opines that "Comm. de iure signature justitiae," says that there is record of the referendaries as such in 1243. Innocent IV mentions them. As time went on, recourse to the Holy See became more and more frequent, whether to obtain graces or to submit cases to the decision of the pope, the number of the referendaries increased considerably. Alexander VI deemed it expedient to define their office better, which he did by creating a double Signature—the Signature of Grace, and the Signature of Justice—to which the referendaries were severally assigned. As the office of referendary was a very honored one, it cannot be considered frequently as a merely honorary title, so that the number of the referendaries was unduly increased; and Sixtus V was constrained, in 1586, to limit the referendaries of the Signature of Justice to 100, and those of the Signature of Grace to 70. Alexander VII combined the referendaries of both Sigutures in a college, with a dean. These were called "voting referendaries," and actually exercised their office. The others remained as "supernumerary referendaries" (extra numerum). In 1834 Gregory XV gave a new organization to the Signature of Justice. On the other hand, the Signature was usually diocesan and its mention is made of it after 1847 in the catalogues of the tribunals and officials of the Curia.

The Signature of Grace, also called Signature of the Holy Father (Signatura Sanctissimi), was held in the presence of the sovereign pontiff, and there were present at it some cardinals and many prelates, chief among the latter being the voters of this Signature. At the invitation of the Holy Father, the voters voted upon the matters under consideration, but that vote was merely consultative. The Holy Father reserved to himself the decision in each case, announcing it then and there or later, if he chose, through his "domestic auditor," as De Luca calls him, or "auditor of the Holy Father" (auditor sanctissimi), as he was called later. The Signature of Justice was a genuine tribunal, presided over in the name of the pope by a cardinal prefect. The voters of this Signature were present at it, and their vote was not consultative, but definitive. An appeal was admitted only when their vote was necessary for a decision.

Pius X, in the Constitution by which he reorganised the Curia, abolished the two ancient Signatures, and created a new one that has nothing in common with the other two. The Signature now consists of six cardinals, appointed by the pope, one of whom is its prefect. It has a secretary, a notary, who shall be a priest, some consultants, and a few subordinate officers. The present Signature is a permanent tribunal which ordinarily has jurisdiction in four kinds of cases, namely: accusations of suspicions against an auditor of the Rota; accusations of violation of secrecy by an auditor of the Rota; appeals against the sentence of the Rota; petitions for the nullification of a decision of the Rota which has already become res judicata. As a temporary commission, the pope gave to the Signature the mandate and the power to review the sentences passed by the Roman Congregations before the Constitution "Sapienti Consilio." This commission was given to the Signature through an answer to the Consultor in the case of the Pope's declaration on the subject of a doubt relating to a case of this kind. Of course the Holy Father may on special occasions give other commissions of this nature to the Apostolic Signature.

II. OFFICES OF CURIA.—These are five in number: The Apostolic Chancery; Apostolic Dataria; Apostolic Camera; Secretariat of State; Secretariat of Briefs.

A. The Apostolic Chancery (Cancellaria Apostolica).—This office takes its name from civil law and from the imperial chancellories, and is certainly of very ancient origin in its essence. The primacy of the Roman See made it necessary that the sovereign pontiff should have in his service officers to write and to transmit his answers to the numerous petitions for favours and to the numerous consultations addressed to him. This office, in course of time, underwent many transformations, to the most important of which only we shall refer. After Martin V had instituted a large number of offices in the Chancery, Sixtus V placed many of them in the class of cancelli, as they were then called. The origin of this institution was as follows: The papal legates, during their absence from Rome, were placed in the charge of Christendom, to wage war, to fit out expeditions, or at least to give financial assistance to the princes who waged such wars at his exhortation. But the pontifical treasury, on the other hand, was often without means to defray even the expenses of the Pontifical laws and it became necessary, accordingly, the popes resorted to the expedient of selling several lucrative offices of the Curia, and, as a rule, to the highest bidder. It should be observed, however, that what was sold was not the office itself, but the receipts of the office, e.g., the taxes for the favours granted through the office in question. Some offices were sold with the right of succession by the heirs of the purchaser. This, however, could be done only in the case of an office of minor importance, in the exercise of which no special ability was required. Those offices which entailed grave responsibilities, and which could be filled only by prelates and learned men, were sold on the condition that they should revert to the Curia at the death of the purchaser. An aleatory contract, therefore, was made, the uncertainty being, on the one side, the amount of the income of the office and, on the other, the length of life of the purchaser. The prices of the offices, especially of the most desired ones, were so exorbitant that Clement X, after the death of the Chancery for 30,000 Roman scudi—a large fortune for those times. The hasard was not necessarily confined to the life of the purchaser; he was free to establish it upon the life of another person, provided the latter (called the intestate) were expressly
designated. The purchaser was also allowed to change the life hazard from one person to another, providing this were done forty days before the death of the last preceding intestate.

The offices of the Chancery which were transformed into sacabilii by Sixtus V were those of the regent, of the twenty-five notaries, of the twelve auditors, auditors of the causes of the Holy Palace, and others. Sixtus V assigned the proceeds of these sales to the vice-chancellor (see below) as part of the latter's emoluments; but this too liberal prescription in favour of the cardinal who presided over the Chancery was revoked by Innocent XI, who assigned the revenue in question to the Apostolic Camera. Alexander VIII restored these revenues to the vice-chancellor, who, at that time, was the pope's nephew, Pietro Ottoboni. Under Napoleon I, the Government redeemed many of the sacabilii, and but few remained. Pius VII, after his return to Rome, undertook a reform of the Chancery, and wisely reduced the number of the offices. But he granted to the sacabilii the privilege that, by a legal fiction, time should be regarded as not having transpired (quod tempus et tempora non currunt), and many proprietors of sacabilii having obtained grants of what was called sopraelevatio, by which deceased intestataries were considered to be living, it came to pass that certain offices remained sacabilii in name, but not in fact. Finally, Leo XIII (1901) suppressed all the sacabilii offices, ordering his pro-datatype to redeem them, when necessary, the datary's office being substituted for the proprietors.

Since the Constitution of Pius X, the Chancery has been reduced to a forwarding office (Ufficio di Spedizione) with a small personnel; there are, besides, the cardinal who presides over the Chancery, and to him, with the college of Apostolic prothonotaries, a notary, secretary and archivist, a protocolist, and four amanuenses. The presiding cardinal, prior to the recent Constitution, was called vice-chancellor. The authors who wrote on the Chancery gave many ingenious reasons why that dignitary should not have received a more obvious title of chancellor. Cardinal De Luca regarded these explanations as senseless (simplicitates et fabellas), and proposed an explanation of his own, without, however, insisting on its correctness. According to him, it was probable that the title of vice-chancellor arose in the same way as the title of pro-datatype, the custom having been to call the head of the datary office (datario) the datary (datario), if he were not a cardinal, and the pro-datatype (pro datario), if he were a cardinal. The reason for this must be sought in the fact that the office of datario really not that of a cardinal, but rather of minor dignity; wherefore it did not seem well to give the title of datario to a cardinal. The same custom still obtains in the case of a nuncio who is elevated to the cardinalate; he retains his position for a time, but with the title of pro-nuncio. This theory of De Luca's, if not altogether accurate, is at least probable. The new Constitution, however, establishes that the head of the Chancery shall hereafter be called chancellor, a very reasonable prudence, seeing that this office has been filled for centuries by cardinals. For the rest, the office in question was always regarded as one of the most honourable and most important of the Curia, as may be seen from Moroni's account of the funeral of Cardinal Alexander Farnese, vice-chancellor, and arch-priest of the Vatican Basilica. The authority of the vice-chancellor was increased when, under Alexander VIII in 1699, there was added to his office, in perpetuity, that of compiler (sommatario).

At present the chancellor retains little of his former influence and attributes. He acts as notary in the consistory and directs the office of the chancery. The greatest splendour of the chancellor was under Leo X, from whose successor, Clement VII, this functionary received as residence the Palazzo Riario, long known as the Cancelleria Apostolica, where he resides at the present day. His former residence was in the Palazzo Borgia, from which he was moved to the Palazzo Sforza Ceccarini, the latter palace being, on this account, known for a long time as the Cancelleria Vecchia. The removal of the vice-chancellor's residence and office to the majestic Palazzo Riario, in the Campo di Fiori, was due to the confiscation of the property by Cardinal Raffaele Riario for his share, with Cardinala Petrucci, Sacchi, Soderini, and Castellesi, in a conspiracy.
against the life of Leo X. Contiguous to the Cancelleria, in fact forming a part of it, is the Church of St. Lorenzo in Damaso. When Clement VII, having signed this palace as the perpetual residence of the vice-chancellor, he provided that the vice-chancellor should always have the title of that church; and, as it happens that the chancellors are not always of the same order in the Sacred College, being sometimes cardinal-deacons, sometimes cardinal-priests, and sometimes cardinal-bishops, this church does not follow the rule of the other cardinalitial churches, which have a fixed grade, being titular—that is churches over which cardinals of the order of priests are placed—or deaconies—churches over which are placed deacons. Moreover, contrary, is a titular when the chancellor is of the order of priests, and a deaconcy when he is a cardinal-deacon. When, on the other hand, he is a sub-ordinary bishop, the chancellor retains this church in commendam.

The Regency, which is the next office in the order of precedence in the Chancery after the chancellorship, was created in 1377, when Gregory XI returned from France to his see. Cardinal Pierre de Montére, who was the chancellor at that time, refused to follow the pope from Avignon to Rome; and, as it was necessary to have someone about the pope's person in Chancery, the pope, leaving the title of vice-chancellor to Montére, appointed the Archbishop of Bari, Bartolommeo Prignano, regent of this important office. At the death of Gregory XI, in 1378, Prignano was elected pope, and he appointed a successor to himself in the office of regent of the Chancery, which was thereafter maintained, even when the vice-chancellor re-established his residence at Rome.

There is not space here to refer in detail to the other offices of the Chancery, and the subject is the less important, since the greater number of those offices had to do with the finance of the Curia. At present, the Chancery is charged only with the expedition of Bulls for consistorial benefices, the establishment of new dioceses and new chapters, and other more important affairs of the Church. (For the various forms of Apostolic Letters, see BULLS AND BRESCAT.) One fact concerning the expedition of Bulls should be mentioned. Formerly, there were four different ways of issuing these documents, namely, by way of the Curia (per viam curiae), by way of the Chancery (per cancellarium), secretly (per viam secretam), and by way of the Apostolic Camera (per viam camera). The reason for this was that, while the Bulls of the Chancery were taxed, there was no taxation on others, and it was necessary to determine upon what Bulls the proprietors of the sacelli offices had a right to receive taxes. Bulls, therefore, which concerned the government of the Catholic world, being exempt from all taxation, were said to be issued by way of the Curia. Those Bulls of which the expedition was by way of the Chancery were the common Bulls, which, after being reviewed by the abbreviators of the greater presidency (see ABBREVIATORS), were signed by them and by the proprietors of the sacelli, the latter of whom received the established taxes. The Bulls said to be issued secretly were those in favour of some privileged persons—as the palestine prelates, the auditors of the Rota, and the relatives of cardinals. They were signed by the vice-chancellor, and they, too, were exempt from taxation. Finally, the Bulls of which the expedition was said to be by way of the Apostolic Camera. Since the style and the rules of the Chancery could not be adapted to these Bulls, they were issued by the sommista, whose office was created by Alexander VI and later, as was said above, united by Alexander VIII with that of the vice-chancellor.

At the present time, all the sacelli having been abolished, these various forms of expedition have been suppressed, the new Constitution providing that all Bulls be issued by way of the Chancery, on order of the Congregation of the Congregation, and in name of the competency of that body, and by order of the pope for all others. This is in keeping with the new organization of the Chancery as a merely issuing office. The Constitution "Sapienti consilio" provided that the ancient formula of Bulls should be changed, and the duty of preparing new one was given to a commission of cardinals composed of the chancellor, the datary, and the secretary of the Consistorial Congregation. This commission has already reformed the Bulls for the Consistorial benefices, and Pius X, by his Motu Proprio of 8 December, 1910, approved the new formula on the 1 January, 1911. The college of the abbreviators of the greater presidency having been suppressed, and the abbreviators of the lesser presidency having become extinct in fact, the Apostolic prothonotaries in actual office have been appointed to sign the Bulls. A very reasonable change has also been made in regard to the dating of Bulls. Formerly Bulls were dated according to the year of the Incarnation, which begins on 25 March. This medieval style of dating remained peculiar to papal Bulls, and in time gave rise to much confusion. Pius X considered these dates as being the only one used according to common custom, by the year which begins on 1 January.

Mention should here be made of what are known as the Rules of the Chancery. This name was given to certain Apostolic Constitutions which the popes were in the habit of promulgating at the beginning of their pontificate, in regard to judicial causes and those concerning benefices. In many cases the pope merely confirmed the provisions of his predecessor; in others he made additions or suppressions. The result has been an ancient collection of standing rules which remain unmodified even in the reform of the Curia. These Rules are usually divided into three classes: rules of direction or expedition, which concern the expedition of Bulls; beneficial or regeratory, rules, relating to benefices and reservations; lastly, judicial rules, concerning certain prescriptions to be observed in judicial matters, especially with relation to appeals. The Rules of the Chancery have the force of law, and are binding wherever exceptions have not been made to them by a concordat. In ancient times, these rules ceased to be in force at the death of the sovereign pontiff, and were revived only upon the express confirmation of the succeeding pope. Urban VIII, however, declared, that, without an express confirmation, the Rules of the Chancery should be in force on the day after the creation of the new pope. It would be outside of the scope of this article to enter into a minute examination of these rules, all the more because the commission of cardinals charged with the reformation of the formule of Bulls has also charge of revising the Rules of the Chancery.

B. The Apostolic Dataria.—According to some authorities, among them Amyenuses (De officio et jurisdictione dataria necon de stylo Dataria), this office is of very ancient origin. It is not so, however, as appears from the fact that the business which eventually fell to it was originally transacted by the Consistorialities. The Dataria was entrusted, chiefly, with the concession of matrimonial dispensations of external jurisdiction, and with the collation of benefices reserved to the Holy See. To this double faculty was added that of granting many other indulgences and benefits, which were essential in the time of the twelfth century. Matrimonial dispensations were granted through the Penitentiarii; and as to the collation of reserved benefices, that authority could not have been granted in very remote times, since the establishment of those reservations is comparatively recent: although some vestige of reservations is found even prior to the eleventh century, the custom was not frequent before Innocent IV, and it was only from the time of Clement IV that the reservation of benefices was adopted as a general rule [c. ii, "De praet., et dignit." (III, 4) in 6°. It may be said that, while this office certainly existed in the thirteenth century, yet even in this century it is impossible to determine the precise time of its creation.

The Dataria consists, first, of a cardinal who is its chief and who, until the recent Constitution, was called the pro-dataria, but now has the official title of datarist. There was formerly as much discussion about the title of pro-dataria as about that of vicerecanon (see above). Some are of opinion that it is derived from the fact that this office dated the rescripts and grants of the sovereign pontiff, while others hold it to be derived from the right to grant and give (oculus pop. De Luca) indulgences, which petitions were made to the pope. It is certain that, on account of these functions the datarist enjoyed great prestige in former times, when he was called the eye of the pope (oculus pop. After the cardinal comes the sub-datarist, a prelate of the Curia who assists the datarist, and is usually the pope's relative, uncle, or one of his functions. In the old organization of the Dataria there came after the sub-datarist a number of subordinate officials who, as De Luca says, bore titles that were enigmatical and sibylline, as, for example, the prefect of the per obitum, the prefect of the conspectus, the casus of the comenodoro, an officer of the missa, and the like.

Leo XI already had introduced reforms into the organisation of the Dataria, to make it harmonise with modern requirements, and Pius X, reducing the competency of the office, gave it an entirely new organisation in his Constitution "Sapienti consilio", according to which the Dataria consists of the cardinal datarist, the sub-datarist, the prefect and his surrogate (sostituto), a few officers, a cashier, who has also the office of distributor, and two wrighters of Bulls. The new Constitution retains the theological examiners for the competitions for parishes. Among the Datarist offices that have been abolished mention should be made of that of the Apostolic dispensators, which, in the new organisation of the Curia, has no longer a reason for being. Formerly these officials were necessary. Because of the privilege of synopsis, they did not refer directly to the Dataria, which dealt only with persons known to, and approved by, itself. Now, however, anyone may deal directly with the Datarist, as with any of the other pontifical departments. The Datarist, which, as noted above, was commissioned to grant many papal indulgences and benefits, has now only to investigate the fitness of candidates for Consistorial benefices, which are reserved to the Holy See, to write and to dispatch the Apostolic Letters for the collation of those benefices, to dispense from the conditions required in regard to them, and to provide for the pensions, or for the time being, conditions of things so unfavourable to good administration, and Pius X has totally abolished it.

C. The Apostolic Camera.—In the Constitution "Sapienti consilio" Pius X provided that during vacancies of the Holy See its property should be administered by this office. The cardinal-camerlengo (see Camerlengo) presides over the Camera, and is governed in this capacity by the independent Camera established in the Constitution, "Vacante sede apostolica", of 25 December, 1906. (For history and general treatment see Apostolic Camera.)

D. The Secretaries of State.—After the promulgation of the Constitution of Innocent XII, in 1692, the cardinal nephews were succeeded by the secretaries of State. Of the cardinal nephews many authors have written with greater severity than is justified by the facts, although the dignitaries in question may on more than one occasion have given cause of complaint. In times when the life of the pope was in jeopardy from conspiracies formed in his own court (such, for instance, as that against Leo X mentioned above, under A. The Apostolic Chancery), it was a necessity for the sovereign pontiff to have as his chief assistant one in whom he might repose implicit confidence, and such he could nowhere more surely find than in his own family. This was the occasion, in this case, of the Secretary Pape et superintendens status ecclesiasticus. The cardinal secretary of State, who fills the place of the nephew, has been, and is, in the present day, the confidential assistant of the pope. Hence the office is vacated upon the death of the reigning pontiff. Before the promulgation of the Constitution, Pius X, this office of Curia comprised, besides the cardinal secretary himself, a surrogate, also called
secretary of the cipher, and some clerks and subaltern officials. Now, however, there have been amalgamated with it certain other offices which were formerly independent of their former departments, and at present divided into three sections, the first of which deals with certain extraordinary ecclesiastical affairs, the second with ordinary affairs, including grants of honours, titles, and decorations by the Holy See otherwise than through the majordomo, the third with the expediency of the Pontifical Briefs. Therefore, the office of the Secretary of the State has charge of the distribution of offices of the Curia, and of the election of the various officers. Through this section titles of nobility—as prince, marquis, count palatine, etc.—are granted and the decorations of the Holy See, which, besides the golden cross pro Ecclesia et Pontificiæ, instituted by Leo XIII., include such distinctions as the Supreme Order of Christ (or Order of the Militia of Jesus Christ, as it is called by Pius X in his brief of 7 February, 1905), the Order of Pius IX, established by that pontiff, the Order of Saint Gregory the Great, created by Gregory XVI in 1831; the Order of Saint Sylvester; the Order of the Golden Militia, or of the Golden Spur, restored by Pius X, and the Order of the Holy Sepulchre, of which Pius X has reserved to himself the supreme mastership.

As has already been said, the third section of the Curia of the State is exclusively concerned with the expediency of Briefs.

E. The Secretariate of Briefs to Princes and of Latin Letters. The Secretariate of Briefs to Princes consists of the secretary and two office assistants. The secretary is a prelate whose duty it is to write the pontifical Briefs addressed to emperors, kings, civil princes, or other exalted personages. He also prepares the allocations which the pope pronounces at Consistories, and the Encyclicals or Apostolic Letters addressed to the bishops and to the faithful. All this he does according to the instructions of the pope. He composes the drafts of the Latin language in which these documents are written. The secretary for Latin letters also is a prelate or private chamberlain (cameriere segreto), his duties being to write the letters of less solemnity which the sovereign pontiff addresses to different personages. He has an official secretary.

III. COMMISSIONS OF CARDINALS AND THE PONTIFICAL FAMILY. Certain commissions of cardinals which still exist are the Commissions for Biblical Studies, for Historical Studies, for the Administration of the Funds of the Holy See or of the Peterseime, for the Conservation of the Faith in Rome, and for the Codification of the Canon Law.

In the wider sense of the term, the Curia includes not only the departments already mentioned, but also what is officially known as the Pontifical Family. The chief members of this body are the two palatine cardinals—cardinal datary and the cardinal secretary of State. Formerly the cardinal datary always lived with the pope; the secretary of State, even now, lives in the Vatican Palace and is the pontiff's confidential officer. After these follow the palatine prelates: majordomo, the maestro di camera, the master of the Sacred Palace, the chamberlain (the private almoner), the secretary of Briefs to Princes, the surrogate for ordinary affairs of the Secretariate of State and secretary of the Cipher, the subsecretary, the secretary for Latin Letters, the copyst, the embassy secretary, and the master of the robes), to whom are added, as palatine prelates, the sacristan and the secretary of Ceremonies. Nearly all these prelates live in the Vatican. It would be impossible to refer, here, to each one of them in particular. The most important among these dignitaries are those with that of the Apostolic Palace, and with the lives of the popes. (See MAESTRO DI CAMERA DEL PAPA; MAJORDOMO.)

The majordomo and maestro di camera are followed in order in the Pontifical Family by the domestic prelates of His Holiness. These are divided into colleges, the first of which is the College of the Patriarchs, Archbishops, and Bishops, Assistants to the Pontifical Throne; the second is the College of Apostolic Protonotaries, active and supernumerary. After these come the Colleges, respectively, of the Prelate Auditors of the Rota of the Papal Chancery of the Apostolic Camera, and of the Domestic Prelates, simply so called. Bishops assistants to the Throne (assistentes solio pontificii) are named by a Brief of the Secretariate of State, and in virtue of their office are members of the Pontifical Chapel (Cappella Pontificii); they wear the cappa magna and wait on the pope, assisting him with the book, and holding the candelabrum (bupia). Moreover, they may wear silk robes—an exclusive privilege of the Pontifical Family, although many bishops, in ignorance of this rule, act at variance with it.

The College of Apostolic Protonotaries is called PROTONOTARY APOSTOLIC. For the College of Prelate Auditors of the Rota see ROTA, SACRA ROMANA. Of the clerics of the Apostolic Camera, enough has already been said in the present article.

The domestic prelates are appointed as a rule by a man of the Pope's of the pope, occasionally at the petition of their bishops, and they enjoy several privileges, among which are the use of the violet dress, which is that of a bishop (without the cross), the ring, the violet biretta, and the cappa magna. These domestic prelates are appointed for life, and retain their dignity at the death of the pope. After them in the Church Family come the camerieri segreti di spada e cappa partecipanti, all of whom are laymen, the staff and the higher officers of the Pontifical Noble Guard, the supernumerary camerieri segreti or private chamberlains (ecclesiastics), the active and the supernumerary camerieri di spada and cappa (laymen), the camerieri segreti di d'onore e d'importanza (ecclesiastics), the camerieri d'onore di spada and cappa, active and supernumerary (laymen), the staff and the higher officers of the Swiss Guard and of the Palatine Guard of Honour, the master of pontifical ceremonies, the private chaplains, the non-secretariate chaplains, the secretary of Extra Urban, the chierici segreti, the College of Ordinary Pontifical Chaplains. It would be impossible to refer, here, to each of these ranks in particular. It may be said, however, of the supernumerary camerieri segreti that, like the active and the partecipanti camerieri segreti, their office ceases at the death of the pope; while it lasts they have the right to use the violet dress, of a cut slightly differing, however, from that of the prelates; on account of which difference, they are called monsignori di mantellone, while the prelates are called monsignori di manticella.
Romano, Saint, surnamed ἡ σοφίας and ἡ τριάδος, poet of the sixth century. The only authority for the date of this greatest of Greek writers is the account in the Menasion for October; his feast is 1 October. According to this account he was by birth a Syrian, served as deacon in the church at Berytus, and came to Constantinople in the reign of Anastasios. It was in the Church of the Most Holy Theotokos (διὰ τὰ Κέφα) that he received the charismata of sacred poetry. “After a religious retreat at Blachernæ he returned to his church, and one night in his sleep saw a vision of the Most Holy Theotokos, who gave him a volume of paper, saying, ‘Take the paper and eat it.’” The saint, in his delight, dropped his book and swallowed the volume. It was Christmas Day, and immediately he awakened and marvelled and glorified God. Then, mounting the ambo, he began the strains of his ἡ σοφίας ἁμαρτία τῶν ἐνεργειῶν τινας.

He wrote also about one thousand kontakia for other feasts before his death. Beyond this passage, there are only two mentions of Romanos’s name, one in the eighth-century poet St. Germanos, and once in Suidas (s. v. ἀναλυτημές), who calls him “Romano the melode”. None of the Byzantine writers on hombology allude to him; his fame was practically extinguished by the newer school of hymn-writers which flourished in the eighth and ninth centuries. Krumbacher has made it fairly certain, by a number of critical arguments, that the emperor named in the Menasion as reigning when Romanos came to the capital is Anastasius I (A. D. 491–518), not Anastasius II (A. D. 713–16). Petra and Gennadius are of the same opinion; proba-

ably, then, he lived through the reign of Justinian (A. D. 527–65), who was himself a hymn-writer; this would make him contemporary with two other Byzantine melodies, Anastasios and Kyriakos. “In poetic talent, fire of inspiration, depth of feeling, and elevation; he excelled all the other melodies. The literary history of the future will perhaps acclaim Romanos for the greatest ecclesiastical poet of all ages”, says Krumbacher, and all the other critics of Byzantine poetry subscribe to this enthusiastic praise. Some have called him the Christian Pindar. From the twelfth century his Christmas hymn was performed by a double choir (from S. Sophia and the Holy Apostles) at the imperial banquet on that feast day. Of most of the others only a few strophes survive. The long hymns (kontakia) consist of twenty-five strophes (troponia), usually of twenty-one verses each, with a refrain. Besides the Christmas hymn we may cite the following titles to exemplify St. Romanos’s choice of subjects: “Canticum Paschale”, “de Cruce Triunpho”, “de Íuda Proditore”, “de Petri Negatione”, “de Virgine iuxta eucrém”. Dramatic and pathetic dialogue plays a great part in the structure. The simple since emotional puts the reader in mind of the Latin medieval hymns, or the earliest Italian religious verse. Romanos, like the other melodies, obeys a purely accentual or rhythmical law; the quantitative scansion are obsolete for those to whom he sings (see Byzantine Literature, IV). Editions: Twenty-nine hymns in Pitra, “Analecata Sacra”, I, 1876; three more in Pitra, “Sanctus Romanus veterem melodorum princeps” (1888); Krumbacher long ago promised a complete critical edition according to the Patmian codices, but has not yet achieved it.

J. S. Philimore.
cure of souls and the administration of the sacraments.

In parochial ministrations, then, regulars are subject to all things to episcopal supervision, visitation, nomination, promotion, and removal. Religious are obliged to attend at conferences of the clergy as well as diocesan synods. "We declare," says the constitution, "that all rectors of missions are bound by their office to attend the conferences of the clergy; and moreover we ordain and command, that vicars also and other religious enjoying ordinary missionary faculties, living in residencies and small missions, do the same." The Council of Trent prescribes that all having the cure of souls be present at diocesan synods. The constitution says in regard to this question: Let the Council of Trent be observed. Another point of controversy related to appeals from synodal decrees. Regulars are not denied this right. Their appeal from the ordinary's interpretation of synodal statutes in matters pertaining to common law has a devolutionary effect only; in matters pertaining to regulars as such, owing to their exemption, an appeal begs the perpetual question of the right to divide parishes, even though under the management of regulars, is maintained, providing the formalities prescribed in law be observed. The opinion of the rector of the mission to be divided must be sought; while a bishop is not free to divide a mission in charge of religious without their assent. The claim of regulars to be reckoned in character, to the Holy See, should the case require it, is granted from the bishop's decision to divide a parish or mission. The ordinary is free to follow his own judgment in appointing rectors of new missions, even when formed from parishes in charge of regulars. The claim of regulars to preference in these appointments is thus denied. It is unlawful for religious to establish new monasteries, churches, colleges, or schools without the previous consent of the ordinary and of the Apostolic See. Similar permission is required to convert existing institutions to other purposes, except where such change, affecting merely the domestic arrangements or discipline of regulars themselves, is not contrary to the conditions of the foundation. The bishop may exercise the right of canonical visitation in regard to churches and parochial or elementary schools, though they be in charge of regulars. This right does not extend to monasteries or institutions for the use of religious only; nor to colleges in which religious, according to their rule, devote themselves to the education of youth. The temporal affairs of a parish or mission are determined by a decree of Propaganda, published 19 April, 1866. All goods or revenues must be accounted for according to diocesan statutes; not, however, donations made to regulars for themselves. It is the duty of the ordinary to see religious goods are devoted to the purposes designated by the donors. Inventories (Propaganda, 16 March, 1866) will distinguish particular properties from the rest of property. These regulations of former decrees are embodied in "Romani Pontificii".

ANDREW B. MeHEAN.

Roman Patriarchate. See Patriarch and Patriarchate.

Roman Rite (rites romanus), Title, is the manner of celebrating the Holy Sacrifice, administering Sacraments, reciting the Divine Office, and performing ecclesiastical functions (blessings, all kinds of Sacramentals, etc.) as used in the city and Diocese of Rome. The Roman Rite is the most wide-spread in Christendom. That it has advantages possessed by no other, the most archaic antiquity, unqualified dignity, beauty, and the practical conveniences of being comparatively short in its formula will not be denied by anyone who knows it and the other ancient rites. But it was not the consideration of these advantages that led to its extensive use; it was the exalted position of the see that used it. The Roman Rite was adopted throughout the West because the local bishops, sometimes kings or emperors, felt that they could not do better than use the reigning bishop of all, at Rome. And this imitation of Roman liturgical practice brought about in the West the application of the principle (long admitted in the East) that rite should follow patriarchy. Apart from its universal primacy, the pope has always been unquestioned Patriarch of the West. It was then the right and normal thing that the West should use his liturgy. The irregular and anomalous incident of liturgical history is not that the Roman Rite has been used, practically exclusively, in the West since about the tenth or eleventh century, but that before that there were other rites in the pope's patriarchy. Not the disappearance of these other rites, but the toleration of the Gallican and Spanish rites is the difficulty (see RTR). Like all others, the Roman Rite bears clear marks of its local origin. Wherever it may be used, it is still Roman in the local sense, obviously composed for use in Rome. Our Missal contains marks the Roman Rite has preserved in the saints in the Canon (see CANON OF THE MASS), honours with special solemnity the Roman martyrs and popes. Our feasts are constantly anniversaries of local Roman events, of the dedication of Roman churches (All Saints, St Michael, St. Maria ad Nives, etc.). The Collect for St. Peter and Paul (29 June) supposes that it is said at Rome (the Church which "received the beginnings of her Faith" from these saints that is of Rome), and so on continually. This is quite right and fitting; it agrees with all liturgical history. No rite has ever been composed consciously for general use. In the East there are still stronger examples of the same thing. The Orthodox all over the world use a rite full of local allusions to the city of Constantinople.

The Roman Rite evolved out of the (presumed) universal, but quite fluid, rite of the first three centuries during the (liturgically) almost unknown time from the fourth to the eighth century, when it was fully developed in the Leonine, later in the Gelasian, Sacramentaries. How and exactly when the specifically Roman qualities were formed during that time will, no doubt, always be a matter of conjecture (see LITURGY, MASS, LITURGY OF THE). At first its use was very restrained. It was followed only in the Roman province. North Italy was Gallican, the South, Byzantine, but Africa was always closely akin to Rome liturgically. From the eighth century gradually the Roman usage began its career of conquest in the West. By the twelfth century at latest it was used in nearly Latin obtaining, being used except at Milan and in retreating parts of Spain. That has been its position ever since. As the rite of the Latin Church it is used exclusively in the Latin Patriarchate, with three small exceptions at Milan, Toledo, and in the still Byzantine churches of Southern Italy, Sicily, and Corsica. During the Middle Ages it developed into a derived rite, differing from the pure form only in unimportant details and in exuberant additions. Most of these were abolished by the decree of Pius V in 1570 (see MASS, LITURGY OF THE). Meanwhile, the Roman Rite had itself been affected by, and had received additions from, the Gallican and Spanish rites. The Roman Rite is now used by every one who is subject to the pope's patriarchal jurisdiction (with the three exceptions noted above); that is, it is used in Western
Europe, including Poland, in all countries colonised from Western Europe: Americana, Australia, etc., by virtue of the Roman missions all over the world, including the Eastern lands where other Catholic rites also obtain. No one may change his rite without a legal authorisation, which is not easily obtained. So the Western priest in Syria, Egypt, and so on uses his own Roman Rite, just as at home. On the same principle, the Eastern rites in Russia, in America, etc., keep their rites; so that rites now cross each other wherever such people live together. The language of the Roman Rite is Latin everywhere except that in some churches along the Western Adriatic coast it is said in Slavonic and on rare occasions in Greek at Rome (see ritus). In derived forms the Roman Rite is found in Eastern churches (Lyons) and by several religious orders (Benedictines, Carthusians, Carmelites, Dominicans). In these their fundamentally Roman character is expressed by a compound name. They are the "Ritus Romano-Lugdunensis", "Romano-monasticus", and so on.

For further details and bibliography see Breviarium; Canon of the Mass; Liturgy; Mass, Liturgy of the Rites.

ADRIAN FORTECSU.

ROMANS, EPISTLE TO THE.—This subject will be treated under the following heads: I. The Roman Church and St. Paul; II. Content and Composition of the Epistle; III. Authenticity; IV. Integrity; V. Date and Circumstances of Composition; VI. Historical Importance; VII. Theological Contents: Faith and Works (Paul and James).

I. THE ROMAN CHURCH AND ST. PAUL.—Among the Epistles of the New Testament which bear the name of the Apostle Paul, that written to the Roman Church occupies the first place in the manuscripts which have come down to us, although in very early times the order was probably otherwise. The Epistle is intended to serve as an introduction to a community with whom the author, though he has not founded it, desires to form connections (i, 10-15; xv, 22-24, 28-29). For years his thoughts have been directed towards Rome (xv, 23). The Church there had not been recently established; but its faith had already become known everywhere (i, 5) and it is represented as a firmly established and comparatively old institution, which Paul regards with reverence, and with which he can concern its foundation, unfortunately, the Epistle to the Romans gives us no information. To interpret this silence as decisive against its foundation by Peter is inadmissible. It cannot indeed be ascertained with complete certainty when Peter first came to Rome; that he was there before any Apostle set foot there, but it is simply inconceivable that this Church should have attained such firm faith and such a high standard of religious life without one of the prominent authorities of nascent Christianity having laid its foundation and directed its growth. This Church did not owe its Faith solely to some unknown members of the primitive Christian community who chanced to come to Rome. Its Christianity was, as the Epistle tells us, free from the Law; this conviction Paul certainly shared with the majority of the community, and his wish is simply to deepen this conviction. This condition is entirely incomprehensible if the Roman Church traced its origin only to some Jewish Christian of the community in Jerusalem, for we know how far the fight for freedom was from being ended about a.d. 50. Nor can the foundation of the Roman Church be traced to the Gentile Christian Churches, who named themselves after their own foundation, was too recent, and Paul would have worded his Epistle otherwise, if the community addressed were even meditately indebted to his apostolate. The complete silence as to St. Peter is most easily explained by supposing that he was then absent from Rome; Paul may well have been aware of this fact, for the community was not entirely foreign to him. An epistle like the present would hardly have been composed if the residence of the Apostle was in Rome, and the reference to the ruler (xii, 8) would then be difficult to explain. Paul probably supposes that, during the months between the composition and the arrival of the Epistle, the community would be more or less thrown on its own resources. This is the reason why he quotes the Epistle to the Galatians—unoubtedly addressed to Christians who are on the point of submitting to circumcision. Even if the Epistle to the Romans repeatedly addresses (e.g. ii, 17 sqq.) Jews, we may deduce nothing from this fact concerning the composition of the community devoted to the human master, not with the Jews, but with the Jews still subject to the Law and not yet freed by the grace of Christ. The Apostle wishes to show the rule and efficacy of the Law—what it cannot and should not—and what it was meant to effect.

II. CHARACTER, CONTENTS, AND ARRANGEMENT OF.
THE EPISTLE.—A. Character.—The chief portion of this Epistle to the Romans (i—xi) is evidently a theological discussion. It would however be inaccurate to regard it not as a real letter, but as a literary epistle. Indeed, the letter to the Galatians (vi; 1 COR. vi; 1) is addressed to a special community, and, like that sent to the Corinthians or the cognate Epistle to the Galatians, must be judged according to the concrete position and the concrete conditions of that community. What the Apostle says, he says with a view to his readers in the Galatian community and his own relations to them.

Language and style reveal the writer of the Epistles to the Corinthians and the Galatians. Its emphatic agreement with the latter in subject-matter is also unmistakable. The difference in the parties addressed and between the circumstances, however, interjects (2 Cor. 9, 6; Phil. 1, 9-11; 1 Thess. 2, 5-8) new conditions and consequences with which the former Epistle is so instinct. Not that Romans is a purely abstract theological treatise; even here Paul, with his whole fiery and vigorous personality, throws himself into his subject, sets before himself his opponent, and argues with him. This character of the Epistle is brought into very strong relief in the second letter. Here arise uneasiness and harshness in language and expression noticeable in the other Epistles. This does not prevent the Epistle as a whole from revealing an elaborately thought out plan, which often extends to the smallest details in magnificent arrangement and expression. We might recall the exordium to which, in thought and to some extent in language, the great concluding doxology corresponds, while the two sections of the first part deal quite appropriately with the impressive words on the certainty of salvation and on God's exercise of providence and wisdom (viii, 31—39; ix, 33—36).

The immediate external occasion for the composition of the Epistle is given by the author himself; he wishes to announce his arrival to the community and to prepare them for the event. The real object of this comprehensive work, and the necessity for a new Epistle, is not so much that St. Paul desired to give the Romans a proof of his intellectual gifts (i, 11; xv, 29) as excluded by its pettiness. We must therefore conclude that the reason for the Epistle is to be sought in the conditions of the Roman community. The earliest interpreters (Ambrose, Augustine, Theodoret) and a great number of later exegetes see the occasion for the Epistle in the conflict concerning Judaistic ideas, some supposing an antagonism between the Gentile and Jewish Christians (Hug. Delitzsch) and others the existence of some typically Jewish errors or at least of an antipodal spirit. This view does not accord with the character of the Epistle: of errors and division in the Church the author makes no mention, nor was there any difference of opinion concerning the fundamental conception of Christianity between Paul and the Roman Church. The polemics in the Epistle are directed, not against the Jewish Christians, but against unbelieving Judaism. It is true that there are certain contrasts in the community: we hear of the strong and the weak; of those who have acquired the complete understanding and use of Christian freedom, and who emphasize and exercise it perhaps regardless of grace, while we have remained to the full possession of freedom. These contrasts are as little based on the standpoint of the Law and a false dogmatic outlook as the "weak" of I Corinthians. Paul would otherwise not have treated them with the mild considera-

tion which he employs and demands of the strong (xiv, 5—10; xiv, 13—xy, 7). In judging there was always a danger, and mistakes had occurred (xiv, 13: 2). Let us not therefore judge one another any more (13: 3)". The divisions might easily gain a footing; from what direction these were to be expected, is not declared by the Apostle, but the cases of Corinth and Galatia indicate it sufficiently. And even though Paul had no reason to anticipate the gross Jewish errors, it must have been for him that divine discourse of the uniformity of the community, rendered his labours more difficult, made co-operation with Rome impossible, and seriously impaired the community itself. He therefore desires to send beforehand this earnest exhortation (xxvi, 17 sqq.), and does all he can to dispel the misconception that he despaired of and fought against Israel and the Law. That there was good ground for these fears, he learned from experience in Jerusalem during his last visit (Acts, xxii, 20—1).

From this twofold consideration the object of Romans may be determined. The exhortations to charity and unity (xi sqq.) have the same purpose as the former, but since the obstacle in the way and the circumstances in which the Apostle finds himself in charity and the service of the Church are somewhat different, his exhortations are the best means of securing the confidence of the whole community and its assistance in his future activities. The thoughts which he here expresses are those which ever guide him, and we can easily understand how they must have forced themselves upon his attention, when he resolved to seek a new, great field of activity in the West. They correspond to his desire to secure the co-operation of the Roman community, and especially with the state and needs of the Church. They were the best intellectual gift that the Apostle could offer; whereby he set the Church on the right path, created internal solidarity, and shed light on the darkness of the doubts which certainly must have overcast the souls of the contemplative Christians in face of the attitude of incredulity which characterised the Chosen People.

Contents and Arrangement.—Introduction and Reason for writing the Epistle arising from the obligations of his calling and plans (i, 1—16): (1) The Theocritic Part (i, 16—xi, 36), Main Proposition: The Gospel, in whose service Paul stands, is the power of God and works justification in every man who believes (i, 16—17). This proposition is discussed and proved (i, 18—viii, 30), and then defended in the light of the history of the Chosen People (ix, 1—xi, 36).

(a) The justice of God is acquired only through faith in Christ (i, 18—viii, 30). (i) The proof of the justice of God is obtained through faith (i, 18—iv, 25): without faith there is no admission from the case of the pagans (i, 18—32) and the Jews (ii, 1—iii, 20); (b) justice is acquired through faith in and redemption by Christ (the Gospel, iii, 21—31). Holy Writ supplies the proof: Abraham's faith (iv, 1—25). (c) The greatness and blessing of justification through faith (v, 1—viii, 30), reconciliation with God through Christ, and certain hope of eternal salvation (v, 1—11). This is illustrated by contrasting the sin of Adam and its consequences for all mankind, which were not removed by the Law, with the superabundant fruits of redemption merited by Christ (v, 12—21). The righteousness communicated to the individual through baptism requires death to sin and life with Christ (vi, 1—23). To accomplish this the Law is ineffectual, for by the death of Christ it has lost its binding power
(vii, 1–8), and, although holy and good in itself, it possesses only educative and not sanctifying power, and is thus impotent in man’s dire combat against sin and death. In contrast to this impotence, communion with Christ imparts freedom from sin and from death (viii, 1–11), establishes the Divine kinship, and raises mankind above all earthly trouble to the certain hope of an indescribable happiness (viii, 12–39).

8. Epistle. The first part from the history of the people of Israel (ix, 1–xi, 36). The consoling certainty of salvation may appear threatened by the rejection or obduracy of Israel. How could God forget His promises and reject the people so favoured? The Apostle must thus explain the providence of God. He begins with a sieving survey of God’s deeds of love and power towards the Chosen People (ix, 1–5), proceeding then to prove that God’s promise has not failed. For (i) God acts within His right when He grants grace according to His free pleasure, since God’s promises did not apply to Israel according to the flesh, as early history shows (Isaiah and Isaiah, Ezekiel and Ezekiel, ix, 13); (ii) God’s word to Moses and His conduct towards Pharaoh call into requisition this right (ix, 14–17); God’s position (as Creator and Lord) is the basis of this right (ix, 19–24); God’s express prophecy announced through the Prophets the exercise of this right towards Jews and pagans; God’s accomplishment was a sense demanded by the foolish reliance of Israel on its origin and justification in the Law (ix, 30–x, 4) and by its refusal of and disobedience to the message of faith announced everywhere among the Jews (x, 5–21); (iii) In this is revealed the wisdom and goodness of God: for God’s rejection is not complete; a chosen number have attained to the faith (xi, 1–10); (iv) Israel’s unbelief is the salvation of the pagan world, and likewise a solemn exhortation to fidelity in the faith (xi, 11–22); (v) Israel’s rejection is irrevocable. The people will find mercy and salvation (xi, 23–32). Hence the praise of the wisdom and the inscrutable providence of God (xi, 33–36).

(2) The Practical Part (xii, 1–xv, 13).—(a) The general exhortation to the faithful service of God and the avoidance of the spirit of the world (xii, 1–2). (b) God’s unity and charity, justice, mercy, peacefulness, and love of enemies (xii, 3–21). (c) Obligations towards superiors; fundamental establishment and practical proof (xiii, 1–7). Conclusion: A second inculcation of the commandment of love (xiii, 8–10) and an incitement to seek in view of the proximity of the end (xiii, 11–14). (d) The relationship between the strong and the weak (treated with special application to the Roman community on account of the importance and practical significance of the question; it falls under (b): (i) fundamental criticism of the standpoint of both classes (xiv, 1–12); (ii) practical inferences for both (xiv, 13–xv, 6); (iii) establishment through the Chosen People of the intentions of God (xv, 7–13). Conclusion: Defence of the Epistle: (1) in view of Paul’s calling; (2) in view of his intended relations with the community (xv, 22–23); (3) recommendations, greetings (warning), doxology (xvi, 1–27).

111. Authorship. Is the Epistle to the Romans a work of the great Apostle of the Gentiles, St. Paul? Undoubtedly it has the same authorship as the Epistles to the Corinthians and the Epistle to the Galatians; consequently, if the authenticity of these be proved, that of Romans is likewise established. We shall in this question quite independently. The external evidence of the authenticity of Romans is uncommonly strong. Even though no direct testimony as to the authorship is forthcoming before Macion and Irenæus, still the oldest writings betray an acquaintance with the Epistle. One might with some degree of probability include the First Epistle of St. Peter in the series of testimonies; concerning the relation between Romans and the Epistle of St. James we speak below. Precise information is furnished by Clement of Rome, Ignatius of Antioch, Polycarp, and Justin. Marcion admitted Romans into his canon, and the earliest Gnostics were acquainted with it. The internal evidence is equally convincing. Modern critics (van Manen and others) have indeed asserted that no attempt was ever made to prove its authenticity; they have even gone further, and declared the Epistle an invention of the second century. Evансон (1792) first attempted to maintain this view; he was followed by Br. Bauer (1852, 1877), and later by Ehrhardt, Stekelenburg, and others. A less negative standpoint was adopted by Pirson-Naber, Michelsen, Völter, etc., who regarded Romans as the result of repeated revisions of genuine Pauline fragments, e.g., that one genuine Epistle, interpolated five times and combined finally with an Epistle to the Ephesians, gave rise to Romans (Völter). These critics have made a point of their ground in denouncing the authenticity of the Epistle in the following considerations: Romans is a theological treatise rather than an epistle; the beginning and conclusion do not correspond; the addresses cannot be determined with certainty; despite a certain unity of thought and style, there are perceptible breaks between each section; the period of composition, consisting of periods, connexions of ideas, which reveal the work of the reviser; the second part (ix–xii) abandons the subject of the first (justification by faith), and introduces an entirely foreign idea; there is much that cannot be the composition of St. Paul (the texts dealing with the rejection of Israel lead one to the period after the destruction of Jerusalem; the Christians of Rome appear as Pauline Christians; the conception of freedom from the law, of sin and justification, of life in Christ, etc., are signs of a later development); finally there are according to Van Manen, traces of second-century Gnosticism in the Epistle.

We have here a classical example of the arbitrariness of this type of critics. They first declare all the writings of the first and of the early second century forgeries, and, having thus destroyed all the sources, construct a purely subjective picture of the period, and reaching the source, modern activity.

That the Epistle to the Romans was written at least before the last decades of the first century is established; even by external evidence taken alone; consequently all theories advocating a later origin are thereby exploded. The treatment of a scientific (theological) problem in an epistle can constitute a difficulty only for such as are unacquainted with the literature of the age. Does it follow as to the unity of the Epistle vanish of themselves on a closer examination. The introduction is most closely connected with the theme (i, 4, 5, 8, 12, etc.); the same is true of the conclusion. An analysis of the Epistle reveals incontestably the coherence of the first and second parts; from chapter to chapter it is given to the question which has obstructed itself in the earlier portion. In this fact Chr. Baur sees the important point of the whole Epistle. Besides, the interrelation between the parts finds express mention (ix, 30–32; x, 3–6; xi, 6; xii, 30–23; etc.). The author’s attitude towards Israel will be treated below (VII). The rejection of the Chosen People could have become abundantly clear to the author after the uniform experiences of a wide missionary activity extending over more than ten years. The unevenness and difficulty of the language show at most that the text has not been perfectly preserved. Much becomes clear when we remember the personality of St. Paul and his custom of dictating his Epistles.

Were the Epistle a forgery, the expressions concerning the person and views of the author would be inexplicable and completely enigmatic. Who in the second
century would have made St. Paul declare that he had not founded the Roman community, that previously he had had no connections with it, since at a very early date the same Apostle becomes with St. Peter its co-founder? How much more likely a second century, which has conceived the idea of attributing to St. Paul the intention of paying merely a passing visit to Rome, when (as would have been palpable to every reader of Acts, xxviii, 30-31) the Apostle had worked there for two successive years? The Acts could not have supplied the suggestion! The idea is completely out of the second century, there is not even a hint of Rome in Colossians (xix, 21). Of Paul's plan of proceeding thence to Spain, the author of Acts says nothing; in recording the nocturnal apparition of the Lord to St. Paul, mention is made only of his giving testimony at Rome (Acts, xxiii, 11). The arrival at Rome is recorded with the words: "And so we went to [the wished for] Rome" (Acts, xxviii, 14). Acts closes with a reference to Paul's residence and activity in Rome, without even hinting at anything further. Again, it would have occurred to a forger to mention Peter also in a forged Epistle to the Romans, even though it were only in a greeting or a reference to the foundation of the Church. Other writers, however, mention Epistle to Rome only in the chapters. Whoever studies Romans closely will be convinced that here the true Paul speaks, and will acknowledge that "the authenticity of the Epistle to the Romans can be contested only by those who venture to banish the personality of Paul from the pages of hisologico." IV. INTEGRITY.-Apart from individual uncertain texts, which occur also in the other Epistles and call for the attention of the textual investigator, the last two chapters have given rise to some doubts among critics. Not only did Marcion omit xvi, 25-37, but, as Origen-Rufinus expresses it, "cuncta dissecut" from xiv, 23. Concerning the interpretation of these words there is indeed no agreement, for while the majority of exegetes see in them the complete rejection of the two concluding chapters, others translate "dissecut" as "disintegrated", which is more in accordance with the Latin expression. Under Chr. Baur's leadership, the Tubingen School has rejected both chapters; others have inclined to the theory of the disintegration work of Marcion.

Against chapter xv no reasonable doubt can be maintained. Verses 1-13 follow as a natural conclusion from the general exhortation of chapter xiv, which in a new character of the Church is recommended in ch. xiv is in the highest degree Pauline. Furthermore xvi, 7-13 are so clearly connected with the theme of the Epistle that they are on this ground also quite beyond suspicion. Though Christ is called the "minister of the circumcision" in xv, 8, this is in entire agreement with all that the Gospel say of Him and His mission, and with what St. Paul himself always declares elsewhere. Thus also, according to the Epistle, salvation is offered first to Israel conformably to Divine Providence (i, 16); and the writer of xv, 3-5, could also write xv, 8.

The personal remarks and information (xv, 14-33) with the coming of the Epistle, both in thought and tone. His travelling plans and his personal unsiness concerning his reception in Jerusalem are, as already indicated, sure proofs of the genuineness of the verses. The objection to ch. xv has thus found little acceptance, of it "not a sentence may be referred to a forger." (Jülicher).

Stronger objections are urged against ch. xvi. In the first place the concluding doxology is not universally recognized as genuine. The MSS. indeed afford some grounds for doubt, although only a negligible small number of witnesses have with Marcion ignored the whole doxology. The old MSS., in other respects regarded as authoritative, insert it after xvi, 24; a small number of MSS. place it at the end of xiv; some have it after both xiv and xvi. In view of this uncertainty and of some expressions not found elsewhere in the writings of St. Paul (e.g., the only wise God, the scriptures of the prophets), the doxology has been declared a later addition (H. J. Blohm, for instance). This hypothesis, however, a very unlikely view in the face of the almost unexceptional testimony, especially since the thought is most closely connected with the opening of Romans, without however betraying any dependence in its language. The fullness of the expression corresponds more completely to the style of the Pauline Epistle. The high-spirited temperament of the author powerfully shows itself on repeated occasions. The object with which the Apostle writes the Epistle, and the circumstances under which it is written, offer a perfect explanation of both attitude and tone. To these addressees, the impending journey to Jerusalem with its problematic outcome (St. Paul speaks later of his anxiety in connexion therewith—Acts, xx, 22), the acceptance of his propaganda at Rome, on which, according to his own admission, his Apostolic future so much depended—all these were factors which must have combined once more at the conclusion of the Epistle to stress the principal thoughts. In view of this consideration, the removal of the doxology would resemble the extraction of the most precious stone in a jewel-case.

The critical references to xvi, 1-24, of to-day are concerned less with their Pauline origin than with their connection in Romans. The doubt enlivening us concerning them is of a twofold character. In the first place it has been considered difficult to explain how the Apostle had so many personal friends in Rome (which he had not yet visited), as is indicated by the series of greetings in this chapter; one must suppose a real tide of immigration from the Eastern Pauline communities to Rome, and that within the few years which the Apostle had devoted to his missions to the Gentiles. Certain names occasion especial doubt: Epenetus, the "first fruits of Asia", one would not expect to see in Rome; Aquila and Priscus, who according to I Corinthians have assembled about them a household community in Ephesus, are represented as having a little later a similar community in Rome. Further, it is surprising that the Apostle in an Epistle to Rome, should emphasize the services of these friends. But the chief objection is that this last chapter gives the impression of a new character, not as an introduction, but as a warning to the community. One does not write in so stern and authoritative a tone as that displayed in xvi, 17-20, to an unknown community; and the words "I would" (xvi, 19) are not in keeping with the restraint evinced by St. Paul elsewhere in the Epistle. In consequence of these considerations numerous critics have, with David Schuls (1829), separated all or the greater portion of chapter xvi from the Epistle to the Romans (without however denying the Pauline authorship), and declared it an Epistle to the Ephesians—whether complete epistle to the Ephesians or not being determined. Verses 17-20 are not ascribed by some critics to this Epistle to the Ephesians; other critics are more liberal, and refer ch. ix-xi or xii-xiv to the imaginary Epistle.

We agree with the result of criticism in holding as certain that xvi belongs to St. Paul. Not only the language, but also the names render its Pauline origin certain. For the greater part the names are not of those who played any role in the history of primitive Christianity or in legend, so that there was no reason for bringing them into connexion with St. Paul. Certainly the idea could not have occurred to anyone in the second century, nor could the unknown Andronicus and Junias as Apostles, but to assign them a prominent position among the Apostles, and to place them on an eminence above St. Paul as having been in Christ before him. These
considerations are supplemented by external evidence. Finally, the situation exhibited by historical research is precisely that of the Epistle to the Romans, as is already admitted at the beginning of the third missionary journey, which brought the Apostle back from Ephesus to Corinth. The mention of the Christian, Phoebe of Cenchreae (xvi, 1) and the greeting on the part of his host Caius (xvi, 23) very likely the one whom Paul had baptized (I Cor., i, 14)—conduct us to Corinth, where the Epistle was written shortly before Paul's departure for Macedonia. Its composition at the port of Cenchreae would be possible only on the supposition that the Apostle had made a long stay there; the Epistle is too elaborate and evinces too much intellectual labour for one to suppose that it was written at an intermediate station.

The year of composition can only be decided approximately. According to Acts, xxiv, 27, St. Paul's imprisonment in Cæsarea lasted two full years until the removal of the procurator Felix. The year of this change lies between 58 and 61. At the earliest 58, because Felix was already many years in office when Paul began his imprisonment (Acts, xxiv, 10); Felix scarcely came to Judea before 62, and less than four or five years cannot well be called "many". At the latest 61, although this date is very improbable, as Festus, the successor of Felix, died in 62 after an eventful administration. According to the testimony of St. Clement, St. Peter, and the composition of the Epistle to the Romans, which occurred in the preceding few months, must be referred to the years 56-59, or better 57-58. The chronology of St. Paul's missionary activity does not exclude the suggestion of the years 56-57, since the Apostle began his third missionary journey perhaps as early as 52-53 (Galio, proconsul of Achaea—Acts, xviii, 12-17—was, according to an inscription in Delphi, probably in office about 52).

VI. HISTORICAL IMPORTANCE.—The Epistle gives us important information concerning the Roman Church and St. Paul's early relations with it. We may recall the dangers and strained relations and the various groupings of the community referred to in xvi, 5, 14, 15, and perhaps in xvi, 10, 11. That Paul's gase was turned towards Rome for years, and that Rome was to be merely a stopping place on his way to Spain (xvii, 15), is clear enough. Did he ever reach Spain? All tradition affords only one useful piece of information on this point: "he went to the extremest west" (Clement of Rome, vi, 7); the Muratorian Fragment, 38 sq., is not sufficiently clear.

An interesting conception of the apostolate is contained in the words: "But now having no more place in these countries" (xv, 23). Paul thus limited his task to laying the foundation of the Gospel in large centres, leaving to others the development of the communities. The meaning of the words "unto Illyricum" (xv, 19) will always remain uncertain. Probably the Apostle had set this point not yet crossed the borders of the province. Whether the remark in Titus, iii, 12, concerning a proposed residence during the winter in Nicopolis (the Illyrian town is meant), is to be connected with a missionary journey, must remain unsettled.

The Epistle is instructive for its revelation of the personal feelings of the Apostle of the Gentiles towards his fellow-Jews. Some have tried to represent these feelings as hard to explain and contradictory. But a true conception of the great Apostle renders every word intelligible. On the one hand he maintains in this Epistle the position of faith and grace as distinct from the Law, and, addressing a people who appealed to their natural lineage and their observance of the Law to establish a supposed right (to salvation), he insists unwaveringly on the Divine election to grace. But Paul emphasizes not less
nearly that, according to God’s word, Israel is first called to salvation (i, 18; ii, 10), explicitly proclaiming that he would bring salvation to the Divine promises, Divine sonship, the Covenant and the Law, and, greatest privilege of all, the origin of the Messias, the true God, in Israel according to the flesh—xv, 8). Paul willingly recognizes the zeal of the people for the things of God, although their zeal is not according to knowledge (x, 31 sqq.).

Such being his feelings towards the Chosen People, it is not surprising that Paul’s heart is filled with bitter grief at the blindness of the Jews, that he beseeches God with prayer, that he is guided throughout his life of self-sacrificing apostolic labours by the hope that thereby his brethren may be won for the Faith (ix, 1-2; x, 1; xi, 26 sqq.; xii, 25 sqq; xv, 9); it would be otherwise if he were to forgo in his own case the happiness of union with Christ, if by such a renunciation he could secure for his brethren a place in the heart of the Saviour.

These utterances can offer a stumbling-block only to those who do not understand St. Paul, who cannot fathom the depths of his apostolic charity. If we study closely the character of the Apostle, realize the fervour of his feelings, the warmth of his love and devotion to Christ’s work and Person, we shall recognize how spontaneously these feelings flow from such a heart, how natural they are to such a noble, unselfish nature. The apostle’s reaction to adducing letters of the Gentiles in the course of his apostolate, the more bitter must have been the thought that Israel refused to understand its God, stood aloof peevish and hostile, and in its hatred and blindness even persecuted the Messias in His Church and opposed as far as possible the work of His Apostles. These were the hardest things for love to bear, they explain the abrupt, determined break with the ruthless warfare against the destructive spirit of unbelief, when Paul sees that he can protect the Church of Christ in no other way. Hence he has no toleration for insistence on the practice of the Law within the Christian fold, since such insistence is in the last analysis the spirit of Judaism, which is incompatible with the spirit of Christ and the Divine election to grace, for such insistence would by practice of the Law supplement or set a seal on Faith. But from the same apostolic love springs also the truly practical spirit of consideration which Paul shows for the weak brethren. The Church is not a club demands from others everywhere, so long as the Gospel is not thereby jeopardized. One can easily understand how such a man can at one moment become inflamed with bitter resentment and holy anger, showing no indulgence when his life’s work is threatened, and can later in a peaceable purpose forget the offender only a misguided brother, whose fault arises, not from malice, but from ignorance. In a soul which loves deeply and keenly one might expect the coexistence of such contrasts; they spring from a single root, a powerful, zealous, all-compelling charity—that certainly of St. Paul, the Apostle of the Gentiles.

V. CONCLUSIONS: FAITH AND WORKS.

The theological importance of the Epistle to the Romans lies in its treatment of the great fundamental problem of justification; other important questions (e. g., original sin—v, 12-21) are treated in connexion with and from the standpoint of justification. In the Epistle to the Galatians Paul had already defended his teaching against the attacks of the extreme Jewish Christians; in contrast with the Epistle to the Galatians, that to the Romans was not evoked by the excitement of a polemical warfare. The discussion of the question in it is deeper and wider. The fundamental doctrine which Paul proclaims in this Epistle is as follows: In the case of all men the call to the Messianic salvation is absolutely dependent on the free election of God; no merit or ability of the individual, neither inclusion among the descendants of Abraham nor the practice of the Law, gives a title to this grace. God sealously watches over the recognition of this truth; hence the emphasising of faith (i, 18 sqq.; iv, 24-30; vi, 6-10, 15-21; vii, 25; viii, 29 sqq.); we owe our whole salvation and the inalienable certainty of salvation to the propitiatory and sanctifying power of the Blood of Christ (vii, 26 sqq.).

From this standpoint the second part (ix-xi) describes the action of Divine providence, which is more than once revealed under the Old Dispensation, and which alone corresponds with the grandeur and sovereign authority of God. Hence the irresponsibility of Israel becomes intelligible; the Jews are blocked in their own path, considered themselves entitled to claim the Messianic Kingdom on the grounds of their personal justice. In view of this repugnant spirit, God was compelled to leave Israel to its own resources, until it should stretch out its hand after the merciful love of its Creator; then would the hour of salvation also strike for the People of the Covenant (ix, 30 sqq.; x, 3-21; xi, 32).

Securing of Salvation.—To the question how man obtains salvation, St. Paul has but one answer: not by natural powers, not by works of the Law, but by faith, and indeed by faith without the works of the Law (Rom. ii, 6-10, 24-30; Gal. ii, 16, 21 sqq.; v, 24 sqq.; vi, 6-10, 16-21; vii, 25; viii, 29 sqq.); we owe our whole salvation to the grace of the Propitiator and sanctifying power of the Blood of Christ (vii, 26 sqq.).

Faith is for St. Paul often nothing else than the Gospel, i. e., the whole economy of salvation in Christ (Gal., i, 23; iii, 23, 25, etc.); often it is the teaching of faith, the proclamation of the faith, and the life of faith (Rom., i, 5; xii, 6; xvi, 25; Gal., iii, 2; Acts, vii, 7; Rom., i, 8; II Cor., i, 23; x, 15-16; xii, 5; Acts, xiii, 8; xiv, 21; xvi, 6). That according to all these conceptions salvation comes only by faith without the works of the Law, needs no demonstration. But to what faith was Abraham indebted for his justification? (iv, 3, 9, 13-22; Gal., iii, 6). Abraham had to believe the word of God, that is, to hold it for certain. In the fourth chapter of the Christian Faith (Rom. xii, 5 sqq.) is treated the case of the Christian who is not yet in the midst of the Faith to believe that we shall live also together with Christ: knowing that Christ rising again from the dead, dieth now no more’ (vi, 8-9); ‘If thou confess with thy mouth the Lord Jesus, and believe in thy heart that God hath raised him up from the dead, thou shalt be saved’ (x, 9). This is the teaching of the Galatians, he has already defended it in the Epistle to the Galatians, and Paul has also to defend it here. That belief as unbelief is the true authority of God (dogmatic faith). The same conception of faith underlies all the exhortations to submit ourselves in faith to God; submission presupposes the conviction of faith (i, 5; vi, 16-19; x, 16; xv, 18).

The faith described in the Epistle to the Romans, as elsewhere in St. Paul’s writings and in the New Testament in general, is further more a trusting faith, e. g., in the case of Abraham, whose trust is specially extolled (iv, 17-21; cf. iii, 3, unbelief and the fidelity of God). So far is this confidence in God’s fidelity from excluding dogmatic faith that it is based undeniably on it alone and unconditionally requires it. Without the unswerving acceptance of certain truths (e. g., the Messiasship of the Divinity of Christ, the redemptive character of Christ’s death, the Resurrection, etc.), there is for St. Paul, as he never fails to make clear in his Epistles, no Christianity. Therefore, justifying faith comprises dogmatic faith as well as hope. Again, it would never have occurred to St. Paul to conserve baptism as other than necessary for salvation; Romans itself offers the surest guarantee that baptism and faith, viewed of course from different standpoints, are alike necessary for justification (vi, 3 sqq.; Gal., iii, 26 sqq.).

The turning away from sin is also necessary for ins-
unction. Paul cannot proclaim sufficiently the incompatibility of sin and the Divine sonship. If the Christian must avoid sin, those who seek salvation must also reside from it. While St. Paul never speaks in his Epistle of penance and contrition, these constitute so self-evident a condition that they do not call for any special mention. Besides, Chapters i–iii are only a grand exposition of the truth that sin separates us from God. For the nature of justification it is inessential whether Paul is discussing the practical interests of the Christian the consequences of sin, or is making sentiments of contrition and a change to a Christian mode of life a necessary preliminary condition for the obtaining of grace. What sentiments he requires, he describes in the words: "For in Jesus Christ, neither circumcision counts for anything, nor uncircumcision; but faith, which worketh by charity" (Gal. v, 6). It is merely a repetition of this sentence when the Apostle, after proclaiming freedom in Christ, seeks to remove the misconception that the condition of Christian freedom might endure anything and become synonymous with liberty to sin (Gal., v, 13–21; cf. Rom., xii, 1 sq.; xiii, 13; Paul and Jude, 12 sq., 20 sq.).

We thus see what Paul would have us understand by justifying faith. If he does not always describe it from every standpoint as in the present instance, but designates it as dogmatic or trusting faith, the reason is easily understood. He has no intention of dogmatising or laying down a law of justification; for he is so far from desiring to give a strict definition of its nature, that he wishes merely to indicate the fundamental condition on the part of man. This condition is, from the standpoint of the supernatural character of justification, not so much the feeling of contrition or the performance of penitential works as the trusting acceptance of the promise of God. When a person has once taken this first step, all the rest, if he be consistent, follows of itself. To regard justifying faith as the work or outcome of natural man and to attribute grace to this work, is to misunderstand the Apostle. The free submission which lies in faith prepares the soul for the reception of grace. Provided that the teaching of St. Paul be studied in the context in which it is found in the Epistles to the Romans and the Galatians, it cannot be misunderstood. If, however, Paul in both Epistles forestalls an unjustified practical consequence that might be drawn therefrom, this is not in his deep knowledge of the matter, but in no way a limitation of his doctrine. The faith which justifies without the works of the Law and the Christian freedom from the Law continue unimpaired. The possibility of error would be afforded if one were to withdraw the words of the Apostle from their context: even shibboleths for libertinism might be extracted in that case from his teaching. This leads us to the well-known sentence in the Epistle of St. James concerning faith without works (ii, 20, 24). Was this written in premeditated opposition to St. Paul?

Two questions must be distinguished in our inquiry: (1) Is there an historical connexion between the statements in the Epistles? (2) How are the antitheses to be explained? Are they premeditated or not?

(1) The possibility of a direct reference in the Epistle of St. James to St. Paul (this hypothesis alone is tenable) depends on the question of the priority of the Epistle. For scholars (e.g., Neander, Beyschlag, Th. Zahn, Belser, Camerlynck, etc.) who hold that the Epistle of St. James was written before A.D. 50, the question is settled. But the grounds for the assigning of this date to the Epistle are not entirely convincing. For the Epistle in question is written in the conditions of the succeeding centuries. An extreme attitude is adopted by many modern critics (e.g., Chr. Baur, Hilgenfeld, H. J. Holtzmann, von Boden, Jülicher), who assign the Epistle to the second century—a scarcely intelligible position in view of the historical conditions. If the Epistle of St. James were composed shortly after the heathen world was, in view of the lively intercourse among the Christians, have been influenced by the misunderstood views of the teachings of St. Paul, and James may have combated the misused formula of St. Paul. The almost verbal connexion in the passages might thus be accounted for.

(2) Does there exist any real opposition between Paul and James? Is this question answered in the affirmative in many quarters to-day? Paul, it is asserted, taught justification through faith without works, while James simply denied St. Paul's teaching (Rom., iii, 28), and seeks a different explanation for the chief passage quoted by St. Paul (Gen., xv, 6) concerning the faith of Abraham (Jülicher and others). But does James really treat of justification in the same sense as St. Paul? Their formulation of the question is different from the outset. James speaks of true justice before God, which, he declares, consists not alone in a firm faith, but in a faith supported and enlivened by works (especially of charity). Without works faith is useless and dead (ii, 17, 20). James addresses himself to readers who are already within the fold, but who may not lead a moral life and may appeal in justification of their conduct to the word of faith. To those who adopt this attitude, James can only answer: "But he that hath looked into the perfect law of liberty, and hath kept it, he shall be happy, and shall persever in becoming a forgetful hearer, but a doer of the word, this man shall be blessed in his deed" (i, 25). Throughout his Epistle James aims at attaining the translation of faith to life and works; in speaking of a faith that worketh by charity (Gal., v, 6), Paul really teaches exactly the same as James.

But what of the argument of James and his appeal to Abraham? "Was not Abraham our father justified by works, offering up Isaac his son upon the altar? Seest thou, that faith did co-operate with his works; and by works faith was made perfect? And the scripture was fulfilled, saying: Abraham believed God, and it was reputed to him to justice, and he was called the friend of God?" (ii, 21–23). Paul, like James, appealed to the same Abraham—both rightly from their individual standpoints. With entire right could Paul declare that Abraham owed his justice, not to circumcision, but to his faith; with complete right could James appeal to Abraham as a model of faith; and, finally, did not that faith accompanied it and by it faith was completed. And if James applies to this act the phrase: "It was reputed to him to justice", he is quite entitled to do so, since Abraham's obedience is rewarded with a new and glorious promise of God (Gen., xxiii, 16 sq.).

It is clear from the whole passage that James does not use the word "justify", in the sense in which Paul speaks of the first justification, but in the sense of an increasing justification (cf. Rom., ii, 13; Apoc., xxii, 11), as corresponds to the object of the Epistle. Of any contradiction between the teachings of the Romans and that of St. James, therefore, there can be no question.

Finally, there is a difference in the use of the term faith. In the passage in question, James uses the term in a narrow sense. As shown by the reference to the faith of the demons (ii, 19), nothing more is here meant by faith than a firm conviction and undoubting acceptance, which is shared even by the damned, and has therefore in itself no moral value. Such a faith would never have been termed by St. Paul a justifying faith. That throughout the whole course of the Epistle of St. James St. Paul's doctrine of justification is never really questioned is evident from Paul on his side shows nowhere the least opposition to St. James, calls for no further proof. The fundamental conceptions and the whole treatment in the two Epistles exclude all views to the contrary.

ROMANUS, SAINTS.—(1) A Roman martyr. Romanus is mentioned in the "Liber Pontificialis" (ed. Duchesne, I, 155) with three other ecclesiastics as companions in the martyrdom of St. Lawrence (10 August, 255).

There is no reason to doubt that this mission comes from tradition. Lawrence was buried in the Catacomb of the Cyriaca on the Via Tiburtina. The grave of St. Romanus is explicitly mentioned in the Itineraries of the seventh century (De Rossi, "Roma sotterranea", I, 175-9). In the purely legendary Acts of St. Lawrence, the ostera Romanus is transformed into an angel: this account in accordance with this statement is inserted in the historical martyrologies and in the present Roman Martyrology, which latter places his feast on 9 August (cf. Duchesne, "Les Gesta Martyrum romains", II, 201). (2) In 305 or 304, at the beginning of the Diocletian persecution, a deacon called Romanus of Cesarea in Palestine suffered martyrdom at Antioch. Upon the proclamation of Diocletian's edict he strengthened the Christians of Antioch and openly exhorted the weaker brethren, who were willing to offer heathen sacrifices, not to waver in the Faith. He was taken prisoner, was condemned to death and was buried in Antioch, but, however, as the Emperor Galerius was then in Antioch, Romanus was brought before him. At the emperor's command the tongue of the courageous confessor was cut out. Tortured in various ways in prison he was finally strangled. Eusebius speaks of his martyrdom in "De martyribus Palestin." on. ii. Prudentius ("Peristephanon", X in "P. L.", LX, 444 sqq.) relates other details and gives Romanus a companion in martyrdom, a Christian by name Barulas. On this account several historians, among them Baronius, consider that there were two martyrs named Romanus at Antioch, though more likely there was but the one whom Eusebius mentions. Prudentius was interested in getting historical features into his account, and his connexion of the martyrdom of Barulas with that of Romanus is probably arbitrary. The feast of St. Romanus is observed on 18 November [cf. Allard, "Histoire des persécutions", IV, 175 sq.; Quentin, "Les martyrologies historiques" (Paris, 1906), 183-6].

"Martyrologium Hieronymianum" mentions martyrs of this name at several dates, chiefly in large companies of Christians who suffered martyrdom. No further particulars are known of any of them. (4) A holy priest named Romanus laboured in the district of the Girond, at the present period of the Girond, at the end of the fourth century. Gregory of Tours gives an account of him ("De gloria confessorum", c. xlv), and relates that St. Martin of Tours made ready the grave of the dead Romanus. An old life of St. Romanus was published in the "Analecta Bollandiana", V (1666), 178 sqq. The feast of the saint is observed on 24 November. (5) St. Romanus, Abbot of Condé-Claude, in the French Jura, b. about 400; d. in 463 or 464. When thirty-five years old he went into the lonely region of Condat to live as a hermit, where after a while his younger brother Lupicinus followed him. A large number of scholars, among whom was St. Eugenius, gathered themselves under the holy hermits, so that the brothers who founded several monasteries: Condat (now Saint-Claude), Lausanne (later Saint-Lupicin, as Lupicinus was buried there), La Baume (later Saint-Romain-de-Roche), where St. Romanus was buried, and Romainmôtier (Romanus monasterium) in the canton of Vaud in Switzerland. Romanus was ordained priest by St. Hilary of Arles in 444, and with Lupicinus he directed these monasteries until his death. His feast is observed on 28 February. Two lives of him are in existence: one by Gregory of Tours in the "Liber vite patrum" (Mon. Germ. Hist. Script. Merov., I, 663), and an anonymous "Vita Romani Romanii Lupicini" in Monumenta Germaniae Historica, Script. Latina, III, 131 sqq.; cf. Benoit, "Histoire de St-Claude", I (Paris, 1890); Bessen, "Recherches sur les origines des évêchés de Gèvres, Luzanne, et Sion" (Fribourg, 1906), 210 sqq.] (6) St. Romanus, monk in a monastery near Subiaco, Italy, at the beginning of the sixth century. He aided St. Benedict when he withdrew into a solitary place and regularly brought Benedict bread to support life (St. Gregory the Great, "Dialogi", II, i). Romanus later (from 533) represented St. Benedict at Subiaco, and is said to have afterwards gone to Gaul and to have founded a small monastery at Dijon-Fontour. He died about 550 and was venerable from the day he was observed on 22 May. A St. Romanus, who is venerated as Bishop of Auxerre on 8 October, is probably identical with this Abbot Romanus whose relics were subsequently translated to Auxerre [cf. "Acta SS.", May, V, 135 sqq.; October, III, 596 sqq.; Adhoc in "Studien und Mitteilungen aus dem Benediktiner- und Cisterzienserorden" (1907), 267 sqq., 501 sqq.; (1908), 103 sqq., 327 sqq., 587 sqq.; Leclerc, "Vie de St Roman, éducateur de St Bénoin" (Paris, 1893)].

(7) St. Romanus, Bishop of Rouen, date of birth unknown; d. about 460. His feast is observed on 23 October. The legend of St. Romanus is worth little in itself, as the value (Acta SS., October, X, 91 sqq.), and there is but little authentic information concerning him [cf. "Analecta Bollandiana" (1904), 337 sqq.] (8) St. Romanus, "the Singer", the most important representative of rhythmical poetry in the Greek Church. According to the Greek "Iof Aib" he was born in Syria, was ordained deacon at Antioch, then went to Constantinople, where he became one of the clergymen at the Blachernae church. The era in which he lived is not certainly ascertained; most probably, however, his residence in Constantinople was from about 516 to 556. His feast is observed on 1 October. Several of his poems were edited by Pitra, "Analecta sacra", I (Paris, 1876), 1-241 [cf. Mass, "Die Chronologie der Hymnen des Romanus" in "Byzantin. Zeitschr." (1906), 1-44; Bardenhewer, "Patriologie" (3rd ed.), 486].

J. P. KIRSCH.

ROMANUS, POPE.—Of this pope very little is known with certainty, not even the date of his birth nor the exact dates of his consecration as pope and of his death. He was born at Galles near Civitá Castellana, and was the son of Constantine. He became cardinal-priest of S. Vitale and pope in August 543. He died four months later. He granted the pallium to Vitalis, Patriarch of Grado, and a privilege for his
church; and to the Spanish Bishops of Elna and Gerona, he confirmed the possessions of their sees. His coins bear the name of the Emperor Lambert, and his own monogram with "Ses. Petrus". The contemporary historian Procopius has three verses about Jerome; but we cannot give him his due credit. It is certain, however, he was deposed by one of the factions which then distracted Rome, for we read that "he was made a monk", a phrase which, in the language of the times, often denoted deposition.

HORACE C. MANN.

Rome.—The significance of Rome lies primarily in the fact that it is the city of the pope. The Bishop of Rome, as the successor of St. Peter, is the Vicar of Christ on earth and the visible head of the Catholic Church. Rome is consequently the centre of unity in belief, the source of ecclesiastical jurisdiction and the seat of the supreme authority which can bind by its enactments the faithful throughout the world. The Diocese of Rome is known as the "See of Peter", the "Vicariate of St. Peter", the "Holy Roman Church", the "Holy See"—titles which indicate its unique position in Christendom and suggest the origin of its preeminence. Rome, more than any other city, bears witness both to the past splendour of the pagan world and to the triumph of Christianity. It is here that the see of the Church dates from its earliest days, from the humble beginnings in the Catacombs to the majestic ritual of St. Peter's. At every turn one comes upon places hallowed by the deaths of the martyrs, the lives of innumerable saints, the memories of wise and holy pontiffs. From Rome the sound of the Church's message went out to the peoples of Europe and eventually to the uttermost ends of the earth. To Rome, again, in every age countless pilgrims have thronged from all the nations, and especially from English-speaking countries. With religion the missionaries carried the best elements of ancient culture and civilization which Rome had preserved amid all the vicissitudes of barbaric invasions. To these treasures of antiquity have been added the productions of a nobler art inspired by higher ideals, that have filled Rome with masterpieces in architecture, painting, and sculpture. These appeal to the mind and emotions with artistic suggestion; but their full meaning only the Catholic believer can appreciate, because he alone, in his deepest thought and feeling, is at one with the spirit that pulsates here in the heart of the Christian world.

Many details concerning Rome have been set forth in the sections of the Catholic Encyclopedia. For the prelates of the papacy the reader is referred to Pope; for the ecclesiastical government of the city and diocese, to Cardinal Vicar; for liturgical matters, to Roman Rite; for education, to Roman Colleges; for literary development, to Academies, Roman; for history, to the biographical articles on various popes Constantine the Great, Charlemagne, etc. There is a special article on each of the religious orders, saints, and artists mentioned in this article, while the details of the papal administration, both spiritual and temporal, will be found treated under Apostolic Camera; Audience, Pontifical; Examiners, Apostolic; Holy See; Rescripts, Papal; Roman Congregations; Roman Curia; Rota, Sacra Romana; States of the Church, etc. Of the great Christian monuments of the Eternal City, special articles are devoted to St. Peter, Basilica of St. Peter, Tombs of Eastern Churches, Vatican, etc. The present article will be divided: I. Topography and Existing Conditions; II. General History of the City; III. Churches and other Monuments.

I. Topography and Existing Conditions.—The City of Rome rises on the banks of the Tiber at a distance of from 16 to 19 miles from the mouth of that river, which makes a deep furrow in the plain which extends between the Alban hills, to the south; the hills of Palestrina and Tivoli, and the Sabine hills, to the east and west; and the Umbritum hills to the north. The city stands in latitude 41° 54' N. and longitude 12° 30' E. of Greenwich. It occupies, on the left bank, not only the plain, but also the adjacent heights, namely, portions of the Parioli hills, of the Fisciano, the Quirinal, the Viminal, the Esquiline (which are only the easternmost part of a mountain mass of tufa extending to the Alban hills), the Capitoline, the Caelian, the Palatine, and the Aventine—hills which are now isolated. On the right bank is the valley lying beneath Monte Mario, the Vatican, and the Janiculum, the last-named of which has now become covered with houses and gardens. The Tiber, traversing the city, forms two sharp bends and an island (S. Bartolommeo), and within the city its banks are protected by the strong and lofty walls which were begun in 1875. The river is crossed by fourteen bridges, one of them being only provisional, while ten have been built since 1870. There is also a railroad drawbridge near St. Paul's. Navigation on the river is practicable only for vessels of light draught, which anchor at Ripa Grande, taking cargoes of oil and other commodities.

For the cure of souls, the city is divided into 54 parishes (including the suburbs), administered partly by secular clergy, partly by regular. The boundaries of the parishes have been radically changed by Pius X, to meet new needs arising out of topographical changes. Each parish has, besides its parish priest, one or two assistant priests, a chief sacristan, and an indeterminate number of chaplains. The parish priests every year elect a chamberlain of the clergy, whose position is purely honorary; every month they assemble for a conference to discuss cases in moral theology and also the practical exigencies of the ministry. In each parish there is a parish committee for Catholic works; each has its various confraternities, many of which have their own church and oratory. In the vast extent of country outside of Rome, along the main highways, there are chapels for the accommodation of the few settled inhabitants, and the labourers and shepherds who from October to July are engaged in the vineyards and the open country. In former times many of these chapels had priests of their own, who also kept schools; nowadays, through the exertions of the Society for the Religious Aid of the Agro Romano (i.e. the country districts around Rome), priests are taken thither from Rome every Sunday to say Mass, catechise, and preach on the Gospel. The huge number of male religious is about 160; of female religious, 205, for the most part devoted to teaching, ministering to the sick in public and private hospitals, managing various houses of retreat, etc. Besides the three patriarchal chapters (see below, under Churches), there are at Rome eleven other chapters.

In the patriarchal basilicas there are confessors for all the principal languages. Some nations have their national churches (German, Anima and Campo Santo; French, S. Luigi and S. Claudio; Croats, S. Girolamo dei Schiavoni; Belgians, S. Giuliano; Portuguese, S. Antonio; Spaniards, S. Maria in Monserrato; to all which may be added the churches of the Oriental rites). Moreover, in the churches and chapels of many religious houses, particularly the generalates, as well as in the various national colleges, it is possible for foreigners to fulfil their religious obligations under the auspices of the various religious communities (the convents of the Irish Dominicans (S. Clemente) and of the Irish Franciscans (S. Isidoro), the English, Irish, and American Colleges, the new Church of St. Patrisio in the Via Ludovisi, that of S. Giorgio of the
English Sisters in the Via S. Sebastiano, and particularly S. Silvestro in Capite (Pallottini) should be mentioned. In these churches, too, there are, regularly, sermons in English on feast-day afternoons, during Lent and Advent, and on other occasions. Sometimes there are sermons in English in other churches also, notice being given beforehand by letter posted beside the churches and by advertisements in the papers. First Communions are mostly made in the parish churches; many parents place their daughters in seclusion during the period of immediate preparation, in some educational institutions. There are also two institutions for the preparation of secondary teachers, a national boarding school, and other lay institutions, besides several private and public schools for languages etc. — the Vatican, the Nazionale (formed out of the libraries of the Roman College, of the Aracelli, and other monastic libraries partially ruined), the Corsini (now the School of the Accademia dei Lincei), the Cesarina (the Agostiniana, the Sciansina, the Augustinians), the Vaticellana (Oratorians, founded by Cardinal Baronius), the Militare Centrale, the Chigiana, and others. (For the academies see ACADEMIES, ROMAN.) Foreign nations maintain institutions for artistic, historical, or archaeological study (America, Great Britain, Austria-Hungary, Prussia, Holland, Belgium, France). There are three astronomical and meteorological observatories: the Vatican, the Capitol (Campionglogio), and the Roman College (Jesuit), the last-named, situated on the Janicul, has been suppressed. The museums and galleries are admirable. The Vatican (especially the VATICAN), those of Christian and of profane antiquities at the Lateran (famous for the "Dancing Satyr"; the "Sphinxes", one of the finest of portrait statues in existence, found at Terracina; the "Neptune", the pagan and Christian sarcophagi with decorations in relief, and the statue of Hippolytus). In the gallery at the Lateran there are paintings by Crivelli, Giosoli, Lippi, Spagna, Francis, Palmessano, Sassoferrato, and Sinti. The Capitoline Museum contains Roman prehistoric tombs and household furniture, relics from the Arch of Marcus Aurelius, a head of Constantine, a broken figure of our Lord in the Comodus, the epiphany of the infant prodigy Quintus Sulpicius Maximus, the Equester and the Capitoline Venus, "Diana of the Ephesians", the Capitoline Wolf (Etruscan work of the fifth century B.C.), Marmorius, the Dying Gladiator, busts of the emperors and other famous men of antiquity, and Vespasian's "Lex regia"; the Capitol's famous works by Spagna, Tintoretto, Caracci, Caravaggio, Guercino (St. Petronilla, the original of the mosaic in St. Peter's), Guido Reni, Titian, Van Dyke, Domenichino, Paolo Veronese, and other masters. There are important numismatic collections and collections of gold jewelry. The National Museum of Etruscan and Lucanian and the Museo Romano, objects recently excavated; the Museo Kircheriano has been enlarged into an ethnographical museum. The Borghese Gallery is in the villa of the same name. The National Gallery, in the Exposition Building (Palazzo dell' Esposizione), is formed out of the Corsini, Sciarra, and Torksonia collections, together with modern acquisitions. There are also various private collections in different parts of the city.

The institutions of public charity are all consolidated in the Congregazione di Carità, under the Comunal Administration. There are twenty-seve public hospitals, the most important of which are: the Polyclinic, which is destined to absorb all the others; S. Spirito, to which is annexed the lunatic asylum and the foundling hospital; S. Salvatore, a hospital for women, in the Lateran; S. Giacomo; S. Filippo Neri to S. Antonio; the Gesuati; and the Sacro Cuore. There are also an institute for the blind, two clinics for diseases of the eye, twenty-five asylums for abandoned children, three lying-in hospitals, and numerous private clinics for paying patients. The great public promenades are the Gianicolo, adjoining the Villa Borghese and now known as the Rais, where a zoological garden has recently been installed, and the Janiculum. Several private parks or gardens,
as the Villa Pamphilii, are also accessible to the public every day.

The population of Rome in 1901 was 462,783. Of these 5000 were Protestants, 7000 Jews, 8200 of other religions and no religion. In the census now (1910) there was an increase of more than 100,000 inhabitants. Rome is now the largest city in Italy. Its large size and population make it a focal point for the arts, politics, and commerce of the country.

During the splendid reign of Tarquinius Superbus, Rome was the master of Latium as far as Circii and Signia. But, returning victorious from Ardea, the king found the gates of the city closed against him. Rome took to itself a republican form of government, and the two consulae, who were elected for only one year, were only in times of difficulty was a dictator elected, to wield unlimited power. In the expulsion of Tarquinus Superbus some historians have seen a revolt of the Latin element against Etruscan domination. Besides wars and treaties with the Latins and other peoples, the principal events, down to the burning of Rome by the Gauls, were the institution of the tribunes of the people (tribuni plebis), the establishment of the laws of the Twelve Tables, and the destruction of Veii. In 390 the Romans were defeated by the Gauls near the River Allia; a few days later the city was burned and set on fire on the Palatine Hill, a tufaceous ledge rising in the midst of marshy ground near the Tiber. That river, it may be observed here, was known to the primitive peoples by the name of Rmeo, “the River.” Thus is the traditional account of the origin of Rome substantially verified. At the same time, or very little later, a colony of Sabines was formed on the Quirinal and, on the Esquiline an Etruscan colony. Between the Palatine and the Quirinal rose the Capitoline, once covered by two sacred groves, afterwards occupied by the temple of Jupiter and the Rock. Within a small space, therefore, were settled the ancient guards of three distinct peoples of different characters; the Latins, shepherds; the Sabines, tillers of the soil; the Etruscans, already far advanced in civilization, and therefore in commerce and the industries. How these three villages became a city, with, first, the Latin influence preponderating, then the Sabine, then the Etruscan (the two Tarquins), is all enveloped in the obscurity of the history of the seven kings (753–509 B.C.). The same uncertainty prevails as to the conquests made at the expense of the surrounding peoples. It is unquestionable that all those conquests had to be made afresh after the expulsion of the kings.

But the social organisation of the new city during this period stands out clearly. There were three original tribes: the Ramnians (Latinas), the Titians (Sabines), and the Luceres (Etruscans). Each tribe was divided into ten curiae, each curia into ten gentes, each gens into ten (or thirty) families. Those who belonged to these, the most ancient, tribes were Patricians, and the chiefs of the three hundred gentes formed the Senate. In the course of time and the wars with surrounding peoples, new inhabitants occupied the remaining hills; thus, under Tullus Hostilius, the Cassian was assigned to the population of the razed Alba Longa (Albano); the Sabines, conquered by Ancus Martius, had the Aventine. Later on, the Viminal was occupied. The new inhabitants formed the Plebeians (Pele), and their civil rights were less than those of the older citizens. The internal history of Rome down to the Imperial Period is nothing but a struggle of plebeians against patricians for the acquisition of greater civil rights, and these struggles resulted in the civil, political, and juridical organisation of Rome. The king was high-priest, justice was administered by the Senate and the Comitia of the People were convened by him at his pleasure, and debated the measures proposed by him. Moreover, the kingly dignity was hereditary. Among the important public works in this earliest period were the drains, or sewers (cloacas), for draining the marshes around the Palatine, the work of the Etruscan Tarquinii Priscus; the city wall was built by Servius Tullius, who also organised the Plebeians, dividing them into thirty tribes; the Suburban Bridge was constructed to unite the Rome of that time with the Janiculum.

During the splendid reign of Tarquinius Superbus, Rome was the mistress of Latium as far as Circii and Signia. But, returning victorious from Ardea, the king found the gates of the city closed against him. Rome took to itself a republican form of government, and the two consulae, who were elected for only one year, were only in times of difficulty was a dictator elected, to wield unlimited power. In the expulsion of Tarquinus Superbus some historians have seen a revolt of the Latin element against Etruscan domination. Besides wars and treaties with the Latins and other peoples, the principal events, down to the burning of Rome by the Gauls, were the institution of the tribunes of the people (tribuni plebis), the establishment of the laws of the Twelve Tables, and the destruction of Veii. In 390 the Romans were defeated by the Gauls near the River Allia; a few days later the city was burned and set on fire on the Palatine Hill, a tufaceous ledge rising in the midst of marshy ground near the Tiber. That river, it may be observed here, was known to the primitive peoples by the name of Rmeo, “the River.” Thus is the traditional account of the origin of Rome substantially verified. At the same time, or very little later, a colony of Sabines was formed on the Quirinal, and, on the Esquiline an Etruscan colony. Between the Palatine and the Quirinal rose the Capitoline, once covered by two sacred groves, afterwards occupied by the temple of Jupiter and the Rock. Within a small space, therefore, were settled the ancient guards of three distinct peoples of different characters; the Latins, shepherds; the Sabines, tillers of the soil; the Etruscans, already far advanced in civilization, and therefore in commerce and the industries. How these three villages became a city, with, first, the Latin influence preponderating, then the Sabine, then the Etruscan (the two Tarquins), is all enveloped in the obscurity of the history of the seven kings (753–509 B.C.). The same uncertainty prevails as to the conquests made at the expense of the surrounding peoples. It is unquestionable that all those conquests had to be made afresh after the expulsion of the kings.

But the social organisation of the new city during this period stands out clearly. There were three original tribes: the Ramnians (Latinas), the Titians (Sabines), and the Luceres (Etruscans). Each tribe was divided into ten curiae, each curia into ten gentes, each gens into ten (or thirty) families. Those who belonged to these, the most ancient, tribes were Patricians, and the chiefs of the three hundred gentes formed the Senate. In the course of time and the wars with surrounding peoples, new inhabitants occupied the remaining hills; thus, under Tullus Hostilius, the Cassian was assigned to the population of the razed Alba Longa (Albano); the Sabines, conquered by Ancus Martius, had the Aventine. Later on, the Viminal was occupied. The new inhabitants formed the Plebeians (Pele), and their civil rights were less than those of the older citizens. The internal history of Rome down to the Imperial Period is nothing but a struggle of plebeians against patricians for the acquisition of greater civil rights, and these struggles resulted in the civil, political, and juridical organisation of Rome. The king was high-priest, justice was administered by the Senate and the Comitia of the People were convened by him at his pleasure, and debated the measures proposed by him. Moreover, the kingly dignity was hereditary. Among the important public works in this earliest period were the drains, or sewers (cloacas), for draining the marshes around the Palatine, the work of the Etruscan Tarquinii Priscus; the city wall was built by Servius Tullius, who also organised the Plebeians, dividing them into thirty tribes; the Suburban Bridge was constructed to unite the Rome of that time with the Janiculum.

During the splendid reign of Tarquinius Superbus, Rome was the mistress of Latium as far as Circii and Signia. But, returning victorious from Ardea, the king found the gates of the city closed against him. Rome took to itself a republican form of government, and the two consulae, who were elected for only one year, were only in times of difficulty was a dictator elected, to wield unlimited power. In the expulsion of Tarquinus Superbus some historians have seen a revolt of the Latin element against Etruscan domination. Besides wars and treaties with the Latins and other peoples, the principal events, down to the burning of Rome by the Gauls, were the institution of the tribunes of the people (tribuni plebis), the establishment of the laws of the Twelve Tables, and the destruction of Veii. In 390 the Romans were defeated by the Gauls near the River Allia; a few days later the city was burned and set on fire on the Palatine Hill, a tufaceous ledge rising in the midst of marshy ground near the Tiber. That river, it may be observed here, was known to the primitive peoples by the name of Rmeo, “the River.” Thus is the traditional account of the origin of Rome substantially verified. At the same time, or very little later, a colony of Sabines was formed on the Quirinal, and, on the Esquiline an Etruscan colony. Between the Palatine and the Quirinal rose the Capitoline, once covered by two sacred groves, afterwards occupied by the temple of Jupiter and the Rock. Within a small space, therefore, were settled the ancient guards of three distinct peoples of different characters; the Latins, shepherds; the Sabines, tillers of the soil; the Etruscans, already far advanced in civilization, and therefore in commerce and the industries. How these three villages became a city, with, first, the Latin influence preponderating, then the Sabine, then the Etruscan (the two Tarquins), is all enveloped in the obscurity of the history of the seven kings (753–509 B.C.). The same uncertainty prevails as to the conquests made at the expense of the surrounding peoples. It is unquestionable that all those conquests had to be made afresh after the expulsion of the kings.

But the social organisation of the new city during this period stands out clearly. There were three original tribes: the Ramnians (Latinas), the Titians (Sabines), and the Luceres (Etruscans). Each tribe was divided into ten curiae, each curia into ten gentes, each gens into ten (or thirty) families. Those who belonged to these, the most ancient, tribes were Patricians, and the chiefs of the three hundred gentes formed the Senate. In the course of time and the wars with surrounding peoples, new inhabitants occupied the remaining hills; thus, under Tullus Hostilius, the Cassian was assigned to the population of the razed Alba Longa (Albano); the Sabines, conquered by Ancus Martius, had the Aventine. Later on, the Viminal was occupied. The new inhabitants formed the Plebeians (Pele), and their civil rights were less than those of the older citizens. The internal history of Rome down to the Imperial Period is nothing but a struggle of plebeians against patricians for the acquisition of greater civil rights, and these struggles resulted in the civil, political, and juridical organisation of Rome. The king was high-priest, justice was administered by the Senate and the Comitia of the People were convened by him at his pleasure, and debated the measures proposed by him. Moreover, the kingly dignity was hereditary. Among the important public works in this earliest period were the drains, or sewers (cloacas), for draining the marshes around the Palatine, the work of the Etruscan Tarquinii Priscus; the city wall was built by Servius Tullius, who also organised the Plebeians, dividing them into thirty tribes; the Suburban Bridge was constructed to unite the Rome of that time with the Janiculum.
than delay the movement towards monarchy. Another triumvirate was soon formed by Antony, Lepidus, and Octavian; Antony and Octavian disagreed, and at Actium (32) the issue was decided in Octavian’s favour. Roman power had meanwhile been consolidated and extended in Spain, in Gaul, and even as far as Pannonia, in Pontus, in Palestine, and in Egypt, and the influence and authority of Rome was no longer the history of the City of Rome, although it was only under Caracalla (A. D. 211) that Roman citizenship was accorded to all free subjects of the empire.

In the midst of these political vicissitudes the city was growing and being beautified with temples and other buildings, public and private. On the Campus Martius and beyond the Tiber, at the foot of the Janiculan, new and populous quarters sprang up, with theatres (those of Pompey and of Marcellus) and circuses (the Maximus and the Flamininus, 221 B. C.). The centre of political life was the Forum, which had been the market before the centre of buying and selling was transferred, in 388, to the Campus Martius (Forum Holitorium), leaving the old Forum Romanum to the business of the State. Here were the temples of Concord (366), Saturn (487), the Dj Concilus, Curia Hostilia (54), the Basilica Julia (45), the Curia Hostilia (B. Adriano), the Rostra, etc. Scarcely had the empire been consolidated when Augustus turned his attention to the embellishment of Rome, and succeeding emperors followed his example: brick-built Rome became marble Rome. After the sixth decade B. C., many Hebrews had settled at Rome, in the Trastevere quarter and that of the Porta Capena, and soon they became a financial power. They were incessantly making proselytes, especially among the women of the upper classes. The names of thirteen synagogues are known as existing not at all on the Conzi time, but during the Imperial Period. Thus was the way prepared for the Gospel, whereby Rome, already mistress of the world, was to be given a new, sublimer and more lasting, title to that dominion—the dominion over the souls of all mankind.

Even on the Day of Pentecost, “Roman strangers” (adensa Romani, Acts, ii, 10) were present at Jerusalem, and they surely must have carried the good news to their fellow-citizens at Rome. Ancient tradition assigns to the year 42 the first coming of St. Peter to Rome, though, according to the pseudo-Clementine Epistles, St. Barnabas was the first to be received in the Eternal City. Under Claudius (A. D. 50), the name of Christ had become such an occasion of discord among the Hebrews of Rome that the emperor drove them all out of the city, though they were not long in returning. About ten years later Paul also arrived, a prisoner, and exercised a vigorous apostolate in the House of Judas. The Christians were numerous at that time, even at the imperial Court. The burning of the city—by order of Nero, who wished to effect a thorough renovation—was the pretext for the first official persecution of the Christian name. Moreover, it was very natural that persecution, which had been occasional, should in course of time have become general and systematic; hence it is unnecessary to transfer the date of the Apostles’ martyrdom from the year 67, assigned by tradition, to the year 64 (see Peter, Saint; Paul, Saint). Domitian’s reign brought a fresh threat from the Jews. The absolutism and from the Christians; among them some who were of very exalted rank—Titus Flavius Clemens, Acilius Glabrio (Cemetery of Priscilla), and Flavia Domitilla, a relative of the emperor. It must have been then, too, that St. John, according to a tradition of a very primitive character, was exiled. The reign of Trajan and Adrian was the culminating point of the arts at Rome. The Roman martyrdoms attributed to this period are, with the exception of St. Ignatius’, somewhat doubtful. At the same time the heads of various Gnostic sects settled at Rome, notably Valentinus, Cerdon, and Marcion; but it does not appear that they had any great following. Under Antoninus, Marcus Aurelius, and Commodus, several Roman martyrs are known—those of St. Lucius, St. Euphrase, and companions, and the Senator Apollonius. Under Commodus, thanks to Martia, his morganatic wife, the condition of the Christians improved. At the same time the schools of Rhodon, St. Justin, and others flourished. But three new heresies from the last brought serious trouble to the members of the Church: that of Theodotus, the shoemaker of Byzantium; that of Noetus, brought in by one Epigonus; and Montanism. In the struggle against these heresies, particularly the last-named, the priest Hippolytus, a disciple of St. Irenaeus, bore a distinguished part, but he, in his turn, incurred the censure of Popes Zephyrinus and Callistus, and became the leader of a schismatic party. But the controversies between Hippolytus and Callistus were not confined to theological questions, but also bore upon discipline, the pope thinking proper to introduce certain regulations. Emphasis in the school to Rome at this period was that of the Eclesiastes.

The persecution of Septimius Severus does not appear to have been very acute at Rome, where, before this time, many persons of rank—even of the imperial household—had been Christians. The long period of tranquillity, hardly interrupted by Maximinus (235–38), fostered the growth of Roman church organisation; so much so that, under Constantine, after the first fury of the Decian persecution, the city numbered about 50,000 Christians. The last-named persecution produced many Roman martyrs—Pope St. Sixtus, St. Peter, and many others; the problem of reconciling the latter resulted in the schism of Novatian. The persecution of Valerian, too, fell first upon the Church of Rome. Under Aurelian (271–75), the menace of an invasion of the Germans, who had already advanced as far as Pescaro, compelled the emperor to restore and extend the walls of Rome. The persecution of Dioecletian also had its victims in the city, although there are no trustworthy records of them; it did not last long, however, in the West. Maxentius went so far as to restore to the Christians their cemeteries and other landed property, and, if we are to believe Eusebius, ended by showing them honour, as a means of conciliation. At this period several pretentious buildings were erected—baths, a circus, a basilica, etc. In the fourth and fifth centuries the city began to be embellished with Christian buildings, and the moribund art of antiquity thus received a new accession of vitality. Of the heroes of this period, Arianism alone disturbed the religious peace for a brief space; even Pelagianism failed to take root. The conflict between triumphant Christianity and dying Paganism was more bitter. Symmachus, Prætextatus, and Neochius were the most zealous and most powerful defenders of the ancient religion. At Milan, St. Ambrose kept watch. By the end of the fourth century the deserted temples were becoming filled with cobwebs; pontiffs and vestals were demanding baptism. The statues of the gods served as public ornaments; precious objects were seldom plundered, and until the year 526 not the slightest opposition to the use of images was made in Christian worship. In 402 the necessity of once more arose of fortifying Rome. The capital of the world, which had never before been a hostile army since the days of Hannibal, in 408 withstood the double siege of Alaric. But the Senate, mainly at the urging of a pulchritudinous woman, brought to light the deposed Honorius, and enthroned a new emperor, Attilius. Two years later, Alaric returned, succeeded
In taking the city, and sacked it. It is false, however, that the destruction of Rome began then. Under Alaric, as in the Gothic war of the sixth century, only so much was destroyed as military exigencies rendered inevitable. The intervention of St. Leo the Great saved the Eternal City from the fury of Attila, by a treaty and payment of a ransom, the 456, sacking it without mercy for fifteen days: statues, gold, silver, bronze—whether the property of the State, or of the Church, or of private persons—were taken and shipped to Carthage.

Rome still called itself the capital of the empire, but since the second century it had seen the emperors only at rare and uncertain intervals. Italy preferred Ravenna as a residence. Theodoric, nevertheless, made provision for the outward magnificence of the city, preserving its monuments so far as was possible. Pope St. Agapetus and the learned Cassiodorus entertained the idea of creating at Rome a school of advanced Scripture studies, on the model of that which flourished at Edessa, but the Gothic invasion made shipwreck of this design. In that Titanic war Rome stood five sieges. In 536 Belisarius took it without striking a blow. Next year Vitiges besieged it, cutting the aqueducts, plundering the public buildings, even menacing the catacombs, but the city would not have been taken, had not the garrison of Hadrian's tomb defended themselves with fragments of statues and gods which they found in that monument. Soon after the departure of Pope Vigilius from Rome (November, 545), King Totila invested it and captured a fleet bearing supplies sent by Vigilius, who by that time had passed over to Sicily. In December, 546, the city was captured, through the treachery of the Isaurian soldiery, and once more sacked. Totila, obliged to set out for the south, forced the whole population to leave it and to leave it as it was left uninhabited; but they returned with Belisarius in 547. Two years later, another Isaurian treachery made Totila once more master of the city, which then for the last time saw the games of the circus. After the battle of Taginae (552), Rome opened its gates to Narsetes and became Byzantine. The ancient Senate and the Roman nobility were extinct. There was a breathing-space of sixteen years, and then the Lombards drew near to Rome, pillaging and destroying the neighbouring regions. St. Gregory the Great has described the lamentable condition of the city; the same saint did his best to restore it. The cathedral was desecrated by a violent assault on the Lateran made by Mauricius, the chartularius of the Exarch of Ravenna (560), by the exile of Pope St. Martin (563), and by the visit of the Emperor Constans I (863). The imprisonment of St. Sergius, which had been ordered by Justinian II, was prevented by the native troops of the Exarchate.

In the eighth century the Lombards, with Liutprand, were seized with the old idea of occupying all Italy, and Rome in particular. The popes, from Gregory II on, saved the city and Italy from Lombard domination by the power of their threats, until they were finally rescued by the aid of Pepin, when Rome and the peninsula came under Frankish domination. Provision was made for the material well-being of the city by repairs on the walls and the aqueducts, and by the establishment of agricultural colonies (coloniagae) for the labourers in the domains surrounding the city. But in Rome itself there were various factions—favouring either the Franks or the Lombards, or, later on, Frankish or Nationalist—and these factions often caused tumults, as, in particular, on the death of Paul I (767) and at the beginning of Leo III's pontificate (795), the村镇 of Charlemagne (799) Rome became finally detached from the Empire of the East. Though the pope was master of Rome, the power of the Sword was wielded by the imperial missi, and this arrangement came to be more clearly defined by the Constitution of Lothair (824). Thus the government was divided. In the ninth century the pope had to defend Rome and Central Italy against the Saracens. Concerning the papacy of Leo IV, the walls for the defence of the Basilica of St. Peter, and sacked in 846, and Joannopolis, for the defence of St. Paul's, were built by Gregory IV, Leo IV, and John VIII. The latter two and John X also gained splendid victories over these barbarians.

The decline of the Carolingian dynasty was not without its effects in Rome itself. The popes of this period, who in the Carolingian period had been given almost complete power over Rome, which became a mere lordship of the great feudal families, especially those of Theodora and Marosia. When Hugh of Provence wished to marry Marosia, so as to become master of Rome, his son Alberic rebelled against him, and was elected their chief by the Romans, with the title of Patriarch (Patriarchus) and Consul. The temporal power of the pope might then have come to an end, had not John, Alberic's son, united the two powers. But John's life and his conduct of the government necessitated the intervention of the Emperor Otto I (963), who instituted the office of promotor fidei, representing the temporal authority. (This office became hereditary in the Vico family.) Order did not reign for long: Crescentius, leader of the anti-papal party, deposed and murdered popes. It was only for a few brief intervals that Otto II (980) and Otto III (996–1002) were able to re-establish the imperial and pontifical authority. At the beginning of the eleventh century three popes of the family of the counts of Tuscum immediately succeeded each other, and the last of the three, Benedict IX, led a life so scandalous as made it necessary for Henry III to intervene (1046). The schism of Gregory in 1053 was the result of the same, the efforts of the Emperor Henry IV to exasperate party passions at Rome, and conspicuous in the struggle was another Crescentius, a member of the Imperialist Party. Robert Guiscard, called to the rescue by Gregory VII, sacked the city and burned a great part of it, with immense destruction of monuments and documents. The struggle was revived under Henry V, and Rome was repeatedly besieged by the imperial troops.

Then followed the schism of Pier Leone (Anacletus II), which had hardly been ended, in 1143, when Giorlamo di Pierleone, counselled by Arnold of Brescia, made Rome the capital of the Lombard communes, under the rule of fifty-six senators. In vain did Lucius II attack the Capitol, attempting to drive out the usurpers. The commune was in opposition no less to the imperial than to the papal authority. At first the popes thought to lean on the emperors, and thus Adrian IV induced Barbaressa to burn Arnolfo alive (1155). Still, just as in the preceding century, every coronation of an emperor was accompanied by quarrels and fights between the Romans and the imperial soldiery. In 1188 a modus vivendi was established between the commune and Clement III, the emperor being sovereign on the right of coinage, the senators and military captains being obliged to swear fealty to him. But the fiction did not cease. Innocent III (1203) was obliged to flee from Rome, but, on the other hand, the friendly disposition of the mercantile middle class turned him to him some influence in the affairs of the commune, in which he obtained the appointment of a chief of the Senate, known as "the senator" (1207). The Senate, therefore, was reduced to the status of the Communal Council of Rome; the senator was the syndic or mayor. But in the conflict between the popes, on the one hand, and, on the other, Frederick II and his heirs, the Senate was mostly Imperialist, cherishing some sort of...
desire for the ancient independence; at times, however, it was divided against itself (as in 1262, for Richard, brother of the King of England, against Manfred of Sicily). In 1263 Charles of Anjou, returning from the conquest of Naples, caused himself to be elected senator for life; but Urban IV obliged him to be content with a term of ten years. Nicholas III forbade that any foreign prince should be elected senator, and in 1278 he himself was elected. The elections are always subject to the pope's approval. However, these laws soon fell into desuetude. The absence of the popes from Rome had the most disastrous results for the city: Anarchy prevailed; the powerful families of Colonna, Savello, Orsini, Anguillara, and others lorded it with no one to gain their consent; the pope's vicars were either stupendously weak; the monuments crumbled of themselves or were destroyed; sheep and cows were penned in the Lateran Basilica; no new buildings arose, except the innumerable towers, or keeps, of which Brancacone degli Andalò, the senator (1259-56), caused more than a hundred to be built. The revival of art, so remarkable in the thirteenth century, was abruptly cut off. The mad enterprise of Cola di Rienzo only added to the general confusion. The population was reduced to about 17,000. The Schism of the West, with the wars of King Ladislaus (1406 and 1460), siege and sack of the city from the sea, the pope's return as quickly as it should. Noteworthy, however, is the understanding between Boniface IX and the Senate as to their respective rights (1393). This pope and Innocent VII also made provision for the restoration of the city.

With Martin V the renaissance of Rome began. Eugene IV again was driven out by the Romans, and Nicholas V had to punish the conspiracy of Stefano Porcarli; but the patronage of letters by the popes and the new spirit of humanism obliterated the memory of these longings for independence. Rome became the city of the arts and of letters, of luxury and of disinterest. The population, too, changed in character and dialect, which had before more nearly approached the Neapolitan, but now showed the influence of immigration from Tuscany, Umbria, and the Marches. The sack of 1527 was a judgment, and a manifest awakening of the hearts of the people, who felt that the Brothers of the Oratory of Divine Love (the nucleus of the Thiene Order) and, later, the Jesuits and St. Philip Neri devoted themselves. In the war between Paul IV and Philip II (1556), the Colonna for the last time displayed their imperial arms on the towers of their castle. In 1799 Rome was at peace under the popes, who vied with the cardinals in embellishing the city with churches, fountains, obelisks, palaces, statues, and paintings. Unfortunately, this work of restoration was accompanied by the destruction of ancient and, still more, medieval monuments. An attempt was also made to improve the general plan of Rome by straightening and widening the streets (Sixtus IV, Sixtus VI—the Corso, the Ripetta, the Babuino, Giulia, Paola, Sistina, and other streets). The artists who have successfully left their imprint on the city are Bramante, Michelangelo, Vignola, Giacomo della Porta, Fontana, Maderna, Bernini, Borromini, and, in the eighteenth century, Fuga. The most important popular risings of this period were those against Urban VIII, on account of the mischief done by the Barberini and against Cardinal Ciacchi, after the death of Pope Benedict XIII.

The pontificate of Pius VI, illustrious for its works of public utility, ended with the proclamation of the Republic of Rome (10 February, 1798) and the pope's exile. Pius VII was able to return, but after 1806 there was a French Government at Rome side by side with the papal, and in 1808 the city was incorpored in the empire. General Molià, indeed, desired well of Rome for the public works he caused to be executed (the Pincian), and the archaeological excavations, which were vigorously and systematically continued in the succeeding pontificates, especially that of Pius IX. Of the works of art carried away to Paris only a part were restored after the Congress of Vienna.

But the Revolutionary germ still remained planted at Rome, even though it gave no signs of activity either in 1820 or in 1830 and 1831. A few political murders were the only indication of the fire that smouldered beneath the ashes. The election of Pius IX, hailed as the Liberal pontiff, electrified all Rome. The pope saw his power slipping away; the destruction of Pellegrini's building on the Quirinal (26 November, 1848) counselled his flight to Gaeta. The Triumvirate was formed and, on 6 February, 1849, convoked the Constituent Assembly, which declared the papal power abolished. The mob abandoned itself to the massacre of defenceless priests, and the wrecking of churches and palaces. Oudinot's French troops restored the papal power (6 August, 1849), the pope retaining a few French regiments. Secret plotting went on, though at Rome none dared attempt anything (the Fausti trial). Only in 1867, when Garibaldi, the victor at Monteolate, reached the city, defeated at Palmanova, was the revolt that was to have burst out into a war while Enrico Cairoli was trying to enter the city; but the coup de main failed; the stores of arms and ammunition were discovered; the only serious occurrence was the explosion of a mine, which destroyed the Serriatori barracks in the Borgo. Not until 20 September, 1870, was Rome taken from the popes and made the actual capital of the Kingdom of Italy.

III. CHURCHES AND OTHER MONUMENTS.—The "Annuario Ecclesiastico" enumerates 335 public churches and oratories in Rome and its suburbs. Besides, there are the chapels of the seminaries, colleges, monasteries, and other institutions. Since 1870 many churches have been destroyed, but many new ones have arisen in the new quarters. The principal patriarchal basilicas are St. Peter's (the Vatican Basilica), St. John Lateran (the Basilica of the Gesù and St. Ignatius), and St. Mary Major (the Liberian Basilica). For the first time we refer to the three VATICAN; LATERAN. The Liberian Basilica dates from the fourth century; it was called the Basilica Sienini; in the fifth century, under Sixtus III, it was adorned with interesting mosaics of Biblical subjects; Eugenius III added the portico, and the mosaics of the triumphal arch were added by Alexius IV, restored and, to some extent, altered. On the sides are two chapels with cupolas: that of Sixtus V, containing the altar of the Blessed Sacrament and the tombs of Sixtus V and St. Pius V; the other, that of Paul V, with the Madama in St. Luke, which existed as early as the sixteenth century. Benedict XIV caused it to be restored by Fuga (1743), who designed the façade which now almost shuts out the view of the mosaics. Beneath the high altar, the baldacchino of which is supported by four porphyry columns, are the reliefs of St. Matthew and of the Holy Crib (hence the name, S. Maria ad presbiterium). Here are buried St. Jerome, Nicholas IV, Clement VIII, IX, X, and Pius V. (Also see SAINT PAUL-OUTSIDE-THE-WALLS.) Among the lesser basilicas is S. Croce in Gerusalemme (Basilica Sessoriana), founded, it is said, by St. Helena in the place called the Sessorium, restored by Sixtus II (1144) and by Paul IV. The choir and the tribune, is the fresco of Pinturicchio representing the Finding of the Cross, and here are preserved the relics of the Cross of Jesus Christ, the Title, one of the Thorns, the finger of St. Thomas, etc. The church is served by Cistercians, whose convent, however, has been converted into barracks. St.
Lawrence-Outside-the-Walls, another minor basilica, which stands in the Cemetery of S. Ciriaco, where the saint was buried, was built under Constantine and, next to that of the same name, the most frequented sanctuary in Rome at the end of the fourth century (see Prudentius's description). Pelagius II (578), Honorius III, and Pius IX made thorough repairs in this basilica, the last-named adding frescoes by Fracassini, representing the martyrdom of S. Lawrence. The frescoes are the work of the same hand as those in the thirteenth century. The high altar stands beneath a raised ambulatory, which is the simple tomb of Pius IX. The mosaics of the triumphal arch date from the time of Pelagius II. Near this basilica is the Cemetery of Rome, constructed in 1837, and surmounted by few in Italy for the sumptuousness of its monuments. Both the church and the cemetery are served by Capuchins.

St. Sebastian-Outside-the-Walls, near the cemetery ad catacumbas (see Catacumbas), built in the fourth or fifth century and altered in 1612, contains Giorgini's statue of the saint. The churches so far named are the "Seven Churches" usually visited by pilgrims and residents to gain the large indulgences attached to them.

S. Agnese fuori le Mura, near the catacombs of the same name, was built by Constantine, decorated by Pope Symmachus with mosaics, in which that pope's portrait is preserved (515), the altar is that of S. Agnese, by Cardinal Giuliano della Rovere (1479), and by Pius IX. It is served by Canons Regular of St. John Lateran. In one of the adjacent buildings Pius IX, in 1856, fell with the flooring of a room, but without suffering any injury. Not far off is S. Costanza, the mausoleum of Constantine's daughter, which was made into a church in 1256. S. Giorgio in Velabro, Cardinal Newman's diocesan title, takes its name from the ancient Velabrum, where it stands, and the fourth century; it has a fine tabernacle, but the church is much damaged by damp. S. Lorenzo in Damaso, built by Pope Damasus (370), was, in the time of Bramante, enclosed in the palace of the Cancellaria; it contains modern frescoes and the tombs of Annulliare Caleo and Pellegrino Rossi.

S. Maria ad Martyres (the Pantheon) is a grandiose circular building with a portico. It was built in 25 b.c. by Marcus Agrippa, and has been often restored; in 66 Constantine I covered the dome to be taken away; it contains the tombs of Raphael, Cardinal Consoli and Kings Victor Emmanuel II and Humbert I. S. Maria in Cosmedin, which stands on the foundations of a temple of Hercules and a granary, dates from the sixth century, but was a dwelling in the Middle Ages, the national church of the Scots; it received its present form (a cupola and a fanciful Campanile) from the architects Guerra and Borromini in the seventeenth century, and has two angels by Bernini. Before the Lady altar of this church took place the conversion of Verecunda Maria Alphonse Ratibonne. S. Angelo in Pescheria, built in the eighth century and restored in 1894, is occupied by the Clerics Regular Minor, who were transferred from S. Lorenzo in Lucina. S. Anastaso, on the Aventine, is a Romanesque building (1000), annexed to the international conference building, and is the residence of the abbot primate of their order.

Santi Apostoli, adjoining the generale of the Minor Conventuals, dates from the fifth century; it was restored by Martin V, with frescoes by Melozzo da Forli, remodelled in 1702 by Francesco Caetani, and contains the tombs of Cardinal Bessarion and Bessario. The convent is occupied by the headquarters of a military division. S. Bartolomeo all'Isoia, Friars Minor, stands on the site of the ancient temple of Asculapius, and was built by Otto III, in 1001, in honour of S. Adalbert. The relics of S. Bartholomew were brought there in 1647, in the presence of those of S. Paulinus of Nola being given in exchange. The church has been several times restored. S. Bernardo alle Terme, Cistercians, is a round church built in 1598, its foundations being laid in the caudarium of the baths (Italian term) of Domitian. S. Bonaventura, on the Paliano. Friars Minor, contains the tomb of S. Leonard of Port Maurice. S. Camillo, a very modern church, is the residence of the Camilliano Attendants of the Sick, and has a hospital connected with it. S. Carlo (Carlino) of the Spanish Trinitarians belongs to the Borromini. S. Carlo ai Catinari, Bernabites, formerly the site of a little church dedicated to S. Niccolo del Fuco. The decorations of the cupola are by Pietro da Cortona; there is a picture by Maratta and a statue of Judith by Le Brun. The Rosminiens have officiated in this church for some years past. S. Claudio dei Borgognoni is served by the Congregation.
of the Most Holy Sacrament; it has Exposition all the year around.

S. Clemente, the church of the Irish Dominicans (1643), and titular church of William Cardinal O'Connell, Archbishop of Boston, exists as early as the 12th century. It stands on the site of the old basilica of St. Cyril and martyr. It is characterized by the two ambons which project about half way down the nave and an atrium which is also the courtyard of the convent which stands in front of the basilica. The ambos date from John VIII (972); the altar and tabernacle, from Paschal II. V, the church was destroyed by fire in the conflagration kindled by Robert Guiscard (1084); its rebuilding was begun immediately, but the plan was adopted of raising somewhat the pavement of the old church, which was filled in with debris; the new church was also less spacious. At this period the mosaics of the apse were executed. In the chapel of St. Catherine are some frescoes attributed to Massoello (1428); in the chapel of the Blessed Sacrament, the tombs of cardinals Brusati and Roverella; in that of St. Cyril, who is buried in the basilica, modern frescoes. In 1888 the excavation of the old basilica was carried through the efforts of the Dominican priors, Mulhooyer. The frescoes, seventh to eleventh century, are important; in them may be distinguished the first indications of a new birth of Christian art, and particularly interesting are those relating to Sts. Cyril and Methodius. The original basilica was raised on foundations of the palaces of exarch of which, moreover, there was a spaelum, or grotto, of Mithras; it is probable that this building was St. Clement's patronal home. Santissima Concessione, Capuchini, near the Piazza Barberini, was built by the Capuchin Cardinal Barberini, twin brother of Urban VIII, a fine church; the chapel of Viterbo buried there. The church is noted for St. Michael by Guido Reni, a St. Francis by Domenichino, a St. Felix of Cantalice by Turchi, and other pictures by Sacchi and Pietro da Cortona. Beneath the church is the ossuary of the friars. Ss. Coemers and Damiani, Franciscan Tertiaries, is made up of two ancient buildings, the temples of Romulus, son of Maxentius, and of the Sacra Urbs, which were given to the Church by Theodoric and converted into a basilica by Felix IV (528), to whom are due the mosaics of the apse and the arch, retouched in the ninth and sixteenth centuries. Urban VIII (1634) caused the cavedis to be raised ten feet. In the crypt are the tomb of Felix II and some objects belonging to the old church.

St. Crisogono. Trinitarians, dates at least as far back as the fifth century, and was restored by Cardinal Scipione Borghese (1633). It has a fine tabernacle and, in the apse, mosaics by Cavallini (1290). Excavations have recently been made under this church, which is associated with English history as having been the titular church of Cardinal Langton (see Langton, Stephen). S. Cuore al Csfeto Pretorio, S. Maria del Popolo, built by Blessed Vincenzo was due to the seal of Pope Boniface. Connected with it is a boarding-school of arts and industries. S. Francesca Romana (S. Maria Nova), Olivetans, was erected by Leo IV in 1225 in place of S. Maria Antiqua, which was in danger of being injured by the ruins of the Palatine, on a portion of the ruined temple of Venus and Rome, where once stood a chapel commemorating the *all of Simon Magnus. It was restored by Honorius III and under Paul V. In the apse are mosaics of 1161; in the confession, the tomb of St. Frances of Rome (1440). There is a group by Mell, and St. Gregory XI (1574), Cardinal Vincenzo Carafa, and Francesco Ridolfi. S. Francesco a Ripa, the provincialate of the Friars Minor (1239), has pictures by the Cavalieri d'Arpino and by Sabatini (Annunciation), and the tomb of Ludovico Albertoni, one of Bernini's best works. S. Francesco di Paola belongs to the Minims, the convent being now occupied by a technical institute.

The Gesù, connected with the professed house and the general's residence of the Jesuits, is the work of Vignola (1569-73), completed by Bernini and del Bello, through the munificence of Cardinal Alessandro Farnese. It became the model of the style known as "Jesuit". Its altar of St. Ignatius, who is buried there, has a silver statue of the saint which is ordinarily covered by a picture painted by the Jesuit Pozzo; the globe and four columns are of lapis lazuli. Opposite is the tomb of St. Francis Xavier, where an arm of that saint is preserved, and a picture by Maratta. The ceiling is painted by Gaglii with the Triumph of the Name of Jesus. The Madonna della Strada is venerated in one of the chapels. In this church are the tombs of Cardinal Bellarmine and Ven. Giuseppe Maria Pignatelli. Gesù e Maria, Calced Augustinians, with its magnificent high altar, is in the Corto. S. Gioacchino, Redemptorists, was erected for the sacerdotal jubilee of Leo XIII, its side chapels being dedicated by the various nations. S. Giovanni Calabriti, on the Island of St. John, belongs to the Escorial, who have a hospital. Ss. Giovanni e Paolo, on the Celian, Passionists, was built by Pamphili in the house of these two saints, who were officials in the palace of Constantia, daughter of Constantine, and were slain by order of Julian. In 1184 the church was raised, and is now a national sanctuary preserved in the church of the Blessed Sacrament. The church of St. Paul of the Cross is modern. Under the church are still to be seen thirteen interstices of the house of the saints with other saints. This was the titular church of Edward Cardinal Howard, afterwards Cardinal-Bishop of Frascati; S. Gregorio al Celio, Camadese, was built by Gregory II in the paternal home of St. Gregory the Great, and was modernized by Borso (1633) and Ferrari (1734). It contains an altar of the saint, with his stone bed and his marble chair, and there is an ancient image of the Madonna. In the monks' garden there are also three chapels; those of St. Silvia, mother of St. Gregory, with her statue by Cordieri and frescoes by Guido Reni, of St. Andrew, decorated by Reni and Domenichino, and of St. Barbara, with a statue of St. Gregory by Cordieri. The little chapel opposite contains a sarcophagus brought by Henry Edward Cardinal Manning and Herbert Vaughan, Archbishops of Westminster.

S. Ignazio, Jesuits, was built in 1626 by Cardinal Ludovisi, under the direction of the Jesuit Grassi. The frescoes of the vault, representing the apotheosis of St. Ignatius, were painted by the Jesuit lay brother Pozzi, whose uncle was also of the pictures in the altars. Ss. Aloysius Gonzaga and John Berchmans, buried here, have splendid altars; in the adjoining Roman College (now the Ginnasio-Liceo and National Library) there are still other chapels with souvenirs of these two saints. On the highest point of the choir, a large work by Perti and Secchi caused to be executed a model with a ball which, by a mechanical contrivance, drops precisely at noon every day. S. Isidoro belongs to the Irish Franciscans. In the adjoining convent the famous Luke Wadding wrote his history of the Franciscan Order. S. Marcello, Servites, is believed to be the stable in which Pope St. Martinus was compelled to serve. It was restored in 1519 by order of Giuliano de' Medici (Clement VII), completed in 1708 by Carlo Fontana, and contains paintings by Pierin del Vaga and Ferdinando Zucaro. It was the titular church of Thomas Cardinal Weld (see Yrto, Ferrr or). S. Maria d'Agrò, which stands on the Campidoglio, once the general's residence of the Franciscans (beginning from 1250), is (1911) the titular church of Cardinal Falconio. It stands on the site of the ancient citadel of Rome and the temple of Juno.
Monets, and is approached by a flight of 124 steps. The façade is still of brick, and the church contains antiq... in the seventh and fourteenth centuries. The Buffalini Chapel are frescoes (Life of St. Bernardino) by Pinturicchio, and on the high altar is a Madonna attributed to St. Luke, where was formerly the Madonna of Foligno. To the left a small building, known as the Cappella Santa di Sant’Elena (Holy Chapel of St. Helena), marks the spot where, according to the legend which can be traced to the fifth century, the Emperor Augustus saw the Blessed Virgin upon an altar of heaven (Lat. ara coeli). To this legend something was contributed by Virgil’s fourth eclogue, in which he speaks of the “nova progenies” descending from heaven, and which was interpreted in Christian antitype of the prophetic events (thus Constantine in the sermon “Ad sanctorum oecum”). In the sacristy is venerated the “Santo Bambino,” a little figure of olive wood from the Mount of Olives (sixteenth century) for which the Romans have a great devotion. The sepulchral monuments of this church are numerous and important, including those of Cardinal Louis d’Albert, with figures of St. Michael and St. Francis; Michelangelo Marchese di Saluzzo, by Dosio; Pietro de’ Vincenti, by Sansovino; Honorius IV and others of the Savelli family in the Savelli chapel, which dates from the fourteenth and fourteenth centuries. Matthew of Aquasparta; Catherine, Queen of Bosnia (1478). The Crib, built every year in the second chapel on the left, is famous; at Christmas and Epiphany children recite dialogues and little discourses near it.

S. Maria in Traspontina, in the Borgo, Calced Carmelites, was erected by Sixtus IV on the site of a church that had been built there, in 1099, to drive away the demons which haunted the ashes of Nero. The architect was Meo del Ceprina; Bramante and Bernini modified the building. It is one of the most beautiful monuments of the Renaissance, its cupola being the first of its kind built in Rome. It contains paintings by Pinturicchio—the Adoration of the Shepherds, all the paintings of the Lady Chapel and the chapel of St. Augustine, the frescoes of the vault, etc.—Raphael designed the mosaics of the Chigi chapel by the painter Raphael and Sebastian da Piombo (the Birth of the Blessed Virgin). The sepulchral monuments are costly, including those of Giovanni della Rovere, Cardinal Coste, Cardinal Podocatharo, Cardinal Girolamo Base, by Sansovino, and Cardinal Sforza, by the same artist. Also Agostino Chigi, Prince of Aquino and a picture after suggestions, and decorated, by Raphael, and Cardinal Pallavicino. The painted windows, the most beautiful in Rome, are by Guillaume de Marcillot (1800). S. Maria del Priorato, Knights of Malta, on the Aventine, was built in 939, when Alberic II gave his palace to St. Odo of Cluny. The present form of the church, however, is due to Piranesi (1765). Some of the tombs of the grand masters of the Order of Malta—Caraffa, Caracciolo, and others—are interesting. The adjoining residence commands a splendid panorama. S. Maria del Rosario, on Monte Mario, belongs to the Dominicans. S. Maria della Scala, Discaled Carmelites, built by Francesco da Volterra, is so called from an image of the Madonna found under the stairs of a neighbouring house, and contains paintings by Saraceni and Gerhard von Honthorst. In the adjoining convent, a great part of which is occupied by the Guardia di Polizia, the Carafes, who make the “Acqua della Scala.” S. Maria della Vittoria, Carmelites, was erected by Paul V in memory of the victory of the Imperialists over the Protestants at Prague (1623), and contains pictures by Domenichino, Guercino, and Serra (1684), also a famous group by Bernini, of St. Teresa transfigured by an angel, and Turkish standards captured at the siege of Vienna (1683). S. Maria in Aquiro, the ancient diaconate, was converted into a church in 1590. It was formerly an asylum for the destitute; Clement VIII gave it to the Somaschi Brothers, who still have an orphanage there under the supervision of the municipality. S. Maria in Campitelli was built in 1665 to receive the image of S. Maria in Portica (Galla Placidia) in the place of Rome’s deliverance from the plague (1556). It contains a picture of St. Anne, by Luca Giordano, and the tomb of Cardinal Pacca. It is served by the Clerics Regular of the Mother of God.

S. Maria in Vallicella (the Chiesa Nuova, or “New Church”), Oratorians of St. Philip Neri, is associated with the spiritual establishment of St. Philip, who founded it. The frescoes of the vaulting and of the cupola are by Pietro da Cortona, the three pictures of the high altar by Rubens, and others by Scipione Gaetano, Cavaliere d’Arpino, Maratta, Guido Reni (St. Philip), Roncalli, and Barocci. The chapel of the saint is rich in votive offerings; in the adjoining house, until now almost entirely occupied by the Assize Court, is his cell, with relics and souvenirs of him. The library (Vallicelliana) now belongs to the State. S. Maria in Via Lata, Servites, is a fine church of the late Renaissance (1549). St. Philip’s infirmary, a scholas, Sick (formerly their generalate), is now occupied by the elementary communal schools. Here the cell of St. Camillus of Lellis is preserved, with the crucifix which encouraged him to found his order. S. Maria Sopra Minerva, the only authentic Gothic church in Rome, belongs to the Dominicans, who had their general staff and their higher schools in the adjoining convent, now the Ministry of Instruction, as well as the Casanatense Library, now in the hands of the State. This was the titular church of the Cardinal of New York (see Howard, Thomas Printz), Cardinal McCluskey, Archbishop of New York, and Cardinal Tschereau, Archbishop of Quebec (see McCluskey John; Tschereau, Eliezer Alexandre); its title is now (1911) held by Cardinal Farley, Archbishop of New York. The church stands on the ruins of a temple of Minerva, one of those built by Phocas in the middle of the third century, was a Greek monastery here. In 1280 Fra Sisto and Fra Ristoro, Dominicans, began the new church by order of Nicholas III, and with the aid of the Caetani, Savelli, and Orsini. It was completed in 1453. The pillars of the nave are clustered columns; the transept is rectangular. In the high altar Beneath the high altar rests the body of St. Catherine of Siena. The chapel of the Annunziata has a confraternity, founded by Cardinal Torquemada, which every year distributes dowries to 400 poor young women, and there is a picture by Antonio Rossano dealing with the subject. The Carafa family chapel of St. Thomas contains frescoes by Filippo Lippi (1487–93); that of St. Dominic, pictures by Maratta; of the Rosary, by Venusti. There are also paintings by Baronio and others. The statue of the Risen Christ is by Michelangelo. Here, also, are the tombs of Giovanni Alberini (1490), Urban VII, by Buonvicino, the Aldobrandini family, by Giacomo della Porta, Paul IV, by Sigismondo Coci, and Giovanni di Cosma (1296), Cardinal Domenico Capranica (1458), Clement V and Leo X, by Baccio Bandinelli, Blessed Angelico of Ferrara, with an epitaph by Nicholas V, and Cardinal Schönberg (1837).

S. Martino ai Monti, Carmelites, probably dates from the time of Constantine, when the priest Equitus built an oratory on his own land. Symmachus rebuilt it, dedicating it to St. Silvester and St. Martin of Tours, and then again to S. Maria Maggiore. In 1559 it was given to the Carmelites, who
in 1650 remodelled it. It is notable for its landscapes by Poussin. Under the more modern church is the old church of St. Silvester, with remains of mosaics, frescoes, and fragments of the portico of the Roman church, (formerly S. Giacomo degli Spagnuoli), in the Piazza Navona, belongs to the Missionaries of the Sacred Heart, who have an apostolic school there. S. Onofrio on the Janiculum, Hieronymites, was built in 1439 by the de Cupia family and Niccolò da Forca Paleina. The frescoes of the portico of the momento-chino, three scenes from the life of St. Jerome; within are frescoes by Baldassarre Peruzzi, and the tombs of Cardinal Mezzofanti and the poet Tasso, who died in the convent, where his cell contains a small museum of objects that belonged to him. S. Pancrazio fuori le mura, recently restored, is in the Lateran district, and contains a mosaic of three saints (504) near the Cemetery Calepodii; in 1849 it was wrecked by the Garibaldians; the government caused it to be freshly decorated. Near S. Pancrazio degli Scolti is the generale of the Friars (Scolti). S. Paolo alle Tre Fontane belongs to the Trappists, who have put the surrounding land under cultivation. The abbey contains three churches. The oldest, SS. Vincenzo e Anastasio, founded by Honorius I, came into the hands of Greek monks; Innocent II restored and assigned it, with the abbey, to the Cistercians. There is a fine cloister adjacent to this church, the entrance of which is in the yard. S. Maria in Cosmedin, of the ninth century, was rebuilt in 1560 by Giacoma della Porta, and contains a mosaic by Francesco Zucca. S. Paolo alle Tre Fontane was built by the same Giacoma della Porta (1569) on the three springs which appeared, as the legend says, on the three places successively touched by the head of St. Paul, who was beheaded here. The springs, however, existed before St. Paul's martyrdom as the Ague Salvi, and in 1689 some ancient mosaic pavements were dug up here. S. Pietro in Montorio, Friars Minor, was in earlier days known as S. Maria in Castro Aureo, and had connected with it a monastery which passed into the hands of various orders until in 1472, it was given to the Franciscans for the training of subjects for the foreign missions. Ferdinand the Catholic had the church and convent rebuilt, and they were dedicated to St. Peter, following a bequest and an executation by the bequest of what unfortunate conjecture hazarded by Maffeo Vegio, and which is even yet keenly debated. The rose-window of the façade is very fine, and there are frescoes and other paintings by Sebastiano del Piombo (the Flagellation), Vasari, Daniele da Volterra, and others. The tomb of the Emperor Hadrian (65-117) and Raphael's Transfiguration is on the high altar, and there is a beautiful balustrade. Here, too, are the tombs of Cardinals Fabiano and Antonio del Monte (Ammanati), and of Giuliano, Archbishop of Ragusa (Dosio). In the courtyard of the convent, on the spot where St. Peter is supposed by some to have been crucified, stands Bramante's tempietto, the most graceful work of that genius. A splendid view of Rome may be had from the piazza in front of the church. It was the titular church of Paul Cardinal Cullen, Archbishop of Dublin.

S. Pietro in Vincoli, Canons Regular of St. John Lateran, existed as the titulus Apostolorum as early as 431. Sixtus III made alterations in the church with funds given him by the Empress Eudoxia, who also presented the Jerusalem chain of St. Peter together with his Roman chain. These relics had been stolen for many ages in which it contains the inscription Salve, and a title, a vinculis S. Petri, occurs for the first time only in 530. Filings from the chains were given as relics—like those taken to Spoleto by Bishop Achilles in 419. The chains themselves are kept in a precious reliquary attributed to Pollaiuolo. The church was restored by Sixtus IV and Julius II. Its twenty monolithic columns are antique, and it contains pictures by Guerino and Domenichino (The Deliverance of St. Peter), a mosaic (St. Sebastian) of about the year 690, and the tombs of Julius II and the electors, of Rome and of Cardinal Nicholas of Cusa, with a portrait in relief. In the adjoining monastery the scuola di applicazione di l'Engiineering is established. S. Prassede, Vallombrosans, was built by Paschal II (822) at some distance from the original S. Prassede, which then in ruins, was restored by Honorius II, and by St. Charles Borromeo. Its twenty-two antique columns are still standing, and there are interesting mosaics of the ninth century (the chapel of St. Zeno and the apec) and the thirteenth century (the crypt). In the crypt are antique sarcophagi with the relics of St. Praxedis, Pudentiana, and others, and Paschal placed the bones of Zeno (7) martyr, brought from the catacombs, to be laid in an enclosed cemetery. There are pictures by Giulio Romano, Federico Zuccaro, and the Cavaliere d'Arpino. Santi Quaranta in Trastevere belongs to the Spanish Franciscans. Santi Quattro Coronati, Capuchins, was the titulus S. Michaelis as early as the fourth century, and is dedicated to four soldiers (cornicularii) who were martyred on the Via Labicana, with whom were afterwards associated five martyrs, stoncutters of Pannonia. Honorius built a vast basilica, which, however, Paschal II reduced to the proportions of what has been the nave since that time. The old basilica in the two atra and, in the church, frescoes by Giovanni Manassi and a ciborium by Capponi (1493). Annexed to this church is the chapel of the Corporation of Stoncutters, with pictures of the sixteenth century. The Augustinian Sisters have a refuge for young women adjoining the church. S. Sabina all'Aventino, Dominicans, built under Clement I by the Illyrian priest Petrus (424), is remarkable for a half-door decorated with wood-carving of the fifth century, while its columns of Parian marble were taken from the temple of Diana on the Aventine. In the apse and above the door are mosaics, and the picture by Sassoferrato (the Madonna of the Rosary) is famous. In the adjoining convent, formerly the Savelli palace, are shown the cells of St. Dominic and St. Pius V.

S. Sallustio della Scuola Santi, Passionists, contains, according to the legend, the tombs of Pilate's praetorium, which were bathed with the Blood of Christ, but of which there is no mention earlier than 845. By these stairs, which were restored by Nicholas III and by Coemus II, pilgrims ascend on their knees (pinocchioni) to the Cappella Santa Scenatorum, in which the most famous relics of St. Peter and of the Lateran are preserved (see SCALA SANTA). There is a ninth-century mosaic picture and a very ancient picture of the Saviour, on cedwood, believed to have been made not by human hands. S. Silvestro in Capite, Pallotti (see PIOUS SOCIETY OR MISSIONS), built by Paul I (761) in his paternal home, was given to some Greek monks and subsequently passed into the possession of various orders. It was restored by Domenico de Rossi in 1681, and has a high altar by Rinaldo. This is, in a sense, the national church of the English Catholics. Its monastery has now become the Postal Department. S. Stefano degli Abissini, Trinitarians, with an interesting doorway, was erected by St. Leo the Great, and was one of the churches surrounding the Basilica of St. Peter's. S. Stefano del Cacco, Sylvestrines, was erected by Honorius I (630) on the ruins of the temple of Isis, in the same district in which it contains the title ECO. In the same district of the generale of the Discalced Carmelites, in the Lombard style, is one of the recently erected churches (1900). Santiissima Trinità in via Condotti, Dominicans of the Philippines Province, was erected in the sixteenth century, and has fine pictures on its altars. Santiissima Trinità in via della Missione belongs to the Lazarists, who have a house of retreat.
for the clergy there. S. Venanzio, Minor Conventuals, is at the foot of the Capitol. Santi Vincenzo ed Agnese, in the Piazza di Trevi, ministers of the sick, was built by Cardinal Masari (1650). Here are kept the urns containing the viscera of deceased popes.

Other notable churches are the following: S. Agata dei Goti, or in Suburra, built in 460 for the Arians (Goths and other Germans), by Ricimerus, who caused a mosaic to be made there (destroyed in 1533), and who was buried outside it. In 1691 St. Gregory the Great dedicated it to Catholic worship, and it is connected with the Irish College. In it is the tomb of John Lascaris, the famous Greek humanist (1535).

S. Agnese al Circo Massimo stands on a part of the site of Domitian’s stadium, where St. Agnes was exposed to shame (the victim of the church), and where she was put to death. The older church is not mentioned in any records earlier than the ninth century; the present one, in baroque style, is the work of Carlo Rinaldi (1832); its turrets are by Borromini. On the high altar is a tabernacle of 1123; there is an erroneously attributed fresco which was painted by Paolo Campi and a monument of Innocent X. S. Alessio sull’Aventino was originally dedicated to the Roman martyr Boniface. S. Anastasia, at the foot of the Palatine, built in the fourth century and modernized in 1721, contains the tomb of Cardinal Angelo Maffei; this mosaic was painted by Rusca and used by St. Jerome. S. Apollinare, the church of the Roman Seminary, formerly of the German College, was restored by Benedict XIV and contains a picture of the school of Perugino. S. Balbina, on the Aventine, consecrated by St. Gregory the Great, has a house of correction for boys now encircled by it. It was the titular church of Cardinal Kemp, Archbishop of Canterbury (see Kemp, John). S. Benedetto in Piscinula (Trastevere) stands on the site of the mansion of the Ancii, St. Benedict’s family, and contains a picture of the saint. S. Caterina dei Funari, on the ruins of the Circus Flaminius, was begun in 1549. Its façade is by Gismondo della Porta, and it contains pictures by Caracci, Federico Zuccari, and others. Connected with it is a refuge for penitent women founded by St. Ignatius.

S. Cecilia, a very ancient church, stands on the site of a later house, Paschal I. St. Terezia was restored and transferred the body of the saint thither from the Catacombe (821). Cardinal Rampolla had its ancient character partly restored. In the apace are some mosaics dating from Paschal. The tabernacle of the high altar is by Arnoldo di Cambio (1163); there are some ancient frescoes and some by Pietro Cavallini; in the confessio is a recumbent statue of the saint by Maderno, showing her as she was found when the sarcophagus was opened in 1699; also the tomb of the English cardinal, Adam of Hertford (d. 1398). It was the titular church of Cardinal Wolley. S. Cosimo, on the Appian Way, erroneously ascribed to Paschal, has in the confessio a mosaic of S. Maria del Popolo. In the adjoining monastery, originally Benedictine and then Clarissan (1234), is a fine cloister with coupled columns (twelfth century). This monastery is now used as a home for old women. Santi Domenico e Sisto, Dominican Sisters, in the sixteenth century, was restored in 1640, with a fine façade. S. Eligio dei Ferrari contains a fine picture by Sermoneta; S. Eustachio, frescoes by Mengs. S. Eustachio is an ancient diaconate and possesses the relics of the saint. S. Giacomo in Augusta, in the Corso, is connected with the hospital for incurables (1338). S. Giovanni dei Fiorentini is the work of Sansovino (1521) and contains a picture by Salvator Rosa. S. Girolamo dei Scaligoni was built by Sixtus IV. S. Dalmatia, in the Dalmatians, where the Turks had fled from the Turks; Sixtus V restored it; it contains fine frescoes by Gagliardi (1583). S. Giuseppe a Capo le Case, with its paintings by Andrea Sacchi (St. Teresa) and Domenichino (St. Joseph), has a convent of the Carmelite Sisters which is now used as a museum of the Sacred Art. S. Giuseppe dei Paleognami is built upon the ancient Tullian Dungeon, where, according to tradition, St. Peter was imprisoned.

S. Lorenzo in Lucina preserves the gridiron on which St. Lawrence suffered martyrdom. It is believed that here was the house of the matron, Lucina, so often mentioned in the Acts of Roman martyrs; this house was transformed by Sixtus III into a basilica which was repeatedly restored. It has a fine campanile, a picture by Guido Reni (The Crucifixion), and the tomb of Pouscin. S. Lorenzo in Lucina was built by St. Sixtus III; it was restored in the Forum. In S. Lorenzo in Fonte, it is believed, was the saint’s prison. S. Marco, enclosed within the Palazzo di Venezius, is attributed to the pope of that name (336). The Rogation procession (25 April), instituted by St. Leo the Great, used to set free the prisoners in S. Marco; it was restored in the ninth century, in the fifteenth century, and by Cardinal Quirini in 1727. In the tribune are mosaics of the time of Gregory IV; there are also pictures by Palma il Giovane and Melosso da Forli; two ciboria, in the sacristy, one of the twelfth century, the other by Gino da Fiesole; the tombs of Pessaro, by Canova, and of Cardinal Gregorio Barbarigo. S. Maria degli Angeli was built by Michelangelo, at the command of Pius IV, within the baths of Diocletian. The church was given to the Carthusians. Here are to be seen many of the original designs for the mosaics now in St. Peter’s; also Houdon’s famous statue of St. Bruno, and the tombs of Pius IV and Cardinal Serbelloni. The adjoining monastery now contains the Museo Nazionale delle Terme.

S. Maria della Pace, the titular church of Michael Cardinal Logue, Archbishop of Armagh, commemorates the peace concluded in 1455 by Pius II at Florence, Milan, and Naples. It was built for Sixtus IV by Pietro da Cortona, who added a beautiful semicircular portico in front. In the Chiigi chapel are the famous Sibyl of Raphael; there are also frescoes by Peruzzi. The adjoining monastery (Canons Regular of the Lateran) contains a courtyard by Bramante and the chapel of the St. Paul’s Association of the Clergy of Rome. S. Maria in Campo Marzio belongs to the Benedictine Sisters. S. Maria di Loreto, an octagonal church with a cupola, is the work of Antonio da Sangallo the Younger (1507), and has a statue of St. Susanna by Dughentov. The churches of S. Maria de’ Miracoli and S. Maria di Monte Santo were built in 1662 by Cardinal Gastaldo, and form the termination of three streets—the Ripetta, the Corso Umberto, and the Babuino—which lead from the Piazza del Popolo. S. Maria dell’Orto (1490) is the fruit-vendors’ church. S. Maria in Trastevere, in the Piazza di Trevi, has a beautiful façade of the fifteenth century. S. Maria in Lati, a very ancient diaconate, stood near the Arch of Diocletian, but was destroyed in 1485; its present subterranean form is due to Pietro da Cortona. Here, according to the legend, St. Paul was imprisoned, and the remains of the Sepulcher and of the ancient basilica, with some frescoes. Santi Martina e Luca, in the Forum, occupies the site of the Secretarium Senatus; it existed before the seventh century and contained the body of St. Martin the Roman martyr; in 1640 the new
church was built above the old by Pietro da Cortona (who made a statue of St. Martin), and was dedicated to St. Luke, being the church of the Academy of St. Luke. It is said that a violet or Amaranth was a very ancient church, contains mosaics of the time of Leo III and an ambon of the thirteenth century. S. Nicola in Carcere stands on the ruins of the three temples of Petras, Juno Sospita, and S. Sulpicia Nome di Maria, in Trajan's Forum, was built to commemorate the victory of the Turks (1683). One Church of SS. Pietro e Marcellino stands in the Via Merulana; the other is outside the walls, on the Labicana, near the mausoleum of St. Helena. S. Prisco, on the Aventine, occupies the site of the temple of Diana Napoletana. The legend has it that Prisco was the wife of Agrippa, mother of the Acts of the Apostles as entertaining St. Peter, lived here.

S. Pudenziana, again, is associated with memories of St. Peter: it was the mansion of the senator, Pudentus, whose daughters, Pudentiana and Praxedes, gave it to St. Peter, and from that time it became a church. Since the time of Sixtus (384) it has had the form of a basilica, and its apse has been adorned with the most beautiful mosaics in Rome. It was restored in 1598, and a cupola was added with frescoes by Roncalli. At the beginning of the 12th century, the work was taken by the Church of St. Peter for the celebration of the Eucharist. There is a marble group of Christ giving the keys to St. Peter, by Giambo and della Porta. The title of S. Pudenziana was born by Nicholas Cardinal Wiseman, first Archbishop of Westminster, to Salvatore, on the Aventine, existed in the time of St. Gregory, whose mother retired to a spot near by. To her were dedicated some ancient frescoes recently brought to light. That it was even then the abode of monks is indicated by the name cella and by an ancient burial-place of an earlier date (c. 840). Here a community of Greek monks was installed until the ninth century. After that it passed to the Benedictines, and then to the German College, which still possesses it. S. Salvatore in Lauro, the church of the Scalabrini of the Piceni, earlier than the thirteenth century, was restored in 1450 and in 1599. It has a fine cloister and the tombs of Malaguzzi and had of Eugene IV (tomb made by St. Peter's), the work of Isaula da Pisa. S. Sisto Vecchio, earlier than the sixth century, has a fine campanile and frescoes of the fifteenth century. Here was the first house of the Dominicans in Rome. The title of S. Maria in Sessa borne by Cardinal Langham, Archbishop of Canterbury (1472-1521), S. Spirito in Sassia is so called because in this quarter (the Borgo) an Anglo-Saxon colony, led by King Ina, was established, with a church called S. Maria in Sessa. In 1291 Innocent III built a hospital and founding institute which was entrusted to the Hospitallers of the Holy Ghost. Sixtus IV removed it to a hospital, and Paul III had the present church built by Antonio da Sangallo il Giovane (1544); but the campanile dates from Callisti III. The residence of the superior (Palazzo del Commendatore dello Spedale) is adjacent to the church, but about half of it has been pulled down for the construction of the Victor Emmanuel Bridge. S. Stefano Rotondo, built by Pope Simplicius on the foundations of an ancient building consisting of three concentric circles divided by two rings of twenty columns in all, is decorated with frescoes by Pomarancio and Tintoretto. It was built in 1603. S. Beato, Archbishop of St. Andrews (see BRATON, David), and now belongs to the German College. S. Susanna, dedicated to the Roman martyr of that name, dates back to the fourth century. In its restoration by Maderano (1600) the mosaics of 796 persons, and it was decorated with frescoes by Corelli. It was the titular church of Cardinal Moro, Arch-

bishops of Sydney. S. Teodoro, at the foot of the Palatine, contains a circular structure, an ancient church. Under Adrian I, S. Anastasia Trinità dei Monti was said to have been built through the munificence of Charles VIII of France. Its great flight of stairs, starting from the Piazza di Spagna, was built by order of Louis XIV. It contains fine pictures of the school of Piranesi, also by Raphael, Piero del Vaglio, etc. Daniel de Volterres (1596) signed the frescoes. The church belongs to the Ladies of the Sacred Heart who have an institution (1827) in the chapel of which is venerated the Ter Admirabilis (Thrice Admirable) Madonna. Of the churches outside the City special mention should be made of the sanctuary of the Madonna del Divino del Distretto delle Terme near the Via Ardeatina, near an old castle of the Orsini, which is visited by a great concourse of people on Whit-Monday.

National Churches.—S. Antonio (Portuguese); S. Luigi (French—1496); S. Maria dell' Anima (German), with a hospice for pilgrims founded in 1399; the present church was built in 1500; pictures by Sarcenic, Seitz, and Giulio Romano (high altar); tombs of Adrian VI and Duke Charles Frederick of Cleves by Lucas Holstenius (see ROYAL COLLEGES); S. Maria della Pieta, venerated for the time of Charlemagne; S. Maria di Monsecco (Spanish). Also the churches of various cities—Florence, Naples, Siena, Venice, Bergamo, Bologna, the Marches—of Italy.—Churches of the Oriental rites.—Besides the churches of various colleges (see ROYAL COLLEGES), the following should be mentioned: the Armenian Church of St. Mary of Egypt, occupying the site of the ancient temple of Fortuna Virilia; the Greek-Melchite Basilian Church of S. Maria in Domincia (mosaic of the eighth century); S. Lorenzo al Monte, for Greek-Ruthenian Uniates. Moreover, there are eight Protestant churches intended for propaganda work, each having one or two halls, known as sale cristiane, connected with it, while five others are principally for the benefit of foreigners, and the Germans have decided to build one more. The Orthodox Russians, too, have a church, where the Bishop of Kronstadt officiates. The Hebrews have a chief private oratory, besides a school of religious learning and various benevolent organizations.

Non-religious Buildings.—The Palace of the Cancelleria, by Bramante; the Curia of Innocent X, now occupied by the Italian Parliament; the Quirinal Palace; the king's residence (1873) and enlarged by Paul V and Pius VI, where the popes formerly resided, and the conclaves were held; the Palazzo di Giustizia, built by Calderari entirely of travertine; the Bank of Italy (Koch) and the Palazzo Buonompaige, the residence of the queen-mother; the Palazzo Braschi, of the Ministry of Internal Affairs, Palazzi Capitolini (Michelangelo), Palazzo del Consulta (Ministry of Foreign Affairs), Villa Medici (French Academy), Palazzo Venezia (Austrian Embassy), built by Paul II, Palazzo Corinoni (Academia dei Lincei), Palazzo Farnese (Michelangelo), now the property of France and occupied by the French Embassy. Among the private palaces are the Altieri (Clement X), Barberini (Borromini), Borghese (Paul V), Caetani (Ammannati), Pamfili, Esedra, Giraud (Bramante—now belonging to the Torlonia family), Massimo, Odescalchi, Pamphilj (Sangallo), with a semi-circular colonnade behind it. The principal fountains are: the Aquae Paols, on the
Janiculum (Paul V); the Piazza S. Pietro fountain, the Tartaruga (Raphael), the Fontana del Tritone (Bernini), and, most magnificent of all, the Trevi (Clement XII, Nicolà Salvi).

Principal ancient Edifices and Monuments.—The Flavian Amphitheatre, or Colosseum, begun by Vespasian. Much of its material, particularly on the south side, has been piloted, the destructive practice having been effectively stopped only in the eighteenth century. The Arch of Constantine was erected in 312 to commemorate the victory over Maxentius, the decorations being, in part, taken from the Arch of Trajan. That of Marcus Aurelius, on the Flaminian Way, (Corienne), by Alexander V, its decorations are preserved in the Capitol. That of Septimius Severus (203) is richly decorated with statues and bas-reliefs; that of Titus, commemorating his victory over the Jews, has the celebrated bas-relief representing objects taken from the Temple of Jerusalem; that of Drusus (Trajan?) is near the Porta S. Sebastiano. The Arch of Dolabella (A. p. 10) is surmounted by three conoids taken from a branch of the Aqua Claudia. The Arch of Gallienus dates from A. p. 262. The secular basilicas are the Æmilian, or Fulvian (167 b. c.), the Julian (54 b. c.), the Consular (A. p. 306–10), and the Ulpian, on the Forum of Trajan, with which a library was once connected.

For Christian catacombs see CATACOMBS, ROMAN. The most important catacombs of the Hebrews are those of Vigna Randanini, on the Appian Way.

The Circuses are: that of Domitian, now the Piazza Navona; the Flaminian (the Palazzo Maiteli); the Circus Maximus, the oldest of all, erected in the Murcian Valley, between the Palatine and the Aventine, where, even in the days of Romulus, races and other public amusements were to be held (as on occasion of the Regium Mensis); that of Numa near St. Peter’s, where the Apostle was martyred; that of Maxentius, outside the city, via Appia. Trajan’s Column, on the forum of the same name, with a spiral design of the emperor’s warlike exploits, is 100 Roman feet (about 97 English feet) in height, erected by the senate and people A. p. 113. That of Marcus Aurelius, with reliefs of the wars with the Marcomanni, Quadri, Sarmatii, etc. (172–75), is interesting for its representation of the miraculous rainfall which, as early as Tertullian’s time, was attributed to the prayers of the Christian soldiers. This column bears a bronze statue of St. Paul the Martyr, invested with a statue of St. Peter (Sixtus V, 1589). That of Phocas was erected in 608 by the exarch Smaragdus. The Roman Forum was originally the swampy valley between the Palatine, Capitoline, and Esquiline, which became a market and a meeting-place for the transaction of public business. Soon it was surrounded with shops and public buildings—basilicas, the Curia Hostilia, the Rostra, or platform for public speakers, and various temples. Other forums were those of Augustus, of Peace, of Nero, the Julian, and Trajan’s, all in the same neighbourhood.

The Mausoleum of Augustus, between the Corso and the Via Ripetta, is now a concert hall. The Mausoleum of Hadrian (Castle of S. Angelo) was used as a fortress by Goths and Romans as early as the sixth century; in the tenth and following centuries it often served as a prison, voluntary or compulsory, for the poorer classes. In the reign of VIII, the popes who did most to restore and transform it. The Tomb of Cecilia Metella, on the Via Appia, still fairly well preserved, was a stronghold of the Caetani in the Middle Ages, and from them passed to the Savelli and the Colonna. The Pyramid of Augustus, on the Campo Vaccino, is the largest and highest pyramid in Rome. The tomb of Eurytacian, outside the Porta Maggiore, has interesting bas-reliefs showing the various operations of baking bread. That of the Scipios, near the Gate of St. Sebastian, was discovered in 1780, with the sarcophagus of Scipio Barbatius, consul in 208, which is now in the Vatican Museum. The Appian Way was lined with numbers of sepulchral monuments; among these mention may be made here of the columbaria, or grotoes where a family or several families kept their dead in the crypt in the common vault or entombed urns of its members. The most important of these are in the Vigna Codini and near S. Giovanni in Ovio.

With Septimius Severus a new architectural period was inaugurated, which was continued by Heliodorus and Alexander. The emperor’s tomb at C. Augustus, that of Tiberius, the hippodrome, the library of the house of Livia, the palaestra, or quarters of the imperial pages (where the celebrated drawing of a certain Alexandromes adoring a crucified ass was discovered)—all these are still clearly distinguishable. There were also a temple of the Great Mother (205 a. c.), one of Jupiter Victor (296 a. c.—commemorating the victory of Sentinus, and one of Apollo, surrounded by a great portico in the enclosure of which now stands the Church of S. Sebastiano in Palladio. In the substructures of the palace of the Celsi was discovered some years ago the ancient basilica of S. Maria Antiquus, probably dating from the fourth century, in which frescoes of the eighth and ninth centuries (including a portrait of Pope St. Zacharias, then living) were found. It is evident at certain points, where the paintings have been broken, that two other layers of painting lie beneath. Other temples are those of Concordia, three columns of which are still standing in the Roman Forum, built in 388 b. c. for the peace between the Patricians and the Plebeians, and in which the Senate often assembled; of the Deus Reducius, outside the city, near the Appian Way, which was dedicated by a resolution to retire without besieging Rome; of Castor and Pollux, built in 484 b. c. to commemorate the victory of Lake Regillus, over the Latin, and restored in 117 (three columns remaining); of Faustina and Antoninus (S. Lorenzo in Miranda); of Fortuna Virilis (second century b. c.—the Church of S. Maria in Egypt); of Julius Caesar, erected by Augustus in the Forum, on the spot where Caesar’s body was burned; of Jupiter Capitolinus, now the German Embassy; of Mars Ultor (the Avenger) erected in the Forum of Augustus to fulfill his vow made at the battle of Philippi, which included the statue of Caesar and the temple of Ceres Urbs, forms part of Santi Cosmo e Damiano; of Saturn, in the Forum. The two temples of Venus and Rome have their apses touching each other, and were surrounded by a common peristylium, a plan designed by the Emperor Hadrian himself; to the temple of Vesta, below the Palatine, is annexed the house of the Vestals; the small round temple of the Mater Matuta, in the Forum Boarium, has been commonly called Vesta’s.

Characteristic of Rome are the lofty brick towers, generally square, with few windows, which may still be seen here and there throughout the city. They are of the seventh and eighth century, and are monuments of the discord between the most powerful families of Rome. The most important of them are: the Torre Anguillara in Trastevere, adjoining the palace of the Anguillara family, reconstructed and used as a medieval museum; and the two Capocci, which are more than two hundred years old. The Torre del Conti, once the largest and strongest, built by Riccardo, brother of Innocent III; that of
PIAZZA AND BASILICA OF ST. MARY MAJOR

INTERIOR, CHURCH OF S. MARIA SOPHIA MINERVA
the Scimmia, or of the Frangipani, near S. Antonio dei Portoghesi, surmounted by a statue of the Madonna; the Torre Millina, in the Via dell’Animar; the Torre San Salvatore, which was erroneously called “Nero’s Tower,” that emperor being supposed to have watched from it the burning of Rome; it was built, however, under Innocent III, by his sons Piero and Alessio, partisans of the senator Pandolfo, who opposed the pope’s brother Riccardo.

UNIVERSITY OF ROME.—The University of Rome must be distinguished from the “Studium Generale apud Curiam”, established by Innocent IV in 1244–5 at Lyons for the convenience of the members of the pontifical Court and of the persons who flocked (from all over Europe) to the Holy See. The Studium comprised the faculties of theology and of canon and civil law. Clerics and priests could not only attend the lectures in the latter branch, but were allowed to teach it, despite the prohibition of Honorius III. The Studium accompanied the popes on all their journeys and was transferred to Avignon, in accordance with the Decree of the Council of Vienne, the Studium Curie was the first, owing to the generosity of John XXII, to establish chairs of Arabic, Hebrew, and Chaldean; there was, moreover, a professor of Armenian. At Avignon professorships of medicine were also instituted. During the sojourn of the popes at Avignon and those at Rome a Studium Generale; but in the former theology alone was taught. In the fifteenth century the Studium Generale was abolished in favour of the University of Rome. Previously King Charles of Anjou, out of gratitude for his election as successor of Pope Urban IV, decided, 14 October, 1265, to erect a Studium Generale “liber utriusque juris quam artium” (of civil and canon law and of arts), but his plan was not carried into execution. The real founder of the University of Rome was Boniface VIII (Bull “In supremis” of 20 April, 1303), who established it in order that Rome, the recipient of so many Divine favours, might become the fruitful mother of science. The chief source of revenue of the university was the tribute which Tivoli and Romagna paid the City of Rome. It is worthy of note that a school of law already existed in Rome in the thirteenth century.

The existence of the papal Court at Avignon did not at first injure the Studium Generale. John XXII took a deep interest in it, but limited the granting of degrees to the two faculties of law. The Vicar of Rome was to preside at the examinations; to obtain a degree the candidate had to study six years (five for canon law) and profess the same for two years. There exist documents from the year 1369 showing that degrees were then granted. But later, in the days of anarchy that overtook the city, the Studium Generale became decayed. In 1363 the statutes were reformed; among other changes, provision was made for obtaining foreign professors, who would be independent of the various factions in the city. In 1370, however, or a little later, the Studium was entirely closed. Towards the end of the century, however, the Church was restored to the university by offering very large salaries to the professors. Innocent VII in 1406 gave it new statutes and arranged with Manuel Chrysoloras to accept the chair of Greek literature. But the death of Innocent and the subsequent political and ecclesiastical troubles frustrated this plan. In 1409, a new reformer of the university was Eugenius IV (10 October, 1431). He drew up regulations for the liberty and immunity of the professors and students, and increased the revenues by adding to them the duties imposed on wines imported from abroad. For the purpose of government, four reformatrices, Roman citizens, were appointed, giving the university more independence. The position of chancellor was given to the cardinal-camerlengo. The university was located near the Church of Sant’ Eustachio, where it had first been established. The first college for poor students was the Collegium Capranica (1455, see Roman Colleges). But the latter plan was not realised. The Studium of law soon flourished; but the theological faculty, on account of the competition of the Studium Curie, was not so successful. Under Nicholas V the classical studies developed rapidly owing to the labours of Lorenzo Valla, Poggio Bracciolini, Bruni, Francesco Filelfo, Pomponio Leto, and the Greeks, Lascaris, Chalcrocondyles, and Musurus. But the process against the Academia Romana under Paul II reacted on the university. Sixtus IV intended to suppress it and reduced the salaries of the professors. Better days returned with Alexander VI, who began the present building of the Sapienza, which was remodelled in the seventeenth century. It seems, however, that it was Leo X who suppressed the Studium Curie in favour of the University of Rome. In 1514 the latter had 88 professors: 4 of theology, 11 of canon law, 20 of civil law, 5 of medicine, 1 of rhetoric. The degree of bachelor of arts was conferred in 1520 by Pope Leo X. In 1530, in consequence of the Pope’s opposition to the Jesuits, the University was placed in the Campidoglio, and the lectures were given on the steps. In 1539, the Jesuits were expelled from the university, which was re-established as the University of Rome, with faculties of medicine, chemistry, philosophy, mathematics, rhetoric, grammar, and botany. Lectures were given even on feast days. The number of students was very small, being frequently less than the number of professors. The blame is to be laid on the latter, whose official and professional duties interfered with their lectures. It was not until 1570 that the first serious lectures were given. In 1628 the statutes were revised, and the university was reformed and re-established in the Campidoglio. It was given the title of “Studium diocesani” and the professorships numbered 24; 2 of theology, 8 of canon and civil law, 5 of medicine (one teaching anatomy and one botany), 5 of philosophy, 3 of Latin, and 1 of Greek literature. Julius III entrusted the administration to a congregation of cardinals. Pius V enlarged the botanical garden of medical herbs previously estab-
lished near the Vatican by Nicholas V, and allowed the bodies of Jews and condemned infidels to be used for the purposes of anatomical study. He also established chairs of Hebrew and mathematics. A mathematical museum (the "Metronomea") (which was later abandoned) was founded in the Vatican. Under Gregory XIII adjunct chairs with salary attached were established for the young doctors of Rome, who might later become ordinary professors. In that and the following centuries the professors of theology were generally the procurators general of the various religious orders. Sixtus V granted 22,000 scudi to extinguish the debt encumbering the university. He gave to the college of consistorials advocates the exclusive right of electing the rector who, until then, had been elected by the professors and the students, and he instituted a congregation of cardinals. "Pro Universitate Studii Romani". At the end of the sixteenth century the university began to decline, especially in the faculties of theology, philosophy, and literature. This was due in part to the formidable concurrence of the Jesuits in their Collegio Romano, where the flower of the intellect of the Society was engaged in teaching. Moreover, Plato was the favoured master in the Sapienza, while Aristotle was more generally followed elsewhere. Among the distinguished professors in this century besides those already mentioned were Tommaso de Vio, O.P., later the celebrated Cardinal Gaetano; Domenico Jacobazzi; Felice Peretti (Sixtus V); Marco Antonio Muret, professor of law and elegant Latinist; Bartolomeo Eustacchio, the famous anatomist.

In the seventeenth century the decline was rapid. Many of the professors had the privilege of lecturing only when they pleased; most of them were foreigners. The medical school alone continued to prosper owing to the labours of Cesalpino and Lancisi. The Accademia dei Lincei promoted the study of the natural sciences and was honoured by Benedetto Castelli, the disciple and friend of Galilei, and Andrea Argoli; later Vito Giordani the mathematician attracted many students. Only two jureconsults of note are found during this century, Farinacci and Gravina. Giuseppe Carpani brought the students together at his home to familiarise them with the practice of law. The most important event of the century occurred in 1660, under Alexander VII (1655–67), when the university building erected by Alexander VI (1492–1503) was completed. Alexander VII established moreover the university library (the Alexandrine Library) by obtaining from the Clerks Regular Minors of Urbania, whom he compensated by giving them permanently the chair of ethics, the printed books from the library of the D. see of U. Inno cent XI erected six new chairs, among which was that of controversial church history, first filled by the Portuguese Francesco Macedo. Innocent XI erected a fine anatomical hall. The most celebrated and relatively speaking most frequented schools were those of the Oriental languages. Under Innocent XII a move was made to improve the university and assign the buildings to the Priests for the free education of young boys. Fortunately the plan was not only not executed but resulted in a radical reform and the introduction (1700) of a new regime which benefited in particular the faculty of law.

Cardinal Rafaelli purchased (1703) with his private funds some fields on the Janiculum, where he established a botanical garden, which soon became the most celebrated in Europe through the labours of the brothers Trionfetti. Benedict XIV, who had been a professor and rector of the university (1702–17), in 1744 new regulations concerning especially the vacations, the order of examinations, and the selection of professors, which was to be by competitive examination, whereas from the time of Innocent XII they were ordinarily appointed by the pope. Another Edict (1748) dealt with the rights and duties of the professors and established chairs of chemistry, botany, and experimental physics. The following chairs were then in existence: 6 of jurisprudence; 6 of medicine; 15 of arts (including theology). In 1778 the sciences were divided into five classes: theology, 5 chairs; jurisprudence, 6; medicine, 9; philosophy and arts, 5; languages (Latin, Greek, Arabic, Hebrew, Syriac). But a rector of that time deplored the inertia of the professors and the laxness of the students. Pius VII (1804) founded the mineralogical and natural history museum, and in 1806 a chair of veterinary science. From 1809 till 1813 the French system was in force. Leo XIII in 1824 established the Congregation of Studies, and gave it control of the universities in the pontifical state. Many professors at Rome as at Bologna had to resign their chairs on account of their political opinions, which resulted in the university failing to keep pace with the universities in other states, for instance, the chairs of public and commercial law were not founded till 1848; and that of political economy still later. Among the distinguished professors of the eighteenth century were the jurists, Fagnani, Romazzi (also the historian of the university), Patrocchi; the professors of medicine, Baglivi, Toschi, Pacelli; the mathematician, Quartaroni; the Syrian scholar, Asemani; and Menzioni and Fontanini the littérateurs; in the nineteenth century the Abbate Tortolini and Chelini, mathematicians. In 1870 there were 6 professors of theology, 8 of law, 2 of notarial law, 13 of medicine, 4 of pharmacy, 11 of surgery, 3 of veterinary science, 15 of philosophy and mathematics, 8 of Italian and classical philology, and 4 of Oriental languages. Under the new Government all the professors who refused to take the oath of allegiance were dismissed, among those refusing being the entire theological staff. These alone then formed the pontifical university, which came to an end in 1876.

The university is now under the control of the Italian Government and is called the Royal Univer-
sity. Its present state is as follows: philosophy and letters, chairs ordinary, 23; extraordinary, 3; tutors, 13; mathematics, chairs ordinary, 23; extraordinary, 7; tutors, 16; law, chairs ordinary, 16; tutors, 8; medicine, chairs ordinary, 20; extraordinary, 2; tutors, 15; philosophy and letters, professors, 33; docents, 33; physics and mathematics, professors, 34 (with 4 assistants); docents, 41; law, professors, 33; docents, 33. Annexed to the university are schools of philosophy, literature, and natural science, archaeology, medieval and modern art, Oriental languages, pharmacy, and applied engineering. There are also institutes of pedagogy, chemistry, physics, mineralogy, geology, physiology, the astronomical observatory of the Campidoglio, many medical institutes and clinics, and finally the Alexandria library. The number of students in 1909–10 was 3686. Owing to the growth of the university after 1870, the building of the Sapienza was insufficient, consequently the schools of physical and natural sciences had to be located elsewhere.

U. BENIGNI.

Romero, Juan, missionary and Indian linguist, b. in the village of Machena, Andalusia, Spain, 1559; d. at Santiago, Chile, 31 March, 1630. He entered the Society of Jesus in 1586, was assigned to the South American mission in 1588, and arrived in Peru in January, 1590, to take up his work among the Indians. From 1593 to 1598 he was superior of the missions of Tucumán, the missionary centre for the wild tribes of what is now northern Argentina. After a term as procurator in Rome, he returned to South America in 1610 and was successively superior of the Jesuit college at Buenos Aires, rector of the colleges of Santiago del Estero, Argentina, and Santiago, Chile, and first vice-provincial of Chile. In his long service of nearly forty years as active or directing missionary Father Romero acquired a more or less fluent knowledge of several Indian languages, particularly of the Guaraní (q. v.) of Paraguay, on which he was an authority. He was also the author of numerous letters and shorter papers and of an important manuscript work, "De Prædestinatione."

JAMES MOONET.

Romuald, Saint, b. at Ravenna, probably about 950; d. at Val-di-Castro, 19 June, 1027. St. Peter Damian, his first biographer, and almost all the Camaldolese writers assert that St. Romuald's age at his death was one hundred and twenty, and that therefore he was born about 907. This is disputed by most modern writers. Such a date not only results in a series of improprieties with regard to events in the saint's life, but is also irreconcilable with known dates, and probably was determined from some mistaken inference from St. Peter Damian. In his youth Romuald indulged in the usual thoughtless and even vicious life of the tenth-century noble, yet felt greatly drawn to the eremetical life. At the age of twenty, struck with horror because his father had killed an enemy in a duel, he fled to the Abbey of San Apollinare-in-Claudia and in humble asceticism entered religion. San Apollinare had recently been restored by St. Matthew, Abbot of Cluny, but still was not strict enough in its observance to satisfy Romuald. His injudicious correction of the less zealous aroused such enmity against him that he applied for, and was readily granted, permission to retire to Venice, where he placed himself under the direction of a hermit named Marinus and lived a life of extraordinary severity. About 975, Pietro Orseolo I, Doge of Venice, who had obtained his office by acquiescence in the murder of his predecessor, began to suffer remorse for his crime. On the advice of Guarinus, Abbot of San Miguel-de-Cuxa, in Catalonia, and of Marinus and Romuald, he abandoned his office and relations, and fled to Cuxa, where he took the habit of St. Benedict. The monks of Romuald and Marinus erected a hermitage close to the monastery. For five years the saint lived a life of great austerity, gathering round him a band of disciples. Then, hearing that his father, Sergius, who had become a monk, was converted, with doubts as to his sincerity, and also with a desire to return in haste to Italy, he returned in haste to Italy, subjected Sergius to severe discipline, and so resolved his doubts. For the next thirty years St. Romuald seems to have wandered about Italy, founding many monasteries and hermitages. For some time he made Pereum his favourite resting place. In 1005 he went to Val-di-Castro for about two years, and left it, prophesying that he would return to die there alone and unaided. Again he wandered about Italy: then attempted to go to Hungary, but was prevented by persistent illness. In 1012 he appeared at Vallombrosa, whence he moved into the Diocese of Arezzo. Here, according to the legend, a certain Maldorus, who had seen a vision of monks in white garments ascending into heaven, gave him some land, afterwards known as the Campus Maldoli, or Camaldoli. St. Romuald built on this land five cells for hermits, which, with the monastery at Fonteubuno, built two years later, became the famous mother-house of the Camaldolese Order (q. v.). In 1013 he retired to Mont-Siриa. In 1021 he went to Bifolco. Five years later he returned to Val-di-Castro where he died, as he had prophesied, alone in his cell. Many miracles were wrought at his tomb, over which an altar was allowed to be erected in 1032. In 1466 his body was found still incorrupt; it was translated to Aquinian in 1481. In 1656 Pope Innocent VII fixed his feast on 7 Feb., the day of the translation of his relics, and extended its celebration to the whole Church. He is represented in art pointing to a ladder on which are monks ascending to Heaven.

LESLIE A. ST. L. TOKE.

Romulus Augustulus, deposed in the year 476, the last emperor of the Western Roman Empire. His reign was purely nominal. After the murder of Valentinian III (455) the Theodosian dynasty was extinct in Western Europe and the Suevian Visigoths, a branch of the Goths, governed the Western Empire for sixteen years as its real ruler. Like Stilicho and Aetius he raised five shadowy emperors to the throne and then deposed them, partly in agreement with the Eastern Empire. After his death in 472 his nephew Gun-
Ronsard, Pierre de, French poet, b. 2 (or 11) Sept., 1524, at the Château de la Poissonnière, near Vendôme; d. 27 Dec., 1585, at the priory of Saint-Cosme-en-l’Isle, near Tours. He was first educated at home by a private tutor, and at the age of nine was sent to the College of Navarre, in Paris. Having left the college before graduating he was appointed page to the Duke of Orleans, son of Francis I, and soon afterwards to James V, King of Scotland. After a sojourn of three years in Scotland and England, during which he became thoroughly proficient in the English language, he travelled in Germany, Piedmont, and other countries. In 1541, being afflicted with an incurable deafness, he retired from public life and for several years devoted his entire time to study. He studied Greek under the famous scholar Dorat, at the College de Neuf. His pupils were the Emperor Charles V and the College of Guerbet. His ambition was to find new paths for French poetry, and he was soon recognized as the author of the “Prince des Poètes”, a title he merited by his “Odes” (1550), “Amours de Cassandre”, etc. He was a great favourite with Charles IX; Elisabeth, Queen of England, sent him a diamond; Mary Stuart found relief in her imprisonment in reading his poems; the City of Toulouse presented him with a solid silver Minerva; and the literary men of his time acknowledged him as their leader. His last ten years were spent by Ill-Néan. He retired to Croix-Val-en-Vendômois, in the forest of Gassic, and then to the priory of Saint-Cosme-en-l’Isle, where he died. The works of Ronsard are numerous and their chronology is very intricate. In twenty-four years (1560-64) six editions of his works were published, and the number of occasional pieces is almost innumerable. The following are the most important: “Les Amours de Cassandre” (2 books of sonnets, Paris, 1550), “Odes” (5 books, Paris, 1551-1553), “Le bocage royal” (Paris, 1554), “Les Hymnes” (2 books, Paris, 1556), “Poèmes” (2 books, Paris, 1556-73), “Discours sur les ministres du temps” (1560), “La Franciade” (Paris, 1572). His influence and his reforms were far-reaching. He enriched the French vocabulary with a multitude of words borrowed not only from Greek and Latin, but from the old romance dialects as well as from the technical languages of trades, sports, and sciences. His many rules concerning verse-making were as influential as numerous. He invented a large variety of metres, adopted the regular intertwining of masculine and feminine rhymes, proscribed the histus, and introduced harmony in French verse. He was perhaps the greatest French lyrical poet prior to the nineteenth century. His themes are as varied as their forms, simple and sublime, ironical and tender, solemn and familiar.

LOUIS N. DELAMARRE.

Rood (Anglo-Saxon Rod, or Rode, "cross"), a term, often used to signify the True Cross itself, which, with the prefix Holy, occurs as the dedication of some churches—e. g. Holyrood Abbey, in Scotland. But more generally it means a large crucifix, with statues of Our Lady and St. John, usually placed over the entrance to the choir in medieval churches. These roods were frequently very large, so as to be seen from all parts of the church, and were black, and often was marked with a white cross. When the rood was exceptionally large or heavy, its weight was sometimes taken partly by wrought-iron rod-chains depending from the chancel roof over which it was placed. The precise origin of the screen and its connexion with the rood is somewhat obscure, and apparently varied in different churches. The custom of screening off the altar is very ancient, and emphasizing, as it did, the air of mystery surrounding the place of sacrifice, was possibly a survival of Judaism; but the placing of a screen more or less solid, between the chancel and nave—i. e. between clergy and people—must have originated from practical rather than from symbolic reasons, and was probably an attempt to secure privacy and comfort for those engaged in the work of the choir, more especially at times when there was no deacon present. This was certainly the case with the heavy closed screens, usually of stone, in the large conventual and collegiate churches, where the long night offices would have been impossible in winter without such protection.

Over such screens was a loft or gallery (rood-loft), which, according to some authorities, was used for the reading of the Epistle and Gospel, certain lections, the pastoral of bishops, the Acts of councils, and other like purposes. The episcopal benediction was also sometimes pronounced, and penitents absolved, from the loft, and in some churches of France the paschal candle stood there. The Blessed Sacrament was exposed on the loft in Lyons cathedral and, according to De Molène, similarly also at Rouen in the eighteenth century. The loft likewise frequently provided convenient accommodation for the organs and singers. In large monastic churches it was called the pulpitu; but in secular cathedrals and parish churches there does not seem to have been usually a separate rood-screen, the rood, in such cases, being either on or over the pulpitu itself. In France the rood-loft was called the jubé, which seems to imply that it was used liturgically for the reading of lessons and the like. A gallery or loft corresponding to the medieval jubé was not unknown in the early Church, but there is no satisfactory evidence to show that it was surmounted by a rood.

Thiers, taking Sénégal as his example, suggests that the loft began merely as a sort of bridge connecting the two ambos on either side of the chancel arch, and that it was gradually made more spacious as it proved useful for other purposes. This could only have been so, however, in the smaller churches where there was no pulpitum, which perhaps it was itself the origin of the pulpitum.

In smaller parish churches it seems probable that the loft was originally only a convenience for reaching the rood-lights, and that its obvious suitability for other uses caused its enlargement and elaboration. Nothing, however, can be stated with absolute certainty. Many of these medieval screens, both with and without lofts, remain to the present day, in spite of the iconoclasm of the Reformation period. Notable screens that may be mentioned as typical examples are at Cawston, Ranworth, Southwold, Dunster, and Staverton in England; at Troyes, Albi, St-Fiacre-le-Fauquet, and St-Etienne-du-Mont, Paris, in France; at Louvain and Dinxmude in Belgium; at Lubeck in Germany. Some are constructed of stone, and some of the later ones of metal-work.
but they are mostly of wood and usually consist of close panelling below—often decorated with painted figures of saints—and open screenwork above, supporting traceried and richly carved cornices and groined vaulting. In England they were generally limed and gilded. In some instances they extend across the aisles of the church as well. In England, also, the rood frequently stood not on or near the screen and loft, but on a separate transverse beam called the rood-beam, which was similarly carved and gilded. In French churches, however, others besides that supporting the rood, like those at St. David’s, between the choir and sanctuary, and Lincoln beyond the high altar, on which stood lights and reliquaries. Corbels, or stone brackets in English churches—e.g., Worcester cathedral—often indicate the position of the rood-beam before its removal in the sixteenth century. Leading up to the rood-loft were the rood-stairs, many of which still remain even where the loft itself has been destroyed. In England these stairs were generally enclosed in the wall separating chancel from nave, but in other countries they often constituted an architectural feature with elaborate tracery; e.g., Rouen (see facsimile of the screen, St.-Etienne-du-Mont, and La Madeleine at Troyes.

In churches where there were both pulpitum and rood-screen the latter usually had two doors, and between them was placed, on the western side, the rood-altar, which, in monastic churches, often served as the parish altar, the 'cloister altar' being accommodated in the nave. This was the case in almost all the monastic cathedrals and greater abbeys of England, and the altar, being immediately under the great rood, was dedicated to the Holy Cross, except at Durham, where it was called the Jesus altar, and at St. Albans, where the dedication was to St. Cuthbert. The latter still remains in situ as the parish altar. In Münster cathedral and at Lübeck, in the hospital church, there were three altars, with the two doors of the screen between them. In smaller churches, with no separate pulpitum, but only a rood-screen with a central doorway, there was usually an altar on either side of the door, but it is doubtful whether these can strictly be termed rood-altars. It seems probable that in some cases the rood-altar was on the loft itself, instead of beneath—e.g., at Lichfield, Lyons, and St.-Maurice,ienne. In some old lofts drains have been found which may possibly be the remains of the piscinas for such altars. In the daily part of Matins and Lauds, on or under the rood-screen, was called the rood Mass, though occasionally this term is used to signify merely the Mass of one or other of the feasts of the Holy Cross.

A few other terms used in connexion with the rood may here be briefly explained. The rood-arch was the arch separating chancel from nave, under which the rood and rood-screen were usually situated. A rood-door was either the central door of a rood-screen or one of the two doors on either side of the rood-altar. Rood-gallery was another term for rood-loft. The rood-gap was the space under the chancel arch, paved by the rood-step. The rood-step was often furnished with the figures of Sts. Mary and John on either side of the rood; rood-steps, the steps leading up from the nave into the chancel, under or immediately before the rood-screen. Rood-steeple, or rood-tower, was a name sometimes given to the central tower of a church at the intersection of nave and chancel with the transept; as at Durham, Norwich, Paris, and Lübeck.

At the last-named place the name has since been corrupted into "Broad Tower."

ROOD LOFT WITH ORGAN, IN THE HOFKIRCHE, INNSBRUCK
richest fields for the activity of his brethren in the Society, namely the home and foreign missions. During his administration, the order increased two-fold and the number of its members (593) and in its apostolic activity, although it had meanwhile to suffer banishment and persecution in many places, especially in the year of revolution, 1848. The General himself had to quit Rome for two years. On his return his health was broken, his strength began to fail, and signs of weakness announced his approaching end. The characteristics of Rosmini are well expressed in the words which he himself declared the principle of his administration: "fortiter et suaviter". The same idea is expressed in the words of his biographer: "Impetuous by nature, he governed all passions by the exercise of Christian self-denial, so that in all things forms his distinctive characteristic."

S. SCHRED.

ROPER, MARGARET. See THOMAS MORE, BLESSED.

ROPER, WILLIAM, biographer of the Blessed Thomas More, b. 1496; d. 4 Jan., 1578. Both his father and mother belonged to distinguished legal families. He was educated at one of the English universities; he received his B.C.L. (1513) in the Law School of the Inns of Court of King’s Bench. He held this post till shortly before his death. When he was about twenty-three he seems to have been taken into Sir Thomas More’s household, and he married Margaret, Sir Thomas’s eldest daughter, in 1521. Erasmus wrote of the More family, describing them as a young family. He has written his life of excellent and modest character and not acquainted with literature. He became fascinated, however, by the Lutheran doctrine of justification by faith, and professed his heresy so openly as to be summoned before Wolsey. Sir Thomas frequently reasoned with his son-in-law. "Meg," he said to his daughter, "I have borne a long time with thy husband; I have reasoned and argued with him in these points of religion, and still given to him, my poor fatherly counsel, but I perceive none of all this able to call him home; and therefore Meg, I will no longer dispute with him, but will only pray and let him be left to God to pray for him." To these prayers Roper attributed his return to the Faith; henceforth he was an ardent Catholic. He sat in four of Mary’s parliaments, twice as member for Rochester and twice as member for Canterbury. His Catholicism got him into difficulties; at the moment under Elizabeth and he was summoned before the Council in 1568; in the following year he was bound over to be of good behaviour and to appear before the Council when summoned. He does not seem to have been troubled further. His reminiscences of Sir Thomas More were written in the time of Queen Mary nearly twenty years after the events with which they deal, but his relations with his father-in-law had been so close and the impressions he received in that delightfully household so vivid, that these rather disjointed notes form a most attractive biography. Roper’s "Life" was not printed till 1626, but it was used by the earlier biographers of More, and is the chief authority for his personal history.

F. F. URQUHART.

BORATE COILI (Vulgate, text), the opening words of Ις., xlv, 8. The text is used frequently both at Mass and in the Divine Office during Advent, as it gives expressive poietical expression to the longings of Patriarchs and Prophets, and symbolically of the Church, for the coming of the Messias. Throughout Advent it occurs daily as the versicle and response at Vespers. For this purpose the verse is divided into the versicle, "Rex Domini justum" (Drop down, dew, ye heavens, from above, and let the clouds rain the just), and the response: "Aperiatur terra et germinet salvatorem" (Let the earth be opened and send forth a Saviour).

The text is also used: (a) as the Introit for the Fourth Sunday in Advent; (b) as the versicle in the first responsory of Tuesday in the first week of Advent; (c) as the antiphon at Lauds for the Tuesday preceding Christmas and the second antiphon at Matins of the Exaltation of the Blessed Virgin; (d) as the antiphon of the third responsory for Friday of the third week of Advent and in the fifth responsory at Matins of the Exaltation of the Blessed Virgin. In the "Book of Hymns" (Edinburgh, 1910), p. 4, W. Rookley translates the text in connexion with the O Antiphons (q. v.): "Mystic dew from heaven Unto earth is given: Break, O earth, a Saviour yield— Fairest flower of the field!"

The exquisite Introit plain-song may be found in the various editions of the Vatican Graduale and the French Missal. In the "Oxford Gradual" the heading, "Prayer of the Churches of France during Advent", Dom Guéranger (Liturgical Year, Advent tr., Dublin, 1870, pp. 155–5) gives it as an antiphon to each of a series of prayers ("Ne irascaris", "Peccavimus", "Vide Domine", "Consolamini") expressive of penitence, expectation, comfort, and furnishes the Latin text and English rendering of the Prayer. The Latin text and a different English rendering are also given in the Baltimore "Manual of Prayers" (pp. 603–4). A plain-song setting of the "Prayer", or series of prayers, is given in the Solesmes "Manual of Gregorian Chant" (Rome-Tournai, 1903, 313–5) in plain-song notation, and in a slightly simpler form in modern notation in the "Roman Hymnal" (New York, 1884, pp. 140–5), as also in "Les principaux chants liturgiques" (Paris, 1875, pp. 111–2) and "Recueil d’anciens et de nouveaux cantiques notés" (Paris, 1886, pp. 218–9).

H. T. HENRY.
street, and in that way, by a fortunate accident, came under the attention of Lanfranco, and through him got to know Falomo. Both of these artists were of the greatest possible assistance to him. His progress, however, was exceedingly slow, and the members of his family took almost everything that he earned for their own support; meantime he was laid up almost periodically with a malignant fever, the seeds of which had been sown in his journeys with the robbers.

In 1634, he came to Rome, but fell very ill, and had to return again to Naples more dead than alive. After a little while, however, he went back to Rome, and there gained a patron in Cardinal Brancaccio, who gave him various commissions both in the Eternal City and in Viterbo. In some of these works he was assisted by a fellow-pupil named Mercuri.

From this point he began to make progress, but presently discovered that he had a genius for composing witty poems, sparkling and epigrammatic, which gained for him a sudden reputation in Rome; this he turned to good account; then suddenly dropping his poetic work as quickly as he had taken it up, turned again to his favourite profession of painting. He worked very hard, and was a painter of considerable power, and of marked personality. His pictures as a rule are distinguished by gloom and mystery, rich colouring, magnificent shadows, and broad, free, easy work, nervous and emotional. There is a general air of melancholy over almost all his works, and they appear to have been turned out at top speed, but there is an impressiveness about his pictures which can never be mistaken. For a while they were regarded far too highly at a time when the Academic School was the only one in repute; they then passed under a cloud when the primitives came into their own, but now their genius is again asserting itself, and the landscapes of Rosso with their marvellous draughtsmanship and extraordinary, melancholy magnificence are being appreciated by persons able to understand the merits of a poetic interpretation. The last few years of the artist's life were passed between Naples and Rome, with one temporary visit to Florence, where he remained three or four years. It was in Rome that he died; but the best part of his life was passed in his native town, where he was held in high repute, and regarded as one of its glories. His works are to be found in almost all the galleries of Europe, notably in the Pitti, the National Gallery of London, the Hermitage, the galleries of Dulwich and Edinburgh, and in almost every important palace in Rome. He was a skilful etcher, leaving behind him some thirty-five or forty well-etched plates, and was a very powerful draughtsman in black and sanguine. Many of his pictures are signed by his conjointed initials arranged in at least a dozen different ways, and always skilfully combined.

Some of the information on him is obtained from Passeri, Vita di pittori, scultori & architetti che hanno lavorato in Roma (Rome, 1773).

GEORGE CHARLES WILLIAMSON.

**Rosalba**

Rosalba, Saint, hermitess, greatly venerated at Palermo and in the whole of Sicily of which she is patroness. Her feast is celebrated on 25th April.

A special feast of the translation of her relics is kept in Sicily 15 June. There is no account of her before Valerius Rossi (about 1590), though churches were dedicated in her honour in 1237. Her Vita (Acta SS., 11 Sept., 278) which, according to the Bollandist J. Stilling, is compiled from local traditions, paintings and inscriptions, says: She was the daughter of Sinibald, Lord of Quisquina and of Rosa, descended from the family of Charlemagne; in youthful days she left home and hid herself in a cave near Bivona and later in another of Monte Fellegrino near Palermo, in which she died and was buried. Her remains were discovered and brought to the Cathedral of Palermo. Urban VIII put her name into the Roman Martyrology. Whether before her retirement she belonged to a religious community, is not known. The Basilians, in their Martyrology, claim her as a member. She is often represented as a Basilian nun with a Greek cross in her hand. Many of her pictures may be found in the Acta SS.

DUNBAR, Lives of Saintly Women (London, 1805); BARING-GOULD, Lives of the Saints (London, 1877); Stuliner in Hugelken- leison. FRANCIS MORSHEM.

**Rosary,** The. — I. IN THE WESTERN CHURCH.

"The Rosary", says the Roman Breviary, "is a certain form of prayer wherein we say fifteen decades or tens of Hail Marys with an Our Father between each ten, while at each of these fifteen decades we recall successively in pious meditation one of the mysteries of our Redemption." The same lesson for the Feast of the Holy Rosary informs us that.beginPath the Albigensian heresy was devastating the country of Toulouse, St. Dominic earnestly besought the help of Our Lady and was instructed by her, "so tradition asserts", to preach the Rosary among the people as an antidote to heresy and sin. From that time forward this manner of prayer was most wonderfully published (vulgo augmentum capit) by St. Dominic whom different Supreme Pontiffs have in various passages of their apostolic letters declared to be the institutor and author of the same devotion." That many popes have so spoken is undoubtedly true, and amongst the rest we have a series of encyclicals, pronounced in 1883, issued by Pope Leo XIII, which, while commending this devotion to the faithful in the most earnest terms, assumes the institution of the Rosary by St. Dominic to be a fact historically established. Of the remarkable fruits of this devotion and of the extraordinary favours which have been granted to the world as beheld through this means, something will be said under the headings ROSARY, FEAST OF, and ROSARY, CONFRATERNITIES OF. We will confine ourselves here to the controverted question of its history, a matter which both in the middle of the eighteenth century and again in recent years has attracted attention.

Let us begin with certain facts which will not be contested. It is tolerably obvious that whenever any prayer has to be repeated a large number of times recourse is likely to be had to some mechanical apparatus less troublesome than counting upon the fingers. In almost all countries, then, we meet with
something in the nature of prayer-counters or rosary-boards. Even in ancient Nineveh a sculptured palm has been found thus described by Layard in his "Monumenta" (I, plate 7): "Two winged females standing before the sacred tree in the attitude of prayer; they lift the extended right hand and hold in the left a garland or rosary." However this may be, it is certain that among the Mohammedians the Tasbih or bead-string, counting of 33, 66, or 99 beads, and used for counting devotionally the names of Allah, has been in use for many centuries. Marco Polo, visiting the King of Malabar in the thirteenth century, found to his surprise that that monarch employed a rosary of 104 (180) precious stones to count his prayers. As the account of what his players did were equally astonishing to see that rosaries were universally familiar to the Buddhists of Japan. Among the monks of the Greek Church we hear of the kambologion, or komboschoinion, a cord with a hundred knots used to count genuflexions and signs of the cross. Similarly, beside the mummy of a Christian ascetic, Thaiais, of the fourth century, recently disinterred at Antinœ in Egypt, was found a sort of cibbage-board with holes, which has generally been thought to be an apparatus for counting prayers. Still more primitive is the device of which Palladius and others speak of the apostle having an unparalled for the purpose of marking his prayers. A certain Paul the Hermit, in the fourth century, had imposed upon himself the task of repeating three hundred prayers, according to a set form, every day. To do this, he gathered up these hundred pebbles and threw one away as each prayer was finished. (Palladius, "Hist. Lausi", xx; Butler, II, 63). It is probable that other ascetics who also numbered their prayers by hundreds adopted some similar expedient. (Cf. "Vita S. Godrici", civil). Indeed when we find a papal privilege addressed to the monks of St. Apollinaris in Classe requiring them, in gratitude for the pious choir, tosay Kyrie eleison three hundred times a day (see the privilege of Hadrian I, a. d. 782, in Jaffe-Löwenfeld, n. 2437), one would infer that some counting apparatus must almost necessarily have been used for the purpose.

But there were other prayers to be counted more nearly connected with the Psalms and the Lord's Prayer. Early date among the monasteries, the practice had established itself not only of offering Masses, but of saying vocal prayers as a sursum of their deceased brethren. For this purpose the private recitation of the 150 psalms, or of 50 psalms, the third part, was constantly enjoined. Already in the 10th century, Lactantius eleison three hundred times a day. (Mon. Germ. Hist.: Confrat., Gall and Reichenau. "Mon. Germ. Hist.: Confrat., Piper, 140) that for each deceased brother all the priests should say one Mass and also fifty psalms. A charter in Kemble (Cod. Dipl., I, 290) prescribes that each monk is to sing two fifties (tua fóta) for the souls of certain deceased persons, while each priest is to sing two Masses and each deacon to read two Passions. But as time went on, and the concelebrants, or lay brothers, most of them quite illiterate, became distinct from the choir monks, it was felt that they also should be required to substitute some simple form of prayer in place of the psalms to which their more educated brethren were bound by rule. Thus we read in the "Ancient Customs of Cluny", collected by Udalrio in 1096, that when the death of any brother at a distance was announced, every priest was to offer Mass, and every non-priest was either to say a Mass or to recite the Lord's Prayer five times a day for a week. ("quia se cedere est cantant missam pro eo, et qui non est ceditar quinquaginta psalmos aut toties orationem dominicanam"). P. L., CXLIX, 776. Similarly among the Knights Templars, whose rules date from about 1128, the knights who could not attend choir were required to say the Lord's Prayer 57 times in all and on the death of any of the brethren they had to say the Pater Noster a hundred times a day for a week.

To count these accurately there is every reason to believe that already in the eleventh and twelfth centuries a practice had come in of using pebbles, berries, or discs of bone threaded on a string. It is in any case certain that the Countess Godiva of Coventry (c. 1075) left by will to the statue of Our Lady in a certain monastery "the circle of precious stones which she had threaded on a cord in order that by fingering them one after another she might count her prayers exactly" (Malmesbury, "Gesta Pont.", Rolls Series 311). Another example seems to occur in the case of St. Rosalia (a. p. 1160), in whose tomb similar strings of beads were found. More important is the fact that such strings of beads were known throughout the Middle Ages—and in some Continental tongues are known to this day—as "Paternosters". The evidence for this is overwhelming and comes from every part of Europe. Already in the thirteenth century the manufacturers of these articles, who were known as "paternosterers" almost everywhere formed a recognized craft guild of considerable importance. The "Livre des métiers" of Stephen Boyleau, for example, supplies full information regarding the four guilds of paternostiers in Paris in the fourteenth century. In London still preserves the memory of the street in which their English craft-fellows congregated. Now the obvious inference is that an appliance which was persistently called a "paternoster", or in Latin filia de paternoaster, numeralia de paternoaster, and so on, had, at least originally, been designed for counting Our Fathers. This inference, drawn out and illustrated with much learning by Father T. Eisner, O.P., in 1897, becomes a practical certainty when we remember that it was only in the middle of the twelfth century that the Hail Mary came at all generally into use as a formula of salvation. It is therefore impossible that Lady Godiva's circle of jewels could have been intended to count Ave Marias. Hence there can be no doubt that the strings of prayer beads were called "paternoster" because for a long time they were principally employed to number repetitions of the Lord's Prayer.

When, however, the Hail Mary came into use, it appears that from the first the consciousness that it was in its own nature a salutation rather than a prayer induced a fashion of repeating it many times in succession, accompanied by genuflexions or some other external act of reverence. Just as happens nowadays for the firing of salutes during the day by the public performer, or in the rounds of cheers evoked among school-boys by an arrival or departure, so also then the honour paid by such salutations was measured by numbers and continuance. Further, since the recitation of the Psalms divided into fifties was an innumerable document, at least, the favourite form of devotion for religious and learned persons, so those who were simple or much occupied loved, by the repetition of fifty, a hundred, or a hundred and fifty salutations of Our Lady, to feel that they were imitating the practice of God's more exalted servants. In any case it is certain that in the course of the twelfth century and before the birth of St. Dominic, the practice of reciting 50 or 150 Ave Marias had become generally familiar. The most conclusive evidence of this is furnished by the "Mary-legends", or stories of Our Lady, which obtained wide circulation at this epoch in particular, according to which a client of the Blessed Virgin who had been wont to say a hundred and fifty Ave was hidden by her to say only fifty, but more slowly, has been shown by Mussafia (Marten-legen- den, Pue I, 11) to be unquestionably of early date. Not less conclusive is the account given of St. Albert (d. 1140) by his contemporary biographer, who tells
us: "A hundred times a day he bent his knees, and fifty times he prostrated himself raising his body again by his fingers and toes, while he repeated at every genuflexion: 'Hail Mary, full of grace, the Lord is with thee, blessed art thou amongst women and blessed is the fruit of thy womb.'" This was the whole of the Hail Mary as then said, and the fact of its being so short and confined is not only not remarkable, but it should be remembered that the formula had not yet become universally familiar. Not less remarkable is the account of a similar devotional exercise occurring in the Corpus Christi MS. of the Ancren Riwle (q. v.). This text, declared by Koblig to have been written in the middle of the twelfth century (English Chronicle, 1885), may in any case be hardly later than 1200. The passage in question gives directions how fifty Aves are to be said divided into sets of ten, with prostrations and other marks of reverence. (See The Month, July, 1903.) When we find such an exercise recommended to a little group of anchorites in a corner of England, twenty years before any Dominican foundation was made in this country, it seems difficult to resist the conclusion that the practice of reciting fifty or a hundred and fifty Aves had grown familiar, independently of, and earlier than, the preaching of St. Dominic. Of the practice of meditating on certain definite mysteries, which has been rightly described as the very essence of the Rosary devotion, seems to have arisen long after the date of St. Dominic's death. It is difficult to prove a negative, but Father T. Essef, O.P., has shown (in the periodical "Der Katholik" of Mainz, Oct., Nov., Dec., 1897) that the introduction of this meditation during the recitation of the Aves was rightly attributed to a certain Cursbanus, Dominic the Prussian. It is in any case certain that at the close of the fifteenth century the utmost possible variety of methods of meditating prevailed, and the Rosary as generally accepted were not uniformly adhered to even by the Dominicans themselves. (See Schmider's "Rosentransgebet", p. 74; Essef in "Der Katholik" for 1904-6.) To sum up, we have positive evidence that both the invention of the beads as a counting apparatus and also the practice of repeating a hundred and fifty Aves cannot be due to St. Dominic, because they are both notably older than his time. Further, we are assured that the meditating upon the mysteries was not introduced until two hundred years after his death. What then, we are compelled to ask, is there left in the early Rosary as may be traced? These positive reasons for distrusting the current tradition might in a measure be ignored as archaeological refinements, if there were any satisfactory evidence to show that St. Dominic had identified himself with the pre-existing Rosary and become its apostle. But here we are met with absolute silence. Of the eight or nine early Lives of the saint, not one makes the faintest allusion to the Rosary. The witnesses who gave evidence in the cause of his canonization are equally reticent. In the great collection of documents accumulated by Fathers Balmé and Leladier, O.P., in their "Cartulaire de St. Dominique" the question is studiously ignored. The early constitutions of the different provinces of the order have been examined, and many of them printed, but no one has found any reference to this devotion. We possess hundreds, even thousands, of manuscripts containing devotional treatises, sermons, chronicles, and the like written by the Early Preachers between 1220 and 1450; but no single verifiable passage has yet been produced which speaks of the Rosary as instituted by St. Dominic or which even makes much of the devotion as one specially dear to his children. The charters and other deeds of the Dominican convents for men and women, as M. Jean Guiraud points out with emphasis in his edition of the Cartulaire of La Prouille (I, xxxviii), are equally silent. Neither do we find any suggestion of a connexion between St. Dominic and the Rosary in the paintings and sculptures of these two and a half centuries. Even the tomb of St. Dominic at Bologna and the numberless frescoes by Fra Angelico representing the brethren of the Rosary as closely associated with, if not the devotees of, the devotion of "Our Lady's Psalter" (a hundred and fifty Hail Marys) was instituted or revived by St. Dominic. Alan was a very earnest and devout man, but, as the highest authorities admit, he was full of delusions, and based his revelations on the imaginary testimony of writers that never existed (see Quetif and Echard, "Scriptores O.P." I, 849). His preaching, however, was attended with much success. The Rosary Confraternities, organized by him and his colleagues at Douai, Cologne, and elsewhere had great vogue, and led to the printing of many books, all declaring the idea of Alan. Indulgences were granted for the good work that was thus being done and the documents conceding these indulgences accepted and repeated as was natural in that uncritical age, the historical data which had been inspired by Alan's writings and which were submitted according to the usual practice by the promoters of the confraternities themselves. It was in this way that the tradition of Dominican authorship grew up. The first Bulls of this authorship with some reserve: "Pro suhoris legiter" says Leo X in the earliest of all, "Pastoris seminal" 1520; but many of the later popes were less scrupulous.

Two considerations strongly support the view of the Rosary tradition just expounded. The first is the gradual surrender of almost every notable piece of evidence that has at one time or another been relied upon to vindicate the supposed claims of St. Dominic. Tourist and Alan Butler appealed to the Memoirs of a certain Luminose of Apessa who professed to have heard St. Dominic preach at Bologna, but these Memoirs have long ago been proved to be a forgery. Dansaz, Von Loe and others attached much importance to a fresco at Muret; but the fresco has now disappeared and there is no record of believing that the rosary once seen in that fresco was painted in at a later date ("The Month" Feb. 1901, p. 179). Mamachi, Essef, Waleh, and Von Loe quote some alleged contemporary verses about St. Dominic in connexion with a crown of roses; but the original manuscript has disappeared, and it is certain that the writers named have printed Dominicus where Benoist, the only person who has seen the manuscript, read Dominus. The famous will of Anthony Sers, which professed to leave a bequest to the Confraternity of the Rosary at Falencia in 1221, was put forward as a conclusive piece of testimony by Mamachi; but it is now admitted by Dominican authorities to be a forgery ("The Irish Rosary," Jan., 1901, p. 92). Similarly, a supposed reference to the subject by Thomas a Kempis in the "Chronicle of Mount St. Agnes" is a pure blunder ("The Month", Feb., 1901, p. 187). With this may be noted the absence of the Rosary in the authoritative works of reference. In the "Kirchlichen Handerikion" of Munich and in the latest edition of Herder's "Konversationslexikon" no attempt is made to defend the tradition which connects St. Dominic personally with the origin of the Rosary. Another consideration which cannot be developed here is the multitude of conflicting legends concerning
ing the origin of this devotion of Our Lady's Psalter which prevailed down to the end of the fifteenth century, as well as the early diversity of practice in the manner of its recitation. These facts agree ill with the supposition that it took its rise in a definite revelation and was jealously watched over from the beginning by one of the most learned and influential of the religious orders of the Western Church. No early instance has been recorded in the history of the Rosary and its confraternities in modern times and the vast influence it has exercised for good are mainly due to the labours and the prayers of the sons of St. Dominic, but the historical evidence serves plainly to show that their interest in the subject was only awakened in the last years of the thirteenth century. That the Rosary is pre-eminent the prayer of the people adapted alike for the use of simple and learned is proved not only by the long series of papal utterances by which it has been commended to the faithful but by the daily experience of all who are familiar with it. The objection so often made against its "rain repetitions" is felt by none but those who have failed to realize how entirely the spirit of the exercise lies in the meditation upon the fundamental mysteries of our faith. To the initiated the words of the angelical salutation form only a sort of half-conscious prayer, an external formality which is as equally helpful for any one as the houses of the Western peoples of the Latin Rite with those of the Eastern Rite at the beginning of the Crusades caused the practice of saying prayers upon knots or beads to become widely diffused among the monastic houses of the Latin Church, although the practice had been observed in some instances before that date. On the other hand, the recitation of the Rosary, as practised in the West, has not become general in the Eastern Churches; there it still retains a form as a monastic exercise of devotion, and in but little known or used among the laity, while even the secular clergy seldom use it in their devotions. Bishops, however, retain the rosary, as indicating that they have risen from the monastic state, even though they are in the world governing their dioceses.

The rosary used in the present Greek Orthodox Church—whether in Russia or in the East—is quite different in form from that used in the Latin Church. The use of the prayer-knots or prayer-beads originated from the fact that monks, according to the rule of St. Basil, the only monastic rule known to the Greek Rite, were enjoined by their founder to recite their prayers in three sets of one hundred beads without any distinction of great or little ones, while the Old Slavonic, or Russian, rosary generally consists of 103 beads, separated in irregular sections by four large beads, so that the first large bead is followed by 17 small ones, the second by 33 and the third by 41. The fourth by 33 small ones, and the fifth by 12 small ones, with an additional one added at the end. The two ends of a Russian rosary are often bound together for a short distance, so that the lines of beads run parallel (hence the name ladder used for the rosary), and they finish with a three-cornered tassel, or an oval one, or a tassel or other final, corresponding to the cross or medal used in a Latin rosary.

HERBERT THURSTON.
The use of the Greek rosary is prescribed in Rule 87 of the “Nomocanon,” which reads: “The rosary should have one hundred [the Russian rule says 103] beads; and upon each bead the prescribed prayer should be recited.” The usual form of this prayer prescribed for the rosary runs as follows: “O Lord Jesus Christ, Son and Word of the living God, through the intercessions of thy most holy Mother [††† μαρτυρομεν παντων Μαριας] and of all thy Saints, have mercy and save us.” If, however, the rosary be said as a penitential exercise, the prayer then is: “O Lord Jesus Christ, Son of God, have mercy on me a sinner.” The Russian rosary is divided by the four large beads so as to represent the different parts of the canon of the Office, the recitation of the rosary replaces, while the four large beads themselves represent the four Evangelists. In the monasteries of Mount Athos, where the severest rule is observed, from eighty to a hundred rosaries are said daily by each monk. In Russian monasteries the rosary is usually said five times a day, while in the recitation of it the “great reverences” are reduced to ten, the remaining being simply sixty “little reverences” (bowing of the head not further than the waist) and sixty recitations of the penitential form of the prescribed prayer.

Among the Greek Uniates the rosary is but little used by the laity. The Basillian monks make use of it in the Eastern style just described and in many cases use it in the Roman fashion in some monasteries. The more active life prescribed for them in following the example of Latin monks leaves less time for the recitation of the rosary according to the Eastern form, whilst the reading and recitation of the Office during the canonical Hours fulfills the original monastic obligation and so does not require the rosary. Latterly the Melchites and the Italo-Greeks have in many places adopted among their laity a form of rosary similar to the laity used in the Roman Rite, but its use is far from general. The Ruthenian and Rumanian Greek Catholics do not use it among the laity, but reserve it chiefly for the monastic clergy, although lately in some parts of Galicia its lay use has been occasionally introduced and is regarded as a latinitizing practice. It may be said that among the Greeks in general the use of the rosary is regarded as a religious exercise peculiar to the monastic life; and wherever among Greek Uniates its lay use has been introduced, it is an imitation of the Roman practice. On this account it has never been popularized among the laity of the peoples, who probably have strongly attached to their venerable Eastern Rite.

Andrew J. Shipman.

BREVIARY HYMS OF THE ROSARY.—The proper office granted by Leo XIII (5 Aug., 1888) to the feast contains four hymns which, because of the pontiff’s great devotion to the Rosary and his skilful work in classical Latin verse, were thought by some critics to be the compositions of the Holy Father himself. They have been traced, however, to the Dominican Office published in 1834 (see Chevalier, “Reperto- rum Hymnologicum,” under the fourth titles of the hymns) and were afterwards granted to the Dioceses of Segovia and Venics (1841 and 1848). Their author was a pious client of Mary, Eustace Sirena. Exclusive of the devotional meaning of the hymns, each hymn contains five four-lined stanzas of classical dimeter iambics. In the hymn for First Vespers (Celestis aule nuntius) the Five Joyful Mysteries are celebrated, a single stanza being given to a mystery. In the same symmetrical manner the hymn for Matins (In monte olivis consi) deals with the Five Sorrowful Mysteries and that for Lauds (Jam morte victor obitura) with the Five Glorious Mysteries. The hymn for Second Vespers (Te gestientem gaudia) maintains the symmetrical form by devoting three stanzas to a recapitulation of the three sets of mysteries (Joyful, Borrowed, Glorious), prefacing them with a stanza which sums up all three and devoting a fifth stanza to a poetical invitation to weave a crown of flowers from the “rosary” for the Mother of fair love. The compression of a single “mystery” into a single stanza may be illustrated by the first stanza of the first hymn, devoted to the First Joyful Mystery:

Cælestis aule nuntius,
Areana pandens Numinis,
Pleasit animum destitia.
Dei Parentem Virginem.

“The envoy of the Heavenly Court,
Sent to unfold God’s secret plan,
The Virgin hails as full of grace,
And Mother of the God made Man”

(Bagshawe).

The first (or preface) stanza of the fourth hymn sums up the three sets of mysteries:

Te gestientem gaudia,
Te saeluius donator,
Te judi amicatam gloria,
O Virgo Mater, panegimus.

The still greater compression of five mysteries within a single stanza may be illustrated by the second stanza of this hymn:

Ave, redundans gaudio
Dum concipiis, dum visitas,
Et edis, offers, invenis,
Mater beata, Filium.

“Hail, filled with joy in heart and mind,
Conceiving, visiting, or when
Thou didst bring forth, offer, and find
Thy Child amidst the learned men.”

Archbishop Bagshawe translates the hymns in his “Breviary Hymns and Missal Sequences” (London, s. d., pp. 114–18). As in the illustration quoted from one of these, the stanza contains (in all the hymns) only two rhymes, the author’s aim being “as much as possible to keep to the sense of the original, neither adding to this, nor taking from it” (preface). The other illustration of a fully-rhymed stanza is taken from another version of the four hymns (Henry in the “Rosary Magazine,” Oct., 1891). Translations into French verse are given by Albin, “La Poésie du Bréviaire”, with slight comment, pp. 345–56.

H. T. Henry.

CONFRATERNITY OF THE HOLY ROSARY.—In accordance with the conclusion of the article Rosary no sufficient evidence is forthcoming to establish the existence of any Rosary Confraternity before the last quarter of the fifteenth century. Dominican guilds or fraternities there were, but we cannot assume without proof that they were connected with the Rosary. We know, however, that through the preaching of Alan de Rupe such associations began to be erected shortly before 1475; that established at Cologne in 1474 by Father James Spranger is especially famous; from his and one or two others such as his followers, but we cannot assume without proof that they were connected with the Rosary. We know, however, that through the preaching of Alan de Rupe such associations began to be erected shortly before 1475; that established at Cologne in 1474 by Father James Spranger is especially famous; from his and one or two others such as his followers, but we cannot assume without proof that they were connected with the Rosary.
and sisters." Even at that time the entry of the name of each associate on the register was an indispensable condition of membership, and so it remains to this day. The confraternity was under the Dominicans, and their close connection with the Rosary friars, which by degrees began to be erected in many other places under Dominican supervision, that the great vogue of the Rosary as well as the acceptance of a more uniform system in its recitation was mainly due. The recitation of the Rosary is alone prescribed for the members to at present they undertake to recite the fifteen mysteries at least once in each week—but even this does not in any way bind under sin. The organization of these confraternities is entirely in the hands of the Dominican Order, and no new confraternity can be anywhere begun without the sanction of the general. It is to the members of the Rosary confraternities that the principal indulgences have been granted, and there can be no need to lay stress upon the special advantages which the confraternity offers by the union of prayer and devotional exercises as well as the participation of merits in this which is probably the largest organization of the kind within the Catholic Church. Moreover, in the "patent of erection," which is issued for each new confraternity by the General of the Dominicans, a clause is added granting to all members enrolled therein "a participation in all the good works which by the grace of God are performed in the works of the brethren or sisters of the said [Dominican] Order." An important "Apostolic Constitution on the Rosary Confraternity," which may be regarded as a sort of new charter, was issued by Leo XIII on 2 Oct., 1898.

The Perpetual Rosary is an organization for securing the continuous recitation of the Rosary by day and night by a certain number of associates who perform their allotted share at stated times. This is a development of the Rosary Confraternity, and dates from the seventeenth century. The "Living Rosary" was begun in 1826, and is independent of the confraternity; it consists in a number of circles of fifteen members who each agree to recite a single decade every day and who thus complete the whole Rosary between them.

Nearly all the works mentioned in the last article devote more or less space to the Confraternity of the Rosary. They are all written at various times, and for various purposes, and are in general reprints of earlier periodicals. John Petermann has made a special study of the confraternity, and his "Istoria de la confraternita del Rosario" (1874) is still the standard work on the subject. M. J. P. KIRCH.

Rosati, Joseph. See Saint Louis, Archidioecese of.

Roscelin, a monk of Compiègne, was teaching as early as 1087. He had intercourse with Lanfranc, St. Anselm, and Ivo of Chartres. Brought before a council at Soissons (1093), where he was accused of Trithemius, he denied the doctrine attributed to him; but this was done through fear of excommunication, for later he returned to his early theories. He was successively in England, at Rome, and finally returned to France. Of his writings there exists only a letter addressed to Abelard. Haureau brings forward his name in connexion with a text: "Sententia de universalibus secundum magistrum R. ("Notices et extr. de quelques manuscrits lat.")., V., Paris, 1892, 224), but this is a conjecture. On the other hand we have as evidences of his doctrine texts of St. Anselm, Abelard, John of Salisbury, and an anonymous epigram. His share in the history of ideas and especially the value of his Nominalism have been exaggerated, his celebrity being far more due to his theological Trithemius. This article will study him from both points of view.

personality is much discussed and who has not yet been definitively identified. What constitutes the "sententia vocum"? To judge of it we have besides the texts mentioned above which bear directly on Roscelin an exposition of the treatise "De generibus et speciebus illud quidem sive subsistentiae sive in nuditibus habendo sive" (this text is not in the Nominalismus seu universale of Abelard) to which Victor Cousin referred. The "sententia vocum" was one of the anti-Realist solutions of the problem of universals accepted by the early Middle Ages. Resuming Porphry's alternative (mox de generibus et speciebus illud quidem sive subsistentiae sive in nuditibus habendo sive) the first medium- 

II. TRITHEISM OF ROSCELIN.—Roscelin considered the three Divine Persons as three independent beings, like the three correges. If these persons united, he adds, it might truly be said that there are three Gods. Otherwise, he concluded, God the Father and God the Holy Ghost would have become incarnate with God the Son. To retain the appearance of dogmata he admitted that the three Divine Persons had but one will and power [Audio ... quod Roscellus dicit in tres personas esse tres res ab invicem separatas, sicut sunt tres angeli, ita tamen ut una sit voluntas et potentia aut Patrem et Spiritum sanctum esse incarnatum; et tres deos vere posse dici usus admitteret (letter of St. Anselm to Fulquius)]. This characteristic Trithesism, which St. Anselm and Abelard agreed in refuting even after its author's conversion, seems an indisputable application of Roscelin's anti-Realism. He argues that if the three Divine Persons form but one God three have become incarnate, which is inadmissible. There are therefore three Divine substances, three Gods, which are three angels, that is, three beings that constitute an individual, which is the fundamental assertion of anti-Realism. The ideas of the theologians are closely linked with those of the philosophers. Roscelin's letter to Abelard has been re-edited by Regensburg, De Nominalismus seu universale in die Philos. Phil. der Mittelalt. (Münster, 1910); De Wulf, Hist. of Medieval Phil. (New York, 1939); T. Hill (London, 1911); Eckart, Zur Gesch. des Nominalismus vor Roscelin (Vienna, 1860); Picavet, Roscelin, phil. et theologum Phil. (London, 1897). M. De Wulf.

Roscomon, capital of County Roscommon, Ireland, owes origin and name to a monastery founded by St. Coman in the first half of the eighth century on a "rost" or wooded point amidst marshes. Ware and his copiers make Coman author of a monastic rule observed throughout three-fourths of Connaught; but this statement is wrongly deduced from annalist 

But this theory of Roscelin's had no connexion with the abstract concept of genus and species. He did not touch on this question. It is certain that he did not deny the existence or possibility of these concepts, and he was therefore not a Nominalist in the fashion of Taine or in the sense in which Nominalism is at present understood. That is why, in reference to the modern sense of the word, we have called it a pseudo-Nominalism. John of Salisbury, speaking of "nominalia secta" (Metalog. II, 17), said it was "the rudimentary, even childish, solution do not compromise the value of universal concepts and may be called a stage in the development of moderate Realism.

Roscelin was also taken to task by St. Anselm and Abelard for the less clear idea which he gave of the whole and of composite substance. According to St. Anselm he maintained that colour does not exist independently of the horse which serves as its support and that the wisdom of the soul is not outside of the soul which is wise (De fide trinit., 2). He denies the intellect, new at that time, and is said to have been 

standing the windy loquacity of Rainbert of Lille one has but to breathe into his hand (manuque ori 

ROSCOMON
till the latter part of the fifteenth century an Irish community under native superiors—despite the Norman supremacy within the limits of the kingdom, of the 1268 and the policy of ousting the Irish from their monasteries. During the great Western Schism, Thomas Macheugan (Mac Aodhagain) whom the antipope Clement VII made prior of this house, came from Avignon as Clement's agent, and convening the prelates, clergy, and laity of Connaught at Roscommon, secured the admission of the order, except in 1287 and of Elphin, who did not attend, and the Bishop of Kilala, who sent his archdeacon to uphold the right of Urban VI. When the O'Connors made terms with Queen Elizabeth, the abbey and its possessions were attached to the constableship of Roscommon Castle, and subsequently granted to Sir Nicholas Malbie; even the site is scarcely traceable.

The Dominican friary that was situated at Roscommon was founded in the year 1253 by Fethlimidh O'Conchubhair, King of Connaught, and consecrated to the Blessed Virgin in 1257; in 1305 the founder ended his stormy life within its walls, and was buried there. His monument, still extant, represents him recumbent in long robes of peace and wearing a royal crown. In subsequent centuries this church was the chosen burial-place of several of his and other princely families. After the confiscation the house passed from the Society of Jesus, was first attached to the constableship of Roscommon, and then granted to Malbie; but the friars lingered around the spot. Under Cromwell several of them, amongst whom O'Heyne mentions Donald O'Neagh-
ten, Edmund O'Bern, Raymund MacEichaidh, and Bernard O'Kelly, were put to death. Afterwards they obtained a small house and land and assembled a community numbering sixteen in 1791; but it died out in 1844. Of the original buildings only ruins of the church remain. The Franciscans also had a convent at Roscommon for a brief period; founded in 1269, it was burned down in 1270, and on account of the founder's death never rebuilt.

Rose, the Golden. See Golden Rose.

Rosess, a titular see. The official catalogue of the Roman Curia mentioned formerly a titular see of Rosea in Syria. The title is borne at present by Mgr. Felix Jourdan de la Passeridie, of the Oratory of France, who lives in Paris. The name Rosea being only a corruption of Rhoeus was replaced by the latter in 1884 (see Ruosus).

S. Pétridès.

Rosess, Diocese of (Rosessis), suffragan of Port of Spain, Trinidad, B. W. I. The different islands of the Caribean Sea, which constitute the Diocese of Roseau, belonged to the Vicariate Apostolic of Port of Spain up to 1850, when Pius IX by brief of 30 April, 1860, erected the Diocese of Roseau, with the diocese of Port of Spain, of which it is the suffragan. The Very Reverend Father Michael Monaghan was elected first bishop of the new diocese and consecrated 16 February, 1851. He died in St. Thomas, 14 August, 1855, and was succeeded in 1856 by Rev. Father Michael Vesque, who died 10 August, 1859. The third bishop was Benjamin Marie Charles Potier, C.J.M., who governed the diocese from 1859 to 1878. Next came Bishop Michael Naughten from 1880 till 4 July, 1900. The present occupant is Philip Schelfhout, C.S.S.R., b. at St. Nicholas, Belgium, 27 September, 1850, ordained priest 18 October, 1878, and consecrated bishop, 16 March, 1902. The diocese comprises the islands of Dominica, B. W. I., with 30,000 Catholics, 12 parishes, 18 priests, 16 churches, and 4 chapels; Montserrat, B. W. I., with 600 Catholics, 1 parish, 1 priest, 1 church; Antigua, B. W. I., with 400 Catholics, 1 parish, 1 priest, 1 church; St. Kitts, B. W. I., with 1500 Catholics, 1 parish, 2 priests, 1 church, 2 chapels; St. Croix, D. W. I., with 400 Catholics, 2 parishes, 4 priests, 2 churches, 1 chapel; St. Thomas, D. W. I., with 3000 Catholics, 1 parish, 3 priests, 1 church, 1 chapel. The total Protestant population of the diocese is about 100,000. In the smaller British Islands of Nevis, Anguilla, Barbuda, Sombado, and in the Virgin Islands, Tostola, Anegada, and Virgin Gorda, as also in the Danish Island of St. John, the Catholic Church has so few adherents that no priest has ever been resident there. With the exception of two parishes, which are served by secular priests, the whole diocese is under the care of the Redemptorist Fathers of the Belgian province, and the Fathers of Mary Immaculate (Chavagnac en Paillers, France).

There are also 14 Redemptorist Brothers on the mission. In Roseau, the Religious of the Faithful Virgin devote themselves to the education of the girls of both the lower and higher classes, while the Ladies of the Union of the Sacred Hearts conduct a high school for girls in St. Thomas. In Dominica only all the schools are in the hands of the local Government; however, religious instruction is given by the priests during school hours. In the other islands, with the exception of Antigua, parochial schools are taught at the mission.

Rosecrans, William Starke, b. at Kingston, Ohio, U. S. A., 6 Sept., 1819; d. near Redondo, California, 11 March, 1898. The family came originally from Holland and settled in Pennsylvania, moving thence to Ohio. His mother was a daughter of Samuel Hopkins, a soldier of the Revolution and one of the signers of the Declaration of Independence. He graduated at the U. S. Military Academy, West Point, in July, 1837, and after a brief service in the engineer corps returned to the Academy as a professor, remaining there until 1847. It was during this period that he became a Catholic.

In 1854 he resigned from the army, but at the breaking out of the Civil War he was made a colonel of volunteers, and, in June, 1861, a brigadier-general of regulars. During the succeeding years he held various important commands in West Virginia, Mississippi, and Tennessee, until 19 and 20 Sept., 1863, when he was defeated by Gen. Bragg, at the battle of Chickamauga. Then after a short period of service in the department of Missouri he was relieved of all command. Up to this he had been uniformly successful as a good fighter and military strategist. At the close of the war he resigned from the army and, in 1868, served as U. S. Minister to Mexico, where from 1869 to 1881 he devoted himself to railroad and industrial enterprises. He was elected to Congress as a Demo-

William Starke Rosecrans From a Photograph.
crat, in 1880, and again in 1882. From 1885 to 1893 he was registrar of the U.S. Treasury. In 1889 Congress restored him to the rank and pay of a brigadier-general of the regular army on the retired list.

His brother, Sylvester Horton Rosecrans, first Bishop of Columbus, was also a convict. Born in Ohio, 8 Feb. 1827, he was sent to Kenyon College, the leading Episcopalian institution of the state. While there in 1845 he received a letter from his brother William, then a professor at West Point, announcing his conversion to the Catholic Faith. It so impressed him that he also sought instruction and became a Catholic. He entered and graduated in 1846. Elected to study for the priesthood he was sent by the Bishop of Cincinnati as a student to the College of Propaganda, Rome, where he was ordained priest in 1852. Returning to Cincinnati he officiated at St. Thomas's church, and was a professor in the diocesan seminary. In 1859 a college was opened in connexion with the seminary and he was made its president. In 1862 he was consecrated titular Bishop of Pompeipolis and Auxiliary of Cincinnati. When the Diocese of Columbus was created, 3 March, 1868, he was transferred to that see. At its first bishop he died 21 October, 1878 (see COLUMBUS, DIACONI or). During his residence in Cincinnati he was a frequent editorial contributor to the "Catholic Telegraph".

Roseline (Rosolina), SAINT, b. at the Château of Arcs in eastern Provence, 1263; d. 17 January, 1329. Having overcome her father's opposition Roseline became a Carthusian nun at Berstaud in the Alps of Dauphine. Her "consecration" took place in 1288, and about 1300 she succeeded her aunt, Blessed Jeanne or Diane de Villeneuve, as Prioress of Celle-Robaude in the Diocese of Fréjus near her home. In 1320 her brother Hélio, Grand Master (1319-46) of the Knights of St. John, restored the monastery, and in 1324 St. John XXII, formerly Bishop of Fréjus, increased its revenue, granting indulgences for the anniversary of the dedication of the church. Roseline obtained leave to resign her office before her death. Many visions together with extraordinary austerities and great power over demons are ascribed to her. Her feast is given in the Acta SS. on 11 June, the day of the first translation of her remains in 1334 by her brother Elsear, Bishop of Digne; but by the Carthusian Order it is celebrated on 16 October. There has always been a local cultus and this was confirmed for the Diocese of Fréjus by a Decree of 1851, for the Carthusian Order in 1577. The saint is usually represented with a reliquary containing two eyes, recalling the fact that her eyes were removed and preserved apart. This relic was still extant at Arcs in 1882. There is no ancient life of the saint, but that given in the Acta SS. 2 June, 489 sq., was constructed by Papebroch from ancient documents.

RAYMOND WEBSTER.

Roseau (Hung., Rozsnyó), Diocese of (Rosna-
vienne), in Hungary, suffragan of Eger, established by Maria Theresa, in 1775-76. In 1836 Cardinal Peter Pázmány proposed to establish a diocese in the east part of Hungary, where the Catholic Faith was almost dead. Pázmány's death intervened, and nothing was done until Maria Theresa took up the plan. In 1776 John Gálgyay was appointed first Bishop of Roseau, but died before taking charge. His successor, Count Anthony Révay (1776-80), caused the church to be restored and the high altar to be removed. Of his successors may be mentioned: John Szórtosy (1827-35), Bishop of Eger, and Bishop of Gran; Ethelbert Bartakovics (1845-50), later Archbishop of Eger. Since 1905 the see is governed by Louis Balás. The diocese is divided into 3 archdeaconries and has 2 abbeys and 3 provostships. The chapter consists of 6 active clergy. The diocese has 99 parishes, 152 churches, 151 chapels, 99, and there are 154 secular, 28 regular, priests; 3 monasteries; 34 nuns; 190,000 Catholics; 10,165 Greek Uniates; 97,071 Lutherans; 44,600 Calvinists; 11,220 Jews. The seminary was established in 1814.

A. ALDÁSY.

Rose of Lima, SAINT, virgin, patroness of America, b. at Lima, Peru, 20 April, 1586; d. there 30 August, 1617. The name "Rose of Lima" was given her by the people of Lima because, when an infant, her face had been seen transformed by a mystical rose. As a child she was remarkable for great reverence, and pronounced love, for all things relating to God. This so took possession of her that thenceforth her life was given up to prayer and meditation. She made a special devotion to the Infant Jesus and His Blessed Mother, before whose altar she spent hours. She was scrupulously obedient and of untiring industry, making rapid progress by earnest attention to her parents' instruction, to her studies, and to her domestic work, especially with her needle. After reading of St. Catherine she determined to follow her model. She began by fasting three times a week, adding secret severe penances, and when her vanity was assailed, cutting off her beautiful hair, wearing coarse clothing, and roughening her hands with toil. All this time she had to struggle against the objections of her friends, the ridicule of her family, and the censure of her parents. Many hours were spent before the Blessed Sacrament, which she received daily. Finally she determined to take a vow of virginity, and inspired by supernatural love, adopted extraordinary means to fulfill it. At the outset she had to overcome the opposition of her father to marry. For ten years the struggle continued before she won, by patience and prayer, their consent to continue her mission. At the same time great temptations assailed her purity, faith, and constancy, causing her excruciating agony of mind and desolation of spirit, urging her to more frequent mortifications; but daily, also, Our Lord manifested Himself, fortifying her with the knowledge of His presence and consoling her mind with evidence of His Divine love. Fasting daily was soon followed by perpetual abstinence from meat, and that, in turn, by use of only the coarsest food and just sufficient to support life. Her days were occupied with acts of charity, and the care of her poor, and with the consent of her confessor, she was allowed later to become practically a recluse in this cell, save for her visits to the Blessed Sacrament. In her twentieth year she received the habit of St. Dominic. Thereafter she redoubled the severity and variety of her penances to an heroic degree, wearing constantly a metal spiked crown, covering her body with roses, and an iron chain about her waist. Days passed with-
out food, save a draught of gall mixed with bitter herbs. When she could no longer stand, she sought repose on a bed constructed by herself, of broken glass, stone, pottery, and thorns, and there she admitted that the thought of lying down on it made her tremble with dread. Fourteen years this martyrdom of her body continued without relaxation, but not without consolation. Our Lord revealed Himself to her frequently, flooding her soul with such inexpressible peace and joy as to leave her in ecstasy for hours. At the last, she offered to Him all her mortifications and penances in expiation for offences against His Divine Majesty, for the idolatry of her country, for the conversion of sinners, and for the souls in Purgatory. Many miracles followed her death. She was beatified by Clement IX, in 1667, and canonized, with St. Francis of Damasc, and she is so honourable. Her feast is celebrated 30 August. She is represented wearing a crown of roses.

Hansen, Vita Mirabilis (1864), Spanish tr. by Farrar.

Edw. L. Atme.

Rose of Viterbo, Saint, virgin, b. at Viterbo, 1235; d. 6 March, 1252. The chronology of her life must always remain uncertain, as the Acts of her canonization, the chief historical sources, record no dates. Those given above are accepted by the best authorities. Born of poor and pious parents, Rose was remarkable for her meekness and for her physical endowments from her earliest years. When but three years old, she raised to life her maternal aunt. At the age of seven, she had already lived the life of a recluse, devoting herself to penances. Her health succumbed, but she was miraculously cured by the Blessed Virgin, who ordered her to enroll herself in the Third Order of St. Francis, and to preach penance to Viterbo, at that time (1247) held by Frederick II of Germany and a prey to political strife and heresy. Her mission seems to have extended for about two years, and such was her success that the prefect of the city decided to banish her. The imperial power was seriously threatened. Accordingly, Rose and her parents were expelled from Viterbo in January, 1250, and took refuge in Soriano. On 5 December, 1250, Rose foretold the speedy death of the emperor, a prophecy realized on 13 December. Soon afterwards she went to Vitorchiano, whose inhabitants had been perverted by a monk-sorcerer. Rose secured the conversion of all, even of the sorcerer, by standing unscathed for three hours in the flames of a burning pyre, a miracle as striking as it is well attested. With the restoration of the papal power in Viterbo (1251) Rose returned. She wished to enter the monastery of St. Mary of St. Roses, but was refused because of her poverty. She humbly submitted, foretelling her admission to the monastery after her death. The remainder of her life was spent in the cell in her father's house, where she died. The process of her canonization was opened in that year by Innocent IV, but was not definitively undertaken until 1457. Her feast is celebrated on 4 September, when her body, still incorrupt, is carried in procession through Viterbo.

Gregory Cleary.

Rosicrucians, the original appellation of the alleged members of the occult-cabalistic-theosophic "Rosy Cross" society, was first applied in 1503 to a letter "Fama Fraternitatis R.C." ("Rosae Crucis"), which was circulated in MS. as early as 1610 and first appeared in print in 1614 at Casell. To the first two additions were prefixed the tract "Allgemeine und Generalreformation der ganzen weiten Welt," a translation of Fr. Boccalini's "Dei Ragguagli di F. Parnaso," 1612. Beginning with the Fama, which was written in 1615, the third Rosicrucian rudiment, "Confessio der Fraternitatis," was added to the "Fama." According to these, the Rosicrucian brotherhood was founded in 1408 by a German nobleman, Christian Rosenkreuz (1378-1494), formerly a monk, who while travelling through Damascus and Persia had been initiated into Arabian learning (magic), and who considered an antipapal Christianity, tinged with theosophy, his ideal of a religion. Concerned above all else that their names should appear in the Book of Life, the brothers were to consider the making of gold as the most important thing, although, otherwise, true philosophers (Occultists) this was an easy matter and (1422-1454). They must apply themselves zealously and in the deepest secrecy to the study of Nature in her hidden forces, and to making their discoveries and inventions known to the order and profitable to the needs of humanity. And to further the object of the said order they must assume an annunciation at the "Echo of the Holy Spirit," the secret head-quarters of the order, cure the sick gratuitously, and whilst each one procured himself a successor they must provide for the continuance of their order. Free from ill health and pain, these "Invisibles," as they were called in the Germany of the 16th century, affirmed for the time when the Church should be "purified." For two hundred years, while the world never had the least suspicion of their existence, the brotherhood transmitted by these means the wisdom of "Father" Rosenkreuz, one hundred and twenty years after the latter's burial, until about 1604 they finally became known. The "Fama," which effected this, invited "all of the scholars and rulers of Europe" openly to favour the cause, and eventually to sue for entrance into the fraternity, to which, nevertheless, only chosen souls would be admitted. The miraculous penalty of the age for esoterism, magic, and confederacies caused the "Fama" to raise a feverish excitement in men's minds, expressed in a flood of writings for and against the brotherhood, and in passionate efforts to win admission to the order, or at least to discover who were its members. All of these endeavours, even by scholars of real repute like Descartes and Leibniz, were vainly pursued. Most falsely fabulous and impossible "History" of the brotherhood, it was apparent that it depended upon a "mystification." This mystification was directly explained by an investigation of the author, who appears unquestionably to have been the Lutheran theologian of Wurttemberg, John Valentin Andrae (1602-1654). According to his own admission, Andrae composed in 1602 or 1603 the Rosicrucian book, "Chymische Hochzeit Christiani Rosenkreuz 1459," which appeared in 1616. This book, called by Andrae himself a youthful literary trifle in which he intended to ridicule the mania of the times for occult marvels (Life, p. 10), bears the closest intrinsic relation to the "Fama," which, in the light of this, is undoubtedly a later work of Andrae's or at least of one of the circle of friends inspired by him. Alchemistic occultism is mocked at in these works and in the "General Reformation," the follies of the then untimely reformers of the world are openly ridiculed. The fantastic form of the tracts is borrowed from contemporary romances of knighthood and travel. The "Rosy Cross" was chosen for the symbol of the order because, first, the rose and cross were ancient symbols of occultism and secondly, occur in the family arms of Andrae. It recalls Luther's motto, "Des Christi Guten, der kniet unter dem Kreuze steht" (Hoesbach, 121). As a result of his satirically meant but seriously accepted works, which soon gave rise to occult humbuggery (opposed by him) in new Rosi-
crucian raiment, Andrea openly denounced Rosicrucianism and frequently referred to it as a ridiculous comedy and folly. In spite of this, the Rosicrucian fraud, which served in many ways as a model for the anti-Masonic Tariż-Schunhild, has continued effective until the present day. In all of the works of which members of the Rosicrucian Order, and Robert Fludd were its champions. Pseudo-Rosicrucian societies arose, falsely claiming descent from the genuine fraternity of the "Fama." After 1750 occult Rosicrucianism was propagated by Freemasonry, where it led to endless extravagant manifestations (St. Germain, Casioletto, Seligmann, and others). In the system of 14th of the 18th century in "Scottish" Freemasonry, especially in the Rosenkruz degree, the Rosicrucian symbols are still retained with a Masonic interpretation. Finally, since about 1866 there have existed in England and Scotland (London, Newcastle, York, Glasgow) and in the United States (Philadelphia) colleges of a Masonic Rosicrucian society, whose members claim to be direct descendants of the brotherhood founded in 1408. Only Masonic Masters are eligible for membership. According to the definition of the president of the London branch (Supreme Magus), Brother Dr. Wm. W. M. B. L. N. E. S. it is "the aim of the Society to afford mutual aid and encouragement in working out the great problems of life and in searching out the secrets of nature; to facilitate the study of philosophy founded upon the Kabbalah and the doctrines of Hermes Trismegistus, which was inculcated by the original Prior Rosica Crucis of Germany, A. 1450," and to "form a body of men engaged in research and to find a scheme of universal morality of all that now remains of the wisdom, art, and literature of the ancient world." The view which has been lately revised, especially by Katsch and Pike, that Rosicrucianism definitely or even perceptibly cooperated in the foundation of modern Freemasonry in 1717, is contradicted by well-known historical researches.

HERMANN GRUBER.

ROSKOVÁNY, August, Bishop of Neutra in Hungary, doctor of philosophy and theology, b. at Szenna in the County of Ung, Hungary, 7 December, 1807; d. 24 February, 1892. He took his gymnasia class in the college of the Piarists at Kis-Szeben from 1817–22, studied philosophy at Eger, 1822–24, theology in the seminary at Eger, and completed his training at the Augustinian at Vienna. After his doctorate of theology in the priesthood in 1831 he was for a short time engaged in pastoral duties, then went to the seminary at Eger as prefect of studies, became vice-rector of the seminary, and in 1841 rector. In 1836 he was made a cathedral canon of Eger, in 1839 received the Abbey of Staur, in 1847 became auxiliary bishop, in 1850 capi-

Bishop of Neutra. Roskovany was also made a Roman count, prelate, and assistant at the papal throne. His charity is shown by the foundations he established, valued at several hundred thousand guilden. He was distinguished as an ecclesiastical writer. Among his works, all of which were approved by the Church, he mentioned: "De primatu Romani Pontificis ejusque juris" (Augsburg, 1839; 2nd ed., Agram, 1841); "De matrimonio mixtia" (5 vols., Fürnkirchen, 1842; Pesth, 1854, 1870–71); "De matrimonio in ecclesia catholic" (3 vols., Augsburg, 1837–40); "Monumenta catholica pro independietae poloniae et germaniae ab oppressione et opere gentium [...]" (Prague, 1847; Pesth, 1856, 1865, 1870–71); "Collobas et brevirarium, duo gravissima clericorum officia," etc. (7 vols., Pesth, 1867, 1875); "Romanus Pontifex tamquam primas ecclesiae," etc. (16 vols., Neutra and Comoromi, 1867, 1875); "Beata Virgo Maria in suo conceptu immacula-
ta" (12 vols., Budapest, 1873–4; Neutra, 1877).

VONK, Adalbert u. nysor_shutdown (Neutra, 1902), written in Hungarian; also in Hungarian, Sivatar, Magyar, giving a complete list of Roskovány's works and a full bibliography.

A. ALDAET.

Rosminian and Rosminianism.—Antonio Rosmini-Serbati, philosopher, and founder of the Institute of Charity, b. 24 March, 1797, at Rovereto, Austrian Tyrol; d. 1 July, 1855, at Stressa, Italy; was educated at home until his twentieth year, and, after three years' course at the University of Padua, returned to Rovereto to prepare for Holy orders. He was ordained priest at Chioggia, 21 April, 1821, and in 1822 received at Padua the Doctorate in Theology and Canon Law. In 1823 he went to Rome with Mgr. Pyrker, Patriarch of Venice, met Consalvi and other prominent men, and was encouraged by Pius VII to undertake the reform of philosophy. The next three years (1823–26) he spent in philosophical pursuits at Rovereto, working on his works. At the request of Mgr. Pyrker, he took leave of absence; he returned in 1827 to Monte Calvario near Modena. In 1828 he again went to Rome, where he was encouraged by Leo XII and later by Pius VII to pursue his philosophical studies and consolidate his institute. During this period he published his "Metafisica moderna," and his "Nuovo saggio sull'origine delle idee" (1829; tr. "Origin of Ideas," London, 1883–84). In the autumn of 1830 he inaugurated the observance of the rule at Calvario, and from 1834 to 1835 had charge of a parish at Rovereto. About this time a pope made over to him the monastery, valued at £50,000. After the revolution in 1830, the pope took him to Rome where he was instituted bishop of Neutra and appointed to the See of Calvario near Modena. The Constitutions of the institute were given to Gregory XVI and, after some discussion regarding the form of the vow of religious poverty, were approved on 26 March, 1838. On 26 March, 1839, the vows of the institute were taken by twenty Fathers in Italy and by six in England (Spetisbury and Prior Park). The Letters Apostolic ("in sublimi," 20 Sept., 1839) formally recorded the approval of the institute and its rule, and appointed Rosmini provost for life. The institute then spread rapidly in England and Italy, and requests for foundations came.
from various countries. The publication of Rosmini's "Trattato della coscienza morale" (Milan, 1839) led to a sharp controversy. Against Rosmini were writers like Melia, Passaglia, Rosazzen, Antonio Ballerini, all members of the Society of Jesus, in which Rosazzen held the office of assistant to the general. On the defensive, along with Rosmini, were L. Eastalde, Pestalozza, Pagamini. For fifteen years the wordy war was protracted, with a truce from 1843 to 1846, due to an injunction of Gregory XVI enjoining perpetual silence on all sides. Pius IX, who succeeded Gregory in 1846, showed himself favourable to the institute, and various new foundations in England attested its vitality. In 1848 Rosmini published (Milan) his "Costituzione secondo la giustizia sociale" and "Cinque piaghe della chiesa"; the latter against Josephism, especially in the matter of Austrian episcopal appointments in Northern Italy. In August of the same year, he was sent to Rome by King Charles Albert of Piedmont to enlist the pope on the side of Italy as against Austria. Pius IX, Dixon, at first, looked to the consultors to deliberate on the definability of the doctrine of the Immaculate Conception, and at the outbreak of the revolution asked Rosmini to share his exile at Gaeta. Antonelli's influence, however, prevailed and Rosmini left Gaeta, 19 June, 1849. His works, "Costituzione" and "Cinque piaghe", were condemned in August, a sentence which he unhesitatingly accepted. A further attack was made on him in the "Postille" and the "Lettere di un prete Bolognese" (1848). Pius IX (1850) referred the "Postille" to the Congregation of the Index, which rejected it as false. In view of other charges the pope ordered an examination of all Rosmini's works. The decision, rendered 3 July, 1854, was that all the works be dismissed (espresso disattinenti), that the investigation implied nothing disparaging to the author, to the institute founded by him, or to his exceptional services, and that he prevent any renewal and dissemination of charges and strife, silence was for the third time imposed on both parties. Within a year after this decision Rosmini died. His body reposers in the Church of the Santissimo Crocifisso built by him at Stress. (See Rossini.)

George Cormack.

The Rosminian System.—According to Rosmini, philosophy is "the science of the ultimate reasons or grounds of human knowledge." The philosopher at the outset must answer the question: What is knowledge? What is thought? Can we be certain of what we know? Rosmini's answer is given in his ideology and logic. Intellect, he holds, is essentially different from sense; thought is objective, sensation is subjective. The term of the intellectual act is seen in such a way that the thinker, at the moment, is conscious neither of himself nor of any relation with himself as seeing. The primal and essential act of human intelligence, thus terminating in its object, is intuition—an attitude rather than an activity, in which the mind pronounces no judgment on what is known, but merely receives the communication of the intelligible object. All other concepts, when analyzed, reveal being (somethingness) as their essential constituent; or, conversely, human concepts are nothing but determinations more or less complex of the simple and elementary notion of being. This fundamental idea is indeterminate and general, conveying to the intellect no knowledge of particular things, but only manifesting the essence of being. Our abstraction does not produce it, but merely discovers it already present in thought. Being, as it appears within man's experience, has two modes, each governed by its own conditions and laws, each with well-defined attributes, diverse, but not contradictory. Manifesting itself to the mind as the intelligible object, not exerting any stimulus upon the intellect, but simply illuminating it, this being is in its ideal mode. As it acts or is acted upon in feeling, modifying the human subject in sensation, constituting the sentient principle in action and passion, this being is in its real mode. The former is essentially objective, simple, and one—universal, necessary, immutable, eternal; the latter is subjective and, in our world, contingent, particular, temporal, manifold, and almost infinitely varied in aspect. Ideal being is not God, but we may call it, says Rosmini, an apperception of God, and even Divine, for its characteristics are not those of created finite things, and its ultimate source must be in God. If thought had in it no element transcending the contingent and finite, all knowledge of the absolute and infinite would be inexplicable, and truth, uncertain and variable, would exist only in name.

To explain our knowledge of particular real entities, Rosmini says that our knowledge of realities reduces itself to a judgment about the existence of what is felt by us. Real entities act upon man's senses, and he immediately recognizes them as particular activities of that essence of being already manifested under another mode in intuition. Because of its simplicity, the human ego, or subject-principle, is constrained to bring together and collate its feeling and its knowledge of being, and thus it perceives being energizing in the production of feeling. This act of the subjective human being that it recognizes real entities, Rosmini calls reason. By sense we are introduced to realities, but we could not know them as beings unless we already possessed the idea of being. This is given to man prior to all perception or individual cognition; it is not acquired by any act of thought, but is implanted in us by the Creator from the beginning of our existence: it is innate, and constitutes for us the light of reason. Furthermore, it is the very form of the human intelligence, a form not multiple, but one—not subjective, but objective—i.e., not a quality or attitude or component of the human subject, but distinct from it and superior to it, existing in an absolute mode and called the form of the mind because, in manifesting itself to man, it draws forth and creates, so to speak, the act of his intelligence.

Logic, says Rosmini, is "the science of the art of reasoning." The scope of reasoning is certainty,
I. e., a firm persuasion conformable to truth. The truth of a thing is, in last analysis, its being, and since being is the term of the human intellect, it follows that a criterion of truth and certainty lies at the base of all thought and reasoning. The principles which govern reflection and argument are founded on the primitive intuition of being. "Being is the object of thought"; this is the principle of cognition, and it is antecedent to the principle of contradiction. Being is not in the intellect, without any determination, nor in the principles of reasoning, which simply express the essential object of the mind in the form of a proposition without adding anything foreign, but in reflection, and hence in the will, which usually initiates reflection. Logic shows how to use reflection so as to attain truth and avoid error.

The Sciences of Perception are psychology and cosmology. The subject of psychology is the ego in its primal condition, i. e., stripped of its acquired relations and developments. The soul is felt by and through itself; it is essentially a principle of feeling. "Mater humanis res est intellectus et subjectum primum" or principle, having by nature the intuition of being and a feeling whose term is extended, besides certain activities consequent upon intelligence and sensitivity." This "extended term" is twofold: space, which, simple and immovable, underlies all sensations as the immediate phenomena of thought; and body, a limited extended force which the sentient principle passively receives and thereby acquires individuation. It is a favourite doctrine of Rosmini that the extended can exist only in synthesis with a simple, immanent principle. Considered apart from this principle, the material concept soul term lacks the unity and coherence necessary for existence and permanence. Our own body, the "subjective body," is felt directly as the proper term of the human sentient principle and is the seat of corporeal feelings. Other (external) bodies, since they modify not the soul, but the bodily term in connexion with the soul, are felt by an extra-subjective perception. We feel our own bodies as we feel external bodies, through vision, touch etc.; but we also feel them immediately with a fundamental feeling, always identical and substantial, in which no distinct limits, figure, or relation of parts can be perceived. Shape, however, is not perceived in the extra-subjective world. But the body is not merely felt by the soul; it is also intellectually perceived by the soul in a primordial and immanent judgment, whereby being is applied to it (the body) in the way above described. In this perception is found the true nexus intimately uniting soul and body. The body is the felt-understood term of the human principle which in this intellective synthesis performs its first act as a rational soul and exerts a real physical influence on its bodily term. Hence Rosmini's definition of life as "the incessant production of all those extra-subjective phenomena which precede, accompany, and follow parallel with the corporeal and material feeling (subjective)."

Every time that by generation an animated organism is produced, perfectly constituted according to the human type, the vivifying, sentient principle rises to the vision of the intelligible object, ideal being. This happens in virtue of a primordial law, established by God from the very act. This is, however, an intellectual pasing from sentence to intelligence, as if one could assign an instant in which the human soul was purely sentient and another following in which it had become rational. All is consummated in a single point of time. The soul's immortality is deduced from its immutability. We are thus driven to the object-term the eternal and necessary idea of being. This is independent of space and time, and the act of intuition continues even after the bodily term has been dissolved by death, and the soul's immanent perception of its body has been for a period destroyed. The mind, and this also the nature of contingent real being and its cause, is not a complete science in itself; it must be treated in connexion with the sciences of reasoning in which reflection, testing the observations of intuition and perception, discovers new truths and arrives at the existence of beings beyond the reach of intuition and perception.

The Sciences of Reasoning are ontological and deontological. The former comprise ontology and natural theology. Ontology treats of being in all its extent as known to man, viz., ideal being, the necessary object of the intellect; real being, i.e., subjective force and feeling; moral being, the relation between real and ideal—a special act of recognition and adherence on the part of the subject harmonising it with the object. Light, life, love; intellect, sense, will—these are the forms under which the essence of being manifests itself in man's world; they are also the foundation of the categories. Natural theology treats of the Absolute Being, God. The essence of God is known, not through perception or direct intuition, but through reasoning. Ideal being is being under only one of its forms and therefore incomplete; in the real world we meet only partial realisations of being. Comparing in reflection the products of our perception with the essence of being, we conclude that they do not exhaust the possibilities of that essence; yet this must find its full realisation in some way far transcending our experience; it cannot, in that fulness, be finite and imperfect as are the things of this world. This knowledge of the Absolute Being Rosmini calls negative-ideal; it tells us not so much what God is as what God is not.

Definite proofs of God's existence are furnished by being in its essence and in each of its forms. The essence of being is eternal, necessary, infinite; but these attributes would not possess if it did not subsist identical under the other two forms of reality and morality, complete and perfect. Where it exists under all these forms, it is being in every way infinite and absolute, i.e., God. Again, the ideal form that creates intelligence is an eternal object and hence demands an eternal subject with infinite wisdom—God. The real form of being is contingent, and it therefore postulates a First Cause in the sense of a subject and a colour harmonious in the absolute term. Finally, the binding force of the moral law is eternal, necessary, absolute, and its ultimate sanction must be found in an Absolute Being in whom the essence of holiness subsists. Thus man naturally does not perceive God; his knowledge of God is but of a negative kind. In the supernatural order of things, the real communication of God to man, a new light super-added to that of reason brings man into conjunction with God's own reality, which reveals itself to him in an inceptive and obscure manner, yet acts upon the soul with positive efficacy. Thus the Christian becomes a new creature, consors divinae naturae.

The deontological treatises discuss the perfections of beings and the ways in which these perfections may be acquired, produced, or lost. Amongst them, ethica, the science of virtue, is prominent (see "Compendio di Etica", Rome, 1907). Each moral act contains three elements: the law, the subject's free will, and the relation (agreement or disagreement) between them. However, an intellectual consideration of himself; the moral imperative must come from a higher source, from the necessary and universal object of the understanding. Being, manifested to the mind, has an order of its own, and the various entities we know though they occupy different places in the scale of existence by their relations to one another, we recognize them by a practical act of our will, adhering to the good we see in them with an intensity determined by the moral exigence of the object. The
idea of an entity, therefore, as the medium which reveals its excellence, clothes itself with the authority of law; and as all ideas are but determinations of the idea of being, the first of laws and the first principle of obligation is: “Follow the light of reason”, or “Reason is the measure”. Besides the consciousness and the consent of mankind, the proofs for free-will, i.e., the power of choice between objective good (duty) and subjective good (pleasure, self-interest), are closely bound up with Rosmini’s theory of man and the soul. Man is stimulated by sensation and his subjective modifications; at the same time he is restrained by the light of being. Natural and original, whence he can draw strength to overcome the allurements of sense and unite himself to the absolute good. 

In reference to the third element Rosmini used a distinction which led to sharp controversy. By pecatum (sin) he means the sinful condition of the will in its antagonism to objective good; by culpa (sin as fault), the same condition considered relatively to its cause, free will. Ordinarily, pecatum is also culpa, and every sin is traceable to a free agent. But, in abnormal circumstances, there may be pecatum where there is not, at the moment, culpa. The acts of a weak sinful habit when performed without advertence or deliberation are contrary to the will, though at the moment the will is not responsible. They are culpa and imputable, but to complete the imputability one must link them with the first free act which the habit resulted. Original sin is a true sin yet not a culpa, not imputable to the person in whom it is found as to its free cause. The responsible cause is to be sought in the free will of Adam, whose sin was both pecatum and culpa. Rosmini wrote voluminously in defence of the traditional Catholic doctrine of original sin. Conscience he defines as “a speculative judgment on the morality of a given act”. He points out, belongs to an order of reflection anterior to the conscience, there may exist in man moral or immoral conditions apart from conscience—a doctrine which he also applied to original sin and to certain states of virtue and vice. Regarding probabilism, he distinguishes, in the question of the doubtful law, what is intrinsically evil from what is evil only on account of some extrinsic cause, for example, prohibition by positive law, and lays down the rule: “If there is a doubt respecting the existence of the positive law, and the doubt cannot be resolved, the law is not binding; but if there is a doubt in a matter pertaining to the moral right of him to whom the risk of the evil must be avoided.” This theory provoked controversy, but Rosmini maintained that it accorded substantially with the teaching of St. Alphonsus Ligouri.

The science of rational right arises from the protection which the moral laws afford to the useful good. The classification of the goods and rights which we possess in our relations with our fellow-men, is based on freedom and property. Freedom is the power, which each one has, to use all his faculties and resources as long as he does not encroach on the rights of others. Property is the union of goods with the human person; it is the bond, not the simply a moral. The moral bond guards the other two, for the moral law forbids one man to wrest from another what he has united to himself by affection and intelligence. The subject of right may be either the individual man or man in society. Concerning the three societies necessary for the development of the human race, Rosmini speculates at length in his “Filosofia del diritto” (Milan, 1841-43).

Rosmini applied his philosophical principles to education in “Della educazione cristiana” (Milan, 1856) and especially, “Del principio supremo della metodica” (Turin, 1867; tr. by Grey, “The Ruling Principle of Method Applied to Education”, Boston, 1893). His basic idea is that education must follow the natural order of development. The mind of the child must be led from the general to the particular. The natural and necessary order of all human thoughts is expressed in the law: “A thought is that which becomes the matter, or provides the matter of another thought.” The whole sum of thoughts which may occur to the human mind is classified in diverse orders of which Rosmini enumerates five. To the first order belong thoughts whose matter is not taken from antecedent thoughts; each of the successive orders is characterized by its matter being taken from the order immediately preceding it. The principle of method is: Present to the mind of the child (and this applies to man in general), first, the objects which belong to the first order of cognitions, then those which belong to the second order, and so on, taking care never to lead the child to a cognition of the second order without having ascertained that his mind has grasped those of the first order relative to it, and the same with regard to the cognitions of the third, fourth, and other higher orders. In applying this principle to the different orders, Rosmini explains the cognitions proper to each, the corresponding activities, the instructions which they require, the moral and religious education which the child should receive. His general theory of adapting education to the needs of the growing mind and in the importance he attached to instinct, feeling, and play, Rosmini anticipated much that is now regarded as fundamental in education. “The child”, he says, “at every age must act.” To regulate the different kinds of activity, and to make each kind reasonable, is really to educate. It is in the kindergarden system of Froebel, the contemporary of Rosmini, that these principles are most fully worked out.

The most important of Rosmini’s posthumous works was his “Scuola” (ontology and natural theology), was published in five volumes (Turin, 1859-64; Intra, 1864-74). In 1876 some Catholic newspapers and periodicals in Italy, interpreting the “Dimittatur” decree of 1854, declared that Rosmini’s works were open both to criticism and to censure. The Rosminian school on the contrary maintained that, while the decree gave no positive approval, it at least guaranteed that the books examined contained nothing worthy of censure and could therefore be safely read, and their conclusions accepted by Catholics. This view seemed to be confirmed by the Master of the Sacred Palace, who, in a letter to the “Osservatore Romano” (1887), cited the silence enjoined on both parties and stated that no theological censure could be inflicted. A month later, the “Osservatore Cattolico” of Milan, as ordered by the Prefect of the Congregation of the Index, acknowledged its interpretation to be erroneous.

After the death of Pius IX, the controversy was renewed. An answer of the Index was given (21 June, 1880) that “dimittatur signifies only this—a work dismissed is not prohibited”—and another (5 Dec, 1881) that a work dismissed is not to be held as free from every error against faith and morals. Both answers were taken by the adversaries of Rosmini’s doctrines to justify new censures, while the Rosminian writers contended that these answers in no degree rendered untenable the position they had maintained. By 1887, the Inquisition condemned forty propositions taken from the works of Rosmini. The decree, published 7 March, 1888, lays special stress on the posthumous works which, it says, developed and explained doctrines contained in germ in the earlier books; but the propositions condemned have no theological note attached. About one-half of the propositions
ROSMINIAN

ROSMINIAN

refer to Rosmini’s ontology and natural theology; the remainder, to his teachings on the soul, the Trinity, the Eucharist, the supernatural order and the beatific vision (Denzinger, “Enchiridion,” 1891 sq.). Some of the propositions were clearly taught in the works examined in 1854; others repeated what Rosmini had said over and over again in the principal branches of his teaching. The superior general of the Institute of Charity enjoined obedience and submission on the members. Leo XIII in a letter to the Archbishop of Milan (1 June 1889) plainly stated that he approved and confirmed the decree. Cardinal Masella discussed the propositions exhaustively in “Rosminianarum propositionum theologicarum” (Rome, 1892). This brought out a reply from an erudite layman, Prof. Giuseppe Morando, under the title “Esame critico delle 40 proposizioni Rosminiane” (Milan, 1905).

Besides the works already mentioned, Rosmini wrote a large number of treatises on the most important of which are: “Il Rinnamento della Filosofia in Italia” (Milan, 1836); “Psicologia” (Novara, 1843; Turin, 1887); “Logica” (Turin, 1853; Intra, 1868); “La Filosofia della Morale” (Milan, 1831); “L’Antropologia in servizio della Scienza Morale” (Milan, 1838); “Antropologia morale pratica” (Casale, 1884); “Testamento” (Milan, 1845); “Filosofia della Politica” (Milan, 1858); “La società e il suo fine” (Milan, 1839); “V. Gioberti e il Panteismo” (Milan, 1847); “Introduzione alla Filosofia” (Casale, 1850); “Introduzione al Vangelo secondo S. Giovanni” (Turin, 1882).

Rosminians.—The Institute of Charity, or, officially, Societas a charitate nuncupata, is a religious congregation founded by Antonio Rosmini, first organised in 1828, formally approved by the Holy See in 1838, and taking its name from “charity” as the fullness of Christian virtue. In English-speaking lands its full name is the Congregation of the Brothers of Charity, but in Italy, Rosminians.

Foundation of the Institute.—The founder of this society was, strictly speaking, Rosmini alone. Nevertheless there existed in the age into which he was born many very potent directive elements which gave a bent to his thoughts and supplied an opportunity for the development of some organisation. His life was in the immediate wake of the French Revolution, and doubtless it was by the many tendencies and movements, some of them remote enough, which culminated in that upheaval, that he was gradually and unconsciously led to consider the intellectual and moral inheritance of Christendom as a whole, not in blind protest and reaction merely, but with impartial contemplation of new ideas as well as of old. The one side of truth was to be corrected by its counterpart, and secondary things which had usurped a primacy were to resume their just order. For his Church’s enemies aroused to new vigour of attack, but also a growing danger among many who still remained within the Church of a practical denial or at least a belittling of the supernatural in man. There was ill-regulated activity and impatience of ancient tradition, and by reaction from this in other quarters there was an equally ill-timed and fatal pasquinade. The world was too wrong, it seemed, ever to be set right; and nothing it could say was worthy of being even heeded. This was a spirit that shut itself up in the past and anathematized all fresh thought. The Church was to renounce either tradition or development, in either case abandoning her Divine Guide.

On such a basis there could easily be set up a spirit which looked on the whole Church as a party, and furthered her cause with partisan eagerness, or else substituted for the great end of the Church the petty ends of the leaders and persons within her. It tended to replace Catholicism by clericalism. But Rosmini judged these domestic ills no less than the relentless attacks from without to be traceable to one deeply-seated cause, namely, that men were relaxing their grip on the fundamental and general truths. What was becoming blurred was God’s own part in the world: first His creative part; then the Divine nature of that moral good which in some sort stands before the human mind as truth itself; and again the Divine action of grace, causing truth and good to be felt in the depths of the soul as having not only infinite rightness and bindingness but also supreme driving-power. The crying need then was for a clearer recognition of God’s place in nature, in the soul, and in the Church, and hence for the re-establishment of Christian first principles as a slow, indeed, but the only rational, cure of the evils of the day.
was approved by Rome more than twelve years later. But he took no practical measures. He still waited for God's signs. Led to Milan in February, 1826, for a charitable work and better convenience for study, he received there a powerful stimulus in June, 1827, by meeting the Abbe Loewenbruck. This zealous and impetuous priest introduced him to the new abbot, whose sudden decision was the same as the words: "I am thinking of a society directed to a reform of the clergy, and you must help me to carry this into effect." Rosmini answered by confessing his own aspirations and laying down the principles on which alone he would build. They conferred further, sought and received more light, and at last agreed to the creation of the Congregation of the Holy Spirit. In November, the Abbe built a prayer in an almost ruinous house on Monte Calvario above Domodossola, a town near the Italian end of the Simplon Pass. Here on 20 February, 1828, Rosmini began his great work, but alone, as Loewenbruck did not present himself again to cooperate in the labour. Lent was passed by Rosmini in practising austerities and writing the constitutions of the institute.

Still, this was no more than a plan. For forming a religious society a number of like-minded men are needed. Rosmini sought none, encouraged none. To his abbot he explained his thought: "The very principles made them at once into a community practising many of the religious virtues. These principles urged him to betake himself forthwith to the Holy See and lay his society before it. He arrived at Rome in November, 1828, but would not do anything there to further his cause. Pius VIII, who was elected pope in the following March, called him to an audience a few weeks after. "If you think", said the Pope, "of beginning with something small, and leaving all the rest to God, we gladly approve; not so if you thought of starting on a large scale." Rosmini answered that he had always proposed a very humble beginning. His was no extraordinary vocation, he said, like that of St. Ignatius, but quite ordinary. In the autumn of 1830 he gave the institute something of its regular form, and all the community began to pass through their stages of religious training. Such was the state of affairs when, in March, 1830, the Abbe Loewenbruck and Rosmini's friend and protector at Rome, Cardinal Cappellari, was chosen pope and took the name of Gregory XVI.

The new pope came from the outset the foster-father of the institute, and Rosmini shunned all initiative more than ever. An unsolicited papal Brief came forth in March, calling the new society but not approving its plans. Its approbation was in the interest of the Holy See, and Rosmini knew it. The pope's approval of the institute should have the status of a religious congregation, with the usual privileges. The pope immediately ratified this decision. On the following 25 March the vows were first made, by twenty in Italy and five in England. Five of those then went to Rome and on 22 August, in the Catacombe of St. Sebastian made the fourth vow of special obedience to the pope. Apostolic letters embodying Rosmini's own summary of the constitutions were issued on 20 September, naming Rosmini as the first pro-vost-general of the institute for life.

The work which the Institute of Charity sets before its members is perfect charity. Love of God is plenitudo legis, because it extends of its very nature to all intelligent creatures who are in God's image. No special manner of life is added in this rule as an obligatory proximate end; hence for a vocation to it nothing is required but a true and constant desire to love justice most. It is a universal vocation. It embraces all vocations, not indeed by taking all charitable works whatsoever as its province; rather it does not take one, but it refuses none. The field then is vast, but only with a negative vastness. Hoc est voluntas Dei, sanctificatio rerum. But by focusing the will on that one point the best way is opened to everything else. Thus the first or elective state of the Rosminian is just the unum necessarium, the contemplative life; not inactivity, not sluggishness, but prayer and labour and study and the learning of some mechanical or industrial art. The institute is ready for any call and not become a burden to others. It is a time for accumulating experience and strength, and those who avail themselves of it apply themselves to their duties, awaiting the time when they will go forth to answer the call of zeal. If no such call comes, it matters little, for in the elective state the institute's progress under the pope's approval of the institute of charity for the assumed state, this being accepted not of choice at all, but only because of God's will clearly manifested. By what methods does the institute discern this will? Apart from extraordinary inward motions at the Holy Ghost, the common way is that outward events, which give sure tokens of God's will to those who use the light of faith. The principal events, as the institute views it, which make known God's call to charitable work are: (1) a petition made by a neighbour in need; (2) a request by someone else on his behalf; (3) his needs themselves when they come before us. Among simultaneous requests there is a choice. The pope's come first, a bishop's next; ceteris paribus, earlier petitions are accepted rather than later. But in general whenever a neighbour, in the universal Christian meaning of that word, seeks the help of the institute, it has to be given, unless the cause be exceptional, because one is never to be wanting: that the desired work be no hindrance to the fulfillment of duties already undertaken, that the whole labour which such addition involves be not beyond the brethren's strength, and that the institute have at its disposal members sufficient in
both number and endowment for its rightful discharge.

Again, charity which is one in essence, is threefold in exercise, and according as good things regard the bodily and sentient life or the intellectual or the moral, the charity which bestows them is divided in nature, in intellect and in spiritual. The temporal is the lowest and gives the lowest kind of good. Inconceivably far above it stands that which seeks to increase the life of the understanding by the knowledge of truth; and above both there is the spiritual charity which tends to make men and happy and loving the things of truth. Hence we see that the topmost point of the institute's activity is the cure of souls. Its whole theory leads to the religious and the pastoral life wedded together, as the crowning achievement of charity. The blending of the two types in the rule consists in this, that the brethren have to choose and prefer a private state in the Church. They are of the ecclesia discens. The restless disposition which indirectly seeks honours or powers would be treason to their whole spirit. Passive in privacy till public work summons them, they must then be all courage, confidence, perseverance, and work.

The three classes of persons who more or less strictly belong to the Institute of Charity. The first is of those who, led by a desire to keep the Evangelical law perfectly, take on themselves the discipline of the society and bind themselves by vows. The second is of Christians who desire perfection, but are so bound by earlier engagements that they cannot make these vows, yet desire as far as possible to co-operate with the society, and these are "adopted children". The third is of "sacred members", good Christians who do not aspire to the life of the counsellors, yet according to their condition desire also to co-operate. But since only the religious will form the substance of the society, it is of their formation and regulation alone that we will here add a few words.

The institute neither solicits nor inquires vocations, but leaves the initiative to Divine Providence, being from its fundamental principles just as perfect when small and hidden as if it was large and famous. Of the care used in examining and instructing the postulant and in implanting firm roots of piety and charity in the novice and in trying his vocation in many ways we need not here give detailed notice. After two years of novitiate, but free from promises made, obstinacy to comprehend the acceptance of any grade that superiors may assign. He thus becomes an "approved scholastic", who is not, however, definitively incorporated with the institute until he has fitted himself by study or other preparation for taking the coadjutor's vows. If any other spiritual or temporal, add the further promise of not seeking any dignity either within the society or outside and of not accepting and not refusing the spontaneous offer of it except under obedience. They are divided moreover into internal coadjutors if living in houses of the institute, and external if elsewhere, the latter state being from the universality of charity quite in harmony with the rule. From among the internal spiritual coadjutors presbyters are chosen, and these take a fourth vow of special obedience to the sovereign pontiff. Thus the body of the society consists of presbyters and coadjutors, but it is the particular who give life and buy away from them and to whom the more universal works of charity are committed.

Vows in the institute are life-long, and ordinarily, though not necessarily, simple. Its form of poverty permits the retention of bare ownership in the eye of the civil law, but each member must be ready to surrender even that at the call of obedience, and none may keep or administer or use one farthing at his own will. Strenuous opposition was offered in Rome to this form of religious poverty, which was declared by one party to be merely affective, not effective. Rosmini answered by indicating the conditions just named and also the nature of property itself; that it is a complex of rights, that rights are relations, and are divisible; that they may be relative to the State or to the Church; and that a religious keeps property relatively to the State only, and not absolutely. It is absolute ownership, not relative, that offends Evangelical poverty. The founder's sagacity in seeing the legal dominion of individuals has been abundantly illustrated since his time; the spiritual gains of the occasions thus given for continually renewed acts of sacrifice are no less obvious. The true facts of the rule are that board, lodging, and clothing are to be those of poor men, and that all, even superiors, do much of their own servile work. Charity next, considered as a vow, is understood in the sense of the subdeacon's obligation. The virtue of obedience is regarded as a director of charity and, therefore, as quite universal; as a vow, however, though its field is still unrestricted, it comes more seldom into play. Among the counsellors, the institute is elected by certain presbyters according to a minutely prescribed form. He has full powers except for a few exceptional cases. It is he who admits to the various grades in the society and who appoints all the superiors. The institute is divided into provinces, and each province, engaged in some province, at least in the division into dioceses, and each diocese into parishes; and there may be rectories besides for more particular works of charity. Having in view only the fullness of Christian law, it has followed as nearly as possible the organisation of the Christian Church. Being subject to charity, the institute chooses a way of living that will not separate them from other men. No habit and no special bodily mortification is prescribed them, but in lieu of further austerities they embrace the lasting hardness of their chosen lot. Not the hedge of a multitude of regulations, but a strong conviction of lofty principles is to make men such as the institute desires.

The institute as such holds no property and takes no kind of civil action. From the State it does not seek exemptions, but only common right. If guarantees of association were refused it, it could still live privately and contemplatively, and attain its whole object. Its members being unobstructed to comprehend the acceptance of any grade that superiors may assign. He thus becomes an "approved scholastic", who is not, however, definitively incorporated with the institute until he has fitted himself by study or other preparation for taking the coadjutor's vows. If any other spiritual or temporal, add the further promise of not seeking any dignity either within the society or outside and of not accepting and not refusing the spontaneous offer of it except under obedience. They are divided moreover into internal coadjutors if living in houses of the institute, and external if elsewhere, the latter state being from the universality of charity quite in harmony with the rule. From among the internal spiritual coadjutors presbyters are chosen, and these take a fourth vow of special obedience to the sovereign pontiff. Thus the body of the society consists of presbyters and coadjutors, but it is the particular who give life and buy away from them and to whom the more universal works of charity are committed.

the bishop's invitation; but Austrian dislike of Italian influences brought it to an end in 1835. The same spirit drove the institute from Rovereto in 1835 and from Verona in 1849. The charge of the Sanctuary of St. Michele della Chiesa, a steep mountain-peak near Turin, was accepted in 1835 at the King of Sardinia's desire, and remains of deceased members of his house were transferred thither. This sanctuary is still kept, but the king's plan of a house of retreat was left unexecuted by his Government. A good number of elementary schools are conducted by the institute in various parts of northern Italy, and in 1906 it accepted the charge of the Church of St. Charles in the Corso at Rome. Noteworthy also are Rosmini's plans of an English college of missionaries for different parts of the British Empire, with a special training for work in India; his college of elementary masters in the institute, still flourishing, and his project of a medical college towards which Prince d'Aremberg offered a large sum. An orphanage, founded with this money at Sainghin, near Lille, was closed in 1903 through the hostility of the French Government.

In England, the name of Luigi Gentili is inseparably linked with the name of Luigi Gentili. This cultured and ardent young Roman threw himself wholeheartedly into religious life in 1831, and from the first felt greatly drawn towards England. Ambrose de Lisle was already inviting him to work in Leicester and Maryborough. James Vincent, Bishop of the Northern Diocese, had offered him a position at Prior Park. To this college he was sent by Rosmini in 1835 with two companions to teach both lay and church students. He became rector there the next year, but the entrance of two of the bishop's clergy, Furlong and Hutton, into the institute brought the engagement to an abrupt close in 1839. Invited next to the Midland district, the fathers taught for a while at old Oscott, and in 1841 was opened the mission of Loughborough, which has since remained in the institute's hands. Many converts were made and some missions founded in the neighbourhood, and in 1843 the first public mission ever preached in England was given by Gentili and Furlong. In the same year at Ratcliffe, near Leicester, were laid the foundations of a novitiate designed by Pugin, but in 1846 the present college for boys of the middle class was opened there. The mission of Newport, Monmouthshire, was undertaken in 1849, that of Rugby in 1850, and Cardiff (of which only two churches are now retained by the institute) in 1854.

The fathers were all this time giving zealous aid towards dissipating that excessive fear of outward devotion which English Catholics had inherited from times of persecution. Rosmini's warm interest in England had led him to send thither some of the most capable and apostolic men he had. Pagani (this J. B. Pagani, author of "The Science of the Saints" and "Anima Divota," is to be distinguished from the Italian provincial of the same name, author of "Life of Rosmini," and other Rosminian works), Gentili, Rinolfi, Cervelli, Cavalli, Dona, Rosmini; and the mission of Gentili and Furlong, and also of Rinolfi and Lockhart, in many parts of the British Isles produced a deep and lasting effect. Gentili died of fever in Dublin, in 1848, while preaching a mission in a fever-streicken district. Of Lockhart it should be added that he began the second half of the century of its first residence in North London, and here he worked for twenty years. The Church of St. Etheldreda, formerly chapel of the London palace of the bishops of Ely, and a fine specimen of thirteenth-century Gothic, was restored by the institute to Catholic worship in 1876, and is able to accommodate its faithful. Other missions under the charge of the English province are the reformatory called St. William's School at Market Weighton, Yorkshire, and two Irish industrial schools, one at Upton near Cork, and one towards which Count Moore gave land and money, at Clonmel. The latest mission established by the institute is that of Bexhill-on-Sea. The Rugby house, which had from 1850 the English novitiate, became in 1889 a juniorate, or preparatory school for novices. The present novitiate stands in wooded grounds at Wadhurst, Sussex, and a house for Irish novices has been opened at Omagh on the shores of Carlingford Lough in the Archdiocese of Armagh.

In America Fr. Joseph Cota, after working single-handed in various parts of Illinois, gathered the first community of the institute about him at Galesburg in that state. Here they have St. Joseph's Church, which existed before; and in addition they have built Corpus Christi Church (1857) and College (1896) as well as St. Joseph's Academy; directed by Sisters of Providence; and, in 1906 St. Mary's College (1890). Other names deserving mention are Vincent de Vit, known principally for two works of the period, "The Labour and Research," and "The Labour and Research," and "Onecatt," a new and greatly enlarged edition of Forcellini, and the "Onomasticon," a dictionary of proper names; Giuseppe Calza, noteworthy as a philosopher; Paolo Perez, formerly professor at Padua, and master of a singularly delicate Italian style; Gialetti, afterwards Bishop of the same see; and Giuseppe Maria Bertarelli, bishop of the Diocese of Pernambuco, who died at Rome during the Vatican Council, and whose incorrupt body has lately been transported with great veneration to his see; and two English priests, Richard Richardson, organizer of the holy war against intemperance, and enroller-in of 70,000 names; and Joseph Hirst, member of the Royal Archeological Institute. (See Rosmini and Rosminiand-Gentili, Gentili, Lockhart, Sisters of Providence.)

ROSS, Diocese of (Rossensis), in Ireland. This see was founded by St. Fachtna, and the place-name was variously known as Roscaibre and Rosallithir (Ross of the pilgrims). St. Fachtna founded the first school of Ross in 750; and the town was called Atrio. The see occurred about 590, on 14 August, on which day his feast is celebrated. The succession of bishops was uninterrupted till after the Reformation period. King John in 1207 granted the cantred of Rossalithir to David Roche, regardless of the claims of the native church, the O'Driscoll. The episcopal manors were left undisturbed. In 1306, the value of the bishop's mena was 26 marks, while the cathedral was valued at 3 marks; and the tribal revenue of the see was but 45 pounds sterling. The number of parishes was 29, divided into 3 divisions; and there was a Cistercian abbey, Carrigilly (de foinsi su); also a Benedictine abbey at St. Carvaa's, which acquired a foundation at Sherkin Island from the O'Driscoll in 1460. Owing to various causes the see was not in a flourishing condition in the fourteenth century, and the Wars of the Roses contributed to the unfortunate state of affairs which prevailed in the second half of the century. In 1497 the see of Kilkenny was united to that of Ross, but the see was but 60 marks. At that date the chapter was complete with 12 canons and 4 vicars, and there were 27 parishes, including three around Berehaven.

ROSS 201 ROSS
Thomas O’Herlihy assisted at the Council of Trent, and ruled from 1562 till his death on 11 March, 1580. It was not until 1581 that Queen Elizabeth ventured to appoint a Protestant prelate under whom, in 1584, the Sees of Cork and Cloyne were annexed to Ross. However, in the Catholic arrangement Ross continued independent, and Owen MacEgan died a confessor in January, 1602-3. In 1625 the bishop (de Torres) was a Spaniard, who ruled his diocese through a vicar-general. In 1647 the nave and tower of the cathedral were levelled by the Puritans; and the bishop (MacEgan) was basely hanged by Lord Broghill, on 10 April, 1650. At length, in 1693, Bishop Slevyn of Cork was given Ross in commendam, and the see continued under his successors till 1748, when it was united to Cloyne, under Bishop O’Brien. From 1748 Ross was administered by the Bishops of Cloyne, but it regained its autonomy under Bishop Crotty, and in 1857 early age of forty-six, in what year we cannot say, but probably late in the sixth century, and is buried in his own cathedral church at Ross. Like many other great Irish saints, he received his first lessons in piety from St. Ita of Killeedy, the Brigid of Munster, from whose care he passed, according to some writers, to St. Finbarr’s seminary at Loch Eire, near Cork. He founded the monastery Molana, on the little island of Drinins in the Blackwater, not far from the town of Youghal. Returning to his native territory, he set about a more important foundation in a rocky promontory in the midst of woods and green fields between two lovely bays. This was the monastic School of Ross, called in the “Life of St. Mochoemoec,” magnus studium scholastum, for it quickly became famous for its study of Sacred Scripture, and the attention given to all the branches of a liberal education. One of the assistant teachers was St. Brendan the Navigator, whom Fachtna had known and loved as a companion when under the care of St. Ita. An old document quoted by Usher represents Brendan as being at Ross in 540. While engaged in teaching here, St. Fachtna was stricken with total blindness. On appealing to God in his distress, he was visited by an angel to make application to Nessa, the sister of St. Ita, who was about to become the mother of St. Mochoemoec. Fachtna did as he was directed and his sight was miraculously restored. Fachtna, it is generally thought by the best authorities, received episcopal orders, and became the first bishop of Ross. He is sometimes called Facundus, in allusion to his eloquence, to which, as well as to his sanctity, unmistakable testimony is borne by St. Cuimín of Connor. Cuimín describes him as “the generous and steadfast, who loved to address assembled crowds and never spoke aught that was base and displeasing to God.”

His immediate successor in the School of Ross was St. Conall, and we read also of a St. Finchad, a former schoolmate at Loch Eiree. Both were probably tribesmen of his own, for we are told that he was succeeded by twenty-seven bishops of his own tribe, whose names unfortunately have not been preserved. Under several ninth-century dates we find in the Four Masters reference to the abbots of the School of Ross; and under date 840 we are told that the institution was ravaged by the Danes. Only in the two centuries that followed is there mention of a bishop, Neachthain Naoi, who teachtain was set down in the Annals of Ulster for 1085. In all other references to Ross the word archinect is used, as if showing that the government of the school had fallen into the hands of laymen, who no doubt employed ecclesiastics to perform the spiritual duties and functions. Nevertheless the School must have continued to flourish, for we read mention of the year 866—according to the “Chronicon Scotorum,” 866—of the death of Fergus who is described as a celebrated scribe and anchorite of Ross-Altlithir. But more remarkable evidence still of the extent and variety of the literary work done at Ross is furnished by the geographical poem in the Irish language, extant, composed by MacCosee or Ferelgid, a lecturer at this school, and used no doubt as a text-book in the different classes. When we take into account the period at which MacCosee lived, his geographical treatise may fairly be thought one of the most accurate and interesting of its kind that has ever yet been composed. Of the later history of the School there are but few details, but mention of the native spoiler, not missing in them. In 1127, according to the “Chronicon Scotorum,” one Toirdheachb O’Conor sailed to Ross-Altlithir, and laid waste the land of Desmond. He was followed by the Anglo-Norman forces. Under FitzStephen the last of the century completed the devastation. All record of this ancient seat of learning is then lost.

THE CATHEDRAL, SKIBBEREEN

Bishop O’Hea was consecrated to Ross. During the episcopate of Dr. O’Hea (the Catholic population was then 45,000) the episcopal see was transferred to Skibbereen, and the diocese was materially improved under his fostering care. His successor, William Fitzgerald (1877-97) also laboured zealously. The present bishop, the Most Rev. Denis Kelly, was born near Nenagh, Co. Tipperary, in 1852, and was educated at Ennis and Paris. He was appointed president of the Killaloe Diocesan College in 1890, and was consecrated 9 May, 1897. Bishop Kelly has acted on several Royal commissions, and has recently (1911) been named one of the two commissioners for the projected Home Rule finance. In 1901 the Catholic population was 46,654, and there were eleven parishes—two of which were mensal—served by 28 priests. The latest returns give the number of churches as 22, and there are three Convents of Mercy, respectively, at Skibbereen, Clonakilty, and Rosscarbery. There is no chapter, but there are two vicars—

W. H. GRATTAN-FLOOD.

ROSS, SCHOOL OF, now called Ross-Carbery, but formerly Ross-Altlithir from the large number of monks and students who flocked to its halls from all over Europe, was founded by St. Fachtna, who is generally regarded as the same who founded the Diocese of Kilfenora, for the feast in both cases is kept on 14 August; and in both the saint’s descent is traced to the princely race of Corca Laighe. Fachtna was born at a place called Tulaicheann, and died at the calendare papal registers (9 vols., London, 1893-1911); brady, records of cork, cloyne, and ross (Dublin, 1864); idem, episcopal successions (rooney, 1875); archibald, martyrologium irlandicum (Dublin, 1873); smith, cork (new ed., cork, 1893); irish catholic directory (1911).
Rossano, Archdiocese of (Rossanensis), in Calabria, province of Cosenza, Southern Italy. The city is situated on an eminence not far from the Gulf of Taranto. It was the ancient Roscianum, a Roman colony, and was ravaged by Totile. The Saracens failed to conquer it. In 982 Otto II captured it temporarily from the Byzantines, who had made it the capital of their possessions in Southern Italy. It preserved its Greek character long after its conquest by the Normans. In the cathedral there is an ancient image of the "Madonna acheropita" (i.e. the "Madonna not made by hands"). Rossano was the birthplace of John VII, the antipope of John VII (Philagathus), St. Nilus, founder of the Abbey of Grottaferrata, and St. Bartholomew, another abbot of that monastery. The first known bishop of this see is Valerianus, Bishop of the "Ecclesia Rossana" in the Roman Council of 680. Cappelletti, however, names a certain Saturninus as first bishop. In the tenth century, or perhaps earlier, the Greek Rite was introduced at Rossano, and continued until the sixteenth century, although two attempts were made to introduce the Latin Rite—one in 1092, and again by Bishop Matteo de' Saraceni in 1460. Priests of the Latin Rite, however, were often appointed bishops. The Greek Rite was maintained especially by the seven Basilian monasteries in the diocese, the most famous of which was S. Maria in Patro. In 1571 the Greek Rite was abandoned in the cathedral, and half a century afterwards throughout the city. It is still observed in a few villages inhabited by Albanians.

Noteworthy bishops were: Vincenzo Pimpinella (1523), nuncio in Germany; Giovanni Battista Catagna (1553), afterwards Urban VII; Lucio Sunseverino, founder of the seminary; Pier Antonio Spinelli (1628) and Jacopo Carafa (1648), both of whom restored and embellished the cathedral. The archdiocese is without suffragans. It includes the ancient Diocese of Turio (Thurii), a city which arose after the destruction of Sybaris; five of its bishops are known, the first being Giovanni (501) and the last Guglielmo (1170). Rossano has 39 parishes, 70,000 Catholics, 140 secular priests, 4 houses of nuns, and 3 schools for girls. For the famous "purple Codex Rossanensis", discovered in 1879 in the cathedral sacristy, see Batiffol (below). This Greek parchment manuscript of St. Matthew (to xvi, 14) and St. Mark is the oldest pictorial Gospel known, and is accorded by scholars various dates from the end of the fifth to the eighth or ninth century; it is probably of Alexandrine origin (ed. Gebhardt and Harnack, 1880; A. Muñoz, Rome, 1907).

Maria in Patro (Naples, 1747); Batiiffol, L'abbaye de Rossano (Paris, 1891); O'Key, Les églises du Calabre à l'époque byzantine (Macon, 1900). For the Codex Rossanensis, as above, see Kraus, Greek, obrië. Kunst (Freiburg, 1896-7); Kordoscoff, Hist. de l'art byzantin, 1 (Paris, 1866), 114 sqq.

Rosselli, Cosimo (Lorenzo di Filippo), Italian fresco painter, b. at Florence, 1439; d. there in 1507. The master-works of this skilful artist are the four panels in the Sistine Chapel which he painted for Sixtus IV as a part of the decoration in that building. Vasari tells us that they pleased the pope more than the similar panels by Ghirlandajo, Signorelli, Perugino, and Botticelli by reason of the glory of blue and gold which distinguished them, but is not existent now. The panels are skilfully composed, marked by clever draughtsmanship, and harmonious in their colour scheme, but vastly inferior to the other panels in the same chapel. One is, therefore, more easily able to understand Vasari's comment upon them, because there must have been some reason to account for Rosselli being given so many panels. His reputation rests more and more entirely on his close friendship with Benozzo Gozzoli and on the fact that among his pupils were Fra Bartolommeo and Piero di Cosimo. Amongst his other works are three frescoes at Berlin, a very important one from Fiesole in the National Gallery, a fine example in Paris, and several at Florence, including one in the Academy, and others in various churches.

George Charles Williamson.

Rossi, Bernardo de (Rubens, Giovanni Francesco Bernardo Maria), theologian and historian; b. at Cividale del Friuli, 8 Jan., 1687; d. at Venice, 2 Feb., 1775. He made his religious profession with the Dominicans at Conegliano, 1704, after which he studied at Florence and Venice. He taught at Venice for fifteen years, and was twice general vicar of his province. In 1722 he was theologian to a Venetian embassy to Louis XV and remained in Paris five months. He resigned his chair in 1730 and de-
Rossi, Bernardo de. See Editions of the Bible.

Rossi, Felicecchio, publicist, diplomat, economist, and statesman, b. at Carrara, Italy, 13 July, 1787; assassinated at Rome, 15 November, 1848. He studied at the Universities of Pavia and Bologna, in which latter city he practised law with great success. In 1812, however, he abandoned the ordinary Paths and civil procedure. Rossi being an advocate of Italian unity and independence, and a member of the Carbonari, Joachim Murat, King of Naples, who then aspired to the sovereignty of the entire peninsula, appointed him commissioner general of the provinces lying between the Po and the Tronto; but on Murat's defeat at Tornello, Rossi was forced to fly to France, whence, after Waterloo, he betook himself to Geneva. At Geneva he began a private course of Roman law which gained him a chair in the university of that city, notwithstanding the fact that he was a Catholic. Having married a Protestant Genevese lady, he was elected to the Cantonal Council of Geneva, where he played a prominent rôle in the compilation of the laws on mortgages, civil marriage, and court procedure. In 1832 he presented to the Swiss Federal Diet a plan of a constitution (called the 'Tatto Rossi') based on that of 1803, which was approved by the Diet, but rejected by the country. Nonetheless, during his political activity he continued his deep study of law. Between 1819 and 1821, with the collaboration of Siamon and Bello, he published the "Annales de législation et d'économie politique", which in a short time gained him a world-wide reputation. With Guisot he established the doctrinaire school, the juridical principles of which did not differ fundamentally from those of the eighteenth century. In 1829 he published his "Traité de droit pénal", an authoritative work of the time.

The hostility caused by his projected constitution led him in 1833, to seek the chair of political economy in the Collège de France, and although the Académie des Sciences Morales had presented another candidate, Rossi was successful. In the beginning he met with some opposition, which, however, he overcame, chiefly through the influence of Guisot, minister of Louis Philippe, who knew that Rossi shared his political and juridical views. In 1834 he taught constitutional law in the university; nor did he fail to gain further honours and distinctions, being elected a member of the Académie des Sciences Morales (1836) and made a peer of France (1839), and an officer of the Legion of Honour (1841). In 1843 he withdrew from the chair, chiefly on account of ill health, and devoted himself to private life, watching the development of the Revolution in the first years of the pontificate of Pius IX. He believed that the age demanded a régime of liberty, but that it sufficed of economy gradually. The pope, who knew his opinions on this subject, appointed him minister of justice in the Fabbrini ministry, on the fall of which Rossi was invited to draw up a programme. His intention was to re-establish the papal authority, together with a form of constitutional government, and to re-establish public order. Such a programme was as displeasing to the Conservative Party, who distrusted the prevailing views, as to the advanced Republicans, who hated Rossi as the representative of the constitutional monarchy. Like Pius IX, he favoured the Italian league, but wished to preserve its independence of each state. This programme, and the energy which Rossi exhibited against the disturbers of public order, caused him to be sentenced to death by the secret societies. On 15 November, 1848, Rossi was on his way to the Legislative Assembly (in the Palazzo della Cancelleria) to explain his programme; hardly had he seated himself in his carriage, when he was assassinated by a dagger in the neck. He expired almost immediately. Pius IX, on hearing the tidings, exclaimed: "Count Rossi has died a martyr of duty." The assassination was for the secret societies the signal to spread the flames of the revolution which drove Pius IX into exile and made the name of Rossi a byword.

The most important of Rossi's writings is his "Cour d'économie politique", a classic work based on the theories of Smith, Say, Malthus, and Ricardo. Like these authors, he favoured freedom of trade, labour, and manufacture; and in general, not clearly foreseeing the difficulties of economic life, he wished to solve them by the free play of individual force and intelligence rather than by legislation. But he recognised the great economic utility of associations. A characteristic note of his scientific speculations is his fondness for considering social phenomena from a mathematical point of view, so that he was called the geometer of economy. This made him attach great importance to statistics. In politics he is the father of the principle of non-intervention, and published an essay on the subject. A most distinguished representative of the middle-class Liberal doctrines, and of the type of "men of 1830", Pellegrino Rossi died by the assassin's sword as the inevitable result of a policy too advanced for the supporters of the Holy Alliance, and too backward for the generation that was being prepared by Cavour.

Garibaldi, Notizie sulla vita e le trame di M. Rossi (Paris, 1870); Retrato, Economistes et politiciens, d'apres les dessins dall'assassinato del comte P. Rossi (Rome, 1854) inHist. pol. Bist. XXVII, 109 sqq.; Civilta Catt., 2nd series, VIII; D'Istilie, La comte Pellegrino Rossi (Paris, 1887).
cesses were at Venice and Milan. In 1813 he wrote "Tancred", the first of his operas which, with "L'Italiana in Algeri", became celebrated throughout Europe. In 1816 and 1817 he composed for the Teatro Valle at Rome his happiest, if not his greatest, work, "The Barber of Seville" and "Cenerentola". Meanwhile he had begun his career at the San Carlo in Naples, and wrote for this important opera house in 1818 "Mose", in 1819 "La Donna del Lago". In 1823 came "Semiramide", written for Venice, his last work in Italy; it was his third and fourth operas. In 1824 he spent the season in London, and at the concert he himself sang the solo. The same year he undertook in Paris the direction of the Italian Opera, and then of the Académie. He wrote for Paris in 1829 "William Tell", his last and finest opera. Then followed the comparatively inactive period of his life, in which he ceased to write for the stage, but still produced in 1832 his well known "Stabat", in 1847 his "Stabat" to Pius IX, in 1864 a "Messe Solennelle". In 1836 he went to live with his father at Bologna; but from 1855 till his death he was again in France.

ROSTOCK
B. at Grottkau, Silesia, 24 Aug., 1807; d. at Breslau, 9 June, 1871. He studied classics at Neisse and from 1829 to 1836, philosophy and theology at Olmütz. After his ordination he was pastor at Zarnowitz, 1833 he was assigned to pastoral duty at Neisse, and was distinguished for his courage and oratorical talent. When the Swedes captured the city in 1842, Rostock was taken prisoner and deported to Stettin. After his release he was ennobled by the emperor, but remained pastor of Neisse until his transfer in 1849 to the cathedral of Breslau. Henceforth he played a prominent part in the administration of the diocese, and in 1853 was appointed vicar-general. It was largely through his efforts that the right of reformation (jus reformandi), granted the emperor by the peace of Westphalia, was effectively exercised in the territory of Breslau, so that 650 Catholic churches which had been seized by the Protestants were restored to their former owners. Considerable difficulty was experienced in providing suitable priests for these numerous churches, and in infusing new religious life into an almost completely-ruined diocese. But Rostock consecrated his life to the service of the Church in spite of the additional difficulty from the almost uninterrupted absence from their diocese of the three bishops under whom he served. In 1846 he was himself elected bishop, and shortly after the civil administration of the district was also placed in his hands. He continued with great energy the work of Catholic reorganization, endeavored to suppress the power of the Protestants over affairs of the Catholic Church, and to neutralize the anti-Catholic influence of Protestant teachers. He succumbed to an attack of apoplexy, superinduced by an imperial decree which suspended a decision that had been previously granted and which was favourable to Catholic interests.

JUNGENSTEIN, Sebastian von Rostock (Breslau, 1801).

N. A. WEBER.

ROSTOCK, UNIVERSITY OF, in Mecklenburg-Schwerin, founded in the year 1419 through the united efforts of Dukes John IV and Albert V, and in February of the same year granted a Bull of foundation by Pope Martin V. At first the university included only the three secular faculties; in 1432 a theological faculty was added with the approval of Eugenius IV. The Bishop of Schwerin was appointed chancellor of the university; his present successors are the Grand Dukes of Mecklenburg. The majority of the professors came from Erfurt, among them the first rector, Petrus Stenhake. The city of Rostock endowed the university most generously with lands, as did the Bishop of Schwerin, who presented his house at Rostock as a residence. At a later date it received contributions from Hamburg and Lübeck. In 1427 it obtained from Martin V a unique privilege, allowing the rector in conjunction with several doctors to bestow a degree if the chancellor refused without a valid reason to grant it. When Rostock was placed under the ban of the empire and the Church on account of outbreaks among the citizens, the university moved to Greifswald (Easter, 1437). In 1443 it returned to Rostock, but when the dukes wished to raise one of the churches of the city to a cathedral-church in order to give the professors the canonicity as benefices, the town opposed the procedure and there developed what is known as the cathedral feud. The university migrated temporarily in the summer of 1487 to Wismar and then to Lübeck. It fell into complete decay after the beginning of the Reformation in (1523) when the university revenues were lost and matriculations ceased. When an effort was made later to reorganize the university a dispute arose between the city of Rostock and the dukes of Mecklenburg as to the administration and supervision of the school. In 1563 an agreement called the "Formula concordis", was made between the contending parties, which granted nearly equal rights to both. The university now enjoyed an era of prosperity. In 1758 Duke Frederick desired the appointment of a rigidly orthodox professor, but the theological faculty opposed him; whereupon the duke obtained an imperial patent for the founding of a university at Bützow which was opened in 1760. The two universities proving too expensive for the country, the school at Bützow was closed and united with Rostock in 1789. In 1829 the town council renounced its right of co-patronage. During the second half of the nineteenth century the University began steadily to develop and gain, so that in 1911 it had about 800 students.

ROTA, SACRA ROMANA.—In the Constitution "Sapiens Consilio" (29 June, 1908), II, 2, Pius X re-established the Sacra Romana Rota, one of the three tribunals instituted by that Constitution. To it are assigned all contentious cases that must come before the Holy See and require a judicial investigation, with proof, independent of the crimes cases. The Rota therefore tries in the first instance the cases, including criminal cases, which the pope, either motu proprio or at the request of the contesting par-
ties, calls up for his own judgment and commits to the Rota; it decides these cases even in the second and third instance. Moreover, it is the court of appeal for cases decided by the apostolic tribunals of first instance. Finally, it decides in the last instance cases tried by any inferior tribunal of second or further instance, as the cause has not then become res judicata. In addition to major cases, episcopal decisions which are given without judicial procedure are excluded from the jurisdiction of the apostolic tribunals. The Rota is composed of the auditors, ranking as prelates, appointed by the pope; they must be priests who have obtained a doctorate in theology and canon law. When they reach the age of seventy their office ceases forever, but they remain in the dignity of "former auditors." These form a college of which the oldest among them is dean. Each auditor chooses an assistant, who must be a doctor of canon law, and whose selection must be approved by the pope. Other officers—are a promoter of justice, corresponding to the publico ministero in modern Italian civil courts, and a registrar of the bond (defensor vinculi), who may have a substitute. These officials are appointed by the pope on the recommendation of the College of Auditors. There are also notaries (at present three in number) selected by the pope to act as Auditors of Appeals, to take up acts etc. The auditors give their decision either through three of their number or in pleno; but sometimes the pope may in a particular case ordain otherwise. A case may also be submitted to the Rota not for a decision but for an opinion. The auditor who prepares the report is called the penitens or relator. An appeal may be made from one judicial commission to another. The contestants may plead personally or, as more ordinarily happens, may employ a procurator or advocate, whose selection must be confirmed. The complaint and the defence must be in writing or printed, and copies distributed among the judges, the assistants, the promoter, and others concerned. The written defence may be elucidated orally in the presence of the judges. The auditors decide by a majority of votes. The sentence must contain not only the conclusion arrived at, but the reasons thereof. History: The many and various ecclesiastical courts which were referred to the Holy See from every quarter of the Christian world were, till near the end of the twelfth century, discussed and decided by the pope, as a rule, in the Consistory, which from the presence of many bishops became like a council. From the end of the twelfth century, however, owing to the increasing number of these cases and to the more detailed and complicated procedure, the popes appointed for each case either a cardinal or one of their chaplains, and sometimes a bishop, to arrange for the suit, hear the evidence of the litigants (hence the term auditor), and then make a report to the pope, who would give his decision personally or in the Consistory. Sometimes, too, the auditor was empowered to decide, but his judgment had to be confirmed by the pope. In the latter half of the thirteenth century we find the auditors as a class distinct from the chaplains, with the title of "Sacer palatii causarum generales auditors." This innovation was made by Innocent IV, who entrusted to them cases relating to benefices (which had increased owing to the many expectative reservations granted by this pope) and other minor ones, while he employed the cardinals in the other cases. Gradually the various cases were almost always entrusted to them for decision, and they exercised the same jurisdiction. The auditors consequently did not as yet constitute a tribunal with definitive jurisdiction, but only a college from which the pope selected at pleasure judges for the cases he chose to entrust to them. Nicholas III and Martin IV temporarily appointed auditors general for civil suits in the papal dominions; Nicholas IV (1286) appointed them permanently for the various provinces of Italy, and John XXII the papal tribunals, and in 1309 an auditor general for contentious ecclesiastical cases, the litigant having the choice of going before the pope himself or the auditor general. Thus arose an autonomous tribunal, but one in concurrence with the pope. From the year 1323 we have the first document of a transaction adjudicated collabalis, and in a definitive way by that tribunal; John XXII, by the Bull "Ratio Juris" (1331), laid down certain rules for it; but its sphere of competency was not marked out, so that in all the fourteenth century the causes were referred in a special way to the pope. Sixtus IV fixed the number of auditors at twelve. Other popes, like Martin V ("Romani pontificis", 1422; "Statuta et ordinationes", 1414), Inno- cent VIII ("Finem litiibus", 1487), Pius IV ("In throno justitiae", 1561), Paul V ("Universi agri", 1611), determined that competency might be definitely, Civil appeals in the papal dominions were also entrusted to the tribunals of the auditors of the sacred palace, probably after the end of the Western Schism; but criminal cases were always excluded. With the institution of the Roman congregations the jurisdiction of the Rota was not at first, but grew and became more curtailed, and it became, generally speaking, a civil tribunal, enjoying a world-wide reputation.

Character. — The civil character of the Rota was confirmed by the legislation of Gregory XVI, and mixed suits and purely ecclesiastical suits concerning economical matters, if the subject matter did not amount to over 500 scudi, were assigned to it. Leo XIII entrusted to the auditors part of the process of beatification and canonization, as well as the canonical suits of those employed in the Apostolic Palace. Formerly the auditors had many privileges. France, Austria, Spain, Venice, and Milan each had the right of proposing one of their subjects as an auditor. Austria still has the privilege, at present the auditors being two in number. From 1774 there has been a tribunal of the Rota at Madrid, the president of which is the Nuncio. The origin of the name Rota is uncertain and has been a matter of discussion; it occurred first in 1336.

U. BERNONI.

Roth, Heinrich, missionary in India and Sanskrit scholar, b. of illustrious parentage at Augsburg, 18 December, 1620; d. at Agra, 20 June, 1668. He became a Jesuit in 1639; was assigned to the Ethiopian mission (1643); then to Bengal and Berar; next to Angor, Incolastadio, ad missionem Aethiopicam prorecto), in Hoonder, "Deutsche jesuitenmissionare im 17. und 18. Jahrh." (Freiburg, 1899, 213), and arrived at Goa by the land route, via Ispahan. He laboured first on the Island of Salsette off Goa, where from time to time he acted as Portuguese interpreter. He was sent out as an embassy to one of the native princes, and finally reached the empire of the Great Mogul, where, as resident of the country at Agra, he was involved in the persecution under Shah Jahan. Here the French explorer, Francis Bernier, learned to know and appreciate him as one extremely versed in the knowledge of the Mughal em- phy of religions in India ("Travels in Hindustan", new ed., Calcutta, 1904, p. 109 sqq.). In 1662 Roth revisited Europe by the land route via Kabul to obtain new recruits for the mission, and returned to
Agra in 1664. Roth shares with the Jesuit, Hanzleden, the fame of being among Europeans the pioneer Sanskrit scholar, and of having compiled the first Sanskrit grammar (Wiener, Zeitschr. für die Kunde des Morgenlandes, XV, 1901, pp. 303–320). "During his stay in Agra, he succeeded in persuading some Brahmans to take up Sanskrit and, after six years of diligent study, he obtained complete mastery of this difficult tongue. He was the author of the interesting description of the Sanskrit alphabet, published by Athanasius Kircher in his China illustrata” (Max Müller, "Lectures on the Science of Language", London, 1866. Roth’s works, most of which were published by his learned friend, Athanasius Kircher, S.J., are: "Relatio rerum notabilium Regni Mogor in Asia", which contains the first information concerning Kabul which had reached Europe (Strassburg, 1665, Aschaffenburg, 1668); "Iter ex Agra Mogorum in Europam ex ratione PP. Joh. Gruber et H. Roth" in Kircher, "China illustrata" (Amsterdam, 1667), pp. 79–91 sqq.; "Itinerarium St. Thomae Apost. ex Judea in Indiam", and "Dogmata varia fabulosissima Brachmanorum", ib., 156–162; "Exactissimum opus totius grammaticae Brachmanicae cujus et rudimenta is [Roth] primus Europe communicavit" in "Romani Collegii S. J. museum" (Amsterdam, 1675), p. 85; a letter (Rome, 1664) in "Welt-Bött", I (Augsburg, 1726), 35; manuscript-letters and relations in Royal Library, Brussels, Nos. 6282–29, fol. 415.

ANTHONY HUNTER.

Roth, DAVID, Bishop of Ossory (Ireland), b. at Kilkenny in 1573, of a distinguished family; d. 20 April, 1650. Having studied at the Irish College, Douai, and at the University of Salamanca, where he graduated doctor in civil and canon law, he was ordained in 1600, and proceeded to Rome. From 1601 to 1609 he was professor of theology and secretary to Archbishop Lombard, and on 15 June, 1609, was appointed Vice-Primate of Armagh. He arrived in Ireland in 1610, having made previous apothecary Apostolic, and held a synod for the Ulster Province at Drogheda, in February, 1614, and a second synod in 1618. Though appointed Bishop of Ossory on 10 October, 1618, he had, owing to the severity of the penal laws, to seek consecration in Paris, where he was consecrated early in 1620; he returned to Ireland in the winter of 1621. As early as 1616, Dr. Roth had published the first part of his famous "Analecta" and the completed work was issued at Cologne (1617–19); a new edition was brought out by Cardinal Moran in 1684. In 1620 he published "Brigida Thaumaturga", at Paris, followed by "Hiberniae Sive Antiquiorius Scotiae" in 1621 at Antwerp, and "Hibernia Resurgens" at Paris, in the same year. Other works of his except some few fragments have long since disappeared. In 1624 Bishop Roth presided over a synod at Kilkenny, and he laboured zealously for religion and country during a trying period. He joined the Confederates in 1642, and welcomed the papal nuncio, Rinuccini, to Kilkenny, on 12 November, 1645. Unfortunately, three years later, he refused to acknowledge the validity of the censures issued by Rinuccini, believing that the Supreme Council were acting in the best interests of the country. Although seriously ill in 1649, he continued to minister to the plague-stricken citizens of Kilkenny. He was compelled by the Cromwellians to leave his episcopal city 28 March, 1650, but, being robbed on the way, he was permitted to return. His remains were interred in St. Mary’s Church, but there is a cenotaph to his memory in St. Canio’s Cathedral.

Rottenburg, Diocese of (Rottaburgensis), suffragan of the ecclesiastical Province of the Upper Rhine. It embraces the Kingdom of Württemberg, three parishes in the Grand Duchy of Baden, and one parish in the Prussian territory of Hohenzollern-Sigmaringen. The diocese is divided into 29 deaneries, and in 1911 contained 988 parishes, 19 Pfarrkuratien (incorporated churches with an independent care of souls), 164 chaplaincies, and 155 other pastoral charges; 1084 active and 75 pensioned secular clergy, and 720,000 Catholics. The cathedral chapter, which enjoys the right of electing the bishops, consists of a cathedral dean and vicar-general, six canons, and six prebendaries. The bishop, cathedral dean, and the six canons constitute also the ordinariates; the legal adviser of the ordinariate is the syndicus, a lay official who is likewise director of the chancellorry of the ordinariate, consisting of six members. The rights of the State circa sacra are entrusted to a royal Catholic church council, which is composed of a director, two clerical, and several lay members. The diocesan institutions are: the priests’ seminary at Rottenburg, with a regent, viceregent, and a Replentia, or private tutor; the theological college "Wilhelmsstift" at Tübingen with a director and 7 Reptenti, supported by the State, and placed under the supervision of the bishop and church council; the gymnasia, philosophical schools at Eisingen and Rottenburg, which are maintained by the State; the diocesan boys’ seminaries at Rottenburg and Mengenthel. Theological students are trained partly in the "Wilhelmsstift" and partly in the theological faculty of University of Tübingen, which has four ordinary and three extraordinary clerical professors. The "Theologische Quartalschrift", the
oldest theological periodical in Germany, is published by the professors of the theological faculty. Priests also act as instructors in the private boarding-schools at Ehingen, Ellwangen, and Rottweil, which are under the patronage of the bishop, as well as in the public intermediate schools (Gymnasien, Realschulen, Lateinschulen etc.).

Despite every effort on the part of the Catholics, the male religious orders have not yet been readmitted into the Kingdom of Württemberg. In 1910 the following orders and congregations of women had establishments in the diocese: the Congregation of the Third Order of St. Francis, who have a mother-house at Bonlanden, a boarding school, and two branches (116 sisters); the Sisters of St. Francis from Heiligenbronn, with a mother-house and two branches (188 sisters), who conduct an institute for the rescue, education, and boarding of poor neglected girls, an institute for boys, and a children's home; the School Sisters of Our Blessed Lady, with a mother-house at Ravensburg and one branch (79 sisters); the Sisters of the Third Order of St. Francis, from Reute, who have 103 nursing establishments, schools for manual work, and schools for children (783 sisters); the School Sisters of the Order of St. Francis, who have a mother-house at Unterarchtalschlag and 127 branches (1243 sisters), and, besides nursing the sick, conduct schools for children, and schools for manual training, homes for working women, boarding schools, and rescue institutions; the Sisters of the Holy Cross, from Strasburg, Alsdorf, who have one establishment with 13 sisters. There are also in the diocese 11 ecclesiastical boarding schools for poor and orphaned children under religious direction. Of the numerous Catholic churches notable from the artistic standpoint may be mentioned: the Cathedral of St. Martin at Rottweil, a three-nave Gothic basilica, which was completely renovated after the fire of 1844 (a new cathedral is being planned by the present bishop); the late-Roman Church of St. John at Gmünd (thirteenth century); the Gothic parish church of Gmünd (1331-1410); the church of the former Benedictine Monastery of Ellwangen, the largest Romanesque church in the country (1214); the parish church of Weingarten; the "Sankt Petersdom Württembergs", erected in the year 1738-53; the Gothic Church of Our Lady, Stuttgart (1879). Of the churches which were formerly Catholic, but which now are Protestant, the most important is the Gothic cathedral at Ulm (1377-1464), which has the highest church tower in the world (over 526 feet). Much frequented places of pilgrimage are Weingarten, Weggental, near Rottweil; Reute, with the grave of Blessed Elizabeth Bona; the Schönberg, near Ellwangen, the Dreiheiligenberg, near Spaichingen. Concerning the erection and beginnings of the diocese, see PEFERRATH, ECLSIS LATICIANA PRAT (Basel, 1895); GOBERT ET CARDINAL, L'OBS. HIST. ET LIT. DE L'IGLES. ET VIE DES RELIGIOUS DE FRANCEN (1854); NOGUES DE MEM. ARCH. INSTITUT (Norwich, 1847).

Joseph Lins.

Rotuli, i.e. rolls, in which a long narrow strip of papyrus or parchment, written on one side, was wound like a blind about its staff, formed the earliest kind of "volumen" (volumen from Volusia, to roll up) of which we have knowledge. Many such rolls have been uncovered in their primitive form from the excavations at Herculaneum and elsewhere. In the fourth and fifth centuries, however, these rolls began to give place to books bound as we know them now, i.e. a number of written leaves were laid flat one on top of the other and attached together by their corresponding edges. This was a gain in convenience, but for certain purposes rolls were still retained. To this latter class belonged certain legal records (from which is still derived the title of the judicial functionary known as the "Master of the Rolls"), also the manuscripts used for the chanting of the Mass. In the beginning of the Middle Ages, the documents employed in sending round the names of the deceased belonging to monasteries and other associations which were banded together to pray mutually for each other's dead. These "mortuary rolls" (in French "rouleaux des morts") were called in Latin "rotuli". They consisted of strips of parchment, sometimes of prodigious length, at the head of which was entered the notification of the death of a particular person deceased or sometimes of a group of such persons. The roll was then carried by a special messenger ("gerulus", "rotarius", "rollier", "tomiger", "provatorio", "poster", etc.) or the "rolier" (a member of the association who had been elected for the purpose) from monastery to monastery, and at each entry was made upon the roll attesting the fact that the notice had been received and that the requisite suffrages would be said.

By degrees a custom grew up in many places of making these entries in verse with complimentary amplifications often occupying many lines. It will be readily understood that these records, some of which are still in existence, preserving as they do specimens of ornate verse composition by a representative scholar of each monastery or institution, and engrossed on the roll by some skilful penman in each community, afforded an invaluable aid to the study of paleography and also for a comparative judgment of the standard of scholarship prevalent in these different centres of learning. The use of these mortuary rolls flourished most in the eleventh, twelfth, and thirteenth centuries. Some are of prodigious size. That of the Abbesses Matilda of Ghent, the daughter of William the Conqueror, was seventy-two feet long and eight or ten inches wide, but this no doubt was altogether exceptional.

Herbert Thurston.

Rouen, Archdiocese of (Rothomagensis), revived by the Concordat of 1802 with the Sees of Bayeux, Evreux, and Sées as suffragans: it also includes the Department of the Seine Inferieure. The Archdiocese of Rouen was curtailed in 1802 by giving the Archdeaconry of Pontoise to the Diocese of Versailles; the Deaneries of Payzac and Audemars being amalgamated, and a part of the Diocese of Périgueux to the Diocese of Evreux; several parishes of the Deanery...
of Aumale were annexed to the Diocese of Beauvais. The Archbishop of Rouen bears the title of Primate of Normandy. Rouen, chief city of the Seconda Provincia Lugudunensis under Constantine, and later of Neustria, has been since 912 the capital of Normandy and residence of the dukes.

The episcopal catalogues of the ninth and tenth centuries and the "Liber Eburovicensis" of the cathedral of Rouen, which extends to 1068, indicate St. Mellon as first Bishop of Rouen; the "Liber Niger" of St. Ouen which comes down to 1079 and the episcopal lists dating from the twelfth century mention the episcopate of a certain Niciause (Nicaise) as antedating that of St. Mellon. The legend of this Nicaise, based on Hilduin, makes him and his two companions, Quirinus and Scubiculus, disciples of St. Denis who chancellor of Clotaire II; legend relates how he delivered the environs of Rouen from a monster called Gargouille, having had him captured by a liberated prisoner; in commemoration of St. Romain in the Middle Ages the Archbishops of Rouen were granted the right to set a prisoner free on the day that the reliquary of the saint was carried in procession; St. Ouen (Audoennus) (641-684), previous to his appointment as bishop, was charismatized and wrote a life of St. Eloy (Eliigius); his episcopate was distinguished by the foundation of the monasteries of Fontenelle, Jumièges, and Fécamp, by the unceasing efforts he made to exterminate all traces of paganism in his diocese, and by the arbitration effected through his influence between the Angles and Franks; his fame as a miracle-worker was great in the Middle Ages; St. Ansbert (684-92 or 93) chancellor of Clotaire III, and afterwards confined for political reasons by Pepin of Heristal in the Abbey of Hautmont; recently there was found in the library of Carlsruhe a curious little poem of the seventh century written by him on St. Ouen; this poem came originally from the Abbey of Reichenau; St. Hugh (722-30) was a monk of Jumièges before being made bishop; he subsequently combined the Sees of Rouen, Paris and Bayeux, also the abbey of Jumièges and Fontenelle; St. Remi (753-772), brother of King Pepin, was also archbishop of Rouen.

Guntbalduis who had played a certain part in the restoration of Louis the Pious, having become Bishop of Rouen, was commissioned in 846 by Sergius II to settle a dispute between Ebbo and Hincmar, and died in 849. The name of a certain St. Leo who suffered martyrdom at Bayonne sometimes appears incorrectly on the lists of archbishops of Rouen at the end of the ninth century and should be struck off. Among the more famous archbishops of Rouen were: Archbishop Franco (911-19), who baptized the Northman chief Rolle; St. Maurille (855-87), who reformed his clergy and fought the heresies of Ausson; John of Bayeux (1069-79), whose book on ecclesiastical services regulated religious devotions in Normandy; William I (Boonne Ame) (1071-1119), first a Benedictine and allowed St. Anselm to leave the Abbey of Bec to occupy the See of Canterbury; Hugh of Amiens (1151-74), author of numerous works; John, under whose episcopate Rouen was honoured in May, 1131, by a visit from Innocent II, the only pope who ever entered Normandy; Gautier de Coutances called the Magnificent (1184-1207) the favourite companion of Richard the Lion Hearted; Etudes II Rigaud (1247-1292), one of the most learned of the day; he accompanied St. Louis on his Tunis crusade and left a diary of his pastoral visitations which has the most important bearing on the ecclesiastical history of the province; Gilles Aycelin (1311-18), Chancellor of France; Pierre Roger (1350-39) became Pope Clement VI; Peter de Forca (1352-56) was at first Bishop of Paris and became a cardinal in 1356, as Chancellor of France he was one of the most faithful adherents of the dauphin, afterwards Charles V.

During the Hundred Years War the English occupied Rouen from 1417-1449; the Duke of Bedford at his own request was formally made a member of the Chapter of Rouen in 1430. The English rule, so severe for the people, increased the privileges of the clergy but dealt rigorously with such ecclesiastics as were thought rebellious; especially with Archbishop Louis de Harcourt who was deprived in 1421 of his possessions for refusing to pay homage to Henry V. The following should be cited: John, bishop: John of la Rochetaillé (1423-29), cardinal in 1426; Louis of Luxembourg (1434-42), cardinal in 1439, was the sworn agent in France of Henry VI, King of England; William of Estouvelles (1453-83), cardinal in 1437 and commissioned by Nicholas V in 1453 to mediate between France and England, and to

INTERIOR OF THE CATHEDRAL, ROUEN

came from Rome to Normandy but suffered martyrdom at their arrival on the banks of the river Epte. It was under the episcopate of William (Boonne Ame) the Good (1079-1119) that the name of Nicaise was placed at the head of the episcopal lists of Rouen. A number of saints were the successors of St. Mellon; according to the chronology of the Abbé Sauvage they were: St. Avitius (about 314); St. Severus; St. Victricius, born about 330, a soldier in the beginning of his career and as such a confessor of the Faith under Julian the Apostate; made Bishop of Rouen about 380 and died, according to his biographer, Abbé Vacandard, before 408; famous for his friendship with St. Paulinus of Nola and St. Martin, also for going in 396 to England where he worked zealously for the conversion of the English people; his treatise "De Laude Sanctorum" is a strong plea in favour of the devotion to relics; Innocent I commissioned him in 404 to make known in Gaul the "Liber Regularum", which contains urgent instructions for ecclesiastical celibacy, for the respect due to the hierarchy, and Roman supremacy; St. Innocent; St. Evodius (about 430); St. Godardus (490-525), brother of St. Medardus, one of the assistants at the baptism and coronation of Clovis; St. Flavius; St. Pretextatus (550-580), exiled in 577 by order of King Chilpéric, was reinstated in the diocese in 584, and stabbed before the altar in 586 by order of Fredegonde; St. Romanus (631-641) former
obtain from Charles VII certain modifications of the Pragmatic Sanction; Robert of Crosmemare (1483–93) and Cardinal Georges d’Amboise (1493–1510), both of whom played an important part in the Renaissance movement; the two Cardinals Charles of Bourbon (1550–90 and 1590–94), the first of whom was at one time governor of France; the Cardinal de Joyeuse (1604–15) who negotiated peace in the name of Henry IV between Paul V and the Republic of Venice; the two François de Harlay (1615– 51) and (1651–71); John Nicholas Colbert (1691– 1707), son of the minister; Nicholas de Saulx Tavannes (1728–67, canonized in 1744) in the diocese of La Rochefoucauld (1759–1800), cardinal in 1777, president of the clergy at the States General, emigrated after 10 August, 1792, and died in exile at Münster; Etienne Cambacérès (1802–18), brother of the archchancellor of Napoleon, cardinal in 1803; Prince de Croy (1823–44), chief almoner of France under the Restoration, and cardinal in 1825; Henry de Bonnechose (1858–83), cardinal in 1863; Léon Thomas (1884–94), cardinal in 1893; William Bourriau (1894– 99), cardinal in 1897.

It is not known exactly whether Rouen became a metropolitan at the time of St. Viticultus or under Bishop Vedette in 744, to whom is dedicated the abbey of St. Zachary; in the Middle Ages it exercised metropolitan rights over Evreux, Avranches, Sees, Bayeux, Lisieux, and Coutances. It seems that in the seventh century Lillebonne (Julibons) was for a short time the see of a bishop suffragan of Rouen. The Archbishop of Rouen assumed at an early date the title of Primate of Normandy and Neustria, to indicate the entire independence of his metropolitan see which was directly subject to the Holy See. In vain did Gebuin, Archbishop of Lyons, obtain from Gregory VII two Bulls in 1070 which recognized his primacy over Rouen retained unexorcised a simony of the Bull of Celestine II given in 1144. On 12 November, 1455, Cardinal Dominic Capranica, papal delegate, recognized the independence of the Church of Rouen by giving a definite decision, confirmed in 1457 and 1458 by two Bulls of Callistus III. The Archdeacon of Rouen was known as the “grand archidiacon de la cathédrale”. The Chapter, in virtue of a Bull from Gregory XI in 1371, was completely exempt from the archbishop’s jurisdiction both spiritual and temporal. Nicholas Oresme (d. 1382) was head master of the College of Navarre and Bishop of Lisieux; he translated Aristotle and was dean of the Church of Rouen; the Abbot Peter d’Alby and the historian Thomas Baslin, later Bishop of Lisieux, belonged to the Chapter of Rouen. St. Remy, Bishop of Rouen, was after Chrodogis, Bishop of Metz, the principal initiator in the reform which under Pepin replaced the Gallican with the Roman Liturgy. In 1729 the cathedral of Rouen accepted the breviary of Urban VIII and the vicar-general of Rouen, who revised the liturgy in a Gallican sense. Later Cardinal Bonnechose insisted on the use of the Roman liturgy in the diocese. The Chapter of Rouen preserved its custom until the Revolution of chanting the Office by heart; it was forbidden to bring in a book into the choir. The faculty of Catholic theology of Rouen was founded in 1808 and organized in 1809; it was however suppressed in 1885.

No town of France has produced such marvels of religious architecture as Rouen. The oldest part of the cathedral, which has survived all fires, is the belfry of St. Romanus’s tower, which dates from the beginning of the fourteenth century. The construction of the nave began about 1200; the Calende portal, so called from an imaginary animal, and the portals of the libraries, famous for the richness of their ornamentation, were finished in the first quarter of the fourteenth century. The Butter Tower (la Tour de Beurre), so called because it was built with the alms derived from the Lenten dispensations, dates from the end of the fifteenth and the beginning of the sixteenth century, and is one of the most famous edifices in the flamboyant style. The ninety-six choir stalls were carved in the fifteenth century under the direction of Philippe Viart and represent in their workmanship all the professions of the period. There are three celebrities, three of the most famous, of this period alone, whether correctly or not, is said to be the tomb of Archbishop Maurille, and dates from the twelfth and thirteenth centuries; that of the two cardinals of Amboise dates from 1520 to 1525, and on it is the statue of George d’Amboise, the work of Jean Goujon; that of St. Louis de Brézé is in position; the latter was executed from 1555 to 1544 at the expense of Diane de Poitiers, widow of Louis de Brézé. The present Church of St. Ouen, where a small Roman apse is still preserved and some bases of Roman pillars dating from the eleventh century, is one of the rare examples that exist in France of a large and beautiful church of the fourteenth century, almost complete, and one of the most delicate pieces of architecture extant. The Church of St. Maclou dates from the fifteenth and sixteenth centuries; the folding doors are attributed to Jean Goujon. On one side of the church is a monument unique in its way, the étre St. Maclou. There is also the L’âtre St. Maclou, the old cemetery of the parish, is a large rectangular space surrounded by porticoes built in 1526–40, and shows the Renaissance style in all its purity. A Dance of Death (Danse Macabre) sculptured on its columns was unfortunately badly defaced by the Huguenots. The Palace of Justice in Rouen is one of the most celebrated buildings belonging to the end of the Gothic period.

Among the twelve Benedictine abbeys for men which the Diocese of Rouen possessed under the old regime must be mentioned, besides Fontenelle and Jumièges, the Benedictine Abbeys of St. Hagard, St. Ouen and St. Romain, founded in 548, where a school of theology flourished which was recognized by Gregory IX in 1238; and the Abbey of Fécamp, dedicated to the Trinity in 688 by St. Viningus (Vaning), Governor of Neustria and Count of the Palace under Clovis II. This was first occupied by nuns under the direction of St. Hildemarehe, was ruined by the Normans in 941, and reopened for priests by Richard, first Duke of Normandy, who had the present beautiful church dedicated in 990. St. William (1001–28) was the first Abbot of Fécamp; he had among his successors the future Pope Clement VI and Jean Casimir, King ofolland, who, victorious in the battle of Fécamp, was Abbot of Fécamp in 1669. The Abbey of St. George de Boscherville was founded in 1060 by Raoul de Tancarville, chamberlain of William the Conqueror. The abbey of Tréport was founded in 1056–59 by Robert, Count d’Eu, companion of William the Conqueror. During the religious wars the Ursulines of Rouen committed great ravages in Rouen; having become masters of the city 16 April, 1562, they devastated St. Ouen, made a pyre in the centre of the church with the stalls and fragments of the superb screen, and then burnt the body of St. Ouen and other relics of the basilica. Rouen was retaken 26 October, 1562, by François de Guise and Antoine de Bourbon; the majority of Charles IX was proclaimed there in 1563. Rouen, which had declared for the League, was ineffectually besieged by Henry IV from December, 1591, to April, 1592, and only surrendered in 1594 to the new Bourbon king.

In the eleventh century an association of distinguished men was founded at Rouen in honour of the Immaculate Conception. Its chief or president was called “prince”. In 1486 Pierre Daré, lieutenant-general of the bailiwick of Rouen, was “prince” and converted the association into a literary society which awarded a prize for the best poems written on the Immaculate Conception. Every stanza of the poems,
according to a special rule, must end with the same verse as the first; this repeated verse, which they called "palinodion," gave the name of "Palinodio" to the confraternity. Malherbe took the prize in 1555; Pierre Corneille competed in 1633, but does not seem to have been crowned; Jacqueline Pecoeau received the prize in 1640; Thomas Cornelle in 1641. The threelvolume Bible, finished at the end of the twentieth century for the royal library, is illustrated with ten miniatures which are among the most beautiful produced in France during the fifteenth century. The extant of the "Chroniques de Monstrelet" was made at Rouen and contains drawings of the greatest importance for the history of the fifteenth century. The manuscripts, written in the sixteenth century by order of Cardinal George d'Amboise, who brought back with him the most beautiful manuscripts from the royal library of Naples, compare favourably with those of the best Italian masters. Besides those already mentioned, many saints are connected with the history of the Diocese of Rouen or are the objects there of special devotion: St. Severus (sixth century) who perhaps was the Bishop of Rouen, whose body was translated into the cathedral of Rouen; St. Austreberta, Benedictine abbess (seventh century); St. Sidonius, of Irish origin (seventh century); the hermit St. Clair, of Vexin, martyr of the ninth century; St. Lawrence O'Toole, Archbishop of Dublin, died at Eu in the diocese 1180; Blessed Jean of Arc was imprisoned at Rouen in the tower constructed in 1206 by King Philip Augustus, and was burned in the old market place 31 May, 1431, after her so-called abjuration at the cemetery of St. Ouen; St. John Baptist de la Salle, who established the first novitiate of the Brothers of the Christian Schools at St. Yves, near Rouen in 1705 and died at Rouen in 1719. The saints given to the diocese by Fontenelle and Jumieges must also be mentioned. The saints of Fontenelle are: the founder, St. Wandrille (Wandregasus) (570-667); the abbots St. Bain (about 729); St. Wando (742-756); St. Gerold (d. 806); St. Ansegisus (823-853), who compiled the canonical or statutes of Chartres and Le Mans; St. Pious; St. Gerard (1008-31); and the monks St. Gond (d. about 690); St. Erembert, who became, about 657, Bishop of Toulouse; St. Wolfran, Archbishop of Sens and apostle of the Frisians (d. in 720); St. Agatius; St. Dessir; St. Sindos; St. Conde; St. Desir with Hermeland, who died in 715 after founding the monastery of Hindre (Indre) in the Diocese of Nantes; St. Erinhard (d. 739); St. Hardouin (d. 811). The saints of Jumieges are: the founder, St. Philibert (675); St. Aciade (d. 687), and St. Gontard (1072-93). The distinguished natives of the diocese should also be mentioned: the two Cornelle brothers; the philosopher, Fontenelle (1657-1757); the Jesuit, Brumoy (1688-1742), famous for his translations of Greek plays; the Jesuit, Gabriel Daniel (1649-1728), whose three-volume "History of France," published in 1713, is considered the first reliable and complete history of France. Cavelier de la Salle (1643-87), explored the Valley of the Mississippi; the Protestant theologian, Samuel Bochart (1599-1677), a famous Oriental scholar; the numerous Protestant family of Basnage, the most distinguished member of which, Jacques Basnage (1553-1723), is well known as a historian and divine; the liberal publicist, Anselme de Coigny (1800-36); Boildieu, the composer (1775-1834) and pupil of the cathedral musical school of Rouen.

The principal pilgrimages of the archdiocese are: Our Lady of Salvation (Notre Dame de Salut) near Fécamp, which dates from the eleventh century; Our Lady of Good Hope (Notre Dame de Bon Secours) at Blosseville, a pilgrimage which existed in the thirteenth century; Our Lady of the Waves (Notre Dame des Flots) at St. Adresse, near the harbour of Havre, is a chapel built in the fourteenth century. Before the Law of 1901 directed against the religious orders, there were in the Diocese of Rouen, Benedicentes, Dominicans, Franciscans, Pious and Oblates of the Holy Ghost, the Servants of the Sacred Heart of Mary, and Brothers of the Christian Schools. Some religious orders for women originated in the diocese, of which the most important are the Sisters of Providence, a teaching order founded in Rouen in 1666 by the Minim Barre and the priest Antoine de Lahaye, and the Sisters of the Sacred Heart, who were founded at Ermenonville in 1698 by Archbishop Colbert. The religious owned in the Diocese of Rouen at the end of the nineteenth century 6 infirmary, 43 infirmary schools, 1 asylum for deaf-mutes, 5 orphanages for boys, 1 orphanage for children of both sexes, 4 girls' orphanages, 3 schools of apprenticeship, 7 societies for preservation, 1 house of correction, 38 hospitals, 1 dispensary, 26 houses of religious who care for the sick in their homes, 4 houses of convalescence, 2 homes for incurables, 1 asylum for the blind. In 1910 the Diocese of Rouen had 863,879 inhabitants, 6 archdeaconries, 45 deaneries, 16 first-class parishes, 47 second-class parishes, 59 succursal parishes, 55 curacies and about 800 priesthouses.

GEORGES GOUlage.

ROUEN, Synods of.—The first synod is generally believed to have been held by Archbishop Saint-Ouen about 560. Sixteen of its decrees, one against simony, the others on liturgical and canonical matters, are still extant. Four others were held in 671, 718, 896, and a few others place this synod in the second half of the ninth century. Later synods were presided over by: Archbishop St. Anbért some time between 689-93; Archbishop Mauger in 1048; the papal legate Hermann of Sitten at Lièges in 1056, at which Archbishop Mauger shewed his and the clergy's pietas to the morals; Archbishop Maurilius in 1055, which drew up a creed against Berengarius of Tours to be subscribed to by all newly elected bishops; Archbishop John of Bayeux, one in 1072 and two in 1074, urging ecclesiastical reforms; Archbishop William in 1096, at which the decrees of the Council of Chartres were confirmed; Archbishops Goisfrid in 1115, at which the papal legate Conrad asked the assembled prelates and princes to support Gelasius II against Emperor Henry V and his antipope, Burdinus (Gregory VIII); the same Archbishop in 1119, and the cardinal legate Matthew of Albano, in 1128, to enforce clerical celibacy; Archbishops Gualterinus, Arnaud, and Étienne de Couron, in 1214, to urge clerical reform. Other synods were held in 1223, 1231, 1278, 1313, 1321, 1335, 1342, 1445, and 1531. The synod held by Archbishop Colbert in 1699 condemned Fénélon's "Maximes des Saints": The last provincial synod was

held by Archbishop Bailleul in 1830; for its Acts see "Collectio Lacensis," IV, 513-36.

Michael Ott.

**BOUQUETTE, ADRIEN,** b. in Louisiana in 1813, of French parentage; d. as a missionary among the Choctaw Indians in 1857. The great passion of his youth was devotion to the Choctaw Indians. He was sent north in 1824 to divert his mind from his savage associates. In 1829 he was sent to France and finished his collegiate studies in Paris, Nantes, and Rennes, winning his baccalaureate in 1833. He returned to New Orleans, but refused to mingle in worldly pleasures, and spent much time alone or among his Indian friends. Later he returned to Paris to study law, but preferred literature, and returned to Louisiana, led a desultory life until 1842. Then he made a third visit to France, where he published his first poetic essay, "Les Sauvages." This was well received and he returned to Louisiana to become editor of "Le Propagateur Catholique." Ere long he found his true vocation and was ordained priest in 1845. Assigned to duty at the Cathedral of Saint Louis, at New Orleans, his eloquence crowded the building, and his holy life commanded the love and respect of all denominations. He served for fourteen years as a priest at New Orleans, then suffered a breakdown in 1859, he severed all connection with civilization and made his home for twenty-nine years as a missionary among the Choctaw Indians on the banks of Bayou La Combe. As a result of his patient labours he won many converts to the Faith. Among his publications are: "La Théâtrale de l'Amérique," "L'Antoniade," "La Nouvelle Atala," "Wild Flowers." S. B. Elder.

**BOUSSAU, JEAN-BAPTISTE,** a French poet, b. in Paris, 16 April, 1670; d. at La Genette, near Brussels, 17 May, 1741. Although he was the son of a shoemaker, he was educated with the greatest care and made his studies at the Jesuit College of Louis le Grand, Paris. On account of his wit, he was admitted to the most exclusive salons. After a short sojourn in London, as private secretary to the French ambassador, Tallard, he frequented the irreligious society which gathered at the Temple, the evil influence of which caused his misfortunes. His first dramatic attempts were failures, but his epigrams gained him a great reputation. He was elected to the Academy of Inscriptions and Belles-Lettres in 1700. In 1710 he was accused of being the author of "Couplets infâmes," a libel of a most licentious character. Having retorted that they had been written by Saurin, he was sentenced by the Parlement to a fine and a thousand livres damages, to Saurin, and soon after sent to exile. He went first to Switzerland, where he was sheltered by the French ambassador, Count de Luc, then to Vienna, to Prince Eugène's Court, and finally to Brussels. He tried several times to have the court's decision annulled, but failed because of the hostility of Voltaire and a few others. His works consist of: (1) a comedy in prose, "Le café" (1694), two operas, "Jason" (1696) and "Vénus et Adonis" (1697), and five comedies in verse, only two of which were produced on the stage, "Le flateur" (1696) and "Le caprice" (1700); (2) four books of odes, the first being an adaptation of the Psalms, two books of allegories and a score of cantatas; (3) his epigrams, the best part of his work, which will secure his fame (4) his letters. His works were repeatedly reprinted from 1710 to 1820. His lyrics are not esteemed now, but he is still regarded as the greatest epigrammatist of the eighteenth century.

Louis N. Delamarre.

**BOVETANO, BENEDETTO DA,** sculptor and architect, b. in 1490, either at Rovezzano, near Florence, or, according to some authorities, at Canapale, near Pistoia; d. at Florence, 1530. His family name is said to have been Gratini or Grazini. One of his most important works was the sculptures for the Church of St. John Gualbertus (1505); these sculptures were injured during the siege of Florence, 1530. The mutilated fragments, five reliefs from the life of the saint, are in the Bargello. Benedetto executed many tombs, chiefly architectural in design, with ornaments in sculpture. The monument of Odde Altoviti, Church of Ss. Apostoli, Florence, done in 1507, is by him; the monument of Piero Soderini in the choir, church of the Carmine, Florence; and others. Leo X sent to Card. Wolsey twelve terra cotta medallions by Rovezzano and the sculptor himself went to England in 1524. The cardinal engaged him upon a tomb for himself, but as he fell into disfavour before its completion, it was finished by the king's order. Charles I wished to be buried in it, but the tomb remained empty until the death of Nelson. Rovezzano is believed to have acquired prosperity in England. He returned to Florence in later life, and endured long years of blindness before his death. Further works are the altar of St. Denis in the S. Trinità, Florence; two altars in the church of the Badia; door of Badia; door of SS. Apostoli; a St. John in marble in the Duomo; and in the Bargello, marble niches from the Palazzo Cepparello and a chimney piece.

**BOWLANDS, RICHARD.** See VERSTEIGEN, RICHARD.

**Bowsham, Stephen,** a native of Oxfordshire, entered Oriel College, Oxford, in 1572. He took orders in the English Church and was minister at the University Church about 1578, but becoming convinced of the truth of the Catholic religion he went to Reims (23 April, 1581), where he was ordained priest, and sent on the English mission (30 April, 1582). Being recognized almost immediately on his landing, he was apprehended and sent to the Tower, 19 May, 1582,

and remained a prisoner for more than three years, during half of which time (14 Aug., 1859, until 12 Feb., 1854) he was confined to the dungeon known as the "Little Cage". On the latter date he was transferred to the Marshalseas, from which prison he was carried into exile in the autumn of 1858. He arrived at Reims, 8 October, but set out for England again, 7 Feb., 1858. The field of his labours, which were continued for about a year, was in the west of England. He was taken to the Sanctuary of the Widow Strange in Gloucestershire. His trial and martyrdom were at Gloucester in March, 1586-87.

ROY, PAUL EUGENE. See Quebec, Archdiocese of.

Royal Declaration, the.—This is the name most commonly given to the solemn repudiation of Catholicity which, in accordance with the provisions of the "Bill of Rights" (1689) and of "The Act of Succession" (1700), every sovereign succeeding to the throne of Great Britain was, until quite recently, required to make in the presence of the assembled Lords and Commons. This pronouncement has also often been called "the King's Protestant Declaration at Coronation" and (but quite incorrectly) "the Coronation Oath". With regard to this last term it is important to notice that the later coronation oath, which for two centuries has formed part of the coronation service and which still remains unchanged, consists only of certain promises to govern justly and to maintain "the Protestant Religion established by Law". No serious exception has ever been taken by Catholics to this particular formula, but the Royal Declaration, on the other hand, was regarded for long years as a substantial grievance, constituting as it did an insult to the faith professed by many millions of loyal subjects of the British Crown. The terms of this Declaration, which from 1689 to 1910 was imposed upon the sovereign by statute, ran as follows: "I, A. B., by the grace of God King (or Queen) of England, Scotland and Ireland, Defender of the Faith, do solemnly and sincerely in the presence of this assembly swear and declare, that I believe that in the Sacrament of the Lord's Supper there is no any Transubstantiation of the elements of bread and wine into the Body and Blood of Christ at or after the consecration thereof by any person whatsoever: and that the invocation of the Virgin Mary or any Saint, and the Sacrifice of the Mass, as they are now used in the Church of Rome, are superstitious and idolatrous. And do solemnly in the presence of God profess, testify, and declare that I do make this declaration, and every part thereof, in the plain and ordinary sense of the words read unto me, as they are commonly understood by English Protestants, without any evasion, equivocation, or mental reservation whatsoever, and without any dispensation already granted me by the Pope, or any other authority or person whatsoever, or without any hope of any such dispensation from any person or authority whatsoever, or without thinking that I am or can be acquitted before God or man, or absolved of this declaration or any part thereof, although the Pope, or any other person or persons, or power whatsoever, should dispense with or annul the same or declare that it was void from the beginning.

The terms of the document are significant, for even the extravagant and involved wording of the "long rigmarole" at the end added much to the sense of studied insult conveyed by the whole formula. Not only is the Mass stigmatised as idolatrous, but a false statement of Catholic doctrine is implied in the reference to the "adoration" of the Virgin Mary and the saints as "now used in the Church of Rome"; while the existence of papal power is assumed which the Catholic Church has always repudiated. What added still more to the just resentment of Catholics at the continued retention of the Declaration was the consciousness that, in the words of Lingard, it owed its origin "to the perjuries of an impostor and the despotism of a nation". The former was not one drafted by a parliament of the Witsden or sober senses. With the object of excluding Catholics from the throne, the Bill of Rights, after the deposition of James II in 1689, exacted of the monarch a profession of faith or "Test". The test selected was one which already stood in the statute book, and which was first placed there by Act of Parliament by the supposed Popish Plot of 1678. It was amid the panic created by the fabrications of Titus Oates, that this Test was drafted (not improbably by Oates himself), and it was imposed upon all officials and public servants, thus effectually excluding Catholics from Parliament and positions of trust. By a curious inversion of history the declaration which was drawn up in 1678 to be taken by every official except the king, had come two hundred years later to be exacted only of the king and of no one else. Although statements have been made contending that the substance of the Royal Declaration is older than the time of the Act of 1689, and that an examination of these earlier formule shows little to support such a conclusion (see a full discussion in "The Tablet", 13 Aug., 1910, p. 243). A brief account of these formules, and of the attempts which were made in 1689 and subsequent years to abolish or modify the Royal Declaration, has already been given in the article OATES. It will be sufficient to cite here the terms of the new Declaration which was formally carried by Mr. Asquith's Government in August, 1910, in order to relieve King George V from the necessity of wounding the feelings of his Catholic subjects by a repetition of the old formule. In virtue of Mr. Asquith's "Accession Declaration Act" the brief statement, which now replaces that quoted above, runs as follows: "I, N., do solemnly and sincerely in the presence of God, profess, testify and declare that I am a faithful Protestant, and that I will, according to the true intent of the enactments to secure the Protestant Succession to the Throne of my realm, uphold and maintain such enactments to the best of my power."

See sections IV and V of the bibliography under the article OATES: Ternorov in Dublin Review, 1822-30, and in The Tablet (London, July and August, 1910), pseude.

Herbert Thurston.

Roye-Colllard, Pierre-Paul. Polish philosopher and French politician, b. at Sompries (Marne), 26 June, 1763; d. at Châteauvieux (Loire et Chor), 4 September, 1845. An advocate under the ancient régime, and assistant registrar of the municipality of Paris from 1778 to 1792, he withdrew to La Marne during the Terror. In 1797 he represented La Marne in the Council of the Five Hundred (Cinq-Cents) and became prominent through a celebrated discourse in which he demanded liberty for the Catholic religion, "which rallied under its ancient standards seventeighths of the French people", and accused of "profound folly" those who wished to substitute "I know not what philosophical sillsiness". Driven from the council by the stroke of the 18 Fructidor, he turned to the restoration of the Bourbons and began a correspondence with Louis XVIII; he was even, up to 1806, a member of a secret council which sent messages to the future King Louis XVIII from public life, but accepted from Napoleon (December, 1809) the chair of philosophy at the Sorbonne. His teaching, which was influenced by the School of Reid, marked a reaction against the sensualism of the eighteenth century. He held to a certain spiritual-

Ruadhán, Saint, one of the twelve "Apostles of Erin" (q. v.); d. at the monastery of Lorrha, Co. Tipperary, Ireland, 5 April, 584. Ruadhán studied under Saint Finian of Clonard. His embassy to King Dermot at Tara, in 556, is worked into a romance known as the "Cursing of Tara", but the story continued to reside at Tara till his death (564). The legend as to Tara's halls having been deserted after 564 is of comparatively late origin, and is contradicted by the fact that a Peta was held at Tara in 697. St. Ruadhán founded the monastery of Lorrha. His bell is preserved in the British Museum; St. Ruadhán's feast is kept on the anniversary of his martyrdom.

W. H. GRATAN-FLOOD.

Rubesl, Bernardus de. See Rossi, Bernardo de.

Ruben [Reuben], a proper name which designates in the Bible: (I) a patriarch; (II) a tribe of Israel. I. Ruben, a patriarch, Jacob's eldest son (Gen. xlix. 8; xlix. 3) by Lia, was blessed by his father, and called Ruben ("see ye, a son") as an allusion to Lia's distress because of Jacob's previous dislike of her: "The Lord saw my affliction: now my husband will love me" (Gen., xxix, 32). Ruben was deprived of his birthright in punishment of an inceit which he committed in Chanaan (Gen., xxvii. 40). It was at his suggestion that instead of killing Joseph, his brothers threw the latter into a pit, whence Ruben vainly hoped to rescue him (Gen., xxxvii, 18–24; 29–30; xlii, 22). When Jacob refused to allow Benjamin to go to Egypt with his brothers, Ruben offered two of his sons as a sign that Benjamin would be brought back (Gen., xlii, 37). To this day, biblical literary concerning Jacob's firstborn, numerous and worthless Haggadic details are added in rabbinical and apocryphal literature.

II. Ruben, a Tribe of Israel, situated east of Jordan, and sharing with the tribe of Gad, the original territory of the Amorite king, Sehon, between the Arnon and the Jecob and as far east as Jaser, the border of the Ammonites. The respective lot of Ruben and Gad cannot be given with perfect accuracy (see Gad), although on the basis of Jos., xiii, 15–23, Ruben's territorial possessions are usually described as on the east of the Dead Sea and Jordan, between Gad on the north and Moab on the south. Among the prominent towns of the Rubenites were Baalmaon, Bethphogor, Cariahitam, Dibon, Hesebon, Jasea, Medaba, and Sabama. During the journey through the wilderness, the tribe of Ruben counted over 40,000 men (Num., i, 21; xxvi, 7) and marched with Gad and Simeon on the south side of Israel. To the same period are referred the rebellion of the Rubenite chiefs, Dathan and Abiron, against Moses, and its signal punishment (Num., xvi; Deut., xi, 6). After contributing to the conquest of Western Palestine and sharing in the various incidents connected with the erection of a great altar, the descendents of Ruben settled in a district favourable to pastoral pursuits (Num., xxxii; Jos., xxxii). Together with the Gadites, they held aloof from the war against Sisara (Judges, v), were smitten by Hasael (IV Kings, x, 32–3), and carried into captivity by Teglathphalassa. The Rubenites were pre-eminently a pastoral race, little fitted to resist invasion, and several of their cities fell into the hands of Moab (q. v.) long before the tribes east of Jordan were carried captive by the Assyrians (cf. Is., xv; Mesa).

FRANCIS E. GIGOT.

Rosny, see Rosneau, Diœcese of.

Rosny, Pierre Paul, Diœcese of.

Ian, based on "common sense", and an "understanding of human weakness". Under the Restoration he again took up politics; he became deputy and was president for five years of the Committee of Public Instruction as counsellor of state. As deputy he opposed both the intrigues of the Ultras, and the anti-constitutional manoeuvres of the Left. His discourses on the religious laws of the epoch show that he was inclined to admit, as a consequence of the Concordat, the influence of the State in Church matters. Educated by a Jansenist mother and declaring voluntarily that "whoever did not know Port-Royal did not know humanity", he preserved certain prejudices against Roman influence and gave expression to them in his discourses. He opposed the law punishing sacrilege with death, and the laws restraining the liberty of the Press.

In 1827 he was elected by seven electoral colleges, became president of the Chamber in 1828, and presented to Charles X in 1830 the address of the two hundred and twenty-one in which the Chamber refused to accept Polignac. Royer-Collard described himself when he wrote to Barante (19 Sept., 1833):

"My only vocation as a liberal was on the side of the Legitimists". For the "doctrinaires", of whom he was the head, the legitimist monarchy without liberty was an absolute absolutism, liberty without the legitimist monarchy, anarchy. Under the monarchy of July he continued as deputy, but only as a spectator. The "Restoration", writes Barante, "was for him a country", and from 1830 this country no longer existed. He resigned from the Chamber in 1842, and passed his last years in retirement, his disciples, both in philosophy and politics—Jouffroy, Cousin, Guizot, Rémuas—perpetuated the influence of certain of his writings; and M. Faguet declares that in these one must seek "the most penetrating, the most solid, and the most far-seeing doctrine on parliamentary government". This he developed with a grave, austere eloquence, trusting to logic for its strength. Whilst during the first half of the nineteenth century the word "liberal" was generally synonymous with Voltaireanism and hostility to the Jesuits, certain speeches of Royer-Collard quoted by Barante show that this liberal, especially in his later years, pressed a definite attachment for the Church. "If Christianity", he wrote, "has been a degradation, a corruption, Voltaire in attacking it has been a benefactor of the human race; but if the contrary be true, then the passing of Voltaire over the Christian earth has been a great calamity." In a letter to Père de Ravignan he comments upon the institution of the Jesuits as a wonderful creation. His death was that of a professing and believing Catholic. He was the incarnation of the upper middle class of his time. He was a member of the French Academy from 1827.

GEORGES GOYAU.
RUBENS
215

RUBENS

warp, 30 May, 1640. His father, Jan Rubens, a lawyer and alderman of Antwerp, was a Protestant who had fled from his native city to Cologne at the time that the Spanish governor was making strong efforts to extirpate heresy in Flanders. After various troublous experiences in connexion with the Dutch army, with the wife of Prince William of Orange, and following upon more than one imprisonment, the father, who had temporarily to leave Cologne, returned to that city, where Peter Paul continued his studies. His mother, Maria Pype- linx, had continued a Catholic, although she temporarily concealed the fact during her aggressive husband's life, but she insisted upon the boy's education at a Jesuit school. She herself was formally received back into the Catholic Church, immediately upon the death of the elder Rubens, when, though in reduced circumstances, she was able to return to Antwerp. From her and from his schoolmaster Rombout Vordenck, Rubens acquired the strong religious character which marked the whole of his career. His earliest days were passed as a page in the household of a princess, the widow of Count van Lalain, former Governor of Antwerp. When nearly thirteen the young Rubens was sent to the studio of Tobias Verhaecht, and thence quickly removed to study under Adam van Noort where he made the acquaintance of Jordaens, a fellow-pupil in the same studio and a lifelong friend of the great artist. He soon went to a third studio, that of Otto van Veen, and remained with this master until 1598, when he was admitted to the Painters' Guild of Antwerp, and started on his first journey to Italy (1600).

He carried introductions to the Duke of Mantua, Vincenzo Gonzaga, received his patronage, and was sent by him to Florence, Genoa, and Rome to carry out important commissions. He then returned to Mantua and was sent to Spain in charge of certain portraits intended as diplomatic presents. On his return to Italy he entered into the Duke's permanent service, but was permitted to spend considerable time in Rome where he continued his studies. In 1606 he left Italy and returned to his own city of Antwerp, where he married Isabella Brant and settled down as an artist of great renown. He joined more than one religious guild connected with the local churches, and especially became attached to that of St. Paul, in honour of whose great festival on the day of his birth, Rubens had received his two Christian names. At this time he commenced his great house, splendidly built, lavishly decorated, and installed with many fine treasures which he had acquired in Italy. He lived there in great luxury, full of commissions, and surrounded by a host of pupils, among whom was Anthony van Dyck who raved, and even surpassed him in portraiture, and the eminent painters Jordaens, Snyders, de Vos, and Justus van Egemont.

Here his two sons, Albert and Nicholas, were born. In 1622 he was commissioned to paint the great picture, The Marriage of Medici, now in a gallery in the Louvre; this occupied him for two years. His wife died in 1626, and four years after, he married Helena Fourment, the daughter of Isabella Brant's sister. Meantime, he had become painter-inordinary to the new Governor of the Spanish Netherlands, the Infanta Isabella, who kept him very busy, both as artist and diplomatist, the result of his courtliness and sweetness of manner particularly fitted him. In 1629 he was sent to London by the Count Olyives by way of Brussels and Paris, and was knighted by Charles I on 21 February, 1629-30. After his second marriage he purchased a great house near Mechlin and there prepared his designs for the pageant intended to commemorate the royal entry into Antwerp of the new governor, Archduke Ferdinand. This governor made him Court painter and showered various commissions upon him, among them the decorations of a shooting box which the King of Spain was at that time erecting near Madrid. By this time Rubens' wonderful energy and health were so broken, that many of his later pictures were executed by his pupils under his supervision and are to a very slight extent his own work.

He had become a man of considerable means through countless commissions not only in painting and designing pictures, but in etching, silver-point work, preparing designs for tapestry, engraving on silver, and planning the entire decoration for the wonderful pageants that were a feature of his period and country. A man of prodigious energy and overpowering enthusiasm, he was the author of perhaps a larger number of huge pictures than can be attributed to any other painter, and though very many of his works were entirely executed by his own hand, he trained his pupils to so skilfully copy his methods and carry out his ideas that in many cases all the rough and bolder work of the picture was executed by them, he himself applying the finer details and glazes, which enabled the picture to be declared a masterpiece and gave to it that quality which his hand alone could supply. The best of his religious work is at Antwerp, but the twenty-two pictures representing the history of Marie de' Medici, on all of which he is supposed to have worked to a certain extent, stand supreme in decorative work. Several of his finest portraits are in Madrid, others in Munich, and one or two of his masterpieces in the National Gallery in London, but almost all the great galleries of Europe contain representative examples of his work. Dresden, Brussels, Frankfort, St. Petersburg, Vienna, Berlin, Florence, and Warsaw must all admit that any adequate idea of the output of this extraordinary and remarkable painter is to be obtained.

He has been the subject of many biographies and of constant research. He is always somewhat of a mystery, for at first one is depressed by his very exuberance, his unbridled artistic frenzy, and the vast show of flesh and power which he vulgarily summarizes his pictures, while to many who love tenderness, mysticism, a sensitive quality, and stately dignity, his impropriety and exaggerated enthusiasm is repugnant. Some of the greatest artists, such as Rossetti, were in their early days unable to understand the anomalies in the art of Rubens. People could pictures even in their most lenient moods. There is such an abundant glory, such powerful organic life in the work of this majestic colourist, that his pictures
are not easy to appreciate until one is practically vanquished by the glory of their colour and the luminosity of their central sun. The more circumscribed conception awakens fuller appreciation and the marvellous conceptions of the artist and his exuberant ideas of magnificence impress and reveal the high position of the painter.

In his drawings he is almost supreme. His religious pictures, when properly regarded and thoughtfully underlined, are impressive. The reverential quality apart from the fury of colour and extravagance. His portraits are triumphant, sometimes perhaps sensual, often dreamy, always impressive. He is unequalled as to colours, and though fuller of the delights of earth than of heaven, yet when the nature of the man is understood the intensely devout quality of his beautiful religious pictures can be appreciated.

It is, however, as a draughtsman and colourist, as a master of pageant and a decorator of the highest position that the fame of Rubens has been created.

See also the catalogues of Rubens exhibitions and articles upon him, specially those by Wagen, Bainburt, and Rubens.

GEORGE CHARLES WILLIAMSON.

Rubrics. I. Idea.—Among the ancients, according to Columella, Vitruvius, and Pliny, the word rubrica, rubric, signified the red earth used by carpenters to mark on wood the line to follow in cutting it; according to Juvenal the same name was applied to the red titles under which the jurisconsulta arranged the announcements of laws. Soon the red colour, at first used exclusively for writing the titles, passed to the indications or remarks made on a given text. This custom was adopted in liturgical collections to distinguish from the formule of the prayers the instructions and indications which should regulate their recitation, so that the word rubrica has become the consecrated term for the rules concerning Divine service or the administration of the sacraments. Gavanti said that the word appeared for the first time in this sense in the Roman Breviary printed at Venice in 1560, but it is found in MSS. of the fourteenth century, such as 4397 of the Vatican Library, fol. 227-28; several thirteenth-century MSS. of the Prioress of Peter Amelius. The word is used sometimes to indicate the general laws, sometimes to mark a particular indication, but always to furnish an explanation of the use of the text, hence the saying: Lege rubrum ai vis intelligere nigrum (read the red if you understand the black). Thus in liturgical books and character tables, these characters indicate what should be done, the black what should be recited, and the Rubrics may be defined as: the rules laid down for the recitation of the Divine Office, the celebration of Mass, and the administration of the sacraments. In some respects the rubrics resemble ceremonies, but they differ immeasurably as the ceremonies are external attitudes, actions considered as accidental rites and movements, while the Rubrics bear on the essential rite.

II. Kinds.—Writers distinguish between the rubrics of the Breviary, the Missal, and the Ritual, according as the matter regulated concerns the Divine Office, the Mass, or the sacraments; and again between essential and accidental rubrics according as they relate to what is of necessity or to external circumstances in the act which they regulate, etc. But the chief distinction seems to be that which divides them into general and particular rubrics. The first are the rules common to the same sacred function, e.g. those which regulate the recitation of the Divine Office, whether considered as a whole, in its chief parts, or in its secondary parts; they are at present printed under thirty-four titles in the editions of the Roman Breviary at the head of the part for autumn; those which regulate the celebration of Mass printed at the beginning of the Roman Missal (twenty titles containing the general rules, thirteen titles containing the rubrics of the liturgy of the Mass, and ten others explaining the defects which may occur); those which regulate the administration of the sacraments (given by the Ritual at the beginning of each of the sacraments, as also by the Pontifical for the sacraments administered by a bishop). The particular rubrics are the special rules which determine the course of the rubrics at each period of the year, on certain fixed days, as the days of Holy Week, or when a particular formula is recited. They are inserted in the midst of the formule of Breviary, Missal, or Ritual.

III. Origin and Development.—The Rubrics are as ancient as the Offices themselves. They were long transmitted by oral tradition and when they were consigned to writing it was not in the fulness known to us. Like the various elements of the Divine Office and the Missal, the manner of celebrating them had at first a local character; there were observances peculiar to certain churches. Thus St. Cyprian (Ep. iv. in P. L., IV, 410) mentions the peculiarities of Carthage in the administration of the sacraments; St. Augustine in his reply to Januarius (Ep. iv, in P. L., XXXIII, 204) treated at length the rites of the Church, those which might under no circumstances be neglected and those which might be discontinued; Gregory the Great, writing to St. Augustine (Ep. XIX, in P. L., LXXVII, 1186) suggests to him the same wise direction with regard to local practices. It is difficult to determine the period at which these rules were consigned to writing. The ancient Sacramentaries, the MSS. Missals, and even the early printed Missals contain some, but very few, rubrics. There is every reason to believe that they were contained in special collections known as Ordinaries, Directories, and Rituals. An Ordo Romanus has been attributed to Gregory the Great (see LITURGICAL Books), but it is difficult to say what it was. Relying on the "Ordines Romani" published by Mahillon, Father Griaar (Civitella Cattolica, 20 May, 1905) gives the oldest description of the solemn pontifical Mass as dating from the pontificate of Gregory the Great. Hittorpi's publication has been much discussed, Cardinal Bona (De divina pastoralia, 1, 604) regarding the position of the Roman Missal, but non-Roman Missals of subsequent ages, which is the case with all the liturgical books. Cardinal Tommasi (Opere, IV, p. xxxx) characterizes it as a confused mass in which it is impossible to distinguish the most ancient and authentic practices. In this primitive state are rubrics and ceremonies of the whole book.

There were no rubrics until the fifteenth and sixteenth centuries. At first they were compilers and worked on separate parts. Cardinal Quignéz found the ancient rubrics obscure and confused; the new rubrics which still exist with some additions and alterations form an excellent exposition borrowed from predecessors ("Directories, Office Divinum", 1593) by the Franciscan L. Ciconiale with the approval of Pope Paul III. In 1592, under Leo X, Burchard edited the general rubrics of the Roman Missal; they were printed in the edition of the "Missale Plano" and have thus reached us. In collaboration with Aug. Pascal Piccolomini, Burchard also issued (1488) the ordinary and the ceremonies of the pontifical Rome, under the title "Roman Ecclesiae Ceremoniarum libri tres"; these have passed into our present Pontifical. Finally the Roman Ritual, edited in 1614 under Paul V, was compiled, with the aid of the Ritual of Cardinal Giulio Antonio Santacroce, from which most of the rubrics are derived. Thus various collections of the rubrics compiled by individuals have received the approval of the sovereign pontiffs, and since Pius V, instead of being published as separate treatises, they have been inserted in the liturgical
books with which they dealt. The S. C. of Rites, instituted by Sixtus V in 1587, is commissioned to approve new rites, to suppress abuses in liturgical matters, to sanction archdiocesan rubrics, to interpret the rubrics, and to solve difficulties connected therewith. Besides this interpreting authority, individual liturgists may also write commentaries and explanations on the subject.

IV. Obligatory Character.—In describing the kinds of rubrics, we have intentionally omitted mention of distinctions which seem to us without sufficient foundation. Writers distinguish between Divine and human rubrics, but as soon as rubrics are approved by the sovereign pontiff and promulgated in his name it seems to us that they emanate from a Divine-human authority, and hence to have the Church has to establish such rules. According to a prevalent sentiment, we should do away with the distinction between the preceptive rubrics (those which bind under pain of sin, mortal or venial according to the matter) and directive rubrics (those which are not binding in themselves, but state what is requisite) in the form of a single rule.

It may be said that the rubrics of the liturgical books are real laws; this follows from the definition: they are prescriptions for the good order of external worship in the Catholic Church, they emanate from the highest authority—the sovereign pontiff—and can impose penalties, although they are promulgated. It does not appear that the supreme head of the Church merely desires to give a counsel. Hence the distinction between the preceptive and directive rubrics is (a) in contradiction to the terms of the definition of rubrics, which are rules, consequently ordinances, laws, whose character is to be wise, once both directive and preceptive, i.e. to impose an obligation: (b) it is contrary to the mind of the sovereign pontiffs as expressed in their Bull, which in establishing and promulgating rubrics intend to make them real laws. Pius V in the Bull "Quod a nobis", for the publication of the Roman Breviary (1568), expressed himself as follows: "Statuientes Breviarium ipsum nullo unquam tempore, vel totum vel ex parte mutandum, vel ei aliquid addendum, vel omnino detrahendum esse". The same pope uses similar terms in the Bull "Quo primum tempore", for the publication of the Roman Missal (1570): "Mandantes, ac dicti, ut in ritibus ex aliis Missalisibus quantumvis vetustius habentes observari consuetudinum, in posterum penitus omnis ac plane receptus, Missam juhta ritum, modum ac normam quae per Missale hoc a Nobis nunc traditur decentem ac legantem, neque in Missae celebratone ac regimine, quae successa est quo hoccus Missali continentur addiere vel recticare praesumant". No less explicit are the expressions employed by Paul V for the publication of the Ritual (Brief "Apostolice Sedis", 1614), by Clement VIII for the publication of the Pontifical (Brief "Ex quo in Ecclesia", 1596), etc.; (c) this distinction is equally contrary to the Decrees of the Sacred Congregation of Rites, which constitute a real command, while it cannot be said that they involve a greater obligation than the rubrics which they explain, which would be the case if the rubrics were not preceptive, when the commentary would have greater force than the text itself. (d) It is contrary to the rubricists' manner of expressing themselves. Thus Bissius declares that the rubrics are laws: "Leges tam Missalis quam Breviarii dicuntur Rubrice, cum legis et aliis ordinationibus et solent esse firmae docent revocentur". De Herdt is still more explicit: "Rubrice sunt regulae juxta quas obediri communi licentia celebrari, et sacramenta administrandi debent." It is true that many others admit the distinction between preceptive and directive rubrics, as De Herdt does, but they write from the standpoint of conscience, and when they excuse infractions of the rule it is in virtue of special reasons due to circumstances. It is also objected that certain rubrics are called "Ad libitum", e.g. the third Collect of the Mass for certain days, the optional recitation of the "Dies Irae" in low unprivileged Masses for the dead. But even in these cases there is a certain prescription: a third prayer must be said, which is left to the choice of the celebrant; half of the "Dies Irae" may not be said, but it must either be omitted or repeated. Rubrical indications whose obligatory character is completely lacking, such as the prayers in preparation for Mass, "pro opportunitate saeculorum faciendis", are exceptional instances, the very terms of which show what is to be understood, but these exceptions merely confirm the point in establishing a distinction is merely to multiply distinctions at all, a procedure that is all the more useless because it would eventually amount to saying that there are preceptive precepts and non-preceptive precepts. We can only conclude that the distinction between preceptive and directive rubrics should be or can be made only at all, it should be simply as an historical reference (see Ephemerides Liturgicae, I, 146). Under certain circumstances rubrics may be modified by custom, but in this respect they do not differ from laws in general.

F. CABROL

Rubruck, William (also called William of Rubruck and less correctly Ruysbroek, Ruysbroeck, and Rubruquis), Franciscan missionary and writer of travels; b. at Rubruck in northern France probably about 1200; d. after 1256. He became closely connected with St. Louis (Louis IX) in Paris, accompanied him on his crusade, and was at Acre and Tripoli. Louis, notwithstanding his repeated ill-success, again formed the plan of converting the Tartars to Christianity, and at the same time of winning them as confederates against the Saracens. Consequently at his orders Rubruck undertook an extended missionary journey, going first to visit Sartach, son of Batu, the Mongol ruler of Kiptchak, and at the latter's persuasion became a Christian. In 1253 Rubruck started from Constantinople, crossed the Black Sea, traversed the Crimea towards the North, and then continued eastward; nine days after crossing the Don he met the khan. The latter was not inclined to agree to the schemes of St. Louis and sent the ambassadors to his father Batu, living near the Volga. Batu would not embrace Christianity and advised the envoys to visit the great Khan Mangu. In midwinter they reached the eastern point of Lake Alakul, south of Lake Balkash; and near this the Court of the khan, with which they arrived at Karakorum early in 1254. The Mongol head-quarters for some time in this city they had to return home without having obtained anything. On the return journey they took a somewhat more northerly route and arrived in the spring of 1255 by way of Asia Minor to Cyprus, whence they proceeded to Tripoli.

The report of the journey which Rubruck presented to the king is a geographical masterpiece of the Middle Ages. It exceeds all earlier treatises in matter, power of observation, keenness of grasp, and clearness of presentation, besides being but little spoiled by fabulous narratives. In it Rubruck gives a clear account of the condition of China, of the characteristics and technical skill of its inhabitants, of his journeys, of his peculiar writing, and of the manufacture of silk; he also mentions paper money, printing, the division into castes, rice brandy, kumias, speaks of the physicians who diagnosed diseases by the pulse, and prescribed
Rudolf of Fulda, chronicler, d. at Fulda, 8 March, 862. In the monastery of Fulda Rudolf entered the Benedictine Order, studied under the celebrated Rabanus Maurus, and was himself a teacher. He was also associated with King Louis the Pious, whose intimate friend he considered himself, but it is not known how long he remained at court. It is probable that, after the elevation of Rhabanus to the Archiepiscopal See of Mainz, Rudolf followed him thence, and only towards the close of his life took up permanent residence once more at Fulda. He was one of the most distinguished scholars of his time. The "Annales Fuldenses", begun by Einhard and continued (838-63) on the same lines by Rudolf, are valuable contributions to the general history of the period on account of his close connexion with the court. Among the many editions of the "Annales Fuldensis" the "Annales regni Francorum orientalis", that of Kurze (Hanover, 1891) is the best (German tr. by Wattenbach, "Geschichtsschreiber der deutschen Vorgeschichte", XXIII, Leipzig, 1889). At the suggestion of his master Rabanus, Rudolf (838) compiled, from notes of the priest Megis and from oral tradition, a life of St. Lioba or Leobhryth (published in "Acta SS.", VII., Sept., Antverp. ed., 760-9, and in "Mon. Germ. Script.", XV., i, 121-31). It was St. Lioba whom St. Boniface called to Bishofheim on the Tauber to assist him by her activity. Under the mis-leading title, "Vita beati Rabani Mauri, archiepiscopi Moguntini Germaniae", there is extant a work on the miracles performed by the relics brought to Fulda by Rabanus, interspersed, according to the spirit of the times, with important historical and ethnological notes. In the "Mon. Germ. Script." (XV., 329-41) it is printed under the more correct title, "Miracula sanctorum in Fuldense ecclesiæ translatorum". A similar work of much more importance historically is "Translatio sanctorum Alexandri Wildeshausian anno 851" in "Mon. Germ. Script.". II., 673-81, begun by Rudolf in 863 at the request of Waldbert, a grandson of Widukin, and completed by Meginhart. Taking the "Germania" of Tacitus for his model, he pictured the history of ancient Saxony and the introduction of Christianity.

Rudolf of Habsburg, German king, b. 1 May, 1218; d. at Speyer, 15 July, 1291. He was the son of Albert IV, the founder of the Habsburg line, and Countess Heilwig of Kiburg. After the death of his father in the Holy Land, Rudolf pursued an independent line of politics. In the conflict between the papacy and the empire he supported the Hohenstaufens, and, during the interregnum, strove to increase the power of his house, especially in Switzerland. In his extensive domains, of which Swabia formed the centre, he showed himself a good, if stern, ruler, and especially in the south won many friends. At the instigation of Gregory X, who threatened to appoint a regent to govern the empire if steps were not taken to restore order to the country by the election of a prince who would exercise an effective rule, Rudolf was chosen emperor 1 October, 1273. Towering but lean of stature, with bony cheeks and hooked nose, he was a courageous warrior, a skilled diplomat, and distinguished alike for unrelenting sternness and genial kindness. Six electors voted for Rudolf; the seventh, Ottakar of Bohemia, abstained from voting. This powerful king ruled over Germany, Meissen, and the mountains in the north of Bohemia as far as the Adriatic, having added Austria, Styria, Carinthia, and Krain to his inherited domains. When Ottakar was summoned to answer for this alienation of the imperial fiefs, Rudolf proved himself an astute politician in the proceedings against Bohemia. Recognizing that it was impossible to force the German princes to the position of vaasals, he utilized every opportunity to enhance the power of his house, for only the possession of great domains could ensure for a German king a position of prominence. Supported by the Church, Rudolf began the war in 1278, and on the Marchfeld on 26 August, 1278, Ottakar lost his throne and his life. The ancient possessions of the Bohemian royal house were left to Ottakar's son Wenceslaus, who was still a minor, but the Austrian lands had to be given up and were formally granted by Rudolf to his own sons, as according to the prevailing laws of the empire, the sovereign could not retain confiscated lands. In this manner Ostmark became permanently into the possession of the Habsburgs. Whether the downfall of Ottakar was a German success or not, is still an open question among scholars. In recent times, the opinion has prevailed that, far from being hostile to the Germans, Ottakar favoured German immigration into Bohemia, and, with the possession of the Austrian lands, he might perhaps have completely germanized Bohemia; and, had he secured the imperial crown, this powerful prince might have given a new importance to the imperial authority. The creation of a strong central power was also the object of Rudolf's politics. For the consolidation of his kingdom about the Danube, peace and stability in Germany were necessary, and these only a strong imperial power could guarantee. There was no fixed imperial constitution, and the development of such would have been resisted by the territorial princes. Rudolf was shrewd enough to obtain from attempting forcibly to increase his constitutional powers, and contented himself with preserving such domains and rights as were still left to the crown. He sought to recover the many imperial possessions which had been lost since 1245, moreover he saw to it that the taxes laid upon the imperial cities and towns were duly paid; although he failed to establish uniform system of taxation owing to the
resistance of many cities which had to be put down by force of arms before they came to an agreement with him.

With Rudolf began a period of national peace for Germany which was to last for two hundred years. Taking as his model the pacific settlement made by the Emperor Frederick II, in the Landfrieden at Mainz, in 1235, he drew up a number of agreements which, though often broken, were the forerunners of means of maintaining peace and trade. But here also he had to be content, if the princes and towns really carried out these settlements to do which they claimed as their right and if they really checked the system of robbery, which, under the form of “feuds”, prevailed more and more. This happened not always the case. Even in such cases Rudolf did not take vigorous measures and prove practically that the maintenance of public peace was the duty of the Emperor. Lesser peace-breakers he punished; greater ones in only case in they threatened his dynastic interests. In Swabia his governor (Landvogt), Count Albert of Hohenberg, fought without much success against Count Eberhard the Illustrious of Württemberg; against Siegfried, the ambitious Metropolitan of Cologne, he proceeded by force of arms. But it was not the warlike measures of Rudolf, but the defeat of Siegfried near Wormingen in 1267 by the Duke of Brabant, that finally determined the inheritance of Duke Walram of Limburg that curbed the ambitious efforts of the archbishop. Rudolf was more successful in his efforts (1289) to settle the disputes in the House of Wettin. But his chief ambition, to secure the imperial crown for his house, he failed to realize. The electoral authority grew stronger during his reign, and the system of electing his kings remained the calker of the German Empire. Until the very last he endeavoured to increase the power of his family; indeed, in the east of the empire, he created for his family such a position that a little later it developed into a decisive factor in the subsequent historical evolution of the German Empire. Meanwhile, considering the difficult conditions, he did very much to restore the unity of the empire. By his wise moderation he secured for himself general recognition, being the first emperor for a long period to achieve this end. The many diets which he called also his strengthening of the unity of the empire. His foreign policy showed the same wise moderation. He abstained from taking any action in the Italian question, without however resigning the rights of the empire. However much the pope strove to secure the support of the king against the powerful Count of Anjou in order to check his power in the south of the peninsula, Rudolf was always able to skilfully avoid the overtures; even the attractions of the imperial crown were of no account in the eyes of this sober and calculating prince. In Burgundian affairs he interfered only so far as his action was likely to increase the power of his house, by strengthening his imperial frontiers towards Burgundy. Otherwise his policy in the West was guided by the principle of preserving peaceful relations with France. The death of this upright and popular monarch was received with lamentations throughout the empire. He was buried at Speyer.

RUDOLF, 219

RUDOLF

Rudolf of Rüdesheim, Bishop of Breslau, b. at Rüdesheim on the Rhine, about 1402; d. at Breslau in Jan., 1452. From 1422 to 1426 he studied at the University of Heidelberg from which he graduated as master. He then proceeded to Italy, graduated as doctor in ecclesiastical law and became auditor of the Rota. Numerous benefices were conferred upon him at an early date, particularly in the dioceses of Mainz and Worms. From 1438 onward he represented the cathedral chapter of the latter city at the schismatic Council of Basle, where he formed a friendship with Enes Silvio de' Piccolomini, subsequently Pope Pius II. The latter, however, as well as Pope Pius II, and the Emperor Frederick III entrusted Rudolf with important missions and difficult negotiations. Pius II named him in 1463 Bishop of Lavant in Tyrol. The See of Breslau was conferred on him in 1468, at a time when the inhabitants were spiritedly resisting their ruler, George Podiebrad, King of Bohemia. The latter had been expelled from Hungary and communicated, but maintained his position as ruler. The war which resulted was protracted beyond Podiebrad's lifetime and terminated, with Rudolf's co-operation, in the Peace of Olmütz in 1479. Now intent more exclusively upon the spiritual welfare of his diocese, the bishop sought to heal the wounds of the war, endeavoured to imbue the diocesan secular and regular clergy with a sound ecclesiastical spirit, and insisted upon the importance of their proper theological training. The acts of the synods held in 1473 and 1475 bear witness to the zeal and energy of the skull of the diocese.

FRANZ KAMPERS.

Rudolf von Emn (Hohenems in Switzerland), a Middle High German epic poet of the thirteenth century. Almost nothing is known of his life. He himself tells us that he was in the service of the Counts of Montfort and from the anonymous continuator of the "Weltchronik" we learn that the poet died "in welschen richten", i.e. in Italy, whither he had probably gone with King Conrad IV, about 1254. He professes himself a follower of Gottfried von Straßburg, for whom he entertains the greatest admiration, but his morals and didactic tendency differs strikingly from Gottfried's joyous sensualism, and he is prone to diffuseness and redundancy. In the choice of subjects he shows a predilection for those that are of a religious character, and he never forgets his function as a preacher. The earliest of his extant poems and one of the best is "Der gute Gerhard" in which the simple piety of an humble merchant of Cologne puts to shame the parochial ostentation of the Emperor Otto. The didactic tendency is very conspicuous in the poem "Bariam und Joseph", which treats a well-known legend that seems to have its root in Buddhist sources and which on account of its glorification of the ascetic life and its defence of Christianity against Paganism was a favourite subject with medieval poets. Another poem on a legendary subject, the conversion of St. Eustace, which Rudolf mentions among his works, has been preserved in the form of "Wilhelm von Orlens", a courtly epic with a conventional love-story, is based on a French original and was written for one Konrad von Winterstetten (d. 1241). Rudolf's most ambitious efforts were the historical epics "Alexander" and "Weltchronik". For the former the chief sources are the "historia de pratis" and the work of Curtius Rufus. The "Weltchronik" was undertaken at the request of King Konrad IV and was to be a complete history of the world from the beginning to the poet's own time. But death intervened and the story breaks off with King Solomon's reign. An anonymous poet then took up the subject and finished the use of Rudolf's material. As well as drawing on Godfrey of Viterbo's "Pantheon" he gave a version that carried the story as far as the Book of Judges. This second recension, usually called the "Christ-Herre-Chronik", from its opening words, was sub-
RUDOLPH

sequently still further amalgamated with Rudolph's version and amplified by various contributors, notably one Heinrich von München (fourteenth century). In 1802 the work became very popular and was finally resolved into prose.

"Der gute Gerhard" was edited by Haupt (Leipzig, 1840); "Blaßraam und Josaphat" by Pfeiffer (Leipzig, 1843). Of the other works there are as yet no critical editions. A MS. reprint of a Willhelm von Orelli's was given by Victor Junk in "Deutsche Texte des Mittelalters" (Berlin, 1905), II; selections from "Alexander" by Junk in "Beiträge zur Geschichte der deutschen Sprache" (1904), 29, 369–469; from "Weltechronik", by Vilmar, "Die zwei Rezensionen und die Handschriftenfamilien der Weltechronik Rudolf v. E. (Marburg, 1893)." Reprints, "Stellung einer Untersuchung über R. v. E. als Nachahmer Gotfrieds" (Leipzig, 1890); Ziegler, Die Quellen zum Alex. des R. v. E. in Weinhold und Voigt. Germanische Abhandlungen, IV (Breisig, 1885); Zdzieo, Die Quellen von Rudolf v. E. Wilhelm von Orelli (Berlin, 1894); Jone, Die Epigen des hl. Eppos in Sammlung Giehke, no. 296 (Leipzig, 1906), 16–62.

ARTHUR F. J. REMY.

Rudolph Acquaviva, Blessed. See Cun Colin, Martyrs of.

Rueckers, Family of, famous organ and piano-forte builders of Antwerp. Hans Rueckers, the founder, lived in Amsterdam at the end of the sixteenth and the beginning of the seventeenth century, where he became a member of the Guild of St. Luke and was active primarily as organ-builder. He died in 1640 or 1641. In what year the house which he established in Amsterdam was transferred to Antwerp is not known, but it was in the latter city that it attained its renown. Hans Rueckers originated a spinet (fore-runner of the piano-forte) with two keyboards, which could be played simultaneously. One could be coupled, a higher octave on one keyboard, with a lower octave on the other, thereby doubling the sonority. Hans Rueckers' son, Andreas, b. in 1579, still further perfected the mechanism of their instruments, which gained world-wide celebrity under Andreas the Younger during the second half of the seventeenth century, their importance continuing under his successors throughout the greater part of the eighteenth. Rueckers' pianos were exported to foreign countries, particularly to England, and sold for the price, in those days fabulous, of 3000 francs. Manuscripts were decorated by famous painters, which caused some of them to be destroyed so that the paintings might be preserved.

RIMBAULT, The Pianoforte, its Origin, Progress, and Construction, London, 1875; "Keyboard Instruments" (London, 1887); "Musikalisches Konservatorenzul" (Berlin, 1877).

JOSEPH OTTEN.

Ruffini, Paolo, physician and mathematician, b. at Valentano in the Duchy of Castro, 3 Sept., 1765; d. at Modena, 10 May, 1822. At first he intended to enter Holy orders and went so far as to receive the tonsure, but changing his mind, he began the study of mathematics and medicine in the University of Modena, where he received the degree of doctor. At the age of twenty-three he was appointed professor of analysis after having substituted for a year for his teacher, Cassandra, b. 1771, the chair of elementary mathematics was entrusted to him. In the meantime, he did not neglect the study and practice of medicine. At the time of the French invasion of Italy (1796), he was unexpectedly appointed a member of the Juniori in the legislative body at Milan. It was not without difficulty that he succeeded in returning to his lectures at Modena; he refused to take the required oath without the conditional declaration dictated by his conscience, he was dismissed from his position as a public lecturer; but with the return of the Austrians in 1799 he was restored to his former post and maintained therein by succeeding governments. A call to the chair of higher mathematics in Pavia he declined, because he did not wish to give up his medical practice among his dear Modenesi. The university having been degraded, he accepted (1806) the chair of applied mathematics at the newly established military school. In 1814 Francesco IV re-established the university and appointed Ruffini rector for life, and at the same time professor of practical medicine and applied mathematics. By his lectures with the pupils actually present he revived the clinical studies which had been neglected for several years. During the typhus epidemic of 1817 he sacrificed himself for his fellow citizens, and finally succumbed. Although he recovered, he never regained his strength. He was buried in the Church of S. Lorenzo, between the tombs of Sigonio and Muratori.

Ruffini's sole medical treatise is a "Memoria sul tifo contagioso". As a mathematician his name is inseparably associated with the proof of the impossibility of solving algebraically the quintic equation, on which subject he wrote several treatises ("Teoria generale delle equazioni, in cui si dimostra impossibile la soluzione algebrica delle equazioni generali di grado superiore al 4°", 2 vols., Bologna, 1798; "Della soluzione delle equazioni alg. determinate particolari di grado sup. al 4°", in Mem. Soc. Nat. Ital., IX, 1802, which was send to the Paris National Institute of Milan; "Della insolubilità delle eq. alg. etc.", ibid., X, 1803; "Della insolubilità etc. qualunque metodo si adoperi, algebrico esso sia o trascendente" in "Mem. Inst. Nat. Ital.", I, 1806). He also proved the impossibility of the quadrature of the circle ("Riflessione intorno alla rettificazione ed alla quadratura del cerchio" in "Mem. Inst. Nat. Ital.", IX, 1802). Less known, however, is the fact that Ruffini published the now familiar "Horner's method" of approximation to the roots of numerical equations fifteen years before Horner's first paper on it appeared in the "Philosophical Transactions" of 1819 (pt. I, pp. 308–35). In 1802 the Italian Society of Forty offered a gold medal for the best method of determining the root of a numerical equation of any degree. In 1804 the medal was awarded to Ruffini, and the dissertation was published under the title "Sopra la determinazione delle radici delle equazioni numeriche di qualunque grado" in the Southwestern Section of the American Math. Soc. (26 Nov., 1910), Professor Florian Cajori pointed out that the computation demanded by Ruffini is identical with that in "Horner's method", and that this method is elaborated by Ruffini with a clearness and thoroughness not surpassed in Horner's own exposition of 1819. In view of this fact, Professor Cajori insists that the name of Ruffini should be associated with that of Horner in the designation of the method. Ruffini again wrote on this subject in 1807 (Algebra elementare, esp. iv), and in 1813 (Memorie Soc. Itt., XVI, XVII). Ruffini was during his whole life a zealous Catholic. His convictions find expression in his apologetic works: "Dell' immortalità dell' anima" (Modena, 1806), dedicated to Pius VII, who sent him a gold medal; "Riflessione critiche sopra il saggio filosofico intorno alle probabilità del Sig. Conte de la Place" (Modena, 1821), in which he proves himself to be as familiar with metaphysics as with questions of religion.

Rufford Abbey, a monastery of the Cistercian Order, situated on the left bank of the Rainworth
RUFINA

Water, about two miles south of Ollerton in Nottinghamshire, was founded by Gilbert de Gant in or about 1145, as a daughter house of Rievaulx. By 1147 Gilbert endowed it with the manor of Rufford, and shortly afterwards added "Cratil" (Wellow), Barton, and Willoughby; these donations were confirmed by Stephen and Henry II, who also granted exemption from certain tolls and customs. Other benefactions followed and the abbey grew rich enough to be required in 1310 to supply victuals for Edward II's expedition to Scotland, and to be asked in 1319 for a contribution towards making good the losses suffered by the Archbishop of York through the Scottish war; yet in 1409 it escaped payment of a tenth to the king on the grounds of extreme poverty. The published lists of abbots in Dugdale and the Victoria County History, begin with Philip de Kyme, a well-known Lincolnshire magnate, whose inclusion is due to a mis-punctuation in a Pontefract charter. Both lists also omit the following early abbots: Gamellus, who occurs as witness to a Kirkstead charter of 1149-49 (Dugdale, V, 429) and is eulogized in two epitaphs contained in a Rufford manuscript now in the British Museum (Tit. D. xxiv, f. 81b, 88); Elias (1156 and 1166), in Bulla of Adrian IV and Alexander III (Harr. Ch. 111, A, 2, 5); Matthew (c. 1170-80), in various undated charters (Harr. MS. 1063, f. 10b, 65b, etc.); William, occ. between 1183-95 "Reg. of Abp. W. Gray", Surtees Soc., p. 39; Walter, 1212 (Harr. MS. 1063, f. 66); Robert, 1228 (ib., f. 127b); John, c. 1260-70 (ibid., f. 22b). The last abbots, but one, Rowland Blyton, or Bliton, left Rufford in 1533 to become Abbot of Rievaulx. His successor, Thomas Doncaster, was given a pension of £25 at the dissolution in 1536; but relinquished it within a few months on becoming rector of Rotherham. The dissolved abbey, with its estates, valued at £246 15s. 6d. yearly, was granted in 1537 to George Talbot, Fourth Earl of Shrewsbury. On the death of Edward, eighth earl, in 1618, it passed to Sir George Savile through his marriage with Lady Mary Talbot; and it has remained ever since in the possession of the Savile family, the present owner being John, Lord Savile. The remains of the monastic buildings are incorporated in the modern mansion. RuFINA. Monast. Angl. Anglicanum, V (1823), 517-21; PAU, Victoria History of co. Nottingham, ii (1910), 101-5; WARE AND ELLEN, Facsimiles of Brit. Mus. Charters, I (1908), no. 48; authorities cited, especially Harr. MS. 1063, a seventeenth-century transcript of Abbot John Lyle's chartyule compiled in 1471.

J. A. HERBERT.

RUFINA, SAINTE.—The present Roman Martyrology records eleven saints named Rufinus: (1) On 28 February, a Roman martyr Rufinus, with several companions in martyrdom; nothing is known concerning them. (2) On 7 April, an African martyr Rufinus with two companions; their names are mentioned under 6 April in a list of martyrs in the "Martyrologium Hieronymianum" (ed. De Rossi-Duchesne, 40). (3) On 14 June, the two martyrs Valerius and Rufinus who suffered at Soissons, France, during the Diocletian persecution; their names are given under this date in the "Martyrologium Hieronymianum" (ed. cit., 78; cf. 66 under 26 May; also Acta SS., June, I, 769 sqq.). (4) On 21 June, Rufinus who suffered martyrdom with Martin at Syracuse; nothing is known concerning him. (5) On 30 July, Rufinus of Assisi, who was according to legend the bishop of this city and a martyr. He is probably identical with the "episcopus Marsorum" noted under 11 August. The Acts of the martyrdom of this Rufinus are purely legendary (cf. "Bibliotheca hagiographica latina", II, 1063; Elzei, "Studien...", 1893; D. de Vincentiis, "Notizie di S. Rufino" (Avezzano, 1885)). (6) On 19 August, Rufinus, confessor at Mantua. (7) On 28 August, a confession Rufinus venerated at Capua (cf. Acta SS., August, V, 819-820). His name is given in the "Martyrologium Hieronymianum" under 26 and 27 August. (8) On 4 September, a martyr Rufinus with his companions in martyrdom who suffered at Ancyræ in Galatia; he is also mentioned in company with several others in the "Martyrologium Hieronymianum" (ed. cit., 113) under 31 August, and again

St. JUSTA AND RUFINA

Murillo, Provincial Museum, Seville

771 sq., and in the "Bibli. hagiogr. greca", 2nd ed., 143). (4) On 24 or 25 August, the feast of two martyrs, Rufina and Euthychus, at Capua in Campania is recorded in the "Martyrologium Hieronymianum" (110). Nothing further is known of either of these saints.

J. P. KIRSCH.
under 4 September (ed. cit., 116). (9) On 9 September, Rufinus and Rufinianus, with no further particulars. 
(10) On 16 November, Rufinus, a martyr in Africa with several companions in martyrdom; nothing is known concerning this saint. (11) Besides the saints already given mention should also be made of a martyr Rufinus of Alexandria whose name is given under 22 June in the "Martyrolog. Hieronym." (ed. cit., 81).

J. P. KIRSCH.

Rufinus Tyrannus, better known as Rufinus of Aquileia, b. about 345, probably at Concordia in Italy (Jerome, Ep. ii, 2); d. in Sicily about 410. Though both his parents were of the Christian Faith, he was not baptized till he was about twenty-five years old at Aquileia, where he lived for a short time as a monk. During this period he probably composed his "Exposition of the Creed". Soon after his baptism he went to Egypt, probably in the company of Melania, where he spent six years among the hermits, and from them imbibed his love of Origen. Afterwards he settled in Palestine, and lived in a monastery on the Mount of Olives with companions who dwelled in cells built at his expense, for he was a wealthy man. He later paid a second visit to Egypt which lasted about two years. His friendship with St. Jerome, begun at Aquileia if not earlier, was broken by the Origenist controversy in Palestine stirred up by St. Epiphanius (see ORIGENIUM), but the two were subsequently reconciled. In 397 he returned to Italy in the company of Melania. On his arrival there he composed a commentary on the "Benedictions of the Patriarchs", and began his labours as a translator of Origen with a Latin version of Pseudo-Clement's "Adversus Moses" (see PAMPHILUS OF CESAREA, SAINT), to which he affixed by way of epilogue a short but historically valuable treatise "The Adulteration of the Works of Origen by Heretics". This was followed by a translation of Origen's "De principiis". As the original is no longer extant, Rufinus's concept of his office as a translator, though prudent at the time, is aggravating to posterity. Assuming extensive falsification by heretics, he omitted and rectified, endeavouring however to make his rectifications from what Origen had said elsewhere. He also indiscriminately, if not with malicious intent, lauded St. Jerome's earlier zeal for Origen. This led to a fierce outburst in the Origenist controversy and a final estrangement from St. Jerome. St. Jerome attacked Rufinus, who replied with an "Apology" in two books. It was in connexion with this controversy that he wrote his short "Apology to Pope Anastasius". Rufinus translated other writings of Origen besides those already mentioned, some treatises of St. Basil and of Gregory of Nazianzus, the "Recognitions of Clement", the "Sayings" or "Ring of Xystus", some short tracts of Evagrius Ponticus, and Eusebius's "Church History"; to this last he added two books, bringing the narrative down to his own times. For the question whether this "Historia monachorum" was an original work or a translation see MONASTICISM. II. Eastern Monasticism Before Chalcedon (A. D. 451). The best edition of the works of Rufinus is that of Vallarsi (Verona, 1745). It contains Fontanini's "Vita Rufini", which is still a great authority. This edition has been reprinted by Migne in P. L., XXI. Unfortunately, it does not contain all the important, prefaces to the translations: these must be sought in the works of Origen, St. Basil etc. The translation of Eusebius's "Church History", together with the continuation, has been recently published in the Berlin edition of the Greek Christian writers of the first three centuries. The importance of Rufinus's writings, including the aforesaid prefaces, have been translated in the third volume of Wace and Schaff's "Nicene and Post-Nicene Fathers".

For further information concerning Rufinus and his works consult the Pataceni on the afore-mentioned translation and see also FREMANTLE in Dict. Christ. Biol., a. v. Rufinus (5). For the Origenist controversy see DUChESNE, Hist. anc., iii, ii, iii; TURIBY, Saint Jerome, i (Paris, 1867), i, vii. For Rufinus as a translator of Origen see ARMS TAGE ROBINSON's edition of the Philochoros (Cambridge, 1893), pp. xxii-xxxii; this writer says: "His [Rufinus's] translation is in fact what we should now call a paraphrase. He gives as a rule sense; and for the most part it is Origen's sense, if we have regard to the general thought rather than to the individual sentence".

F. J. BACCHUS.

Rufus, Saints.—The present Roman Martyrology records ten saints of this name. Historical mention is made of the following: (1) On 19 April, a group of martyrs in Melitene in Armenia, one of whom bears the name of Rufus. These martyrs are mentioned also in the "Martyrolog. Hier." (ed. De Rossi-Duchesne, 46). (2) On 2 August, Rufus, with several companions who, according to the most reliable manuscripts of the "Martyrol. Hieronym." died at Todi, the place being afterwards by mistake changed to Philadelphia (cf. Quentin, "Les martyrologes historiques", 337). (3) On 27 August, two martyrs named Rufus at Catania, whose name also appears as Rufinus in the "Martyrol. Hieronym." (ed. cit., 111). The other is said to have suffered with a companion, Carponius, in the Diocletian persecution (cf. "Bibliotheca hagiographica latina", i, 107, 382, vi, 18-19). (4) On 25 September, several martyrs at Damascus, among them one named Rufus. (5) On 7 November, a St. Rufus, who is said to have been Bishop of Metz; his history, however, is legendary. His name was inserted at a later date in an old manuscript of the "Martyrol. Hieronym." (ed. cit., 140). In the ninth century his relics were transferred to Gauchole (Duarte de Azevedo). (6) On 12 November, Rufus, a supposed Bishop of Avignon, who is perhaps identical with Rufus, the disciple of Paul (21 November). Legend, without any historical proof, has made him the first Bishop of Avignon (cf. Duchesne, "Fastes épiscopaux de l'ancienne Gaule", i, 258; Duprat in "Mémoires de l'Académie de Valence" (1889), 373 sqq.; (1890, 1 sqq., 105 sqq.). (7) On 21 November, Rufus the disciple of the Apostles, who lived at Rome and to whom St. Paul sent a greeting, as well as he did also to the mother of Rufus (Rom. xvi, 13). St. Mark says in his Gospel (xxv, 21) that Simon of Cyrene was the father of Rufus, and of the Roman Christians, this Rufus is probably the same as the one to whom Paul sent a salutation (cf. Corney, "Commentar. in Epist. ad Romanos" (Paris, 1896), 778 sqq.). (8) On 28 November, a Roman martyr Rufus, probably identical with the Rufinianus who was buried in the Catacomb of Gentile on the Portuensis, and who is introduced in the legendary Acts of the martyrdom of St. Chrysogonus (cf. Allard, "Histoire des persécutions", IV, 371 sqq.). (9) On 18 December, the holy martyrs Rufus and Zosimus, who were taken to Rome with St. Ignatius of Antioch and who were to death there for their unwavering devotion to the Christian Faith during the persecution of Trajan. St. Polycarp speaks of them in his letter to the Philippians (c. ix).

J. P. KIRSCH.
Ruinao, Thierry (Théodore), church historian and theologian, b. at Reims 10 June, 1657; d. at the Abbey of Hautvillers near Reims, 27 September, 1700. After completing his classical studies he entered (2 October, 1767) the Maurist Convent of the Benedictine Order at the Abbey of Saint-Remy at Reims which, in that era, produced in France a brilliant company of distinguished scholars. His seriousness, deep piety, and fine intellectual gifts soon made him known throughout his order, and Mabillon requested the superiors to give him Ruinao and his brother. Thus in 1682 he came to the Abbey of Saint-Germain-des-Prés, near Paris, where Mabillon was staying and, under the guidance of this great investigator, became one of the most eminent church historians and critics of his time.

The first, large, important work that Thierry Ruinao undertook was the publication of the Acts of the martyrs that he regarded as genuine: "Acta primorum martyrum sincera et selecta" (many editions; first ed. Paris, 1689; last ed., Ratisbon, 1839). Taken as a whole the collection is not surpassed even to-day, though individual documents are known as genuine by the keenest critics of modern times. In the introduction he ably discussed the authorities for the history of the martyrs, the Christian persecutions, and in doing this refuted the opinion propounded by Dodwell ("De paucitate martyrum", Oxford, 1684), that there were only a small number of martyrs in the early Church. A supplement to his work was published by Le Blanc ("Les actes des martyrs", Paris, 1883, in "Mémoires de l'Institut de France", XXX). After the "Acta" he published the "Historia persecutionis Vandalicarum" of Victor of Vita, to which he added an exhaustive discussion of the persecution of the Catholics in Africa at the hands of the Vandals (Paris, 1894; Venice, 1732).

After this he edited the works of St. Gregory of Tours (S. Gregori Florentii episcopi Turon. opera omnia) and the chronicle of Fredegar (Paris, 1699), with a comprehensive introduction and a large number of notes. With Mabillon he published volumes VIII and IX of the "Acta Sanctorum ord. S. Benedicti" (Paris, 1700-01). In this same period he prepared his "Apologie de la mission de Saint-Maur" (Paris, 1702) as a contribution to the history of the Benedictine Order in France. He published the treatise "De constitutione capitata" (Paris, 1705), in defence of Mabillon's work, "De re diplomatica", which had been attacked by Bartholomew Germon. Mabillon had begun, but had not been able to complete, a new edition of the "De re diplomatica"; this edition was now issued by Ruinao, who published in concert with it as "Abus ge de la vie de J. Mabillon" (Paris, 1709). At the same time he had undertaken the continuation of the "Annales ord. S. BENEDICTI" and carried it further by nearly completing the fifth volume.

While on a journey made during the year 1709, which he undertook to gather further material for this work, he was taken ill and died of a stomach affection (16 May, 1710), aged 53. After his death, his manuscripts were published by Thullier ("Ouvrages posthumes de Mabillon et de Ruinao") in three volumes (Paris, 1724). Among these were three treatises by Ruinao: "Itineraerum in Alastiam et Lotharingiam"; "De pallio archiepiscopalii"; "Vita S. Urbanii, pp. II". The letters of the distinguished scholar were edited by Valéry, "Correspondence inédite de Mabillon et de Montfaucon" (three volumes, Paris, 1846), by Jadar in his biography of Ruinao, see below, and by Girard, "Oeuvres de l'évêque de Saint-Maur, 1652-1741" (three volumes, Copenhagen, 1892-93).

J. P. KIRSCH.

Ruis de Aldaron y Mendoza, Juan de, Spanish dramatic poet, b. at Mexico City, about 1580; d. at Madrid, 4 August, 1639. He received his elementary education in Mexico and finished his studies at the University of Salamanca, obtaining the degree of Bachelor of Laws. In 1606, he removed to Seville with the object of practising his profession, and remained in that city for three years. While there his friends and associates were the men of letters of the city, among them the famous Master Jose Saavedra, with whom he formed a close friendship. The years between 1609 and 1611 he passed in his native country. Returning to Spain, he settled in Madrid. A few years before Philip II had transferred his court to that city, and it was not long before Aldaron's dreams of a prominent position at the bar were shattered, for he saw that only through intrigue and adulation could he hope for preferment. This being distasteful to a man of his temperament, he turned to writing for the stage, attracted by the success of Lope de Vega, Gabriell Telles (Tirso de Molina), and others of that period, which was so rich in literary masters. He was successful almost from the start. Unfortunately, he gained as well the envy and enmity of some of the poets of the time, among them Lope de Vega, Gongora, and Montvalán, who lampooned him mercilessly. After his death he was gradually forgotten, save by plagiarists, who could safely plagiarize from his unread works. Posterity, however, has given him his due, and he is considered the first great literary product of the New World and perhaps even to this day, one of the greatest. He is admitted in the foremost rank of Spanish dramatists, being surpassed, if at all, only by Lope de Vega and Calderón. Aldaron was the author of many plays, all of them masterpieces. Among the best known are: "Truth Suspected", which drew forth the highest praise from Corneille, who used it as a basis for his "Le Menteur"; "Walls have Ears" was meant to ridicule the habits of gossip and slander; "The Weaver of Segovia", a drama of intrigue and passion in two acts, one of which has been attributed to another author, being so much inferior to the second. In general his plays are distinguished by their ingenious plots, moral tone, vigorous and pure style, and purity of veracity.

VENTURA FUENTES.

Ruis de Montoya, António, one of the most distinguished pioneers of the original Jesuit mission in Paraguay, and a remarkable linguist; b. at Lima, Peru, on 13 June, 1585; d. there 11 April, 1652. After a youth full of wild and daring pranks and adventures he entered the Society of Jesus on 1 November, 1606. This year he published a volume, just mentioned, was edited (Paris, 1713) by Massuet after Ruinao's death. Several manuscripts left by Mabillon and Ruinao were edited by Thuillier ("Ouvrages posthumes de Mabillon et de Ruinao") in three volumes (Paris, 1724). Among these were three treatises by Ruinao: "Itinerarium in Alastiam et Lotharingiam"; "De pallio archiepiscopalii"; "Vita S. Urbanii, pp. II". The letters of the distinguished scholar were edited by Valéry, "Correspondance inédite de Mabillon et de Montfaucon" (three volumes, Paris, 1846), by Jadar in his biography of Ruinao, see below, and by Girard, "Oeuvres de l'évêque de Saint-Maur, 1652-1741" (three volumes, Copenhagen, 1892-93).
ready existing. When the missions of Guayas were endangered by the incursions of marauders from Brazil in search of slaves, Father Marques, the Franciscan, was sent to transport the Christian Indians, about 15,000 in number, to the Reductions in Paraguay, partly by water with the aid of seven hundred rafts and numberless canoes, and partly by land through the masses of the primeval forest. The plan was successfully carried out in 1573. The country was suffering great hardship and dangers. "This expedition," says the Protestant von Ihering, "is one of the most extraordinary undertakings of this kind known in history." (Globus, LX (1891), 179). In 1637 Montoya on behalf of the governor, of the Bishop of Paraguay, and of the heads of the orders laboriously instructed before the King a policy of sending marauding expeditions into the neighbouring regions. He obtained from the king important exemptions, privileges, and measures of protection for the Reductions (see Reductions of Paraguay). Soon after his return to America Montoya died in the course of sanctity.

He was a fine scholar in the beautiful but difficult language of the Guarani Indians, and has left works upon it which were scarcely exceeded later. These standard works are: "Tesoro de la lengua guarani" (Madrid, 1639), a quarto of 407 pages; "Arte y voces lengua guaraní" (Madrid, 1640), a quarto of 295 pages; "Catecismo de la lengua guaraní" (Madrid, 1648), a quarto of 336 pages. Mulhall calls Ruiz de Montoya's grammar and vocabulary "a lasting memorial of his industry and learning." The German linguist Von der Gabelentz regarded them as the very best sources for the study of the Guarani language, while Havera declares that the clearness and comprehensive grasp of the rules to which Montoya traced back the complicated structure and pronunciation of Guarani are most extraordinary. All three works were repeatedly republished and revised. In 1876 Julius Platemann, the distinguished German scholar in native American languages, issued at Leipzig an exact reprint of the first Madrid edition of this work "unique among the grammars and dictionaries of the American languages." A Latin version was edited by the German scholar Christ. Friedr. Seybold at Stuttgart in 1890–91. A collected edition of all Montoya's works was published at Vienna under the supervision of the Vicomte de Porto Seguro in 1876. Of much importance as one of the oldest authorities for the history of the Reductions of Paraguay is Montoya's work. Conquista espiritual hecha por los religiosos de la C. de F. en las provincias de la Amazonia, de Guayra y de Tape" (Madrid, 1639), in quarto; a new edition was issued at Bilbao in 1892. In addition to the works already mentioned Montoya wrote a number of ascetic treatises. Letters and various literary remains of Ruiz de Montoya are to be found in the "Memorial histor. espafoil", XVI (Madrid, 1822), 57 sqq.; in "Historia y ancias provin. de Paraguay" (Antwerp, 1800), and in the "Memorial sobre limites de la Republ. Argentina con el Paraguay" (Buenos Aires, 1867), I, appendix; II, 216–252; cf. Backer-Sommervogel, "Bibl. de la C. de Jesús", VI, 1675 sqq.

ANTHONY HUONDER.

Ruiz de Montoya, Diego, theologian, b. at Seville, 1562; d. there 15 March, 1632. He entered the Society of Jesus in 1572 and was professed 22 July, 1592. He taught philosophy in Granada, moral theology for one year in Baeza, and theology for about twenty years in Cordova and Seville. For a time he was rector of the College of Cordova, and represented the province, Andalucia, at "San Isidro," a General Congregation. The last years of his life were devoted to writing. His distinguishing characteristics seem to have been humility, a retiring disposition, and integrity. Notwithstanding the fact that the Duke of Lerma promised to obtain permission from Paul V to publish his manuscripts "De Auxilii" if he furthered his plans, he declined to advise the citizens of Seville to pay a certain tribute. Fray Miguel de San José considers him a most finished theologian; Merlin a wise, subtle, prudent student and faithful interpreter of the Fathers, and Kleutgen and Menéndez-Pelayo consider that he was one of the most learned of the Jesuits, with scholaric, in a manner not achieved by any of the theologians who preceded him. His published works are: "Doctrina Christianas," written by command of the Bishop of Cordova, published anonymously and several times reprinted; "Commentaria ac disputations in primam partem D. Th. de Trinitatis" (Lyons, 1625), his principal treatise and one of the best on this subject; (b) "De predestinacione ac reprobatione hominum et angelorum" (Lyons, 1628); (c) "De scientia, ideis, veritate ac vitat Dei" (Paris, 1629); (d) "De voluntate Dei et propriis actibus ejus" (Lyons, 1630); (e) "De providentia Dei" (Lyons, 1631); (f) "La ensenanza de la sagrada parábola never been rare and much sought editions. In manuscript preserved in various libraries: "De auxiliis," two volumes classified as very good by Father Vitelleschi; "De angelis"; "Commentarii in materiam de peccatis"; "Controversiae et questiones theologicae"; "De beneficiis parochialibus commendi"; "Deaniae et republca comodis vulgari"; "De statu qui petunt dimensionem in Societate Jesu"; "De causis dimittendi a Societate Jesu".

MUNDO DE GALVEZ, Carlos: . . . sobre la muerte y virtudes del Padre Montoya. (Cartagena, 1742) and was written by Father Faeliciano de Figuero (Catalogue . . . No. 5979). Rule of Faith. See Faith.

Rumania, a kingdom in the Balkan Peninsula, situated between the Black Sea, the Danube, the Carpathian Mountains, and the Pruth.

I. History.—The modern Rumanians are generally regarded as the descendants of the Dacians, a branch of the ancient Thracians; they dwelt north of the Danube in the territory now known as Transylvania, and formed at the breaking up of the Christian empire a comparatively well-organized state. Under the rule of able princes (e. g. Decebalus) they frequently threatened the Roman civilization between the Adriatic Sea and the Danube. Trajan first succeeded after several campaigns (102–96) in bringing the country under the Roman dominion; the new Roman province received the name of Dacia, which included the modern Transylvania, Banat, and Rumania. To replace the Dacians, a portion of whom had emigrated northward, Trajan introduced colonists into the land from every part of the Roman Empire, especially from the neighbouring Illyrian provinces; these settlers soon converted the Dacian territories wasted by the wars into one of the most flourishing Roman provinces, which was shortly known as "Dacia Felix". From the fusion of the remaining Thracians and the Roman colonists, who possessed a higher culture, issued in the course of the third and fourth centuries the Daco-Rumanian people. As early as the second century
began the assaults of the Germanic tribes on the Roman Empire. After several unsuccessful attempts, the Goths occupied the Dacian province in the third century, and in 271 Emperor Aurelian formally ceded the territory to them. In the fourth century the Goths were followed by the Visigoths, who in similar fashion brought the Romans and Goths into subjection after several campaigns. In the fifth century the Avar Slavs occupied Dacia for two centuries. Under the dominion of the Avars the Slavs made their appearance, settling peacefully among the inhabitants; they have left many traces of their presence in the names of places and rivers. Gradually, however, they were absorbed and Romanized, so that the Latin character of the language was preserved. The influence of the Slavs was greater on the right bank of the Danube, where the Thracio-Roman population, by weight of numbers, and denationalized the Finnic Bulgars who settled in the country in the seventh century. In this way the Romanic population of the Balkan Peninsula was divided by the Slavs into two sections; the one withdrew northwards to the Carpathians, where people of kindred race and language settled and afterwards to the valleys of the Pindus and the Balkan Mountains, where their descendants (the modern Aromanians and Macedo-Vlachs) still maintain themselves. In the history of the Southern Rumanians the erection of the Rumanian-Bulgarian Empire by the brothers, Peter, Jojita, and Asen at the end of the twelfth century is especially noteworthy; this empire became disintegrated in the middle of the thirteenth century on the extinction of the Asen dynasty (see BULGARIA). The Bulgar dominion over ancient Dacia exercised a decisive influence on the ecclesiastical development of the country. Christianity had been introduced—especially into the modern Dobrudja, where there was a strong garrison—by Roman colonists and soldiers, the Latin form and liturgy being employed. In Tomi (now Constanta) existed an episcopal see, nine occupants of which between the fourth and sixth centuries are known. During the dominion of the Bulgars the ancestors of the Rumanians with their lords came under the jurisdiction of the Greek Patriarch of Constantinople, and were thus drawn into the Greek Schism. Consequently, even to-day the vast majority of the inhabitants of Rumania belong to the Greek Church. Upon the restoration of the Bulgars was followed by the campaigns of the Magyars, who however made no permanent settlement in the land, choosing for settlement the plain between the Danube and the Theiss. At the beginning of the tenth century the country was subject to the repeated attacks of the Pechenegs, and in the middle of the eleventh to those of the Cumans. During the migrations and invasions of various tribes, the population of the country was strongly impoverished with Slav and other elements, and only in the wooded hills of Northwestern Moldavia and Transylvania did the original Daco-Rumanian population remain. From its position to pay tribute to the Turks, the country was restored, the people descended from these remote retreats, and united with the inhabitants of the plains to form the Rumanian people.

During the tenth and eleventh centuries small principalities called Banats were formed in the territory of ancient Dacia; and Moldavia, like Transylvania northwards and westwards to the valley of the Theiss came gradually under the sway of the Magyars, while those extending eastwards and southwards from the Carpathians maintained their independence. From the latter originated the principalities of Wallachia and Moldavia. The smaller districts on both sides of the River Olt, Vovode Basarab (d. 1340) founded toward the end of the thirteenth century the Grand Banat, Little Wallachia, and successful wars against Charles I, King of Hungary, and Robert of Anjou enabled him to preserve his independence and to extend his authority to the Danube and the Black Sea. A little later (about the middle of the fourteenth century) Bogdan, Voivode of Wallachia, set up a state against the suzerainty of Hungary in 1360, founded the Principality of Moldavia by overrunning the Carpathians and reducing under his sway the hilly country along the River Moldau. Both these Rumanian principalities had to contend with great difficulties from without and without: on the one hand their independence was threatened by the neighboring kingdoms of Hungary and Poland, while on the other domestic quarrels and a want of unity between the kindred principalities lessened their strength. But their most dangerous enemy was the Turk, who extended his conquests into the Balkan Peninsula in the middle of the fourteenth century. In wars against the Turks and vain efforts to shake off the Turkish yoke, almost the whole activity of the two principalities was exhausted for several centuries. By their unflinching defence of their religion, the ancestors of the present Rumanians prolonged the culture and the Christianization of the Christian West from the slaughter of Islam, and thus played a rôle in universal history. Several of the princes who reigned during this heroic period of Rumanian history are especially conspicuous: Miroes the Old or the Great (1356-1418) and Radul the Great (1405-1508) in Wallachia, and Alexander the Good (1400-38) and Stephen the Great (1457-1504) in Moldavia. Miroes organised his dominions and extended his frontiers to the Black Sea by seizing Dobrudja and the town of Pilkas from the Bulgars in 1391. To repel the onsets of the Turks, he formed with King Sigismund of Hungary (afterward emperor) an offensive and defensive alliance, in accordance with which he participated in the ill-fated battle near Nicopolis in 1396. In 1402 he had to recognise the suzerainty of Turkey, to vacate the right bank of the Danube, and to pay a yearly tribute, in return for which the Porte guaranteed the free election of the Wallachian princes and the independent internal administration of their territory. The immediate followers of Miroes were weak princes, and disputes concerning the succession postponed the casting off of the Turkish yoke. Radul the Great, son and successor of the ex-monk Vlad I who had been appointed prince by the Porte in 1405, seems to have been a tyrant; he introduced and in ecclesiastical matters to mitigate the general distress and to secure greater independence from Turkey.

For Moldavia the long reign of Alexander the Good (1401-32) was a time of prosperity: he organised the finances, the administration, and the army, drew up a code of laws after Byzantine models, and increased the culture of the people by founding schools and monasteries. Alexander had on three occasions to take the oath of fealty to the King of Poland; his son had likewise to recognize the suzerainty of Poland, and his natural son, Peter (1437-87), had to pay the same tribute to the Turks. After a period of almost uninterrupted wars for the princely dignity, Stephen the Great (1457-1504), a grandson of Alexander, inaugurated a period of peace and splendour for Moldavia. Thanks to his valiant and well-organised army, he succeeded not only in keeping his country independent of the Turks for nearly half a century, but also increased his territory by subduing a portion of Bessarabia, organised the Church, founded a new bishopric, and built several new churches and monasteries. Under him Moldavia reached its greatest power and extent. His son Bogdan III (1504-17), in view of the superior forces of the Turks, had to engage to pay a yearly tribute, in return for which Moldavia was (like Wallachia) allowed the maintenance of the Christian faith, the free
election of its princes, and independent domestic administration. In spite of these treaties, a period of bondage began for both lands after the battle of Mohács, which had brought Turkey to the height of its power. The Turks created a military zone along the Danube and the Dniester (now Bessarabia) and the Dniester garrisons in important places, and compelled the princes to do personal homage to the sultan in Constantinople every three years, to bring (in addition to the tribute) presents in token of their submission, to perform military service, to maintain a troop of janissaries in their retinue, and to give five relatives as hostages for their fidelity. The sultans finally arrogated to themselves the right of appointing and removing at will the vaivodes of both principalities; the princes thus became mere blind tools of the Porte, were for the most part engaged in harrying each other, and in very many instances fell by the hands of assassins. Turkey abused its power to appoint new princes at short intervals; as the princes had usually to purchase the recognition of the Porte with large sums of money, they exacted from their subjects twice or three times the amounts thus paid. The chief portions of these extortions were wrung from the peasants, who were reduced to pauperism, and the boyars (the nobles) to the condition of serfs. The nobles also became demoralized, and wasted their strength in scheming to obtain the vaivodeship. Both principalities, however, occasionally enjoyed a brief period of prosperity. Thus, Michael the Brave of Wallachia (1568–1583) succeeded in casting off the Turkish yoke, defeating an army twenty times as numerous as his own in 1595. In 1599 he occupied Transylvania and in 1600 Moldavia, and thus formed an united Rumanian Kingdom which, however, again collapsed on his assassination in 1601. The reign of Matthias Bassarab (1632–54) was also beneficial for Wallachia; he protected his boundaries from the attacks of the Turks on the Danube, restrained the previous inordinate influence of the Greeks, founded in 1652 the first Rumanian printing establishment, and had a code of laws compiled after Greek and Slav models. His example was imitated by Vasili Lupu, Vaiulde of Moldavia (1632–53), who in addition endeavoured by the foundation of schools and charitable institutions to promote the culture of the land. Thus, despite the oppressive political conditions of the seventeenth and eighteenth centuries, became possible the existence of a round of ecclesiastical and lyrical poetry, which kept alive the national consciousness of the people. At this period were laid the enduring foundations of Rumanian culture. Of great importance also was the circumstance that the Old Slavonic language then began to be replaced by the Rumanian both in public life and in the church.

When, towards the end of the seventeenth and the beginning of the eighteenth century, the Turkish power was broken by the victories of Austria, the influence of Austria and Russia began to make itself felt in the affairs of the two Rumanian principalities. To rid them of the Turkish garrisons, the imperial army turned now to one power and now to the other, but were deceived by both. To oppose these attempts the Porte ceased to appoint native Rumanian nobles to the vaivodeship as previously, appointing Greeks—especially from the Fanar district in Constantinople, who were able to offer larger remuneration than the boyars; the princely dignity was thus in the strictest sense of the word leased. For the Rumanian lands thus began the gloomiest period of their history, the period of the fanariotes, which lasted from 1712 to 1821. Foreign princes succeeded one another in the shortest intervals, taking upon them the country with a numerous retinue of wards, relatives, and creditors, and reducing it to greater and greater poverty. A great portion of the land was presented to Greek monasteries, and much of its income left the land and enriched Greek monasteries throughout the East (especially Mount Athos). Meanwhile the Porte arbitrarily raised the tribute to many times its former amount. Some Greek princes formed a strong party to support the Turks against Austria or Russia, for the benefit of the peasants, rendered great services to both countries; especially notable in this respect were Nicholas and Constantin Mavrocordatus in Wallachia and Gregory Ghica in Moldavia. During the Fanariot dominion Rumania was frequently the scene of war between Turkey and Austria or Russia. In 1718 the western portion fell to Austria, but in 1739 it was recovered by Turkey. After the Turkic-Russian War of 1768–74 Russia wished to occupy the Rumanian principalities; Austria opposed this and, in return for this service, the Porte ceded to Austria Upper Moldavia (the present crownland of Bucovina). Moldavia had to bear the cost of the Russo-Turkish War of 1806–12, the eastern portion of the country between the Pruth and the Dniester (Bessarabia) being ceded by Turkey to Russia. Of the Moldavians of Stephen the Great only half now remained. When Vaiulde Alexander Ypsilanti, a Fanarariote and the national leader, remonstrated against the rebellion of the Turks against the Greek rule, the Porte found itself compelled to cease appointing Greeks to the princely dignity, and to revert to the old procedure of naming Rumanians. Russia now began to interest itself in the principalities though only for interested reasons; by the Treaty of Akerman it obtained that only boyars should be appointed princes. A new war having broken out between Russia and Turkey in connexion with the Greek struggle for freedom, Russia occupied the two principalities after the Peace of Adrianople (1828); the Russian Count Kisselev, who governed the territories at the head of the Russian army of occupation, regulated anew the administration and the political organization of the country. After the Russian occupation Russia appointed as princes for life, for Moldavia Michael Sturdza (1834–49), and for Wallachia Alexander Ghica (1834–49), who was succeeded by another member of the family, George Bibescu.

The reforms introduced under the Russians subsequently prepared the way for the gradual economic development of the territories. However, this improvement benefited the landlords and the officers of the police and the great landowners, while the people remained in their former pitiable condition. These circumstances, as well as the interference of Russia in the domestic affairs of the principalities, the spread of patriotic and liberal ideas, the desire for national unity, the curtailment of the privileges of the boyars, and the popular institutions, finally led (owing to the example given by the French Revolution of February) to an insurrection, which was successful only in Wallachia. On 21 June, 1848, George Bibescu was forced to abdicate, a new constitution was proclaimed, and a provisional government appointed. However, Russia coveted Wallachia and Greece as provinces; after the peace had been signed, they occupied the provinces and set aside the constitution, and restored the old conditions by the Convention of Baia-Limani (1 May, 1849); at the same time the election of princes for life and the national assembly were abolished. Barbati Stirbeiu, Bibescu's brother, was named Prince of Wallachia, and Gregory Alexandru Princu of Moldavia for a period of seven years. During the Crimean War both principalities were occupied first by Russia, and then (after 1854) by Austria. The Congress of Paris rearranged their relations, setting aside the Russian suzerainty and restoring that of Turkey. A commission of the great powers which had been sent to settle the principalities having learned the wishes of the Rumanian people, both were given autonomy to the extent of their ancient treaty with Turkey and a consti-
tutional government by the Convention of Paris (1858); the further wishes of the people for the union of the two territories and the nomination of a prince from one of the ruling houses of Europe were not fulfilled, the two principalities being kept separate and each electing a prince for life. In 1861, however, a personal union was effected, Colonel Alexander Ioan Cuza being elected for Moldavia on 17 January and for Wallachia on 24 January; the double election was ratified by the Porte after some hesitation. In 1861 Cuza established, instead of the separate ministries, a common ministry and a common representative assembly, and each electoral union. In 1870, a personal union was established, a representative known as Rumania, was proclaimed. Prince Cuza introduced a series of reforms; the most important were the secularization of the Greek monasteries, the law dealing with public instruction, the codification of the laws on the basis of the Napoleonic Code, and especially the land laws of 1864, by which the peasants were given free possession of the land and the remnants of serfdom, socage and tithes, were abolished. As the chamber, which was controlled by the boyars, was particularly opposed to the last measure, Cuza abolished the chamber in 1864 and gave the council jurisdiction over the chambers with the same power, excepting all his services, Cuza brought the country into a financial crisis. A conspiracy was formed against him, in which the army participated; on the night of 22 February, 1866, he was seized by the conspirators and compelled to abdicate the following month.

After Count Philip of Flanders, brother of King Leopold of Belgium, had refused the sovereignty, the Catholic prince, Charles of Hohenzollern-Sigmaringen, was elected hereditary prince at the instance of Napoleon III on 14 April, 1866. On 22 May he entered Bucharest, and after some months was recognized by the Porte, although Rumania had again to recognize its obligation to pay tribute. From the beginning of his reign Charles had great difficulties to overcome; the development of the country had been prevented by centuries of foreign occupation, commerce and manufacture were to a great extent in the hands of foreigners, the land was for the most part in the power of a few great landowners, while the mass of the population were poor and burdened with heavy taxation. Notwithstanding frequent rotation in power of the political parties, a series of reforms were passed, and the army, organized after the Prussian model, made effective. When the Turkish War broke out in 1878, Rumania made a treaty with the tsar, allowing the Russian troops to march through its territory, and on 22 May, 1877, declared its independence of the Porte. At the storming of Plevna and the besieging of other places the Ruse, an army rendered very important services to Russia—services for which Russia showed no gratitude. The complete independence of Rumania was recognized by the Congress of Berlin (13 July, 1878), but it was compelled to cede to Russia Bessarabia, which it had acquired in 1856, and to content itself with the present Dobruja. In consequence of his disappointment Rumania has since favoured Germany and Austria in its foreign policy. On 26 March, 1881, Charles had himself crowned king. The new kingdom soon began to display a successful activity in both the material and intellectual domains. The natural richness of the land was developed, the railways pushed, and the standard of public instruction raised. Between 1882 and 1885 the independence of the Orthodox Church in Rumania from the Patriarchate of Constantinople was effectuated, and in 1883 the Archdiocese of Bukarest was erected for the Catholics. Thanks to its intellectual and material development, and its military strength, Rumania has become an important factor in European politics. Grievous conditions, however, still prevail in the country in one connexion—the distribution of the land and real property. Almost half of the landed interest (over 47 per cent) is vested in the hands of scarcely 4200 persons, so that Rumania out-rivals Southern Italy as the land of big estates with all the resulting evils. As these great landowners were a political as well as an economic power, and exercise it to the detriment of the peasants, a serious rising of the peasants broke out in 1907, and could be suppressed only with the aid of the army after the proclaiming of martial law. To abolish gradually these evil conditions and to protect the peasants from the oppression of the landowners and the principalities, a series of excellent agrarian reforms have been introduced since 1907 and have been in many cases already enforced.

II. PRESENT CONDITION.—The area of Rumania is 50,730 sq. miles; according to the census of 1899 the population was 5,956,680 (at the beginning of 1910 the estimated population was 6,865,900). In 1899 the population included: 5,451,787 Greek Orthodox (over 91.5 per cent), 140,677 Catholics (2.5 per cent), 22,749 Protestants, 15,094 Lippovans, 5787 Armenians, 266,625 Jews, 44,732 Mohammedans, 222 of other religions. An examination of the population is as follows: 5,459,296 Rumanians, 106,265 Austrians and Hungarians, 23,756 Turks, 20,103 Greeks, 8841 Italians, 7964 Bulgarians, 7636 Germans, 5859 foreign Jews, 11,380 of other nationalities. According to the constitution of 19 June, 1866, Rumania is a constitutional monarchy, the legislative power being vested jointly in the king and parliament. The national assembly consists of two chambers, a senate and a house of representatives. To the Senate belong the adult princes of the royal house, the eight bishops of the Orthodox Church, one representative of each of the two national unions, and 110 members elected by two electoral colleges; the house of representatives consists of 183 members elected by adult Rumanians paying taxes organized into 3 electoral colleges. The bills passed by Parliament receive the force of laws only when sanctioned by the king. While according to the constitution the Greek Orthodox is the State Church, liberty in the practice of their religion is granted to all the other Churches, and the State refrains from all interference in the election and appointment of the clergy of the various denominations. State support is given only to the Orthodox Church. The Orthodox Church of Rumania declared itself independent of the Constantinople in 1878, a declaration which was not recognized by the latter until 1885. The supreme ecclesiastical authority is the Holy Synod, consisting of the two metropolitan, the six bishops, and the eight titular archbishops of Rumania; its duties are to preserve the unity of the Rumanian with the Eastern Church in dogma and the canons, to maintain ecclesiastical discipline within the territory of Rumania, and to decide all purely ecclesiastical spiritual and legal questions according to the holy canons. The choice of bishops is vested in an electoral body composed of the eight bishops, the titular archbishops and all the Orthodox representatives and senators; the election is by secret ballot. For ecclesiastical administration the country is divided into eight eparchies (dioceses), of which the eparchies Ungro-Wallachia, with its seat at Bukarest, and Moldau, and Suceava, with its seat at Suceava, are the most important. The Primate of Rumania is the Metropolitan of Bukarest. For the Catholics of Rumania have been erected the Archdiocese of Bukarest and the Diocese of Jassy. The ancient Catholic Church of Rumania disappeared when the people, influenced by the Bulgars, placed themselves under the jurisdiction of the Greek Church in the ninth century and thus became involved in its schism.

The seed of the modern Catholic Church in Ru-
Rumohr, Karl Friedrich, art historian, b. at Dresden, 1785; d. there, 1843. He became a Catholic in 1804. He was blessed not only with worldly possessions, but also with a practically unquenchable thirst for knowledge, and especially with a keen sense of form and beauty, which fitted him for the critical treatment of art and social relations. Italy was especially frequently visited by him, and he was fond of varying life in the large cities with the stillness and loneliness of the country. Exercising a magnificent hospitality, he himself was in many places, despite his very irritable temperament, a welcome guest—even with King William IV of Prussia and Christian VIII of Denmark. In his "Italienische Forschungen" (3 vols., 1826–31), he treated in masterly fashion the Umbrian-Tuscan School of painting, and prepared the way for a critical conception of art history in Italy. His residence in Italy also gave rise to interesting works in the rural conditions of Central and Upper Italy. His "Der Administrator Albrecht" appeared as a special work. As the result of searching study he wrote "Hans Holbein the Younger in his Verhältniss zum deutschen Formenstilwesen", "Zur Geschichte und Theorie der Formschmiedekunst", and "Geschichte der königlichen Kupferstichenkunst an den."
RUPERT, SAINT (alternative forms, RUPRECHT, HRODBERTUS, HRODPERH, HRODPERHT, ROUDBERTUS, RUDBERTUS, ROBERT, RUPRECHT), first Bishop of Salzburg, contemporary of Childebert III, King of the Franks (685–711), date of birth unknown; d. at Salzburg, Easter Sunday, 27 March, 718. According to an old tradition, he was a son of the Frankish Merovingian family. The assumption of 660 as the year of his birth is merely legendary. According to the oldest short biographical notices in the “Mon. Germ. Script.”, XI, 1–15, Rupert was noted for simplicity, prudence, and the fear of God; he was always not only a master of thought and language, but also of the opinions of the bishops and prelates. In counsel, energetic in action, his life was a model of rectitude. While he was Bishop of Worms, the fame of his learning and piety drew many from far and wide. The report of the bishop’s activities and his Theodosian character of the early church at Salzburg. Theodorus placed himself at the head of the current ecclesiastical movement in Bavaria. Theodorus sent Rupert messengers with the request that he should come to Bavaria to revive, confirm, and propagate the spirit of Christianity there. Despite the work of early missionaries Bavaria was only the tip of its apostolate mission, and its very Christianity was indeed to some extent Arian, while heathen customs and views were most closely interwoven with the external Christianity which it had retained. St. Rupert succeeded to Theodorus’s request, after he had by messengers made himself familiar with the land and people of Bavaria. St. Rupert was received with great honour and ceremony by Theodorus in the old residential town of Ratisbon (696). He entered immediately upon his apostolic labours, which extended from the territory of the Danube to the borders of Lower Pannonia, and upon his missionary journey came to Loreto. Thence he travelled to the lonely shores of the Walensee, where he built a church in honour of St. Peter, thereby laying the foundation of the present market-town of Seckkirchen in the Newmarket district of Salzburg. From the Roman colony there Rupert obtained an account of the ancient Roman town of Juvalum, upon the site of which there still remained many more or less dilapidated buildings, overgrown with briars and brushwood. Having personally verified the accuracy of this account concerning the place and position, Rupert requested Theodorus to give him the territory of Juvalum (which was still a place of considerable commerce) for the erection of a monastery and an episcopal see. The duke granted this petition, bequeathing the territory of Juvalum (the modern Salzburg), two square miles in area, to St. Rupert, and his successors. At the foot of the precipices of the Münsberg, where once St. Maximus, a disciple of St. Severin, had suffered martyrdom with his companions (476), St. Rupert erected the first church in Salzburg, the Church of St. Peter, in honour of the Prince of the Apostles, and he found it as established the Theodosian metropolis Salburgensis antiquae (Salzburg, 1696), 65. On the Rupert question cf. ANTMULLER, Die Gesch. der Ruper-
Rusaddir, a titular see of Mauritania Tingitana. Rusaddir is a Phoenician settlement whose name signifies a lofty cape or isle. It is mentioned by Ptolemy (IV, 4), and Pliny (V, 18) who call it "oppidum et portus", also by Mela (I, 33), under the corrupted form Ruscada and by the "Itinerarium Antonini". During the Middle Ages it was the Berber city of Milla; it is now known as Melilla. In 1497 it fell to the hands of the Duke of Medina Sidonia, and in 1506 was returned to the Crown of Spain. Since then its history is a succession of famines and sieges of which the most renowned is that of 1774 and the most recent that of 1893. In 1909 it was the seat of the warfare carried on between Spain and the Rif tribes. Melilla is, after Ceuta, the most important of the Spanish fortsresses or presidios on the African coast. It has about 9000 inhabitants, and is built in the form of an amphitheatre on the east slope of a steep rock 1640 feet high, bounded by abrupt cliffs, whereon is the Fort of Rosario. A free port since 1881, Melilla carries on an active commerce with the Rif. There is no record of any bishop of this see.

Ruscada, a titular see of Numidia. It is mentioned by Ptolemy (IV, 3), Mela (I, 33), Pliny (V, 22), "Itinerarium Antonini", the "Tabula Peutingeri", etc. Nothing is known of its history. Situated near the mouth of the Taphus, it served as the commercial port of Cirta and exported grain to Rome. The port was called Stora or Ustura, where under Valentinian and Valens granaries were built whose ruins are still visible. The city was known as Colonia Veneria Ruscada. It was a total ruin when rebuilt by the French as Philippeville. Philippeville is the capital of the Department of Constantine (Algeria); it has 21,550 inhabitants of whom 8200 are French, 5000 foreigners, mostly Italians and Maltese, 450 Jews, and 7000 Arabs. The ancient name survives in Ras Skidda, a point of the Djebel Addouna from which juts forth the great pier. The commerce of the bishop of this see is of the theatre, music, Christian sarcophagus, Christian inscriptions, and the remains of a basilica dedicated to Saint Digna may be found there. Six bishops of Ruscade are known: Verulus, present at the Council of Carthage (255), perhaps the martyr in the martyrlogy; 217 is named at the Council of Cirta (305) as a traitor or betrayer of the Scriptures; Navigius whose remains and epitaph have been recovered in the church which he erected to Saint Digna in the fourth century; Faustinianus, present at the Conference of Carthage (411) with his Donastis rival, Junior; Quintilius (? in 425; Eusebius, exiled by Huneric in 484.

Ruspe, titular see of Byzacena in Africa, mentioned only by Ptolemy (IV, 3) and the "Tabula" Peutinger. According to the first it was on the coast between Acholla (Kaer el Abiah) and Usilla (Henahir Inshilla); the "Tabula", or map of Peutinger, states that it was six (doubtless twenty-six) miles from the latter place. It is identified with the ruins called Ksar Siad, seventeen miles from Acholla. Others believe it to be on or near the coast west of Cape Kapoudia (north of the Gulf of Gabes, Tunisia), its name being preserved at Koudiat Rosfa near Ras el Louza. It seems more probable that Koudiat Rospa is itself the ancient Ruspe. Four bishops of the see are known: Stephanus, exiled by King Hunicus (484); St. Fulgentius, consecrated in 508, died in 533; Felicianus, his companion in exile and successor, who wrote at the Council of Carthage (about 534); Julianus, who signed in 641 the Anti-Monothelite letter of the bishops of Byzacena to the Emperor Constantine.

S. PETRIDES.

Russell, Charles, Baron Russell of Killowen, b. at Newry, Ireland, 10 November, 1832; d. in London, 10 August, 1900. He was the elder son of Arthur Russell of Killowen and Margaret Mullin of Belfast. The family was in moderate circumstances, their estates, their property, and the Faith in the seventeenth and eighteenth centuries. Arthur Russell having died in 1845, the care of his large family devolved upon their talented mother and their paternal uncle, the celebrated Dr. Russell of Maynooth. Having studied at the diocesan seminary, Belfast, at a private school in Newry, and St. Vincent's College, Castleknock, Dublin, Charles Russell entered the law offices of Mr. Denvir, Newry, in 1849, and of Mr. O'Rorke, Belfast, in 1852. Admitted a solicitor in 1854, he practised in the county courts of Down and Antrim, and became at once the champion of the Catholics who had been prosecuted in the last century for attempting to proselytise by Protéstants in these counties. His success was so striking that his legal friends urged him to become a barrister in London, and in 1858 he entered at Lincoln's Inn. Having followed an extensive course by close private study under the direction of Maine, Broom, and Birbeck, he was called to the bar in 1860. His success on the northern circuit soon recalled him to London, where he became "Queen's Counsel" in 1872, and divided the mercantile business of the circuit with Lord Herschell. The increasing demand for his services may be judged by his income, which averaged $15,000 a year from 1862-72, $50,000 in the next decade, $80,000 in the third, and in 1893-4, his last year of practice, reached $150,000. His knowledge of law, business, and human character, a flexible and often passionate eloquence which derived its force from intense earnestness rather than oratorical device, marvellous dexterity in sifting the truth from witnesses, and a manifest honesty of purpose gave him a power over judge and jury which made him universally regarded as the first advocate of his age.

Though in his first years in London he had been weekly correspondent of the Dublin "Nation", Advocate of the Advanced National Union, and agitator for the alteration of the representation as a Liberal being elected, after two defeats, member for Dundalk in 1880. He generally acted with the Nationalists on Irish, and always on Catholic questions, and, when he visited the United States in 1853, bore a flattering introduction from Mr. Parnell. Elected member for South Hackney (1885-94), he was appointed attorney-general by Mr. Gladstone in 1886, and again in 1892 on the return of the Liberals to power. He was a strenuous advocate of Home Rule in Parliament and on public platforms, and was leading advocate for Mr. Parnell at the Parnell Commission trial in 1888. His cross-examination of the witnesses of the "Times", and especially his exposure of Pigott, the author of the "Times" forgeries, made a favourable verdict inevitable. His famous eighth-day speech for the defence was his greatest forensic effort. In 1893 he represented Great Britain in the Behring Sea Arbitration, his speech on his side, four times in length, the cross-examination, lasting eleven days, and was knighted for his services. Made Lord of Appeal, 1894, he was raised to the peerage for life, taking his title from his native townland of Killowen. In the same year he was appointed Lord Chief Justice of England, the first Catholic to attain that office for centuries. He won
RUSSIA

RUSSIA Speedily the public confidence and is ranked with the most illustrious of his predecessors. He revisited the United States in 1871 to address the American Bar Association and delivered a notable address on arbitration. In 1899 he represented England on the Venezuelan Boundary Commission, and displayed all his old power of separating vital points from obscuring details. The following year he was attacked while on circuit by an internal malady, but, after a few weeks' illness, died piously in London, after receiving the sacraments of the Catholic Church, of which he had been always a faithful and devoted member. He was survived by his widow (Ellen, daughter of Dr. Mulholand of Belfast), whom he married in 1865, and by five sons and four daughters. He was the first public defender of the English and American Bar and by the people and journals of the most diverse political and religious views attested that, despite his masterful character as lawyer, judge, and parliamentarian, and his stalwart loyalty to his Faith and country, he had attained a rare and widespread popularity. In him were blended many qualities not usually found together. With a keen and orderly mind, a resolute will, great capacity for work, and severe official dignity, he combined sensibility of temperament, a spirit of helpfulness and comradeship, and a dreamer's devotion to ideals. He was always ready to write and speak for educational, religious, and benevolent purposes, though such action was not calculated to forward his political ambitions. Devoted to his family, he crossed the continent on his first American trip to visit Mother Mary Baptist Russell of San Francisco (who, with two others of her sisters, had entered the Order of Mercy), and found time to write for his children and send them day by day an admirable account of his experiences. This "Diary of a Visit to the United States" has been since edited by his brother, Rev. Matthew Russell, S.J., and published (1910) by the U. S. Catholic Historical Society. His other published works include: "New Views of Ireland" (London, 1880); "The Christian Schools of England and Recent Legislation" (1883); his speech before the Parnell Commission (1888); essay on Lord Coleridge in the "North American Review" (1894); and on the legal profession in the "Strand Magazine" ("Arbitration, its Origin, History, and Prospects") (London, 1896).

BARRY O'BRIEN, Life (London, 1901); personal recollections in The Times (London, 11 Aug., 1900); files of the daily press on other matters (Sept. and Dec. Reports of American Bar Association (31 Aug., 1900), and of the universities (Rutgers College, 1864-1914; William and Mary, 1870; Men at the Bar; Lincoln's Inn Reg.; Burke's Peerage (1900); Coram, Complete Peerage (1900).

M. KENNY.

RUSSIAN, CHARLES WILLIAM, b. at Killough, Co. Down, 14 May, 1812; d. at Dublin 26 Feb., 1880. He was descended from the Russells who held the barony of Killough of Quomianstown and Ballynaw. He received his early education at Drogheda grammar school and Downpatrick, after which he entered Maynooth in 1826. After a brilliant course he was ordained on 13 June, 1833, and became one of the professors of humanities at the college. In 1842 he was chosen by Gregory XVI. to be the first Vicar Apostolic of Ceylon, but he refused the dignity as also the Bishopric of Down and the Archbishopric of Armagh. Three years later he returned to Maynooth as professor of ecclesiastical history. Having published his translation of Leibnitz's "System of Theology" in 1836, he was occupied on his "Life of Cardinal Mazarin" which appeared in 1837. In 1857 he succeeded Dr. Rennahan as President of Maynooth. His profound antiquarian learning caused him to be appointed a member of the Historical Manuscripts Commission in 1868, and in that capacity he acted as joint editor (with John Prendergast) of the eight-volume "Report on the Carte Manuscripts in the Bodleian Library" (1871) and the "Calendar of State Papers" published by the American Bar Association and delivered a notable address on arbitration. In 1899 he represented England on the Venezuelan Boundary Commission, and displayed all his old power of separating vital points from obscuring details. The following year he was attacked while on circuit by an internal malady, but, after a few weeks' illness, died piously in London, after receiving the sacraments of the Catholic Church, of which he had been always a faithful and devoted member. He was survived by his widow (Ellen, daughter of Dr. Mulholand of Belfast), whom he married in 1865, and by five sons and four daughters. He was the first public defender of the English and American Bar and by the people and journals of the most diverse political and religious views attested that, despite his masterful character as lawyer, judge, and parliamentarian, and his stalwart loyalty to his Faith and country, he had attained a rare and widespread popularity. In him were blended many qualities not usually found together. With a keen and orderly mind, a resolute will, great capacity for work, and severe official dignity, he combined sensibility of temperament, a spirit of helpfulness and comradeship, and a dreamer's devotion to ideals. He was always ready to write and speak for educational, religious, and benevolent purposes, though such action was not calculated to forward his political ambitions. Devoted to his family, he crossed the continent on his first American trip to visit Mother Mary Baptist Russell of San Francisco (who, with two others of her sisters, had entered the Order of Mercy), and found time to write for his children and send them day by day an admirable account of his experiences. This "Diary of a Visit to the United States" has been since edited by his brother, Rev. Matthew Russell, S.J., and published (1910) by the U. S. Catholic Historical Society. His other published works include: "New Views of Ireland" (London, 1880); "The Christian Schools of England and Recent Legislation" (1883); his speech before the Parnell Commission (1888); essay on Lord Coleridge in the "North American Review" (1894); and on the legal profession in the "Strand Magazine" ("Arbitration, its Origin, History, and Prospects") (London, 1896).

BARRY O'BRIEN, Life (London, 1901); personal recollections in The Times (London, 11 Aug., 1900); files of the daily press on other matters (Sept. and Dec. Reports of American Bar Association (31 Aug., 1900), and of the universities (Rutgers College, 1864-1914; William and Mary, 1870; Men at the Bar; Lincoln's Inn Reg.; Burke's Peerage (1900); Coram, Complete Peerage (1900).

EDWIN BURTON.

RUSSIA, RICHARD, Bishop of Viséu in Portugal, b. in Berkshire, 1630; d. at Viséu, 15 Nov., 1693. He was of humble station, and when twelve years old became servant to Dr. Edward Daniel, newly appointed President of Lisbon College. Five years later, having meanwhile applied his leisure to study, he was admitted an alumnus of the college and took the oath, 14 Aug., 1647. In 1653 he went to Douai College, and thence to Paris, where he was ordained. In 1655 he returned to Lisbon, where his father later was summoned by the Chapter to England, where he spent three years as a chaplain to the Portuguese ambassador. On his return to Portugal he received the title of Secretary to the Queen, and a pension, in consideration of his services to the crown of Portugal. Shortly after, however, he again took up business connected with the marriage treaty of Charles II and Catharine of Braganza, and on this occasion he was elected a Canon of the English Chapter (26 June, 1661). Having declined the Bishopric of the Cape Verde Islands, Russell accompanied the Infants to England. The English Chapter hoped that he might receive the consecration of a Portuguese see and that then he would return to England, resign his diocese and become head of the English clergy with episcopal powers; for the English Catholics had long been without a resident bishop, and they had had no episcopal superior at all since the death of Bishop Smith in 1655. This plan, however, came to nothing, and when Russell was persuaded to accept the see of Portalegre in 1671 he decided to remain in his diocese. He was consecrated bishop in the chapel of the English College, Lisbon, on 27 Sept., 1671. Overcoming the first opposition of his clergy to a foreign bishop, he spent ten years in zealous and apostolic labour and effected a complete reformation of the diocese. In 1682 he was transferred to the diocese of Viséu where he spent the last eleven years of his life. His portrait is preserved at the English College, Lisbon.

EDWIN BURTON.

EDWIN BURTON.
part of Eastern Europe, and a third of Asia; its area is one-sixth of the land surface of the globe. In the reign of Alexander II the total area of the empire was 8,689,945 sq. miles, of which only 2,156,000 were in Europe. The greatest length of Russia from east to west is 6956 miles, and its greatest breadth is 2966 miles, giving an area of 7,036,300,000 acres, or about 70° N. lat. and 30° E. from the east, the Pacific Ocean. Russia forms a vast, compact territory, the area of its islands being only 107,262 sq. miles, which was greatly reduced by the cession of the southern part of Sakhalin to Japan. Geographers usually divide Russia into European and Asiatic Russia, regarding the natural boundary to be the Ural Mountains, the Ural River, the Don, and the Volga; this division is based neither on natural nor on political grounds. The Ural Mountains form a chain of wooded highlands, which may be compared to the central axis of the empire rather than to a dividing barrier; moreover, no straight line could be drawn on the southern extremity of these mountains and the Caspian Sea. The division between European and Asiatic Russia can best be established ethnologically, and this method is frequently used in Russian geographies.

Some of the coasts of Russia are washed by many seas; the Arctic Ocean, the White Sea, the Bay of Tchekataysa, the Bay of Kara, the Gulf of Obi, the Baltic Sea, the Gulf of Bothnia, Finland, and Riga, the Black Sea, the Sea of Azof, the Caspian Sea, the Pacific Ocean, Behring Sea, the Sea of Okhotsk, and the Sea of Japan. But Russia is not destined to become a maritime power. The cause for the most part the seas of Russia are in regions where navigation is impossible in winter; for periods of six months in the Arctic Ocean, and from fifteen days to one month at some points in the Black Sea. And the future of Russia as a maritime power is moreover obstructed by political difficulties; the way from the Black Sea to the Mediterranean is closed by the Bosporus and the Dardanelles; the way from the Baltic to the Atlantic is closed by Sweden, Germany, Norway, and Denmark. The Arctic Ocean washes the extreme northern coasts of Russia, sterile, uninhabited, and a barrier to the world, which is only three months, paralyzing the activities of life. The ice, whether fixed or floating, blocks the way of ships; these ply however in the White Sea, which is free of ice for three months of the year, and the waters of which form the Gulfs of Mesen, the Dwina, Onega, and Kandalak, the latter being the most frequented. There are but few islands in this immense extent of ice; the more important ones are the islands of Kolguet, Vaigatch, Nova Zembla, New Siberia, and the islands of Solovka, on one of which is a famous monastery founded in the fifteenth century by St. Sabbatusius and the Blessed Germius. Among the most important peninsulas may be cited that of Kola or Russian Lapland: Russia shares the possession of the Baltic Sea with Sweden, Germany, and Denmark, and its waters have been the highway of Russian commerce since the time of Peter The Great, although their shores are rugged and reefs numerous. The Gulfs of Bothnia, Finland and Riga are frozen for several months of the year, while the Gulf of Livadia is frozen for six weeks, although it sometimes remains free of ice through the whole year. Notwithstanding these natural obstacles, Russian commerce has been developed on the Baltic, the shortest route for the exportation of grain and other products to America. The Baltic Sea is studied with islands, of which the following belong to Russia: the numerous Aland group, eighty of which are inhabited; the Islands of Dago, Oesel, Mohn, Worines, and Koltin; on the last is built the formidable fortress of Kronstadt.

Climate.—In European Russia the climate is severe, both in winter and summer, the rains are scanty, and the temperature varies considerably. In summer, in the north of the Crimea it rises to 55-3° in summer. The isothermal lines of European Russia are not coincident with the parallels of latitude, but diverge towards the southeast. There are places situated on the same parallel presenting considerable differences in mean temperatures, e.g. Libau, 49-1°; Moscow, 39-2°; Kazan, 37-4°; Yekaterinburg, 32-9°. In the valley of the River in the Caucasus, cotton and sugar-cane are grown, while the tundras of the Kola Peninsula are sparsely covered with moss. In Western Russia, the cold of winter is never greater than 31° below zero, while the heat of summer is never less than 90° F. In the south of Russia, the thermometer falls to 40° below zero in winter, and rises to 109° in summer. European Russia may be divided into four climatic zones: the cold zone, which includes the coasts of the Arctic Ocean and their adjacent islands, and extends beyond the Arctic Circle; its winter lasts nine months, and its summer three; the cold-temperature zone, from the Arctic Circle to 61° N. lat.; its winter lasts six months, and each of the other seasons two months; the temperature zone, extending from 61° to 48° N. lat.; each season lasts three months, the winter being longer towards the north, and summer longer towards the south; the warm zone, between 48° 30° N. lat. and the Tauric Chain, in the south of Russia; the summer lasts six months, and the other three seasons two months each. European Russia is not unhealthy, although in the cold zone scurvy is frequent, and near the Gulf of Finland ailments of the throat and the respiratory organs; Wich poliomyelia infects the marly regions of Lithuania and Russian Poland; and there is the so-called Crimean fever in the neighbourhood of the Sivash and in a region on the coast of the Black Sea.

The climate of the Caucasus is not of a uniform character; it belongs in the north to the cold-temperature zone, and in the south to the Transcaucasia to the warm zone. In the north, summer lasts six months, and the other seasons two months each. In Transcaucasia the summer lasts nine months, and the other three months of the year are like spring. Nevertheless the irregularity of the mountain system of the Caucasus produces differences of temperature in places separated by short distances. On the coast of the Black Sea, between Batum and Sukhum, the temperature seldom falls below 32° in January the temperature rises as high as 43°. Western Transcaucasia receives warm and humid winds, while the eastern part is exposed to dry winds from the desert.
zero in winter, and 49-46° in summer. In midwinter the northern extremity of Siberia resembles the polar regions; during several days the sun does not rise, and the vast plain of snow is lit up by the Aurora Borealis, while at times the region of the aurora is swept by violent gales. The climate for the Russians; baneful to the Tatars and ruinous to Siberia. Those regions are far from the sea, and have cold winters and very warm summers, a sky that is always clear, a dry atmosphere, and strong north-erly and north-easterly winds. The north winds develop violent snowstorms. The summer is unbarren and the shade, the thermometer rises to 100° and even to 117-5°, while the ground becomes heated to 158°

The precipitation is estimated at from 8 to 24 inches. In general, those parts of Russia that are exposed to the North, and are covered with snow during the winter, abound in forests that preserve the humidity, in which they have an advantage over the southern part of the country. In the former, the rains are not violent, but are lasting, and moisten the earth to a considerable depth; in the South they are resolved into severe tempests, which pour down great quantities of water that are dispersed in torrents and rivers, and do not sink deep into the ground. The greatest rainfall is in the Caucasia Mountains, and the climate is in the Caucasia Mountains. The advantages of the western over the eastern part of Russia are due to its greater proximity to the Atlantic Ocean, the vapours of which are carried over Europe into Russia. The mean rainfall of Western Russia is calculated at 13-3 inches; that of the north-east, 15 inches; that of the east, from 12 to 15 inches; and that of the south is still less. The months of greatest rainfall are June, July, and August. The yearly rainfall at St. Petersburg is 20 inches, there being rain on 150 days of the year. The number of days upon which rain falls diminishes considerably towards the East, and

**MINERAL RICHES:** The mineral riches of Russia consist principally of salt, coal, and iron. Salt is found in the mineral state in the Governments of Orenburg, Astrakhan, Kharkoff, and Yekaterinoslav; and as a sediment, deposited by salt waters, in the Government of Astrakhan, and in the Central lakes of Sakakoe, Sasyk, and Sivash. The river basin that most abounds in coal is that of the Donets; it is 333 miles in length, and 100 in breadth, and produces every known species of fossil coal. This basin also furnishes great quantities of peat, naphthas, gold, silver, platinum, copper, tin, mercury, iron, manganese, radium, and uranium. The rivers that are the sources of these minerals are the Donets, the Don, the Volga, and the Oka. The Central Ural Mountains yield malachite and jasper. There are abundant petroleum springs in the Caucasus Mountains, especially in the vicinity of Baku. In the Kolvan Mountains, which is a ramification of the Altai, there is a group of hydrothermal springs, and the Russian chronicles refer to twelve tribes, collected under the general name of Russians; they are the Slovenes, Krivitches, Dregovitches, Drevlans, Polians, Duliebys, Bushans, Siverecs, Radimitches, Viatics, and the Sieverians. The political cradle of Russia is the region of Kief, where the Varangian princes formed the first Russian state. The invasions of the Tatars exercised a great influence upon the Russians; but after a long period of time, they disappeared entirely before the Tatars and that, in the fourteenth and fifteenth centuries, the regions evacuated by the Tatars were peopled by little Russians from Galicia. The population of Russia has steadily increased in numbers during the last two centuries, but not being partly due to the birth-rate, and partly to the importation of vast foreign territories. In 1724 Russia had a population of 14,000,000, which had increased to 36,000,000 in 1793, to 69,000,000 in 1851, and to 123,907,694 in 1897. The census of 1897 was the first official census of Russia. Its data, however, are only relatively correct, partly on account of the great extension of the Russian Empire, partly on account of the continuous emigration within the frontiers of that country, partly because of the lack of information concerning some of the centres of population in Siberia, and partly because of the resistance of some tribes to submit to the census. In view of the enormous excess of births over deaths, the progressive increase of the population is calculated to be 2,000,000 each year. In 1904, basing the calculation on the statistics of births, the population of Russia was 146,000,000; in 1906, 154,000,000; and in 1910, 159,000,000. The greatest increase in the population is given by the region of New Russia, that of the Baltic, and the Province of Moscov. In general, the number of births in Russia is calculated at 48 per 1000, and that of deaths at 34 per 1000. Compared with other European states, Russia is very thinly peopled, except in some regions; for the whole empire, it is 17-325 per sq. mile; for European Russia 65; for Poland, 214; and for Siberia, 1-35. The government in which the population appears to be most dense is that of Piotrkow, where the corresponding figures are 285 inhabitants per sq. mile; after which follow in order the Governments of Moscow (187), Podolia (184-5), and Kief (180). In the Government of Archangel, there are 2-25 inhabitants per sq. mile, and in Yakutsk 225.

The great mass of the population consists of peasants; they form 84 per cent of the population of European Russia, and 24 per cent of that of Rumania, Hungary, and Switzerland, nations that are essentially agricultural. The nobles and their servants constitute 1-5 per cent of the population; the clergy, 0-5 per cent; the citizens or merchants, 0-6 per cent; the burgesses (mishkurstan, 10-8 per cent. The proportion of working men shows a notable increase: from 1885 to 1897 the increase in the mining centres was 91 per cent, and in the manufacturing centres 73 per cent; the population of the cities also is continually increasing. Some of these cities, as Kazan, Astrakhan, Tiflis, and Bakhtchisarai, are the export centres of the silk of Turkestan. The cities of ancient Livonia, e.g., Riga and Reval, have the appearance of medieval German towns. The villages of Great Russia have a commercial character, and stretch along the principal roads and waterways. On the other hand the villages of Little Russia are agricultural in character. The White Russian villages are noticeable for the small number of houses they contain. With relation to sex, according to the statistics of 1905, the population of Russia has 103-2 women for each 100 men. In the villages, the corresponding proportion of women is 106-1; in the cities, it is 93-9. In 13 of the 50 millions of the population of European Russia, the number of men is greater than that of the women; in 3 these numbers are equal, and in 34 the number of women is in excess of that
of the men; in 12 governments the proportion is 100 men to 110 women.

With regard to religion, Christianity in various denominations is the religion of the great majority of the people. There are 123,000,000 Christians (84.3 per cent of the entire population). The adherents are of the Orthodox Church, which has 102,-
600,000 adherents (69-9 per cent of the population, the corresponding figures for European Russia being
91,000,000 (75 per cent). Consequently among the Russians Orthodox and Russian are synonymous terms. Since the Ukase of 17 April, 1860, which proclaimed the freedom of the Orthodox Church, it has lost 1,000,000 of followers, through conversions to Catholicism, to Protestantism, and to Mohammedanism. The Catholics of Russia number 13,-
000,000 (8-9 per cent); the Protestants, 7,200,000 (4-9 per cent); other Christian denominations, 1,000,000 (1 per cent); Mohammedans, 15,000,000 (10 per cent); pagans, 700,000 (0-4 per cent). Pagans, to the number of 300,000, are to be found, not only in Siberia, but also in European Russia (Kalmucks and Samogitians). The Catholics are chiefly in Poland, where, according to the census of 1867, 11 per cent of the population is Catholic. On the other hand, one-half of the Jews who are scattered over the earth are in Russia, the number of them in that country being estimated at from 6,000,000 to 7,000,000, all concentrated within the boundaries of fifteen governments.

From the standpoint of education, Russia does not occupy even a secondary position in Europe. In Europe Russia the percentage of those who know how to read and write is 22-9. The regions in which there are the least numbers of the educated are as follows: Estonia (79 per cent); Livonia (77-7 per cent); Courland (70-9 per cent); the Duchy of St. Petersburg (55-1 per cent); and Moscow (40-2 per cent), and Poland (41 per cent).

Emigration, as a rule, takes place only within the boundaries of the empire. From the most remote times, the inhabitants of Novgorod founded colonies as far away as the shores of the White Sea and the Ural Mountains. Emigration to Siberia began in 1582; the first colonists of that country were the exiles, the Cossacks, fishermen, and prospectors in search of gold; and this emigration was considerably increased after the liberation of the serfs in 1861. In 1891 the Siberian Railway Company undertook the transport of Siberia. The condition of Siberia and the opportunities gave a great impulse to Siberian immigration. In 1889 the number of Russian emigrants to that region was between 25,000 and 40,000; in 1900 it had increased to 220,000. These emigrants, who came from Central Russia and from Little Russia, spread at first over Western Siberia, and then over Central Siberia; but later they went farther and farther towards the extreme east, a movement to which the war with Japan put a stop, but which was again taken up with greater activity when that war ended. In 1906, 200,790 emigrants passed through Chelyabinsk to Siberia, or 74 per cent of the emigration. A part of the emigration is directed towards the south-east of Turkestan. The first colonists arrived in the Province of Semireytenchas in 1848, and in the Province of Sir-Daria in 1876. Emigration beyond the frontiers of Russia is very limited, amounting in 1906 to the percentage of 0-001, or to 1,000, who for the greater part pass through the ports of Bremen and Hamburg. From 1891 to 1906, out of every 1000 Russian emigrants, 900 went to the United States, and the majority of the others to Brazil and the Argentine Republic.

The emigrations of Russia, though very much divided linguistically, it being calculated that a hundred languages are spoken within the empire, of which forty-two are in use in the city of Tiflis alone. Rus-

sian is the official language of eighty-nine governments and provinces, but it is the predominant language in only forty-one of them. Among the dialects, Great Russian is the one that is most extensively used. The tongues of the Mongolian tribes that are subject to Russia, and of which the population is generally without a literature. The population of Russia presents a great variety of races, united by a political rule, by the community of the Russian language, and to a great extent by the Orthodox religion; it is characterized also by a great preponderance of the rural over the urban population, and by the presence of a high percentage of tribes or tribes with little culture of their own, and little aptitude for the assimilation of the culture of Europe.

Special Ethnography.—Ethnographically the population of the Russian Empire is divided into two races, the Caucasian, which predominates, and the Mongolian. Of the total population 121,000,000, or 82-6 per cent, are Caucasians; while the Mongolian races in all Russia constitute 17 per cent of the whole population. Russians, properly so-called, constitute 57-7 per cent of the population in Western Siberia, 80 per cent in European Russia, 53-9 per cent in eastern Siberia, 48 per cent of the Far Eastern population, 6-7 per cent in the region of the Vistula, and 0-2 per cent in Finland. Notwithstanding the difference in types, the Russians constitute a single people, ethnographically divided into three classes, Great Russians, Little Russians, and White Russians.

The three ethnographical branches are differentiated from each other by dialectical differences, domestic traditions and customs, character, and historical tradition. It is difficult to determine the zones of the three branches, or the numbers of individuals of which they consist. According to the census of 1897, there were 55,667,488 Great Russians (Vur-
russer), 22,380,350 Little Russians (Malorussi), and 5,885,547 White Russians (Bielorussi). At present, there are 65,000,000 Great Russians. They occupy the central and northern parts of European Russia, their centres of population extending from the White Sea to the Caspian Sea and the Sea of Azoff, and are to be found also in Siberia and in the Caucasus. They have emigrated to Little Russia in considerable numbers; at the beginning of the nineteenth century, Kharkoff was inhabited almost entirely by Little Russians, but in 1897 Great Russians constituted 72 per cent of the population, and the Little Russians only 25 per cent. The Great Russians are active and energetic, and have great aptitude for commerce and work in general. They are regarded as the essentially Russian race, which has not only preserved its known ethnical characteristies under difficult conditions, but has assimilated with itself other races, especially of the Finnish stock. Their language is the predominant tongue of the Russian Empire. The small commerce of the cities is in their hands, as is also the commerce of the wines and fruit that come from Bessarabia, the Crimea and the Don, and the fish from the Black Sea and the Ural River.

The Little Russians inhabit the south of Russia and the basin of the middle and lower course of the Dnieper, and constitute 26-6 per cent of the total population of the empire. Their greatest masses are to be found in the Governments of Pultowa (98 per cent), Tcherkassy (85-6 per cent), Podolia (80-9 per cent), Kharkoff (80-6 per cent), Stavropol (80 per cent), Kief (79-2 per cent), Volhynia (70-1 per cent), and Yekaterinoslaff (69-9 per cent). The Little Russians are an agricultural people, and remain in their native districts. Their emigrations are very small, and to New Russia, and to the territories of the Don and of the Kuban rivers. Of recent times they have furnished a large contingent to the agricultural
colonyisation of Siberia. From the standpoint of culture, that of the Great Russians is superior to that of the Little Russians. Although the intellectual level of Little Russia was much higher than that of Great Russia during the Polish domination. The musical and poetical talents of this people are very much developed and their popular literature abounds in beautiful songs. The difference between Great and Little Russia is only anthropological, but is also one of temperament and character. The Little Russians, too, protest that they are not Muscovites; and to emphasize their anti-Semitism for the other race, in the nineteenth century they attempted to give a literary development to their dialect.

The White Russians inhabit the forest and marsh regions on the left bank of the rivers Duna, Dnieper, Pripet, and Bug. They represent 7 per cent of the total population, and are scattered through the Governments of Vilna, Vitebok, Grodno, Kovno, Minsk, Mohilef, Suwalki, and Velislavetspol. Both physically and intellectually they are less developed than the Great and Little Russians. According to the Russians, the intellectual inferiority of that people is due to the despotism of Polish masters, under which they lived for several centuries, to the loss of their nobility, which became Polish, and to the economic supremacy of the Jews. Accordingly, the White Russians are poor, ignorant, and superstitious. There is a great mixture of Polish and Lithuanian elements in their dialect. At the present time, however, national sentiment is awakening in the White Russians, who publish newspapers in their own language, and aspire to better their economic conditions.

Ethnographically, the Caucasians are a race of warrior-mERCHANTS and agriculturists, who developed the characteristic traits of their social and domestic life in struggles with the Tatars and Turks. According to the statistics of 1905, there were 3,370,000 Cossacks in all Russia, or 2-3 per cent of the population of the empire. Those of the Don are Great Russians. They are famous for their military qualities in general, and in particular for the part that they took in the liberation of Moscow from Polish occupation in 1612, in the conquest of Siberia, and in the war of 1812. At present they devote themselves to agriculture, raising cattle, commerce, and mining. They are as far from the table as the Indians are from the diet of the Cossacks. The Cossacks of the Urals are noted for their religious fanaticism. Those of the Kuban and of the Black Sea are of Little Russian origin. They are called Cossacks of "the line", because, after the Russian conquest of the Caucasus, they were thrust into fortified villages on the shores of the Kuban, to defend their new possessions against incursions of the so-called mountaineers of the Caucasus, the Tcherkess, Tchetcheny, Abkhaz, Ossetiny, and Lesginy. In their life they have preserved the Little Russian customs and traditions.

The Jews, as a race of oppressors, are a great many other races that belong politically to Russia. Among the Slav races within the Russian frontiers, the most numerous are the Poles, of whom there are 12,000,000, and who chiefly inhabit the region of the Vistula. The Poles have not been a nation for centuries, being created by the mixing of different races. They have not been Russianized; but the Poles showed reverence to this, and still preserve their national character. The Lithuanians live along the Vilma River and the lower course of the Niemen, at the Prussian frontier. Their number is given as 90,000. They are in the forefront of culture under Russian, Polish, Finnish, and Jewish influence. They are fervent Catholics, and their economic conditions are prosperous. Their national sentiment, depressed for several centuries, has awakened in recent times, and nationalist Lithuanians seek to throw off Russian and Polish influence and to form a national literature. Related to the Lithuanians are the Letts (Latviesi); they are a hard-working race and have a high moral standard. Their religion is chiefly Calvinism; a few of them are of the Orthodox Church.

To the Germanic race belong the Germans and Swedes. The Germans of Russia live on the Baltic Sea and on the western frontier, while colonies of them are to be found in European Russia and in the province of the Volga. They constitute the higher classes of the population, being for the most part merchants and artisans. They own the greater portion of the land, because, after the imperial manifest of 19 February, 1861, they freed their serfs (Letts and Esthonians), but did not divide the free lands among them. There are over 100,000 of them in this region; in that of the Vistula, there are German colonists, some of whom descend from those who were called by the Polish nobility to occupy the free lands. At the present time, the Germans are devoted chiefly to industry, and have established a great many factories, especially at Lodz. There are German colonies on the steppes, which, having the authorization of the Government and special privileges, are prosperous, but which oppose effective resistance to all attempts to Russianize them. The Swedes, about 400,000 in number, are concentrated in Finland, especially in the Government of Lyndal (45 per cent) and Vaasa (28-8 per cent). They also form the aristocratic and intellectual classes of Finland; but their political and literary influence, which was considerable, tends to diminish before the development of Finnish national sentiment.

The Romanic races are represented by about 1,000,000 Moldavians, and by the Wallachians, who inhabit Bessarabia and the western part of the Government of Kherson. They are all of the Orthodox religion, and as a rule are employed in wine production and gardening. They resemble the Little Russians both physically and morally. The Italian races are represented by about 1,000,000 Armenians, part of whom inhabit the Little Caucasus; the rest are scattered about the various cities of the Caucasus and in European Russia. They are famous for the beauty of their type and for their patriarchal habits. The Jews are to be found among them numbering as many as fifty in every hundred rural households of the rest of them. They devote themselves to agriculture and commerce, for the latter of which pursuits they have a special aptitude. They are Monophysites, and reject the Council of Chalcedon (Armenian-Gregorian), being under the jurisdiction of a katolicoe who resides at Etchmiadzin. They have the greatest attachment to their language and the traditions of their mother-country. Among those who live in the Caucasus, there is a considerable literary culture. Several thousands of them are Catholics.

On the shores of the Black Sea and the Sea of Azoff there are several colonies of Greeks who devote themselves to agriculture, and are engaged in the culture of tobacco. There are Greek colonies also in the chief centres of population of Russia, especially at Odesa and St. Petersburg.

The Jews are a scattered population, principally in the Governments of Western and Southern Russia. Their presence in Russia is due to emigration of German Jews from Poland, and they still preserve their dialect of Hebrew German, which is the language of their Press. As elsewhere, they eulogize the greatest aptitude for commercial matters, and the commerce and industry of Western Russia is in their hands. The severe laws that limit the civil rights of the Jews in Russia have concentrated the members of that race in the cities, and the number of workmen and of artisans among them is very great, making their struggle for existence very difficult. Large fortunes are to be found among the Russian Jews, but their
masses constitute a proletariat that on various occasions has been the victim of cruel massacres. Among these Russian Jews there is the greatest devotion to the Jewish religion and the greatest racial brotherhood. The Government admits only a limited number of them to the establishments of higher education; nevertheless, the large cities contain a great number of Jews who exercise the liberal professions, and especially that of medicine. The number of those who devote themselves to industrial pursuits increases each year.

The Finns inhabit the regions of the Baltic Sea, the Volga, and the Ural Mountains. The Finns, properly so-called, who inhabit Finland are 2,500,000 in number. For several centuries they were under the domination of Sweden, by which country they were barred from western civilisation. They are famous for their honesty, love of their country and traditions (they are Lutherans), their high intellectual level (there are scarcely any illiterates among them), the status of their women (the University of Helsingfors has six hundred women students, and the Parliament of Helsingfors has twenty-two women members), and their tenacity of character, by which they have transformed the poor soil of Finland. The progress of the last fifty years has been considerable, but in 1910 the Government suppressed the liberty and autonomy of Finland, and possibly thereby has placed a barrier to the development of Finnish culture. The Karey, who live to the north of Lake Ladoga and Onega, and of whom there are 210,000, are Baltic Finns; there are also small groups of them between Lake Iimen and the Volga. They have been more amenable to Russianisation, and have embraced the Orthodox faith. The Estonians occupy the southern part of the plain of the Baltic. There are 1,300,000 of them, who constitute a class of poor peasants, among whom religious feeling and education are very limited. The Finns have had and still have their own churches, banks, postal service, and a newspaper. After 1905 there were universal suffrage, and the new chamber of deputies admitted women also to its membership. In 1910, however, the Duma approved a bill relating to Finland, which, if carried into effect, would bring Finnish autonomy to an end. Finland is divided into eight governments. In the Caucasus, where the Russian population is in a minority, besides the various governments, there are provinces where special laws are in force. Siberia is divided into governments and provinces. Among the latter may be mentioned one of 800,000 square miles, with a population of 17,900. The central portion of this island, however, was ceded to Japan by the treaty of Portsmouth, 10–29 August, 1905. The governments and provinces of Siberia are eight in number. Asiatic Russia has provinces (oblasts) only, because the Russians constitute only a small minority of the population.

Agriculture, and Condition of the Peasants. —Russia is a great agricultural nation; three-quarters of its population derive their support from the soil, which furnishes the most important resources of the country. The state statistics date from 1877–78, and were collected by the Central Committee of Statistics. More precise information was gathered by the same committee in 1886–88, and in 1905. According to the latest of these statistics, there were in European Russia, exclusive of the Kingdom of Poland, 10,677,956 arable cultivated land, besides 17,609,124 acres of pasturage steppe, and 19,133,296 in the steppes of the Kirghiz. The cultivated lands are divided into three classes: (1) private property (274,885,426 acres); (2) lands granted by the government to the peasants or nadzialoje zemli (374,672,494 acres); (3) lands belonging to the tsar, the churches, cities, and institutions (417,661,885). A comparison of these statistics with those of 1877 shows that in
1905 the lands owned by the nobles had diminished in area by 53,851,906 acres, and those of foreign subjects, 27,465,996 acres. On the other hand, the landed property of the peasants had increased by 20,051,428 acres, and that of the other social classes had increased proportionately. In Siberia all the land, except the southern part of the Government of Tomsk which belongs to the imperial family, is the property of the Government, for as yet only a small portion has been granted to public and private institutions.

The state lands of European Russia are distributed very irregularly. In the Governments of Archangel, Olonets, and Vologda, the State owns from 53 to 90 per cent of the land; in the region of Tcherkassy, 5 per cent, and in the Government of Pultova, Bessarabia, and in Estonia less than 1 per cent. The lands granted to the peasants occupy more than half of the Governments of Orenburg, Vyatska, Ufa, Kazan, Penza, Voronezh, Samara, the Province of the Don, Vladimir, Ryazan, Kursk, Moscow, Kaluga, Kharkov, Tchernigoff, and Pultova.

Of the lands that are private property, 32 per cent belong to the nobility, 24 per cent to the peasants, 16 per cent to the merchants, and the remainder is divided among other classes. The possessors of the nobility are chiefly in the Baltic region, Lithuania, and the counties of Polesia, and Kief. In the period between 1860 and 1905 the rural property of the nobility, which had reached 213,300,000 acres, was reduced to 143,100,000 acres.

The great landowners, possessing more than 2700 acres each, are chiefly in the eastern governments and in those of the Baltic. The arable lands of the Kingdom of Poland occupy an area of 30,312,186 acres of which 44-56 per cent belong to private owners, 45-85 per cent to the peasants through government concessions, 4-02 per cent to the cities, and 5-84 per cent to the churches and other institutions. The land belonging to the churches and monasteries in the whole of European Russia, including Poland, is estimated at 0-6 per cent of all the arable land of that division of the empire.

There are 591,788 rural villages in European Russia, with a total population of 81,050,300, of whom 84-5 per cent are peasants. According to some estimates, of which one-third is arable land; 26-2 per cent is arable land; 19-1 per cent is land not available for cultivation; and 15-9 per cent is prairies and pasture lands. The lands unavailable for cultivation are the salt steppes, the marshes, and the tundra. In Finland these lands occupy 35-6 per cent of the country, and the proportion is still greater in Siberia and Turkستان, where the arable land is only 2 per cent.

The "extensive" and the "intensive" systems of cultivation are variously applied in Russia, according to the region. In the governments of Northern Russia (Archangel, Olonets, Vologda, Novgorod, and in parts of Yaroslav, Kostroma, Vyatska, and Perm) the system called podstitchnaja obtains, consisting in stripping and uprooting the forests, planting wheat on their sites for intervals of from three to nine years, and then allowing the forests to grow up again when the fertility of the soil has been exhausted. In the Governments of Kherson, Yekaterinoslaff, Taurida, Stavropol, Orenburg, the Province of the Urals, and the Province of the Don Cossacks is practised the method called zalezhnaja (Fr. jachére). This consists in cultivating the land while its productive power endures; then it is transformed into pasture. The Government of Kief and Podolia, an interval of ten, twelve, or fifteen years, as occasion may require. The intensive method of agriculture obtains in the central governments of Russia, in the zone of Tchernosom, and in other governments. A field is divided into three sections; in the first, winter grain (rye, corn) is sown; in the second, a crop of summer grain is put in (wheat, barley, oats); in the third, another summer grain is grown. Each year the crop of each section is changed for one of the other two, thus allowing each section to rest once in three years. In the regions of the Vistula and the Baltic, and in the south-western part of Finland the intensive system of agriculture obtains; no portion of the land remains untilled, but the peasant sow seed and harvest, and in nine years, so as not to exhaust the productiveness of the soil. In several regions, especially in the Caucasus, in Daghestan, Transcaucasia, and Turkestan, a remedy is found for the aridity of the soil in irrigation by means of canals. In other regions a marshy character the work of draining the swamps is carried on, at times by the Government, and at times by private parties. In Podlasia alone, from 1874 to 1892, there were reclaimed 6,210,000 acres of swamp lands. The same kind of work was accomplished in Siberia.

Russia is a great cereal-producing country. According to the statistics of 1906, in 73 governments (63 in Russian Europe, 1 in Transcaucasia, 4 in Siberia, and 5 in Central Asia), out of 327,642,983 acres of land, 562 per cent were devoted to the culture of cereals, 32 per cent to the culture of potatoes, 132 per cent to the culture of peas, 60 to 100 per cent to the culture of potatoes and peas, 48,000,000 tons; the potato crop yielded 29,000,000 tons; oats, 13,000,000 tons, and hay from arable meadows, 47,000,000 tons. The governments that are the most productive of cereals are those of Bessarabia, Kherson, Taurida, Yekaterinoslaff, and the province of the Don Cossacks. As a cereal-producing country, Russia is the second in the world, the United States being the first.

The development of potato culture, which was introduced into Russia in 1707, is notable. The grain that Russia produces is not only sufficient to supply the home market, but also constitutes one of the chief exports. The amount of it that is exported amounts on an average to 15,000,000 tons a year. It should be noticed, however, that in proportion to the area on the empire, the grain production of Russia is not high: Germany, France, and Austria, the combined area of which produces only one-third of that of European Russia, produce together more grain than is produced in all Russia.

There are abundant crops of other staples, also, that Russia produces; these are the flax crop, which yields 600,000 tons a year, produced in several of the governments of the empire; hemp, 400,000 tons; cotton, raised in Transcaucasia and Turkistan, especially in the Province of Fergana, annual yield more than 170,000 tons. Tobacco was introduced into Russia in the seventeenth century; its use was prohibited by severe laws, but was allowed from the time of Peter the Great; it is cultivated in the Governments of Tchernigov, Pultova, Samara, Saratof, Taurida, Bessarabia, Kuban, etc. Its annual yield is about 100,000 tons, while the lands that are devoted to its cultivation cover an area of 1,755,000 acres. The principal tobacco factories are at St. Petersburg, Moscow, Riga, Kiev, and Odessa. The culture of beets, introduced into Russia about the beginning of the nineteenth century, has been greatly developed during the last thirty years, there being now devoted to it an aggregate area of 1,485,000 acres, the greater portion of which is in the Governments of Kief and Podolia, the annual crop amounting to 10,000 tons. Wine is not extensively produced in Russia, and is of inferior quality. The best vineyards are in the Crimea, in Kakhetsia, and in the Province of the Don Cossacks. There are 729,000 acres devoted to vine culture, and the yearly product amounts to not more than 85 million gallons. The
Government seeks to encourage the home production of wine by very high duties on foreign wines. The culture of vegetables and fruit is not greatly developed; market gardens thrive in the neighbourhood of the large cities, especially in the District of Kharkoff, and in the Government of Saratoff and Samara. The production of fruit is abundant in Transcaucasia and the Crimea.

According to the statistics of 1908 there were in Russia 140,656,000 head of cattle, namely, 28,723,000 horses, 42,631,000 horned cattle, 57,466,000 sheep and goats, and 12,506,000 hogs. The horses are scattered over the whole of European Russia; the cattle of Siberia are of a better class, on account of the abundance of forests. There are numerous breeds of horses in Russia, and special establishments are devoted to the improvement of these breeds in the Province of the Don Cossacks and the Governments of Voronezh, Kherson, Tambov, Putilow, and Kharkoff. The annual product from the sheep, calculated at 120,000,000 roubles (1 rouble equals 52 cents U. S. A.).

The best wool is produced by the flocks of the Governments of Novgorod and Voronezh, of the Volga, the Volkhov, the Baltic, the Caucasus, and Turkestan. The lands were under serfdom, and were governed by the Governments of Minesk and Volhynia. The chicken industry flourishes in Western and Central Russia; hens and eggs are exported and yield an annual income of more than 70,000,000 roubles, of which 61,000,000 are for eggs. The annual production of honey is no more than 10 tons, and was increased by the Governments of Samara and Astrakhan. The aggregate income of from 15,000,000 to 20,000,000 roubles.

The culture of the silk-worm is being developed chiefly in the Governments of Bessarabia, Kherson, and Taurida, and in Turkestan and the Caucasus. The yearly production of silk amounts to 35,000 cwt.

The condition of the peasants, although greatly improved, is far from being prosperous, and the agrarian question is one of the gravest with which Russian statesmen have to deal. Prior to 1861, or since 1592 according to some authorities, 1649 according to others, the peasants were legally reduced to servitude (eripostnoe pravo). They were under serfdom to the landowners, were attached to the soil, and were not allowed to change their place of residence or dispose freely of their property; they were obliged to cultivate the lands of their employers and pay a tax to the State. The pomieshchi, or landowners, bore the whole burden of the State and the peasants were reduced to the condition of slaves. As a consequence there occurred the revolts of the peasants, in the seventeenth century, under Stenkof Rasim, and in the eighteenth century, under Fugatcheoff. During the reign of Catherine II a Russian author, Radishkeff, in his "Voyage from St. Petersburgh to Moscow" suggested the necessity of freeing the peasants from their servitude; the book was held to be dangerous, and its author was exiled to Siberia. Paul I in 1797 alleviated the condition of the peasants by decreeing that they should work only three days on the lands of their employers. Alexander II abolished servitude in 1857. In 1859 the committees of the nobility and of the pomieshchi in the various provinces discussed this question of the abolition of servitude, and the Press dealt with it in an active way, showing Russia's moral and political need to solve it. An imperial commission was appointed in 1859 to prepare a law which, after long deliberations and frequent modifications, received the signature of the tsar, 12 Feb., 1861, and was promulgated on 5 March of the same year. The terms of this law made all peasants free, and secured to them, upon the payment of a tax established by law, the land comprising their holdings (deer) and a grant of land, of which they could become owners in fee simple by pecuniary redemption. Moreover, the pomieshchi were obliged to grant to the peasants or to the mir the lands occupied by them, conformably with a maximum or minimum established by law. On the other hand, the devoe, or servants, who numbered 1,500,000, in 1861 regained their freedom, with however the obligation of serving their masters for a further period of two years.

The lands were so distributed that each peasant who was entitled to share in them received, on an average, fourteen acres; on an average, because the quality of the land was not the same in the various regions; in the zone of the Tchernomor, the concessions were of eight acres. Moreover, the distribution of lands was very unequal, and 42-6 per cent of the peasants who participated in it received concessions that were insufficient for their needs; to this may be added that many of those peasants, yearly growing poorer, were not benefited by the law, and that the annual tax to be paid to the Government by those who received portions of land became a burden. The Government therefore continued to enact laws to solve the agrarian question. The taxes were diminished in 1881, and in 1882 the Agrarian Bank was established, which helped the peasants to acquire possession of 19,000,000 acres in a few years. In 1885 the per capita tax paid by the peasants was abolished, by which the Government lost 50,000,000 roubles. Other laws, some of them promulgated as late as 1890, are directed towards the protection of the rights of the peasants. These measures, however, are insufficient. The increase in the population has greatly reduced the average holding of land, which in 1893 amounted to 6-5 acres for each peasant. The improvement of the peasants, drink, backward methods in agriculture, and bad legislation have on more than one occasion made life difficult to be felt in the agricultural regions. The agrarian question, therefore, lies like an incubus on Russia, while the various parties of the Duma propose different solutions for it. The moderate parties advise directing the peasant emigration towards Siberia, dispersing the peasants in less populous governments, and imposing higher taxes on agricultural instruction; while the more advanced parties demand that the crown lands and the lands of the churches and the monasteries be divided among the peasants, or again that the great landowners be deprived of their rural possessions (socialisation of lands). Until now, however, the agrarian laws in the various dumas on this subject have led to no practical results.

Statistics of Commerce.—According to the statistics of 1908 Russia occupies the ninth place among nations as regards her merchant fleet, which including that of Finland has 6250 ships, with a gross tonnage of 1,046,195; this includes 1240 steamers with a tonnage of 500,000. Finland has 2800 ships, with a tonnage of 346,195. The ships of more than 1000 tons burden in the Russian merchant fleet number 114. Of Russian vessels, 1129 belong to the Black Sea ports and the Sea of Azof, and 1104 to the Baltic ports. According to the statistics of the same year, there arrived at Russian ports during 1908 11,011 ships, of which 1777 were Russian, with an aggregate tonnage of 1,241,000, and 9519 foreign, aggregate
tonnage 9,519,000. The chief centres of Russian maritime commerce are the ports of the Baltic, the Black Sea, and the Sea of Azof. The foreign maritime commerce of Russia is divided by tonnage as follows: England, 42 per cent; Germany, 16 per cent; Denmark, 10 per cent; Greece, 8 per cent; and Sweden and Norway, 4 per cent. The coasting trade between small ports is reserved exclusively for Russian shipping; it has found its greatest development in the Black Sea and the Sea of Azof (36,590 ships, 15,098,000 tons), in the Caspian Sea (16,539 ships, 8,584,000 tons), and in the Baltic Sea (10,589 ships, 1,236,000 tons). This shipping carries on an average 9,936 million tons of merchandise a year, of which 4,400,000 tons is petroleum, and 1,100,000 tons grain. The great coasting commerce between the Black and the Baltic Seas, between the ports of European Russia and those of Eastern Siberia, and between the Murman coast (Murmanskii bereg) and the Baltic Sea, employs 212 steamships, of an aggregate tonnage of 450,000, carrying a yearly average of 270,000 tons of merchandise. The most important commercial ports of Russia are St. Petersburg, Riga, Libau, Reval, and Odessa. According to the most recent statistics, the river fleet consists of 6,758 vessels of the merchant marine, with an aggregate tonnage of 11,200,000. The yards that build this shipping are at Nischni-Novgorod, St. Petersburg, Moscow, Perm, and in Finland. The river fleet carries a yearly average of 32,000,000 tons of merchandise, of an aggregate value of 800,000,000 roubles.

The first railway that was constructed in Russia was that of Tsarskoi Selo in 1837; in 1850, Russian railways had 666 miles of line, which had increased to 7,094 miles in 1870, to 14,786 in 1880, and to 20,000 in 1890. The greater portion of these was constructed by private companies, and in 1885 13,698 of the total 19,922 miles were held by private companies. In 1908 the railway mileage of Russia amounted to 45,132 miles, of which 35,076 were in Europe, 2078 in Finland, and 7978 in Asia. At present four-fifths of these railways belong to the State, and one-fifth to private parties. In 1909 there were 270 miles of new railways opened and the construction of 3074 miles more was determined upon. Russia has the second railway mileage of the world, being second only to the United States; but compared with the area of the empire, the railway mileage of Russia is small. The railway centre of Russia is Moscow, the industrial Trans-Siberian Railway is the greatest enterprise of modern Russia: it has made possible the exploitation of the natural riches of Siberia, and has opened a way for the commerce of Europe with the Far East. Its construction was begun in 1891, and finished in 1905, at a cost of 850,000,000 roubles. It has a length of 5532 miles. As the war with Japan, the branch to Port Arthur became a part of the Eastern China Railway. The voyage from Europe to Shanghai, which takes forty-five days by the Sues Canal, and thirty-five days by Canada and the Pacific Ocean, is made in from eighteen to twenty days over the Trans-Siberian Railway by way of Vladivostok. The total value of the Russian railways is 5,500,000,000 roubles, and their average cost is estimated at 169,500 roubles per mile.

In foreign commerce, exports and imports, Russia occupies the seventh place among commercial countries. The import, in 1905, amounted to 2,000,000,000 roubles (in 1906, 800,000,000 roubles of imports, and 547,500,000 roubles of exports). This commerce to the amount of 1,545,000,000 roubles is carried on across the frontiers of Europe, 928,000,000 roubles across Asia from 3,000,000,000 roubles across the frontiers of Finland. Russia exports wheat, barley, oats, rye, and corn to Germany, England, Holland, Italy, France, Austria, etc.; eggs, sugar, butter, caviare, fish, fowls, petroleum, cattle, and raw minerals; and imports woollen textiles amounting to 25,000,000 roubles, worked metals, paints, and dyes, coal, silk, rubber goods, machinery, watches, tea, tobacco, and Nishni-Novgorod, originating in the seventeenth century near the monastery of the Blessed Macarius, which was built within the Government of Nishni-Novgorod. To that market Turks, Tartars, and Persians went in great numbers. In 1816 the fair was transferred to Novgorod, a city which, on account of its position at the confluence for becoming a great commercial centre; the commercial importance of the fair increased rapidly; it was visited by as many as 200,000 merchants from all parts of Russia and Siberia. The fair has been brought under the control of the Government, which amounted to 32,000,000 roubles in 1817, obtained a sum of 246,000,000 roubles in 1841, after which it fell to a yearly average of from 160 to 170 million roubles. The fair is held from 15 July to 25 Aug., the chief commodities being silk, cotton, linen, and woollen goods, worked metals, and skins. Another important fair is that of Iribit, in the Government of Perm. This fair originated in 1643; it is held from 1 Feb. to 1 March, the value of the merchandise brought to it being estimated at 30,000,000 roubles each year. In Little Russia these fairs are frequently held; among them the most noted are those of the Emba and the Burea. Another is that of Jan. (merchandise of a value from 11 to 13 million roubles); those of the Assumption, the Intercession of the Blessed Virgin, and the Holy Trinity, in the same city, from 15 Aug. to 1 Sept., 1 to 15 July, and 1 Oct. to 1 Nov., respectively; the fair of Kieff, from 5 to 26 Feb.; those of Kurek, Simbirsk, Menzelinsk, Ivanovskiaia etc. The growth of the railways tends to diminish the importance and volume of business of these fairs. The number of commercial establishments in Russia (statistics of 1907) is 889,746, and the number of people engaged in commerce is 1,600,000.

INDUSTRIES, AND CONDITION OF THE WORKERS.—Russian industries have been greatly developed, although they are far from being in a position to supply the home demand. In 1906 there were in Russia 14,247 industrial establishments, in which there were 3,484,569 workers; in 1907 the number of those establishments had decreased to 14,190, while the workers had increased to 1,723,173. The industrial districts are those of St. Petersburg (2049 establishments, 296,109 workers), Moscow (2485 establishments, 810,402 workers), Warsaw (2978 establishments, 298,265 workers), Kiev (2301 establishments, 207,751 workers), the Volga (1768 establishments, 137, 235 workers), and Kharkoff (2119 establishments, 203,424 workers). The number of women employed in these establishments increases continually, and grew from 383,782 in 1901 to 435,684 in 1906. The metal industries are the most important. Under Peter the Great there was called freedom of mines (gornaia svoboda), according to which the ownership of a mine was independent of that of the land under which it was found. This law was revoked by Catherine II in 1781, to the detriment of the metallurgical industries. According to the latest statistics, the number of workmen employed in these industries is 700,000, of whom
more than half are employed in the extraction and working of iron. The value of the yearly output of the metallurgical industries is 300,000,000 roubles.

Russia holds an important position as a gold-producing country: in 1906 Siberia, the Urals, and Finland produced 30 tons of gold. The average production of gold each year, from sand and gravel, is about 8,000,000 roubles. Russia occupies the fourth place among gold-producing countries. The Province of Irkutak, in Eastern Siberia, is the chief gold region of the country, and especially the District of Oleminak, which produces 6 tons of the metal. By the laws of 12 March 1901, and 1 March 1902, the prohibition that had been placed upon free commerce in gold was removed. There are 80,000 workers employed in the gold industries of the country.

Russia may be said to be the only platinum-producing country. This metal is taken from the Urals, where it was discovered in 1819, the yearly production of it amounting to 5 tons, although in 1906 the amount was 5½ tons. It is mined in the Government of Perm, giving employment to 1292 men, and is usually sold to the British at a price of 806,000 roubles per ton; when refined in England, it is sold for 1,240,000 roubles per ton. The production, which fell from 886 to 1890 to 13 tons a year, has decreased to 6 tons yearly. The metal is mined in the Districts of Nertchink and the Altai, and in the Governments of Vobor and Archangel.

Russia has produced copper since the seventeenth century, and her annual production of that metal increases continually: from 8,800 tons in 1905, it increased to 70,000 tons in 1906, and to 14,000 in 1907. There are 22 establishments devoted to the copper industry; the metal is mined chiefly in the Caucasus and in the Urals, and to a small extent in the steppe of the Kirghis and in the Altai Mountains. Lead is usually found in Russia mixed with silver, and is obtained in the Province of Terek and the Districts of Nertchink and the Altai. An exact average of the yearly production of lead cannot be established; in 1890 it amounted to 800 tons; in 1895 to 400 tons; in 1904 to only 80 tons, while it increased to 770 tons in 1905, and to 1000 tons in 1906. Zinc is furnished by four great establishments, situated respectively at Bendzin, Constantin, Paulina (Government of Piotrkow), and Alagdur, in the Province of Terek. The production of this metal yields 1 million and quartis, in 1904; 1,000 tons in 1905; and 3,000 tons in 1906. Mercury was discovered in 1879 in the District of Bakhmut (Government of Yekaterinoslav), and its yearly production amounts to 320 tons. Manganese, which is worked chiefly in the Governments of Kutais and of Yekaterinoslav, yielded a production of 320 tons in 1898, 790 tons in 1900, and 500 tons in 1905.

Russia produces great quantities of iron. The first establishments for the working of this metal originated in the seventeenth century and were the property of the State: In 1906 the total production of iron amounted to 5,183,579 tons. There are 126 foundries which produce 2,700,000 tons of melted iron. Russia occupies the seventh place among the coal-producing countries. The first coal was mined in the reign of Peter I, but the coal industry was only developed to any extent under Catherine II, and that development continued from an annual output of this mineral amounted to 25,000,000 roubles. Russia is exceptionally rich in petroleum. Many of its oil deposits are yet undeveloped, especially in the Governments of Kieoe and Taurida, and in the Urals. The greatest supply of Russian petroleum now comes from the northern and southern slopes of the Caucasus Mountains, especially from the Government of Baku (90 per cent), from the Provinces of Terek, Kuban, and Daghestan, from the Government of Tiflis, and from the Transcaspian region. In 1907 the total production of petroleum in Russia amounted to 8,300,000 tons. The petroleum exported in 1906 represented a value of 30,000,000 roubles.

Among salt-producing countries Russia holds the fourth place, producing from mines and salt lakes a yearly average of more than 1,770,000 tons of salt, chiefly from the Governments of Yekaterinoslav, Astrakhan, Perm, and Taurida. The textile industry holds an important place, there being 2000 factories, employing 700,000 workers, producing fabrics valued at 800,000,000 roubles a year. Of those establishments 730 are cotton factories, which employ 437,000 workers, and produce a yearly output valued at 520,000,000 roubles. The principal establishments for the cleaning of cotton are in Turkestan and the Government of Erivan. Factories for spinning and weaving cotton first appeared in Russia during the second half of the eighteenth century; the principal ones among them at the present time are in the Governments of Vladimir, Moscow, Piotrkow, St. Petersburg, Kostrora, Terek, and Yaroslav. The wool industry has 916 factories, with an aggregate yearly income of nearly 170,000,000 roubles. Russia has 145 linen factories that produce a yearly income of 42,000,000 roubles. The silk industry, which was introduced at the beginning of the eighteenth century, had in 1900 300 factories (Governments of Moscow, Vladimir, and Piotrkow), and was producing a yearly income of 25,000,000 roubles.

The flour industry is an important one, there being 1400 large mills, the yearly products of which are valued at 225,000,000 roubles, besides which there are 20,000 small mills. The distillation of grains, made from rye and barley, is a large industry, there being 2480 distilleries with a yearly production of 89,100,000 gallons. There are 80 distilleries for the production of vodka, which has become a government monopoly, and the yearly product of which is 2,180,000 gallons, chiefly in the Governments of Moscow and St. Petersburg. The brewing of beer was begun in Russia more especially in the nineteenth century, and as a beer-producing country Russia occupies the sixth place, having 818 breweries with a yearly product of 182,000,000 gallons. Russia also produces sugar. In the eighteenth century the production of sugar, 1400 tons in 1820, increased to 1,460,000 tons in 1906. The sugar industry, which flourishes in the Governments of Warsaw, St. Petersburg, and Moscow, yields an annual income of 5,500,000 roubles. Electrical works, of which there are 50 in the Government of St. Petersburg, have made their appearance within recent years; their annual product is valued at 5,000,000 roubles.

There are 827 workshops where industrial machinery is made, the value of their annual products being estimated at 208,000,000 roubles. Fourteen large establishments in the Governments of St. Petersburg, Livonia, Moscow, and Nishini-Novgorod construct locomotives and railway cars, of a value of 22,000,000 roubles. The goldsmith's industry, which flourishes in the Governments of Warsaw, St. Petersburg, and Moscow, yields an annual income of 5,500,000 roubles. Electrical works, of which there are 50 in the Government of St. Petersburg, have made their appearance within recent years; their annual product is valued at 5,000,000 roubles.

There are 250 furniture factories, with a yearly output of 16,000,000 roubles. The yearly production of the 174 chemical factories in
Russia is estimated at 39,000,000 roubles. Tanning, which is prosecuted in Russia as far back as the ninth and tenth centuries, is now carried on in 641 tanneries that produce a yearly output of 55,000,000 roubles. The glass industry also is important in Russia, where it made its appearance in the seventeenth century, under the Tsar Michael Theodorovich (315 factories, and a yearly output of 26,000,000 roubles).

The material and the moral conditions of the working people leave a great deal to be desired. The wages are low in proportion to the cost of living in Russian cities, and the law does not give the workman sufficient protection against exploitation by his employer. It must be said that the labor laws with regard to workers in factories, although this matter has been considered by various commissions, established by the Government in 1859, 1870, 1874, and 1892. Sickness and accidents are frequent among the workmen: in 1871 in 17,553 establishments, employing 1,700,000 workers, there were 24,744 accidents, of which 385 were fatal. To these may be added 23,360 injuries through accident in the mines, making a total of 48,104; these official figures seem too low to represent the facts. The insurance societies have only 600,000 workers insured on the list, and in case of accident it is very difficult to obtain payment from them. There is a great deal of medical assistance. The moral standard is very low. It is therefore no wonder that the working class takes an active part in revolutionary movements and furnishes a large percentage of highway robbers.

Intellectual Russia.—Intellectual culture is of recent date, and was first developed in Southern and Western Russia under Polish influence. The first Russian academy was established at Kieff in the seventeenth century. In Muscovite Russia intellectual culture began under Peter the Great, who gave much attention to the education of the people. Catherine II established the first school for girls. Under Alexander II a great number of schools and of establishments for higher education were opened, and this intellectual development was carried to Siberia by the foundation of the University of Tomsk under Alexander III. Higher education is represented by ten universities: St. Petersburg, Moscow, Kieff, Odessa, Kharkoff, Warsaw, Kazan, Yurieff (Dorpat), Helsingfors, and Tomsk. Two other universities are about to be established by the Government, at Saratoff and Tobolok. In 1909 the ten universities just named were attended by 85,000 students having the greatest number of students being the Universities of St. Petersburg (8805), Moscow (8098), Kharkoff (4048), and Kieff (4230); on the other hand, Warsaw has only fifteen students, being boycotted by the Poles on account of the exclusive use of the Russian language. The most frequent courses are those of law (13,970 students), physics and mathematics (8778 students), and medicine (7068 students). There is a notable attendance of women (500) at the University of Helsingfors. The nine Russian universities are maintained by the State at an expense of 5,405,600 roubles a year, to which should be added other amounts of regular receipts, making a sum total of 7,684,000 roubles. The University of Helsingfors is supported by Finland at a cost of 806,700 roubles, of which 173,700 roubles are furnished by the public treasury.

Theological universities, some of which date from the eighteenth or even the seventeenth century, received their first impetus from Alexander I (1801-25), who founded the Universities of Kharkoff, Kazan, and St. Petersburg. Under Nicholas I (1825-55), they ran the risk of being closed, and were subjected to a rule of superintendence and severe discipline. In 1853 the minister Golovin introduced important reforms into the organization and administration of the universities, and conferred many privileges upon the professors and students, which in the last analysis were created by the law of 23 Aug., 1884. The regular professors receive a salary of 3000 roubles a year; the supplementary professors receive 2000 roubles, and the docents 1000 roubles. The various universities have in their faculties men of superior attainments, who are an honor to science. The professors are decorated also for their Liberal sentiments, which in 1905-07 degenerated into excesses, and on various occasions transformed the universities into hotbeds of political agitation.

The intellectual culture of women has its centres in the so-called "Superior Courses" (Vysshie kursy) of St. Petersburg (2398 students) and of Moscow (2177 students), and in the women's medical school of St. Petersburg (1635 students). In the "Superior Courses," the greater portion of the women students take up the study of history and of philosophy. The one at St. Petersburg is maintained at a cost of 217,530 roubles a year; the corresponding one at Moscow at 153,000 roubles a year, and the women's school of medicine at a cost of 573,928 roubles. There are many scholarships for poor students, men and women. The Russian women who frequent the "Superior Courses" are, as a rule, from eighteen to twenty-five years of age. They are distinguished by their quickness of intellect and energy of character, and also by a decrease of womanly qualities.

According to the statistics of 1907, secondary instruction for men is given in 246 gymnasiums and 37 pro-gymnasiums, having 2912 classes, 4658 masters, and 107,926 students; for women, in 433 gymna- sia and 172 pro-gymnasiums, with 5432 classes, 10,272 teachers, and 200,761 students, and in 178 Realschulen, 1590 classes, 2538 teachers, and 55,499 students. In the gymnasium, the course lasts seven years; Greek, Latin, French, and German are taught at these institutions, as also the natural sciences, history, geography, Russian literature, and the catechism. The pro-gymnasium teach the same subjects, with the exception of the dead languages. The Realschulen impart a practical education. In the gym- nasium for girls, the course is six years. To the number of these schools must be added the institutes and the seminaries for the education of teachers (uchitel' ekie instituty, uchitel' skiia seminarii), there being 10 of the former, with 143 professors, and 1738 students; and 73 of the latter, with 909 professors, and 12,355 students.

There are 8000 schools in the whole of Russia, including Finland, 111,427 schools for primary instruction, attended by 6,875,765 scholars, of whom 4,691,691 are boys. To this class belong the parochial schools that were instituted 13 July, 1884, and were placed under the direct control of the Synod. The scope of these schools is chiefly religious; they teach the law of God, reading, writing, and arithmetic; some of them have only one class; some two; in the second class, when there is one, ecclesiastical and national history are taught. The remuneration received by the teachers of parochial schools is often as low as 150 roubles a year. In the schools that depend upon the Ministry of Public Instruction, the salaries of teachers are 500 or 600 roubles a year. In 1909 the ministry spent 54,000,000 roubles for the schools of primary instruction, while the Holy Synod spent 14,000,000 for the schools dependent upon it, a sum that is increased to 89,000,000 roubles by the contributions of other missions or institutions. The schools are so numerous, and so less are insufficient in number, and the progressive element in Russia calls for the establishment of 500,000 additional schools. Russia has also professional schools: an institute of forestry (lesnoi institute), attended by 460 students; 142 commercial institutes, with 2775 professors and 33,397 students;
RUSSIA

87 commercial schools, with 10,400 professors and 12,510 students; and 37 professional schools and institutes, with 717 professors and 4,270 students.

Among the scientific institutions, the Imperial Academy of Sciences of St. Petersburg stands in the first place. It was instituted by Peter the Great in 1724, and was opened by Catherine I in 1726, and has various museums, libraries, laboratories, and observatories. Its literary activity is intense, its numerous scientific publications already forming a vast library. There are also the Imperial Archæographical Commission of St. Petersburg, which has published and is publishing the reprints of Russian national chronicles; the Imperial Archæographical Commission of St. Petersburg; the Imperial Archæological Society of Moscow, which publishes learned and artistic volumes on the sacred and profane monuments of Russia; the Society of Oriental Studies, at St. Petersburg (Vostotchnomu словуче-
nijia Obašhastvoj), the scientific researches of which deal especially with Siberia and China; the Society of Naturalists of St. Petersburg (Obašhastvo estes-
vozvjezdateljia), which was founded in 1806; the So-
ciety of Geographical Studies (Obašhastvo zemle-
delmeckoe), founded at St. Petersburg in 1805; the
Imperial Institute of Experimental Medicine, the philologico-historical societies of Odessa and of Khar-
koff; the Imperial Historical Society of St. Peters-
burg, which has published 130 volumes of historical documents and the Russian biographical lexicon; the Archæological, and the Archæological Society of Kazan; the Society of the Friends of Ancient Litera-
ture of St. Petersburg, which has published numerous and valuable copies of ancient texts; the Historical and Ancient Literature Society, connected with the University of Moscow, whose Tchentija (lectures) constitute the richest and most valuable historical collection of Russia; the Imperial Mineralogical In-
stitute of St. Petersburg; the Slav Society of Moscow,
which publishes the periodical "Slavianski Viech"; the Polytechnical Institute of Moscow; the Imperial Archæological Society of St. Petersburg, with classical, Oriental, Russo-Slavic, and numismatical sections; the Imperial Geographical Society of St. Petersburg, famous for its publications; the Juridical Institute of
St. Petersburg; the Lazareff Institute of Moscow,
famous for its learned publications on Oriental and other subjects. All of these institutions, to which many of secondary importance, existing in all Russian cities, added, furnishing a great deal of work to the activities of Russian science, which in reality are very considerable. These institutions are also endowed with very fine libraries.

The most important Russian library is the Imperial Public Library, which is divided into thirteen sec-
tions, and is rich in bibliographical treasures, among them the famous Codex Sinaiticus of the Bible. The second is the library of the Academy of Sciences, which is growing richer from year to year, and with which is connected the library of the Asiatic Museum of St. Petersburg, where there are many Oriental manuscripts. Two famous libraries at Mos-
ev are: that of the Holy Synod, where there is a
very large collection of Greek codices; and the li-
brary of the Rumiansoff Museum. In the Caucasus there are: the library of the Ecclesiastical Museum of Tiflis, which is rich in ancient Georgian codices; and the library of the monastery of Etschmiadzin, which has a valuable collection of Armenian codices.

ECONOMICS AND FINANCE.—It was only towards the end of the nineteenth century that the budget began to free itself from its continuous fluctuations. In view of the disorder that obtained in its finances during that century, the Government was compelled con-
tinually to authorize the extraordinary acceptance of bank-notes which, from a total of 568 million roubles in 1857, increased to 1100 million roubles by 1883. To meet its obligations, it was obliged to resort to loans which, from 2,537 million roubles in 1856, in-
creased to 5,242 million roubles in 1883. The Russian
budget, both in receipts and in expenses, increases continually: the highest budgets, for receipts and for expenses, were those of 1905 (receipts, 2,989 million roubles; expenses, 3,106 million roubles); 1906 (receipts, 3,423 million roubles; expenses, 3,212 million roubles); and 1907 (receipts, 2,195 million roubles; expenses, 2,582 million roubles). The increased receipts are due to loans, and the increased expenses to the war with Japan. The expenses of the war from 1904 to 1905 amounted to 1,414,223,184 roubles; the budget that was submitted to the Duma and to the Council of the Empire for 1908 fixed the receipts at 2,478,677,241 roubles, and the expenditure at 2,631,-
495,496 roubles. That for 1909 fixed both the receipts and the expenditure at 2,366,049,000 roubles. Of the receipts 193,882,000 roubles are derived (Statute of 1909) from direct taxation; 523,758,000
from indirect taxation; 140,700,000 from the cus-
toms; 806,488,000 from the rights of the State (regali); 685,670,000 from the properties and capitals of the State; and the remainder from other sources. Of the expenditure 547,918,000 roubles are due to the
Independent Army; 393,363,000 roubles are absorbed by the payment of coupons of the Russian Rentes; 89,353,000 roubles are assigned to the Ministry of the Navy; 452,117,000 to the Ministry of Finance; 553,156,000 to the Ministry of Railways and Communications; 194,378,000 to the Ministry of the Interior; 215,386,000 to the Ministry of Public Instruction; 31,663,000 to the Holy Synod, and 71,488,000 to the Ministry of Justice. Among the direct taxes are those upon alcoholic liquors (34,-172,000 roubles), upon tobacco (48,028,582 roubles), on sugar (75,541,747 roubles), and on petroleum (31,-857,500 roubles). The monopoly of alcoholic drinks yields to the State the enormous sum of 542,288,341 roubles. The Government receives 36,500,000 roubles from the postal service, 21,500,000 roubles from the telegraphs, and 453,500,000 roubles from the railways. Russia has the largest budget in the world, but not in proportion to the number of its inhabitants.

A great portion of the resources of Russia is ab-
sorbed by the interest on its debt, which in 1907 amounted to 8,625,560,215 roubles. Of this sum, 3,155,641,839 roubles were on account of the railways. In 1908 the debt amounted to 8,725,523,210 roubles. In the course of the ten years between 1903-07 the Russian debt increased by a sum of 2,851,596,540 roubles. For the payment of its foreign Rentes, the Russian Government needs several hundred millions in gold, wherefore its financial policy tends to increase exportsations, to favour home industries, and to aug-
ment the metallic supply. The law of 29 Aug., 1897, put gold into circulation in Russia; and that of 28 April, 1900, guaranteed the payment in gold of notes of credit. In 1908 the bank notes in circulation aggre-
gated a sum of 1200 million roubles; and the gold 578,200,000 roubles, a decrease of 19,400,000 roubles from the preceding year. The principal establishment for credit in Russia is the State bank (bank), which has 8 agencies and 107 branches. Its gold reserve in 1908 amounted to 1200 million roubles, in Russian and in foreign coin, and in bars. It's de-
posits in precious metals and in securities amounted to 8286 million roubles. In 1892 there were only 2 savings banks in Russia: in 1891 their number had increased to 76, and in 1890 to 1826; in 1900 to 5145, in 1908 to 6710, with an aggregate of 6,210,238 depositors, and of 1,149,243,581 roubles of deposits. Other important banks are: the Agricultural Bank of the Nobility, the assets of which, on 1 Jan., 1909, amounted to 808,000,000 roubles; the Agricultural Bank of the peasants, which on the same date had assets of 1134 million roubles; the agricultural stock banks (akcionerny'ye zemel'nye banki), which were
established between 1871 and 1873 in the Governments of Kharkoff, Pultowa, St. Petersburg, Tula, Bessarabia, Tsaritsa, Nishni-Novgorod, Samara, Kief, Vologda, and Nizhni-Novgorod. In 1900, according to Don Cossacks, the aggregate assets of which, on 1 Jan., 1909, amounted to 1164 million roubles. The first mutual credit society was established at St. Petersburg in 1864; at the present time there are 401 of them, 13 of which are at St. Petersburg. In 1909 there were 386 of these associations, with an aggregate of 206,914 members, and assets of 450 million roubles.

Insurance societies are of long standing in Russia. One of them, the Russian Fire Insurance Society, was established in 1827. In 1907 there were 13 fire insurance societies in the empire, the aggregate receipts of which in 1907 amounted to 107,000,000 roubles, as compared with 99,000,000 in 1906, and 91,000,000 in 1905. The most important of these companies is the Salamandra, which was established in 1846. Life insurance policies are issued also by the State savings banks, which in 1907 issued 1553 policies for the total sum of 3,018,929 roubles. There are 7 Russian and 3 foreign life insurance companies, the first having a combined capital of 90,000,000 roubles, and the second 20,000,000 roubles. In 1907 there were 125 insurance societies in operation in the various cities of Russia. After the law of 2 July, 1903, which provided for indemnity for accidents to workers, more accident insurance societies appeared, at the industrial centres of Riga, Ivanovo, Warsaw, Moscow, Kief, Odessa, St. Petersburg, Tchernomorizia, and Bielostok. These societies have a combined capital of 1,700,000 roubles, but the number of workers insured is small (260,775). Besides the establishments that have been mentioned above, there are in Russia 34 commercial banks, 407 mutual credit societies, and 86 pawn offices (mons de piété). In all, there are 1502 institutions of credit in Russia.

MORALITY: STATISTICS OF CRIME.—Statistics show a continual increase of criminality in Russia, due to the increase of the population, the dissemination of socialistic and of revolutionary ideas among the lower classes, the want of culture, and the lack of moral influence of the Orthodox religion. From a total of 266,261 crimes punished by the law in 1901, the figures increased to 271,360 in 1902; 285,907 in 1903; 296,968 in 1904; and 317,710 in 1905. Against the person represent the greatest number of these crimes. The number of homicides increased considerably in 1905-07, and likewise offences by the Press. In 1906 there were 141,847 arrests (129,275 men). In the same year 3622 men and 720 women were sentenced for homicides. Against persons of the same age of criminals is furnished by the peasants. In 1906 there were 111,403 arrests; in 1907, 138,501; and to 1 Jan., 1908, 160,025. In 1907 there were 930 prisons. Criminality has assumed great proportions, especially in the Caucasus and Poland, where, on account of political as well as economic causes, outlaws has increased its numbers to a considerable extent. Political criminality has increased there to an alarming degree. In Poland in 1904-06 760 civil, military, and police employees died by violence, and 864 were wounded; 142 suffered from the explosion of bombs. In Warsaw alone, from 1904 to 1907, 236 police were killed, 179 of them in 1906. The Russian Government has answered these assaults by a multiplication of death sentences, the number of which from 1905 to the present time amounts to several thousand.

HISTORY.—A. The Epoch of the Princes. — Nestor, the Russian chronicler, speaks of the Drevlians, the Livlans, and the primitive races of Russia as of beasts, and assails their polygamy, indecency, and the roughness of their ways. A few families would collect to form a village, and a few villages would constitute a roost governed by a prince; their attempts at cities were few and far between, and the little states, devoid of a central Government, were the prey of internal discord, and too weak to resist the attacks of exiles. The territory south were tributaries of the Khazars; and according to Nestor, those of the Ilmen, torn by dissensions, sent messengers to the Vareghi, or Varanghi, inviting the latter to the country of the Slavs of the Ilmen, which was a land of plenty, but devoid of order and of justice. Russian historians do not agree upon the ethnological relations of these peoples from among Justinian. Some, according to some authorities, were Scandinavians, and according to others, Slavs; while yet others regard them as adventurers made up of both of these races; more frequently however they are recognized as Normans. Be that as it may, the Vareghes accepted the invitation to establish themselves in the country of the Slavs of the Ilmen, and opened the era of the national history of Russia—of the Russia of the heroic period; and the region of Kief, according to ancient chronicles, received the name of Russa.

The first to establish themselves in the territory of the Russian tribes were the three Vareghan brothers, Rurik, Sineus, and Truvor, who came with their druzhine, or bands of warriors. Rurik pitched his tent on the shores of Lake Ladoga; Sineus on the shores of the White Sea; while Truvor established himself at Izborsk. After the deaths of Sineus and Truvor, Rurik took up his abode at Novgorod, where he died in a castle. Two other Vareghians, Askold and Dir, installed themselves at Kief, and reigned over the Polians; with their fleets of small vessels, they crossed the Bosphorus and attacked Constantinople, which city, according to the Byzantine chroniclers, owed its safety on this occasion to the intervention of Our Lady of the Blachernae. Rurik was succeeded by Oleg, who treacherously murdered Askold and Dir, made himself master of Kief, to which he gave the name of Mother of Russian Cities, collected a great fleet in 906 to attack Byzantium, and died in the height of his glory, leaving the kingdom to a son of Rurik, Igor. The latter turned his arms unsuccessfully against Byzantium, and died the victim of a barbarous assassination at the hands of the Drevlians in 945. The widow of Igor, Queen Olga, assumed the regency in the minority of her son Sviatoslaff, and cruelly punished the Drevlians and the Dnieper.
Kieff. His reign was long and glorious. He inflicted terrible defeats upon the Petcheneghi, the Lithuanians, and the Finnish tribes, but sought in vain to take Constantinople. His far-sighted policy led him to seek intermarriages with the Kings of Poland, Norway, France, and Hungary. Kieff (adorned with the title of Grand Duke of St. Sophia) became the artistic and intellectual centre of Russia.

From 1054, however, the political conditions of Russia went from bad to worse, and the want of political unity remained a constant cause of internal weakness. In less than two centuries, according to Pogodin, there were sixty-four wars with their attendant civililities, 293 princes, and 83 civil wars, to which must be added the continual incursions of the barbarians. The history of Russia during this period is a mass of discordant notices. The chief principalities of that time were Smolensk, Tcherningoff, Northern Novgorod, Ryasan, Murum, Tver, Suzdal, Rostoff, Vladimir, Yaroslaff, Pereiaslaff-Zaleski, Volynhia, Galicar, and others; and these states, upon the death of each of their respective princes, were subdivided into new fiefs. Yaroslaff was succeeded upon the throne of Kieff by his son Isiaslaff, who died in 1075. The son of Isiaslaff, Sviatopolk, reigning from 1075 to 1113, was the chief of the question of the succession to the Principalities of Tcherningoff and Volynhia brought the horrors of civil war upon Russia. Sviatopolk was succeeded by the prudent Vladimir Monomacous (1113-25), who obtained important victories over the Polovcy, Petcheneghi, and Tcherkeressi. When he died he left as his testament to his sons an instruction, which is to some extent an autobiography, and which contains wise advice for government. His sons and grandsons, however, did not profit by it, for their rivalry contributed to the decadence of Kieff, which in 1147-50 passed to Vladimir and Suzdal, commanded by Mtsiaslav, son of Andrew Bogoljubski. The city was sacked and its churches profaned. In 1203 it was again sacked by the Polovcy, and Kieff ceased to be the political centre of Russia.

After the fall of Kieff, the Principalities of Suzdal, Galicar, Yaroslaff, and Pakof had a rapid but ephemeral development. The most famous of the princes of Suzdal was Andrew Bogoljubski (1157-74), who owed his fame to his ambition, his military enterprises, his love for the fine arts, and his attachment to the Orthodox Church. The city of Vladimir overran the Amfipolis and the Arzamas, and the Arzamas that was in the front rank of the cities of Russia from an archaeological standpoint. Autocracy found in him its staunchest supporter, which, however, cost him his life, for he was assassinated by the boyars at Bogoljubovo, where he had built a monastery. His death was followed by turbulence, caused by the rivalry of the cities of Rostoff, Suzdal, and Vladimir, the last of which was victorious, and developed its power still more under Prince Vevyolod (1178-1212). Further wars of succession led in 1215 to the terrible battle of Lipetek, in which the troops of Novgorod, Pakof, and Smolensk massacred the army of Suzdal and Murum. Their prince, George II, at the death of his brother Constantine, Prince of Vladimir, fought furiously against the Bulgarians of the Volga, and in 1220, at the confluence of the Oka with the Volga, laid the foundation of Niamni-

In Galicar, Romano, Prince of Volynhia (1188-1205), assisted by the Poles, established himself at Galitch, became famous through his cruelty and his military enterprises, and died in battle against the Poles. He was succeeded by his son Daniel (1205-1226), who, as prince and prince-knyaz, showed the Germans to enter his dominions, and thereby greatly promoted industry and commerce. During this period the free cities of Novgorod, Pakof, and Vyatka, like the Italian republics of the Middle Ages, reached a high degree of splendour, and of economic and artistic development; but, torn by internal dissensions, their power waned, while the power of the German military order of the Brothers of the Militia of St. Maria of the Teutonic Order increased; these two orders were formed into a single society in 1237, and subjected the Letts, the Livonians, and the Finns to their influence.

B. Russia under the Tatara.—After uniting all the Tartar tribes under his son-in-law, Joseph II, (1154-1227) extended his conquest to China, Turkistan, Great Bokhara, and the plains of Western Asia as far as the Crimea; and his successors, continuing the advance, with their horsemen crossed the steppes of Southern Russia, and reached the frontiers of the Polovcy; these turned to the Russian princes for assistance. The latter responded to that appeal, and met the Asiatic horsemen (1224) at the Kalka, a rivulet that flows into the Sea of Azoff. The prince Mtsiaslav the Rash, Daniel of Galitch, and Olek of Kurk performed prodigies of valor at the head of their troops; but the numerical superiority of the Tartars of the Bokharian frontier fell heavy upon the Russians, costing them the lives of six princes and seventy boyars. In 1237, led by Baty, the Tatara returned to Russia, burnt and destroyed the capital of the Bulgarians in the region of the Volga, and assailed Ryasan, whose prince opposed a desperate resistance, without however being able to save the city from pillage and ruin. Having secured the possession of Ryasan, the Tatara invaded the Principality of Suzdal (1238), and burned Suzdal, Rostoff, Yaroslaff, and many other cities and villages. The Prince of Suzdal, George II, died on the battlefield. In 1238-40 the Tatara undertook their devastations through Southern Russia, took Pereiaslaff, Tcherningoff, and Kieff, sowed death and ruin broadcast, and entered Volynhia and Galicar. Novgorod alone escaping the fate of the other Russian cities. In the region of the lower course of the Volga, Baty established his residence (Soros, the castle), which became the capital of a great Tataar empire, called the Kingdom of the Golden Horde, extending from the Urals and the Caspian Sea to the mouth of the Danube. About 1272 the Tatara of Russia embraced Mohammedanism, became its fanatical preachers, and, on this account refrained from marching with the Russian princes. George II his dominions, devastated and pillaged, were inherited by Yaroslaff (1238-46), who was forced to traverse the whole of Russia and Asia to pay homage to the Grand Khan of the Tatara, Oktai. He died of want in the desert, and was succeeded by his son Alexander Nevski, whose name is famous in the national history of Russia on account of his victories over the Teutonic Knights, the Swedes, and the Finns (1246-52).

Following a policy of toleration the very opposite of the Turkic policy towards Christian peoples, the Tatara respected the dynasties and the political institutions of the Russian principalities. Suzdal, Galicar, Volynhia, Tcherningoff, Polotak, and Novgorod continued to live and to govern themselves as in the past. The Russians were not tatarized, chiefly because differences of religion raised insuperable barriers between them. The khans of the Golden Horde limited themselves to requiring the external homage of the Russian princes, to acting as arbiters in their quarrels, to imposing a poll-tax, to exacting a military contingent, to reserving the right of investiture over them, and to forbidding them to carry arms without permission. This subjection of the Russians to the Tatara exercised a great influence on Russia. For
several centuries the Russians had no contact with Western civilization, and were subjected more directly to the weakening influence of the Byzantine civilization. In their military, economic, and political organization the Russians adopted a great many Tatar institutions. The autocratic government of the Tatars, theocracy, and theocracy of the Russian princes, which was derived from Byzantium. The Orthodox Russian Church grew in power under the rule of the Tatars, on account of the privileges and exemptions accorded to it. Monasteries were multiplied throughout Russia, and through the donation of land to acquired enormous riches. On the other hand, there are Russian writers who believe that they discern Tatar influence in the condition of the women in Russia.

Besides the Tatars, in the thirteenth and fourteenth centuries the Russians had to struggle in the western provinces against the aggressive ambition of the Lithuanians, the political union of which people had been established by Prince Mindaugas, assassinated in 1263. The territorial expansion of the Lithuanians reached its culmination under Prince Gediminas (1315-40), who extended his conquests to Southern Russia, and subjected to his rule Grodno, Pinsk, Brest, Polotsk, Tver, and finally Kiev, which had entirely lost its prestige. At his death, his son Olgerd (1345-77) led his victorious armies into the territory of Novgorod, adding to his father's conquests Vitebsk, Mohilev, Vitebsk, northern Novgorod, Kamenets, Podolia, and Podolia, and reached the shores of the Black Sea. He would have established his power at Moscow also, if the Teutonic Knights and the Poles had not opposed his ambitious projects. His successor Jagellon (1377-1434) married Hedwig, Queen of Poland, converted the Lithuanians to Catholicism, and established his capital at Cracow. But the conversion of the Lithuanians dispelled the obstinate pagans and the members of the Orthodox Church, and these two united under the flag of Vitovt (1392-1430), upon whom Jagellon was obliged to confer the title of Grand Prince of Lithuania. Vitovt, like his predecessors, continued his conquests in Russia, and took and pillaged Smolensk. He also conceived the design of bringing the Tatar domination to an end, and in 1399 at the head of an enormous army of Lithuanians, Poles, and Russians, he gave battle to the Tatars, who routed him completely. Vitovt, however, was not disheartened. In 1410 with a large army of Poles and Lithuanians, to which 40,000 Tatars and 20,000 mercenaries were added, he assailed the army of the Teutonic Knights at Tannenberg, and, notwithstanding their desperate efforts, destroyed their power, while they left the flower of their order on the battlefield.

C. The Principality and the Grand Princes of Moscow.

The growth of Moscow appears for the first time in Russian chronicles in 1147. Its founder is said to have been Prince George Dolgoruki, who raised it from a humble village to a city that was destined to become the heart of the great Russian empire. In 1237 it was burned by the Tatars; but having recovered, again under Prince George Danilovich (1303-26), it began its political development. The means adopted for their aggrandizement are certainly not creditable to the princes of Moscow, who, according to Rambaud, used intrigue, corruption, the purchase of consciences, servility towards the Tatars, assassination, and delation. George Danilovitch used the Tatars to destroy the power of the princes of Tver. He was assassinated in 1325 by Prince Demetrius of Tver, and was succeeded by Ivan Kalita, who turned his efforts to transforming Moscow into the metropolis of Russia; he built the Cathedral of the Assumption (Uspenski Sabor) within the enclosure of the Kremlin; and he destroyed the power of the princely dynasty of Tver. His two sons, Simon the Superb (1340-55) and Ivan the Wise (1353-59), continued the policy of their father, the former holding the Russian princes in submission, and taking the title of Grand Prince of all the Russians; and the latter showing himself gentle towards his rivals and towards the Lithuanians when they attempted to encroach upon his rights; he was supported by faithful and intelligent men, among them the metropolitan Alexis, who preserved the throne for Demetrius Ivanovitch, son of Ivan. Demetrius Ivanovitch made the first decisive step towards liberating Russia from the Tatar yoke, by starting on war with the princes of Suzdal, of Tver, and of Ryazan, he crossed the Don, with a large army and the contingents of many Russian princes subject to him, and on the plains of Kulikovo inflicted a bloody defeat upon Mamai, Khan of the Golden Horde, who had led against the Russians an immense multitude of Tatars, Turks, Polovets, etc. His victory won him the epithet of Donokoi, but his success was not lasting, for the Tatars, assisted by Tokhtamish, one of the generals of Timur, laid waste Moscow, Vladimir, Moschaisk, and Yurieff.

At the death of Demetrius, the Grand Principality of Moscow and Vladimir was inherited by Vassili-Dmitrievitch (1389-1425), was extirpated by new conquests in the territory of Tver, Smolensk, Vytka, and Novgorod, and thereafter consolidated more and more its supremacy over the Tatars, whose empire was wasting away in consequence of internal quarrels. During the reign of his successor, Vassili the Blind (1425-62), a civil war that lasted twenty years desolated the Grand Principality of Moscow, the political development of which was thereby arrested. Nevertheless Muscovite supremacy was established over Novgorod and Ryazan. From 1449 Vassili had associated with himself in the government his son Ivan, who was destined to acquire the epithets of the Great and Consolidator of Russia. Ivan the Great (1462-1505) founded the territory that he inherited at the death of his father surrounded by the Tatar conquests, the Lithuanian Empire, and Sweden. Among the first events of his reign should be mentioned the complete submission of Novgorod to his power, and the free city retained only the name of republic; in 1495 Ivan destroyed its commerce also, and reduced it to the status of a city of his dominions. At the same time Russian armies were penetrating the north of Russia, conquering the Province of Perm and the city of Vytka, marching to the shores of the Pechora, and reaching the coast of the White Sea. The Principality of Tver was annexed to that of Moscow; as
were also the cities of Bielozerk, Dmitrov, Mohaisk, and Serpukho. The political unity of Russia was being consolidated in proportion as the Tatar empire of the Golden Horde crumbled. In 1480 two great armies of Russians and Tatars almost decided the fate of Russia in open battle. In 1487 the troops of Moscow entered the Tatar city of Kazan, and took its prince, a prisoner, to Moscow. Kazan, however, did not become Russian territory, for Ivan the Great feared that a general uprising of the Musulman Tatars would follow if he annexed it.

From 1492 Ivan turned his arms against Lithuania. The Lithuanians were supported by the Poles, the Tatars, and Tatars. Many princes among the vassals of the Grand Prince of Lithuania passed to the side of the Muscovites. The war was prolonged for many years, until a truce was brought about by the mediation of Pope Alexander VI and the King of Hungary in 1503. The most important event of the reign of Ivan the Great was his marriage to Sophia Paleologus, daughter of Thomas Paleologus, a brother of the last Emperor of Byzantium. This marriage was concluded by Paul II and Cardinal Bessarion, and served as the pretext for the tsars to declare themselves heirs of the Byzantine banner, to take up their arms and to assume the rôle of defenders and champions of the Orthodox Church. With Sophia Paleologus there went to Moscow the surviving representatives of Byzantine culture, and some Italian artists, among whom were the famous architects Aristotele Fioravanti and Pietro Antonio. Ivan the Great then entered into relations with Venice. Through the Princess Sophia, Humanism and the Renaissance flourished for a period at the court of Moscow.

Under Basil Ivanovitch (1505-33), Muscovite Russia grew by the annexation of the Republic of Pakot, the Principalities of Ryasan and Novgorod-Seversk, and the Territory of Smolensk. The political prestige of Russia increased in Europe, and Basil Ivanovitch had diplomatic relations with the pope, France, Austria, Sweden, Turkey, and Egypt. The court of Moscow displayed Asiatic luxury in its feasts. The Tatars, who had again invaded Russia, and had reached the wails of Moscow, were met by new campaigns against Kasan (1523 and 1524), which, however, were not successful. In 1533 Ivan IV, a son of Basil, ascended the throne. Posterty has given to him the name of Terrible on account of his cruelty, also much noted for his love of treasure. Slutsk and Zabielin have sought to clear his memory and to proclaim his great services to Russia. After freeing himself from the tutelage of the boyars, who longed it according to their pleasure, in 1547 as heir of the House of Paleologus he caused himself to be crowned at Moscow as Tsar of all the Russians, conquered Kasan (1552), and Astrakhan (1556), subjugated the Tchermis, Mordv, Tchuvash, Votic, Bashkiri, and Nogais; he fought with varied fortunes against the Teutonic Order in Livonia and against the Poles, and through the daring exploits of Gregory Strogonoff and of the Cossack Irmak Timotheevitch he conquered Siberia. He had the misfortune of seeing his capital burned by the Tatar Khan Devlet Ghirei, and of killing his eldest son Ivan in one of his violent excesses of rage. He died in 1584 and was succeeded by his son Fedor (1584-98), who was born the son of Ivan and Anastasia Romanoff. He married Irene, sister of Boris Godunoff, who coveted the throne and was true tsar in the reign of Fedor. The young prince Demetrius, son of the seventh wife of Ivan the Terrible, was relegated to the city of Uglic. To the advice of Boris Godunoff also were due the two important measures of this reign, the institution of serfdom, and of the patriarchate.

To satisfy his thirst for power, Godunoff had the young brother of Fedor, the Tsarevitch Demetrius, and his relations put to death, and made the city of Uglic pay for having given them hospitality. At the death of Fedor, Boris Godunoff, whose name was to be immortalized by the beautiful tragedy of Pushkin, placed the crown of the tsars upon his own head. He worked to introduce western civilization into Moscow, where he died in 1605. He wished to bestow his son, Fedor Borisovitch; in 1603 however a man, whose identity is still shrouded in mystery, had presented himself to the court and to the Polish nobility as the son of Ivan the Terrible, the young Demetrius whom Boris Godunoff had attempted to murder, but who had been rescued by the Polish nobility. Demetrius, known to posternity as Pseudo-Demetrius, succeeded in entering Moscow, where Fedor Borisovitch and his mother paid with their lives for the short reign of Boris Godunoff. But a year later Demetrius died, the victim of a conspiracy, at the head of which was Prince Vasili Shuiski, who then ascended the throne of the tsars.

Russia then entered upon a period of troubles (emunov oremia) that nearly brought about its political dissolution. New false Demetriuses appeared. The serfs and the peasants, led by Bolotnikoff, menaced Moscow. The nobles rallied to Vasili from the throne. The Poles fomented troubles, and sought to establish their supremacy at Moscow. A Polish army under the orders of the wayne John Sapieha and of Lissowski for sixteen months besieged the shrine of the Holy Trinity and St. Sergius, forty miles from Moscow. But the monks defended themselves so resolutely that they compelled the enemy to raise the siege. Tsar Vasili Shuiski called the Swedes to his assistance, but the King of Poland, Sigismund III, casting aside all pretence, entered upon the conquest of Russia. The inhabitants of Moscow revolted, and compelled Shuiski to abdicate (1610). Menaced from many quarters, the election of the new son of Sigismund, to be their tsar, on condition that he would adopt the Orthodox religion. The Polish troops, commanded by the hetman Tolkiewski, entered Moscow. But soon a popular revolt that cost thousands of lives obliged the Polish army to shut the country and to turn to the capital. The election of Sigismund was victorious: Smolenek, after a heroic defence, fell into his hands, and the Tsar Vasili Shuiski died at Warsaw. Russia seemed destined to disappear as a political entity. The people, however, saved her: a butcher of Nishni-Novgorod instigated his fellows to arms, and they, knowing their history, went from their country from the foreigner; and the Russian monks and bishops were ardent supporters of this struggle for the defence of Russian orthodoxy and of the power of the tsars. A Russian army was formed at Yaroslav, and under the command of Prince Demetrius Poxharski marched against Moscow, where the Polish troops, decimated by hunger, capitulated at the moment when Sigismund was drawing near with an army to assist them (1612). A great national assembly convened at Moscow, and elected Michael Romanoff tsar. He was a son of the metropolitan Filaret, who was held a prisoner at Marienburg by the Poles.

Under the new tsar (1613-45), Russia strove to heal its wounds. With Sweden in 1617 the peace of Stolbovo was concluded; but the Poles continued their hostilities, and Vladislav was ready to march on Moscow. In 1618 however a truce was concluded. Filaret then returned to Moscow, and was made counsellor of his son, and was associated with him in the empire. At the death of Sigismund III (1632), Vladislav, having ascended the throne of Poland as Vladislaw IV, took up arms against Russia once more. The war, which was fought with varied fortunes, terminated in the truce of Deulin, by the terms of which Wladislaw recognised Michael Romanoff as
The successor of Michael was Alexis Mikhailovich (1645-76). His first action was directed against Poland, which, by its political and religious persecution of the Orthodox of Little Russia, had lost the good will of the Cossacks and of the lower classes. A Cossack leader, Bogdan Khmelnicki, raised the banner of revolt, and after several battles the tear also took up arms in 1654. The Russian armies marched upon the Dnieper, but re-established Polish rule in Lithuania. This warfare was made necessary by the Cossacks, who were unwilling to submit to authority, menaced the interior tranquility of Russia. One of them, Stenko Rasin, put himself at the head of a large band of Cossacks of the Don, passed to the region of the Volga, caused peasants, Tatars, Tchiuvashi, Mordvian, and Tcheremis to revolt, and desolated eastern Russia. His hordes were routed by George Baratinski near Simbirak, and he was decapitated at Moscow in 1670. Under the Tsar Feodor Alexievich (1672-82) the Ukraine and the territory of the Zaporogian Cossacks definitely became Russian possessions, by the treaty of 1681 with Turkey.

**D. Reform of Peter the Great.—Modern Russia and its foreign relations as a European state really begin with Peter the Great. Without him Russia would probably have remained an Asiatic power. Peter I the Great was the son of Alexis Mikhailovitch and his second wife Natalia Naryshkin. He was proclaimed tsar at the age of nine years, and his youth was threatened by the grave perils. The ambitious Sophia, daughter of Alexis Mikhailovitch and his first wife, Maria Mikeslavska, taking advantage of the minority of Peter, succeeded, by intrigue and cunning beyond her age, in holding the regency of the empire for seven years (1682-89), until she was driven from the throne and locked up in the Devisi monastery, while her favourites and partisans died on the scaffold or in exile. Sole and absolute sovereign, Peter the Great wished to begin his reign with some great victory. Accordingly, he rapidly built a fleet, with which he compelled the capitulation of Azof in 1696. This episode gave him the title "savior of the sea." In 1697 he undertook a journey to Western Europe, where he visited Holland, England, and Austria, becoming a mechanic, visiting industrial establishments, and taking workmen and engineers into his employ, while at the same time he busied himself with politics. This voyage of Peter the Great had disastrous effects upon internal order in Russia, for the clergy and the lower classes, with superstitious terror, believed that it would establish foreign influence in Russia, that is to say, would destroy the ancient religious customs of the land. The lower classes considered it sacrilegious to shave off the beard, just as the race, who were very numerous in Russia, regarded it as a crime to use tobacco. Both of these customs Peter the Great had brought to Russia; reports were spread that he was not of royal birth, but was the child of adultery, and that he was the Antichrist who was to be born in those times. Peter the Great returned to Moscow, and quenched the revolution in blood, causing a thousand people to be put to death amid tortures in a single week, and not hesitating to wield the axe himself to decapitate rebels. Two other military revolts, that of the Don Cossacks (1708) and the Cossacks of the Ukraine, which was brought about by the hetman Masepys, who defected to Charles XII of Sweden, were crushed by Peter's generals.

The conquest of the Baltic led Peter the Great to make war on Sweden. The Russian troops were defeated in 1700 under the walls of Narva; but in 1701 Prince Seremestein inflicted a severe defeat upon the Swedish general Spenfich, near Ehresper, and a more severe one in 1702 near Hopenesdorf, after which he took the fortress of Nienstucken, which the Swedes had built at the mouth of the Neva. Narva fell into the hands of Peter the Great in 1704. In 1708 Charles XII of Sweden invaded Russia at the head of an army of 43,000 veterans, and took the way to Moscow through Lithuania; but a most severe winter and the want of provisions decimated his troops. On 8 July, 1709, under the walls of Parnawa, 60,000 men attacked the Swedes, who were reduced to extremes by hunger and sickness. Both sides fought heroically, but the Swedish army was destroyed and Charles XII was compelled to seek refuge in Turkey. By this victory, which has remained famous in military history, Russia raised her flag on the shores of the Baltic, while Sweden fell from the rank of a great European power.

Crowned with the halo of victory, Peter the Great displayed greater energy in his purpose to combine Western civilisation with the ancient Russian life, preserving however those Russian customs that seemed to him to be useful to his empire. For example, the servitude of the agricultural classes was sanctioned by laws, and all the peasants were bound to fixed residence and to per capita taxation. The inhabitants of the cities were divided into guilds, according to trades or professions; foreigners were authorised to carry on commerce and to devote themselves to industry in Russia; women were taken from their isolation and from the retirement of the terem; he instituted the directing senate to take the place of the ancient duma of the boyars; the provincial administration was reorganized; many abuses of the bureaucracy were rooted out; the army received a European organization, and was increased to 210,000 men; the ancient organisation of the Russian Church was destroyed by the institution of the Holy Synod; religious tolerance was established; commerce and industry were developed; a great number of schools and printing-houses were founded; and at the mouth of the Neva he built his capital, St. Petersburg, the "window opened towards the West"; the head of Russia, as Moscow is its heart. And in order to reduce so many reforms to practice in the face of the hostility, sometimes open, sometimes covert, of his subjects, Peter the Great used all the resources of his iron will, all the forms that autocracy placed in his hands, not excluding violence and cruelty.

The work of these reforms did not take the mind of the great reformer from his military enterprises. In 1711 he crossed the Dnieper at the head of 30,000 men, bent on the conquest of Constantinople; in 1714 an army of 200,000 Turks and Tatars on the banks of the Pruth compelled him to abandon his ambitious dream and to restore Azof to Turkey. In 1713 the Russian fleet, under the direction of Admiral Aprxin and of Peter the Great himself, took possession of Helingsor and Abo in Finland, and drew near to Stockholm. After a few years the expedition from the west was renewed in 1719 and continued until the peace of Nystad put an end to it in 1721, securing to Russia the possession of Livonia, Esthonia, Ingmanland, a part of Finland, and a part of Karelia. In the following year Russian troops marched to the frontier of Persia, invaded Daghestan, Chiyan, and Masandaran, and took possession of Derbent.

But the military and political successes of Peter the Great were embittered by domestic tragedies. His first wife, Eudocia Lapukhina, was opposed to the reforms, and was therefore suspected to be in league with Charles XII in the Pokrovo monastery at Suzdal. The son of Eudocia, Alexis, held to his mother's ideas, and hated his father's reforms. He left Russia while Peter the Great was travelling in the West, and sought refuge at Vienna and Naples. Having been discovered, he returned to St. Petersburgh, where his father subjected
him to torture, and thereby discovered that Alexis and his mother were the soul of a conspiracy to destroy Peter's work. Eudocia was beaten with rods; the consorts of the princesses died of grief and the most dreadful sufferings; and Alexis himself, having been subjected to torture several times, died in consequence, or was executed, in 1718. By his ukase in 1723, Peter the Great declared Catherine empress. She was a native of Livonia who, after being the mistress of Sherevsky (Poltekh, Viskok, Orlovich, Meshikoffs, and Golovchik, and, with 1,500,000 inhabitants, Austria received eastern Galicia and Ruthenia (or Red Russia), with 2,500,000 inhabitants; and Prussia received the provinces of western Prussia (except Thorn and Danzig), with 900,000 inhabitants.

To these victories and conquests Catherine added her efforts to give to Russia good internal government: she established a commission, a species of national representation of the different peoples of Russia, to frame a new code of laws (1766–68); she suppressed the revolt of Emilius Pugatchev, a Raskolnik Cossack, who, pretending to be Peter III., escaped from his supporters, and murdered the Tsar; she reorganized the administration of justice, and reformed the procedure in the courts; she reformed the police, and abolished the flogging of the serfs and the serfs. She suppressed the revolt of the Cossacks and massacred many nobles (1775); by a ukase in 1775 she divided Russia into fifty governments, and the governments into districts; she reorganized the administration of justice, and reformed the procedure in the courts; she reformed the police, and abolished the flogging of the serfs.

Thevenues of Catherine I (1725–27) and of Peter II. Alexeevitch, son of Alexis and Charlotte of Brunswick, offered nothing of interest, except the struggle for political influence between the Mensikoffs and the Dolgorukis. At the death of Peter II., Anna Ivanovna, Duchess of Courland, became Empress of Russia, and an attempt was made from her ambitious court to limit the autocratic power of the lives of its authors, among whom were several of the Dolgorukis. The empress surrounded herself with Germans; and among them, a Courlander of low extraction, named Biren, became very influential. On his suggestion Anna established Ivanovna a Skeptical Emperatress and received a letter from the Empress of Bironowskathina. Very many nobles paid with their lives for the antipathy they felt towards the new regime, and measures of public finance reduced the peasants to extreme poverty, while Anna indulged in unheard-of luxury, and her court distinguished itself for its immorality and dissipation. At the death of Anna in 1740 the regency passed to Anna Leopoldovna of Mecklenburg, who continued the German regime and gave to Elizabeth, daughter of Peter the Great, timely occasion to drive her from the throne and to imprison her with her husband and her children at Kholmogory, while Elizabeth proclaimed herself Empress of all the Russians. Elizabeth Petrovna (1756–1762), notwithstanding her dissolve habits, continued the traditions of her father: the senate was re-established; industry was developed; great impulse was given to commerce; the severity of corporal punishment was mitigated; the University of Moscow was established; Peterburg was adorned with splendid buildings designed by the Italian architect Rastrelli; the Academy of Sciences, founded by Peter the Great and Catherine I., began its period of fruitful literary work; while the Russian armies conquered southern Finland and weakened the power of Prussia, which suffered the disasters of Grossgorendorf (1757) and Kunkerdorf (1759). In 1760 the armies of Elizabeth made their triumphal entrance into Berlin.

Elizabeth was succeeded by Peter III., a son of Anna Petrovna and Charles Frederick, Duke of Holstein. His reign was a political farce. The Princess Sophia of Anhalt-Zerbst, who became celebrated under the name of Catherine II., compelled him to abdicate, leaving her to reign alone in 1762. The first great events of her government were the war with the Turks and the partition of Poland. Against the Turks, Catherine sent Prince Gallitzin, who in 1769 near Chotów defeated a Turkish army three times larger than his own. In the following year (1770), Rumiantzeff obtained a still more decisive victory at Kagul, where with 17,000 Russians he defeated a Turkish army of 150,000 men. In 1771 Prince Dolgorukii took possession of the whole of the Crimea, from which the Turks had been expelled. At the same time the Russian Baltic fleet annihilated the Turkish fleet in the roads of Chios and in the port of Tchermes. Hostilities were resumed in 1772, and culminated in the treaty of Kutchuk-Kainardji (1774), by which the independence of the Tatars of the Crimea was recognized, while Assof, Kinburn, and the strongholds of the peninsula were ceded to Russia, which received a population of 3,000,000. The treaty on 15 Jan., 1772, between Russia and Prussia sanctioned the iniquitous division of Poland, which was desired by Frederick II. and was fastened by the policy of the Polish nobility and, to a great extent, of the clergy. By this division Russia added to her dominions White Russia (Polat, Viskóč, Orlovich, Meshikoff, and, with 1,500,000 inhabitants, Austria received eastern Galicia and Ruthenia (or Red Russia), with 2,500,000 inhabitants; and Prussia received the provinces of western Prussia (except Thorn and Danzig), with 900,000 inhabitants.

Under Catherine II. there took place the third Partition of Poland, which the 'heroism of Kosciusko was not able to avert. By this partition Russia added Volhynia, Podolia, Little Russia, and the remainder of Lithuanian to her empire (1793). Catherine died 17 Nov., 1796, at the age of 67 years. Thanks to her policy and to the victories of her generals she had greatly increased the territory of Russia, extending its frontiers to the Niemen, the Dnieper, and the Black Sea. Paul I. (1796–1801) at first followed a policy of peace; he introduced wise economic reforms, and re-established the principle of succession to the throne in the male line. But the French Revolution compelled him to enter an alliance with Turkey, England, and Austria against France. The Russian troops, under the orders of Rimsky-Korsakoff, entered Switzerland, and under Suvoroff they marched into upper Italy. The campaign was not a successful one for the Russians, but their retreat under Suvoroff through the Alps, where they were shut in by the French armies (1799), has remains famous. Paul I. was assassinated by a palace conspiracy on the night of 22–23 June, 1801, and Alexander I. (1801–25) ascended the throne. The new emperor took part in the epic struggle of Europe against Napoleon. On 2 Dec., 1805, was fought the battle of Austerlitz, which cost Russia the flower of her army and very nearly the life of Alexander him-
self. On 6 Feb., 1807, at Eylau, the Russian troops under Benniger, after a bloody battle in which they lost 26,000 men killed and wounded, were compelled to retreat. On 25 April, 1807, Russia and Prussia signed the convention of Bartenstein, by which those two powers became allied against France; and on 14 June of the same year the decisive defeat of Benniger at Friedland led Alexander to conclude with Napoleon the treaty of Tilsit, which was ratified 12 Oct., 1808, at Erfurt. At peace with France, Russia turned her arms against Turkey, whose armies were defeated at Batyina by Kameski (1810), and at Slobodskaja by Kutusoff (1811). The congress of Berlin (1812) disposed of the possession of Bessarabia. At the same time Russia was at war with Persia.

The Polish question and the Russian national sentiment, which was excited to a high degree against the French, brought about the great war between Russia and France, a war that led to the ruin of the Napoleonic empire. The French army, consisting of 600,000 men of the various European nationalities, crossed the Russian frontiers, entered Vilna, and on 18 Aug., 1812, fought the Russians in a bloody battle at Smolensk. The battle of Borodino was fought on 7 Sept., the cost of the Russian army being 50,000 men, and the French lost 30,000. On 14 Sept. Napoleon entered Moscow to the sound of the Marseillaise. The city was set on fire. On the other hand an exceptionally severe winter set in. After a stay of thirty-five days at Moscow, Napoleon began the retreat, during which he was obliged to defend himself, not only against the regular Russian troops, but also against the Cossacks and the peasants in search of booty. Between 26 and 29 Nov., on the right bank of the Beresina, near Studienka, 40,000 men of the Grand Army held 140,000 Russians in check, and with Napoleon succeeded in making a safe retreat. On 30 Dec., after having found many supplies at the Niemen with the remnant of the army. The Grand Army of Napoleon had left 330,000 men killed and wounded in Russia. Russia had repelled the invader from her soil, and on 28 Feb., 1813, allied herself to Prussia by the Treaty of Kalisch.

The military genius of Napoleon and his victories were unable to save his throne. On 31 March, 1814, Alexander I and the allied armies entered Paris. The Congress of Vienna (1815) placed the Kingdom of Poland again under the sceptre of the Tsars, and withdrew that unhappy nation from the number of the nations. Its attitude to Russia is a great question to the Tsar, who has also organised Finland as an independent grand duchy. That prince had a mind that was open to Liberal ideas, which found a convinced promoter in the minister Speransky (1806–12); but the intrigues of Speransky's enemies undermined the influence that he exercised with the Tsar, and his place was taken by Arakcheeff, a man whose name in Russia is synonymous with blind reaction and ferocity. The reformist policy of Speransky ceased, and measures of the severest intolerance were adopted in politics, and even in the ecclesiastical court. Alexander I was becoming more and more of a mystic, as he death occurred him at Taganrog on 1 Dec., 1825. The popular imagination transformed him into a legendary hero, into a sovereign who, to expiate his faults, adopted the garb of a Mussulman, and lived and died unknown among his most humble subjects.

Alexander I succeeded on 24 Dec., 1825, by Nicholas I, third son of Paul I. The beginning of his reign was marked by a revolution that broke out in December, and brought to its authors the name of Dekabristi or Decembrists. The most cultured and eminent men of Russia were engaged in this conspiracy, among them Peter Ilyich Tchaikovsky, Apostol, and Bestuzheff-Riumin, who sought to establish a constitutional regime. Nicholas was most severe. The Decembrists ended their lives in Siberia or on the scaffold. They are regarded as the most illustrious martyrs of liberty in Russia. In his domestic policy Nicholas I continued the work of his predecessors with regard to the codification of the Russian laws. In 1830 there appeared the "Complete Collection of Russian Laws." In 1838 the "Collection of Laws in Force," and in 1845 the penal code. The work of canal-making was continued, and the first railways in Russia were built; but every literary or political manifestation of Liberal ideas found in Nicholas I a fierce and inexorable adversary.

In his foreign policy Nicholas continued the war with Persia, which by the treaty of 22 Feb., 1828, was compelled to cede the Provinces of Erivan and Nakhichevan, to pay a war indemnity, and to grant commercial concessions. The Russian fleet, together with the French and the English fleets, took part in the Battle of Navarino (20 Oct., 1827), in which the Turkish fleet was destroyed, and by which the independence of Greece was established. Russia continued the war against Turkey in 1828 and 1829, until the Treaty of Adrianople (1829) secured to Russia the gains which she had won. The acquisition of Turkish territory and commercial advantages. After a series of military expeditions, the Khan of Khiva finally became a vassal of the tsar (1854). The Polish insurrection of 1830, which was desired by the people rather than by the cultured and leading classes, put Poland and Lithuania at the mercy of fire and sword in 1830 and 1831, and cost Poland her autonomy, brought on her the policy of russianisation, and led to the exile of thousands of victims to Siberia. Austria and Germany gave to Russia their moral support in her severe repression of the Polish revolution, which on the other hand had found many sympathizers in Germany. Nicholas I was the most determined enemy of the European revolution of 1848. In 1849 the Russian army suppressed the Hungarian revolution, and saved the throne of Francis Joseph. In 1853 the question of the Holy Places, the antagonism of France and Russia in the East, and the ambition of Nicholas for a Russian protectorate over all the Orthodox states of the Balkans brought about the war between Russia and Turkey, and in 1854 the Crimean War. Turkey, England, and France, and later Piedmont allied themselves against Russia. The allied fleets were harassed by the Russian batteries, and in 1855 the allied armies invaded the Crimea, where on 20 Sept. the battle of Alma opened to them the way to Sebastopol. The Russians had prepared to make a desperate defence of that city, under one of the most daring and talented generals of the Russian army, Tchiblen. But the fortunes of the Crimean campaign now appeared disastrous for Russia. Nicholas I was heartbroken by it, and unable to withstand the blow that it dealt to his pride, he died of a broken heart 3 March, 1855, while the star of Russian power in the East was waning.

The first care of his successor, Alexander II (1855–1881), was to bring the Crimean War to an honourable termination, and to prevent the political and economic ruin of Russia. Sebastopol had fallen on 8 Sept., 1855. The war had cost Russia 250,000 men, and the Government had not funds to continue it. The Congress of Paris, on 25 June, 1856, Russia to accept terms of peace by which all the efforts and sacrifices of Peter I, Catherine II, and Alexander I to establish their power at Constantinople came to naught. The Black Sea was opened to all nations, and Russia was refused the protectorate over Christians in the East. Alexander II understood that, to remedy the evil results of the Crimean War, it was
necessary to establish great social reforms, and to curtail the power and limit the abuses of the bureaucracy. On 19 Feb., 1861, an imperial decree proclaimed the end of the serfdom of the rural classes, and restored to freedom 23,000,000 serfs. Important reforms were introduced into the administration of justice, and of the provincial governments; compulsory punishment was abolished; the censorship of the Press was made less severe; foreigners were granted the same privileges enjoyed by Russians, and the privileges of the universities that Nicholas I had abolished were restored. By all of which Alexander II acquired the good will of the people, who were due to lose the title of Tzar Liberator. Other reforms were intended to mitigate the painful conditions of the Poles, whom the iron hand of Nicholas I had despoiled of their autonomy. But the impudence of the Nationalist parties provoked the new Polish insurrection of 1863, which, notwithstanding the pacific remonstrances of France, Austria, and England, brought its deathblow to Polish free government, cost Poland thousands of victims, and transformed that land into a field open to all the abuses of russianisation. The Polish language was officially replaced by the Russian. Finland on the contrary was confirmed in all its privileges by Alexander II. He was succeeded by his son Alexander III (1881-94). The constitutional projects of Alexander II were entirely abandoned; the counsellors of the sea, and especially Ignatieff and Katkov, bitter enemies of Liberalism, induced the emperor to give to the principle of autocracy his strongest sanction. This reign was marked by the terrible massacres of the Jews in 1881 and 1882; by the disorders of the universities in 1882 and 1887, which led the government to subject the universities to severe supervision; by the rigorous censorship of the Press; by the promulgation of a collection of laws that were intended to compromise the work of the serfdom; to better the economic condition of the rural classes; lastly, by the great economic and military development of Russia. The work of russianisation was continued with activity, even with ferocity. The Caucausus lost its administrative autonomy; cruel and inhumane laws were framed against the Poles; the Jews were reduced to despair and hunger; the German Protestant of the Baltic provinces were treated like the Poles; and the autonomy of Finland lacked little of being destroyed by force.

Alexander III continued with the greatest success the Russian invasion of Asia. Russian territory, notwithstanding the conquest of the provinces of China, and the expense of Afghanistan, China, and Korea; the building of the Trans-Caspian Railway opened to Russia the strategic ways of Persia, Afghanistan, and India; the Trans-Siberian Railway was to endow Russia with an open sea, and to open a way of communication between Moscow and the Pacific Ocean. The influence of Russia in the Balkans waned under Alexander III. The severity of the court of St. Petersburg toward Prince Alexander of Battenberg, and towards the national sentiment of the Bulgarians, and the tenacity with which Stambouloff conducted the campaign against the Russian policy in his country, greatly diminished the gratitude and good will of the Bulgarians towards Russia. The most important event in the foreign relations of Russia during the reign of Alexander III was the understanding with France. Russia at first leaned towards Germany; after the revolutions of 1848 and the Crimean War (1853 and 1856) and the formation of the Triple Alliance, she turned to France; for her friendly relations with this power Russia had also financial reasons, because she needed funds for the construction of her railways, especially the Trans-Siberian; and as the money the French lent to victors of the Crimea and of Algeria, the French had lent her, in the years 1867, 1889, 1890, and 1891, more than 3,000,000,000
france. In 1891 the French fleet, commanded by Admiral Gervais, visited Kronstadt, where the French sailors were received with an enthusiastic welcome. In June, 1893, a commercial treaty created more intimate relations between the two powers.

The successor of Alexander III is Nicholas II, b. 6 May, 1868, and married 14 Nov., 1894, to the daughter of Louis IV, Grand Duke of Hesse, the Empress Alexandra Feodorovna. The reign of Nicholas II has been unfortunate for Russia. He was crowned at Moscow in May, 1896, in the presence of delegates of nearly all the civilized nations of the world, and the head of which was Cardinal Agliardi; and a few days after his coronation, on the occasion of a feast given in his honour, a thousand people were crushed to death by crowding. In 1898 a convention between China and Russia placed Port Arthur under the control of the latter for a space of twenty-five years, granted the right to connect that port with the Trans-Siberian Railway, and secured to the Russians a free way to the Pacific Ocean. By this convention Russia took a preponderant position in the Far East, and already contemplated the conquest of Korea, to be followed by China. In 1899, Russia was granted to the right of way for the prolongation of the Trans-Siberian Railway as far as Mukden. The domestic policy, thanks especially to the inspirations of de Plevéh and of Constantine Pobedonostseff, was one of fierce repression and Russianisation. It was intended to crush the Polish element and to deprive Finland of its autonomy. To carry out this policy, General Bobrikoff was appointed governor of Finland. He fell in 1898 a victim of the exaggerated patriotism of a student. The Jews especially were made objects of legal as well as illegal persecutions, which led to the massacres of Kemel and Kishineff in 1881 and 1881, a renewal of the activities of the terrorists, who in 1901 and 1902 murdered the ministers of public instruction, Bogoljepoff and Sipiagin, and in 1904 de Plevéh.

In 1899 at the initiative of Nicholas II the conference of the Hague was convoked, to consider the question of disarmament and the maintenance of universal peace. How commercial this initiative was, Russia herself soon showed, for in 1904 she broke off diplomatic negotiations with Japan. The Japanese demanded that Russia should evacuate Manchuria and give up her project of conquering Korea. The war was fought entirely by both countries, but the Russians lost Port Arthur, were driven from Korea, and saw their fleet annihilated at Tsushima. Russia could have continued her disastrous war, but the growth of the revolution at home compelled her to consent to the proposals of peace that were made by President Roosevelt of the United States. On 15 Aug., 1905, there was concluded at Portsmouth, New Hampshire, U. S., a peace that was ratified on 1 Oct. of the same year. Meanwhile Russia was in the throes of the revolution. In Jan., 1905, the troops fired upon thousands of workmen who were making a demonstration and the next day several hundreds were killed. In February the Grand Duke Sergei was torn to fragments by a bomb. A man-of-war of the Black Sea fleet mutinied: a military revolt broke out at Viborg. The tsar, to stop the revolutionary flood, in October granted a constitution by an imperial decree in which he proclaimed liberty of conscience, of the press, of association, the right of assembly, the civil privileges of Finland, and promised to alleviate the conditions of the non-Russian subjects of the empire.

On 27 April, 1906, the Duma, which consisted in great part of Liberal members, was opened. It lasted two weeks. The period of non-Russian was opened, nevertheless, the second Duma, which lasted a hundred days, had a revolutionist and socialist majority. The government reformed the electoral laws, and in that way was able to secure the election of a Duma that was more in accord with its wishes, containing among its members forty-two priests and two bishops of the Orthodox Church. Notwithstanding the proclamation of liberty of conscience and of the Press, there was a return to the old methods of repression, the most severe methods of repression to put down revolutionary movements and the feverish banditism of Poland and the Caucasus. Exceptional laws against the Poles and Finns were revived.

From 1907 to 1911 the Russian Government, though constitutional in outward form, had succeeded in strengthening its autocratic regime and to render illusory all its promises of constitutional liberty. During this period, the reins of government were in the strong and energetic hands of Peter Arkadevitch Stolypin, b. at Srednikovo near Moscow, 1862, and governor of Saratoff in 1906. Appointed to the Ministry of the Interior 26 April, 1906, and premier on 8 July, 1906, he applied himself with unshaken purpose to re-establish internal order in Russia. In the beginning he seemed to be animated by Liberal sentiments, but pressure from the court party and on the other hand from the peasants led him to adopt a policy with that faction of the Duma which opposed the constitution as harmful to the solidarity of Russia. In internal politics he sought to limit the powers of the Duma, to maintain in all their vigour the laws against the Jews, to crush the obstinacy of the Finns by transforming the Government of Viborg into a Russian province and impeding in every way the Diet of Helsingfors, to suppress the Polish national movement by limiting the number of Polish deputies in the Zemstvo of western Russia, and by dividing administratively the Province of Chelm from the Kingdom of Poland. In foreign politics Russia has suffered from its defeat in the war with Japan in 1905; and in the Balkans, in 1911, Herzegovina came near precipitating a conflict between Austria and Russia, almost involving all the Slavs of the Balkan states, but Austria's military superiority, in addition to the support of the German Emperor, induced Russian diplomacy to moderate its demands. In the meantime, Russia has been preoccupied in reorganising its own military and naval forces, in efficaciously directing colonizations in Siberia, in penetrating tentatively into Persia, and in agitating its own political propaganda in the Austrian provinces of Galicia and Bukovina. The revolution which raged when in 1905-1907, in 1911, Stolypin, in the Imperial Theatre of Kiev, fell under the dagger of a Jewish lawyer called Bogroff. He exalted declaring that he was always ready to die for the tsar. The tsar selected as his successor Kokovtsoff, an economist of European fame, who entertains the same political ideas as Stolypin and continues his methods of government.

THE RELIGION OF RUSSIA.—A. The Origin of Russian Christianity.—There are two theories in regard to the early Christianity of Russia; according to one of them, Russia was Catholic from the times when she embraced Christianity until the twelfth century; the other holds that Russia was always Orthodox, i.e., an adherent of the Greek schism, from the time when Christian missionaries entered the Russian territory. The first of these theories is held by Catholics, whose arguments were condensed and developed by Vissarion (“Dissertatio de origine christianae religionis in Russia”) Rome, 1826), and, more amply, by Father Verdier, S.J. (“Origines catholiques de l’Eglise russe”) (Paris, 1856). The Orthodox writers unanimously reject the conclusions that Verdier demonstrated in the form of theses, which, to us, appear to be without solid foundations. The history of Russian Christianity dates from the ninth century; by which it is implied that Christianity was entirely unknown to the Russians before that
period, for the merchants of Kieff were in frequent communication with Constantinople: one of the quarters of the flourishing metropolis, St. Mamante, was inhabited by them, and there is no doubt that there were Kieffian priests. On the other hand, some nucleus of Christianity must have existed at Kieff before Photius, as he himself relates in his encyclical letter to the Patriarchs of the East, sent a bishop and missionaries to that city. On account of this action, Photius is considered to have introduced Christianity into Russia. His testimony is repudiated by Catholic writers, who claim for St. Ignatius the glory and the initiative of this evangelical mission to Russia.

There are no valid arguments, however, to throw doubt upon the authenticity of the information that has been handed down by Photius, as is proved in a later chapter, and his work "La chronique de Fosio", in "Studii religiosi", t. I, 1901, pp. 133–61.

According to the national chronicler Nestor, many Russians were Christians in 943, and had at Kieff the Church of St. Elise ("La chronique de Nestor", t. I, Paris, 1834, p. 65). In 965 Olga, widow of Igor, went to Constantinople, where she was baptized by the Patriarch Photius (956–70), and, loaded with rich gifts that she received from Constantine Porphyrogenitus (912–59), she returned to Kieff, and devoted herself to the conversion of her fellow-countrymen. She founded the Church of the Virgin of the East, but the conquest of the East by the West was not yet accomplished; and therefore Olga, who received in baptism the name of Helen, is venerated as a saint also by the United Russianians. Western chroniclers relate that Olga sent an embassy to the Emperor Otto I, to ask for Latin missionaries, and that Otto charged Adalbert, bishop of Bremen, to satisfy that request. Adalbert consecrated as bishop of the Russians Libitius, a monk of the convent of St. Alban, who died before entering Russia. He was succeeded by Adalbertus, a monk of the convent of St. Maximinus, at Trier. The Russians, however, received the Latin bishop badly, killed several of his companions, and constrained him to return to Germany. It may be observed that Assemani and Karamzin do not admit that Latin missionaries came to Russia with Adalbertus.

The efforts of Olga to convert her son Sviatoeslaff to Christianity were unsuccessful; Vladimir, his successor, in Sviatoeslaff, has the glory of having established Christianity as the official state religion in Russia. According to the legend, Vladimir received Mohammedan, Latin, and Greek legates, who urged him to adopt their respective religions. The Greeks finally triumphed. Vladimir marched with an army towards the Don, in 988 took Kherson; then he sent ambassadors to the Emperors Basilius and Constantin, asking for the hand of their sister Anna, which he obtained on condition that he would become a Christian. He was baptized by the Bishop of Kherson, who, according to Russian chroniclers, made Vladimir read a profession of faith that was hostile to the "corrupt" doctrine of the Latins. Thereafter, taking with him the relics of Pope St. Clement and of that pope's disciple, Phebus, as well as sacred vessels and images, Vladimir returned to Kieff, accompanied by his consort, and by some Greek missionaries. Once there he caused the idol of Perun to be thrown into the Dnieper, and on the site that it occupied built a Christian church, also commanding that all his subjects, without distinction of age, should be baptized. The inhabitants of Kieff yielded before his threats; but those of Novgorod resisted and suffered severe trampling and pillage. Vladimir, however, did not receive Christian instruction and education; the ancient beliefs and habits of Paganism endured, and survived for many centuries; consequently the moral influence of Christianity was not efficiently exercised upon the Russian people. Vladimir erected a church in honour of the Assumption of the Blessed Virgin Mary, under the direction of Grecian artists. Thanks to his piety, the Russian Church was endowed with a hierarchy, a metropolitan, bishops, and priests. On his deathbed, he gave some of his dominions to his son, and appointed him bishop of that city, out of which, however, the Dominicans were driven in 1233. Another letter of Honorius III, and one of Gregory IX (1227–41) encouraged the Russians of Pskov to realize their intention of embracing Catholicism. All of these efforts were in
vain. It was only in Galicia that the solicitude of the pope was attended with some favourable results. Innocent IV (1243–54) had continuous relations with the Grand Prince Daniel Romanovitch (1229–64), who hoped for the assistance of the West to throw off the Tatar yoke; the pope's nuncio to the King of Poland in 1254 crowned the grand prince as king at the city of Dorogotch. But through dissension among the princes of the West the assistance that the pope promised to Daniel was not given, and in 1256 the latter repudiated his union with Rome. The same pope made efforts to convert to Catholicism the national hero, Alexander Nevski, whose father had abjured the errors of the schism before the pontifical legate Giovanni da Pian Carpinu. In 1248 Innocent IV wrote to the Prince Alexander Nevski, exhorting the

latter to embrace Catholicism; and in another letter the same pope asserts that the conversion of that prince took place. Russian writers however are unanimous in considering their national hero a champion of the Orthodox faith, who refused to submit to Rome.

Under John XXII (1316–34) Catholicism was propagated in Lithuania, where it had its martyrs. Gedimin (1315–45), although a pagan, wrote a letter to John XXII, declaring that Franciscans and Dominicans were authorised to preach in his principality. Pangram was firmly rooted in the people, and in 1332 fourteen Franciscans were massacred at Vilna. In 1323 the same pope re-established the Latin Diocese of Kieff, to which he appointed a Dominican. Catholicism became preponderant in Lithuania, when Hedwig, Queen of Poland, married Jagello, and the two states were united into a single kingdom. Jagello embraced Catholicism in 1386, called Polish priests to Lithuania, and, like Vladimir the Great, resorted to violence to convert his subjects. Many Russians were converted to Catholicism, and Vilna became the see of a Latin bishop.

In 1438 the Russian Church, which was still dependent upon Constantinople, had as metropolitan Isidor (1438–41), a Greek, native of Thessalonica, and staunch adherent of the cause of the union. This prelate on 8 Sept., 1437, with Avraam, Bishop of Suzdal, and many clergymen and laymen, went to the Council of Florence, where he ardently defended the union; and by a Brief of 17 Aug., 1438, Eugene IV refused him legate a latere for Poland, Lithuania, and Russia. Avraam of Suzdal, however, was not a partisan of the union; and leaving Isidor, returned alone to Russia. Isidor sent an encyclical letter to the Russians (5 March, 1440), exulting the union that had been concluded at Florence. Upon his return to Moscow, however, Pius II convened a council, condemned the work of the metropolitan, and imprisoned the latter in the Monastery of the Miracles (Tchudoff); but Isidor succeeded in making his escape, and found asylum in Italy. Wherefore, Russia did not accept the decree of union of the Council of Florence; on the contrary, she drew from it arguments to proclaim the superiority of her Orthodox faith over the plural faith of the Greeks, and to prepare the way for her religious autonomy.

C. Catholicism in Russia from the Council of Florence to the Present Time.—Isidor resigned the Metropolitan See of Kieff about 1458, and in the same year Pius II appointed Gregor the Bulgarian, who was a disciple and companion of the former metropolitan, and who, according to the historian Golubinski, remained united to Rome until 1470, after which he became Orthodox, and died in 1472. Among his successors who were friendly to the union were Mikhail Drozdi (1475–90), Semion (1481–88), Jonah Gilev (1492–94), Makap (1495–97), and Josef Soltan, who in 1500 wrote a letter to Alexander VI asking for papal confirmation of his metropolitan dignity. At the death of Josef II, which according to Stroff was in 1519, the Metropolitanate of Kieff became again wholly Orthodox.

After the Council of Florence, the fanaticism of the Russians in regard to the Latin Church increased. The Latins were not even considered citizens. They were not allowed to build churches in Russian cities. The popes, however, did not cease their efforts to effect a reconciliation between Russia and the Roman See. An event that should have hastened the attainment of that end served only to widen the breach between Orthodoxy and Catholicism. There lived at Rome under the tutelage of the popes and the spiritual guidance of Cardinal Bessarion the Greek Princess Zoe, daughter of Thomas II, Duke of Morea; and Paul II, wishing ardently to induce the Russians to join the princes of the West in a crusade against the Turks, proposed to offer the hand of Zoe to Ivan Vasilewitz III (1462–1505); but death overtook him before he was able to bring about the realization of his purpose. Sixtus IV (1471–84) continued the policy of his predecessor. Ivan III received the proposal with enthusiasm. On 12 Nov., 1472 Zoe with a numerous suite arrived at Moscow, and the Metropolitan Philip I (1464–73) united her in marriage with Ivan. But the hopes of union to which this marriage had given rise vanished. Ivan IV, who was not in the prophecies of Bishop Antonio, who as legate of the Holy See had accompanied Zoe; while the latter passed over to the schism. Ivan III and the Russians thought only of drawing profit from the good will of the popes. The grand prince, having married a princess of the imperial house of Paleologus, formulated claims to the throne of Byzantium; while the Russians began to regard Moscow as the third Rome, which should inherit the prerogatives of the first and of the second.

Several embassies of Leo X and of Clement VII to the Prince Basel Ivanovitch (1560–93) were without measurable results for the union. Julius III at Pius IV invited Ivan the Terrible to send delegates to the Council of Trent; while Pius V in his turn invited him to join a crusade against the Turks; but Sigis-
mend, King of Poland, and Maximilian II, Emperor of Germany, prevented the legates of the pope from crossing the Russian frontier, or rendered their missions fruitless. In 1580 Ivan the Terrible, menaced by the victorious arms of Báthori, King of Poland (1576–86), and of the Swedes, sent to Gregory XIII an embassy at the head of which was Leontius Tchevrygin. The Holy See, although placing little faith in the promises of the Tartar, sent to Moscow to meet with the most eminent men of his day, the Jesuit Antonio Possevino, who, on 22 Feb., 1582, had a theological disputation with the tsar. Possevino was well received at the Court of Moscow, but his apostolic efforts were without result. He returned on 15 March, 1582, in company with Jacob Molvianinoff, legate of the Greek patriarch, and bore a letter to Gregory XIII. In that letter Ivan the Terrible did not refer to the union. Possevino had relations also with the successor of Ivan, Feodor Ivanovitch, and with Constantine II, Prince of Ostrog, the great champion of Orthodoxy in the sixteenth century; always, however, with unfavourable results. The advent of the False Demetrius and his marriage with the heiress of the Waywodes of Sandomir gave hopes that Russia would see a Catholic dynasty on its throne. Demetrius, indeed, had been converted to Catholicism in 1604, and had entered into relations with the Holy See, when his wife was seized in Pskov, and the legate demanded to confirm him in the Catholic faith, and to maintain his devotion to the Roman Church. Demetrius gave to the Holy See the happiest hopes for the conversion of Russia; but through a conspiracy on 27 May, 1606 he lost the crown and his life. Fanatical Russian writers charge the pope with responsibility for the turbulence that followed the advent to the throne of the False Demetrius; but the letters of the Roman pontiffs refute that calumny decisively.

In 1675 the Tsar Alexis (1645–76) sent, as ambassador to Clement X, General Paul Mnesius, a Catholic. The object of this embassy was to promote an alliance of the Christian princes against the Turks. The Russian legate was received with great distinction. No happy results, however, attended his mission from a religious point of view. During the reign of Alexis, strenuous efforts were made to draw Russia towards the Church by a famous missionary, George Krizhanitch, a student of the Propaganda, on whose life and works Professor Bielokuroff recently wrote several valuable volumes rich in documents. Krizhanitch is regarded as one of the pioneers of Panaslavism; but his efforts to bring Russia to the Catholic Church, in 1661, met with failure, whence he was unable to return to Moscow until 1678, after the death of Alexis.

In 1684 the Jesuit Father Schmidt established himself at Moscow as chaplain to the embassy from Vienna. In 1685 another Jesuit, Father Albert Debois, was the bearer of a letter from Innocent XI to the tsar; and in 1687 Father Giovanni Vota, also of the Society of Jesus, advocated at Moscow the needs of the Russia to unite herself to the Church of Rome. The Emperor of Germany, Leopold I (1657–1705), obtained permission for the Jesuits to open a school at Moscow, where they established a house. Their work would have been very favourable for the Church, for under the influence of Catholic theology a band of learned Orthodox theologians, led by the higumen Sylvester Medvedeff, supported certain Latin doctrines, especially the Epiphysis. Unfortunately however two fanatical Greek monks, Ioannikius and Socrates, excited the first imitation of the Russians against the Latins at Moscow, and when Peter the Great freed himself of the tutelage of his sister Sophia in 1689, the Jesuits were expelled from Moscow. The schismatic Patriarch Joachim, a man actuated by hatred for foreigners, and in particular for Catholics, had much to do with that expulsion. The returns of Peter the Great did not better the condition of Catholicism in Russia. In the first years of his reign he allowed the Catholic Church, he granted permission to the Catholics in 1693 to build a church at Moscow, and to summon Jesuits for its service; in 1707 he sent an embassy to Clement XI, to induce that pontiff not to recognise Stanislaus Leszcynski as King of Poland, to which dignity the latter had been elected by the Diet of Warsaw on 12 July, 1704; he promised the pope to protect a constitution that would establish, in favour of Catholicism, the freedom of worship that had been promised, but never maintained. During his sojourn at Paris in 1717 he received from various doctors of the Sorbonne a scheme for the union, to which he caused Theophanes to add a Latin copy of it and bear a letter to Gregory XIII.

In order to capitivate the Russians, the doctors of the Sorbonne had worked Gallican ideas into that scheme, regarding the primacy of the pope and his authority.

Peter the Great, however, was inimical to Catholicism. His religious views were influenced by Prokopovitch, a man of great learning, but a courtier by nature, and a bitter enemy of the Roman Church. Peter the Great revealed his anti-Catholic hatred when, at Polotsk in 1705, he killed with his own hand the Basilian Theophanus Kolbietszyński, as also by many other measures; he caused the most offensive publications against Catholicism, such as the book by the Greek priest, Gavriil Petrovitch, to be destroyed in Russia; he expelled the Jesuits in 1719; he issued ukases to draw Catholics to Orthodoxy, and to prevent the children of mixed marriages from being Catholics; and finally, he celebrated in 1722 and in 1725 monstrous orgies as parodies of the concave, casting ridicule on the pope and the Roman court.

From the time of Peter the Great to Alexander I, the history of Catholicism in Russia is a continuous struggle against Russian legislation: laws that embarrassed the action of Catholicism in Russia, that favoured the apostasy of Catholics, and reduced the Catholic clergy to impotence were multiplied in each year, and constituted a Neronian code. In 1727, to put a stop to Catholic propaganda in the Government of Smolensk, Catholic priests were prohibited from entering that province, or, having entered it, were prohibited from occupying themselves with religious instruction; but leaguered Roman Catholic priests, in the Orthodox communion, to have Catholic teachers, to go to foreign countries, or to marry Catholic women. In 1735 the Empress Anna Ivanovna prohibited Catholic propaganda among Orthodox Russians under the severest penalties. Illustrious converts, like Alexei Matalovitch Gatis and Mitskevitch, were sentenced to the most inhuman barbarity on account of their conversion. In 1747 the government expelled from Astrakhan the Capuchins who were making many conversions to Catholicism among the Armenians.

Under Catharine II (1762–96) the condition of Catholics became worse than before, notwithstanding the ukases of religious tolerance that the empress promulgated. The ukase of 22 July, 1763 authorised the Catholics to build chapels and churches of stone. Another ukase of 23 Feb., 1769 promulgated the ecclesiastical constitution of the Catholics. This constitution established two parishes, at St. Petersburg and Moscow, and placed them in charge of the Reformed Franciscans and the Capuchins. It provided that the number of parishes should not be greater than nine; and it strictly prohibited Catholic priests, residing in Russia, from proselytizing among Orthodox Russians. The annexation of Poland (1772) brought a strong body of Catholics to Russia, and Catharine II proposed to make of them a national Church, independent of Rome. Unfortunately an ambitious Polish bishop, Stanislaus Staszczewicz, entered into her views, and a ukase of 23 May, 1774 established the Diocese of White Russia, with its episcopal seat at
Mohileff, its first bishop being Siestrenzowics, Vicar-General of Vilna. This personage is judged variously by historians. Pierling, Zaleński, and Markovitch treat him as an ambitious man who sought to become patriarch of all the Catholics in Russia, and who in his heart hated the Roman See. Godlewski on the contrary is inclined to excuse him, and to believe that the restrictions of the apostolic government in Russia possibly led him to adopt measures that appear to have been injurious to Catholic interests. According to Markovitch, during his long episcopate (1774—1826), Siestrenzowics was the scourge of the Catholic Church of both rites in Russia. By her manifestos of 1779 Catholics he began to persecute the members of the religious orders, withdrawing them from the authority of their religious superiors, and putting them under the jurisdiction of the Bishop of Mohileff. The latter in 1782 was raised to the archiepiscopal dignity, and in 1784 received the pallium from the Apostolic legate, Mgr. Giovanni Andrea Archetti, Archbishop of Chalcedon. He assumed episcopal jurisdiction over all the Catholics of the Russian Empire, and acted as if he were independent of the Holy See.

The sound principles of Catholicism, however, were maintained and respected by the Jesuits who were suppressed by the Holy See and exiled from the Catholic nations, found an asylum and the centre of their future revival in Russia. In 1779 Catharine II invited the Jesuits to exercise their ministry in White Russia, and in 1786 they had in Russia six colleges and 175 members. Their number increased so much that Pius VII re-established their order for Russia, where it returned to life under Father Gruber. In 1801 the society had 262 members, and 347 in 1811. The Jesuits retained a lively gratitude for the hospitalities that they had received in Russia, and worked with success in spreading Catholicism.

The Second and Third Partitions of Poland (1793—94) considerably increased the number of Catholics in Russia; Catharine II promised them the free exercise of their religion, their rights of property and those of their Church, and their complete independence of the civil power. These promises were deceptive, as was shown by the destruction of the Ruthenian Church, accomplished by her order. The Catholics of the Latin Rite also soon had cause to remember that they were under the domination of implacable enemies. The Catholics had awaited the death of Catharine and the accession of her son in order (1796—1801) to better their condition. In 1797 Archbishop Lorenzo Litta, legate a latere of the Holy See, arrived at St. Petersberg, where he was received with great honours. The Catholics who had been exiled to Siberia were recalled; the Sees of Lutak, Vilna, Kamenetz, Minsk, and Samogitia (the ancient Diocese of Livonia) were created; the archiepiscopal See of Mohileff was declared metropolitan, which it still is; and the government granted an indemnity to the clergy for the property that had been taken from them. In 1802 the number of the faithful amounted to 1,335,490; of adults alone. Paul I showed a special predilection for the Jesuits, and reposed great confidence in Father Gruber; he called them to St. Petersberg, where he authorized them to open schools and seminaries, while he obtained from Pius VII a Brief (7 March, 1801), re-establishing the society in Russia.

Under Alexander I diplomatic relations were established between the Holy See and Russian Government. In 1802 a Russian legation was established at Rome, while Pius VII on his part named an Apostolic nuncio to St. Petersberg, Mgr. Aressio, Archbishop of Selucia. The affairs of the Catholic Church in Russia were to be administered by the Roman Catholic Ecclesiastical congregation, created by the decree of the Synod of St. Petersberg. This college had been approved by Alexander I, through his ukase of 21 Nov., 1801. Siestrenzowics of course was selected as its president; and the Russian Government, in its Note of 13 Dec., 1803, asked of the Holy See such powers for him as would have rendered him independent. The Sovereign Pontiff opposed a determined resistance to these demands, and the Ecclesiastical College was henceforward merely a name. In 1804 Mgr. Arezz, of the Apostolic nuncio, in a view of the dissensions between the Russian Government and the Holy See, left St. Petersberg; whereupon Siestrenzowics had a free hand, and devoted himself to accrediting Catholicism by proposing as bishops of the vacant sees men who were corrupt or allied to the government, by persecuting the Protestant denomination, divorcing arbitrarily, by favouring the English Bible Society, and finally, by surrounding himself with assistants of evil mind and heart. Diplomatic relations between the Holy See and Russia were resumed in 1815. The Russian plenipotentiary, Baron de Tuyll, had colloquies with Cardinal della Somaglia in regard to the union of the two Churches, which, however, were without result, for the Russian Government declared that the union was impossible so long as the Holy See wished to impose its dogmatic teachings and its disciplinary practices upon the Russians. Mean time, Siestrenzowics used his influence with the Government to obtain the submission of the Catholics to the Church of Rome, and of the relations between Rome and St. Petersberg to seek through the Russian Government new favours and concessions, e. g. the nomination of episcopal candidates by the Holy See, the title of Primate, matrimonial dispensations, etc. In other words, it was a question of imitating the canonical legislation of the Orthodox Church, and of harmonizing Catholicism with the civil government. The various efforts of the Russian Government to establish a primate, with patriarchal, almost independent powers in Russia were always thwarted by the determined resistance of the Holy See.

The most painful occurrence in the history of Catholicism during the reign of Alexander I was the expulsion of the Jesuits from Russia, the pretext for which was the conversion of Prince Alexander Galitzin to the Catholic faith. The Jesuits were expelled from St. Petersberg during the night of 22—23 Dec., 1815, and the Catholic parish church of St. Catharine was given to the Greek Catholics. The Jesuits were relegated to Polotak; later, however, by the ukase of 25 March, 1820, they were exiled from Russian territory. On the other hand, as many nobles of the former Polish provinces, subjects of Russia, sent their children abroad to be educated by the Jesuits, the government provided that young Catholics should not leave Russia. In the last years of his reign Alexander I showed more sympathy for Catholicism, and the relations of the Holy See with the Russian Government were cordial during the pontificate of Leo XII and the sojourn of the Chevalier Italinski at Rome as Russian minister. The Holy See obtained the concession that the Russian Government would pay to the Datary 1000 scudi for the Bulls of Catholic archbishops in Russia, and 500 scudi for those of bishops; Alexander I also allowed a Catholic chapel to be erected at the imperial residence of Tsarskoye Selo, and gave 40,000 roubles for its construction. He proposed to visit Rome, and the prohibited his visit. He proposed to visit Rome, and the prohibition of the visit was cancelled after a retrospection, historical report, to abjure Orthodoxy. There are Catholic writers who affirm that Alexander I and his consort became Catholics; but there is no documentary evidence in support of this.

The reign of Nicholas I was a long period of persecution and suffering for Catholics in Russia. In 1826 the Holy See sent Mgr. Bernetti to St. Petersberg, to be present at the coronaition. He was well
received by the tsar, and thereafter wrote optimisti-
cally to Rome. Soon, however, the trials of the
Catholics began. By two ukases in 1828 the admi-
nision of novices in the religious orders, and of clerics
in the seminaries, was made very difficult, if not quite
impossible; and in the following year all the novitiates
were closed. In 1830 other ukases encouraged di-
vulgation of anti-Catholic propaganda among the Orthodox, the hearing the confessions of foreigners, and changes of residence
among the clergy.

The Polish insurrection of 1830 and 1831 intensified
the persecution against the Latin Catholics. In 1832 the
Russians referred to the "Ecclesiastical College" that the number of convents
be diminished. Of 300 monasteries in the Diocese of Mohileff 202 were closed; while the administrator
of that diocese, Bishop Szczyt, who had opposed this
restriction, was sent to Siberia. In the same year the
publication of Papal Bulls in Russia was prohibited.
In June and September, 1832 respectively the Holy
See addressed two notes to the Russian Government,
lamenting the disabilities to which Catholics were sub-
jected in Russia, and the innovations which had been
introduced into ecclesiastical discipline. The govern-
ment replied that the Polish restrictions were for its
own peace and interest.
On 9 June, 1832, yielding to the Russian Government, Gregory XVI addressed his Encyclical to the Polish
clergy, urging obedience to the civil power in civil
matters. The encyclical aroused great discontent
among the Poles, and did not deter the Russian Gov-
ernment from its purpose of annihilating Catholicism.
The Government directed its blows against Catholics,
more especially by laws concerning mixed marriages,
by preventing Catholic priests from ministering to the
United Catholics, and by calling to the episcopal sees
men who were devoted to its policy, e.g. Mgr. Paw-
lowski, metropolitan of Mohileff, on 30 July, 1841.
The Holy See could no longer remain silent in the
presence of this violence, and in his Allocution to the
solemn Consistory of 22 July, 1842, Gregory XVI
called the attention of the Catholic world to the
painful oppression to which Catholicism was subjected
in Russia; and his protests were more serious and
energetic, when in 1845, upon the occasion of the
visit of the tsar to Rome, he had an interview with
the latter, which resulted in the concordat of 3 Aug.,
1847, by which there were established in Russia an
archiepiscopal and six episcopal sees, and in Poland
the use of the Dominican Order had been established
by the Bull of Pius VII of 30 June, 1818. The
concordat repealed several iniquitous laws that had been
promulgated against Catholics, placed the seminaries
and the ecclesiastical academy of St. Petersburg under
the jurisdiction of the ordinary, and recognized to a
somewhat greater degree the authority of the Holy
See over the bishops. The Tsar Nicholas, by a letter
of 15 Nov., 1847, ratified the concordat of 3 Aug.,
which, like so many other Russian laws, was destined
to remain a dead letter. Obstacles were placed to the
determination of the boundaries of dioceses; 21
convents were suppressed by a ukase of 18 July, 1859;
while Catholics were prohibited from rebuilding their
churches and from building new ones; from preaching
sermons that had not previously been approved by the
government, and from refuting the calumnies of the
Press against Catholicism. It is not necessary
for us to recur to the authority of Catholic writers,
like us among our co-religionists, for the words religious
we may be satisfied with a mere glance at the immense
collection of laws and governmental measures con-
cerning the Catholic Church, from the times of Peter
and of Ivan Alexievitch to 1867 ("Zakonoposluzhnenia
i pravitelestvnyia rasporjashchenia do rimsko-kato
licheskih v Rusian, v. 3, v Rome: von Wenne
vremeni castrovanija Tsarei Petra i Ioanne Aleksee-
vitelchei, 1669-1867"), Vienna, 1888). It is not with-
out reason that a Catholic writer has said that the
laws of Nicholas I against Catholicism constitute a
Neronian code.

The first years of the reign of Alexander II were not
marked by anti-Catholic violence. The Russian Gov-
ernment promised the Holy See that the concordat
would be scrupulously observed, and in 1856 the
Infant of Prague sees were restored to the Holy See.
Soon however there was a return to the methods of
Nicholas I, notwithstanding the fact that Pius IX
wrote to the tsar, imploring liberty for Catholics of
both rites in Russia. In another letter, addressed in
1861 to Mgr. Fialkowski, Archbishop of Warsaw, Pius
IX expressed his concern to safeguard the existence of Catholicism in Russia,
and to the difficulties that were opposed to all measures of
his and of his predecessors in that connection.
Encouraged by the words of the pope, the Polish
bishops presented a memorandum to the representa-
tive of the emperor at Warsaw, asking for the abroga-
tion of the laws that oppressed Catholics and destroyed
their liberty. A similar memorandum was presented
to the tsar by the Archbishop of Mohileff and the
bishops of Russia. Upon the basis of these memo-
randa, the government accused the Catholic clergy of
promoting revolts against the tsar.

Moet painful occurrences ensued; the soldiery was not restrained from profaning the churches and the Holy Eucharist, from wounding
defenceless women, or from treating Warsaw as a city
taken by storm. One hundred and sixty priests, and
among them the most zealous Bialobrzeski, were
taken prisoners, and several of them were exiled to
Siberia. Mgr. Deckert, coadjutor of the Archbishop
Fialkowski, died of the sufferings that these events
caused him. The condition of the Poles was becom-
ing intolerable, and Catholicism suffered proportion-
ately much. Amid the disorders in Russia and Europe, one
voice, that of Pius IX, was raised, firm and emphatic in favour of an oppressed people and of a persecuted
faith. On 12 March, 1863, in his Allocution to the
Consistory, and on 22 April, 1863, in a letter to the
tsar, Pius IX demanded that justice and equity be
no longer violated. The tsar Alexander II wrote to the
pope expressing regrets that the Holy See should ally itself with the authors of civil disorder and should disturb the public peace.

The Polish revolution of 1863 furnished the govern-
ment with a pretext for inhumanity towards the
Catholic clergy, both regular and secular. There is no
doubt that some priests and religious, with patriotic ardour, committed the error of taking part in
an insurrection which was opposed by the more
cultured and reasonable portion of the nation.
The Russian Government, however, did not take pains
to punish only the guilty, but dealt with all the Catholic
 clergy alike. In 1863 the Archbishop of Warsaw,
Mgr. Felinski, was confined at Yaroslaff, as was his
coadjutor Mgr. Razaewski at Astrakhan in 1865;
while their successors, the canons Szczygiecki and
Domagolaki, were exiled to Siberia in 1867. Mgr.
Grynski, Archbishop of Vilna, was confined at
Vytatka. Several priests in 1863 were either hanged
or shot, as implicated in the revolt, while others were
sent to the interior of Russia, or were deported to
Siberia. The Poles and the Catholics in their dis-
tress received consolation only from Pius IX, who dis-
tinguished between the right of a government to
expropriate sees of Russia and Poland, and the right of subjects to
profess their Faith freely. In the encyclical "Ubi
Urbaniano" of 30 July, 1864, addressed to the bishop-
of Russia and Poland, he enumerated the grievous
evils that the Russian Government had inflicted on
Catholicism.

The letters and the protests of the pope however were of little avail. On 8 Nov., 1864 the government
suppressed the convents and religious orders of Rus-

RUSSIA
sian Poland; and a ukase of 16 Nov., 1868 abolished the concordat of 1847. Another ukase, on 22 May, 1867, made the "Roman Catholic College" the intermediary between the Catholic bishops of Russia and the Holy See. Unfortunately some prelates allowed themselves to be led astray by the promises or by the threats of the Russian Government, which sought to procure the establishment of a Polish national church. We may cite Mgr. Staniewski, administrator of the Diocese of Mohilef, Mgr. Constanle Lubienski, Bishop of Augustow, who nobly expiated his mistake, and died in exile at Driianburg; and Mgr. Soczewski, administrator of the Diocese of Bielsko, by numerous revelations and documents, concerning the incredible abuses of Russian legislation against Catholicism, is contained in the work "Das polnisch-russische Staatskirchenrecht auf Grund der neuesten Bestimmungen und praktischer Erfahrungen systematisch erzählt von einem Priester" by Posen, 1892.

Under Alexander III (1881-94) negotiations between the Holy See and the Russian Government were renewed, and Russia maintained a legation at the Vatican. In 1882 Archbishop Felinski was recalled from exile, and, instead of his See of Warsaw, received a new See of Brodnitsa. The See of Warsaw was given to Mgr. Vincent Theophile Popiel, who had energetically resisted the efforts of the Russian Government to establish an independent ecclesiastical college for the government of the Catholic Church in Russia. A new concordat was concluded in 1882, but its clauses were nullified by new laws. It should not be forgotten that, during the entire reign of Alexander II, the religious policy of Russia was inspired by Konstantin Pobiedonostseff, Procurator General of the Holy Synod, who, for political rather than religious motives, was a fierce advocate of absolutism. The absolute power of the Czar was utilized to endure the severest oppression, abandoned to the caprices of the police, greatly reduced in numbers, and tramelled by a thousand obstacles in the exercise of its apostolic ministry. This condition of things was prolonged into the reign of Nicholas II, during which Pobiedonostseff exercised his dictatorship until 1905.

After the war with Japan, however, and in consequence of internal political troubles, Nicholas II promulgated the constitution in 1905, and published the edict of religious toleration. Two years of liberty were sufficient to revive the great vitality of Catholicism in Russia, for the number of conversions to the Catholic faith, in so short a lapse of time, amounted to 500,000, including over 300,000 Uniate Catholics whom the Russian Government had compelled to declare themselves Orthodox; 100,000 of these, known in Russian as Obtinates (upostavshikie), had not received the sacraments for more than thirty years, during which time they frequented no church, in order not to be reckoned among the Orthodox. The Catholic clergy developed the greatest activity in social and educational work, in the Press, and in the awakening of a Christian piety in the Russian people. A party of the Orthodox Church, centred in the Synod, cried out against the danger, and called for new laws to protect Orthodoxy against the assaults of militant Catholicism. These protests and lamentations were heard; the laws relating to liberty of conscience were submitted to revision, abolished, or modified; the government tried to receive the converts to Catholicism in Russia; the conversions to Catholicism of the former Uniate Catholics; the priests who baptized children of mixed marriages were punished with fines and imprisonment; the parochial schools were closed; the confessions and the Catholic social organizations were dissolved; the assembly of the clergy was stopped, and the establishment of a Polish national church was resumed. The government directed its action especially against the re-establishment of the United Church in Russia, and in 1911 closed two Russian-Catholic chapels that had been erected at St. Petersburg and Moscow. Denunciations against a zealous Jesuit, Father Wrezynsky, who had established himself at Moscow in 1903, and had converted a thousand Russians to Catholicism, furnished the government with pretext for renewed severity; Father Wrezynsky was exiled; the equal numbers of Jesuits who were then in Russia, Father Denisiewics, was deposed (1911) without the previous consent of the Holy See, and was deprived of his stipend; and another most zealous prelate, Baron von Ropp, Bishop of Vilna, was obliged to resign his sees and to retire to the Government of Perm.

Nevertheless, Catholicism exercised a great influence upon the cultured classes of Russia, a fact due in great measure to Vladimir Soloveff, the greatest of Russian philosophers, who has rightly been called the Russian Newman; and from these classes there have always been conversions that have brought to the fold of the Catholic Church noble and exalted souls, as, for example, Princess Narishkin, Princess Bariatskina, Princess Volkonska, Countess Neskelrod, Miss Usahkova, Prince Gagarin, Prince Galitzin, Count Shuvaloff, and many others. Khomiakoff, the legislator and apostle of Slavophilism, said that if liberty of conscience were restored in Russia the upper and the cultured classes would embrace Catholicism, which seems to be justified by the facts.

D. Statistics of the Catholic Dioceses of Russia.

The basis for the diocesan and clerical statistics of Russia is furnished by the very useful "Elenchi omnium Ecclesiarum et universi cleric" which is published every year by the various dioceses as an appendix to the "Directorium divini officii". These "Elenchi" are useful not only for their statistics but also for their historical data, because they sometimes contain documents and historical notes concerning the dioceses. From the statistical point of view the Catholic dioceses of Russia are divided into two classes: the dioceses of the Kingdom of Poland, and those of Russia. The Kingdom of Poland, or Russian Poland, has seven sees: (1) Archdiocese of Warsaw; (2) Diocese of Kielce; (3) Diocese of Lublin (with administration of Podlachia); (4) Diocese of Plock; (5) Diocese of Sandomir; (6) Diocese of Szczecin and Augustowo; (7) Diocese of Wladislaw. In Russia there are: (1) Archdiocese of Mohilef (with administration of Minsk); (2) Diocese of Kutus, Zhitomir, and Kamenets; (3) Diocese of Samogitia; (4) Diocese of Tiraspol; (5) Diocese of Vilna, with the Archbishopric of Vilna, in the three separate sees. In 1868 the Russian Government suppressed the Diocese of Podlachia in Poland, and Minsk and Kamenets in Russia; the Holy See, however, did not sanction these arbitrary acts, and therefore the three dioceses in question exist canonically, although they have no bishops, and have been incorporated into other dioceses. There are in the Russian Empire more than 13,000,000 Catholics, of whom more than 5,000,000 are in Russia; there are approximately 2,000 parishes, 3,000 churches, 2,000 chapels, and 4,000 priests. According to the illustrative tables of the relation of the Catholic clergy, reckoned an average of more than 3,000 Catholics for each priest. In some dioceses, as for example in Podlachia, there is 1 priest for each 4,500 Catholics; and in the Diocese of Minsk 1 priest for each 4,570 Catholics. The division into parishes is irregular, and some of the parishes have a very large population; the Holy Cross at Pinsk has a population of 142,000 Catholics with only 10 priests; and Praga, near Warsaw, has 82,000 Catholics, with only 4 priests. In Siberia the parishes have an enormous extent. According to the convention between the Holy See and the Government, the diocesan bishops should have 22 sees each: 3 for the Diocese of Warsaw; 3 for the Diocese of Kovno; 3 for Lutsk, Zhitomir, and Kamenets; 3 for Vilna; 2 for Tiraspol; 2 for Warsaw;
and 1 each for Kielce, Lublin, Wladislaw, Sandomir, Plock, and Sejn and Augustowo. Unfortunately however the convention is not observed by the Russian Government: in 1911 there were only four suffrigan bishops; and it should be added that the dioceses remain vacant for long periods. The Diocese of Vilna has been vacant since 1895. There follows a list of the most important consistories, which have charge of ecclesiastical administration, which cannot be remedied for lack of competent authority.

Each diocese has its cathedral and its collegiate chapters. A ukase of 1865 fixed 12 as the number of canons of a cathedral. Each diocese has also its consistory, and to the two diocesan consistories, should be added the consistories of Kalisp, Piotrkow, and Pultusk. The consistories are composed of "officers", "vice-officers", assessors, visitors of monasteries, and also lay members in the Russian dioceses. The efforts of the Russian Government to make autonomous the consistories of the various dioceses and the ecclesiastical college at St. Petersburg have failed, for the Catholic hierarchy in Russia, taught by experience, remains faithful to the Roman See, and accepts no innovations contrary to Catholic canon law.

E. Religious Orders.—In the seventeenth and eighteenth centuries there were some Russian monasteries, and several thousand religious of the various orders. Among the latter the Jesuits and the Piarists (founded by St. Joseph Calasansius) distinguished themselves by their services to education; but the inquisitive laws of Catharine II and Nicholas I, and the measures adopted by the Russian Government in 1864 after the Polish insurrection, almost extirpated Western monachism from Russia. In 1864 it was provided that the monasteries of Russia should be divided into two classes, those approved and recognized by the state, and those not approved or recognized. Of the monasteries of the first class, two were allowed to have novices, and to be inhabited each by 14 religious; those of the second class were allowed to remain in existence until the number of religious in each should be reduced to 7, when the monastery was to be suppressed. The opening of the novitiates of the recognized monasteries was deferred to the time when the non-approved monasteries should have ceased to exist. The number of the Paulist monks of the monastery of Czenstochowa was fixed at twenty-four. Even these restrictive laws, however, were not observed. Only three or four of the recognized monasteries were allowed to remain, and the monks of religious orders were prohibited from having relations with their religious superiors outside of Russia. It is therefore not astonishing that the religious orders should have nearly disappeared from that country. The Sisters of Charity alone have been able to develop their organization; and, as elsewhere, they have won the admiration of all, even of the Orthodox.

The greater part of the religious are in Russian Poland. The Archdiocese of Warsaw has a Capuchin monastery at Nowe Miasto, with 15 religious, and the convents of the Visitation (14 religious), the Perpetual Adoration (13 religious), and the Sisters of the Immaculate Conception (36 religious). The Sisters of Charity; 382 in number, have under their charge there 34 hospitals or philanthropic institutions. In 1905 the Redemptorists, five in number, had established themselves at Warsaw; but the Russian Government expelled them in 1910. The same fate overtook the old orders that were suppressed in 1864, but their number is reduced from year to year.

The Diocese of Wladislaw has the celebrated monastery of Czenstochowa, belonging to a congregation of cenobites called Paulists (from St. Paul I the hermit). The number of cenobites in which religious are received in the convent. A egregious crime that was committed in the convent in 1909 led the diocesan authorities to adopt the severest measures for the re-establishment of religious discipline there. In the same diocese there are two convents of Friars Minor, at Kolo and at Wladislaw, with 10 religious; one convent of Dominican Tertiaries, at Przyrów, with 12 religious; and one convent of Franciscan Tertiaries, with 13 religious, at Wielen. There are 49 Sisters of Charity, who have charge of 13 philanthropic establishments. In the Diocese of Plock there are: a convent of Carmelites, at Obory, with 6 religious; a monastery of Felician Sisters, at Przasnysz, with 9 religious; and 5 charitable institutions, in the care of the Sisters of Charity.

In the Diocese of Sejn, besides a Benedictine monastery, with 10 religious, there are two hospitals and one asylum, under the care of 13 Sisters of Charity. In the Diocese of Sandomir there is a Franciscan convent for women, with 13 religious; and 6 charitable institutions, under the care of 29 Sisters of Charity.

The Diocese of Kielce has 35 Sisters of Charity, and that of Lublin 44 who are in charge of 8 charitable establishments.

In the Archdiocese of Mohilef there are no convents, properly so called. At St. Petersburg and Moscow there are several Russian Benedictine monasteries, and many monasteries, and several thousand religious of the various orders. Among the latter the Jesuits and the Piarists (founded by St. Joseph Calasansius) distinguished themselves by their services to education; but the inquisitive laws of Catharine II and Nicholas I, and the measures adopted by the Russian Government in 1864 after the Polish insurrection, almost extirpated Western monachism from Russia. In 1864 it was provided that the monasteries of Russia should be divided into two classes, those approved and recognized by the state, and those not approved or recognized. The monasteries of the first class, two were allowed to have novices, and to be inhabited each by 14 religious; those of the second class were allowed to remain in existence until the number of religious in each should be reduced to 7, when the monastery was to be suppressed. The opening of the novitiates of the recognized monasteries was deferred to the time when the non-approved monasteries should have ceased to exist. The number of the Paulist monks of the monastery of Czenstochowa was fixed at twenty-four. Even these restrictive laws, however, were not observed. Only three or four of the recognized monasteries were allowed to remain, and the monks of religious orders were prohibited from having relations with their religious superiors outside of Russia. It is therefore not astonishing that the religious orders should have nearly disappeared from that country. The Sisters of Charity alone have been able to develop their organization; and, as elsewhere, they have won the admiration of all, even of the Orthodox.

The greater part of the religious are in Russian Poland. The Archdiocese of Warsaw has a Capuchin monastery at Nowe Miasto, with 15 religious, and the convents of the Visitation (14 religious), the Perpetual Adoration (13 religious), and the Sisters of the Immaculate Conception (36 religious). The Sisters of Charity; 382 in number, have under their charge there 34 hospitals or philanthropic institutions. In 1905 the Redemptorists, five in number, had established themselves at Warsaw; but the Russian Government expelled them in 1910. The same fate overtook the old orders that were suppressed in 1864, but their number is reduced from year to year.

The Diocese of Wladislaw has the celebrated monastery of Czenstochowa, belonging to a congregation of cenobites called Paulists (from St. Paul I the hermit). The number of cenobites in which religious are received in the convent. A egregious crime that was committed in the convent in 1909 led the diocesan authorities
Orthodox and the affection of Catholics. The generosity of the Catholics, especially Poles and Lithuanians, is considerable, and therefore the financial circumstances of the Catholic clergy are of the best, not only for the support of their families but also for their sanctuaries, which are largely supported by contributions from the Russian Government. There are over one million pilgrims who visit the sanctuaries of Our Lady of Ostredoma and Vilna every year. The streets leading to the sanctuaries are crowded with people on their knees.

The Catholic clergy in Russia is unable to contribute efficiently to the propagation of the Faith, for its seal is tampered with by severe laws. In 1908-1911 many priests were fined, imprisoned, and even exiled for having baptized children of mixed marriages; nevertheless the clergy contributes in some measure to the work of the Union. There has been a number of Catholic prayers in the Russian Empire, through the agency of three or four Russian priests who were converted to Catholicism; and two chapels of the Slav Rite sprang up, at St. Petersburg and Moscow. In 1918, however, the Russian Government closed the two chapels, and forbade the exercise of their ministry by the converted priests, one of whom returned to the seminary.

The Catholic clergy, and Catholics in general, abstain from taking part in politics; but they do a great deal for the moral and intellectual development of their fellow-countrymen. The Poles are the staunchest supporters of the Catholic Church in Russia. The Lithuanian clergy has taken a very active part in the awakening of Lithuanian nationalism, the restoration of the Lithuanian language to the churches of Lithuania, and the development of Lithuanian literature. From these points of view, therefore, both the Polish and Lithuanian clergy have rendered great service to their respective nationalities.

It is to be regretted, however, that there should frequently arise at Vilna between the Polish and the Lithuanian clergy, disputes that are at variance with Catholic interests. The intellectual development of the clergy, as yet, is not all that might be desired. The seminaries, in all that concerns the admission of young men, are at the mercy of the government, which, possibly, prevents the more desirable youths from entering those establishments. For the rest, the course of studies in those seminaries is not very complete. At present, however, an intellectual and moral reform in these establishments is being sought: a considerable number of Catholic priests go to foreign countries to complete their studies in Catholic universities, and upon their return to Russia teach in the seminaries. The Catholic Press, also, which has been associated with Catholicism and the Russian nationalism, has improved greatly of recent times. In 1909 the seminary of Wladislaw began the publication of the "Duchowni Kaplan", a monthly periodical that is on a level with the most learned Catholic publications of Europe. Other Catholic periodicals are published at Warsaw, Vilna, Sandomir, etc., and seek to neutralize the anticatholic propaganda, and the propaganda of atheism, which latter has its centre at Warsaw, where it publishes its organ the "Myśl Nepoległa" (Independent Thought).

The chief centre of Catholic study in Russia is the Russian Catholic Ecclesiastical Academy of St. Peters- burg, established in 1833, situated in the suburb of Vilna, which was considered the university of the Catholic clergy in Russia. The academy has a rector, an inspector, a spiritual director, 15 professors, and 1 librarian. The dioceses send to this establishment their best students, who after a course of four years receive the Degree of Master of Theology. It has 60 students. Among its professors mention should be made of Mikhail Godlewski, author of important publications on Catholicism in Russia, and Stanislaus Trzezia, the author of an important work on the literature and religion of the Jews at the time of Christ ("Literatura i religia u żydów za czasów Chrystusa Pana", Warsaw, 1911). The sect of the Mariavites is treated in the article Poland.

The Orthodox Church of Russia.—Russian writers ordinarily divide the history of their national church into five periods. The first, from 989 to 1237, was the period of the diffusion of Christianity in Russia. Christianity was spread slowly, but the influence of culture among the people caused pagan superstitions to be maintained under the external appearances of Christian rites. The conditions of the lower clergy, both as to culture and to apostolic spirit, were wretched. Monastic life began to flourish in Russia, when the monk Anton, coming from Mount Athos in 1051, established himself in a grotto near Kieff, and thereafter a monastery. In 1238, on the foundation of the famous Blessed Theodosius Petcherskia, laid the foundations of the great monastery called Kiev-Petcherskaia. This monastery became a focus of culture in the development of the Russian Church, and is rightly considered a national monument of that country.

Monasticism was so generally established in the sixteenth century that in the city of Kieff alone there were seventeen monasteries. During this first period the Russian Church was totally dependent upon the Church of Constantinople, and was governed by the Metropolitans of Kieff, the list of which opens with Evgenius (d. 1044), and closes with the Metropolitan Josef in 1237. According to Golubinski this first list contains twenty-four names. Some of them, Mikhail, Iliarion, Ivan II, Ephraim, and Konstantin were placed upon the calendar of the saints. One of the most famous saints of this first epoch was St. Cyril of Turoff.

The second period, from 1237, in which year begin the Mongolian invasions and the progressive development of the power of northern Russia, extends to 1461, when Orthodox Russia was divided into two metropolitansates. During this period, Russia was governed by the line of Peter-Bede, of whom begins with Cyril III (1242-49), and closes with St. Gona (1448-61). Among these metropolitans, St. Pioter (1308-26), St. Alexei (1354-78), and St. Gona (1448-61) were raised to the honour of the altar of the Russian Church. The latter fought against the Tatars; while several Russian princes suffered martyrdom for their Faith and were canonized. Some few missionaries attempted to spread Christianity among the Tatars. In 1329 two Russian monks, Sergei and Germanus, founded the famous monastery of Balaam, on an islet of Lake Ladoga. In the second half of the fourteenth century St. Stephen, Bishop of Perm (d. 1396), preached Christianity to the Zyrians. The efforts of the Russians, however, to win Lithuania over to the schism were not crowned with success. During this period, there were eighteen eparchies in Russia. The Russian bishops gradually leaned towards Moscow, which had aspirations to spiritual supremacy. The moral and intellectual conditions of the clergy were very low. Towards the latter end of the fourteenth century, there arose the heresy of the Strigolniki, who rejected the hierarchy. Monasticism attained its highest development, there appearing 180 new monasteries. St. Sergei Radonejko, dead in 1392, and St. Joachim, who represent as endowed with supernatural powers, became the legislator of the new monasticism. At Sergievsko, 40 miles from Moscow, he founded the celebrated monastery of the Most Holy Trinity, a
great religious and national monument of Russia. The monasteries at this epoch contained possibly 300 religious.

The third period is from 1481 to 1589, when the Russian Church was divided into the two metropolitanates of Moscow and Kieff. The former was bounded by the frontiers of Great Russia, and was strictly Russian and Orthodox. That of Kieff attempted to assimilate the culture of the West, and developed great literary activity. In the metropolis of Moek (now Tihon of Yaroslav) died in 1612, was appointed for the conversion of the Volungi and of the Ostiaki of the Government of Perm. The monks of the monastery of Solovka evangelised the Lopari, in which efforts the Blessed Theodoterus (dead in 1577) and the Blessed Tihon Petchenski (1496–1538) distinguished themselves. In the work of the conversion of the pagans of the Caucasus and the Kalmucks, George (Guri) Rugotin became famous. He died 4 Dec., 1563, and was canonised by the Russian Church; so also was the archimandrite Barsonous (dead in 1576, and Germanus (d. 1567). Other Russian monks devoted their energies to the conversion of the pagans of the Bessarabian Despoin.

The Russian Church became more and more separated from the Greek Church, and towards the end of the fifteenth century refused to receive Greek metropolitanans and bishops. Among the metropolitanans of this time, Macarius (1442–63), and the energetic Timothy, who, a mere boy in 1473, were distinguished by the extent of their learning. In the Metropolitanate of Moscow there were ten eparchates. The clergy were very numerous, and many of its members, unable to subsist in the villages, lived a vagabond life at Moscow, to the detriment of the services and of the liturgy, with a view to forming the clergy there was convened at Moscow in 1551 the famous Council of the Hundred Chapters (Stoigial). Monasticism spread more and more. From the fifteenth to the seventeenth century there appeared three hundred new monasteries, which accumulated enormous wealth. The Blessed Nil Sorski (1433–1508) made himself the champion of a reform among the monks, which implied on their part the renunciation of all real property and seclusion in the monasteries. His doctrines found numerous adherents, among whom was the Blessed Joes of Velodov (1503). Many of them took the habit and were venerated as saints. Among the more famous of these, were Alexander Svirski (dead in 1533) and Daniel of Pereiaslaal (d. 1540). The want of religious instruction favoured superstition and the germination of heresies. In the fifteenth century there arose in the heresy of the Judaisers (shikovatnyiasshce), against which the Archbishop Gennadius (a saint who died in 1505) and the Blessed Joes of Volock struggled with much energy. In the sixteenth century Matwei Baksin and Theodosius Koei taught rationalist doctrines, abjuring the sacraments and ecclesiastical government, which evoked refutations by anathemas from Maxim the Greek, and from the monk Zinovi Otenaki. The Protestants established themselves at Moscow.

There were fifteen metropolitanans of Kieff, from Gregor the Bulgarian (1458–71), who, according to Golubinski, after embracing the union, returned to the Orthodox Church, to Osniphorus Dvietchak (1579–98), who was succeeded by Mikhail Ragosa — the latter having embraced the Union. The Orthodox of the metropolitanate, after the Union of Brest, fanatically opposed the progress of the Unions. Russian writers mention the unionists, among the champions of Orthodoxy against the Union, Prince Andrei Kurbiski and Prince Konstantin of Ostrog. The followers of Orthodox also established confraternities for the printing and dissemination of polemical works, and to oppose Catholic influence through the schools. For want of bishops and priests of their own, members of the Orthodox Church passed over to the Union. In 1620, however, Thoetro, Patriarch of Jerusalem, named as his successor Borecki Metropolitan of Kieff, and six members of the Orthodox Church as bishops respectively of Polotak, Vladimir, Lutak, Przemysl, Chelem, and Pinsk; and thus the Orthodox hierarchy was re-established. In the domain of theology the sixteenth and seventeenth centuries were full of controversy, written by Orthodox theologians, to combat the arguments of the Catholics and Uniates. The most salient personality of the Orthodox hierarchy of Kieff during this period was the Metropolitan Peter Moghila (d. 1646).

The fourth period of the Russian Church is that of the Patriarchate of Moscow (1589–1700). The Patriarchate of Moscow was created in 1589 by Jeremias II, Patriarch of Constantinople. The first patriarch was Job (1589–1605); he was succeeded by Ignatei (1605–06), Hermogenes (1606–09), Filaret Romanoff (1609–13), Jonas (1609–15), Joseph (1609–40), Nikon (1652–66), Josephat (1667–72), Pitirin (1672–73), Joschim Saveloff (1674–90), and Adrian (1690–1700). Among the most famous of these mention should be made of Filaret and Joschim, bitter enemies of Catholicism; and of Nikon, who with uncurbed energumens upheld the rights of his Church against the usurpation of the Uniates. On his account he was deposed in 1666. The patriarchs formed at Moscow a court, which, especially under Filaret Romanoff, was a rival of that of the tsars, both as to wealth and authority, and which for these reasons was suppressed by the tsars. The patriarchs exercised superintendence over the metropolitanans and over the bishops, the number of whom was increased and diminished by turns. After the establishment of the patriarchate, Novgorod, Kasan, Roestoff, and Kutki became metropolitanans, and Susdal, Ryasan, Tver, Vologda, and Smolenak were made archiepiscopal sees. The number of dioceses was fixed at eight. In 1620 Siberia was given an episcopal see at Tobolsk. In 1682 the Tsar Feodor Alexandria proposed the establishment of 12 metropolitanans and 72 dioceses; but a council of bishops reduced the latter number to 94, later to 22, and thereafter to 14. There was a large number of bishops and aaeas, and the number of new dioceses, and at the end of the seventeenth century the patriarchate of Moscow had 13 metropolitanans, 7 archbishops, and 2 dioceses.

Meanwhile the tsars, seeing the growth of the influence and power of the Church under the rule of the patriarchs, adopted the policy of diminishing the prerogatives of the clergy. The Tsar Alexis Mikhailovitch published a statute (ulazhenie) which prohibited the further acquisition of property by the clergy. The judicial position of the clergy received another blow by the promulgation of the so-called monastyrskiy prizak (monasteries endowment). They were deprived of the diminutio capitis with evident displeasure; and when Nikon, Metropolitan of Novgorod, was raised to the patriarchal dignity in 1652, protests were redoubled, and the conflict between the patriarch and the tsar became acute. The bishops, who were partisans of the tsar, had the support of the Greek hierarchy. The Council of Moscow, to please the tsar, deposed the patriarch, who died after a long captivity, at Bielo-oxero, in 1681. With the death of Nikon the Russian Church was yoked to the chariot of the State. The Peter the Great found that the patriarchate was powerless, and in 1721, in order to realize his purposes; and accordingly, at the death of Adrian in 1700, he suppressed it. The Patriarchate of Moscow had succeeded in uniting the Orthodox Church of Russia. After the convention of 1686 between Russia and Poland, which made
the tsars of Moscow masters of Kieff and Little Russia, the Patriarch Joseph named Gedeon Tochetvertinski metropolitan of Kieff, and in 1687 Dionisius, Patriarch and Hieromartyr, recognized the dependency of the Metropolitanate of Kieff upon the Patriarchate of Moscow.

In the seventeenth century under the Patriarch Nikon a great schism broke out in the Orthodox Church, called the Schism of the Old Believers. The liturgical books in use in the Russian Church were repelled with horror. Their correction was an urgent necessity, and had been undertaken in the sixteenth century. The fanaticism opposed this "corruption" of the sacred texts, and Maxim the Greek, who had worked upon it, paid for his participation in the work with a long imprisonment. Under Nikon in 1654 a council held at Moscow recognized the necessity of the reform in question. Accordingly the liturgical books were corrected, but many Russians, influenced by the monks, refused to accept the corrected versions. It began to be rumoured that Antichrist, personified by the pope, had in view the destruction of the Orthodox Church, through the Latin Catholics of western Russia. But a council held at Moscow in 1666 approved the reform of Nikon, and pronounced its anathema against those who had not accepted his decisions. Anathemas, however, were like the severity of the government, without effect against the clergy of the official Church who were averse to the reform withdrew to solitary places, and founded clandestine monasteries, among which those of Vyg, Starodub, and Vyatka became famous. The more violent schismatics were burnt alive or decapitated. But persecutions invigorated the schism, called in Russian ruskia, whence the name of its adherents, Raskolniki.

The fifth, called the synodal period begins with 1700, and extends to the present time. At the death of Adrian (1700), Stepan Tavorski, Metropolitan of Rysaan, and a learned theologian, was appointed patriarchal vicar, and charged to reform the entire constitution of the Russian Church. Tavorski found an excellent co-operator in Theophanus Prokopovitch, who was Bishop of Pakof in 1718, and who, although educated at Lemberg, Cracow, and Rome, and according to some, a convert to Catholicism, nourished a bitter hatred against the Catholics. Tavorski and Prokopovitch the task of preparing the "Ecclesiastical Regulations" which became the Magna Carta of the Russian Church. This code was finished in 1720. It is divided into three parts, concerning respectively the functions of the synod, the metropolitan, and the jurisdiction of the bishops and their members. The synod was solemnly opened on 14 Feb., 1721. By the "Ecclesiastical Regulations", the tsar is the supreme judge of the ecclesiastical college. His representative in that capacity was a layman, who in a document of 1722 is called the eye of the tsar. This functionary, bearing the title of Ober-Prokurator, was to be chosen preferably from the military class.

The synod in the early period of its existence had ten members, besides the president, and maintained its ecclesiastical character. After the death of Peter the Great, however, that ecclesiastical character was lost by degrees, and the synod became a vast political bureaucracy. The bishops were at the mercy of the procurators-general, who at times, as in the case of Prince Shakhovski, regarded the synod as a political institution, and sometimes maltreated the prelates who displeased them. Peter the Great, who made public profession of atheism, as Tochevski (1768–74), or of rationalism, as Prince A. Golycin (1803), the Russian Church suffered humiliation under the lay rule of the synod (see the important work of Blagojudoff, an ex-professor of the Ecclesiastical Academy of Kazan, on "The Procurators of the Holy Synod"). In 1881 there was called to the government of the synod Konstantin Pobedonostseff, a man of great culture but of reactionary views, who wished to establish the monastic bishops in Russia in the Orthodox Church. The epoch of Pobedonostseff was one of complete thraldom for the Russian Church. His dictatorship however came to an end in 1905, when the edict of toleration was promulgated. The Liberal Russian clergy attacked the synod and the anti-canonical constitution of the Russian Church in turn, and demanded the re-establishment of the patriarchate. The Government proposed the convocation of a great national synod, to return its liberties to the Church of Russia and to give it a new constitution, but this purpose was frustrated by the fracture between the "white" (secular) and the "black" (regular) clergy, by the triumph of the revolutionary parties, and by the outbreak of the revolution. The synod continued to exercise its deleterious authority under various procurators: Prince Obolenski, Ivoseki, Lukianoff (a mental specialist), and finally, in 1911, Count Vladimir Sahier, a friend of the provisional government and Pobedonostseff, but a man of broader and more liberal ideas.

Other changes were made in the eparchies. When the synod was established, there were 18 eparchies and 2 vicariates in Russia; in 1764, the number of the former had increased to 28, and to 30 at the beginning of the nineteenth century; the latter, which until then had been under Nicholas I, and became 65 in our day. The eparchies are ruled by metropolitans (Saint Petersburg, Moscow, and Kieff), archbishops, and bishops. According to the most recent statistics, there were 133 Russian bishops, including the bishop-vicars of the eparchies, and the bishops without a charge. In regard to the moral character of the Russian episcopate, and concerning the various institutions of the Russian dioceses, see the present writer's work "La Chiesa russa", pp. 105–160. The Russian clergy, which is divided into two castes, the "white" clergy, or seculars, and the "black" clergy, or regulars, has not acquired, among the Russians, the moral prestige that the Catholic clergy has acquired in Catholic countries. According to the latest statistics, there are in the "white" clergy 45,000 priests, 2,400 archpriests, 15,000 deacons, and 44,000 singers, while there are 80,000 churches and chapels in Russia. The Church of Russia exercises its ministry over more than 90 millions of Orthodox faithful; but it is rendered incapable of accomplishing its mission by poverty, want of education, the lack of sound vocations, the oppression of the Government, contempt and social isolation, family disorganization, and the secondary duties of the clergy. In many cities there are to be found priests of culture and in comfortable circumstances; those who work in the rural parishes are deserving of pity and compassion.

In the eighteenth century, the "black" clergy suffered vicissitudes that greatly reduced the number of monasteries and monks. Peter the Great especially and Anna Ivanovna treated the monks with the greatest severity. Nevertheless the "black" clergy preserved their moral and economic superiority in Russia; bishops, rectors, and inspectors of academies and seminaries are taken from the ranks of the "black" clergy, and the monasteries still possess immense riches. According to the most recent statistics there are 298 monasteries that are recognised and subsidized by the Government, while there are 154 not subsidized (zatamni). There were 9317 monks and 8266 novices. There were 400 religious houses of women, inhabited by 9000 women. Many of these religious houses are of the Russian Sisters of Charity, who maintain 184 hospitals, and 148 asylums. The life of the regular clergy, except in some few monasteries of strict observance, is very lax.

The Orthodox Church receives its education in the ecclesiastical schools, preparatory for the seminaries.

RUSSIA 265

RUSSIA

VII. RUSSIAN LITERATURE OF THE TIME OF PETER THE GREAT; VIII. LITERATURE OF RUSSIA IN THE EIGHTEENTH CENTURY; IX. LITERATURE OF RUSSIA IN THE NINETEENTH CENTURY; X. CONTEMPORARY RUSSIAN LITERATURE.

I. RUSSIAN LANGUAGE.—Russian is a Slav language belonging to the Indo-European family. The dispersion of the Slavs facilitated the formation of various Slav dialects, of which Shafarik counted twelve, although other writers recognize only six or seven. The Slav dialects are divided into the South-Eastern dialects and the Western dialects. To the former, which culminate in the Bulgarian, belong the Russian, or rather the Russian dialects of the ancient Great and White Russia. Russia has many affinities with the Bulgarian and Servian languages, because Russia received her primitive literature from the Bulgarians and Servians. The absence of documents, however, makes it impossible to define with precision the character of the primitive language of Russia, or rather the relations between that language and the Russian of literature. According to Sremski and Lavrov, the similarity between the two languages was almost complete, and consisted in turns of expression rather than in grammatical forms. Before the thirteenth century, the literary and commercial language was one. But in the fourteenth century the ecclesiastical language began to differ from the literary language and this difference grew considerably in the fifteenth and sixteenth centuries. The Paleoslav or ecclesiastical language, however, varied little in either case from the language of the people. In time Russia underwent local changes of form that gave rise to the dialects of Kieff, Novgorod, Vladimir, and Moscow. The Varegii, the Greeks, the Tatars, the Lithuanians, and the Poles left traces of their political domination on the language of Russia, and in the times to follow this influence increased. The question of the primitive language of Russia is connected with the ethnological question, and in the nineteenth century gave rise to lengthy and spirited polemics which, however, led to no definite results. A leading work for the study of this controversy is Buslaeff’s “Historical Grammar of the Russian Language” (1858). Political and nationalist questions also enter into the philological researches concerning the primitive language of Russia. The Ruthenians, or Little Russians, claim that their language is the only one that can be accepted as the primitive Russian literature should rather be called Ruthenian. On the other hand Sobolevskii and the nationalists of Great Russia declare that the present Russian is not the primitive language of Kieff. This philological controversy between the nationalists of Little Russia and those of Great Russia has not yet terminated.

II. ANCIENT POPULAR LITERATURE.—From its earliest history Russia has possessed a literature that was handed down by tradition from generation to generation. It was not before the seventeenth century that this literature took a written form. The collection of Russian proverbs was started in the eighteenth century Daniloff published the first collection of Russian byline: at the end of the century and at the beginning of the nineteenth. Tuchkoff, Popoff, and Macaroff published the first collections of popular songs. Up to the present day so much information on the religious, civil, and social life of primitive Russia, great light was thrown by the studies of Klaidevitch, Seregin, Sakharoff, Kirejewski, Bielski, Athanasieff, Kowtonoroff, Makov, Buslaeff, Bessonoff, and Veselovski. The Russian songs and legends are classical. There are the mystic or ritual songs (obriadnaya pieta), which were sung in the sacred games, and on
other solemn occasions; they conflate many memories of the ancient pagan feast, celebrating the glories of Bash-Bog (the sun-god), of Koliada (traced by Russian writers to the Latin Calendar), and of Ovwen. Others (I believe the majority, among modern people) do not observe this, but I am happy to note that there is a movement which is trying to revive these ancient practices. They believe that the birth of Jesus Christ (sviatolouchnya piemia) or the birth of the sun (khvorovodnya) is the most important event of the year. To this day, the period of the birth of the sun is celebrated with great joy and festivity.

The blythe are the most beautiful treasures of this popular literature, of which form the heroic cycle. The term blythe is derived from the verb blyot (it was), and etymologically signifies the recital of that which happened in times gone by. They tell of the deeds of the legendary heroes of primitive Russia. History, legend, and mythology together furnish the material of these epic songs. In them the Russian heroes are called Bogatyry, a name that some believe to be derived from Bog (God), as if they were descended from the same god, while others believe that it is derived from Tatar or Mongolian; and yet others from the Sanskrit (bhoga, force, happiness). The heroes who are immortalized in the blythe belong to the epoch of Vladimir the Great, or to more ancient times, and partake of a mythological character. These heroes, with whom the times of the epoch of Vladimir the Great are identified by a mythological character, are Sviatogor, Mikula Selishinovitch, Volga Sviatoslavitch, Sukman Odzhevatich, and Don Ivanovitch; the historians of Russian literature designate them by the epithet of "Bogatyry luboslye" (bogatyry luboslye) and "Bogatyry malakhe" (bogatyry malakhe) belonging historically to the epoch of Vladimir; their names are Elia Muromce, Dobrynja Nikititch, Alesha Popovitch, Solovej Budimirovitch, etc. Kieff, is, to speak, their geographical centre, and Vladimir their star. In the Russian chronicles they are mentioned between the eleventh and thirteenth centuries. Elia of Muron lived at the end of the twelfth century, and his remains rest in the grotto of the sanctuary of Petcherskaia at Kieff. They combat the monsters that assailed Russia from within or from without, that is, paganism and thieves among the first, and the Tartars among the second. The historical, philological, and poetical importance of these ancient monuments of literature is very great. Other blythe of later date, more commonly called historical songs, refer to the Tartar invasions, to the period of Ivan the Terrible, and also to that of Peter the Great. The songs and legends of Little Russia are called dumy (elegies, balladas), and celebrate the struggles of the Cossacks and Little Russians against the Turks or Tatars and the Poles, and the union of Little Russia with Great Russia. The songs that refer to domestic life are called by the name of piemia. They sing the young brides and games, and the sad as well as happy events of domestic life, while they preserve many traces of paganism. The best collections of them are those of Tchulkoff (St. Petersburg, 1770–74); Novikoff (Moscow, 1780–81); and Sakharoff (St. Petersburg, 1838–39).

Popular literature belong the fanciful novels called skazki, which resemble somewhat the stories of the Fates. Their protagonists are strange beings created by the ardent popular fancy, Baba-lyga, serpents with six or twelve heads, stags, horses, etc. The forces of darkness are personified. At times the material element predominates in them entirely; and again it is blended with Christianity. The oldest novels are characterized by their simplicity and by the repose of their recital. Some of them, like the one entitled "The Judgment of Semjaks", are satirical compositions. Others are derived from Western novels, especially the Italian. The proverbs also belong to popular literature. They are called poslovicy, and are very abundant, the first complete collection of them having been published in 1837. They are the spontaneous product of the wisdom, caustic spirit, and rudimentary culture of the Russian people, and reflect the various historical ages of Russia. Some of them date from pagan times, others emanate from the people's knowledge of Holy Scripture, and others originate in the events that produced the greatest interest in the popular imagination. To popular literature belong also the enigmas or riddles (zagadki), collected by Khudiakoff (Moscow, 1861) and by Sadovnikoff (St. Petersburg, 1876); the incantations (sajovory), the conjurations (zakliatia), and the lullabies (plachy), which are most useful for the study of Russian folklore and primitive Russian life.

III. FIRST MONUMENTS OF RUSSIAN LITERATURE

The first written literature of Russia is coincident with the conversion of Russia to Christianity. Bulgaria was the first Slav educator of Russia, and the first Slav Scriptures, or Byzantine writings, were Bulgarian. The first spoken literature of the Slavs, or "russkie" (posadniki) of the city. This valuable document was published by Vostokoff in 1843. Ancient Russian literature is of an eminently religious character. The greater portion of its monuments are sermons, homilies, lectures, lives of saints, pilgrimages; even the romance works, such as the chronicles, have a religious tone. On the other hand, owing to the fact that the Russians received their Christianity from Byzantium, their literature was openly Byzantine in character, the early Russians either translating the Byzantine works, or being inspired by the spirit of those works, and writing as if they were Byzantines. Primitive Russian literature, however, was subject also to other influences. The Slav influence was due to the Bulgarians and Servians, who, until the fifteenth century, gave many cultured men to Russia, e.g., the Metropolitan Cyprian and Gregor Camblik. Greek influence lasted a century or more, and flourished in the seventeenth and eighteenth centuries.

Russian literature in the beginning consisted of translations from the Greek and of original works. Its development was very slow, because the prices of codices were very high. The copying of books was considered not only a useful contribution to culture but a supernatural work. The Princess of Polotak, St. Euphroyene (twelfth century), copied books, a work to which monks, and even bishops, devoted themselves. Russian monks were wont to go to Constantinople, or to Mount Athos, and there to become an anastasios, or chronicler of the first Russian, or Pitra. The translation of all the books of the Holy Scriptures was carried out in 1499, by order of Gennadius Gonzoff, Archbishop of Novgorod (1484–1504).

Simultaneously with the Holy Scriptures, the writings of the Fathers of the Church were greatly in vogue, especially those of St. John Chrysostom. Highly esteemed also were the doctrinal explanations of St. Cyril of Jerusalem, the canons of St. Basil, the homilies of St. Theodore the Studite, the discourses of St. Athanasius against Ariamis, the
discourses of St. Gregory of Nazianzus, the “Klimax” of St. John Climacus, and the works of St. Isaac the Syrian, St. Ephraem the Syrian, and St. John Damascene. Until the seventeenth century, the theological writings of St. John Damascene were the sources of Russian Orthodox theology. The great popularity of the works of the Fathers gave rise to the formation of collections of extracts from their discourses, and to annotated copies, with explanations, for the study of their writings, called shorniki, of which there were several: “Zlatoust”, a collection of moral sermons and homilies (112), mostly from St. John Chrysostom; “Margarit” another collection from St. John Chrysostom, included in the monologue of the Metropolitan Macarius, and published for the first time at Ostrog in 1596; “Ismaragd”, a collection of sermons and homilies from St. Basil, St. John Chrysostom, St. Ephraem, St. Gregory the Great, and St. Cyril of Alexandria; “Andriatza”, a collection of the homilies recited by St. John Chrysostom at Antioch; “Zlataya ciep” (golden chain), a

in the sixteenth and seventeenth centuries. One of the most famous novels, taken from the literature of Constantinople, is the history of Barlaam and Josaphat. At the end of the sixteenth century, the influence of Polish literature helped to spread in Russia two works that were much in vogue in the West, the “Graeca Romanorum Monuments” of the Venetian, “The Apocryphal books of the Old Testament (story of Adam and Eve; story of the Tree of the Cross; story of the Just Enoch, etc.), and those of the New Testament (story of Aphrodian on the miracles in Persia; dispute of Christ with the Devil; conversations of Adam and God, of Jesus and Limbo, etc.) were also widely disseminated in the literature of that time.

There were also translated into Paleorussian the “Elucidarium sive dialogus de summa totius religiosi christiani”, attributed to Honorius of Autun by Migne; books of magic and books of astrology (“Gromnik” “Mołniak”, “Koliadnik”, etc.). Under the influence of this literature, religious songs were created that became very popular with the people (Dukhovnye stikh). These little poems or songs treat of the most varied subjects, and it is very difficult to derive them into different classes. They are a mixture of religious character and often refer to a more popular type. The references to St. Michael the Archangel, to the sufferings of the damned, to the birth or passion of Jesus Christ, to the Russian saints, etc. And besides these poetical productions sprang up the hagiographical legends, of which the most known refer to St. Nicholas of Myra, St. Panteleev, and St. Cassian. The deep knowledge of Archenskii and Sobolevsky throw a great deal of light on the Russian versions of the Fathers and of the Byzantine writings.

IV. LITERATURE FROM THE ELEVENTH TO THE THIRTEENTH CENTURIES.—Russian literature, properly so called, from the period of the advent of Chris
tianity in Russia to the time of Peter the Great, comprises discourses, instructions, and letters that are intended to exude Christian sentiments, and to draw the people from pagan practices; polemical works, directed at first against the Latins, and later against the first Russian heretics; lives of saints, chronicles, and historical works, pilgrimages and voyages, and juridical monuments. There is almost a total absence of poetry. The first centres of culture were Kieff and Novgorod; in the sixteenth century, Mosco

ow. Among the writers who left a name for sacred eloquence in the period from the eleventh to the thirteenth centuries were Makariy, Metropolitan Zhiati, Archbishop of Novgorod (1035–59), whose discourse is a brief recapitulation of the truths of the Faith; St. Hilarius, Metropolitan of Kieff in 1051, whose discourses contain very valuable data for the early history of Russian Christianity; the Blessed Theodoreus Pecherski, who wrote discourses for the people and the monks; Nicephorus, Metropolitan of Kieff (1104–20), whose discourses and letters, written in Greek, were translated later into Russian; Cyril of Turoff (1171–82), a brilliant writer who, on account of his natural and vigorous eloquence, resembling that of St. c. Chrysostom, is called the Chrysostom of Russia. His discourses, homilies, writings on monastic life, and prayers are among the most important monuments of the ancient ecclesiastical literature of Russia.

The polemics against the Latins found almost their only exponent in the monk Karamzin, who on the beginning governed the Russian dioceses. Leontius, metropolitan (992–1008), wrote against the Arians; George, metropolitan (1065–73), wrote a “Dispute with a Latin”, in which the various pretended innovations of the Roman Church are attacked; Basil, metropolitan of Kiev (1186–90), is the author of a Latin “Lamentation” against the demands of the Latins, and III, in which the Latins are reproved only on account of the insertion of the Pitrae in the Creed. The letter on the Faith of the Vareghi (or Varashtskoi
scription), which by some is attributed, although without strong arguments, to St. Theodosius Petcherski, is believed by some to be of Russian origin. The first Russian hagiographers mention should be made of Jacob, a monk of the Petcherskaia hermitage, who wrote an account of the martyrdom of Sts. Boris and Gleb, and the panegyric of St. Vladimir; of Nestor, the most famous of the ancient Russian writers, a member of the Petcherskia hermitage. He is the author of the lives of Boris and Gleb, of the Blessed Theodosius of Izbosk, and of a chronicle ("Li-epism") The original of the chronicle of Nestor has not come down to us; the most ancient copy of it is that of the monk Lawrence, made in 1377 for Demetrius, the Portaitich, Prince of Suzdal, and the first Russian chronicle Otherchroniclers, whose names and works have not been handed down to us, wrote before him at Novgorod. The national and literary importance of the chronicle of Nestor is very great. The Russians rightly consider it as an epic history, warm with the love of country. It finishes with the year 1110, but was continued by other writers, under various names, as "Chronicle of Kieff," "Chronicle of Volyinia," "Chronicle of Suzdal," etc. They are of an eminently religious character, and abound in texts from the Scriptures and in ascetic considerations.

But what in Russian national sentiment predominates is the journey of the Kilgumeno Daniel (thirteenth century) to the Holy Places: before the Holy Sepulchre he prays "for all the land of Russia." Anthony, Archbishop of Novgorod, visited Constantinople four years after the taking of that city by the Latins (1204), and left a short but very important description of its churches and monasteries.

To profane literature belong the "Testament" of Vladimir Monomachus, written in 1099, in which its author gives a recital of his enterprises; and the celebrated account of the battle of Igor ("Slovo" or "Polku Igorievie"), which was found in 1795 in the library of Count Musin Pushkin. It is the only poetic work of the Russia of the princes, and relates the military expedition of Igor Sviatoslavitch, Prince of Novgorod-Sievierski, against the Polovec (1196). It is characterized by the grandeur of its poetical beauty, the simplicity of its descriptions, and love of country. In the twelfth century was written the discourse of Daniel Zatotchnik (Captivus), who, imprisoned in the Government of Olontos, wrote to a prince to ask for his liberty, making a great display of his learning, but his juridical arguments of that age we may cite the "Kutisov Pravda" (Russian code) of Prince Yaroslaff I, and the Greek Nomocanon, translated in the earliest times of Russian Christianity, and qualified with the epithet of Kormicha kniga, corresponding to the Greek σακεμένον. To the nomocanon were added the "Ecclesiastical Regulations" ("Cerkovskie Pravila") of Vladimir and Yaroslaff, which however are not of those princes, at least in the form in which they have been transmitted to us in codices of the thirteenth century. The monasteries were centres of the literary culture of Russia in the eleventh and twelfth centuries; and the Greek-Russian clergy laboured for the diffusion of it. From the Greek clergy came the polemical works, and the hatred of the Latins that became fixed in the hearts of the Russian people. The first Greek polemics which lived in Russia spread the most absurd calumnies against the Latins, and above all the heretical ecclesiastical customs: the Metropolitan George enumerated twenty-seven points of divergence between the Greeks and Latins. The thirteenth century is very poor from the standpoint of literature. The Tatar invasions stopped the progress of culture, and prevented intellectual work. Among the literary monuments of that century are cited a letter of Simon, Bishop of Vladimir (1215-26), to Polycarp, a monk of the Petcherskia hermitage; the Liulikovo (1508) of Smolensk, a most important historical document; the sermons of Serapion, Bishop of Vladimir (1274-75), and a synodal and canonical decision of Cyril II, Metropolitan of Kieff (1243-80), which is inserted in the Kormicha kniga.

The Literature of Russia in the Fourteenth to the Sixteenth Centuries.—In the period from the fourteenth to the sixteenth centuries, literary culture, paralysed by Tatar oppression in the region of Kieff, continued to flourish at Novgorod and Pskof, and from there was carried to other centres, viz., Vladimir, Rossof, Murman, Yaroslaff, Ryazan, and Smolensk, which received the name of the Third Rome. In the fourteenth century sacred sermons were written by various authors, among whom were Peter, Metropolitan of Moscow; Alexei, another metropolitan of Moscow (1293-1377) who, in a codex of the Gospel which he transcribed, corrected the ancient Slav version in many points, by the Greek original; Matvei, Bishop of Sarai; the metropolitan Cyprian (1376-1406), a Servian by birth, who also left various letters and translated the Psalter, the Missal (Sluzhebnik), the Nomocanon, etc.; the Blessed Cyril, founder of the monastery of Bieloros, the author of several letters and sermons, of Demetrius Donskoi; Basil, Archbishop of Novgorod (1331-1352), who wrote a letter to Fedor, Bishop of Tver, to convince him of the existence of a terrestrial paradise. Brief descriptions of Constantinople and its churches in the fourteenth century were left by Stephen, a monk of Novgorod, by Ignatius, a deacon of Smolensk, and by Alexandr Djak ("judge," "magistrate"). Among the novels special mention should be made of the "Zadonshina," written by Sofronio or Sofonio of Ryasan, an epic story that relates the military acts of Prince Demetrius Donskoi, who vanquished the Tatars at Kieff at the battle of Krasave in 1380. In the fifteenth century the beginning of heresies in Russian Christianity, which originated in the decadence of monastic asceticism as well as in the gross ignorance of the clergy and laity, opened up new fields to Russian religious polemics. Photius, Metropolitan of Moscow (1408-1411) and the grandson of the Metropolitan of Kieff (1416) composed letters and moral sermons; Gennadius, Archbishop of Novgorod (1485-1504), wrote against the sect of the Judaisers, which originated in that city about 1471; the Kilgumeno Josef Sanin of Polotak assailed the same sect in his treatise "On the Monastery" ("slava "monasteria"). Nil Sorski (1433-1508), founder of a hermitage on the banks of the Sora River, is the author of writings that were directed towards the reformation of the ideals and the life of Russian monasticism. Among the travellers of this period Zoeimus, hiero-deacon of the hermitage of St. Sergius, and a merchant, Basil, left accounts of their pilgrimages to the Holy Land. Simeon, hiero-monk of Suzdal, accompanied Isidore, Metropolitan of Moscow, to the Council of Florence, and left an interesting recital of his voyage to Italy, and a short but important account of the council, which is one of the monuments of the Russian polemics against the Latins. Anthony Nikitin, a merchant of Tver, went to India through Persia in 1466, returned to his country in 1472, and in the account of his travels gave important information on the religious beliefs of the people of India. In historical literature, besides the valuable sketches of the Chronicle of Flor, the most noted is the memoir of the foundation and the taking of Constantinople, which was very popular among the Russians.

The sixteenth century, as Forthreff rightly states, was one of criticism and restoration. Its literature, always eminently religious, proposed to revive the
ancient customs, and the ancient traditions, and to restore religion and the family. The most famous and most learned champion of these reforms was Maximus the Greek, born at Arta, in Albania, and educated in Italy. He entered monastic life on Mount Athos in 1518, and in 1519 he took an active part in the religious life of the country, and in the correction of the liturgical books; he suffered a painful imprisonment in various monasteries, from 1525 to 1553, and died at the hermitage of St. Sergius in 1556. A most learned theologian, he wrote polemical works against the Greeks, the Jews, the Judaisers, the Mohammedans, and the Latins, especially in opposition to the supremacy of the pope and to the Filioque; he combated astrology, and wrote short works and discourses on moral subjects. Among the Russian prelates of the sixteenth century, Daniel, elected Metropolitan of Moscow in 1522, acquired fame. He was the author of sixteen discourses that prove him to have read assiduously, and to have had a profound knowledge of patristic literature. The most important monument of the literature of the sixteenth century is the "Domostroi", and Sylvestre, a contemporary of Ivan the Terrible; Sylvestre was, however, the compiler rather than the author of the work. It is a book of a moral character, in which are propounded the rules for living according to the precepts of the Faith and Christian piety, the duties of man as a member of the family, and the way to govern the home well, and to care for domestic economy. The "Domostroi", therefore, is a compendium of the duties of a Christian man, and at the same time a true picture of the social and domestic organisation of Russia in the sixteenth century. Another great work, which had remained unpublished until now, but which the Archontographical Commission of St. Petersburg is now bringing to light, is the "Tchet'yi Minei" of the Metropolitan Macarius of Moscow (1642–64). From the beginnings of its literature, Russia possessed lives of saints, the number of which increased from century to century. The Metropolitan Macarius collected into a vast work the lives of all the saints of the Greco-Russian Church, adding panegyrics and discourses in their honour, and also whole books of Scripture, with commentaries, writings of the Fathers, and synaxaria, so that his hagiologies are almost a complete répertoire of medieval literature, a mere simple hagiological collection. To the same century belong the hagiological legends, which are lives of the saints, or episodes in them, embellished by popular fancy, examples of which are the legends of the Tseretitch Peter (thirteenth century), of St. Marcus, of Macarius, and of Prince Peter of Murom, and of his consort, Fevronia.

Prince Andrew Kurbski, a warm defender of the Orthodox Church, translated the dialectics and the Πηγὴ γράμμων of St. John Damascene, and wrote a brief history of the Council of Florence and a history of the Church, with which correspondence; these letters are preserved to our day. An important work of religious polemics was written by the monk Zinovi of Otna, who refuted the heretical and Judaistic doctrines of Kosol. The title of the work is "Istiny pokazanie" (demonstration of the truth), and it consists of fifty-six chapters. Of the sixteenth century there are also two small works, written in refutation of Protestantism, which at that time was beginning to spread in Russia. Among the Russian pilgrims who visited the Holy Places and who wrote an account of their travels the most distinguished are Trifon Korobeinikoff, and George Grekov, who went to Jerusalem in 1582.

VI. LITERATURE OF LITTLE RUSSIA AND GREAT RUSSIA IN THE SEVENTEENTH CENTURY.—The seventeenth century witnessed the Renaissance of Little Russia, which became the instructor of Great Russia. Under Catholic and Polish influence Little Russia drew near to the West, assimilated Western science, and modelled its schools upon those of the Latins. The "Union" of Brest in 1596 gave an efficient impulsion to Orthodox Christianity. Peter Mogilas, established to open schools and printing-offices for the publication and dissemination of polemical works; among them those of Lemberg, Vilna, and Kief were famous. Scholastic theology and philosophy entered into and dominated the Russian academies and seminaries. In the sixteenth century the Jews, the Judaisers, and the Mohammedans were expelled from Russia, and in the teaching of theology Peter Mogilas, Metropolitan of Kief, transformed into a superior school of theology the school established by the Confraternity of the Church of the Apparition of the Lord. The works of St. Thomas Aquinas exercised a great influence on Orthodox theology, and in the academy of Kief the Immaculate Conception was upheld. The literature of the religious polemics against the Latins, to which the Union of Brest gave rise, is very rich. In 1597 was published the "Ekthesis", or Orthodox history of the Union of Brest; Kristof Orszanski, under the pseudonym of "Filius", wrote the "Apokryphas", and later the "Perestroga" (admonishment). Meleitus Smotrichik, Archbishop of Polotok (d. 1633), wrote the "Threnoi" and other works of religious polemic, and finally embraced Catholicism; in 1622 Zacharias Kopytenski wrote the "Palinodia", the most important work in this polemical literature. The writings of Meleitus Smotrichik in defence of Catholicism, which he had on other occasions so strenuously opposed, were confuted by Andrew Muskalovski, by Job Borecki, Metropolitan of Kief, and by Gelasius Diplee. Joanna Nikus Galiatowski, rector of the academy of Kief (d. 1606), wrote several works against the Catholics, one of them against the Filioque, confuted the Hebrews in his work "The True Messia" and also wrote several works in refutation of the Koran. Another polemic against the Latins was Lazaras Barnovitch, Archbishop of Tchernigoff (d. 1694); in a work that was directed against the Jesuit Boyne, he opposed the supremacy of the pope and the Procession of the Holy Ghost from the Son.

The first Orthodox catechisms appeared in the seventeenth century, written by Laurence Zizanii and by Peter Mogilas; the latter (dedicated to him), defends the Orthodox Church against the charges of Protestantism; he is considered to be the author of the famous Orthodox Confession of the Eastern Church, approved by the special Council of Jassy in 1643. Among the preachers whom the sacred orators of the East sought to imitate, mention may again be made of Joanna Nikus Galiatowski, who wrote a treatise on the art of oratory, entitled "Kliucht rasumienia"; Anthony Radilovski, higymeno of the hermitage of Kief; and Lazaras Baranovitch. In 1691 there was published at Lemberg the first Slavo-Russian lexicon by Peter Mogilas, who wrote a Slav grammar in 1596, and the grammar of Meleitus Smotrichik was published in 1619. Zizanii added a small Slav dictionary to his grammar, but the first Slavo-Russian lexicon was published by Berynda, hiero-monk of Kief, in 1627. Western influence is revealed also in the poetry of the academy of Kief. Besides the sacred cantata, the "Mysteri" were introduced to the schools and colleges; these "Mysteri" were sacred plays, modelled upon those of the Jesuit colleges. Among the historical works of Little Russia, mention should be made of the "Synopsis", the history of Rus, the "Institut Quod", the "Armonistria" of Kief, the "Energia" or history of the school of Kief, and the "Paterikon" of the Petcherskaia hermitage by Sylvestre Kosenoff, Metropolitan of Kief (d. 1657).
From Kiev Western culture was carried to Moscow, to which city masters and learned men of Little Russia were invited to settle, to write books, and print books; but they did not receive a friendly welcome. Their orthodoxy was suspected; the more so since several of the most illustrious theologians of Kiev admitted with the Latins the dogmatic truth of the Immaculate Conception, and the official monk, of consecration alone to effect Transubstantiation. The suspicion against the purity of their theological teachings became so strong that the Russians turned to the Greeks for masters. In 1685 the Greek school was established at Moscow, and in time took the name of Greco-Slav-Latin Academy. There the leaders of Moscow, monks Ioannikius and Sophronius Likhudes, who had studied in Italy, and who taught Greek literature at Moscow from 1685 to 1694. They wrote many polemical works against the Latins, against Protostates, and against the theologians of Little Russia who leaned towards the Latins, especially against Sylvester Medvediev. In ecclesiastical literature the most distinguished authors were Epiphanius Slavinecki, the first of Russian bibliographers; Arsenius Su-zhanoff, author of "A Voyage to the Holy Land" ("Ploskyatvratia"); Simon Polocki (of Polotak, and also the author of the first Russian work on Orthodox theology ("Vienie vie"y")), and also of sermons that are highly prized, of sacred poems, and of sacred plays; St. Demetrius of Rostoff (1651–1709), one of the most illustrious bishops of the Russian Church, a theologian, historian, poet, polemic, and hagiologist. He was the author of two Orthodox catechisms of a very strong work against the Raskolniki ("Roxsky"), of a diary of his life, the "Tchetseni nepe" (menologie), a work upon which he spent twenty years; many sacred discourses that are appreciated for the simplicity of their style and for their depth of religious sentiment, and, finally, of several treatises on Orthodoxy, the first of which is "Epistola de Rodymii" (1738–1739), who translated into Russian the "Ars Poetica" of Horace, and the work bearing the same title by Boileau. Prince Antichous Dmitrievich (1708–44), a Rumanian in the service of Russia, inaugurated the era of classicism in Russian poetry with his satires, which are clever servile imitations of Horace, Juvenal, and Boileau. Michael Vasilevich Lomonosof (1711–65) deserves to be called the Peter the Great of Russian literature on account of his versatility, of the multiplicity of his works, and of his great literary influence: he wrote treatises on Botanic; On Chemistry (1748), on grammar (1755); he composed an epic poem on Peter the Great, two tragedies (Tamira and Salim, and Damofonte); he translated the Psalms into verse and wrote lyric poems, among which the ode to the Empress Elisabeth has remained famous. Alexander Petrovitch Shamaloff composed many tragedies, some of them with Russian subjects (Yaropolk and Dimiss, Vysheslaf, Demetrius, Mstislav); he founded the national Russian drama, wrote the comedies "Operekun" (The Tutor), and "Likholome" (The Consecrator), composed satires, and in 1769 established the first Russian literary periodical, the "Trudolubiva Ptacha" (The Working Bee).

Among the prose writers, Ivan Posokhoff (1670–1725), in his "Zaviehenie otestchek" (testament of the Fatherland), shows the necessity of well-arranged reforms and a more equal distribution of wealth. "Kniga o skusnoby i bogatstvye" he develops in an original way his theories on political and social economy. Basil Nikititch Tatishcheff (1665–1790) gathered the chronicles, the synazoria, and the historical documents, and subjecting them to critical analysis, wrote the "History of Russia". The academician Schlotters spent forty years elucidating...
the origin and the historical problems of the primitive national chronicles of Russia. In 1728 the Academy of Sciences began the publication of the book of "S. Petersburskaja Viedomosti," under the direction of the academicians Müller, who in 1755 also founded the four years literary periodical, called the "Ehrenreichotzuba sotchinniki." 

VIII. LITERATURE OF RUSSIA IN THE EIGHTEENTH CENTURY.—During the reign of Catherine II French influence upon Russian literature became greater instead of decreasing. The writings of the French Encyclopedists and materialist philosophy became popular, and the "Viestnik in Russian" became entirely imbued with a Voltairean spirit. She did not limit herself to favouring scientific institutions, and to creating new ones, but also to literary laurels. She wrote spelling-books, stories for children, letters on education, comedies, newspaper articles, and several volumes of memoirs in French, in which, with a cynical simplicity of style, she relates some of the ugliest episodes of her unchaste life. During her reign many literary publications were established. The empress herself did not disdain to contribute to the "Viestnik v Rossii" through her "Dionysius Iatviotch Fonvinius (1744–92) wrote comedies which, like the "Brigadier," and the "Nedorelo" (Pupil), became popular in Russia. Gabriel Romanovitch Derzhavin (1743–1816), of Tatar origin, assimilated the classical and modern literatures, and as a lyric poet shocked the height of Voltaire and Lessing. His encomiastic odes are an apotheosis of the reign of Catherine II. In his religious songs, with his "Ode to God" (1784), which the Russians regard as the most beautiful monument of their national poetry, he perhaps attains sublimity of inspiration. His moral and philosophical odes and his Analectes verses reveal in him a great poetical genius. His tragedies "Pozharski," "Tiemnji" and "Euprasia" do not join dramatic quality to their elegance of form. Mikhail Matveievitch Kherskoff, of Wallachian origin, by his poems "Rossiada" and "Vladimir" which have been forgotten, deserves the title of the Virgil or the Homer of Russia. Ippolit Fedorovich Bogdanovitch (1743–1803), in his poem "Dushenka," imitated La Fontaine's "Amours de Psyché et de Cupidon." Basil Ivanovitch Malkoff (1728–98) distinguished himself as a writer of comic poetry. A. A. L. von Rodzianinov published his appendices, "Iabeata" (The Calumny), a comedy by Kapnist (1757–1828), was also among the plays that became popular.

The scientific movement was greatly promoted by the Academy of Sciences of St. Petersburg, by the University of Moscow, and by the Russian Academy, which was founded in 1733. Among those who distinguished themselves in historical work or in the study of the social and political conditions of Russia were Shusherbatoff (1733–90), who wrote six volumes of a "History of Russia"; Bol'tin (1735–92), whose learned work "Observations on the History of Russia," edited by Leclerc was translated by Solovev; Radishasheff (1749–1802), whose "Journey from St. Petersburg to Moscow," describing the miseries of the peasants and the abuses of the Russian bureaucracy cost its author an exile of ten years in Siberia. The archpriest of Moscow, Alekseiev, wrote the first ecclesiastical encyclopedia, while the Bishop Damascenus Rudneff, who died in 1795, published his "Russian Library," which contains an account of Russian literature, from its origin to the eighteenth century. Tchulkoff and Mikhail Popoff collected the monuments of the popular literature of their country.

IX. LITERATURE OF RUSSIA IN THE NINETEENTH CENTURY.—In the nineteenth century, Russian literature freed itself little by little from the yoke of foreign imitation, perfected the language, making it a most adequate means for the expression of the highest conceptions of the mind and the most delicate affections of the heart, and through a number of men of genius, won a place of honour in the history of universal literature. The merit of this transformation, of this new direction of Russian literature, is in no small measure due to Nikolai Mikhailovitch Karamzin (1766–1826), who acquired a great fame in his country through his letters on travels that he made in Europe, his novels, and the part that he took in the establishment of the periodicals "Moskovski Zhurnal" and "Russki Zurnal." But his greatest claim to glory is the "Istorija goda narodov Rossii" (History of the Russian Empire), a masterpiece of style, exposition, and eloquence, which contributed more than anything else to the formation of Russian prose. Historical criticism may find more to say of this work, but the literary merit of it will never be eclipsed. The work formed a literary school, to which belong Ivan Ivanovitch Dmitrieff (1760–1837), an exponent of elegance in poetry, author of poetical stories, satires, and fables, and Ismaillow, who became famous through his "Ostrogozhschina." In the sphere of dramatic poetry, there became famous Ozeroff, by his tragedy "Edipus in Athens" (1804); "Fingal" (1805); "Dmitri Donskoi" (1807), and "Polissena" (1809); the most noted satirists were Gortchakoff and Nakhimoff. But the greatest poet of the Russian romantic school was Alexander Pushkin. He was born of a noble family, V. A. Zhukovski (1783–1852), the master of romanticism in Russia, author of the Russian national hymn "Boze, carja Khran," and an indefatigable translator of Homer, Schiller, Goethe, Bürger, Uhland, Rükkert, Byron, and Scott. His elegies are full of Latin and sentimental reminiscences, imitations of the German, became popular; they reveal in him a vivid poetic imagination.

Ivan Andreievitch Kryloff (1768–1844) owes his celebrity rather to his comedies than to his fables, which, it is true, are imitations of La Fontaine, but are written with so much simplicity, elegance, and richness of style, with such variety of rhythm and expression, that they form a veritable literary jewel, the value of which can be appreciated only by those who have a thorough knowledge of Russian. His comedies, "Modnaja lavka" (The Custom Shop) and "Urok dotchani" (A Lecture to the Mother) owe little literary merit. As a writer of comedy, Alexander Sergeievitch Griboidoff (1790–1839) rose to the pinnacle of the art in a play that is the masterpiece of Russian theatrical composition, "Gore ot um" (The Misfortunes of Having Talent), a work which is full of pessimism on the social conditions of Russia and civilisation generally; many of its verses have become proverbs.

The epoch of Nicholas I, which was one of fierce absolutism, was nevertheless one of glory in the development of Russian literature. Russian genius being oppressed, withdrew within itself, and revealed itself to the world in the works of the authors' animating the Russian soul. Among the greatest poets of this period there stands pre-eminent Alexander Pushkin (1799–1837), whose career was brought to an end in a duel, when his genius was at its height. Melchior Vogtrey rightly considers him one of the greatest poets that ever lived. He began his literary career at the age of fifteen, when he was a student in the lyceum of Tsarskoye Selo. His first lyric poems bear the date of 1814, and are a revelation of his genius. He adopted Byron and Zhukovski for his models. Among those lyric poems his inventive spirit of the celebration of Russian thought, is in great "Roselli," written in 1831, is famous. Of his epic works we may cite the famous "Rusalka, the Prisoner of the Caucuses" ("Kavakazi plennik") in 1821;
the "Fountain of Bahkhtesiberai" (1822–23); the "Tsigan" (1824); "Poltava" (1828), one of Pushkin's most perfect poems, written in glorification of Peter the Great; "Eugene Onegin" (1825–31), an original imitation of Byron's "Childe Harold," admirable on account of the sublimity of its psychological analysis and in the value of drama. He gave to his country a great masterpiece, the tragedy "Boris Godunoff" (1825–31), and in that of drama, "Skupoi rycar" (The Avaricious Knight), "Mozart and Salery", and "Russilka". Among his works in prose, mention should be made of the "Outlines of the History of Peter the Great", and of the "History of the Sedition of Pugatcheff". Pushkin was the first great original poet of Russia, and one of the most excelled in classic style. At the same time he was the author of a school that has among its members Ivan Ivanovitch Kolsoff, author of two most touching poems, "Teyn" and "Lidveng"; "Delvin" (1798–1831); "Jasykoff" (1802–46), and Eugenie Baratynski (1800–44).

Nikolai Vassilievitch Gogol (1808–52), a native of Little Russia, was another genius of the Russian literature of the nineteenth century. His comedy, "The Overcoat", published in 1836, is one of the masterpieces of the Russian theatre, a true portrait of the malversations of the bureaucracy. Among his romances and novels, he acquired merit fame through "Taras Bul'ba", an historical romance of Southern Russia, "The Dispute between Ivan Ivanovitch and Ivan Nikolaevitch", "The Portrait", "The Arnesques", "Koliakas" (The Calseh), "Zapiski sumasebdashago" (Memoirs of a Madman), and largely "Mertvyaja duša" (The Dead Souls), in two parts, a masterpiece in the romantic literature of Russia, which makes its author the rival of Cervantes and Lessage. It is a suggestive and faithful picture of Russian society: a vast theatre in which the most varied types of the Russian people are in action. - Mikhail Yurievitch Lermontoff (1814–41) is also of the school of Pushkin and Byron. He was one of the most delicate lyric poets of modern Russia, whose poetry echoed with a deep poetry of the deepest chords of the heart, and exhibits the soft melody of the literary language of Russia in its fullness. The most famous of his epic poems are "The Demon", which is based upon a Georgian legend, and in which the beauties of the Caucasus are described in admirable verses; "Jamal Bey"; "Khadzhi-Abrek, the Boyard Orphan", and "Zaporozhian Horrors", an epic poem of the times of Ivan the Terrible; "Mcry", a legend of the Caucasus. Lermontoff is the author of the very popular romance "Geroi nashego vremeni" (A Hero of our Times), which reveals him as one of the most original poets, and as having a profound knowledge of the human heart. He lived in the age of twenty-seven years, and like Pushkin, in the plenitude of his intellectual activity. Alexei Vasilievitch Koloff (1809–42) also distinguished himself as a lyric poet of the school of Pushkin and Lermontoff. He was the poet of the peasants and of nature, and the inventor of a special kind of poems (Dumy), in which a question to be resolved is proposed and is answered. Other poets who also were ornamens of Russian literature, although they did not attain the height of those already mentioned, were Odolevski, Count Sologub, Markinski, Weltmann, Poukhoff, and Kukolnik, a prolific writer of historic dramae.

History, philology, and critical studies had a period of growing prosperity during the reign of Nicholas I. Pogodin, Butkoff, Ivanoff, Venelin, Grigor'eff, and Muraveff worked to defend the Russian chronicles against the charge of lack of authenticity, to throw light on the origin of the Russian nation, and to investigate the historical past of Russia and the various European nations. In the study of the ancient Slav language, and in the preservation of the literature of Russia, and in the collection of ancient texts, fundamental works that are yet esteemed were written by Kala dovitch, Vostokoff, Undolski, Klutchareff, Maximovitch, Certelev, Brederoff, Sakharoff, and Bodianski. This class of studies were greatly promoted by the "Antiquities of the Northern Nations", which were formed 1814 and still flourishing. Eugene Bolkhovitinnoff, Metropolitan of Kieff, prepared two historical lexicons of the clerical and lay writers of Russia; Polevoi, Shveyreff, and Nikitenko wrote histories of Russian literature, while Prince A. Viasemski, Nadezhdin, and especially Bessarion Grigorievitch Bielinski (1810–48) were the chief literary critics. Literary and scientific progress was assisted by the periodicals "Viestnik Evropy", "Russki Viestnik", "Syn Otetschestva" (The Son of the Fatherland), "Sivevernaja Pechora", "The Bee of the North", and "Evanoff". "Obzor vseuchastvennaja zapiski" (Memoirs of the Fatherland).

During the reign of Alexander II the literary genius of Russia continued to shine brightly, and to assume always a more national character, although the influence of foreign writers, especially of Dickens, George Sand, and others, was felt. Russia was forced to support in the school of Slavophilus, the most illustrious representatives of which are the two Kireievski (Ivan and Peter), Komiakhoff, Valeuff, Konstantin and Ivan Aksakoff, Kosheleff, Elagin, Toutcheff, Grigorieff, Strakhoff, and Danilevski. This school was dominated by a spirit of Orthodoxy, in which the Russian poet, in the domain of theology, the Greek in his, the Roman Catholic in his, and the Jew in his, proclaimed that Orthodoxy is the expression of the religious ideal of Christianity. The religious and political paradoxes of the Slavophilus found their opponents in the school of the Occidentalisists (Zapadniki). The philosopher Tchaadoff, in his philosophical letters published in 1836, wrote of Russian barbarity, and proclaimed Catholicism to be the only means of bringing Russia into the civilisation of the nations of the West.

The most illustrious representatives of this school, which had not many followers, were Herzen (1812–70), who became one of the leaders of Nihilism; the poet Ogareff, Granovski, Solouveff, Kavelin, Kulatchoff, and Pavloff, illustrious names in the annals of Russian history and Russian philosophy.

The most famous writer of the time of Alexander II was Ivan Sergueievitch Turgenieff (1818–83), the magician of Russian prose. As a poet his title to fame rests on the poems "Parasha", "Yakoff Panoff", "Rudolf, Prince of Anja", "A Nest of Nobles". In 1842 he published one of the most famous of Russian novels, "Otyo i dieti" (Fathers and Sons). Among the other novels of Turgenieff, the most successful were "Zapiski Okhotnitsa" (Memoirs of a Huntsman), rich in admirable descriptions of nature; "Dym" (Smoke); "Nov" (Virgin Soil); and among his stories: "Lear of the Steppe", "Waters of Spring", "The Brigadier", "The Dream", "The Story of Father Alexi", "The Song of Triumphant Love", "The Desesperado" etc. He enriched Russian literature with several plays, among which the most beautiful is called "Vztrakhu predvztraku" (The Collaboration with the Nobility). Ivan Alexanderovitch Goncharoff (1812–91) acquired no less fame as a novelist through his novels "Obyknovennaja istorija" (A Simple Story),
"Oblomoff", which personifies the want of initiative and semi-fatalism of the Russian character, and "Obyff" (The Precipice), which was considered a decadent production. Greater fame was acquired by Fedor Mikhailovitch Dostoevski (1821-81), whose first novel, "Biednye liudi" (Poor People), published in 1846, made its author famous, at once, by the positive and novel manner of its presentation, and by the novel itself. After four years of a most painful imprisonment and exile to Siberia, he wrote the "Zapiski i Mervago Domu" (Memoirs of the House of the Dead), in which he describes the tortures of the exiles with a most effective vigour of style; the famous novel "Prestuplenie i Nakazanie" (Crime and Punishment), a psychological masterpiece, "The Idiot", "Biesiy" (The Possessed), and "The Brothers Karamazoff".

To romantic literature also belong Dimitri Vassiliyevitch Grigorovitch, an imitator of George Sand, and a faithful portrayor of the sufferings of the lower classes, in his romances and novels, among which we will mention "Derevnia" (The Village), "Antony Goremyka", "The Valley of Smidoff", "The Fishermen", and "The Colonists". In other novels he described the life and condition of the middle and higher classes, as in "Neudvashnaja shiam" (At Uniennaia; The University), "Leyof Radeyoff" (The Kapelmeyer), "The School of Hospitality". The romantic school was represented by Alexei Teofilaktovitch Pismenski (1823-81). In the novel "Bojarashkins" (The Time of the Boyars), he preached free love: the censorship prohibited the circulation of the book. In another novel, "Borovsk" (The Pester), his realism goes beyond that of Zola. His best novel is "Tyatya" (A Thousand Souls), a gloomy but faithful picture of the corruption of Russian society, which is portrayed also in his novel "Vsgalamunchoennoe More" (Tempeautous Sea); his novel "Liudi sokrozovykh godof" (Men of Forty Years) deals with the life of the Russian. "Bitter Destiny" places him in a high position among Russian dramatists. Other writers proposed to scourge the corruptors of society, to pierce them with the arrows of their satire. They form a literary school known in Russia as obichal'naia (accusing, refuting). The master of this school was Mikhail Evgrafovitch Saltikoff (1826-98), better known by the pseudonym of Shchedrin. The characters in his novels recall those of Gogol, but his pessimism is much more bitter and exaggerated. Among the best-known of his novels and other writings are "Bogatyr'" (The Cossacks), "Golubtsi" (The Little Groom), "Otcherki" (Sketches of Government Personages), "Tashkeny" (The Lords of Tashkend), and "The Brothers Golovlev", a novel that is considered the best work of Saltikoff, but is displexing on account of the cynicism of its characters. Other writers worked with the same end of laying bare the moral and social defects of the Russian people; the most famous among them are Pomialovski (1835-63), whose novel "Otcherki burzy" is famous; it describes in dark colours the methods of education that obtain in the ecclesiastical seminaries of Russia; A. Slepakow, author of the novel "Trudnoe Vremja" (Difficult Times); A. Mikhailoff, the pseudonym of Scheller, who wrote the novels "Gniyja bolota" (Putrid Swamp), and "The Life of Shupoff"; Zasedomski; Bashin; Théodoroff; Staniukovitch; and Girsi. More moderate in their criticism of Russian society are the novels of Bronislaw Monkoff, Nemirovititch-Dantchenko, and Togolikoff (both known by his pseudonym of Atava), Saloff, Akshanov, Leskin, Kliunnikhoff, Liaszkoff, Krestovski, Prince Mesherhiki, Markewitch, Avsienkoff, Golovin, and Avenarius.

The noted authors of lyric and satirical poetry were: Nikolai Alekseevitch Nekrasov (1821-76), whose muse, as he himself wrote, was one of sobes and pains, the muse of the hungry and the mendicant; of his songs, there became famous "Moros Krasniy Nos" (Red-nosed Frost), a personification of the Russian winter, "Troika", and "The Sons of the Peasants"; in his poems he has a predilection for popular types; A. Plesheef, who, to his lyric poems added beautiful translations of the finest English and French poetry, the best known one being "Gross" (The Tempest), which describes the dissolution of the Russian family; it was written in 1860. Two of his comedies that obtained great success are "We will agree among ourselves", and "Each one in his place". The number of his theatrical works is very great. Another among the best of Russian dramatists was Alexander Nico-laiavitch Ostrovski (1823-86), whose theatrical compositions, admirable for the richness of their language, are partly original, and partly imitations of Shakespeare and Goethe. The best known one is "Gross" (The Tempest), which describes the dissolution of the Russian family; it was written in 1860. Two of his comedies that obtained great success are "We will agree among ourselves", and "Each one in his place".
the publication of his autobiographical memoirs, which appeared in the "Sovremennik" of St. Petersburg in 1852; they are a masterpiece of psychological analysis and are the model of a type. This work was followed by "Adolescence", "Youth", "The Cosacks", and "Recollections of Sebastopol", all of which are filled with horror of the sight he beheld at Sebastopol. But the masterpieces among his novels are "War and Peace", a powerful romance that for all its apparent confusion and disorder is an epic and imposing picture of the Napoleonic war in Russia; "Anna Karenina", a profound analysis of the feminine soul, that led astray by passion, forgets dignity and family for adultery, and finds its punishment in its sin; "Resurrection", a novel that is a study of the psychology of the church and plays the role of the church in the play "The Power of Darkness", strong in its vigour and dramatisation. And yet this genius, who made Russian literature popular all over the world, attained religious, ethical, and political nihilism; in the "Kreutzer Sonata" he preaches the abjection of woman; "The Gospels" is a criticism of dogmatic theology, while "My Religion", "The Church and the State", and "The Theories of the Apostles" strip Christian revelation from its base, and forswear the Divinity of Jesus Christ, His Church, and His sacraments; in the book "What is Art?", he disparages the most illustrious intellects of the human race, and declares "The Knave" "to be the best of you" preaches non-resistance to evil. Political and religious conceptions took Tolstoi out of his orbit, and transformed him into a visionary, an encyclopaedia, so to speak, of all institutions, Divine and human.

Among the other modern novelists, mention should be made of: A. Novodvorski, author of "Niavy, Ni Vorony" (Neither Peacock nor Crow), and of other stories; B. Garshin, who in his principal novels is sometimes a follower of Tolstoi and sometimes of Turgenieff. Those works are "Tetchyre dija" (The Four Days), "Trus" (The Coward), "Krasnye cvetov" (The Red Flower), "Ataata princeps", "Vtripetca" (The Encounter), and "Nadeshda Nikolaeva"; I. Yasinski was famous under the pseudonym of Maxim Bielsinski; his most important works are "The City of the Dead", and "The Guiding Star"; M. Albov, K. Yaftchev, E. Pchelnov, and A. Myanikin are also well known. Koletenko, a beautiful story-teller, who reminds his readers of Dostoievski and Tolstoi in his novels "The Dream of Macarius" (a fantastic story), "The Sketches of a Tourist in Siberia", "Easter Night", "The Old Music Player", and "Smolensk Sketches" (Two sketches Commemorating the Battle of Smolensk) from Potrepenko, who views life in the light of optimism, and not with the pessimism so much in vogue among Russian writers; one of his novels, "Sviateoe iskusstvo", describes the Bohemia of the students of St. Petersburg; Demetrius Maxim, under the pseudonym of Siberian, describes the customs of Western Siberia; and finally Prince Galitine. Among the most prominent of the new school are Anton Pavlovitch Tchep- hoff (1860-1904), whose novel "Skutchnaja iistorija" had a great success. He is without a superior in the narrative of his novels; the heroes of his stories are always morally corrupt, and of distracted minds. Alexei Maksimovitch Pleshkov, better known by the pseudonym of Maxim Gorki (b. 1869); he is the novelist of the beggars and the populace, whose works contain pages of nauseating naturalism, and shameful immorality. Vincent Smidlivski, b. at Tula, 1867; under the pseudonym of Tverskoff he came to celebrate his chapter "Memoirs of a Doctor", which elicited violent re- criminations in the medical profession. One of the most famous of the Russian writers of the present day is Leonid Andreef, b. at Oreli in 1881. He is the novelist of the degenerate. His novels "The Red Laughter", "The Thought", "The Cloud", "Silence", etc. are to be condemned from every point of view, religious and moral, and the Russian press has blamed him for them in vehement language.

Among writers of the present day mention should be made of Sofija Ivanovna Smirnova, who wrote the novels "Salt of the Earth", and "Foros of Character"; Valentine Dmitriev, writer of stories; Olga Andreevna Shapirin, who wrote "Without Love" and "Youth"; Lydija Veselitkaja, Alexandra Shabekale, Anna Maria, etc. These novelists, however, are not original; their works recall too much the great poets who preceded them. The fiction of Russia generally uses, as a channel of publication, the literary periodicals, among which some that were famous in the nineteenth century now disappeared, as the "Sovremennik" (The Contemporary), the "Otechestvennaja Zapisiki", and the "Moskvitjanin". The best-known of those that are yet published are the "Viestnik Evropy", and the "Pykht".

The historical literature of Russia in the second half of the nineteenth century furnishes illustrous names. Sergij Solovew is the author of a "History of Russia", in thirty volumes, which begins with the most ancient times, and terminates with the reign of Alexander I; it is a work of greater historical than literary merit; Zabielin devoted his studies by preference to the history of the sixteenth and seventeenth centuries; A. Nikitaki wrote on the historical past of Novgorod and Pako; Kostomaroff wrote on Little Russia; the historical monographs of this author are held in high esteem, as also his "History of Russia", composed of biographical narratives. Pypin devoted his researches to the reign of Alexander I; Shapoff studied the social and educational development of Russia; Bruckner dealt with the life of Peter the Great; Bestuzheff-Klumin wrote a biographical and bibliographical history of John I; A. M. Mezhericki has published "History and Antiquity of Moscow, which, with hundreds of learned publications, and especially of the Russian chronicles, have greatly facilitated the task of the student. Yushkevitch, Yakushkin, Metlinskii, Ribnikoff, Khudakoff, and Barsoff distinguished themselves in the collection of ancient Russian literary documents, upon which light was thrown by Bussaev, Miller, Stassoff, Maikoff, Kolosoff, Rozoff, Dashkevitch, Veslovski, and above all Sremski, who for several years edited the "Izviestije", and the "Uchenaja Zapisiki" of St. Petersburg (Academy of Sciences). Bussaev, with his "Historical Chronicle", made together the literary annals of Russia. Pekarski related the scientific and literary transactions of Peter the Great, Pypin and Porfiriev wrote full and classic histories of the literature of Russia. Special works on the greatest Russian writers are so numerous that the "Bibliography of the Russian Literature of the Nineteenth Century", ed. Meszler, St. Petersburg, 1902, devotes 650 octavo pages to the titles of those works alone.

In philosophy Russian works until now have not been original. They have been produced under the supreme influence of German philosophy, inspired
by Kant, Hegel, and Schelling. Positivism, Materialism, and Spiritualism have each suffered a eclipse.

Spurred by the famous dispute between Galich, a professor of philosophy at St. Petersburg (1848), was an atheist; Davidoff (d. 1862) reduced philosophy to psychology alone. The philosophy of Schelling influenced even ecclesiastical writers, as Skvorcov and the arche-mandrite Theophanov Arseneff. Orest Novicki is a well-known disciple of Fichte. Novicki, a professor of the University of Kieff, Hegelianism, however, was the most popular of all, and was once accepted by the Occidentals Stankevitch, Granovskii, Bielinski, and Osgareff, and by the Slavophiles Kirizevski, Khomjakof, Samar, and Aksakov. But the academic atmosphere of St. Petersburg is not gone. Gogol, one of the greatest writers of the Russian academy of Kieff published his philosophical dictionary. The materialist theories of Moleshchott and Bichner were defended by M. Antonovich and Pissareff, and refuted by Yurkevitch, Strakhoff, Kudriavceff, Samar, and Vladislavoff. Darwinism found defenders in Timiroff and Fainmync, and opponents in Troieki, Dokutsheff, Guseff, Popoff, and Strakhoff. The Positivism of Comte was upheld by de Roberti and Mikhailovski.

The most original philosophers of Russia were: Kavelin (1815-85), who dealt more especially with psychology, history, and social philosophy, to whom Russia owes the establishment of the "Voprosy filosofii i psikhologii," a periodical devoted to philosophy, which is held in very high esteem; Kudriavceff-Platoff, who excels in religious philosophy, and whose studies in apostology are admirable for their vigour and power of argument; Vladimir Scholoff, an ardent defender of Catholic principles in Russia, and a spiritual philosopher, the most eminent that Russia has produced. His extensive treatise on ethics, "Opravdanie dobra" (Justification of the Good), is a masterpiece of speculation; Prince Troubetzoff, a follower of Scholoff; and finally, Novicki, a professor of the ecclesiastical academy of Kazan, whose work "The Science of Man" gives him the first place among the Christian philosophers of Russia at the present time.

Otto, Lehrbuch der russischen Literatur (Leipsig, 1857); Polevov, Ocherki russkoj literatury (Essays on Russian Literature) (2 vols., St. Petersburg, 1839); Nevevokoff, Blick auf die Geschichte der russischen Literatur (Leipsig, 1859); Joinville, Histoire de la litterature russe (Leipsig, 1859); Serbovskij, Istoria russkoj literatury (4 vols., Moscow, 1858-60); Minilovtseff, Beitrage zur Geschichte der russischen Literatur (Berlin, 1854); Pobrylov, Tableau de la litterature russe depuis ses origines jusqu' a nos jours (Paris, 1873); Hornegg, Geschichte der russischen Literatur (Berlin, 1900); Wielopolskoff, Geschichte der russischen Literatur (Leipsig, 1881); Haller, Geschichte der russischen Literatur (Riga, 1883); Strutz, Geschichte der russischen Literatur (Ospkoff, 1882); Reinhardt, Geschichte der russischen Literatur (Leipsig, 1889); Matykov, Ocherki po istorii russkoj literatury (Essays on the History of the Russian Literature of the seventeenth and eighteenth centuries) (St. Petersburg, 1889); Wangenewski, Literatur russe (Paris, 1900); Wolters, Die russische Literatur der Gegenwart (Berlin, 1902); Pobrylov, Russlands Dichter und Schriftsteller (Halle, 1905); Bichner, Geschichte der russischen Literatur (Leipsig, 1909). The best histories of Russian literature in Russian are those of PTT, Bolon, Tolkow, and St. Petersburg, 1900); Pobrylov, Istoria russkoj slovesnosti (4 vols., Kassel, 1896, 1904, 1907); Pobrylov (12 vols., St. Petersburg, 1903).

Rusticius of Narbonne, SAINT, b. either at Marselles or at Narbonnaise, Gaul; d. 26 Oct., 461. According to biographers, Rusticius is the one to whom St. Jerome (about 411) addressed a letter, commending him to the imitate of St. Exuperius of Toulouse and to follow the advice of Proculus, then Bishop of Marseilles. When he had completed his instruction in Gaul, Rusticius, who at that time had soon gained a reputation as a public speaker, but he wished to embrace the contemplative life. He wrote to St. Jerome, who advised him to continue his studies. Then Rusticius entered the monastery of St. Vincent of Lérins. He was ordained at Marseilles, and on 450 (or 457) was consecrated Bishop of Narbonne. With all his zeal, he could not prevent the progress of the Arian heresy which the Goths were spreading abroad. The siege of Narbonne by the Goths and dissensions among the Catholics so disheartened him that he wrote to St. Leo, renouncing the bishopric, but the following year he then endeavoured to consolidate the Catholics. In
444-48, he built the church of Narbonne; in 451, he assisted at the consecration of forty-four bishops of Gaul and approved St. Leo’s letter to Flavian, concerning Nestorianism; he was present also at the Council of Arles, with thirteen bishops, to decide the dispute between Theodore, Bishop of Frejus, and the Abbey of Lérins. A letter from Ravennius, Bishop of Arles, sent to Rusticus, proves the high esteem in which he was held. His letters are lost, with the exception of one to St. Jerome and two others to St. Leo, written either in 452 or in 458. His feast is celebrated on 20 October.

**Joseph Delmed.**

_Ruth, Book of_, one of the proto-canonical writings of the Old Testament, which derives its name from the heroine of its exquisitely beautiful story.

I. Contents.—The incidents related in the first part of the Book of Ruth (i–iv, 17) are briefly as follows. In the time of the judges, a famine arose in the land of Israel, in consequence of which Elimelech and his two sons-in-law, Mahalon and Chilion, his two sons, married Moabitish wives, and not long after died without children. Noemi, deprived now of her husband and children, left Moab for Bethlehem. On her journey thither she dissuaded her daughters-in-law from going with her. One of them, however, named Ruth, accompanied Noemi to Bethlehem. The barley harvest had just begun and Ruth, to relieve Noemi’s and her own poverty, went to glean in the field of Boos, a rich man of the place. She met with the greatest kindness, and following Noemi’s advice, she made known to Boos her intention to marry Elimelech, her claim to marriage. After a nearer kinsman had solemnly renounced his prior right, Boos married Ruth who bore him Obed, the grandfather of David. The second part of the book (iv, 18–22) consists in a brief genealogy which connects the line of David through Boos with Phares, one of the sons of Judah.

II. Place in the Canon.—In the series of the sacred writings of the Old Testament, the short Book of Ruth occupies two different principal places. The Septuagint, the Vulgate, and the English Version, respectively, distinctly place it among the Hagiographa. The Hebrew Bible, on the contrary, reckons it among the Hagiographa or third chief part of the Old Testament. Of these two places, the latter is most likely the original one. It is attested to by all the data of Jewish tradition, namely, the oldest enumeration of the Hagiographa in the Talmudic treatise “Baba Bathra”, all the Hebrew MSS, whether Spanish or German, the printed editions of the Hebrew Bible, and the testimony of St. Jerome in his Preface to the Book of Daniel, according to which eleven books are included by the Hebrews in the Hagiographa. The presence of the Book of Ruth after that of Judges in the Septuagint, whence it passed into the Vulgate and the English Version, is easily explained by the systematic arrangement of the historical books of the Old Testament in that ancient Greek Version. As the episode of Ruth is connected with the period of the judges by its opening words “in the days”, when the Book of Judges as a sort of complement to it. The same place assigned to it in the lists of St. Melito, Origen, St. Jerome (Prol. Galeatus), is traceable to the arrangement of the inspired writings of the Old Testament in the Septuagint, inasmuch as these lists bespeak in various ways the influence of the nomenclature and grouping of the sacred books in that Version, and consequently should not be regarded as conforming strictly to the arrangement of those books in the Hebrew Canon. It has indeed been asserted that the Book of Ruth is really a third appendix to the Book of Judges and was, therefore, originally placed in immediate connexion with the two narratives which are even now appended to this latter book (Judges, xvii–xviii; xix–xxi); but this view is not probable owing to the differences between these two works with respect to style, tone, subject, etc.

III. Purpose.—As the precise object of the Book of Ruth is not expressly given either in the book itself or in authentic tradition, scholars have variously interpreted it. According to many, who lay special stress on the genealogy of David in the second part of the book, the chief aim of the author is to throw light upon the origin of David, the great King of Israel and royal ancestor of the Messiah. Had this, however, been the main purpose of the writer, it seems that he should have given it greater prominence in his work. Besides, the genealogy at the close of the book is but loosely connected with the preceding appendix added to that book by a later hand. According to others, the principal aim of the author was to show the connection between David and Moab through Ruth and to fecund the reception of Moabites into Yahweh’s assembly, the Moabite Ruth was incorporated with Yahweh’s people, and eventually became the ancestress of the founder of the Hebrew monarchy. But this second opinion is hardly more probable than the foregoing. Had the Book of Ruth been written in such full and distinct view of the Deuteronomistic prohibition as is affirmed by the second opinion, it is most likely that its author would have placed a direct reference to that legislative enactment on Noemi’s lips when she endeavoured to dissuade her daughters-in-law from accompanying her to Judah, or partially, when addressing Elimelech, her claim to marriage. After a nearer kinsman had solemnly renounced his prior right, Boos married Ruth who bore him Obed, the grandfather of David. The second part of the book (iv, 18–22) consists in a brief genealogy which connects the line of David through Boos with Phares, one of the sons of Judah.

IV. Historical Character.—The charming Book of Ruth is no mere “idyll” or “poetical fiction”. It is plain that the Jews of old regarded its contents as historical, since they included its narrative in the Septuagint within the prophetic histories (Joseph-Kings). The fact that Josephus in framing his account of the Jewish Antiquities utilizes the data of the Book of Ruth in exactly the same manner as he does those of the historical books of the Old Testament shows that this inspired writing was then considered as no mere fiction. Again, the mention by St. Matthew of several personalities of the episode of Ruth (Boos, Ruth, Obed), among the actual ancestors of Christ (Matt., 1, 5), points in the same direction. Intrinsic data agree with these testimonies of ancient tradition. This book records the story of Ruth and Boos with a Moabite, which shows that its narrative does not belong to the region of the poetical. The historical character of the work is also confirmed by the friendly intercourse between David and the King of Moab which is described in 1 Kings, xxi, 3, 4; by the Moabite’s distinct reference to a Jewish custom as obsolete (Ruth, iv, 7), etc.
RUTHENIAN

In view of this concordant, extrinsic and intrinsic, evidence, little importance is attached by scholars generally to the grounds which certain critics have put forth to disprove the historical character of the Book of Ruth. It is rightly felt, for instance, that the symbolic mode of thought in the narrative (Noemi, Mahalon, Chelion) is not a conclusive argument that they have been fictitiously accommodated to the characters in the episode, any more than the similar symbolic meaning of the proper names of well known and fully historical persons, in the book of Judges (the Biblical Ahithophel, Barak, Samson, etc.). It is rightly felt likewise that the striking appropriateness of the words put on the lips of certain personages to the general purpose of edification apparent in the Book of Ruth does not necessarily disprove the historical character of the work, since this is also noticeable in other books of Holy Writ which are undoubtedly historical. Finally, it is readily seen that however great the contrast may appear between the general tone of simplicity, repose, purity, etc., of the characters delineated in the episode of Ruth, and the opposite features of the figures which are introduced in the Book of Judges, that事实上 actual events in one and the same period of Jewish history; for all we know, the beautiful scenes of domestic life connected in the Book of Ruth with the period of the judges may have truly occurred during the long intervals of peace which are repeatedly mentioned in the Book of Judges.

V.

The Book of Ruth is anonymous, for the name which it bears as its title has never been regarded otherwise than as that of the chief actor in the events recorded. In an ancient Beraath to the Talmudic treatise "Baba Bathra" (Babylonian Talmud, c. 1), it is definitely stated that "Samuel wrote his book, Judges, and Ruth;" but this ascription of Ruth to Samuel is groundless and hence almost universally rejected at the present day. The name of the author of the book of Ruth is unknown, and so is also the precise date of its composition. The work, however, was most likely written before the Babylonian exile. On the one hand, there is nothing in its contents that would compel one to bring down its origin to a later date; and, on the other hand, the comparative purity of its style stamps it as a pre-exilic composition. The numerous critics who hold a different view overlook the important isolated Assyro-Babylonian which cannot be accounted for by a use of a spoken patois clearly independent of the actual developments of literary Hebrew. They also make too much of the place occupied by the Book of Ruth among the Hagiographa, for, as can be fairly realized, the admission of a work is also this third instance of the Hagiographa. But while the internal data supplied by the Book of Ruth thus point to its pre-exilic origin, they remain decisive with regard to the precise date to which its composition should be referred, as clearly appears from the following inferred.

Commentaries.—Catholic: Clair (Paris, 1878); von Hummelauers (Paris, 1888); Pilling (Paris, 1889); Vincent (Paris, 1901); Chapman, Prophetess; Knight (London, 1888); Keil (Leipzig, 1874); Brehm (Leipzig, 1883); Oettig (Mödlingen, 1889); Bethel (Freiburg, 1889); Nowack (Goettingen, 1895).

Frances E. Gigot.

Ruthenian Rite.—There is, properly speaking, no separate and distinct rite for the Ruthenians, but inasmuch as the name is often used for the modifications which the Ruthenians have introduced in the Byzantine Liturgy, it is used, as described by them, as a description of them is proper. These modifications have come about in two ways. In the first place, the ancient Slavonic missals used in Russia and in Little Russia (Ruthenia) differed in many instances from the Greek as used at Constantinople, and the correction of these differences by the Patriarch Nikon gave rise to the Old Ritualists (see Raskolnikis). When, therefore, the Ruthenians came into union with the Holy See in 1595, they brought with them in their liturgical books the modifications of several periods of the Old Ritualists, of which Nikon afterwards corrected at Moscow in the Orthodox Church. Where these differences presented no denial or contradiction of the faith the Holy See allowed them to remain, just as they have allowed the rites of many religious orders. In the second place, under the union there was the fact, not of the Polish Latin clergy and laity seemed to find in the Greek ceremonies and forms of language some apparent contradictions of the faith as more fully elaborated in the Roman Rite. This seemed to them to indicate a lack of unity of the faith, and the Ruthenian clergy in the Synod of Zamoec (1720) made a number of changes in the Byzantine Rite, particularly that of the Mass, so as more clearly to express the unity and identity of their faith with that of their brethren of the Roman Rite. These changes are sometimes bitterly spoken of by Russian authors as "extremes," and "unnecessary," and it is abundantly unnecessary. When we consider that the Melchites, Rumanians, and Italo-Greeks have kept the old forms thus changed, it does not seem that they were required in order to express the complete unity of the faith. Nevertheless they were sufficient to cause them to be spoken of as the Ruthenian Rite, as distinct from the older form of the Byzantine Rite (see Constanti

Rusic Catholica in America; Greek Church).

The chief modifications introduced were the addition of the Filius (a Synax) to the Creed, and the commemoration of the holy universal Chief Bishop N. the Pope of Rome," in the Ektenia and in the general commemoration at the Great Entrance; while the emphasis laid on the words of consecration rather than on the Epiklesis (invocation) may be said to also constitute a difference from the Orthodox Rite. The addition of the Filius is not required even in Italy, for at Rome the Creed is still said in Greek without it; but there it is simply an ancient custom and no indication of any difference in doctrine. As to the prayers for the pope, the various Orthodox Churches of Russia and Eastern Europe have never hesitated to change the Byzantine liturgy in order to insert prayers for the Holy Synod, imperial family, etc., even carrying them out to great length. The Ruthenians however differ from the other Greek Catholic nationalities and from the Orthodox churches in many other peculiarities of rites.

In the Proskomide of the Divine Liturgy the Ruthenians are allowed to prepare for Mass with one altar-bread (prospora) or with three, or even with the dry Agnets (the square Greek host) if no prospora can be had, instead of requiring five prospora. Then too the Ruthenian priest may omit the full number of particles to be placed on the paten, which have been drawn from them by recent Catholic scholars.

The number of the saints to be commemorated has also been cut down to a few principal names. When the Mass of the Catechumen or public part of the Divine Liturgy begins, the Royal Doors of the Iconostasis are thrown wide open and continue so during the entire Mass. There are no rubrics directing them to be open and shut during the service, nor is there any veil to be drawn. Formerly this was the practice of the Old Slavonic, now it is only performed in the Court Church and only after the Great Entrance is completed. The custom of reverencing during the singing of the Eudorozy Synax (Filius unigenitus) and the Creed at the word vochelotevich-
Rhutenians (Ruthenian and Russian: Rusin, plural Rusin), a Slavic people from Southern Russia, Galicia and Bukowina in Austria, and North-eastern Hungary. They are also called Ukrainians (u, at or near, and krai, the border or land composing the border), from the Ukraine, comprising the vast steppes or plains of Southern Russia extending into Galicia. In the Austro-Hungarian Empire, Rhutenians were separated from one another by the Carpathian Mountains, which leave one division of them in Galicia and the other in Hungary. The Rhutenians or Little Russians in Russia and Bukowina belong to the Greek Orthodox Church, whilst those of Galicia and Hungary are Greek Catholics in unity with the Holy See. For this reason the term Russian has been generally used to indicate those of the race who are Catholics, and Little Russian those who are Greek Orthodox, although the terms are usually considered as fairly interchangeable. It must be remembered that in the Russian and Ruthenian languages (unlike in English) there are two words which are often indiscriminately translated as Russian, but which have quite different meanings. One is Russ, which is the generic word denoting an abstract fatherland and all who speak a Russo-Slavic tongue, who are of Russo-Slavic race and who profess the faith of the Christian Empire. It is of wide and comprehensive meaning. The other word is Rossiya, which is a word of restricted meaning and refers only to the actual Russian Empire and its subjects, as constituted to-day. The former word Russ may be applied to a land or people very much as our own word "American" to the North American Indians. It not only includes those who live in the Russian Empire, but millions outside of it, who are of similar race or kin, but who are not politically, religiously, or governmentally united with those within the empire. From the word Russ we get the derivative Rusicky, which may therefore be translated in English as "Ruthenian" as well as "Russian," since it is older than the present Russian Empire. From Rossiya we have the derivative Rossitskoy, which cannot be translated otherwise than by "Russian," pertaining to or a native of the Russian Empire. Indeed the word "Ruthen" or "Ruthenian" seems to have been an attempt to put the word Rusin into a Latinized form, and the medieval Latin word Ruthenica was often used as a term for Russia itself, before it grew so great as it is to-day.

The name Rhutenian (Ruthenii) is found for the first time in the old Polish annalist, Martinus Gallus, who wrote towards the end of the twelfth century, the beginning of the twelfth century; he uses this name as one already well known. The Danish historian, Saxo Grammaticus (1203), also used it to describe the Slavs living near the Baltic Sea. These Slavs were already converted to Christianity and the name was probably used to distinguish them from the pagans. The term Ruthenian was well known in the eleventh century and its origin seems to be considerably older. It is said to have really originated in the southern part of Gaul in the time of Charlemagne. When the Huns overrun Europe in the fifth century, they subdued the Slavic tribes with whom they came into contact, and made them a part of their victorious army. Under Attila's leadership they pressed still farther west, devastating everything in their path, and penetrated into Northern Italy and the south-eastern part of Gaul. In the great battle at Châlons the Christian armies overcame them; a portion of the Huns' forces was slaughtered, but other portions were divided and scattered in small detachments throughout the country, and the greater part of these were the Slavs who had been made captive and forced to join the army. After the death of Charlemagne they had settled permanently in that land, and their names are retained in various Latin names of places, as Rouergue (Provincia Ruthenorum), Rodes (Sedunam Rutheni), and Auvergne (Augusta Ruthenorum). As these Slavic tribes furnished the name for the Latin writers of
Italy and France, this same word was also used later in describing them in their native land, where descriptions came to be written by western writers who first came in contact with them. Indeed the word "Ruthenian" is considerably older than the word "Russian," in deliberate Slavonic nationality; for the term Rusia (Rossia), indicating the political state and government, did not come into use until the fourteenth or fifteenth century.

The Ruthenians may well claim to be the original Russians. There is the land where Sts. Cyril and Methodius spread their Slavonic gospel. That land, with Kieff as the centre, became the starting point of Greco-Slavic Christianity, and for centuries that centre was the religious and political capital of the present Russia. Great Russia was then merely a conglomerate of Swedish, Finnish, and Slavic tribes, and although it has since become great and has subdued its weaker brethren, it does not represent the historic race as does the Ruthenian in the south. They were never so thoroughly under the rule of the conquering Tartar as the Great Russians of Moscov, Vladimir, and Kasan. Besides, Little Russia was seven centuries before the Russians were a force in the centuries subject to Poland and Lithuania. Yet Great Russia has become in Russia the norm of Russian nationality, and has succeeded largely in suppressing and arresting the development of the Little Russians within the empire. It is no wonder that the old dress, the Cyrillic, the Slavonic, the old way of Little Russia, independent both of Russia and Poland, have found a lodgment in the hearts of the Southern Russians; the same feeling has gained ground among the Ruthenians of Galicia and Hungary, surrounded as they are by the German, Polish, and Hungarian peoples. However, the milder and more equitable rule of Austria-Hungary has prevented direct political agitation, although there is occasional trouble. The result of such forces among the Ruthenians of Galicia and Hungary has been the formation of political parties, which they have brought to America with them. These may be divided into three large groups: the Ukrainists, those who believe in and foster the development of the Ruthenians along their own lines, quite independent of Russia, the Poles or the Germans, and who actually look forward to the independence of Little Russia, almost analogous to the Home Rulers of Ireland; the Mussulphites, those who look back and have for some years a real Russian Slavic race and who are partisans of Panalavism; these may be likened to the Unionists of Ireland, in order to round out the comparison; the Upro-Russki, Hungarian Ruthenians, who while objecting to Hungary, and particular phases of Hungarian rule, have no idea of losing their own peculiar nationality by taking present Russia as their standard; they hold themselves aloof from both the other parties, the ideas of the Ukrainists being particularly distasteful to them.

(See GREEK CATHOLICS IN AMERICA.) In Russia all political agitation for Little Russia and for Little Russians has been repressed and suppressed; and it was only since 1895 that newspapers and other publications in the Little Russian language have been permitted. It was Little Russia which united with the Holy See in 1895, in the great reunion of the Greek Church; and it was in Little Russia where the pressure of the Russian Government was brought to bear in 1895, 1839, and 1875, whereby the Greek Catholics of Little Russia were utterly wiped out and some 7,000,000 of the Uniates there were compelled, partly by force and partly by deception, to become part of the Greek Orthodox Church.

The greatest newspaper in America is "The Russian;" and the greatest newspaper in Little Russian speech is considered as leading away from Russian unity, whether of State or Church; the prompt return of a quarter of a million of Little Russians to Catholicism in 1905-06, at the time of the decree of toleration, perhaps lends countenance to the belief in Russian minds. The Russian language is very close to the Russian and both are descendents of the ancient Slavonic tongue which is still used in the Mass and in the liturgical books. The Ruthenian, however, in form is more Slavonic than the modern Russian language is. Still it does not differ much from the modern Russian or the so-called Great Russian language; it bears somewhat the same relation to the latter as the Lowland Scotch does to English or the Plattdeutsch to German. Thus Ruthenian in America and the Little Russians in Russia use the Russian alphabet and write their language in almost the same orthography as the Great Russian, but in many cases they pronounce it differently. It is almost like the case of an Englishman and a Frenchman who write the word science exactly alike, but each pronounces it in a different manner. Many words are unlike in Ruthenian and Russian, for example, bachiti, to see, in Ruthenian, becomes videt in Russian; perehy, first, in Ruthenian, is pery in Russian. All this tends to differentiate the two languages, or extreme dialects, as they might be called. The very name of the Galicia and Bukowina has provoked much discussion. For the purpose of more closely accommodating the Russian alphabet to the Ruthenian, they added two new letters and rejected three old ones, then spelled all the Ruthenian or Little Russian words exactly as the Russian people do. This "germanization" differentiates the Ruthenian more than ever from the Russian. It has divided Ruthenian writers into two great camps: the "etymological," which retains the old system of spelling, and the "phonetic," which advocates the new system. It has even been made a basis of political action, and the phonetic system of orthography is still strongly opposed, partly because it was an Austrian governmental measure and partly because it is regarded as an effort to detach the Ruthenians from the rest of the Russian race and in a measure to Polonize them. The phonetic system of writing has never been adopted among the Hungarian Ruthenians, and it is only within the last two or three years that anyone has dared to use it in Little Russian publications issued in the Russian Empire. Yet in many parts of Hungary the Russian language is printed in Roman letters so as to reach those who are not acquainted with the Russian alphabet. The language of the Ruthenian or Little Russian, however, has in a large part been taken up by many Russian magazines and reviews. The Ruthenians have also brought their language and political difficulties with them to America (see GREEK CATHOLICS IN AMERICA; under subtitle Ruthenian Greek Catholics), where they encounter them as obstacles to social progress. Not only in history but in literature have the Ruthenians or Little Russians held an honourable place. Their chief city, Kieff, was the capital of the country before Moscov was founded in the middle of the twelfth century. A portion of them led the wild, stirring life in the Cossack's pillaging of Europe and Asia; their "Cossack Bulba," their revolt under Chmielnicki in 1648 is pictured by Sienkiewicz in his historical romance "With Fire and Sword"; that of half a century later under Maseppa is made known to most of us by Byron's verse. They had free printing presses for a secular as well as religious literature in the sixteenth century; still many of their best writers, such as Gogol, have used the Great Russian language even when their themes were Little Russian, just as so much of the text of Scott's Scotch novels is pure English. The Russian language, however, has been employed by authors of Russian blood, the greatest of whom is the poet Shevchenko. Other authors of widening reputation have followed in the present century, and some like Gowda have transferred their literary efforts to American soil.
The Ruthenian Greek Catholic Church in Austria-Hungary is represented by one province in Galicia, Austria, and three dioceses in Hungary. The former is the Diocese of Galicia, and the two latter ones are the dioceses of the Ruthenian Church in the two subordinate dioceses of Przemysl and Stanislaw. In Hungary there are the separate dioceses of Eperies and Munkaš in the north and the Diocese of Kreuts (Crișium, Krișește) in the south. These northern two are subject to the Latin Archbishop of Esztergom, and the southern one to the Latin Archbishop of Agram. The Ruthenian immigration to America comes almost wholly from these dioceses, and their efforts and progress in solidly establishing themselves in the United States and Canada have been described. They have built many fine and flourishing churches, have established schools and now have a bishop here of their own right (see GREEK CATHOLICS IN AMERICA). Some of them are becoming wealthy, and in some places in Pennsylvania are reckoned as a factor in American politics. Nevertheless, they have been subjected in America to strenuous proselytizing, both on the part of the Russian Orthodox mission churches, which preach Panaslevism in its most alluring forms, and which are at times bitterly hostile to Catholicism (see GREEK ORTHODOX CHURCH IN AMERICA, UNDER RUSSIAN ORTHODOX), and on the part of various Protestant missionary activities, which have succeeded in establishing, and the “Catholics” to distinguish them from the Russian Orthodox clergy have found it the task even easier, for they appeal to the Slavonic national feeling and adopt the usual religious practices of the Greek Catholic clergy, and are thus enabled to win over many an immigrant by offering sympathy in a strange land.

ADAM G. SHAPIRA.

BUTTER.

The “Orthodox Journal” (VII, 223) gives a sympathetic notice of this sterling priest, characterized by his old-world learning and solid piety. Rutter wrote an “Evangelical Harmony,” re-edited (1857) by Hurst, and other works, contains and devotional translations, are enumerated and described by Gillow. The “Answer to Dr. Southey” (the poet-laureate) is a contribution to the controversy provoked by Southey’s “Book of the Church” (1824), in which Charles Butler (q. v.) was the Catholic protagonist. PATRICK RYAN.

RUYKO and Bitonto, Diocese of (RUTHERNS OR BRUNNIENSIS), in the Province of Bar, Aquileia, Southern Italy. Ruvo, the ancient Ruvenon a calcareous hill, after 1066 a Norman cathedral of the eleventh century. Outside of the city are the ruins of a more ancient cathedral, possibly of the late fourth or early fifth century. According to a legend St. Peter preached the Faith here and appointed to the see its first bishop St. Cletus, later pope. We read also of a St. Cletus in thesee of Bitonto, Bishop John of unknown date; Bishop Joanna, spoken of in 493, is the first prelate of the city known with certainty; of the others mention may be made of Pietro Ruggieri (1759–1804); Bishop Anderano (about 734) belonged either to Bitonto or Bisignano; Arnolfo (1057), the first undoubted Bishop of Bitonto; Enrico Muratori (1382), later cardinal; Cornelio Musco (1544), a Conventual, distinguished at the Council of Trent; Fabrizio Carafa (1622), founder of a literary academy; Alessandro Crescenti (1652), later cardinal. In 1818 the Diocese of Ruvo, which comprised only the commune of Ruvo, was united to principal city of the town of Bitonto, which included only the commune of Bitonto. It has a fine cathedral with four rows of beautiful marble columns. The chief historic events relating to the dioceses are the capture of Ruvo in 1533 by Gonsalvo di Cordova, who defeated the papal forces, and the last in which the Austrians were defeated by the Spaniards. The united dioceses contain 50,000 inhabitants, a Franciscan friary, 7 houses of religious, 3 of which are enclosed, 2 having hospitals attached, and 2 others charitable establishments.

CAPPADOCIA, Le Château d’Italie, XVI (Venice, 1825). U. BENIGNI.

Ruybroeck, John, Blessed, named the Admirable Doctor, and the Divine Doctor, undoubtedly the foremost of the Flemish mystics, b. at Ruybroeck, near Brussels, 1293; d. at Groenendael, 2 Dec., 1381. He was blessed with a devout mother who trained him from infancy in the ways of piety and holiness. Of his father we know nothing; John’s only family name, van Ruybroeck, is taken from his native hamlet. At the age of eleven he forsook his mother, departing without leave or warning, to place himself under the guidance and tuition of his uncle, John Hintzker, a kindly priest, and a canon of Brussels, who with a fellow-canon of like mind, Francis van Coudenbergh, was following a manner of life modelled on the simplicity and fervour of Apostolic days. This uncle provided for Ruybroeck’s education with a view to the priesthood. In due course, Blessed John was presented with the habit of the Gudule’s, and ordained in 1317. His mother had followed him to Brussels, entered a Beguine house there, and made a happy end shortly before his ordination. For twenty-six years Ruybroeck continued to lead, together with his uncle Hintzker and van Coudenbergh, a life of extreme austerity and retirement. At that time the Brethren of the Free Spirit were causing considerable trouble in the Netherlands, and one of them, a woman named Bloemardinne, was particularly active in Brussels, propagating her false tenets chiefly by means of popular pamphlets. In defence of the Faith Ruybroeck responded with pamphlets also written in the native tongue. Nothing of these treatises remains; but the effect of the controversy was so far permanent with Ruybroeck that his later writings bear constant reference, direct and indirect, to the heresies, especially the false mysticism, of the day, and he composed always in a fiery, chiefly secular, chiefly with a view of counteracting the mischief of the heretical writings scattered broadcast among the people in their own tongue.

The desire for a more retired life, and possibly also the persecution which followed Ruybroeck’s attack on Bloemardinne, induced the three friends to quit
Brussels in 1435, for the hermitage of Groenendael, in the neighbouring forest of Soignes, which was made over to them by John III, Duke of Brabant. But happily, especially in the maintenance of the house, it was found expedient to organise into a duly-authorized religious body. The hermitage was erected into a community of canons regular, 13 March, 1439, and eventually it became the mother-house of a congregation, which bore its name of Groenendael. Francis Xavier Coulon, who was appointed the first provost, and Blessed John Ruysbroeck prior. John Hinckeraeft refrained from making the canonical profession lest the discipline of the house should suffer from the exemptions required by the inimitable of his old age; he dwelt, therefore, in a cell outside the cloister, and there a few years later happily passed away. This period, from his religious profession (1439) to his death (1481), was the most active and fruitful of Ruysbroeck's career. To his own community his life and words were a constant source of inspiration and encouragement. His fame as a man of God, as a sublime contemplative and a skilled director of souls, and his love, natural and true, for his brethren, brought him to Holland, Germany, and France. All sorts and conditions of men sought his aid and counsel. His writings were eagerly sought and rapidly multiplied, especially in the cloisters of the Netherlands and Germany; early in the fifteenth century these German editions appeared in print. Among other famous visitors to Groenendael mention is made of Tauler, but though the German preacher certainly knew and appreciated his writings, it is not established that he ever actually saw Ruysbroeck. Gerard Groote in particular venerated him as a father and loved him as a friend. And through Groote, Ruysbroeck's influence helped to mould the spirit of the Windelesch School, which in the next generation found its most famous exponents in Thomas a Kempis. Just now strenuous efforts are being made to discover authentic Flemish MSS. of Blessed John Ruysbroeck's works; but up to the present the standard edition is the Latin version of Surius, all imperfect and probably incomplete as this is. Of the various treatises here preserved, the best-known and the most characteristic is that entitled "The Spiritual Exposuysalts". It is divided into three books, treating respectively of the soul's condition, the spiritual life, and the relationships of the parts of the soul. Each book is subdivided into four parts working out the text; (1) Ecce Sponsus venit, exit ex obviam ei, as follows: (1) Ecce, the work of the vision, man must turn his eyes to God; (2) Sponsus venit, the divers comings of the Bridegroom; (3) exit, the soul going forth along the path of virtue; and (4) the embrace of the soul and the heavenly Spouse.

Literally, Ruysbroeck wrote as the spirit moved him. He loved to wander and meditate in the solitude of the forest adjoining the cloister; he was accustomed to carry a tablet with him, and on this to jot down his thoughts as he felt inspired so to do. Late in life he was able to declare that he had never committed to writing save by the motion of the Holy Ghost. In no one of his treatises do we find anything like a complete or detailed account of his system; perhaps, it would be correct to say that he himself was not conscious of elaborating any system. In his devotional writings he is emphatically a faithful son of the Catholic Church, explaining, illustrating, and enforcing her traditional teachings with remarkable force and lucidity; this fact alone is quite sufficient to dispose of the contention, still cherished in certain quarters, that Ruysbroeck was a forerunner of the Marcionites, etc. In his ascetic works, his favourite virtues are detachment, humility, and charity; he loves to dwell on such themes as flight from the world, meditation upon the Life, especially the Passion of Christ, abandonment to the Divine Will, and an intense personal love of God. But naturally it is in his mystical writings that the peculiar genius of Ruysbroeck shines forth. Yet here again it is the manner rather than the matter that is new, and it is evident that the greatest possible originality, boldness, variety, detail, and truth of his imagery and conceptions that the individuality of Ruysbroeck stands out. Students of mysticism from the pages of the Areopagite onwards will scarcely discover anything for which they cannot recall a parallel elsewhere. But there are, many things are in ruin, that Blessed John stands alone, unrivalled, in his thought, and what we may term the metaphysics of mysticism, in the delicate-ness and sureness of his touch when describing the phenomena and progress of the mystic union, and in the combined beauty, simplicity, and loftiness of his language and style.

In common with most of the German mystics Ruysbroeck starts from God and comes down to man, and thence rises again to God, showing how the two are so closely united as to become one. But here he is careful to protest: "There where I assert that we are one in God, I must be understood in this sense that we are united in God, not in ourselves. This declaration, however, and other similar saving clauses scattered over his pages, some of Ruysbroeck's expressions are certainly rather unusual and startling. The sublimity of his subject-matter was such that it could scarcely be otherwise. His devoted friend, Eusebius of Vich, called him a quirk, a charm, a flash. But one can feel of uneasiness over certain of his phrases and passages, and begged him to change or modify them for the sake at least of the weak. Later on, Jean Ge-son and then Bossuet both professed to find traces of unconscious pantheism in his works. But as an off-set to these we may mention the enthusiastic commendations of his contemporaries, Groote, Tauler, a Kempis, Soechenoven, and in subsequent times of the Franciscan van Herp, the Carthusians Denys and Surius, the Carmelite Thomas of Jesus, the Benedic-tine Louis de Blois, and the Jesuit Leesius. In our own days Ernest Heil and especially Maeterlinck have done much to make his writings known and even popular. And at present, particularly since his beatification, there is a strong revival of interest in all that concerns Ruysbroeck in his native Belgium.

A word of warning is needed against the assumption that he would confine himself to the spiritual realm, for the spirit of Ruysbroeck by dwelling on what they term his illiteracy and ignorance. As a matter of fact the works of Blessed John manifest a mastery of the sacred sciences, and a considerable acquaintance even with the natural science of his day. His adaptation of the elements of his native tongue to the genius of his master is admirable beyond praise; and though his verse is not of the best, his prose writings are vigorous and chaste, and evidence not only the intellect of a metaphysician, but the soul also of a true and tender poet. Blessed John's relics were carefully preserved and his memory honoured as that of a saint. When Groenendael Priory was suppressed by Joseph II in 1783, the relics were transferred to St. Gudule's, Brussels, where, however, they were lost during the French Revolution. A long and oft-interrupted series of attempts to secure official acknowledgment of his heroic virtues from Rome was crowned at length by a De-ree, 1 Dec., 1908, confirming to him under the title of "Blessed" his cultus ab immemorabili tempore. And the Office of the Beatus has been granted to the clergy of Mechlin and to the Canons Regular of the Lateran. Albertus Magnus and Thomas Aquinas were forerunners of the master; but the traditional picture represents him in the canonical habit, seated in the forest with his writing tablet on his knee, as he was in fact found one day by the brethren—raft in ecstasy and enveloped in flames, which enticed without consuming the tree under which he is resting.
Ruysch, John, astronomer, cartographer, and painter, b. at Utrecht about 1460; d. at Cologne, 1533. Little is known of his early life. He became a secular priest, but joined the Benedictine Order in the monastery of St. Martin's at Cologne, where he made his profession in 1492. He devoted himself to the study of astronomy and to painting, in which art he acquired much skill. He gave proof of his talent by decorating the refectory of the monastery with artistic designs, representing the lunar month and the signs of the zodiac. He went to Rome about 1505 and received a pension from the pontifical palace. While there, he published his famous map of the world entitled "Nova et universalis orbis cognitio tabula". It contains in particular the new Spanish and Portuguese discoveries in America. He assisted Raphael in his great paintings in the Vatican. Leaving Rome he journeyed to Florence and became known to the Medicis, who esteemed him highly on account of his knowledge of astronomy and cosmography, and made him astronomer to the fleet. He finally returned to Cologne and spent his last years in the monastery of his profession. He possessed considerable mechanical skill, and left a number of astronomical instruments of his own construction. He was also the author of the "Admonitiones ad spiritualitatem trabentes", which he wrote in 1494, and of a treatise on the mixing of colours and on painting on canvas.

Ruysch, Abraham, poet, b. at Antwerp, 1489; d. at Antwerp, 1527. He inherited from his parents, in its most poetic and religious form, the strange witchery of the Irish temper. Fitted for the priesthood by a nature at once mystic and spiritual, he was ordained just before the beginning of the Civil War, entered the Confederate army as a chaplain, and served in this capacity until the end of the war. In the hour of victory, the heart of the entire South by his "Conquered Banner," whose exquisite measure was taken, as he told a friend, from one of the Gregorian hymns. The Marseillaise, as a hymn of victory, never more profoundly stirred the heart of France than did this hymn of defeat the hearts of those whom it was addressed. It was read or sung in every Southern household, and thus became the apostrophe of the "Lost Cause". While much of his later war poetry was notable in its time, his first effort, which fixed his fame, was his finest production.

The only other theme upon which he sang were those inspired by religious feeling. Among his poems of that class are to be found bits of the most weird and exquisite imagery. Within the limits of the Southern Confederacy and the Catholic Church in the United States, no poet was more popular. After the war he exercised the ministry in New Orleans, and was editor of "The Star," a Catholic weekly; later he founded "The Banner of the South" in Augusta, Ga., a religious and political weekly; then he retired to Mobile.

In 1860 he lectured in several cities as a pulpit orator and lecturer, he was always interesting and occasionally brilliant. As a man he had a subtle, fascinating nature, full of magnetism when he saw fit to exert it; as a priest, he was full of tenderness, gentleness, and courage. In the midst of pestilence he had no fear of death or disease. Even when his young and feeble body gave him the appearance of age, and with all this there was the dreamy mysticism of the poet so manifest in the flesh as to impart to his personality something which marked him off from all other men. His "Poems, Patriotic, Religious, and Miscellaneous" have reached a twenty-fourth edition.

Ryan, James. See also Alton, Diocese of.

Ryan, Patrick John, sixth Bishop and second Archbishop of Philadelphia, b. at Thurlow, County Tipperary, Ireland, 20 February, 1831; d. at Philadelphia, 11 February, 1911. His early education was received at the school of the Christian Brothers in his native town. In his twelfth year he entered the Jesuit college school of Mosta' and L. N. at Ramsgate, and after his graduation in 1850, proceeded to the pension at Brussels, where he began his Classical studies. In 1844, while a pupil at Mr. Naughton's school, he headed a delegation of students, and in their name made an address to Daniel O'Connell, then a prisoner in Richmond Bridewell Prison. It is said that the great Liberator comprehended the young speaker, and predicted a brilliant future for him. In 1847 he was adopted for the Diocese of St. Louis in the United States by Archbishop Peter Richard Kenrick, and entered St. Patrick's College, Carlow. In 1850 he finished his course and was advanced to deacon's orders, but being too young to be ordained priest, he set out for St. Louis with Rev. Patrick Feehan, a subject of the same diocese, and afterward Archbishop of Chicago, and on his arrival was appointed to teach in the Diocesan Seminary at Carondelet. On account of his exceptional ability as a public speaker, Archbishop Kenrick invited him to preach to the deacon to preach frequently in the cathedral. His fame went forth at once, and he drew large audiences, made up not only of the regular members of the congregation, but of the most prominent people of all denominations from various parts of the city and more distant points. On 8 September, 1861, by special dispensation, he was ordained priest and was appointed assistant rector at the cathedral. He served there as assistant and as rector until 1861, when he was appointed to build the Church of the Annunciation at St. Louis. Having completed this vast enterprise, he was transferred to the rectorship of St. John's parish at St. Louis. During all these years he was noted for his zeal in the work of the ministry, for his faithfulness in attending the military prisoners in Gratiot Street Prison during the Civil War, for the frequency and effectiveness of his sermons, and for the large number of converts, many of them persons of note, who by his influence were brought into the Church.

In 1866 he attended the Second Plenary Council of Baltimore as one of Archbishop Kenrick's theologians, and was one of three priests chosen to preach on that occasion, the others being Archbishop John Lancaster Spalding, and the late Rev. James Concannon, C.S.P. In 1868 he spent a year in Europe with Archbishop Kenrick. His fame as an orator had preceded him, and he received calls from all sides. At Rome, at the request of Pope Pius IX, he deliv-
ered the English Lenten course for that year. Archbishop Kenrick appointed him vicar-general and administrator of the diocese, during his attendance at the Vatican Council. On 14 February, 1872, he was consecrated titular Bishop of Tricoria, and Coetzenberg of the diocese on 17 March, 1873. After serving faithfully and successfully in this capacity for twelve years, he was made titular Archbishop of Salamis on 6 January, 1884.

In the meantime the See of Philadelphia had become vacant by the death of Archbishop Wood, and on St. Valentine's Day Kenrick was appointed to succeed him. During his reign in Philadelphia the Church grew rapidly, as can be seen by the following table:—

During that time also the Roman Catholic High School for Boys, which was endowed by Mr. Thomas Cahill, was built, and put in operation; high school centres for girls taught by the different communities were established; a new central high school for girls was erected, and became the whole Catholic Industrial School for Boys was endowed and successfully operated; the Philadelphia Protection for Boys was erected; it has since been enlarged, at a cost of over half a million dollars and with capacity for six hundred; St. Joseph's Home for Working Boys was founded; a new foundling asylum and maternity hospital was built; a new St. Vincent's Home for younger orphan children was purchased with the archbishop's Golden Jubilee fund of $200,000; a third Home for the Aged was erected; a Memorial Library Building, dedicated to the Archbishop, was begun at St. Charles' Seminary, Overbrook; and the three Catholic hospitals of the city doubled their capacity. The extent of the Archbishop's seal is shown by his care for the emigrants who came into the diocese during his time. In 1884 there were very few foreign churches in the diocese; now there are 20 for the Italians, 20 for the Poles, 18 for the Czechs, 15 for the Slovaks, 8 for the Lithuanians, and several for other nationalities.

The archbishop took special interest in the Indians and negroes. He established two congregations for the latter in Philadelphia, and invited the Holy Ghost Fathers to build their college and motherhouse at Cornwells near the city. Under his direction Mother Katharine Drexel founded the Sisters of the Blessed Sacrament, who devote themselves entirely to the Indians and negroes, with their motherhouse, novitiates and orphan asylums at Cornwells, and several convents and schools in the West and South. Another proof of this interest is found in the archbishop's attendance at the Lake Mohonk conferences, and at the meetings of the U. S. Indian Commission, to which he had been appointed by President Roosevelt. By his prudence and tact he removed much prejudice against the Church, and obtained special privileges for Catholics in public institutions. His great reputation as an orator brought him invitations to speak, not only at the most important ecclesiastical functions, but also on secular occasions. In addition to his monthly sermons, in St. Louis on the first Sunday, and in Philadelphia on the third, he gave addresses at the laying of cornerstone-stones, at the consecration of bishops, and churches, and at funerals. Some of the more remarkable instances were the dedication of St. Patrick's Cathedral, New York, the conferring of the pallium on Archbishop Corrigan, and his funeral sermon; the consecration and funeral of Archbishop Hennessy of Dubuque; and the funeral of Archbishop Kenrick of St. Louis. He addressed the St. Louis Legislature twice; opened the St. Louis University on the 6th of October; was chairman of the Committee of the United States Senate on Indian affairs; opened the Republican National Convention in Philadelphia in 1900, and was the principal speaker at the McKinley Memorial service in Philadelphia, after the president's assassination.

During his lectures on various occasions, the most important of his lectures probably being on "What Catholics do not believe," St. Louis, 1877, and on "Agnosticism," Philadelphia, 1894. He received the degree of Doctor of Laws from the University of St. Louis and from the University of Pennsylvania. Under his guidance the Catholic "Standard and Times" of Philadelphia, his official organ, obtained a reputation unrivalled in Catholic journalism; and under his editorial direction the "American Catholic Quarterly Review" preserved and extended the reputation which it had already made as a leading exponent of Catholic thought. The celebrations of the Golden Jubilee of the archbishop in the episcopacy, 1897, and of his Golden Jubilee in the priesthood, 1903, proved the esteem in which he was held by the whole community, irrespective of creed, because the whole city rejoiced; while his death showed how universally he was loved.

The Archbishop was known as an orator and a wit. He was adorned most by strong faith and piety, by great meekness and humility, and by a prudence that was far-reaching and admirable. He has left no published works except some lectures. These are: "Modern Religious & Scepticism," "What Catholics do not believe," "Christian Civilization," and "Agnosticism." All are published by the Catholic Truth Society of San Francisco as well as by similar organizations in this country and London. There is a fifth lecture on "Religion and the Fine Arts".

JAMES P. TURNER.

Ryder, HENRY IGNATIUS DUDLEY, English Oratorian priest and controversialist, b. 3 Jan., 1837; d. at Edgbaston, Birmingham, 7 Oct., 1907; was the eldest son of George Dudley Ryder, one of the numerous clergymen of the Established Church of England who followed the steps of Newgate. He was received into the Catholic Church at Rome in 1846. The grandfather, Henry Dudley Ryder, a son of the first Lord Harrowby, was a prominent Evangelical in the early years of the last century, and was the first of the party to be raised to the episcopate. He was successively Bishop of Gloucester and of London. His kneeling statue by Chantrey will be remembered by all visitors of Lichfield cathedral. Newman, in his "Apologia," speaks of the veneration in which he held Bishop Ryder. George Ryder married Sophia, a daughter of the Rev. John Sargent, the three other Sargents married in succession to the third, who became Bishop, first of Oxford, and then of Winchester; Henry Wilberforce; and Henry Edward Manning, the future cardinal and Archbishop of Westminster.

Father Ryder's lifelong connexion with Newman and the Oratory began as a private pupil, when he was about twelve years old. The only interruption was a year at the English College at Rome and a few months at the Catholic University at Dublin, in which Newman was rector, before he began in
December, 1866, his Oratorian novitiate. In 1863 he was ordained priest. After Cardinal Newman’s death he was elected superior of the Birmingham Oratory and held this office till his health gave way. He was the last survivor of "my dear brothers of this House, the Priests of the Birmingham Oratory" to whom Newman dedicated his "Apologia". His grave is with theirs and Cardinal Newman’s at Rednal, a small country house belonging to the Birmingham Oratory, about seven miles from Birmingham. His life was uneventful. He cared little for notoriety or even fame. Once only did he push himself forward, and then it was to incur obloquy rather than applause. This was in 1867–8, when he attacked W. G. Ward, at that time editor of "The Dublin Review", and a leading spirit among an influential section of English Catholics who were singularly intolerant towards those who differed from them. Ward seemed to think of the pope as unassayingly exercising his very highest prerogative. All doctrinal instructions contained in papal documents, such as encyclicals and the like were infallible utterances. The Syllabus, together with all the documents which it quotes, was certainly infallible. So also, most probably, were the doctrinal Decrees of the Index and the Holy Office, when sanctioned by the pope and promulgated by his order. These opinions were put forward not tentatively, but as the only possible ones for a loyal Catholic. In other words, the doctrine of Infallibility was caricatured by its would-be defender in almost exactly the same way that it was caricatured a few years later by the Old Catholic Schulte (see Kissler). Against these extravagances Ryder delivered his protest in three pamphlets, remarkable both for their literary style and the theological knowledge they displayed. He earned for his reward, as he himself in later years expressed it, "the prophet’s portion of stones"; but time has shown that he was mainly in the right; within a very few years his opponent had to retract many of his more pronounced opinions in deference to the teaching of Roman theologians. It should be added that Ryder fully believed in the doctrine of Papal Infallibility before it was defined.

His literary output was small. Apart from a number of articles in American and English magazines, he published "Idealism in Theology, a Review of Dr. Ward’s Scheme of Dogmatic Authority" (London, 1887); "A Letter to W. G. Ward on his Theory of Infallible Instruction" (London, 1888); "Postscriptum to Letter, etc." (London, 1888); "A Critique upon Mr. Foulkes’ Letter" (London, 1889); "Catholic Controversy", a reply to Littledale’s "Plain Reasons" (London, 1893); "Poems Original and Translated" (Dublin, 1882). There is besides "Essays of the Rev. H. I. D. Ryder, edited by Francis Bacchus" (London, 1911). "His literary ideal", writes Mr. Wilfrid Ward, "was so high; his self-criticism so unsparing, that much which might have secured him a wider reputation was set aside. Quantity was sacrificed in preference to letting the world see anything which he himself felt to fall short of his own high standard in quality."

Wilfrid Ward, Father Ignatius Ryder in The Dublin Review (January, 1888), republished in 1908, Ten Personal Studies (London, 1908); Chapman, Dr. Ryder’s Essays in The Dublin Review (April, 1911).

J. F. Bacchus.

Ryken, Theodore James, known as Brother Francis Xavier, founder of the Xaverian Brothers, b. at Elshout, North Brabant, Holland, 30 August, 1797; d. at Bruges, 1871. His parents, who were devout Catholics, died while he was yet a child, and a pious uncle reared him. Even in youth he loved works of charity and zeal, and at nineteen he became a catechist. At twenty-five he became secretary to a well-known convert, M. J. O’Gasho, and acted in that capacity for four years, until cholera broke out at Groningen. While helping the nurse the patients, he caught the infection, and came near to death. In 1826 he made a pilgrimage to Rome, and Leo XII gave him a medal in commemoration. He made a second visit in 1832 in audience with Gregory XVI. In 1827 he entered a Trappist monastery in Germany, but, as his confessor told him that God had other designs for him, his stay was short. Ryken came to America in 1831, and remained for three years. His observations in the United States convinced him that Catholic teachers were needed, and, returning to Europe, he planned to establish a teaching institute. In 1837 he returned to America and obtained written approval from seven bishops. Thereupon he asked permission from Bishop Boussen, of Bruges, to found a congregation. The bishop consented, but, before the actual foundation, required Ryken to pass a year’s novitiate, which he fulfilled with the Redemptorists.

The Xaverian Brothers (q. v.) were established at Bruges in 1839. The beginning was hard, the founder having, with two or three companions, to struggle against disheartening obstacles. Courage and energy prevailed, and after a few years came brighter days. Brother Francis pronounced the vows of religion in 1846. In 1860, after holding the office of Superior General of the Xaverians for twenty-seven years, he was relieved of his duties on account of failing strength. At the time of his death the Xaverians were firmly settled in Belgium, England, and the United States. In Ryken’s character the conspicuous traits were optimistic faith, rigour towards self, and zeal for the observance of the rule.

Brother Francis Xavier (Theodore James Ryken): A Life Sketched (Baltimore, 1904); Xaverian Reminiscences from the History of the Xaverian Brothers (Baltimore, 1911).

Brother Isidore.
S

SABA (Saa), MANOEL DE, a Portuguese theologian and exegete, b. at Villa do Conde (Province Entre-Minho-e-Douro), 1530; d. at Arona (Italy), 30 Dec., 1596. He distinguished himself as a student at the University of Coimbra, and at the age of fifteen joined the Society of Jesus. He soon afterwards taught philosophy, first at Coimbra, and next at Gandia, where he also acted as tutor to St. Francis Borgia, then Duke of Gandia. In 1557, he became one of the early professors of the Roman College, and commented for two years on the prophecies of Osee and the "Summa" of St. Thomas. Exhausted by his labours, he discontinued his lectures, and visited the houses of the Society in Tuscany. Restored to health, he returned to the Roman College, where he filled the chair of exegesis, and found time to give missions in various places, preaching with an eloquence truly apostolic. His reputation for scholarship induced Pius V to appoint him as a member of the commission in charge of preparing the authentic edition of the Septuagint. This did not prevent him from continuing his apostolic labours and from founding several houses of his order in Upper Italy. After residing for a time at Genoa, he withdrew to the professed house of Arona (Diocese of Milan), where he died. His exegetical works are: "Scholia in Quatuor Evangelia" (Antwerp, 1596), and "Notationes in totam Scripturam Sacram" (Antwerp, 1598), both of which passed through several editions. However short, Sa's annotations clearly set forth the literal sense of Holy Writ, and bespeak a solid erudition, despite a few inaccuracies which have been sharply rebuked by Protestant critics. His theological treatise entitled "Aphorismi Concessiororum ex Doctorem sententiat colecti" (Venice, 1595), however remarkable, was censured in 1603, apparently because the Master of the Sacred Palace treated some of its maxims as contrary to opinions commonly received among theologians, but it was later corrected and has recently been removed from the Roman Index (1900). Sa's life of John of Texeda, the Capuchin confessor of St. Francis of Borgia, when Duke of Gandia, has not been published.

VENTURA FUENTES.

SABA and SABEANS.—This Saba (Sheba) must not be confused with Saba (Seba) in Ethiopia of Is., xliii, 3; xlv, 14. It lies in the Southern Arabian deserts, about 200 miles north of Aden. The Sabean literature is mentioned in the Bible as a distant people (Joel, iii, 8), famous traders (Ex., xxvii, 22-3; xxxviii, 13; Job, vi, 19), who exported gold (Is., lx, 6; Ps., lxxv, 15 (R. V.)); Ez., xxviii, 13), precious stones (Ex., xxvii, 22), perfumes (Jer., vi, 20), incense (Is., lx, 6), and perhaps slaves (Joel, iii, 8), and practiced brigandage. The genealogies of Genesis connect them now with Dadan, as sons of Regemna (x, 7; Cf. I Par., i, 9) and of Jecsan (xxv, 3; Cf. I Par., i, 32), now with Asarmoth (Hadhranōt), as sons of Jecsan (x, 20-8; cf., I Par., i, 20-22). These details point to two Sabaean, one in the south contiguous to Hadhranōt, another in the north near Taima (Job, i, 15; vi, 19) and El'Elia (cf. "Comptes rendus de l'Académie des Inscriptions" etc., June, 1910); but which was the original home of the Sabeans, cannot yet be decided. Hommel indeed places it in the north, near Idumean Dedan, and identifies it with Aribi-Yareb (whose queen figures in Assyrian inscriptions), with the Saba, whose queen visited Solomon ('III Kings, x), which is probably mentioned as tributary to Téglaflaphélasar III (745-27 B. C.), and whose ruler, Ithamar, paid tribute to Sargon in 715 B. C. Thence (according to Glaser) the Sabeans moved south in the eighth or ninth century and established their kingdom on the ruins of the Mosaic power. This theory is plausible and solves the difficulty of III Kings, x; but the identification of Saba, with Aribi-Yareb is arbitrary, and all present evidence disproves the existence of kings in Saba till much later. Sargon, who ravishes the title of King on his tributaries, refutes it to Ithamar, the Yethamara of Sabean inscriptions, and these inscriptions point to a long period of rule by Mukarrab (priest-kings), ten of whose names have been preserved.

Their capital was Cîrwa. Authorities agree in placing their rule as beginning in the tenth century a. c., and in making the advent of the kings contemporaneous with the destruction of the Mosaic kingdom. Here agreement ceases. Glaser, e. g. dates the Sabean kings from 890, Müller from 750,
and they can certainly not be placed later than 500 B.C., since at least seventeen of them reigned before 115 B.C. At that date a new era begins. The history of the country to which geography often throws in that year the Kingdom of Saba, and founded the "Kingdom of Saba and Ra'dan." In 25 B.C. the army of Julius Gallus failed miserably before the walls of Marib, the Sabaean capital. About A.D. 300 the ever-increasing Abyssinian immigrants overwhelmed the Hispanic-Arabian population, the "Kingdom of Saba, Ra'dan, Hadramaut, and Yemen," which, after yielding place for an interval to a Judeo-Sabaean kingdom and violent religious persecution (cf. Perera, "Historia dos Martires de Nágran," Lisbon, 1899), was re-established by Byzantine intervention in 556. After the rout of the Visigoth Alhazha at Mecca in 570, the Persians seized their opportunity, and Southern Arabia became a Persian province till its incorporation into Islam.

Modern discoveries confirm the classical and Biblical accounts of Sabaean prosperity. Ruins of fortresses and walled towns, of temples and irrigation-works, cover the land. Of the immense damms the most famous is that of the capital, Marib, which did service, after repeated restoration, down to the sixth century of our era. Thanks to irrigation, agriculture was abundant, with silting up precious spices. Brigandage reigned over the natural products. But the chief source of wealth was the trade route from India to Egypt and Northern Syria, which passed through the Sabaean capital (cf. Müller, "Der Islam im Morgen- und Abendland," I, 24 sqq.). Accordingly, when, in the first century after Christ, the Ptolemies exchanged the Southern Arabian route for a direct road from Alexandria to Egypt, the decline of Sabaean prosperity began. Thus the bursting of the dam of Marib was the consequence, not, as Arabic legend pretended, the cause, of the disintegration of the Sabaean tribes. The Sabaean polity seems to have been based on the feudal system. Two kings appear to have shared supreme power, but the monarchy was not hereditary, and passed on the king's death to the first male born during the reign to one of the leading families. The heads of these families shared the realm of the exalted, and were entitled to sanction the building of castles, and are even called kings of their own tribes. Of other magistrates—e.g. the eponymous magistrates—we know little more than names. A wide principle of individual equality seems to have prevailed; strangers were admitted as clients; slaves apparently appeared to have enjoyed certain rights with their consorts and are sometimes called "mistress of the castle." Concupiscence prevailed, but not polygamy. Sabaean art has in some respects merited high praise, but it lacks originality, and betrays at different periods the influence of the surrounding civilizations. The coins, the king's head with an owl on the reverse, are sometimes of fine workmanship (cf. Schlumberger, "Le trésor de San'a Daris," 1880). The earliest date from the fifth century B.C. Many recent writers attribute to the Sabaeans the invention of the Semitic alphabet. The supreme god of Saba was Il-Mukah, to whom was joined in the inferior capacity of spouse or daughter, the sun-goddess Shamah. Other deities were Athtar, the morning or evening star, Ta'lab, "Patron of Rym'am", Haubas, Rammám, and others—names which may be merely epithets of the moon-god. Sabaean divinity is difficult to define. Il-Mukah's name is the characteristic of the Sabaean religion. The inscriptions commemorate gratitude for success in arms, "man-slaying," health, preservation, safe return, booty, and rich crops. Worshippers offer to the gods themselves and their children, register vows, and attest their fulfillment. Votive offerings consisted in gilt images of the object, and one king dedicated as many as thirty golden (gift) statues on one occasion. We can only make a passing allusion to the prominent influence of the geography on the formation of the Mosaic institutions. Especially strong is the Arabian origin of the Divine name and of many religious terms, on the scruple of the Arabs about using the Divine name, their designation of priests as Levites, their laws of ceremonial purity, their imageless worship, their sin-offerings etc., especially when viewed in the light of Abraham's ancestry, and of the intimate connexion of Moses with Midian. Apart, however, from the fact that the question belongs to the Meccan rather than to the Sabaean problem, the materials at present at our disposal do not warrant any probable solution of the question.

Sabaism. See NASORAEANS.

Sabaoth (תַּבָּאֹת, pl. of תַּבָּאָה host or army).—The word is used almost exclusively in conjunction with the Divine name as a title of majesty: "the Lord of Hosts," or "the Lord of Hosts." The original and precise significations of the title are matters of more or less plausible conjecture. According to some scholars the "hosts" represent, at least prima facie, the armies of Israel over whom Jehovah exercised a protecting influence. Others opine that the word belongs to the hosts of heaven, the angels, and by metaphor to the stars and entire universe (cf. Gen., ii, 1). In favour of the latter view is the fact that the title does not occur in the Pentateuch or Josue though the armies of Israel are often mentioned, while it is quite common in the prophetic writings where it would naturally have the more exalted and universal meaning.

JAMES F. DRISCOLL.

Sabbas (SABS), Saint, hermit, b. at Mutaba in near Cæsarea in Cappadocia, 439; d. in his laura 5 Dec., 532. He entered a Basilian monastery at the age of eight, came to Jerusalem, lived five years in a cavern as a disciple of St. Euthymius, and, after spending some time in various monasteries, founded (483) the Laura Mar Saba (restored in 1840) in the gorges of the Cedron, south-east of Jerusalem. Becaue some of his monks opposed his rule and demanded a priest as the spiritual head, Patriarch Sausus of Jerusalem ordained him in 491 and appointed him archimandrite of all the monasteries in Palestine in 494. The opposition continued and he withdrew to the new laura which he had built near Thekla. A strenuous opponent of the Monophysites and the Origenists he tried to influence the emperors against
SABBATARIANS

them by calling personally on Emperor Anastasius at Constantinople in 511 and on Justinian in 531. His authorship of "Typicon S. Sabae" (Venice, 1645), a religious work written under the name of St. Sabbas, a Goth, martyred 12 April, 372, by being drowned in the Museus, a tributary of the Danube; St. Sabbas, also a Goth, martyred with about seventy others at Rome, under Aurelian; St. Julianus Sabbas, a hermit near Edessa, d. about 360; St. Sabbas the Younger, a Baselian abbot, d. Fec. 990 or 991, at the monastery of St. Cassius in Rome; St. Sabbas, Archbishop of Servia, d. at Trnawa, 14 January, 1237.

A Life in Greek by Cyril of Scythopolis was edited by Cottereau in Rev. Grecque, i (Paris, 1880), 220-376, and by Ponsvalviki together with an Old Slavonic version (St. Petersburg, 1890); another old Life in Greek was edited by Koliotis (Jerusalem, 1890).

M. MICHAEL OTT.

Sabbatarians, Sabbatarianism (Heb. סבּתֶּר rest).—The name, as appears from its origin, denotes those individuals or parties who are distinguished by some peculiar opinion or practice in regard to the observance of the Sabbath or day of rest. In the first place it is applied to those rigorists who apparently confound the Christian Sunday with the Jewish Sabbath and, not content with the prohibition of servile work, will not allow any ordinary and innocent occupations on the Sunday. This form of Sabbatarianism has chiefly prevailed among Scottish and English Protestants and was at one time very common. Of late years it has sensibly declined; and there is now a tendency towards the opposite extreme of laxity in observing the law of Sunday rest. These Sabbatarians never formed a distinct sect; but were merely a party of rigorists scattered among many and various Protestant denominations. At the same time it is not only in their name that they have something in common with the distinctive sects of Sabbatarians properly so-called, for their initial error in neglecting the distinction between the Christian weekly day, the Jewish Sabbath, and the starting-point of the Sabbatarian sects; and these carry their mistaken principle to its logical conclusion.

This logical development of judaizing Sabbatarianism is curiously illustrated in the history of a sect of Sabbatarian Socinians founded in Transylvania in the middle of the 18th century. Their first principle, which led them to separate from the rest of the Unitarian body, was their belief that the day of rest must be observed with the Jews on the seventh day of the week and not on the Christian Sunday. And as we learn from Schrödl the greater part of this particular Sabbatarian sect joined the orthodox Jews in 1874, thus carrying out in practice the judaizing principle of their founders. Although there does not seem to be any immediate or obvious connexion between the observance of the seventh day and the rejection of infant baptism, these two errors in doctrine and discipline are often found together. Thus Sabbatarianism made many recruits among the Mennonite Anabaptists in Holland and among the English Baptists who, much as they differ on other points of doctrine, agree in the rejection of paedobaptism. And it is presumably a result of this common principle that the sects are found in association with fanatical views on political or social questions. The most conspicuous of English Sabbatarian Baptists was Francis Bampfield (d. 1683), brother of a Devonshire baronet and originally a clergyman of the English Church. He was the author of several works and ministered to a congregation of Sabbatarian Baptists in London. He suffered imprisonment for his heterodoxy and eventually died in Newgate. In America the Baptists who profess Sabbatarianism are known as Seventh-Day Baptists.

But if the greater number of Sabbatarians have come from the Baptists, the most amazing of them was at one time associated with the Wesleyan Methodists. This was the prophetess Joanna Southcott (1750-1814), like Bampfield a native of Devonshire, who composed many spiritual poems and prophetic writings, and became the mother of a sect of Sabbatarians, also known as Southcottians or Joannaans. Modern Englishmen who are apt to smile at medieval credulity can scarcely find in Catholic countries in the "darkest" days of ignorance any instance of a more amazing credulity than that of Joanna Southcott's disciples, who confidently awaited the birth of the promised Messiah whom the prophetess of sixty-four was to bring into the world. They gave practical proof of their faith by preparing a costly cradle. Nor did they abandon all hope when the poor deluded woman died of the disease which had given a false appearance of pregnancy. The sect survived for many years; and when in 1874 her tombstone was shattered by an accidental explosion, the supposed portent re-enthralled the faith of her followers.

The American sect of Seventh-Day Adventists may be added to the list of these Sabbatarian communities, among which their large numbers should give them a conspicuous place. To these may be added the Jewish sect of Sabbatarians, though these derive their name not from the Sabbath, but from their founder, Sabbatian Zebi or Zevi (1638-78). His teaching was not concerned with any special observance of the Sabbath, but as a form of false Messiahism it may be compared with the mission of Joanna Southcott. The two stories show some strange points of resemblance especially in the invincible credulity of the disciples of the pretended Jewish Messiah and of the deluded Devonshire prophetess. (See bibliography of Adventists.)

W. H. KENT.

Sabbath (שבת, sabath, cessation, rest; Gr. εσπαβα-

rē; Lat. sabbatum), the seventh day of the week among the Hebrews, the day being counted from sunset to sunset, that is, from evening to evening.—Prescriptions concerning the Sabbath.—The Sabbath was a day of rest "sanctified to the Lord" (Ex., xvi, 23; xxxvi, 15; Deut., v, 14). All work was forbidden, the prohibition including strangers as well as Israelites, beasts as well as men (Ex., xx, 8-13; xxxvi, 12-17; xxv, 9-16). Their particular actions are mentioned as forbidden: cooking (Ex., xvi, 23); gathering manna (xvi, 26 sqq.); plowing and reaping (xxxiv, 21); lighting a fire (for cooking, xxxv, 3); gathering wood (Num., xv, 32 sqq.); carrying burdens (Jer., xvii, 21-22); preserving grapes, bringing in sheaves, and loading animals (I Eed., xiii, 15); trading (ibid., 15 sqq.). Travelling, at least with a religious object, was not forbidden, the prohibition of Ex., xvi, 29, referring only to leaving the camp to gather food; it is implied in the institution of holy assemblies (Lev., xxiii, 2-3, Heb. text), and was customary in the time of the kings (IV Kings, iv, 23). At a later period, however, all movement was restricted to a distance of 200 cubits (between five and six furlongs), or a "sabbath day's journey" (Acts, 1, 12). Total abstinence from work was prescribed only for the Sabbath and the Day of Atonement; on the other hand, the Sabbath was often prohibited (Ex., xii, 16; Lev., xxiv, 3 sq.). While the law of the Sabbath was punished with death (Ex., xxxi, 14-15; Num., xv, 32-36). The prohibition of work made it necessary to prepare food, and whatever might be needed, the day before the Sabbath, hence known as the day of preparation, or Paraseve (παρασκευή;
Matt., xxvii, 62; Mark, xv, 42, etc.). Besides abstention from work, special religious observances were prescribed. (a) The daily sacrifices were doubled, that is two lambs of a year old without blemish were offered up in the morning, and two in the evening, with twice the usual quantity of flour tempered with the spices and wine of libation (Num., xxv, 1–10). (b) New moons and the solemn feasts were observed (Ex., xiii, 10). (c) A sacred assembly was to be held in the sanctuary for solemn worship (Lev., xxiii, 2–3, Heb. text; Ezech., xvi, 3). We have no details as to what was done by those living at a distance from the sanctuary. Symbolical worship, however, is suggested by the fact that sacrifices were offered daily, and it is probably a development of an old custom. In earlier times the people were wont to go to hear the instructions of the Prophets (IV Kings, iv, 23), and it is not unlikely that meetings for edification and prayer were common from the earliest times.

Meaning of the Sabbath.—The Sabbath was the consecration of one day of the weekly period to God as the Author of the universe and of time. The day thus being the Lord's, it required that man should abstain from working for his own ends and interests, since by working he would appropriate the day to himself, and God would devote his activity to God by special acts of positive worship. After the Sinaitic covenant God stood in the relation of Lord of that covenant. The Sabbath thereby also became a sign, and its observance an acknowledgment of the pact: "See that thou keep my sabbath: because it is a sign between me and you in your generations: that ye may know that I am the Lord, who sanctify you." (Ex., xxxi, 13). But while the Sabbath was primarily a religious day, it had a social and philanthropic side. It was also intended as a day of rest and relaxation, particularly for the slaves (Deut., v, 14). Because of its influence on character, religion, and the social life of the day, two different reasons are given for its observance. The first is taken from God's rest on the seventh day of creation: "For in six days the Lord made heaven and earth, and rested on the seventh day: therefore the Lord blessed the seventh day, and sanctified it" (Ex., xx, 11; xxxi, 17). This does not mean that the Sabbath was instituted at the Creation, as some commentators have thought, but that the Israelites were to imitate God's example and rest on the day which He had sanctified by His rest. The Sabbath as the sign of the Sinaitic covenant recalled the deliverance from the bondage of Egypt. Hence the command, "Remember the Sabbath" (Deut., v, 14, 15). As a reminder of God's benefits to Israel the Sabbath was to be a day of joy (Lev., xvi, 29), and as such it was in practice (cf. Ezech. ii, 11; Lam., ii, 6). No fasting was done on the Sabbath (Judith, viii, 6), on the contrary the choicest meals were served to which friends were invited (cf. Luke, xiv, 1).

Origin of the Sabbath.—The Sabbath is first met with in connection with the fall of the princes (Ex., xvi, 22 sq.), but it there appears as an institution already known to the Israelites. The Sinaitic legislation therefore only gave the force of law to an existing custom. The origin of this custom is involved in obscurity. It was not borrowed from the Egyptians, the statement of several authors that seven days of rest was unknown to them. In recent years a Babylonian origin has been advocated. A lexicographical tablet gives shabbatu as the equivalent of דְמַי הָדָּעָה, "day of the appeasement of the heart" (of the gods). Furthermore, a religious custom of the intercalary month Elul and of the moon month Misannei mentions the 7th, 14th, 21st, 28th, and 19th days, the latter probably because it was the 49th (7 x 7) day from the beginning of the preceding month, as days on which the king, the magician, and the physician were to abstain from certain acts. The king, for instance, was not to eat food prepared with fire, put on bright garments, ride in a chariot, or exercise acts of authority. These days were, then, days of propitiation, and therefore omitted the Sabbath days. Hence it must be inferred that the last day of which is marked by abstention from certain actions, and called shabbatu, in other words the equivalent of the Sabbath. A Babylonian origin is not in itself improbable, since Chaldea was the original home of the Hebrews, but there is no proof that such an act is actually so observed. It is uncertain, shabbatu being at least equally probable. Besides, there is no evidence that these days were called shabbatu; the signs so read are found affixed only to the 13th day of the month, where, however, ša pātī, "division" of the month, is the more probable reading. These days, moreover, differed entirely from the Sabbath. They were not days of general rest, business being transacted as on other days. The abstention from certain acts had for object to appease the anger of the gods; the days were, therefore, days of penance, not of joy like the Sabbath. Lastly, the Sabbath was followed by the last of the moon, whereas the Sabbath was independent of them. Since the Sabbath always appears as a weekly feast without connexion with the moon, it cannot be derived, as is done by some writers, from the Babylonian feast of the full moon, or fifteenth day of the month, which, however, has only a doubtful claim to the designation shabbatu.

Obsecration of the Sabbath.—Violations of the Sabbath seem to have been rather common before and during the exile (Jer., xvii, 19 sqq., Ezech., xx, 13, 16, 21, 24; xxii, 8; xxiii, 38); hence the Prophets refer to that time (Ezech., xxii, 5-7, xxxii, 8). The exiles, i., 13; Lam., 13-14; Jer., loc. cit.; Ezech., xx, 12 sqq.). After the Restoration the day was openly profaned, and Nehemiah found some difficulty in stopping the abuse (II Ezed., xiii, 18–22). Soon, however, a movement set in towards a more rigorous observance which went far beyond what the law contemplated. At the time of the Maccabees the faith-ful Jews allowed themselves to be massacred rather than fight on the Sabbath (1 Mach. ii, 38–39); Mathathias and his followers realising the folly of such a policy decided to defend themselves if attacked on the Sabbath, though they would not assume the offensive (1 Mach. ii, 46-48). The influence of pharisaic rigorism a system of minute and burdensome regulations was elaborated, while the higher purpose of the Sabbath was lost sight of. The Mishna treatise Shabbath enumerates thirty-nine main heads of forbidden actions, each with subdivisions. Among the main heads are such trifling actions as weaving two threads, sewing two stitches, writing two letters, etc. To pluck two ears of wheat was considered as reaping, while to rub them was a species of threshing (cf. Matt., xii, 1–2; Mark, ii, 23–24; Luke, i, 1–2). To carry an object of the weight of a fig was carrying a burden; hence to carry even a stone (John, v, 10) was a gross breach of the Sabbath. It was unlawful to cure on the Sabbath, or to apply a remedy unless life was endangered (cf. Matt., xii, 10 sqq.; Mark, iii, 2 sqq.; Luke, vi, 7 sqq.). This explains why the sick were brought to Christ after sundown (Mark, i, 32). It was even forbidden to use a closing window-sash which produced its effect on the Sabbath. In the time of Christ it was allowed to lift an animal out of a pit (Matt., xii, 11; Luke, xiv, 5), but this was later modified so that it was not permitted to lay hold of it and lift it out, though it might be helped to come of itself by means of mere persuasion or entreaty. These examples, and these are not the worst, show the narrowness of the system. Some of the rules
were, however, found too burdensome, and a treatise of the Mishna (Erubin) tempers their rigour by subtle deduction.

The Sabbath in the New Testament.—Christ, while observing the Sabbath, set himself in word and act against this absurd rigorism which made man a slave of the day. He reproved the scribes and Pharisees for putting an intolerable burden on men's shoulders (Matt., xxiii, 4), and proclaimed the principle that “the Sabbath was made for man, and not man for the Sabbath” (Mark, ii, 27). He cured on the Sabbath, and defended His disciples for plucking ears of corn on that day. In His arguments with the Pharisees on this account He showed that the Sabbath is not broken in cases of necessity or by acts of charity (Mark, xii, 3–9). See also LXX, ix, 3 sqq.; xiv, 5). St. Paul enumerates the Sabbath among the Jewish observances which are not obligatory on Christians (Col., ii, 16; Gal., iv, 9–10; Rom., xiv, 5). The gentile converts held their religious meetings on Sunday (Acts, xx, 7; I Cor., xvi, 2), and with the disappearance of the Jewish churches this day was exclusively observed as the Lord's Day.

Sabbath Observance. See SUNDAY.

Sabbatical Year (םייח בַּשָּׁבָת; shendith shabbathón), “year of rest”; Sept. πανεκκλησία; Vulg. annus requiescitionis), the seventh year, devoted to cessation of agriculture, and holding in the period of seven years a place analogous to that of the Sabbath in the week; also called “year of remission.” Three prescriptions were to be observed during the year (Ex., xxii, 10–11; Lev., xxv, 1–7; Deut., xv, 1–11; xxxi, 10–13). (1) The land was to lie fallow and all agricultural labor was to be suspended. The harvest was to be neither ploughing, sowing, nor were the vines and olives to be attended to. The spontaneous yield was not to be garnered, but was to be left in the fields for common use, and what was not used was to be abandoned to the cattle and wild animals (Ex., xxii, 10–11; Lev., xxv, 1–7). Of the fruit trees were also set aside, because the oil was one of the three great agricultural products; but the law probably applied also to other trees. The law prescribed rest for the land, not for man. Hence work other than agricultural was not forbidden, nor even work in the fields which had no direct connection with raising crops, such as building walls of enclosure, digging wells, etc.

(2) No crops being reaped during the sabbatical year, the payment of debts would have been a great hardship, if not an impossibility, for many. Hence the creditor was commanded to withhold his hand and not to exact a debt from an Israelite, though he might demand it of strangers, who were not bound to abstain from agricultural pursuits (Deut., xv, 1–3, Heb. text). The Talmudists and many after them understood the law to mean the remission of the debt; but modern commentators generally hold that the remission was suspended, because the debtor was exonerated from exacting the debt during the year. The Douay translation “He to whom anything is owing from his friend or neighbour or brother, cannot demand it again” is incorrect.

(3) During the sabbatical year the Law was to be read on the Sabbath to the Tabernacle to all Israel, men, women, and children, as well as to the strangers within the gates, that they might know, and fear the Lord, and fulfill all the words of the Law (Deut., xxxi, 10–12). The law concerning the release of Hebrew slaves in the seventh year (Ex., xx, 12 sqq.; Lev., xv, 12 sqq.) is wrongly connected by some writers with the sabbatical year. That there was no special connexion between the two is sufficiently shown by the requirement of six years of servitude, the beginning of which was not affixed to any particular year, and by the law prescribing the liberation of Hebrew slaves in the year of jubilee, which immediately followed the seventh sabbatical year (Lev., xxx, 9 sqq.).

Since the sabbatical year was preceded by six sowing and six harvests (Ex., xxiii, 10), it began with the new moon, the time of sowing, and proceeded with the civil year, which began with the month of Tishri (Sept.–Oct.); some commentators, however, think that like the year of jubilee it began on the tenth of the month. The year was not well observed before the Captivity (cf. II Par., xxxvi, 21 and Lev., xxvi, 34, 35, 43). After the return, the people covenanted to let the land lie fallow and to exact no debt in the seventh year (II Esd., x, 31), and there-after it was regularly kept. The occurrence of a sabbatical year is mentioned in I Mach., vi, 49, 53, and its observance is several times referred to by Josephus, Ant., ii, 8, 2, x, 8, 1; Wars of the Jews, viii, 1; XIV, xvi, 2). The absence of any allusion to the celebration of the sabbatical year in pre-exilic times has led modern critics to assert that it was instituted at the time of the Restoration, or that at least the custom of allowing all fields to lie fallow simultaneously was then introduced. But it is hardly credible that the struggling community would have adopted a custom calculated to have a seriously disturbing effect on economic conditions, and without example among other nations, unless it had the sanction of venerable antiquity. The main object for which the sabbatical year was instituted was to bring home to the people that the land was the Lord’s, and that they were merely His tenants at will (Lev., xxv, 23). In that year He exercised His right of sovereign dominion. Secondly, it was to excite their faith and reliance on God (ibid., 20–22), and to remind and stimulate their faithfulness to His Law (Deut., xxxi, 10–13).

Sabbatine Privilege.—The name Sabbatine Privilege is derived from the apocryphal Bull “Sacratissimo uti culmine” of John XII, 5 March, 1222. In this Bull the pope is made to declare that the Mother of God appeared to him, and most urgently recommended him to the Carmelite Order and its confratres and consores. The Blessed Virgin asked that John, as Christ's representative on earth, should ratify the inducements which He had already granted in heaven (a plenary indulgence for the members of the Carmelite Order and a partial indulgence, remitting the third part of the temporal punishment due to their sins, for the members of the confraternity); she herself would graciously descend on the Saturday (Sabbath) after their death and liberate and conduct to heaven all those who were in purgatory. The condition on which the confratres and consores must fulfill. At the end of the Bull the pope declares: “Istam ergo sanctam Indulgentiam accepto, roboro et in terris confirmo, sicut, propter merita Virginis Matris, gratias Jesus Christus concegis in oculis”. (This holy indulgence I therefore accept; I confirm and ratify
it on earth, just as Jesus Christ has graciously granted it in heaven on account of the merits of the Virgin Mother.' Our first information of this Bull is derived from a work of the Carmelite Baldinus Leersius ("Collectaneum exemplorum et miraculorum" in "Bibliotheca Carmelit.," I, Orleans, 1752, p. 218), who died in 1483. The authenticity of the Bull was keenly contested especially in the seventeenth century, but generally, when it was published on Wednesdays and Saturdays, the Carmelites and their chief opponents of its authenticity were Joannes Launoy and the Bollandist, Daniel Papebroch, both of whom published works against it. To-day it is universally regarded by scholars as inauthentic, even the "Monumenta histor. Carmel." of the Carmelite B. Zimmerman (I., Lierne, 1907, pp. 556-63) joining in condemning it.

In 1379, in consequence of the hostility still shown to their order and especially to its name, the Carmelites besought Urban VI to grant an indulgence of 3 years and 3 quarantines to all the faithful who designated them and their order "Ordinum et Fratres B. Marie Genetricis Dei Monte Carmelli" (Bullar. Carmelit., I, 141); this was granted by Urban on 26 April, 1379. It is difficult to understand why, instead of asking for this indulgence, they did not appeal to the old promise and the recent "Bulla sabbatin," if the scapular was then known, and the promise to the poor was made in July, on the Bull itself in its wording nor its general contents were thereby declared authentic and genuine. On the contrary, the ratification by Gregory XIII on 18 September, 1577 (Bullar. Carmelit., II, 190), must be interpreted quite in the sense of the later Decree of the Holy Office. This Decree, which appeared in 1613, expresses no opinion concerning the genuineness of the Bull, but confines itself to declaring what the Carmelites may presume of its authenticity. The Bull forbids the painting of pictures representing, in accordance with the wording of the Bull, the Mother of God descending into purgatory (cum desensione beate Virginis ad animas in Purgatorio liberalandas). It must be also remembered that the latest authentic indulgences of the Carmelite Order are dated 23 January, 1907 (Acta S. Sedis, XL, 753 sq.), approved by the Congregation of Indulgences, says nothing either of the Bull of John XXII, of the indulgences granted by him, or of the Sabbatine privilege for the Carmelites. To learn the meaning and importance of the privilege, we may turn only to the above-mentioned Decree of the Holy Office. It was inserted in its entirety (except for the words forbidding the painting of the pictures) into the list of the indulgences and privileges of the Confraternity of the Scapular of Mount Carmel.

We reproduce here the whole passage dealing with the Sabbatine privilege, as it appears in the summary approved by the Congregation of Indulgences on 4 July, 1908. It is noteworthy that the Bull of John XXII, which was still mentioned in the previous summary approved on 1 December, 1886, is no longer referred to (cf. "Rescript. authent. B. C. Indulgu.", Ratibon, 1885, p. 475). Among the privileges which are mentioned after the indulgences, the following occurs in the first place: 'The privilege of Pope John XXII, commonly [rulgo] known as the Sabbatine, which was approved and confirmed by Clement VII ("Ex elementi," 12 August, 1530), St. Pius V ("Ex elementi," 18 Feb., 1568), Gregory XIII ("Ut laudes," 18 Sept., 1577), and others, and also by the Holy Roman General Inquisition under Paul V on 20 January, 1613, in a Decree to the following effect:"

It is permitted to the Carmelite Fathers to preach that the Christian people may piously believe in the help which the souls of brothers and members, who have departed this life in charity, have worn throughout the life the scapular, and have ever observed charity, have recited the Little Hours of the Blessed Virgin, or, if they cannot read, have observed the fast days of the Church, and have abstained from flesh meat on Wednesdays and Saturdays (except when Christmas falls on such days), may derive after death—especially on Saturdays, the Church's holy day—to that of the Scapular of Mount Carmel — through the unceasing intercession of Mary, her pious petitions, her merit, and her special protection."

With this explanation and interpretation, the Sabbatine privilege no longer presents any difficulties. When Benedict XIV adds his decree of the decree of the Holy Office, he should rely on it (Opera omnia, IX, Vened., 1767, pp. 197 sqq.). Even apart from the Bull and the tradition or legend concerning the apparition and promise of the Mother of God the interpretation of the Decree cannot be contested. The Sabbatine privilege thus consists essentially in the early liberation from purgatory through the special intercession and petition of Mary, which she graciously exercises in favour of her devoted servants preferentially— as we may assume— on the day consecrated to her, Saturday. Furthermore, the conditions for the granting of the privilege are of such a kind as justify a special trust in the Carmelites. It is especially required of all who wish to share in the privilege that they faithfully preserve their chastity, and recite devoutly each day the Little Hours of the Blessed Virgin. However, all those who are bound to read their Breviary, fulfill the obligation of reciting the Little Hours by reading their Office. Persons who cannot read must (instead of reciting the Little Hours) observe all the fasts prescribed by the Church as they are kept in their home diocese or place of residence, and must in addition abstain from flesh meat on all Wednesdays and Saturdays of the year, except when Christmas falls on one of these days. The obligation to read the Little Hours and to abstain from flesh meat on Wednesday and Saturday may on important grounds be changed for other pious works: the faculty to sanction this change was granted to all confessors by Leo XIII in the Decree of the Congregation of Indulgences of 11 (14) June, 1901.

Sabina, SAINT, widow of Valentinus and daughter of Herod Metallarius, suffered martyrdom about 126. According to the Acts of the martyrdom, which cannot have no historic value, she lived among the Samaritans and was converted to Christianity by her female slave Serapia. Serapia was put to death for her faith and later, in the same year, Sabina suffered martyrdom. In 430 her relics were brought to the Aventine, where a basilica, which is very interesting in the history of art, is called after St. Sabina. Originally the church was dedicated to both saints. The feast of St. Sabina is celebrated on 20 August. 

Acta SS., VI, August, 496-504; Bibliotheca hagiographica latina (Brussels, 1890-1900), 1705.

KLEEMENS LOFFLER.

Sabina (Sabinensis), a suburbanicarian diocese, with residence in Magni Sabinus, formed from the territory of the three ancient dioceses: Forum Novum (S. Maria in Vescovio), Cures (Corse), and Nomentum
(Mentans). When these see were united, the diocese was called Sabina because it included that part of Sabina which at the time of the Lombard invasion remained united to the Roman territory (Sabina Romana) while the remainder became part of the Lombar Kingdom. Curia was the ancient city of the Sabinas, which territory lay between the Tiber, the Anio, and the Appennines (Gran Sasso e Maiella). Nomentum is frequently mentioned in ancient Roman history. After Charlemagne, Sabina was ruled by a count; later its territory was divided between some bishops of Rome and the Senet of Rome, exercised feudal jurisdiction over its territory, e.g., Magliano. During the persecutions Nomentum had two cemeteries, one at St. Restitutus, a third century martyr, at the sixteenth mile on the Via Nomentana, belonging to Justa, a pious matron, and one at St. Primitus and Felicianus, martyrs under Diocletian, at the fourteenth and fifteenth miles. Bishop Stephanus, a contemporary of St. Restitutus, is mentioned in the Acts of the martyr. Urose is the first known Bishop of Nomentum (415). Others are known from Gratianus (593) till St. Gregory the Great united the Sees of Cures and Nomentum. Tiburius (465) was the first Bishop of Cures, called from Sabina or of St. Anthismus, as that martyr's basilica, adjoining the bishop's residence, was all that remained of the town in the fifth century. It was destroyed in 870, and the city fell into decay. The last Bishop of Nomentum was Joanna, who assisted at the Council of Rome (964). The small town of Mentana arose around the castle of the Crescensi and came into the hands of the Orsini. Here Garibaldi was defeated by the pontifical and French troops (1867).

In 984 Nomentum was united to the See of Forum Novum, called also Vicoasebinae, situated on the Via Sabina, having bishops from the fifth century, e.g., Patius (465). The dignity of "hebdomasary" was assumed by the lateran basilica was then conferred on the Bishop of Nomentum, the closest to Rome; later the Bishop of Sabina became a cardinal-bishop. The following deserve mention: Joannes (1044), afterwards Antipope Sylvester III; Gregory, legate to Emperor Henry IV in 1078; Cistinus (1101) imprisoned the imprisonment of Paschal II; Conrad (1153), later Anastasius IV; Conrad of Wittelsbach (1163), legate to the Holy Land and Germany; John (1202), legate; Peter (1216), legate against the Albigenses and in Syria; Gaufredo Conti (1220); later Celestine IV; Guglielmo (1244), Bishop of Moletta in Livonia; Lithuan; Guido Gros (1261), later Clement IV; Egido Albornos (1355); Guillaume d'Aigrefeuille (1768). During the Western Schism, the Avignon popes also created cardinal-bishops of Sabina; the transference of Giordano Orsini (1427) to the See of Ostia (1439) was the first example of the opatic state, existing in regard to suburbanicarian sees; Bessarione (1442); Amadeus of Savoy (1449-51), afterwards Antipope Felix V; Iseidore (1452), former metropolitan of Kief; John Torquemada (1463). Forum Novum, having recovered from its destruction in the Gothic war, was destroyed in 1776 by the Saracens and remained deserted for fifty-eight years. The basilica, at first dedicated to S. Valentine, was later restored under the title of S. Maria al Vescovio, but remained unimportant.

During the Avignon period only a few inhabitants remained, and Cardinal Jerome Caraffa (1479) induced Alexander VI (1498) to transfer the episcopal see to Magliano, erecting the collegiate church of that city into the cathedral. Magliano (Maniulianum) overlooks the valley of the Tiber, on which river the inhabitants formerly carried on an extensive trade with Rome. Storus V caused the Ponte Fiasco to be constructed. The city of Sabina was a beneficiary of Leo X to restore the title of cathedral to the church of Vescovio. Cardinal Paleotti established a convent for Reformed Friars Minor, later replaced by the Order of Mercy. In 1733 Clement XII suppressed the chapter. In the subterranean crypt of the church there are many traces of frescoes which have been brought to light through the munificence of the present cardinal-bishop, among whose predecessors may be mentioned: Alessandro Farnese (1523), later Paul III; Lorenzo Campeggio (1537); G. F. Caraffa (1546), later Paul IV; Giovanni Morone (1561); Cristoforo Madruzi (1562); Gio. Antonio Serbelloni (1578); Gab. Paleotto (1591), a reformer of discipline and founder of the seminary of Pietro Aloiobrandizi (1820); Scipio Borghese (1629), who procured an auxiliary; Francesco Barberini (1645); Blessed Nicolò Albargati (1677); Pietro Ottoboni (1681), later Alexander VIII; Carlo Pio of Savoy (1683); Paluzio Altieri (1689); Ippolito Vincenti Carreri (1698), who died in exile in Paris; Lorenzo Litta (1714); Venanzio Carlo Odescalchi (1753); Luigi Lamberchini (1842). In 1841 the territory now forming the Diocese of Poggio Mirteto was separated from Sabina. The Diocese of Sabina contains 35 parishes with 55,000 inhabitants, 56 secular and 32 regular priests, 4 houses of religious, and 15 monks.

SABINIANUS, Pope.—The date of his birth is unknown, but he was consecrated pope probably 13 Sept., 804, and died 22 Feb., 806. The son of Bonus, he was born at Blera (Bieza) near Viterbo. In 683 he was sent by St. Gregory I as apostolic nuncio to Constantinople; but in some respects his administration of the office did not come up to Gregory's expectations. He was not astute enough for the rulers of Byzantium. He returned to Rome in 859, and was chosen to succeed Gregory soon after the death of the great pontiff; but as the imperial confirmation of his election did not arrive for some time, he was not consecrated till September. The difficulties of his pontificate were caused by fear of the Lombards and by famine. When the Lombard had passed, Sabinianus opened the granaries of the Church, and sold corn to the people at one solido (twelve shillings) for thirty pence. Because he was unable to unwilling to allow the people to have the corn for little or nothing, there grew up in later times a number of idle legends in which his predecessor was represented punishing him for avarice. He is said to have had restored to the secular clergy posts which St. Gregory had filled with monks. He was buried in St. Peter's.

SABBAN, Louis de; Jesuit; b. in Paris, 1 March, 1652; d. at Rome, 23 Jan., 1732. His father, afterwards a marquis, was attached to the French embassy in London during the Commonwealth, and piously visited the martyrs Corby and Ducket (q. v.) before their deaths. He married an English lady (a Goring), and Louis was sent to the English College of St. Omer, and entered among the English Jesuits. Distinguished for many talents, he became one of the royal chaplains to King James II, in 1685, preached with great diligence and was engaged in controversy with William Sherlock, dean of St. Paul, and Edward Wigglesworth. When the outbreak of the Revolution in 1688 he was first sent to London with the infant Prince of Wales, and then became involved in many adventures. He was repeatedly seised by the mob and maltreated, but as often escaped, and finally managed to slip over to France. He was subsequently appointed visitor of the Neapolitan Jesuits, and represented his province at Rome in the congregation of 1693, when the case of Father
Sacramentals. — In instituting the sacraments Christ did not determine the matter and form down to the slightest detail, leaving this task to the Church, which should determine what rites were suitable in the administration of the sacraments. These rites are indicated by the word Sacramentals, the object of which is to manifest the respect due to the sacrament and to secure the sanctification of the faithful. They belong to widely different categories, e. g.: substance, in the mingling of water with Eucharistic wine; quantity, in the triple baptismal effusion; quality, in the use of unleavened bread; relation, in the capacity of the minister; time and place, in feast-days and churches; habit, in the liturgical vestments; posture, in genuflexion, prostrations; action, in chanting etc. So many external conditions connect the sacramentals with the virtue of religion, that they are being indicated by the Council of Trent (Sess. XXXI, 15), that it is essential that apart from their ancient origin and traditional maintenance-ceremonies, blessings, lights, incense etc. enhance the dignity of the Holy Sacrifice and arouse the piety of the faithful. Moreover the sacramentals help to distinguish the members of the Church from heretics,
Sacramentals are dependent on the Church which established them, and which therefore has the right to maintain, develop, modify, or abrogate them. The ceremonial regulation of the sacraments in Apostolic times is sufficiently proved by the words of St. Paul to the Corinthians: "Cetera autem, cum venero, disponam [the rest I will set in order when I come (I Cor., xi, 34)], which St. Augustine, on what ground we know not, supposes to refer to the obligation of the Eucharist (Ep. liv., Ad Januarius", c. 6, n. 23). The Fathers of the Church enumerate ceremonies and rites, some of which were instituted by the Apostles, others by the early Christians (cf. Justin Martyr, "Apol. I", n. 61, 65 in F. G., VI, 419, 427; Tertullian, "De baptismo", vii in F. L., L. 1206; St. Basil, "De Spiritu Sancto" I, xcvii, n. 67 in F. G., XXII, 191). The Catholic Church, which is the heiress of the Apostles, has always used and maintained against heretics this power over sacramentals. To her and to her alone belongs the right to determine the matter, form, and minister of the sacramentals. The Church, that is, the Supreme Authority, is represented by the visible head, alone legislates in this matter, because the bishops no longer have in practice the power to modify or abolish by a particular legislation what is imposed on the universal Church. What concerns the administration of the sacramentals is contained in detail in the Roman Ritual and the Episcopal Ceremoniale.

Apart from the ceremonies relating to the administration of the sacraments the Church has instituted others for the purpose of private devotion. To distinguish between them the latter are named sacramentals use of the respective rites and those of the sacraments properly so-called. In ancient times the term sacrament alone was used, but numerous confusions resulted and the similarity of rites and terms led many Christians to regard both as sacraments. After Peter Lombard the use and definition of the word "sacramental" had a fixed character and was exclusively applicable to those rites presenting an external resemblance to the sacraments but not applicable to the sensible signs of Divine institution. St. Thomas Aquinas makes use of the terms sacrament and sacramentals (Summa I, Q. cxi, a. 2, ad 2um; III, Q. cxi, a. 1, q. 2um) and the thomists of that time adopted so that at present sacramentals is exclusively reserved for those rites which are practised apart from the administration of the seven sacraments, for which the word ceremonies is used.

The number of the sacramentals may not be limited; nevertheless, the attempt has been made to determine their general principles or rather applications in the verse: "Oro, tinctus, edenes, confessans, dans, benedicens"). Orano indicates public prayer, whether liturgical or private; tinctus, the use of holy water and theunction in use at various consecrations; edenes, the eating of blessed foods, consecrated by the general avowal of faults which is made in the Confiteor recited at Mass, in Communion, in the Divine Office; dans, alms, benedicens, papal and episcopal blessings etc., blessings of candles, ashes, palms etc. Another distinction classifies sacramentals according to the presence of heavenly beings in the acts, a distinction above, or things, such as medals, holy water etc. The sacramentals do not produce sanctifying grace ex opere operato, by virtue of the rite or substance employed, and this constitutes their essential difference from the sacraments. The Church is under no compulsion or restraint, the number of sacramentals as they were instituted by Christ, but the sacramentals do not possess this dignity and privilege. Theologians do not agree as to whether the sacramentals may confer any other grace ex opere operato through the action of the one who uses them, but the negative opinion is more generally followed, for as the Church cannot confer sanctifying grace nor institute signs thereof, neither can she institute efficacious signs of the other graces which God alone can give. Moreover, as Eucharist teaches, the sacramentals do not infallibly produce their effect. Finally in the eucharistic formulas of the sacramentals the Church makes use, not of affirmative, but of deprecatory expressions, which shows that she looks directly to Divine mercy for the effect.

Besides the efficacy which the sacramentals possess in common with other good works they have a special efficacy of their own. If their true value proceeded from the opus operantis, all external good works could be called sacramentals. The special virtue recognised by the Church and experienced by Christians in the sacramentals should consist in the official prayers whereby we implore God to pour forth special graces on those who make use of the sacramentals. These prayers move God to give graces which He would not otherwise give, and when so obtained are represented to the invisible head, alone legislates in this matter, because the bishops no longer have in practice the power to modify or abolish by a particular legislation what is imposed on the universal Church. What concerns the administration of the sacramentals is contained in detail in the Roman Ritual and the Episcopal Ceremoniale.

Apart from the ceremonies relating to the administration of the sacraments the Church has instituted others for the purpose of private devotion. To distinguish between them the latter are named sacramentals use of the respective rites and those of the sacraments properly so-called. In ancient times the term sacrament alone was used, but numerous confusions resulted and the similarity of rites and terms led many Christians to regard both as sacraments. After Peter Lombard the use and definition of the word "sacramental" had a fixed character and was exclusively applicable to those rites presenting an external resemblance to the sacraments but not applicable to the sensible signs of Divine institution. St. Thomas Aquinas makes use of the terms sacrament and sacramentals (Summa I, Q. cxi, a. 2, ad 2um; III, Q. cxi, a. 1, q. 2um) and the thomists of that time adopted so that at present sacramentals is exclusively reserved for those rites which are practised apart from the administration of the seven sacraments, for which the word ceremonies is used.

The number of the sacramentals may not be limited; nevertheless, the attempt has been made to determine their general principles or rather applications in the verse: "Oro, tinctus, edenes, confessans, dans, benedicens"). Sacramentines. See Perpetual Adorers of the Blessed Sacrament.

Sacramento, Diocese of (Sacramentines), was created by the Vicariate of Marysville, which comprised the regions lying between the parallels of latitude 39° and 42° N., and between the Pacific Ocean on the west and the Colorado River on the east. The diocese at present covers 54,449 square miles in California, and 38,162 square miles in Nevada. It includes the counties of Alpine, Amador, Butte, Calaveras, Colusa, Del Norte, Douglas, El Dorado, Grave, Inyo, Kern, Lake, Lassen, Marin, Modoc, Mono, Nevada, Placer, Plumas, Sacramento, Shasta, Sierra, Siskiyou, Sutter, Tulare, Tehama, Trinity, Yolo, and Yuba in California; and the counties of Churchill, Douglas, Esmeralda, Humboldt, Lyon, Ormsby, Storey, and Washoe in Nevada.

The Vicariate of Marysville (Marysvillenius) was formed in 1861; four priests were in the territory. There are now 65 priests and about 50,000 Catholic people within the Diocese of Sacramento. Grass Valley, Marysville, and Virginia City, Nevada, were the three principal settlements in 1864. Amongst the pioneer priests, the names of Very Rev. T. J. Dalton, vicar-general for fifteen years, and Very Rev. J. J. Callan stand out prominently. The Very Rev. C. M. Lynch, vicar-general and pastor of St. Patrick's, Grass Valley, who figured largely since 1864 in the pioneer work, chiefly in the mining country, died on 29 Sept., 1911. The site of the first permanent church at Sacramento was given by the Governor of California, Peter H. Burnett, a devout convert and a brilliant lawyer. The early mission centres were chiefly in the gold and silver regions. The rich pastures, timber, fruit, and agricultural lands began later to attract settlers, until these at present form the most populous parts of the diocese. The Rev. Eugene O'Connell was chosen the first Vicar Apostolic of Marysville in 1861. Until that time the territory was under the jurisdiction of the Archbishop of San Francisco. Bishop O'Connell was born in June, 1815, at Kingscourt, in the Diocese of Meath, Ireland; he studied and was ordained in St. Patrick's College, Maynooth, in June, 1842. He taught for several years in Navan seminary, which he left to direct a college at Santa Inés, California, in 1851, and spent one year there. The Bishop was sent to take charge of the theological seminary of St. Thomas near San Francisco, where he remained three years. In 1854 he returned to Ireland, was dean and taught theology in All Hallows College. From there he was consecrated titular Bishop of Flaviopolis and Vicar Apostolic of Marysville by Cardinal Cullen at Dublin, 3 February, 1861. He was installed at St. Joseph's Pro-Cathedral, Marysville, by Archbishop Alemany, 28 March, 1862.

Pius IX formed the vicariate into the Diocese of Grass Valley (Vallisfratensis) on 29 March, 1868. Bent with work and care the learned and apostolic Prelate gave time to see, 17 March, 1854, was appointed titular Bishop of Joppa, and retired to the hospital of the Sisters of Charity in Los Angeles where he died, 4 December, 1891. His remains lie in Calvary Cemetery, Los Angeles. The Rev. Patrick Manogue, then pastor of Virginia City, Nevada, was at first appointed as Vicar Apostolic of Ceramos, and was consecrated, 16 January, 1861, in St. Mary's Cathedral, San Francisco, by Archbishop J. S. Alemany. He was born in 1831 at Desart, Kilkenny, Ireland, of a family that numbered many distinguished ecclesiastics. He received his early education at St. Columb's College, and settled in New England, and later engaged in mining in California. After some years he returned to St. Mary's of the Lake, Chicago, to prepare for the priesthood, and from there went to St. Sulpio, Paris, for his ecclesiastical studies. He was ordained there by Cardinal Morlot in 1861, and returned to California. Father Manogue was sent to work in the territory of Nevada about 1864. He devoted himself to the Indian tribes and attained great results in gaining converts. His manner of teaching them Christianity was to assemble the roving bands in the church and explain the stations, the altar, statuary, etc. He succeeded to the see, 17 March, 1884. Leo XIII changed the boundaries of the diocese, 16 May, 1886, and the episcopal see was moved to Sacramento. In 1890 the See erected there a cathedral in the Italian Renaissance style with a seating capacity of over sixteen hundred. The architect was Mr. Brian J. Clinch. Bishop Manogue took a leading part in public affairs and was a successful arbitrator between the mine owners and the miners in their conflicts. He was of large stature, of a humorous turn of mind, and a good musician. He died on 27 February, 1895, and lies buried in St. Joseph's Cemetery, Sacramento, surrounded by the remains of eleven priests. The Rev. Thomas Grace succeeded Bishop Manogue. He was preconised as bishop on 27 February mar- rauded in England (Dublin, Ireland, on 2 Aug., 1841; educated at St. Peter's College, Wexford; made his ecclesiastical studies at All Hallows College, Dublin, and was ordained on 11 June, 1876. He came to California the same year by the way of the Isthmus of Panama in company with Fathers M. Coleman, L. Kennedy, V. O., and J. J. Callan. He was rector at Marysville for eight years, pastor at Sacramento (1881-96), and was consecrated bishop on 16 June, 1896, in the Cathedral of the Blessed Sacrament, Sacramento.

Statistics.—The diocese was incorporated on 24 Nov., 1897. Its legal title is The Roman Catholic Diocese of Sacramento; the bishop is the corporation sole; 53 priests are from Ireland, 3 from Italy, 2 from Portugal, 3 German, and 2 American. All Hallows College, Dublin, has supplied by far the largest number of priests and continues to do so. In the episcopal city there are distinct parishes for Portuguese, Italians, and Germans. Four priests minister at the cathedral. Nine Brothers of the Christian Schools teach a primary and high school adjacent to the cathedral. The Sisters of Mercy conduct a primary school and academy. The Sisters of St. Francis (Lewiston, N.Y.) conduct the parochial schools. In all about 1100 children attend Catholic schools in the city. The Notre Dame Sisters, Sisters of the Holy Cross, Dominic Sisters, and Sisters of Mercy conduct schools in various parts of the diocese. The Sisters of Mercy also conduct a home for destitute children at Sacramento, a home for the aged, and a hospital for 75 patients, with a training school for nurses attached; the classes contain 36 at present. At Grass Valley they have two orphanages providing for 100 boys and 123 girls. The State makes an allowance for each orphan and half orphan. The state prison at Folsom has a priest for chaplain. The largest town in the diocese is Stockton, which has 12 priests and a population, including suburbs, of 55,000; Eureka, 2 churches and 2 priests, population, 11,845; Marysville, 2 priests and 1 church, 5430; Grass Valley, 1 church and 1 priest, 6500; Reno, 1 church and 1 priest, 10,897; Chico, 1 priest and 1 church, 11,775. Catholic Almanac paper is published at Sacramento. A public library is attached to the cathedral, and works in conjunction with the state and city libraries. A clerical aid fund helps to maintain infirm and aged priests. The Friars Minor (St. Louis province) have a house at Sacramento. The United States government makes funds for Indian and negro missions, orphanages, the Catholic University, Peters, and Holy Land shrines. The Priests' Eucharistic League meets annually at the
Cathedral of the Blessed Sacrament. The priests make a retreat every year at the House of Retreats, Grass Valley. The following confraternities are in the diocese: Men’s Sodality of the B. V. M.; Women’s Sodality of the B. V. M.; Holy Angels; and the Holy Childhood; St. Aloysius Society; Altar Servers’ Association; Catholic Librarians’ Association; Catholic Ladies’ Aid Society; Young Ladies’ Institute; Young Men’s Institute; Catholic Library Association; and Knights of Columbus. The growth of the Catholic population is steady. Converts are many.

Sacraments, outward signs of inward grace, instituted by Christ for our sanctification (Catechism of the Catholic Church, II, n. 4, ex 8. Aug. “De cathedratis sacratis”). The subject may be treated under these heads: I. The nature of the sacraments; II. The origin of the sacraments; III. The number of the sacraments; IV. The effects of the sacraments; V. The minister of the sacraments; VI. The recipient of the sacraments. 

I. NECESSITY AND NATURE. (1) In what sense necessary. — Almighty God can and does give grace to men in answer to their internal aspirations and prayers without the use of any external sign or ceremony. This will always be possible, because God, grace, and the soul are spiritual things. God is for men at work in invisible symbols in dealing with men; the sacraments are not necessary in the sense that they could not have been dispensed with. But, if it be shown that God has appointed external, visible ceremonies as the means by which certain graces are to be conferred on men, then in order to obtain those graces it will be necessary for men to make use of those Divinely appointed means. This truth theologians express by saying that the sacraments are necessary, not absolutely but only hypothetically, i.e., in the supposition that if we wish to obtain a certain supernatural end we must use the means he has appointed for obtaining that end. In this sense the Council of Trent (Sess.VII, can. 4) declared heretical those who assert that the sacraments of the New Law are superfluous and not necessary, although all are not necessary for each individual. It is the teaching of the Catholic Church and of Christians in general that, whilst God was nowise bound to make use of external ceremonies as symbols of things spiritual and sacred, it has pleased Him to do so, and this is the ordinary and most suitable manner of dealing with men. Writers on the sacraments refer to this as the necessitas concretionis, i.e., necessity of suitable externals. It is not a necessity, but the most appropriate manner of dealing with creatures that are at the same time spiritual and corporeal. In this assertion all Christians are united: it is only when we come to consider the nature of the sacramental signs that differences arise. Some theologians hold that sacraments have a twofold nature — visible and internal — whereas others maintain that these are but different aspects of a single reality, viz., that of the visible and internal. This question has been argued for many centuries, and still is; but even to this day no final blow has been struck against the old doctrine of the necessity of visible signs. 

(2) Why the sacramental system is most appropriate. — The reasons underlying a sacramental system are as follows: (a) Taking the word “sacrament” in its broadest sense, as the sign of something sacred and hidden (the Greek word is ‘mystery”), we can say that the whole world is a vast and complex sacrament in that material things are unto men the signs of things spiritual and sacred, even of the Divinity. “The heavens shew forth the glory of God, and the firmament declareth the work of his hands.” (Ps. xvii. 2). “The invisible things of him [i.e. God] from the creation of the world are clearly seen” (Rom. i. 20). (b) The redemption of man was not accomplished in an invisible manner. God renewed, through the Patriarchs and the Prophets, the promise of salvation made in the first man; existence of visible symbols were integral parts of the faith in the promised Redeemer: “all these things happened to them [the Israelites] in figure” (I Cor., xi. 11; Heb., x. 1). “So also, when we were children, were we served under the elements of the world. But when the fulness of the time was come, God sent forth his Son, made of a woman” (Gal., iv. 3, 4). The Incarnation took place because God dealt with men in the manner that was best suited to their nature. (c) The Church established by the Saviour was to be a visible organization (see Church: The Visibility of the Church); consequently it should have external ceremonies and symbols of things sacred. (d) The principal reason for a sacramental system is found in man. It is the nature of man, writes St. Thomas (III, Q. ix, a. 1), to be led by things corporeal and sense-perceptive to things spiritual and intelligible; now Divine Providence provides for everything in accordance with its nature (secundum modum suae conditionis); therefore it was fitting that Divine Wisdom should provide means of salvation for men in the form of certain corporeal and sensible signs which are called sacraments. (For other reasons see Catech. Conc. Trid., n. 14.)

(3) Existence of sacred symbols. — (a) No sacraments exist in state oflimbo. — According to St. Thomas (I, c. a. 2) and theologians generally there were no sacraments before Adam sinned, i.e., in the state of original justice. Man’s dignity was so great that he was raised above the natural condition of human nature. His mind was subject to God; his lower faculties were subject to the higher part of his mind; his body was subject to his soul; it would have been against the dignity of that state had he been dependent, for the acquisition of knowledge or of Divine grace, on anything beneath him, i.e. corporeal things. For this reason the majority of theologians hold that no sacraments would have been instituted even if that state had lasted for a long time. (b) Sacraments of the law of nature. — Apart from what was or might have been in that extraordinary state, the use of sacred symbols is universal. St. Augustine says that every religion, true or false, has its own peculiar visible signs of reverence (in religionis); and the Roman Church, under the name of Ecclesiastical Law, has made use of visible signs of reverence. The Moslem Law, as there are sacraments of greater dignity under the Law of Christ. Under the law of nature — so-called to exclude supernatural revelation
but because at that time there existed no written supernatural law—salvation was granted through faith in the promised Redeemer, and men expressed that faith by some external signs. What those signs should be God did not determine, leaving this to the people, most probably to the leaders or heads of the tribes, who were guided by the interior inspiration of the Holy Ghost. This is the conception of St. Thomas, who says that, as under the law of nature (when there was no written law), men were guided by interior inspiration in worshiping God, so also they determined what signs should be used. Men manifested their belief by the outward rite of sacrifice (III, Q. ix, a. 3, ad 3um). Afterwards, however, as it was necessary to give a written law: (a) because the law of nature had been obscured by sin, and (b) because it was time to give a more explicit knowledge of the grace of Christ, then also it became necessary to determine what external signs should be used as sacraments (ibid., and Q. lixi, a. 3, ad 2um). This was not necessary immediately after the Fall, by reason of the fullness of faith and knowledge imparted to Adam. But about the time of Abraham, when faith had been weakened, many had fallen into idolatry, and the light of reason had been obscured by a deluge of passions. Even unto the commission of sins against nature, God intervened and appointed as a sign of faith the rite of circumcision (Gen. xvi; St. Thomas, III, Q. lxx, a. 2, ad 1um; see CIRCUMCISION).

The vast majority of theologians teach that this ceremony was a sacrament and that it was instituted as a remedy for original sin; consequently it was conferred grace, not indeed of itself (ex opere operato), but by reason of the faith in Christ which it expressed. "In circumsicione conferetur gratia, non ex virtute circimsicionis, sed ex virtute fidei passionis Christi future, ejusdem signum erat circumsicionis—a signum sanctae legis New Law, in the Old Testament, may be defined as an external sign of something sacred. In the twelfth century Peter Lombard (d. 1184), known as the Master of the Sentences, author of the first manual of systematic theology, gave an accurate definition of a sacrament of the New Law: A sacrament is in such a manner an outward sign of inward grace that it bears its image (i.e. signifies or represents it) and is its cause—"Sacramentum proprium dictur quod signum est gratiae Dei, et invisibilis gratiae forma, ut ipsius imaginem geret et causam existat." (IV Sent., d. I, n. 2). This definition was adopted and perfected by the leading Scholastics. From St. Thomas we have the short but very expressive definition: The sign of a sacred thing in so far as it sanctifies men—"Signum sacri in quantum est sanctificans homines." (III, Q. ix, a. 2).

All the creatures of the universe proclaim something sacred, namely, the wisdom and the goodness of God, as they are sacred in themselves, not as they are sacred things sanctifying men, hence they cannot be called sacraments in the sense in which we speak of sacraments (ibid., ad 19a). The Council of Trent includes into the supernatural definitions in the following: "Symbolum rei sacre, et invisibilis gratiae forma visibilis, sanctificandii viri habens." A symbol of something sacred, a visible form of invisible grace, having the power of sanctifying (Sess. XIII, cap. 3). The Catechism of the Council of Trent gives the complete definition: Something perceivable by the senses which by Divine institution has the power both to signify and to effect sanctity and justice (II, n. 2). Catholic catechisms in English usually have the following: An outward sign of inward grace, a sacred and mystic symbol instituted in the Church by Christ, by which grace is conveyed to our souls. Anglican and Episcopal theologies and catechisms give definitions which Catholics could accept (see,
e. g. Mortimer, "Catholic Faith and Practice," New York, 1906, part I, p. 120).

In every sacrament three things are necessary: the outward sign to signify mysterious effects. Yet they are not altogether arbitrary, because in some cases, if not in all, the ceremonies performed have a quasi-natural connection with the effect to be produced. Thus, pouring water on the head of a child readily brings to mind the interior purification of the soul. The word "sacrament" (sacramentum), even as used by profane Latin writers, signified something sacred, viz., the oath by which soldiers were bound, or the money deposited by litigants in a contest. In the writings of the Fathers of the Church the word was used to signify something sacred and mysterious, and where the Latin used sacramentum the Greeks used teryia. The word and meaning of the thing signified is Divine grace, which is the formal cause of our justification (see GRACE), but with it we must associate the Passion of Christ (efficient and meritorious cause) and the end (final cause) of our sanctification, viz., eternal life. The significance of the outward sign is that we may believe the institution of Jesus Christ (Romans, II, 13). Thomas, III, Q. ix, a. 3) and the Roman Catechism (II, n. 13) extends to these three sacred things, of which one is past, one present, and one future. The three are aptly expressed in St. Thomas's beautiful antiphon on the Eucharist: "O sacrum convivium, in quo Christus sumitur, recolitur memoria passionis ejus, mens impletur gratia, et futura gloria nobis pignus datur—O sacred banquet, in which Christ is received, the memory of the passion is recalled, the soul is filled with grace, and a pledge of future life is given to us."

(2) Errors of Protestants.—Protestants generally hold that the sacraments are signs of something sacred (grace and faith), but deny that they really cause Divine grace. Episcopalians, however, and Anglicans, especially the Ritualists, hold with Catho-

lics that the sacraments are effectual signs of grace. Wherefore Wood says (his Works, in loco, sec. XVII) that "the words of institution we read: "Sacraments ordained of God be not only badges or tokens of Christian men's profession, but rather they be certain sure witnesses and effectual signs of grace and God's good will towards us by which He doth work invisibly in us, and doth not only quicken and regenerate us, but also confirm and edify us." (cf. art. XXVII.) The "Zwinglian theory," writes Morgan Dix (op. cit., p. 73), "that sacraments are nothing but memorials of Christ and badges of Christian profession, is one that can by no possible jugglery with the English tongue be reconciled with the formulas of our church." Mortimer adopts and explains the Catholic formula "ex operae operantis" (loc. cit., p. 122). Luther and his early followers rejected this conception of the sacraments. They do not cause grace, but are merely "signs and testimonies of God's good will towards us." (Augsburg Confessions;) they excite faith, and faith (fiduciary) causes justification. Calvinists and Presbyterians hold substantially the same doctrine. Zwingli lowered still further the dignity of the sacraments, making them signs not of God's fidelity but of our fidelity. By receiving the sacraments we manifest faith in Christ, and the grace of our profession and the pledges of our fidelity. Since we receive the sacraments, all these errors arise from Luther's newly-invented theory of righteousness, i. e. the doctrine of justification by faith alone (see GRACE). If man is to be sanctified not by an interior renovation through grace which will blot out his sins, but by an extrinsic imputation through the merits of Christ, which will cover his soul as a cloak, there is no place for signs that cause grace, and those used can have no other purpose than to excite faith in the Sacraments. Luther's convenient doctrine on justification was not adopted by all his followers and it is not baldly and boldly proclaimed by all Protestants to-day: nevertheless they accept its consequences affecting the true notion of the sacraments.

(3) Catholic Doctrine.—Against all innovators the Council of Trent declared: "If any one say that the sacraments of the New Law do not contain the grace which they signify, or that they do not confer grace on those who place no obstacle to the same, let him be anathema" (Sess. viii, can. vi). If any one should deny that grace is not conferred by the sacred liturgical opera operantis, but that faith in God's promises is alone sufficient for obtaining grace, let him be anathema" (ibid., can. viii; cf. can. iv, v, vii). The phrase "ex operae opera", for which there is no equivalent in English, probably was used for the first time by Peter of Poitiers (d. 1205), and afterwards by Innocent III (d. 1216; de myst. miss., III, v), and by St. Thomas (d. 1274; IV Sent., dist. I, Q. i, a. 5). It was happily invented to express a truth that had always been taught and had been introduced without objection. It is not an elegant formula but, as St. Augustine remarks (In Ps. cxxxviii): "It is better that grammarians should say a thing shorter than that which St. Thomas says:"Ex operae opera," i.e. by virtue of the action, means that the efficiency of the action of the sacraments does not depend on anything human, but solely on the will of God as expressed by Christ's institution and promise. "Ex operae operantis," i.e. by reason of the agent, would mean that the action of the sacraments depended on the worthiness of the minister or of the recipient (see Pourrat, "Theology of the Sacraments," tr., St. Louis, 1910, 162 sqq.). Protestants cannot in good faith object to the phrase as if it meant that the mere outward ceremony, apart from God's action, causes grace. It is well known that Catholics teach that the sacraments are only the instrumental, not the principal, causes of grace. Neither can it be claimed that the phrase adopted by the council does away with all dispositions necessary on the part of the recipient, the sacraments acting like infallible charms causing grace "ex operae operantis." Those who are not used to understand Christ's words as saying that the fathers of the council were careful to note that there must be no obstacle to grace on the part of the recipients, who must receive them, i.e. rightly and worthily; and they declare it a calumny to assert that they require no previous dispositions (Sess. XIV, de pecc. orig., cap. 4), and express their faith in the sacraments just as much as the Pope, the bishops, and the people, and compare the subject, but they are a condition (condicio sine qua non), not the causes, of the grace conferred. In this case the sacraments differ from the sacramentals, which may cause grace by virtue of the prayers of the Church or the good, pious sentiments of those who use them (see SACRAMENTAL).)

(4) Proofs of the Catholic Doctrine.—In examining proofs of the Catholic doctrine it must be borne in mind that our rule of faith is not simply Scripture, but Scripture and tradition. (a) In Sacred Scripture we find expressions which clearly indicate that the sacraments are more than mere signs of grace and faith: "Unless a man be born again of water and the Holy Ghost, he cannot enter into the kingdom of God" (John, iii, 5); "He saved us, by the laver of regeneration, and renovation of the Holy Ghost" (Tit., iii, 5); 'Then they laud their God, and sing the Holy Ghost" (Acts, viii, 17); "He that eateth my flesh, and drinketh my blood, hath everlasting life . . . For my flesh is meat indeed: and my blood is drink indeed" (John, vi, 55, 56). These and similar expressions (see articles on each sacrament) are, so to say, the least, very much exagger-
stated if they do not mean that the sacramental ceremony is in some sense the cause of the grace conferred. (b) Tradition virtually starts the search for a reason, for they have been interpreted in the Church. From the numerous expressions used by the Fathers we select the following: “The Holy Ghost comes down from heaven and hovers over the waters, sanctifying them in the Holy Spirit, and thus imbue the power of sanctifying” (Tertullian, De bapt., c. iv.). “Baptism is the expiation of sins, the remission of crimes, the cause of renovation and regeneration” (St. Gregory of Nyssa, “Orat. in Bapt.”). “Explain to me the manner of nativity in the flesh and I will explain to you the regeneration of the soul . . . Throughout, by word and in the manner of actions, reasonable or unreasonable, no art can explain it” (ibid.). “He that passes through the fountain [baptism] shall not die but rises to new life” (St. Ambrose, De sacr., I, iv.) “Whence this great power of water,” exclaims St. Augustine, “that it touches the body and cleanses the soul?” (Tr. 80 in Joanne). “Baptism” writes the same Father, “consists not in the merits of those by whom it is administered, nor of those to whom it is administered, but in its own sanctity and truth, on account of Him who instituted it” (Cont. Cres., IV). The doctrine solemnly defined by the Council of Trent had been enunciated in the ancient councils, notably at Constantinople (381; Symb. Fid.), at Mileve (416; can. ii) in the Second Council of Orange (529; can. xv); and in the Council of Florence (1439; Decr. pro Armen., see Denzinger-Bannwart, nn. 86, 102, 200, 685). The early Anglican Church held fast to the true doctrine: “Baptism is not only a sign of profession and a mark of difference, whereby christened men are discerned from those that be not christened, but is also a sign of regeneration or New-Birth, whereby as by an instrument they that receive Baptism rightly are grafted into the church” (Art. XXIV). (c) Theological Argument.—The Westminster Confession adds: “The Baptism of children is in any wise to be retained in the church as most agreeable with the institution of Christ.” If baptism does not confer grace ex opere operato, but simply excites faith, then we may ask: (1) Of what use would this be if the language used by the Scriptures be understood by the recipient, i.e., an infant or an adult that does not understand Latin? In such cases it might be more beneficial to the bystanders than to the one baptized. (2) In what does the baptism of Christ surpass the baptism of John, for the latter could excite faith? Why were those baptized by the disciples not determined as the disciples were by the baptism of Christ? (Acts, xix). (3) How can it be said that baptism is strictly necessary for salvation; since faith can be excited and expressed in many other ways? Finally Episcopalian and Anglicans of today would not revert to the doctrine of grace ex opere operato, unless they were convinced that the ancient faith was warranted by Scripture and Tradition. (5) Matter and Form of the Sacraments.—Scholastic writers of the thirteenth century introduced into their explanations of the sacraments terms which were derived from the philosophy of Aristotle. William of Auverre (d. 1223) was the first to apply to them the words matter (materiæ) and form (forma). As in physical bodies, so also in the sacramental rite we find two elements, one undetermined, which is called the matter, the other determining, called the form. For instance, water may be used for drinking, or for cooling or cleansing the body, but the words pronounced by the priest are conditioned by the intention of the child, with the intention of doing what the Church does, determines the meaning of the act, so that it signifies the purification of the soul by grace. The matter and form (the res et serba) make up the external rite, which has its special significance and efficacy from the institution of Christ. The words are the more important element in the composition, because men express their thoughts and intentions principally by words. “Verba inter homines omnium principalis significat” (St. Augustine, “De doctr. christ.”, II, iii; St. Thomas, III, Q. ix, a. 6). It must not be supposed that the things used for the acts performed, for they are included in the res, remarks St. Thomas (loc. cit., ad 2am) have no significance. Though they too may be “sacramentum signum et sacramentum substantia” (with oil relates to health; but their significance is clearly determined by the words. “In all the compounds of matter and form the determining element is the form” (St. Thomas, loc. cit., a. 7). The terminology was somewhat new, the doctrine was old: the same thought expressed in different times in different words. Sometimes the form of the sacrament meant the whole external rite (St. Augustine, “De pesc. et mer.”, xxxiv; Conc. Nîlev., De bapt.). What we call the matter and form were referred to as “mystic symbolism” “the sign and the thing invisible” “the word and the element” (St. Augustine, tr. 80 in Joanne). The new terminology immediately found favour. It was solemnly ratified by being used in the Decree for the Armenians, which was added to the Decrees of the Council of Florence, yet has not the value of a conciliar definition (see Denzinger-Bannwart, 685; Hurter, “Theol. dog. comp.”, 1541; Prouvat, op. cit., 441). The rite used the words matter and form (Sess. XIV, cap. ii, can. iv), but did not define that the sacramental rite was composed of these two elements. Leo XIII, in the “Apostolicæ Curae” (13 Sept., 1896) made the Scholastic theory the basis of his declaration, and pronounced ordination performed according to the ancient Anglican rite invalid, owing to a defect in the form used and a lack of the necessary intention on the part of the ministers. The hylomorphic theory furnishes a very apt comparison and sheds much light on our conception of the external ceremony. Nevertheless our knowledge of the sacraments is still dependent on this Scholastic terminology, and the comparison must not be carried too far. The attempt to verify the comparison (of sacraments to a body) in all details of the sacramental rite will lead to confusing subtleties or to singular opinions, e.g., Melchior Canons’s (De locis theol., VIII, 3) opinion as to the minister of matrimony (see Marriage; cf. Prouvat, op. cit., ii). III. ORIGIN (CAUSE) OF THE SACRAMENTS.—It might now be asked: in what far was it necessary that the matter and form of the sacraments should have been determined and fixed? The Council of Trent defined that the seven sacraments of the New Law were instituted by Christ (Sess. VII, can. i). This settles the question of fact for all Catholics. Reason tells us that all sacraments must come originally from God. Since they are the signs of sacred things in so far as by these sacred things men are sanctified (St. Thomas, III, Q. ix, a. 2 c. et ad i); since the external rite (matter and form) of itself cannot give grace, it is evident that all sacraments properly so called must originate in Divine appointment. “Since the sanctification of man is in the power of God who sanctifies,” writes St. Thomas (loc. cit., a. 5), “it is not in the competency of man to choose the things by which he is to be sanctified, but this must be determined by Divine institution”. Add to this that grace is, in some sense, a participation of the Divine nature (see Grace) and our doctrine becomes unassailable: God alone can determine that by external ceremonies men shall be partakers of His nature. (2) Power of Christ.—God alone is the principal cause of the sacraments. He alone authoritatively and by innate power can give to external material rites the power to confer grace on men. Christ as God, equally with the Father, possessed this principal,
authoritative, innate power. As man He had another power which St. Thomas calls "the power of the principal ministry" or "the power of excellence" (III, Q. xiv, a. 5): "Christ produced the interior effects of the sacraments and the Church by His power and by the power of them. . . ." The passion of Christ is the cause of our justification meritoriously and effectively, not as the principal agent and authoritatively, but as an instrument, inasmuch as His Humanity was the instrument of His Divinity" (ibid.; cf. III, Q. xiii, aa. 1, 3). The passive obedience of Christ is the principle of the old maxim: "From the side of Christ dying on the cross flowed the sacraments by which the Church was saved" (Gloss. Ord. in Rom. 5; St. Thomas, III, Q. xiii, a. 5). The principal efficient cause of grace is God, to Whom the Humanity of Christ is as a conjoined inextricable, the sacraments of being. Nothing not joined to the Divinity (by hypostatic union): therefore the saving power of the sacraments passes from the Divinity of Christ, through His Humanity into the sacraments (St. Thomas, loc. cit.). One who weighs well all these words will understand why Catholics have great reverence for the sacraments (a. 4). But the sacraments have the efficacy from His merits and sufferings; (2) they are sanctified and they sanctify in His name; (3) He could and He did institute the sacraments; (4) He could produce the effects of the sacraments without the external ceremony (St. Thomas, Q. xiv, a. 5). The power of Christ could not institute the power of excellence to men: this was not absolutely impossible (ibid., a. 4). But, (1) had He done so men could not have possessed it with the same perfection as Christ: "He would have remained the head of the Church principally, others secondarily" (ibid., ad 5), (2) Christ did not do so because He foresaw this for the good of the faithful: (a) that they might place their hope in God and not in men; (b) that there might not be different sacraments, giving rise to divisions in the Church (ibid., ad 1). This second reason is mentioned by St. Paul (I Cor., 12, 13): "every one of you saith: I indeed am of Paul; and I am of Apollo; and I of Cephas; and I of Christ. Is Christ divided? Was Paul then crucified for you? Or were you baptized in the name of Paul?"

(3) Immediate or Mediatic Institution.—The Council of Trent did not define explicitly and formally that all the sacraments were instituted immediately by Christ. Before the council great theologians, e.g. Peter Lombard (IV Sent., d. xxiii), Hugh of St. Victor (De sac., II, ii), Alexander of Hales (Summa, IV, Q. xxiv, l) held that some sacraments were instituted by the Apostles, the latter being given by Christ. Doubts were raised especially about confirmation and extreme unction. St. Thomas rejects the opinion that confirmation was instituted by the Apostles. It was instituted by Christ, he holds, when he promised to send the Paraclete, although it was not administered whilst He was on earth. Concerning the fuller of the Holy Ghost was not to be given until after the Ascension: "Christus institut hoc sacramentum, non exhibendo, sed promittendo" (III, Q. xiii, a. 1, ad 1um). The Council of Trent defined that the sacrament of Extreme Uction was instituted by Christ and promulgated by St. James (Sess. XIV, can. i). Some theologians, e.g. Benedict Bellarmine, Vasques, Gonet, etc. thought the words of the council (Sess. VII, can. i) were explicit enough to make the immediate institution of all the sacraments by Christ a matter of defined faith. They are opposed by Soto (a theologian of the council), Estius, Giordani, Berti, and a host of others to that now nearly all theologians unite in saying: it is theologically certain, but not defined (de fide) that Christ immediately instituted all the sacraments of the New Law. In the Decree "Lamentabili", 3 July, 1907, Pius X condemned twelve propositions of the Modernists, who would attribute the origin of the sacraments to some species of evolution or development. The first sweeping proposition is this: "The sacraments had their origin in the things personified and moved by circumstances and events, interpreted some idea and intention of Christ" (Denzinger-Bannwart, 1940). Then follow eleven propositions relating to each of the sacraments in order (ibid., 2041–51). These propositions deny that Christ immediately instituted the sacraments, and some went to deny even their mediate institution by the Saviour.

(4) What does Immediate Institution Imply? Power of the Church.—Granting that Christ immediately instituted all the sacraments, it does not necessarily follow that personally He determined all the details of the sacred ceremony, prescribing minutely every iota relating to the matter and the form to be used. It is sufficient (even for immediate institution) to say: Christ determined what special graces were to be conferred by means of external rites: for some sacraments (e.g. baptism, the Eucharist) He determined directly in the matter and form: for others He determined only in a general manner (here) that there should be an external ceremony, by which special graces were to be conferred, leaving to the Apostles or to the Church the power to determine whatever He had not determined, e.g. to prescribe the matter and form of the Sacraments of Confirmation, Matrimony, and Holy Orders. St. Ignatius (Spirituali, XXXI, cap. ii) declared that the Church had not the power to change the "substance" of the sacraments. She would not be claiming power to alter the substance of the sacraments if she used her Divinely given authority to determine more precisely the matter and form in so far as they had not been determined by Christ. This theory (which is not modern) had been adopted by theologians: by it we can solve historical difficulties relating, principally, to confirmation and Holy orders.

(5) May we then say that Christ instituted some sacraments in an implicit state? That Christ was satisfied to lay down the essential principles from which, after a more or less protracted development, would come forth the fully developed sacraments? This is an application of Newman's theory of development, according to Pourrat (op. cit., p. 300), who proposes two other forms of sacraments, the sacraments of Christ instituted immediately, but did not himself give them all to the Church fully constituted; or Jesus instituted immediately and explicitly baptism and Holy Eucharist: He instituted immediately but implicitly the five other sacraments (loc. cit., p. 301). Pourrat himself, however, maintains the latter position. The Council of Trent probably will consider it rather dangerous, and at least "male hominum". If it be taken to mean more than the old expression, Christ determined in genere only the matter and the form of some sacraments, it grants too much to development. If it means nothing more than the expression hitherto in use, which is gained by admitting a formula which exactly might be misunderstood?

IV. NUMBER OF THE SACRAMENTS. (1) Catholic Doctrine: Eastern and Western Churches.—The Council of Trent solemnly defined that there are seven sacraments of the New Law: truly and properly so called, viz., baptism, confirmation, Holy Eucharist, penance, extreme unction, orders, and matrimony. The same enumeration had been made in the Decree for the Armenians by the Council of Florence (1439), in the Profession of Faith of Michael Paleologus, offered to Gregory X in the Council of Lyons (1274), and under Otto, legate of the Holy See. According to some writers Otto of Bamberg (1139), the Apostle of Pome- rania, was the first who clearly adopted the number seven (see Tanquerey, "De sacr."). Most probably
this honour belongs to Peter Lombard (d. 1184) who in his fourth Book of Sentences (d. i, n. 2) defines a sacrament as a sacred sign which not only signifies but also causes grace, and then (d. ii, n. 1) enumerates the seven sacraments. It is worthy of Crato to note, although the great Scholastics rejected many of his theological opinions (list given in app. to Migne ed. Paris, 1841), this definition and enumeration were at once universally accepted, proof positive that he did not introduce a new doctrine, but merely expressed in a convenient and precise formula what had always been in the Church. Just as many doctrines were believed, but not always accurately expressed, until the condemnation of heresies or the development of religious knowledge called forth a neat and precise formula, so also the sacraments were accepted and used by the Church for centuries before Aristotlean philosophy, applied to the systematic explanation of Christian doctrine, furnished the accurate definition and enumeration of Peter Lombard: The earlier Christians were more concerned with the use of sacred rites than with scientific formula, being like the pious author of the "Imitation of Christ", who conceived he rather feel communion than know its definition" (I, i).

Thus time was required, not for the development of the sacraments—except in so far as the Church may have determined what was left under her control by Jesus Christ—but for the growth of knowledge of the sacraments. For many centuries all signs of sacred things were called sacraments, and the enumeration of these signs was somewhat arbitrary. Our seven sacraments were all mentioned in the Sacred Scriptures, and we find all of them mentioned here and there by the Fathers (see TSXOLOGY; and articles on each sacrament). After the ninth century, writers began to draw a distinction between sacraments in a general sense and sacraments properly so called. The ill-fated Abelard ("Intro. ad Theol.", I, i, and in the "Sic et Non") and Hugh of St. Victor (De sacr., I, part 9, chap. viii; cf. Pourrat, op. cit., pp. 94, 35) prepared the way for Peter Lombard, who proposed the precise formula which the Church accepted. Thereupon until the time of the so-called Reformation the Eastern Church joined with the Latin Church in saying: by sacraments proper we understand efficacious sacred signs, i. e. ceremonies which by Divine ordinance signify, contain and efficaciously work what they signify; and they claim that the history of councils and councils held to effect the reunion of the Greek with the Latin Church, we find no record of objections made to the doctrine of seven sacraments. On the contrary, about 1576, when the Reformers of Wittenberg, anxious to draw the Eastern churches into their errors, sent a Greek translation of the Augsburg Confession to Jerusalem, Patriarch of Constantinople, he replied: "The mysteries received in this same Catholic Church of orthodox Christians, and the sacred ceremonies, are seven in number—just seven and no more" (Pourrat, op. cit., p. 285). On the same subject is clearly shown by Arendius, "De con. eccl. occident. et orient. in sept. sacr. administr." (1619); Goar (q. v.) in his "Euchologion" by Martine (q. v.) in his work "De antiquis ecclesie ritibus", by Renaudot in his Perpétus de la ffor sacraments" (1711), and this agreement of the thirteenth by force alone, leaves to (Eastrians) with a strong argument in support of their appeal for the acceptance of seven sacraments (cf. Tanquerey, "De sacr.", i, 24; Pourrat, op. cit., pp. 84, 85).

(2) Protestant Errors.—Luther's capital errors, viz. private interpretation of the Scriptures, and justification by faith alone, together with the Catholic doctrine on the sacraments (see Luther, Grace). Gladly would he have swept them all away, but the words of Scripture were too convincing and the Augsburg Confession retained three as "having the command of God and the promise of the grace of the New Testament". These three, baptism, the Lord's Supper, and penance were admitted by Luther also by Cranmer in his "Catechism" (see Dix, op. cit., p. 79). Henry VIII protested against Luther's innovations and received the title "Defender of the Faith" as a reward for publishing the "Assertio septem sacramentorum" (recently re-edited by Rev. Louis O'Donovan, New York, 1908). Followers of Luther's principles suspected their leader in opposition to the sacraments. One was that they were merely "signs and testimonies of God's good will towards us", the reason for great reverence was gone. Some rejected all sacraments, since God's good will could be manifested without these external signs. Consecration (penance) was soon dropped from the list of those retained. The Anabaptists rejected infant baptism, since the ceremony could not excite faith in children. Protestants generally retained two sacraments, baptism and the Lord's Supper, the latter being reduced by the denial of the Real Presence to a mere commemorative service. After the first fervour of the Reformation there was a reaction, and Cranmer retained three sacraments, yet we find in the Westminster Confession: "There are two Sacraments ordained of Christ Our Lord in the Gospel, that is to say, Baptism, and the Supper of the Lord. These two Sacraments are commonly called the chief Sacraments, that is to say, Confirmation, Penance, Orders, Matrimony, and Extreme Unction, are not to be counted for sacraments of the Gospel, being such as have grown partly of the corrupt following of the Apostles, partly are states of life allowed in the Scriptures but yet have not like nature of sacraments with Baptism and the Lord's Supper, for that they have not any visible sign or ceremony ordained of God" (art. XXV). The Wittenberg theologians, by way of compromise, had a willingness to make such a distinction, in a second letter to the Patriarch of Constantinople, but the Greeks would have no compromise (Pourrat, loc. cit., 250).
